NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2010

(Unaudited)

(Dollars in thousands, except per share amounts)

1. Basis of Presentation, Principles of Consolidation, and Use of Estimates

Basis of Presentation The accompanying unaudited condensed consolidated financial statements have been prepared by Alliance HealthCare Services, Inc. (the "Company") in accordance with accounting principles generally accepted in the United States of America and with the instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (including normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the quarter ended March 31, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes to the consolidated financial statements for the year ended December 31, 2009.

On January 1, 2009, the Company adopted Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 810, "Consolidation". ASC 810 requires, among other things, that cash flows related to noncontrolling interest in subsidiaries be presented in the financing section of the Statement of Cash Flows rather than the operating section for the quarter ended March 31, 2010. In conformity with the current year presentation, the Company reclassified Noncontrolling interest in subsidiaries from the operating section to the financing section of the Statement of Cash Flows for the three months ended March 31, 2009.

Principles of Consolidation The accompanying unaudited condensed consolidated financial statements of the Company include the assets, liabilities, revenues and expenses of all majority owned subsidiaries over which the Company exercises control. Intercompany transactions have been eliminated. The Company records noncontrolling interest related to its consolidated subsidiaries which are not wholly owned. Investments in non-consolidated investees are accounted for under the equity method.

Use of Estimates The preparation of condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

2. Transactions

During December 2009, the Company entered into and completed various debt related transactions in order to expand its borrowing capacity and extend the maturity of its debt (the "Refinance Transaction"). In order to accomplish this, the Company retired substantially all of its \$300,000 7¹/₄% senior subordinated notes due 2012 (the "7¹/₄% Notes") through a cash tender offer (the "Tender Offer") and repaid the balance of \$351,600 on its existing Tranche C1 term loan facility (the "Old Term Loan"). In conjunction with the Refinance Transaction, the Company entered into a new senior secured credit agreement (the "New Credit Facility"), comprised of a \$460,000 term loan (the "New Term Loan") maturing June 2016 and a \$120,000 revolving facility (the "New Revolving Credit Facility") maturing December 2014. Borrowings under the New Term Loan were issued at 98.0% of

(Unaudited)

(Dollars in thousands, except per share amounts)

2. Transactions (Continued)

par, with the discount to par being amortized to interest expense and other, net through the maturity date of the loan. Borrowings under the New Credit Facility bear interest through maturity at a variable rate based upon, at the Company's option, either London InterBank Offered Rate ("LIBOR") or the base rate (which is the highest of the administrative agent's prime rate, one-half of 1.00% in excess of the overnight federal funds rate, and 1.00% in excess of the one-month LIBOR rate), plus in each case, an applicable margin. With respect to the New Term Loan, the applicable margin for LIBOR loans is 3.50% per annum, and with respect to the New Revolving Credit Facility, the applicable margin for LIBOR loans ranges, based on the applicable leverage ratio, from 3.25% to 3.75% per annum, in each case, with a LIBOR floor of 2.00%. With respect to the New Term Loan, the applicable margin for base rate loans is 2.50% per annum, and with respect to the New Revolving Credit Facility, the applicable margin for base rate loans ranges, based on the applicable leverage ratio, from 2.25% to 2.75% per annum. The Company also issued \$190,000 of 8.0% senior notes due 2016 (the "8% Notes") in a transaction that was exempt from the registration requirements of the Securities Act of 1933, as amended. On April 29, 2010, the Company filed a registration statement with the Securities and Exchange Commission with respect to an offer to exchange the private 8% Notes for new 8% Notes with substantially similar terms registered under the Securities Act of 1933, as amended. The 8% Notes were issued at 98.69% of par, with the discount to par being amortized to interest expense and other, net through the maturity date of the notes. The Company used the proceeds from these transactions and existing cash to complete the Tender Offer and purchase \$294,418 of the 7¹/₄% Notes at a purchase price equal to 100.125% of the principal amount, together with the accrued interest to the redemption date. The Company also used the proceeds from these transactions to pay off the Old Term Loan and redeem the remaining \$5.6 million of 7¹/₄% Notes in January 2010 at a redemption price equal to 100.0% of the principal amount, together with accrued interest to the redemption date. The Company incurred a loss on extinguishment of debt of \$14,600 in December 2009 related to the Refinance Transaction, which represents the tender premium and consent payment to redeem the 7¹/₄% Notes, write-off of unamortized debt issuance costs related to the retired debt, and other fees and expenses.

3. Share-Based Payment

The Company adopted ASC 718, "Compensation Stock Compensation" in the fiscal year beginning January 1, 2006, using the modified prospective application transition method. Under ASC 718, the Company records in its consolidated statements of operations (i) compensation cost for options granted, modified, repurchased or cancelled on or after January 1, 2006 under the provisions of ASC 718 and (ii) compensation cost for the unvested portion of options granted prior to January 1, 2006 over their remaining vesting periods using the amounts previously measured under ASC 718 for pro forma disclosure purposes.

The Company has elected to follow the alternative transition method as described in ASC 718 for computing its beginning additional paid-in capital pool. In addition, the Company treats the tax deductions from stock options as being realized when they reduce taxes payable in accordance with the principles and timing under the relevant tax law.

March 31, 2010

(Unaudited)

(Dollars in thousands, except per share amounts)

3. Share-Based Payment (Continued)

Stock Option Plans and Awards

In November 1999, the Company adopted an employee stock option plan (the "1999 Equity Plan") pursuant to which options and awards with respect to a total of 6,325,000 shares of the Company's common stock became available for grant. On May 30, 2007, the Company adopted an amendment to the 1999 Equity Plan which increased the number of shares available to be awarded to 8,025,000 shares. On May 27, 2009, the Company adopted an amendment to the 1999 Equity Plan which increased the number of shares available to be awarded to 11,025,000 shares. As of March 31, 2010, a total of 1,977,462 shares were available for grant under the 1999 Equity Plan. Options are granted with exercise prices equal to the fair value of the Company's common stock at the date of grant, except as noted below. All options have 10-year terms. Options granted after January 1, 2008 are time options which vest 25% each year, over four years. For options granted prior to January 1, 2008, initial stock option grants were comprised 50% of "time options" and 50% of "performance options." The time options have a five-year vesting schedule, vesting 20% per year. The performance options cliff vest after eight years; however, in the event certain operating performance targets are met, up to 20% of the performance options may vest each year, accelerating the vesting period up to five years. During the year ended December 31, 2009, there were no options in which vesting was accelerated. Prior to January 1, 2008, subsequent stock options granted under the 1999 Equity Plan to employees were always time options which vest 5% in the first year, 20% in the second year and 25% in years three through five.

In November 2000, the Company granted stock options to certain employees at exercise prices below the fair value of the Company's common stock, of which 35,000 options were outstanding at March 31, 2010. The exercise prices of these options and the fair value of the Company's common stock on the grant date were \$5.60 and \$9.52 per share, respectively.

The Company uses the Black-Scholes option pricing model to value the compensation expense associated with share-based payment awards. The fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing model using the assumptions noted in the table below. In addition, forfeitures are estimated when recognizing compensation expense and the estimate of forfeitures will be adjusted over the requisite service period to the extent that actual forfeitures differ, or are expected to differ, from such estimates. Changes in estimated forfeitures will be recognized through a cumulative catch-up adjustment in the period of change and will also impact the amount of compensation expense to be recognized in future periods. The Company records share-based payments for stock options granted with exercise prices below the fair value of the Company's common stock at the date of grant and for certain stock options subject to amended performance targets under the 1999 Equity Plan, as discussed below.

Table of Contents

ALLIANCE HEALTHCARE SERVICES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2010

(Unaudited)

(Dollars in thousands, except per share amounts)

3. Share-Based Payment (Continued)

The following weighted average assumptions were used in the estimated grant date fair value calculations for stock option awards:

	Quarter Ended March 31,	
	2009	2010
Risk free interest rate	1.94%	3.12%
Expected dividend yield	0.00%	0.00%
Expected stock price volatility	60.2%	49.6%
Average expected life (in years)	6.25	6.25

The expected stock price volatility rate for the quarter ended March 31, 2010 was based on the historical volatility of the Company's common stock. The expected stock price volatility rate for the quarter ended March 31, 2009 was based on a blend of the historical volatility of the Company's common stock and peer implied volatility. The risk free interest rates are based on the U.S. Treasury yield curve in effect at the time of grant for periods corresponding with the expected life of the option or award. The average expected life represents the weighted average period of time that options or awards granted are expected to be outstanding, as calculated using the simplified method described in ASC 718, as the Company does not have sufficient historical exercise data to provide a reasonable basis upon which to estimate the expected term.

The following table summarizes the Company's stock option activity:

	Number of Shares	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at December 31, 2009	4,417,550	\$ 6.87		
Granted	664,000	5.71		
Exercised	(1,250)	4.19		
Canceled	(23,875)	6.60		
Outstanding at March 31, 2010	5,056,425	\$ 6.72	6.19	\$ 1,523
Vested and expected to vest in the future at March 31, 2010	4,826,192	\$ 6.70	6.11	\$ 1,498
Exercisable at March 31, 2010	3,002,325	\$ 6.59	4.76	\$ 1,319

The weighted average grant date fair value of options granted during the quarters ended March 31, 2009 and 2010 was \$4.63 per share and \$2.95 per share, respectively. The total intrinsic value of options exercised during the quarters ended March 31, 2009 and 2010 was \$44 and \$1, respectively. The total cash received from employees as a result of stock option exercises was \$42 and \$75 for the quarters ended March 31, 2009 and 2010, respectively.

Table of Contents**ALLIANCE HEALTHCARE SERVICES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****March 31, 2010****(Unaudited)****(Dollars in thousands, except per share amounts)****3. Share-Based Payment (Continued)**

The following table summarizes the Company's unvested stock option activity:

	Shares	Weighted Average Grant Date Fair Value
Unvested at		
December 31, 2009	1,953,675	\$ 4.37
Granted	664,000	2.95
Vested	(544,575)	4.44
Canceled	(19,000)	2.95
Unvested at March 31, 2010	2,054,100	\$ 3.91

At March 31, 2010, the total unrecognized fair value share-based payment related to unvested stock options granted to both employees and non-employees was \$6,297, which is expected to be recognized over a remaining weighted-average period of 2.58 years. The valuation model applied in this calculation utilizes highly subjective assumptions that could potentially change over time, including the expected forfeiture rate and performance targets. Therefore the amount of unrecognized share-based payment noted above does not necessarily represent the value that will ultimately be realized by the Company in the statements of operations. The total fair value of shares vested during the quarters ended March 31, 2009 and 2010 was \$1,838, and \$2,420, respectively.

Restricted Stock Awards

The 1999 Equity Plan, as amended and restated, permits the award of restricted stock, restricted stock units, stock bonus awards and performance-based awards. During 2008, the Company granted 290,000 restricted stock awards ("awards") to certain employees of the Company. During 2009, the Company granted 310,000 awards to certain employees and 66,016 awards to non-employees of the Company. During the first quarter of 2010, the Company granted 730,000 awards to certain employees of the Company. These awards cliff vest after one to five years, provided that the employee remains continuously employed and the non-employee continues service through the issuance date. On December 31, 2009, the Company granted restricted stock awards to three non-employee directors of the Company who are unaffiliated with Oaktree Capital Management, LLC ("Oaktree") and MTS Health Investors, LLC ("MTS") ("unaffiliated directors") equal to 13,672 of common stock each. These awards to unaffiliated directors cliff vest after one year based on the unaffiliated directors' continued service with the Company through that date. For the quarters ended March 31, 2009 and 2010, the Company recorded share-based payment related to restricted stock awards of \$673 and \$740, respectively. The weighted average grant date fair value of restricted stock awards granted during the quarters ended March 31, 2009 and 2010 was \$7.97 and \$5.71 per share, respectively.

Table of Contents**ALLIANCE HEALTHCARE SERVICES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****March 31, 2010****(Unaudited)****(Dollars in thousands, except per share amounts)****3. Share-Based Payment (Continued)**

The following table summarizes the Company's unvested restricted stock activity:

	Shares	Weighted Average Grant Date Fair Value
Unvested at		
December 31, 2009	601,016	\$ 7.11
Granted	730,000	5.71
Vested		
Canceled		
Unvested at March 31, 2010	1,331,016	\$ 6.34

At March 31, 2010, the total unrecognized fair value share-based payment related to restricted stock awards granted to employees was \$6,117, which is expected to be recognized over a remaining weighted-average period of 2.45 years. At March 31, 2010, the total unrecognized fair value share-based payment related to the restricted stock awards granted to unaffiliated directors was \$180, which is expected to be recognized over a remaining weighted-average period of 0.75 years. The unaffiliated directors will each receive a restricted stock award on December 31, 2010 and each December 31 thereafter (the "Grant Date") of the number of shares of common stock having a value equal to \$80, rounded down to the nearest whole share, and calculated using the average share price of the Company's stock over the fifteen-day period preceding the Grant Date. Such restricted stock awards will fully vest one year after the Grant Date based on the continued service of the non-employee director through the vesting date. The valuation model applied in this calculation utilizes highly subjective assumptions that could potentially change over time, including the expected forfeiture rate. Therefore the amount of unrecognized share-based payment noted above does not necessarily represent the amount that will ultimately be realized by the Company in the statements of operations.

Stock Bonus Award

During 2006 and 2007, the Company granted stock bonus awards to certain employees of the Company. On the issuance date, the Company issued a number of shares of the Company's common stock ("shares"), equal to the award divided by the fair market value of the shares at that time. During the first quarter ended March 31, 2009, the Company issued 125,470 shares related to the stock bonus awards granted in 2006. During the first quarter ended March 31, 2010, the Company issued 87,565 shares related to the stock bonus awards granted in 2007. For the quarter ended March 31, 2009, the Company recorded share-based payment related to these grants of \$42. There are no unvested stock bonus awards as of December 31, 2009.

4. Recent Accounting Pronouncements

Variable Interest Entities Accounting Standards Update ("ASU") No. 2009-17, "Improvements to Financial Reporting by Enterprises Involved With Variable Interest Entities" ("ASU 2009-17"), enhances the current guidance on disclosure requirements for companies with financial interest in a

Table of Contents

ALLIANCE HEALTHCARE SERVICES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2010

(Unaudited)

(Dollars in thousands, except per share amounts)

4. Recent Accounting Pronouncements (Continued)

variable interest entity. ASU 2009-17 replaces the quantitative-based risks and rewards calculation for determining which enterprise, if any, has a controlling financial interest in a variable interest entity with an approach focused on identifying which enterprise has the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance and (a) the obligation to absorb losses of the entity or (b) the right to receive benefits from the entity. ASU 2009-17 requires an additional reconsideration event when determining whether an entity is a variable interest entity when any changes in facts and circumstances occur such that the holders of the equity investment at risk, as a group, lose the power from voting rights or similar rights of those investments to direct the activities of the entity that most significantly impact the entity's economic performance. It also requires ongoing assessments of whether an enterprise is the primary beneficiary of a variable interest entity. ASU 2009-17 requires additional disclosures about an enterprise's involvement in variable interest entities. ASU 2009-17 is effective for fiscal years beginning after November 15, 2009, with early application prohibited. The Company adopted the provisions of ASU 2009-17 on January 1, 2010. The adoption of ASU 2009-17 did not have a material impact on the Company's results of operations, cash flows or financial position.

Fair Value of Financial Instruments ASU No. 2010-06, "Improving Disclosures about Fair Value Measurements" ("ASU 2010-06"), amends ASC 820 to add new requirements for disclosures about transfers into and out of Levels 1 and 2 and separate disclosures about purchases, sales, issuances, and settlements relating to Level 3 measurements. ASU 2010-06 also clarifies existing fair value disclosures about the level of disaggregation and about inputs and valuation techniques used to measure fair value. Further, ASU 2010-06 amends guidance on employers' disclosures about postretirement benefit plan assets under ASC 715 to require that disclosures be provided by classes of assets instead of by major categories of assets. ASU 2010-06 is effective for the first reporting period (including interim periods) beginning after December 15, 2009, except for the requirement to provide the Level 3 activity of purchases, sales, issuances, and settlements on a gross basis, which will be effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The Company adopted the provisions of ASU 2010-06 on January 1, 2010. The adoption of ASU 2010-06 did not have a material impact on the Company's results of operations, cash flows or financial position.

5. Fair Value of Financial Instruments

The Company used the following methods and assumptions in estimating fair value disclosure for financial instruments:

Cash and cash equivalents The carrying amounts reported in the balance sheet approximate fair value due to the short-term maturity or variable rates of these instruments.

Debt The fair value of the Company's fixed-rate debt was based on open bid/ask quotations of those notes at December 31, 2009 and March 31, 2010. The carrying amount of variable-rate borrowings at March 31, 2010 approximates fair value estimated based on current market rates and credit spreads for similar debt instruments.

ALLIANCE HEALTHCARE SERVICES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2010

(Unaudited)

(Dollars in thousands, except per share amounts)

5. Fair Value of Financial Instruments (Continued)

Derivative instruments Fair value was determined based on the income approach and standard valuation techniques to convert future amounts to a single present amount and approximates the net gains and losses that would have been realized if the contracts had been settled at each period-end.

The estimated fair values of the Company's financial instruments are as follows:

	December 31, 2009		March 31, 2010	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Cash and cash equivalents	\$ 111,884	\$ 111,884	\$ 114,197	\$ 114,197
Fixed-rate debt	193,115	184,189	187,600	175,750
Variable-rate debt	450,897	450,897	450,058	450,058
Derivative instruments asset position	59	59	1,271	1,271
Derivative instruments liability position	2,409	2,409	2,214	2,214

The Company adopted ASC 825, "Financial Instruments" on January 1, 2008. ASC 825 applies to all assets and liabilities that are being measured and reported on a fair value basis. ASC 825 requires disclosure that establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosure about fair value measurements. This statement enables the reader of the financial statements to assess the inputs used to develop those measurements by establishing a hierarchy for ranking the quality and reliability of the information used to determine fair values. The statement requires that assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

Level 1 Quoted market prices in active markets for identical assets or liabilities.

Level 2 Observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3 Unobservable inputs that are not corroborated by market data.

None of the Company's instruments have transferred from one level to another.

The following table summarizes the valuation of the Company's financial instruments that are reported at fair value on a recurring basis by the above ASC 825 pricing levels as of December 31, 2009:

	Total	Quoted market prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Cash and cash equivalents	\$ 111,884	\$ 111,884	\$	\$
Interest rate contracts liability position	2,409		2,409	
Fuel swap asset position	59			59

The following table summarizes the valuation of the Company's financial instruments that are reported at fair value on a recurring basis by the above ASC 825 pricing levels as of March 31, 2010:

	Total	Quoted market prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Cash and cash equivalents	\$ 114,197	\$ 114,197	\$	\$
Interest rate contracts asset position	1,269		1,269	
Interest rate contracts liability position	2,086		2,086	
Fuel swap asset position	2			2
Fuel swap liability position	128			128

The following table summarizes the Company's fair value measurements of derivative instruments using significant unobservable inputs (Level 3):

Balance as of December 31, 2009	\$ 59
Total gains or losses (realized/unrealized)	
Included in earnings	(56)
Included in other comprehensive income	(129)
Balance as of March 31, 2010	\$ (126)

The amount of total gains or losses for the period included in earnings attributable to the change in unrealized gains or losses relating to assets still held at the reporting date

	\$ (56)
--	---------

The Company's derivative instruments are primarily pay-fixed, receive-variable interest rate swaps and caps based on LIBOR swap rate. The Company has elected to use the income approach to value these derivatives, using observable Level 2 market expectations at measurement date and standard valuation techniques to convert future amounts to a single present amount assuming that participants are motivated, but not compelled to transact. Level 2 inputs for interest rate swap and cap valuations are limited to quoted prices for similar assets or liabilities in active markets (specifically futures contracts on LIBOR for the first two years) and inputs other than quoted prices that are observable for the asset or liability (specifically LIBOR cash and swap rates at commonly quoted intervals and implied volatilities for options). The Company has identified both a public and a private data source for use in valuing the Department of Energy ("DOE") diesel fuel swap. There appears to be a material difference in the pricing for diesel fuel contracts traded on NYMEX and the pricing that brokers make available to retail clients hedging changes in the DOE average national diesel fuel price as executed by the Company. As a result the Company has elected to use broker data available from its counterparty and informally corroborated by a second broker to fair value the diesel fuel swap. The March 31, 2010 over-the-counter forward rates were compared to the fixed rates executed by the Company for each forward date. The loss on each forward date was then present valued at LIBOR plus a credit spread of 3.5%. Mid-market pricing is used as a practical expedient for fair value measurements. ASC 820, "Fair

Table of Contents**ALLIANCE HEALTHCARE SERVICES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****March 31, 2010****(Unaudited)****(Dollars in thousands, except per share amounts)****5. Fair Value of Financial Instruments (Continued)**

Value Measurements and Disclosures" states that the fair value measurement of an asset or liability must reflect the nonperformance risk of the entity and the counterparty. Therefore, the impact of the counterparty's creditworthiness and the Company's creditworthiness has also been factored into the fair value measurement of the derivative instruments. For additional information please see Note 9 of the Notes to the Condensed Consolidated Financial Statements.

6. Goodwill and Intangible Assets

Changes in the carrying amount of goodwill are as follows:

Balance at January 1, 2009	\$ 193,430
Goodwill acquired during the period	378
Adjustments to goodwill during the period	435
Balance at December 31, 2009	194,243
Goodwill acquired during the period	
Adjustments to goodwill during the period	
Balance at March 31, 2010	\$ 194,243

Intangible assets consisted of the following:

	December 31, 2009			March 31, 2010		
	Gross Carrying Amount	Accumulated Amortization	Intangible Assets, net	Gross Carrying Amount	Accumulated Amortization	Intangible Assets, net
Amortizing intangible assets:						
Customer contracts	\$ 89,708	\$ (41,701)	\$ 48,007	\$ 89,512	\$ (43,647)	\$ 45,865
Other	16,407	(8,825)	7,582	18,592	(9,685)	8,907
Total amortizing intangible assets	\$ 106,115	\$ (50,526)	\$ 55,589	\$ 108,104	\$ (53,332)	\$ 54,772
Intangible assets not subject to amortization			44,599			42,385
Total other intangible assets			\$ 100,188			\$ 97,157

In accordance with ASC 350, "Intangibles Goodwill and Other", the Company has selected to perform an annual impairment test for goodwill and intangible assets with indefinite useful lives based on the financial information as of September 30, or more frequently when an

Edgar Filing: Alliance HealthCare Services, Inc - Form 10-Q

event occurs or circumstances change to indicate an impairment of these assets has possibly occurred. The Company compares the fair value of the reporting unit to its carrying amount to determine if there is potential impairment. No triggering events occurred during the fourth quarter of 2009 or the first quarter of 2010 which required additional impairment testing as of December 31, 2009 or March 31, 2010,

Table of Contents**ALLIANCE HEALTHCARE SERVICES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****March 31, 2010****(Unaudited)****(Dollars in thousands, except per share amounts)****6. Goodwill and Intangible Assets (Continued)**

respectively. In 2009 and the first quarter of 2010, the Company concluded that no impairment was present in its intangible assets. Goodwill is allocated to the Company's various reporting units.

The Company uses the estimated useful life to amortize customer contracts, which is a weighted average of 13 years. Other intangible assets subject to amortization are estimated to have a weighted average useful life of four years. Amortization expense for intangible assets subject to amortization was \$2,776 and \$2,806 for the quarters ended March 31, 2009 and 2010, respectively. The intangible assets not subject to amortization represent certificates of need and regulatory authority rights which have indefinite useful lives.

Estimated annual amortization expense for each of the fiscal years ending December 31, is presented below:

2010	\$ 11,160
2011	10,604
2012	8,977
2013	6,176
2014	4,506
2015	3,776

7. Other Accrued Liabilities

Other accrued liabilities consisted of the following:

	December 31, 2009	March 31, 2010
Accrued systems rental and maintenance costs	\$ 1,128	\$ 1,845
Accrued site rental fees	1,079	1,023
Accrued property and sales taxes payable	16,037	15,755
Accrued self-insurance expense	6,095	6,254
Other accrued expenses	8,548	9,266
Total	\$ 32,887	\$ 34,143

Table of Contents**ALLIANCE HEALTHCARE SERVICES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****March 31, 2010****(Unaudited)****(Dollars in thousands, except per share amounts)****8. Long-Term Debt and Senior Subordinated Credit Facility**

Long-term debt consisted of the following:

	December 31, 2009	March 31, 2010
Term loan facility	\$ 460,000	\$ 458,850
Discount on term loan facility of 5.88%	(9,103)	(8,792)
Senior subordinated notes	5,582	
Senior notes	190,000	190,000
Discount on senior notes of 8.25%	(2,467)	(2,400)
Equipment debt	23,878	22,380
Long-term debt, including current portion	667,890	660,038
Less current portion	16,902	10,978
Long-term debt	\$ 650,988	\$ 649,060

The remaining \$5,582 of the 7¹/₄% Notes were redeemed in January 2010 at a redemption price equal to 100% of the principal amount, together with accrued interest to the redemption date.

9. Derivatives

The Company accounts for derivative instruments and hedging activities in accordance with the provisions of ASC 815, "Derivatives and Hedging". Management generally designates derivatives in a hedge relationship with the identified exposure on the date the Company enters into a derivative contract, as disclosed below. The Company has only executed derivative instruments that are economic hedges of exposures that can qualify in hedge relationships under ASC 815. The Company formally documents all relationships between hedging instruments and hedged items, as well as the risk-management objective and strategy for undertaking various hedge transactions. In this documentation, the Company specifically identifies the firm commitment or forecasted transaction that has been designated as a hedged item and states how the hedging instrument is expected to hedge the risks related to the hedged item. The Company formally assesses effectiveness of its hedging relationships, both at the hedge inception and on an ongoing basis, then measures and records ineffectiveness. The Company would discontinue hedge accounting prospectively (i) if it is determined that the derivative is no longer effective in offsetting change in the cash flows of a hedged item, (ii) when the derivative expires or is sold, terminated or exercised, (iii) because it is probable that the forecasted transaction will not occur, or (iv) if management determines that designation of the derivative as a hedge instrument is no longer appropriate. The Company's derivatives are recorded on the balance sheet at their fair value. For additional information please see Note 5 of the Notes to the Condensed Consolidated Financial Statements. For derivatives accounted for as cash flow hedges, any effective unrealized gains or losses on fair value are included in comprehensive income (loss), net of tax, and any ineffective gains or losses are recognized in income immediately. Amounts recorded in comprehensive income (loss) are reclassified to earnings when the hedged item impacts earnings.

9. Derivatives (Continued)

Cash Flow Hedges

Interest Rate Cash Flow Hedges

The Company has entered into multiple interest rate swap and cap agreements to hedge the future cash interest payments on portions of its variable rate bank debt. For the quarters ended March 31, 2009 and 2010 the Company had interest rate swap and cap agreements to hedge approximately \$242,250 and \$242,719 of its variable rate bank debt, respectively, or 36.4% and 36.8% of total debt, respectively. Over the next twelve months, the Company expects to reclassify \$2,875 from accumulated other comprehensive loss to interest expense and other, net.

In the first quarter of 2008, the Company entered into two interest rate swap agreements in accordance with Company policy in order to avoid unplanned volatility in the income statement due to changes in the LIBOR interest rate environment. The swap agreements, with a total notional amount of \$185,438, were designated as cash flow hedges of future cash interest payments associated with a portion of the Company's variable rate bank debt (the "2008 swaps"). These agreements are three years in length and mature in January 2011. Under the terms of these agreements, the Company receives three-month LIBOR and pays a fixed rate of 3.15%. The net effect of the hedges was to record interest expense at a fixed rate of 5.65%, as the underlying debt incurred interest based on three-month LIBOR plus 2.50%. See below for additional information regarding the 2008 swaps. As discussed below, the Company elected to terminate and replace one of the 2008 swaps in the first quarter of 2009.

On September 15, 2008, Lehman Brothers Holdings, Inc. ("LHI") filed for bankruptcy protection under Chapter 11 of the United States Bankruptcy Code. On October 6, 2008, Lehman Commercial Paper, Inc. ("LCPI") filed for bankruptcy protection under Chapter 11 of the United States Bankruptcy Code. One of the Company's 2008 swaps with a notional amount of \$92,719 was with LCPI (the "Lehman Swap"). As of September 12, 2008, hedge accounting was terminated and all further changes in the fair market value of this swap were recorded in interest expense and other, net. Comprehensive income (loss) related to effective unrealized gains or losses on the fair value of the swap through September 12, 2008 will remain in accumulated comprehensive income (loss) on the balance sheet and will be amortized into interest expense and other, net through 2011 as the underlying interest payments are recognized in earnings. The swap was valued using the income approach with observable Level 2 market expectations at the measurement date and standard valuation techniques to convert future amounts to a single discounted present amount.

During the first quarter of 2009, the Company replaced the Lehman Swap with an interest rate swap agreement which has a notional amount of \$92,719 (the "2009 Swap Replacement") that has been designated as a cash flow hedge of variable future cash flows associated with a portion of the Company's long-term debt. Under the terms of this agreement, which matures in January 2011, the Company receives three-month LIBOR and pays a fixed rate of 3.15%. The net effect of the hedge is to record interest expense at a fixed rate of 5.65%, as the debt incurs interest based on three-month LIBOR plus 2.50%.

ALLIANCE HEALTHCARE SERVICES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2010

(Unaudited)

(Dollars in thousands, except per share amounts)

9. Derivatives (Continued)

Additionally, during the first quarter of 2009, the Company entered into an additional interest rate swap agreement which has a notional amount of \$56,813 that has been designated as a cash flow hedge of future interest payments associated with a portion of the Company's variable rate bank debt (the "New 2009 Swap"). Under the terms of this agreement, which was to mature in November 2011, the Company received three-month LIBOR and paid a fixed rate of 2.07%. The net effect of the hedge was to record interest expense at a fixed rate of 4.57%, as the underlying debt incurred interest based on three-month LIBOR plus 2.50%.

The Company elected to terminate one of the 2008 swaps and the New 2009 Swap in December 2009 in connection with entering into the Refinance Transaction on December 1, 2009. As a result of the Refinance Transaction, the Company de-designated the 2008 swap, the 2009 Swap Replacement and the New 2009 Swap and hedge accounting was terminated and all further changes in the fair market value of the terminated swaps are being recorded in interest expense and other, net. Comprehensive income (loss) related to effective unrealized gains or losses on the fair value of the terminated swaps through September 30, 2009 remain in accumulated comprehensive income (loss) on the balance sheet and will be amortized into interest expense and other, net as the underlying interest payments are recognized in earnings. The terminated swaps were valued using the income approach with observable Level 2 market expectations at the measurement date and standard valuation techniques to convert future amounts to a single discounted present amount.

In the first quarter of 2010, the Company entered into one interest rate swap agreement (the "2010 Swap") and three interest rate cap agreements, in accordance with Company policy, in order to avoid unplanned volatility in the income statement due to changes in the LIBOR interest rate environment. The 2010 Swap, which matures in January 2011, has a notional amount of \$92,719 and synthetically unwinds the effects of the 2009 Swap Replacement. The interest rate cap agreements, which mature in February 2014, have a total notional amount of \$150,000 and were designated as cash flow hedges of future cash interest payments associated with a portion of the Company's variable rate bank debt. Under these arrangements, the Company has purchased a cap on LIBOR at 4.50%. The Company paid \$1,537 to enter into the caps, which is being amortized through interest expense and other, net over the life of the agreements.

Diesel Fuel Cash Flow Hedges

The Company is exposed to market fluctuations in diesel fuel prices related to its mobile fleet. During the first quarter of 2009, the Company entered into a diesel fuel swap agreement which had a notional quantity of 1,008,000 gallons, or 84,000 gallons per month, to hedge future cash payments associated with the Company purchasing diesel fuel for its mobile fleet. Under the terms of this agreement, which matured in February 2010, the Company received the DOE published monthly average price per gallon and paid a fixed rate of two dollars and sixty-three cents per gallon. The Company designated this swap as a cash flow hedge of future cash flows associated with its diesel fuel payments. The swap was designated in a cash flow relationship in the month following execution. The loss from trade date to designation date was recorded in other (income) and expense, net. Post-designation, the Company recorded effective changes in the fair value of the swap through

Table of Contents**ALLIANCE HEALTHCARE SERVICES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****March 31, 2010****(Unaudited)****(Dollars in thousands, except per share amounts)****9. Derivatives (Continued)**

comprehensive income (loss) and reclassified gains or losses to fuel expense (included in cost of revenues, excluding depreciation and amortization) when the underlying fuel was purchased.

During the first quarter of 2010, the Company entered into a diesel fuel swap agreement which has a notional quantity of 1,008,000 gallons, or 84,000 gallons per month, to hedge future cash payments associated with the Company purchasing diesel fuel for its mobile fleet. Under the terms of this agreement, which matures in February 2011, the Company receives the DOE published monthly average price per gallon and pays a fixed rate of three dollars and twenty-five cents per gallon. The Company designated this swap as a cash flow hedge of future cash flows associated with its diesel fuel payments. The Company records effective changes in the fair value of the swap through comprehensive income (loss) and reclassifies gains or losses to fuel expense (included in cost of revenues, excluding depreciation and amortization) when the underlying fuel is purchased.

10. Income Taxes

For the quarter ended March 31, 2009, the Company recorded a provision for income taxes of \$3,161, or 42.2%, of the Company's pretax income. For the quarter ended March 31, 2010, the Company recorded an income tax benefit of \$613, or 22.1%, of the Company's pretax loss. The Company's effective tax rates differed from the federal statutory rate principally as a result of state income taxes and permanent non-deductible tax items, including share-based payments, unrecognized tax benefits and other permanent differences.

As of March 31, 2010, the Company has provided a liability for \$1,378 for unrecognized tax benefits related to various federal and state income tax matters. The tax effected amount would reduce the Company's effective income tax rate if recognized.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in income tax expense. As of March 31, 2010, the Company had approximately \$145 in accrued interest and penalties which is included as a component of the \$1,378 unrecognized tax benefit noted above.

The Company is subject to U.S. federal income tax as well as income tax of multiple state tax jurisdictions. The Company is currently open to audit under the statute of limitations by the Internal Revenue Service for the years ended December 31, 2006 through 2009. The Company's state income tax returns are generally open to audit under statutes of limitation for the years ended December 31, 2005 through 2009. The Company does not anticipate a significant change to the total amount of unrecognized tax benefits within the next 12 months.

11. Earnings Per Common Share

Effective January 1, 2009, the Company adopted ASC 260, "Earnings Per Share". ASC 260 addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and therefore need to be included in the earnings allocation in calculating earnings per share under the two-class method described in ASC 260. ASC 260 requires companies to treat unvested share-based payment awards that have non-forfeitable rights to dividend or dividend equivalents as a separate class of securities in calculating earnings per share. The Company granted and expects to continue to grant restricted stock awards to its officers and non-employee directors that contain non-forfeitable rights to dividends. Such awards are considered participating securities under ASC 260. As such, the Company is required to include these awards in the calculation of the Company's basic earnings per share and calculate basic earnings per share using the two-class method. Restricted stock awards have previously been included in the Company's dilutive earnings per share calculation using the treasury stock method. The two-class method of computing earnings per share is an earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. The Company has historically not paid and does not expect to pay dividends in the foreseeable future; however, the Company must still allocate undistributed earnings between common shareholders and participating securities based on the contractual rights of each security, as if all the earnings for the period have been distributed.

Basic net income per share is computed utilizing the two-class method and is calculated based on weighted-average number of common shares outstanding during the periods presented, excluding nonvested restricted stock units which do not contain nonforfeitable rights to dividend and dividend equivalents.

Diluted net income per share is computed using the weighted-average number of common and common equivalent shares outstanding during the periods utilizing the two-class method for stock options, nonvested restricted stock and nonvested restricted stock units. Potentially dilutive securities are not considered in the calculation of net loss per share as their impact would be anti-dilutive.

12. Commitments and Contingencies

The Company has applied the disclosure provisions of ASC 460, "Guarantees" to its agreements that contain guarantee or indemnification clauses. These disclosure provisions expand those required by ASC 440, "Commitments," and ASC 450, "Contingencies," by requiring a guarantor to disclose certain types of guarantees, even if the likelihood of requiring the guarantor's performance is remote. The following is a description of arrangements in which the Company is the guarantor or indemnifies a party.

In the normal course of business, the Company has made certain guarantees and indemnities, under which it may be required to make payments to a guaranteed or indemnified party, in relation to certain transactions. The Company indemnifies other parties, including customers, lessors, and parties to other transactions with the Company, with respect to certain matters. The Company has agreed to hold the other party harmless against losses arising from certain events as defined within the particular contract, which may include, for example, litigation or claims arising from a breach of representations or covenants. In addition, the Company has entered into indemnification agreements with its executive officers and directors and the Company's bylaws contain similar indemnification obligations. Under these arrangements, the Company is obligated to indemnify, to the fullest extent permitted under applicable law, its current or former officers and directors for various amounts incurred with respect to actions, suits or proceedings in which they were made, or threatened to be made, a party as a result of acting as an officer or director.

It is not possible to determine the maximum potential amount under these indemnification agreements due to the limited history of prior indemnification claims and the unique facts and circumstances involved in each particular agreement. Historically, payments made related to these indemnifications have been immaterial. At March 31, 2010, the Company has determined that no liability is necessary related to these guarantees and indemnities.

In connection with the Company's acquisition of Medical Outsourcing Services, LLC ("MOS") in the third quarter of 2008, Alliance subsequently identified a Medicare billing practice related to a portion of MOS's retail billing operations that raised compliance issues under Medicare reimbursement guidelines. The practice was in place prior to the acquisition and was discontinued when Alliance became aware of it. In accordance with its corporate compliance program, Alliance has entered into discussions with representatives of the federal government to advise them of the issue and seek guidance on appropriate next steps. The discussions are ongoing and no resolution has yet been reached. Although the government may seek repayment and penalties relating to the billing practice, the Company does not expect that such repayment and penalties, if imposed on the Company, would have a material impact on the Company's results of operations, cash flows or financial position because the Company believes the amounts it would owe will be substantially or fully off-set by recoveries under the indemnification provisions of the MOS acquisition purchase agreement.

The Company from time to time is involved in routine litigation and regulatory matters incidental to the conduct of its business. The Company believes that resolution of such matters will not have a material adverse effect on its consolidated results of operations or financial position.

Table of Contents**ALLIANCE HEALTHCARE SERVICES, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****March 31, 2010****(Unaudited)****(Dollars in thousands, except per share amounts)****13. Related-Party Transactions**

On April 16, 2007, Oaktree and MTS purchased 24,501,505 shares of the Company's common stock from a fund managed by an affiliate of Kohlberg Kravis Roberts & Co ("KKR"). Upon completion of the transaction, Oaktree and MTS owned in the aggregate approximately 49.7% of the outstanding shares of common stock of the Company. At March 31, 2010, Oaktree and MTS owned in the aggregate approximately 46.4% of the outstanding shares of common stock of the Company. The Company does not pay management fees to Oaktree and MTS for their financial advisory services to the Company.

Revenues from management agreements with unconsolidated equity investees were \$4,380 and \$3,382 during the first quarters of 2009 and 2010, respectively. The Company provides services as part of its ongoing operations for and on behalf of the unconsolidated equity investees, which are included in the management agreement revenue, who reimburse the Company for the actual amount of the expenses incurred. The Company records the expenses as costs of revenues and the reimbursement as revenue in its condensed consolidated statements of operations. For the quarters ended March 31, 2009 and 2010, the amounts of the revenues and expenses were \$3,491 and \$2,451, respectively.

14. Investments in Unconsolidated Investees

The Company has direct ownership in five unconsolidated investees at March 31, 2010. The Company owns between 33.3% and 50% of these investees, and provides management services under agreements with four of these investees, expiring at various dates through 2025. All of these investees are accounted for under the equity method since the Company does not exercise control over the operations of these investees.

Set forth below is certain financial data for Alliance-HNI, LLC and its subsidiaries, one of the Company's unconsolidated investees:

	December 31,		March 31,

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We are a leading national provider of outpatient diagnostic imaging services, based upon annual revenue and number of diagnostic imaging systems deployed, and are a provider of radiation oncology services. Our principal sources of revenue are derived from magnetic resonance imaging ("MRI") and positron emission tomography/computed tomography ("PET/CT"). We provide imaging and therapeutic services primarily to hospitals and other healthcare providers on a shared-service and full-time service basis. We also provide services through a growing number of fixed-site imaging centers, primarily to hospitals or health systems. Our services normally include the use of our imaging systems, technologists to operate the systems, equipment maintenance and upgrades and management of day-to-day shared-service and fixed-site diagnostic imaging operations. We also provide non scan-based services, which include only the use of our imaging systems under a short-term contract. We have also leveraged our leadership in MRI and PET/CT to expand into radiation oncology. Our radiation oncology business is operated through our wholly-owned subsidiary, Alliance Oncology, LLC ("AO"), and includes a wide range of services for cancer patients covering initial consultation, preparation for treatment, simulation of treatment, actual radiation oncology delivery, therapy management and follow-up care. Our services include the use of our linear accelerators, therapists to operate such systems, administrative staff, equipment maintenance and upgrades, and management of day-to-day operations. We also provide stereotactic radiation oncology services through our wholly-owned subsidiary, Alliance Radiosurgery, LLC.

MRI, PET/CT and radiation oncology services generated 45%, 41% and 9% of our revenue, respectively, for the quarter ended March 31, 2010 and 48%, 39% and 7% of our revenue, respectively, for the quarter ended March 31, 2009. Our remaining revenue was comprised of other modality diagnostic imaging services revenue, primarily computed tomography ("CT") and management contract revenue. We had 507 diagnostic imaging and radiation oncology systems, including 297 MRI systems and 125 positron emission tomography ("PET") or PET/CT systems, and served over 1,000 clients in 45 states at March 31, 2010. We operated 119 fixed-site imaging centers (three in unconsolidated joint ventures), which constitute systems installed in hospitals or other medical buildings on or near hospital campuses, including modular buildings, systems installed inside medical groups' offices, and free-standing fixed-site imaging centers, which include systems installed in a medical office building, ambulatory surgical center, or other retail space at March 31, 2010. Of the 119 fixed-site imaging centers, 93 were MRI fixed-site imaging centers, 19 were PET or PET/CT fixed-site imaging centers, four were other modality fixed-site imaging centers and three were in unconsolidated joint ventures. We also operated 25 radiation oncology centers and stereotactic radiosurgery facilities (including two radiation oncology centers in unconsolidated joint ventures) at March 31, 2010.

Approximately 81% and 80% of our revenues for each of the quarters ended March 31, 2010 and 2009, respectively, were generated by providing services to hospitals and other healthcare providers, which we refer to as wholesale revenues. Our wholesale revenues are typically generated from contracts that require our clients to pay us based on the number of scans we perform on patients on our clients' behalf, although some pay us a flat fee for a period of time regardless of the number of scans we perform. Wholesale payments are due to us independent of our clients' receipt of retail reimbursement from third-party payors, although receipt of reimbursement from third-party payors may affect demand for our services. We typically deliver our services for a set number of days per week through exclusive, long-term contracts with hospitals and other healthcare providers. The initial terms of these contracts average approximately three years in length for mobile services and approximately five to 10 years in length for fixed-site arrangements. These contracts often contain automatic renewal provisions and certain contracts have cancellation clauses if the hospital or other healthcare provider purchases their

Table of Contents

own system. We price our contracts based on the type of system used, the scan volume, and the number of ancillary services provided. Pricing is also affected by competitive pressures.

Approximately 19% and 20% of our revenues for each of the quarters ended March 31, 2010 and 2009, respectively, were generated by providing services directly to patients from our sites located at or near hospitals or other healthcare provider facilities, which we refer to as retail revenue. Our revenue from these sites is generated from direct billings to patients or their third-party payors, including Medicare, which are recorded net of contractual discounts and other arrangements for providing services at discounted prices. We typically charge a higher price per scan under retail billing than we do under wholesale billing.

Fixed-site imaging centers and radiation oncology centers can be structured as either wholesale or retail arrangements. Our contracts for radiation oncology services average approximately 10 to 20 years in length. Revenues from these centers are included in either our wholesale or retail revenues.

For services for which we bill Medicare directly, we are paid under the Medicare Physician Fee Schedule, which is updated on an annual basis. Under the Medicare statutory formula, payments under the Physician Fee Schedule would have decreased for the past several years if Congress failed to intervene. For example, for 2008, the fee schedule rates were to be reduced by approximately 10.1%. The Medicare, Medicaid and SCHIP Extension Act of 2007 eliminated the 10.1% reduction for 2008 and increased the annual payment rate update by 0.5%. This increase to the annual Medicare Physician Fee Schedule payment update was effective only for Medicare claims with dates of service between January 1, 2008 and June 30, 2008. Beginning July 1, 2008, under the Medicare Improvement for Patients and Providers Act of 2008 ("MIPPA"), the 0.5% increase was continued for the rest of 2008. In addition, MIPPA established a 1.1% increase to the Medicare Physician Fee Schedule payment update for 2009. For 2010, the Centers for Medicare and Medicaid Services ("CMS") are projecting a rate reduction of 21.2% unless Congress intervenes again to avoid the payment reduction. On December 19, 2009, President Obama signed into law the Department of Defense Appropriations Act, 2010 (H.R. 3326) which includes a zero percent Medicare physician update through February 28, 2010. This was further extended through March 31, 2010 and later through May 31, 2010 by the Temporary Extension Act of 2010 and the Continuing Extension Act of 2010, signed into law by President Obama on March 2, 2010 and April 15, 2010, respectively. If Congress fails to intervene to prevent the 21.2% rate reduction, the resulting decrease in payment will adversely impact our revenues and results of operations.

MIPPA also modified the methodology by which the budget neutrality formula was applied to the 2009 physician fee schedule payment rates, resulting in an overall reduction in payment rates for services performed by many specialties, including an estimated 3% reduction for radiation oncology and 1% reduction for nuclear medicine. The impact of the payment rates on specific companies depends on their service mix. We estimated decreases in rates for our radiation oncology business, but cannot predict the full impact the rate reductions will have on our future revenues or business. Also with respect to MIPPA, the legislation requires all suppliers that provide the technical component of diagnostic MRI, PET/CT, CT, and nuclear medicine to be accredited by an accreditation organization designated by CMS by January 1, 2012. On January 26, 2010, CMS initially approved the following designated accreditation organizations to accredit suppliers furnishing the technical component of all advanced imaging modalities (CT, nuclear medicine, PET and MRI) on or after January 1, 2010: The American College of Radiology (ACR), the Intersocietal Accreditation Commission (IAC) and The Joint Commission. All our facilities are accredited by The Joint Commission.

A number of other legislative changes impact our retail business. For example, the Deficit Reduction Act of 2005 ("DRA") imposed caps on Medicare payment rates for certain imaging services furnished in physician's offices and other non-hospital based settings. The caps impact MRI, PET/CT and certain imaging services performed in conjunction with radiation therapy, including certain image

Table of Contents

guided radiation therapy ("IGRT") services and diagnostic imaging services used to plan intensity modulated radiation therapy ("IMRT"). Under the cap, payments for specified imaging services cannot exceed the hospital outpatient payment rates for those services. This change applies to services furnished on or after January 1, 2007. The limitation is applicable to the technical components of the diagnostic imaging services only, which is the payment we receive for the services for which we bill directly under the Medicare Physician Fee Schedule. CMS issues on an annual basis the hospital outpatient prospective payment ("HOPPS") rates, which are used to develop the caps. If the technical component of the service established under the Physician Fee Schedule (without including geographic adjustments) exceeds the hospital outpatient payment amount for the service (also without including geographic adjustments), then the payment is to be reduced. In other words, in those instances where the technical component for the particular service is greater for the non-hospital site, the DRA directs that the hospital outpatient payment rate be substituted for the otherwise applicable Physician Fee Schedule payment rate. The implementation of this reimbursement reduction contained in the DRA had a significant effect on our financial condition and results of operations in 2007, whereas the changes in 2008, 2009 and the first quarter of 2010 have been limited.

The DRA also codified the reduction in reimbursement for multiple images on contiguous body parts, which was previously announced by CMS. The DRA mandated payment at 100% of the technical component of the higher priced imaging procedure and 50% for the technical component of each additional imaging procedure for multiple images of contiguous body parts within a family of codes performed in the same session. Initially, CMS announced that it would phase in this reimbursement reduction over a two-year period. CMS implemented only the initial 25% reduction for each additional imaging procedure on contiguous body parts beginning 2006. For services furnished on or after July 1, 2010, the recently enacted Patient Protection and Affordable Care Act, as amended by the Health Care and Education Affordability Reconciliation Act (collectively, the "PPACA"), requires CMS to implement the full 50% reduction as mandated by the DRA.

Regulatory updates to payment rates for which we bill the Medicare program directly are published annually by CMS. For payments under the Physician Fee Schedule for calendar year 2010, CMS changed the way it calculates components of the Medicare Physician Fee Schedule. As part of the changes, CMS reduced payment rates for certain diagnostic services using equipment costing more than \$1 million through revisions to usage assumptions from the current 50% usage rate to a 90% usage rate. An increase in usage rate generally corresponds to a decrease to the corresponding payment rate. This utilization change, to be phased in over a four-year period, applied to MRI and CT scans, but not for radiation therapy and other therapeutic equipment. The PPACA supersedes CMS's assumed usage rate for such equipment. Beginning on January 1, 2011, the PPACA requires CMS to use a 75% utilization rate. In addition, the Office of Inspector General has stated that for 2010, it intends to focus on, among other things, the practice expense components, including the equipment utilization rate, for certain imaging services reimbursed under Medicare Physician Fee Schedule to determine whether Medicare payment reflects the actual expenses incurred and whether the utilization rate reflects current industry practices.

Further with respect to its 2010 regulatory changes to the Medicare Physician Fee Schedule, in addition to the changes to the usage assumptions, CMS's changes to services primarily involving the technical component rather than the physician work component were adjusted downward. The reductions primarily impact radiology and other diagnostic tests, including the services we provide. Some of the changes to the Medicare Physician Fee Schedule are being transitioned over a four year period such that beginning in 2013, CMS will have fully implemented the revised payment rates. For the 2010 transition payment, CMS estimated that the impact of its changes (including the change in the usage assumption that has been superseded by PPACA) would result in a 1% reduction in radiation oncology, 5% reduction in radiology, 18% reduction in nuclear medicine and 12% reduction for all suppliers providing the technical component of diagnostic tests generally. These impacts are calculated

Table of Contents

prior to any application of the projected negative update factor of 21.2% related to MIPPA (which may be implemented in June 2010 unless Congress intervenes) and may impact our future revenues. The PPACA changes to the Medicare Physician Fee Schedule impact only the usage assumptions described above and therefore all other 2010 updates issued by CMS remain in place. If the CMS 2010 reimbursement rates had been in effect for full year 2009, we estimate that our annualized retail revenue related to MRI and radiation oncology would not have been materially impacted. At this time, we estimate that the new usage assumptions for MRI and CT scans under the PPACA, which is to take effect on January 1, 2011, will not have a material impact on our future retail revenues.

In addition to annual updates to the Medicare Physician Fee Schedule, as indicated above, CMS also publishes regulatory changes to the HOPPS on an annual basis. These payments are the amounts received by our hospital clients for hospital outpatient services. For 2008, the national Medicare HOPPS payment rate for nonmyocardial PET and PET/CT scans was \$1,057 per scan and the national payment rate for myocardial PET scans was \$1,400 per scan. Effective January 1, 2008, CMS also bundled the PET and PET/CT payment for radiopharmaceuticals with the payment for the PET and PET/CT scan. In addition, CMS reduced the 2008 national Medicare HOPPS rate for MRI scans by approximately 3%. The 2008 national Medicare HOPPS payment rates for stereotactic radiosurgery treatment delivery services ranged from \$1,057 to \$8,055, depending on the level of service. For 2009, the payment rate for nonmyocardial PET and PET/CT scans was \$1,037 per scan. For myocardial PET procedures, the 2009 payment rate was \$1,157 per scan. For stereotactic radiosurgery treatment delivery services, the 2009 payment rates ranged from \$952 to \$7,642, depending on the level of service. On October 30, 2009, CMS released its 2010 national Medicare HOPPS payment rates, which went into effect January 1, 2010. For nonmyocardial PET and PET/CT, the 2010 payment rate is \$1,037 per scan. For myocardial PET procedures, the 2010 payment rate is \$1,433 per scan. For stereotactic radiosurgery treatment delivery services, the 2010 payment rates range from \$963 to \$7,344, depending on the level of service.

Combined, the DRA and PET and PET/CT Medicare HOPPS rate reductions did not have a material negative effect on revenue and earnings in 2008, 2009 or the first quarter of 2010. At this time, however, we cannot predict the impact the rate reductions will have on our future revenues or business.

Furthermore, with respect to the final Medicare Physician Fee Schedule Rule for calendar year 2009, CMS announced additional performance standards for suppliers of mobile diagnostic services. The final rule requires suppliers of mobile diagnostic services under certain circumstances to enroll in Medicare and bill directly for these services, regardless of where they are performed. An exception was made for services provided to hospital patients under arrangement with that hospital. In those circumstances, the mobile diagnostic facility would be required to enroll in Medicare, but the hospital would bill for the services. On December 15, 2008, CMS issued additional guidance that companies that lease or contract with a Medicare-enrolled provider or supplier to provide only diagnostic testing equipment and/or non-physician personnel are not required to enroll in Medicare. The agency nonetheless indicated that it is continuing to evaluate such arrangements. These policies have not significantly impacted our business.

Over the past few years, the growth rate of MRI industry wide scan volumes has slowed in part due to weak hospital volumes as reported by several investor-owned hospital companies, a growing number of medical groups adding imaging capacity within their practice setting and additional patient-related cost-sharing programs. In addition, there is an increasing trend of third-party payors intensifying their utilization management efforts, for example through benefit managers who require preauthorizations, to control the growth rate of imaging services generally. We expect that these trends will continue throughout 2010. In addition, we cannot predict the full extent of the PPACA on our business. The legislation substantially changes the way health care is financed by both governmental and private insurers and may negatively impact payment rates for certain imaging services. Nor can we

Table of Contents

predict at this time whether or the extent to which other proposed changes will be adopted, if any, or how these or future changes will affect the demand for our services.

We have experienced and continue to experience an increase in the competitive climate in the MRI industry, resulting in an increase in activity by original equipment manufacturers, or OEMs, selling systems directly to certain of our clients. Typically, OEMs target our higher scan volume clients. This increase in activity by OEMs has resulted in overcapacity of systems in the marketplace. This has caused an increase in the number of our higher scan volume clients deciding not to renew their contracts. We replace lost higher volume clients typically with lower volume clients. Our non-scan based MRI business has been impacted by a decline in the number of hospital construction projects, driven by a decrease in new MRI systems being added by hospitals in their facilities and a decrease in the number of equipment upgrades occurring in the hospital market. Our MRI revenues decreased in the first three months of 2010 compared to 2009 due to the factors described above, and we believe that MRI revenues will continue to decline in future years.

Recent global market and economic conditions have been unprecedented and challenging with tighter credit conditions and recession in most major economies continuing into 2010. Continued concerns about the systemic impact of potential long-term and wide-spread recession, inflation, energy costs, geopolitical issues, the availability and cost of credit, the United States mortgage market and a declining real estate market in the United States have contributed to increased market volatility and diminished expectations for the United States economy. Added concerns fueled by the United States government financial assistance to certain companies and other federal government's interventions in the United States financial system has led to increased market uncertainty and instability in both United States and international capital and credit markets. These conditions, combined with volatile oil prices, declining business and consumer confidence, increased unemployment, increased tax rates and governmental budget deficits and debt levels have contributed to volatility of unprecedented levels. We believe our MRI and PET/CT scan volumes have been impacted during 2009 and the first three months of 2010 and will continue to be impacted in the remainder of 2010 by rising unemployment rates, the number of under-insured or uninsured patients and other conditions arising from the global economic conditions described above. At this time, it is unclear what impact this might have on our future revenues or business.

As a result of these market conditions, the cost and availability of credit has been and may continue to be adversely affected by illiquid credit markets and wider credit spreads. Concern about the stability of the markets generally and the strength of counterparties specifically has led many lenders and institutional investors to reduce, and in some cases, cease to provide funding to borrowers. Continued turbulence in the United States and international markets and economies may adversely affect our liquidity and financial condition, and the liquidity and financial condition of our customers. If these market conditions continue, they may limit our ability to timely access the capital markets to meet liquidity needs, resulting in adverse effects on our financial condition and results of operations.

The principal components of our cost of revenues are compensation paid to technologists, radiation therapists and drivers, as well as, system maintenance costs, medical supplies, system transportation and technologists' travel costs. Because a majority of these expenses are fixed, decreased revenues as a result of lower scan volumes per system significantly impacts our margins while higher scan volumes would result in improved margins.

The principal components of selling, general and administrative expenses are sales and marketing costs, corporate overhead costs, provision for doubtful accounts, and share-based payment.

We record noncontrolling interest and earnings from unconsolidated investees related to our consolidated and unconsolidated subsidiaries, respectively. These subsidiaries primarily provide shared-service and fixed-site diagnostic imaging and therapeutic services.

Table of Contents**Seasonality**

We experience seasonality in the revenues and margins generated for our services. First and fourth quarter revenues are typically lower than those from the second and third quarters. First quarter revenue is affected primarily by fewer calendar days and inclement weather, typically resulting in fewer patients being scanned during the period. Fourth quarter revenues are affected by holiday and client and patient vacation schedules, resulting in fewer scans during the period. The variability in margins is higher than the variability in revenues due to the fixed nature of our costs. The Company also experiences fluctuations in the revenues and margins generated due to acquisition activity and general economic conditions, including the high unemployment rate, recession or economic slowdown.

Results of Operations

The following table shows our consolidated statements of operations as a percentage of revenues for each of the quarters ended March 31:

	Quarter Ended March 31,	
	2009	2010
Revenues	100.0%	100.0%
Costs and expenses:		
Cost of revenues, excluding depreciation and amortization	52.3	55.0
Selling, general and administrative expenses	13.7	13.6
Transaction costs	0.3	0.3
Severance and related costs	0.1	0.4
Depreciation expense	17.9	19.9
Amortization expense	2.1	2.4
Interest expense and other, net	8.1	11.2
Other (income) and expense, net	(0.2)	(0.3)
Total costs and expenses	94.3	102.5
Income (loss) before income taxes (benefit), earnings from unconsolidated investees and noncontrolling interest, net of tax	5.7	(2.5)
Income tax expense (benefit)	2.4	(0.5)
Earnings from unconsolidated investees	(0.4)	(0.8)
Net income (loss)	3.7	(1.2)
Less: Net income attributable to noncontrolling interest, net of tax	(0.5)	(0.6)
Net income (loss) attributable to Alliance HealthCare Services, Inc.	3.2%	(1.8)%

The table below provides MRI statistical information for each of the quarters ended March 31:

	2009	2010
MRI statistics		
Average number of total systems	285.4	274.3
Average number of scan-based systems	242.2	233.1
Scans per system per day (scan-based systems)	9.13	8.20
Total number of scan-based MRI scans	147,656	122,580
Price per scan	\$ 380.99	\$ 390.32

Table of Contents

The table below provides PET and PET/CT statistical information for each of the quarters ended March 31:

	2009	2010
PET and PET/CT statistics		
Average number of systems	110.5	119.1
Scans per system per day	6.15	5.80
Total number of PET and PET/CT scans	45,113	44,231
Price per scan	\$ 1,116	\$ 1,075

Following are the components of revenue (in millions) for each of the quarters ended March 31:

	2009	2010
Total MRI revenue	\$ 62.6	\$ 53.0
PET/CT revenue	51.0	48.3
Radiation Oncology revenue	8.9	10.8
Other modalities and other revenue	9.3	6.6
Total	\$ 131.8	\$ 118.7

	2009	2010
Total fixed-site imaging center revenue (in millions) for each of the quarters ended March 31:	\$ 29.1	\$ 27.5

Quarter Ended March 31, 2010 Compared to Quarter Ended March 31, 2009

Revenue decreased \$13.1 million, or 10.0%, to \$118.7 million in the first quarter of 2010 compared to \$131.8 million in the first quarter of 2009 due to a decrease in MRI revenues, PET/CT revenues and other modalities and other revenue, partially offset by an increase in radiation oncology revenues. MRI revenue decreased \$9.6 million in the first quarter of 2010, or 15.4%. Scan-based MRI revenue decreased \$8.4 million in the first quarter of 2010, or 14.9%, compared to the first quarter of 2009, to \$47.9 million in the first quarter of 2010 from \$56.3 million in the first quarter of 2009. Scan-based MRI scan volume decreased 17.0% to 122,580 scans in the first quarter of 2010 from 147,656 scans in the first quarter of 2009, primarily due to a decrease in client demand and the increase in the unemployment rate over 2009, and the related increase of uninsured and under-insured patients. The average number of scan-based systems in service decreased to 233.1 systems in the first quarter of 2010 from 242.2 systems in the first quarter of 2009. Average scans per system per day decreased by 10.2% to 8.20 in the first quarter of 2010 from 9.13 in the first quarter of 2009. These decreases were partially offset by an increase in the average price per MRI scan. The average price per MRI scan increased to \$390.32 per scan in the first quarter of 2010 from \$380.99 per scan in the first quarter of 2009. Non scan-based MRI revenue decreased \$1.2 million in the first quarter of 2010 over the same period in 2009 primarily due to a decline in the number of hospital construction projects and a decrease in the number of equipment upgrades occurring in the hospital market, both of which impact the demand for our non-scan based MRI business. PET and PET/CT revenue in the first quarter of 2010 decreased \$2.7 million, or 5.4%, compared to the first quarter of 2009. Total PET and PET/CT scan volumes decreased 2.0% to 44,231 scans in the first quarter of 2010 from 45,113 scans in the first quarter of 2009, primarily due to a decrease in client demand and the increase in the unemployment rate over 2009, and the related increase of uninsured and under-insured patients. Scans per system per day decreased 5.7% to 5.80 scans per system per day in the first quarter of 2010 from 6.15 scans per system per day in the first quarter of 2009. The average price per PET and PET/CT scan decreased to \$1,075 per scan in the first quarter of 2010 compared to \$1,116 per scan in the first quarter of 2009. The average number of PET and PET/CT systems in service increased to 119.1 systems in the first quarter

Table of Contents

of 2010 from 110.5 systems in the first quarter of 2009. Other modalities and other revenue decreased \$2.7 million, or 28.5%, to \$6.6 million in the first quarter of 2010 compared to \$9.3 million in the first quarter of 2009, primarily due to a decrease in management fee revenue. Radiation oncology revenue increased \$1.9 million, or 21.2%, to \$10.8 million in the first quarter of 2010 compared to \$8.9 million in the first quarter of 2009, primarily due to an increase in treatments performed in our core radiation oncology business. Included in the revenue totals above is fixed-site imaging center revenues, which decreased \$1.6 million, or 5.6%, to \$27.5 million in the first quarter of 2010 from \$29.1 million in the first quarter of 2009.

We had 297 MRI systems at March 31, 2010, compared to 294 MRI systems at March 31, 2009. We had 125 PET and PET/CT systems at March 31, 2010, compared to 119 PET and PET/CT systems at March 31, 2009. We operated 119 fixed-site imaging centers (including three in unconsolidated investees) at March 31, 2010, compared to 106 fixed-site imaging centers (including four in unconsolidated investees) at March 31, 2009. We operated 25 radiation oncology centers (including two in unconsolidated investees) at March 31, 2010, compared to 22 radiation oncology centers (including two in unconsolidated investees) at March 31, 2009.

Cost of revenues, excluding depreciation and amortization, decreased \$3.7 million, or 5.3%, to \$65.2 million in the first quarter of 2010 compared to \$68.9 million in the first quarter of 2009. Compensation and related employee expenses decreased \$3.1 million, or 9.4%, primarily as a result of a decrease in average headcount. Management contract expense decreased \$1.0 million, or 29.8%, as a result of a decrease in expenses incurred on behalf of unconsolidated investees. Medical supplies decreased \$0.3 million, or 3.7%, primarily as a result of a decrease in the number of PET and PET/CT scans, which use a radiopharmaceutical as a component of the PET and PET/CT scan. Maintenance and related costs increased \$1.5 million, or 11.1%, due to an increase in service costs related to an increase in the number of MRI, PET/CT and radiation oncology systems in operation and one-time maintenance costs incurred in the first quarter of 2010. All other cost of revenues, excluding depreciation and amortization, decreased \$0.8 million, or 7.6%. Cost of revenues, as a percentage of revenue, increased to 55.0% in the first quarter of 2010 from 52.3% in the first quarter of 2009 as a result of the factors described above.

Selling, general and administrative expenses decreased \$1.8 million, or 9.9%, to \$16.1 million in the first quarter of 2010 compared to \$17.9 million in the first quarter of 2009. Compensation and related employee expenses decreased \$0.9 million, or 8.0%, primarily as a result of a decrease in average headcount. The provision for doubtful accounts decreased \$0.6 million, or 130.2%, primarily due to the collection of aged accounts receivable during the first quarter of 2010. The provision for doubtful accounts as a percentage of revenue was (0.1)% in the first quarter of 2010 compared to 0.4% of revenue in the first quarter of 2009. Share-based payments decreased \$0.1 million in the first quarter of 2010 from the first quarter of 2009 due to equity awards that fully vested and were fully expensed in 2009. All other selling, general and administrative expenses decreased \$0.2 million, or 3.5%. Selling, general and administrative expenses as a percentage of revenue were 13.6% and 13.7% in the first quarter of 2010 and 2009, respectively.

We recorded transaction costs of \$0.4 million in the first quarters of 2010 and 2009.

We recorded severance and related costs of \$0.5 million in the first quarter of 2010 compared to \$0.2 million in the first quarter of 2009.

Depreciation expense was \$23.7 million in the first quarters of 2010 and 2009.

Amortization expense was \$2.8 million in the first quarters of 2010 and 2009.

Interest expense and other, net, increased \$2.6 million, or 24.6%, to \$13.3 million in the first quarter of 2010 compared to \$10.6 million in the first quarter of 2009, primarily due a \$0.9 million expense from a non-cash fair value adjustment related to our interest rate swap agreements, which were de-designated in 2009, higher average interest rates on our credit facility and notes and an

Table of Contents

\$0.8 million non-cash fair value adjustment related to our interest rate swap agreement with Lehman Commercial Paper, Inc. ("LCPI") in 2009, which reduced the 2009 expense.

Income tax benefit was \$0.6 million in the first quarter of 2010 compared to income tax expense of \$3.2 million in the first quarter 2009, resulting in effective tax rates of 22.1% and 42.2% in the first quarters of 2010 and 2009, respectively. Our effective tax rates differed from the federal statutory rate principally as a result of state income taxes and permanent non-deductible tax items, including share-based payments, unrecognized tax benefits and other permanent differences.

Earnings from unconsolidated investees increased by \$0.3 million, or 54.5%, to \$0.9 million in the first quarter of 2010 compared to \$0.6 million in the first quarter of 2009 due to an increase in earnings from our unconsolidated investees.

Net income attributable to noncontrolling interest, net of tax, was \$0.7 million in the first quarters of 2010 and 2009.

Net loss attributable to Alliance HealthCare Services, Inc. was \$2.2 million, or \$(0.04) per share on a diluted basis, in the first quarter of 2010 compared to net income of \$4.3 million, or \$0.08 per share on a diluted basis, in the first quarter of 2009.

Liquidity and Capital Resources

Our primary source of liquidity is cash provided by operating activities. We generated \$30.7 million and \$32.9 million of cash flow from operating activities in the first quarters of 2010 and 2009, respectively. Our ability to generate cash flow is affected by numerous factors, including demand for MRI, PET/CT, other diagnostic imaging and radiation oncology services. Our ability to generate cash flow from operating activities is also dependent upon the collections of our accounts receivable. The provision for doubtful accounts decreased by \$0.6 million in the first quarter of 2010 compared to the first quarter of 2009. Our number of days of revenue outstanding for our accounts receivable was 48 days and 50 days as of March 31, 2010 and 2009, respectively, which we believe is favorable compared to other diagnostic imaging and radiation oncology providers. In addition, as of March 31, 2010, we had \$115.6 million of available borrowings under our revolving line of credit.

We used cash of \$18.9 million and \$12.0 million for investing activities in the quarters ended March 31, 2010 and 2009, respectively. Investing activities in the first quarter of 2009 include \$0.6 million which was used for acquisitions. Investing activities in the first quarter of 2009 also include \$2.1 million in cash provided by a decrease in cash in escrow. We expect to continue to use cash for acquisitions in the future. Other than acquisitions, our primary use of capital resources is to fund capital expenditures. We incur capital expenditures for the purposes of:

purchasing new systems;

replacing less advanced systems with new systems; and

providing upgrades of our MRI, PET and PET/CT, and radiation oncology systems and upgrading our corporate infrastructure for future growth.

Capital expenditures totaled \$20.2 million and \$14.9 million in the quarters ended March 31, 2010 and 2009, respectively. During the first quarter of 2010, we purchased eight MRI systems and one PET/CT system. We traded-in or sold a total of thirteen systems for the quarter ended March 31, 2010. Our decision to purchase a new system is typically predicated on obtaining new or extending existing client contracts, which serve as the basis of demand for the new system. We expect to purchase additional systems in 2010 and finance substantially all of these purchases with our available cash, cash from operating activities, our revolving line of credit, and equipment leases. Based upon the client demand described above, which dictates the type of equipment purchased, we expect cash capital expenditures to total approximately \$65 to \$75 million in 2010.

Table of Contents

At March 31, 2010, we had cash and cash equivalents of \$114.2 million. This available cash and cash equivalents are held in accounts managed by third party financial institutions and consist of invested cash and cash in our operating accounts. The invested cash is invested in interest bearing funds managed by third party financial institutions. These funds invest in high-quality money market instruments, primarily direct obligations of the government of the United States. To date, we have experienced no loss or lack of access to our invested cash or cash equivalents; however, we can provide no assurances that access to our invested cash and cash equivalents will not be impacted by adverse conditions in the financial markets.

At March 31, 2010, we had \$109.2 million in our accounts that are with third party financial institutions which exceed the Federal Deposit Insurance Corporation ("FDIC") insurance limits. While we monitor daily the cash balances in our operating accounts and adjust the cash balances as appropriate, these cash balances could be impacted if the underlying financial institutions fail or could be subject to other adverse conditions in the financial markets. To date, we have experienced no loss or lack of access to cash in our operating accounts.

We believe that, based on current levels of operations, our cash flow from operating activities, together with other available sources of liquidity, including borrowings available under our revolving line of credit, will be sufficient over the next one to two years to fund anticipated capital expenditures and potential acquisitions and make required payments of principal and interest on our debt. As of March 31, 2010, we are in compliance with all covenants contained in our long-term debt agreements and expect that we will be in compliance with these covenants for the remainder of 2010.

Recent Accounting Pronouncements

For a discussion of recent accounting pronouncements, please refer to Note 4 of the Notes to Condensed Consolidated Financial Statements.

Cautionary Statement Pursuant to the Private Securities Litigation Reform Act of 1995

Certain statements contained in Management's Discussion and Analysis of Financial Condition and Results of Operations, particularly in the sections entitled "Overview," "Results of Operations" and "Liquidity and Capital Resources," and elsewhere in this quarterly report on Form 10-Q, are "forward-looking statements," within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Statements which address activities, events or developments that we expect or anticipate will or may occur in the future, including such things as results of operations and financial condition, capital expenditures, economic trends, demand for our services, the consummation of acquisitions and financing transactions and the effect of such transactions on our business and our plans and objectives for future operations and expansion, are examples of forward-looking statements. In some cases you can identify these statements by forward-looking words like "may," "will," "should," "expect," "plan," "anticipate," "believe," "estimate," "predict," "seek," "intend," "continue" or similar words. These forward-looking statements are subject to risks and uncertainties which could cause actual outcomes and results to differ materially from our expectations, forecasts and assumptions. These risks and uncertainties include factors affecting our leverage, including fluctuations in interest rates, the risk that the counter-parties to our interest rate swap agreements fail to satisfy their obligations under these agreements, our ability to incur financing, the effect of operating and financial restrictions in our debt instruments, the accuracy of our estimates regarding our capital requirements, the effect of intense levels of competition in our industry, fluctuations or unpredictability of our revenue, including as a result of seasonality, changes in the rates or methods of third party reimbursements for diagnostic imaging and radiation oncology services, changes in the healthcare regulatory environment, our ability to keep pace with technological developments within our industry, the growth in the market for MRI and other services, the disruptive effect of hurricanes and other natural disasters, adverse changes in general domestic and worldwide economic conditions and instability and disruption of credit markets, difficulties we may face in connection with recent, pending

Table of Contents

or future acquisitions, including unexpected costs or liabilities resulting from acquisitions, diversion of management's attention from the operation of the business and our ability to integrate acquisitions, and other risks and uncertainties, including those enumerated and described under "Risk Factors" below and in our Form 10-K, as filed with the Securities and Exchange Commission, for the fiscal year ended December 31, 2009. The foregoing should not be construed as an exhaustive list of all factors which could cause actual results to differ materially from those expressed in forward-looking statements made by us.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We provide our services exclusively in the United States and receive payment for our services exclusively in United States dollars. As a result, our financial results are unlikely to be affected by factors such as changes in foreign currency exchange rates or weak economic conditions in foreign markets.

Our interest expense is sensitive to changes in the general level of interest rates in the United States, particularly because the majority of our indebtedness has interest rates which are variable. The recorded carrying amount of our long-term debt under our New Credit Facility approximates fair value as these borrowings have variable rates that reflect currently available terms and conditions for similar debt. To decrease the risk associated with interest rate increases, we have entered into multiple interest rate swap and cap agreements for a portion of our variable rate debt. These swaps and caps are designated as cash flow hedges of variable future cash flows associated with our long-term debt.

During the first quarter of 2008, we entered into two interest rate swap agreements, with notional amounts of \$92.7 million each, to hedge future cash interest payments associated with a portion of our variable rate bank debt (the "2008 swaps"). Under the terms of these agreements, we receive three-month LIBOR and pay a fixed rate of 3.15%. The net effect of the hedges was to record interest expense at a fixed rate of 5.65%, as the underlying debt incurred interest based on three-month LIBOR plus 2.50%. For the quarter ended March 31, 2009, we received a net settlement amount of \$0.1 million on these swap agreements. The 2008 swaps are three years in length and mature in 2011. See below for additional information regarding the 2008 swaps. As discussed below, we elected to terminate and replace one of the 2008 swaps in the first quarter of 2009.

On September 15, 2008, LHI filed for bankruptcy protection under Chapter 11 of the United States Bankruptcy Code. On October 6, 2008, LCPI filed for bankruptcy protection under Chapter 11 of the United States Bankruptcy Code. One of our 2008 swaps with a notional amount of \$92.7 million, which expires January 31, 2011, is with LCPI ("the Lehman Swap"). As of September 12, 2008 hedge accounting was terminated and all further changes in the fair market value of the Lehman Swap are being recorded in interest expense and other. Comprehensive income (loss) related to effective unrealized gains or losses on the fair value of the Lehman Swap through September 12, 2008 remain in accumulated comprehensive income (loss) on the balance sheet and will be amortized into interest expense and other as the underlying interest payments are recognized in earnings. The Lehman Swap was valued using the income approach with observable Level 2 market expectations at the measurement date and standard valuation techniques to convert future amounts to a single discounted present amount. The fair market value of the Lehman Swap at September 30, 2008 was an asset of \$0.7 million, which was adjusted to zero as collectability was deemed uncertain due to the LHI bankruptcy filing. We included the write down of the asset in interest expense and other for the year ended December 31, 2008. For the last three quarters of 2008, we included \$2.4 million in interest expense and other, net related to the fair value adjustment for this swap as we did not expect LCPI to fulfill their obligations under the swap agreement. As a result, we terminated the Lehman Swap in February 2009. We paid \$2.2 million for the remaining fair market value of the swap at the date of termination.

Table of Contents

During the first quarter of 2009, we replaced the Lehman Swap with an interest rate swap agreement which has a notional amount of \$92.7 million (the "2009 Swap Replacement") and has been designated as a cash flow hedge of variable future cash flows associated with a portion of our long term debt. Under the terms of this agreement, which matures in January 2011, we receive three-month LIBOR and pay a fixed rate of 3.15%. The net effect of the hedge is to record interest expense at a fixed rate of 5.65%, as the debt incurs interest based on three-month LIBOR plus 2.50%. We received \$2.2 million in cash based on the terms of the agreement.

Additionally, during the first quarter of 2009, we entered into an interest rate swap agreement, which has a notional amount of \$56.8 million, to hedge future cash interest payments associated with a portion of our variable rate bank debt (the "New 2009 Swap"). Under the terms of this agreement, which was to mature in November 2011, we received three-month LIBOR and paid a fixed rate of 2.07%. The net effect of the hedge was to record interest expense at a fixed rate of 4.57%, as the debt incurred interest based on three-month LIBOR plus 2.50%. For the quarter ended March 31, 2010, we paid a net settlement amount of \$0.7 million on this swap agreement. For the quarter ended March 31, 2009, we did not receive any net settlement amount on this swap agreement.

We elected to terminate one of the 2008 swaps and the New 2009 Swap in December 2009 in connection with entering into the Refinance Transaction on December 1, 2009. As a result of the Refinance Transaction, we de-designated the 2008 swap, the 2009 Swap Replacement and the New 2009 Swap and hedge accounting was terminated and all further changes in the fair market value of the terminated swaps are being recorded in interest expense and other. We paid \$3.3 million and \$1.4 million for the remaining fair market value of the 2008 swap and the New 2009 Swap, respectively, at the date of termination. Comprehensive income (loss) related to effective unrealized gains or losses on the fair value of the terminated swaps through September 30, 2009 remain in accumulated comprehensive income (loss) on the balance sheet and will be amortized into interest expense and other as the underlying interest payments are recognized in earnings. The terminated swaps were valued using the income approach with observable Level 2 market expectations at the measurement date and standard valuation techniques to convert future amounts to a single discounted present amount.

In the first quarter of 2010, we entered into one interest rate swap agreement (the "2010 Swap") and three interest rate cap agreements in order to avoid unplanned volatility in the income statement due to changes in the LIBOR interest rate environment. The 2010 Swap, which matures in January 2011, has a notional amount of \$92.7 million and synthetically unwinds the effects of the 2009 Swap Replacement. The interest rate cap agreements, which mature in February 2014, have a total notional amount of \$150.0 million and were designated as cash flow hedges of future cash interest payments associated with a portion of our variable rate bank debt. Under these arrangements we have purchased a cap on LIBOR at 4.50%. We paid \$1.5 million to enter into the caps, which is being amortized through interest expense over the life of the agreements.

During the first quarter of 2009, we entered into a diesel fuel swap agreement which had a notional quantity of 1,008,000 gallons, or 84,000 gallons per month, to hedge future cash payments associated with purchasing diesel fuel for our mobile fleet. Under the terms of this agreement, which matured in February 2010, we received the Department of Energy published monthly average price per gallon and paid a fixed rate of \$2.63 per gallon. Settlement amounts under this swap were not material for the quarters ended March 31, 2010 and 2009. For the quarter ended March 31, 2010, amounts recognized in other (income) and expense, net due to ineffectiveness were not material. For the quarter ended March 31, 2009, we recognized expense of \$0.1 million in other (income) and expense, net due to one month of the agreement not being designated and due to ineffectiveness.

Table of Contents

During the first quarter of 2010, we entered into a diesel fuel swap agreement which has a notional quantity of 1,008,000 gallons, or 84,000 gallons per month, to hedge future cash payments associated with purchasing diesel fuel for our mobile fleet. Under the terms of this agreement, which matures in February 2011, we receive the Department of Energy published monthly average price per gallon and pays a fixed rate of three dollars and twenty-five cents per gallon. We designated this swap as a cash flow hedge of future cash flows associated with our diesel fuel payments. We record effective changes in the fair value of the swap through comprehensive income (loss) and reclassify gains or losses to fuel expense (included in cost of revenues, excluding depreciation and amortization) when the underlying fuel is purchased.

Our interest income is sensitive to changes in the general level of interest rates in the United States, particularly because the majority of our investments are in cash equivalents. We maintain our cash equivalents in financial instruments with original maturities of 90 days or less. Cash and cash equivalents are invested in interest bearing funds managed by third party financial institutions. These funds invest in high-quality money market instruments, primarily direct obligations of the government of the United States. At March 31, 2010, we had cash and cash equivalents of \$114.2 million, of which \$109.2 million was held in accounts that are with third party financial institutions which exceed the FDIC insurance limits. At March 31, 2009, we had cash and cash equivalents of \$91.1 million, of which \$86.9 million was held in accounts that are with third party financial institutions which exceed the FDIC insurance limits.

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Also, we have investments in certain unconsolidated entities. As we do not control or manage these entities, our disclosure controls and procedures with respect to such entities are more limited than those we maintain with respect to our consolidated subsidiaries. These unconsolidated entities are not considered material to our consolidated financial position or results of operations.

As required by SEC Rule 13a-15(b), we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

There has been no change in our internal control over financial reporting during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we are involved in routine litigation incidental to the conduct of our business. We believe that none of this litigation pending against us will have a material adverse effect on our business.

In connection with our acquisition of Medical Outsourcing Services, LLC ("MOS") in the third quarter of 2008, we subsequently identified a Medicare billing practice related to a portion of MOS's retail billing operations that raised compliance issues under Medicare reimbursement guidelines. The practice was in place prior to the acquisition and was discontinued when we became aware of it. In accordance with our corporate compliance program, we have entered into discussions with representatives of the federal government to advise them of the issue and seek guidance on appropriate next steps. The discussions are ongoing and no resolution has yet been reached. Although the government may seek repayment and penalties relating to the billing practice, we do not expect that such repayment and penalties, if imposed on us, would have a material impact on our results of operations, cash flows or financial position because we believe the amounts we would owe will be substantially or fully off-set by recoveries under the indemnification provisions of the MOS acquisition purchase agreement.

ITEM 1A. RISK FACTORS

The regulatory and political framework is uncertain and evolving.

Healthcare laws and regulations may change significantly in the future which could adversely affect our financial condition and results of operations. We continuously monitor these developments and modify our operations from time to time as the legislative and regulatory environment changes.

In March 2010, the President signed one of the most significant health care reform measures in decades. The Patient Protection and Affordable Care Act, as amended by the Health Care and Education Affordability Reconciliation Act (collectively, the "PPACA"), substantially changes the way health care is financed by both governmental and private insurers, including several payment reforms that establish payments to hospitals and physicians based in part on quality measures, and may significantly impact our industry. The PPACA requires, among other things, payment rates for services using imaging equipment that costs over \$1 million to be calculated using revised equipment usage assumptions and reduce payment rates for imaging services paid under the Medicare Part B fee schedule. The current 50% usage assumption rate would be replaced with a 75% usage rate for such equipment for services furnished on or after January 1, 2011. In addition, the PPACA changes the technical component discount on imaging of contiguous body parts during a single imaging session from 25% to 50%, as mandated by the DRA. We are unable to predict what effect the PPACA or other healthcare reform measures that may be adopted in the future will have on our business. The federal government will, however, have greater involvement in the healthcare industry than in prior years, and such greater involvement may adversely affect our financial condition and results of operations.

Federal and state anti-kickback and anti-self-referral laws may adversely affect our operations and income.

Various federal and state laws govern financial arrangements among health care providers. The federal Anti-Kickback Law prohibits the knowing and willful offer, payment, solicitation or receipt of any form of remuneration in return for, or to induce, the referral of Medicare, Medicaid or other federal healthcare program patients, or in return for, or to induce, the purchase, lease or order of items or services that are covered by Medicare, Medicaid or other federal healthcare programs. Further, the recently enacted PPACA, among other things, amends the intent requirement of the federal anti-kickback and criminal health care fraud statutes. A person or entity no longer needs to

Table of Contents

have actual knowledge of this statute or specific intent to violate it. In addition, the PPACA provides that the government may assert that a claim including items or services resulting from a violation of the federal anti-kickback statute constitutes a false or fraudulent claim for purposes of the false claims statutes. Many state laws also prohibit the solicitation, payment or receipt of remuneration in return for, or to induce, the referral of patients in private as well as government programs. Violation of these laws may result in substantial civil or criminal penalties and/or exclusion from participation in federal or state healthcare programs. We believe that we are operating in compliance with applicable laws and believe that our arrangements with providers would not be found to violate the federal and state anti-kickback laws. However, these laws could be interpreted in a manner that could have an adverse effect on our operations.

The Stark Law prohibits a physician from referring Medicare or Medicaid patients to any entity for certain designated health services (including MRI and other diagnostic imaging services) if the physician has a prohibited financial relationship with that entity, unless an exception applies. In addition, effective January 1, 2010, as a component for satisfying the Stark exception for in-office ancillary services, the PPACA requires physicians who refer a patient for MRI, CT, PET and any other designated health service to inform the patient in writing at the time of the referral that the patient may obtain such services from a person other than the in-office provider, and provide the patient with a written list of suppliers who furnish such services in the area in which the patient resides. Although we believe that our operations do not violate the Stark Law, our activities may be challenged. If a challenge to our activities is successful, it could have an adverse effect on our operations. In addition, legislation may be enacted in the future that further addresses Medicare and Medicaid fraud and abuse or that imposes additional requirements or burdens on us.

A number of states in which our diagnostic imaging centers are located have adopted a form of anti-kickback law and/or Stark Law. The scope of these laws and the interpretations of them vary from state to state and are enforced by state courts and regulatory authorities, each with broad discretion. A determination of liability under the laws described in this risk factor could result in fines and penalties and restrictions on our ability to operate in these jurisdictions.

In addition, under the DRA, states are encouraged to adopt false claims acts, similar to the federal False Claims Act, which establish liability for submission of fraudulent claims to the State Medicaid program and contain qui tam or whistleblower provisions. States enacting such false claims statutes will receive an increased percentage of any recovery from a State Medicaid judgment or settlement. Adoption of new false claims statutes in states where we operate may impose additional requirements or burdens on us.

The Company has included in Part I, Item 1A of its Annual Report on Form 10-K for the year ended December 31, 2009, a description of certain risks and uncertainties that could affect the Company's business, future performance or financial condition (the "Risk Factors"). The Risk Factors are hereby incorporated in Part II, Item 1A of this Form 10-Q. Investors should consider the Risk Factors prior to making an investment decision with respect to the Company's stock.
