ITEM 7.01.

Regulation FD Disclosure.

Fleet Status Update

The Company hereby incorporates by reference into this Item 7.01 the Noble Corporation and Subsidiaries Fleet Status Update as of September 29, 2010, which is attached as Exhibit 99.1 hereto and will be published on the Company's website at <http://www.noblecorp.com>. The report provides certain summary information about the operations of the drilling units of the Company. The report is being furnished in accordance with Rule 101 (e) (1) under Regulation FD and shall not be deemed to be filed.

Merger-Related Costs and Effective Tax Rate

Noble's financial results for the quarter ended September 30, 2010 will include costs incurred during the quarter related to the acquisition of FDR Holdings Limited ("Frontier"), which closed on July 28, 2010. Noble expects these merger-related costs, which are not tax-effected, to be \$14 to \$17 million.

In addition, for the third quarter of 2010, we expect our effective tax rate to be approximately 25%. Our tax rate can vary significantly from quarter to quarter, and the tax rate for the third quarter of 2010 will be impacted primarily by the current moratorium on specified types of drilling activities in the U.S. Gulf of Mexico and by our decision to reserve the revenue on the Noble Homer Ferrington contract pending resolution of a dispute with our customer. The determination of our final merger-related costs and our tax rate for the third quarter of 2010 is subject to the finalization and review of our financial results for the quarter.

Statements regarding merger-related costs and tax rates, as well as any other statements that are not historical facts in this filing, are forward-looking statements that involve certain risks, uncertainties and assumptions. These include but are not limited to actions by regulatory authorities or other third parties, market conditions, actions by, and resolution of disputes with, our customers and other third parties, factors affecting the level of activity in the oil and gas industry and our geographical revenue mix, supply and demand of drilling rigs, factors affecting the duration of contracts, the actual amount of downtime, our ability to meet performance bonus criteria, violations of anti-corruption laws, hurricanes and other weather conditions, the future price of oil and gas and other factors detailed in the Company's most recent Form 10-K, Form 10-Q's and other filings with the Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those indicated.
