**Hawaiian Holdings, Inc.**

Notes to Consolidated Financial Statements (Unaudited)

**1. Summary of Significant Accounting Policies**

***Business and Basis of Presentation***

Hawaiian Holdings, Inc. (the Company or Holdings) is a holding company incorporated in the State of Delaware. The Company's primary asset is its sole ownership of all issued and outstanding shares of common stock of Hawaiian Airlines, Inc. (Hawaiian). Hawaiian was originally incorporated in January 1929 under the laws of the Territory of Hawaii and, based on the total number of miles flown by revenue passengers in 2006, Hawaiian is the largest airline headquartered in Hawaii and the seventeenth largest domestic airline in the United States. Hawaiian is engaged primarily in the scheduled air transportation of passengers and cargo amongst the Hawaiian Islands and between the Hawaiian Islands and certain cities in the Western United States, the South Pacific and Australia. As of September 30, 2007, Hawaiian operated a fleet of 11 Boeing 717-200 aircraft for its interisland routes and a fleet of 18 Boeing 767-300 aircraft for its transpacific, South Pacific and charter routes.

The accompanying unaudited financial statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X of the U.S. Securities and Exchange Commission (SEC). Accordingly, these interim financial statements do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, the accompanying financial statements contain all adjustments, including normal recurring adjustments unless otherwise disclosed, necessary for the fair presentation of the Company's results of operations and financial position for the periods presented. Due to seasonal fluctuations common to the airline industry and Hawaiian, the results of operations for the periods presented are not necessarily indicative of the results of operations to be expected for the entire year. The accompanying financial statements should be read in conjunction with the financial statements and the notes thereto of Hawaiian Holdings, Inc. and Hawaiian Airlines, Inc. included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2006.

***Reclassifications***

Certain amounts for prior periods have been reclassified to conform to the current year presentation.

**2. Earnings Per Share**

Three Months ended September 30, 2007	2006	Nine Months ended September 30, 2007	2006
(in thousands, except for per share data)			

**Denominator:**

# Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

Weighted average common stock shares outstanding - Basic	47,203	47,171	47,190	47,141
Assumed exercise of stock options	102	80	172	
Weighted average common stock shares outstanding - Diluted	47,305	47,251	47,362	47,141

## **Net income (loss) per common stock share:**

Basic	\$	0.41	\$	0.16	\$	0.08	\$	(0.66)
Diluted	\$	0.41	\$	0.16	\$	0.08	\$	(0.66)

The weighted average number of common shares outstanding used in the calculations of basic and diluted net loss per common share for the three and nine months ended September 30, 2007 includes 617,186 shares issued on May 1, 2007 under the Hawaiian Airlines, Inc. Stock Bonus Plan discussed in Note 3.

Options to acquire approximately 2.5 million and 2.3 million shares of the Company's common stock were not included in the calculation of diluted net income per common share for the three and nine months ended September 30, 2007, respectively, and options to acquire approximately 2.0 million and 2.6 million shares of the Company's common stock were not included in the calculation of diluted net (income) loss per common share for the three and nine months ended September 30, 2006, respectively, because the effect of including the options would have been antidilutive. In addition, 9.5 million shares of the Company's common stock issuable upon exercise of common stock warrants were excluded from the computation of diluted earnings per share for the three and nine months ended September 30, 2007 and 9.6 million and 13.7 million weighted average shares of the Company's common stock issuable upon conversion of convertible debt securities and

issuable upon exercise of common stock warrants, respectively, were excluded from the computation of diluted net income (loss) per common stock share for the three and nine months ended September 30, 2006 because the effect of including such shares would have been antidilutive.

### 3. Employee Benefit Plans

Net periodic defined benefit pension and other retirement benefit expense for the three and nine months ended September 30, 2007 and 2006 included the following components (in thousands).

Components of Net Periodic Benefit Cost	Three months ended September 30,		Nine months ended September 30,	
	2007	2006	2007	2006
Service cost	\$ 2,286	\$ 1,896	\$ 7,632	\$ 5,688
Interest cost	5,614	5,194	17,285	15,582
Expected return on plan assets	(5,217)	(4,279)	(15,240)	(12,837)
Recognized net actuarial gain	(1,032)		(1,851)	
Net periodic benefit cost	\$ 1,651	\$ 2,811	\$ 7,826	\$ 8,433

The Company sponsors three tax-qualified defined benefit pension plans covering certain of its contract labor groups and its non-contract salaried employees. In addition, the Company sponsors two unfunded defined benefit postretirement medical and life insurance plans. Employees in the Company's pilot group are eligible for certain medical, dental and life insurance benefits under one plan if they become disabled or reach normal retirement age while working for the Company. Employees in the Company's non-pilot group are eligible for certain medical benefits under another plan if they meet specified age and service requirements at the time of retirement.

Effective June 1, 2005, the Company established a separate plan to administer the pilots disability benefits previously covered under the Retirement Plan for Pilots of Hawaiian Airlines, Inc. The Company initially accounted for the separate plan as a defined contribution plan because the Company's contributions to the plan are limited to an amount specified in the pilots' disability plan. During the three months ended September 30, 2007, the Company determined that the pilots disability benefits should be accounted for as a defined benefit plan in accordance with Financial Accounting Standards No. 112, Employer's Accounting for Postemployment Benefits since the plan does not include individual participant accounts. As a result, the Company determined that its accumulated postemployment benefit liability and goodwill were understated by \$9.3 million. The impact to employee benefits expense was negligible for all periods. Because the impact of the error was not material to the Company's financial statement for either the current or prior periods, the Company has corrected its accounting for the other postretirement benefit obligation during the three months ended September 30, 2007.

The Company made scheduled contributions to its tax-qualified defined benefit pension plans and pilots disability plan of \$4.7 million and \$11.1 million related to these plans during the three and nine months ended September 30, 2007, respectively, and made its last expected contribution for 2007 to its defined benefit pension plans on October 15, 2007 in the amount of \$0.6 million.

### 4. Income Taxes

## Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

The Company recorded an income tax expense of \$2.2 million and an income tax benefit of \$6.9 million for the three and nine months ended September 30, 2007, respectively. The Company recorded an income tax expense of \$5.6 million and \$10.1 million for the comparable three and nine month periods in 2006, respectively. For the three months ended September 30, 2007, the income tax expense of \$2.2 million is driven by the decrease of the net operating loss carryback to 2005 due to the increase in income in the third quarter. For the three months ended September 30, 2006, the income tax expense of \$5.6 million is based on the taxable income for the third quarter of 2006. For the nine months ended September 30, 2007, the difference was primarily due to the tax benefit recognized resulting from operating losses which will be fully recovered by the availability of carrybacks to tax years 2004 and 2005. In addition, the taxable income for the nine months ended September 30, 2007 was less than the same period in 2006 because of higher deductible expenses triggered primarily by accelerated tax depreciation of aircraft that were acquired during 2006.

Utilization of the Company's deferred tax assets is generally based on the Company's ability to generate taxable income in future years. In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the Company's deferred tax assets will not be realized. The ultimate realization of the Company's deferred tax assets is dependent upon its ability to generate future taxable income during the periods in which those temporary differences become deductible, or the future utilization of resulting net operating loss carryforwards prior to expiration. As of September 30, 2007, the Company recognized a full valuation allowance on its deferred tax assets.

## Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

In October 2006, the Internal Revenue Service (IRS) issued a Revenue Agent's Report summarizing the income tax examination changes for tax year 2003. Most issues related to the examination of Hawaiian's 2003 federal income tax return have been resolved and agreed upon. Examination issues for 2003 that have not been resolved and agreed upon are currently being reviewed by the Appeals Office of the IRS.

The State of Hawaii Department of Taxation is currently in the process of examining Hawaiian's general excise tax returns for 2002 through 2005, in addition to the Hawaii capital goods excise tax credit claimed on the 2002 through 2004 income tax returns. Hawaiian cannot currently determine the impact of any potential assessments resulting from these examinations on its future financial position, results of operations and liquidity. Any additional taxes paid by the Company related to any periods prior to the effective date of Hawaiian's plan of reorganization will result in a corresponding increase in goodwill; conversely, a reduction in the Company's income tax liability resulting from the State of Hawaii examination will result in a decrease to goodwill.

The Company adopted the Financial Accounting Standards Board's Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 (FIN 48) effective January 1, 2007. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in financial statements and requires the impact of a tax position to be recognized in the financial statements if that position is more likely than not of being sustained by the taxing authority.

Upon adoption of FIN 48, the Company's existing tax liability was adequate for purposes of its unrecognized tax benefits of \$6.7 million; as such, no incremental entry to retained earnings was necessary. In future periods, the Company may be required to adjust its liability as these matters are finalized, which could increase or decrease our income tax expense and effective income tax rates. Of the Company's total unrecognized tax benefits, approximately \$6.7 million would favorably affect its effective income tax rate if recognized in future periods. While the Company expects that the amount of its unrecognized tax benefits will change in the next twelve months, the Company does not expect this change to have a significant impact on its results of operations or financial position.

The Company accrues interest related to the unrecognized tax benefits in nonoperating expense on its Consolidated Statement of Operations. As of January 1, 2007, the Company had liabilities of approximately \$0.3 million for interest accrued related to the unrecognized tax benefits. The amount of interest recognized in its income statement was \$0.2 million and \$0.4 million for the three and nine months ended September 30, 2007.

Various taxes and fees assessed on the sale of tickets to end customers are collected by the Company as an agent and remitted to taxing authorities. These taxes and fees have been presented on a net basis in the accompanying Consolidated Statements of Operations and recorded as a liability until remitted to the appropriate taxing authority.

### 5. Comprehensive Income (Loss)

Total comprehensive income (loss) for the three and nine months ended September 30, 2007 and 2006 included the following (in thousands):

Three months ended September 30,		Nine months ended September 30,	
2007	2006	2007	2006

Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

Net income (loss)	\$	19,577	7,760	\$	3,744	(30,917)
Other comprehensive income (loss):						
Unrealized net gains/(losses) on hedge instruments and short-term investments		2,013	(1,314)		2,466	12,404
Adjustments to net actuarial gains (losses) on employee benefit plans as a result of changes in actuarial assumptions		3,241			3,241	
Amortization of net actuarial gains (losses) on employee benefit plans		(700)			(1,519)	
Total comprehensive income (loss)	\$	24,131	\$ 6,446	\$	7,932	\$ (18,513)

**6. Commitments and Contingencies**

*Litigation and Contingencies*

## Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

The Company is subject to legal proceedings arising in the normal course of its operations. Management does not anticipate that the disposition of such proceedings will have a material effect upon the Company's financial statements except as noted below.

As previously disclosed, Hawaiian filed suit in the United States Bankruptcy Court for the District of Hawaii against Mesa in February 2006. The suit alleged that Mesa misused confidential and proprietary information that had been provided by Hawaiian to Mesa in 2004, pursuant to a process that was established by the Bankruptcy Court to facilitate Hawaiian's efforts to solicit potential investment in connection with a Chapter 11 plan of reorganization. On October 30, 2007, the Bankruptcy Court ruled in favor of Hawaiian, awarding Hawaiian \$80 million for damages incurred to date, and ordering that Mesa pay Hawaiian post-judgment interest, its cost of litigation and reasonable attorney fees. There can be no assurance that Hawaiian will prevail if this decision is appealed by Mesa, as Mesa has stated publicly that it intends to do, or that any damages or litigation costs will ultimately be recovered by Hawaiian. The recognition of any such amount will only occur when realized, likely upon collection of such amount.

*Los Angeles Airport Operating Terminal*

## Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

In December 1985, Hawaiian entered into an agreement with other airlines, as amended, for the sharing of costs, expenses and certain liabilities related to the acquisition, construction and renovation of certain passenger terminal facilities at the Los Angeles International Airport (Facilities). Current tenants and participating members of LAX Two Corporation (the Corporation), a mutual benefit corporation, are jointly and severally obligated to pay their share of debt service payments related to Facilities Sublease Revenue Bonds issued to finance the acquisition, construction and renovation of the Facilities which totaled \$111.9 million at completion. The Corporation leases the Facilities from the Regional Airports Improvement Corporation under an agreement accounted for as an operating lease. In addition, the Corporation is also obligated to make annual payments to the city of Los Angeles for charges related to its terminal ground rental.

### *General Guarantees and Indemnifications*

The Company is the lessee under certain real estate leases. It is common in such commercial leases for the lessee to agree to indemnify the lessor and other related third parties for tort liabilities that arise out of or relate to lessee's use or occupancy of the leased premises. In some cases, this indemnity extends to related liabilities arising from the negligence of the indemnified parties, but usually excludes any liabilities caused by their gross negligence or willful misconduct. Additionally, the lessee typically agrees to indemnify such parties for any environmental liability that arises out of or relates to its use of the leased premises. The Company expects that it is covered by insurance (subject to deductibles) for most tort liabilities and related indemnities described above with respect to real estate that it leases. The Company cannot estimate the potential amount of future payments, if any, under the foregoing indemnities and agreements.

### *Credit Card Holdback*

Under Hawaiian's credit card processing agreements, certain proceeds from advance ticket sales are held back to serve as collateral to cover any possible chargebacks or other disputed charges that may occur. These holdbacks, which are included in restricted cash in the Company's Consolidated Balance Sheets, totaled \$47.8 million at September 30, 2007. The funds are interest-bearing and are subsequently made available to us as air travel is provided. The agreement with Hawaiian's largest credit card processor also contains financial triggers which require, among other things, that we maintain a minimum amount of unrestricted cash and short-term investments, and maintain certain levels of debt service coverage and operating income. Under the terms of this credit card processing agreement, which was amended effective June 30, 2007, the level of credit card holdback is subject to adjustment based on these specific financial triggers. As of September 30, 2007, the holdback was at the contractual level of 40% of the applicable credit card air traffic liability. If these specific financial triggers are not met in the future, the holdback could increase to an amount up to 100% of the applicable credit card air traffic liability, which would also cause an increase in the level of restricted cash.

## **7. Special Charges**

The Company recorded \$2.5 million of severance charges during the second quarter of 2007 as a component of Wages and Benefits in the Consolidated Statement of Operations. These severance charges are a result of the voluntary separation packages offered to employees affected by the outsourcing of certain functions within our accounting, reservations and information technology (IT) departments and costs related to involuntary terminations resulting from the Company's organizational restructuring which eliminated approximately 140 positions. There were no additional charges incurred during the three months ended September 30, 2007.

## 8. New Accounting Standards

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS 157), which defines fair value, establishes a framework for measuring fair value, and requires enhanced disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements; rather it specifies valuation methods and disclosures to be applied when fair value measurements are required under existing or future accounting pronouncements. As required, the Company will adopt SFAS 157 on January 1, 2008. The Company has not yet determined the impact of adopting SFAS 157 on the consolidated financial statements.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of FASB No. 115 (SFAS 159). SFAS 159 permits, but does not require, entities to measure certain financial instruments and other assets and liabilities at fair value on an instrument-by-instrument basis, with the objective of reducing both the complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. SFAS 159 is effective for the Company on January 1, 2008. The Company has not yet determined the impact of adopting SFAS 159 on the consolidated financial statements.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**

**Forward-Looking Statements**

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that reflect our current views with respect to certain current and future events and financial performance. These forward-looking statements are and will be, as the case may be, subject to many risks, uncertainties and factors relating to our operations and business environment which may cause our actual results to be materially different from any future results, expressed or implied, in these forward-looking statements.

Factors that could cause actual results to differ materially from these forward-looking statements include, but are not limited to, the following:

aviation fuel costs;

our dependence on tourist travel;

competition in the interisland market;

the effects of seasonality and cyclicalities;

the concentration of our business in Hawaii;

the competitive advantages held by network carriers in the transpacific markets;

the effects of new entrants into the transpacific and interisland markets;

competitive pressures on pricing (particularly from lower-cost competitors);

demand for transportation in the markets in which we operate;

the impact of our substantial financial and operating leverage;

our ability to comply with financial covenants;

the competitiveness of our labor costs;

our relationship with our employees and possible work stoppages;

our ability to attract, motivate and retain key executives and other employees;

increasing dependence on technologies to operate our business;

our reliance on other companies for facilities and services (including, without limitation, aircraft maintenance, code sharing, reservations, accounting and computer services, frequent flyer programs, passenger processing, ground facilities, baggage and cargo handling and personnel training);

our fleet concentration in out-of-production Boeing 717-200 aircraft;

the impact of indebtedness on our financial condition and results of operations;

the effects of any hostilities or act of war (in the Middle East or elsewhere) or any terrorist attack;

increases in aircraft maintenance costs due to the aging and increased utilization of our fleet, and the possible unavailability of other aircraft;

bankruptcies in the airline industry and the possible negative impact such bankruptcies might have on fares and excess capacity;

government legislation and regulation, including the Aviation and Transportation Security Act and other such regulations stemming from the September 11, 2001 or future terrorist attacks;

changes that may be required by the Federal Aviation Administration or other regulators to our aircraft or operations;

the impact of possible aircraft incidents;

the impact of possible outbreaks of disease;

the impact of possible disruptions due to unpredictable weather and environmental concerns;

economic conditions generally;

changes in the level of fares we can charge and remain competitive;

the cost and availability of insurance, including aircraft insurance;

security-related costs;

consumer perceptions of our services compared to other airlines; and

other risks and uncertainties set forth from time to time in our reports to the Securities and Exchange Commission, included under Risk Factors in our Annual Reports on Form 10-K.

We undertake no obligation to publicly update or revise any forward-looking statements to reflect events or circumstances that may arise after the date of this quarterly report.

## ***Overview***

### ***Our Company***

Hawaiian Holdings, Inc. (the Company or Holdings) is a holding company incorporated in the State of Delaware. The Company's primary asset is its sole ownership of all issued and outstanding shares of common stock of Hawaiian Airlines, Inc. (Hawaiian). Hawaiian was originally incorporated in January 1929 under the laws of the Territory of Hawaii and became the Company's indirect wholly-owned subsidiary pursuant to a corporate restructuring that was consummated in August 2002. Hawaiian became a Delaware corporation and the Company's direct wholly-owned subsidiary concurrent with its reorganization and reacquisition by the Company in June 2005 as is described in greater detail in our Annual Report on Form 10-K for the year ended December 31, 2006.

We are engaged primarily in the scheduled air transportation of passengers and cargo amongst the Hawaiian Islands (the interisland market) and between the Hawaiian Islands and certain cities in the Western United States (the transpacific market), the South Pacific and Australia (the South Pacific market). Based on the total number of miles flown by revenue passengers in 2006, Hawaiian is the largest airline headquartered in Hawaii and the seventeenth largest domestic airline in the United States. As of September 30, 2007, our operating fleet consisted of 11 leased Boeing 717-200 aircraft, 11 leased Boeing 767-300 aircraft and seven owned Boeing 767-300 aircraft. Based in Honolulu, Hawaiian had approximately 3,400 active employees as of September 30, 2007.

General information about us is available at <http://www.hawaiianair.com/about/>. Our annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, as well as any amendments and exhibits to those reports, are available free of charge through our website as soon as reasonably practicable after we file them with, or furnish them to, the SEC.

***Third Quarter Highlights***

We increased our capacity by approximately 17.2%, primarily in the transpacific market with a slight increase in our load factor. However, intense competition on both the interisland and transpacific routes continues to suppress yields and affect our revenue performance.

Our operating cost per available seat mile (CASM) decreased by 3.8% from the three months ended September 30, 2006 to the three months ended September 30, 2007 and 4.9% from the nine months ended September 30, 2006 to the nine months ended September 30, 2007. Our operating cost per seat mile excluding fuel (ex-fuel CASM) declined by 5.7% and 5.4% for the three and nine months ended September 30, 2007, respectively.

We announced approval from the U.S. Department of Transportation (DOT) to provide nonstop flights between Honolulu and Manila in the Philippines. When service begins in 2008, we will be the only U.S. carrier providing nonstop service between Hawaii and the Philippines.

**Results of Operations**

## Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

We had net income of \$19.6 million (\$0.41 per basic and diluted common share) on operating income of \$25.6 million for the three months ended September 30, 2007 and net income of \$3.7 million (\$0.08 per basic and diluted common share) on operating income of \$8.8 million for the nine months ended September 30, 2007. On a net income basis, our results have improved from the three and nine months ended September 30, 2006 to the same periods in 2007. During the three months ended September 30, 2007, we have seen improvements in our unit operating costs, substantially due to cost containment efforts. During the nine months ended September 30, 2007, our net income improved primarily due to the inclusion in the prior year period of \$32.1 million of nonoperating charges incurred in connection with the redemption, extinguishment and modification of certain long-term debt we issued in June 2005 to partially fund Hawaiian's joint plan of reorganization.

Our passenger yield has declined by 1.0% and 6.4% during the three and nine months ended September 30, 2007, respectively, compared to the same periods in 2006. This decline was attributable to competitive pressures in the form of increased capacity and the proliferation of discount fares on many of our routes that began during the third quarter of 2006 and the disproportionate increase in our longer haul flying which has lower yield. Our revenue per available seat mile decreased for the nine months ended September 30, 2007 as compared to the nine months ended September 30, 2006 by 6.2%, our revenue per available seat mile increased by 0.3% for the three months ended September 30, 2007 from the same period in 2006. We expect the proliferation of low fares to suppress revenue per available seat mile during the remainder of 2007. Passenger yield on our interisland routes continue to be affected by the availability of substantially lower fares than were available during the first two quarters of 2006. The availability of these lower fares is attributed to the commencement of service by Mesa Airlines (Mesa), which operates under the brand name *go!*, in June 2006.

For the three and nine months ended September 30, 2007, passenger revenue represented approximately 90% of our operating revenue. Of this amount, approximately 70% came from our transpacific routes. Our principal competition on our transpacific routes has come from network carriers such as United Airlines, American Airlines, Continental Airlines, Delta Air Lines, Northwest Airlines and US Airways, and from low-cost air carriers such as ATA Airlines. Delta Air Lines and Northwest Airlines were both operating under Chapter 11 of the U.S. Bankruptcy Code since September 2005. Although both carriers emerged from bankruptcy during 2007, both carriers were able to substantially reduce their cost structures while operating under Chapter 11. In addition, other airlines continue to pursue a variety of means toward reducing costs and increasing general competitiveness. Many of the network carriers are able to offset the negative impact of competitive pressure on transpacific routes with increasing yields on their international routes. Potential increases in airline capacity to Hawaii, whether from existing or other network carriers or low-cost carriers, could result in a significant decrease in our share of the transpacific market and/or our yields in that market, which could have a material adverse effect on our results of operations and financial condition. In October 2007, Alaska Airlines commenced daily scheduled service to Hawaii.

In the South Pacific market, we currently are the only provider of nonstop service between Honolulu and each of Pago Pago, American Samoa, and Papeete, Tahiti. We also operate roundtrip flights between Honolulu and Sydney, Australia, competing directly against Qantas Airways, its low-cost affiliate Jetstar and Air Canada on this route. For the three and nine months ended September 30, 2007 and the year ended December 31, 2006, we derived approximately 7% of our total operating revenue from our South Pacific market.

For the three and nine months ended September 30, 2007, our CASM decreased by 3.8% and 4.9%, respectively, from those same periods in 2006. Our ex-fuel CASM decreased by 5.7% and 5.4% for the three and nine months ended September 30, 2007, respectively, compared to those same periods in 2006. While our operations and financial results are affected by a variety of factors, we, like most airlines, are particularly affected by the availability and price of jet fuel. Fuel costs are volatile and constituted a significant portion of our operating expenses representing approximately 31.1% and 28.3% of our operating expenses for the three and nine months ended September 30, 2007, respectively. Based on gallons expected to be consumed in 2007, every one-cent change in the cost of jet fuel increases or decreases our annual fuel expense by approximately \$1.3 million. Future increases in jet fuel prices or disruptions in fuel supplies could have a material adverse effect on our results of operations.

In order to more effectively compete in the markets that we serve, we are committed to managing down our controllable costs. During 2006, we initiated a top-to-bottom review of a variety of third-party spending categories, including the areas of maintenance, ground handling, catering and insurance. We expect annual savings of over \$10 million from these areas specifically. During July 2007, we executed an agreement with a new third-party maintenance vendor to provide periodic airframe heavy maintenance for our 767-300 fleet, the benefits of which are reflected in the aforementioned savings estimate. During the summer of 2006, we signed a Letter of Agreement with the International Association of Machinists and Aerospace Workers (IAM) which allows us to outsource reservations, accounting and certain other back office functions in return for job protection to the employees in those areas. During early 2007, we selected vendors for the areas of reservations, accounting and IT and offered voluntary separation packages to those employees whose positions were affected. Outsourcing of certain reservations activities to a third-party contractor in the Philippines began during April 2007, while transition of certain transactional accounting functions and certain IT infrastructure functions to a third-party contractor in India commenced during the second quarter of 2007. Each of these outsourcing initiatives is expected to be fully transitioned to steady state by the end of 2007 or early 2008. In addition, approximately 140 positions were eliminated as a result of organizational restructuring, including 98 positions that were filled by non-union employees who held administrative positions throughout the Company. The remaining positions that were eliminated were unfilled at the time of the organizational restructuring. As a result of voluntary separation packages offered to employees affected by outsourcing and costs related to the involuntary terminations, our operating expenses for the nine months ended September 30, 2007 include \$2.5 million of severance charges in Wages and Benefits in the Consolidated Statement of Operations.

**Hawaiian Holdings, Inc.**

Average cost per gallon of jet fuel (actual) (b)	\$ 2.27	\$ 2.24	\$ 2.11	\$ 2.17

(a) The scheduled passenger load factor required at the current yield to breakeven on a net income basis.

(b) Includes applicable taxes and fees.

Both the cost and availability of jet fuel are subject to many economic and political factors and are therefore beyond our control. Presenting ex-fuel CASM provides the ability to measure and monitor our cost performance on a more consistent basis. The following is a reconciliation between the CASM and ex-fuel CASM for the three and nine months ended September 30, 2007 and 2006:

	Three Months Ended		Nine Months Ended	
	2007	2006	2007	2006
	(in thousands, except as otherwise indicated)			
GAAP operating expenses	\$ 246,955	\$ 219,138	\$ 723,047	\$ 651,298

CASM - ex-fuel	7.07¢	7.50¢	7.54¢	7.97¢

**Three Months ended September 30, 2007 Compared to Three Months ended September 30, 2006**

During the three months ended September 30, 2007, we achieved net income of \$19.6 million and operating income of \$25.6 million, compared to net income of \$7.8 million and operating income of \$12.7 million for the same three-month period in 2006. The significant differences between income and expense items for the third quarters of 2007 and 2006 are discussed below.

**Operating Revenue.** Operating revenue was \$272.5 million for the three months ended September 30, 2007, a 17.8% increase over operating revenue of \$231.8 million for the same three-month period in 2006. Scheduled passenger revenue was \$247.7 million for the three months ended September 30, 2007, compared to scheduled passenger revenue of \$208.7 million for the same three-month period in 2006. The detail of changes in revenue is outlined in the table below.

	Change in scheduled passenger revenue (millions)	Change in Yield	Change in RPM	Change in ASM
Transpacific	\$ 33.2	2.4%	20.7%	21.1%
Interisland	2.7	(8.8)	15.1	1.4
South Pacific	3.2	6.8	14.5	1.3
Total scheduled	\$ 39.1	(1.0)%	19.9%	17.6

Other operating revenue slightly increased to \$24.8 million for the three months ended September 30, 2007 compared to \$23.2 million for the comparable three-month period in 2006.

**Operating Expenses.** Operating expenses were \$247.0 million for the three months ended September 30, 2007, a \$27.8 million increase from operating expenses of \$219.1 million for the comparable three-month period in 2006. The increase in operating expenses for the three-month period in 2007 was due primarily to increases in aircraft fuel, maintenance materials and repairs, depreciation and amortization and other operating expenses.

	Three months ended September 30, 2007	Change from three months ended September 30, 2006	Change
	(in thousands)		
<b><u>Operating expenses</u></b>			
Aircraft fuel, including taxes and oil	\$ 76,821	\$ 11,725	18.0% (a)
Wages and benefits	53,585	1,342	2.6
Aircraft rent	24,629	(2,639)	(9.7) (b)
Maintenance materials and repairs	21,122	3,992	23.3 (c)
Aircraft and passenger servicing	13,172	1,009	8.3
Commissions and other selling	14,056	2,872	25.7 (d)
Depreciation and amortization	11,958	4,802	67.1 (e)
Other rentals and landing fees	7,521	1,128	17.6
Other	24,091	3,586	17.5 (f)

Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

Total	\$	246,955	\$	27,817	12.7%
-------	----	---------	----	--------	-------

---

(a) The increase in aircraft fuel expense was primarily due to a 16.6% increase in fuel consumption during the three-month period ended September 30, 2007 as a result of increased operations. The cost of fuel (including taxes, delivery and hedging) also increased slightly by 1.2% to an average of \$2.27 per gallon in the third quarter of 2007.

The Company recognized \$0.7 million and \$0.9 million of gains during the three months ended September 30, 2007 and 2006, respectively, resulting from the fuel hedging programs in effect during those quarters which are reflected in the average fuel price per gallon.

As illustrated below, our average fuel expense per gallon in the third quarter of 2007 was \$2.27 as a result of prevailing spot prices, taxes and the impact of jet fuel hedges designated for the quarter.

	Per Gallon Average	Aggregate (thousands)
Spot Price (including delivery)	\$ 2.19	\$ 74,066
Taxes	0.10	3,413
Hedge Impact	(0.02)	(658)
Fuel Expense	\$ 2.27	\$ 76,821

(b) The decrease in aircraft rent expense was a result of the purchase in late December 2006 of three Boeing 767-300ER aircraft that were previously leased. This decrease was partially offset by \$1.6 million of aircraft rent expense recorded during the three months ended September 30, 2007, due primarily to supplemental rent charged for certain leased aircraft with non-refundable maintenance deposits. See our Critical Accounting Policies section for further discussion.

(c) The increase in maintenance materials and repairs expense was due primarily to three Boeing 767 aircraft c-checks performed during the three months ended September 30, 2007 compared to one in the same period in 2006, as well as increased costs incurred under power-by-the-hour (PBH) maintenance contracts for Boeing 767-300ER and Boeing 717-200 aircraft engines and other Boeing 767 and Boeing 717 aircraft components (e.g., auxiliary power units). The increase in expenses incurred under the PBH maintenance contracts was due in turn to the inclusion of additional Boeing 767 engines, increased hourly charges and increased utilization of our aircraft (approximately 13.2% more block hours were operated in the three months ended September 30, 2007 compared to the same period in 2006). We expect aircraft maintenance expenses to continue to increase in subsequent years due to a variety of factors, including the aging of our fleet, additional fleet utilization, the growth of our fleet, including the introduction of the four used Boeing 767-300 aircraft acquired in early 2006, the expiration of manufacturers warranties on certain aircraft and increased costs for related materials and services. As more fully discussed in our Critical Accounting Policies, we have made deposits to our aircraft lessors to cover a portion of our future maintenance costs. However, because these payments are recorded as deposits, to the extent recoverable through future maintenance, and then recognized as maintenance expense when the underlying maintenance is performed, they do not impact the timing of our recognition of maintenance expense, which is recognized as expense when incurred.

(d) The increase in commissions and other selling expenses was due primarily to an increase in credit card fees resulting from increased credit card sales as well as an increase in costs associated with our frequent flyer program.

(e) The increase in depreciation and amortization expense was attributable primarily to depreciation expense incurred following the acquisition of the three Boeing 767-300ER aircraft that were previously leased in late December 2006, as well as depreciation expense incurred on the four used Boeing 767-300 aircraft that were purchased in March 2006 and placed into service in September 2006 and January, March and June 2007.

(f) The increase in other operating expense included transition expenses related to the transfer of certain of our reservations functions to a third-party contractor in the Philippines and certain of our accounting and information technology (IT) functions to a third-party contractor in India. The increase also includes third-party contractor costs associated with completed outsourced activities which is expected to increase as we complete our outsourcing initiatives in reservations, accounting and IT. In addition, we incurred higher legal fees during the three months ended September 30, 2007 as well as increased hotel and per diem costs for the flight attendants and pilots as a result of increased operations.

**Nonoperating Income and Expense.** Nonoperating expense, net was \$3.7 million for the three months ended September 30, 2007, as compared to nonoperating income, net of \$0.6 million for the three months ended September 30, 2006. The \$4.4 million additional expense from the three months ended September 30, 2006 to the three months ended September 30, 2007 is primarily due to higher interest expense due to the addition of long-term debt in 2006.

**Income Taxes.** We recorded an income tax expense of \$2.2 million for the three months ended September 30, 2007 compared to income tax expense of \$5.6 million for the same period in 2006. The income tax expense of \$2.2 million is driven by the decrease of the net operating loss carryback to 2005 due to the increase in income in the third quarter. The income tax expense of \$5.6 million is based on the taxable income for the third quarter of 2006.

**Nine Months ended September 30, 2007 Compared to Nine Months ended September 30, 2006**

During the nine months ended September 30, 2007, we achieved net income of \$3.7 million and operating income of \$8.8 million, compared to a net loss of \$30.9 million and operating income of \$17.1 million for the same nine-month period in 2006. The \$34.7 million improvement in net income for the nine months ended September 30, 2007 compared to the same period in 2006 is primarily due to the inclusion in the earlier period of a \$32.1 million nonoperating charge incurred in connection with the redemption, extinguishment and modification of certain long-term debt issued in June 2005 to partially fund the joint plan of reorganization. The significant differences between income and expense items for the nine months ended September 30, 2007 and 2006 are discussed below.

**Operating Revenue.** Operating revenue was \$731.9 million for the nine months ended September 30, 2007, a 9.5% increase over operating revenue of \$668.4 million for the same nine-month period in 2006. Scheduled passenger revenue was \$662.4 million for the nine months ended September 30, 2007, compared to scheduled passenger revenue of \$600.4 million for the same nine-month period in 2006. The detail of changes in revenue is outlined in the table below.

	Change in scheduled passenger revenue (millions)	Change in Yield	Change in RPM	Change in ASM
Transpacific	\$ 74.3	(0.5)%	19.8%	21.3%
Interisland	(15.0)	(20.1)	14.2	6.7
South Pacific	2.7	6.0	0.5	(10.4)
Total scheduled	\$ 62.0	(6.4)%	17.9%	17.0%

**Operating Expenses.** Operating expenses were \$723.0 million for the nine months ended September 30, 2007, a \$71.7 million increase from operating expenses of \$651.3 million for the comparable nine-month period in 2006. The increase in operating expenses for the nine-month period in 2007 was due primarily to increases in aircraft fuel expense, maintenance materials and repairs, and depreciation and amortization expenses.

	Nine months ended September 30, 2007 (in thousands)	Change from nine months ended September 30, 2006	Change
<b><u>Operating expenses</u></b>			
Aircraft fuel, including taxes and oil	\$ 204,279	\$ 23,005	12.7% (a)
Wages and benefits	171,528	5,059	3.0
Aircraft rent	73,208	(8,582)	(10.5) (b)

Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

Maintenance materials and repairs	69,420	17,256	33.1	(c)
Aircraft and passenger servicing	41,109	5,189	14.4	(d)
Commissions and other selling	42,436	6,046	16.6	(e)
Depreciation and amortization	33,353	12,472	59.7	(f)
Other rentals and landing fees	21,324	2,866	15.5	
Other	66,390	8,438	14.6	(g)
Total	\$ 723,047	\$ 71,749	11.0%	

(a) The increase in aircraft fuel expense was due to a 12.5% increase in fuel consumption during the nine-month period ended September 30, 2007 due to increased operations. The cost of fuel (inclusive of taxes, delivery and hedging) also increased slightly by 0.02% to an average of \$2.11 per gallon for the nine-month period ended September 30, 2007. The Company recorded a gain of \$2.3 million and a loss of \$0.8 million during the nine months ended September 30, 2007 and 2006, respectively, resulting from the fuel hedging programs in effect during those respective periods.

As illustrated below, our average fuel expense per gallon in the first nine months of 2007 was \$2.11, as a result of prevailing spot prices, taxes and the impact of jet fuel hedges designated for the period.

		Per Gallon Average		Aggregate (thousands)
Spot Price (including delivery)	\$	2.04	\$	197,150
Taxes		0.10		9,412
Hedge Impact		(0.03)		(2,283)
Fuel Expense	\$	2.11	\$	204,279

(b) The decrease in aircraft rent expense was a result of the purchase in late December 2006 of three Boeing 767-300ER aircraft that were previously leased. This decrease was offset by \$4.2 million of aircraft rent expense recorded during the nine months ended September 30, 2007, due primarily to supplemental rent charged for certain leased aircraft with non-refundable maintenance deposits. See our Critical Accounting Policies section for further discussion.

(c) The increase in maintenance materials and repairs expense was due primarily to two Boeing 767 engine overhauls that took place during the nine months ended September 30, 2007 compared to none in the same period in 2006, as well as increased costs incurred under power-by-the-hour (PBH) maintenance contracts for Boeing 767-300ER and Boeing 717-200 aircraft engines and other Boeing 767 and Boeing 717 aircraft components (e.g., auxiliary power units). The increase in expenses incurred under the PBH maintenance contracts was due in turn to the inclusion of additional Boeing 767 engines, increased hourly charges and increased utilization of our aircraft (approximately 15% more block hours were operated in the nine months ended September 30, 2007 compared to the same period in 2006). We expect aircraft maintenance expenses to continue to increase in subsequent years due to a variety of factors, including the aging of our fleet, additional fleet utilization, the growth of our fleet, including the introduction of the four used Boeing 767-300 aircraft acquired in early 2006, the expiration of manufacturers warranties on certain aircraft and increased costs for related materials and services. As more fully discussed in our Critical Accounting Policies, we have made deposits to our aircraft lessors to cover a portion of our future maintenance costs. However, because these payments are recorded as a deposit, to the extent recoverable through future maintenance, and then recognized as maintenance expense when the underlying maintenance is performed, they do not impact the timing of our recognition of maintenance expense, which is recognized as expense when incurred.

(d) The increase in aircraft and passenger servicing expense was primarily due to an increase in passenger food expense and an increase in passenger inconvenience expense over the prior year. The increase in

passenger food expense is largely attributable to the increase in the number of passengers carried on our long haul 767-300 services.

(e) The increase in commissions and other selling expenses was due primarily to an increase in credit card fees resulting from increased credit card sales as well as an increase in costs associated with our frequent flyer program.

(f) The increase in depreciation and amortization expense was attributable primarily to depreciation expense incurred following the acquisition of the three Boeing 767-300ER aircraft that were previously leased in late December 2006, as well as depreciation expense incurred on the four used Boeing 767-300 aircraft that were purchased in March 2006 and placed into service in September 2006 and January, March and June 2007.

(g) The increase in other operating expense was primarily due to transition expenses related to the transfer of certain of our reservations functions to a third-party contractor in the Philippines and certain of our accounting and IT functions to a third-party contractor in India. The increase also includes third-party contractor costs associated with completed outsourced activities which are expected to increase as we complete our outsourcing initiatives in reservations, accounting and IT. In addition, we incurred higher legal fees during the nine months ended September 30, 2007 as well as increased hotel and per diem costs for the flight attendants and pilots.

**Nonoperating Income and Expense.** Nonoperating expense, net was \$12.0 million for the nine months ended September 30, 2007, as compared to nonoperating expense, net of \$38.0 million for the nine months ended September 30, 2006. The decrease of \$26.0 million from the nine months ended September 30, 2006 to the nine months ended September 30, 2007 was primarily due to the following:

\$28.0 million of nonoperating loss on the redemption of the 5.0% subordinated convertible notes on April 21, 2006 due principally to the accelerated amortization of the remaining discount associated with the notes when they were initially issued in June 2005.

\$4.1 million of debt extinguishment and modification costs recorded during the nine months ended September 30, 2006 related to the credit facilities that were amended on March 13, 2006.

\$7.0 million higher interest expense during the nine months ended September 30, 2007 due to the addition of long-term debt in December 2006.

**Income Taxes.** We recorded an income tax benefit of \$6.9 million for the nine months ended September 30, 2007 compared to income tax expense of \$10.1 million for the same period in 2006. The difference was primarily due to the tax benefit recognized in the nine months ended September 30, 2007 resulting from operating losses which will be fully recovered by the availability of carrybacks to tax years 2004 and 2005. In addition, our taxable income for the nine months ended September 30, 2007 was less than the same period in 2006, primarily due to additional depreciation deductions in 2007. In 2006, taxable income was also higher due to the nondeductibility of certain debt extinguishment charges.

## **Liquidity and Capital Resources**

### *Cash Flows*

Our liquidity is dependent on the operating results and cash flows of Hawaiian, along with our significant debt financings, including the loan agreements entered into in December 2006 to finance the purchase of three previously leased Boeing 767-300ER aircraft and two credit facilities entered into in June 2005 in connection with our plan of reorganization and subsequently amended in March 2006. These financial arrangements are described in more detail in our Annual Report on Form 10-K for the year ended December 31, 2006. Substantially all of our assets are encumbered under our existing credit facilities.

We have been able to maintain positive cash flow from operations principally by increasing scheduled passenger revenue through a combination of yield management and scheduling on our long-haul and interisland routes, and through increases in the sales of miles to companies affiliated

## Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

with its frequent flyer program, *HawaiianMiles*. However, the introduction of new and expanded service into our transpacific market by certain major domestic airlines, the depressed fares in our interisland markets associated with overall capacity increases due primarily to the entrance of Mesa Airlines in June 2006, and other downward pressures on our yields and load factors in the markets we serve have adversely impacted and may continue to adversely impact our operating revenue. As discussed above, to counteract in part such potentially adverse effects on our operating revenue, we have initiated programs aimed at significantly reducing our operating expenses in order to help maintain positive cash flow from operations in the future.

Cash, cash equivalents, restricted cash and short-term investments were \$215.3 million as of September 30, 2007, which was \$47.1 million higher than at December 31, 2006. Cash and cash equivalents as of September 30, 2007 were \$110.4 million which was \$43.6 million higher than at December 31, 2006. The increase in cash and cash equivalents was due to increased ticket sales and a decrease in the holdback level required by our largest credit card processing contract through an amendment which was effective January 1, 2007. As a result of the amendment to the credit card agreement, our holdback percentage was reduced, resulting in a release of approximately \$24 million from restricted to unrestricted cash.

Our net cash provided by operating activities increased by \$34.3 million from the nine months ended September 30, 2006 to the nine months ended September 30, 2007 which is consistent with the increase in net income of \$34.7 million between those same periods. The \$34.3 million period-over-period increase was primarily due to a reduction in the cash collateral required by our credit card processor resulting from the amendment discussed above, as well as increases in air

traffic liability during the nine months ended September 30, 2007 due to advanced ticket sales. Net cash used by investing activities was \$32.7 million during the nine months ended September 30, 2007 compared to net cash used of \$93.7 million for the comparable period in 2006. The net cash used of \$32.7 million during the nine months ended September 30, 2007 was due to \$23.4 million of capital expenditures primarily related to modifications and overhauls of the used Boeing 767-300 aircraft purchased in March 2006. Purchases and sales of short-term investments offset each other for the nine months ended September 30, 2007. During the nine months ended September 30, 2006, we used \$93.7 million of cash for investing activities. This was comprised of \$62.4 million of capital expenditures primarily related to the initial purchase of the four used Boeing 767-300 aircraft and \$31.3 million of net purchases of short-term investments. Financing activities for the nine months ended September 30, 2007 used net cash of approximately \$17.3 million primarily related to repayments on our long-term debt and capital lease obligations, whereas financing activities for the nine months ended September 30, 2006 provided net cash of approximately \$12.3 million due primarily to the \$91.3 million of additional debt incurred, offset by \$54.9 million used to repurchase the subordinated convertible notes and warrants and \$20.6 million of repayments on our long-term debt and capital lease obligations.

*Financial Covenants*

## Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

The terms of our Term A and Term B Credit Facilities restrict our ability to, among other things, incur additional indebtedness, pay dividends or make other payments on investments, consummate asset sales or similar transactions, create liens, merge or consolidate with any other person, or sell, assign, transfer, lease, convey or otherwise dispose of all or substantially all of our assets. The terms of the agreements contain covenants that require us to meet certain financial tests to avoid a default that might lead to early termination of the facilities. These financial tests include maintaining a minimum amount of unrestricted cash and achieving certain levels of debt service coverage. As of September 30, 2007, we were in compliance with these covenants. If we were not able to comply with these covenants, our outstanding obligations under these facilities could be accelerated and become due and payable immediately.

Under our credit card processing agreements, certain proceeds from advance ticket sales are held back to serve as collateral to cover any possible chargebacks or other disputed charges that may occur. These holdbacks, which are included in restricted cash in our Consolidated Balance Sheets, totaled \$47.8 million at September 30, 2007. The funds are interest-bearing and are subsequently made available to us as air travel is provided. The agreement with our largest credit card processor also contains financial triggers which require, among other things, that we maintain a minimum amount of unrestricted cash and short-term investments, and maintain certain levels of debt service coverage and operating income. Under the terms of this credit card processing agreement, which was amended effective June 30, 2007, the level of credit card holdback is subject to adjustment based on these specific financial triggers. As of September 30, 2007, the holdback was at the contractual level of 40% of the applicable credit card air traffic liability. However, given continued downward pressure on passenger yields and volatility of fuel prices, we cannot guarantee that our financial performance in future periods will not require further increases in the holdback level up to 100%, and that restricted cash will not be commensurately increased. The additional holdback of restricted cash may increase the likelihood of failing to comply with other credit facility financial covenants and, if we did not take steps to obtain a waiver of, or otherwise mitigate the increase in restriction of cash, it could also cause a covenant violation under other debt or lease obligations and have a material adverse impact on us.

### *Pension and Postemployment Benefit Plan Funding*

## Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

Hawaiian sponsors three tax-qualified defined benefit pension plans covering its Air Line Pilots Association, IAM, Transport Workers Union, Network Engineering Group and certain non-contract employees, as well as a separate plan to administer the pilots' disability benefits. In the aggregate, these plans are underfunded. Hawaiian made scheduled contributions of \$4.7 million and \$11.1 million during the three and nine months ended September 30, 2007, respectively, and made its last expected contribution of \$0.6 million to the defined benefit pension plans for the remainder of 2007 on October 15, 2007. Future funding requirements are dependent upon many factors such as interest rates, funded status, applicable regulatory requirements for funding purposes and the level and timing of asset returns.

As a result of a recent technical correction to the Pension Protection Act of 2006, the timing of our minimum required contributions to our defined benefit pension plans has changed significantly and will have the effect of delaying previously required minimum contributions to future periods. The legislation did not change our total future contributions and also did not change the expected contribution for 2007.

The U.S. Congress is currently considering legislation that would allow commercial airline pilots to fly until age 65. The Federal Aviation Administration currently requires commercial pilots to retire once they reach age 60. We have not completed an evaluation of the impact of the proposed legislation on our financial statements; however, the proposed legislation could have a material impact on the valuation of our liability for pension and postretirement benefits.

## Critical Accounting Policies

The discussion and analysis of our financial condition and results of operations are based upon financial statements that have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amount of assets and liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities as of the date of the financial statements. Actual results may differ from these estimates under different assumptions and/or conditions.

Critical accounting policies and estimates are defined as those accounting policies and accounting estimates that are reflective of significant judgments and uncertainties that potentially could result in materially different results under different assumptions and conditions. For a detailed discussion of the application of our critical accounting policies other than the one discussed immediately below, see Critical Accounting Policies and Note 3, Summary of Significant Accounting Policies, to our consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2006.

*Aircraft maintenance and repair costs.* Maintenance and repair costs for owned and leased flight equipment, including the overhaul of aircraft components, are charged to operating expenses as incurred. Engine overhaul costs covered by power-by-the-hour arrangements are paid and expensed as incurred, on the basis of hours flown per contract. Under the terms of our power-by-the-hour agreements, we pay a set dollar amount per engine hour flown on a monthly basis and the third-party vendor assumes the obligation to repair the engines at no additional cost to us, subject to certain specified exclusions. Additionally, although our aircraft lease agreements specifically provide that we, as lessee, are responsible for maintenance of the leased aircraft, we do, under our existing aircraft lease agreements, pay maintenance reserves to aircraft lessors that are to be applied towards the cost of future maintenance events. These reserves are calculated based on a performance measure, such as flight hours, and are available for reimbursement to us upon the completion of the maintenance of the leased aircraft. If there are sufficient funds on deposit to reimburse us for the invoices initially paid by Hawaiian and then submitted to the lessor, they are reimbursed to us. However, reimbursements are limited to the available deposits associated with the specific maintenance activity for which we are requesting reimbursement. Under certain of our existing aircraft lease agreements, if there are excess amounts on deposit at the expiration of the lease, the lessor is entitled to retain any excess amounts; whereas, at the expiration of certain other of our existing aircraft lease agreements, any such excess amounts are returned to us provided that we have fulfilled all of our obligations under the lease agreements. The maintenance reserves paid under our lease agreements do not transfer either the obligation to maintain the aircraft or the cost risk associated with the maintenance activities to the aircraft lessor. In addition, we maintain the right to select any third-party maintenance provider. Therefore, we record these amounts as a deposit on our balance sheet and then recognize maintenance expense when the underlying maintenance is performed in accordance with our maintenance accounting policy. Because we recognize expense when the underlying maintenance is performed, as opposed to expensing the deposits when paid to the lessor, and because the cost of maintaining an aircraft increases as the aircraft gets older, we will recognize significantly less maintenance expense in the earlier years of the leases than in the later years, even though our use of and benefit from the aircraft does not vary correspondingly over the term of the lease, and our current and past results of operations may not be indicative of our future results as a result of our expectation of expensing the deposits in the future. Hawaiian's maintenance reserve activity for the past three years and the nine months ended September 30, 2007, is as follows (in thousands):

Beginning

Ending

Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

	Balance	Payments	Reimbursements	Balance
Year ended December 31:				
2004	\$ 15,916	\$ 11,412	\$ (1,990)	\$ 25,338
2005	25,338	12,593	(7,542)	30,389
2006	30,389	14,604	(8,504)	36,489
Nine months ended September 30, 2007	36,489	9,582	(3,096)	42,975
Fair value adjustments (1)				(3,798)
Deposits not considered probable of recovery (2)				(7,924)
Recorded balance at September 30, 2007			\$	31,253

(1) We recorded Hawaiian's maintenance deposits at fair value upon Hawaiian's emergence from bankruptcy on June 2, 2005. The individual line items in the table do not reflect our recorded fair value adjustments (which related primarily to recording the deposits at their net present value as of June 2, 2005, based on the anticipated dates the underlying maintenance would be performed).

(2) Non-refundable amounts that are not considered probable of being used to fund future maintenance expense recognized as additional aircraft rental expense. In determining whether it is probable that maintenance deposits will be used to fund the cost of maintenance events, we conduct the following analysis:

We evaluate the aircraft's condition, including the airframe, the engines and the landing gear.

We then project future usage of the aircraft during the term of the lease based on our business and fleet plan.

We also estimate the cost of performing all required maintenance during the lease term. These estimates are based on the experience of our maintenance personnel and industry available data, including historical fleet operating statistic reports published by the aircraft and engine manufacturers. Our assessment of the recoverability of our maintenance deposits is subject to change in the event that key estimates and assumptions supporting it change over time. Those key estimates and assumptions include our fleet plan and the projected total cost and, to a lesser extent, anticipated timing of the major maintenance activities covered by the maintenance reserves. During the nine months ended September 30, 2007, we contracted with a new third-party maintenance provider resulting in projected cost savings for major maintenance activities for certain leased aircraft with non-refundable maintenance deposits. As a result of the expected cost savings, we expensed \$1.8 million of certain major overhaul maintenance deposits that we had previously determined to be recoverable through future maintenance activities with our current third-party maintenance providers, along with \$1.2 million of engine maintenance deposits that we began expensing as they become due. This revision in our assessment was based entirely on the projected total cost of the anticipated major maintenance activities that will be required over the remaining aircraft lease term. Furthermore, based on historical trends and future projections, including those published by the manufacturers of our aircraft and engines, we believe it is unlikely that future maintenance costs for our aircraft will decline further to such an extent that the maintenance deposits currently recorded on our Consolidated Balance Sheets would not be used to fund the cost of future maintenance events and, therefore, not be recoverable.

**ITEM 3.  
RISK.**

**QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET**

We are subject to certain market risks, including commodity price risk (i.e., jet fuel prices), and interest rate risk. We have market sensitive instruments in the form of variable rate debt instruments and financial derivative instruments used to hedge our exposure to jet fuel price increases. The adverse effects of potential changes in these market risks are discussed below. The sensitivity analyses presented do not consider the effects that such adverse changes may have on overall economic activity nor do they consider additional actions we might undertake to mitigate our exposure to such changes. Actual results may differ.

**Aircraft Fuel Costs.** Aircraft fuel costs constituted a significant portion of our operating expense. Fuel costs represented 31.1% and 27.3%, respectively, of our operating expenses for the three months ended September 30, 2007 and the year ended December 31, 2006. Based on gallons expected to be consumed in 2007, for every one-cent increase in the

cost of jet fuel, our annual fuel expense increases by approximately \$1.3 million.

In order to mitigate some of the risk associated with the fluctuating cost of jet fuel, we utilize jet fuel forward contracts and heating oil hedging contracts. As of September 30, 2007, we had entered into jet fuel forward contracts and heating oil forward contracts to hedge the cost of approximately 20% of our fuel requirements through the first quarter of 2008. The combined jet fuel and heating oil forward contracts hedge approximately 25% of our total fuel requirements for the fourth quarter of 2007 and approximately 14% of our total fuel requirements for the first quarter of 2008. Our jet fuel forward contracts have an average contract price of \$2.18 and our heating oil forward contracts have an average contract price of \$2.05. The fair value of the jet fuel forward contracts and heating oil hedging contracts was \$2.1 million as of September 30, 2007 and was recorded in prepaid expenses and other in the accompanying Consolidated Balance Sheets.

Our jet fuel operating expense in a particular period will reflect the spot price for jet fuel during that period, applicable fuel taxes, the cost of delivery to airports and the recognition of hedge gains or losses for the designated period.

We do not hold or issue derivative financial instruments for trading purposes. We are exposed to credit risks in the event our jet fuel forward counterparty fails to meet its obligations; however, we do not expect this counterparty to fail to meet its obligations.

**Interest Rates.** Our results of operations are affected by fluctuations in interest rates due to our variable-rate debt and interest income earned on our cash deposits and short-term investments. The Company's primary debt agreements include the Term A Credit Facility, Term B Credit Facility and the Boeing 767-300ER financing agreements, the terms of which are discussed in Note 6 to our consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2006.

At September 30, 2007, we had \$77.8 million of fixed rate debt, including capital leases of \$0.8 million, and \$167.5 million of variable rate debt indexed to the Wells Fargo Bank Prime Rate and the one-month London Interbank Bank Offered Rate (LIBOR) and six-month LIBOR. Interest rates on the LIBOR indexed loans adjust either monthly or semi-annually. The Wells Fargo Bank Prime Rate was 7.75% and one-month LIBOR and six-month LIBOR were 5.12% and 5.13%, respectively, on such date. We do not mitigate our exposure on variable-rate debt by entering into interest rate swaps. Therefore, changes in market interest rates have a direct and corresponding effect on our pre-tax earnings and cash flows associated with our floating rate debt and interest-bearing cash accounts and short-term investments. However, based on the balances of our cash and cash equivalents, restricted cash, short-term investments, and variable-rate debt as of September 30, 2007, a change in interest rates would not have a material impact on our results of operations because the level of our variable-rate interest-bearing cash deposits and investments approximate the level of our variable-rate liabilities. Should that relationship change in the future, our exposure to changes in interest rate fluctuations would likely increase.

Market risk for fixed rate long-term debt and capitalized lease obligations is estimated as the potential increase in fair value resulting from a hypothetical 10 percent decrease in interest rates, and amounted to approximately \$2.2 million as of September 30, 2007.

#### **ITEM 4. CONTROLS AND PROCEDURES.**

##### **Evaluation of Disclosure Controls and Procedures**

Our management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), performed an evaluation of our disclosure controls and procedures, which have been designed to permit us to effectively identify and timely disclose important financial information. Based on that evaluation, our management, including our CEO and CFO, concluded that our disclosure controls and procedures are effective as of September 30, 2007 and provide reasonable assurance that the information required to be disclosed by the Company in reports it files under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and is accumulated and communicated to our management, including our CEO and CFO, to allow timely decisions regarding required disclosure. While our disclosure controls and procedures provide reasonable assurance that the appropriate information will be available on a timely basis, this assurance is subject to limitations inherent in any control system, no matter how well it may be designed or administered.

##### **Changes in Internal Control over Financial Reporting**

## Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

During the third quarter of 2007, we continued to outsource certain accounting functions to a business process outsourcing (BPO) organization in India. We also upgraded our financial accounting system. In connection with these transactions, we believe there have been no significant changes to the internal controls over financial reporting that materially affected, or are reasonably likely to materially affect the effectiveness of our internal controls over financial reporting.

### **PART II. OTHER INFORMATION**

#### **ITEM 1. LEGAL PROCEEDINGS.**

*Mesa Air Group*

## Edgar Filing: HAWAIIAN HOLDINGS INC - Form 10-Q

On February 13, 2006, Hawaiian filed a complaint against Mesa Air Group, Inc. (Mesa) in the Bankruptcy Court for the District of Hawaii, Hawaiian Airlines, Inc. v. Mesa Air Group, Inc., Adversary Proceeding No. 06-90026 (Bankr. D. Haw.). The complaint alleged that Mesa misused confidential and proprietary information that was provided by Hawaiian to Mesa in April and May 2004, pursuant to a process that was established by the Bankruptcy Court to facilitate Hawaiian's efforts to solicit potential investment in connection with a Chapter 11 plan of reorganization. On September 25, 2007 the case went to trial. The first matter the Court considered was the motion for sanctions Hawaiian filed on September 7, 2007 based upon new forensic computer evidence that was uncovered revealing that a Mesa senior executive officer had destroyed files

and other documentary evidence on three computers he used and then backdated the computers' clocks to conceal his spoliation of the evidence. After two days of hearing, the Court ruled that Mesa had failed to return or destroy the proprietary information it had received from Hawaiian, had misused that information, and had relied on that information as a substantial factor in its decision to enter the Hawaii market. During the trial that followed, the remaining issues for Hawaiian to prove were that the information Mesa misused was confidential and not publicly-available, and the extent Hawaiian was damaged by Mesa's malfeasance. Hawaiian seeks \$173 million in damages, plus prejudgment interest and attorney's fees and costs, and injunctive relief. On October 30, 2007, the Bankruptcy Court ruled in favor of Hawaiian, awarding Hawaiian \$80 million for damages incurred to date and ordering that Mesa pay Hawaiian post-judgment interest and its cost of litigation and reasonable attorneys' fees. There can be no assurance that Hawaiian will prevail if this decision is appealed by Mesa, as Mesa has stated publicly that it intends to do, or that any damages or litigation costs will ultimately be recovered by Hawaiian.

We are not a party to any other litigation that is expected to have a significant effect on our operations or business.

**ITEM 1A. RISK FACTORS.**

There have been no material changes to the risk factors disclosed in Item 1A., Risk Factors, in our Annual Report on Form 10-K for the fiscal year ended December 31, 2006.

**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.**

None.

**ITEM 3. DEFAULTS UPON SENIOR SECURITIES.**

None.

**ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.**

None.

**ITEM 5. OTHER INFORMATION.**

None.
