

ROYAL BANK OF SCOTLAND GROUP PLC
Form 6-K
August 06, 2010

FORM 6-K
SECURITIES AND EXCHANGE COMMISSION
Washington D.C. 20549

Report of Foreign Private Issuer

**Pursuant to Rule 13a-16 or 15d-16
of the Securities Exchange Act of 1934**

For August 6, 2010

Commission File Number: 001-10306

The Royal Bank of Scotland Group plc

RBS, Gogarburn, PO Box 1000
Edinburgh EH12 1HQ

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F

Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): _____

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): _____

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes

No

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-

The following information was issued as a Company announcement in London, England and is furnished pursuant to General Instruction B to the General Instructions to Form 6-K:

Divisional performance

The operating profit/(loss) of each division before amortisation of purchased intangible assets, integration and restructuring costs, gain on redemption of own debt, strategic disposals, bonus tax, Asset Protection Scheme credit default swap - fair value changes and write-down of goodwill and other intangible assets is shown below.

Group impairment losses	2,487	2,675	4,663	5,162	7,521

Divisional performance (continued)**Key points**

- Operating profit before impairment losses, adjusted for the movement in the fair value of own debt, was £2,737 million, down 23% compared with the first quarter of 2010 but up 31% compared with the second quarter of 2009. Pre-impairment profits grew in every Core division except GBM and RBS Insurance.
- Core Retail & Commercial generated good growth in pre-impairment operating profit during the second quarter, but this was offset by weaker GBM performance in more difficult conditions and by operating losses due to prior year reserve increases in RBS Insurance.

Notes:

- (1) Return on equity is based on divisional operating profit after tax, divided by divisional notional equity (based on 8% of divisional risk-weighted assets, adjusted for capital deductions).
- (2) Adjusted cost:income ratio is based on total income after netting insurance claims and operating expenses.

Key points

Q2 2010 compared with Q1 2010

- Operating profit of £276 million in Q2 2010 was £136 million higher than in the previous quarter. Impairment losses fell £87 million to £300 million. Growth in income of 6% (£72 million) was partly offset by increased costs. Return on equity was 18.8%, compared with 9.4% in Q1 2010.
- UK Retail continues to focus on the delivery of its strategic plan and is benefiting from investment in process improvements and automation. The division launched its customer charter during Q2 2010, which has been well received by customers and staff.

UK Retail (continued)

Key points (continued)

Q2 2010 compared with Q1 2010 (continued)

- UK Retail continued to achieve its growth targets for secured lending while building customer deposits.
 - o Mortgage balances were up 2% on Q1 2010, with continued retention of existing customers and new business sourced predominantly from the existing customer base. Gross lending increased 41% on Q1 2010, which saw low levels of business activity, driven by seasonality and removal of stamp duty relief at the end of 2009. Market share of new mortgage lending was 12%, still well above the Group's 7% share of stock. The Group considers mortgages to be a critical customer need and will continue to make lending available for both new and existing customers.
 - o Unsecured lending fell 2% in the quarter, as repayments continued to exceed new borrowing, which remained subdued in line with trends in the economy.
 - o Deposit growth continued albeit at a slower rate than previously with 1% growth in the quarter. This growth was despite a challenging market place, continued low interest rates and significant maturities of earlier fixed-term products.
 - o The loan to deposit ratio at 30 June 2010 was 114%, 1 percentage point higher than Q1 2010 as a result of continued strong growth in mortgage balances.
- Net interest income increased by 7%, with net interest margin increasing by 22 basis points. Asset margins continued to widen across all products, while liability margins in Q2 2010 were slightly lower than in Q1 2010. Savings margins remained stable, but swap rates on current account hedges declined.
- Non-interest income increased by 1%, with transaction-based fee income remaining stable as growth in the current economic climate remained challenging.
- Costs increased by 3% in the quarter reflecting marketing expenses associated with the launch of the customer charter as well as the impact of annual pay awards. Adjusted for insurance claims, the cost:income ratio improved by 2 percentage points to 56%.
- Impairment losses declined by 22% in Q2 2010. The impairment outlook is expected to remain steady and may improve slightly, subject to economic conditions remaining stable.
 - o Mortgage impairment losses decreased 8% in the quarter due to a reduction in customer default volumes, with performance continuing to benefit from the low interest rate environment.

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form 6-K

- o The unsecured portfolio impairment charge fell 24% to £ 256 million, on a book of £19 billion, due to lower default volumes together with improved collections performance.

- Risk-weighted assets fell marginally in the quarter as the impacts of mortgage volume growth and a retiring cards securitisation were more than offset by lower unsecured balances. Portfolio credit metrics remain stable.

UK Retail (continued)

Key points (continued)

Q2 2010 compared with Q2 2009

- Operating profit increased significantly, with income up 5% and costs down 3%, while impairments were 36% lower than in the previous year, primarily reflecting lower volumes of arrears on the unsecured portfolio.
- Net interest income was 15% higher than Q2 2009, with widening asset margins across all products. Liability margins came under pressure during 2009, with savings margin sacrificed to support balance growth.
- Non interest income decreased 18% versus prior year primarily as a result of changes to the structure of overdraft charges which took effect from Q4 2009.
- Deposit balances were up 8% on Q2 2009. Savings balances grew by 9%, significantly outperforming the market, which remains intensely competitive. Personal current account balances were up 5%, with 2% growth in accounts.
- Mortgage balances at 30 June 2010 were up 13%. UK Retail continues to take proactive steps to support and retain existing customers.
- Costs were 3% lower than in Q2 2009, driven by process re-engineering efficiencies within the branch network and operational centres. The adjusted cost:income ratio fell from 61% to 56%.
- Impairment losses dropped by 36% compared with Q2 2009, primarily reflecting lower arrears volumes on the unsecured portfolio and stabilisation of recovery expectations.

H1 2010 compared with H1 2009

- Net interest income was 16% higher, with net interest margin increasing 20 basis points. Widening asset margins across all products and an increasing number of mortgage customers choosing to remain on standard variable rate were the key drivers. Liability margins, however, fell as a result of lower interest rates, a competitive market place and our focus on saving balance growth.
- Total customer lending grew 9% from H1 2009 with mortgage balances increasing 13%, whilst unsecured balances reduced 8%. Deposit balances grew 8% with savings deposits up 9% and current account balances up 5% on H1 2009.

- Costs decreased by 8%, as process re-engineering helped to deliver lower staff costs and operational efficiencies.
- Impairment losses fell 17% in H1 2010 as improved economic conditions favourably impacted unsecured impairments, which declined by £166 million whilst secured impairments grew by £29 million.

UK Corporate (continued)

Key points

Q2 2010 compared with Q1 2010

- Operating profit increased by 23% to £390 million, driven by good income growth and reduced costs.
- Net interest income increased by 6%. Loans and advances to customers were broadly in line with previous quarter, despite robust levels of gross new lending; margins continue to recover from the low levels reached in 2008 and 2009. Customer deposits grew by £4 billion, with deposit-gathering initiatives continuing through the quarter. Deposit margins remained tight. Net interest margin increased by 12 basis points.
- Non-interest income increased 3%, driven by GBM cross sales and money transmission fees.
- Staff costs were £16 million lower due to phasing of staff compensation. Excluding the £29 million Office of Fair Trading (OFT) penalty taken in Q1 2010, total expenses were 2% lower.
- Impairments were broadly in line with the previous three quarters and continue to reflect the delicate financial condition of many clients, especially in the property and SME sectors.
- Although nominal assets increased by 1%, risk-weighted assets decreased by 4%, primarily reflecting improvements in risk metrics.

Q2 2010 compared with Q2 2009

- Operating profits increased by £305 million, reflecting income growth and significantly lower impairments.
- Net interest income increased by 16%, driven by the recovery in lending margins. Non-interest income increased by 4%, from small increases across most fee and product lines.
- Staff expenses increased by £7 million, with changes to the phasing of staff costs partially offset by reduced redundancy costs. Other expenses increased £32 million, partly as a result of a £19 million legal recovery in Q2 2009. Adjusting for this, total expenses were up 7%.
- Impairments decreased by £252 million compared with Q2 2009, which included a higher charge taken to reflect potential losses in the portfolio not yet specifically identified.

H1 2010 compared with H1 2009

- Operating profit increased by £302 million or 74% compared with H1 2009, driven by strong income performance (up 13%) and significantly lower impairments.
- Net interest income increased by £198 million, 19%, and net interest margin recovered, rising by 41 basis points, reflecting repricing of the loan portfolio and a better funding cost environment than in the prior year, offset by adverse deposit floor impacts. Deposit-gathering initiatives delivered balance growth of 11% and the loan:deposit ratio improved to 119%, compared with 130% at H1 2009.
- Non-interest income increased by 5%, reflecting good refinancing activity levels.
- Total expenses increased £92 million, 12%, or 2% after excluding the OFT penalty and legal recovery and normalising for phasing of staff compensation and 2009 redundancy costs.
- Impairments were £166 million lower, primarily a result of higher charges taken in H1 2009 to reflect potential losses in the portfolio not yet specifically identified.

Key points

Q2 2010 compared with Q1 2010

- Operating profit rose 31% to £81 million, mostly reflecting increased net interest income and a reduction in expenses.
- Competition in the deposit market remains intense. Deposits showed a slight decline from Q1 2010, with continued growth in the UK offset by reductions in the international businesses. At constant exchange rates deposits were flat.
- Loans and advances grew in response to client demand, increasing 3% over the prior quarter with margins continuing to improve.
- Assets under management were affected by adverse market conditions, with balances declining 5%. Assets under management outflows continued in the international businesses, where competition for private bankers has resulted in client attrition.
- Total expenses decreased 6% on the previous quarter reflecting the phasing of compensation accruals. On an underlying basis, total expenses were flat with a reduction in indirect expenses offsetting the impact of the annual pay round and increased investment in staff.

Q2 2010 compared with Q2 2009

- Operating profit decreased by 31% reflecting significant margin pressure, particularly on the deposit book. Net interest income fell 15%, with a marked reduction in net interest margin partly offset by growth in client deposit and loan balances.
- Client deposits grew 3% with increases most evident in the UK as new products attracted funds. Deposit outflows occurred in the international businesses where competition for private bankers has resulted in client attrition.
- Lending margins widened by 22 basis points and loans and advances grew by 20%, reflecting the strong client demand evident during 2009 and 2010.
- Total expenses rose 16% reflecting changes to compensation structures and to indirect expense allocations.

H1 2010 compared with H1 2009

- Trends in the first half were consistent with those exhibited in the second quarter.
- The economic backdrop and highly competitive deposit market have left the division tracking behind its deposit growth targets. As a consequence the loan:deposit ratio has deteriorated to 41%.

Key points

Q2 2010 compared with Q1 2010

- Excluding the movement in fair value of own debt, revenue fell 31% from the strong first quarter, which included excellent performances in credit markets and rates-flow. All fixed income and currency products saw a reduction in revenue during Q2 2010, reflecting a drop in market liquidity as customer flows declined on increased risk aversion. Equities revenue also fell, with lower global equity capital markets volumes and subdued investor confidence.
- Operating profit fell 26% in the quarter, in line with lower revenues. While headline return on equity (RoE) was 20%, adjusting for the fair value of own debt RoE was 14%, still broadly in line with the 2011 strategic plan target of c.15%, in spite of the tough market conditions.

Global Banking & Markets (continued)

Key points (continued)

Q2 2010 compared with Q1 2010 (continued)

- Total costs fell by 20% as a result of lower incentive compensation accruals, with non-staff costs held flat. Excluding the impact of fair value own debt, the compensation ratio was 33%, while the cost:income ratio of 53% remains below 55%, the 2013 strategic plan target.
- Higher impairments reflect a small number of individual provisions.
- Balance sheet management remained tight in Q2 2010, with reverse repos and securities lower than in the prior quarter. Holdings of cash and Treasury bills were reduced at the divisional level, offset by greater holdings of term liquidity instruments at the Group level.
- Risk-weighted assets remained flat over the period, reflecting tight management of underlying risks and regulatory charges.

Q2 2010 compared with Q2 2009

- Operating profit increased by 3% benefitting from an £813 million swing in the fair value of own debt. Excluding this, operating profit fell 51% due to lower revenue and higher impairment losses.
- Excluding the movement in fair value of own debt, revenue fell 25%. Money markets revenue fell sharply from the levels achieved during the exceptional market conditions experienced during the first half of 2009. Credit markets revenue also fell as the trading environment deteriorated in response to uncertainty in the eurozone, although the largely US-based mortgage trading business continued to perform well and has maintained its revenue over the period.
- Portfolio management revenue was boosted by a swing in market derivative values and by lower costs associated with credit risk and balance sheet management trades.
- The widening of the Group credit spreads contrasted with a narrowing in Q2 2009, generating a £331 million credit from the movement in the fair value of own debt compared with a £482 million debit in Q2 2009.

H1 2010 compared with H1 2009

- Operating profit fell 44%. Although Q1 2010 was a strong quarter, Q2 2010 saw weakening investor confidence and subdued deal volumes. This was in contrast to H1 2009 when markets rebounded and revenues were enhanced by wide spreads and volatility.
- Money markets revenue fell sharply as rapidly falling short term interest rates generated exceptional revenue opportunities last year. Rates-flow and Currencies & Commodities also fell meaningfully compared with H1 2009 as the exceptional volatility and wide bid-offer spreads were not repeated in 2010. Credit markets declined a more modest 7% as the mortgage trading business enjoyed both a buoyant market and strong customer demand in H1 2010.
- Growth in portfolio management revenues reflects lower costs incurred on credit risk / balance sheet management trades. The underlying origination and lending business remained flat. A strong finish to Q1 2010 gave way to a subdued Q2 2010 as investor confidence waned following uncertainty in the eurozone.

Global Transaction Services (continued)

Key points

Q2 2010 compared with Q1 2010

- Operating profit increased 20%, or 18% at constant foreign exchange rates, driven by increased deposit income and lower expenses.
- Income increased by 7%, or 6% at constant foreign exchange rates, reflecting higher domestic and international average deposit balances and improving merchant acquiring volumes.
- Expenses fell by 2% and were 1% lower at constant foreign exchange rates. Direct costs were broadly flat, with lower staff compensation offset by increased investment.
- Customer deposits at 30 June were 3% lower than at 31 March, principally as a result of adverse currency movements (down 1% at constant exchange rates). Average balances for the quarter increased by 4%.
- Risk-weighted assets decreased by £1.0 billion as a result of RBS NV moving to advanced status under Basel II.

Q2 2010 compared with Q2 2009

- Operating profit increased 5%, driven by higher income from deposits (average balances were 27% higher), partially offset by expense growth.
- Income was up 4%, reflecting improved deposit volumes, higher transactional foreign exchange income and increased commercial cards activity.
- Expenses increased by 3%, with higher staff compensation partially offset by lower indirect costs.

H1 2010 compared with H1 2009

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form 6-K

- Operating profit increased by 3%, or 5% at constant foreign exchange rates with higher income and lower impairments partially offset by increased expenses.
- Income increased by 2%, or 3% at constant foreign exchange rates, with higher deposit volumes, improved transactional foreign exchange income and strong growth in commercial cards.
- Expenses increased by 3%, as a result of changes to the phasing of staff compensation.
- Customer spot deposit balances at £62.7 billion were up 16% (average balances up 19%) with growth in both the UK and international cash management (ICM) businesses.
- Third party assets increased by £6.3 billion, of which £3.8 billion was due to the bringing of yen clearing activities in-house. Loans and advances to customers increased by 16%, reflecting higher trade finance volumes.
- Risk-weighted assets increased £2.7 billion across the trade and ICM businesses partially offset by some benefits from the completion of the Basel II advanced implementation.

Key points

Q2 2010 compared with Q1 2010

- Operating loss totalled £177 million for the quarter, a deterioration of £40 million from the previous quarter, driven by higher impairment losses. Operating profit before impairment losses increased by 38% on a constant currency basis, with favourable movements on both income and expenses.
- Net interest income increased by 6% in constant currency terms largely driven by higher income on capital. Although the deposit market remained competitive, placing continued pressure on liability spreads, loan margins continued on an upward trend, benefiting from the impact of ongoing pricing actions. As a result, net interest margin increased by 15 basis points to 192 basis points.
- Loans to customers remain broadly unchanged in the quarter in constant currency terms. Customer deposit balances increased by 2% on the same basis, reflecting an ongoing focus on growing the core customer deposit base.

Ulster Bank (continued)

Key points (continued)

Q2 2010 compared with Q1 2010 (continued)

- Total expenses decreased by 10% on a constant currency basis reflecting strong cost discipline across both direct and indirect cost bases.
- Impairment losses increased by £63 million in the quarter. Economic conditions remain challenging with a continued downward pressure on asset values and a resultant impact on the credit quality of customers. The bank continues to support customers through a range of debt management initiatives.

Q2 2010 compared with Q2 2009

- Net interest income reduced by 7% on a constant currency basis with continued pressure on deposit margins partly offset by positive loan pricing actions.
- Loans to customers decreased by 4% in constant currency terms as levels of new business activity remain muted. Customer deposits increased by 23% at constant currency from Q2 2009 driven by a significant uplift in both retail and wholesale customer balances.
- Non-interest income has remained broadly flat over the period reflecting subdued activity levels across most business lines. The bank continues to focus on developing new product lines and diversifying its income base.
- Total expenses declined by 20% in constant currency terms, largely driven by the restructuring programme, which commenced in 2009. The rollout of the programme has resulted in a downward trend in direct expenses throughout 2009 and is a key driver in the reduction in the cost:income ratio from 70% to 58% over the period.
- Impairment losses increased significantly over the period reflecting the deterioration in the Irish economic environment and the resultant impact on customer repayment capacity.
- Risk-weighted assets increased by 20% on a constant currency basis reflecting the continued weak credit environment and consequent procyclical impact.

H1 2010 compared with H1 2009

- An increase in impairment losses of £342 million from H1 2009 has resulted in a significant deterioration in financial performance and an operating loss of £314 million for the period.
- Ulster Bank customer numbers increased by 3% over the period with strong flow trends particularly in retail current and deposit accounts.

- (1) Return on equity is based on divisional operating profit/(loss) after tax, divided by divisional notional equity (based on 8% of divisional risk-weighted assets, adjusted for capital deductions).

Key points

- Sterling continued to weaken over the course of the second quarter, with the average exchange rate declining by 4% compared with Q1 2010.
- Performance is described in full in the US dollar-based financial statements set out on pages 43 and 44.

Key points

Q2 2010 compared with Q1 2010

- US Retail & Commercial returned a profit for the second consecutive quarter, posting an operating profit of \$195 million compared with \$63 million in the prior quarter. Excluding a \$113 million credit related to changes to the defined benefit pension plan, operating profit was up \$19 million, 30%, driven by growth in both net interest and non-interest income. However, economic conditions in the division's core regions remain difficult, with lingering high unemployment, a soft housing market and subdued consumer activity.
- Net interest income was up 2%, while loans and advances were down 1%, reflecting a lack of credit demand. Net interest margin improved by 9 basis points to 2.78%, substantially driven by a continuing change in deposit mix, with continued migration from lower margin time deposits to more favourably priced demand deposit accounts.
- Non-interest income was up 5% with an increase in deposit fees, debit card income and mortgage banking income more than offsetting a \$13 million reduction in securities gains.

US Retail & Commercial (US Dollar) (continued)

Key points (continued)

Q2 2010 compared with Q1 2010 (continued)

- Expenses were down 10%, including the pension credit associated with changes to the defined benefit pension plan. This more than offset movements in mortgage servicing rights and marketing and communications costs partly related to a new brand launch.
- Impairment losses improved slightly as losses associated with other than temporary impairment related to securities were taken in Q1 2010. Loan impairments remained flat at 1.1% of loans and advances.

Q2 2010 compared with Q2 2009

- Operating profit increased to \$195 million from an operating loss of \$19 million.
- Net interest income was up 7%, with net interest margin improving by 46 basis points, driven by changes to deposit pricing and mix offset by lower loan volume.
- Non-interest income was up 5% reflecting higher gains on securities realisations and improved debit card income, but mortgage refinancing activity moderated in 2010, compared with the record levels reached in 2009.
- Expenses were down 14% reflecting the benefit associated with the changes to the defined benefit pension plan and lower deposit insurance costs, including a one-off FDIC assessment in Q2 2009, which more than offset an impairment of mortgage servicing rights, changes in compensation accrual methodology, and higher medical costs.
- Impairment losses declined 7%, following significant loan reserve building in 2009, and have stabilised at 1.1% of loans and advances.
- Customer deposits were down 5% reflecting pricing strategies on low margin term and time products but strong growth was achieved in checking balances. Over 31,000 consumer checking accounts and more than 13,500 small business checking accounts were added over the year. Consumer checking balances grew by 9% and small business balances by 9%.

H1 2010 compared with H1 2009

- Operating profit increased to \$258 million from an operating loss of \$76 million with income up 6%, expenses down 6% and impairment losses down 21%. The drivers are consistent with Q2 2010 compared with Q2 2009.
- Loan impairments decreased as a proportion of loans and advances from 1.3% to 1.1%.

Notes:

- (1) Based on divisional operating profit/(loss) after tax, divided by divisional notional equity (based on regulatory capital).
- (2) Cost:income ratio is based on total income, including investment income and total expenses.
- (3) Loss ratio is based on net claims divided by net premium income for the UK businesses.
- (4)

Combined operating ratio is the expenses (including fees & commissions) divided by gross written premium income, added to the loss ratio, for the UK businesses.

Key points

Q2 2010 compared with Q1 2010

The performance of RBS Insurance was adversely impacted by a significant increase in bodily injury reserving, including adding £241 million to reserves relating to prior years. This resulted in an underwriting and operating loss in the motor book. Actions are in progress to tighten underwriting criteria and to restore the profitability of the business.

RBS Insurance's home insurance business has continued to make good progress and the division has now established itself as the largest home insurance provider within the UK.

As planned, total in-force policies have declined due to a reduction in motor policies following significant re-pricing as well as exiting less profitable partnership and broker business. This decline has been partly offset by growth in home and international policies. International policy numbers now exceed one million.

Total income declined, as the increase in pricing was more than offset by the reduction in in-force policies, mainly resulting from the elimination of higher premium, higher risk motor business.

RBS Insurance (continued)

Key points

Q2 2010 compared with Q1 2010 (continued)

- Net claims were significantly higher than Q1 2010 due to a further need for increased reserves in respect of bodily injury, driven by deterioration in the observed severity of bodily injury claims. An overall adjustment of £320 million was posted in the quarter, of which £241 million was in respect of business written in prior years. Motor pricing continued to be increased in response to the development in this claims experience. In addition, significant progress has been made in removing higher risk business from the overall motor book by targeted rating actions.
- Expenses were flat in the quarter, with higher staff expenses off-set by lower indirect costs.

Q2 2010 compared with Q2 2009

- Net premium income was flat and direct expenses were cut by 7%, but claims costs increased sharply, primarily reflecting the uplift to bodily injury reserves.

H1 2010 compared with H1 2009

- Total in-force policies declined by 2%, driven by a fall of 6% in motor own brand motor policies partly offset by a 7% increase in own brand household and life policies. The partnership and broker segment declined by 12% in line with business strategy.
- Total income increased by 2% as a result of pricing actions, partially offset by a reduction in in-force policies, including the removal of higher premium, higher risk motor business.
- Net claims were 36% higher principally driven by an increase in claims reserves in respect of bodily injury and by adverse weather conditions. Significant motor price increases have been implemented to reflect the rising claims costs. In addition, initiatives are being introduced to adapt pricing models and enhance claims management.
- Direct expenses were reduced by 14% with wage inflation more than offset by a reduction in headcount and marketing expenditure. Recently announced plans regarding site rationalisation, off-shoring activity and further planned headcount reduction, will further drive down expenses,

delivering a more robust and cost-competitive platform for the business.

- Investment income was lower as a result of an impairment charge in the fixed income portfolio booked in Q1 2010, adjusting for this investment income increased reflecting higher gains realised on the sale of corporate bonds.
- The combined operating ratio, including indirect costs, was 120.2% compared with 95.2% in H1 2009, owing to the impact of increased reserving for bodily injury claims partially mitigated by expense ratio improvement. Excluding increased bodily injury reserving relating to prior years, the combined operating ratio was 108.3%.

Central items

	Quarter ended			Half year ended	
	30 June	31 March	30 June	30 June	30 June
	2010	2010	2009	2010	2009
	£m	£m	£m	£m	£m
Fair value of own debt	288	(137)	(478)	151	(94)
Other	49	337	166	386	271
Central items not allocated	337	200	(312)	537	177

Key points

- Funding and operating costs have been allocated to operating divisions, based on direct service usage, the requirement for market funding and other appropriate drivers where services span more than one division.
- Residual unallocated items relate to volatile corporate items that do not naturally reside within a division.

Q2 2010 compared with Q1 2010

- Movements in the fair value of own debt represented a net credit of £288 million in the quarter. The Group's credit spreads widened over the quarter, resulting in a decrease in the carrying value of own debt.
- Other items not allocated during the quarter amounted to a net credit of £49 million, a reduction of £288 million on Q1 2010. This movement was primarily driven by unallocated volatile Group Treasury items and a one-off VAT recovery in Q1 2010 of £170 million.

Q2 2010 compared with Q2 2009

- The credit for change in the fair value of own debt of £288 million, reflecting a marked widening in the Group's credit spreads, compares with a charge of £478 million in the second quarter of 2009.
- Other items not allocated during the quarter declined by £117 million relative to Q2 2009. This movement can primarily be attributed to unallocated volatile Group Treasury items.

H1 2010 compared with H1 2009

- The change in the fair value of own debt was a net credit of £151 million in H1 2010. The Group's credit spreads widened in H1 2010, resulting in a decrease in the carrying value of own debt.
- Other items not allocated during H1 2010 amounted to a net credit of £386 million, compared with £271 million in H1 2009, driven by the items described above.

Non-Core (continued)

Key points

Q2 2010 compared with Q1 2010

- Non-Core reduced its operating loss to £1,324 million in the second quarter, compared with £1,559 million in Q1 2010, with improved results from trading activities and a further reduction in impairment losses.
- Income from trading activities totalled £33 million, compared with a loss of £131 million in the first quarter. The improvement reflected continued widening of credit spreads over the period, generating £188 million of gains on single name credit protection purchased in previous periods. Structured credit and exotic credit losses declined.
- Net interest income fell by £34 million, principally reflecting a reduction of 10% in the loan book, including the completion of a number of business disposals. Markdowns on the value of real estate

and equity finance positions held in the banking book resulted in a loss of £206 million in other operating income, excluding rental income.

- Expenses declined by 10%, partly reflecting the successful completion of a number of business disposals in Asia.
- Impairment losses decreased by 18% to £1,390 million, reflecting a recovery of £270 million on a large single name exposure and the continued slowing of impairments in the corporate sector, offset by further impairments in relation to UK and Irish commercial property.
- Good progress was made in Non-Core's run-off programme, with third party assets (excluding derivatives) reduced by £20 billion to £174 billion. This was largely driven by the division's disposal programme (£8 billion), including the completion of the Asian retail and commercial sales, and portfolio run-off (£6 billion), as well as a favourable currency impact from the strengthening of sterling (£4 billion). The international business disposal plan has made good progress with a number of other transactions expected to close in the second half of 2010.
- RWAs increased by £11 billion to £175 billion, reflecting an increase of £14 billion in RBS NV due to the implementation of Basel II (which was largely offset at Group level by reductions in RBS NV RWAs in other divisions). A reduction of £7 billion in RWAs resulting from disposals and portfolio run-off was partially offset by a £ 5 billion increase in market risk charges.

Q2 2010 compared with Q2 2009

- Operating losses were substantially reduced from the £4,877 million loss recorded in Q2 2009, with significant improvements in both trading income and impairments.
- Impairments were sharply lower than in Q2 2009, which saw a peak for Non-Core impairments. However, high charges continue to be incurred as a result of the continued decline in the UK and Irish commercial property sectors.
- Over the 12 months to 30 June 2010 third party assets (excluding derivatives) were cut by £34 billion, 16%, largely through a combination of disposals, portfolio run off and impairments.

Non-Core (continued)

Key points (continued)

H1 2010 compared with H1 2009

- Non-Core's operating loss improved to £2,883 million in the first half of 2010 from £9,357 million in H1 2009. The bulk of the improvement came from lower impairments (down 42% to £3,094 million) and reduced losses on trading activities (an improvement of £3,703 million compared with H1 2009).
- The reduction in impairments reflected the improving trend that began to emerge towards the end of 2009, particularly in the corporate sector, partly offset by higher provisions taken as a result of the continued decline in the UK and Irish commercial property sectors.
- RWAs increased by £1 billion to £175 billion. This reflects a number of movements, including the implementation of Basel II in RBS NV, largely offset by reductions in RWAs through credit grade changes along with disposals and banking portfolio run-off.

Allocation methodology for indirect costs

For the purposes of managing the operations of the Group, Business Services and Group Centre directly attributable costs have been allocated to the operating divisions, based on their service usage. Where services span more than one division, an appropriate measure is used to allocate the costs on a basis which management considers reasonable. Business Services costs are fully allocated and there are no residual unallocated costs. The residual unallocated costs remaining in the Group centre relate to volatile corporate items that do not naturally reside within a division.

Treasury costs are allocated to operating divisions as follows: term funding costs are allocated based on long-term funding gap or surplus; liquidity buffer funding costs are allocated based on share of overall liquidity buffer derived from divisional stresses; and capital cost or benefit is allocated based on share of divisional risk-adjusted RWAs.

Notes:

- (1) Interest receivable and interest payable on trading assets and liabilities are included in income from trading activities.
- (2) Interest earning assets and interest-bearing liabilities exclude the Retail bancassurance long-term assets and liabilities, attributable to policyholders, in view of their distinct nature. As a result, net interest income has been increased by £3 million (2009 - £15 million).
- (3) Changes in the fair value of interest bearing financial instruments designated as at fair value through profit or loss are recorded in other operating income in the consolidated income statement. In the average balance sheet above, interest includes increased interest income and interest expense related to these instruments of £5 million (2009 - £25 million) and £12 million (2009 - £154 million) respectively and the average balances have been adjusted accordingly.
- (4) Interest receivable has been reduced by £90 million in respect of a non-recurring receivable.
- (5) Interest payable has been increased by £110 million in respect of a non-recurring adjustment.
