RECENTLY ISSUED FINANCIAL ACCOUNTING STANDARD

Edgar Filing: TRIUMPH GROUP INC / - Form 10-Q

In June 2006, the Financial Accounting Standards Board (FASB) issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, an interpretation of Statement of Financial Accounting Standards (SFAS) No. 109 (FIN 48). FIN 48 creates a single model to address accounting for uncertainty in tax positions by prescribing a minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. In connection with its adoption of FIN 48 on April 1, 2007, the Company recognized a charge of approximately \$291 to retained earnings. See Note 8 of Notes to Consolidated Financial Statements for additional information regarding the Company's uncertain tax positions.

In March 2007, the FASB ratified Emerging Issues Task Force Issue No. 06-10 (EITF 06-10), *Accounting for Collateral Assignment Split-Dollar Life Insurance Agreements*. EITF 06-10 provides guidance for determining a liability for the post-retirement benefit obligation as well as recognition and measurement of the associated asset on the basis of the terms of the collateral assignment agreement. EITF 06-10 is effective for fiscal years beginning after December 15, 2007. The Company is currently evaluating the impact the adoption of EITF 06-10 will have on the Company's financial position, results of operations and cash flows.

The Company has also decided to sell Triumph Precision Castings Co., a casting facility in its Aftermarket Services Segment that specializes in producing high quality hot gas path components for aero and land based gas turbines. The Company recognized a pre-tax loss of \$3,500 in the first quarter of fiscal 2008 based upon a write-down of the carrying value of the business to estimated fair value less costs to sell. The write-down was applied to inventory and long-lived assets, consisting primarily of property, plant and equipment. For financial statement purposes, the assets, liabilities, results of operations and cash flows of these businesses have been segregated from those of the continuing operations and are presented in the Company's consolidated financial statements as discontinued operations and assets and liabilities held for sale.

In conjunction with the adoption of FIN 48, the Company has classified uncertain tax positions as non-current income tax liabilities unless expected to be paid in one year. 10. SEGMENTS

The Company is organized based on the products and services that it provides. Under this organizational structure, the Company has two reportable segments: the Aerospace Systems Group and the Aftermarket Services Group. The Company evaluates performance and allocates resources based on operating income of each reportable segment. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies (see Note 2). Each segment has a president and controller who manage their respective segment. The segment president reports directly to the President and CEO of the Company, the Chief Operating Decision Maker (CODM), as defined in SFAS No. 131, *Disclosure about Segments of an Enterprise and Related Information*. The segment presidents maintain regular contact with the CODM to discuss operating activities, financial results, forecasts and plans for the segment. The segment controllers have dual reporting responsibilities, reporting to both their segment president as well as to the Corporate Controller. The Company's CODM evaluates performance and allocates resources based upon review of segment information. The CODM utilizes operating income as a primary measure of profitability.

At September 30, 2007, our Aerospace Systems segment consisted of 33 operating locations, and the Aftermarket Services segment consisted of 17 operating locations.

The Aerospace Systems segment consists of the Company's operations which manufacture products primarily for the aerospace OEM market. The Aerospace Systems' operations design and engineer mechanical and electromechanical controls, such as hydraulic systems and components, main engine gearbox assemblies, accumulators and mechanical control cables. The Aerospace Systems' revenues are also derived from stretch forming, die forming, milling, bonding, machining, welding and assembly and fabrication of various structural components used in aircraft wings, fuselages and other significant assemblies. Further, the segment's operations also design and manufacture composite assemblies for floor panels, environmental control system ducts and non-structural cockpit components. These products are primarily sold to various aerospace OEMs on a global basis.

The Aftermarket Services segment consists of the Company's operations that provide maintenance, repair and overhaul services to both commercial and military markets on components and accessories manufactured by third parties. Maintenance, repair and overhaul revenues are derived from services on auxiliary power units, airframe and engine accessories, including constant-speed drives, cabin compressors, starters and generators, and pneumatic drive units. In addition, the Aftermarket Services' operations repair and overhaul thrust reversers, nacelle components and flight control surfaces. The Aftermarket Services' operations also perform repair and overhaul services, and supply spare parts for various types of cockpit instruments and gauges for a broad range of commercial airlines on a worldwide basis.

Segment operating income is total segment revenue reduced by operating expenses identifiable with that segment. Corporate includes general corporate administrative costs and any other costs not identifiable with one of the Company's segments.

The Company does not accumulate net sales information by product or service or groups of similar products and services, and therefore the Company does not disclose net sales by product or service because to do so would be impracticable.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

(The following discussion should be read in conjunction with the Consolidated Financial Statements contained elsewhere herein.)

OVERVIEW

We are a major supplier to the aerospace industry and have two operating segments: (i) Triumph Aerospace Systems Group, whose companies design, engineer and manufacture a wide range of proprietary and build to print components, assemblies and systems for the global aerospace OEM market; and (ii) Triumph Aftermarket Services Group, whose companies serve aircraft fleets, notably commercial airlines, the U.S. military and cargo carriers, through the maintenance, repair and overhaul services of aircraft components and accessories manufactured by third parties.

Financial highlights for the second quarter of fiscal 2008 include:

Net sales for the second quarter of fiscal 2008 increased 26.1% to \$279.8 million

Operating income in the second quarter of fiscal 2008 increased 34.9% to \$31.8 million

Net income for the second quarter of fiscal 2008 increased 36.6% to \$17.2 million

Backlog increased 14% over the prior year to \$1,179.2 million

For the quarter ended September 30, 2007, net sales totaled \$279.8 million, a 26.1% increase from last year's second quarter net sales of \$221.8 million. Income from continuing operations for the second quarter of fiscal 2008 increased 40.9% to \$18.7 million, or \$1.05 per diluted common share, versus \$13.3 million, or \$0.81 per diluted common share, for the second quarter of the prior year. During the quarter, we generated \$15.2 million of cash flow from operating activities.

Net sales increased by \$58.0 million, or 26.1%, to \$279.8 million for the quarter ended September 30, 2007 from \$221.8 million for the quarter ended September 30, 2006. The acquisitions of the assets and businesses of Allied Aerospace Industries, Inc. and Grand Prairie Accessory Services, LLC, herein referred to as the 2007 Acquisitions, contributed \$15.6 million of the net sales increase. Excluding the effects of the 2007 Acquisitions, organic sales growth was \$42.4 million, or 19.1%.

The Aerospace Systems segment benefited primarily from increased sales to our OEM customers driven by increased aircraft build rates, while the increase in sales for our Aftermarket Services segment was the result of increased demand for our services as a result of growth in global air traffic, the age of existing aircraft and enhanced capabilities.

Segment operating income increased by \$8.4 million, or 30.5%, to \$36.0 million for the quarter ended September 30, 2007 from \$27.5 million for the quarter ended September 30, 2006. Operating income growth was a direct result of margins attained on increased sales volume as described above, improved margins and the contribution of \$1.3 million from the 2007 Acquisitions, partially offset by increased costs in litigation, research and development, payroll and healthcare, and amortization associated with the 2007 Acquisitions.

Corporate general and administrative expenses increased by \$0.2 million, or 4.3%, to \$4.1 million for the quarter ended September 30, 2007 from \$3.9 million for the quarter ended September 30, 2006, primarily due to recognition of stock-based compensation and increased bonus accruals offset by insurance reimbursements related to product liability claims.

Interest expense and other increased by \$0.5 million, or 15.0%, to \$3.6 million for the quarter ended September 30, 2007 compared to \$3.1 million for the prior year period. This increase was due to higher average borrowings outstanding and amortization of debt issuance costs, partially offset by lower interest on our convertible notes issued in September 2006 as compared to the previously outstanding Class A Senior Notes and Class B Senior Notes.

The effective income tax rate for the quarter ended September 30, 2007 was 33.8% compared to 35.3% for the quarter ended September 30, 2006. The decrease in the tax rate was primarily due to the retroactive reinstatement of the research and experimentation tax credit in December 2006. Accordingly, the quarter ended September 30, 2006 did not include the benefit from the research and experimentation tax credit.

The increase was primarily due to increased sales to our OEM customers of \$35.1 million driven by increased aircraft build rates and the net sales contributed from the acquisition of the assets and business of Allied Aerospace Industries, Inc. (now Triumph Aerospace Systems – Newport News).

Aerospace Systems segment operating income increased by \$5.8 million, or 22.9%, to \$31.1 million for the quarter ended September 30, 2007 from \$25.3 million for the quarter ended September 30, 2006. This increase was due to the sales increase associated with the acquisition of the assets and business of Grand Prairie Accessory Services, LLC (now Triumph Accessory Services – Grand Prairie, Inc.), and an increase in same store sales of \$7.3 million due to new customers and products, growth in global commercial air traffic and U.S. military maintenance requirements resulting in increased demand for repair and overhaul of auxiliary power units and the brokering of similar units.

Liquidity and Capital Resources

Our working capital needs are generally funded through cash flows from operations and borrowings under our credit arrangements. During the six months ended September 30, 2007, we generated approximately \$4.3 million of cash flows from operating activities, used approximately \$18.1 million in investing activities and generated approximately \$15.3 million in financing activities.

In September 2006, the Company issued \$201.3 million of convertible senior subordinated notes due October 1, 2026 bearing interest at a fixed rate of 2.625% (Convertible Notes). In October 2007, the Company delivered a notice to holders of its Convertible Notes to the effect that, for at least 20 trading days during the 30 consecutive trading days preceding September 30, 2007, the closing price of the Company's common stock was greater than or equal to 130% of the conversion price of such notes on the last trading day. Under the terms of the Convertible Notes, the increase in the Company's stock price triggered a provision, which gave holders of the notes a put option through December 31, 2007. Accordingly, the Company has reclassified these notes to short-term debt as of September 30, 2007.

As of September 30, 2007, \$226.7 million was available under our revolving credit facility (the Credit Facility). On September 30, 2007, an aggregate amount of approximately \$116.9 million was outstanding under the Credit Facility, \$110.0 million of which was accruing interest at LIBOR plus applicable basis points totaling 6.5% per annum, and \$6.9 million of which was accruing interest at the overnight rate of 6.2% per annum. Amounts repaid under the Credit Facility may be reborrowed.

On October 15, 2007, the Company amended its Credit Facility with its lenders to add a sublimit of \$200.0 million for foreign currency borrowings and amend and eliminate certain other terms and covenants.

Effective April 2007, the Company entered into a settlement agreement with a customer relating to a long-term supply agreement (LTSA). The LTSA is related to the Company's acquisition of Rolls-Royce Gear Systems, Inc. in fiscal 2004. The Company has been producing the component parts for this LTSA at a loss for approximately one year which has been reserved for through a loss contract reserve. The agreement provides for the parties to establish a transition plan that provides for the customer to re-source the component parts from other suppliers, essentially terminating the Company's requirement to provide future deliveries of these component parts. The agreement establishes a date of no later than December 31, 2008 for completion of the re-sourcing effort. Additionally, the Company will be required to make four payments of \$0.5 million each over the next two years, upon successful transition of the component parts, by the customer, to other vendors. The Company recorded the estimated impact of this settlement in its March 31, 2007 balance sheet, which did not result in a significant adjustment to the recorded loss reserve. As of September 30, 2007, the recorded loss reserve was \$5.4 million. If the transition is completed earlier than December 2008 or the number of delivered units produced by the Company is different than anticipated under the settlement agreement, an adjustment to the recorded loss reserve may be required. Because we cannot determine the extent of re-sourcing that may occur or the timing of the re-sourcing, we will monitor progress and make appropriate adjustments, as may be necessary, to the loss contract reserve on a periodic basis.

Capital expenditures were approximately \$21.5 million for the six months ended September 30, 2007, primarily for manufacturing machinery and equipment. We funded these expenditures through borrowings under our Credit Facility. We expect capital expenditures to be in the range of \$55.0 million to \$70.0 million for our fiscal year ending March 31, 2008. The expenditures are expected to be used mainly to expand capacity or replace old equipment at several facilities.

The expected future cash flows for the next five years for long term debt, leases and other obligations are as follows:

Contractual Obligations	Total	Payments Due by Period (dollars in thousands)			
		Less than 1 year	1-3 years	3-5 years	More than 5 years
Debt Principal (1)	\$ 326,800	\$ 201,471	\$ 416	\$ 117,208	\$ 7,705

Purchase Obligations	266,643	198,600	64,601	3,377	65
Other Long Term Obligations (1) (3)	67	67			
Total	\$ 662,362	\$ 420,377	\$ 84,399	\$ 132,537	\$ 25,049

(1) Included in the Company's balance sheet at September 30, 2007.

(2) Includes fixed-rate interest only.

(3) Includes interest component.

We believe that cash generated by operations and borrowings under the Credit Facility will be sufficient to meet anticipated cash requirements for our current operations. However, we have a stated policy to grow through acquisition and are continuously evaluating various acquisition opportunities. As a result, we currently are pursuing the potential purchase of a number of candidates. In the event that more than one of these transactions are successfully consummated, the availability under the Credit Facility might be fully utilized and additional funding sources may be needed. There can be no assurance that such funding sources will be available to us on terms favorable to us, if at all.

Critical Accounting Policies

The Company's critical accounting policies are discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations and notes accompanying the consolidated financial statements that appear in the Annual Report on Form 10-K for the fiscal year ended March 31, 2007. Except as otherwise disclosed in the financial statements and accompanying notes included in this report, there were no material changes subsequent to the filing of the Annual Report on Form 10-K for the fiscal year ended March 31, 2007 in the Company's critical accounting policies or in the assumptions or estimates used to prepare the financial information appearing in this report.

Part II. Other Information

Item 1. Legal Proceedings.

As we have previously disclosed, the Company, our subsidiary Triumph Actuation Systems, LLC (formerly Frisby Aerospace, LLC) and certain employees of our subsidiaries are the defendants in a suit brought by Eaton Corporation and several Eaton subsidiaries in the Circuit Court of the First Judicial District of Hinds County, Mississippi, involving claims of misappropriation of trade secrets and intellectual property allegedly belonging to Eaton relating to hydraulic pumps and motors used in military and commercial aviation. We have also disclosed that, in a separate proceeding, five engineers of Triumph Actuation Systems who are former employees of Eaton Aerospace, LLC, were indicted by a grand jury sitting in the Southern District of Mississippi on five counts of trade secret misappropriation and related charges, of which all counts other than part of one were dismissed by the U.S. District Court for the Southern District of Mississippi, leaving a charge of conspiracy to misappropriate trade secrets.

On October 11, 2007, the government obtained a new indictment against the same five engineer defendants raising new charges arising out of the same investigation. Pretrial motions, including motions to dismiss, are pending. No charges have been brought against Triumph Actuation Systems, and we understand that neither Triumph Actuation Systems nor the Company is currently the subject of the criminal investigation.

In the civil case, following stays of most discovery while the parties litigated a motion to dismiss and a motion to protect the defendant engineers Fifth Amendment rights, discovery recommenced in late August 2007. Tentative trial dates have been set in the summer of 2008. It is too early to determine what, if any, exposure to liability Triumph Actuation Systems or the Company might face as a result of the civil suit. We intend to continue to vigorously defend the allegations contained in Eaton's complaint and to vigorously prosecute the counterclaims brought by Triumph Actuation Systems.

Further information on the proceedings described above can be found in Item 3. Legal Proceedings in our Annual Report on Form 10-K for the fiscal year ended March 31, 2007.
