Management Policy

Basic Policy

Under the corporate philosophy of *kyosei* living and working together for the common good Canon's basic management policy is to contribute to the prosperity and well-being of the world while endeavoring to become a truly excellent global corporate group targeting continued growth and development.

Management goals

Based on this basic management policy, Canon Inc. launched two consecutive five-year management plans Phase I of its Excellent Global Corporation Plan in 1996 and Phase II in 2001 with the aim of becoming a truly excellent global company. Through these two five-year management plans, the company promoted a range of management reforms, thoroughly strengthening its product competitiveness and financial base. From 2006, Canon will make use of the solid management foundation achieved through the two five-year plans as the company initiates Phase III, a new five-year management initiative, targeting further growth and improved corporate value, pursuing sound growth by maintaining a high level of profitability while further expanding the company's corporate scale. In particular, the company will focus on the following five important management objectives.

- 1) Achieving the overwhelming No. 1 position worldwide in all current core businesses, and firmly establishing three display technologies as businesses
- 2) Establishing new production systems to sustain international competitiveness
- 3) Expanding business operations and establishing a Three Regional Headquarters System through diversification
- 4) Identifying new business domains and accumulating required technologies
- 5) Nurturing truly autonomous and strong individuals promoting everlasting corporate reforms

Mid- to long-term management strategies

In order to realize the above objectives, we will implement the following mid- to long-term management strategies:

- 1) Achieving the overwhelming No. 1 position worldwide in all current core businesses
- In order to realize our objective of obtaining the No. 1 market share position for all of our core products, Canon will focus on thoroughly enhancing each business's product development capabilities and product price competitiveness. Furthermore, in order to realize our objective of becoming No. 1 in each of our businesses, we will carry out the following measures.

As for copying machines and laser beam printers, amid growing demand for color output in the office, we have applied Canon proprietary technology to actively launch competitive new products that are differentiated by their outstanding performance capabilities to expand our market share. Furthermore, we will take advantage of changes in the office network environment due to the spread of broadband networks and aim to get a jump on the competition with the development of a new-concept multifunction device that maximizes the functionality of each device connected to a network. Also, to satisfy the various needs of our customers, we will actively expand our document solutions business through the use of our platform architecture, which makes possible expanded functionality, and by supplying software and services. Furthermore, going forward, we aim to launch products with improved price competitiveness in emerging markets, which are expected to grow significantly, capitalizing on underlying demand to raise our market share.

With regard to inkjet printers, we aim to expand our market share by utilizing Canon-developed high-precision inkjet print heads, which offer a competitive advantage in printing high-quality photo images, and strengthening our lineup of multifunction products, which have become a core segment of the market.

In the digital camera segment, through the timely launch of competitive products that capitalize on our expertise in optical and image-processing technologies, we will further solidify our top market share position. Especially in the expanding market for digital SLR cameras, we aim to further expand our market share by taking advantage of our strong product lineup, spanning the range from professional to entry-level models, along with strengthening such proprietary imaging technologies as CMOS image sensors and the

Table of Contents

DIGIC digital imaging engine, which support the differentiation of Canon products.

As for compact digital cameras, which continue to drop in price, we aim to increase our market share by continuously launching competitive new models in a timely manner while also further strengthening our cost competitiveness through an integrated production system that tightly links all stages of production, from parts manufacturing through to final assembly.

Furthermore, by taking advantage of our strengths in photo printers and digital cameras, we aim to become No. 1 worldwide in the home photo-printing market.

With regard to IC steppers, we will raise our competitiveness in the market by concentrating on the early development of lithography equipment that employs such leading-edge technologies as liquid immersion technology. As for LCD aligners, a market in which Canon has already secured the No. 1 market share position, we aim to strengthen the development of next-generation models to further solidify our position in the future.

2) Enhancing cost competitiveness

Amid intensified price competition in the marketplace, we will continue our efforts to strengthen cost competitiveness in order to raise the price competitiveness of our products. In addition to further advancing the various reform initiatives that we have carried out until now including production reform activities, centered on the cell production system, and prototype-less development, in which every effort has been made to eliminate the need for physical prototypes in the product-development process we will strive to realize a three-in-one foundation for manufacturing that organically integrates development, manufacturing technology, and the factory floor. Plans also call for the introduction of automated production lines using automated assembly systems and robots that operate around the clock, seven days a week, making possible production in Japan at costs that are competitive with production elsewhere in Asia. To realize this goal, we are planning the construction of a new production-engineering center to speed up the strengthening of our production technology capabilities. In addition, we will focus our energies on in-house production, ranging from key devices to various manufacturing equipment and metal molds, and on efforts to improve procurement efficiency of the Canon Group. By thoroughly carrying out these cost-reduction activities we will strive to further lower our cost of sales ratio.

3) Further enhancing technological strength, a source of profit and growth

For a company to continue growing while maintaining profitability, it is essential to make the most of growth areas and increase competitiveness in such areas. To this end, last year we completed the construction of a leading-edge technology research center at our Shimomaruko headquarters in Tokyo to actively promote the creation of next-generation business domains and develop leading-edge technologies. We are also working to move ahead of the competition in the development of leading-edge technologies by pursuing partnerships with the world's top research facilities and universities.

To improve product competitiveness within existing business segments, we are also focusing our efforts on the development of key components and key devices. At the same time, we are working to further bolster base development technologies in the areas of measurement, analysis and simulation with the aim of further shortening development lead times and reducing the number of product prototypes through the realization of prototype-less development processes.

In addition to the three management strategies outlined above, we will also promote group diversification and strive to create new independent businesses with manufacturing subsidiaries at the core.

By steadily implementing these management strategies, we are working to further enhance growth and profitability for the Canon Group and link this to improved corporate value.

Business challenges and countermeasures

At Canon, the creation of new businesses and maintaining our high profitability structure represent two very important management objectives to ensure continuous future growth. As for new businesses, we will promote research into leading-edge technologies in such areas of expertise as biotechnology, nanotechnology and life sciences. Also, to establish new business segments, we will take advantage of M&A opportunities and business tie-ups. Furthermore, we aim to enter the display business, moving away from a focus on still images as we strengthen our ability to deliver video images, which will play an increasingly important role in the broadband era. In this area, we are accelerating our development efforts for our new large-screen flat panel SEDs (Surface-conduction

Electron-emitter Displays) toward full-scale

Table of Contents

commercialization. With this objective in mind, we established a joint venture company for the development and production of SED panels with Toshiba in October 2004.

With regard to maintaining our high profitability structure, in order to effectively respond to the intensifying price competition centered on the consumer goods market and the investment burden that accompanies the launch of new businesses, we believe that it is important to further improve the profit-earning ability of our current businesses. To facilitate this, we will promote the development of new competitive products and actively pursue cost-reduction activities.

We also view our approach to the environment as an important management issue which we need to deal with at the corporate level. From the product development stage through to production, sales, use, recovery, and recycling, we focus our energies on creating environmentally conscious products that realize energy efficiency, resource efficiency, and eliminate the use of hazardous substances. Additionally, we actively promote the development of recycling systems, the expansion of green procurement policies, the disclosure of environmental information, and participation in environmental conservation activities at the community level. Through these kinds of activities, we aim to simultaneously pursue environmental preservation and corporate development.

Basic policy regarding share trading unit

Canon maintains a basic policy of regularly reviewing its share trading unit from the standpoint of enhancing liquidity and stimulating broader investor participation.

In view of this policy, the company changed the number of shares that constitute one trading unit from 1,000 to 100, effective May 6, 2004. Furthermore, the company initiated a 3-for-2 forward stock split with a Record Date of June 30, 2006, making its shares even more accessible to a broader range of potential shareholders.

Basic policy regarding profit distribution

With regard to returning profits to shareholders, Canon actively works to do so mainly through the distribution of dividends, taking into consideration planned future investments, free cash flow, and the company's consolidated business performance.

Specifically, the medium- to long-term objective will be to continuously strive to raise the consolidated payout ratio to around 30 percent.

In accordance with this policy, Canon raised its full-year per-share dividend from 65 yen in 2004, to 100 yen in 2005. And for the period ending December 2006, to further enhance shareholder return, in addition to the interim dividend of 50 yen, Canon plans to pay a year-end dividend of 50 yen (post stock-split basis). Calculated on a pre-stock-split basis, the year-end dividend per share would be 75 yen per share, equivalent to a full-year dividend increase of 25 yen per share.

With regard to dividends from and after the fiscal year ending December 2007, we will review related policies, including the policy-making body and payout frequency.

Matters regarding the parent company, etc.

Canon Inc. does not have a parent company.

Table of Contents

Operating Results and Financial Conditions

2006 First Half in Review

Looking back at the global economy in the first half of 2006, the U.S. economy continued to display growth despite concerns over the effects of high crude oil prices and an increase in interest rates accompanying inflation fear, with private sector spending and corporate capital expenditure supporting expanded domestic demand. In Europe, the economy continued moving toward moderate recovery amid strong exports. Within Asia, China and India maintained high rates of growth while other economies in the region also enjoyed generally favorable performances. In Japan, the economy continued to indicate a trend toward recovery, boosted by an improvement of employment conditions and increased capital spending fueled by an upturn in corporate profits.

As for the markets in which the Canon Group operates, within the camera segment demand for digital single-lens-reflex (SLR) cameras and compact digital cameras continued to realize healthy growth during the term. Within the office imaging product market, demand for network digital multifunction devices (MFDs) remained solid amid the shift toward color. As for computer peripherals, including printers, while demand within the laser beam printer market grew for color models, and shifted within the inkjet printer market from single-function to multifunction models, the segment suffered amid severe price competition. In the optical equipment segment, although the market for steppers, used in the production of semiconductors, indicated a trend toward moderate recovery, the market for projection aligners, which are used to produce liquid crystal display (LCD) panels, declined due to restrained investment by LCD manufacturers. The average value of the yen in the first half was ¥115.63 to the U.S. dollar and ¥142.36 to the euro, representing year-on-year decrease of about 9% against the U.S. dollar, and 5% against the euro.

Amid these conditions, Canon's consolidated net sales for the first half increased by 11.2% from the year-ago period to ¥1,952.3 billion (U.S.\$16,976 million), boosted by a solid rise in sales of digital cameras, color network MFDs and laser beam printers, along with the positive effects of favorable currency exchange rates. The gross profit ratio marked a high level, improving 1.7 points year on year to reach 50.1%. The increase in the gross profit ratio was mainly the result of such factors as the launch of new products and cost reduction efforts realized through ongoing production-reform and procurement-reform activities, along with favorable sales of high value-added products. These absorbed the effects of escalating raw material costs, as well as severe price competition in the consumer product market. Owing to the increase in sales and an improvement in the gross profit ratio, first-half gross profit increased by 15.1% to ¥978.7 billion (U.S.\$8,511 million). As for operating expenses, while first-half R&D expenditures grew by ¥10.1 billion (U.S.\$88 million) for the year-ago period to ¥146.5 billion (U.S.\$1,274 million), the operating expense to net sales ratio improved 0.2 points year on year as a result of limiting growth in selling, general and administrative expenses, with the exception of a temporary increase in expenses related to the relocation of operating bases. Consequently, operating profit in the first half totaled ¥338.5 billion (U.S.\$2,943 million), a year-on-year increase of 25.3%. Although other income (deductions) declined mainly due to an increase in currency exchange losses on foreign-currency-denominated transactions, income before income taxes and minority interests in the first half totaled ¥341.0 billion (U.S.\$2,966 million), a year-on-year increase of 20.2% as interest income grew in line with the rise in the interest rate, and first-half net income totaled ¥214.2 billion (U.S.\$1,862 million), both recording all-time highs on a first-half basis.

Basic net income per share for the first half was ¥160.85 (U.S.\$1.40), a year-on-year increase of ¥29.11 (U.S.\$0.25). (Note: The basic net income per share calculation is based on the number of outstanding shares following the implementation of the stock split previously mentioned in this report.)

Table of Contents**Results by Product Segment**

In the business machine segment, demand for network digital MFDs, which are grouped in the office imaging products sub-segment, has increased significantly for color models in the U.S. and European markets, as well as in the domestic Japanese market. Within this sector, the iR C3170 series, equipped with a new high-speed image-processing chip, and the iR C3220 series continued to sell well, as did the new high-speed iR C6870-series models. Among monochrome network digital MFDs, mid-level models such as the iR4570 series contributed to expanded sales, along with the iR6570, featuring energy-saving performance, while low-end models, such as the iR2020 series with enhanced networking features, also contributed to sales growth. Overall, sales of office imaging products for the first half realized a year-on-year increase of 3.1%. In the field of computer peripherals, sales of laser beam printers increased for both low-end monochrome and color models while sales of supplies also recorded healthy growth, resulting in a year-on-year increase in sales of 15.4%. As for inkjet printers, despite a decline in the unit sales of single-function models and severe price competition in the market, sales in terms of value increased by 4.3% thanks to such factors as a significant increase in unit sales of multifunction models, such as the mid-level PIXMA MP500 and entry-level PIXMA MP150 for overseas markets, as well as favorable sales growth for consumables. As a result, sales of computer peripherals for the first half increased 11.9% year on year. Within the field of business information products, sales increased by 5.8%, amid healthy demand for an expanded lineup of document scanners. Collectively, sales of business machines for the first half totaled ¥1,286.6 billion (U.S.\$11,188 million), a year-on-year increase of 7.5%. Operating profit for the business machines segment totaled ¥294.6 billion (U.S.\$2,561 million), a year-on-year increase of 13.5%, supported by such factors as an improvement in the expense ratio and an increase in gross profit accompanying the growth in sales.

Within the camera segment, digital SLR cameras continued to enjoy robust growth, bolstered by particularly strong sales of the EOS DIGITAL REBEL XT and the newly introduced EOS 30D, which has also led to expanded sales of interchangeable lenses. Sales of compact-model digital cameras also continued to expand steadily, with healthy demand for the PowerShot SD550 and PowerShot SD450, as well as the PowerShot SD700 IS, PowerShot SD630, and PowerShot SD600, launched in the first half. Accordingly, unit sales of digital cameras for the first half expanded more than 20% compared with the year-ago period. In the field of digital video camcorders, newly introduced DVD models delivered strong performances, as did Mini DV models. As a result, overall camera sales for the first half increased by 21.4% from the year-ago period to ¥460.3 billion (U.S.\$4,002 million). The gross profit ratio for the camera segment also rose substantially, boosted by such factors as favorable sales in high value-added products, along with cost-reduction efforts realized through production-reform and procurement-reform activities. As a result, operating profit for the camera segment increased by 75.8% year on year to ¥108.7 billion (U.S.\$946 million).

In the optical and other products segment, while steppers, used in the production of semiconductors, enjoyed steady demand, sales of optical products decreased in the first half amid declining demand for aligners, used to produce LCD panels, due to restrained investment by LCD manufacturers. As for the other products included in the segment, the subsidiary that was acquired last year contributed to significant sales growth. As a result, first-half sales for the optical and other products segment totaled ¥205.4 billion (U.S.\$1,786 million), a year-on-year increase of 14.3%. Operating profit for the segment grew by 10.2% year on year to ¥23.2 billion (U.S.\$202 million), boosted by the increase in gross profit accompanying the increase in sales.

Cash Flow

In the first half of 2006, Canon maintained cash flow from operating activities of ¥323.9 billion (U.S.\$2,816 million), a year-on-year increase of ¥65.9 billion (U.S.\$573 million), reflecting the substantial growth in sales and increased cash proceeds from sales, combined with an increase in net income and depreciation expenses. Capital expenditure totaled ¥208.7 billion (U.S.\$1,814 million), which was used mainly to expand production capabilities in both domestic and overseas regions, as well as to bolster the company's R&D-related infrastructure. Cash flow from investing activities totaled ¥210.3 billion (U.S.\$1,829 million). As a result, free cash flow totaled ¥113.6 billion (U.S.\$987 million), an improvement of ¥36.7 billion (U.S.\$319 million) from ¥76.9 billion for the year-ago period. Cash flow from financing activities recorded an outlay of ¥57.8 billion (U.S.\$503 million), mainly resulting from the dividend payout of ¥59.9 billion (U.S.\$521 million), an increase of ¥24.4 billion (U.S.\$212 million) compared with the previous year. Consequently, cash and cash equivalents, which totaled ¥1,055.2 billion (U.S.\$9,175 million), an

increase of ¥50.2 billion (U.S.\$437 million) from the end of the previous year, remained at a high level.

-6-

Table of Contents

Non-consolidated Results and Dividend

Canon Inc.'s non-consolidated net sales during the first half totaled ¥1,266.0 billion (U.S.\$11,009 million), a year-on-year increase of 9.3%. Ordinary profit grew by 17.1% to ¥246.1 billion (U.S.\$2,140 million) and net income increased 12.8% to ¥155.5 billion (U.S.\$1,353 million), marking all-time highs for both first-half ordinary profit and net income.

The Board of Directors is planning to increase the interim dividend by ¥17.50 (U.S.\$0.15) to ¥50.00 (U.S.\$0.43) per share.

Outlook

As for the outlook for the global economy in the third quarter and thereafter, although there are concerns due to such factors as price trends for crude oil and raw materials, as well as rising interest rates in the U.S., Europe, and Japan, the global economy is likely to continue its course toward modest recovery.

In the businesses in which Canon is involved, demand for digital cameras is expected to continue enjoying robust growth in Japan and overseas markets. As for network digital MFDs and laser beam printers, while demand is projected to shift toward full-color models, severe price competition and shifting demand toward lower-priced models are expected to continue. Within the semiconductor-production equipment market, demand for steppers indicates a trend toward moderate recovery, supported by increased investment by chip manufacturers. In the market for projection aligners used in the production of LCD panels, demand is expected to decline due to restrained investment by LCD manufacturers.

Reflecting the latest performance, the company has revised its forecasts for the 2006 fiscal year and now anticipates consolidated net sales of ¥4,130.0 billion (U.S.\$35,913 million) and, in addition to consolidated income before income taxes and minority interests of ¥700.0 billion (U.S.\$6,087 million), consolidated net income of ¥440.0 billion (U.S.\$3,826 million). As for non-consolidated forecasts, while keeping its non-consolidated sales projection of ¥2,700.0 billion (U.S.\$23,478 million), the company has revised its non-consolidated ordinary profit forecast to ¥500.0 billion (U.S.\$4,348 million) and non-consolidated net income to ¥316.0 billion (U.S.\$2,748 million). These forecasts assume currency exchange rates of ¥114 to the U.S. dollar and ¥143 to the euro, representing the same level against the U.S. dollar, and an approximately 4% depreciation of the yen against the euro compared with previous year.

Table of Contents**Consolidated Outlook**

Fiscal year	Millions of yen			Year ended December 31, 2005	Change (%)
	Year ending		Change

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

CONSOLIDATED

8. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

(1) CHANGES IN GROUP OF ENTITIES

Subsidiaries

Addition: 21 companies

Removal: 5 companies

(2) SIGNIFICANT ACCOUNTING POLICIES

The accompanying consolidated financial statements reflect the adjustments which management believes are necessary to conform them with U.S. generally accepted accounting principles, except for the segment information, as required by Statement of Financial Accounting Standards No.131, Disclosures about Segments of an Enterprise and Related Information.

1. Marketable Securities and Investments

Canon's consolidated financial statements are based on Statement of Financial Accounting Standards No. 115 (SFAS 115), Accounting for Certain Investments in Debt and Equity Securities. Under SFAS 115, certain investments in debt and equity securities should be classified as trading, available-for-sale or held-to-maturity. Canon's debt securities and marketable equity securities consist of available-for-sale and held-to-maturity securities.

Unrealized holding gains and losses, net of the related tax effect, on available-for-sale securities are excluded from earnings and are reported as a separate component of other comprehensive income (loss) until realized.

2. Inventories

Inventories are stated at the lower of cost or market value. Cost is determined principally by the average method for domestic inventories and the first-in, first-out method for overseas inventories.

3. Depreciation

Depreciation is calculated principally by the declining-balance method over the estimated useful lives of assets.

4. Accrued pension and severance cost

Canon has been adopting Statement of Financial Accounting Standards No.87, Employer's Accounting for Pensions.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

Notice regarding revision of projected dividend for the fiscal year
 ending December 31, 2006 (the 106th Business Term)

At a Board of Directors meeting held on July 27, 2006, a decision was made to revise the projected year-end dividend for the fiscal year ending December 31, 2006 (the 106th Business Term) as follows.

1. Reason for the dividend revision

This year, the first year of Canon's latest five-year initiative Phase III of the Excellent Global Corporation Plan the Company expects to exceed its projected financial results.

Based on this expectation, and in order to enhance shareholder return and steadily pursue our medium- to long-term objective targeting a shareholder return ratio of 30%, the following revision was made to the year-end dividend projection.

2. Details of the revision

Record Date	Mid-term	Dividend per share	
		Year-end	Full Year
Previous projection		40.00 yen	90.00 yen
(May 11, 2006)	50.00 yen	(60.00 yen)	(110.00 yen)
Current revision	50.00 yen	50.00 yen	100.00 yen
		(75.00 yen)	(125.00 yen)
This year's dividend payout			
Previous year's dividend payout	32.50 yen	67.50 yen	100.00 yen
(Fiscal year ending December 31, 2005)			

Notes:

The projected year-end dividend reflects a 3-for-2 forward stock split for record date shareholders as of June 30, 2006. For reference only, figures in parenthesis reflect the projected year-end and full year dividend on a pre-stock-split basis.

Furthermore, the dividend for the previous year and the mid-term dividend for this year are presented on a pre-stock-split basis.

This notice contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, plan, and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this notice. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.
