Comment

Terry Burman, Group Chief Executive, commented, The Group continued to perform well in the second quarter with like for like sales up by 6.0%.

In the US like for like sales were up by 6.8%, a strong result in a changeable retail environment.

The UK business saw like for like sales growth of 4.4% for the 13 weeks, a performance which was ahead of the general retail market.

Accounting Policy Change in Respect of Extended Service Agreements

Following an amendment to FRS 5 Reporting the substance of transactions in the form of Application Note G Revenue Recognition, the Group, for financial year 2004/05, has changed its accounting policy in respect of extended service agreements sold in the US. The Group will now spread the revenue arising from the sale of such agreements over the anticipated period of claims. Previously the Group recognised the revenue from such plans at the date of sale with provision being made for the estimated cost of future claims arising.

As a result of the change the Group will restate prior years. Therefore the previously reported 2003/04 results will now reflect a decrease in sales of £7.4 million and a non-cash reduction in profit before tax of £7.2 million. Consequently, restated profit before tax for the 52 weeks ended 31 January 2004 will be £204.7 million. It is anticipated that the impact on results for the 52 weeks ending 29 January 2005 will be a decrease in sales of circa £6.5 million and in profit before tax of circa £5.8 million. The effect on brought forward reserves at 31 January 2004 will be a reduction of £35.1 million net of deferred tax, with shareholders funds at 31 January 2004 therefore restated to £692.5 million.

Total sales in this announcement have been reported using the new accounting policy. There is no impact on the like for like sales figures. Interim results for the 26 weeks to 31 July 2004, which are expected to be published on 1 September 2004, will be reported on the revised basis resulting in a reduction in profit before tax of approximately £0.3 million compared to that which would otherwise have been reported. On the same basis the restatement of 26 weeks to 2 August 2003 will result in a reduction of £0.4 million in profit before tax.

Note 1 Impact of constant exchange rates

The Group has historically used constant exchange rates to compare period-to-period changes in certain financial data. This is referred to as constant exchange rates throughout this release. The Group considers this to be a useful measure for analysing and explaining changes and trends in the Group's results. The impact of the re-calculation of sales at constant exchange rates, including a reconciliation to the Group's GAAP sales, is shown below.
