SAP INTERIM REPORT  
JANUARY - SEPTEMBER 2003

Any statements contained in this document that are not historical facts are forward-looking statements as defined in the U.S. Private Securities Litigation Reform Act of 1995. Words such as anticipate, believe, estimate, expect, forecast, intend, may, plan, project, predict and similar expressions as they relate to the Company are intended to identify such forward-looking statements. SAP undertakes no obligation to publicly update or revise any forward looking statements. All forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from expectations. The factors that could affect the Company's future financial results are discussed more fully in the Company's filings with the U.S. Securities and Exchange Commission (the SEC), including SAP's most recent Annual Report on Form 20-F for 2002 filed with the SEC. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of their dates.

The quarterly report discloses certain financial measures, such as pro forma EBITDA, pro forma operating income, pro forma net income and pro forma EPS that are considered non-GAAP financial measures. The non-GAAP measures included in our quarterly report have been reconciled to the nearest GAAP measure as is now required under new SEC rules regarding the use of non-GAAP financial measures. However these measures should be considered in addition to, and not as a substitute for, or superior to, operating income, cash flows, or other measures of financial performance prepared in accordance with generally accepted accounting principles. The pro forma measures used by us may be different from pro forma measures used by other companies.

Management believes that pro forma EBITDA is a widely accepted supplemental measure of evaluating operating performance and liquidity among companies. Further Management believes that pro forma operating income, pro forma net income and pro forma EPS provide supplemental meaningful information to the investor to fully assess the financial performance of our core operations. Management excludes stock-based compensation expenses because we have no direct influence over the actual expense of these awards once we enter into stock-based compensation plans. Eliminated expenses in the pro forma measures are defined as follows:

Acquisition-related charges include amortization of intangible assets acquired in acquisitions.

Impairment-related charges include other than temporary impairment charges on minority equity investments.

Stock-based compensation includes expenses for stock-based compensation as defined under U.S. GAAP (STAR and LTI) as well as expenses related to the settlement of stock-based compensation plans in the context of mergers and acquisitions.

In addition, management gives guidance based on non-GAAP financial measures. Management does not provide its guidance on operating margin and earnings per share based on GAAP measures because these measures include expenses like stock-based compensation, impairment related charges and acquisition related charges. Management views these expenses as less meaningful to assess the financial performance of our core operations or they are factors outside management's control dependent on fluctuations in SAP's share price, or the share price of companies we acquire or in which we invest.

SAP AG ordinary shares are listed on the Frankfurt Stock Exchange as well as a number of other exchanges. In the United States, SAP's American Depositary Receipts (ADRs), each worth one-fourth of an ordinary share, trade on the New York Stock Exchange under the symbol SAP. SAP is a component of the DAX, the index of 30 German blue chip companies.

Information on the SAP ordinary shares is available on Bloomberg under the symbol SAP GR, on Reuters under SAPG.F and on Quotron under SAGR.EU. Additional information is available on SAP AG's home page: [www.sap.com](http://www.sap.com).

As of September 30, seven companies, in which SAP directly holds between 20 % and 50 % of the voting rights or has the ability to exercise significant influence over the operating and financial policies ( associated companies ), are accounted for using the equity method. In the third quarter the number of associated companies increased by one.

The impact of changes in the scope of companies included in the consolidated financial statements has an immaterial effect on the comparability of the consolidated financial statements presented.

**STOCK-BASED COMPENSATION** SFAS 123 requires disclosure of pro forma information regarding net income and earnings per share as if the Company had accounted for its stock-based awards granted to employees using the fair value method. The fair value of the Company s stock-based awards was estimated as of the date of grant using the Black-Scholes option-pricing model.

The weighted average fair value of the Company s stock-based awards granted in 2003 under SAP SOP 2002 until the end of the third quarter amounts to 32.04 per option and was calculated using the following weighted average assumptions:

|                          |       |
|--------------------------|-------|
| Expected life (in years) | 2.5   |
| Risk free interest rate  | 2.6%  |
| Expected volatility      | 68%   |
| Expected dividends       | 0.73% |

The following table illustrates the effect on net income if the fair-value-based method had been applied to all outstanding and unvested awards in each period.
