SkyePharma PLC

**Appointment of New Chairman and
Outcome of Strategic Review**

LONDON, UK, 2 February 2006 - SkyePharma PLC (LSE: SKP; Nasdaq: SKYE) announces that following the completion of its Strategic Review, it has appointed Dr Argeris ("Jerry") Karabelas as Non-executive Chairman. The Strategic Review has been concluded.

Dr Karabelas, aged 53, has had a distinguished career at senior levels in the global pharmaceutical industry. He was Executive of Novartis Pharma and prior to that President of the North American operations of SmithKline Beecham. He was also executive director of Care Capital, a specialist US healthcare investment fund, and is a director of several pharmaceutical and healthcare companies including Human Genome Sciences. Dr Karabelas has been a Non-executive Director of SkyePharma PLC since 2000 and his familiarity with the Company's business will enable him to make an immediate contribution to the Company.

The Strategic Review was initiated in November 2005. As part of this process, Lehman Brothers advised the Company on potential expressions of interest for the Company. As foreshadowed in the announcement of 1 February 2006, the Company is offering for the Company as a whole that the Board feels able to recommend to shareholders. However, the Board is also aware of the interests of returning the Company to sustainable profitability in the shortest possible time, and is considering the sale of its oral and pulmonary products and divest the injectable business interests, for which a number of potential buyers have been identified during the Strategic Review. Any such divestment will be subject to approval by shareholders.

The injectables business, primarily located in San Diego, consists of two marketed products, Depodur® for the treatment of post-surgical pain, and a pipeline of projects in various stages of development, including controlled-release injectable formulations of a number of biological products and DepoBupivacaine, a controlled-release formulation of the local anaesthetic bupivacaine for the control of post-operative pain. DepoBupivacaine is in development and will commence Phase III trials shortly. It has been licenced to Mundipharma in Europe, the United States, American and Japan and to Maruho for Japan. The Board remains convinced that DepoBupivacaine is a product of significant medical need and has major commercial potential. However the Board is conscious of the fact that the development of DepoBupivacaine would be required to maximise the potential of DepoBupivacaine and of the biological products pipeline investment, together with the associated investment in manufacturing capacity, would not be in the best interests of the Company's current resources but also impact the Company's profitability for several years.

The Company believes that the injectables business is a valuable asset and the funds raised by the Strategic Review will enhance the core oral and pulmonary business, including accelerating the development of certain products in the injectables business will consist of the oral and pulmonary products business, with development based in Munich, Germany, Muttenz and in Lyon, France. There are seven marketed oral and pulmonary products, including Paxipar, a number of late-stage products that are close to the market. The pipeline includes SkyePharma's DepoBupivacaine, Flutiform, a combination asthma product that will enter Phase III development in the next few months. Further details of the portfolio and pipeline will be disclosed at the Company's R&D Days. These had to be postponed due to the Strategic Review. Dates will be announced shortly.

Dr Karabelas said: "I am honoured to take on the role of Chairman and look forward to implementing the Strategic Review, particularly given my background in the development of oral and respiratory products. I am very confident I can make an important contribution to its future success. I also relish the opportunity to work with the Company's executive management team with confidence."

The conclusion of the Strategic Review and the fact that the Company is no longer in discussion with any party concerning an offer for the Company as a whole means that the Company is no longer a takeover target. The UK Takeover Panel. Further announcements will be made in due course about the ongoing work of the Company's executive management team.
