CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains “forward-looking statements” intended to qualify for the safe harbors from liability established by the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact contained in this report are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Forward-looking statements usually relate to future events and anticipated revenues, earnings, cash flows or other aspects of our operations or operating results. Forward-looking statements are often identified by the words “believe,” “expect,” “anticipate,” “plan,” “intend,” “foresee,” “should,” “would,” “could,” “may,” “estimate,” “outlook” and similar expressions, including the negative thereof. The absence of these words, however, does not mean that the statements are not forward-looking. These forward-looking statements are based on our current expectations, beliefs and assumptions concerning future developments and business conditions and their potential effect on us. While management believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting us will be those that we anticipate.

All of our forward-looking statements involve risks and uncertainties (some of which are significant or beyond our control) and assumptions that could cause actual results to differ materially from our historical experience and our present expectations or projections. Known material factors that could cause actual results to differ materially from those contemplated in the forward-looking statements include those set forth in Part II, Item 1A, “Risk Factors” and elsewhere in this Quarterly Report on Form 10-Q and Part I, Item 1A, “Risk Factors” in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014, as well as the following:

- Demand for our systems and services, which is affected by changes in the price of, and demand for, crude oil and natural gas in domestic and international markets;
- Potential liabilities arising out of the installation or use of our systems;
- U.S. and international laws and regulations, including environmental regulations, that may increase our costs, limit the demand for our products and services or restrict our operations;
- Disruptions in the political, regulatory, economic and social conditions of the foreign countries in which we conduct business;
- Fluctuations in currency markets worldwide;
- Cost overruns that may affect profit realized on our fixed price contracts;
- Disruptions in the timely delivery of our backlog and its effect on our future sales, profitability and our relationships with our customers;
- The cumulative loss of major contracts or alliances;
- Rising costs and availability of raw materials;
- A failure of our information technology infrastructure or any significant breach of security;
- Our ability to develop and implement new technologies and services, as well as our ability to protect and maintain critical intellectual property assets;
- The outcome of uninsured claims and litigation against us;
- Deterioration in future expected profitability or cash flows and its effect on our goodwill;
- Continuing consolidation within our customers’ industries; and
- Downgrade in the ratings of our debt could restrict our ability to access the debt capital markets.

We wish to caution you not to place undue reliance on any forward-looking statements, which speak only as of the date hereof. We undertake no obligation to publicly update or revise any of our forward-looking statements after the date they are made, whether as a result of new information, future events or otherwise, except to the extent required by law.

FMC TECHNOLOGIES, INC. AND CONSOLIDATED SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements of FMC Technologies, Inc. and its consolidated subsidiaries (“FMC Technologies”) have been prepared in accordance with United States generally accepted accounting principles (“GAAP”) and rules and regulations of the Securities and Exchange Commission (“SEC”) pertaining to interim financial information. As permitted under those rules, certain footnotes or other financial information that are normally required by GAAP have been condensed or omitted. Therefore, these statements should be read in conjunction with the audited consolidated financial statements, and notes thereto, which are included in our Annual Report on Form 10-K for the year ended December 31, 2014.

Prior to 2015, the income taxes financial statement line item in cash provided by operating activities on the condensed consolidated statements of cash flows historically included changes during the reporting period attributable to income taxes receivables and payables and current and deferred income tax assets and liabilities. Beginning in the first quarter of 2015, amounts attributable to current and deferred income tax assets and liabilities are now presented in the other assets and liabilities, net financial statement line item. All prior-year amounts have been revised to conform to the current year presentation.

Our accounting policies are in accordance with GAAP. The preparation of financial statements in conformity with these accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Ultimate results could differ from our estimates.

In the opinion of management, the statements reflect all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation of our financial condition and operating results as of and for the periods presented. Revenue, expenses, assets and liabilities can vary during each quarter of the year. Therefore, the results and trends in these statements may not be representative of the results that may be expected for the year ending December 31, 2015.

NOTE 2. RECENTLY ADOPTED ACCOUNTING STANDARDS

Effective January 1, 2015, we adopted Accounting Standards Update (“ASU”) No. 2015-01, “Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items” which eliminates from GAAP the concept of extraordinary items. However, the presentation and disclosure guidance for items that are unusual in nature or infrequent in occurrence was retained. We adopted the updated guidance prospectively. The adoption of this update concerns presentation and disclosure only as it relates to our condensed consolidated financial statements.

Table of Contents

NOTE 3. EARNINGS PER SHARE

A reconciliation of the number of shares used for the basic and diluted earnings per share calculation was as follows:

(In millions, except per share data)	Three Months Ended	
	March 31,	
	2015	2014
Net income attributable to FMC Technologies, Inc.	\$147.6	\$135.2
Weighted average number of shares outstanding	233.0	237.4
Dilutive effect of restricted stock units and stock options	0.9	0.4
Total shares and dilutive securities	233.9	237.8
Basic earnings per share attributable to FMC Technologies, Inc.	\$0.63	\$0.57
Diluted earnings per share attributable to FMC Technologies, Inc.	\$0.63	\$0.57

NOTE 4. INVENTORIES

Inventories consisted of the following:

(In millions)	March 31,	December 31,
	2015	2014
Raw materials	\$198.4	\$196.6
Work in process	146.7	166.1
Finished goods	856.2	849.9
	1,201.3	1,212.6
LIFO and valuation adjustments	(188.2) (191.4
Inventories, net	\$1,013.1	\$1,021.2

Table of Contents

NOTE 5. DEBT

Long-term debt consisted of the following:

(In millions)	March 31, 2015	December 31, 2014
Revolving credit facility	\$—	\$—
Commercial paper ⁽¹⁾	478.1	469.1
2.00% Notes due 2017	299.7	299.6
3.45% Notes due 2022	499.7	499.7
Term loan	18.6	22.9
Property financing	8.8	9.7
Total long-term debt	1,304.9	1,301.0
Less: current portion	(3.3) (3.8
Long-term debt, less current portion	\$1,301.6	\$1,297.2

Committed credit available under our revolving credit facility provided the ability to refinance our commercial paper obligations on a long-term basis. As we have both the ability and intent to refinance these obligations on a ⁽¹⁾ long-term basis, our commercial paper borrowings were classified as long-term in the condensed consolidated balance sheets at March 31, 2015 and December 31, 2014. As of March 31, 2015, our commercial paper borrowings had a weighted average interest rate of 0.64%.

NOTE 6. INCOME TAXES

Our income tax provisions for the three months ended March 31, 2015 and 2014, reflected effective tax rates of 20.0% and 33.2%, respectively. The year-over-year decrease in the effective tax rate was primarily due to an increase in earnings from foreign operations indefinitely reinvested outside the United States and a favorable change in the forecasted country mix of earnings. As of January 1, 2015, we changed our assertion of certain prior year earnings from foreign operations as indefinitely reinvested due to increased cash demands outside the United States. Our effective tax rate can fluctuate depending on our country mix of earnings, since our foreign earnings are generally subject to lower tax rates than in the United States. In certain jurisdictions, primarily Singapore and Malaysia, our tax rate is significantly less than the relevant statutory rate due to tax holidays.

Table of Contents

NOTE 7. WARRANTY OBLIGATIONS

Warranty cost and accrual information was as follows:

(In millions)	Three Months Ended March 31,	
	2015	2014
Balance at beginning of period	\$23.0	\$18.0
Expense for new warranties	7.7	5.4
Adjustments to existing accruals	1.6	0.4
Claims paid	(8.2) (4.9
Balance at end of period	\$24.1	\$18.9

NOTE 8. PENSION AND OTHER POST-RETIREMENT BENEFITS

The components of net periodic benefit cost were as follows:

(In millions)	Pension Benefits			
	Three Months Ended March 31,			
	2015		2014	
	U.S.	Int'l	U.S.	Int'l
Service cost	\$3.7	\$4.1	\$3.4	\$4.3
Interest cost	6.6	3.7	7.3	4.7
Expected return on plan assets	(11.0) (6.9) (11.6) (7.6
Amortization of actuarial loss (gain), net	4.9	3.2	3.1	1.7
Net periodic benefit cost	\$4.2	\$4.1	\$2.2	\$3.1
	Other Post-retirement Benefits			
	Three Months Ended March 31,			
	2015	2014		
Interest cost	\$0.1	\$0.1		
Amortization of actuarial loss (gain), net	—	(0.1		
Net periodic benefit cost	\$0.1	\$—		

During the three months ended March 31, 2015, we contributed \$2.3 million to our domestic pension benefit plans and \$11.5 million to our international pension benefit plans.

Table of Contents

NOTE 9. STOCK-BASED COMPENSATION

Under the Amended and Restated FMC Technologies, Inc. Incentive Compensation and Stock Plan (the “Plan”), we have primarily granted awards in the form of nonvested stock units (also known as restricted stock units in the plan document). We recognize compensation expense and the corresponding tax benefits for awards under the Plan. Stock-based compensation expense for nonvested stock units was \$19.8 million and \$17.9 million for the three months ended March 31, 2015 and 2014, respectively.

During the three months ended March 31, 2015, we granted the following restricted stock units to employees:

(Number of restricted stock shares in thousands)	Shares	Weighted-Average Grant Date Fair Value (per share)
Time-based	701	
Performance-based	246	*
Market-based	123	*
Total granted	1,070	\$39.04

* Assumes grant date expected payout

For current-year performance-based awards, actual payouts may vary from zero to 492 thousand shares, contingent upon our performance relative to a peer group of companies with respect to earnings growth and return on investment for the year ending December 31, 2015. Compensation cost is measured based on the current expected outcome of the performance conditions and may be adjusted until the performance period ends.

For current-year market-based awards, actual payouts may vary from zero to 246 thousand shares, contingent upon our performance relative to the same peer group of companies with respect to total shareholder return (“TSR”) for a three year period ending December 31, 2017. The payout for the TSR metric is determined based on our performance relative to the peer group, however a payout is possible regardless of whether our TSR for the three year period is positive or negative. If our TSR for the three years is not positive, the payout with respect to TSR is limited to the target previously established by the Compensation Committee of the Board of Directors. Compensation cost for these awards is calculated using the grant date fair market value, as estimated using a Monte Carlo simulation, and is not subject to change based on future events.

NOTE 10. STOCKHOLDERS’ EQUITY

There were no cash dividends declared during the three months ended March 31, 2015 and 2014.

The following is a summary of our treasury stock activity for the three months ended March 31, 2015 and 2014:

(Number of shares in thousands)	Treasury Stock
Balance as of December 31, 2013	50,318
Stock awards	(459)
Treasury stock purchases	899
Balance as of March 31, 2014	50,758
Balance as of December 31, 2014	54,626
Stock awards	(322)
Treasury stock purchases	776
Balance as of March 31, 2015	55,080

Table of Contents

We repurchased \$30.8 million and \$45.8 million of common stock during the three months ended March 31, 2015 and March 31, 2014, respectively, under the authorized repurchase program. In February 2015, the Board of Directors authorized an extension of our repurchase program by 15.0 million shares. As of March 31, 2015, our Board of Directors had authorized 90.0 million shares of common stock under our share repurchase program, and approximately 22.3 million shares of common stock remained available for purchase, which may be executed from time to time in the open market. We intend to hold repurchased shares in treasury for general corporate purposes, including issuances under our stock-based compensation plan. Treasury shares are accounted for using the cost method.

Accumulated other comprehensive loss consisted of the following:

(In millions)	Foreign Currency Translation	Hedging	Defined Pension and Other Post-retirement Benefits	Other	Accumulated Other Comprehensive Loss
December 31, 2014	\$ (311.9) \$ (77.3) \$ (294.5)	\$ (683.7
Other comprehensive income (loss) before reclassifications, net of tax	(101.0) (41.4) —)	(142.4
Reclassification adjustment for net losses (gains) included in net income, net of tax	—	13.0	5.3)	18.3
Other comprehensive income (loss), net of tax	(101.0) (28.4) 5.3)	(124.1
March 31, 2015	\$ (412.9) \$ (105.7) \$ (289.2)	\$ (807.8

Reclassifications out of accumulated other comprehensive loss consisted of the following:

(In millions)	Three Months Ended		Affected Line Item in the Condensed Consolidated Statement of Income
	March 31, 2015	March 31, 2014	
Details about Accumulated Other Comprehensive Loss Components	Amount	Reclassified out of Accumulated Other Comprehensive Loss

(a) These accumulated other comprehensive income components are included in the computation of net periodic pension cost (see Note 8 for additional details).

Table of Contents

NOTE 11. DERIVATIVE FINANCIAL INSTRUMENTS

We hold derivative financial instruments for the purpose of hedging the risks of certain identifiable and anticipated transactions. The types of risks hedged are those relating to the variability of future earnings and cash flows caused by movements in foreign currency exchange rates. We hold the following types of derivative instruments:

Foreign exchange rate forward contracts—The purpose of these instruments is to hedge the risk of changes in future cash flows of anticipated purchase or sale commitments denominated in foreign currencies. At March 31, 2015, we held the following material positions:

(In millions)	Notional Amount Bought (Sold)	USD Equivalent
Australian dollar	47.2	35.9
British pound	56.4	83.4
Canadian dollar	(196.6) (154.5)
Euro	165.8	178.2
Kuwaiti dinar	(5.5) (18.4)
Malaysian ringgit	111.3	30.0
Norwegian krone	2,480.7	306.7
Russian ruble	(457.3) (7.8)
Singapore dollar	163.6	119.1
U.S. dollar	(787.4) (787.4)

Foreign exchange rate instruments embedded in purchase and sale contracts—The purpose of these instruments is to match offsetting currency payments and receipts for particular projects, or comply with government restrictions on the currency used to purchase goods in certain countries. At March 31, 2015, our portfolio of these instruments included the following material positions:

(In millions)	Notional Amount Bought (Sold)	USD Equivalent
Brazilian real	(106.7) (32.7)
Euro	11.6	12.5
U.S. dollar	22.3	22.3

The purpose of our foreign currency hedging activities is to manage the volatility associated with anticipated foreign currency purchases and sales created in the normal course of business. Our policy is to hold derivatives only for the purpose of hedging risks and not for trading purposes where the objective is solely to generate profit. Generally, we enter into hedging relationships such that changes in the fair values or cash flows of the transactions being hedged are expected to be offset by corresponding changes in the fair value of the derivatives. For derivative instruments that qualify as a cash flow hedge, the effective portion of the gain or loss of the derivative, which does not include the time value component of a forward currency rate, is reported as a component of other comprehensive income (“OCI”) and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings.

Table of Contents

The following table of all outstanding derivative instruments is based on estimated fair value amounts that have been determined using available market information and commonly accepted valuation methodologies. Refer to Note 12 for further disclosures related to the fair value measurement process. Accordingly, the estimates may not be indicative of the gains or losses we may ultimately incur when these contracts settle or mature.

(In millions)	March 31, 2015		December 31, 2014	
	Assets	Liabilities	Assets	Liabilities
Derivatives designated as hedging instruments:				
Foreign exchange contracts:				
Current – Derivative financial instruments	\$245.1	\$304.5	\$172.1	\$207.1
Long-term – Derivative financial instruments	174.0	295.1	129.4	214.6
Total derivatives designated as hedging instruments	419.1	599.6	301.5	421.7
Derivatives not designated as hedging instruments:				
Foreign exchange contracts:				
Current – Derivative financial instruments	26.9	27.4	25.5	23.1
Long-term – Derivative financial instruments	6.1	6.7	5.5	5.6
Total derivatives not designated as hedging instruments	33.0	34.1	31.0	28.7
Total derivatives	\$452.1	\$633.7	\$332.5	\$450.4

We recognized a loss of \$0.9 million and an immaterial loss on cash flow hedges for the three months ended March 31, 2015 and 2014, respectively, as a result of the discontinuance of cash flow hedges because it was probable that the original forecasted transaction would not occur or would not occur by the originally specified time period.

Cash flow hedges of forecasted transactions, net of tax, resulted in an accumulated other comprehensive loss of \$105.7 million and \$77.3 million at March 31, 2015, and December 31, 2014, respectively. We expect to transfer an approximate \$29.5 million loss from accumulated OCI to earnings during the next 12 months when the anticipated transactions actually occur. All anticipated transactions currently being hedged are expected to occur by the end of 2016.

Table of Contents

The following tables present the impact of derivative instruments in cash flow hedging relationships and their location within the accompanying condensed consolidated statements of income.

(In millions)	Gain (Loss) Recognized in OCI (Effective Portion) Three Months Ended March 31,	
	2015	2014
Foreign exchange contracts	\$(53.6) \$1.9
Location of Gain (Loss) Reclassified from Accumulated OCI into Income	Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion) Three Months Ended March 31,	
(In millions)	2015	2014
Foreign exchange contracts:		
Revenue	\$ (26.4) \$ (10.5
Cost of sales	11.5	11.3
Selling, general and administrative expense	(0.5) (0.1
Total	\$ (15.4) \$ 0.7

(In millions)	Gain (Loss) Recognized in Income (Ineffective Portion and Amount Excluded from Effectiveness Testing) Three Months Ended March 31,	
	2015	2014
Foreign exchange contracts:		
Revenue	\$ 0.5	\$ 4.6
Cost of sales	(5.8) (3.7
Total	\$ (5.3) \$ 0.9

Instruments that are not designated as hedging instruments are executed to hedge the effect of exposures in the condensed consolidated balance sheets, and occasionally, forward foreign currency contracts or currency options are executed to hedge exposures which do not meet all of the criteria to qualify for hedge accounting.

(In millions)	Gain (Loss) Recognized in Income on Derivatives (Instruments Not Designated as Hedging Instruments) Three Months Ended March 31,	
	2015	2014
Foreign exchange contracts:		
Revenue	\$(1.5) \$(1.0
Cost of sales	0.1	0.5
Other income (expense), net ⁽¹⁾	27.9	3.6
Total	\$26.5	\$3.1

⁽¹⁾ Other income (expense), net excludes asset and liability remeasurement gains and losses.

Table of Contents

Balance Sheet Offsetting—We execute derivative contracts only with counterparties that consent to a master netting agreement which permits net settlement of the gross derivative assets against gross derivative liabilities. Each instrument is accounted for individually and assets and liabilities are not offset. As of March 31, 2015, and December 31, 2014, we had no collateralized derivative contracts. The following tables present both gross information and net information of recognized derivative instruments:

	March 31, 2015			December 31, 2014		
(In millions)	Gross Amount Recognized	Gross Amounts Not Offset Permitted Under Master Netting Agreements	Net Amount	Gross Amount Recognized	Gross Amounts Not Offset Permitted Under Master Netting Agreements	Net Amount
Derivative assets	\$452.1	\$(430.6)	\$21.5	\$332.5	\$(321.5)	\$11.0

	March 31, 2015			December 31, 2014		
(In millions)	Gross Amount Recognized	Gross Amounts Not Offset Permitted Under Master Netting Agreements	Net Amount	Gross Amount Recognized	Gross Amounts Not Offset Permitted Under Master Netting Agreements	Net Amount
Derivative liabilities	\$633.7	\$(430.6)	\$203.1	\$450.4	\$(321.5)	\$128.9

NOTE 12. FAIR VALUE MEASUREMENTS

Assets and liabilities measured at fair value on a recurring basis were as follows:

	March 31, 2015				December 31, 2014			
(In millions)	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
Assets								
Investments:								
Equity securities	\$22.2	\$22.2	\$—	\$—	\$22.5	\$22.5	\$—	\$—
Fixed income	6.0	6.0	—	—	7.1	7.1	—	—

Stable value fund	0.8	—	0.8	—	0.7	—	0.7	—
Other	2.0	2.0	—	—	2.1	2.1	—	—
Derivative financial instruments:								
Foreign exchange contracts	452.1	—	452.1	—	332.5	—	332.5	—
Total assets	\$486.0	\$30.2	\$455.8	\$—	\$368.3	\$31.7	\$336.6	\$—
Liabilities								
Derivative financial instruments:								
Foreign exchange contracts	633.7	—	633.7	—	450.4	—	450.4	—
Total liabilities	\$633.7	\$—	\$633.7	\$—	\$450.4	\$—	\$450.4	\$—

Investments—The fair value measurement of our equity securities, fixed income and other investment assets is based on quoted prices that we have the ability to access in public markets. Our stable value fund and money market fund are valued at the net asset value of the shares held at the end of the quarter, which is based on the fair value of the underlying investments using information reported by the investment advisor at quarter-end.

Table of Contents

Derivative financial instruments—We use the income approach as the valuation technique to measure the fair value of foreign currency derivative instruments on a recurring basis. This approach calculates the present value of the future cash flow by measuring the change from the derivative contract rate and the published market indicative currency rate, multiplied by the contract notional values. Credit risk is then incorporated by reducing the derivative's fair value in asset positions by the result of multiplying the present value of the portfolio by the counterparty's published credit spread. Portfolios in a liability position are adjusted by the same calculation; however, a spread representing our credit spread is used. Our credit spread, and the credit spread of other counterparties not publicly available are approximated by using the spread of similar companies in the same industry, of similar size and with the same credit rating.

At the present time, we have no credit-risk-related contingent features in our agreements with the financial institutions that would require us to post collateral for derivative positions in a liability position.

See Note 11 for additional disclosure related to derivative financial instruments.

Fair value of debt—The fair value, based on Level 1 quoted market rates, of our 2.00% Notes due 2017 and 3.45% Notes due 2022 (collectively, "Senior Notes") was approximately \$794.7 million at March 31, 2015 and approximately \$779.5 million at December 31, 2014, as compared to the \$800.0 million face value of the debt, net of issue discounts, recorded in the condensed consolidated balance sheets.

Other fair value disclosures—The carrying amounts of cash and cash equivalents, trade receivables, accounts payable, short-term debt, commercial paper, debt associated with our term loan, as well as amounts included in other current assets and other current liabilities that meet the definition of financial instruments, approximate fair value.

Credit risk—By their nature, financial instruments involve risk, including credit risk, for non-performance by counterparties. Financial instruments that potentially subject us to credit risk primarily consist of trade receivables and derivative contracts. We manage the credit risk on financial instruments by transacting only with what management believes are financially secure counterparties, requiring credit approvals and credit limits, and monitoring counterparties' financial condition. Our maximum exposure to credit loss in the event of non-performance by the counterparty is limited to the amount drawn and outstanding on the financial instrument. Allowances for losses on trade receivables are established based on collectability assessments. We mitigate credit risk on derivative contracts by executing contracts only with counterparties that consent to a master netting agreement which permits the net settlement of gross derivative assets against gross derivative liabilities.

Table of Contents

NOTE 13. COMMITMENTS AND CONTINGENT LIABILITIES

Contingent liabilities associated with guarantees—In the ordinary course of business with customers, vendors and others, we issue standby letters of credit, performance bonds, surety bonds and other guarantees. The majority of these financial instruments represent guarantees of our future performance.

In August 2014, FMC Technologies entered into an arrangement to guarantee the debt obligations under a revolving credit facility of FMC Technologies Offshore, LLC (“FTO Services”), our joint venture with Edison Chouest Offshore LLC. Under the terms of the guarantee, FMC Technologies and Edison Chouest Offshore LLC jointly and severally guaranteed amounts under the revolving credit facility with a maximum potential amount of future payments of \$40.0 million that would become payable if FTO Services defaults in payment under the terms of the revolving credit facility. The approximate term of the guarantee is two years. The liability recognized at inception for the fair value of our obligation as a guarantor was not material, and we expect our future performance under the guarantee to be remote.

Management does not expect any of these financial instruments to result in losses that, if incurred, would have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Contingent liabilities associated with legal matters—We are involved in various pending or potential legal actions in the ordinary course of our business. Management is unable to predict the ultimate outcome of these actions, because of the inherent uncertainty of litigation. However, management believes that the most probable, ultimate resolution of these matters will not have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Contingent liabilities associated with liquidated damages—Some of our contracts contain penalty provisions that require us to pay liquidated damages if we are responsible for the failure to meet specified contractual milestone dates and the applicable customer asserts a conforming claim under these provisions. These contracts define the conditions under which our customers may make claims against us for liquidated damages. Based upon the evaluation of our performance and other commercial and legal analysis, management believes we have appropriately accrued for probable liquidated damages at March 31, 2015, and December 31, 2014, and that the ultimate resolution of such matters will not materially affect our consolidated financial position, results of operations or cash flows for the year ending December 31, 2015.

Intercompany eliminations	(27.4) (21.2
Total segment assets	5,632.3	6,075.0
Corporate ⁽³⁾	1,338.9	1,100.6
Total assets	\$6,971.2	\$7,175.6

-
- FMC Technologies' management views segment operating capital employed, which consists of assets, net of its
- (1) liabilities, as the primary measure of segment capital. Segment operating capital employed excludes debt, pension liabilities, income taxes, and LIFO and valuation adjustments.
- (2) Segment liabilities included in total segment operating capital employed consist of trade and other accounts payable, advance payments and progress billings, accrued payroll and other liabilities.
- (3) Corporate includes cash, LIFO adjustments, deferred income tax balances, property, plant and equipment not associated with a specific segment, pension assets and the fair value of derivative financial instruments.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Business Outlook

Overall Outlook. During the fourth quarter of 2014, crude oil prices experienced a precipitous decline due to continued growth in U.S. oil production and continued strong international crude oil supply, especially from OPEC's decision to maintain oil production levels, combined with a weakened outlook for the global economy. As a result of the weaker crude oil price environment, many crude oil development prospects are being deferred, leading to a downturn in demand for our products and services and an overall weaker demand for oilfield services. While the downturn we now face in our industry is significant, we believe the predominantly supply-driven, market imbalance will undergo the corrective measures necessary for the recovery of commodity prices in the long term. Although the timing of the recovery of crude oil prices is dependent on many variables, including any decisions by various countries to lift oil sanctions on Iran which could further negatively affect crude oil prices, we believe as long-term demand rises and production naturally declines, commodity prices will recover and our customers will begin to increase their investments in new sources of oil production.

Subsea Technologies. In reaction to the decline in crude oil prices, many of our customers have reduced their capital spending plans for 2015, have deferred new projects, or have requested price concessions on projects. These actions will have an adverse effect on our 2015 inbound orders when compared to the prior year. During the first quarter of 2015, subsea margins increased when compared to the prior year. The increase in subsea margins was attributed to our ability to successfully capitalize on the improved execution we achieved in 2014. Given our lower full year 2015 inbound orders expectations, our focus throughout the remainder of 2015 will be the continued concentration on standardization, process improvement, cost reductions, supply chain management, and the reduction and leveraging of our workforce to maintain these operating margin improvements. As we center our operations on the needs of our customers, a large part of our efforts will be focused on ways to improve customer returns by offering cost-effective approaches to our customers' project developments, including customer acceptance of new technologies and acceptance of alternative business models to help achieve their cost-reduction goals and accelerate time to first oil. Part of this strategy includes standardization of subsea production equipment as operators understand the cost and scheduling benefits that standardization brings to their projects. Additionally, Forsys Subsea, our recently announced joint venture with Technip, creates the alliance between two market leaders that is expected to deliver significant cost reductions to deepwater projects by offering integrated concept development and FEED studies early in the development of a subsea field when the ability to control costs is most influential. Refer to "Cautionary Note Regarding Forward-Looking Statements" related to statements made regarding Forsys Subsea.

In the long-term, we continue to believe deepwater development will remain a significant part of our customers' portfolios. A critical part of our long-term strategy to maintain our subsea market leadership is to continue to invest in the technologies required to develop our customers' challenging assets and further expand our capabilities focused on increasing reservoir production over the life of the field.

Surface Technologies. Given the decline in commodity prices, we expected a decline in rig counts and decreased North American land activity in 2015 which would negatively affect all of our surface technologies businesses in North America. The decreases in capital investment in shale production has led us to take significant actions to reduce headcount in our North American businesses and to work with our suppliers to reduce costs. Although difficult to predict the length of depressed crude oil prices, specifically its impacts on the down cycle in shale, we expect that commodity prices in 2016 may be at a level to allow some recovery in North American activity. Throughout the remainder of 2015, we expect continued efforts to integrate our North American surface wellhead and completion services businesses to strengthen our market presence and bring increased value to our customers. Our international surface wellhead business delivered strong operational results from continued strength in international markets in the first quarter of 2015, and we expect this strength to continue throughout the remainder of the year as a result of our strong international surface wellhead backlog.

Table of ContentsCONSOLIDATED RESULTS OF OPERATIONS
THREE MONTHS ENDED MARCH 31, 2015 AND 2014

(In millions, except %)	Three Months Ended March 31,		Change		
	2015	2014	\$	%)
Revenue	\$1,695.2	\$1,824.4	(129.2	(7.1)
Costs and expenses:					
Cost of sales	1,293.0	1,403.5	(110.5	(7.9)
Selling, general and administrative expense	174.0	182.8	(8.8	(4.8)
Research and development expense	29.6	25.3	4.3	17.0)
Total costs and expenses	1,496.6	1,611.6	(115.0	(7.1)
Other income (expense), net	(6.3) (1.1) (5.2	*)
Net interest expense	(7.3) (8.2) 0.9	11.0)
Income before income taxes	185.0	203.5	(18.5	(9.1)
Provision for income taxes	36.9	67.0	(30.1	(44.9)
Net income	148.1	136.5	11.6	8.5)
Net income attributable to noncontrolling interests	(0.5) (1.3) 0.8	61.5)
Net income attributable to FMC Technologies, Inc.	\$147.6	\$135.2	12.4	9.2)

* Not meaningful

Revenue decreased by \$129.2 million in the first quarter of 2015 compared to the prior-year quarter. Revenue in the first quarter of 2015 included a \$128.8 million unfavorable impact of foreign currency translation. Overall, our Subsea Technologies revenue was relatively flat year-over-year. Revenue increased in our Western Region subsea business due to project backlog conversion and increased volumes in subsea services but was offset by decreased revenue in our Brazilian and Eastern Region subsea business primarily from foreign currency translation and lower volumes in our Schilling Robotics business. Surface Technologies posted decreased revenue year-over-year in our fluid control, completion services, and North American surface wellhead businesses from lower market activity in North America, partially offset by an increase in revenue in our international surface wellhead business from increased sales of conventional wellhead systems.

Gross profit (revenue less cost of sales) increased as a percentage of sales to 23.7% in the first quarter of 2015, from 23.1% in the prior-year quarter. The improvement in gross profit as a percentage of sales was due to our Subsea Technologies segment, primarily in our Eastern Region subsea business from higher margin project backlog conversion. Surface Technologies realized lower gross profit margins year-over-year in our fluid control, completion services and surface wellhead businesses from lower market activity in North America, partially offset by an increase in our international surface wellhead business from conventional wellhead systems sales.

Selling, general and administrative expense decreased \$8.8 million year-over-year, resulting from the sale of our Material Handling Products business during the second quarter of 2014 and foreign currency translation.

Other income (expense), net during the first quarter of 2015 included an unrealized foreign currency loss of \$7.0 million.

Table of Contents

Our income tax provisions for the first quarter of 2015 and 2014 reflected effective tax rates of 20.0% and 33.2%, respectively. The year-over-year decrease in the effective tax rate was primarily due to an increase in earnings from foreign operations indefinitely reinvested outside the United States and a favorable change in the forecasted country mix of earnings. As of January 1, 2015, we asserted a larger portion of our foreign earnings as permanently reinvested outside the United States. The year-over-year effective tax rate decreased 4.8 percentage points due to an increase in the amount of prior year foreign earnings considered to be indefinitely reinvested outside of the United States, which are subject to foreign tax rates lower than the federal income tax rate. Additionally, our effective tax rate can fluctuate depending on our country mix of earnings since our foreign earnings are generally subject to lower tax rates than in the United States. In certain jurisdictions, primarily Singapore and Malaysia, our tax rate is significantly less than the relevant statutory rate due to tax holidays. The cumulative balance of foreign earnings for which no provision for U.S. income taxes has been recorded was \$1,722 million at March 31, 2015. We would need to accrue and pay U.S. tax on such undistributed earnings if these funds were repatriated. We have no current intention to repatriate these earnings.

* Not meaningful

Segment operating profit is defined as total segment revenue less segment operating expenses. The following items have been excluded in computing segment operating profit: corporate staff expense, net interest income (expense) associated with corporate debt facilities and investments, income taxes and other revenue and other expense, net.

Table of Contents

Subsea Technologies

Subsea Technologies revenue decreased \$44.8 million year-over-year. Revenue for the first quarter of 2015 included a \$99.8 million unfavorable impact of foreign currency translation. Excluding the impact of foreign currency translation, total revenue increased by \$55.0 million year-over-year. Subsea Technologies revenue is primarily impacted by the amount of beginning backlog entering the period and the rates of backlog conversion. Overall, our Subsea Technologies revenue was relatively flat year-over-year. Revenue increased due to project backlog conversion and increased volumes in subsea services in our Western Region subsea business but was offset by decreased revenue in our Brazil and Eastern Region subsea business primarily from foreign currency translation and lower volumes in our Schilling Robotics business.

Subsea Technologies operating profit in the first quarter of 2015 totaled \$168.7 million, or 14.6% of revenue, compared to the prior-year quarter's operating profit as a percentage of revenue of 11.8%. The margin improvement was primarily driven by operational improvements and project execution in our Eastern Region and Asia Pacific subsea businesses. Operating profit for the first quarter of 2015 included a \$10.0 million unfavorable impact of foreign currency translation.

Surface Technologies

Surface Technologies revenue decreased \$33.2 million year-over-year. Revenue for the first quarter of 2015 included a \$19.3 million unfavorable impact of foreign currency translation. The decrease in revenue was primarily driven by our fluid control, completion services, and North American surface wellhead businesses from lower market activity in North America, partially offset by an increase in revenue in our international surface wellhead business from increased sales of conventional wellhead systems.

Surface Technologies operating profit in the first quarter of 2015 totaled \$62.9 million, or 14.1% of revenue, compared to the prior-year quarter's operating profit as a percentage of revenue of 18.3%. The margin decline was primarily driven by the following:

- Fluid Control - 3.5 percentage point decrease due to decreased volumes in our well service pump and flowline products resulting from lower activity in the North American shale markets;
- Completion Services - 1.7 percentage point decrease due to decreased wireline and flowback volumes from lower activity in the North American shale markets; and
- Surface Wellhead - 0.6 percentage point increase due to strong sales growth in international markets.

Table of Contents

Energy Infrastructure

Energy Infrastructure revenue decreased \$44.7 million year-over-year. The decrease was due to the sale of our Material Handling Products business early in the second quarter of 2014 and decreased revenue in all other businesses. Revenue for the first quarter of 2015 included a \$9.9 million unfavorable impact due to foreign currency translation.

Energy Infrastructure operating profit in the first quarter of 2015 totaled \$2.9 million, or 2.9% of revenue, compared to the prior-year quarter's operating profit as a percentage of revenue of 10.7%. The margin decline was primarily driven by the following:

• Automation and Control - 4.1 percentage point decrease due to revenue recognized in the first quarter of 2014 that was subsequently corrected in the third quarter of 2014; and

• Loading Systems - 2.4 percentage point decrease due to higher margin offshore loading arm projects in the first quarter of 2014.

Corporate Items

Our corporate items reduced earnings by \$50.0 million in the first quarter of 2015 and \$42.8 million in the first quarter of 2014. The year-over-year increase primarily reflected the following:

• unfavorable variance in foreign currency gains and losses of \$6.8 million;

• unfavorable variance of \$2.5 million related to higher amortization of pension actuarial losses resulting from a lower discount rate;

• favorable variance of \$1.3 million due to the absence of any remeasurement associated with the Multi Phase Meters earn-out consideration in the first quarter of 2015.

Table of Contents

Inbound Orders and Order Backlog

Inbound orders represent the estimated sales value of confirmed customer orders received during the reporting period.

(In millions)	Inbound Orders	
	Three Months Ended March 31,	
	2015	2014
Subsea Technologies	\$552.0	\$1,918.8
Surface Technologies	326.3	527.3
Energy Infrastructure	95.8	141.3
Intercompany eliminations and other	(5.1) —
Total inbound orders	\$969.0	\$2,587.4

Order backlog is calculated as the estimated sales value of unfilled, confirmed customer orders at the reporting date. Translation negatively affected backlog by \$386.2 million and positively affected backlog by \$81.1 million for the three months ended March 31, 2015 and 2014, respectively.

(In millions)	Order Backlog		
	March 31, 2015	December 31, 2014	March 31, 2014
Subsea Technologies	\$4,825.0	\$5,793.1	\$6,786.6
Surface Technologies	519.5	654.2	789.5
Energy Infrastructure	173.1	187.0	285.0
Intercompany eliminations	(10.6) (14.9) (18.9
Total order backlog	\$5,507.0	\$6,619.4	\$7,842.2

Order backlog for Subsea Technologies at March 31, 2015, decreased by \$968.1 million compared to December 31, 2014. Subsea Technologies backlog of \$4.8 billion at March 31, 2015, was composed of various subsea projects, including BP's Mad Dog Phase 2 and Shah Deniz Stage 2; Chevron's Agbami; Eni's Block 15/06 East Hub and Jangkrik; Petrobras' pre-salt tree and manifold awards; Statoil's Snorre B Platform Workover System; Total's Edradour and Egina; Tullow Ghana's TEN; and Wintershall's Maria.

Surface Technologies order backlog at March 31, 2015, decreased by \$134.7 million compared to December 31, 2014. The decrease was due to lower North American activity which negatively affected our fluid control business backlog and lower inbound orders when compared to the fourth quarter of 2014 in our international surface wellhead business.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Substantially all of our cash balances are held outside the United States and are generally used to meet the liquidity needs of our non-U.S. operations. Most of our cash held outside the United States could be repatriated to the United States, but under current law, any such repatriation would be subject to U.S. federal income tax, as adjusted for applicable foreign tax credits. We have provided for U.S. federal income taxes on undistributed foreign earnings where we have determined that such earnings are not indefinitely reinvested.

We expect to meet the continuing funding requirements of our U.S. operations with cash generated by such U.S. operations, cash from earnings generated by non-U.S. operations that are not indefinitely reinvested and our existing revolving credit facility. If cash held by non-U.S. operations is required for funding operations in the United States, and if U.S. tax has not previously been provided on the earnings of such operations, we would make a provision for additional U.S. tax in connection with repatriating this cash, which may be material to our cash flows and results of operations.

Net debt, or net cash, is a non-GAAP measure reflecting debt, net of cash and cash equivalents. Management uses this non-GAAP measure to evaluate our capital structure and financial leverage. We believe net debt, or net cash, is a meaningful measure that may assist investors in understanding our results and recognizing underlying trends. Net (debt) cash should not be considered an alternative to, or more meaningful than, cash and cash equivalents as determined in accordance with GAAP or as an indicator of our operating performance or liquidity.

The following table provides a reconciliation of our cash and cash equivalents to net debt, utilizing details of classifications from our condensed consolidated balance sheets.

(In millions)	March 31, 2015	December 31, 2014
Cash and cash equivalents	\$695.1	\$638.8
Short-term debt and current portion of long-term debt	(14.8) (11.7
Long-term debt, less current portion	(1,301.6) (1,297.2
Net debt	\$(621.3) \$(670.1

The change in our net debt position was primarily due to cash generated from operations, partially offset by capital expenditures and repurchases of common stock.

Cash Flows

We generated \$175.6 million and \$51.8 million in cash flows from operating activities during the three months ended March 31, 2015 and 2014, respectively. The increase in cash flows from operating activities year-over-year was primarily due to income from operations and changes in our working capital driven by our portfolio of projects. Our working capital balances can vary significantly depending on the payment and delivery terms on key contracts.

Investing activities used \$81.4 million and \$90.0 million in cash flows during the three months ended March 31, 2015 and 2014, respectively. The decrease in cash flows used by investing activities in the first three months of 2015 was due to a slight decrease in capital expenditures to fund our investment in subsea service capabilities.

Financing activities used \$30.9 million and \$70.0 million in cash flows during the three months ended March 31, 2015 and 2014, respectively. The change in cash flows from financing activities was due to decreased treasury stock repurchases and repayments of short-term debt during the first three months of 2015 when compared to 2014.

Table of Contents

Debt and Liquidity

Senior Notes—Refer to Part II, Item 8 of our Annual Report on Form 10-K for the year ended December 31, 2014 for information related to our Senior Notes.

Credit Facility—The following is a summary of our revolving credit facility at March 31, 2015:

(In millions) Description	Amount	Debt Outstanding	Commercial Paper Outstanding ^(a)	Letters of Credit	Unused Capacity	Maturity
Five-year revolving credit facility	\$1,500.0	\$—	\$478.1	\$—	\$1,021.9	March 2017

Under our commercial paper program, we have the ability to access up to \$1.0 billion of financing through our ^(a) commercial paper dealers. Our available capacity under our revolving credit facility is reduced by any outstanding commercial paper.

Committed credit available under our revolving credit facility provides the ability to issue our commercial paper obligations on a long-term basis. We had \$478.1 million of commercial paper issued under our facility at March 31, 2015. As we had both the ability and intent to refinance these obligations on a long-term basis, our commercial paper borrowings were classified as long-term in the accompanying condensed consolidated balance sheets at March 31, 2015.

As of March 31, 2015, we were in compliance with all restrictive covenants under our revolving credit facility.

Credit Risk Analysis

Valuations of derivative assets and liabilities reflect the value of the instruments, including the values associated with counterparty risk. These values must also take into account our credit standing, thus including in the valuation of the derivative instrument the value of the net credit differential between the counterparties to the derivative contract. Our methodology includes the impact of both counterparty and our own credit standing. Adjustments to our derivative assets and liabilities related to credit risk were not material for any period presented. Additional information about credit risk is incorporated herein by reference from Note 12 to our condensed consolidated financial statements included in Item 1 of this Quarterly Report on Form 10-Q.

Outlook

Historically, we have generated our capital resources primarily through operations and, when needed, through our credit facility. We have \$1,021.9 million of capacity available under our revolving credit facility that we expect to utilize if working capital needs temporarily increase in response to market demand. The volatility in credit, equity and commodity markets creates some uncertainty for our businesses. However, management believes, based on our current financial condition, existing backlog levels and current expectations for future market conditions, that we will continue to meet our short- and long-term liquidity needs with a combination of cash on hand, cash generated from operations and access to capital markets. Although we expect to continue to reach payment milestones on many of our projects, we expect our consolidated operating cash flow position in 2015 to slightly decrease as a result of the negative impact the decline in commodity prices will have on our overall business.

We project spending approximately \$250 million in 2015 for capital expenditures, largely towards our subsea service offerings. During the second quarter of 2015, we expect to remit most of the \$10 million withheld purchase price related to the acquisition of our automation and control business. A portion of the purchase price was withheld under the stock purchase agreement as security for payment related to any and all indemnities during the three-year period post acquisition of the business.

During the remainder of 2015, we expect to make contributions of approximately \$5.4 million to our international pension plans. Actual contribution amounts are dependent upon plan investment returns, changes in pension obligations, regulatory environments and other economic factors. We update our pension estimates annually during the fourth quarter or more frequently upon the occurrence of significant events. Additionally, we expect to make payments of approximately \$1.8 million to our U.S. Non-Qualified Defined Benefit Pension Plan during the remainder of 2015.

We continue to evaluate acquisitions, divestitures and joint ventures that meet our strategic priorities. Our intent is to maintain a level of financing sufficient to meet these objectives. Further, we expect to continue our stock repurchases authorized by our Board of Directors, with the timing and amounts of these repurchases dependent upon market conditions and liquidity.

OFF-BALANCE SHEET ARRANGEMENTS

Information related to guarantees is incorporated herein by reference from Note 13 to our condensed consolidated financial statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

CRITICAL ACCOUNTING ESTIMATES

Refer to our Annual Report on Form 10-K for the year ended December 31, 2014, for a discussion of our critical accounting estimates. During the three months ended March 31, 2015, there were no material changes in our judgments and assumptions associated with the development of our critical accounting estimates.

OTHER MATTERS

During the second quarter of 2014, the Company received an inquiry and a subpoena from the SEC seeking information about accruals within the automation and control business unit for paid time off (“PTO”). The inquiry addressed the reversal of an accrual for PTO which understated the liability for PTO in the business unit for the quarter ended March 31, 2013. During the fourth quarter of 2014, the Company informed the SEC about an additional matter the Company identified within the automation and control business unit. The Company received a second subpoena in the fourth quarter of 2014. The Company has cooperated and fully responded to all requests for information. The Company discussed these matters with its independent registered public accounting firm and the Company’s Audit Committee.

RECENTLY ISSUED ACCOUNTING STANDARDS

In May 2014, the FASB issued Accounting Standards Update (“ASU”) No. 2014-09, “Revenue from Contracts with Customers.” This update requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU will supersede most existing GAAP related to revenue recognition and will supersede some cost guidance in existing GAAP related to construction-type and production-type contract accounting. Additionally, the ASU will significantly increase disclosures related to revenue recognition. The amendments in the ASU are effective for the Company on January 1, 2017. Early application is not permitted. Entities are permitted to apply the amendments either retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying the ASU recognized at the date of initial application. The Company has not determined the method to be utilized upon adoption. The impacts that adoption of the ASU is expected to have on the Company’s consolidated financial statements and related disclosures are being evaluated. Additionally, the Company has not determined the effect of the ASU on its internal control over financial reporting or other changes in business practices and processes.

In February 2015, the FASB issued ASU No. 2015-02, “Amendments to the Consolidation Analysis.” This update amends the criteria for determining whether a limited partnership or similar entity is a variable interest entity, eliminates the presumption in the voting model that a general partner controls a limited partnership, eliminates the deferral of ASU 2009-17 for investments in certain investment funds, removes three of the six criteria a fee must meet for a decision maker or service provider to conclude a fee does not represent a variable interest, alters how variable interests held by related parties affect consolidation, and clarifies the two-step process to determine whether the at-risk equity holders of a corporation have the power to direct the corporation’s significant activities. The amendments in this ASU are effective for the Company on January 1, 2016. Early application is permitted. We believe the adoption of this guidance will not have a material impact on our consolidated financial position or results of operations.

In April 2015, the FASB issued ASU No. 2015-03, “Simplifying the Presentation of Debt Issuance Costs.” This update requires debt issuance costs to be presented in the balance sheet as a deduction from the carrying amount of the corresponding debt liability, consistent with debt discounts or premiums. The amendments in this ASU are effective for the Company on January 1, 2016. Early application is permitted, and a retrospective application is required. We believe the adoption of this guidance will not have a material impact on our consolidated financial position.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Refer to Part II, Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2014, for quantitative and qualitative disclosures about market risk. There have been no material changes in our exposures to market risk since December 31, 2014.

ITEM 4. CONTROLS AND PROCEDURES

As of March 31, 2015, and under the direction of our principal executive officer and principal financial officer, we have evaluated the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. Based upon this evaluation, our principal executive officer and principal financial officer have concluded as of March 31, 2015, that our disclosure controls and procedures were:

effective in ensuring that information required to be disclosed in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms; and

effective in ensuring that information required to be disclosed in reports that we file or submit under the Exchange Act is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in internal controls over financial reporting identified in the evaluation for the quarter ended March 31, 2015, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act.

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are involved in various pending or potential legal actions in the ordinary course of our business. Management is unable to predict the ultimate outcome of these actions because of the inherent uncertainty of litigation. However, management believes that the most probable, ultimate resolution of these matters will not have a material adverse effect on our consolidated financial position, results of operations or cash flows.

ITEM 1A. RISK FACTORS

In addition to our risk factors previously disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2014, the following risk factor was identified:

Our customers' industries are undergoing consolidation that may impact our results of operations. Some of our customers are undergoing consolidation which may decrease demand for our products and services as a result of decreased customer capital spending achieved through economies of scale or price concessions. This consolidation activity could have a significant negative impact on our results of operations, financial condition or cash flows. We are unable to predict what effect consolidations in the industries may have on prices, capital spending by our customers, our selling strategies, our competitive position, our ability to retain customers or our ability to negotiate favorable agreements with our customers.

Table of Contents

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

We had no unregistered sales of equity securities during the three months ended March 31, 2015.

The following table summarizes repurchases of our common stock during the three months ended March 31, 2015.

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased ^(a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs ^(b)
January 1, 2015—January 31, 2015	246,070	\$ 41.75	245,000	7,787,632
February 1, 2015—February 28, 2015	244,900	\$ 39.54	231,500	22,556,132
March 1, 2015—March 31, 2015	309,960	\$ 38.31	299,000	22,257,132
Total	800,930	\$ 39.74	775,500	22,257,132

^(a) Represents 775,500 shares of common stock repurchased and held in treasury and 25,430 shares of common stock purchased and held in an employee benefit trust established for the FMC Technologies, Inc. Non-Qualified Savings and Investment Plan. In addition to these shares purchased on the open market, we sold 22,490 shares of registered common stock held in this trust, as directed by the beneficiaries during the three months ended March 31, 2015.

^(b) In 2005, we announced a repurchase plan approved by our Board of Directors authorizing the repurchase of up to two million shares of our issued and outstanding common stock through open market purchases. The Board of Directors authorized extensions of this program, adding five million shares in February 2006 and eight million shares in February 2007 for a total of 15 million shares of common stock authorized for repurchase. As a result of the two-for-one stock splits (i) on August 31, 2007, the authorization was increased to 30 million shares; and (ii) on March 31, 2011, the authorization was increased to 60 million shares. The Board of Directors authorized additional extensions of this program, adding 15 million shares in both December 2011 and February 2015 for a total of 90 million shares of common stock authorized for repurchase.
