ELECTRONIC CLEARING HOUSE, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - Basis of Presentation:

The accompanying consolidated financial statements as of the nine-month period ended June 30, 2006, are unaudited and reflect all adjustments (consisting only of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of the financial position and the results of operations for the interim periods. The consolidated financial statements herein should be read in conjunction with the consolidated financial statements and notes thereto, together with management's discussion and analysis of financial condition and results of operations, contained in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2005. The results of operations for the nine months ended June 30, 2006 are not necessarily indicative of the likely results for the entire fiscal year ending September 30, 2006. Certain prior year reported amounts have been reclassified to conform to the 2006 presentation.

New Accounting Standards:

In June 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, (FIN 48) an interpretation of FASB Statement No. 109, Accounting for Income Taxes. FIN 48 requires that a position taken or expected to be taken in a tax return be recognized in the financial statements when it is more likely than not (i.e. a likelihood of more than fifty percent) that the position would be sustained upon examination by tax authorities. A recognized tax position is then measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. Upon adoption, the cumulative effect of applying the recognition and measurement provisions of FIN 48, if any, shall be reflected as an adjustment to the opening balance of retained earnings.

FIN 48 requires that subsequent to initial adoption a change in judgment that results in subsequent recognition, derecognition or change in a measurement of a tax position taken in a prior annual period (including any related interest and penalties) be recognized as a discrete item in the period in which the change occurs. Currently, we record such changes in judgment, including audit settlements, as a component of our income tax provision. Thus, our reported quarterly income tax rate may become more volatile upon adoption of FIN 48. This change will not impact the manner in which we record income tax expense on an annual basis.

FIN 48 also requires expanded disclosures including identification of tax positions for which it is reasonably possible that total amounts of unrecognized tax benefits will significantly change in the next twelve months, a description of tax years that remain subject to examination by major tax jurisdictions, a tabular reconciliation of the total amount of unrecognized tax benefits at the beginning and end of each annual reporting period, the total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate and the total amounts of interest and penalties recognized in the statements of operations and financial position. FIN 48 is effective for fiscal years beginning after December 15, 2006. We are currently evaluating the impact of this standard on our Consolidated Financial Statements.

NOTE 2 - Stock-Based Compensation:

Effective October 1, 2005, the Company began recording compensation expense associated with stock options in accordance with SFAS No.123R, Share-Based Payment. Prior to October 1, 2005, the Company accounted for stock-based compensation related to stock options under the recognition and measurement principles of Accounting Principles Board Opinion No. 25; therefore, the Company measured compensation expense for its stock option plan using the intrinsic value method, that is, as the excess, if any, of the fair market value of the Company's stock at the

grant date over the amount required to be paid to acquire the stock, and provided the disclosures required by FAS Nos. 123 and 148. The Company has adopted the modified prospective transition method provided under SFAS No. 123R, and as a result, has not retroactively adjusted results from prior periods. Under this transition method, compensation expense associated with stock options recognized in the first nine months of fiscal year 2006 includes expense related to the remaining unvested portion of all stock option awards granted prior to October 1, 2005, based on the grant date fair value estimated in accordance with the original provisions of SFAS No. 123. The Company has not issued any stock options since the adoption of SFAS No. 123R.

Index**NOTE 2: Continued**

The adoption of SFAS No. 123R also resulted in certain changes to the Company's accounting for its restricted stock awards, which is discussed below in more detail.

As a result of the adoption of SFAS No. 123R, the Company's net income for the three and nine months ended June 30, 2006 includes \$269,000 and \$704,000 of compensation expense, respectively, and includes \$3,000 of income tax benefits related to the Company's stock options for the three and nine months ended June 30, 2006. The effect of adopting SFAS No. 123R had a negative effect to the basic and diluted earnings per common share for the three-month period ended June 30, 2006 of \$0.02 and for the nine-month period ended June 30, 2006 of \$0.06. The compensation expense related to all of the Company's stock-based compensation arrangements is recorded as a component of selling, general and administrative expenses. Prior to the Company's adoption of SFAS No. 123R, the Company presented tax benefits resulting from the disqualified dispositions of stock options as cash flows from operating activities on the Company's consolidated statements of cash flows. SFAS No. 123R requires that cash flows resulting from tax deductions in excess of the cumulative compensation cost recognized for options exercised (excess tax benefits) be classified as cash inflows from financing activities and cash outflows from operating activities.

The Company issues new shares upon the exercise of stock options and the issuance of restricted stock.

Stock Options:

At June 30, 2006, the Company had one stock option plan. Under the Company's current stock option plan, the Board of Directors may grant options to purchase up to 1,150,000 shares of the Company's common stock to officers, key employees and non-employee directors of the Company. At June 30, 2006, options for 248,012 shares remained available for future grant under the plan. Options cancelled due to forfeiture or expiration return to the pool available for grant. The plan is administered by the Board of Directors or its designees and provides that options granted under the plan will be exercisable at such times and under such conditions as may be determined by the Board of Directors at the time of grant of such options; however, options may not be granted for terms in excess of ten years. Compensation expense related to stock options granted is recognized ratably over the service vesting period for the entire option award. The total number of stock option awards expected to vest is adjusted by estimated forfeiture rates. The terms of the plan provide for the granting of options at an exercise price not less than 100% of the fair market value of the stock at the date of grant, as determined by the closing market value stock price on the grant date. All options outstanding at June 30, 2006 were issued at 100% of the fair market value of the stock at the date of grant and have five-year vesting terms.

The estimated fair value of each option award granted was determined on the date of grant using the Black-Scholes option valuation model with the following weighted-average assumptions for option grants during the nine months ended June 30, 2005. There were no options granted during the nine months ended June 30, 2006.

	Nine Months Ended June 30, 2005
Risk-free interest rate	3%
Expected volatility of common stock	76.6%
Dividend yield	-0-
Expected option term	7 year

The computation of the expected term is based on a weighted average calculation combining the average life of options that have already been exercised or cancelled with the estimated life of all unexercised options. The expected

volatility is based on the historical volatility of the Company's stock. The risk-free interest rate is based on the implied yield on U.S. Treasury constant maturities with a remaining term equal to the expected term of the option. The dividend yield is projected to be zero.

A summary of the status of the Company's stock option plan as of June 30, 2006 and of changes in options outstanding under the plan during the nine months ended June 30, 2006 is as follows:

7

Index**NOTE 2: Continued**

	Number of Shares	Weighted-Average Exercise Price per Share	Weighted-Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value
Options outstanding at September 30, 2005	1,116,125	\$ 5.51		
Options granted	-0-			
Options exercised	(114,600)	\$ 4.20		
Options forfeited or expired	(9,500)	\$ 10.66		
Options outstanding at June 30, 2006	992,025	\$ 5.61	6.6	\$ 4,017,000
Options vested and exercisable at June 30, 2006	493,625	\$ 5.00	5.9	\$ 1,776,000

Nonvested share activity under our Stock Option Plan for the nine-month period ended June 30, 2006 is summarized as follows:

	Nonvested Number Of Shares	Weighted Average Grant-Date Fair Value
Nonvested balance at October 1, 2005	684,625	\$ 4.28
Vested	(186,225)	\$ 3.70
Nonvested balance at June 30, 2006	498,400	\$ 4.50

The weighted-average fair value of each option granted during the first nine months of fiscal year 2005, estimated as of the grant date using the Black-Scholes option valuation model, was \$5.20 per option. The total intrinsic value of options exercised was \$237,000 during the first nine months of fiscal year 2005.

As of June 30, 2006, there was \$2,241,000 of unamortized compensation cost related to non-vested stock option awards, which is expected to be recognized over a remaining weighted-average vesting period of 7.5 years.

Cash received from stock option exercises for the nine months ended June 30, 2006 and 2005 was \$482,000 and \$329,000, respectively. The income tax benefits from stock option exercises totaled \$236,000 and \$82,000 for the nine months ended June 30, 2006 and 2005, respectively.

For stock options granted prior to the adoption of SFAS No. 123R, the following table illustrates the pro forma effect on net income and earnings per common share as if the Company had applied the fair value recognition provisions of

SFAS No. 123 in determining stock-based compensation for awards under the plan:

8

Index**NOTE 2: Continued**

	Three Months Ended June 30, 2005	Nine Months Ended June 30, 2005
Net income, as reported	\$ 433,000	\$ 629,000
Add: Stock-based compensation expense included in reported net income, net of related tax effects	-0-	5,000
Deduct: Total stock-based compensation expense determined under fair value-based method for all awards, net of related tax effects	(133,000)	(399,000)
Pro forma net income	\$ 300,000	\$ 235,000
Earnings per common share:		
Basic - as reported	\$ 0.07	\$ 0.10
Basic - pro forma	\$ 0.05	\$ 0.04
Diluted - as reported	\$ 0.06	\$ 0.09
Diluted - pro forma	\$ 0.04	\$ 0.03

Restricted Stock:

Restricted Stock is granted under the 2003 Option Plan. Compensation expense related to restricted stock issued is recognized ratably over the service vesting period. Restricted stock grants are normally vested over a five-year period.

In accordance with SFAS No. 123R, the fair value of restricted stock awards is estimated based on the closing market value stock price on the date of share issuance. The total number of restricted stock awards expected to vest is adjusted by estimated forfeiture rates. As of June 30, 2006, there was \$1,030,000 of unamortized compensation cost related to non-vested restricted stock awards, which is expected to be recognized over a remaining weighted-average vesting period of 4.38 years. The unamortized compensation cost related to non-vested restricted stock awards was recorded as unearned stock-based compensation in shareholders equity at September 30, 2005. As part of the adoption of SFAS No. 123R, such unamortized compensation cost was reclassified as a component of paid-in capital.

A summary of the status of the Company's restricted stock awards as of June 30, 2006, and of changes in restricted stock outstanding under the plan during the nine months ended June 30, 2006 is as follows:

	Number Of Shares	Weighted-Average Grant Date Fair Value Per Share
Restricted stock awards outstanding at September 30, 2005	50,000	\$ 8.50
Shares issued	62,588	\$ 11.91
Shares forfeited	-0-	\$ -0-

Restricted stock awards outstanding at June 30, 2006	112,588	\$	10.39
--	---------	----	-------

9

Index**NOTE 2: Continued**

In May 2006, the Company entered into an agreement with certain of its employees and executives to potentially grant 80,000 shares of restricted stock and 10,000 shares payable in cash. The restricted stock will only be granted and cash only be paid if the Company achieves predetermined cumulative Earnings Before Income Taxes and Depreciation and Amortization ("EBITDA") for the fiscal years ending 2006, 2007 and 2008. Cumulative EBITDA results must be reached or a reduced number of shares will be granted, if any. As required by SFAS 123R, 80,000 shares of this award will be treated as an equity award, with the fair value measured at the grant date and 10,000 shares will be treated as a liability award, with the fair value measured at the grant date and remeasured at the end of each reporting period (marked to market). In conjunction with this award, the Company recognized \$42,000 of compensation expense for the quarter ended June 30, 2006.

NOTE 3 - Earnings Per Share:

The Company calculates earnings per share as required by Statement of Financial Accounting Standard No. 128, "Earnings per Share".

	Three Months Ended June 30,		Nine Months Ended June 30,	
	2006	2005	2006	2005
Numerator:				
Net income	\$ 1,010,000	\$ 433,000	\$ 2,026,000	\$ 629,000
Denominator:				
Weighted average shares outstanding for basic earnings per share	6,630,055	6,512,411	6,596,737	6,469,632
Effect of dilutive common stock equivalents	526,149	429,711	419,605	486,479
Adjusted weighted average shares outstanding for diluted earnings per share	7,156,204	6,942,122	7,016,342	6,956,111
Basic net earnings per share	\$ 0.15	\$ 0.07	\$ 0.31	\$ 0.10
Diluted net earnings per share	\$ 0.14	\$ 0.06	\$ 0.29	\$ 0.09

For the three months ended June 30, 2006 and 2005, approximately 4,000 option shares and 79,500 option shares, and for the nine months ended June 30, 2006 and 2005, approximately 4,000 option shares and 79,500 option shares, respectively, attributable to the exercise of outstanding options were excluded from the calculation of diluted EPS because the effect was antidilutive.

NOTE 4 - Supplemental Cash Flow Information:

	Three Months Ended June 30,		Nine Months Ended June 30,	
	2006	2005	2006	2005
Cash paid for:				
Interest	\$ 21,000	\$ 29,000	\$ 68,000	\$ 87,000
Income Taxes	39,000	42,000	42,000	154,000

Significant non-cash transactions for the nine months ended June 30, 2006 were as follows:

- Restricted stock valued at \$745,000 was issued to certain executives and employees.
- Capital equipment of \$2,000 was acquired under a capital lease.

Significant non-cash transaction for the nine months ended June 30, 2005 was as follows:

- A note was issued for \$39,000 for the purchase of capital equipment.

Index**NOTE 5 - Segment Information:**

The Company primarily operates in two business segments: Bankcard and transaction processing and check-related products, all of which are located in the United States.

The Company's reportable operating segments have been determined in accordance with the Company's internal management structure, which is organized based on the Company's product lines. The Company evaluates performance based upon two primary factors; one is the segment's operating income and the other is based on the segment's contribution to the Company's future strategic growth.

	Three Months Ended June 30,		Nine Month Ended June 30,	
	2006	2005	2006	2005
Revenues:

NOTE 6 - Commitments, Contingent Liabilities, and Guarantees:

The Company currently relies on cooperative relationships with, and sponsorship by, one bank in order to process its Visa, MasterCard and other bankcard transactions. The agreement between the bank and the Company requires the Company to assume and compensate the bank for bearing the risk of "chargeback" losses. Under the rules of Visa and MasterCard, when a merchant processor acquires card transactions, it has certain contingent liabilities for the transactions processed. This contingent liability arises in the event of a billing dispute between the merchant and a cardholder that is ultimately resolved in the cardholder's favor. In such a case, the disputed transaction is charged back to the merchant and the disputed amount is credited or otherwise refunded to the cardholder. If the Company is unable to collect this amount from the merchant's account, and if the merchant refuses or is unable to reimburse the Company for the chargeback due to merchant fraud, insolvency or other reasons, the Company will bear the loss for the amount of the refund paid to the cardholders. The Company utilizes a number of systems and procedures to manage merchant risk. In addition, the Company requires cash deposits by certain merchants, which are held by the Company's

sponsoring bank to minimize the risk that chargebacks are not collectible from merchants. A cardholder, through its issuing bank, generally has until the later of up to four months after the date a transaction is processed or the delivery of the product or service to present a chargeback to the Company's sponsoring bank as the merchant processor. Therefore, management believes that the maximum potential exposure for the chargebacks would not exceed the total amount of transactions processed through Visa and MasterCard for the last four months and other unresolved chargebacks in the process of resolution. For the last four months through June 30, 2006, this potential exposure totaled approximately \$644 million. At June 30, 2006, the Company, through its sponsoring bank, had approximately \$110,000 of unresolved chargebacks that were in the process of resolution. At June 30, 2006, the Company, through its sponsoring bank, had access to \$18.7 million in merchant deposits to cover any potential chargeback losses.

Index

NOTE 6: Continued

For the three-month periods ended June 30, 2006 and 2005, the Company processed approximately \$472 million and \$300 million, respectively, of Visa and MasterCard transactions, which resulted in \$2.6 million in gross chargeback activities for the three months ended June 30, 2006 and \$1.9 million for the three months ended June 30, 2005. Substantially all of these chargebacks were recovered from the merchants.

The Company's contingent obligation with respect to chargebacks constitutes a guarantee as defined in Financial Accounting Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantee, Including Indirect Guarantees of Others" ("FIN 45"). FIN 45 requires that guarantees issued or modified subsequent to December 31, 2002 be initially recorded as liabilities in the Statement of Financial Position at fair value. Since the Company's agreement with its sponsoring bank, which establishes the guarantee obligation, was entered into prior to December 31, 2002 and has not been modified since that date, the measurement provisions of FIN 45 are not applicable to this guarantee arrangement.

In accordance with SFAS No. 5, "Accounting for Contingencies", the Company records a reserve for chargeback loss allowance based on its processing volume and historical trends and data. As of June 30, 2006 and 2005, the allowance for chargeback losses, which is classified as a component of the allowance for uncollectible accounts receivable, was \$439,000 and \$58,000, respectively. The expense associated with the valuation allowance is included in processing and transaction expense in the accompanying consolidated statements of income. For the three-month periods ended June 30, 2006 and 2005, the Company expensed \$91,000 and \$7,000, respectively.

In its check guarantee business, the Company charges the merchant a percentage of the face amount of the check and guarantees payment of the check to the merchant in the event the check is not honored by the checkwriter's bank. Merchants typically present customer checks for processing on a regular basis and, therefore, dishonored checks are generally identified within a few days of the date the checks are guaranteed by the Company. Accordingly, management believes that its best estimate of the Company's maximum potential exposure for dishonored checks at any given balance sheet date would not exceed the total amount of checks guaranteed in the last 10 days prior to the balance sheet date. As of June 30, 2006, the Company estimates that its maximum potential dishonored check exposure was approximately \$2,287,000.

For the quarters ended June 30, 2006 and 2005, the Company guaranteed approximately \$19,463,000 and \$12,039,000 of merchant checks, respectively, which resulted in \$196,000 and \$47,000 of dishonored checks presented to the Company for payments, respectively. The Company has the right to collect the full amount of the check from the checkwriter. The Company establishes a reserve for this activity based on historical and projected loss experience. For the quarter ended June 30, 2006 and 2005, the check guarantee loss was \$160,000 and \$59,000, respectively. The check guarantee loss is included in processing and transaction expense in the accompanying consolidated statements of income.

NOTE 7 - Litigation:

The Company is involved in various legal cases arising in the ordinary course of business. Based upon current information, management, after consultation with legal counsel, believes the ultimate disposition thereof will have no material affect, individually or in the aggregate, on the Company's business, financial condition or results of operations. It is possible that in the future we could become a party to such proceedings.

NOTE 8 - Effective Tax Rate:

The effective tax rate for the three and nine months ended June 30, 2006 was 45.0% and 45.7% as compared to 39.1% and 39.3% for the corresponding prior year periods. The increases in the tax rates were primarily due to stock compensation expense which was a non-deductible expense as the Company does not recognize a tax benefit in incentive stock options until a disqualifying disposition occurs.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS
2. OF OPERATIONS

FORWARD-LOOKING STATEMENTS

The discussion of the financial condition and results of operations of the Company should be read in conjunction with the consolidated financial statements and notes thereto included elsewhere herein. This discussion contains forward-looking statements, including statements regarding the Company's strategy, financial performance and revenue sources, which involve risks and uncertainties. The Company's actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including, but not limited to, those set forth elsewhere herein, and in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2005.

OVERVIEW

Electronic Clearing House, Inc. is an electronic payment processor that provides for the payment processing needs of merchants, banks and collection agencies. We derive the majority of our revenue from two main business segments: 1) bankcard and transaction processing services ("bankcard services"), whereby we provide solutions to merchants and banks to allow them to accept credit and debit card payments from consumers; and 2) check-related products ("check services"), whereby we provide various services to merchants and banks to allow them to accept and process check payments from consumers. The principal services we offer within these two segments include, with respect to our bankcard services, debit and credit card processing, and with respect to our check services, check guarantee (where, if we approve a check transaction and a check is subsequently dishonored by the check writer's bank, the merchant is reimbursed by us), check verification (where, prior to approving a check, we search our negative and positive check writer database to determine whether the check writer has a positive record or delinquent check-related debts), electronic check conversion (the conversion of a paper check at the point of sale to a direct bank debit which is processed for settlement through the Federal Reserve System's Automated Clearing House ("ACH") network), check re-presentation (where we attempt to clear a check on multiple occasions via the ACH network prior to returning the check to the merchant so as to increase the number of cleared check transactions), and check collection (where we provide national scale collection services for a merchant or bank). We operate our services under the following brands:

- MerchantAmerica, our retail provider of all credit card, debit card and check payment processing services to both the merchant and bank markets;
- National Check Network ("NCN"), our proprietary database of negative and positive check writer accounts (i.e., accounts that show delinquent history in the form of non-sufficient funds and other negative transactions), for check verification, check conversion capture services, and for membership to collection agencies;
 - *XPRESSCHEX*, Inc. for check collection services; and
 - *ECHO*, for wholesale credit card and check processing services.

We discuss our services in greater detail below. Overall, our ability to program and oversee the management of a merchant's point-of-sale (POS) system, provide credit card and debit card processing, provide multiple services for the processing of checks, provide both electronic and traditional collection services, and fully integrate all of these services into a single Internet-based reporting capability allows us to provide for the majority of the payment processing needs of our customers.

We were incorporated in Nevada in December 1981. Our executive offices are located at 730 Paseo Camarillo, Camarillo, California 93010, and our telephone number is (805) 419-8700. Our common stock is traded on the NASDAQ Capital Market under the ticker symbol "ECHO." Information on our website, www.echo-inc.com, does not

constitute part of this quarterly report.

Bankcard and transaction processing services provide for the majority of our revenues. We typically receive a percentage-based fee on the dollar amount processed and a transaction fee on the number of transactions processed. For the quarter ended June 30, 2006, the bankcard and transaction processing business segment accounted for approximately 76.1% of the Company's total revenue.

13

Index

We purchased a fully integrated, multi-modular bankcard processing system which, once fully implemented, should provide us with greater flexibility to price our credit card processing services and allow us to offer our services to other third parties. Management anticipates the clearing portion of this system to begin live customer deployment in the last quarter of 2006.

ECHO has invested significant resources and management focus in its check services business. Check services revenue increased approximately 28.3% from \$3,702,000 in the third fiscal quarter of 2005 to \$4,751,000 for the current fiscal quarter. Revenue from check collections and ACH fees continues to increase. Growth has come primarily from four sources: Internet wallet providers, check collection services, cross-selling electronic checks and collection services into the credit card merchant base we already serve and casino check cashing services.

Wallet providers allow a customer to fund an online wallet with a lump sum and then the customer can use the wallet at various sites on the Internet. (Probably the best known wallet service on the Internet is PayPal, a service owned by eBay, Inc.) *ECHO* provides back-end payment processing services for various providers of wallet services which permits them to fund the initial wallet transaction. Subsequent transactions of transferring funds from the online wallet are generally not handled by *ECHO* because the payment is typically handled online by the wallet provider themselves.

Approximately 70% of *ECHO*'s credit card processing merchants operate their businesses in non-face-to-face environments such as mail order, phone order and the Internet. These relationships historically have higher margins than those seen with normal retail merchants because of the higher risk of fraud.

ECHO has established an integrated processing relationship with the largest check cashing provider to the gaming and casino market. Our services are primarily centered on providing check verification (using our NCN data base), funds movement, and several sophisticated risk management services that are used to assist the provider in confidently accepting checks.

ECHO is both a Third-Party Processor and an Acquirer Processor for the Visa POS Check Program. Visa officially released its POS Check Service as of December 2002 and several national banks have entered the program since its inception to both sell the service to their merchants and to connect all of their checking accounts to the Visa network. Visa's connectivity to checking account balances has increased significantly over the past year, moving nationally to 30% and higher in many metropolitan areas. (See the discussion of the Visa POS Check Service Program below.)

In addition to being a Third-Party Processor, we are currently certified as an Acquirer Processor with Visa, a role that accepts transactions from the merchant's point-of-sale terminal/systems and reformats them for submission to the Visa network. Most banks presently in the Visa Program are large national or regional banks and already had terminal management service providers that could act as Acquirer Processor for the Visa Program. In the future, as smaller banks make the decision to enter the Visa Program, it is expected that many will have no prior relationship with a terminal management provider and therefore, may potentially choose us as their Acquirer Processor.

We derive transaction revenue in our role as a Third-Party Processor and/or Acquirer Processor by negotiating a transaction fee with Visa and/or the bank that chose us as its Third-Party Processor and/or Acquirer Processor. This Third-Party Processor transaction fee averages \$0.07 to \$0.09 per transaction and the Acquirer Processor transaction fee is generally \$0.02 to \$0.04. The party that sells the service to the merchant (usually the bank) enjoys the largest mark-up on the product, offering the service in the range of \$0.20 to \$0.50 per check, with external cost in the \$0.12 to \$0.15 range, depending on what the bank negotiates with Visa and any third-party provider.

We entered into a sponsorship agreement with our primary credit card processing bank, First Regional Bank, to enable us to sell the Visa Program directly to merchants with an obligation to pay a \$0.01 transaction fee per check to the

bank. This allows the bank to realize added revenue, allows us to realize higher revenue in a marked-up pricing model, and a portion of the mark-up to be used to compensate and motivate resellers of our products and services to offer the Visa Program to merchants in the marketplace. The balance of the mark-up after paying the bank and the sales organization would be additional revenue to us. This will also enable us to use our direct sales channels to provide the Visa Program to *ECHO's* current and potential merchant base.

Strategy

ECHO's service strategy is to provide merchants, banks and industry-specific resellers with electronic payment services that combine credit card, debit card and electronic check and collection services with quality customer support. *ECHO's* services enable merchants to maximize revenue by offering a wide variety of payment options, minimize costs by dealing with one source and improve their bad debt collection rates through use of *ECHO's* integrated collection and risk management services.

Index

Our sales strategy is four-fold: to target providers of point-of-sale systems who serve various industries in the merchant marketplace; to continue to pursue community banks with the combined set of services we currently offer; to focus our direct sales team on specific associations and merchants in industries where both checks and credit cards are common forms of payment; and to continue to support and promote the Visa POS Check Program. We intend to capitalize on our advantage of being a full credit card and check processor by combining our products and using our lower overall processing costs to allow the system provider, community bank or association to enjoy a financial benefit from their customer's processing activity.

Electronic Payment Services for Point-of-Sale System Providers

We believe there are significant opportunities in working closely with those firms that specialize in certain industries and provide a point-of-sale capability to merchants of some nature. By aligning our processing with these parties, we believe we can leverage our sales activity and have longer term relationships with merchants than are historically the case for most processors. We also believe our full processing capability allows us to include the point-of-sale system provider with some economic benefit from the processing volume of the users of its system. We are seeing good opportunities from this sales channel.

Promote Merchant Payment Processing for Regional and Community Banks

ECHO pursues small regional and community banks for credit card and check payment programs. *ECHO* has developed a service that allows community banks to offer credit card and check processing services using our back-end infrastructure with little or no technical involvement by the bank. Much of the reporting to the merchant utilizes the Internet as a delivery channel, an environment in which we have significant experience and knowledge. Due to the high costs and the perceived high risk, most community banks are either unable or unwilling to compete with national banks in providing credit card and check real time processing services and Internet-based reporting tools to their merchants. We have designed the program to be adopted by a bank at little or no cost while it allows the bank to generate revenue and earnings in competition to those earned by much larger banks that have had to make major investments in the technology.

This merchant payment processing service, which is marketed under the MerchantAmerica name, incorporates all of *ECHO's* web-based features and functionalities and our full set of services and payment options. We believe that our fully integrated payment and reporting system allows community banks to enjoy competitive equality with much bigger banks without making significant investments in technology. We, in turn, benefit from the increased processing and transaction revenue. Additional benefits of the MerchantAmerica program to regional and community banks include the:

- Ability for banks to set processing fees for each merchant;
- Assurance that the bank controls the merchant relationship; and
- Reduction of fraud risk.

In addition to the benefits that the bank receives from the MerchantAmerica program, the bank's merchants also receive numerous benefits, including a retail merchant account for credit cards, debit cards and checks; an online shopping cart and check-out payment system; sales tracking and online transaction history; all returned checks being automatically referred to our collection agency; and dedicated customer service available 24 hours a day, seven days a week.

As of June 30, 2006, there are twenty-eight participating banks. *ECHO* estimates that there are 10,000 community banks in the United States and no one provider of services has over 10% of the market. Based on third-party research, we estimate that approximately 6,000 of these banks do not offer any payment solution but refer their merchants to outside providers. The approximately 4,000 banks that are affiliated with a payment service, we believe, will be very responsive to the MerchantAmerica value proposition when a comparison of features and costs is reviewed.

Promote to Associations and Guilds

There are over 8,000 associations and guilds in the United States and many of the 4.1 million merchants belong to one of these organizations. We believe our combination of services and our controlled cost structure will allow us to attract many of these organizations to actively refer their members to us for meeting their payment processing needs. With the hiring of an experienced Senior Vice President of Sales, we expect to see increased activity in this sales channel in the coming months.

15

Index

Promote Visa POS Check Service Program

Given *ECHO*'s role as a "first adopter" in the early stages of the Visa Program and our subsequent investment of significant resources and management focus with respect to the Visa Program, we have seen solid growth in check services as the marketing efforts of participating banks in the Visa Program became more widely implemented.

In June of 2003, a large participating bank sold the Visa Program to the national retailer, Gap, and it deployed the service to all of their stores (Gap, Banana Republic and Old Navy). Their stores submit check MICR data (the numbers along the bottom of a check) in real time and then return the paper check to the check writer at the point of sale. *ECHO* responds with an approval or decline to the check in less than two seconds and for those it approves, it moves the funds nightly from the customers account to the merchant's account. *ECHO* also coordinates all electronic check re-presentment and collection on returned checks when needed. Gap remains the largest merchant in the Visa Program to date. Other national merchants are also in the program, including Burlington Coat Factory, Pearle Vision, and Things Remembered.

The primary source of savings to merchants on the Visa Program are derived from (1) the elimination of having to handle and process paper checks and (2) the net financial benefit seen from the bad check write-off percentage falling below the rates charged by the national guarantee services.

While *ECHO* believes that the Visa Program has the potential to generate significant revenue for us in the future, the market potential of this service is still unproven and its success is largely dependent on the continuing marketing support of *ECHO*, Visa and Visa's member banks.

Sales and Marketing

ECHO offers its payment services through several sales channels.

·*Primary Sales Channels* - Direct sales personnel are dedicated to various industries and/or services. We employ approximately 21 people who serve in either field or office positions that are dedicated to sales.

·*Secondary Sales Channels* - All or a portion of our services are sold through banks who sign up with our MerchantAmerica Agent Bank Program, through banks who are selling the Visa POS Check Program, through third-party resellers, independent sales organizations (ISO's) and through one of our 300 NCN Collection Agency Members. These channels offer lower margins to us due to the added participation in the overall revenue such channels require. Currently *ECHO* has 150 authorized resellers registered to sell *ECHO*'s check products.

During the quarter, we appointed a Senior Vice President of Sales and we have added two new direct sales executives to cover the western region and we are actively pursuing an additional sales executive to cover vertical markets. This direct sales staff will be refocusing on selling our complete bankcard and check product suites. With the addition of these sales resources in fiscal 2006, we feel we are effectively building upon this year's sales momentum and will be well positioned for 2007.

Management believes that we are distinctive in the number of payment methods that we allow, the combination of transaction types that we manage directly, our ability to integrate additional services, and our ability to support each merchant through one vertically integrated source.

Our marketing strategy is to build processing relationships with certain providers of point-of-sale software/hardware that serve select merchant markets; maximize cross-selling opportunities to our existing base of retail merchants and financial institutions; sell integrated suites of check, credit and debit card processing services through community banks and industry-specific resellers; enhance and market MerchantAmerica.com; and pursue associations

aggressively.

16

Index

Competition

Bankcard processing and check processing services are highly competitive industries and are characterized by consolidation, rapid technological change, rapid rates of product obsolescence and introductions of competitive products often at lower prices and/or with greater functionality than those currently on the market. Credit card and debit card processors have similar direct costs and therefore their products are becoming somewhat of a commodity product where a natural advantage accrues to the highest volume processors. To offset this fact, we have focused on marketing to niche markets where we can maintain the margins we deem necessary to operate profitably but no assurance can be given that this strategy will be successful in the future.

There are a number of competitors in the check services industry, the largest of which are TeleCheck (the leading provider of conversion and guarantee services and a subsidiary of First Data Corporation), SCAN/eFunds (the largest verification provider in the nation), Certegy (now a part of Fidelity) and Global Payments. While all four have major national accounts, we have been successful in winning the processing relationships for national accounts when competing for such business against these parties. *ECHO* believes that it can effectively compete due to its ownership of the NCN database, its integrated set of check and collection services and the technological advantage of having been certified as both a Third-Party Processor and Acquirer Processor with the Visa POS Check Program.

ECHO is among the top 50 credit card processors in the nation when evaluated by processing volume. *ECHO* is among a much smaller group when evaluated by processing capability. Of the top 50 firms, approximately 40 of them are independent sales organizations or banks that sell the service and may manage the front-end authorization service but they hire the back-end clearing and settlement services from a full service processor. There are probably 10 or fewer firms capable of full credit card processing and these would include First Data Corporation, Total Systems, NPC (Bank of America), Global Payments, RBS LYNK, and Heartland Payment Services. We believe we hold the distinction of being the smallest public company who, with the installation of the new clearing module in 2006, will serve as a full service processor in credit cards. All of our competitors have greater financial and marketing resources than we have. As a result, they may be better able to respond more quickly to new or emerging technologies and changes in customer requirements. Competitors also may enjoy per transaction cost advantages due to their high processing volumes that may make it difficult for *ECHO* to compete.

We believe that being the smallest processor also has some advantages. There are many merchants who are sizable to us that our larger competitors do not consider to be major merchants. We are finding these merchants appreciate getting preferential treatment from their processor. Also, our willingness to send top management into the field to meet regularly with our major merchants at their location is a perceived distinction and we are using it as a merchant retention tool. While we understand that slightly lower costs can be generated by processing high volumes, we do not think the economic advantages that high volume affords are enough to eliminate *ECHO* as an acceptable and competitive processor in most cases. Despite these potential advantages, we believe that our success will depend largely on our ability to continuously exceed expectations in terms of performance, service, and price, on our ability to develop new products and services, and on how well and how quickly we enhance our current products and introduce them into the market.

RESULTS OF OPERATIONS

Three Months Ended June 30, 2006 and 2005

Financial highlights for the third quarter of fiscal 2006 as compared to the same period last year were as follows:

Total revenue increased 39.1% to \$19.9 million

Edgar Filing: ELECTRONIC CLEARING HOUSE INC - Form 10-Q

· Gross margins from processing and transaction revenue was 33.1% for the current quarter as compared to 36.6% for the prior year

· Operating income increased 153.9% from \$703,000 to \$1,785,000

· Diluted earnings per share were \$0.14 as compared to \$0.06 per share

· Bankcard and transaction processing revenue increased 42.9% to \$15.1 million

· Bankcard processing volume increased 57.5% from \$299.9 million to \$472.1 million

Index

Check-related revenue increased 28.3% to \$4.8 million

ACH transactions processed increased 18.5% to 9.3 million transactions

Stock compensation expense increased to \$269,000 from \$0 as a result of the Company's adoption of SFAS 123R this fiscal year.

Revenue. Total revenue increased 39.1% to \$19,869,000 for the three months ended June 30, 2006, from \$14,281,000 for the same period last year. The increase can be primarily attributed to the 42.9% growth in the bankcard processing revenue and 28.3% growth in the check services business segment as compared to the same period last year. This growth has occurred organically from our existing merchants and from our marketing initiatives. We have two merchants who each generated approximately 8% of the total bankcard processing revenue during the current quarter. The increase in revenue was primarily the result of a 57.5% increase in bankcard processing volume as compared to the prior year quarter.

Cost of Sales. Bankcard processing expenses are directly related to the changes in processing revenue. A major component of the Company's bankcard processing expense, the interchange fees paid to the card issuing banks, is normally fixed as a percentage of each bankcard transaction dollar processed. Processing-related expenses, consisting primarily of data center processing costs, interchange fees, third-party processing fees, and communication expense, increased from \$9,051,000 in the third fiscal quarter of 2005 to \$13,299,000 in the current quarter, a 46.9% increase. The increase was primarily attributable to the 42.9% increase in bankcard processing revenue for the current quarter.

Gross margin was 33.1% for the current quarter as compared to 36.6% for the same period last year. The decrease in gross margin was primarily attributable to several high volume merchants that contributed slightly lower margin. Gross margin for this quarter was further impacted by a \$213,000 increase in software amortization expense and an \$83,000 increase in chargeback losses as compared to the same period last year. A majority of this increase in chargeback losses was related to the bankruptcy of one of our merchants.

Expense. Other operating costs such as personnel costs, telephone and depreciation expenses decreased slightly, from \$1,493,000 in the third quarter of 2005 to \$1,438,000 for the current fiscal quarter, a 3.7% decrease. This was attributable to the 39.1% increase in total revenue and the benefits from economies of scale in supporting such growth.

Research and development expenses decreased from \$354,000 for the quarter ended June 30, 2005 to \$316,000 in the current year quarter. Continued investment in research and development and IT initiatives is critical to our ability to maintain our competitive position and strengthen our infrastructure to support growth. Several of our major IT projects should be completed in the fourth quarter of 2006. However, we anticipate making continued investments in our IT initiatives and expect research and development expenses to remain at current levels for the remainder of the 2006 fiscal year and into fiscal 2007.

Selling, general and administrative expenses increased from \$2,680,000 in the third fiscal quarter of 2005 to \$3,031,000 for the current fiscal quarter, an increase of 13.1%. This increase was primarily attributable to the \$269,000 increase in stock compensation expense as the result of the implementation of SFAS 123R starting this fiscal year. In addition, SOX compliance costs increased \$115,000 as compared to the prior year quarter. As a percentage of total revenue, selling, general and administrative expenses decreased from 18.8% in the prior year quarter to 15.3% in the current quarter.

Operating Income. Operating income for the quarter ended June 30, 2006 was \$1,785,000, as compared to operating income of \$703,000 in the same period last year, a 153.9% increase. The increase in operating income was primarily due to 39.1% increase in revenue.

Interest Expense. Net interest was \$52,000 for the three months ended June 30, 2006 as compared to \$8,000 interest income for the prior year quarter. The increase was due to the increase cash and cash equivalents balances and increase in interest rates being earned.

18

Index

Effective Tax Rate. The effective tax rate for the quarter ended June 30, 2006 was 45.0% as compared to 39.1% for the prior year quarter. The increase in the tax rate was primarily due to stock compensation expense which was a non-deductible expense as the Company does not recognize a tax benefit from incentive stock options until a disqualifying disposition occurs.

Net Income. Net income for the current quarter ended June 30, 2006 was \$1,010,000, as compared to \$433,000 for the prior year quarter. This 133.3% increase was primarily attributable to the 39.1% increase in revenue.

Segment Results

Bankcard and Transaction Processing. Bankcard processing and transaction revenue increased 42.9%, from \$10,579,000 in the fiscal quarter ended June 30, 2005 to \$15,118,000 for the current year quarter ended June 30, 2006. This revenue increase was mainly attributable to organic growth from our existing merchants and several new merchants with high processing volume. We have two bankcard merchants who each generated approximately 8% of the total bankcard processing revenue and a total of 20.2% of the bankcard processing volume during the current quarter. Bankcard revenue made up 76.1% of total revenue for the current quarter as compared to 74.1% for the same period last year. We attribute this level of growth to the success our sales and marketing program.

Operating income from our bankcard and transaction processing segment was \$2,762,000 for the current period as compared to \$1,651,000 in the same period last year, a 67.3% increase. The increase in operating income was primarily attributable to the 42.9% revenue growth and offset by lower margin from the merchants with high processing volume.

Check Related Products. Check-related revenues increased from \$3,702,000 for the prior year quarter to \$4,751,000 for the current fiscal quarter, an increase of 28.3%. This increase was attributable to the 15.7% increase in ACH revenue and check verification revenue, and a 98.6% increase in collection revenue. This increase primarily came from add-on sales from our existing merchants. We have one check processing merchant who comprises approximately 10% of our total check processing revenue.

Check services revenue made up 23.9% of total revenues in the current quarter as compared to 25.9% in the prior year quarter. Check-related operating income was \$1,418,000 for the quarter ended June 30, 2006 as compared to \$624,000 in the same period last year. The improvement in this business segment was primarily attributable to the 28.3% increase in revenue.

Other Corporate Expenses. Other corporate expenses increased from \$1,572,000 for the fiscal quarter ended June 30, 2005 to \$2,395,000 for the current quarter, an increase of 52.4%. This increase was primarily attributable to the 39.1% increase in revenue and the \$269,000 increase in stock compensation expense and a \$155,000 increase due to SOX compliance costs.

Nine Months Ended June 30, 2006 and 2005

Financial highlights for the nine months ended June 30, 2006, as compared to the same period last year, were as follows:

- Total revenue increased 38.8% from \$40.4 million to \$56.0 million
- Gross margins from processing and transaction revenue decreased from 36.1% for the prior year nine month period to 33.3% for the current period
- Diluted EPS of \$0.29 as compared to diluted EPS of \$0.09

· Bankcard and transaction processing revenue increased 43.0% to \$42.4 million

· Bankcard processing volume increased 57.2% to \$ 1,323 million

· Check-related revenue increased 27.2% to \$13.7 million

· ACH transactions processed increased 15.9% to 28.2 million transactions

· Stock compensation expense increased to \$704,000 from \$8,000.

Index

Revenue. Total revenue increased 38.8% to \$56,023,000 for the nine months ended June 30, 2006, from \$40,362,000 for the same nine month period last year. This revenue increase was the result of organic growth from our existing merchants and new merchants generated from our sales and marketing programs. Our bankcard processing volume increased 57.2% for the nine months ended June 30, 2006, as compared to the same period last year.

Cost of Sales. Processing-related expenses increased from \$25,783,000 for the nine month period in 2005 to \$37,357,000 for the same nine months ended June 30, 2006, a 44.9% increase. This increase was directly attributable to the 38.8% increase in revenue. Gross margin from processing and transaction services decreased to 33.3% in the current nine month period from 36.1% for the same nine month period last year. The decrease in gross margin was primarily attributable to several high volume merchants who yielded lower margins. Gross margin for the nine months ended June 30, 2006 was further impacted by a \$694,000 increase in software amortization expense and a \$407,000 increase in chargeback losses as compared to the same period last year.

Expense. Other operating costs increased slightly from \$4,236,000 for the nine months ended June 30, 2005 to \$4,266,000 for the nine months ended June 30, 2006, an increase of 0.7%. This increase was directly related to the 38.8% increase in total revenue and the benefits from economies of scale in supporting such growth.

Research and development expense decreased from \$1,271,000 in the nine months ended June 30, 2005 to \$1,189,000 in the current nine month period. We are continuing to invest in infrastructure improvement and software enhancement to remain competitive in our industry.

Selling, general and administrative expenses increased from \$8,044,000 for the nine months ended June 30, 2005 to \$9,584,000 in the current nine-month period, an increase of 19.1%. This increase was primarily attributable to a \$511,000 increase in salaries due to the increase in employees to support the Company's growth, a \$696,000 increase in stock compensation expense as the result of the implementation of SFAS 123R starting this fiscal year, and a \$167,000 increase in professional fees due mainly to costs related to Sarbanes-Oxley. As a percentage of total revenue, selling, general and administrative expenses decreased from 19.9% for the nine months ended June 30, 2005 to 17.1% in the current nine month period.

Operating Income. Operating income for the nine months ended June 30, 2006 was \$3,627,000, as compared to operating income of \$1,028,000 for the same period last year.

Interest. Net interest increased from \$8,000 interest income for the nine months ended June 30, 2005 to \$105,000 for the current nine-month period. This is attributable to an increase in the cash and cash equivalents, the higher interest earned and a reduction in the total loan balances.

Effective Tax Rate. Effective tax rate for the nine months ended June 30, 2006 was 45.7%, as compared to 39.3% for the nine months ended June 30, 2005. The increase in the tax rate was primarily due to stock compensation expense which was a non-deductible expense as the Company does not recognize a tax benefit from incentive stock options until a disqualifying disposition occurs.

Segment Results

Bankcard and Transaction Processing. Bankcard processing and transaction revenue increased 43.0%, from \$29,626,000 for the nine months ended June 30, 2005 to \$42,370,000 for the current nine-month period. This revenue increase was mainly attributable to the 57.2% increase in bankcard processing volume as compared to the same nine month period last year. The processing volume increase was due to our organic growth, particularly several high processing volume merchants.

Check-Related Products. Check-related revenues increased from \$10,736,000 for the nine months ended June 30, 2005 to \$13,653,000 for the current nine-month period, an increase of 27.2%. This was attributable to the 18.8% revenue growth in ACH revenue and check verification revenue and an 87.3% increase in check collection revenue.

Index

Check services revenue accounted for 24.4% of our total revenue for the current nine month period as compared to 26.6% in the same prior year period. Check-related operating income was \$3,685,000 for the current nine-month period as compared to \$1,577,000 in the same period last year, an increase of 133.7%. The improvement in operating income was primarily attributable to the 27.2% increase in check services revenue over the same period last year.

Other Corporate Expense. Other corporate expense increased from \$4,782,000 for the nine months ended June 30, 2005 to \$7,214,000 for the nine months ended June 30, 2006, an increase of 50.9%. The increases were primarily attributable to the 38.8% increase in revenue, higher salaries, stock compensation expenses and legal and settlement expenses related to a patent lawsuit.

LIQUIDITY AND CAPITAL RESOURCES

As of June 30, 2006 we had available cash and cash equivalents of \$10,250,000, restricted cash of \$2,322,000 in reserve with our primary processing bank and working capital of \$11,740,000.

Accounts receivable, net of allowance for doubtful accounts, increased from \$2,421,000 at September 30, 2005 to \$3,136,000 at June 30, 2006. Allowance for doubtful accounts reserved mainly for chargeback losses increased to \$528,000 at June 30, 2006 from \$92,000 at September 30, 2005. The higher allowance was primarily related to provision for doubtful accounts related to four bankcard merchants' chargeback receivables.

Net cash provided by operating activities for the nine months ended June 30, 2006 was \$6,500,000, as compared to net cash provided by operating activities of \$2,785,000 for the nine months ended June 30, 2005.

Cash amounts classified as settlement receivable/payable are amounts due to/from merchants and result from timing differences in our settlement process with those merchants. These timing differences account for the difference between the time that funds are received in our bank accounts and the time that settlement payments are made to merchants. Therefore, at any given time, settlement receivable/payable may vary and ultimately depends on the volume of transactions processed and the timing of the cut-off date. Settlement deposits are cash deposited in our bank accounts from the merchant settlement transactions.

In the nine months ended June 30, 2006, we used \$662,000 for the purchase of mainly computer equipment and \$3,011,000 for the acquisition and capitalization of software costs, as compared to \$623,000 for the purchase of equipment and \$2,896,000 for the acquisition and capitalization of software costs for the same nine-month period last year. During the nine months ended June 30, 2006, we paid off \$307,000 of notes payable and capitalized lease obligations. During the nine months ended June 30, 2006, we had proceeds of \$482,000 from stock option exercises.

We negotiated a secured \$3,000,000 line of credit and a \$1,000,000 equipment lease line with Bank of the West. As of June 30, 2006, both the \$3,000,000 line of credit and the \$1,000,000 equipment lease line are fully available.

At June 30, 2006 we had the following cash commitments:

Index**Payment Due By Period**

<u>Contractual Obligations</u>	Total	Less than 1 year	2-3 years	4-5 years	After 5 years
Long-term debt including interest	\$ 820,000	\$ 303,000	\$ 451,000	\$ 66,000	\$ -0-
Capital lease obligations	96,000	53,000	43,000	-0-	-0-
Operating leases	1,270,000	646,000	624,000	-0-	-0-
Total contractual cash obligations	\$ 2,186,000	\$ 1,002,000	\$ 1,118,000	\$ 66,000	\$ -0-

Our primary source of liquidity is expected to be cash flow generated from operations and cash and cash equivalents currently on hand and the secured \$3,000,000 line of credit and the \$1,000,000 equipment lease line which have yet to be utilized. Management believes that our cash flow from operations together with cash on hand combined with the available credit facilities will be sufficient to meet our working capital and other commitments.

OFF-BALANCE SHEET ARRANGEMENTS

At June 30, 2006, we did not have any off-balance sheet arrangements.

RISK FACTORS

Our business, and accordingly, your investment in our common stock, is subject to a number of risks. These risks could affect our operating results and liquidity. You should consider the following risk factors, among others, before investing in our common stock:

Risks Related to our Business

We rely on cooperative relationships with, and sponsorship by, banks, the absence of which may affect our operations.

We currently rely on cooperative relationships with, and sponsorship by, banks in order to process our Visa, MasterCard and other bankcard transactions. We also rely on several banks for access to the Automated Clearing House ("ACH") for submission of both credit card and check settlements. Our banking relationships are currently with smaller banks (with assets of less than \$500,000,000). Even though smaller banks tend to be more susceptible to mergers or acquisitions and are therefore less stable, these banks find the programs we offer more attractive and we believe we cannot obtain similar relationships with larger banks at this time. A bank could at any time curtail or place restrictions on our processing volume because of its internal business policies or due to other adverse circumstances. If a volume restriction is placed on us, it could materially adversely affect our business operations by restricting our ability to process credit card transactions and receive the related revenue. Our relationships with our customers and merchants would also be adversely affected by our inability to process these transactions.

We currently maintain one primary bankcard processing and sponsorship relationship with First Regional Bank in Agoura Hills, California. Our agreement with First Regional Bank continues through 2010. We also maintain several banking relationships for ACH processing. While we believe our current bank relationships are sound, we cannot assure that these banks will not restrict our increasing processing volume or that we will always be able to maintain these relationships or establish new banking relationships. Even if new banking relationships are available, they may

not be on terms acceptable to us. With respect to First Regional Bank, while we believe its ability to terminate our relationship is cost-prohibitive, they may determine that the cost of terminating their agreement is less than the cost of continuing to perform in accordance with its terms, and may therefore determine to terminate their agreement prior to its expiration. Ultimately, our failure to maintain this and other banking relationships and sponsorships may have a material adverse effect on our business and results of operations.

Merchant fraud with respect to bankcard and ACH transactions could cause us to incur significant losses.

We significantly rely on the processing revenue derived from bankcard and ACH transactions. If any merchants were to submit or process unauthorized or fraudulent bankcard or ACH transactions, depending on the dollar amount, *ECHO* could incur significant losses which could have a material adverse effect on our business and results of operations. *ECHO* assumes and compensates the sponsoring bank for bearing the risk of these types of transactions.

Index

We have implemented systems and software for the electronic surveillance and monitoring of fraudulent bankcard and ACH use. As of June 30, 2006, we maintained a dedicated chargeback reserve of \$830,000 at our primary bank specifically earmarked for such activity. Additionally, through our sponsoring bank, as of June 30, 2006, we had access to approximately \$18.7 million belonging to our merchants on an aggregate basis. This money has been deposited at the sponsoring bank by the merchants to cover any potential losses. Despite a long history of managing such risk, we cannot guarantee that these systems will prevent fraudulent transactions from being submitted and processed or that the funds set aside to address such activity will be adequate to cover all potential situations that might occur. We do not have insurance to protect us from these losses. There is no assurance that our chargeback reserve will be adequate to offset against any unauthorized or fraudulent processing losses that we may incur. Depending on the size of such losses, our results of operations could be immediately and materially adversely affected.

Excessive chargeback losses could significantly affect our results of operations and liquidity.

Our agreements with our sponsoring bank require us to assume and compensate the bank for bearing the risk of “chargeback” losses. Under the rules of Visa and MasterCard, when a merchant processor acquires card transactions, it has certain contingent liabilities for the transactions processed. This contingent liability arises in the event of a billing dispute between the merchant and a cardholder that is ultimately resolved in the cardholder’s favor. In such a case, the disputed transaction is charged back to the merchant and the disputed amount is credited or otherwise refunded to the cardholder. If we are unable to collect this amount from the merchant’s account, or if the merchant refuses or is unable to reimburse us for the chargeback due to merchant fraud, insolvency or other reasons, we will bear the loss for the amount of the refund paid to the cardholders.

A cardholder, through its issuing bank, generally has until the later of up to four months after the date a transaction is processed or the delivery of the product or service to present a chargeback to our sponsoring bank as the merchant processor. Therefore, management believes that the maximum potential exposure for the chargebacks would not exceed the total amount of transactions processed through Visa and MasterCard for the last four months and other unresolved chargebacks in the process of resolution. For the last four months through June 30, 2006, this potential exposure totaled approximately \$644 million. At June 30, 2006, we, through our sponsoring banks, had approximately \$110,000 of unresolved chargebacks that were in the process of resolution.

For the three-month period ended June 30, 2006 and 2005, we processed approximately \$472 million (2006) and \$300 million (2005) of Visa and MasterCard transactions, which resulted in \$2.6 million in gross chargeback activities for the three months ended June 30, 2006 and \$1.9 million for the three months ended June 30, 2005. Substantially all of these chargebacks were recovered from the merchants.

Nevertheless, if we are unable to recover these chargeback amounts from merchants, having to pay the aggregate of any such amounts would significantly affect our results of operations and liquidity.

Failure to participate in the Visa POS Check Service Program would cause us to significantly shift our operating and marketing strategy.

We have significantly increased our infrastructure, personnel and marketing strategy to focus on the potential growth of our check services through the Visa POS Check Service Program. We currently provide critical back-end infrastructure for the service, including our NCN database for verification and our access to the Federal Reserve System’s Automated Clearing House for funds settlement and for checks written on bank accounts with banks not participating in the program.

Because we believe the market will continue to gain acceptance of the Visa POS Check Service Program, we have expended significant resources to market our check conversion services and verification services to our merchant base, to solidify our strategic relationships with the various financial institutions that have chosen us as their Acquirer Processor and Third-Party processor under the program, and to sell our other check products such as electronic check re-presentments and check guarantee to the Visa member banks.

Our failure to adequately market our services through this relationship could materially affect our marketing strategy going forward. Additionally, if we fail to adequately grow our infrastructure to address increases in the volume of transactions, cease providing services as a Third-Party processor or Acquirer Processor or are otherwise removed or terminated from the Visa Program, this would require us to dramatically shift our current operating strategy.

Index

Our inability to implement, and/or the inability of third-party software vendors to continue to support and provide maintenance services with respect to, the third-party vendors' products, could significantly adversely affect our results of operations and financial condition.

We utilize various third-party software applications and depend on the providers of such software applications to provide support and maintenance services to us. In the event that a third-party software vendor fails to continue to support and maintain its software application, or fails to do so in a timely manner, this could significantly affect our results of operations and financial condition.

Our inability to ultimately implement, or a determination to cease the implementation of various of our software technology initiatives will significantly adversely affect our results of operations and financial condition.

We have spent significant time and monetary resources implementing several software technologies, which resulted in significant cost being capitalized by us as non-current software assets. The implementation of these technologies will provide us with substantial operational advantages that would allow us to attract and retain larger merchants, as well as the small and mid-market merchants that have been our target market. Management believes that the implementation of these software technologies, and the technologies themselves, continues to be in the best interests of, and the most viable alternative for, the Company. However, the inability to ultimately implement, or a determination to cease the implementation of these software technologies would cause these assets to become impaired, and the corresponding impairment would significantly adversely affect our results of operations and financial condition.

A significant amount of our bankcard processing revenue is dependent on approximately 100 merchant accounts, several of which are very large merchants. The loss of a substantial portion of these accounts would adversely affect our results of operations.

We depend on approximately 100 key merchant accounts for our organic growth and profitability. Two merchants accounted for approximately 16% of our bankcard processing revenue during the quarter ended June 30, 2006. The loss of those accounts or the loss of merchants from this select group could adversely affect our results of operations.

The business activities of our merchants could affect our business and results of operations.

We provide direct and back-end bankcard and check processing services to merchants across many industries. Several of these merchants provide consumers access to "Internet wallets," which subsequently permit consumers to use funds in those "Internet wallets" to participate in gaming activities over the Internet. Our "Internet wallet" merchants collectively comprise approximately 27% of our check processing revenue, with one merchant who comprises approximately 10% of our check processing revenue. To the extent any of these merchants conduct activities which are deemed illegal by future legislation or otherwise become involved in activities that incur civil liability from third parties, legal authorities or those third parties could attempt to pursue claims against us for aiding the activities of those merchants. While we believe that the services we provide do not directly aid in the activities of our merchants, and while we have no intent to assist any such activities, other than to provide general processing services consistent with past practice, any claims by legal authorities or third parties would require us to expend financial and management resources to address and defend such claims, the aggregate effect of which could have an adverse impact on our business and results of operations. Additionally, the loss of any of those merchants would have a significant affect on our business and results of operations.

The business in which we compete is highly competitive and there is no assurance that our current products and services will stay competitive or that we will be able to introduce new products and services to compete successfully.

We are in the business of processing payment transactions and designing and implementing integrated systems for our customers so that they can better use our services. This business is highly competitive and is characterized by rapid technological change, rapid rates of product obsolescence, and rapid rates of new product introduction. Our market share is relatively small as compared to most of our competitors and most of these competitors have substantially more financial and marketing resources to run their businesses. While we believe our small size provides us the ability to move quickly in some areas, our competitors' greater resources enable them to investigate and embrace new and emerging technologies, to quickly respond to changes in customers needs, and to devote more resources to product and services development and marketing. We may face increased competition in the future and there is no assurance that current or new competition will allow us to keep our customers. If we lose customers, our business operations may be materially adversely affected, which could cause us to cease our business or curtail our business to a point where we are no longer able to generate sufficient revenue to fund operations. There is no assurance that our current products and services will stay competitive with those of our competitors or that we will be able to introduce new products and services to compete successfully in the future.

Index

If we are unable to process significantly increased volume activity, this could affect our operations and we could lose our competitive position.

We have built transaction processing systems for check verification, check conversion, ACH processing, and bankcard processing activities. While current estimates regarding increased volume are within the capabilities of each system, it is possible that a significant increase in volume in one of the markets would exceed a specific system's capabilities. To minimize this risk, *ECHO* has redesigned and upgraded its check related processing systems and has purchased a high-end system to process bankcard activity. This system is not yet operational, and even when it becomes operational, no assurance can be given that it would be able to handle a significant increase in volume or that the operational enhancements and improvements will be completed in time to avoid such a situation. In the event we are unable to process increases in volume, this could significantly adversely affect our banking relationships, our merchant customers and our overall competitive position, and could potentially result in violations of service level agreements which would require us to pay penalty fees to the other parties to those agreements. Losses of such relationships, or the requirement to pay penalties, may severely impact our results of operations and financial condition.

We incur financial risk from our check guarantee service.

The check guarantee business is essentially a risk management business. Any limitation of a risk management system could result in financial obligations being incurred by *ECHO* relative to our check guarantee activity. While *ECHO* has provided check guarantee services for several years, there can be no assurance that our current risk management systems are adequate to assure against any financial loss relating to check guarantee. While *ECHO* is enhancing its current risk management systems and it is being conservative with reference to the type of merchants to which it offers guarantee services in order to minimize this risk, no assurance can be given that such measures will be adequate. During the quarter ended June 30, 2006, we incurred \$160,000 in losses from uncollected guaranteed checks.

Security breaches could impact our continued operations.

We process confidential financial information and maintain several levels of security to protect this data. Security includes hand and card-based identification systems at our data center locations that restrict access to the specific facilities, various employee monitoring and access restriction policies, and various firewall and network management methodologies that restrict unauthorized access through the Internet. While these systems have worked effectively in the past, there can be no assurance that they will continue to operate without a security breach in the future. Depending upon the nature of the breach, the consequences of security breaches could be significant and dramatic to *ECHO's* continued operations.

The industry in which we operate involves rapidly changing technology and our failure to improve our products and services or to offer new products and services could cause us to lose customers.

Our business industry involves rapidly changing technology. Recently, we have observed rapid changes in technology as evidenced by the Internet and Internet-related services and applications, new and better software, and faster computers and modems. As technology changes, *ECHO's* customers desire and expect better products and services. Our success depends on our ability to improve our existing products and services and to develop and market new products and services. The costs and expenses associated with such an effort could be significant to us. There is no assurance that we will be able to find the funds necessary to keep up with new technology or that if such funds are available that we can successfully improve our existing products and services or successfully develop new products and services. Our failure to provide improved products and services to our customers or any delay in providing such products and services could cause us to lose customers to our competitors. Loss of customers could have a material

adverse effect on *ECHO*.

25

Index

Our inability to protect or defend our trade secrets and other intellectual property could hurt our business.

We have expended a considerable amount of time and money to develop information systems for our merchants. We regard these information systems as trade secrets that are extremely important to our payment processing operations. We rely on trade secret protection and confidentiality and/or license agreements with employees, customers, partners and others to protect this intellectual property and have not otherwise taken steps to obtain additional intellectual property protection or other protection on these information systems. We cannot be certain that we have taken adequate steps to protect our intellectual property. In addition, our third-party confidentiality agreements can be breached and, if they are, there may not be an adequate remedy available to us. If our trade secrets become known, we may lose our competitive position, including the loss of our merchant and bank customers. Such a loss could severely impact our results of operations and financial condition.

Additionally, while we believe that the technology underlying our information systems does not infringe upon the rights of any third parties, there is no assurance that third parties will not bring infringement claims against us. We also have the right to use the technology of others through various license agreements. If a third party claimed our activities and/or these licenses were infringing their technology, while we may have some protection from our third-party licensors, we could face additional infringement claims or otherwise be obligated to stop utilizing intellectual property critical to our technology infrastructure. If we are not able to implement other technology to substitute the intellectual property underlying a claim, our business operations could be severely effected. Additionally, infringement claims would require us to incur significant defense costs and expenses and, to the extent we are unsuccessful in defending these claims, could cause us to pay monetary damages to the person or entity making the claim. Continuously having to defend such claims or otherwise making monetary damages payments could materially adversely affect our results of operations.

If we do not continue to invest in research and development, and/or otherwise improve our technology platforms, we could lose our competitive position.

Because technology in the payment processing industry evolves rapidly, we need to continue to invest in research and development in both the bankcard processing business segment and the check-related products segment in order to remain competitive. This includes investments in our technology platforms to permit them to process higher transaction volumes, to transition some of these technologies to more commonly used platforms, to permit us to process foreign currency transactions, and to expand our point-of-sale connection capability for our bankcard processing services. Research and development expenses decreased from \$354,000 for the quarter ended June 30, 2005 to \$316,000 for the quarter ended June 30, 2006. Most of our development project costs were capitalized once we entered into coding and testing phases. We continue to evaluate projects, which we believe will assist us in our efforts to stay competitive. Although we believe that our investment in these projects will ultimately increase earnings, there is no assurance as to when or if these new products will show profitability or if we will ever be able to recover the costs invested in these projects. Additionally, if we fail to commit adequate resources to grow our technology on pace with market growth, we could quickly lose our competitive position, including the loss of our merchant and bank customers.

Failure to obtain additional funds can impact our operations and future growth.

We use funds generated from operations, as well as funds obtained through credit facilities and equity financing, to finance our operations. In light of our recent financing efforts, and as a result of the cash flow generated from operations, we believe we have sufficient cash to support our business activities, including research, development and marketing costs. However, future growth may depend on our ability to continue to raise additional funds, either through operations, bank borrowings, or equity or debt financings. There is no assurance that we will be able to continue to raise the funds necessary to finance growth or continue to generate the funds necessary to finance

operations, and even if such funds are available, that the terms will be acceptable to us. The inability to generate the necessary funds from operations or from third parties in the future may require us to scale back our research, development and growth opportunities, which could harm our overall operations.

Index

While we maintain insurance protection against claims related to our services, there is no assurance that such protection will be adequate to cover potential claims and our inability to otherwise pay such claims could harm our business.

We maintain errors and omissions insurance for the services we provide. While we believe the limit on our errors and omissions insurance policy is adequate and consistent with industry practice, if claims are brought by our customers or other third parties, we could be required to pay the required claim or make significant expenditures to defend against such claims in amounts that exceed our current insurance coverage. There is no assurance that we will have the money to pay potential plaintiffs for such claims if they arise beyond the amounts insured by us. Making these payments could have a material adverse effect on our business.

Involvement in litigation could harm our business.

We are involved in various lawsuits arising in the ordinary course of business. Although we believe that the claims asserted in such lawsuits are without merit, the cost to us for the fees and expenses to defend such lawsuits could have a material adverse effect on our financial condition, results of operations or cash flow. In addition, there can be no assurance that we will not at some time in the future experience significant liability in connection with such claims. For the three months ended June 30, 2006, we have spent approximately \$22,000 in legal fees and expenses defending these claims.

Our inability to recover from natural disasters could harm our business.

We currently maintain two data centers: one in Camarillo, California, and one in Albuquerque, New Mexico. Should a natural disaster occur in any of the locations, it is possible that *ECHO* would not be able to fully recover full functionality at such data centers. To minimize this risk, *ECHO* centralized its data processing functionality in Camarillo during fiscal 2005 and in 2006, anticipates that Albuquerque will be a fully redundant site. Despite such contingent capabilities, it is possible a natural disaster could limit or completely disable a specific service offered by *ECHO* or site operated by *ECHO* until such time that the specific location could resume its functionality. Our inability to provide such service could have a material adverse effect on our business and results of operations.

Increases in the costs and requirements of technical compliance could harm our business.

The services which *ECHO* offers require significant technical compliance. This includes compliance to both Visa and MasterCard regulations and association rules, NACHA guidelines and regulations with regard to the Federal Reserve System's Automated Clearing House and check related issues, and various banking requirements and regulations. *ECHO* has personnel dedicated to monitoring our compliance to the specific industries we serve and when possible, *ECHO* is moving the technical compliance responsibility to other parties. As the compliance issues become more defined in each industry, the costs and requirements associated with that compliance may present a risk to *ECHO*. These costs could be in the form of additional hardware, software or technical expertise that *ECHO* must acquire and/or maintain. Additionally, burdensome or unclear requirements could increase the cost of compliance. While *ECHO* currently has these costs under control, we have no control over those entities that set the compliance requirements so no assurance can be given that *ECHO* will always be able to underwrite the costs of compliance in each industry wherein we compete.

Our internal controls over financial reporting may not be adequate and our independent auditors may not be able to certify as to their adequacy, which could have a significant and adverse effect on our business and reputation.

Effective with our year-end September 30, 2006 we will become subject to Section 404 of the Sarbanes-Oxley act of 2002 and rules and regulations of the SEC thereunder, which we refer to as Section 404. Section 404 requires a reporting company such as ours to, among other things, annually review and report on its internal controls over financial reporting, and evaluate and disclose changes in its internal controls over financial reporting quarterly. Accordingly, we are evaluating our internal controls over financial reporting in order to allow management to report on, and our independent auditors to attest to, our internal controls over financial reporting. We are currently performing the system and process evaluation and testing required in an effort to comply with the management certification and auditor attestation requirements of Section 404. As a result, we expect to incur additional expenses and diversion of management's time. We cannot be certain as to the completion of our evaluation and testing actions or the impact of the same on our operations and may not be able to ensure that the process is effective or that the internal controls are or will be effective in a timely manner. If we are not able to implement the requirements of Section 404 in a timely manner or with adequate compliance, our independent auditors may not be able to certify as to the effectiveness of our internal control over financial reporting and we may be subject to sanctions or investigation by regulatory authorities, including the SEC. As a result, there could be an adverse reaction in the financial markets due to a loss of confidence in the reliability of our financial statements. In addition, we may be required to incur costs in improving our internal control system and the hiring of additional personnel. Any such action could have a material adverse effect on our business, results of operations and financial condition.

Risks Associated With Our Common Stock

If we need to sell or issue additional shares of common stock or assume additional debt to finance future growth, our stockholders' ownership could be diluted or our earnings could be adversely impacted.

Our business strategy may include expansion through internal growth, by acquiring complementary businesses or by establishing strategic relationships with targeted customers and suppliers. In order to do so, or to fund our other activities, we may issue additional equity securities that could dilute our stockholders' stock ownership. We may also assume additional debt and incur impairment losses related to goodwill and other tangible assets if we acquire another company and this could negatively impact our results of operations. As of the date of this report, management has no plan to raise additional capital through the sale of securities and believes that our cash flow from operations together with cash on hand and our established line of credit with Bank of the West will be sufficient to meet our working capital and other commitments.

Index

We have adopted a number of anti-takeover measures that may depress the price of our common stock.

Our rights agreement, our ability to issue additional shares of preferred stock and some provisions of our articles of incorporation and bylaws could make it more difficult for a third party to make an unsolicited takeover attempt of us. These anti-takeover measures may depress the price of our common stock by making it more difficult for third parties to acquire us by offering to purchase shares of our stock at a premium to its market price.

Our stock price has been volatile.

Our common stock is quoted on the NASDAQ Capital Market, and there can be substantial volatility in the market price of our common stock. Over the course of the quarter ended June 30, 2006, the market price of our common stock has been as high as \$18.19 and as low as \$12.51. Additionally, over the course of the year ended September 30, 2005, the market price of our common stock has been as high as \$10.35 and as low as \$7.10. The market price of our common stock has been, and is likely to continue to be, subject to significant fluctuations due to a variety of factors, including quarterly variations in operating results, operating results which vary from the expectations of securities analysts and investors, changes in financial estimates, changes in market valuations of competitors, announcements by us or our competitors of a material nature, loss of one or more customers, additions or departures of key personnel, future sales of common stock and stock market price and volume fluctuations. In addition, general political and economic conditions such as a recession, or interest rate or currency rate fluctuations may adversely affect the market price of our common stock.

We have not paid and do not currently plan to pay dividends, and you must look to price appreciation alone for any return on your investment.

Some investors favor companies that pay dividends, particularly in general downturns in the stock market. We have not declared or paid any cash dividends on our common stock. We currently intend to retain any future earnings for funding growth, and we do not currently anticipate paying cash dividends on our common stock in the foreseeable future. Because we may not pay dividends, your return on this investment likely depends on your selling our stock at a profit.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We could be exposed to market risk from changes in interest rates on our lease lines. Our exposure to interest rate risk relates to the \$3,000,000 line of credit and the \$1,000,000 equipment lease line which have not been utilized as of June 30, 2006. A hypothetical 1% interest rate change would have no material impact on our results of operations.

Item 4. Controls and Procedures

As of June 30, 2006, the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934). Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that as of June 30, 2006, our disclosure controls and procedures were effective.

During the quarter ended June 30, 2006, there was no change in our internal control over financial reporting that materially affects, or that is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1a.

Risk Factors

For a listing of our Risk Factors, see Part I, Item 2.

Item 5.

Other Information

On May 11, 2006, we entered into separation agreements with each of our principal executive officers (CEO, CFO and COO) and each of our senior vice presidents whereby, in the event of a Change in Control of us (as defined in each agreement) each such executive officer would be entitled, to the extent they remain employed by us at the time of such Change in Control, to the following: (i) an acceleration of vesting with respect to all stock option and restricted stock grants then outstanding and not yet vested, (ii) a portion of such executive's anticipated cash or sales commission-based bonus, as applicable, for the fiscal year in which the Change in Control occurred, and (iii) in the event that the executive is terminated without Cause (as defined in each agreement), or ceases to provide services to us (or our successor) as a result of an Involuntary Termination (as defined in each agreement) within the two year period following the Change in Control, then the executive would be entitled to a one-time lump sum cash payment equal to a percentage of the executive's anticipated total compensation for the fiscal year in which the Change in Control occurred, plus continued medical benefits for a period of time following such termination.

With respect to each of Messrs. Barry and Harris, our Chief Executive Officer and Chief Operating Officer, respectively, in the event of their termination without Cause or Involuntary Termination within the two year period following the Change in Control, they would each be entitled to a one-time lump sum payment equal to two times their anticipated total compensation for the fiscal year in which the Change in Control occurred, plus continued medical benefits for a period of two years following such termination.

With respect to Ms. Cheung, our Chief Financial Officer, in the event of her termination without Cause or Involuntary Termination within the two year period following the Change in Control, she would be entitled to a one-time lump sum payment equal to one and one-half times her anticipated total compensation for the fiscal year in which the Change in Control occurred, plus continued medical benefits for a period of one and one-half years following such termination.

With respect to our senior vice presidents, in the event of their termination without Cause or Involuntary Termination within the two year period following the Change in Control, they would each be entitled to a one-time lump sum payment equal to one and one-half times the respective executive's anticipated total compensation for the fiscal year in which the Change in Control occurred, plus continued medical benefits for a period of one and one-half years following such termination.

The provision regarding the acceleration of vesting for previously issued stock option grants is consistent with the standard terms and conditions of our 2003 Incentive Stock Option Plan, as amended, which already provides for such accelerated vesting.

For purposes of the separation agreements, (a) "Change in Control" means the consummation of (i) a merger or consolidation of the Company with or into another entity or any other corporate reorganization, if more than 50% of the combined voting power (which voting power shall be calculated by assuming the conversion of all equity securities convertible (immediately or at some future time) into shares entitled to vote, but not assuming the exercise of any warrant or right to subscribe to or purchase those shares) of the continuing or surviving entity's securities outstanding immediately after such merger, consolidation or other reorganization is owned, directly or indirectly, by persons who were not shareholders of the Company immediately prior to such merger, consolidation or other reorganization; provided, however, that in making the determination of ownership by the shareholders of the

Company, immediately after the reorganization, equity securities which persons own immediately before the reorganization as shareholders of another party to the transaction shall be disregarded; or (ii) the sale, transfer or other disposition of all or substantially all of the Company's assets; (b) Termination for "Cause" means termination by reason of: (i) any act or omission knowingly undertaken or omitted by the executive with the intent of causing damage to the Company or its affiliates, its properties, assets or business, or its shareholders, officers, directors or employees, (ii) any act of the executive involving a material personal profit to the executive, including, without limitation, any fraud, misappropriation or embezzlement, involving properties, assets or funds of the Company or any of its subsidiaries, (iii) the Executive's consistent failure to perform his normal duties or any obligation under any provision of this Agreement, in either case, as directed by our Board of Directors, (iv) the conviction of, or pleading nolo contendere to, (A) any crime or offense involving monies or other property of the Company; (B) any felony offense; or (C) any crime of moral turpitude, or (v) the chronic or habitual use or consumption of drugs or alcoholic beverages; and (c) "Involuntary Termination" means the executive's cessation of the provision of services to the Company following (i) a material reduction in the executive's function, authority, duties, or responsibilities, without the executive's express written consent; or (ii) a material reduction in salary.

Index

The purpose of the agreements was to align the interests of each of our executive and senior officers with the interests of the Company. As of the date of this report, there is no agreement, transaction or other contemplated plan related to the change of control of the Company.

Item 6.**Exhibits****Exhibit**

<u>Number</u>	<u>Exhibit Description</u>
10.1	Sample Separation Agreement between Electronic Clearing House, Inc. and Company Executives.
