UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT  
OF 1934

For the quarterly period ended September 30, 2014

Commission File Number: 001-33912

Enterprise Bancorp, Inc.

(Exact name of registrant as specified in its charter)

Massachusetts

(State or other jurisdiction of  
incorporation or organization)

04-3308902

(I.R.S. Employer Identification No.)

222 Merrimack Street, Lowell, Massachusetts

(Address of principal executive offices)

(978) 459-9000

(Registrant's telephone number, including area code)

01852

(Zip code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.  Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files)  Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition for "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  Yes  No

As of November 3, 2014, there were 10,164,892 shares of the issuer's common stock outstanding- Par Value \$0.01 per share

ENTERPRISE BANCORP, INC.

Notes to the Unaudited Consolidated Interim Financial Statements

(1) Summary of Significant Accounting Policies

(a) Organization of Holding Company and Basis of Presentation

The accompanying unaudited consolidated interim financial statements and these notes should be read in conjunction with the December 31, 2013 audited consolidated financial statements and notes thereto contained in the 2013 Annual Report on Form 10-K of Enterprise Bancorp, Inc. (the “Company” or “Enterprise”), a Massachusetts corporation, as filed with the Securities and Exchange Commission (the “SEC”) on March 14, 2014. The Company has not changed its reporting policies from those disclosed in its 2013 Annual Report on Form 10-K.

The Company's unaudited consolidated interim financial statements include the accounts of the Company and its wholly owned subsidiary, Enterprise Bank and Trust Company (the “Bank”). The Bank is a Massachusetts trust company organized in 1989. Substantially all of the Company's operations are conducted through the Bank.

The Bank's subsidiaries include Enterprise Insurance Services, LLC and Enterprise Investment Services, LLC, organized under the laws of the State of Delaware for the purposes of engaging in insurance sales activities and offering non-deposit investment products and services, respectively. In addition, the Bank has the following subsidiaries that are incorporated in the Commonwealth of Massachusetts and classified as security corporations in accordance with applicable Massachusetts General Laws: Enterprise Security Corporation; Enterprise Security Corporation II; and Enterprise Security Corporation III, which hold various types of qualifying securities. The security corporations are limited to conducting securities investment activities that the Bank itself would be allowed to conduct under applicable laws.

The Company has 22 full service branches serving the Merrimack Valley and North Central regions of Massachusetts and Southern New Hampshire. Through the Bank and its subsidiaries, the Company offers a range of commercial and consumer loan products, deposit and cash management products, investment advisory and wealth management, trust and insurance services. The services offered through the Bank and its subsidiaries are managed as one strategic unit and represent the Company's only reportable operating segment.

Pursuant to the Accounting Standards Codification (“ASC”) Topic 810 “Consolidation of Variable Interest Entities,” issued by the Financial Accounting Standards Board (“FASB”), the Company carries Junior Subordinated Debentures as a liability on its consolidated interim financial statements, along with the related interest expense. The debentures were issued by a statutory business trust (the “Trust”) created by the Company in March 2000 under the laws of the State of Delaware, and the trust preferred securities issued by the Trust, and the related non-interest expense, are excluded from the Company's consolidated interim financial statements.

The Federal Deposit Insurance Corporation (the “FDIC”) and the Massachusetts Division of Banks (the “Division”) have regulatory authority over the Bank. The Bank is also subject to certain regulatory requirements of the Board of Governors of the Federal Reserve System (the “Federal Reserve Board”) and, with respect to its New Hampshire branch operations, the New Hampshire Banking Department. The business and operations of the Company are subject to the regulatory oversight of the Federal Reserve Board. The Division also retains supervisory jurisdiction over the Company.

The accompanying unaudited consolidated interim financial statements have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and the instructions for Form 10-Q through the rules and interpretive releases of the SEC under federal securities law. In the

opinion of management, the accompanying unaudited consolidated interim financial statements reflect all necessary adjustments consisting of normal recurring accruals for a fair presentation. All significant intercompany balances and transactions have been eliminated in the accompanying unaudited consolidated interim financial statements. Interim results are not necessarily indicative of results to be expected for the entire year.

ENTERPRISE BANCORP, INC.  
Notes to the Unaudited Consolidated Interim  
Financial Statements

Table of Contents

(b) Critical Accounting Estimates

In preparing the unaudited consolidated interim financial statements in conformity with GAAP, management is required to exercise judgment in determining many of the methodologies, assumptions and estimates to be utilized. These estimates and assumptions affect the reported values of assets and liabilities as of the balance sheet date and income and expenses for the period then ended. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates should the assumptions and estimates used change over time due to changes in circumstances. Changes in those estimates resulting from continuing change in the economic environment and other factors will be reflected in the financial statements and results of operations in future periods.

As discussed in the Company's 2013 Annual Report on Form 10-K, the three most significant areas in which management applies critical assumptions and estimates that are particularly susceptible to change relate to the determination of the allowance for loan losses, impairment review of investment securities and the impairment review of goodwill. Refer to Note 1, "Summary of Significant Accounting Policies," to the Company's consolidated financial statements included in the Company's 2013 Annual Report on Form 10-K for significant accounting policies. The Company has not changed its significant accounting policies from those disclosed in its 2013 Annual Report filed on Form 10-K.

(c) Reporting Comprehensive Income

Comprehensive income is defined as all changes to equity except investments by and distributions to stockholders. Net income is one component of comprehensive income, with other components referred to in the aggregate as other comprehensive income. The Company's only other comprehensive income component is the net unrealized holding gains or losses on investments available-for-sale, net of deferred income taxes. Pursuant to Accounting Standards Update ("ASU") No. 2013-02, Comprehensive Income (Topic 220): Reporting Amounts Reclassified Out of Accumulated Other Comprehensive Income, the Company initially excludes these unrealized holding gains and losses from net income; however, they are later reported as reclassifications out of accumulated other comprehensive income into net income when the securities are sold. When securities are sold, the reclassification of realized gains and losses on available-for-sale securities are included on the Consolidated Statements of Income under the "non-interest income" subheading on the line item "net gains on sales of investment securities" and the related income tax expense is included in the line item "provision for income taxes," both of which are also detailed on the Consolidated Statements of Comprehensive Income under the subheading "reclassification adjustment for net gains included in net income."

(d) Restricted Investments

As a member of the Federal Home Loan Bank of Boston ("FHLB"), the Company is required to purchase certain levels of FHLB capital stock in association with the Company's borrowing relationship from the FHLB. This stock is classified as a restricted investment and carried at cost, which management believes approximates fair value. FHLB stock represents the only restricted investment held by the Company.

In conjunction with the other-than-temporary-impairment ("OTTI") review on available-for-sale investments (See Note 2, "Investments," for additional information), management also regularly reviews its holdings of FHLB stock for OTTI. Based on management's ongoing review, the Company has not recorded any OTTI charges on this investment to date. If it was determined that a write-down of FHLB stock was required, impairment would be recognized through

a charge to earnings.

(e) Income Taxes

The Company uses the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax attributable to differences between the financial statement carrying amounts and the tax basis of assets and liabilities. The deferred tax assets and liabilities are reflected at currently enacted income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities will be adjusted accordingly through the provision for income taxes.

The Company's policy is to classify interest resulting from underpayment of income taxes as income tax expense in the first period the interest would begin accruing according to the provisions of the relevant tax law. The Company classifies penalties resulting from underpayment of income taxes as income tax expense in the period for which the Company claims or expects to claim an uncertain tax position or in the period in which the Company's judgment changes regarding an uncertain tax position.

ENTERPRISE BANCORP, INC.  
Notes to the Unaudited Consolidated Interim  
Financial Statements

Table of Contents

The income tax provisions will differ from the expense that would result from applying the federal statutory rate to income before taxes, primarily due to the impact of tax exempt interest from certain investment securities, loans and bank owned life insurance.

The Company did not have any unrecognized tax benefits accrued as income tax liabilities or receivables or as deferred tax items at September 30, 2014. The Company is subject to U.S. federal and state income tax examinations by taxing authorities for the 2011 through 2013 tax years.

(f) Recent Accounting Pronouncements

In January 2014, FASB issued ASU No. 2014-04, Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40) - Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure. The amendments are intended to reduce diversity of practice by clarifying when a creditor should be considered to have received physical possession of residential real estate property collateralizing a residential mortgage loan, such that the loan should be removed, and the real estate property recognized, on the financial statements. Additionally, the amendments require interim and annual disclosure of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in collateralized residential mortgage loans that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The amendments in this ASU are effective for public business entities for annual periods and interim reporting periods beginning after December 15, 2014. As this ASU primarily offers clarification of existing standards and added disclosures, the adoption of this ASU in the first quarter of 2015 is not expected to have a material impact on the Company's financial statements, or results of operations.

In January 2014, the FASB issued ASU No. 2014-01, Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects. The amendments in this ASU apply to all reporting entities that invest in qualified affordable housing projects through limited liability entities that are flow through entities for tax purposes. The amendments in this ASU eliminate the effective yield election and permit reporting entities to make an accounting policy election to account for such investments using the proportional amortization method if certain conditions are met. Those not electing the proportional amortization method would account for the investment using the equity method or cost method. The decision to apply the proportional amortization method of accounting is an accounting policy decision that must be applied consistently to all qualifying affordable housing project investments rather than a decision to be applied to individual investments. The amendments in this ASU are to be applied retrospectively to all periods presented. The amendments in this ASU are effective for public business entities for annual periods and interim reporting periods beginning after December 15, 2014. Early adoption is permitted. The adoption by the Company of this ASU, on the effective date, is not expected to have a material impact on the Company's financial statements, or results of operations.

These categories may include investments issued or guaranteed by government sponsored enterprises such as Fannie Mae (FNMA), Freddie Mac (FHLMC), Ginnie Mae (GNMA), Federal Farm Credit Bank, or one of several <sup>(1)</sup> Federal Home Loan Banks. All agency MBS/Collateralized Mortgage Obligations ("CMOs") investments owned by the Company are backed by residential mortgages.

Included in the carrying amount of the federal agency MBS category were CMOs totaling \$14.3 million and \$17.4 million at September 30, 2014 and December 31, 2013, respectively.

At September 30, 2014, the equity portfolio consisted primarily of investments in a diversified group of mutual funds, with a small portion of the portfolio (approximately 16%) invested in individual common stock of entities in the financial services industry.

Net unrealized appreciation and depreciation on investments available for sale, net of applicable income taxes, are reflected as a component of accumulated other comprehensive income.

The net unrealized gain or loss in the Company's fixed income portfolio fluctuates as market interest rates rise and fall. Due to the fixed rate nature of this portfolio, as market rates fall the value of the portfolio rises, and as market rates rise, the value of the portfolio declines. The unrealized gains or losses on fixed income investments will also decline as the securities approach maturity, or if the issuer is credit impaired. Unrealized gains or losses will be recognized in the statements of income if the securities are sold. However, if an unrealized loss on a fixed income investment is deemed to be other than temporary, the credit loss portion is charged to earnings and the noncredit portion is recognized in accumulated other comprehensive income.

ENTERPRISE BANCORP, INC.  
Notes to the Unaudited Consolidated Interim  
Financial Statements

Table of Contents

The net unrealized gain or loss on equity securities will fluctuate based on changes in the market value of the mutual funds and individual securities held in the portfolio. Unrealized gains or losses will be recognized in the statements of income if the securities are sold. However, if an unrealized loss on an equity security is deemed to be other than temporary prior to a sale, the loss is charged to earnings.

Management regularly reviews the portfolio for securities with unrealized losses that are other-than-temporarily impaired. During the nine months ended September 30, 2014 and 2013, the Company did not record any fair value impairment charges on its investments. As of September 30, 2014, there were a total of 55 investments (fixed income and equity), with a fair market value of \$78.0 million, in an unrealized loss position totaling \$1.2 million, including unrealized losses of \$950 thousand that have been temporarily impaired for 12 months or longer. Management attributes these unrealized losses to increases in current market yields compared to the yields at the time the investments were purchased by the Company. Management does not consider these investments to be other-than-temporarily impaired at September 30, 2014, because (1) the decline in market value is not attributable to credit quality for fixed income securities or a fundamental deterioration in the equity fund or issuers, and (2) the Company does not intend to, and it is more likely than not that it will not be required to, sell those investments prior to a market price recovery or maturity.

In assessing the Company's federal agency MBS investments and federal agency obligations, the contractual cash flows of these investments are guaranteed by an agency of the U.S. Government, and the agency that issued these securities is sponsored by the U.S. Government. Accordingly, it is expected that the securities would not be settled at a price less than the par value of the Company's investments. Management's assessment of other fixed income investments within the portfolio includes reviews of market pricing, ongoing credit quality evaluations, assessment of the investment's materiality, and duration of the unrealized loss position. In addition, the Company utilizes an outside registered investment adviser to manage the corporate and municipal bond portfolios, within prescribed guidelines set by management. At September 30, 2014, the Company's corporate and municipal bond portfolios did not contain any securities below investment grade, as reported by major credit rating agencies. For equities and funds, management's assessment includes the severity of the declines, whether it is unlikely that the security or fund will completely recover its unrealized loss within a reasonable time period and if the equity security or fund exhibits fundamental deterioration.

The contractual maturity distribution at September 30, 2014 of total fixed income investments is as follows:

	Within One Year		After One, But Within Five Years		After Five, But Within Ten Years		After Ten Years			
	Amortized Cost	Yields	Amortized Cost	Yields	Amortized Cost	Yields	Amortized Cost	Yields		
At amortized cost:										
Federal agency obligations	\$5,003	0.59 %	\$28,011	1.37 %	\$21,443	1.95 %	\$—	—	%	
MBS	4	1.29 %	2,423	2.49 %	5,896	2.98 %	83,552	2.16	%	
Municipal securities	4,670	2.05 %	24,538	3.30 %	26,664	4.24 %	10,672	4.73	%	
Corporate bonds	100	1.26 %	4,287	1.60 %	2,654	3.02 %	—	—	%	
Total fixed income securities	\$9,777	1.29 %	\$59,259	2.23 %	\$56,657	3.18 %	\$94,224	2.45	%	
At fair value:										
	\$9,811		\$60,186		\$57,654		\$93,997			

Total fixed income  
securities

Scheduled contractual maturities shown above may not reflect the actual maturities of the investments. The actual MBS/CMO cash flows likely will be faster than presented above due to prepayments and amortization. Similarly, included in the carrying value of fixed income investments above are callable securities, comprised of municipal securities, federal agency obligations and corporate bonds totaling \$36.1 million, which can be redeemed by the issuer prior to the maturity presented above. Management considers these early payment factors when evaluating the interest rate risk in the Company's asset-liability management program.

From time to time, the Company may pledge securities as collateral against deposit account balances of municipal deposit customers, and for borrowing capacity with the FHLB and the Federal Reserve Bank of Boston (the "FRB"). The fair value of securities pledged as collateral for these purposes was \$221.6 million at September 30, 2014.

See Note 8, "Fair Value Measurements" below for further information regarding the Company's fair value measurements for available-for-sale securities.

**(3) Loans**

The Company specializes in lending to business entities, non-profit organizations, professionals and individuals. The Company's primary lending focus is on the development of high quality commercial relationships achieved through active business development efforts, long-term relationships with established commercial developers, strong community involvement and focused marketing strategies. Loans made to businesses include commercial mortgage loans, construction and land development loans, secured and unsecured commercial loans and lines of credit, and standby letters of credit. The Company also originates equipment lease financing for businesses. Loans made to individuals include conventional residential mortgage loans, home equity loans and lines, residential construction loans on primary and secondary residences, and secured and unsecured personal loans and lines of credit. The Company manages its loan portfolio to avoid concentration by industry and loan size to lessen its credit risk exposure.

See Note 4, "Allowance for Loan Losses," for information on the Company's credit risk management, non-accrual, impaired and troubled debt restructured loans and the allowance for loan losses.

Major classifications of loans at the periods indicated are as follows:

(Dollars in thousands)	September 30, 2014	December 31, 2013
Commercial real estate	\$843,648	\$820,299
Commercial and industrial	396,990	357,056
Commercial construction	142,352	132,507
Total commercial loans	1,382,990	1,309,862
Residential mortgages	143,825	132,721
Home equity loans and lines	77,983	74,354
Consumer	9,654	8,643
Total retail loans	231,462	215,718
Gross loans	1,614,452	1,525,580
Deferred loan origination fees, net	(1,678	) (1,524
Total loans	1,612,774	1,524,056
Allowance for loan losses	(27,029	) (26,967
Net loans	\$1,585,745	\$1,497,089

**Loan Categories****- Commercial loans:**

Commercial real estate loans include loans secured by both owner-use and non-owner occupied real estate. These loans are typically secured by a variety of commercial and industrial property types including one-to-four and multi-family apartment buildings, office or mixed-use facilities, strip shopping centers, or other commercial property

and are generally guaranteed by the principals of the borrower. Commercial real estate loans generally have repayment periods of approximately fifteen to twenty-five years. Variable interest rate loans have a variety of adjustment terms and indices, and are generally fixed for an initial period before periodic rate adjustments begin.

Commercial and industrial loans include seasonal revolving lines of credit, working capital loans, equipment financing (including equipment leases), and term loans. Also included in commercial and industrial loans are loans partially guaranteed by the U.S. Small Business Administration ("SBA"), loans under various programs issued in conjunction with the

ENTERPRISE BANCORP, INC.  
Notes to the Unaudited Consolidated Interim  
Financial Statements

Table of Contents

Massachusetts Development Finance Agency and other agencies. Commercial and industrial credits may be unsecured loans and lines to financially strong borrowers, secured in whole or in part by real estate unrelated to the principal purpose of the loan or secured by inventories, equipment, or receivables, and are generally guaranteed by the principals of the borrower. Variable rate loans and lines in this portfolio have interest rates that are periodically adjusted, with loans generally having fixed initial periods. Commercial and industrial loans have average repayment periods of one to seven years.

Commercial construction loans include the development of residential housing and condominium projects, the development of commercial and industrial use property, and loans for the purchase and improvement of raw land. These loans are secured in whole or in part by the underlying real estate collateral and are generally guaranteed by the principals of the borrowers. Construction lenders work to cultivate long-term relationships with established developers. The Company limits the amount of financing provided to any single developer for the construction of properties built on a speculative basis. Funds for construction projects are disbursed as pre-specified stages of construction are completed. Regular site inspections are performed, either by experienced construction lenders on staff or by independent outside inspection companies, at each construction phase, prior to advancing additional funds. Commercial construction loans generally are variable rate loans and lines with interest rates that are periodically adjusted and generally have terms of one to three years.

From time to time, the Company participates with other banks in the financing of certain commercial projects. In some cases, the Company may act as the lead lender, originating and servicing the loans, but participating out a portion of the funding to other banks. In other cases, the Company may participate in loans originated by other institutions. In each case, the participating bank funds a percentage of the loan commitment and takes on the related risk. In each case in which the Company participates in a loan, the rights and obligations of each participating bank are divided proportionately among the participating banks in an amount equal to their share of ownership and with equal priority among all banks. The balances participated out to other institutions are not carried as assets on the Company's financial statements. Loans originated by other banks in which the Company is the participating institution are carried in the loan portfolio at the Company's pro rata share of ownership. The Company performs an independent credit analysis of each commitment and a review of the participating institution prior to participation in the loan. Loans originated by other banks in which the Company is the participating institution amounted to \$51.7 million at September 30, 2014 and \$34.5 million at December 31, 2013.

Standby letters of credit are conditional commitments issued by the Company to guarantee the financial obligation or performance by a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. If the letter of credit is drawn upon, a loan is created for the customer, generally a commercial loan, with the same criteria associated with similar commercial loans.

- Residential loans:

Enterprise originates conventional mortgage loans on one-to-four family residential properties. These properties may serve as the borrower's primary residence, vacation homes, or investment properties. Loan to value limits vary, generally from 80% for adjustable rate and multi-family, owner occupied properties, up to 97% for fixed rate loans on single family, owner-occupied properties, with mortgage insurance coverage required for loan-to-value ratios greater than 80% based on program parameters. In addition, financing is provided for the construction of owner-occupied primary and secondary residences. Residential mortgage loans may have terms of up to 30 years at either fixed or adjustable rates of interest. Fixed and adjustable rate residential mortgage loans are generally originated using secondary market underwriting and documentation standards.

Depending on the current interest rate environment, management projections of future interest rates and the overall asset-liability management program of the Company, management may elect to sell those fixed and adjustable rate residential mortgage loans which are eligible for sale in the secondary market, or hold some or all of this residential loan production for the Company's portfolio. Mortgage loans are generally not pooled for sale, but instead sold on an individual basis. The Company may retain or sell the servicing when selling the loans. Loans sold are subject to standard secondary market underwriting and eligibility representations and warranties over the life of the loan and are subject to an early payment default period covering the first four payments for certain loan sales. Loans classified as held for sale are carried as a separate line item on the balance sheet.

- Home equity loans and lines of credit:

Home equity term loans are originated for one-to-four family residential properties with maximum original loan to value ratios generally up to 80% of the assessed or appraised value of the property securing the loan. Home equity loan payments consist of

ENTERPRISE BANCORP, INC.  
 Notes to the Unaudited Consolidated Interim  
 Financial Statements

Table of Contents

monthly principal and interest based on amortization ranging from three to fifteen years. The rates may also be fixed for three to fifteen years.

The Company originates home equity revolving lines of credit for one-to-four family residential properties with maximum original loan to value ratios generally up to 80% of the appraised value of the property securing the loan. Home equity lines generally have interest rates that adjust monthly based on changes in the Prime Rate, although minimum rates may be applicable. Some home equity line rates may be fixed for a period of time and then adjusted monthly thereafter. The payment schedule for home equity lines requires interest only payments for the first ten years of the lines. Generally at the end of ten years, the line may be frozen to future advances, and principal plus interest payments are collected over a fifteen-year amortization schedule or, for eligible borrowers meeting certain requirements, the line availability may be extended for an additional interest only period.

- Consumer loans:

Consumer loans primarily consist of secured or unsecured personal loans, loans under energy efficiency financing programs in conjunction with Massachusetts public utilities, and overdraft protection lines on checking accounts extended to individual customers. The aggregate amount of overdrawn deposit accounts are reclassified as loan balances.

Loans serviced for others

At September 30, 2014 and December 31, 2013, the Company was servicing residential mortgage loans owned by investors amounting to \$19.2 million and \$20.6 million, respectively. Additionally, the Company was servicing commercial loans participated out to various other institutions amounting to \$41.4 million and \$52.1 million at September 30, 2014 and December 31, 2013, respectively. See the discussion above for further information regarding commercial participations.

Loans serving as collateral

Loans designated as qualified collateral and pledged to the FHLB for borrowing capacity are summarized below:

(Dollars in thousands)	September 30, 2014	December 31, 2013
Commercial real estate	\$289,394	\$320,908
Residential mortgages	106,941	97,626
Home equity	16,630	17,548
Total loans pledged to FHLB	\$412,965	\$436,082

(4) Allowance for Loan Loss

While the Company manages its loan portfolio to avoid concentration by industry and loan size to lessen its credit risk exposure, inherent in the lending process is the risk of loss due to customer non-payment, or "credit risk." The Company endeavors to minimize this risk through sound underwriting practices and the risk management function, however, management recognizes that loan losses will occur and that the amount of these losses will fluctuate depending on the risk characteristics of the loan portfolio and economic conditions. The allowance for loan losses is an estimate of probable credit risk inherent in the loan portfolio as of the specified balance sheet dates.

Allowance for probable loan losses methodology

On a quarterly basis, management prepares an estimate of the allowance necessary to cover estimated credit losses. The Company maintains the allowance at a level that it deems adequate to absorb all reasonably anticipated losses from specifically known and other credit risks associated with the portfolio. The Company uses a systematic methodology to measure the amount of estimated loan loss exposure inherent in the portfolio for purposes of establishing a sufficient allowance for loan losses. The methodology makes use of specific reserves for loans individually evaluated and deemed impaired, and general reserves for larger groups of homogeneous loans. In making its assessment on the adequacy of the allowance, management considers several quantitative and qualitative factors that could have an effect on the credit quality of the portfolio including, individual assessment of larger and high risk credits, delinquency trends and the level of non-performing loans, impaired and restructured loans, net charge-offs, the growth and composition of the loan portfolio,

ENTERPRISE BANCORP, INC.  
Notes to the Unaudited Consolidated Interim  
Financial Statements

Table of Contents

expansion in geographic market area and the strength of the local and national economy, among other factors.

There have been no material changes in the Company's underwriting practices, credit risk management system, or to the allowance assessment methodology used to estimate loan loss exposure as reported in the Company's most recent Annual Report on Form 10-K. Refer to heading "Allowance for probable loan losses methodology" contained in Note 4 "Allowance For Loan Losses," to the Company's consolidated financial statements contained in the Company's 2013 Annual Report on Form 10-K for further discussion of management's methodology used to estimate the loan loss exposure inherent in the portfolio for purposes of establishing a sufficient allowance.

The balances of loans as of September 30, 2014 by segment and evaluation method are summarized as follows:

(Dollars in thousands)	Loans individually		Total Loans
	evaluated for impairment	Loans collectively evaluated for impairment

Total loans	\$ 29,826	\$ 1,494,230	\$ 1,524,056

Credit Quality Indicators

The level of adversely classified loans and delinquent and non-performing assets is largely a function of economic conditions, the overall banking environment, the Company's underwriting, and credit risk management standards. The Company's commercial lending focus may entail significant additional risks compared to long term financing on existing, owner-occupied residential real estate. The Company endeavors to minimize this risk through sound underwriting practices and the risk management function. The credit risk management function focuses on a wide variety of factors, including, among others, current and expected economic conditions, the real estate market, the financial condition of borrowers, the ability of borrowers to adapt to changing conditions or circumstances affecting their business and the continuity of borrowers' management teams. Early detection of credit issues is critical to minimize credit losses. Accordingly, management regularly monitors these factors, among others, through ongoing

credit reviews by the Credit Department, an external loan review service, reviews by members of senior management and the Loan Committee of the Board of Directors. This review includes the assessment of internal credit quality indicators such as the risk classification of individual loans, adversely classified loans, past due and non-accrual loans, impaired and restructured loans, and the level of foreclosure activity, as well as trends in the general levels of these indicators. However, despite prudent loan underwriting and ongoing credit risk management, adverse changes within the Company's market area or deterioration in the local, regional or national economic conditions could negatively impact the portfolio's credit risk profile and the Company's asset quality in the future.

ENTERPRISE BANCORP, INC.  
Notes to the Unaudited Consolidated Interim  
Financial Statements

Table of Contents

The loan portfolio has experienced a level of modest credit stabilization compared to the 2013 periods, as indicated by the improving statistics related to adversely classified, non-accrual, and impaired loans, and the low number and level of Other Real Estate Owned ("OREO") properties held as of September 30, 2014. Given the size and commercial mix of the Company's loan portfolio, management considers the current statistics to be reflective of the lagging effect that the regional economic environment has had on the local commercial markets and its impact on the credit profile of such a portfolio.

Adversely Classified Loans

The Company's loan risk rating system classifies loans depending on risk of loss characteristics. The classifications range from "substantially risk free" for the highest quality loans and loans that are secured by cash collateral, to the more severe adverse classifications of "substandard," "doubtful" and "loss" based on criteria established under banking regulations.

Loans classified as substandard include those loans characterized by the distinct possibility that the Company will sustain some loss if deficiencies are not corrected. These loans are inadequately protected by the sound net worth and paying capacity of the borrower; repayment has become increasingly reliant on collateral liquidation or reliance on guaranties; credit weaknesses are well-defined; and, borrower cash flow is insufficient to meet required debt service specified in loan terms and to meet other obligations, such as trade debt and tax payments.

Loans classified as doubtful have all the weaknesses inherent in a substandard rated loan with the added characteristic that the weaknesses make collection or full payment from liquidation, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. The probability of loss is extremely high, but because of certain important and reasonably specific pending factors which may work to the advantage and strengthening of the loan, its classification as an estimated loss is deferred until more exact status may be determined.

Loans classified as loss are generally considered uncollectible at present, although long term recovery of part or all of loan proceeds may be possible. These "loss" loans would require a specific loss reserve or charge-off.

Adversely classified loans may be accruing or on non-accrual status and may be additionally designated as impaired or restructured, or some combination thereof. Loans which are evaluated to be of weaker credit quality are reviewed on a more frequent basis by management.

The following tables present the Company's credit risk profile for each class of loan in its portfolio by internally assigned risk rating category at the periods indicated.

(Dollars in thousands)	September 30, 2014			Not Adversely Classified	Gross Loans
	Adversely Classified				
	Substandard	Doubtful	Loss		
Commercial real estate	\$9,865	\$1,207	\$30	\$832,546	\$843,648
Commercial and industrial	11,242	49	90	385,609	396,990
Commercial construction	2,983	—	—	139,369	142,352

Consumer	40	—	—	8,603	8,643
Total gross loans	\$26,363	\$1,317	\$236	\$1,497,664	\$1,525,580

The minor shift in adversely classified loan balances amongst the categories since the prior period was due to a variety of activity including: credit rating upgrades, primarily in commercial real estate; payoffs; the foreclosure sale of underlying collateral with payoff on a larger commercial real estate relationship; and charge-offs, primarily commercial real estate and commercial and industrial loans; partially offset by additional credit downgrades, particularly in commercial and industrial and residential mortgage loans during the period.

**Past Due and Non-Accrual Loans**

Loans on which the accrual of interest has been discontinued are designated as non-accrual loans. Accrual of interest on loans is generally discontinued when a loan becomes contractually past due, with respect to interest or principal, by 90 days, or when reasonable doubt exists as to the full and timely collection of interest or principal. When a loan is placed on non-accrual status, all interest previously accrued but not collected is reversed against current period interest income. Interest payments received on loans in a non-accrual status are generally applied to principal on the books of the Company. Interest accruals are resumed on such loans only when payments are brought current and have remained current for a period of 180 days and when, in the judgment of management, the collectability of both principal and interest is reasonably assured. Additionally, deposit accounts overdrawn for 90 or more days are included in the consumer non-accrual numbers below.

The following tables present age analysis of past due loans as of the dates indicated.

**Balance at September 30, 2014**

(Dollars in thousands)	Loans 30-59 Days Past Due	Loans 60-89 Days Past Due	Loans 90 or More Days Past Due (non- accrual)	Total Past Due Loans	Current Loans	Gross Loans

## Balance at December 31, 2013

(Dollars in thousands)	Loans 30-59 Days Past Due	Loans 60-89 Days Past Due	Loans 90 or More Days Past Due (non- accrual)	Total Past Due Loans	Current Loans	Gross Loans
Commercial real estate	\$1,142	\$1,575	\$10,561	\$13,278	\$807,021	\$820,299
Commercial and industrial	680	908	5,743	7,331	349,725	357,056
Commercial construction	196	—	1,118	1,314	131,193	132,507
Residential	1,110	127	633	1,870	130,851	132,721
Home equity	211	10	281	502	73,852	74,354
Consumer	106	18	10	134	8,509	8,643
Total gross loans	\$3,445	\$2,638	\$18,346	\$24,429	\$1,501,151	\$1,525,580

At September 30, 2014 and December 31, 2013, all loans 90 days or more past due were carried as non-accrual. Included in the consumer non-accrual numbers in the table above were \$16 thousand and \$3 thousand of overdraft deposit account balances 90 days or more past due at September 30, 2014 and December 31, 2013, respectively. Total non-performing loans amounted to \$16.5 million and \$18.3 million at September 30, 2014 and December 31, 2013, respectively. Non-accrual loans which were not adversely classified amounted to \$229 thousand at September 30, 2014 and \$577 thousand at December 31, 2013. These balances primarily represented the guaranteed portions of non-performing SBA loans. The majority of the non-accrual loan balances were also carried as impaired loans during the periods noted, and are discussed further below. The increase in loans 30-59 days past due occurred within the commercial portfolios at September 30, 2014, with the majority of these loans having subsequent payments made by mid-October.

The ratio of non-accrual loans to total loans amounted to 1.03% at September 30, 2014, 1.20% at December 31, 2013, and 1.35% at September 30, 2013.

At September 30, 2014, additional funding commitments for loans on non-accrual status totaled \$100 thousand. The Company's obligation to fulfill the additional funding commitments on non-accrual loans is generally contingent on the borrower's compliance with the terms of the credit agreement. If the borrower is not in compliance, additional funding commitments may or may not be made at the Company's discretion.

**Impaired Loans**

Impaired loans are individually significant loans for which management considers it probable that not all amounts due (principal and interest) in accordance with the original contractual terms will be collected. Impaired loans may be included within the non-accrual balances; however, not every loan in non-accrual status has been designated as impaired. Impaired loans include troubled debt restructured ("TDR") loans. Impaired loans exclude large groups of smaller-balance homogeneous loans, such as residential mortgage loans and consumer loans, which are collectively evaluated for impairment and loans that are measured at fair value, unless the loan is amended in a TDR.

Management does not set any minimum delay of payments as a factor in reviewing for impaired classification. Management considers the individual payment status, net worth and earnings potential of the borrower, and the value and cash flow of the collateral as factors to determine if a loan will be paid in accordance with its contractual terms. An impaired or TDR loan classification will be considered for upgrade based on the borrower's sustained performance over time and their improving financial condition. Consistent with the criteria for returning non-accrual loans to

accrual status, the expectation of the borrower's ability to continue to service the loan in accordance the original or modified terms and the collectability of the remaining balance, and in the case of TDR loans, an interest rate at, or greater than, a market rate for a similar credit at the time of modification is assessed.

Impaired loans are individually evaluated for credit loss and a specific allowance reserve is assigned for the amount of the estimated credit loss. Refer to heading "Allowance for probable loan losses methodology" contained in Note 4 "Allowance For Loan Losses," to the Company's consolidated financial statements contained in the Company's 2013 Annual Report on Form 10-K for further discussion of management's methodology used to estimate specific reserves for impaired loans.

Total impaired loans amounted to \$29.6 million and \$29.8 million, at September 30, 2014 and December 31, 2013, respectively. Total accruing impaired loans amounted to \$13.5 million and \$11.9 million at September 30, 2014 and

ENTERPRISE BANCORP, INC.  
Notes to the Unaudited Consolidated Interim  
Financial Statements

Table of Contents

December 31, 2013, respectively, while non-accrual impaired loans amounted to \$16.1 million and \$17.9 million as of September 30, 2014 and December 31, 2013, respectively.

The following tables set forth the recorded investment in impaired loans and the related specific allowance allocated as of the dated indicated.

Balance at September 30, 2014

(Dollars in thousands)	Unpaid contractual principal balance	Total recorded investment in impaired loans	Recorded investment with no allowance	Recorded investment with allowance	Related specific allowance
Commercial real estate	\$ 16,040	\$13,940	\$13,306	\$634	\$110
Commercial and industrial	11,986	10,877	4,046	6,831	2,198
Commercial construction	3,125	2,900	1,082	1,818	690
Residential	1,699	1,625	1,375	250	103
Home equity	208	205	—	205	46
Consumer	22	22	—	22	22
Total	\$ 33,080	\$29,569	\$19,809	\$9,760	\$3,169

Balance at December 31, 2013

(Dollars in thousands)	Unpaid contractual principal balance	Total recorded investment in impaired loans	Recorded investment with no allowance	Recorded investment with allowance	Related specific allowance
Commercial real estate	\$ 17,420	\$15,139	\$12,105	\$3,034	\$507
Commercial and industrial	12,220	10,579	4,902	5,677	2,901
Commercial construction	3,464	3,358	1,426	1,932	830
Residential	673	619	365	254	107
Home equity	110	108	—	108	31
Consumer	23	23	—	23	23
Total	\$ 33,910	\$29,826	\$18,798	\$11,028	\$4,399

The reduction in related specific reserves on impaired loans was due primarily to increases in estimated current realizable collateral values and current charge-offs of previously allocated specific reserves on commercial relationships for which management deemed collectability of amounts due was unlikely based on current realizable collateral values, partially offset by additional reserves for newly impaired loans during the period.

The following table presents the average recorded investment in impaired loans and the related interest recognized during the three month periods indicated.

(Dollars in thousands)	Three Months Ended September 30, 2014		Three Months Ended September 30, 2013	
	Average recorded investment	Interest income recognized	Average recorded investment	Interest income recognized
Commercial real estate	\$14,224	\$75	\$15,405	\$42

Home equity	215	(1)	119	—
Consumer	25	1	17	1
Total	\$28,910	\$369	\$31,919	\$326

At September 30, 2014, additional funding commitments for impaired loans totaled \$167 thousand. The Company's obligation to fulfill the additional funding commitments on impaired loans is generally contingent on the borrower's compliance with the terms of the credit agreement. If the borrower is not in compliance, additional funding commitments may or may not be made at the Company's discretion.

Troubled Debt Restructures

Loans are designated as a TDR when, as part of an agreement to modify the original contractual terms of the loan, the Bank grants the borrower a concession on the terms, that would not otherwise be considered, as a result of financial difficulties of the borrower. Typically, such concessions may consist of a reduction in interest rate to a below market rate, taking into account the credit quality of the note, or a deferment or reduction of payments (principal or interest) which materially alters the Bank's position or significantly extends the note's maturity date, such that the present value of cash flows to be received is materially less than those contractually established at the loan's origination. All loans that are modified are reviewed by the Company to identify if a TDR has occurred. TDR loans are included in the impaired loan category and, as such, these loans are individually evaluated and a specific reserve is assigned for the amount of the estimated credit loss.

Total TDR loans, included in the impaired loan figures above, as of September 30, 2014 and December 31, 2013, were \$20.7 million and \$20.9 million, respectively. TDR loans on accrual status amounted to \$13.0 million and \$11.4 million at September 30, 2014 and December 31, 2013, respectively. TDR loans included in non-performing loans amounted to \$7.7 million and \$9.5 million at September 30, 2014 and December 31, 2013, respectively. The Company continues to work with commercial relationships and enters into loan modifications to the extent deemed to be necessary or appropriate while attempting to achieve the best mutual outcome given the current economic environment.

At September 30, 2014, additional funding commitments for TDR loans totaled \$75 thousand. The Company's obligation to fulfill the additional funding commitments on TDR loans is generally contingent on the borrower's compliance with the terms of the credit agreement. If the borrower is not in compliance, additional funding commitments may or may not be made at the Company's discretion.

At September 30, 2014, there were specific reserves of \$45 thousand allocated to the TDRs entered into during the 2014 period as management considered it likely the majority of principal would ultimately be collected. Interest payments received on non-accruing TDRs in the table above which were applied to principal and not recognized in interest income during the nine months ended September 30, 2014 amounted to \$5 thousand.

There were subsequent charge-offs of \$66 thousand associated with the TDRs noted in the table above during the nine months ended September 30, 2014.

Loans modified as troubled debt restructuring within the twelve month period previous to September 30, 2013 for which there was a subsequent payment default during the period noted are detailed below.

(Dollars in thousands)	Nine months ended September 30, 2013	
	Number of TDRs that defaulted	Post-modification outstanding recorded investment
Commercial real estate	1	\$137
Commercial and industrial	1	62
Commercial construction	1	31
Residential	—	—
Home Equity	—	—
Consumer	—	—
Total	3	\$230

There were subsequent charge-offs of \$38 thousand associated with the TDRs noted in the table above during the nine months ended September 30, 2013. Included in the table above were two TDRs which defaulted, with total post modification outstanding balances of \$168 thousand, and were subsequently transferred to OREO during the September 30, 2013 period. At September 30, 2013, specific reserves allocated to the TDRs entered into during the 2013 period amounted to \$80 thousand, as management considered it likely that the majority of principal would ultimately be collected.

#### Other Real Estate Owned

Real estate acquired by the Company through foreclosure proceedings or the acceptance of a deed in lieu of foreclosure is classified as OREO. When property is acquired, it is generally recorded at the lesser of the loan's remaining principal balance, net of any unamortized deferred fees, or the estimated fair value of the property acquired, less estimated costs to sell. Any loan balance in excess of the estimated realizable fair value on the date of transfer is charged to the allowance for loan losses on that date. All costs incurred thereafter in maintaining the property, as well as subsequent declines in fair value, are charged to non-interest expense.

The carrying value of OREO at September 30, 2014 was \$861 thousand and consisted of three properties; and as of December 31, 2013 was \$114 thousand and consisted of one property. During the nine months ended September 30, 2014, two properties were added to OREO. There were no sales or subsequent write-down of OREO during the nine months ended September 30, 2014. There were \$121 thousand of gains realized on OREO sales during the nine months ended September 30, 2013 and a subsequent write-down of \$23 thousand was recorded during that period.

#### Allowance for Loan Loss Activity

The allowance for loan losses is established through a provision for loan losses, a direct charge to earnings. Loan losses are charged against the allowance when management believes that the collectability of the loan principal is unlikely. Recoveries on loans previously charged-off are credited to the allowance.

The allowance for loan losses amounted to \$27.0 million at both September 30, 2014 and December 31, 2013 compared to \$26.0 million at September 30, 2013. The allowance for loan losses to total loans ratio was 1.68% at

September 30, 2014 compared to 1.77% at both December 31, 2013 and September 30, 2013. The decline in the overall allowance to total loan ratio at September 30, 2014 primarily resulted from the increase in the outstanding loan balances and a reduction in specific reserves. Specific reserves declined due to current charge-offs, the majority of which were previously allocated specific reserves on commercial relationships for which management deemed collectability of amounts due was unlikely based on current realizable collateral values, partially offset by additional reserves for newly impaired loans during the period.

Based on management's judgment as to the existing credit risks inherent in the loan portfolio, as discussed above under the heading "Credit Quality Indicators," management believes that the Company's allowance for loan losses is adequate to absorb probable losses from specifically known and other credit risks associated with the portfolio as of September 30, 2014.

## (5) Supplemental Retirement Plan and Other Postretirement Benefit Obligations

## Supplemental Retirement Plan (SERPs)

The Company has salary continuation agreements with two of its active executive officers, and one former executive officer who currently works on a part time basis. These agreements provide for predetermined fixed-cash supplemental retirement benefits to be provided for a period of 20 years after each individual reaches a defined “benefit age.” The Company has not recognized service cost in the current or prior year as each officer had previously attained their individually defined benefit age and was fully vested under the plan.

This non-qualified plan represents a direct liability of the Company, and as such has no specific assets set aside to settle the benefit obligation. The funded status is the aggregate amount accrued, or the “Accumulated Benefit Obligation,” which is equal to the present value of the benefits to be provided to the employee or any beneficiary in exchange for the employee’s service rendered to that date. Because the Company’s benefit obligations provide for predetermined fixed-cash payments, the Company does not have any unrecognized costs to be included as a component of accumulated other comprehensive income.

The total net periodic benefit cost, which was comprised of interest cost only, was \$36 thousand for the three months ended September 30, 2014, compared to \$33 thousand for the three months ended September 30, 2013. Year-to-date total net periodic benefit cost, comprised of interest cost only, was \$107 thousand for the nine months ended September 30, 2014, compared to \$100 thousand for the nine months ended September 30, 2013.

Benefits paid amounted to \$69 thousand for both the three month periods ended September 30, 2014 and September 30, 2013 and \$207 thousand for both the nine month periods ended September 30, 2014 and September 30, 2013. The Company anticipates accruing an additional \$36 thousand to the plan during the remainder of 2014.

ENTERPRISE BANCORP, INC.  
Notes to the Unaudited Consolidated Interim  
Financial Statements

Table of Contents

Supplemental Life Insurance

For certain senior and executive officers on whom the Bank owns bank owned life insurance ("BOLI"), the Company has provided supplemental life insurance through split-dollar life insurance arrangements, which provides a death benefit to the officer's designated beneficiaries.

The Company has recognized a liability for future benefits associated with the supplemental life insurance plan, which is a non-qualified plan, which provides a benefit to an employee that extends to postretirement periods. This plan represents a direct liability of the Company, and as such has no specific assets set aside to settle the benefit obligation. The funded status is the aggregate amount accrued, or the "Accumulated Postretirement Benefit Obligation," which is the present value of the post- retirement benefits associated with this arrangement.

The total net periodic benefit cost, which was comprised of interest cost only, amounted to \$19 thousand and \$55 thousand for the three and nine months ended September 30, 2014, respectively, compared to \$18 thousand and \$54 thousand for the three and nine months ended September 30, 2013, respectively.

(6) Stock-Based Compensation

The Company has individual stock incentive plans and has not changed the general terms and conditions of these plans from those disclosed in the Company's 2013 Annual Report on Form 10-K.

The Company's stock-based compensation expense includes stock options and stock awards to officers and other employees included in salary and benefits expense, and stock awards and stock compensation in lieu of cash fees to directors included in other operating expenses. Total stock-based compensation expense was \$409 thousand and \$1.3 million for the three and nine months ended September 30, 2014, respectively, compared to \$380 thousand and \$1.2 million for the three and nine months ended September 30, 2013, respectively.

Stock Option Awards

The Company recognized stock-based compensation expense related to stock option awards of \$87 thousand and \$277 thousand for the three and nine months ended September 30, 2014, respectively, compared to \$75 thousand and \$344 thousand for the three and nine months ended September 30, 2013, respectively.

The table below provides a summary of the options granted, fair value, the fair value as a percentage of the market value of the stock at the date of grant and the average assumptions used in the model for the options granted in 2014 and 2013.

	Nine Months Ended September 30,		
	2014	2013	
Options granted	31,229	44,475	
Term in years	10	10	
Average assumptions used in the model:			
Expected volatility	47	% 48	%
Expected dividend yield	2.88	% 2.99	%
Expected life in years	7	7	
Risk-free interest rate	2.19	% 1.30	%

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-Q

Market price on date of grant	\$20.29	\$16.46	
Per share weighted average fair value	\$8.32	\$6.58	
Fair value as a percentage of market value at grant date	41	% 40	%

Options granted during the first nine months of 2014 and 2013 vest 50% in year two and 50% in year four, on the anniversary date of the awards. Vested options are only exercisable while the employee remains employed with the Bank and for a limited time thereafter. If a grantee's employment or other service relationship, such as service as a director, is terminated for any

28

---

ENTERPRISE BANCORP, INC.  
Notes to the Unaudited Consolidated Interim  
Financial Statements

Table of Contents

reason, then any stock options granted that have not vested as of the time of such termination generally must be forfeited, unless the Compensation Committee or the Board of Directors, as the case may be, waives such forfeiture requirement.

The Company utilizes the Black-Scholes option valuation model in order to determine the per share grant date fair value of option grants.

Refer to Note 11 “Stock-Based Compensation Plans” in the Company’s 2013 Annual Report on Form 10-K for a further description of the assumptions used in the valuation model.

Stock Awards

Stock-based compensation expense recognized in association with stock awards amounted to \$278 thousand and \$868 thousand for the three and nine months ended September 30, 2014, respectively, compared to \$265 thousand and \$746 thousand for the three and nine months ended September 30, 2013, respectively.

In January 2014, the Company granted 2,142 shares of fully vested stock to employees as anniversary awards at a grant date fair market value of \$20.95 per share.

Restricted stock awards are granted at the market price on the date of the grant. Employee awards generally vest over four years in equal portions beginning on or about the first anniversary date of the award. Employee performance based awards vest upon the Company achieving certain predefined performance objectives. Director awards generally vest over two years in equal portions beginning on or about the first anniversary date of the award.

The table below provides a summary of restricted stock awards granted in 2014 and 2013.

	Nine Months Ended September 30,	
	2014	2013
Restricted Stock Awards		
Two Year Vesting	6,660	6,146
Four Year Vesting	19,167	25,325
Performance-Based Vesting	33,017	47,735
Total Restricted Stock Awards	58,844	79,206
Weighted average grant date fair value	\$20.29	\$16.45

If a grantee’s employment or other service relationship, such as service as a director, is terminated for any reason, then any shares of restricted stock granted that have not vested as of the time of such termination generally must be forfeited, unless the Compensation Committee or the Board of Directors, as the case may be, waives such forfeiture requirement.

The restricted stock awards allow for the receipt of dividends, and the voting of all shares, whether or not vested, throughout the vesting periods at the same proportional level as common shares outstanding.

Stock in Lieu of Directors’ Fees

In addition to restricted stock awards discussed above, the members of the Company's Board of Directors may opt to receive newly issued shares of the Company's common stock in lieu of cash compensation for attendance at Board and Board Committee meetings. Stock-based compensation expense related to directors' election to receive shares of common stock in lieu of cash fees for meetings amounted to \$44 thousand and \$180 thousand for the three and nine months ended September 30, 2014, respectively, compared to \$40 thousand and \$149 thousand for the three and nine months ended September 30, 2013, respectively. In January 2014, directors were issued 11,136 shares of common stock in lieu of cash fees based on their 2013 annual stock-based compensation expense of \$194 thousand and a market value price of \$17.43 per share, the market value of the common stock on the opt-in measurement date of January 2, 2013.

Table of Contents

(7) Earnings per share

Basic earnings per share are calculated by dividing net income by the weighted average number of common shares outstanding (including participating securities) during the year. The Company's only participating securities are unvested restricted stock awards that contain non-forfeitable rights to dividends. Diluted earnings per share reflects the effect on weighted average shares outstanding of the number of additional shares outstanding if dilutive stock options were converted into common stock using the treasury stock method.

The table below presents the increase in average shares outstanding, using the treasury stock method, for the diluted earnings per share calculation for the periods indicated:

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Basic weighted average common shares outstanding	10,143,055	9,932,060	10,099,593	9,824,984
Dilutive shares	85,446	94,528	84,671	84,035
Diluted weighted average common shares outstanding	10,228,501	10,026,588	10,184,264	9,909,019

For the nine months ended September 30, 2014, there were an additional 22,776 average stock options outstanding, which were excluded from the year-to-date calculation of diluted earnings per share due to the exercise price of these options exceeding the average market price of the Company's common stock for the period. These options, which were not dilutive at that date, may potentially dilute earnings per share in the future.

(8) Fair Value Measurements

The FASB defines the fair value of an asset or liability to be the price which a seller would receive in an orderly transaction between market participants (an exit price) and also establishes a fair value hierarchy segregating fair value measurements using three levels of inputs: (Level 1) quoted market prices in active markets for identical assets or liabilities; (Level 2) significant other observable inputs, including quoted prices for similar items in active markets, quoted prices for identical or similar items in markets that are not active, inputs such as interest rates and yield curves, volatilities, prepayment speeds, credit risks and default rates which provide a reasonable basis for fair value determination or inputs derived principally from observed market data; and (Level 3) significant unobservable inputs for situations in which there is little, if any, market activity for the asset or liability. Unobservable inputs must reflect reasonable assumptions that market participants would use in pricing the asset or liability, which are developed on the basis of the best information available under the circumstances.

The following tables summarize significant assets and liabilities carried at fair value and placement in the fair value hierarchy at the dates specified:

(Dollars in thousands)	September 30,	Fair Value Measurements using:		
	2014	(level 1)	(level 2)	(level 3)
Assets measured on a recurring basis:	Fair Value			
Fixed income securities	\$221,648	\$—	\$221,648	\$—
Equity securities	15,105	15,105	—	—
FHLB Stock	3,357	—	—	3,357
Assets measured on a non-recurring basis:				

Edgar Filing: ENTERPRISE BANCORP INC /MA/ - Form 10-Q

Impaired loans (collateral dependent)	5,790	—	—	5,790
Other real estate owned	861	—	—	861

Financial Statements

Table of Contents

(Dollars in thousands)	December 31,	Fair Value Measurements using:		
	2013	(level 1)	(level 2)	(level 3)
	Fair Value			
Assets measured on a recurring basis:				
Fixed income securities	\$202,201	\$—	\$202,201	\$—
Equity securities	13,168	13,168	—	—
FHLB Stock	4,324	—	—	4,324
Assets measured on a non-recurring basis:				
Impaired loans (collateral dependent)	6,542	—	—	6,542
Other real estate owned	114	—	—	114

The Company did not have cause to transfer any assets between the fair value measurement levels during the nine months ended September 30, 2014 or the year ended December 31, 2013. There were no liabilities measured at fair value on a recurring or non-recurring basis as of September 30, 2014 or December 31, 2013.

All of the Company's fixed income investments and equity securities that are considered "available for sale" are carried at fair value. The fixed income category above includes federal agency obligations, federal agency MBS, municipal securities and corporate bonds as held at those dates. The Company utilizes third-party pricing vendors to provide valuations on its fixed income securities. Fair values provided by the vendors were generally determined based upon pricing matrices utilizing observable market data inputs for similar or benchmark securities in active markets and/or based on a matrix pricing methodology which employs The Bond Market Association's standard calculations for cash flow and price/yield analysis, live benchmark bond pricing and terms/condition data available from major pricing sources. Therefore, management regards the inputs and methods used by third party pricing vendors to be "Level 2 inputs and methods" as defined in the "fair value hierarchy." The Company periodically obtains a second price from an impartial third party on fixed income securities to assess the reasonableness of prices provided by the primary independent pricing vendor.

The Company's equity portfolio fair value is measured based on quoted market prices for the shares; therefore, these securities are categorized as Level 1 within the fair value hierarchy.

Net unrealized appreciation and depreciation on investments available for sale, net of applicable income taxes, are reflected as a component of accumulated other comprehensive income.

The Bank is required to purchase FHLB stock at par value in association with advances from the FHLB; this stock is classified as a restricted investment and carried at cost which management believes approximates fair value; therefore, these securities are categorized as Level 3 measures. See Note 1, "Summary of Significant Accounting Policies," Item (d) for further information regarding the Company's fair value assessment of FHLB capital stock.

Impaired loan balances in the table above represent those collateral dependent impaired commercial loans where management has estimated the credit loss by comparing the loan's carrying value against the expected realizable fair value of the collateral (appraised value or internal analysis less estimated cost to sell, adjusted as necessary for changes in relevant valuation factors subsequent to the measurement date). Certain inputs used in these assessments, and possible subsequent adjustments, are not always observable, and therefore, collateral dependent impaired loans are categorized as Level 3 within the fair value hierarchy. A specific allowance is assigned to the collateral dependent impaired loan for the amount of management's estimated credit loss. The specific allowances assigned to the collateral dependent impaired loans at September 30, 2014 amounted to \$2.4 million compared to \$3.2 million at December 31,

2013.

Real estate acquired by the Company through foreclosure proceedings or the acceptance of a deed in lieu of foreclosure is classified as OREO. When property is acquired, it is generally recorded at the lesser of the loan's remaining principal balance, net of unamortized deferred fees, or the estimated fair value of the property acquired, less estimated costs to sell. The estimated fair value is based on market appraisals and the Company's internal analysis. Certain inputs used in appraisals or the Company's internal analysis, are not always observable, and therefore, OREO may be categorized as Level 3 within the fair value hierarchy. There were no sales of OREO during the nine months ended September 30, 2014. There were \$121 thousand of gains realized on OREO sales during the nine months ended September 30, 2013 and a subsequent write-down of \$23 thousand was recorded during that period.

Financial Statements

Table of Contents

The following table presents additional quantitative information about assets measured at fair value on a recurring and non-recurring basis for which the Company utilized Level 3 inputs (significant unobservable inputs for situations in which there is little, if any, market activity for the asset or liability) to determine fair value as of September 30, 2014.

(Dollars in thousands)	Fair Value	Valuation Technique	Unobservable Input	Unobservable Input Value or Range
Assets measured on a recurring basis:				
FHLB Stock	\$3,357	FHLB Stated Par Value	N/A	N/A
Assets measured on a non-recurring basis:				
Impaired loans (collateral dependent)	\$5,790	Appraisal of collateral	Appraisal adjustments <sup>(1)</sup>	5% - 50%
Other real estate owned	\$861	Appraisal of collateral	Appraisal adjustments <sup>(1)</sup>	0% - 30%

<sup>(1)</sup> Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated liquidation expenses.

#### Other Guarantees and Commitments

Standby letters of credit are conditional commitments issued by the Company to guarantee the financial obligation or performance by a customer to a third party. The fair value of these commitments was estimated to be the fees charged to enter into similar agreements, and accordingly these fair value measures are deemed to be FASB Level 2 measurements. In accordance with the FASB, the estimated fair values of these commitments are carried on the balance sheet as a liability and amortized to income over the life of the letters of credit, which are typically one year. The estimated fair value of these commitments carried on the balance sheet at September 30, 2014 and December 31, 2013 were deemed immaterial.

Interest rate lock commitments related to the origination of mortgage loans that will be sold are considered derivative instruments. The commitments to sell loans are also considered derivative instruments. The Company generally does not pool mortgage loans for sale, but instead, sells the loans on an individual basis. To reduce the net interest rate exposure arising from its loan sale activity, the Company enters into the commitment to sell these loans at essentially the same time that the interest rate lock commitment is quoted on the origination of the loan. The Company estimates the fair value of these derivatives based on current secondary mortgage market prices. These commitments represent the Company's only derivative instruments and are accounted for in accordance with FASB guidance. The fair values of the Company's derivative instruments are deemed to be FASB Level 2 measurements. At September 30, 2014 and December 31, 2013, the estimated fair value of the Company's derivative instruments was considered to be immaterial.

#### Estimated Fair Values of Assets and Liabilities

In addition to disclosures regarding the measurement of assets and liabilities carried at fair value on the balance sheet, the Company is also required to disclose fair value information about financial instruments for which it is practicable to estimate that value, whether or not recognized on the balance sheet. In cases where quoted fair values are not available, fair values are based upon estimates using various valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. The following methods and assumptions were used by the Company in estimating fair values of its financial instruments:

Loans held for sale: Loans held for sale are recorded at the lower of aggregate amortized cost or market value. The fair value is based on comparable market prices for loans with similar rates and terms.

Loans: The fair value of loans was determined using discounted cash flow analysis, using interest rates currently being offered by the Company. The incremental credit risk for adversely classified loans was considered in the determination of the fair value of the loans. This method of estimating fair value does not incorporate the exit price concept of fair value.

Commitments: The fair values of the unused portion of lines of credit and letters of credit were estimated to be the fees currently charged to enter into similar agreements. Commitments to originate non-mortgage loans were short-term and were at current market rates and estimated to have no significant change in fair value.

ENTERPRISE BANCORP, INC.  
Notes to the Unaudited Consolidated Interim  
Financial Statements

Table of Contents

**Financial liabilities:** The fair values of certificates of deposit and borrowings were estimated using discounted cash flow analysis using rates offered by the Bank, or advance rates offered by the FHLB on September 30, 2014 and December 31, 2013 for similar instruments. The fair value of junior subordinated debentures was estimated using discounted cash flow analysis using a market rate of interest at September 30, 2014 and December 31, 2013.

**Limitations:** The estimates of fair value of financial instruments were based on information available at September 30, 2014 and December 31, 2013 and are not indicative of the fair market value of those instruments as of the date of this report. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. The fair value of the Company's time deposit liabilities do not take into consideration the value of the Company's long-term relationships with depositors, which may have significant value.

Because no active market exists for a portion of the Company's financial instruments, fair value estimates were based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates were based on existing on- and off-balance sheet financial instruments without an attempt to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments, including premises and equipment and foreclosed real estate.

In addition, the tax ramifications related to the realization of the unrealized appreciation and depreciation can have a significant effect on fair value estimates and have not been considered in any of the estimates. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

ENTERPRISE BANCORP, INC.  
Notes to the Unaudited Consolidated Interim  
Financial Statements

Table of Contents

The carrying values, estimated fair values and placement in the fair value hierarchy of the Company's financial instruments<sup>(1)</sup> for which fair value is only disclosed but not recognized on the balance sheet at the dates indicated are summarized as follows:

(Dollars in thousands)	September 30, 2014		Fair value measurement		
	Carrying Amount	Fair Value	Level 1 inputs	Level 2 Inputs	Level 3 Inputs
Financial assets:					
Loans held for sale	\$1,645	\$1,645	\$—	\$1,645	—
Loans, net	1,585,745	1,606,731	—	—	1,606,731
Financial liabilities:					
Certificates of deposit (including brokered)	271,298	269,999	—	269,999	—
Borrowed funds	1,004	1,004	—	1,004	—
Junior subordinated debentures	10,825	12,629	—	—	12,629
(Dollars in thousands)	December 31, 2013		Fair value measurement		
	Carrying Amount	Fair Value	Level 1 inputs	Level 2 Inputs	Level 3 Inputs
Financial assets:					
Loans held for sale	\$1,255	\$1,255	\$—	\$1,255	—
Loans, net	1,497,089	1,516,809	—	—	1,516,809
Financial liabilities:					
Certificates of deposit (including brokered)	251,650	250,045	—	250,045	—
Borrowed funds	36,534	36,535	—	36,535	—
Junior subordinated debentures	10,825	11,358	—	—	11,358

Excluded from this table are certain financial instruments with carrying values that approximated their fair value at the dates indicated, as they were short-term in nature or payable on demand. These include cash and cash (1)equivalents, accrued interest receivable, non-term deposit accounts, and accrued interest payable. The respective carrying values of these instruments would all be considered to be classified within Level 1 of their fair value hierarchy.

## Table of Contents

### Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's discussion and analysis should be read in conjunction with the Company's (also referred to herein as "Enterprise," "us," "we" or "our") unaudited consolidated interim financial statements and notes thereto contained in this report and the consolidated financial statements and notes thereto contained in the Company's 2013 Annual Report on Form 10-K.

#### Accounting Policies/Critical Accounting Estimates

As discussed in the Company's 2013 Annual Report on Form 10-K, the three most significant areas in which management applies critical assumptions and estimates that are particularly susceptible to change relate to the determination of the allowance for loan losses, impairment review of investment securities and the impairment review of goodwill. The Company has not changed its significant accounting and reporting policies from those disclosed in its 2013 Annual Report on Form 10-K.

#### Special Note Regarding Forward-Looking Statements

This report contains certain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, including statements concerning plans, objectives, future events or performance and assumptions and other statements that are other than statements of historical fact. Forward-looking statements may be identified by reference to a future period or periods or by use of forward-looking terminology such as "anticipates," "believes," "expects," "intends," "may," "plans," "pursue," "views" and similar terms or expressions. Various statements contained in Item 2 - "Management's Discussion and Analysis of Financial Condition and Results of Operations" and Item 3 - "Quantitative and Qualitative Disclosures About Market Risk," including, but not limited to, statements related to management's views on the banking environment and the economy, competition and market expansion opportunities, the interest rate environment, credit risk and the level of future non-performing assets and charge-offs, potential asset and deposit growth, future non-interest expenditures and non-interest income growth, and borrowing capacity are forward-looking statements. The Company wishes to caution readers that such forward-looking statements reflect numerous assumptions and involve a number of risks and uncertainties that may adversely affect the Company's future results. The forward-looking statements in this report are based on information available to the Company as of the date of this report and the Company undertakes no obligation to publicly update or otherwise revise any forward-looking statement, whether as a result of new information, future events or otherwise. The following important factors, among others, could cause the Company's results for subsequent periods to differ materially from those expressed in any forward-looking statement made herein: (i) changes in interest rates could negatively impact net interest income; (ii) changes in the business cycle and downturns in the local, regional or national economies, including deterioration in the local real estate market, could negatively impact credit and/or asset quality and result in credit losses and increases in the Company's allowance for loan losses; (iii) changes in consumer spending could negatively impact the Company's credit quality and financial results; (iv) increasing competition from larger regional and out-of-state banking organizations as well as non-bank providers of various financial services could adversely affect the Company's competitive position within its market area and reduce demand for the Company's products and services; (v) deterioration of securities markets could adversely affect the value or credit quality of the Company's assets and the availability of funding sources necessary to meet the Company's liquidity needs; (vi) changes in technology, including the increased cyber-security risk and identity theft could adversely impact the Company's operations and increase technology-related expenditures; (vii) increases in employee compensation and benefit expenses could adversely affect the Company's financial results; (viii) changes in laws and regulations that apply to the Company's business and operations, including without limitation, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), the Jumpstart Our Business Startups Act (the "JOBS Act"), the Basel III rules adopted by the federal banking regulators and the additional regulations that will be forthcoming as a result thereof, could adversely affect the Company's business environment, operations and financial results; (ix) changes in accounting

standards, policies and practices, as may be adopted or established by the regulatory agencies, the Financial Accounting Standards Board (the “FASB”) or the Public Company Accounting Oversight Board could negatively impact the Company's financial results; (x) our ability to enter new markets successfully and capitalize on growth opportunities; (xi) future regulatory compliance costs, including any increase caused by new regulations imposed by the Consumer Finance Protection Bureau; and (xii) some or all of the risks and uncertainties described in Item 1A of the Company’s 2013 Annual Report on Form 10-K could be realized, which could have a material adverse effect on the Company’s business, financial condition and results of operation. Therefore, the Company cautions readers not to place undue reliance on any such forward-looking information and statements.

## Table of Contents

### Overview

#### Executive Summary

The Company continues to focus on organic growth while continually planning for our future by investing in our branch network, technology, progressive product capabilities and, most importantly, in our Enterprise team, our customers and our communities.

Net income for the three months ended September 30, 2014 amounted to \$3.8 million, an increase of \$298 thousand, or 8%, compared to the same three-month period in 2013. Diluted earnings per share was \$0.37 for the three months ended September 30, 2014 and \$0.35 for the same period ended September 30, 2013, an increase of 6%. Net income for the nine months ended September 30, 2014 amounted to \$10.7 million, an increase of \$606 thousand, or 6%, compared to the same nine-month period in 2013. Diluted earnings per share was \$1.05 for the nine months ended September 30, 2014 and \$1.01 for the same period ended September 30, 2013, an increase of 4%.

As of September 30, 2014, both loans and deposits, excluding brokered deposits, have increased 6% since December 31, 2013. On an annualized basis, both loans and deposits, excluding brokered deposits, have increased 8% through the first nine months of 2014. Our growth and operating results continue to be driven by our dedicated Enterprise team through active community involvement, relationship building and a customer-focused mindset, as well as our comprehensive and progressive product and service offerings and market expansion.

The Company's growth has contributed to increases in net interest income and non-interest expenses in both the current quarter and year-to-date periods, and also to an increase in non-interest income in the current quarter, as compared to the same periods in 2013. Current year-to-date net income benefited from a lower loan loss provision, while the current quarterly results were impacted by an increase in the loan loss provision, as compared to the same periods in 2013.

#### Composition of Earnings

The Company's earnings are largely dependent on its net interest income, which is the difference between interest earned on loans and investments and the cost of funding (primarily deposits and borrowings). Net interest income expressed as a percentage of average interest earning assets is referred to as net interest margin. The Company reports net interest margin on a tax equivalent basis ("margin").

Net interest income for the three months ended September 30, 2014 amounted to \$18.1 million, an increase of \$1.5 million, or 9%, compared to the same period in 2013. Net interest income for the nine months ended September 30, 2014 amounted to \$52.5 million, an increase of \$3.9 million, or 8%, compared to the same period in 2013. This increase in net interest income was primarily due to loan growth, mainly in commercial real estate loans, partially offset in the year-to-date period by a decrease in tax equivalent net interest margin ("margin"). Average loan balances (including loans held for sale) increased \$138.3 million and \$142.1 million for the three and nine months ended September 30, 2014, respectively, compared to the same periods in 2013. Net interest margin was 4.02% for the quarter ended September 30, 2014, which is relatively consistent with the quarterly margin of 4.04% at both June 30, 2014 and December 31, 2013 and flat compared to September 30, 2013. Net interest margin was 4.03% for the nine months ended September 30, 2014, compared to 4.09% for the nine months ended September 30, 2013.

For the quarters ended September 30, 2014 and 2013, the provision for loan losses amounted to \$765 thousand and \$583 thousand, respectively. For the nine months ended September 30, 2014 and 2013, the provision for loan losses amounted to \$1.2 million and \$1.9 million, respectively. In determining the provision to the allowance for loan losses,

management takes into consideration the level of loan growth and an estimate of credit risk, which includes such items as adversely classified and non-performing loans, the estimated specific reserves needed for impaired loans, the level of net charge-offs, and the estimated impact of current economic conditions on credit quality. The level of loan growth for the nine months ended September 30, 2014 was \$88.7 million, compared to \$113.0 million during the same period in 2013. Total non-performing assets as a percentage of total assets declined to 0.89% at September 30, 2014, compared to 1.09% at September 30, 2013. For the nine months ended September 30, 2014, the Company recorded net charge-offs of \$1.1 million compared to net charge-offs of \$155 thousand for the nine months ended September 30, 2013. The majority of the current charge-offs were previously allocated specific reserves on commercial relationships for which management deemed collectability of amounts due was unlikely based on current realizable collateral values. This reduction in specific reserves, in addition to a lower level of loan growth in the current year, contributed to the declines in the year-to-date provision for loan losses and the overall allowance to total loan ratio at September 30, 2014, compared to the prior year. The increase in the provision for loan losses in the current quarter

## Table of Contents

compared to the same quarter in 2013 reflects additional reserves for newly impaired loans. The allowance for loan losses to total loans ratio was 1.68% at September 30, 2014 and 1.77% at December 31, 2013. Management continues to closely monitor the non-performing assets, charge-offs and necessary allowance levels, including specific reserves. For further information regarding loan quality statistics and the allowance for loan losses, see the sections below under the heading "Financial Condition" titled "Asset Quality" and "Allowance for Loan Losses."

Non-interest income for the three months ended September 30, 2014 amounted to \$3.5 million, an increase of \$372 thousand, or 12%, compared to the same period in 2013. Non-interest income for the nine months ended September 30, 2014 amounted \$10.3 million, a decrease of \$77 thousand, or 1%, compared to the same period in 2013. The increase in non-interest income for the quarter was primarily due to increases in net gains on sales of investment securities, investment advisory fee income and other income, primarily fee income from banking products and services. The year-to-date decrease in non-interest income primarily resulted from lower levels of both gains on sales of loans and net gains on sales of investment securities, partially offset by increases in investment advisory fee income, deposit and interchange fee income and other income, primarily fee income from banking products and services. In the prior year-to-date period, other income also included gains on OREO sales.

Non-interest expense for the quarter ended September 30, 2014 amounted to \$15.1 million, an increase of \$1.3 million, or 10%, compared to the same period in the prior year. For the nine months ended September 30, 2014, non-interest expense amounted to \$45.4 million, an increase of \$3.7 million, or 9%, over the same period in the prior year. Increased expenses over the prior year related to salaries and benefits, occupancy, technology and other operating expenses primarily due to the Company's strategic growth initiatives.

## Sources and Uses of Funds

The Company's primary sources of funds are deposits, Federal Home Loan Bank ("FHLB") borrowings, current earnings and proceeds from the sales, maturities and pay-downs on loans and investment securities. The Company may also, from time to time, utilize brokered deposits and overnight borrowings from correspondent banks to provide additional funding sources and to aid in the Company's asset liability and interest rate risk positioning. Additionally, funding for the Company may be generated through equity transactions including the dividend reinvestment and direct stock purchase plan, exercise of stock options, and occasionally the sale of new stock. These funds are used to originate loans, purchase investment securities, conduct operations, expand the branch network, and pay dividends to shareholders.

The investment portfolio is primarily used to provide liquidity, manage the Company's asset-liability position and to invest excess funds. Total investments, one of the key components of earning assets, amounted to \$236.8 million at September 30, 2014, and comprised 12% of total assets at both September 30, 2014 and December 31, 2013. Since December 31, 2013, investments have increased \$21.4 million, or 10%.

Enterprise's main asset strategy is to grow loans, the largest component of earning assets, with a focus on high quality commercial loans. Total loans increased \$88.7 million, or 6%, since December 31, 2013 and amounted to \$1.61 billion at September 30, 2014, comprising 82% of total assets at both September 30, 2014 and December 31, 2013. Total commercial loans amounted to \$1.38 billion, or 86% of gross loans, at September 30, 2014, which was consistent with the composition at December 31, 2013.

Management's preferred strategy for funding asset growth is to grow low cost deposits (comprised of demand deposit accounts, interest and business checking accounts and traditional savings accounts). Asset growth in excess of low cost deposits is typically funded through higher cost deposits (comprised of money market accounts, commercial tiered rate or "investment savings" accounts and term certificates of deposit) and wholesale funding (brokered deposits and borrowed funds).

At September 30, 2014, deposits, excluding brokered deposits, amounted to \$1.68 billion, an increase of \$99.2 million, or 6%, from December 31, 2013 balances. Non-brokered deposit growth since December 31, 2013 was noted within the checking, primarily non-interest bearing accounts, and money market categories.
