DIGITAL MUSIC GROUP, INC.

NOTES TO CONDENSED FINANCIAL STATEMENTS (Unaudited)

1. ORGANIZATION AND BASIS OF PREPARATION

Digital Music Group, Inc. (the Company) was incorporated in Delaware on April 11, 2005 for the purpose of pursuing digital music opportunities. In February 2006, the Company completed its initial public offering (the IPO) which involved the issuance of 3,900,000 shares of common stock, providing approximately \$33,200,000 in net cash proceeds to the Company, after deducting underwriter discounts, commissions, and other direct expenses related to the IPO. Concurrent with the closing of the IPO, the Company acquired all of the outstanding common stock of Digital Musicworks International, Inc., a California corporation, in exchange for 2,250,000 shares of the Company's common stock. Also concurrently with the closing of the IPO, the Company acquired certain agreements for digital rights to music recordings and assumed certain distribution agreements of Rio Bravo Entertainment LLC, a Delaware limited liability company doing business as Psychobaby, in exchange for 25,000 shares of the Company's common stock.

The financial statements for Digital Music Group, Inc. prior to February 7, 2006 (the effective closing date of the IPO and the acquisitions of Digital Musicworks International, Inc. and certain assets of Rio Bravo Entertainment LLC), are the financial statements of Digital Musicworks International, Inc., which has been designated the Company's accounting acquiror for accounting purposes. The historical shareholders' equity of Digital Musicworks International, Inc. has been restated for all periods prior to February 7, 2006 to give retroactive effect to the acquisition by the Company. The results of operations from the assets acquired from Rio Bravo Entertainment LLC and of the Company are included in the Company's historical financial statements beginning on February 7, 2006.

The accompanying unaudited condensed financial statements are presented pursuant to the rules and regulations of the United States Securities and Exchange Commission in accordance with the disclosure requirements for the quarterly report on Form 10-Q. In the opinion of the management of the Company, the unaudited condensed financial statements reflect all adjustments (consisting of normal recurring adjustments) necessary to fairly state the results for the interim periods presented. Operating results for the three months and six months ended June 30, 2006 are not necessarily indicative of the results that may be expected for the year ending December 31, 2006. These unaudited condensed financial statements should be read in conjunction with the audited financial statements and notes of the Company and Digital Musicworks International, Inc. included in the Company's Annual Report on Form 10-K for the year ended December 31, 2005.

2. ACQUISITIONS AND INITIAL PUBLIC OFFERING

On February 7, 2006, the Company completed its initial public offering of common stock, selling 3,900,000 shares at \$9.75 per share and generating net cash proceeds (after fees and expenses) of approximately \$33,200,000. On the same date, in connection with the closing of the IPO, the Company issued to the underwriters in the offering warrants to purchase an aggregate of 273,000 shares of the Company's common stock. Each of the warrants has an exercise price of \$12.1875 per share, and are exercisable at any time from February 7, 2007 until February 6, 2011. The underwriters paid an aggregate of \$100 for the warrants. The warrants had an estimated fair value at the date of issuance of \$620,529 as determined in accordance with Statement of Financial Accounting Standards No. 123R, *Share-Based Compensation*, assuming a dividend yield of 0%, expected volatility of 35%, risk free rate of return of 4.52%, and an expected term to exercise of 4.6 years. The fair value of the warrants was recorded as an offering cost. Accordingly, the total net proceeds from the Company's IPO were approximately \$32,600,000.

Also on February 7, 2006, the Company concurrently acquired Digital Musicworks International, Inc. and certain assets of Rio Bravo Entertainment LLC in exchange for 2,250,000 and 25,000 shares, respectively, of the Company's common stock. Digital Musicworks International, Inc. has been deemed the Company's acquiror for accounting purposes. The Company had net liabilities and a stockholders' deficit of \$73,305 on the date of acquisition by Digital Musicworks International, Inc.

The purchase price of the assets acquired from Rio Bravo Entertainment LLC on February 7, 2006 totaled \$243,750, which has been allocated to digital music rights. Such rights are being amortized over 24 months, the estimated remaining life of the assets.

Table of Contents

The unaudited pro forma combined statements of operations for the three and six months ended June 30, 2006 and 2005 presented below assume that the acquisitions of Digital Musicworks International, Inc. and certain assets of Rio Bravo Entertainment LLC were closed on January 1, 2006 and 2005, respectively:

	For the three months ended		For the six months ended	
	June 30,		June 30,	
	2006	2005	2006	2005
Revenue	\$ 839,539	\$ 123,260	\$ 1,623,383	\$ 223,672
Cost of revenue:				
Royalties and payments to content owners	386,799	70,665	785,881	130,328
Amortization of master recordings and digital music rights	82,813	35,534	145,004	69,925
Write-down of non-productive assets		73,442		73,442
Gross profit	369,927	(56,381)	692,498	(50,023)
Operating, general and administrative expenses	1,344,198	358,184	2,305,486	895,681
Loss from operations	(974,271)	(414,565)	(1,612,988)	(945,704)
Interest income	388,386	602	608,006	2,898
Interest expense	(3,080)	4,320	(10,733)	7,659
Loss before income taxes	(588,965)	(418,283)	(1,015,715)	(950,465)
Income taxes	(400)		(400)	(800)
Net loss	\$ (589,365)	\$ (418,283)	\$ (1,016,115)	\$ (951,265)
Net loss per common share basic and diluted	\$ (0.07)	\$ (0.09)	\$ (0.13)	\$ (0.20)
Weighted average common shares outstanding basic and diluted	8,599,941	4,700,000	7,781,169	4,700,000

Weighted average shares used in the calculation of the unaudited pro forma combined basic and diluted net loss per share for the three months and six months ended June 30, 2006 include (i) for the entire period, the 2,250,000 shares attributable to Digital Musicworks International, Inc., the 2,425,000 shares of the company outstanding at the IPO date and the 25,000 shares issued in connection with the acquisition of the Rio Bravo Entertainment LLC assets, and (ii) from February 7, 2006 until the end of the period, the 3,900,000 shares sold in the IPO. Weighted average shares used in the calculation of the unaudited pro forma combined basic and diluted net loss per share for the three months and six months ended June 30, 2005 include (i) 2,275,000 shares of Common Stock issued in connection with the acquisitions of Digital Musicworks International, Inc. and the Rio Bravo Entertainment LLC assets, and (ii) 2,425,000 shares of the Company.

The adjustments used in the preparation of this unaudited pro forma combined statement of operations are based on estimates, available information and certain assumptions which may be revised as additional information becomes available. The pro forma financial data do not purport to represent what the Company's combined results of operations would actually have been if such acquisitions had in fact occurred at the beginning of the periods, and are not necessarily representative of the Company's results of operations for any future period since the companies were not under common management or control during the periods presented.

Table of Contents**3. CASH AND CASH EQUIVALENTS**

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. Based upon its investment policy, the Company may invest its cash primarily in deposits with major financial institutions, in highly rated commercial paper, short-term United States treasury obligations, United States and municipal government agency securities and United States government sponsored enterprises. The Company held approximately \$30.1 million and \$468,000 in cash and cash equivalents at June 30, 2006 and December 31, 2005, respectively.

The Company maintains its cash and cash equivalents at financial institutions. The combined account balances at several institutions exceed Federal Deposit Insurance Corporation (FDIC) insurance coverage and, as a result, there is a concentration of credit risk related to amounts on deposit in excess of FDIC insurance coverage. Management believes that this risk is not significant.

4. DIGITAL MUSIC RIGHTS

The Company has acquired digital music rights from record labels, artists and other owners of such rights to various catalogs of music. The cost of acquiring these rights is capitalized and amortized using the straight-line method over the shorter of the term of the related agreement or seven years, which management believes reasonably relates the amount of amortization to the revenue expected to be realized.

Digital music rights comprise the following at:

	June 30, 2006	December 31, 2005
Digital music rights	\$ 1,644,838	\$ 1,221,605
Less accumulated amortization	(149,954)	(25,558)
	\$ 1,494,884	\$ 1,196,047

Amortization expense was \$72,361 and \$5,065 for the three months ended June 30, 2006 and 2005, respectively. Amortization expense was \$124,396 and \$8,987 for the six months ended June 30, 2006 and 2005, respectively.

5. MASTER RECORDINGS

The Company from time-to-time acquires master recordings, including all the rights (digital, physical and otherwise) to such recordings. The cost of acquiring master recordings is capitalized and amortized using the straight-line method over ten years, which management believes reasonably relates to the amount of amortization to the revenue expected to be realized.

Master recordings comprise the following at:

	June 30, 2006	December 31, 2005
Master recordings	\$ 1,592,324	\$
Less accumulated amortization	(10,452)	
	\$ 1,581,872	\$

Amortization expense was \$10,452 and \$0 for the three month and six month periods ended June 30, 2006 and 2005, respectively.

6. ROYALTY ADVANCES

The Company has the exclusive right to distribute certain music catalogs in certain geographic areas pursuant to long-term agreements with the owners of the master recordings. The license agreements have initial terms ranging from five to ten years and, in most cases, grant the Company the right to extend the agreement for one additional term equal to the initial term. Pursuant to the license agreements, the Company typically pays advance royalties that are to be recouped from the content owners' share of future revenue which range from 25% to 50% of gross or net receipts, as defined in the agreements. At June 30, 2006, the Company is obligated to pay \$1,672,634 over the next twelve months in additional advance royalties as the master recordings and related metadata under these long-term agreements are received from the content owners for processing by the Company and to pay a total of \$450,000 in equal quarterly installments through February 2016 as additional advances against future royalties under one long-term agreement.

Table of Contents**7. CAPITAL STOCK***Capital Stock*

The Company completed its IPO on February 7, 2006 and issued 3,900,000 shares of its common stock. On February 7, 2006, the Company also issued 25,000 shares of its common stock to acquire certain assets of Rio Bravo Entertainment LLC and 2,250,000 shares of its common stock to acquire all of the outstanding common and preferred stock of Digital Musicworks International, Inc. In accordance with the merger agreement, fractional shares issuable in connection with the Digital Musicworks International, Inc. merger were converted to cash, resulting in 59 fewer shares being issued. Accordingly, upon completion of the IPO, there were 8,599,941 shares of the Company's common stock outstanding.

Restricted Stock Grant

In March 2006, the Company issued to one of its senior executives a restricted stock grant of 15,000 shares of the Company's common stock at a purchase price of \$0.01 per share, subject to a Company repurchase option at the original purchase price that lapses with respect to 5,000 shares six months following March 22, 2006, 5,000 shares on the first anniversary and the remaining 5,000 shares on the second anniversary of March 22, 2006, so long as the senior executive remains a service provider to the Company. The fair value of the restricted shares at the date they were issued is being charged to operating expense over the vesting period, and the shares will be included as outstanding for purposes of calculating basic earnings per share as the restrictions lapse.

8. INCOME TAXES

The Company has incurred net losses since its inception and has substantial net operating losses available for carryforward to reduce future taxable income for federal and state income tax reporting purposes. The federal net operating loss carryforwards begin to expire in 2019 and the state net operating loss carryforwards begin to expire in 2015. Under the provisions of the Internal Revenue Code, the amount and benefit from net operating loss carryforwards may be limited in certain circumstances, including a stock ownership change such as what occurred when Digital Musicworks International, Inc. was acquired in February 2006. The Company's future tax benefits through June 30, 2006 have been fully offset by a valuation allowance due to the uncertainty of their ultimate realization.

9. SHARE-BASED COMPENSATION

At its inception in 2005, the Company elected early adoption of Statement of Financial Accounting Standards No. 123R (SFAS 123R), *Share-Based Compensation*, which requires entities to recognize compensation expense in an amount equal to the estimated fair value of share-based awards and issuances, such as stock options and warrants granted to employees and non-employees. Prior to January 1, 2006, the Company utilized Black-Scholes, a standard option pricing model, to measure the fair value of stock options granted to employees. While SFAS 123R permits entities to continue to use such a model, the standard also permits the use of a lattice model. Beginning in the first quarter of 2006, the Company determined that the Trinomial Lattice Model was the best available measure of the fair value of employee stock options because it accounts for changing employee behavior as the stock price changes and captures the observed pattern of increasing rates of exercise as the stock price increases.

The following weighted-average assumptions were used in estimating the fair value per share of the options granted under the stock option plans and assuming no dividends for the six months ended June 30, 2006 and 2005:

	2006	2005
Risk-free rate of return	4.66%	4.50%
Expected volatility	35.0%	75.0%
Expected life (in years)	5.3	6.0
Suboptimal exercise factor	2	n/a
Exit rate post-vesting	22.8%	n/a
Exit rate pre-vesting	19.0%	n/a

The Company calculates the expected volatility for stock-based awards using the historical volatility for its peer group public companies because sufficient historical trading data does not yet exist for the Company's stock. The Company

Table of Contents

estimates the forfeiture rate for stock-based awards based on historical data. The risk-free rate for stock options granted during the period is determined by using a zero-coupon U.S. Treasury rate for the period that coincides with the expected option terms.

The Company's accounting acquiror, Digital Musicworks International, Inc., had 1,055,000 outstanding stock options at December 31, 2005, of which 68,689 were vested. As a result of the Company's acquisition of Digital Musicworks International, Inc., and pursuant to Digital Musicworks International, Inc.'s 2004 Stock Plan, the remaining unvested options became exercisable immediately prior to the acquisition date. Options totaling 826,313 were exercised prior to the acquisition in February 2006, generating net proceeds of \$41,103. The remaining 228,687 options of Digital Musicworks International, Inc. were forfeited, and its 2004 Stock Plan was terminated. On February 7, 2006, the Company acquired all of the common shares of Digital Musicworks International, Inc. at an exchange ratio of approximately one share of the Company's stock for every 13.2 shares of Digital Musicworks International, Inc. common stock.

Stock option activity under the Company's Amended and Restated 2005 Stock Plan is summarized as follows:

	Number of		Weighted Average Exercise Price	Weighted- Average Remaining Contractual Term	Aggregate Intrinsic Value 000 s
	Shares	Exercise Price			
Outstanding at December 31, 2005					
Granted	295,000	\$6.38 - \$9.75			
Outstanding at June 30, 2006	295,000	\$6.38 - \$9.75	\$ 9.50	8.2 Years	\$
Exercisable at June 30, 2006	24,000	\$9.75	\$ 9.75	9.7 Years	\$

The weighted average estimated grant-date fair value of options granted during the six months ended June 30, 2006 and non-vested options outstanding at June 30, 2006 was \$1.98.

Restricted stock activity is summarized as follows:

	Number of Shares	Weighted- Average Grant Date Fair Value
Nonvested at December 31, 2005	500,000	\$
Issued	15,000	\$ 9.70
Vested	(150,000)	\$
Nonvested at June 30, 2006	365,000	\$ 0.40

Subsequent to June 30, 2006, 116,667 nonvested shares were vested in connection with the resignation of one of the Company's officers.

The Company recorded a non-cash charge of \$79,149 and \$1,455 as a component of operating, general and administrative expenses related to share-based arrangements for the three months ended June 30, 2006 and 2005, respectively, and \$159,883 and \$3,425 for the six months ended June 30, 2006 and 2005, respectively. The non-cash charge for the six months ended June 30, 2006 included \$38,384 associated with the vesting of the Digital Musicworks International, Inc. stock options. As of June 30, 2006, the future pre-tax share-based compensation expense for stock options grants is \$498,567 to be recognized in the remainder of 2006 through 2010. Future pre-tax share-based compensation expense for

Edgar Filing: Digital Music Group, Inc. - Form 10-Q

restricted stock is \$108,350 to be recognized in the remainder of 2006 through 2008.

As of June 30, 2006, a total of 890,000 shares remained available for grant under the Company's Amended and Restated 2005 Stock Plan.

Table of Contents

10. NET LOSS PER SHARE

Basic and diluted net loss per share have been computed using the weighted-average number of shares of common stock outstanding for the three and six month periods ended June 30, 2006 of 8,599,941 and 7,266,804, respectively. Common stock equivalents include outstanding stock options, warrants and non-vested restricted stock totaling 295,000, 273,000 and 15,000 shares, respectively, as of June 30, 2006, all of which were issued during 2006. These were excluded from the calculation of the weighted-average number of shares outstanding due to their antidilutive effect. Restricted stock issued to three senior executives in August 2005, of which 350,000 shares were non-vested at June 30, 2006, were nominal issuances and are included in basic and diluted earnings per share for the three month and six month periods ended June 30, 2006.

The weighted average number of shares of common stock used in the calculation of basic and diluted net loss per share for the three month and six month periods ended June 30, 2005 was 2,250,000, the number of shares issued by the Company in connection with the acquisition of Digital Musicworks International, Inc., the accounting acquiror for financial statement presentation purposes.

Table of Contents**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**
Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the federal securities laws. These statements relate to future events or our future financial performance and involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from those expressed or implied by the forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as may, likely, will, should, expect, plan, anticipate, believe, estimate, predict, potential, continue or the negative of these terms or other comparable terminology. These forward-looking statements include, but are not limited to, the statements relating to: our financial condition; results of operations; download activity; the impact of new catalogs on overall download rates; business strategy; future operating performance; industry growth trends; industry seasonality; contracts with online music stores; management focus and objectives; business prospects; the purchase and license of music and video recordings by us; the processing of music and video recordings by us; our plans to begin distribution of music video in the fourth quarter of 2006; our ability to process video recordings without the need for significant additional investment in our operations; our expectations for being paid \$1.40 per download for music videos; our reliance on online music stores to process and make available our music recordings and video content; the delay in the delivery of tracks and related metadata to us by certain content owners and our efforts to accelerate such delivery and revise delivery schedules; the delivery of music recordings to the online music stores; expected delays by the online music stores in processing our content; our efforts to accelerate the rate at which our content is made available for sale at the stores; the new outlets we seek for our digital rights; the expansion of new sales channels and our intentions for release of content into such channels; our internal track and video processing capabilities; the expansion of our equipment, software and other infrastructure; the digital rights and master recordings acquisition terms we seek from content owners; payment of royalties by us; our capitalization and amortization policies; increases in future revenue; our expectations for increases in operations, general and administrative expenses; non-recurring severance expense; our plans to hire additional employees; our cash investment policy; and that our cash and cash equivalents will be adequate for the foreseeable future. You should not place undue reliance on these forward-looking statements, which are based on our current views and assumptions. In evaluating these statements, you should specifically consider various factors, including the risks outlined under Risk Factors in this Quarterly Report on Form 10-Q for the quarter ended June 30, 2006. Many of these factors are beyond our control. Our forward-looking statements represent estimates and assumptions only as of the date of this report. Except as required by law, we undertake no obligation to update any forward-looking statement to reflect events or circumstances occurring after the date of this Quarterly Report on Form 10-Q.

The following discussion of our financial condition and results of operations should be read in conjunction with the audited financial statements and related notes of Digital Music Group, Inc. and Digital Musicworks International, Inc. included in our Annual Report on Form 10-K for the year ended December 31, 2005.

Overview***Our Business***

Digital Music Group, Inc. was organized as a Delaware corporation in April 2005 to become a leading owner of digital rights to music and other sound recordings and distributor of these recordings to online music stores. In September 2005, we entered into a merger agreement to acquire Digital Musicworks International, Inc. and an asset purchase agreement to acquire certain assets of Rio Bravo Entertainment LLC, doing business as Psychobaby. The assets of Rio Bravo Entertainment LLC consisted solely of agreements for digital distribution rights to music recordings and its agreements with online music stores. Both of these acquisitions were completed concurrently with our initial public offering on February 7, 2006.

Digital Music Group, Inc. did not have an operating history separate from the operations of Digital Musicworks International, Inc. and the digital music distribution operations of Rio Bravo Entertainment LLC prior to the completion of such acquisitions. In addition, as Digital Musicworks International, Inc. has

Table of Contents

been identified in these transactions as the acquiror for accounting purposes, accordingly, historical financial results are therefore considered to be the historical financial results of Digital Music Group, Inc.

We believe that the recorded music industry is presently undergoing a significant change, with the primary means of music distribution transitioning from physical formats (compact discs) to digital formats accessed over the Internet and wireless and cable networks. We believe this is a direct result of the popularity and proliferation of personal computers and portable digital music players like the Apple iPod, and consumer acceptance and the music industry's endorsement of legitimate digital music sales. We believe this transition is just beginning and the market share of digital music will increase and digital formats will ultimately become the preferred way consumers purchase and listen to music.

We provide digital music recordings to online music stores for purchase by consumers. We purchase or license music recordings in digital format from record labels, artists and other content owners. We process these recordings through our digital music processing system for delivery to leading and selected specialty online music stores through which our recordings become available for purchase via downloading. Through June 30, 2006, we have obtained the contractual rights to sell over 200,000 music recordings in digital format, including perpetual and long-term digital license rights to approximately 35,000 and approximately 160,000 music recordings, respectively, and short-term distribution rights to approximately 5,000 music recordings. We have also acquired over 4,000 master recordings which give the Company all rights (digital, physical and otherwise) to the music recordings.

As of June 30, 2006, approximately 73,000 of our music recordings were available for purchase by consumers at online music stores including the iTunes Music Store, RealNetworks, Napster, Wal-Mart Music, MSN Music and Yahoo! Music. Also as of that date, we had internally processed and delivered approximately 70,000 additional music recordings that had not yet been processed and made available for purchase by the online music stores. Our remaining music recordings as of that date were either not yet received by us from the content owners or not yet processed by us. We are working with content owners to obtain delivery and process the remaining music recordings not currently in our possession and with online stores to make all the recordings we have delivered to them available for sale as quickly as possible. See *Factors Affecting Future Results* below.

In August 2006, we announced the acquisition of music video content through long-term distribution agreements which we intend to distribute for sale to consumers through the iTunes Music Store, Google Video and other sales channels as they become available. The processing of music video content is similar to the processing of music recordings, and we believe that we have the technical ability and capacity to make this content available for sale without significant additional investment in our current operations. We plan to begin distribution of music video in the fourth quarter of 2006.

Recent Developments

On February 7, 2006, we completed our initial public offering of common stock, selling 3,900,000 shares at \$9.75 per share and generating net cash proceeds (after fees and expenses) of approximately \$33,200,000. On the same date, in connection with the closing of the IPO, we issued to the underwriters in the offering warrants to purchase an aggregate of 273,000 shares of the Company's common stock. Each of the warrants has an exercise price of \$12.1875 per share, and is exercisable at any time from February 7, 2007 until February 6, 2011. The underwriters paid an aggregate of \$100 for the warrants. The warrants had an estimated fair value at the date of issuance of \$620,529, which has been recorded as an offering cost. Accordingly, the total net proceeds from our IPO were approximately \$32,600,000.

Concurrently with the closing of our initial public offering on February 7, 2006, we completed the acquisition of Digital Musicworks International, Inc., a California corporation, and certain assets of Rio Bravo Entertainment LLC, a Delaware limited liability company, doing business as Psychobaby. We acquired Digital Musicworks International, Inc. by way of merger and purchased certain assets of Rio Bravo Entertainment LLC consisting solely of agreements for digital distribution rights to music recordings and agreements with online music stores. We issued an aggregate of 2,275,000 shares of common stock to the shareholders of Digital Musicworks International, Inc. and to Rio Bravo Entertainment, LLC in connection with the acquisitions.

Table of Contents***Key Business Metrics***

Our revenue is derived primarily from online stores that offer music recordings on a pay-per-download or subscription basis. We also derive revenue from online stores that offer music recordings on a streaming basis. Our digital rights to these music recordings are held through a combination of purchase agreements, long-term license agreements and short-term distribution agreements and, in some cases, we have acquired the master recordings and all the rights thereto (digital, physical and otherwise). Apple iTunes, the most popular online music store, accounted for approximately 88%, 78%, 88% and 77% of our revenue during the three month periods ended June 30, 2006 and 2005, and the six month periods ended June 30, 2006 and 2005, respectively. The amount we receive per download is negotiated in advance at the time we enter into an agreement with an online music store. Although we negotiate with each store separately, our experience is that the percentage of the retail price paid to rights holders does not vary significantly across music stores. Our revenue is derived by the number of times our music recordings are downloaded multiplied by the negotiated download rate to be paid to us by the online store, which is currently approximately \$0.70 per download for distribution in the United States and up to approximately \$0.85 per download for distribution outside the United States. We expect to begin distribution of music videos through online stores in the fourth quarter of 2006 at a negotiated download rate to be paid to us of approximately \$1.40 per download. Paid downloads are driven by the number of recordings we have available for purchase at the online stores and the average number of times each recording is purchased for download by consumers.

Cost of revenue consists of (i) royalties to artists and publishers, (ii) revenue sharing payments based on long-term license or short-term distribution agreements with content owners, (iii) amortization of costs to acquire master recordings or digital rights to music or video recordings, and (iv) reserves or write-downs in capitalized digital rights or advances that may be deemed necessary from time-to-time. We purchase or license the digital rights to previously recorded music or videos and have no influence over the terms as stipulated in the original recording contract between the content owner and artists or publishers. Our experience is that these artist royalty obligations for music recordings have historically been between 0% and 15% of the revenue attributable to a specific track or album. The publisher royalties for music recordings are a statutory rate in the United States of America, which was \$0.085 per music recording sold during 2005, which increased to \$0.091 in January 2006. The royalties for music video recordings, or synchronization rights, are negotiated by contract with the artist or publisher and typically range between \$0.10 and \$0.15 per video download. When we acquire the master recordings or digital rights to music or video recordings, we usually pay certain or all of these artist, publisher and synchronization royalties. We also enter into long-term license agreements with content owners that typically include a revenue sharing arrangement whereby the content owner receives 25% to 50% of the revenue earned (after certain deductions) over the term of the agreement. In most cases, as an inducement to enter into the long-term license agreement, we will make a royalty advance against the content owner's share of future royalties under this revenue sharing arrangement. All such advance royalties are capitalized as a prepaid asset that is expensed as cost of revenue as the related revenue is earned and the cash advances are recouped. In short-term distribution agreements, we are not responsible for any artists, publisher or synchronization royalties and we make no upfront or fixed payments to the content owner at the time we enter into the agreement. Therefore, the revenue sharing percentage retained by the content owner (generally 80% to 85%) is substantially higher than under long-term license agreements. We also capitalize the acquisition costs, including the purchase price and direct ancillary costs, of our perpetual and long-term digital rights and our master recordings. We amortize these amounts over the shorter of seven years or the length of the contract for digital rights and ten years for master recordings, which we believe reasonably relates the amount of amortization to the revenue expected to be generated.

Operating, general and administrative expenses include all costs associated with processing music recordings and music videos and operating the business. These expense have been increasing substantially during 2006, primarily because of salary costs associated with additional personnel dedicated to business development, accounting and operations, costs incurred as a result of becoming a public-reporting company in February 2006, and for other reasons described below in Factors Affecting Future Results. We have incurred losses since inception. As of June 30, 2006, these losses, which include losses generated by Digital Musicworks International, Inc. prior to its acquisition by us, totaled approximately \$3.2 million. Although we expect an increase in future revenue, we are likely to continue to incur losses during 2006 as a result of higher operating, general and administrative expenses.

Table of Contents**Results of Operations****Selected Financial and Operating Data**

For financial statement presentation purposes, Digital Musicworks International, Inc. has been identified as our accounting acquiror. The following tables set forth selected statement of operations data and such data as a percentage of our revenue for the three month and six month periods ended June 30, 2006 and 2005, as well as certain operating data regarding tracks available for sale and paid downloads during the periods. The statement of operations data for the six months ended June 30, 2006 includes the results of operations for Digital Musicworks International, Inc. for the period from January 1, 2006 through February 6, 2006, and the combined operations of Digital Musicworks International, Inc., certain assets of Rio Bravo Entertainment, LLC, and Digital Music Group, Inc. for the period from February 7, 2006, the date of acquisition, through June 30, 2006. The statement of operations data and operating data for the three months and six months ended June 30, 2005 includes only the results of Digital Musicworks International, Inc.

	For the Three Months Ended June 30,			
	2006		2005

Operating Data:

Edgar Filing: Digital Music Group, Inc. - Form 10-Q

Average number of tracks available for sale during the period	55,600	3,600
Number of tracks available for sale at the end of the period	73,000	8,000
Number of paid downloads during the period	2,085,000	131,500

Table of Contents**Comparison of Three Months Ended June 30, 2006 to 2005**

Revenue. Revenue increased to \$839,539 for the three months ended June 30, 2006, from \$53,560 for the three months ended June 30, 2005. Total paid downloads increased to approximately 1,101,000 for the three months ended June 30, 2006 from approximately 75,100 for the three months ended June 30, 2005. The increase in the number of paid downloads was driven by the increase in tracks under contract and made available for sale, an increase in the average monthly download rate per track to approximately 5.3 times during the three months ended June 30, 2006 from approximately 4.9 times during the three months ended June 30, 2005, and an increase in the average price per download due to a higher percentage of sales outside the United States, where we receive a higher fee from online stores, in the second quarter of 2006 than in the second quarter of 2005. The average number of tracks available for purchase totaled approximately 69,700 and 5,100 during the three months ended June 30, 2006 and 2005, respectively. The increase in the average number of tracks available reflects the increase in new tracks under contract, the increase in tracks processed by us and made available by the online music stores, and the acquisition on February 7, 2006 of certain assets of Rio Bravo Entertainment LLC, representing approximately 6,000 tracks.

Cost of revenue. Our royalties and payments to content owners increased to \$386,799 for the three months ended June 30, 2006, compared to \$18,485 for the three months ended June 30, 2005. The increase is directly related to the increase in revenue. The amortization expense of master recordings and digital music rights increased to \$82,813 for the three months ended June 30, 2006, compared to \$5,065 for the three months ended June 30, 2005. This increase in amortization expense is due to the purchase of digital music rights and master recordings during the second half of 2005 and during 2006. As of June 30, 2006, we were amortizing rights and recordings with a cost basis of approximately \$2,100,000 compared to \$150,000 as of June 30, 2005. Additionally, during the three months ended June 30, 2005, cost of revenue included the write-down of non-productive assets of \$73,442, relating to cash advances and capitalized costs for producing master recordings under a contract with an artist that was entered into in January 2005 and cancelled in July 2005.

Operating, general and administrative expenses. The following table sets forth the individual components of operating, general and administrative expenses for the three months ended June 30, 2006 and 2005:

	For the Three Months Ended June 30, 2006		2005	
	Amount	Percentage of Total	Amount	Percentage of Total
Personnel-related expenses	\$ 644,946	48.0%	\$ 192,688	57.2%
Professional fees	135,599	10.1%	41,559	12.3%
Corporate governance expenses	179,002	13.3%		
Share-based compensation	79,149	5.9%	1,455	0.4%
Travel expenses	41,477	3.1%	22,652	6.7%
Other	264,025	19.6%	78,766	23.4%
Total	\$ 1,344,198	100.0%	\$ 337,120	100.0%

Operating, general and administrative expenses increased to \$1,344,198 for the three months ended June 30, 2006, from \$337,120 for the three months ended June 30, 2005. Operating, general and administrative expenses increased after our initial public offering in February 2006 because of an increase

Table of Contents

in (i) employees and resulting payroll costs, (ii) professional fees, (iii) corporate governance expenses which include board fees, insurance, printing and filing fees, (iv) travel expenses and (v) other expenses as we began to expand our infrastructure to acquire rights to additional music recordings, to process an increasing number of tracks for sale, and to meet our obligations as a public company.

Interest income and other income (expense), net. Interest income increased to \$388,386 for the three months ended June 30, 2006, from \$602 for the three months ended June 30, 2005, due to the temporary investment in money market funds and highly-rated commercial paper of the net cash proceeds from our initial public offering of common stock, which closed on February 7, 2006. Interest expense and taxes were not significant.

Comparison of Six Months Ended June 30, 2006 to 2005

Revenue. Revenue increased to \$1,560,187 for the six months ended June 30, 2006, from \$95,040 for the six months ended June 30, 2005. Total paid downloads increased to approximately 2,085,000 for the six months ended June 30, 2006 from approximately 131,500 for the six months ended June 30, 2005. The increase in the number of paid downloads was driven primarily by the increase in tracks under contract and made available for sale, and an increase in the average monthly download rate per track to approximately 6.3 times during the six months ended June 30, 2006 from approximately 6.1 times during the six months ended June 30, 2005. The average number of tracks available for sale totaled approximately 55,600 and 3,600 during the six months ended June 30, 2006 and 2005, respectively. The increase in the average number of tracks available reflects the increase in new tracks under contract, the increase in tracks processed by us and made available by the online music stores, and the acquisition on February 7, 2006 of certain assets of Rio Bravo Entertainment LLC, representing approximately 6,000 tracks.

Cost of revenue. Our royalties and payments to content owners increased to \$735,325 for the six months ended June 30, 2006 compared to \$32,897 for the six months ended June 30, 2005. The increase is directly related to the increase in revenue. The amortization expense of master recordings and digital music rights expense increased to \$134,848 for the six months ended June 30, 2006 compared to \$8,987 for the six months ended June 30, 2005. This increase in amortization expense is primarily due to the purchase of digital music rights and master recordings during the second half of 2005 and during 2006. As of June 30, 2006 we were amortizing rights and recordings with a cost basis of approximately \$2,100,000 compared to \$150,000 as of June 30, 2005. Additionally, during the six months ended June 30, 2005, cost of revenue included the write-down of non-productive assets of \$73,442, relating to cash advances and capitalized costs for producing master recordings under a contract with an artist that was entered into in January 2005 and cancelled in July 2005.

Operating, general and administrative expenses. The following table sets forth the individual components of operating, general and administrative expenses for the six months ended June 30, 2006 and 2005:

	For the Six Months Ended June 30, 2006		2005	
	Amount	Percentage of Total	Amount	Percentage of Total
Personnel-related expenses	\$ 1,087,511	47.4%	\$ 467,412	53.6%
Professional fees	321,382	14.0%	136,077	15.6%
Corporate governance expenses	269,548	11.7%		
Share-based compensation	159,884	7.0%	2,574	0.3%
Travel expenses	85,943	3.7%	68,764	7.9%
Other	370,594	16.2%	196,700	22.6%
Total	\$ 2,294,862	100.0%	\$ 871,527	100.0%

Table of Contents

Operating, general and administrative expenses increased to \$2,294,862 for the six months ended June 30, 2006, from \$871,527 for the six months ended June 30, 2005. Operating, general and administrative expenses increased after our initial public offering in February 2006 due to increases in (i) employees and resulting payroll costs, (ii) professional fees, (iii) corporate governance expense which include board fees, insurance, printing and filing fees, (iv) travel expenses and (v) other expenses as we began to expand our infrastructure to acquire rights to additional music recordings, to process an increasing number of tracks for sale, and to meet our obligations as a public company.

Interest income and other income (expense), net. Interest income increased to \$608,006 for the six months ended June 30, 2006, from a net interest expense of \$2,898 for the six months ended June 30, 2005, due to the temporary investment in money market funds and highly-rated commercial paper of the net cash proceeds from our initial public offering of common stock, which closed on February 7, 2006. Interest expense and taxes were not significant.

Liquidity and Capital Resources

Our operating activities resulted in net cash outflows of \$486,061 during the six months ended June 30, 2006 as a result of a net loss from operations and increased working capital needs.

Our investing activities resulted in net cash outflows of \$3,106,739 during the six months ended June 30, 2006, to purchase digital music rights, master recordings and fixed assets, and to pay cash advances for license rights. Our expenditures for the six months ended June 30, 2006, were comprised of \$1,517,324 for master recordings, \$294,803 for digital music rights, \$1,070,813 for royalty advances for long-term distribution rights, and \$196,731 for equipment and furniture. Digital music rights purchases and royalty advances include \$119,680 and \$450,000, respectively, related to contractual rights obtained in 2005 for music recordings that were delivered to us in 2006.

Our financing activities provided cash of \$33,236,847 during the six months ended June 30, 2006, primarily from our initial public offering, the exercise of options and warrants, partially offset by payments on capital lease obligations.

As of June 30, 2006, we had total working capital of approximately \$30,300,000, including cash and cash equivalents of approximately \$30,100,000. Included in cash and cash equivalents are cash equivalents of approximately \$29,900,000 which is comprised of investments in money market funds and commercial paper with original maturities of less than 90 days as of that date. Our current principal sources of liquidity are our cash and cash equivalents. We believe that our existing cash and cash equivalents will be sufficient to fund our operations, working capital requirements, and capital expenditure requirements, including acquisitions of master recordings, digital music rights and upfront payments in connection with new content distribution agreements, for the foreseeable future. However, we may seek to raise additional capital through future debt or equity financing to provide for greater flexibility to fund any such acquisitions and licensing activities.

Table of Contents

Indemnification Arrangements

In the ordinary course of business, we enter into contractual arrangements with online stores under which we agree to provide indemnification of varying scope with respect to certain matters, including, but not limited to, losses arising out of our breach of such agreements and out of intellectual property infringement claims made by third parties. In addition, we have entered into standard indemnification agreements with our directors and certain of our officers that will require us, among other things, to indemnify them against certain liabilities that may arise by reason of their status or service as directors or officers. The terms of such obligations vary. Generally, a maximum obligation is not explicitly stated, so the overall maximum amount of the obligations cannot be reasonably estimated. To date, we have not incurred any material costs as a result of such indemnifications and have not accrued any liabilities related to such indemnification obligations in our financial statements.

Off Balance Sheet Arrangements

As of June 30, 2006, we had no off-balance sheet arrangements.

Factors Affecting Future Results

Our operating expenses have increased substantially during 2006 as we added employees and infrastructure to permit our Company to position itself to take advantage of the growth opportunity in the emerging digital music industry. We expect our operating costs to stabilize at current or slightly higher levels in the short-term and our revenue to increase over future periods as we acquire additional content, make more content available online and expand our sales channels. The factors we expect will affect our future results are discussed below.

Business development. As of June 30, 2006, we had cash and cash equivalents of \$30.1 million, the majority of which is earmarked for additional content acquisition. We are working aggressively through due diligence procedures and negotiations with content owners to acquire both music and video content. Our business development team is also negotiating new sales channel outlets, such as the recently announced Google Video relationship. Our business development team is currently comprised of three full-time employees and a number of independent contractors. We may expand our business development team in the future.

Digital processing. We presently are a party to contracts which grant us the digital rights to over 200,000 music and video recordings. Approximately 73,000 of these recordings were available for sale at online music stores at June 30, 2006, and approximately 70,000 additional tracks had been processed and delivered to online music stores but had not yet been made available for sale by those stores as of that date. We are currently working with the content owner of approximately 40,000 tracks who is behind in delivering music recordings to us to establish a revised delivery schedule. At this time, we cannot predict when, or how many of, these tracks will be made available to us for processing. Once we process our music recordings and video in the appropriate digital format for each store, the tracks are delivered to the online music stores for review and posting, so they may be purchased for download by consumers. We do not control the timing of the processing by the online music stores. Historically, this process has taken up to several weeks, although we are currently experiencing longer delays and certain of the online music stores have reported significant backlogs of content for processing. We are working diligently with the stores in an attempt to accelerate their processing of our content, but we expect delays of several weeks to months (over historical processing times) may continue for the foreseeable future.

Seasonality and other factors impacting revenue. The digital music industry is in its infancy. The early-stage nature of the entire industry and our limited operating history have not allowed us to definitively identify seasonality or other consumer trends or factors in our business that may affect the timing of digital downloading and our resulting revenue recognition. We suspect that the fourth quarter of the calendar year may have seasonally higher sales for digital music, just as it is the highest quarter for sales of recorded music in physical format. Likewise, the second and third quarters may be seasonally low. We have experienced significant swings in the download rates for the music recordings we own and distribute. We believe seasonality has played a part in the variance in our download rates between quarters. In addition, the decline in the average download rate between the first and second quarters of 2006 was due in part to a reduction in the download rate in our highest performing catalog, which contains approximately 3,500 tracks that includes a large number of holiday songs and tribute albums. Additionally, a catalog of approximately 14,000 tracks that was processed and made available for sale late in the first quarter has a download rate that is lower than the rest of our content. This lower download rate, which was not unexpected and was reflected in a lower purchase price paid for this catalog. As more catalogs are added, the impact of any individual catalog on our overall download rate will lessen. However, as additional tracks are made available for sale, there is no assurance that the added tracks will be as popular with consumers and generate revenue at the same rate as those

Edgar Filing: Digital Music Group, Inc. - Form 10-Q

currently available for purchase. In addition, there is no assurance that our tracks currently available will generate the same downloads and revenue in the future.

Operating, general and administrative expenses. Following our initial public offering in February 2006, we significantly increased our operating, general and administrative expenses to

Table of Contents

expand our business development team, increase our digital music processing capabilities and increase our accounting and administrative staff, and we began incurring the costs of being a public company. Our operating, general and administrative expenses totaled \$1,344,198 for the three months ended June 30, 2006. We believe these operating, general and administrative expenses will not increase substantially over this amount for the third quarter of 2005 except that we will incur a non-recurring expense of approximately \$100,000 in severance costs associated with the resignation of one of our officers.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Exchange

We receive payment from online music stores in U.S. dollars for all sales to consumers in the United States. For those online music stores which sell our music recordings to consumers in foreign countries, sales and payments to us are based on local currency, which is converted to U.S. dollars at the month-end market-based foreign exchange rate. For the six months ended June 30, 2006, approximately 28% of our pro forma combined revenue was derived on this basis from consumers outside of the United States. As a result, we have foreign currency exposure to fluctuations in foreign currency exchange rates with respect to a portion of our revenues.

Interest Rate Risk

The primary objective of our investment activities is to preserve principal. We do not use derivative financial instruments in our investment portfolio and have no foreign exchange contracts. Our financial instruments consist of cash and cash equivalents, marketable securities, trade accounts and contracts receivable, accounts payable and long-term obligations. We invest our cash in a variety of financial instruments, consisting principally of investments in commercial paper, interest-bearing demand deposit accounts with financial institutions, money market funds and highly liquid debt securities of corporations, municipalities and the U.S. Government. We consider investments in highly-liquid instruments purchased with a remaining maturity of 90 days or less at the date of purchase to be cash equivalents. Based on our invested cash and cash equivalents of approximately \$30,100,000 at June 30, 2006, a one percent change in interest rates could cause a change in our interest income of approximately \$301,000 per year. Due to the investment grade level of our investments, we anticipate minimal market rate risk exposure.

Item 4. CONTROLS AND PROCEDURES

Our management evaluated, with the participation of our Chief Executive Officer and our Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures are effective to ensure that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. Our disclosure controls and procedures are designed to provide reasonable assurance that such information is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. There was no change in our internal control over financial reporting that occurred during the quarter ended June 30, 2006 that has materially affected or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

We are currently not a party to any legal proceedings.

Table of Contents

Item 1A. RISK FACTORS

A restated description of the risk factors associated with our business is set forth below. This description includes any material changes to and supersedes the description of the risk factors associated with our business previously disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2005.

In addition to the other information contained in this Quarterly Report on Form 10-Q, we have identified the following risks and uncertainties that may have a material adverse effect on our business, financial condition, or results of operation. Investors should carefully consider the risks described below before making an investment decision. The trading price of our common stock could decline due to any of these risks, and investors may lose all or part of their investment.

We have a limited operating history and have experienced net losses to date and we may not be able to become profitable or generate positive cash flow in the future.

You should consider our business and prospects in light of the risks, expenses and difficulties encountered by companies in their early stage of development in a rapidly evolving industry. Digital Music Group, Inc. was formed in April 2005 and had no operations prior to the acquisitions of Digital Musicworks International, Inc. and certain assets of Rio Bravo Entertainment LLC in February 2006, other than in connection with the acquisitions and our initial public offering. We have experienced net losses of approximately \$3.2 million from inception through June 30, 2006, and we have not yet been able to generate positive cash flow from operations. We cannot be certain that we will be able to generate net income and positive cash flow from operations in the future.

As a result of our limited operating history, we may fail to meet our forecasts or the expectations of securities analysts or investors, which could cause our stock price to decline.

Our limited operating history and the rapidly evolving nature of our industry make forecasting quarterly and annual operating results difficult. We may not be able to quickly reduce spending if our revenue is lower than we project. Any significant increase in our expenses or shortfall in our revenue would be detrimental to our business, operating results and financial condition and could cause our results of operation to fall below the expectations of public market analysts and investors. As a result, you should not rely on our historical results as an indicator of our future performance.

Our business depends on our ability to identify and locate the holders of digital rights to additional music and video recordings, and failure to do so will limit our revenue growth.

Our goal is to continue to acquire digital rights to music and video recordings in order to substantially increase our revenue. Ownership of music and video recordings is highly fragmented and not organized in a common marketplace. There is no registry or directory of the holders of digital rights to music and video recordings that we may wish to acquire. Finding the owners of music and video recordings and associated digital rights can be difficult and time-consuming. We currently rely on our network of relationships and market research to locate content owners. In the future, our ability to continue to identify and locate such content owners will have a significant impact on the amount of content we are able to acquire.

Our inability to enter into agreements to acquire additional digital rights to music and video recordings on commercially favorable terms could impede our growth and increase our expenses.

Our business is dependent on our ability to acquire digital rights to additional music and video recordings. Even if we are able to locate additional content owners, they may not be willing to sell or license the digital rights to their music and video recordings or we may not be able to negotiate terms that are commercially favorable to us. While we believe that our experience and knowledge in the music industry and our operating history allows us to determine commercially reasonable prices, we may be unable to objectively determine fair market value for the digital rights to music recordings that we acquire

Table of Contents

because of unknown consumer demand for such recordings, unknown number of additional owners of digital rights to such recordings in certain cases and absence of independent valuations for these music and video recordings. If these content owners are unwilling to sell or license their rights on terms that we have determined are commercially favorable to us, we will not be able to substantially increase our revenue.

We face competition from companies seeking to acquire the digital rights to music and video recordings, which could negatively impact our ability to acquire additional digital rights.

The market for acquiring digital rights from content owners is competitive, although the majority of our known current competitors are focused on short-term distribution arrangements, whereas our focus is on acquiring digital rights under long-term license or purchase agreements. The number of commercialized music recordings available for acquisition is large, but limited. We expect to face competition in our pursuit to acquire additional music and video recordings, which may limit the number of available music and video recordings for sale or license and may lead to higher acquisition prices. Our competitors may from time to time offer better terms of acquisition to content owners. Several of our competitors have longer operating histories, larger customer bases, greater brand recognition and greater financial, marketing and other resources than we do. Some of our competitors have adopted, and may continue to adopt, aggressive pricing policies and devote substantially more resources to acquiring digital rights to music and video recordings. In addition, our competitors may form strategic alliances with record labels and online music stores that could result in increased competition for the acquisition of music recordings, service offerings or favorable terms with the online music stores. Increased competition for the acquisition of digital rights to music and video recordings may result in a reduction in our operating margins, market share and brand.

We may acquire record labels or other companies that own master rights to music recordings, and if we are unable to successfully acquire or integrate these companies, we may not be able to acquire additional recordings or grow our revenue.

We may attempt to acquire record labels or other companies that own master rights to music recordings for purposes of acquiring their digital rights. If we are not able to successfully acquire such companies, we may not be able to acquire additional recordings or grow our revenue. In the event we are able to acquire other companies, we may be subject to a number of risks related to the integration and management of such companies, including failure to obtain valid consents to assignment of contracts, including contracts granting rights to music recordings, failure of the business of the acquired company to achieve expected results, diversion of management's attention, and failure to retain key personnel of the acquired company. In addition, if we undertake an acquisition of a company that owns digital and other rights to music recordings, we may attempt to operate the non-digital businesses or sell the non-digital rights to another person or entity, and we may not be able to do so in a manner or on terms favorable to us.

If the music recordings that we provide to the online stores do not appeal to consumers' tastes and preferences, our revenue will decrease.

Our success depends on our ability to acquire and offer for purchase music recordings that appeal to consumers' tastes and preferences. Consumers' tastes are subject to frequent, significant and sometimes unpredictable changes. We cannot accurately assess or control consumer demand for our music recordings. We do not own rights to current popular hits and may never acquire rights to these music recordings. Our historical sales are based on a limited library of music recordings available for purchase at the online music stores. In the future, our current music recordings and the additional music and video recordings we make available for purchase may not experience similar demand. Any reduction in the number of downloads of our recordings by consumers will cause a reduction in our revenue.

Table of Contents

The digital music industry is in its infancy and we are vulnerable to discounting, price-reductions, pricing structure and stocking changes that may evolve in the industry and as a result, cause a reduction in our revenue.

We receive revenue based on the wholesale prices determined by the online music stores based, to a large extent, on the price charged to consumers by the online music stores. Currently, the largest online music store, iTunes, charges consumers \$0.99 per music recording download. Certain major record labels in the music industry recently attempted to change the online pricing model so that the price for current popular hits would be over \$1.00, while older or less current music recordings would be sold for less. Because we are primarily focused on acquiring or licensing the digital rights to independent label, back catalogue, past hits and out-of-print music recordings and are not focused on current popular hits, we would be subject to any such unfavorable pricing changes. We have limited ability to influence the pricing models of the online music stores. While the major record labels were unsuccessful in their attempt to change the pricing structure, there is no assurance that they will not attempt to change the pricing structure in the future or that the online music stores will not initiate such a change. If the online music stores adopt a lower pricing model for our music recordings or if there is a pricing structure change to a flat-fee subscription or other similar pricing models, we may receive substantially less per download for our music recordings, which could cause a material reduction in our revenue, unless it is offset by a corresponding increase in the number of downloads. Additionally, Apple iTunes and other online music stores at present accept and post for sale all the music recordings that we and other distributors deliver to them. However, if online stores in the future decide to limit the types or amount of music recordings they will accept from digital music content owners and distributors like us, our revenue could be significantly reduced.

We are substantially dependent on a limited number of online music stores, in particular Apple iTunes Music Store, for the sale of our music recordings.

We derive our revenue from a small number of leading online music stores that sell to consumers the digital music recordings that we acquire or control through licenses, and we deliver our music recordings to these leading stores in priority of their significance to us. For the year ended December 31, 2005 and quarter ended June 30, 2006, we received 87% and 88% of our revenue from iTunes, respectively. Our agreements with Apple iTunes have terms of three years ending in April 2007. Under the terms of the agreements, Apple is required to pay us an agreed upon wholesale price for each recording sold by Apple. If we are not able to renew our relationship with iTunes and other online music stores that offer our music recordings for sale on similar economic terms, our ability to generate revenue will be significantly reduced.

Our accounts receivable are concentrated with a limited number of online music stores, particularly Apple iTunes, which subjects us to substantial payment risk.

We rely on reports from the online music stores detailing download activity to determine our revenue, and such reports are typically provided to us within 30 days following the end of the month. We receive payment at approximately the same time as we receive these reports of download activity. Our accounts receivable therefore consists of approximately one month's revenue (or one quarter in the case of certain smaller stores that report quarterly). As of June 30, 2006, accounts receivable from Apple iTunes Music Store represented 74% of our total accounts receivable, compared to 83% of our total accounts receivable as of December 31, 2005. The concentration of our accounts receivable among a small number of online stores is likely to continue and we expect our accounts receivable to become larger as we grow. If any of these online music stores are unable to pay us as due each month (or quarter, as the case may be), it could disrupt our business and cause us to report a bad debt loss.

Other parties may have digital rights, or claim to have such rights, to our music recordings, which may result in duplicates of the music recordings we sell to be available for purchase at the online music stores and cause a reduction in our revenue.

We generally acquire all of the digital rights that the content owner of music recordings has available to grant; however, the holders of such rights may not possess exclusive rights to those music recordings. We are unable to determine the number of additional holders of rights to our music recordings. Aside from copyright law, the rights to music recordings are contractual in nature. There is no central registry that evidences the chain of title to the rights of music recordings other than copyright registration,

Table of Contents

which is voluntary. Given the age of many of the music recordings we have or may acquire, there is often a lack of documentation to evidence the chain of title of rights we acquire. In addition, there is a common practice in the music industry of licensing rights in various formats or in certain compilations and to grant the same rights to different parties for the same or different geographic regions. Our content acquisition agreements contain representations, warranties and indemnities only with respect to the digital rights granted to us and not with respect to the rights held by other parties. Because more than one party may have the right to sell the same music recording, we have acquired, and we expect in the future to acquire, rights to multiple copies of the same music recording. In such instances, we become entitled to payment for download activity for both copies, to the extent they are both purchased by consumers at the online music stores. Additionally, we are aware of numerous instances where other parties have digital rights to the same music recordings to which we have digital rights. If copies of our music recordings are available at the online music stores from alternative sources, our revenue will be reduced to the extent these copies are purchased instead of ours.

We may not receive legal title to the digital rights of music recordings that we have paid to acquire, and any determination that we do not hold such rights may subject us to damages for revenue received.

Our agreements contain representations, warranties and indemnities with respect to the digital rights granted to us. In at least one instance, we purchased digital rights that were determined not to be held by the holder from whom we acquired those rights. If we were to acquire and make available for purchase music recordings from a person who did not actually own such rights, our business would be adversely affected. We would lose the rights to sell such music and might be subject to copyright infringement lawsuits for selling such music recordings without the right to do so. Finally, it could materially impact our reputation with content owners and our relationships with online music stores, which could adversely affect our business.

If there are long delays in the time it takes to receive the music and video recordings that we acquire rights to, our revenue growth will be negatively impacted and our cash flow will be affected adversely.

Implementation of our business plan and growth strategy depends on increasing the number of music and video recordings we have available for purchase by consumers at the online stores. Our purchase and long-term license agreements typically require the content owners to deliver to us their recordings under an agreed delivery timetable. Under our short-term license agreements, there are no delivery terms. Certain of the music recordings we acquire may be in older physical formats such as audio tape or vinyl records that require processing onto compact disc prior to being delivered to us. In addition, our agreements require that certain descriptive information required by the online stores for each music recording be delivered with the recordings, such as recording title, album title, artist name, genre, copyright information, label name, unique product identifier, artwork, biographical information, sales information and date of release. Historically, it has at times taken several months or longer after we have entered into an agreement before we have received delivery of the music recordings acquired. In addition, in some cases the quality of the recording data and metadata initially delivered is not sufficient or the data is not complete and follow-up work and effort is required to receive proper and complete delivery,

Table of Contents

although even with such extra efforts there are no assurances such problems can be cured. Although we generally specify delivery dates and make cash payments by us conditional upon delivery, we do not have control over the timing for complete receipt of the music and video recordings acquired. If there are long delays in the time it takes for the content owners to deliver to us the music and video recordings in physical format or complete data format and the related complete descriptive information, it will delay our ability to begin the process of converting the music and video recordings into the digital formats required by the online stores. It could also cause inefficiencies in the utilization of our operations personnel who process these recordings. Any delay in making our music and video recordings available for purchase at the online stores will delay our revenue growth, and inefficiencies caused by such delays could cause a reduction in our cash flow in the interim. We are currently working with a content owner who is behind schedule in delivering approximately 40,000 music recordings to establish a revised delivery schedule. At this time, we cannot predict when, or how many of, these tracks will be delivered to us for processing.

Any extended delay by the online stores in processing and making our music and video recordings available for downloading causes a delay in our ability to earn revenue from such recordings.

Following receipt of music and video recordings from content owners, we convert them into the specific digital formats required by the various online stores. We then deliver these music and video recordings in digital format, together with their associated descriptive information and artwork, to the online stores to be made available for purchase in the specific territories where we have acquired the digital rights. The online stores must then review our music and video recordings, descriptive information and artwork to ensure that they are in the proper format for their store. The recordings are only made available online for purchase by consumers once the store has completed its review, encrypted the recordings with the particular store's digital rights management and other store-specific coding, and posted the digital files on the store's computer servers. We are subject to the online store's internal processing timing and priorities. Our agreements with the online music stores do not provide for a fixed processing time. Our experience has been that the store review and posting process takes several weeks, although we have recently experienced delays which are several weeks or months beyond historical processing times. Any extended delay in making our music and video recordings available for sale at the online stores causes a delay in when we can begin to earn revenue from such recordings.

We have entered into multi-year agreements for digital rights to music and video recordings and if we are unable to renew these agreements on commercially favorable terms once they expire, our revenue could materially decrease.

Our long-term success depends upon, among other things, our ability to renew our non-perpetual rights to music and video recordings once they expire. If any of our competitors offer better terms, it will cause us to spend more money or grant better terms, or both, to renew the rights we currently hold. If we are unable to renew the non-perpetual rights to our music and video recordings on commercially favorable terms, our revenue could materially decrease.

We have limited operating history in the acquisition, processing and sale of digital video recordings and we may not be able to successfully acquire, process and market our digital video recordings.

The distribution of digital video recordings through online stores is a relatively new extension of the digital download industry. We recently entered into our first long-term distribution agreements to distribute digital music video recordings. Because this is a new area of the market for us and the industry, we may not be able to determine the proper valuation for the acquisition or licensing of digital video recordings. In addition, our success in this area depends on the market demand for digital video recordings and our ability to acquire and offer for purchase video recordings that appeal to consumers' tastes and preferences. Consumers' tastes are subject to frequent, significant and sometimes unpredictable changes. The approach we have taken to date in acquiring music recordings may not work well in acquiring video recordings. We cannot accurately assess or control consumer demand for our digital video recordings. In addition, we may encounter unexpected difficulties in processing the video recordings into digital formats or in meeting the technical requirements of the online stores that may be different than the difficulties we face with respect to digital music recordings. Any delay in processing and delivering video recordings to the online stores may cause delays in expected revenue growth.

If we are not able to scale our reporting and payment processes, we may experience delays providing reports to the content owners and paying required royalties that could have a negative effect on our brand identity.

We receive regular sales reports from online music stores that contain sales information for each of our music recordings. Based on these reports, we provide summary reports to the content owners. When we acquire the perpetual digital rights to music recordings and in certain of our license agreements, we may assume the obligations of the content owner to pay any required royalty payments to the artists according to the terms of the existing agreements. In addition, we may be required to pay statutory publishing royalties

Table of Contents

on behalf of the content owner according to the terms of our agreements. We have not fully implemented the systems required to process these royalties. We have accrued for future payment of royalties based on our calculations of such amounts due, but have not paid any of these amounts. As we acquire digital rights to additional music recordings, we may experience difficulties in preparing and distributing sales reports for the content owners or processing and paying artist and publishing royalties in a timely fashion. If we are not able to successfully expand our processing capability or introduce technology to allow us to determine and pay royalty amounts due and automate these tasks, we may experience delays as we increase the number of our music recordings, which could have a negative effect on our relationships with content owners and brand identity.

The loss of one or more of our key personnel, or our failure to attract, assimilate and retain other highly qualified personnel in the future, could cause a disruption in our relationships with the online music stores and content owners.

We depend on the continued services and performance of our key personnel, including Mitchell Koulouris, our President and Chief Executive Officer and President. Although we have employment agreements with our executive officers, they may decide to terminate their employment or otherwise cease to be employed by us. We do not have key person life insurance for any of our personnel. As we grow, our business will be dependent on our ability to recruit, employ and retain additional management and other skilled personnel. The loss of the services of any of our key personnel or the failure to attract other key personnel could disrupt and limit our ability to grow our business.

Piracy is likely to continue to negatively impact our potential revenue.

Our revenue comes from the sale of our digital music recordings over the Internet and wireless and cable networks, which is subject to unauthorized consumer copying and widespread dissemination on the Internet without an economic return to us. Global piracy is a significant threat to the music industry generally and to us. Unauthorized copies and piracy have contributed to the decrease in the volume of legitimate sales of recorded music and have put pressure on the price of legitimate sales.

We face a potential loss of music recordings if it is determined that recording artists have a right to recapture rights in their recordings under the U.S. Copyright Act.

The U.S. Copyright Act provides authors and their heirs a right to terminate licenses or assignments of rights in their copyrighted works that were not works made for hire. If any of our music recordings were determined not to be works made for hire, then the recording artists or their heirs could have the right to terminate the rights we hold. These residual author rights generally survive for five years after the end of the 35-year period from the date of a post-1977 license or assignment, and in the case of a pre-1978 grant in a pre-1978 recording, five years after the end of the 56-year period from the date of creation or January 1, 1978, whichever is later. Any termination of our rights to our music recordings could have a material reduction in our revenue.

We may need to raise additional capital to accomplish our objectives of acquiring the digital rights to music and video recordings, and if we are unable to raise such money as needed our growth would be limited.

We intend to use our common stock and cash for the consideration for future acquisitions of digital rights to additional music and video recordings. If our common stock does not maintain a sufficient market value or content owners are unwilling to accept common stock as part of the consideration for the sale of the digital rights to their music and video recordings or of their businesses or as consideration for licensed rights to their music and video recordings, we may be required to utilize more of our cash resources, if available. Although we currently anticipate that the proceeds from our February 2006 initial public offering of common stock, will be sufficient to meet our cash needs for 2006, we may require additional financing in the future. If we do not have sufficient cash resources, our ability to acquire additional rights to music and video recordings could be limited unless we are able to obtain additional capital through future debt or equity financings. Our ability to obtain financing will

Table of Contents

depend, among other things, on our development efforts, business plans, operating performance and condition of the capital markets at the time we seek financing. Additional financing may not be available to us on favorable terms when required, or at all. Using cash to finance acquisitions could substantially limit our financial flexibility and using debt could result in financial covenants that limit our operations and financial flexibility. If we raise additional funds through the issuance of equity, equity-linked or debt securities, those securities may have rights, preferences or privileges senior to the rights of our common stock, and our stockholders may experience dilution.

If the Internet and portable digital music players cease to be the medium accepted by the mass market for digital music, our business could be affected adversely.

Our success depends to a substantial extent on the willingness of consumers to increase their use of online services as a method of purchasing music and videos. The use of the Internet to select and download purchased music and videos is growing rapidly but is still evolving, and it is uncertain whether this market will achieve and sustain high levels of demand and market acceptance. If the use of the Internet to select and purchase music and video recordings does not gain in popularity and market acceptance, our business could be affected adversely. Much of our revenue is tied to the popularity of portable digital music players like the iPod by Apple Computer and other digital music listening devices. If the market penetration by these devices does not continue, the number of consumers purchasing digital music may decrease or not grow, which could result in a reduction in our revenue.

Our officers and directors and their affiliates will exercise significant voting control over us as stockholders.

Our officers and directors and their immediate family members, as of March 20, 2006, beneficially owned, in the aggregate, approximately 29% of our outstanding common stock. See our Proxy Statement for our 2006 Annual Meeting of Stockholders for the individual beneficial ownership of our common stock held by our directors and officers. These significant stockholders may have interests that are different from yours. As a result of their shareholdings, these individuals will be able to exercise significant control over matters requiring stockholder approval, including the election of directors and approval of significant corporate transactions.

Provisions in our charter documents and under Delaware law could discourage a takeover that stockholders may consider favorable.

Our charter documents may discourage, delay or prevent a merger or acquisition that a stockholder may consider favorable because they:

authorize our board of directors, without stockholder approval, to issue up to 1,000,000 shares of undesignated preferred stock; and

establish advance notice requirements for proposing matters to be approved by stockholders at stockholder meetings.

As a Delaware corporation, we are also subject to the Delaware anti-takeover provisions contained in Section 203 of the Delaware General Corporation Law. Under Delaware law, a corporation may not engage in a business combination with any holder of 15% or more of its capital stock unless the holder has held the stock for three years or, among other things, the board of directors has approved the transaction. Our board of directors could rely on this provision to prevent or delay an acquisition of us.

Our stock price is subject to fluctuation and could decline.

The price at which our common stock has traded since our initial public offering in February 2006 has fluctuated significantly. The price is likely to continue to fluctuate significantly due to the following factors, some of which are beyond our control:

Table of Contents

variations in our operating results;

variations between our actual operating results and the expectations of securities analysts, investors and the financial community;

announcements of developments affecting our business, systems or expansion plans by us or others; and

conditions and trends in online commerce industries, particularly in the online digital music market.

As a result of these and other factors, investors in our common stock may not be able to resell their shares at or above their purchase price.

In the past, securities class action litigation often has been instituted against companies following periods of volatility in the market price of their securities. This type of litigation, if directed at us, could result in substantial costs and a diversion of management's attention and resources.

Future sales of our common stock, including those purchased in our recent initial public offering, may depress our stock price.

Sales of substantial amounts of our common stock by our existing stockholders in the public market following the expiration of lock-up agreements entered into in connection with our initial public offering completed in February 2006 and compliance with Rule 144 hold periods may adversely affect the market price of our common stock. Shares issued upon the exercise of outstanding options also may be sold in the public market. Such sales could create the perception to the public of difficulties or problems with our business. As a result, these sales might make it more difficult for us to sell securities in the future at a time and price that we deem necessary or appropriate.

We do not intend to pay dividends.

We have never declared or paid any cash dividends on our capital stock and do not intend to pay dividends in the foreseeable future. We intend to invest our future earnings, if any, to fund our growth. We cannot assure you that you will receive a return on your investment when you sell your shares or that you will not lose the entire amount of your investment.

Our internal controls over financial reporting may not be adequate and our independent auditors may not be able to certify as to their adequacy, which could have a significant and adverse effect on our business and reputation.

We are in the process of documenting and evaluating our internal controls over financial reporting in order to allow management to report on, and our independent auditors to attest to, such controls, as required by Section 404 of the Sarbanes-Oxley Act of 2002 and rules and regulations of the Securities Exchange Commission thereunder, which we refer to as Section 404. Section 404 requires a reporting company to, among other things, annually review and disclose its internal controls over financial reporting, and evaluate and disclose changes in its internal controls over financial reporting quarterly. We will be required to comply with Section 404 for our fiscal year ending December 2007. We are currently performing the systems and process documentation, evaluation and testing required (and any necessary remediation) in an effort to comply with management certification and auditor attestation requirements of Section 404. In the course of our ongoing evaluation, we may identify areas of our internal controls requiring improvement, and plan to design enhanced processes and controls to address issues that might be identified through this review. As a result, we expect to incur additional expenses and diversion of management's time. We cannot be certain as to the timing of completion of our documentation, evaluation, testing and remediation actions or the impact of the same on our operations and may not be able to ensure that the process is effective or that the internal controls are or will be effective in a timely manner. If we are not able to implement the requirements of Section 404 in a timely manner or with adequate compliance, our independent auditors may not be able to certify as to the effectiveness of our internal control over financial

reporting and we may be subject to sanctions or investigation by regulatory authorities, such as the Securities and Exchange Commission. As a result, there could be an adverse reaction in the financial markets due to a loss of confidence in the reliability of our financial statements. In addition, we may be required to incur costs in improving our internal control system and the hiring of additional personnel. Any such actions could adversely affect our results.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Use of Proceeds

Through June 30, 2006, we have used a portion of the \$33.2 million in net cash proceeds from our initial public offering in February 2006. This includes \$1,812,000 to acquire digital music rights and master recordings; \$1,071,000 to advance royalty payments for catalogs to be distributed under long-term license agreements; \$197,000 for capital expenditures for processing and encoding equipment and upgrades to our royalty payment system; and for general corporate purposes. Our initial public offering generated approximately \$33.2 million in net cash proceeds. We have approximately \$30.1 million cash and cash equivalents as of June 30, 2006.
