NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2011

(unaudited)

On March 2, 2005, First Federal Savings and Loan Association of Hazard ("First Federal of Hazard" or the "Association") completed a Plan of Reorganization (the "Plan" or the "Reorganization") pursuant to which the Association reorganized into the mutual holding company form of ownership with the incorporation of a stock holding company, Kentucky First Federal Bancorp (the "Company") as parent of the Association. Coincident with the Reorganization, the Association converted to the stock form of ownership, followed by the issuance of all the Association's outstanding stock to Kentucky First Federal Bancorp. Completion of the Plan of Reorganization culminated with Kentucky First Federal Bancorp issuing 4,727,938 common shares, or 55% of its common shares, to First Federal Mutual Holding Company ("First Federal MHC"), a federally chartered mutual holding company, with 2,127,572 common shares, or 24.8% of its shares offered for sale at \$10.00 per share to the public and a newly formed Employee Stock Ownership Plan ("ESOP"). The Company received net cash proceeds of \$16.1 million from the public sale of its common shares. The Company's remaining 1,740,554 common shares were issued as part of the \$31.4 million cash and stock consideration paid for 100% of the common shares of Frankfort First Bancorp ("Frankfort First") and its wholly-owned subsidiary, First Federal Savings Bank of Frankfort ("First Federal of Frankfort"). The acquisition was accounted for using the purchase method of accounting and resulted in the recordation of goodwill and other intangible assets totaling \$15.4 million.

1. Basis of Presentation

The accompanying unaudited consolidated financial statements, which represent the consolidated balance sheets and results of operations of the Company, were prepared in accordance with the instructions for Form 10-Q and, therefore, do not include information or footnotes necessary for a complete presentation of financial position, results of operations and cash flows in conformity with U.S. generally accepted accounting principles. However, in the opinion of management, all adjustments (consisting of only normal recurring adjustments) which are necessary for a fair presentation of the consolidated financial statements have been included. The results of operations for the three-month period ended December 31, 2011, are not necessarily indicative of the results which may be expected for an entire fiscal year. The consolidated balance sheet as of June 30, 2011 has been derived from the audited consolidated balance sheet as of that date. Certain information and note disclosures normally included in the Company's annual financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted. These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Form 10-K annual report for 2011 filed with the Securities and Exchange Commission.

Allowance for Loan Losses: The allowance for loan losses is a valuation allowance for probable incurred credit losses. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. Management estimates the allowance balance required using past loan loss experience, the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions, and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged off.

The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired.

A loan is impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Loans for which the terms have been modified resulting in a concession, and for which the borrower is experiencing financial difficulties, are considered troubled debt restructurings and classified as impaired.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2011

(unaudited)

1. Basis of presentation (continued)

Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Real estate loans are individually evaluated for impairment. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported, net, at the present value of estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Large groups of smaller balance homogeneous loans, such as consumer and residential real estate loans, are collectively evaluated for impairment, and accordingly, they are not separately identified for impairment disclosures. Troubled debt restructurings are separately identified for impairment disclosures and are measured at the present value of estimated future cash flows using the loan's effective rate at inception. If a troubled debt restructuring is considered to be a collateral dependent loan, the loan is reported, net, at the fair value of the collateral. For troubled debt restructurings that subsequently default, the Company determines the amount of reserve in accordance with the accounting policy for the allowance for loan losses.

The general component covers non-impaired loans and is based on historical loss experience adjusted for current factors. The historical loss experience is determined by portfolio segment and is based on the loss history experience of the Company over the most recent three years and a rolling average of the current year's loss history. This actual loss experience is supplemented with other economic factors based on the risks present for each portfolio segment. These economic factors include consideration of the following: levels of and trends in delinquencies and impaired loans; levels of and trends in charge-offs and recoveries; trends in volume and terms of loans; effects of any changes in risk selection and underwriting standards; other changes in lending policies, procedures, and practices; experience, ability, and depth of lending management and other relevant staff; national and local economic trends and conditions; industry conditions; and effects of changes in credit concentrations. The following portfolio segments have been identified: residential real estate, nonresidential real estate, loans on deposits and consumer and other loans. The residential real estate segment is our primary lending activity and it enables a borrower to purchase or refinance homes in the Banks' respective market areas. We further classify our residential real estate loans as one- to four-family, multi-family or construction. We originate loans to individuals to finance the construction of residential dwellings for personal use or for use as rental property. We do not generally lend to builders for construction of speculative or

custom residential properties for resale. We also offer loans secured by nonresidential real estate, primarily commercial office buildings, churches and properties used for other purposes. Generally, these loans are originated for 25 years or less and do not exceed 75% of the appraised value. Our consumer loans include home equity lines of credit and loans secured by savings deposits.

2. Principles of Consolidation

The consolidated financial statements include the accounts of the Company, Frankfort First, and its wholly-owned banking subsidiaries, First Federal of Hazard and First Federal of Frankfort (collectively hereinafter "the Banks"). All intercompany transactions and balances have been eliminated in consolidation.

4. Investment Securities

The following table summarizes the amortized cost and fair value of securities available-for-sale and securities held-to-maturity at December 31, 2011 and June 30, 2011, the corresponding amounts of gross unrealized gains recognized in accumulated other comprehensive income and gross unrecognized gains:

Available for sale Convities	Amortized	Gross Inrealize gains	Gros d unre losse	ealized	Estim fair value	nated	
Available-for-sale Securities Agency mortgage-backed: residential U.S. Treasury note	\$190 12,500 12,690	\$ 4 - 4	\$	- - -	\$ 194 12,5 12,6	500	
Held-to-maturity Securities Agency mortgage-backed: residential	Amortized cost \$ 5,760	Gross unrecog gains \$ 413	gnized	Gross unrecog losse		Estima fair valu \$ 6,17	e
Available-for-sale Securities	June 30, 20 Amortize cost	Gro ed unre gain	alized	Gross unrea losses	lized	Estim fair value	ated
Agency mortgage-backed: residential	\$ 199	\$4 Gro ed unre	ss ecognize		oss recogn	\$203 ized	Estimated fair

	cost	gains	losses	value
Held-to-maturity Securities				
Agency mortgage-backed: residential	\$6,810	\$447	\$-	\$7,257

Our securities holdings consist of agency mortgage-backed securities, which do not have a single maturity date and a \$12.5 million U.S. Treasury note that matures in February 2012. None of our securities were pledged at December 31, 2011 or June 30, 2011.

There were no sales of investment securities during the fiscal year ended June 30, 2011 or the six-month period ended December 31, 2011.

We evaluated securities in unrealized loss positions for evidence of other-than-temporary impairment, considering duration, severity, financial condition of the issuer, our intention to sell or requirement to sell. Management does not believe other-than-temporary impairment is evident.

Troubled Debt Restructurings:

A Troubled Debt Restructuring ("TDR") is the situation where the Bank grants a concession to the borrower that the Bank would not otherwise have considered due to the borrower's financial difficulties. All TDRs are considered "impaired." The substantial majority of the Bank's residential real estate TDRs involve conceding to refinance a loan to then-current market interest rates despite poor credit history or a high loan-to-value ratio.

During the period ended December 31, 2011, the terms of a certain loan was modified to accept a payment for interest, taxes and insurance for a period of time.

The following table presents the recorded investment in nonaccrual loans, loans past due over 90 days still on accrual and TDRs by class of loans as of December 31, 2011:

Loans

Nonaccrual Past Due

ast Due TDRs on Accrual

5. <u>Loans receivable</u> (continued)

The following table presents the recorded investment in nonaccrual loans, loans past due over 90 days still on accrual and TDRs by class of loans as of June 30, 2011:

(in thousands)	Nonaccrual	Loans Past Due Over 90 Days Still Accruing	TDRs on Accrual Status
One- to four-family residential real estate	\$876	\$-	\$729

The Company granted one TDR loan modification totaling \$192,000 during the six-month period ended December 31, 2011. The pre-modification outstanding recorded investment equaled the post-modification outstanding recorded investment. The TDRs described above did not increase the allowance for loan losses and did not result in charge offs during the six months ended December 31, 2011. There were no TDRs that defaulted during the six-month period ended December 31, 2011 or over the previous twelve months. There are no outstanding commitments to lend on loans classified as TDRs. A summary of the types of TDR loan modifications that occurred during the first six months of fiscal 2012 were as follows:

(in thousands)	Number of Loans	TDRs Performing to Modified Terms		TDRs Not Performing to Modified Terms		Total TDRs
Residential real estate:						
One- to four-family	1	\$	192	\$		\$ 192

Total	\$ 3,181	\$	876	\$ 4,057	\$179,770	\$183,827

Credit Quality Indicators:

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. This analysis is performed on an annual basis. The Company uses the following definitions for risk ratings:

Special Mention. Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

KENTUCKY FIRST FEDERAL BANCORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

December 31, 2011

(unaudited)

5. Loans receivable (continued)

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable.

Loans not meeting the criteria above that are analyzed individually as part of the above-described process are considered to be pass rated loans. Loans listed that are not rated are included in groups of homogeneous loans and are evaluated for credit quality based on performing status. See the aging of past due loan table above. As of December 31, 2011, and based on the most recent analysis performed, the risk category of loans by class of loans is as follows:

(in thousands)	Pass	Special Mention	Substandard	Doubtful	Not rated
Residential real estate:					
One- to four-family	\$—	\$ 64	\$ 2,561	\$ —	\$153,321
Multi-family	7,434		2,184	_	_
Construction	217				
Nonresidential real estate and land	11,382	272			_
Loans on deposits					2,369
Consumer and other					5,066

At June 30, 2011, the risk category of loans by class of loans was as follows:

(in thousands)	Pass	Special Mention	Substandard	Doubtful	Not rated
----------------	------	-----------------	-------------	----------	-----------

Edgar Filing: Kentucky First Federal Bancorp - Form 10-Q

Residential real estate:

One- to four-family	\$ —	\$ 67	\$ 2,180	\$ 	\$156,574

(unaudited)	

7. Disclosures About Fair Value of Assets and Liabilities

ASC topic 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC topic 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in active markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Following is a description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Securities

Where quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted

prices of securities with similar characteristics. Level 2 securities include agency mortgage-backed securities.

Impaired Loans

The fair value of impaired loans with specific allocations of the allowance for loan losses is generally based on recent independent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for difference between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Independent appraisals for collateral-dependent loans are updated periodically (usually every 9-12 months).

Other Real Estate

Nonrecurring adjustments to real estate properties classified as other real estate owned ("OREO") are measured at fair value, less costs to sell. Fair values are based on recent real estate appraisals. These appraisals may use a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

December 31, 2011

(unaudited)

Description

7. Disclosures About Fair Value of Assets and Liabilities (continued)
