Section 1 - Registrant's Business and Operations

Item 1.01 Entry into a Material Definitive Agreement.

Edgar Filing: PAY88 - Form 8-K

On September 5, 2006, Pay88, Inc. ("Pay88") entered into a Share Purchase Agreement (the "Share Purchase Agreement") with Chongqing Qianbao Technology Ltd., a limited liability company organized under the laws of the People's Republic of China ("Qianbao"), Ying Bao ("Bao"), and Chongqing Yahu Information Development Co., Ltd., a limited liability company organized under the laws of the People's Republic of China ("Yahu"; and together with Bao, the "Qianbao Shareholders"). Pursuant to the Share Purchase Agreement, Pay88 agreed to acquire Qianbao at a closing held simultaneously therewith by purchasing from the Qianbao Shareholders all of their respective shares of Qianbao's registered capital stock, which represent 100% of the issued and outstanding registered capital stock of Qianbao. In consideration therefor, Pay88 agreed to issue to the Qianbao Shareholders an aggregate of 5,000,000 shares of the Company's Series A Convertible Preferred Stock, to be allocated between the Qianbao Shareholders as follows: 4,950,000 shares to Yahu and 50,000 shares to Bao. Mr. Tao Fan, a brother of Mr. Guo Fan, a director and officer of Pay88, is the Chief Executive Officer of Yahu and owns 5% of its issued shares of capital stock.

For all the terms of the Share Purchase Agreement, reference is hereby made to such agreement annexed hereto as Exhibit 10.2. All statements made herein concerning such agreement are qualified by references to said exhibit.

Section 2. Financial Information

Item 2.01 Completion of Acquisition or Disposition of Assets

The disclosure set forth above under Item 1.01 (Entry into a Material Definitive Agreement) is hereby incorporated by reference into this Item 2.01.

The transactions contemplated under the Share Purchase Agreement were consummated at a closing held on September 5, 2006. Pursuant to the Share Purchase Agreement, at the closing Pay88 purchased from the Qianbao Shareholders all of the issued and outstanding shares of registered capital of Qianbao. In exchange therefor, Pay88 issued to the Qianbao Shareholders an aggregate of 5,000,000 shares of the Company's Series A Convertible Preferred Stock, which were allocated between the Qianbao Shareholders as follows: 4,950,000 shares to Yahu and 50,000 shares to Bao. Mr. Tao Fan, a brother of Mr. Guo Fan, a director and officer of Pay88, is the Chief Executive Officer of Yahu and owns 5% of its issued shares of capital stock.

Each share of Series A Convertible Preferred Stock is convertible, at the option of the holder thereof, into 2.8 shares of Pay88's common stock. Accordingly, the Series A Convertible Preferred shares owned by Yahu are convertible into 13,860,000 shares (representing 57.7%) of the issued and outstanding common stock, and the Series A Convertible Preferred Shares owned by Bao are convertible into 140,000 shares (representing 0.6%) of the issued and outstanding common stock. The holders of shares of Series A Convertible Preferred Stock are entitled to vote together with the holders of the common stock, as a single class, upon all matters submitted to holders of common stock for a vote. Each share of Series A Convertible Preferred Stock will carry a number of votes equal to the number of shares of common stock issuable as if converted at the record date. As such, Yahu and Bao hold approximately 57.7% and 0.6%, respectively, of the total combined voting power of all classes of Pay88 stock entitled to vote.

A. Our History

1. History of Pay88

Pay88 was incorporated on March 22, 2005 under the name "Pay88, Ltd." in the State of New Hampshire. We subsequently decided to reincorporate in the State of Nevada by merging with and into Pay88, Inc., a Nevada corporation formed for such purpose on July 7, 2005. Such merger was effectuated on August 9, 2005.

Pay88 is a development stage company. Prior to our acquisition of Qianbao, we were focused on becoming involved in the business of facilitating money transfers from the United States to China. Pay88 has not commenced operations other than in connection with the execution of the license agreement with Yahu described below and the acquisition of Qianbao described herein.

Money transfers are transfers of funds between consumers from one location to another. Our goal is to offer persons in the United States near instantaneous, efficient and secure online money transfer services to China. In a typical money transfer, we anticipate that a customer located in the United States will conduct money transfer transactions on the internet via our website, which we intend to develop. Utilizing our website, which has yet to be developed, a customer will transfer money using a credit card or a debit from a bank account.

Edgar Filing: PAY88 - Form 8-K

The customer will be able to visit our web site and use his or her credit card to credit his or her account for the amount of money that the customer desires to transfer to a designated recipient in China. Immediately after such transaction over the internet, the recipient's account in China will be credited with the funds. Then the recipient can go to its bank in China and withdraw the money. When the customer initiates the transfer, the software will inform him as to the amount of fees we are to be paid as a result of the transaction. The fee paid to us from the sending customer will be based on the amount to be transferred and the location at which the funds are to be received. We expect our money transfer revenues to be derived primarily from consumer transaction fees and revenues from currency exchange on international money transfers.

Any on-line financial service provider requires quality software to be financially and commercially successful. Optimally, the software should be easy to use for the consumer, have the ability to interact with relative ease with other businesses and financial institutions, and must be secure enough to accommodate the strict internet security regulations of both the United States and China. In our initial stages we had to make the decision to develop an internal software system or attempt to partner with an entity that had already developed the software technology. Due to the time frame that would be required to develop the software and the corresponding costs that would be associated with such an undertaking, we made the decision to seek out and utilize a third party that would accommodate our needs. Specifically, we wanted the system to address the following requirements: experience in the China marketplace; real time transactions; ease of use; reliable and detailed account information; system expandability; internet based; where no bank/credit card is available, payment can be made when client deposits money with a financial institution which holds the money for the client (known as an electronic purse); transactions and transaction data be encrypted with the state-of-the-art network security technology; free registration; low cost of transaction; and on-going technical assistance and support.

- 4 -

On August 3, 2005, we entered into a five year agreement with Yahu which satisfies all the above parameters. Pursuant to such agreement, Yahu will provide the system software to us. We hope that this agreement will assist us towards establishing us as a quality internet money transfer service provider.

Mr. Tao Fan, a brother of Mr. Guo Fan, a director and officer of Pay88, is the Chief Executive Officer of Yahu and owns 5% of its issued shares of capital stock. Yahu is a member of CECA (China Electronic Commerce Association) a nationwide organization in the electronic commerce field in China. Yahu has over 650 commercial users and over 250,000 individual users. The agreement provides for two services to be provided to us by Yahu. The first service is the provision of all proprietary software needed to effectuate fund transfers between the United States and China. The second service to be provided is technical assistance in the areas of installation and future product support. This support includes assistance with all technical aspects of the software as well as problem resolution and general inquiries. Both of these services are to be provided to us by Yahu for a licensing fee that is based upon 20% of the gross fund transfer revenues. The fee is payable on a quarterly basis. The use of the software will enable us to provide wire transfers from the United States to China.

On June 8, 2006, we entered into a binding Letter of Intent with QianBao. Pursuant to the Letter of Intent, the Company and QianBao agreed to use their best efforts to negotiate and agree to a mutually acceptable definitive agreement on or before October 31, 2006, pursuant to which we will have purchased from QianBao certain assets, including its intellectual property,

Edgar Filing: PAY88 - Form 8-K

cash, certain real estate holdings, online payment system, software domain name, and customer base. In consideration for the purchase of such assets, we agreed to issue to QianBao shares of our preferred stock, whose preferences and conversion rights were to have been negotiated between us and QianBao.

During the course of our negotiations with Qianbao, it was determined that we would acquire Qianbao by purchasing all of the issued and outstanding shares of registered capital from its stockholders instead of purchasing its assets. As discussed above, on September 5, 2006, we entered into a Share Purchase Agreement, pursuant to which we acquired Qianbao at a closing held on the same date by purchasing from the stockholders of Qianbao all of the issued and outstanding shares of Qianbao's registered capital. In consideration for the sale of their shares of Qianbao, the stockholders of Qianbao received in the aggregate 5 million newly issued shares of the Company's Series A Convertible Preferred Stock.

2. History of Qianbao

Qianbao was incorporated on April 24, 2006, under the name "Chongqing Qianbao Technology Ltd." under the laws of the People's Republic of China. Qianbao is a development stage company and has not had any business operations or revenues since its inception. Qianbao intends to build one or more internet websites on which it will operate a distribution platform through which various suppliers of consumer products will be able to offer their products for sale to consumers or retailers visiting such websites. Qianbao currently has one internet website: <http://www.iamseller.com>. At present, the main products intended to be offered for sale on such website include the following: prepaid game cards, which allow the holder thereof to play online games for the designated allotted time; prepaid calling cards; and prepaid study cards, which allow the holder thereof to use online software that assists in the learning of various subjects including Chinese, English and cooking. Qianbao expects to generate revenue by earning commissions on the sales of such products and other products made from its website. The commission will be a percentage of the revenues generated from such sales; the specific amount of such percentage will be negotiated between Qianbao and each supplier of products sold on Qianbao's website.

- 5 -

On July 3, 2006, Qianbao purchased an office located at No. 78 1st Yanghe Village, Jiangbei District, Chongqing, China for a purchase price of \$358,389. Such office serves as Qianbao's executive offices.

B. Our Business

Following our acquisition of Qianbao, we intend to focus on both of lines of our business. We will continue our efforts to develop our money transfer business. In addition, through our subsidiary, Qianbao, we will focus on our efforts to engage in the sale of consumer products through Qianbao's website.

1. Our Money Transfer Business

We hope to be able to facilitate secure online money transfer services from the United States to China. We would like to initially focus our services to people within the United States seeking to wire transfer money to China. Therefore, we hope to build and execute a marketing campaign that targets areas within the United States that has a large population of Chinese expatriates. Once we have sufficient funds, we intend to employ various methods of marketing which may include internet advertising, telemarketing and commercial advertisements.

As discussed above, on August 3, 2005, we entered into a five (5) year agreement

Edgar Filing: PAY88 - Form 8-K

with Yahu, pursuant to which Yahu will provide to us the software we need to process money transfers. We hope that this agreement will assist us towards establishing us as a quality internet money transfer service provider. We believe that such software is easy to use for the consumer, has the ability to interact with relative ease with other businesses and financial institutions, and is secure enough to accommodate the strict internet security regulations of both the United States and China. We also believe that the software addresses the following requirements: experience in the China marketplace; real time transactions; ease of use; reliable and detailed account information; system expandability; internet based; where no bank/credit card is available, payment can be made when client deposits money with a financial institution which holds the money for the client (knows as an electronic purse); transactions and transaction data be encrypted with the state-of-the-art network security technology; free registration; low cost of transaction; and on-going technical assistance and support.

- 6 -

We recognize that our current management and Board of Directors do not have sufficient marketing experience to create and execute an effective marketing plan. Accordingly, it is our intention to seek out a consulting firm(s) that specializes in this arena. Currently, we are focusing our efforts on developing a request for proposal for prospective marketing firms. Generally we are seeking firms with experience in the Chinese American population.

The electronic money transfer industry is highly competitive. The payment network we plan to introduce will encounter strong competition from many other banks and money wire transfer companies, including many with greater financial resources than ours.

As the global money transfer market continues to expand, we expect there to be significant competition from companies similar to ours, as well as from larger and more established companies. Our competitors include the following:

Capital Electronic-Store (Capital Electronic-Store Online Payment Platform) was founded in March 1999. It is the earliest online payment service platform that implemented online transactions among multiple banks and multiple regions. Now it supports China's 19 banks and 60 plus cards and 4 international credit cards for online payment. It owns huge customers groups comprised of individual consumers as well as nearly 600 business enterprises and institutions, government agencies and social organizations.

The IPS of Universal e-Commerce China Ltd (IPS) is an internet payment system (IPS) developed by Universal Technologies Holdings Ltd. Its fast and secure trade mode has been widely accepted. The system has been widely used in many well-known e-commerce web sites. While they are not presently our direct competitors, they possess all the necessary software and regulation requirements as well as a solid customer base to swiftly become active in our environment.

SmartPay Jieyin Limited was funded in 2001. It is a company devoted to mobile payments that can be made from a clients' cell phone. A cell phone user can use his handset as a payment terminal to pay service or products via Jieyin's mobile payment system. While we do not offer "mobile payments", the ability to effectuate a wire transfer is similar in function.

Financial transaction reporting and state banking department regulations affect our business. As a money transmitter, we must comply with a number of domestic and international regulatory requirements, including the following:

- o state licensing laws;

Edgar Filing: PAY88 - Form 8-K

- o federal and state anti-money laundering and the federal government's Office of Foreign Assets Control ("OFAC") regulations;
- o laws of various foreign countries regulating the ability to conduct a money transfer business and requiring compliance with anti-money laundering regulations;
- o state unclaimed property reporting; and
- o state, federal and international privacy laws.

- 7 -

In the United States, 45 states require us to be licensed in order to conduct business within their jurisdiction. Requirements to be so licensed generally include minimum net worth, surety bonds, operational procedures and reserves or "permissible investments" that must be maintained in an amount equivalent to all outstanding payment obligations issued by us. The state minimum net worth requirements range from \$5,000 to \$100,000, depending on the number of offices or agents within the particular state. The types of securities that are considered "permissible investments" vary from state to state, but generally include United States government securities and other highly rated debt instruments. Most states require us to file reports on a quarterly or more frequent basis, verifying our compliance with their requirements. To assist in obtaining all required licenses the company anticipates allocating \$50,000 towards the procurement of the required regulatory licenses. Such funds may come from the sale of equity and/or debt securities and/or loans.

The state of New Hampshire, which is the only state in which we currently conduct business, does not require us to be so licensed in order to conduct our business within its jurisdiction. However, the legislature of the state of New Hampshire is currently considering proposed legislation that would require us to be so licensed. If such legislation is passed, we will have to ensure that we are in compliance.

The state of China, which is the only foreign state in which we currently anticipate doing business, may impose new or additional rules on money transfers, including regulations which (i) prohibit transactions in, to or from certain countries, governments, nationals and individuals and entities; (ii) impose additional identification, reporting or recordkeeping requirements; (iii) limit the entities capable of providing money transfer services and sales of payment instruments; (iv) limit or restrict the revenue which may be generated from money transfers, including revenue derived from foreign exchange; (v) require additional consumer disclosures; or (vi) limit the number or principal amount of money transfers which may be sent to or from the jurisdiction.

Under the USA Patriot Act, money service businesses, including our agents, are required to establish anti-money laundering compliance programs that include: internal policies and controls; the designation of a compliance officer; ongoing employee training; and an independent review function.

Unclaimed property laws of every state require that we track the relevant information on each money order or money transfer and, if unclaimed at the end of the statutory abandonment period, that we remit the proceeds of the unclaimed property to the appropriate jurisdiction. State abandonment periods for money orders and money transfers range from three to seven years, while those for official checks are generally three to five years. Certain foreign jurisdictions also may have unclaimed property laws.

In the ordinary course of our business, we collect certain types of consumer data and thus are subject to privacy laws. We are subject to the Gramm-Leach-Bliley Act of 1999 (the "GLB Act"), which requires that financial institutions have in place policies regarding the collection and disclosure of

Edgar Filing: PAY88 - Form 8-K

information considered nonpublic personal information. We intend to comply with the GLB Act by posting a privacy notice on our website, as well as posting a privacy notice on the forms completed by individuals in order to use services (for example, on our money transfer "send" form). We also intend to have confidentiality/information security agreements in place with our third-party vendors and service providers to the extent required by the GLB Act.

- 8 -

If we fail to comply with any applicable laws and regulations, this failure could result in restrictions on our ability to provide our products and services, as well as the imposition of civil fines and criminal penalties. We need to develop a compliance program to monitor and address legal and regulatory requirements and developments.

Pay88 does not employ any persons with respect to its money transfer business. All functions with respect to our money transfer business, including development, strategy, negotiations and clerical, are currently being provided by our officers on a voluntary basis.

2. The Business of our Subsidiary, Qianbao.

Through Qianbao, we intend to build one or more internet websites on which we will operate a distribution platform through which various suppliers of consumer products will be able to offer their products for sale to consumers or retailers visiting such websites. Qianbao currently has one internet website: <http://www.iamseller.com>. At present, the main products intended to be offered for sale on such website include the following: prepaid game cards, which allow the holder thereof to play online internet games for the designated allotted time; prepaid calling cards; and study cards, which allow the holder thereof to use online software that assists in the learning of various subjects including Chinese, English and cooking.

We are in the process of arranging for the following companies to supply products to be sold on Qianbao's website: Shandong Tianfu Online Platform (supplier of game cards); Sifang Online Distribution Platform (supplier of game cards); Chongqing Digital World (supplier of phone cards); Chongqing E Net Chongqing Sifang (supplier of phone cards); Chongqing Taoxing (supplier of study cards); and Chongqing Dezheng Technology Development. We have not entered into any agreements with any of such suppliers.

Qianbao has many companies which have financial, technical and marketing resources significantly greater than those of Qianbao. Qianbao's major competitors include Yun Web, Cobuy, Star software, Jun Web, 17173, China card Net and gotogame. All of these competitors have been in operation for over two years, while we began our business this year.

Qianbao currently has forty-eight employees, all of whom are employed on a full time basis. Twenty employees are involved in technical operations of the company, twenty are involved in sales and marketing, and the remainder is involved in human resources and finances.

All employees are employed pursuant to our standard employment contract, which sets forth the term of the employment, duties, compensation, and other such matters. In addition, all of our employees are required to sign our standard confidentiality agreement, pursuant to which they agree to maintain the confidentiality of all proprietary information of our company.

MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

Plan of Operation

We do not expect to generate any revenues over the next twelve months. Through our subsidiary, Qianbao, we will focus on developing our internet distribution platform on Qianbao's website and to begin selling products on such website. We will also continue our efforts to become involved in the business of facilitating money transfers between the United States and China.

As of September 5, 2006, Pay88 has \$128,750 in cash. We do not believe that such funds will be sufficient to effectuate our plans with respect to both our money transfer business and Qianbao's business. However, such funds will be sufficient to effectuate our plans with respect to the business of our subsidiary, Qianbao, over the next twelve months.

Over the next twelve months, Qianbao will continue to focus on developing its website, www.iamseller.com, and to build other internet websites on which it will operate a distribution platform through which various suppliers of consumer products will be able to offer their products for sale to consumers or retailers visiting such websites. Qianbao will continue to its efforts to arrange for suppliers to offer for sale on such website the following products: prepaid game cards, which allow the holder thereof to play online internet games for the designated allotted time; prepaid calling cards; and study cards, which allow the holder thereof to use online software that assists in the learning of various subjects including Chinese, English and cooking. Qianbao is in the process of arranging for the following companies to supply products to be sold on Qianbao's website: Shandong Tianfu Online Platform (supplier of game cards); Sifang Online Distribution Platform (supplier of game cards); Chongqing Digital World (supplier of phone cards); Chongqing E Net Chongqing Sifang (supplier of phone cards); Chongqing Taoxing (supplier of study cards); and Chongqing Dezheng Technology Development. We have not entered into any agreements with any of such suppliers.

After Qianbao's internet distribution platform has been developed and we are ready to begin selling products on Qianbao's website, we may seek additional capital for the purpose of financing our marketing efforts. We may also seek additional capital for the purpose of financing our plans with respect to our money transfer business. We continue to expect to incur a minimum of \$250,000 in expenses in order to effectuate our plans regarding our money transfer business. We estimate that this will be comprised mostly of professional fees including; \$50,000 towards the procurement of the required regulatory licenses, \$75,000 towards the planning of a comprehensive marketing campaign and \$25,000 towards addressing technological infrastructure concerns. Additionally, \$100,000 will be needed for general overhead expenses such as for salaries, corporate legal and accounting fees, office overhead and general working capital. Accordingly, we will have to raise the funds to pay for these expenses.

- 10 -

There can be no assurance that additional capital will be available to us. Although we generally intend to raise additional funds, we have no specific plans, understandings or agreements with respect to such an offering, and we have given no contemplation with respect to the securities to be offered or any other issue with respect to any offering. We may seek to raise the required capital by other means. We will have to issue debt or equity or enter into a strategic arrangement with a third party. We currently have no agreements,

Edgar Filing: PAY88 - Form 8-K

arrangements or understandings with any person to obtain funds through bank loans, lines of credit or any other sources. Since we have no such arrangements or plans currently in effect, our inability to raise funds for a marketing program will have a severe negative impact on our ability to remain a viable company because even though we have the technical platform to provide wire transfer services, no one will know we can provide these services.
