

PULSE ELECTRONICS CORP
Form 10-K
March 13, 2014

UNITED STATES
SECURITIES & EXCHANGE COMMISSION
Washington, D. C. 20549

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the fiscal year ended December 27, 2013

or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____

Commission File No. 1-5375

PULSE ELECTRONICS CORPORATION
(Exact name of registrant as specified in Charter)

PENNSYLVANIA 23-1292472
(State or other jurisdiction of Incorporation or organization) (IRS Employer Identification Number)

12220 World Trade Drive, San Diego, California 92128
(Address of principal executive offices) (Zip Code)
Registrant's telephone number, including area code: 858-674-8100

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each Exchange on which registered
Common Stock, par value \$0.125 per share	New York Stock Exchange

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.
Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to the filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: PULSE ELECTRONICS CORP - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. x

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer (as defined in Rule 12b-2 of the Act). Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company x

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No x

The aggregate market value of voting stock held by non-affiliates as of June 28, 2013 is \$20,852,000 computed by reference to the closing price on the New York Stock Exchange on such date.

Title of each class	Number of shares outstanding March 12, 2014
Common stock, par value \$0.125 per share	17,217,000

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive proxy statement to be used in connection with the registrant's 2014 Annual Shareholders Meeting are incorporated by reference into Part III of this Form 10-K where indicated.

Cautionary Note Regarding Forward-Looking Statements

Our disclosures and analysis in this report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21A of the Securities Exchange Act of 1934. Forward-looking statements reflect our current expectations of future events or future financial performance. You can identify these statements by the fact that they do not relate strictly to historical or current facts. They often use words such as “anticipate”, “estimate”, “expect”, “project”, “intend”, “plan”, “believe” and other similar terms. These forward-looking statements are based on our current plans and expectations. We intend that all forward-looking statements be subject to the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995.

Any or all of our forward-looking statements in this report may prove to be incorrect. They may be affected by inaccurate assumptions we might make or by risks and uncertainties which are either unknown or not fully known or understood. Accordingly, actual outcomes and results may differ materially from what is expressed or forecasted in this report.

We sometimes provide forecasts of future financial performance and liquidity. The risks and uncertainties described under “Risk Factors” as well as other risks identified from time to time in other Securities and Exchange Commission reports, registration statements and public announcements, among others, should be considered in evaluating our prospects for the future. We undertake no obligation to release updates or revisions to any forward-looking statement, whether as a result of new information, future events or otherwise.

Part I

Item 1 Business

General

We were incorporated in Pennsylvania on April 10, 1947 and are headquartered in San Diego, California. Our mailing address is 12220 World Trade Drive, San Diego, CA 92128-3797, and our telephone number is 858-674-8100. Our website is www.pulseelectronics.com. Information contained on our website is not incorporated into this Annual Report. Our ticker symbol on the New York Stock Exchange is “PULS.”

Pulse Electronics Corporation is a global producer of precision-engineered electronic components and modules. We sometimes refer to Pulse Electronics Corporation as “Pulse Electronics”, “Pulse”, “the Company”, “we” or “our.” Based on our estimates of the total annual revenues in our primary markets and our share of those markets relative to our competitors, we believe we are a leading global producer of electronic components and modules in the primary markets we serve.

We operate our business in three segments: our Network product group (“Network”), our Power product group (“Power”) and our Wireless product group (“Wireless”).

Network

Network produces a variety of passive components that manage and regulate electronic signals for use in a variety of devices used in local area and wide area networks. These products operate by filtering out radio frequency interference, shaping waveforms, splitting signals, suppressing noise, matching impedances and other functions. These passive products are often referred to as connectors, filters, filtered connectors, transformers, splitters, micro-filters, baluns and chokes.

Network's components are characterized by labor intensive manufacturing processes that can be highly customized. Generally, our Network products have relatively short life cycles due to process and cost improvements, which allow us to utilize our design, engineering and production expertise to meet our customers' evolving needs. The markets Network serves have been, and are expected to be, characterized by ongoing product design and manufacturing innovation.

Network generated \$150.6 million, or 42.3% of our revenues, for the year ended December 27, 2013 and \$158.1 million, or 42.4% of our revenues, for the year ended December 28, 2012. Refer to Note 19, Segment and geographical information, to the Consolidated Financial Statements for additional information regarding our segments.

Table of Contents

Power

Power primarily manufactures products that adjust and ensure proper current and voltage, limit distortion of voltage, sense and report current and voltage and cause mechanical movement or actuation. Power's products include power transformers, chokes, current and voltage sensors, ignition coils, automotive coils, military and aerospace products and other power magnetic products.

While some of Power's manufacturing is characterized by labor intensive processes, other portions of the business are highly automated and less variable with product life cycles that change as technology improves. These factors allow us to utilize our design, engineering and production expertise to meet our customer design needs. The markets Power serves have been, and will continue to be, characterized by ongoing product design and manufacturing innovation.

Power generated \$111.5 million, or 31.4 % of our revenues, for the year ended December 27, 2013 and \$120.2 million, or 32.2 % of our revenues, for the year ended December 28, 2012. Refer to Note 19, Segment and geographical information, to the Consolidated Financial Statements for additional information regarding our segments.

Wireless

Wireless manufactures products that primarily capture or transmit wireless communication signals. Specifically, our Wireless segment produces antennas, antenna modules and antenna mounting components that capture and transmit communication signals in handsets, other terminal and portable devices, automobiles and wireless-to-wireline access points.

Our Wireless products are sold in a very dynamic market, which causes the life of an average Wireless product to be very short. Wireless utilizes our expertise in the design, engineering and production of antennas and antenna modules to evolve with our customer needs. We believe that the industries Wireless serves have been, and will continue to be, characterized by ongoing product design and manufacturing innovation. However, the manufacturing of our Wireless products tends to be more automated than Network and many Power products, requiring capital investment and changes in our production process for future innovation.

Wireless generated \$93.6 million, or 26.3% of our revenues, for the year ended December 27, 2013 and \$94.9 million, or 25.4% of our revenues, for the year ended December 28, 2012. Refer to Note 19, Segment and geographical information, to the Consolidated Financial Statements for additional information regarding our segments.

Products

The following table contains a list of some of the key products of our segments:

Primary Products	Function	Application
Network		Network switches, routers, hubs and personal computers
Discrete filter or choke	Separate high and low frequency signals, share incoming and outgoing signals to match industry templates	Phone, fax and alarm systems used with digital subscriber lines or DSL
Filtered connectors, which combines a filter with a connector and stand alone connector products	Remove interference, or noise, from circuitry and connects electronic equipment	Local area networks, or LANs, and wide area networks, or WANs, equipment for personal computers and video game consoles

Inductor/chip inductor	Regulate and control electrical energy in a communication circuit	AC/DC & DC/DC power supplies Mobile phones and portable devices
Balun	Connect lines that are balanced to lines that are unbalanced	Cable television and other networks carrying high frequency signals
Transformer	Transfer electrical energy from one circuit to another and provide an impedance match between circuits	Electronic devices that are connected by a wire including PCs, laptops, game boxes, network switches, telephone equipment and DSL routers.

Table of Contents

Splitter and diplexer	Split communication signals for further processing	Wide Area and telephone networks and cable television systems
Power		
Power transformer	Modify circuit voltage	AC/DC & DC/DC power supplies or, generally, anything that plugs in for power
Signal transformer	Limit distortion of signals as they pass from one medium to another	Analog circuitry, military/aerospace navigation and weapons guidance systems
Automotive ignition coils	Provide power for automotive ignition	Ignition systems for automotive gasoline engines
Other automotive coils	Provide power for a variety of automotive electronic functions. Create or control mechanical movement.	Automotive management systems such as safety, communication, navigation, fuel efficiency and emissions control
Inductor/chip inductor	Regulate and control electrical energy under conditions of varying loads	Point of load conversion for power on various electronic devices, including servers, switches, computers, game boxes and telephone network equipment
Current and voltage sensors	Sense the presence of, amount of or phase of current or voltage	Inverters, smart meters, charging stations, electric grid control, flight power generation, motor control and industrial control
Wireless		
Internal handset antenna and handset antenna modules	Capture and transmit communication signals in mobile handsets, personal digital assistants and notebook computers	Cell phones, other terminal and information devices
Mobile and portable antennas	Capture and transmit non-cellular wireless signals, including blue tooth, GPS, WiFi, RFID, VHF/UHF and DECT	Global positioning systems, automotive antennas, wireless handsets, femtocells, routers, switches, smart meters, mesh networks and machine-to-machine communication
Mounts and cables	Mount an antenna onto mobile or stationary location	Police cars, fire trucks, delivery vehicles, lamp posts, rail cars and other automobiles

Sales, Customers and Distribution

Each of our segments sells products predominantly through our worldwide direct sales forces. Given the highly technical nature of our customers' needs, our direct salespeople typically team up with members of our engineering staff to discuss a sale with a customer's purchasing and engineering personnel. During the sales process, there is close interaction between our engineers and those in our customers' organizations. This interaction extends throughout a product's life cycle, engendering strong customer relationships. Also, we believe that our coordinated sales effort provides a high level of market penetration and efficient coverage of our customers on a cost-effective basis. As of December 27, 2013, we had approximately 52 salespeople in 8 sales offices worldwide.

We sell our products and services to original equipment manufacturers, original design manufacturers and electronic contract equipment manufacturers, which design, build and market end-user products. We refer to these companies as OEMs, ODMs and CEMs, respectively. ODMs typically contract with OEMs to design products, whereas CEMs contract with OEMs to manufacture products. Many OEMs use CEMs primarily or exclusively to build their products. Independent distributors sell components and materials to both OEMs and CEMs. While OEMs are often our design partners, most sales are to CEMs, as OEMs have generally outsourced procurement and manufacturing responsibilities to CEMs. In order to maximize our sales opportunities, our engineering and sales teams maintain close relationships with all outlets, including OEMs, ODMs, CEMs and other independent distributors. We provide support for our multinational customer base with local customer service and design centers in North America, Europe and Asia.

Table of Contents

For the year ended December 27, 2013, one individual customer in our Network segment accounted for 10.8% of our consolidated net sales. In addition, one customer in our Network segment, when aggregated with their CEM suppliers, represents more than 10% of our consolidated net sales. Sales to our 10 largest customers accounted for 49.9% of net sales for the year ended December 27, 2013 and 50.1% of net sales for the year ended December 28, 2012.

A large percentage of our net sales are made outside of the United States. For the years ended December 27, 2013 and December 28, 2012, 86.9% and 87.6% of our net sales were outside of the United States, respectively.

Manufacturing

We have developed custom manufacturing processes intended to maximize production efficiency without sacrificing the quality of our products. Specifically, Network's manufacturing of magnetic components, connectors, chokes and filters is labor intensive and can be highly variable. Our model enables flexibility of production to contain costs during slower periods, which reflects the often unpredictable nature of market demand for our product lines. As the cost of labor increases, we are making investments in automation for this product line. However, our model may also prevent us from increasing production capacity over periods of intense demand in tight labor markets. Conversely, the manufacturing of our antennas and automotive products of our Wireless and Power segments is highly mechanized or, in some cases, automated, which causes costs and profitability related to these products to be sensitive to the volume of production. Our products are primarily manufactured in China where we have four manufacturing plants.

Generally, once our engineers design products to meet the end users' needs and a contract is awarded by, or orders are received from, the customer we begin to mass produce the products. To a much lesser extent, we also service customers that design their own components and outsource production of these components to us. In such case, we build the components to the customer's design. We also maintain a portfolio of catalog parts which our customers can easily design into their own products.

We cannot accurately estimate or forecast the overall utilization of our production capacity at a given time. In each facility, maximum capacity and utilization periodically vary depending on our manufacturing strategies, the product being manufactured, current market conditions, customer demand and other non-specific variables.

Research, Development and Engineering

Our research, development and engineering efforts are focused on the design and development of innovative products in collaboration with our customers or their ODM partners. We work closely with OEMs and ODMs to identify their design and engineering requirements. We have design centers throughout the world in proximity to customers to enable better understanding of our end products and readily satisfy our customers' design and engineering needs. Our product lifecycle management system tracks the level of design activity per customer. This enables us to manage and improve our engineers' processes for designing products, which has created an overall disciplined and orderly design methodology. We typically own the customized designs used to make our products.

Research, development and engineering expenditures were \$22.2 million for the year ended December 27, 2013 and \$24.9 million for the year ended December 28, 2012. In limited circumstances, we generate revenue as a result of providing research, development and engineering services to our customers. However, this revenue is not material to our Consolidated Financial Statements.

Competition

We do not believe that any one company competes with the breadth of our product lines on a global basis. However, each of our segments has strong competition within individual product lines, both domestically and internationally. In

addition, several OEMs internally, or through CEMs, manufacture certain of our product offerings. We pursue opportunities to demonstrate to OEMs that our economies of scale, purchasing power and core competencies in manufacturing enable us to produce better engineered products more efficiently. Increasingly, we compete against manufacturers located in low cost of labor countries, many of which sometimes aggressively seek market share at the detriment of profits.

Competitive factors in the markets for our products include:

- engineering expertise;
- product quality and reliability;
- global design and manufacturing capabilities;
- breadth of product line;
- price;
- customer service; and
- delivery time.

Table of Contents

We believe we are competitive with respect to each of these factors. Product quality and reliability, as well as design and manufacturing capabilities, are enhanced through our continuing commitment to invest in and improve our manufacturing and design resources and, also, our close relationships with our customers' engineers. In addition, the breadth of our segments' product offerings provides customers with the ability to satisfy multiple needs through one supplier. Also, our global presence enables us to deepen our relationships with customers and to better understand and more easily satisfy their needs in local markets. Our ability to purchase raw materials in large quantities reduces our production expenses, maximizes our capacity, continually lowers our manufacturing costs and enables us to price our products competitively.

Employees

As of December 27, 2013, we had approximately 10,000 full-time employees compared to 12,000 at December 28, 2012. We utilize temporary staff to supplement our labor capacity, and we have excluded temporary staff from our full-time employment figures. Approximately 200 full-time employees were located in the United States and 9,700 were located in China. None of our employees were covered by collective-bargaining agreements during the year ended December 27, 2013. Also, we did not experience any major work stoppages during 2013, and we consider relationships with our employees to be in good standing.

Raw Materials

The primary raw materials necessary to manufacture all our segments' products include:

- base metals such as copper;
- ferrite cores;
- plastics and plastic resins; and
- rare earth metals.

Currently, we do not have significant difficulty obtaining any raw materials integral to our manufacturing and do not anticipate that we will face any significant difficulty in the near future. However, some of these materials are produced by a limited number of suppliers. The limited amount of suppliers may restrict our ability to obtain these raw materials in sufficient quantities, at reasonable prices or in a timely manner to meet our customers' demand for our products. A lack of availability or a delay in obtaining any of the raw materials used in our products could adversely affect our manufacturing costs and profit margins. In addition, if the price of our raw materials increases significantly over a short period of time due to increased market demand or shortage of supply, customers may be unwilling to bear the increased price for our products and we may be forced to sell our products containing these materials at lower prices causing a reduction in our profit margins.

Backlog

Our backlog of unfilled orders at December 27, 2013 and December 28, 2012 was approximately \$40.8 million and \$36.1 million, respectively. Orders typically fluctuate from quarter to quarter based on customer demand and general business conditions. Unfilled orders may be canceled prior to shipment of goods. It is expected that all or a substantial portion of the backlog will typically be filled within six months. We do not believe that our backlog is an accurate indicator of near-term business activity because of variability in lead times, capacity, and demand uncertainty on the part of our customers, and, also, the increased use of vendor managed inventory and similar consignment type arrangements, tend to limit the significance of our backlog.

Intellectual Property

We utilize proprietary technology that is often developed and protected by us or, to a much lesser extent, licensed from others. Also, we require each of our employees with access to proprietary technology to enter into confidentiality agreements. We also restrict access to our proprietary information to only those employees essential to our products' creation.

7

Table of Contents

Existing legal protections afford only limited advantage to us. For example, others may independently develop similar or competing products or attempt to copy or use aspects of our products that we regard as proprietary. Furthermore, intellectual property law in certain areas of the world may not fully protect our products or technology from such actions. While our intellectual property is important to us in the aggregate, we do not believe any individual patent, trademark or license is material to our business or operations.

Environmental

Our manufacturing operations are subject to a variety of local, state, federal and international environmental laws and regulations governing air emissions, wastewater discharges, the storage, use, handling, disposal and remediation of hazardous substances and, also, employee health and safety. It is our policy to meet or exceed the environmental standards set by these laws. Through planning and continual process improvements, we strive to protect and preserve the environment by preventing pollution and reducing the consumption of natural resources and materials. However, in the normal course of business, environmental issues may arise. We may incur increased costs associated with environmental compliance and cleanup projects necessitated by the identification of new environmental issues or new environmental laws and regulations.

Available Information

We make available free of charge on our website, www.pulseelectronics.com, all materials that we file electronically with the Securities and Exchange Commission ("SEC"), including our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports and all Board and Committee charters, as soon as reasonably practicable after we electronically file or furnish such materials to the SEC.

Table of Contents

Item 1a Risk Factors

You should carefully consider the following risks and any of the other information set forth in this Annual Report on Form 10-K and in the documents incorporated herein by reference, before deciding to invest in shares of our common stock. The risks described below are not the only ones that we face. Additional risks that are not presently known to us or that we currently deem immaterial may also impair our business operations. The following risks, among others, could cause our actual results, performance, achievements or industry results to differ materially from those expressed in our forward-looking statements contained herein and presented elsewhere by management from time to time. If any of the following risks actually occurs, our business prospects, financial condition or results of operations could be materially harmed and the market price of our common stock would likely decline due to the occurrence of any of these risks.

Cyclical changes in the markets we serve could result in a significant decrease in demand for our products, which may reduce our profitability and/or our cash flow.

Our components are used in various products sold in the electronics market. Generally, these markets are cyclical based on the end consumers' demand, so interest in our components also reflects the overall demand for products in the electronics market. A contraction in the electronics market would result in a decrease in sales of our products, as our customers:

- may cancel existing orders;
- may introduce fewer new products;
 - may discontinue current product lines; and
- may decrease their inventory levels.

A decrease in demand for our products could have a significant adverse effect on our operating results, profitability and cash flows, which may adversely affect our liquidity, our ability to retire debt or our ability to comply with debt covenants. Accordingly, we may experience volatility in our revenues, profits and cash flows.

Our debt levels could adversely affect our financial position, our liquidity and the perception of our financial condition in the financial markets.

We have a significant amount of indebtedness. As of March 2014, we had aggregate indebtedness, excluding debt discounts, of approximately \$134.2 million with interest rates on our Term A and B Loans of 12.0% and 10.0%, respectively. Our high level of debt could have important consequences, including:

- limiting our ability to obtain additional financing to fund future working capital, capital expenditures, acquisitions or other general corporate requirements;
- requiring a substantial portion of our cash flow to be dedicated to debt service payments instead of other purposes, thereby reducing the amount of cash flow available for working capital, capital expenditures, acquisitions and other general corporate purposes;
- increasing our vulnerability to adverse changes in general economic, industry and competitive conditions;
- limiting our flexibility in planning for and reacting to changes in the industry in which we compete;
- placing us at a disadvantage compared to other, less leveraged competitors or competitors with comparable debt at more favorable interest rates; and
- increasing our costs of borrowing.

The terms of our debt restrict our current and future operations, particularly our ability to respond to changes or to take certain actions.

Covenants with our lenders require compliance with specific financial ratios that may make it difficult for us to obtain additional financing on acceptable terms for future acquisitions or other corporate needs. In the fourth quarter of 2012, we did not meet certain of these financial covenants. Oaktree Capital Management L.P. and affiliates (collectively, "Oaktree") agreed to forbear from taking any action, including acceleration of payment of the term loans, if we fail to satisfy these covenants in the fourth quarter of 2012 and in 2013 in a forbearance and commitment letter dated March 11, 2013. Oaktree agreed to a forbearance with respect to the Secured Leverage Ratio, calculated as the ratio of consolidated secured debt, which includes the Oaktree term loans, and our rolling four quarters' EBITDA, and the Total Net Debt Leverage Ratio, calculated as the ratio of (a) the sum of consolidated debt, which includes the Oaktree term loans and senior convertible notes, less unrestricted cash (as defined) and (b) our rolling four quarters' EBITDA. On February 21, 2014, we entered into an amendment to the credit agreement, which provides some relief from our financial covenants with respect to the Secured Leverage Ratio, Total Net Debt Leverage Ratio and Minimum Liquidity covenants. Furthermore, for periods after December 27, 2013, the amended credit agreement will relieve us from having to comply with the covenant that previously required us not to permit the Total Net Debt Leverage Ratio to exceed certain specified ratios.

9

Table of Contents

Although we anticipate meeting our covenants in the future, our ability to remain in compliance with the covenants may be adversely affected by future events potentially beyond our control. Violating any of these covenants could result in being declared in default, which may result in our lenders electing to declare our outstanding borrowings immediately due and payable and terminate all commitments to extend further credit. If the lenders accelerate the repayment of borrowings, we cannot provide assurance that we will have sufficient liquidity to repay our credit facilities or other indebtedness. In addition, certain domestic and international subsidiaries have pledged the shares of certain subsidiaries, as well as accounts receivable, inventory, machinery and equipment, intellectual property and other assets as collateral. If we default on our obligations, our lenders may take possession of the collateral and may license, sell or otherwise dispose of those related assets in order to satisfy our obligations. Refer to Note 6, Debt, to our Consolidated Financial Statements for additional discussion of our debt covenants.

Our primary lender and majority stockholder, Oaktree, may have interests that diverge from our interests and the interests of other security holders.

Oaktree is our primary creditor and beneficially owns a majority of our common stock. Oaktree may have interests that diverge from our interests and the interests of other security holders. In addition, so long as Oaktree maintains ownership at specified thresholds, it has the right to nominate a majority of our board of directors and will be entitled to certain information rights and a right to participate in future offerings of our equity securities. Oaktree is in the business of investing in companies and is not restricted by contract from investing in our current or future competitors. Future events may give rise to a divergence of interests between Oaktree and us or our other security holders that would have a material adverse effect on our Company. Oaktree's ownership and control may also have the effect of delaying or preventing a change of control, impeding a merger, consolidation, takeover or other business combination or discourage a potential acquirer from making a tender offer. Oaktree's ownership and control may also limit our ability to issue stock, incur further debt, or dispose of any material assets of the Company or its subsidiaries.

Oaktree and affiliates can exercise significant control over the Company.

Oaktree beneficially owns a majority equity position in us. As a result, as long as Oaktree maintains ownership at specified thresholds, it has the right to nominate a majority of our board of directors, and therefore, has the ability to exert actual control over our management policies and affairs, the outcome of matters submitted to our stockholders, including amendments to the our organizational documents, any proposed merger or other business combination, our financing, consolidation or sale of all or substantially all of our assets and other corporate transactions. In addition, Oaktree is entitled to certain information rights and a right to participate in future offerings of our equity securities. This concentration of ownership may also delay or prevent a change of control, impede a merger, consolidation, takeover or other business combination or discourage a potential acquirer from making a tender offer. Oaktree's ownership and control may also limit our ability to issue stock, incur further debt, or dispose of any material assets of the Company or its subsidiaries.

We are a "controlled company" within the meaning of the NYSE Listed Company Manual and, as a result, qualify for exemptions from certain corporate governance standards, which may limit the presence of independent directors on our board of directors or board committees.

Oaktree beneficially owns a majority equity position in the Company. Accordingly, it has the ability to elect our board of directors and thereby control our management and affairs. Therefore, we are a "controlled company" for purposes of Section 303(A) of the NYSE Listed Company Manual.

Under these rules, a company of which more than 50% of the voting power is held by an individual, a group or another company is a "controlled company" and is exempt from certain corporate governance requirements, including requirements that (1) a majority of the board of directors consist of independent directors, (2) compensation of officers be determined or recommended to the board of directors by a majority of its independent directors or by a

compensation committee that is composed entirely of independent directors and (3) director nominees be selected or recommended for selection by a majority of the independent directors or by a nominating committee composed solely of independent directors. We currently do not rely on any of these exemptions, but we cannot provide any assurance that we will not utilize one or more of these exemptions in the future.

Table of Contents

Reduced prices for our products may adversely affect our profit margins if we are unable to reduce our cost structure.

The average selling prices for our products tend to decrease over their life cycle. In addition, foreign currency movements and the desire to retain market share increase the pressure on our customers to seek lower prices from their suppliers. As a result, our customers are likely to continue to demand lower prices from us. To maintain our margins and remain profitable, we must continue to meet our customers' design needs while concurrently reducing costs through efficient raw material procurement, process and product improvements and reducing our operating expense levels. Our profit margins and cash flows may suffer if we are unable to reduce our overall cost structure relative to decreases in sales prices.

Rising raw material and production costs may decrease our gross margin.

We use commodities such as copper and plastic resins in manufacturing our products. Prices of these and other raw materials have experienced significant volatility in the past. Other manufacturing costs, such as direct and indirect labor, energy, freight and packaging costs, also directly impact the costs of our products. If we are unable to pass these increased costs to our customers or recover the increased costs through production efficiencies, our gross margins may suffer.

An inability to adequately respond to changes in technology, applicable standards or customer needs may decrease our sales.

We operate in an industry characterized by rapid change caused by the frequent emergence of new technologies and standards. Generally, we expect life cycles for products in the electronic components industry to be relatively short. This requires us to anticipate and respond rapidly to changes in industry standards and customer needs, and, also, to develop and introduce new and enhanced products on a timely and cost-effective basis. Our engineering and development teams place a priority on working closely with our customers to design innovative products and to improve our manufacturing processes. Improving performance and reducing costs for our customers requires the continual development of new products and/or improvement to the components of existing products. Our inability to react quickly and efficiently to changes in technology, standards or customer needs may decrease our sales or margins.

If our inventory becomes obsolete, it may adversely affect our future performance and operating results.

The life cycles of our products depend heavily upon the life cycles of the end products for which our products are designed. End products with short life cycles require us to closely manage our production and inventory levels, as adverse changes in end market demand may make our products obsolete. Specifically, during market slowdowns, this may result in significant charges for inventory write-offs. Our future operating results may be adversely affected by material levels of inventory reserves for obsolete or excess inventory.

Our decisions to strategically divest current businesses or our inability to capitalize on prior or future acquisitions may adversely affect our business.

We have completed numerous acquisitions and divestitures in the past and we may continue to seek acquisitions to grow our businesses. We may also divest operations to focus on our core businesses. We may fail to derive significant benefits from such transactions. Also, if we fail to achieve sufficient financial performance from an acquisition, certain long-lived assets, such as property, plant and equipment and intangible assets, could become impaired and result in the recognition of an impairment loss.

The success of our acquisitions depends on our ability to:

- successfully execute the integration or consolidation of the acquired operations into our existing businesses;
- develop or modify the financial reporting and information systems of the acquired entity to ensure overall financial integrity and adequacy of internal control procedures;
- identify and take advantage of cost reduction opportunities; and
- further penetrate existing markets with the product capabilities we may acquire.

Integration of acquisitions may take longer than we expect and may never be achieved to the extent originally anticipated. This could result in lower than expected business growth or higher than anticipated costs. In addition, acquisitions may:

Table of Contents

- cause a disruption in our ongoing business;
- distract our managers;
- increase our debt and leverage;
- unduly burden other resources in our company; and
- result in an inability to maintain our historical standards, procedures and controls, which may result in non-compliance with external laws and regulations or contractual requirements.

Alternatively, we may also consider making strategic divestitures, which may also:

- cause a disruption in our ongoing business;
- distract our managers;
- unduly burden other resources in our company; and
- result in an inability to maintain our historical standards, procedures and controls, which may result in non-compliance with external laws and regulations or contractual requirements.

We may record impairment losses in the future. We assess the impairment of long-lived assets whenever events or changes in circumstances indicate an asset's carrying value may not be recoverable. Factors we consider important that could trigger an impairment review include significant changes in the use of any asset, changes in trends of historical operating performance, a significant decline in the price of our common stock, changes in projected operating performance and significant negative economic trends.

An inability to identify, consummate or integrate acquisitions or a lack of appropriate investment in capital expenditure and research, development and engineering may slow our future growth.

We may identify and possibly consummate acquisitions in the future to penetrate or expand important markets and to grow our business. We may not be able to identify suitable acquisition candidates at reasonable prices. Even if we identify promising acquisition candidates, the timing, price, structure and success of future acquisitions are uncertain. An inability to consummate or integrate attractive acquisitions may reduce our growth rate and our ability to penetrate new markets.

We remain committed to technological development through investing in research, development and engineering activities focused on designing next-generation products, improving our existing products and improving our manufacturing processes. If we determine that any of our manufacturing processes would benefit from capital investment, we may allocate resources to fund the expansion of property, plant and equipment used in these processes. An inability to allocate resources to the appropriate investment or an inability to allocate the appropriate amount of resources to an investment may reduce our ability to grow organically.

If any of our major customers terminates a substantial amount of existing agreements, chooses not to enter into new agreements or elects not to submit additional purchase orders for our products, then our business may suffer.

Our sales are predominantly made on a purchase order basis. We have a concentration of several primary customers that we rely on for a material amount of these purchase orders. To the extent we have agreements in place with these customers, most of these agreements are either short-term in nature or provide these customers with the ability to terminate the arrangement. Such agreements typically do not provide us with any material recourse in the event of non-renewal or early termination.

We will lose business and our revenues may decrease if one or more of these major customers:

- does not submit additional purchase orders;
- does not enter into new agreements with us;

elects to reduce or delay their purchase orders; or
elects to terminate their relationship with us.

If we do not effectively manage our business when facing fluctuations in the size of our organization, then our business may be disrupted.

We have changed our capacity as a result of declines in global demand and through divestitures. We may significantly reduce or expand our workforce and facilities in response to rapid changes in demand for our products due to prevailing global market conditions. These rapid fluctuations place strains on our resources and systems. If we do not effectively manage our resources and systems, our business may be adversely affected.

12

Table of Contents

Uncertainty in demand for our products may adversely affect our results of operations and financial condition.

We have very little visibility into our customers' future purchasing patterns and are highly dependent on customer forecasts. However, these forecasts are non-binding and can often significantly change. Given the fluctuation in growth rates and the occasional cyclical nature of demand for our products, as well as our reliance on our customers' forecasts, it is difficult to accurately manage our production schedule, equipment and personnel needs, as well as our raw material and working capital requirements.

Our failure to effectively manage these issues may result in:

- production delays;
- increased costs of production;
- excessive inventory levels and reduced financial liquidity;
- an inability to make timely deliveries; and
- a decrease in profits or cash flows.

A decrease in the availability of our key raw materials could adversely affect our profit margins.

We use several types of raw materials in the manufacturing of our products, including:

- base metals such as copper;
- ferrite cores;
- plastics and plastic resins; and
- rare earth metals.

Some of these materials are only produced by a limited number of suppliers. The limited amount of suppliers may restrict our ability to obtain these raw materials in sufficient quantities, at reasonable prices or in a timely manner to meet customer demand for our products. A lack of availability or a delay in obtaining any of the raw materials used in our products could adversely affect our manufacturing costs and profit margins. In addition, if the price of our raw materials increases significantly over a short period of time due to increased market demand or shortage of supply, customers may be unwilling to bear the increased price for our products and we may be forced to sell our products containing these materials at lower prices causing a reduction in our profit margins.

Our operating results may be adversely affected by new regulations relating to the sourcing of certain raw materials.

The products we manufacture utilize materials that are impacted by the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") requirement for disclosure of the use of "conflict minerals" mined in the Democratic Republic of the Congo and adjoining countries.

We are in the process of determining the country of origin of certain metals that we purchase from our suppliers, as required by the Dodd-Frank Act. Under regulations promulgated pursuant to that Act, we will be required to submit a report regarding our usage of conflict minerals in May 2014. The supply chain due diligence and verification of sources is complex and requires substantial effort to arrive at a substantive conclusion. We are in the process of aggregating and assessing preliminary responses from our vendors. We may conclude that our full compliance is undeterminable for our 2014 declaration as we continue to finalize the required due diligence processes. If after conducting supply chain due diligence and verification of sources, we conclude that we are required to make changes to our supply chain, we may not be able to obtain such minerals at acceptable prices and there may be additional costs associated with complying with the Dodd-Frank Act. We may also encounter challenges to satisfy customers who require that all of the components in our products are certified as conflict free. If we are unable to meet customer requirements, customers may choose to disqualify us as a supplier.

Competition may result in reduced demand for our products and reduce our sales.

We operate in a highly competitive worldwide industry, with relatively low barriers to competitive entry. We frequently encounter strong competition within individual product lines from various competitors throughout the world, some of which are larger than us and have significantly greater financial resources and technological capabilities. We compete principally on the basis of:

- engineering expertise;
- product quality and reliability;

13

Table of Contents

global design and manufacturing capabilities;
breadth of product line;
price;
customer service; and
delivery time.

Our inability to successfully compete on any or all of the above or other factors may result in reduced sales.

Products we manufacture may contain design or manufacturing defects that could result in reduced demand for our products or services and liability claims against us.

Despite our quality control and quality assurance efforts, defects may occur in the products we manufacture due to design or manufacturing errors or component failure. Product defects may result in delayed shipments and reduced demand for our products. We may be subject to increased costs due to warranty claims on defective products. We may be required to participate in a recall involving products which are, or are alleged to be, defective. We carry insurance for certain legal matters involving product liability; however, we do not have coverage for all costs related to product defects and the costs of such claims, including costs of defense and settlement, may exceed our available coverage.

Fluctuations in foreign currency exchange rates may adversely affect our operating results.

We manufacture and sell our products in various regions of the world and export and import these products to and from a large number of countries. Fluctuations in exchange rates could negatively impact our cost of production and sales which, in turn, could decrease our operating results and cash flow. In addition, if the functional currency of our manufacturing costs strengthens as compared to the functional currency of our competitors' manufacturing costs, our products may become more costly than our competitors.

Our international operations subject us to the risks of unfavorable political, regulatory, labor and tax conditions in other countries.

We manufacture and assemble most of our products in locations outside the United States, primarily in the People's Republic of China ("PRC" or China), and a majority of our revenues are derived from sales to customers outside the United States. Our future operations and earnings may be adversely affected by the risks related to, or any other problems arising from, operating in international locations and markets.

Risks inherent in doing business internationally may include:

the inability to repatriate or transfer cash on a timely or efficient basis;
economic and political instability;
expropriation and nationalization;
trade restrictions;
capital and exchange control programs;
transportation delays;
uncertain rules of law; and
uncertain changes in the laws and policies of the United States or of the countries in which we manufacture and sell our products.

The majority of our manufacturing occurs in the PRC. Although the PRC has a large and growing economy, its political, legal and labor developments entail uncertainties and risks. For example, the availability of labor is highly seasonal and is significantly affected by the migration of workers in relation to the annual Lunar New Year holiday as well as economic conditions in the PRC. At certain times in the past we have encountered difficulties in attracting and

retaining the level of labor required to meet our customers' demands. Also, wages and benefits have been increasing rapidly over the last several years in China. While China has been receptive to foreign investment, its investment policies may not continue indefinitely into the future and future policy changes may adversely affect our ability to conduct our operations in these countries or the costs of such operations.

We have benefited in prior years from favorable tax incentives and we operate in countries where we realize favorable income tax treatment relative to the U.S. statutory rate. We have been granted special tax incentives, including tax holidays, in jurisdictions such as the PRC. This favorable situation could change if these countries were to increase rates or discontinue the special tax incentives, or if we discontinue our manufacturing operations in any of these countries and do not replace them with operations in locations with similar tax incentives or policies. Accordingly, in the event of changes in laws and regulations affecting our international operations, we may not be able to continue to recognize or take advantage of similar benefits in the future.

14

Table of Contents

We could be adversely affected by violations of the U.S. Foreign Corrupt Practices Act and similar worldwide anti-bribery laws.

The U.S. Foreign Corrupt Practices Act ("FCPA") and similar worldwide anti-bribery laws generally prohibit companies and their intermediaries from making improper payments to government officials for the purpose of obtaining or retaining business. Our policies mandate compliance with these anti-bribery laws. We operate in many parts of the world that have experienced governmental corruption to some degree, and in certain circumstances, strict compliance with anti-bribery laws may conflict with local customs and practices. Despite our training and compliance program, we cannot assure you that our internal control policies and procedures always will protect us from reckless or criminal acts committed by our employees or agents. Violations of these laws, or allegations of such violations, could disrupt our business and result in a material adverse effect on our results of operations, financial position, and cash flows.

Liquidity requirements could necessitate movements of existing cash balances, which may be subject to restrictions or may cause unfavorable tax and earnings consequences.

A significant portion of our cash is held offshore by international subsidiaries and may be denominated in currencies other than the U.S. dollar. While we intend to use a significant amount of the cash held overseas to fund our international operations and growth, if we encounter a significant need for liquidity domestically or at a particular location that we cannot fulfill through borrowings, equity offerings, or other internal or external sources, we may experience unfavorable tax and earnings consequences due to necessary cash transfers. For example, these adverse consequences would occur if the transfer of cash into the United States is taxed with no available foreign tax credit to offset the U.S. tax liability, resulting in lower net earnings. Also, we may be prohibited or significantly delayed when transferring cash from a country such as the PRC, as there are foreign exchange ceilings imposed by local governments and often lengthy approval processes, which foreign governments require for international cash transfers. We have not experienced any significant liquidity restrictions in any of the countries in which we operate and we do not presently foresee any.

At December 27, 2013, the Company's majority owned foreign subsidiary located in Taiwan and its subsidiaries held approximately \$12.7 million of our total consolidated cash and cash equivalents. Permanent access to funds from this subsidiary could be in the form of a dividend to its shareholders, which could result in income withholding taxes and distributions to minority shareholders. During fiscal 2012, this majority owned subsidiary declared a dividend of approximately \$7.0 million, which was paid in November 2012. Distributions to minority shareholders, withholding and other taxes reduced the net proceeds of the dividend to the Company to approximately \$4.8 million. Access to this subsidiary's cash in the future could be subject to similar offsets.

Losing the services of our executive officers or other highly qualified and experienced employees could adversely affect our businesses.

Our success depends upon the contributions of our executive officers and senior management, many of whom have numerous years of experience and would be extremely difficult to replace. We must also attract and maintain experienced and highly skilled engineering, sales and marketing, finance and manufacturing personnel. Competition for qualified personnel is often intense, and we may not be successful in hiring and retaining these people. If we lose the services of these key employees or cannot attract and retain other qualified personnel, our businesses could be adversely affected.

We face risks arising from the restructuring of our operations.

In the past, we have undertaken initiatives to restructure our business operations with the intention of improving utilization and realizing cost savings in the future. These initiatives have included changing the number and location

of our production facilities, largely to align our capacity and infrastructure with current and anticipated customer demand. This alignment includes transferring programs from higher cost geographies to lower cost geographies. The process of restructuring entails, among other activities, moving production between facilities, closing facilities, reducing the level of staff, realigning our business processes and reorganizing our management.

15

Table of Contents

We continuously evaluate our operations and cost structure relative to general economic conditions, market demands, tax rates, cost competitiveness and our geographic footprint as it relates to our customers' production requirements. As a result of this ongoing evaluation, we could initiate future restructuring plans. Restructurings present significant potential risks of events occurring that could adversely affect us, including a decrease in employee morale, delays encountered in finalizing the scope of, and implementing, the restructurings (including extensive consultations concerning potential workforce reductions, particularly in locations outside of the U.S.), the failure to achieve targeted cost savings and the failure to meet operational targets and customer requirements due to the loss of employees and any work stoppages that might occur. These risks are further complicated by our extensive international operations, which subject us to different legal and regulatory requirements that govern the extent and speed of our ability to reduce our manufacturing capacity and workforce. In addition, the current global economic conditions may change how governments regulate restructuring as the recent global recession has impacted local economies. Finally, we may have to obtain agreements from our affected customers for the relocation of our facilities in certain instances. Obtaining these agreements, along with the volatility in our customers' demand, can further delay restructuring activities.

Public health epidemics (such as flu strains or severe acute respiratory syndrome) or natural disasters (such as earthquakes or fires) may disrupt operations in affected regions and affect operating results.

We maintain extensive manufacturing operations in the PRC and elsewhere, similar to many of our customers and suppliers. A sustained interruption of our manufacturing operations or those of our customers or suppliers, resulting from complications caused by a public health epidemic or a natural disaster could have a material adverse effect on our business and our results of operations.

The unavailability of insurance against certain business and product liability risks may adversely affect our future operating results.

As part of our comprehensive risk management program, we purchase insurance coverage against certain business and product liability risks. However, not all risks are insurable and those that are insured may differ in the amount covered due to the type of risk, end market and customer location. If any of our insurance carriers discontinues an insurance policy, significantly reduces available coverage or increases our deductibles and we cannot find another insurance carrier to provide comparable coverage at similar costs or we are not fully insured for a particular risk in a particular place, then we may be subject to increased costs of uninsured or under-insured losses, which may adversely affect our operating results.

Also, our components, modules and other products are used in a broad array of representative end products. If our insurance program does not adequately cover liabilities arising from the direct use of our products or liabilities that arise from use of our customers' products, we may be subject to increased costs of uninsured losses, which may adversely affect our operating results.

Environmental liability and compliance obligations may adversely affect our operations and results.

Our manufacturing operations are subject to a variety of environmental laws and regulations, as well as internal programs and policies governing:

- air emissions;
- wastewater discharges;
- the storage, use, handling, disposal and remediation of hazardous substances, wastes and chemicals; and
- employee health and safety.

If violations of environmental laws occur, we could be held liable for damages, penalties, fines and remedial actions for contamination discovered at our present or former facilities. Our operations and results could be adversely affected by any material obligations arising from existing laws or new regulations that may be enacted in the future. We may also be held liable for past disposal of hazardous substances generated by our business or businesses we acquire.

Security breaches and other disruptions could compromise our information and expose us to liability, which would cause our business and reputation to suffer.

We collect and store sensitive data, including intellectual property, our proprietary business information and that of our customers, suppliers and business partners, and personally identifiable information of our customers and employees, in our data centers and on our networks. The secure maintenance and transmission of this information is critical to our operations and business strategy. Despite our security measures, our information technology and infrastructure may be vulnerable to attacks by hackers or breached due to employee error, malfeasance or other disruptions. Any such breach could compromise our networks and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could result in legal claims or proceedings, and damage our reputation, and cause a loss of confidence in our products, which could adversely affect our business, revenues and competitive position.

16

Table of Contents

Our stock price has been and may continue to be volatile.

We believe that the following factors, among others, may have had and may continue to have a significant negative impact on the market price and volatility of our common stock:

- the notice of non-compliance with listing standards we received from the New York Stock Exchange that we previously announced;
- the amount, terms, and timing of our debt obligations;
- developments regarding our ability to raise additional capital;
- soft market demand conditions in certain primary markets;
- economic and other external factors;
- actual or anticipated period-to-period fluctuations in our financial results;
- variations in our operating performance and the performance of our competitors;
 - publication of research reports by securities analysts about us or our competitors or our industry;
- strategic decisions by us or our competitors, such as acquisitions, divestitures, spin-offs, joint ventures, strategic investments or changes in business strategy;
- the passage of legislation or other regulatory developments affecting us or our industry;
- speculation in the press or investment community;
- changes in accounting principles;
- terrorist acts, acts of war or periods of widespread civil unrest; and
- natural disasters and other calamities.

Disruptions or volatility in global financial markets could limit our sources of liquidity, or the liquidity of our customers, dealers and suppliers.

Global economic conditions may cause volatility and disruptions in the capital and credit markets. Since the global economic downturn in 2008, liquidity, credit and credit capacity for certain issuers, including certain of our customers, dealers and suppliers has been restricted. Changes in global economic conditions, including material cost increases and decreases in economic activity in the markets that we serve, and the success of plans to manage cost increases, inventory and other important elements of our business may significantly impact our ability to generate funds from operations. Market volatility, changes in counterparty credit risk, the impact of government intervention in financial markets and general economic conditions may also adversely impact our ability to access capital and credit markets to fund operating needs. An inability to access capital and credit markets may have an adverse effect on our business, results of operations, financial condition and competitive position.

In addition, the global demand for our products generally depends on customers' ability to pay for our products, which, in turn, depends on their access to funds. Subject to global economic conditions, customers may experience increased difficulty in generating funds from operations. Further, following capital and credit market volatility and uncertainty, many financial institutions have revised their lending standards, thereby decreasing access to capital. If capital and credit market volatility occurs, customers' liquidity may decline which, in turn, would reduce their ability to purchase our products.

Further issuances of our common stock will be dilutive.

The market price of our common stock could decline due to the issuance or sale of a large number of shares in the market, including the issuance of shares underlying our remaining convertible notes and warrants to purchase common stock issued in March 2012.

To the extent we issue or sell additional shares of common stock to third parties, we may be required to issue additional shares of common stock to Oaktree under a top-up option in the Investment Agreement. The top-up option provides that Oaktree will have the option to purchase a number of additional shares of common stock to retain its ownership percentage in the Company. As of February 21, 2014, its ownership percentage is 69.8% of our outstanding common stock (which reflects Oaktree's beneficial ownership of 65,855 warrants to purchase our common stock).

Potential share issuances may have a dilutive effect on our common stock and could also make it more difficult or impossible for us to sell equity securities in the future at a time and price that we deem appropriate to raise funds through future offerings of common stock.

17

Table of Contents

Our intellectual property rights may not be adequately protected or third parties may claim we have violated their intellectual property rights.

We may not be successful in protecting our intellectual property through patent laws, other regulations or by contract. As a result, other companies may be able to develop and market similar products, which could materially and adversely affect our market share and results of operations.

Also, from time to time, we may receive claims asserting that our products, processes or technologies infringe the patents or other proprietary rights of third parties. For example, in May 2013, a Federal Court entered a judgment in favor of Halo Electronics, Inc. in its patent infringement suit against us, which we have appealed. The Court imposed a permanent injunction halting the U.S. sale of certain surface mount transformers; however, the Court subsequently issued an emergency stay suspending the injunction through October 15, 2013. Although we do not believe the injunction will have a material adverse impact on our relationship with customers and the sales of our products, particularly in light of the stay and the fact that we have developed new products that we believe will not be determined to infringe third party rights, there can be no assurance that such products will be qualified by, and acceptable to, our customers or that such replacements will not infringe the patents or other proprietary rights of third parties.

Any intellectual property claims, with or without merit, could be time consuming, expensive to litigate or settle and could divert management's attention from administering our business. Third party infringement claims against us or our customers with respect to our current or future products could result in the overall loss of the right to use technology important to our business, could compel us to enter into costly royalty arrangements, and could cause harm to our reputation and the reputation of our customers. Any of the foregoing could have a material and adverse effect on our business and results of operations.

If we do not meet the New York Stock Exchange continued listing requirements, our common stock may be delisted.

On September 27, 2012, the New York Stock Exchange (the "NYSE" or the "Exchange") notified us that we had fallen below the NYSE's continued listing standard for average market capitalization because we failed to maintain an average market capitalization over a consecutive 30-day trading period of at least \$50.0 million and that we must achieve such an average market capitalization over a consecutive 30-day trading period on or before March 27, 2014, or be subject to delisting. The market capitalization requirements provide that the NYSE will promptly initiate suspension and delisting procedures with respect to our common stock if our global market capitalization for 30 consecutive trading days is less than \$15.0 million, in which case we would not be eligible to utilize the cure procedures provided by the NYSE in other circumstances. On November 12, 2012, we submitted a plan for remediation of the deficiency related to the market capitalization and stockholders' equity requirements to the NYSE, which they accepted on January 3, 2013. We are required to provide the Exchange staff with updates in connection with the initiatives of the plan of compliance at least quarterly or upon the Exchange's request and the Exchange staff will review us periodically for compliance with the plan during the extension periods. Failure to make progress consistent with the plan of compliance or to regain compliance with the continued listing standards by the end of the applicable extension periods could result in our common stock being delisted from the Exchange. There can be no assurance that we will be able to make progress consistent with its plan to regain compliance with the Exchange's continued listing standards in a timely manner, or at all.

We face the risk that the average market capitalization may not rise to a level necessary to satisfy the NYSE requirements. Furthermore, even if we regain compliance with the continuing listing standards of the NYSE, we cannot provide assurance that we will continue to list on the NYSE or any other exchange as a public company.

A delisting of our common stock and/or a termination of our public reporting obligations is likely to reduce the liquidity and value of our common stock and may inhibit or preclude our ability to raise additional financing and may

also materially and adversely impact our credit terms with our vendors.

18

Table of Contents

We may incur additional tax expense or become subject to additional tax exposure.

We are subject to income taxes in the United States and numerous foreign jurisdictions, and our domestic and international tax liabilities are dependent upon the distribution of income among these different jurisdictions. Our provision for income taxes and cash tax liability in the future could be adversely affected by numerous factors, including income before taxes being lower than anticipated in countries with lower statutory tax rates and higher than anticipated in countries with higher statutory tax rates, changes in the valuation of deferred tax assets and liabilities and changes in tax laws and regulations. We are also subject to the continuous examination of our income tax returns by the U.S. Internal Revenue Service and other tax authorities. The results of audits and examinations of previously filed tax returns and continuing assessments of our tax exposures may have an adverse effect on the Company's provision for income taxes and cash tax liability.

Item 1b Unresolved Staff Comments

None.

Item 2 Properties

During the year ended December 27, 2013 our corporate headquarters was located in San Diego, California, where we own approximately 50,000 square feet of office space. We operated six manufacturing plants in the U.S. and PRC as of December 27, 2013. We seek to maintain facilities in those regions where we market and sell our products in order to maintain a local presence with our customers.

The following is a list of the principal manufacturing locations as of December 27, 2013:

Location	Approx. Square Ft.	Owned/Leased	Approx. Percentage Used For Manufacturing	
Dongguan, PRC	50,000	Leased	100	%
Mianyang, PRC	410,000	Leased	83	%
Suzhou, PRC	117,000	Leased	100	%
Suining, PRC	136,000	Leased	95	%
Vancouver, Washington	30,000	Leased	60	%
Bristol, Pennsylvania	20,000	Leased	60	%
Total	763,000			

In addition to these manufacturing locations, we have 146,000 square feet of space used for engineering, sales and administrative support functions at various locations in the U.S. and globally. We lease approximately 227,000 square feet of space for dormitories, canteens and other employee-related facilities in the PRC.

Item 3 Legal Proceedings

The information called for by this Item is incorporated herein by reference to Note 10, Commitments and contingencies, to the accompanying Consolidated Financial Statements.

Item 4 Mine Safety Disclosures

Part II

Item 5 Market for Registrant's Common Equity, Related Stockholder Matters, and Issuer Purchases of Equity Securities

Market Information

Our common stock is traded on the New York Stock Exchange under the ticker symbol "PULS." The following table sets forth the high and low closing sales prices in each quarter of the last two years. All share prices have been adjusted to reflect the 1-for-10 reverse stock split effected in May 2013.

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2013 High	\$ 4.80	\$ 4.00	\$ 6.05	\$ 4.08
2013 Low	\$ 2.80	\$ 2.62	\$ 2.60	\$ 2.73
2012 High	\$ 31.50	\$ 25.10	\$ 21.30	\$ 7.40
2012 Low	\$ 23.60	\$ 17.90	\$ 6.80	\$ 2.80

Holders

On December 27, 2013, there were approximately 226 registered holders of our common stock, which has a par value of \$0.125 per share. During 2013, our shareholders approved an amendment to our Articles of Incorporation increasing the number of shares of our outstanding common stock to 31,000,000 from 17,500,000. Additionally, the amendment permitted 2,000 shares of newly-authorized Series A Preferred Stock. For additional information, refer to Item 7, Liquidity and Capital Resources.

Dividends

No cash dividends were declared or paid during the fiscal years ended December 27, 2013 and December 28, 2012. Our agreements with Oaktree prohibit us from paying dividends to our shareholders. Accordingly, we have no intention to pay cash dividends in the foreseeable future.

Equity Compensation Plan Information

The disclosure required by this item is incorporated by reference in our definitive proxy statement to be used in connection with our 2014 Annual Shareholders Meeting.

Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Introduction

This discussion and analysis of our financial condition and results of operations as well as other sections of this report contain certain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and involve a number of risks and uncertainties. Actual results may differ materially from those anticipated in these forward-looking statements for many reasons, including the risks we face described in Item 1a, Risk Factors. Except to the extent required by law, we assume no obligation to update or revise any forward-looking statements.

Management's discussion and analysis of financial condition and results of operations (MD&A) is provided as a supplement to the accompanying Consolidated Financial Statements and footnotes to help provide an understanding of our financial condition, the changes in our financial condition and our results of operations. This item should be read in connection with our Consolidated Financial Statements. See Item 15, Exhibits and Financial Statement Schedules.

We are a global producer of precision-engineered electronic components and modules. Based on our estimates of the total annual revenues in our primary markets and our share of those markets relative to our competitors, we believe we are a leading global producer of electronic components and modules in the primary markets we serve. We operate our business in three segments:

- our Network product group, which we refer to as Network;
- our Power product group, which we refer to as Power; and
- our Wireless product group, which we refer to as Wireless.

Network produces a variety of passive components that manage and regulate electronic signals for use in various devices used in local area and wide area networks, such as connectors, filters, filtered connectors, transformers, splitters, micro-filters, baluns and chokes. Power primarily manufactures products that adjust and ensure proper current and voltage, limit distortion of voltage, sense and report current and voltage and cause mechanical movement or actuation, which includes power transformers, chokes, current and voltage sensors, ignition coils, automotive coils and military and aerospace products. Wireless manufactures products related to the capture or transmission of wireless communication signals, such as antennas, antenna modules and antenna mounting components.

Historically, our gross margin has been significantly affected by product mix and capacity utilization. The markets served by each of our segments are characterized by varying product life cycles, which in some cases cause significant product turnover each year and, subsequently, frequent variations in the prices of products sold. Due to the constantly changing quantity of parts each segment offers and the frequent changes in our average selling prices, we cannot isolate the impact of changes in unit volume and unit prices on our net sales or gross margin in any given period. In addition, our operations are subject to changes in foreign exchange rates, especially the U.S. dollar as compared to the euro and Chinese renminbi, which affect our U.S. dollar reported results of operations.

Technology and Strategic Investments. Our products evolve along with changes in technology, changes in the availability and price of raw materials and changes in design preferences of the end users of our products. Also, regulatory requirements can occasionally impact the design and functionality of our products. We address these dynamic conditions, as well as our customers' desires, by continually investing in the development of each of our segments' products and by maintaining a diverse product portfolio, which contains both mature and emerging technologies. We remain committed to technological development through investing in research, development and engineering activities focused on designing next generation products, improving our existing products and improving our manufacturing processes. If we determine that any of our segments' manufacturing processes would benefit from capital investment, we may allocate resources to fund the expansion of property, plant and equipment used in these processes. For example, we have committed capital to drive higher levels of automation throughout our

manufacturing operations. We also committed capital to the implementation of our new enterprise resource planning (“ERP”) system to enhance visibility, reduce cost, and enhance customer service. As of the end of fiscal year 2013, the majority of our sites are now live on our new ERP system.

21

Table of Contents

Cost Reduction Programs. We continue to simplify our operations to optimally match our capacity to the current and anticipated revenues and unit demand of each of our operating segments. Specific actions to simplify our operations will dictate the future expenses associated with our cost reduction programs. Actions taken over the past several years, such as divestitures, plant closures, plant relocations, and reduction in personnel, have resulted in the elimination of a variety of future costs. The majority of these costs, not related to the impairment of long-lived assets, represent the annual salaries and benefits of terminated employees, including both those related to manufacturing and those that provided selling, general and administrative services. Also, we have experienced depreciation savings from disposed equipment and reductions in rental expense from the termination of lease agreements. Historically, we have also reduced labor and overhead costs as a result of relocating factories with higher wage rates, such as those in southern China, to lower-cost areas in the central regions of China. The savings created by these cost reduction programs impact cost of goods sold and selling, general and administrative expenses, but the timing of such savings may not be apparent due to other performance factors such as unanticipated changes in demand, changes in unit selling prices, operational challenges, changes in operating strategies, and rising labor costs. Wage rates in China, which are mandated by the government, have been steadily increasing. There were minimum wage increases implemented in a portion of our manufacturing locations in the second quarter of 2013, with wage increases in our remaining locations taking effect in the third quarter of 2013. Such wage rate increases have and will continue to have an unfavorable impact on our overall profit margin in the future.

Divestitures. We have completed divestitures to streamline our operations, to focus on our core businesses, to reduce our external debt and to strengthen our financial position. Refer to Note 16, Divestitures and assets held for sale, to the accompanying Consolidated Financial Statements for additional information regarding divestitures.

International Operations. At December 27, 2013, we had manufacturing operations in the U.S. and China. However, nearly all of our products are manufactured in China and sold to customers in China and other countries outside of the U.S. Our net sales are denominated primarily in U.S. dollars, euros and Chinese renminbi. Changing exchange rates often impact our financial results and our period-over-period comparisons. This is particularly true of movements in the U.S. dollar's exchange rate with the Chinese renminbi and the euro, and each of these and other foreign currencies relative to each other. Sales and net earnings denominated in currencies other than the U.S. dollar may result in higher or lower net sales and net earnings upon translation for our U.S. dollar denominated Consolidated Financial Statements. Also, net earnings may be affected by the mix of sales and expenses by currency within each of our segments. Foreign currency gains or losses may be incurred when non-functional currency denominated transactions are remeasured to an operation's functional currency for financial reporting purposes. An increase in the percentage of our transactions denominated in non-U.S. currencies may result in increased foreign exchange exposure on our Consolidated Statements of Operations. In addition, we may also experience a positive or negative translation adjustment to equity because our investments in non-U.S. dollar-functional subsidiaries may translate to more or less U.S. dollars in our Consolidated Financial Statements.

Income Taxes. Our effective income tax rate is affected by the proportion of our income earned in higher tax jurisdictions, such as those in Europe and the United States, and income earned in lower tax jurisdictions, such as Singapore, China and Hong Kong. This mix of income can vary significantly from one period to another. Additionally, our effective income tax rate will be impacted from period to period by significant transactions and the deductibility or non-deductibility of severance and impairment costs and other similar costs as well as by changes in our net deferred tax assets valuation allowance. Changes in operations, tax legislation, estimates, judgments and forecasts may also affect our tax rate from period to period.

Critical Accounting Policies

The preparation of the Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. Estimates have been

prepared on the basis of the most current and best available information. Actual results could differ materially from those estimates. Our significant accounting policies are summarized in Note 1, Summary of significant accounting policies, to the accompanying Consolidated Financial Statements. The following accounting policies are considered to be the most critical as they require significant judgments and assumptions that involve inherent risks and uncertainties.

Inventory Valuation

We carry our inventories at lower of cost or market. Inventory provisions are created to write down excess and obsolete inventory to market value. The establishment of inventory provisions requires judgments and estimates, primarily related to the expected demand for our inventory. We estimate the expected demand for our inventory on hand using historical demand trends and forecasted demand. Our forecasted demand is based upon customer orders, market conditions, and other factors. While the expected demand may change over time and may cause final amounts to differ materially from original estimates, we do not believe that a reasonable change in these assumptions would result in a material impact to our Consolidated Financial Statements. In addition, inventory purchases are made based upon customer orders and the trend of product sales over recent historical periods. If there is a sudden and significant decrease in demand for our products or there is a higher risk of inventory obsolescence because of rapidly changing technology or customer requirements, then we may be required to write down our inventory, which would cause a negative impact to gross margin. However, if we were subsequently able to sell or use a significant portion of inventory that was previously written down, our gross margin could be positively affected.

22

Table of Contents

Revenue Recognition

We recognize revenue on product sales in the period when the sales process is complete. This generally occurs when persuasive evidence of an agreement exists, such as a sales contract or purchase order, title and risk of loss have been transferred, the sales price is fixed or determinable and collectability is reasonably assured. Title and risk of loss pass at the time of shipment for the majority of our sales. We are not subject to any material customer acceptance provisions.

We provide warranties to our customers that are limited to rework or the replacement of products. We will not accept returned goods until we authorize the return, which typically occurs within three months of product shipment. We accrue for warranty returns based on historical experience and record changes in our warranty provision through costs of sales.

We have agreements with certain distributors that provide limited rights of return. For instance, one agreement allows the distributor to return unsalable products based upon a percentage of qualified purchases, which we refer to as stock rotation. Another agreement provides credit to the distributor for the difference between our catalog price and a discounted price when sold to specific customers on specific parts, which we refer to as ship and debit. We record a reduction of revenue with a corresponding increase in accrued expenses each period based on the historical experience of returns or credits under each of these programs. We believe these agreements are customary in our industry, and have met each of the criteria established in the applicable accounting guidance prior to recognizing revenue. We do not believe any of our discounts or return programs are material to our Consolidated Financial Statements.

Divestiture Accounting

Historically, we have engaged in divestitures to streamline our operations, to focus on our core businesses, to reduce our debt and to strengthen our financial position. When the operations and cash flows of the divestiture have been or will be eliminated from our ongoing operations and, also, when we do not expect to have any significant continuing involvement with such operations, we may report the business that has either been disposed of, or is classified as held for sale, as a discontinued operation. If we plan to dispose of the business by sale, we are required to report the divested business or assets at the lower of its carrying amount or at its estimated fair value less costs to sell in the period it is classified as held for sale. These assessments require judgments and estimates which include determining when it is appropriate to classify the business as held for sale, if the business meets the specifications of a discontinued operation, determining the fair value of the business and determining the level and type of involvement, if any, we will have with the disposed business in the future. Furthermore, when removing the divested business or assets from our Consolidated Balance Sheets, and, if necessary, restating results in prior periods, we are required to make assumptions, judgments and estimates regarding, among other things, the assets, liabilities and activities of the business and their relation to our continuing businesses.

Intangible Assets, net

We test our indefinite-lived intangible assets for impairment on an annual basis in the fourth quarter, and, on an interim basis if certain events or circumstances indicate that an impairment loss may have been incurred. We measure the fair value of indefinite-lived intangible assets, which consists of two trade names in our Wireless and Network segments, using the relief from royalty method. This method assumes that the trade names have value to the extent that their owner is relieved of the obligation to pay royalties for the benefits received from them. The determination of the fair value of the trade names requires us to make significant estimates and assumptions using Level 3 inputs, including the future revenue for the related trade names, the appropriate royalty rate, and the weighted average cost of capital.

As a result of the annual impairment review of our indefinite-lived intangible assets, we recorded an impairment charge of approximately \$0.6 million during fiscal 2013. Of the \$0.6 million impairment charge, \$0.4 million resulted from a significant decline in product revenues related to the Network trade name primarily due to customer losses in the fourth quarter of 2013, and \$0.2 million resulted from a decline in forecasted product revenues related to the Wireless trade name due to a change in our plans with respect to branding certain new products to be sold in the future.

23

Table of Contents

Changes in our assumptions concerning projected financial results or any of the other underlying assumptions could have a significant impact on the fair value of the trade names or the amount of the impairment charge. Additionally, significant changes in any of these estimates or assumptions in the future may result in a future impairment. Changes in key assumptions would have affected the impairment charge recorded in 2013 as follows (in millions, except percentages):

			Increase 100 basis points	Decrease 100 basis points
Discount rate	Assumption 15.0	%	\$ 0.1	\$ (0.1)
Terminal growth rate	0.0	%	\$ (0.1)	\$ 0.1
Royalty rate	1.0 - 4.0	%	\$ (0.5)	\$ 0.7

Other finite-lived intangible assets are amortized over their respective estimated useful lives on a straight-line basis over three to seven years. We review intangible assets subject to amortization for impairment whenever events or circumstances indicate that the carrying amount of an asset may not be recoverable. If the sum of the expected future undiscounted cash flows is less than the carrying amount of the asset, an impairment loss is recognized as the amount by which the carrying amount of the asset exceeds its estimated fair value.

Income Taxes

We use the asset and liability method for accounting for income taxes. Under this method, income tax expense or benefit is recognized for the amount of taxes payable or refundable for the current year and, also, for deferred tax liabilities and assets for the future tax consequences of events that have been recognized in an entity's financial statements or tax returns. We make assumptions, judgments and estimates to determine our current provision for income taxes and, also, our deferred tax assets and liabilities and any valuation allowance to be recorded against a deferred tax asset. Our judgments, assumptions and estimates, relative to our provision for income taxes, take into account current tax laws, our interpretation of current tax laws and possible outcomes of current and future audits conducted by foreign and domestic tax authorities. Changes in tax law, or our interpretation of tax laws, and the resolution of current and future tax audits could significantly impact the amounts provided for income taxes in our Consolidated Financial Statements.

We maintain a valuation allowance when it is more likely than not that all or a portion of a deferred tax asset will not be realized based on consideration of all available evidence. Our assumptions, judgments and estimates relative to the value of our deferred tax assets also take into account predictions of the amount and the categories of future taxable income, carry-back and carry-forward periods and tax strategies, which could impact the realization of a deferred tax asset. As of December 27, 2013, we could not sustain a conclusion that it was more likely than not that we would realize our deferred tax assets in the US and certain other locations resulting from recent losses as well as other factors. Consequently, we continue to maintain a valuation allowance against those deferred tax assets. We have maintained a valuation allowance as a result of weighing all positive and negative evidence, including our history of losses in recent years and the difficulty of forecasting future taxable income. We intend to maintain a valuation allowance until sufficient positive evidence exists to support its reversal. Actual operating results and the underlying amounts and categories of income in future years could result in our current assumptions, judgments and estimates of recoverable net deferred taxes being inaccurate.

In the fourth quarter of 2012, we reassessed our previous assertion with regard to permanently invested foreign earnings. As a result of our assessment of our potential cash needs in the U.S. in conjunction with certain distributions in 2012, we determined that \$40.0 million of previously unremitted foreign earnings would not be permanently reinvested and therefore we recorded a deferred tax liability in 2012 for the net tax-effect of these earnings. Aside

from this change, we have generally not provided for U.S. and foreign withholding taxes on our non-U.S. subsidiaries' undistributed earnings, which are considered permanently reinvested. We expect our foreign earnings will be used to service our non-U.S. debt and maintain our foreign operations, and thus are permanently reinvested outside of the U.S. The majority of our cash requirements are generated by our non-U.S. subsidiaries, as our manufacturing and operations are primarily outside of the U.S., and we anticipate that a significant portion of our opportunities for future growth will be outside the U.S. In addition, we expect to use a significant portion of the cash to service debt outside of the U.S. We continue to maintain our permanent reinvestment assertion with regard to the remaining undistributed earnings outside of the U.S. As of December 27, 2013, the amount of cash associated with permanently reinvested foreign earnings was approximately \$14.3 million. We have not, nor do we anticipate the need to repatriate these funds to the U.S. However, if funds are repatriated, we would need to accrue and pay taxes on such amounts.

Table of Contents

Defined Benefit Plans

On December 31, 2010, we froze the plan benefits of our domestic defined benefit retirement plan. The costs and obligations of our defined benefit plans are dependent on actuarial assumptions. These valuations reflect the terms of the plans and use participant-specific information such as compensation, age, and years of service, as well as certain assumptions, including estimates of discount rates, expected return on plan assets, interest crediting rates, and mortality rates. The discount rate is determined based on high-quality fixed income investments that match the duration of expected benefit payments. For our pension obligations in the United States, a yield curve constructed from a portfolio of high quality corporate debt securities with varying maturities is used to discount expected benefit payments to their present value. This generates our discount rate assumption for our domestic pension plan. For our non-U.S. plans, we use the market rates for high- quality corporate bonds to derive our discount rate assumption. The expected return on plan assets represents a forward projection of the average rate of earnings expected from our invested pension assets. We have estimated this rate based on historical returns of similarly diversified portfolios. Changes in these assumptions could result in different expense and liability amounts, as well as a change in future contributions to the plans. However, we do not believe that a range of reasonable changes to these assumptions would result in a material impact to our Consolidated Financial Statements. Refer to Note 9, Employee benefit plans, to the accompanying Consolidated Financial Statements for further details of the primary assumptions used in determining the cost and obligations of our defined benefit plans.

Contingency Accruals

During the normal course of business, a variety of issues arise which may result in litigation, environmental compliance and other contingent obligations. In developing our contingency accruals, we consider both the likelihood of a loss or incurrence of a liability, as well as our ability to reasonably estimate the amount of exposure. We record contingency accruals when a liability is probable and the amount of exposure can be reasonably estimated. We periodically evaluate available information to assess whether contingency accruals should be adjusted, which includes an assessment of legal interpretations, judicial proceedings, recent case law and specific changes or developments regarding known claims. In future periods, we could be required to record additional expenses, if our initial estimates were too low, or reverse part of the charges that were initially recorded, if our estimates were too high. Additionally, the litigation costs we incur in connection with a contingency are expensed as incurred, since the nature of these costs is generally unpredictable and cannot be reasonably estimated prior to being incurred.

Severance, Impairment and Other Associated Costs

Severance, impairment and other associated costs, which we refer to as restructuring costs, involve employee-related termination costs, facility exit costs, and asset impairments resulting from reductions-in-force, migration of facilities or product lines from higher-cost to lower-cost countries, and consolidation of facilities within countries. We recognize termination costs based on requirements established per our severance policy, government law, or previous actions. Facility exit costs generally reflect the cost to terminate a facility lease before the end of its term (measured at fair value at the time we cease using the facility) or costs that will continue to be incurred under the facility lease without future economic benefit to us. Restructuring activities often result in the disposal or abandonment of assets that require an acceleration of depreciation or impairment reflecting the excess of the assets' carrying values over fair value.

The recognition of restructuring costs require that we make certain judgments and estimates regarding the nature, timing, and amount of costs associated with the planned exit activity. To the extent our actual results differ from our estimates and assumptions, we may be required to revise the estimated liabilities, requiring the recognition of additional restructuring costs or the reduction of liabilities already recognized.

New Accounting Pronouncements

Refer to Note 1, Summary of significant accounting policies, to the accompanying Consolidated Financial Statements for our discussion of new accounting pronouncements.

25

Table of Contents

Results of Operations

Year ended December 27, 2013 compared to the year ended December 28, 2012

The following table below shows our results of operations and sets forth the components of net income as a percentage of net sales for the periods indicated (in thousands):

	2013	2012	Change		Results as % of net sales	
			\$	%	2013	2012
Net sales	\$355,676	\$373,169	\$(17,493)	(4.7)%	100.0%	100.0%
Cost of sales	274,009	298,898	24,889	8.3	(77.0)	(80.1)
Gross profit	81,667	74,271	7,396	10.0	23.0	19.9
Selling, general and administrative expenses	73,894	74,712	818	1.1	(20.8)	(20.0)
Severance, impairment and other associated costs	3,342	5,932	2,590	43.7	(0.9)	(1.6)
Debt restructuring and related costs	--	1,198	1,198	(100.0)	--	(0.3)
Legal reserve	147	5,523	5,376	97.3	(0.0)	(1.5)
Cost related to unsolicited takeover attempt	--	(545)	(545)	100.0	--	0.1
Operating profit (loss)	4,284	(12,549)	16,833	134.1	1.2	(3.4)
Interest expense, net	(24,492)	(17,435)	(7,057)	(40.5)	(6.9)	(4.7)
Other income (expense), net	(2,432)	5,213	(7,645)	(146.7)	(0.7)	1.4
Loss from continuing operations before income taxes	(22,640)	(24,771)	2,131	8.6	(6.4)	(6.6)
Income tax expense	(4,383)	(6,979)	2,596	37.2	(1.2)	(1.9)
Net loss from continuing operations	(27,023)	(31,750)	4,727	14.9	(7.6)	(8.5)
Net loss from discontinued operations	--	(345)	345	100.0	--	(0.1)
Net loss	\$(27,023)	\$(32,095)	\$5,072	15.8 %	(7.6)%	(8.6)%

Net sales. Net sales for the year ended December 27, 2013 decreased by \$17.5 million, or 4.7%, to \$355.7 million compared with \$373.2 million in the prior-year period, reflecting ongoing economic and industry weakness which constrained demand for Network and Power products.

Net sales for our three segments for the years ended December 27, 2013 and December 28, 2012 were as follows (in millions):

	2013	2012
Network	\$150.6	\$158.1
Power	111.5	120.2
Wireless	93.6	94.9
Net sales	\$355.7	\$373.2

Gross profit. Gross profit for the year ended December 27, 2013 increased by \$7.4 million to \$81.7 million compared to \$74.3 million in the prior-year period. Gross profit as a percentage of net sales increased to 23.0% for the year ended December 27, 2013 as compared to 19.9% for the prior-year period. The higher gross profit margin compared to the prior year reflects the favorable effects of manufacturing plant consolidations and other cost reduction programs and resulting operational efficiencies which more than offset the labor cost increases in China. In addition, we incurred ramp up costs and inefficiencies in the prior year associated with the growth in our Wireless segment.

26

Table of Contents

Selling, general and administrative expenses. Selling, general and administrative expenses decreased by \$0.8 million, or 1.1%, to \$73.9 million in the year ended December 27, 2013 compared with \$74.7 million in the prior year, which included a \$1.0 million favorable impact of reaching an agreement on intellectual property licensing. The decrease compared to prior year was primarily due to aggressive expense reduction actions and sustained scrutiny over all discretionary spending.

Research, development and engineering expenses (“RD&E”) are included in selling, general and administrative expenses. For the year ended December 27, 2013 and December 28, 2012, respectively, RD&E was as follows (in thousands):

	2013	2012		
RD&E	\$22,238	\$24,856		
Percentage of sales	6.3	%	6.7	%

Our RD&E spending as a percentage of sales in the year ended December 27, 2013 decreased slightly as a percentage of sales compared to the prior year primarily due to decreases in spending in our Wireless segment.

Severance, impairment and other associated costs. During fiscal 2013, the total charges of \$3.3 million included \$1.1 million of severance costs, which consisted of \$0.6 million related to a restructuring action initiated and completed during the third quarter to lower overhead costs and reorganize certain indirect labor functions in China and \$0.5 million related to the program we announced in the second quarter of 2013 to reduce operating expenses, including costs associated with centralization of certain administrative departments and reductions in our engineering resources in our Wireless segment. Additionally, we recorded total impairment charges of \$2.2 million, including the impairment of \$1.6 million of fixed assets that were acquired and developed in connection with a project in our Network segment that we decided to abandon in the third quarter of 2013, as well as \$0.6 million related to two trade names in our Wireless and Network segments in the fourth quarter of 2013. Refer to Note 4, Intangible assets, net, for further details.

During fiscal 2012, the total charges of \$5.9 million included \$3.9 million for severance, lease termination and other costs associated with our restructuring program to reduce and reorganize the capacity of our manufacturing plants in China as we shift manufacturing to lower cost facilities. Additionally, \$1.1 million related to global workforce reductions, primarily in Europe; \$0.2 million related to severance and \$0.7 million for the write-down of fixed assets no longer in use as a result of the shutdown of our Korea manufacturing operations and relocation of this manufacturing to facilities in China; and \$0.2 million of additional costs associated with our withdrawal from Wireless’ audio components business, which we initiated and substantially completed in 2011. These costs were partially offset by a \$0.2 million favorable settlement on our remaining lease obligations for our former corporate headquarters.

Debt restructuring and related costs. During fiscal 2012, we incurred \$1.2 million of costs related to financing and strategic alternatives we were pursuing to increase liquidity and repay the borrowings under our senior credit facility. The majority of these costs represented fees of our financial and legal advisors and related to refinancing projects that were not ultimately consummated.

Legal reserve. During fiscal 2012, we recorded litigation reserves totaling \$5.5 million related to the Halo lawsuit and Turkish VAT-related dispute. During fiscal 2013, we increased our legal reserves by \$0.1 million for interest accrued on these disputes. Both of these lawsuits are further described in Note 10, Commitments and contingencies, to the accompanying Consolidated Financial Statements.

Costs related to unsolicited takeover attempt. During fiscal 2012, we recorded a \$0.5 million gain due to a settlement with an advisor regarding amounts owed for services rendered in the prior year in connection with our unsolicited

takeover defense.

Interest. Net interest expense increased by \$7.1 million to \$24.5 million compared with \$17.4 million in the prior year. The increase was primarily due to higher borrowing rates and debt levels compared to the prior-year period. Also, interest expense increased due to higher debt fee and discount amortization from our Oaktree term loans.

Other. During fiscal 2013, we incurred \$2.4 million of other expense, net, which consisted of a \$2.9 million loss for the change in fair value on the warrant liability we issued to Oaktree in connection with the Oaktree recapitalization, partially offset by a \$0.7 million gain on the sale of assets related to two manufacturing plants in China and a trade name, as well as foreign currency losses related to changes in the various currencies of our intercompany lending program of \$0.3 million. During fiscal 2012, other expense, net primarily consisted of a \$4.2 million unrealized gain for the change in fair value on the warrant liability issued to Oaktree and a \$0.7 million gain on the sale of assets related to the sale of equipment and a manufacturing plant in China.

27

Table of Contents

Income taxes. The effective tax rate for the year ended December 27, 2013 was a tax expense of 19.4% compared to 28.2% for the year ended December 28, 2012. The 2013 effective tax rate was primarily impacted by assessments and permanent non-deductible expenses in foreign jurisdictions. The 2012 effective tax rate was primarily impacted by a tax reserve that was recorded in connection with an audit in a foreign jurisdiction, as well as U.S. and foreign withholding taxes incurred. The 2012 tax rate was not impacted by the change we made in fiscal 2012 to our assertion of previously permanently reinvested foreign earnings and the establishment of a deferred tax liability, due to the offsetting reversal of available valuation allowance in the U.S.

Discontinued operations. During fiscal 2012, our results from discontinued operations included \$0.3 million of costs relating to certain legal matters related to our former Medtech operations.

Liquidity and Capital Resources

The Company had \$26.9 million of cash and cash equivalents at December 27, 2013 compared with \$31.5 million at December 28, 2012. The decrease in cash mainly reflects the use of proceeds from the Oaktree investment for transaction fees and expenses of \$2.2 million, payment of a \$1.6 million bond in relation to the appeal filed in the Halo matter, working capital needs and capital expenditures.

If earnings from non-U.S. operations were repatriated from our non-U.S. subsidiaries, it may require the payment of additional taxes. At December 27, 2013, a majority owned foreign subsidiary located in Taiwan and its subsidiaries held approximately \$12.7 million of our total consolidated cash and cash equivalents. Permanent access to funds from this subsidiary could be in the form of a dividend to its shareholders, which could result in income and withholding taxes and distributions to minority shareholders. Repatriation of some of these funds could be subject to delay for local country approvals and could have potential adverse tax consequences. Management does not believe such restrictions will limit the Company's ability to pursue its intended business strategy. In connection with the on-going simplification and restructuring efforts of the Company, significant amounts of non-U.S. cash on-hand may be used during 2014 to further these objectives and improve the operating efficiency of the Company.

Our primary capital requirements are to fund working capital needs and operating expenses, meet required interest and principal payments, and fund capital expenditures. In the past, our capital resources have primarily consisted of cash flows from operations and borrowings under previous credit facilities. Since 2008, our revenues and earnings have decreased significantly due to a variety of factors, including recessionary economic conditions, weaknesses in our specific markets, and the negative effects of leverage and debt service costs, including interest expense. As a result, we faced liquidity and capital resource challenges, and have also suffered a decline in the market capitalization of our common stock.

In response to these liquidity and capital resource challenges, in November 2012, we entered into agreements with Oaktree to recapitalize our company. In February 2014, we announced that we had reached agreements with the holders of approximately \$20.7 million of our \$22.3 million of outstanding senior convertible notes due in December 2014 to exchange their notes for \$14.9 million of new Term B Loans, 1.1 million shares of common stock, and \$2.1 million of cash. The exchange transactions will reduce our outstanding debt and the amount of cash required for debt service and will extend the maturity of the exchanged debt beyond 2014, allowing us to further focus on our long term strategy and the execution of our business plans.

We believe that we will maintain sufficient financing from operations and cash on-hand to meet funding requirements for the next twelve months. We continue to focus on cost reduction measures in an effort to generate additional cash flows. In the third quarter of 2013, we initiated a program to reduce operating expenses by approximately \$6.0 million on an annualized basis by the end of the third quarter of 2014. Completion of the reductions may enable us to make significant progress towards our targeted operating expense levels and ensure continued cash growth regardless of sales trends. Many of the contemplated actions are efficiency improvements related to the implementation of the

ERP system and are expected to affect all segments. We recorded \$0.5 million in severance expense in the third quarter of 2013 related to these actions and expect to begin to realize savings from those actions in the fourth quarter of 2013. The initiative is on track to achieve the expected \$6.0 million annualized expense savings by the end of the third quarter of 2014. There may be additional severance expense recognized in future periods in connection with the actions.

28

Table of Contents

Cash Flow from Operating Activities

Net cash provided by operating activities was \$8.0 million for the year ended December 27, 2013, as compared to net cash used in operating activities of \$9.7 million for the comparable period in 2012, an increase of \$17.7 million. The increase in the cash provided by operating activities during the year ended December 27, 2013 was primarily due to higher operating profit, as well as lower severance, tax and interest payments compared to the prior-year period.

Cash Flow from Investing Activities

Net cash used in investing activities was \$9.9 million for the year ended December 27, 2013, primarily consisting of \$8.7 million of capital expenditures, as well as an increase in restricted cash of \$1.6 million due to the payment of a bond in relation to the appeal filed in the Halo matter, partially offset by \$0.6 million of proceeds received for the sale of equipment.

Net cash used in investing activities was \$0.3 million for the year ended December 28, 2012, primarily consisting of \$7.9 million of capital expenditures, offset by \$7.5 million of proceeds received for the pending sale of two of our manufacturing plants in China, as well as \$0.6 million for the sale of equipment related to our encapsulated transformer product line.

Capital expenditures in both periods include the continuing implementation of our ERP system, initiatives to drive higher levels of automation throughout our manufacturing operations, as well as investments in programs which we believe are essential to our future growth, primarily related to our Wireless segment.

Cash Flows from Financing Activities

Net cash used in financing activities during the year ended December 27, 2013 was \$2.7 million, consisting of cash used in the payment of debt issuance costs of \$2.2 million, as well as an increase in restricted cash of \$0.5 million related to amounts held in escrow in connection with certain post-closing obligations under the Oaktree credit agreement.

Net cash provided by financing activities during the year ended December 28, 2012 was \$23.8 million. The primary source of cash from financing activities was \$86.0 million of proceeds from long-term borrowings. The primary use of cash for financing activities included a \$55.0 million repayment of our senior credit facility, \$6.0 million of debt issuance costs relating to our senior credit facility amendment in March 2012 and refinancing with Oaktree, and a \$1.3 million dividend paid to minority shareholders of our majority-owned non-U.S. subsidiary.

Financing Transactions

On November 20, 2012, we entered into a credit agreement with certain affiliates of investment funds managed by Oaktree Capital Management, L.P. (such affiliates of such investment funds collectively, "Oaktree") pursuant to which Oaktree extended a new \$75.0 million senior secured Term A Loan and exchanged \$28.5 million of principal and unpaid interest of our outstanding senior convertible notes for a new \$28.5 million secured Term B Loan. We used approximately \$55.0 million of the proceeds to retire our senior credit facility and are using the remaining \$20.0 million for working capital, transaction fees, general business purposes, and cash on hand.

On March 11, 2013, we entered into a forbearance and commitment letter with Oaktree (the "Letter Agreement"). Oaktree agreed, subject to certain specified conditions to forbear from taking any action, including acceleration of payment of the term loans, if we fail to satisfy the secured leverage ratio, the total net debt leverage ratio, and the minimum liquidity covenants included in the credit agreement for the fourth quarter of 2012 and for each quarter in 2013. In addition, the credit agreement includes events of default, including receipt of a judgment or order for payment in excess of the threshold amount as defined in the credit agreement. With respect to the Halo Electronics

case and the Turkish legal matter, subject to certain specified conditions, Oaktree agreed to forbear from taking any action including acceleration of payment of the term loans in the event of judgments or orders of payments that arise through January 1, 2014. Refer to further discussion of these legal matters in Note 10, Commitments and contingencies, to the accompanying Consolidated Financial Statements.

On February 21, 2014, we amended the credit agreement including modifications to the financial covenants. The amendment also extended the waiver of any default with respect to the judgments in the Halo Electronics case and the Turkish legal matter through the maturity date of our term loans subject to certain specified conditions. In consideration for the February 2014 amendment to the credit agreement, we have agreed to pay Oaktree a fee of 1.5% of its term loan principal, or approximately \$1.8 million, which will be added to the principal of the outstanding Term A Loan and Term B Loan owed to Oaktree on a pro rata basis.

29

Table of Contents

On February 21, 2014, we entered into agreements with the holders of approximately \$20.7 million of the \$22.3 million of our senior convertible notes to exchange their notes for new Term B Loans, shares of our common stock, and cash (collectively "the Exchange Transaction"). In aggregate, the Exchange Transaction resulted in the issuance of \$14.9 million of new Term B Loans, 1.1 million shares of our common stock, and \$2.1 million of cash in exchange for approximately \$20.7 million of the outstanding senior convertible notes. The Term B Loans are identical to the Term B Loan issued to Oaktree in November 2012.

Term Loans

As of December 27, 2013, we have \$114.2 million of outstanding principal on our term loans (\$90.0 million, net of discount). On November 20, 2012, we entered into a credit agreement with Oaktree pursuant to which Oaktree extended a new \$75.0 million senior secured Term A Loan and exchanged \$28.5 million of principal and unpaid interest of our outstanding senior convertible notes for a new \$28.5 million secured Term B Loan. We used approximately \$55.0 million of the proceeds to retire our senior credit facility and are using the remaining \$20.0 million for working capital, transaction fees, general business purposes, and cash on hand.

On February 21, 2014, we issued an additional \$14.9 million of Term B Loans to certain holders of our senior convertible notes in connection with the Exchange Transaction. Refer to discussion of the Exchange Transaction below.

The interest rate on the Term A Loan is 12.0% per annum, and the interest rate on the Term B Loan is 10.0% per annum. Interest on each term loan may, at our election, be paid in cash or paid in kind ("PIK") (in the form of additional principal) until November 2015. We plan to pay the interest due on these term loans in the form of additional principal through November 2015. Interest is due on the last business day of the calendar quarter.

During the year ended December 27, 2013, the principal balance on the term loans increased by \$10.7 million due to PIK interest elections made during the year. Additionally, under the credit agreement, we are required to pay non-U.S. withholding tax with respect to the accrued interest on behalf of Oaktree. During fiscal year 2013, we remitted approximately \$1.9 million of foreign withholding taxes on interest accrued on the term loans.

These term loans mature on November 20, 2017 and are secured by a first priority lien on the collateral, which includes the shares and assets of certain domestic and international subsidiaries. The term loans are non-amortizing and may be prepaid without any penalty. While the Term B Loan is not junior in relative lien priority to the Term A Loan, the Term B Loan may not be repaid until the Term A Loan is paid in full.

Debt covenants

Outstanding term loans are subject to financial covenants computed on a quarterly basis as of the most recent quarter end. In accordance with the Letter Agreement, Oaktree agreed to forbear from taking any action, including acceleration of payment of the term loans, if we failed to satisfy the secured leverage ratio, the total net debt leverage ratio, and the minimum liquidity covenants included in the credit agreement for each quarter in 2013.

Under the February 2014 amendment to the credit agreement, we are no longer subject to the minimum liquidity and the total net debt leverage ratio covenants for fiscal year 2014 through the maturity date. In addition, the secured leverage ratio covenants were modified. The secured leverage ratio is calculated as the ratio of consolidated secured debt, which includes the term loans, and our rolling four quarters' EBITDA (as defined in the credit agreement).

Under the credit agreement, as amended in February 2014, the secured leverage ratio requirements, as defined in the agreement, are set forth in the table below:

Edgar Filing: PULSE ELECTRONICS CORP - Form 10-K

Test Period End Date(s)	Secured Leverage Ratio
March 31, 2014 through December 31, 2014	11.00 to 1.00
March 31, 2015 through December 31, 2015	9.50 to 1.00
March 31, 2016 through December 31, 2016	8.00 to 1.00
March 31, 2017 through December 31, 2017	5.00 to 1.00

Table of Contents

In addition, our capital expenditures are limited to \$10.0 million in fiscal 2013, \$12.0 million in fiscal 2014, and \$14.0 million in fiscal 2015 and in each fiscal year thereafter.

We are also subject to financial covenants with respect to the \$23.0 million loan commitment in the Letter Agreement. The effectiveness of the loan commitment is subject to compliance with certain covenants including the following financial covenants for each quarter in 2013: the secured leverage ratio is not to exceed 13.00 to 1.00 and the total net debt leverage ratio is not to exceed 14.00 to 1.00. As of December 27, 2013, we were in compliance with these financial covenants. The loan commitment expires on March 31, 2014.

Stock issuances and Board of Directors

Upon closing of the Oaktree term loans in November 2012, we issued to Oaktree 3.7 million shares of our common stock and a warrant to issue 19.9% of the common stock of a wholly-owned subsidiary of the Company. The warrant was issued pending shareholder approval of an amendment to the Company's Articles of Incorporation that would authorize the issuance of Series A non-voting preferred stock. Upon approval of the amendment at a special shareholder meeting on January 21, 2013, the warrant was terminated and 1,000 shares of Series A non-voting preferred stock of the Company were issued to Oaktree.

In accordance with the Investment Agreement, the Series A preferred stock was automatically convertible into such number of shares of our common stock that would result in Oaktree having received 67.9% of our total common stock (on a pro forma fully diluted basis as of November 20, 2012, and without giving effect to shares of common stock and warrants previously owned by Oaktree). In conjunction with the Exchange Transaction, we amended the Investment Agreement in February 2014 such that the Series A preferred stock was convertible into shares of common stock at such time that we acquired and cancel at least 90% of the \$22.3 million of our outstanding senior convertible notes. In accordance with the Investment Agreement, as amended, the Series A preferred stock was converted into 8.2 million shares of our common stock upon completion of the Exchange Transaction on February 21, 2014. Refer to further discussion in Note 7, Preferred stock, to the accompanying Consolidated Financial Statements.

Also pursuant to the February 2014 amendment to the Investment Agreement, we agreed to grant Oaktree an expansion of its right to nominate individuals to serve as members of the Company's Board of Directors. As such, we agreed to appoint three of Oaktree's designees to the Board and to expand the current number of directors of the Board from seven to nine. We also agreed that, in connection with any meeting of its shareholders at which directors are to be elected, Oaktree shall have the right to designate individuals to the Company's slate of director nominees in proportion to its equity ownership of the Company. So long as Oaktree beneficially owns a majority of our outstanding common stock it will have the right to designate no less than a majority of the individuals comprising the members of such slate.

Convertible Note Exchange Transaction

At December 27, 2013, we had \$22.3 million of outstanding principal on our senior convertible notes that will mature on December 15, 2014. The notes bear a coupon rate of 7.0% per annum.

On February 21, 2014, we entered into agreements with the holders of approximately \$20.7 million of the \$22.3 million of our senior convertible notes to exchange their notes for new Term B Loans, shares of our common stock, and cash. In aggregate, the Exchange Transaction resulted in the issuance of \$14.9 million of new Term B Loans, 1.1 million shares of our common stock, and \$2.1 million of cash in exchange for approximately \$20.7 million of the outstanding senior convertible notes. The Term B Loans are identical to the Term B Loan issued to Oaktree in November 2012.

Following the Exchange Transaction, we have \$1.6 million of outstanding principal on our senior convertible notes. Pursuant to the Series A preferred stock conversion and the resulting issuance of 8.2 million shares of common stock to Oaktree, a “change in control” under the terms of the senior convertible notes was deemed to have occurred since Oaktree beneficially owns a majority of the outstanding shares of our common stock. Such change in control triggered our obligation to repurchase all remaining outstanding senior convertible notes. We expect to provide notice on March 13, 2014 to all holders of outstanding senior convertible notes that a change in control occurred. We will be required to pay the \$1.6 million of outstanding amounts due on either May 1, 2014, or December 15, 2014, the maturity date, depending upon elections made by the note holders.

Senior Credit Facility

On March 9, 2012, we amended our previous senior credit facility and the revised terms reduced the borrowings permitted under the credit facility from \$60.8 million to \$55.0 million, increased the interest rate on the outstanding borrowings to a combination of variable rate of LIBOR plus 10.0%, reduced our permitted capital expenditures and reduced the available cash we were required to maintain. We incurred fees and expenses related to the March 2012 amendment, including \$1.1 million of fees upon execution of the amendment, legal fees, and other expenses. In addition, we recorded a charge of approximately \$0.3 million to write off previously capitalized fees and costs that related to the credit facility and its amendments. The senior credit facility was scheduled to mature in February 2013; however, we repaid the \$55.0 million outstanding under the credit facility on November 20, 2012 in conjunction with the issuance of the Oaktree term loans described above.

31

Table of Contents

In connection with the March 2012 amendment to the senior credit facility, we issued to the bank group at that time warrants to purchase approximately 0.26 million shares of our common stock at an exercise price of \$0.10 per share. The warrants vested over time until we repaid the outstanding borrowings under the senior credit facility in full by certain dates. Consequently, warrants to purchase 0.12 million shares of common stock became vested during the year ended December 28, 2012, of which 0.02 million warrants have been exercised. Warrants to purchase 0.14 million additional shares of common stock reverted back to us and were canceled upon retirement of the outstanding borrowings under the senior credit facility on November 20, 2012.

Certain Other Matters Relating to Liquidity

On September 27, 2012, the New York Stock Exchange (the “NYSE” or the “Exchange”) notified us that we had fallen below the NYSE’s continued listing standard for average market capitalization because we failed to maintain an average market capitalization over a consecutive 30-day trading period of at least \$50.0 million and that we must achieve such an average market capitalization over a consecutive 30-day trading period on or before March 27, 2014. On November 12, 2012, we submitted a plan for remediation of the deficiency related to the market capitalization and stockholders’ equity requirements to the NYSE, which they accepted on January 3, 2013. The plan included our consideration of other options regarding the eventual retirement of the senior convertible notes, either before or at maturity. We are required to provide the Exchange staff with updates in connection with the initiatives of the plan of compliance at least quarterly or upon the Exchange’s request and the Exchange staff will review us periodically for compliance with the plan during the extension periods. Failure to make progress consistent with the compliance plan or to regain compliance with the continued listing standards by March 27, 2014 could result in our common stock being delisted from the Exchange.

On October 10, 2012, the NYSE notified us that we failed to meet an additional listing standard because the average closing share price of our common stock was below the NYSE’s minimum standard of \$1.00 per share during a consecutive 30 trading-day period. On May 22, 2013, we implemented a 1-for-10 reverse stock split of our common stock following shareholder approval at the annual meeting. As a result of the split, every ten shares of issued and outstanding common stock was converted into one issued and outstanding share of common stock and reduced our total common shares outstanding on the effective date from 79.5 million shares to 7.9 million shares. On July 3, 2013, the NYSE notified the Company that our stock price was above the NYSE’s minimum requirement of \$1.00 based on a 30-trading day average. Accordingly, the Company is now in compliance with the \$1.00 continued listing criterion.

We are a party to various legal proceedings, claims and assessments that arise in the ordinary course of business, and may continue to incur significant costs in defending or settling legal matters. The total amount and timing of the expected future payments related to these matters cannot be estimated due to the uncertainty of the duration of the legal proceedings and the ultimate scope of other claims. However, an unfavorable outcome in a single matter or in multiple legal matters during the same reporting period could have a material adverse effect on our consolidated financial position, results from operations and cash flows. Refer to Note 10, Commitments and contingencies, to the accompanying Consolidated Financial Statements for a discussion of certain legal proceedings. As discussed in Note 10, Commitments and contingencies, the court entered final judgment in the Halo lawsuit on May 29, 2013 and ordered the Company to pay a bond in the amount of approximately \$1.6 million to secure Halo’s interest through the appeal process, which we paid in the third quarter of 2013.

Our domestic defined benefit retirement plan has been subject to the pursuit of an alleged claim relating to the sale of our Electrical segment in 2010 by the Pension Benefit Guarantee Corporation (“PBGC”). Communications from the PBGC have indicated that the sale of Electrical’s North America operations may have resulted in a partial plan termination. We have had ongoing discussions with the PBGC regarding potential additional funding of the plan. Based on our most recent discussions with the PBGC, we may contribute up to \$1.0 million to the plan within the next year and may make similar annual payments in future years until we have funded the plan by \$6.2 million. The potential additional funding would have no impact on the liability recorded as of December 27, 2013. There can be no

assurance that the final terms of any agreement reached with the PBGC will reflect the terms offered by the Company in these preliminary discussions.

Our retained earnings are free from legal or contractual restrictions as of December 27, 2013, with the exception of approximately \$27.4 million of subsidiary retained earnings primarily in China that are restricted in accordance with Section 58 of the PRC Foreign Investment Enterprises Law. The \$27.4 million includes approximately \$3.4 million of retained earnings of a majority-owned subsidiary. The amount restricted in accordance with the PRC Foreign Investment Enterprise Law is applicable to all foreign investment enterprises doing business in China. The restriction applies to 10% of our net earnings in China, limited to 50% of the total capital invested.

32

Table of Contents

Contractual Obligations

Future payments related to contractual obligations, including the changes to interest and principal payments as a result of the Exchange Transaction were as follows (in thousands):

	Amounts expected to be paid by period				
	Total (1)	Less than 1 year	1 to 3 years	3 to 5 years	Thereafter
Senior convertible notes	\$1,570	\$1,570	\$--	\$--	\$ --
Term A loan (2)	108,762	--	--	108,762	--
Term B loan (2)	56,948	--	--	56,948	--
Interest on long-term debt	38,039	384	2,112	35,543	--
Operating leases	\$10,459	\$4,083	\$4,197	\$1,382	\$ 797

(1)Excludes other obligations under employment contracts that are generally only payable upon a change of control.

The Term A and Term B loans permit us to pay interest in kind through November 2015, in lieu of cash payment, (2)such that amounts due for interest are added to the outstanding balance of the facility. This table assumes that interest on these loans will be paid in kind through November 2015.

In the schedule of estimated future payments related to our contractual obligations, we excluded unrecognized tax benefits due to the uncertainty of the amount and the period of payment. As of December 27, 2013, we had unrecognized tax benefits of approximately \$3.5 million. Refer to Note 8, Income taxes, to the accompanying Consolidated Financial Statements.

Off-Balance Sheet Arrangements

We do not maintain any off-balance sheet arrangements, transactions, obligations or other relationships with unconsolidated entities that would be expected to have a material current or future effect on our financial condition or results of operations.

Item 8 Financial Statements and Supplementary Data

Information required by this item is incorporated by reference from the Report of Independent Registered Public Accounting Firm and from the Consolidated Financial Statements and supplementary schedules.

Item 9 Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There were no disagreements with accountants on accounting or financial disclosures during the last two fiscal years. On June 26, 2013, the Audit Committee of the Company's Board of Directors dismissed KPMG LLP as the Company's independent registered public accounting firm and engaged Grant Thornton LLP to serve as the Company's new independent registered public accounting firm. For more information with respect to this matter, see our Current Report on Form 8-K dated June 26, 2013.

Item 9a Controls and Procedures

Based on their evaluation as of December 27, 2013, our Chief Executive Officer and Chief Financial Officer, have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the

Securities Exchange Act of 1934, as amended) were effective to ensure that information required to be disclosed by us in the reports that we file or submit is recorded, processed, summarized and reported, within the time periods specified in the Securities Exchange Commission's rules and forms and is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

33

Table of Contents

A company's internal control over financial reporting is a process designed to provide reasonable, not absolute, assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended). Internal control over financial reporting are processes designed to provide reasonable, not absolute, assurance regarding the reliability of financial reporting and the preparation of Consolidated Financial Statements in accordance with accounting principles generally accepted in the United States of America. Our management assessed the effectiveness of our internal control over financial reporting as of December 27, 2013. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in Internal Control – Integrated Framework. Our management has concluded that, as of December 27, 2013, our internal control over financial reporting is effective based on these criteria. Our independent registered public accounting firm has issued an audit report on the effectiveness of our internal control over financial reporting, which is included herein.

The Company has an ongoing initiative to implement a new enterprise resource planning system. During the quarter ended December 27, 2013, we implemented certain modules of our ERP system at the majority of our sales and distribution locations. We have modified the design and documentation of internal control processes and procedures relating to the new system to supplement and complement existing internal controls. There were no other changes in the Company's internal controls over financial reporting during the quarter ended December 27, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Our management, including our Chief Executive Officer and Chief Financial Officer, do not expect that our disclosure controls and procedures or our internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

Item 9b Other Information

None.

Table of Contents

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders
Pulse Electronics Corporation

We have audited the internal control over financial reporting of Pulse Electronics Corporation and subsidiaries (the “Company”) as of December 27, 2013, based on criteria established in the 1992 Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 27, 2013, based on criteria established in the 1992 Internal Control—Integrated Framework issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of the Company as of and for the year ended December 27, 2013, and our report dated March 12, 2014 expressed an unqualified opinion on those financial statements.

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders
Pulse Electronics Corporation

We have audited the accompanying consolidated balance sheet of Pulse Electronics Corporation and subsidiaries (the “Company”) as of December 27, 2013, and the related consolidated statements of operation, comprehensive loss, cash flows, and changes in stockholders’ deficit for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Pulse Electronics Corporation and subsidiaries as of December 27, 2013, and the results of their operations and their cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company’s internal control over financial reporting as of December 27, 2013, based on criteria established in the 1992 Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 12, 2014 expressed an unqualified opinion on the effectiveness of the Company’s internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Pulse Electronics Corporation:

We have audited the accompanying consolidated balance sheet of Pulse Electronics Corporation and subsidiaries (the Company) as of December 28, 2012, and the related consolidated statements of operations, comprehensive loss, cash flows, and changes in shareholders' deficit for the year then ended. These consolidated financial statements the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Pulse Electronics Corporation and subsidiaries as of December 28, 2012 and the results of their operations and their cash flows for the year then ended, in conformity with U.S. generally accepted accounting principles.

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements

(1) Summary of significant accounting policies

The Company

Pulse Electronics Corporation is a global producer of precision-engineered electronic components and modules. We sometimes refer to Pulse Electronics Corporation as “Pulse Electronics”, “Pulse”, “the Company”, “we” or “our.” We operate our business in three segments: our Network product group (“Network”), our Power product group (“Power”) and our Wireless product group (“Wireless”).

Principles of consolidation

The accompanying Consolidated Financial Statements include the accounts of Pulse Electronics and all of its wholly-owned subsidiaries. All intercompany accounts, transactions and profits are eliminated in consolidation.

On May 22, 2013, we implemented a 1-for-10 reverse stock split of our common stock following shareholder approval at the annual meeting. As a result of the split, every ten shares of issued and outstanding common stock was converted into one issued and outstanding share of common stock, without any change in the par value per share. Accordingly, we have adjusted the basic and diluted loss per share on the Consolidated Statements of Operations for the year ended December 28, 2012, to reflect the impact of the reverse stock split. We have also adjusted the number of issued and outstanding shares of common stock presented on the Consolidated Balance Sheet at December 28, 2012, the Consolidated Statement of Changes in Shareholders’ Deficit for the year ended December 28, 2012, and have adjusted all share and per share amounts in the accompanying notes to the Consolidated Financial Statements.

Fiscal periods

We operate on a fiscal year basis. Our fiscal year ends on the last Friday of December each calendar year. For 2013 and 2012, our fiscal years ended on December 27, 2013 and December 28, 2012, respectively. Fiscal 2013 and 2012 were each 52 weeks in length.

Use of estimates

The preparation of the Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. Estimates have been prepared on the basis of the most current and best available information. Actual results could differ materially from those estimates.

Reclassifications

We have reclassified certain items in our Consolidated Financial Statements to conform to the current year presentation.

Cash and cash equivalents

We consider all highly liquid investments with original maturities of three months or less to be cash equivalents.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts for estimated losses on accounts receivable based on evaluation of the aging of receivables, payment histories of our customers, financial condition of our customers, and the overall economic environment. We write off individual accounts against the allowance when we become aware of our customer's inability to meet its financial obligation to us. As of December 27, 2013 and December 28, 2012, we had an allowance for doubtful accounts of \$0.1 million and \$0.2 million, respectively.

45

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

Inventory

Inventory is stated at the lower of cost or market. Cost is determined by the first-in, first-out method. We establish inventory provisions to write down excess and obsolete inventory to market value. Inventory that is written down to its market value in the ordinary course of business is not subsequently written back up. Our inventory reserves at December 27, 2013 and December 28, 2012 were \$3.9 million and \$3.9 million, respectively. If there is a sudden and significant decrease in demand for our products or there is a higher risk of inventory obsolescence because of rapidly changing technology or customer requirements, we may be required to increase our inventory reserves, which would negatively affect our gross margin.

Divestiture accounting

We have engaged in divestitures to streamline our operations, to focus on our core businesses, to reduce our debt and to strengthen our financial position. When the operations and cash flows of the divestiture have been or will be eliminated from our ongoing operations and, when we do not expect to have any significant continuing involvement with such operations, we may report the business that has either been disposed of, or is classified as held for sale, as a discontinued operation. If we plan to dispose of the business by sale, we are required to report the divested business or assets at the lower of its carrying amount or at its estimated fair value less costs to sell in the period it is classified as held for sale. These assessments require judgments and estimates, which include determining when it is appropriate to classify the business or assets as held for sale, if the business meets the specifications of a discontinued operation, determining the estimated fair value of the business and determining the level and type of involvement, if any, we will have with the disposed business in the future. Furthermore, when removing the divested business from our Consolidated Balance Sheets, and, if necessary, restating results in prior periods, we are required to make assumptions, judgments and estimates regarding, among other things, the assets, liabilities and activities of the business and their relation to our continuing businesses.

Intangible assets, net

We test our indefinite-lived intangible assets for impairment on an annual basis in the fourth quarter, and, on an interim basis if certain events or circumstances indicate that an impairment loss may have been incurred. We measure the fair value of indefinite-lived intangible assets, which consist of trade names, using the relief from royalty method. This method assumes that the trade names have value to the extent that their owner is relieved of the obligation to pay royalties for the benefits received from them. The determination of the fair value of the trade names requires us to make significant estimates and assumptions using Level 3 inputs, including the future revenue for the related trade names, the appropriate royalty rate, and the weighted average cost of capital.

Other finite-lived intangible assets are amortized over their respective estimated useful lives on a straight-line basis over three to seven years. We review intangible assets subject to amortization for impairment whenever events or circumstances indicate that the carrying amount of an asset may not be recoverable. If the sum of the expected future undiscounted cash flows is less than the carrying amount of the asset, an impairment loss is recognized as the amount by which the carrying amount of the asset exceeds its estimated fair value.

Revenue recognition

We recognize revenue on product sales in the period when the sales process is complete. This generally occurs when persuasive evidence of an agreement exists, such as a sales contract or purchase order, title and risk of loss have been transferred, the sales price is fixed or determinable and collectability is reasonably assured. Title and risk of loss pass

at the time of shipment for the majority of our sales. We are not subject to any material customer acceptance provisions.

We provide warranties to our customers that are limited to rework or the replacement of products. We will not accept returned goods until we authorize the return, which typically occurs within three months of product shipment. We accrue for warranty returns based on historical experience and record changes in our warranty provision through costs of sales.

We have agreements with certain U.S. distributors which provide limited rights of return. For instance, one agreement allows the distributor to return unsalable products based upon a percentage of qualified purchases, which we refer to as stock rotation. Another agreement provides credit to the distributor for the difference between our catalog price and a discounted price when sold to specific customers on specific parts, which we refer to as ship and debit. We record a reduction of revenue with a corresponding increase in accrued expenses each period based on the historical experience of returns or credits under each of these programs. We believe these agreements are customary in our industry, and have met the criteria established in the applicable accounting guidance prior to recognizing revenue. We do not believe any of our discounts or return programs are material to our Consolidated Financial Statements.

46

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

Stock-based compensation

We sponsor incentive compensation plans under which we have issued stock options and restricted stock. All compensation costs relating to stock-based awards are recognized in our Consolidated Financial Statements based on the fair value of the equity instruments issued. The value of restricted stock issued is based on the market price of the stock at the award date. We hold the restricted shares until the continued employment or performance requirements are attained. Stock options are granted at no cost to the employee and, under our plan, the exercise price of these options cannot be less than the fair market value of our common shares on the date of grant. We value our stock options according to the fair value method using the Black-Scholes option pricing model. These options expire seven years from the date of grant and generally have 25% annual vesting over four years. An estimated forfeiture rate is applied and included in the calculation of stock-based compensation expense at the time that the stock option or stock unit awards are granted and revised, if necessary, in subsequent periods, if actual forfeiture rates differ from those estimates. The value of the stock-based compensation at the date of grant is charged to expense on a straight-line basis over the vesting period, which is generally three to four years.

Foreign currency translation

For our non-U.S. dollar functional currency subsidiaries, the assets and liabilities are translated into U.S. dollars at the exchange rates in effect at the balance sheet date, with the related translation adjustments reported as a separate component of shareholders' deficit and comprehensive loss. Results of operations are translated using the average exchange rates prevailing throughout the period. Transactions denominated in currencies other than the functional currency of the entity that is party to the transaction are remeasured at exchange rates in effect at the balance sheet date or upon settlement of the transaction. Gains and losses from such remeasurement are recorded in the Consolidated Statements of Operations as a component of other income (expense), net. In fiscal 2013 and 2012, we incurred foreign currency losses of \$0.3 million and \$0.2 million, respectively.

Research and development

Our research, development and engineering expenses ("RD&E"), which are expensed when incurred, are included in selling, general and administrative expenses were approximately \$22.2 million and \$24.9 million in 2013 and 2012, respectively. RD&E includes the costs associated with new product development, product and process improvement, engineering follow-through during early stages of production, design of tools and dies, the adaptation of existing technology to specific situations and customer requirements and, also, legal fees associated with certain technology matters, if material. The research and development components of our RD&E, which generally include those costs associated with new technology, new products or significant changes to current products or processes, were approximately \$15.6 million and \$18.4 million in 2013 and 2012, respectively.

Shipping and handling costs

Amounts billed to customers for shipping and handling costs are included in net sales. Shipping and handling costs are charged to cost of sales as incurred.

Income taxes

We use the asset and liability method for accounting for income taxes. Under this method, income tax expense or benefit is recognized for the amount of taxes payable or refundable for the current year and, also, for deferred tax liabilities and assets for the future tax consequences of events that have been recognized in an entity's financial

statements or tax returns. We must make assumptions, judgments and estimates to determine our current provision for income taxes and, our deferred tax assets and liabilities and any valuation allowance to be recorded against a deferred tax asset. Our judgments, assumptions and estimates, relative to our provision for income taxes, take into account current tax laws, our interpretation of current tax laws and possible outcomes of current and future audits conducted by foreign and domestic tax authorities. Changes in tax law, or our interpretation of tax laws, and the resolution of current and future tax audits could significantly impact the amounts provided for income taxes in our Consolidated Financial Statements. We maintain a valuation allowance when it is more likely than not that all or a portion of a deferred tax asset will not be realized based on consideration of all available evidence. Our assumptions, judgments and estimates relative to the value of our deferred tax assets also takes into account predictions of the amount and the categories of future taxable income, carry-back and carry-forward periods and tax strategies, which could impact the realization of a deferred tax asset. As of December 27, 2013, we could not sustain a conclusion that it was more likely than not that we would realize our deferred tax assets in the US and certain other locations resulting from recent losses as well as other factors. Consequently, we continue to maintain a valuation allowance against those deferred tax assets. We have maintained a valuation allowance as a result of weighing all positive and negative evidence, including our history of losses in recent years and the difficulty of forecasting future taxable income. We intend to maintain a valuation allowance until sufficient positive evidence exists to support its reversal. Actual operating results and the underlying amounts and categories of income in future years could result in our current assumptions, judgments and estimates of recoverable net deferred taxes being inaccurate.

47

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

We recognize the tax benefit from uncertain tax positions only after determining that it is more likely than not that the tax position will be sustained upon examination by the taxing authorities, based on the technical merits of the position. We regularly reassess the positions taken and record any changes, as appropriate. Interest and penalties accrued on uncertain tax positions are recorded in income tax expense.

Defined benefit plans

On December 31, 2010, we froze the plan benefits of our domestic defined benefit retirement plan. The costs and obligations of our defined benefit plans are dependent on actuarial assumptions. These valuations reflect the terms of the plans and use participant-specific information such as compensation, age, and years of service, as well as certain assumptions, including estimates of discount rates, expected return on plan assets, interest crediting rates, and mortality rates. The discount rate is determined based on high-quality fixed income investments that match the duration of expected benefit payments. For our pension obligations in the United States, a yield curve constructed from a portfolio of high quality corporate debt securities with varying maturities is used to discount expected benefit payments to their present value. This generates our discount rate assumption for our domestic pension plan. For our non-U.S. plans, we use the market rates for high quality corporate bonds to derive our discount rate assumption. The expected return on plan assets represents a forward projection of the average rate of earnings expected from our invested pension assets. We have estimated this rate based on historical returns of similarly diversified portfolios. Changes in these assumptions could result in different expense and liability amounts, as well as a change in future contributions to the plans. However, we do not believe that a range of reasonable changes to these assumptions would result in a material impact to our Consolidated Financial Statements.

Severance, impairment and other associated costs

Severance, impairment and other associated costs, which we refer to as restructuring costs, involve employee-related termination costs, facility exit costs, and asset impairments resulting from reductions-in-force, migration of facilities or product lines from higher-cost to lower-cost countries, or consolidation of facilities within countries. We recognize termination costs based on requirements established per severance policy, government law, or previous actions. Facility exit costs generally reflect the cost to terminate a facility lease before the end of its term (measured at fair value at the time we cease using the facility) or costs that will continue to be incurred under the facility lease without future economic benefit to us. Restructuring activities often result in the disposal or abandonment of assets that require an acceleration of depreciation or impairment reflecting the excess of the assets' carrying values over fair value.

The recognition of restructuring costs require that we make certain judgments and estimates regarding the nature, timing, and amount of costs associated with the planned exit activity. To the extent our actual results differ from our estimates and assumptions, we may be required to revise the estimated liabilities, requiring the recognition of additional restructuring costs or the reduction of liabilities already recognized.

Debt issuance costs and debt discount

Debt issuance costs are capitalized upon the issuance of long-term debt and amortized over the life of the related debt using the effective interest method. Debt discount is amortized over the life of the related debt using the effective interest method. Amortization of debt issuance costs and the debt discount is included in interest expense. If we extinguish debt prior to its original maturity date, the unamortized balance of debt issuance costs is written off to interest expense.

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

Contingency accruals

During the normal course of business, a variety of issues arise which may result in litigation, environmental compliance disputes or other contingent obligations. In developing our contingency accruals, we consider the likelihood of a loss or incurrence of a liability, as well as our ability to reasonably estimate the amount of exposure. We record contingency accruals when a liability is probable and the amount can be reasonably estimated. Periodically, we evaluate available information to assess whether contingency accruals should be adjusted, which includes an assessment of legal interpretations, judicial proceedings, recent case law and specific changes or developments regarding known claims. In future periods, we could be required to record additional expenses, if our initial estimates were too low, or reverse part of the charges that were initially recorded, if our estimates were too high. Additionally, the litigation defense costs we incur in connection with a contingency are expensed as incurred, since the nature of the costs is unpredictable and cannot be reasonably estimated.

Property, plant and equipment

Property, plant and equipment are stated at cost. Depreciation is based upon the estimated useful life of the assets using the straight-line method. Our assets' estimated useful lives range from 5 to 30 years for buildings and improvements and from 2 to 10 years for machinery and equipment. Expenditures for maintenance and repairs are charged to operations as incurred, and major renewals and improvements are capitalized. Upon sale or retirement, the cost of the asset and related accumulated depreciation are removed from our balance sheets, and any resulting gains or losses are recognized in earnings.

We review the carrying amount and remaining useful life of our long-lived assets, which includes property, plant and equipment, for impairment when events or circumstances indicate that the carrying amount may not be recoverable. Other factors that would indicate potential impairment may include, but are not limited to, significant decreases in the market value of the long-lived asset, a significant change in the long-lived asset's physical condition, and operating or cash flow losses associated with the use of the long-lived asset. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of the asset to the future undiscounted cash flows expected to be generated by the asset. The amount of impairment recognized is the difference between the carrying value of the asset group and its estimated fair value. Fair value estimates are based on assumptions concerning the amount and timing of estimated cash flows and discount rates, reflecting varying degrees of risk.

Assets held for sale

Long-lived assets to be disposed of and for which management has committed to a plan to divest and is actively marketing the asset are classified as held for sale within prepaid and other current assets on the Consolidated Balance Sheets and are reported at the lower of book value or estimated fair market value, less applicable selling costs. Depreciation and amortization expense is not recorded on assets to be divested once they are classified as held for sale.

Software development costs

We capitalize costs incurred to develop or obtain internal-use software during the application development stage. Capitalization of software development costs occurs after the preliminary project stage is complete, management authorizes the project, and it is probable that the project will be completed and the software will be used for the function intended. We expense costs incurred for training, data conversion, and maintenance, as well as spending in the post-implementation stage. A subsequent addition, modification or upgrade to internal-use software is capitalized

only to the extent that it enables the software to perform a task it previously could not perform. The internal-use software is included in software within property, plant and equipment in our Consolidated Balance Sheets. Capitalized software costs are amortized on a straight-line basis over the estimated useful life of the software, which is three to seven years.

We capitalized \$2.2 million and \$4.3 million of software costs during 2013 and 2012, respectively, which primarily relate to employee, consultant and related personnel costs incurred in the implementation of our new ERP system in various locations of the Company. At December 27, 2013 and December 28, 2012, capitalized software costs, a portion of which is classified as construction in process, net of accumulated depreciation were \$8.8 million and \$7.2 million, respectively.

New Accounting Pronouncements

In July 2013, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update No. 2013-11, “Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists” (“ASU No. 2013-11”). ASU No. 2013-11 requires an entity to present an unrecognized tax benefit, or a portion of an unrecognized tax benefit, in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, with limited exceptions. ASU No. 2013-11 is effective for interim and annual periods beginning after December 15, 2013, with early adoption permitted, and may be applied retrospectively. The Company elected early adoption in the second quarter of 2013. As a result of the adoption, the Company reclassified \$1.7 million of unrecognized tax benefits from long-term liabilities to deferred tax assets in the second quarter of 2013.

In February 2013, the FASB issued an amendment to the accounting guidance for the reporting of amounts reclassified out of accumulated other comprehensive income (“AOCI”). The amendment expands the existing disclosure by requiring entities to present information about significant items reclassified out of AOCI by component. In addition, an entity is required to provide information about the effects on net income of significant amounts reclassified out of each component of AOCI to net income either on the face of the statement where net income is presented or as a separate disclosure in the notes of the financial statements. The amendment was effective at the beginning of our fiscal year 2013. The adoption of this accounting pronouncement did not have a material impact on our financial statement disclosures.

(2) Inventory

Inventory as of December 27, 2013 and December 28, 2012 consisted of the following (in thousands):

	2013	2012
Finished goods	\$21,573	\$18,563
Work in progress	3,570	4,276
Raw materials and supplies	11,583	8,595
	\$36,726	\$31,434

(3) Property, plant and equipment

Property, plant and equipment as of December 27, 2013 and December 28, 2012 consisted of the following (in thousands):

	2013	2012
Land	\$745	\$745
Buildings and improvements	8,374	8,047
Machinery and equipment	77,522	75,562
Software	8,069	2,753
Construction in progress	1,900	7,007
Property, plant and equipment, gross	96,610	94,114
Accumulated depreciation	(68,655)	(64,708)

\$27,955 \$29,406

Depreciation expense for years ended December 27, 2013 and December 28, 2012 was \$6.9 million and \$7.3 million, respectively.

(4) Accrued expenses and other current liabilities

Accrued expenses and other current liabilities as of December 27, 2013 and December 28, 2012 consisted of the following (in thousands):

	2013	2012
Income taxes payable	\$6,493	\$6,631
Accrued compensation	10,003	8,893
Accrued restructuring costs	493	733
Deposit on pending divestitures (Note 16)	--	6,100
Legal reserve	5,302	5,716
Other accrued expenses	14,044	16,124
	\$36,335	\$44,197

(5) Intangible assets, net

Intangible assets as of December 27, 2013 and December 28, 2012 consisted of the following (in thousands):

	2013	2012
Intangible assets subject to amortization (definite lives):		
Customer relationships	\$3,300	\$3,300
Technology	2,000	2,000
Total	5,300	5,300
Accumulated amortization:		
Customer relationships	(3,300)	(2,833)
Technology	(2,000)	(2,000)
Total	(5,300)	(4,833)
Net intangible assets subject to amortization	--	467
Intangible assets not subject to amortization (indefinite lives):		
Tradename	2,040	2,600
	\$2,040	\$3,067

In the fourth quarter of 2013, we recorded an impairment charge of approximately \$0.6 million related to two trade names in our Wireless and Network segments. Of the \$0.6 million impairment charge, \$0.4 million resulted from a significant decline in product revenues related to the Network trade name primarily due to customer losses in the fourth quarter of 2013, and \$0.2 million resulted from a decline in forecasted product revenues related to the Wireless trade name due to a change in our plans with respect to branding certain new products to be sold in the future.

As of December 27, 2013, our intangible assets with finite lives were fully amortized. Amortization expense for intangible assets was approximately \$0.5 million for the years ended December 27, 2013 and December 28, 2012.

(6) Debt

Total long-term debt, net of discount, as of December 27, 2013 and December 28, 2012 consisted of the following (in thousands):

	2013	2012
Oaktree term loans	\$114,237	\$103,514
Senior convertible notes	22,315	22,315
Less: Oaktree term loans discount	(24,207)	(29,076)
	112,345	96,753
Less: current portion of long-term debt	(22,315)	--
	\$90,030	\$96,753

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

Overview

On November 20, 2012, we entered into a credit agreement with certain affiliates of investment funds managed by Oaktree Capital Management, L.P. (such affiliates of such investment funds collectively, "Oaktree") pursuant to which Oaktree extended a new \$75.0 million senior secured Term A Loan and exchanged \$28.5 million of principal and unpaid interest of our outstanding senior convertible notes for a new \$28.5 million secured Term B Loan. As a result of the Oaktree refinancing, we repaid \$55.0 million of debt outstanding under our existing senior credit facility, which was scheduled to mature in February 2013.

On March 11, 2013, we entered into a forbearance and commitment letter with Oaktree ("Letter Agreement"). Oaktree agreed, subject to certain specified conditions to forbear from taking any action, including acceleration of payment of the term loans, if we fail to satisfy the secured leverage ratio, the total net debt leverage ratio, and the minimum liquidity covenants included in the credit agreement for the fourth quarter of 2012 and for each quarter in 2013. In addition, the credit agreement includes events of default, including receipt of a judgment or order for payment in excess of the threshold amount as defined in the credit agreement. With respect to the Halo Electronics case and the Turkish legal matter, subject to certain specified conditions, Oaktree agreed to forbear from taking any action including acceleration of payment of the term loans in the event of judgments or orders of payments that arise through January 1, 2014. Refer to further discussion of these legal matters in Note 10, Commitments and contingencies.

On February 21, 2014, we amended the credit agreement, including modifications to the financial covenants. The amendment also extended the waiver of any default with respect to the judgments in the Halo Electronics case and the Turkish legal matter through the maturity date of November 20, 2017 subject to certain specified conditions.

On February 21, 2014, we entered into agreements with the holders of approximately \$20.7 million of the \$22.3 million of our senior convertible notes to exchange their notes for new Term B Loans, shares of our common stock, and cash (collectively "the Exchange Transaction"). In aggregate, the Exchange Transaction resulted in the issuance of \$14.9 million of new Term B Loans, 1.1 million shares of our common stock, and \$2.1 million of cash in exchange for approximately \$20.7 million of the \$22.3 million of outstanding senior convertible notes. The Term B Loans are identical to the Term B Loan issued to Oaktree in November 2012.

Term Loans

As of December 27, 2013 and December 28, 2012, the Oaktree term loans had a carrying value of \$90.0 million and \$74.4 million, respectively, reconciled as follows:

	Term A	Term B	Total
Amount borrowed	\$75,000	\$28,514	\$103,514
Discount associated with warrant and common stock	(21,449)	(8,154)	(29,603)
Carrying value, November 20, 2012	53,551	20,360	73,911
Accretion of discount	377	150	527
Carrying value, December 28, 2012	53,928	20,510	74,438
Accretion of discount	3,497	1,373	4,870
PIK Interest	8,155	2,567	10,722
Carrying value, December 27, 2013	\$65,580	\$24,450	\$90,030

The interest rate on the Term A Loan is 12.0% per annum, and the interest rate on the Term B Loan is 10.0% per annum. Interest on each term loan may, at our election, be paid in cash or paid in kind ("PIK") (in the form of

additional principal) through November 2015. Interest is due on the last business day of the calendar quarter. During the year ended December 27, 2013, the principal balance on the Oaktree term loans increased by \$10.7 million due to PIK interest elections made during 2013. The PIK interest election for the fourth quarter of 2013 was made on December 31, 2013, subsequent to our fiscal year-end; therefore interest accrued during the fiscal quarter of \$3.2 million was classified within other long-term liabilities at December 27, 2013 in our Consolidated Balance Sheet.

These term loans mature on November 20, 2017 and are secured by a first lien on the collateral, which includes the shares and assets of certain domestic and international subsidiaries. The term loans are non-amortizing and may be prepaid without any penalty. While the Term B Loan is not junior in relative lien priority to the Term A Loan, the Term B Loan may not be repaid until the Term A Loan is paid in full.

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

Debt discount

Upon closing of the Oaktree term loans on November 20, 2012, we issued to Oaktree 3.7 million shares of our common stock and a warrant to purchase 19.9% of the common stock of Technitrol, our wholly-owned subsidiary. The common stock and warrant were recorded as a discount of \$29.6 million on the Oaktree loans, which is being accreted over the term of the loans using the effective interest rate method. The common stock was valued at \$13.2 million based on the trading price at the closing date, and the warrant was valued at \$16.4 million based on the estimated incremental equity value of the Company to be transferred to Oaktree. On January 22, 2013, the warrant was cancelled and the Company issued 1,000 shares of Series A preferred stock to Oaktree. Refer to discussion of the preferred stock in Note 7, Preferred stock.

Debt covenants

During the year ended December 27, 2013, in accordance with the Letter Agreement, Oaktree agreed to forbear from taking any action, including acceleration of payment of the term loans, if we failed to satisfy the secured leverage ratio, the total net debt leverage ratio, and the minimum liquidity covenants included in the credit agreement for each quarter in 2013.

Under the February 2014 amendment to the credit agreement, we are no longer subject to the minimum liquidity and the total net debt leverage ratio covenants for fiscal year 2014 through the maturity date. In addition, the secured leverage ratio covenants were modified. The secured leverage ratio is calculated as the ratio of consolidated secured debt, which includes the term loans, and our rolling four quarters' EBITDA (as defined in the credit agreement).

The secured leverage ratio requirements, as defined in the amended agreement, are set forth in the table below:

Test Period End Date(s)	Secured Leverage Ratio
March 31, 2014 through December 31, 2014	11.00 to 1.00
March 31, 2015 through December 31, 2015	9.50 to 1.00
March 31, 2016 through December 31, 2016	8.00 to 1.00
March 31, 2017 through December 31, 2017	5.00 to 1.00

In addition, our capital expenditures are limited to \$10.0 million in fiscal 2013, \$12.0 million in fiscal 2014, and \$14.0 million in fiscal 2015 and in each fiscal year thereafter.

As of December 27, 2013, we are also subject to financial covenants with respect to the loan commitment in the Letter Agreement. The effectiveness of the loan commitment is subject to compliance with certain covenants including the following financial covenants for each quarter in 2013: the secured leverage ratio is not to exceed 13.00 to 1.00 and the total net debt leverage ratio is not to exceed 14.00 to 1.00. As of December 27, 2013, we are in compliance with these financial covenants. The loan commitment expires on March 31, 2014.

Debt issuance costs

We incurred debt issuance costs in connection with the credit agreement and Letter Agreement. These debt issuance costs were deferred and are being amortized to interest expense over the term of the loans using the effective interest method. As of December 27, 2013 and December 28, 2012, we have \$9.3 million and \$4.1 million, respectively, of unamortized deferred loan costs. The short-term portion of these unamortized deferred loan costs is recorded in

prepaid and other current assets and the long-term portion is recorded in deferred loan costs and other assets on our Consolidated Balance Sheets.

The debt issuance costs incurred in connection with the Letter Agreement included the cost associated with the change in the conversion rate of the preferred stock held by Oaktree from 64.38% to 67.9%. In consideration for the forbearance and additional commitment, the preferred stock conversion rate was revised such that the total common stock issued to Oaktree upon conversion of the preferred stock will equal approximately 67.9% of our total common stock (on a pro forma fully diluted basis as of November 20, 2012, and without giving effect to shares of common stock and warrants previously owned by Oaktree). The adjustment to the conversion rate had a fair value of \$5.8 million, based on the market capitalization of the Company's common stock, which was recorded as a deferred loan cost, with an offsetting increase to additional paid-in capital. Refer to further discussion in Note 7, Preferred stock.

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

Restricted cash

As of December 27, 2013, we have certain post-closing obligations under the Oaktree credit agreement for which we have set aside \$0.5 million of cash in an escrow account. This restricted cash has been classified within prepaid expenses and other current assets in our Consolidated Balance Sheet.

Senior Convertible Notes

On December 22, 2009, we issued senior convertible notes, which mature on December 15, 2014. The notes bear a coupon rate of 7.0% per annum that is payable semi-annually in arrears on June 15 and December 15 of each year. At December 27, 2013, we have \$22.3 million of outstanding principal on our senior convertible notes.

These convertible notes rank junior to any secured indebtedness to the extent of the assets that secure such indebtedness, and are structurally subordinated in right of payment to all indebtedness and commitments of our subsidiaries. Holders of our convertible notes may convert their notes to common stock at their option any day prior to the close of business on December 14, 2014. Upon conversion, for each \$1,000 in principal amount outstanding, we will deliver a number of shares of our common stock equal to the conversion rate, which is approximately 15.66 shares of common stock per \$1,000 in principal amount of notes. The initial conversion price was approximately \$63.84 per share of common stock. The conversion rate is subject to change upon the occurrence of specified normal and customary events as defined by the indenture, such as stock splits or stock dividends, but will not be adjusted for accrued interest.

On February 21, 2014, we entered into agreements with the holders of approximately \$20.7 million of the \$22.3 million of our senior convertible notes to exchange their notes for new Term B Loans, shares of our common stock, and cash. In aggregate, the Exchange Transaction resulted in the issuance of \$14.9 million of new Term B Loans, 1.1 million shares of our common stock, and \$2.1 million of cash in exchange for approximately \$20.7 million of the \$22.3 million of outstanding convertible senior notes. The Term B Loans are identical to the Term B Loan issued to Oaktree in November 2012. Refer to Note 20, Subsequent events, for further discussion of the Exchange Transaction in February 2014.

Pursuant to the Series A preferred stock conversion and the resulting issuance of 8.2 million shares of common stock, a “change in control” under the terms of the senior convertible notes was deemed to have occurred since Oaktree beneficially owns a majority of the outstanding shares of our common stock. Such change in control triggered our obligation to repurchase all remaining outstanding senior convertible notes. We expect to provide notice on March 13, 2014 to all holders of outstanding senior convertible notes that a change in control occurred. We will be required to pay the \$1.6 million of outstanding amounts due on either May 1, 2014, or December 15, 2014, the maturity date, depending upon elections made by the note holders.

Senior Credit Facility

Prior to the Oaktree refinancing, we had a senior credit facility that provided for \$55.0 million of borrowings. On March 9, 2012, we amended our senior credit facility and the revised terms reduced the borrowings permitted under the credit facility from \$60.8 million to \$55.0 million, increased the interest rate on the outstanding borrowings, reduced our permitted capital expenditures and reduced the available cash we were required to maintain. We incurred fees and expenses related to the March 2012 amendment, including \$1.3 million of fees upon execution of the amendment, legal fees, and other expenses. In addition, we recorded a charge of approximately \$0.3 million to write off previously capitalized fees and costs that related to the credit facility and its amendments.

In connection with the March 2012 amendment to the senior credit facility, we issued to the bank group at that time warrants to purchase approximately 0.26 million shares of our common stock at an exercise price of \$0.10 per share. The warrants vested over time until we repaid the outstanding borrowings under the senior credit facility in full by certain dates. Consequently, warrants to purchase 0.12 million shares of common stock became vested during the year ended December 28, 2012, of which 0.02 million warrants have been exercised. Warrants to purchase 0.14 million additional shares of common stock reverted back to us and were canceled upon retirement of the outstanding borrowings under the senior credit facility on November 20, 2012.

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

We recorded the fair value of the equity-classified warrants of \$2.0 million as debt issuance costs. The value of the warrants was determined on the date of grant using the Black-Scholes option pricing model with the following assumptions: risk-free interest rate of 0.46%, volatility of 80.0%, a three-year term, and no dividend yield. The valuation also took into account the probability that warrants would vest and become exercisable at June 28, 2012, September 28, 2012, and December 31, 2012. These vesting probabilities were based on management's estimates regarding the probability of success and timing related to the possible sale of certain non-strategic assets and additional financing opportunities that would enable us to repay the outstanding borrowings under the credit facility by these dates.

The senior credit facility was scheduled to mature in February 2013; however, we repaid the \$55.0 million outstanding under the credit facility on November 20, 2012 in conjunction with the issuance of the Oaktree term loans.

Loss on Extinguishment of Debt

During the year ended December 28, 2012, the Company recorded a loss on early extinguishment of debt of \$3.2 million in connection with the Oaktree refinancing transactions, which included the write-off of debt issuance costs of \$1.7 million and lender fees incurred of \$1.5 million. During the year ended December 27, 2013, the Company incurred an additional \$1.2 million of debt extinguishment costs for lender fees incurred in connection with post-closing obligations under the Oaktree credit agreement.

Aggregate Long-term Debt Maturities

The aggregate maturities of current and long-term debt at December 27, 2013, excluding future payment in kind interest elections made on our Oaktree term loans, are as follows (in thousands):

Year Ending	
2014	\$22,315
2015	--
2016	--
2017	114,237
2018	--
Thereafter	--
	\$136,552

(7) Preferred stock

In accordance with the Investment Agreement with Oaktree dated November 7, 2012, we issued to Oaktree a warrant to purchase 19.9% of the common stock of a wholly-owned subsidiary of the Company. The warrant was issued pending shareholder approval of an amendment to the Company's Articles of Incorporation to authorize the issuance of Series A preferred stock ("preferred stock"). Upon approval of the amendment at a special shareholders meeting on January 21, 2013, the warrant was terminated and 1,000 shares of preferred stock was issued to Oaktree in accordance with the Investment Agreement.

The preferred stock, which has no par value, ranks, with respect to any matter including any dividend, distribution rights or redemption rights, equally in priority and preference to all of our common stock, except that (i) in the event of any voluntary or involuntary liquidation, dissolution or winding up of the Company, the holders of the preferred stock are entitled to be paid out of the assets available for distribution to our shareholders, before any payment is made

to the holders of our common stock, in an amount per share equal to 10 cents, and (ii) the holders of the preferred stock have limited voting rights with respect to matters affecting the rights of the preferred stock.

In accordance with the Investment Agreement, the preferred stock was automatically convertible into such number of shares of our common stock that would result in Oaktree having received 67.9% of our total common stock (on a pro forma fully diluted basis as of November 20, 2012, and without giving effect to shares of common stock and warrants previously owned by Oaktree).

In conjunction with the Exchange Transaction, we amended the Investment Agreement in February 2014 such that the 1,000 shares of Series A preferred stock held by Oaktree would convert into shares of common stock at such time that we acquired and cancel at least 90% of the \$22.3 million of our outstanding senior convertible notes. In accordance with the Investment Agreement, as amended, the Series A preferred stock was converted into 8.2 million shares of our common stock upon completion of the Exchange Transaction on February 21, 2014.

On January 22, 2013, we recorded a mark-to-market adjustment of \$2.9 million to adjust the warrant liability to \$15.1 million, its fair value at the cancellation date. The \$2.9 million loss is recorded in other income (expense), net. The cancellation of the warrant and the issuance of 1,000 shares of preferred stock resulted in the settlement of the warrant liability and an increase to additional paid-in-capital of \$15.1 million.

Table of Contents

Pulse Electronics Corporation and Subsidiaries

Notes to Consolidated Financial Statements, continued

On March 11, 2013, in connection with the Letter Agreement, we increased the preferred stock conversion rate from 64.38% to 67.9%. The adjustment to the conversion rate had a fair value of \$5.8 million, and has been recorded as a deferred loan cost, with an offsetting increase to additional paid-in capital. These deferred loan costs are being amortized to interest expense over the term of the loans using the effective interest method.

We determined the fair value of the warrant liability and the fair value of the change in the preferred stock conversion rate to be equal to the estimated incremental value of the Company's common stock to be transferred to Oaktree upon the issuance of the preferred stock. As of January 22, 2013, this estimated incremental value represented the value associated with the increase in Oaktree's ownership from 49.0% to 64.38% of our total common stock (on a pro forma fully diluted basis as of November 20, 2012, and without giving effect to shares of common stock and warrants previously owned by Oaktree). As of March 11, 2013, the estimated incremental equity value represented the value associated with the increase in Oaktree's ownership from 64.38% to 67.9% of our total common stock (on a pro forma fully diluted basis as of November 20, 2012, and without giving effect to shares of common stock and warrants previously owned by Oaktree). We determined the value using the fully diluted common shares outstanding and then derived the estimated incremental equity value attributed to the preferred stock. In addition, we calculated our business enterprise value using both an income approach and a market approach in order to validate that the estimated business enterprise value implied in our warrant liability valuation was reasonable. The income approach calculation was based on the discounted cash flow method and utilized Level 3 inputs, including our revenue and expense projections, a weighted average cost of capital, and a long-term growth rate. The market approach calculations utilized Level 3 inputs, including our revenue and expense projections, EBITDA multiples determined by current trading market multiples of EBITDA for companies operating in businesses similar to us, and revenue multiples related to recent acquisitions of companies operating in businesses similar to us.

(8) Income taxes

For the years ended December 27, 2013 and December 28, 2012, our loss from continuing operations before income taxes was as follows (in thousands):

	2013	2012
Domestic	\$(14,832)	\$(138,770)
Non-U.S.	(7,808)	113,999
Total	\$(22,640)	\$(24,771)

For the years ended, December 27, 2013 and December 28, 2012, our income tax expense was as follows (in thousands):

Current:	2013	2012
Federal	\$462	\$602
State and local	55	102
Non-U.S.	2,952	8,234
	3,469	8,938
Deferred:		
Federal	140	124
State and local	(55)	--
Non-U.S.	829	(2,083)
	914	(1,959)

Net tax expense \$4,383 \$6,979

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

A reconciliation of the U.S statutory federal income tax rate with our effective income tax rate was as follows:

	2013	2012
U.S. statutory federal income tax rate	35 %	35 %
Decrease (increase) resulting from:		
State and local income taxes, net of federal tax effect	--	(1)
Non-deductible expenses and other	(21)	(62)
Withholding taxes	(5)	(9)
Tax credits	5	62
Tax effect of valuation allowance	(8)	(214)
Foreign rate differential	(25)	161
Effective tax rate	(19) %	(28) %

The 2013 effective tax rate was primarily impacted by assessments and permanent non-deductible expenses in foreign jurisdictions. The 2012 effective tax rate was primarily impacted by a tax reserve that was recorded in connection with an audit in a non-US jurisdiction as well as U.S. and foreign withholding taxes incurred. At December 27, 2013 and December 28, 2012, we had approximately \$3.5 million and \$7.9 million accrued for uncertain tax positions, of which \$1.7 million and \$4.1 million was classified as other long-term liabilities, respectively. If all of our tax benefits were recognized as of December 27, 2013, approximately \$1.8 million would impact the 2013 effective tax rate.

A reconciliation of the liability for uncertain tax positions for the years ended December 27, 2013 and December 28, 2012 was as follows (in thousands):

	2013	2012
Unrecognized tax benefits at the beginning of the year	\$7,880	\$17,300
Additions to tax positions related to current year	1,202	1,415
Reductions to tax positions related to prior years	(1,058)	(7,090)
Lapses in statutes of limitation	(4,502)	(3,745)
Unrecognized tax benefits at the end of the year	\$3,522	\$7,880

As of December 27, 2013, we have approximately \$0.4 million accrued for interest and/or penalties related to uncertain income tax positions.

We are subject to U.S. federal income tax as well as income tax in multiple state and non-U.S. jurisdictions. With respect to federal and state income tax, tax returns for all years after 2009 are subject to future examination by local tax authorities. With respect to material non-U.S. jurisdictions in which we operate, we have open tax years ranging from 2 to 10 years. We expect our unrecognized tax benefits to change by \$1.8 million within the next twelve months.

Several of our foreign subsidiaries continue to operate under tax holidays or incentive arrangements as granted by various jurisdictions in China. The nature and extent of such arrangements vary, and the benefits of most arrangements will phase out in the future according to the specific terms as set forth by the foreign tax authorities. In the years ended December 27, 2013 and December 28, 2012, the favorable impact of tax holidays is not significant and the amount of benefit related to tax holidays was reduced due to losses and valuation allowances.

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

Deferred tax assets and liabilities from continuing operations included the following (in thousands):

Assets:	2013	2012
Inventories	\$936	\$1,132
Plant and equipment	5,145	6,155
Vacation pay and other compensation	234	218
Pension expense	1,100	928
Stock awards	1,194	68
Accrued liabilities	1,896	1,522
Net operating losses – federal, state and foreign	19,739	22,216
Tax credits	7,368	10,780
Acquired intangibles	2,851	4,120
Other	5,844	8,246
Total deferred tax assets	46,307	55,385
Valuation allowance	(38,191)	(44,697)
Net deferred tax assets	\$8,116	\$10,688
Liabilities:		
Foreign earnings not permanently invested	\$9,243	\$9,535
Restructuring	1,551	1,551
Acquired intangibles	583	529
Other	3,653	3,282
Total deferred tax liabilities	15,030	14,897
Net deferred tax liabilities	\$(6,914)	\$(4,209)
Short-term deferred tax assets	\$1,305	\$1,056
Short-term deferred tax liabilities	(990)	(92)
Long-term deferred tax assets	4,557	2,443
Long-term deferred tax liabilities	(11,786)	(7,616)
Net deferred tax liabilities	\$(6,914)	\$(4,209)

We maintain a valuation allowance when it is more likely than not that all or a portion of a deferred tax asset will not be realized based on consideration of all available evidence. Our assumptions, judgments and estimates relative to the value of our deferred tax assets also takes into account predictions of the amount and the categories of future taxable income, carry-back and carry-forward periods and tax strategies which could impact the realization of a deferred tax asset. As of December 27, 2013, we could not sustain a conclusion that it was more likely than not that we would realize most of our deferred tax assets resulting from recent losses as well as other factors. Consequently, we continue to maintain a valuation allowance against those deferred tax assets. The majority of deferred tax assets which are not subject to a valuation allowance are located in China. We have maintained a valuation allowance as a result of weighing all positive and negative evidence, including our history of losses in recent years and the difficulty of forecasting future taxable income. The decrease in the valuation allowance during the year ended December 27, 2013 is primarily a result of a true-up regarding certain transactions related to the change in control. We intend to maintain a valuation allowance until sufficient positive evidence exists to support its reversal.

Unless utilized, our net operating losses will expire in fiscal years 2014 through 2033, our foreign tax credit carry forwards will expire in fiscal years 2014 through 2023 and our research and development credit carry forwards will start to expire in 2019.

In the fourth quarter of 2012, we reassessed our previous assertion with regard to permanently invested foreign earnings. As a result of our assessment of our potential cash needs in the U.S. in conjunction with certain distributions in 2012 we determined that \$40.0 million of previously unremitted foreign earnings would not be permanently reinvested and therefore we recorded a deferred tax liability in 2012 for the net tax-effect of these earnings. Aside from this change, we have generally not provided for U.S. and foreign withholding taxes on our non-U.S. subsidiaries' undistributed earnings which are considered permanently reinvested. We expect our foreign earnings will be used to service our non-U.S. debt and maintain our foreign operations and, thus are permanently reinvested outside of the U.S. for the majority of our foreign earnings. The majority of our cash requirements are generated by our non-U.S. subsidiaries, our manufacturing and operations are primarily outside of the U.S., and we anticipate that a significant portion of our opportunities for future growth will be outside the U.S. In addition, we expect to use a significant portion of the cash to service debt outside of the U.S. We continue to maintain our permanent reinvestment assertion with regard to the remaining undistributed earnings outside of the U.S. As of December 27, 2013, the amount of cash associated with permanently reinvested foreign earnings was approximately \$14.3 million. We have not, nor do we anticipate the need to repatriate these funds to the U.S. However, if funds are repatriated, we would need to accrue and pay taxes on such amounts.

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

As of December 27, 2013, we have estimated there was approximately \$267.2 million of accumulated and undistributed earnings in these foreign subsidiaries. Determination of the potential amount of unrecognized deferred income tax liability and foreign withholding taxes is not practicable because of the complexities associated with its hypothetical calculation; however, unrecognized foreign tax credits would be available to reduce some portion of the U.S. liability.

(9) Employee benefit plans

We maintain defined benefit pension plans for certain U.S. and non-U.S. employees. Benefits are based on years of service and average final compensation. For our U.S. plans, we fund at least the minimum amount required by the Employee Retirement Income Security Act of 1974, as amended. We do not provide any post-retirement benefits outside of the U.S., except as may be required by certain foreign jurisdictions. Depending on the investment performance of our plan assets and other contributing factors, funding in a given year may not be required.

The components of our net pension cost (income) related to our defined benefit plans for the years ended December 27, 2013 and December 28, 2012, respectively, was as follows (in thousands):

	2013	2012
Service cost	\$19	\$--
Interest cost	1,616	1,685
Expected return on plan assets	(1,692)	(1,615)
Amortization of transition obligation	--	5
Amortization of prior service costs	--	1
Recognized actuarial gains	14	--
Curtailment gains	(16)	(18)
Net periodic pension cost (income)	\$(59)	\$58

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

The financial status of our defined benefit plans at December 27, 2013 and December 28, 2012 was as follows (in thousands):

	2013	2012
Change in benefit obligation:		
Projected benefit obligation at beginning of year	\$40,636	\$38,195
Service cost	19	--
Interest cost	1,616	1,685
Actuarial (gains) losses	(3,280)	2,969
Benefits paid	(2,056)	(2,152)
Plan curtailments	(16)	(61)
 Projected benefit obligation at end of year	 \$36,919	 \$40,636
Change in fair value of plan assets:		
Fair value of plan assets at beginning of year	\$35,117	\$33,569
 Actual return on plan assets	 (1,644)	 3,592
Employer contributions	123	108
Benefits paid	(2,056)	(2,152)
 Fair value of plan assets at end of year	 \$31,540	 \$35,117
Amounts recognized on the Consolidated Balance Sheets:		
Non-current assets	\$263	\$235
Non-current liabilities	(5,642)	(5,754)
Net amount recorded	\$(5,379)	\$(5,519)

The accumulated benefit obligations for the defined pension plans were \$36.8 million and \$40.2 million as of December 27, 2013 and December 28, 2012, respectively. The unrecognized components of our net periodic pension costs have been included in accumulated other comprehensive income. For the years ended December 27, 2013 and December 28, 2012, the accumulated other comprehensive income for our defined benefit plans included the following components (in thousands):

	2013	2012
Actuarial losses	\$(4,065)	\$(4,027)
Plan curtailment	(84)	(84)
Amortization of prior service costs	(20)	(20)
Amortization of transition obligations	(7)	(7)
Accumulated other comprehensive income	\$(4,176)	\$(4,138)

The pension cost to be amortized from accumulated other comprehensive income in 2013 related to our defined benefit pension plans is expected to be less than \$0.1 million.

The aggregate benefit obligation, accumulated benefit obligation and fair value of plan assets for plans with benefit obligations in excess of plan assets as of December 27, 2013 and December 28, 2012 were as follows (in thousands):

Edgar Filing: PULSE ELECTRONICS CORP - Form 10-K

	2013	2012
Projected benefit obligation	\$36,682	\$40,477
Accumulated benefit obligation	\$36,760	\$40,384
Plan assets	\$31,118	\$34,723

We expect to contribute \$1.1 million to our defined benefit plans in 2014. Additionally, we expect to make benefit payments in 2014 of \$2.1 million from our defined benefit plans.

60

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

Our domestic defined benefit retirement plan has been subject to a claim by the Pension Benefit Guarantee Corporation ("PBGC") relating to the sale of our Electrical segment in 2010. Communications from the PBGC have indicated that the sale of Electrical's North America operations may have resulted in a partial plan termination. We have had ongoing discussions with the PBGC regarding potential additional funding of the plan. Based on our most recent discussions with the PBGC, we may contribute up to \$1.0 million to the plan within the next year and may make similar annual payments in future years until we have funded the plan by \$6.2 million. The potential additional funding would have no impact on the liability recorded as of December 27, 2013. There can be no assurance that the final terms of any agreement reached with the PBGC will reflect the terms offered by the Company in these preliminary discussions.

The defined benefit plans' weighted-average asset allocations at December 27, 2013 and December 28, 2012 were as follows:

<u>Asset category:</u>	2013	2012
Equity securities	11 %	11 %
Fixed income securities	87 %	89 %
Other	2 %	0 %
Total	100 %	100 %

Our asset allocation policy is reviewed at least quarterly. Factors considered when determining the appropriate asset allocation include changes in plan liabilities, an evaluation of market conditions, and possible payment of additional benefits, potential plan termination and tolerance for risk and cash requirements for benefit payments.

A summary of our pension assets that are measured and recorded at fair value on a recurring basis and their level within the fair value hierarchy as of December 27, 2013 and December 28, 2012 is as follows (in millions):

	2013	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Plan assets per asset category (1):				
Cash and cash equivalents	\$0.1	\$ 0.1	\$ --	\$ --
Fixed income securities:				
Corporate bonds (2)	27.5	27.5	--	--
Short-term debt securities (3)	0.5	0.5	--	--
Equity securities:				
Domestic small-cap value (4)	1.0	1.0	--	--
Domestic mid-cap value (5)	1.9	1.9	--	--
International diversified value (6)	0.5	0.5	--	--
Fair value of plan assets	\$31.5	\$ 31.5	\$ --	\$ --

Table of Contents

Pulse Electronics Corporation and Subsidiaries

	2012	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Plan assets per asset category (1):				
Cash and cash equivalents	\$0.1	\$ 0.1	\$ --	\$ --
Fixed income securities:				
Corporate bonds (2)	30.8	30.8	--	--
Short-term debt securities (3)	0.5	0.5	--	--
Equity securities:				
Domestic small-cap value (4)	1.1	1.1	--	--
Domestic mid-cap value (5)	2.1	2.1	--	--
International diversified value (6)	0.5	0.5	--	--
Fair value of plan assets	\$35.1	\$ 35.1	\$ --	\$ --

(1) See Note 15, Fair Value Measurements, for a description of the three levels within the fair value hierarchy.

(2) Debt securities that specialize in investment grade bonds of institutional investors and other treasury related securities

(3) Generally, money market securities that maintain cash for interim purchases.

(4) Equity securities that focus on domestic public companies with low market capitalization.

(5) Equity securities that focus on domestic public companies with a mid-rated market capitalization.

(6) Equity securities that focus on international public companies but diversify their market capitalization to limit investment.

The assumptions used to develop our defined benefit plan data were as follows:

	2013	2012
Discount rate	4.9 %	4.1 %
Annual compensation increases	N/ A	N/ A
Expected long-term rates of return on plan assets	5.0 %	5.0 %

Our measurement date is the last day of the calendar year.

The following table shows our expected benefit payments for the next five fiscal years and the aggregate five years thereafter from our defined benefit plans (in thousands):

<u>Year Ending</u>	
2014	\$2,140
2015	2,115
2016	2,189

2017	2,206
2018	2,235
Thereafter	26,034
	\$36,919

Some of our non-U.S. subsidiaries have defined contribution pension plans which provide benefits for substantially all of their employees. The net pension expense pertaining to these plans included in our results of operations for the years ended December 27, 2013 and December 28, 2012 were \$1.1 million and \$1.1 million, respectively.

We maintain a defined contribution 401(k) plan that covers substantially all of our U.S. employees. The total contribution expense under the 401(k) plan was approximately \$0.7 million and \$0.9 million for the years ended December 27, 2013 and December 28, 2012, respectively. During 2013, we amended these plans and temporarily suspended employer matching contributions.

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

(10) Commitments and contingencies

We conduct a portion of our operations on leased premises, and also lease certain equipment under operating leases. Total rental expense for the years ended December 27, 2013 and December 28, 2012 were \$4.6 million and \$5.1 million, respectively. The aggregate minimum rental commitments under non-cancelable leases in effect at December 27, 2013 are as follows (in thousands):

<u>Year Ending</u>	
2014	\$4,083
2015	2,625
2016	1,572
2017	846
2018	536
Thereafter	797
	\$10,459

Our manufacturing operations are subject to a variety of local, state, federal and international environmental laws and regulations governing air emissions, wastewater discharges, the storage, use, handling, disposal and remediation of hazardous substances and, also, employee health and safety. It is our policy to meet or exceed the environmental standards set by these laws. Through planning and continual process improvements, we strive to protect and preserve the environment by preventing pollution and reducing the consumption of natural resources and materials. However, in the normal course of business, environmental issues may arise. We may incur increased costs associated with environmental compliance and cleanup projects necessitated by the identification of new environmental issues or new environmental laws and regulations.

We accrue costs associated with environmental and legal matters when they become probable and reasonably estimable. Accruals are established based on the estimated undiscounted cash flows to settle the obligations and are not reduced by any potential recoveries from insurance or other indemnification claims. We believe that any ultimate liability with respect to these actions in excess of amounts provided will not materially affect our operations or consolidated financial position, liquidity or operating results.

We are a party to various legal proceedings, claims and assessments that arise in the ordinary course of business, and may continue to incur significant costs in defending or settling legal matters. The total amount and timing of the expected future payments related to these matters cannot be estimated due to the uncertainty of the duration of the legal proceedings and the ultimate scope of other claims. However, an unfavorable outcome in a single matter or in multiple legal matters during the same reporting period could have a material adverse effect on our consolidated financial position, results from operations and cash flows.

We are a defendant in a lawsuit filed in March 2007 by Halo Electronics, Inc. (“Halo”) in the United States District Court, District of Nevada. The case is captioned Halo Electronics, Inc. v. Pulse Electronics, Inc. and Pulse Electronics Corp., Case No. 2:07-cv-00331-PMP-PAL. The plaintiff, Halo, claims that we infringed certain U.S. patents related to an electronic surface mount package, and is seeking injunctive relief and damages. On November 26, 2012, the jury returned a verdict ruling in favor of Halo and found that we willfully infringed on three different patents, specifically U.S. Patent Nos. 5,656,985; 6,297,720; and 6,344,785. The jury verdict also found Pulse liable for approximately \$2.0 million for past damages and interest and for a royalty on all future domestic sales under licenses to use these patents.

On May 29, 2013, the District Court entered final judgment in the case. Halo and the Company have filed cross appeals with the Court of Appeals for the Federal Circuit. The appeals are in the process of being briefed, with completion on the briefing anticipated in April 2014. Pursuant to the Federal Circuits requirements, the parties will engage in another mediation session in April 2014. A hearing before the Federal Circuit is expected to occur in July or August 2014. In July 2013, the District Court ruled against Halo on the willful infringement issue thereby precluding Halo from seeking treble damages and attorney's fees. In addition, although the District Court granted Halo's motion for a permanent injunction against the eight product groups subject to the jury verdict, the District Court granted Pulse's emergency motion to stay the injunction for 90 days through October 15, 2013. Accordingly, we were free to sell the products subject to a 4.5% royalty on relevant U.S. sales during the stay period. The stay period has expired and we are no longer selling the products subject to the injunction.

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

In relation to the appeal filed in the Halo legal matter, we were required by the Court to post a \$1.6 million bond in the third quarter of 2013 for the actual damage amount. The amount of the bond is held in an interest-bearing account in the Company's name, but is restricted and has been classified within prepaid expenses and other current assets in our Consolidated Balance Sheet. The restriction will continue until the resolution of this legal matter.

In light of the Court's summary judgment order and its ruling that we are liable for infringement with respect to our U.S. sales of the products, we increased our legal reserve by approximately \$1.8 million to \$2.0 million during the fourth quarter of 2012. We intend to continue presenting a vigorous defense in the appellate process including maintaining our claim that we owe no liability whatsoever to Halo due to the invalidity of the Halo patents, and contesting the amount of damages asserted by Halo.

During the year ended December 27, 2013 and December 28, 2012, we incurred \$1.3 million and \$1.2 million of legal expenses, respectively, related to this matter.

We are also subject to ongoing tax examinations and governmental assessments in various foreign and domestic jurisdictions. In January 2013, we received a court ruling from the federal tax court in Turkey relating to prior year non-income tax related assessments relating to our former operations, which was upheld in December 2013. The ruling was based on our inability to present certain notarized documents required under Turkish tax law. In January 2014, the Company appealed the decision and requested an annulment of the penalties. The initial judgment ordered us to pay approximately \$3.7 million for fines, penalties, and interest on this matter. Accordingly, we recorded a charge to our legal reserve of approximately \$3.7 million during fiscal year 2012. During the year ended December 27, 2013, we recorded a \$0.5 million decrease to the legal reserve primarily due to foreign currency revaluation.

(11) Accumulated other comprehensive income

A reconciliation of our accumulated balances for each component of other comprehensive income for the years ended December 27, 2013 and December 28, 2012, respectively, was as follows (in thousands):

	Defined Benefit Plan Adjustments	Currency Translation Adjustments	Unrealized Holding Losses on Securities	Total
Balance at December 30, 2011	\$ (3,211)	\$ 25,176	\$ 12	\$21,977
Current year changes	(922)	(352)	--	(1,274)
Balance at December 28, 2012	(4,133)	24,824	12	20,703
Current year changes	(43)	402	(5)	354
Balance at December 27, 2013	\$ (4,176)	\$ 25,226	\$ 7	\$21,057

(12) Stock-based compensation

We have an incentive compensation plan for our employees and outside directors. One component of this plan is restricted stock and restricted stock units, which grants the recipient the right of ownership of our common stock,

generally conditional on continued service for a specified period. Another component is stock options.

64

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

The following table presents the stock-based compensation expense included in the Consolidated Statements of Operations for the years ended December 27, 2013 and December 28, 2012 (in thousands):

	2013	2012
Restricted stock and units	\$898	\$957
Stock options	1,016	932
Total after-tax stock-based compensation expense	\$1,914	\$1,889
Total stock-based compensation included in:		
Selling, general and administrative expenses	\$1,914	\$1,889

There was no income tax benefit for the years ended December 27, 2013 and December 28, 2012 due to the establishment of a full valuation allowance on deferred tax assets in the fourth quarter of 2011.

Restricted stock and units

A summary of our restricted stock activity for the years ended December 27, 2013 and December 28, 2012, was as follows (in thousands, except per share data):

	2013		2012	
	Shares	Weighted Average Stock Grant Price (Per Share)	Shares	Weighted Average Stock Grant Price (Per Share)
Opening nonvested restricted stock and units	104	\$ 26.92	58	\$ 39.70
Granted	284	3.80	59	11.17
Vested	(55)	17.15	(10)	13.57
Forfeited/canceled	(33)	7.82	(3)	10.63
Ending nonvested restricted stock and units	300	\$ 8.91	104	\$ 26.92

As of December 27, 2013, there was approximately \$1.2 million of total unrecognized compensation cost related to grants of restricted stock units expected to be recognized over a weighted-average period of approximately 2.6 years.

Stock options

A summary of our stock option activity for the years ended December 27, 2013 and December 28, 2012, respectively, was as follows (in thousands, except per share data):

	2013		2012	
	Shares	Weighted Average Option Exercise Price	Shares	Weighted Average Option Exercise Price
		Intrinsic Value		Intrinsic Value

Edgar Filing: PULSE ELECTRONICS CORP - Form 10-K

		(Per Share)		(Per Share)		
Opening stock options outstanding	127	\$ 45.10		125	\$ 46.40	
Granted	253	3.82		4	7.30	
Exercised	--	--		--	--	
Forfeited/canceled	(37)	12.69		(2)	48.32	
Ending stock options outstanding	343	18.13	--	127	45.10	--
Ending stock options exercisable	54	\$ 45.44	--	24	\$ 43.70	--

The weighted-average fair value of all stock options granted during 2013 was calculated as \$2.73 per share on the date of grant using the Black-Scholes option-pricing model, which involves management assumptions about the expected term of the option, the risk free interest rate and the estimated volatility. The expected term is calculated using the “simplified” method. Under this method, the expected life is presumed to be the mid-point between the vesting date and the end of the contractual term. The Company will continue to use the “simplified” method until it has sufficient historical exercise data to estimate the expected life of the options. The risk-free interest rate is based on the U.S. Treasury rates at the date of grant with maturity dates approximately equal to the expected term at the grant date. The historical volatility of the Company's stock is used as the basis for the volatility assumption since the Company believes the historical volatility is representative of the expected volatility over the expected term. The weighted-average assumptions of our stock options issued during 2013 and 2012 based on the date of grant are as follows:

65

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

	2013	2012
Dividend yield	0.0 %	0.0 %
Volatility	97.6 %	81.8 %
Risk-free interest rate	0.8 %	0.8 %
Expected life (years)	4.8	4.8

The exercise prices of the options outstanding as of December 27, 2013 range from \$3.80 per share to \$61.50 per share. As of December 27, 2013, there was approximately \$1.1 million of total unrecognized compensation costs related to our outstanding stock option grants to be recognized over a weighted-average period of approximately 2.3 years. There were no stock options exercised during the years ended December 27, 2013 and December 28, 2012.

(13) Per share amounts

For the years ended December 27, 2013 and December 28, 2012, our loss per share calculations was as follows (in thousands, except per share amounts):

	2013	2012
Net loss from continuing operations	\$(27,023)	\$(31,750)
Net loss from discontinued operations	--	(345)
Less: Net earnings (loss) attributable to non-controlling interest	111	(109)
Net loss attributable to Pulse Electronics Corporation	\$(27,134)	\$(31,986)
Basic loss per share:		
Shares	7,994	4,667
Continuing operations	\$(3.39)	\$(6.78)
Discontinued operations	--	(0.07)
Per share amount	\$(3.39)	\$(6.85)
Diluted loss per share:		
Shares	7,994	4,667
Continuing operations	\$(3.39)	\$(6.78)
Discontinued operations	--	(0.07)
Per share amount	\$(3.39)	\$(6.85)

Basic loss per share of common stock is computed by dividing net loss by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share of common stock gives effect to all dilutive potential shares of common stock outstanding during the period. The computation of diluted earnings per share does not assume conversion, exercise or contingent exercise of securities that would have an anti-dilutive effect on earnings per share.

As we had a net loss for the years ended December 27, 2013 and December 28, 2012, we did not include any common stock equivalents related to stock options, restricted shares, and restricted share units in our calculation of diluted loss per share. There were approximately 0.3 million and 0.1 million of stock options outstanding as of December 27, 2013 and December 28, 2012, respectively, and unvested restricted shares and restricted share units outstanding of approximately 0.3 million and 0.1 million as of December 27, 2013 and December 28, 2012, respectively, that were excluded from the computation of weighted average shares outstanding.

In addition, for the year ended December 27, 2013 and December 28, 2012, the effect of the convertible notes and the convertible Series A preferred stock was antidilutive and therefore excluded from our diluted loss per share calculation.

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

(14) Severance, impairment and other associated costsYear Ended December 27, 2013

During the year ended December 27, 2013, the total charges of \$3.3 million included \$1.1 million of severance costs, which consisted of \$0.6 million related to a restructuring action initiated and completed during the third quarter to lower overhead costs and reorganize certain indirect labor functions in China and \$0.5 million related to the program we announced in the second quarter of 2013 to reduce operating expenses, including costs associated with centralization of certain administrative departments and reductions in our engineering resources in our Wireless segment. Additionally, we recorded total impairment charges of \$2.2 million, including the impairment of \$1.6 million of fixed assets that were acquired and developed in connection with a project in our Network segment that we decided to abandon in the third quarter of 2013, as well as \$0.6 million related to two trade names in our Wireless and Network segments. Refer to Note 4, Intangible assets, net, for further details.

As of December 27, 2013, we had \$0.5 million accrued for costs associated with our ongoing restructuring actions, of which a majority is expected to be paid within one year.

Year Ended December 28, 2012

During the year ended December 28, 2012 the total charges of \$5.9 million included \$3.9 million for severance, lease termination and other costs associated with our restructuring program initiated in 2010 to reduce and reorganize the capacity of our manufacturing plants in China as we shift manufacturing to lower cost facilities. Additionally, \$1.1 million related to global workforce reductions, primarily in Europe; \$0.2 million related to severance, and \$0.7 million for the write-down of fixed assets no longer in use as a result of the shutdown of our Korea manufacturing operations and relocation of this manufacturing to facilities in China; and \$0.2 million of additional costs associated with our withdrawal from Wireless' audio components business, which we initiated and substantially completed in 2011. These amounts were partially offset by a \$0.2 million favorable settlement of a lease obligation in the fourth quarter of 2012 for our former corporate headquarters.

The change in the accrual related to severance and other associated costs for the year ended December 27, 2013 and December 28, 2012 was as follows (in millions):

Balance accrued at December 30, 2011	\$4.2
Net expense	5.9
Cash payments	(8.2)
Non-cash charges	(1.2)
Balance accrued at December 28, 2012	0.7
Net expense	3.3
Cash payments	(1.6)
Non-cash charges	(1.9)
Balance accrued at December 27, 2013	\$0.5

(15) Fair Value Measurements

During the year ended December 27, 2013 and December 28, 2012, there were no changes in the fair value level used in the valuation of our financial assets and liabilities measured at fair value on a recurring basis. We categorize our financial assets and liabilities on our Consolidated Balance Sheets into a three-level fair value hierarchy based on inputs used for valuation, which are categorized as follows:

Level 1 Financial assets and liabilities whose values are based on quoted prices for identical assets or liabilities in an active public market.

Level 2 Financial assets and liabilities whose values are based on quoted prices in markets that are not active or a valuation using model inputs that are observable for substantially the full term of the asset or liability.

Level 3 Financial assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's assumptions and judgments when pricing the asset or liability.

67

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

The following table presents our fair value hierarchy for those assets and liabilities measured at fair value on a recurring basis in our Consolidated Balance Sheets as of December 27, 2013 and December 28, 2012 (in millions):

	Fair Value Measurements at December 27, 2013			
	Quoted Prices In Active Markets for Identical Assets (Level 1)	Total	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Long-lived assets held for sale	\$1.9	\$ --	\$ --	\$ 1.9
Total	\$1.9	\$ --	\$ --	\$ 1.9
	Fair Value Measurements at December 28, 2012			
	Quoted Prices In Active Markets for Identical Assets (Level 1)	Total	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Long-lived assets held for sale	\$7.5	\$ --	\$ --	\$ 7.5
Total Assets	\$7.5	\$ --	\$ --	\$ 7.5
Liabilities:				
Warrant Liability	\$12.2	\$ --	\$ --	\$ 12.2
Total Liabilities	\$12.2	\$ --	\$ --	\$ 12.2

The warrant liability measured at fair value on a recurring basis was \$12.2 million as of December 28, 2012. During the first quarter of 2013, the warrant liability was cancelled. The valuation of the warrant liability was based on an estimated business enterprise value, which includes significant unobservable inputs that makes the warrant liability a Level 3 measurement. Refer to the discussion of the valuation methodology and assumptions in Note 7, Preferred stock.

Long-lived assets held for sale are reported at fair value, if, on an individual basis, the fair value of the asset is less than cost. The fair value of assets held for sale is estimated using Level 3 inputs, such as broker quotes for like-kind

Edgar Filing: PULSE ELECTRONICS CORP - Form 10-K

assets or other market indications of a potential selling value which approximates fair value.

A reconciliation of the activity for the assets and liabilities measured at fair value based on unobservable measure criteria for years ended December 27, 2013 and December 28, 2012 are as follows (in millions):

	Warrant liability	Assets held for sale
Fair value at December 30, 2011	\$ --	\$ 8.2
Issuance of warrant liability	16.4	--
Change in fair value (included in other expense, net)	(4.2)	--
Long-lived assets sold	--	(0.7)
Fair value at December 28, 2012	12.2	7.5
Change in fair value (included in other expense, net)	2.9	--
Settlement of warrant liability	(15.1)	--
Long-lived assets sold	--	(5.7)
Foreign currency impact	--	0.1
Fair value at December 27, 2013	\$ --	\$ 1.9

Table of Contents

Pulse Electronics Corporation and Subsidiaries
Notes to Consolidated Financial Statements, continued

The majority of our financial instruments and financial assets approximate fair value, as presented on our Consolidated Balance Sheets. As of December 27, 2013, the estimated fair value of our senior convertible notes was approximately \$16.5 million, as determined through the use of Level 2 fair value inputs. As of December 27, 2013, the estimated fair value of our Oaktree term loans was approximately \$89.5 million. The fair value of the Oaktree term loans is derived from a model that includes significant unobservable inputs which make the Oaktree term loans a Level 3 measurement. These liabilities are not measured at their fair value in our Consolidated Balance Sheets for any period presented.

(16) Divestitures and assets held for sale

During 2012, we entered into a series of definitive agreements for the sale of three of our manufacturing plants in China and equipment related to our encapsulated transformer product line. During 2012, we completed the sale of our encapsulated transformer assets and one of our manufacturing plants and recognized a \$0.7 million gain for the sale of these assets. In 2012, we also received \$6.1 million in cash deposits in connection with the remaining assets, the sales of which were pending the completion of certain administrative closing conditions in China. As of December 28, 2012, these remaining assets had a net carrying value of \$5.7 million and were classified as held for sale within prepaid expenses and other current assets in the Consolidated Balance Sheet. During the first quarter of 2013, we completed the sales of the two manufacturing plants and recognized a \$0.2 million gain for the sale of these assets. During the fourth quarter of 2013, we completed the remaining asset sale under these definitive agreements with the sale of a trademark related to our encapsulated transformer assets and recognized a \$0.5 million gain.

During 2012, we recorded \$0.3 million of costs incurred in connection with an unfavorable litigation outcome involving our former Medtech components business which was sold in 2009.

During 2011, we reclassified the land and building located in our former operations in Tunisia as held for sale within prepaid expenses and other current assets in the Consolidated Balance Sheets. During 2012, we completed the sale of a portion of this real estate for an amount immaterial to our Consolidated Financial Statements and are actively marketing the remaining properties. These assets remain classified as held for sale at December 27, 2013 and have a net carrying value of approximately \$1.9 million.

(17) Statement of cash flow supplementary information

The following table presents our non-cash investing and financing activities supplemental cash flow disclosure for the years ended December 27, 2013 and December 28, 2012 (in thousands):

	2013	2012
Supplemental cash flow disclosures of non-cash investing and financing activities:		
Capital expenditures included in accounts payable	\$391	\$1,548
Debt issuance costs included in accounts payable	1,508	1,247
Common stock and warrant issued in connection with Oaktree recapitalization	--	29,603
Warrant issued in connection with senior credit facility amendment	--	2,013
Cash payments made during the year:		
Income taxes	3,257	10,039
Interest	\$3,436	\$6,973

Diluted loss earnings per share	\$(0.99)	\$(1.53)	\$(2.11)	\$(2.05)

(19) Segment and geographical information

We operate our business in three reportable segments: Network, Power and Wireless. Network produces a variety of passive components that manage and regulate electronic signals for use in a variety of devices. These devices are used in local and wide area networks, such as connectors, filters, filtered connectors, transformers, splitters, micro-filters, baluns and chokes. Power primarily manufactures products that; adjust and ensure proper current and voltage, limit distortion of voltage, sense and report current and voltage and cause mechanical movement or actuation. These products include power transformers, chokes, current and voltage sensors, ignition coils, automotive coils and military and aerospace products. Wireless manufactures products related to the capture or transmission of wireless communication signals, such as antennas, antenna modules and antenna mounting components.

Selling, general and administrative expenses related to the world-wide operation, primarily related to selling, finance, information technology, human resources and other administrative functions, are allocated to each segment based the ratio of its respective net sales to our consolidated net sales.

Our Chief Operating Decision Maker (“CODM”), which we have identified as our Chief Executive Officer, allocates resources and assesses the performance of each segment based on a review of each segment’s net sales and operating profit excluding severance, impairment and other associated costs, debt restructuring and related costs, legal reserve, and costs related to unsolicited takeover attempt. Also, the CODM does not review a measure of segment assets. Many of our long-term assets, including manufacturing facilities and equipment, are shared between our segments; therefore, capital expenditures related to long-term assets cannot be assigned to a specific segment.

Notes to Consolidated Financial Statements, continued

Net sales and operating profit (loss) excluding severance, impairment and other associated costs, debt restructuring costs, legal reserve and costs related to unsolicited takeover attempt per segment for the years ended December 27, 2013 and December 28, 2012 was as follows (in thousands):

	2013	2012
Net sales:		
Network	\$150,570	\$158,089
Power	111,544	120,145
Wireless	93,562	94,935
Total net sales	\$355,676	\$373,169
Operating income (loss) from continuing operations before severance, impairment and other associated costs, debt restructuring and related costs, legal reserve and costs related to unsolicited takeover attempt:		
Network	\$4,839	\$3,519
Power	7,607	5,941
Wireless	(4,673)	(9,901)
Operating income (loss) excluding severance, impairment and other associated costs, debt restructuring and related costs, legal reserve and costs related to unsolicited takeover attempt	7,773	(441)
Severance, impairment and other associated costs	3,342	5,932
Debt restructuring and related costs	--	1,198
Legal reserve	147	5,523
Costs related to unsolicited takeover attempt	--	(545)
Operating income (loss)	4,284	(12,549)
Interest expense, net	(24,492)	(17,435)
Other income (expense) , net	(2,432)	5,213
Loss from continuing operations before income taxes	\$(22,640)	\$(24,771)

Depreciation and amortization per segment for the years ended December 27, 2013 and December 28, 2012 was as follows (in thousands):

	2013	2012
Depreciation and amortization:		
Network	\$2,102	\$1,814
Power	1,286	2,119
Wireless	4,005	3,891
Total	\$7,393	\$7,824

We are a global company that services customers throughout the world. Each of our segments sells products to multinational original equipment manufacturers, original design manufacturers, contract equipment manufacturers and distributors. We attribute customer sales to the country addressed on the sales invoice, as the product is usually shipped to the same country.

The following table summarizes our net customer sales in the geographic areas or regions where our sales are significant for the years ended December 27, 2013 and December 28, 2012 (in thousands):

	2013	2012
Sales to customers in:		
China	\$182,033	\$190,845
United States	46,528	46,395
Asia, other than China	52,683	56,969
Europe	66,520	67,575
Other	7,912	11,385
Total	\$355,676	\$373,169

For the year ended December 27, 2013, one individual customer in our Network segment accounted for 10.8% of our consolidated net sales. For the year ended December 28, 2012, no single customer accounted for more than 10% of our consolidated net sales. In addition, one customer in our Network segment, when aggregated with their CEM suppliers, represents more than 10% of our consolidated net sales in 2012 and 2013.

The following table summarizes our net property, plant and equipment in the geographic areas or regions where our assets are significant (in thousands):

	2013	2012
Net property, plant and equipment located in:		
China	\$14,723	\$16,127
United States	11,614	12,034
Korea	1,045	575
Europe	538	631
Other	35	39
Total	\$27,955	\$29,406

(20) Subsequent events

On February 21, 2014, we entered into agreements with the holders of approximately \$20.7 million of our \$22.3 million outstanding senior convertible notes to exchange their notes for various combinations of Term B Loans, shares of our common stock, and cash (collectively, the "Exchange Transaction"). In aggregate, we exchanged approximately \$14.9 million of new Term B Loans, 1.1 million shares of our common stock, and \$2.1 million in cash for approximately \$20.7 million of the outstanding \$22.3 million senior convertible notes.

The Term B Loan is identical to that issued in our refinancing transaction with Oaktree in November 2012. The interest rate is 10% per annum and is payable-in-kind through November 20, 2015. The term loan matures on November 20, 2017, and is secured by a first lien on the collateral, which includes the shares and assets of certain domestic and international subsidiaries. It is non-amortizing and may be prepaid without any penalty; however the Term B Loan may not be repaid until the existing Term Loan A issued in the Oaktree refinancing is paid in full.

On February 21, 2014, we amended the credit agreement with Oaktree, including modifications to the financial covenants. Under the amendment, we are no longer subject to the minimum liquidity and the total net debt leverage ratio covenants for fiscal year 2014 through the maturity date. In addition, the secured leverage ratio covenants were modified to provide us with additional flexibility to continue to execute our long term strategy.

Pursuant to the amendment, we agreed to grant Oaktree an expansion of its right to nominate individuals to serve as members of the Company's Board of Directors. As such, we agreed to appoint three of Oaktree's designees to the Board and to expand the current number of directors of the Board from seven to nine. We also agreed that, in connection with any meeting of its shareholders at which directors are to be elected, Oaktree shall have the right to designate individuals to the Company's slate of director nominees in proportion to its equity ownership of the Company. So long as Oaktree beneficially owns a majority of our outstanding common stock it will have the right to designate no less than a majority of the individuals comprising the members of such slate.

72

Table of Contents

Pulse Electronics Corporation and Subsidiaries

Notes to Consolidated Financial Statements, continued

In consideration for the covenant modification, we paid Oaktree a fee of 1.5% of its term loan principal, or approximately \$1.8 million, which was added to the principal of the outstanding Term A Loan and Term B Loan on a pro rata basis.

In conjunction with the Exchange Transaction, we amended the Investment Agreement in February 2014 such that the 1,000 shares of Series A preferred stock held by Oaktree will convert into shares of common stock at such time that we acquire and cancel at least 90% of the \$22.3 million of our outstanding senior convertible notes. In accordance with the Investment Agreement, as amended, the Series A preferred stock was converted into 8.2 million shares of our common stock upon completion of the Exchange Transaction on February 21, 2014.
