The accompanying notes are an integral part of the condensed consolidated financial statements.

Notes to the Condensed Consolidated Financial Statements (unaudited)

(dollars in millions, except per-share amounts)

A. Basis of Presentation The Condensed Consolidated Financial Statements are unaudited. These statements include all adjustments, consisting of normal recurring adjustments, considered necessary by management to fairly state the results of operations, financial position, and cash flows. The results reported in these Condensed Consolidated Financial Statements are not necessarily indicative of the results that may be expected for the entire year. The year-end balance sheet data was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America. Certain amounts have been reclassified to conform to current period presentation.

This Form 10-Q report should be read in conjunction with Alcoa s Annual Report on Form 10-K for the year ended December 31, 2005, which includes all disclosures required by accounting principles generally accepted in the United States of America.

B. Stock-Based Compensation On January 1, 2006, Alcoa adopted Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004), Share-Based Payment, (SFAS 123(R)), which requires the company to recognize compensation expense for stock-based compensation based on the grant date fair value. This expense must be recognized ratably over the requisite service period following the date of grant. Alcoa has elected the modified prospective application method for adoption, and prior period financial statements have not been restated. Prior to January 1, 2006, Alcoa accounted for stock-based compensation in accordance with the provisions of Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations.

Stock options under Alcoa s stock-based compensation plans have been granted at not less than market prices on the dates of grant. Beginning in 2006, performance stock options were granted to certain individuals. The final number of options granted is based on the outcome of Alcoa s annual return on capital results against the results of a comparator group of companies. However, an individual can earn a minimum number of options if Alcoa s return on capital meets or exceeds its cost of capital. Stock option features based on date of original grant are as follows:

Date of original grant		Vesting	Term	Reload feature
2002 and prior	One year		10 years	One reload over option term
2003	3 years (1/3 each year)		10 years	One reload in 2004 for 1/3 vesting in 2004
2004 and forward	3 years (1/3 each year)		6 years	None

In addition to the stock options described above, Alcoa granted restricted stock units (stock awards) that vest in three years from the date of grant. Certain of these stock awards were granted with the same performance conditions described above for performance stock options.

The following table summarizes the total compensation expense recognized for all options and stock awards:

	Third quarter ended		Nine months ended			aded		
		ptemb 06	er 30, 20		September 30 2006 20			/
Compensation expense reported in income:								
Stock option grants	\$	1	\$		\$	7	\$	
Stock award grants		6		6		50		18
Total compensation expense before income taxes		7		6		57		18
Income tax benefit		2		2		19		6
Total compensation expense, net of income tax benefit	\$	5	\$	4	\$	38	\$	12

Prior to January 1, 2006, no stock-based compensation expense was recognized for stock options. As a result of the implementation of SFAS 123(R), Alcoa recognized additional compensation expense of \$1 pre-tax (\$1 after tax) and \$7 pre-tax (\$5 after tax) in the 2006 third quarter and nine-month period,

respectively. The 2006 third quarter amount resulted in no impact on earnings per share, and the 2006 nine-month period amount impacted basic earnings per share by \$.01. There was no stock-based compensation expense capitalized in the 2006 and 2005 nine-month periods. Alcoa s net income and earnings per share for 2005 would have been reduced to the pro forma amounts shown below if employee stock option compensation expense had been determined based on the fair value at the grant dates in accordance with SFAS No. 123, Accounting for Stock-Based Compensation - Transition and Disclosure - an amendment of FASB Statement No. 123.

	Third qu	Nine me	Nine months ended			
	•	mber 30, 2005	September 30, 2005			
Net income, as reported	\$	289	\$	1,009		
Add: compensation expense reported in net income, net of income tax						
Less: compensation expense determined under the fair value method, net of income						
tax		9		26		
Pro forma net income	\$	280	\$	983		
Basic earnings per share:						
As reported	\$.33	\$	1.16		
Pro forma		.32		1.13		
Diluted earnings per share:						
As reported	\$.33	\$	1.15		
Pro forma		.32		1.12		

As of January 1, 2005, Alcoa switched from the Black-Scholes pricing model to a lattice model to estimate fair value at the grant date for future option grants. The fair value of each option is estimated on the date of grant or subsequent reload using the lattice pricing model with the following assumptions:

	2006	2005
Weighted average fair value per option	\$ 5.98	\$ 6.18
Average risk-free interest rate	4.43-4.42%	2.65-4.20%
Expected dividend yield	2.0%	1.8%
Expected volatility	27-32%	27-35%
Expected annual forfeiture rate	3%	
Expected exercise behavior	23%	32%
Expected life (years)	3.6	3.8
Expected me (years)	5.0	5.0

The range of risk-free interest rates is based on a yield curve of interest rates at the time of the grant based on the contractual life of the option. Expected dividend yield is based on a five-year average. Expected volatility is based on historical and implied volatilities over the term of the option. Alcoa utilizes historical option exercise and forfeiture data to estimate expected annual pre- and post-vesting forfeitures. The expected exercise behavior assumption represents a weighted average exercise ratio of gains resulting from historical employee exercise behavior. The 2006 expected exercise behavior assumption is based on exercise patterns for grants issued from 2000 forward.

The following table summarizes stock option activity for the nine months ended September 30, 2006 (shares and aggregate intrinsic value in millions):

	2006
Outstanding at January 1, 2006:	
Number of options	88.6
Weighted average exercise price	\$ 33.50
Granted:	
Number of options	3.1
Weighted average exercise price	\$ 29.16
Exercised:	
Number of options	(6.1)
Weighted average exercise price	\$ 24.12
Expired or forfeited:	
Number of options	(4.5)
Weighted average exercise price	\$ 36.21
Outstanding at September 30, 2006:	
Number of options	81.1
Weighted average exercise price	\$ 33.88
Aggregate intrinsic value	\$ 70
Exercisable at September 30, 2006:	
Number of options	78.0
Weighted average exercise price	\$ 34.07
Aggregate intrinsic value	\$ 70

The total intrinsic value of options exercised for the third quarter and nine-month period ended September 30, 2006, was \$2 and \$55, respectively. For the third quarter and nine-month period ended September 30, 2006, the cash received from exercises was \$5 and \$141, respectively, and the tax benefit realized was \$1 and \$16, respectively.

The following tables summarize certain stock option information at September 30, 2006 (shares in millions):

Outstanding at September 30, 2006	4.1	0.7	4.8	30.39

As of September 30, 2006, there was \$11 (pre-tax) of unrecognized compensation expense related to non-vested stock option grants, and \$57 (pre-tax) of unrecognized compensation expense related to stock award grants. These expenses are expected to be recognized over a weighted average period of 2.1 years. As of September 30, 2006, the following table summarizes the unrecognized compensation expense expected to be recognized in future periods.

Stock-based compensation

Weighted average

	exp	ense (pre-tax)
Remainder of 2006	\$	10
2007		33
2008		24
2009		1
Total	\$	68

Alcoa issues treasury shares for the exercise of employee stock options. As of September 30, 2006, 127 million shares of common stock were reserved for issuance under Alcoa s stock-based compensation plans. Alcoa has a policy of repurchasing shares to cover the dilution associated with option exercises and expects to repurchase shares in an amount that approximates options exercised during 2006.

C. Recently Issued and Recently Adopted Accounting Standards In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans an amendment of FASB Statements No. 87, 88, 106 and 132(R), (SFAS 158).

SFAS 158 requires an employer to recognize the funded status of each of its defined pension and postretirement benefit plans as a net asset or liability in its statement of financial position with an offsetting amount in accumulated other comprehensive income, and to recognize changes in that funded status in the year in which changes occur through comprehensive income. This requirement becomes effective for Alcoa for its

December 31, 2006 year-end. The provisions of SFAS 158 are to be applied on a prospective basis; therefore, prior periods presented will not be restated. Based on the funded status of Alcoa s pension and postretirement benefit plans in the December 31, 2005 Annual Report on Form 10-K, the adoption of SFAS 158 will result in the following estimated impacts: the recognition of a \$1,500 liability, a deferred tax asset of \$500, and a \$1,000 other comprehensive loss. The ultimate impact is contingent on plan asset returns and the assumptions that will be used to measure the funded status of each of Alcoa s pension and postretirement benefit plans as of December 31, 2006.

Additionally, SFAS 158 requires an employer to measure the funded status of each of its plans as of the date of its year-end statement of financial position. This provision becomes effective for Alcoa for its December 31, 2008 year-end. The funded status of the majority of Alcoa s pension and other postretirement benefit plans are currently measured as of December 31.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. The provisions of this standard apply to other accounting pronouncements that require or permit fair value measurements. SFAS 157 becomes effective for Alcoa on January 1, 2008. Upon adoption, the provisions of SFAS 157 are to be applied prospectively with limited exceptions. The adoption of SFAS 157 is not expected to have a material impact on Alcoa s consolidated financial statements.

In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108 (SAB 108). SAB 108 was issued to provide interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. The provisions of SAB 108 are effective for Alcoa for its December 31, 2006 year-end. The adoption of SAB 108 is not expected to have a material impact on Alcoa s consolidated financial statements.

In July 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109, (FIN 48). FIN 48 prescribes a comprehensive model for how a company should recognize, measure, present, and disclose in its financial statements uncertain tax positions that it has taken or expects to take on a tax return. FIN 48 is effective for Alcoa on January 1, 2007. Management is currently evaluating the impact of this interpretation and does not expect the adoption of FIN 48 to have a material impact on Alcoa s consolidated financial statements.

Effective January 1, 2006, Alcoa adopted Emerging Issues Task Force (EITF) Issue No. 04-6, Accounting for Stripping Costs Incurred During Production in the Mining Industry, (EITF 04-6). EITF 04-6 requires that stripping costs incurred during the production phase of a mine are to be accounted for as variable production costs that should be included in the costs of the inventory produced (that is, extracted) during the period that the stripping costs are incurred. Upon adoption, Alcoa recognized a cumulative effect adjustment in the opening balance of retained earnings of \$3, representing the reduction in the net book value of post-production stripping costs of \$8, offset by a related deferred tax liability of \$3 and minority interests of \$2.

D. Restructuring and Other Charges Alcoa recorded income of \$3 (\$2 after tax and minority interests) and \$11 (\$7 after tax and minority interests) in the 2006 third quarter and nine-month period, respectively, for restructuring and other charges, resulting from adjustments to prior year severance and other exit cost reserves due to changes in facts and circumstances.

For the full year 2005, Alcoa recorded charges of \$292 (\$190 after tax and minority interests) for restructuring and other items, resulting from the global realignment of Alcoa s organization structure. The 2005 charges were comprised of the following components: \$238 of charges for employee termination and severance costs associated with approximately 8,450 salaried and hourly employees, spread globally across the company; \$86 related to asset impairments for structures, machinery, and equipment; and \$16 for exit costs, consisting primarily of accelerated depreciation associated with assets for which the useful life has been changed due to plans to close certain facilities in the near term. Reversals of previously recorded layoff and other costs of \$48 were primarily due to Alcoa s decision to sell certain locations that it previously planned to shut down in 2005. The 2005 restructuring charges have been reclassified from amounts previously reported to reflect the movement of the home exteriors business and the Hawesville, KY automotive casting facility to discontinued operations in 2006. Charges related to these businesses consisted of asset impairments of \$45 and charges of \$2 for employee termination and severance costs associated with 183 employees. As of September 30, 2006, approximately 5,150 of the 8,450 employees associated with the 2005 restructuring program had been terminated. For further details on the 2005 restructurings, see Note D to the audited financial statements contained in the Annual Report on Form 10-K for the year ended December 31, 2005.

Cash payments of approximately \$32 were made against total reserves in the 2006 nine-month period. The remaining reserves are expected to be paid in cash through 2007, with the exception of approximately \$20 in reserves for ongoing site remediation work over the next several years. Restructuring and other charges are not included in the segment results.

Activity and reserve balances for restructuring charges are as follows:

	Employee termination and severance costs		 er exit osts	Total
Reserve balances at December 31, 2004	\$	25	\$ 39	\$ 64
<u>2005</u> :				
Cash payments		(78)	(7)	(85)

Cash payments		(29)	(3)	(32)
Restructuring charges		2	3	5
Reversals of previously recorded restructuring charges		(15)	(4)	(19)
Reserve balances at September 30, 2006	\$	95	\$ 34	\$ 129

E. Pension Plans and Other Postretirement Benefits The components of net periodic benefit cost follow.

	Third qua	rter ended	Nine months ended		
Pension benefits	Septem 2006	September 30, 2006 2005			
Service cost	\$ 52	\$ 52	2006 \$ 156	2005 \$ 156	
Interest cost	158	154	467	462	
Expected return on plan assets	(184)	(183)	(553)	(537)	
Amortization of prior service cost	4	6	10	18	
Recognized actuarial loss	28	25	91	71	
Net periodic benefit cost	\$ 58	\$ 54	\$ 171	\$ 170	

		-				
	September 30,			0,	Septer	nber 30,
Postretirement benefits	2	00Ĝ	2	005	2006	2005
Service cost	\$	8	\$	8	\$ 24	\$ 24
Interest cost		54		55	155	163
Expected return on plan assets		(4)		(4)	(12)	(12)
Amortization of prior service cost		3		1	7	3
Recognized actuarial loss		12		15	52	45
Net periodic benefit cost	\$	73	\$	75	\$ 226	\$ 223

Third quarter ended

The net periodic benefit cost for postretirement benefits for the third quarter of 2006 and 2005 reflects a reduction of approximately \$13 and \$6, respectively, related to the recognition of the federal subsidy under Medicare Part D. The net periodic benefit cost for postretirement benefits for the first nine months of 2006 and 2005 reflects a reduction of approximately \$39 and \$18, respectively, related to the Medicare Part D subsidy. For further details on the Medicare Part D subsidy, see Note W to the audited financial statements contained in the Annual Report on Form 10-K for the year ended December 31, 2005.

Nine months ended

Alcoa made a discretionary contribution to its pension plans of \$200 in the third quarter of 2006 and \$300 in the third quarter of 2005. In addition, Alcoa made required contributions to its pension plans of \$144 in the 2006 nine-month period and \$64 in the 2005 nine-month period.

The four-year labor agreement between Alcoa and the United Steelworkers that was ratified on June 22, 2006 required a remeasurement of certain pension and postretirement benefit plan liabilities due to plan amendments. The discount rate was updated from the December 31, 2005 rate of 5.7% to 6.5% at May 31, 2006. The effects of the remeasurement resulted in a decrease in the December 31, 2005 pension and postretirement benefit obligations of \$276 and \$76, respectively. The decrease in the liabilities reduces the plans unrecognized net actuarial losses. To the extent the unrecognized net actuarial losses exceed certain thresholds, the excess will continue to be recognized as prescribed under SFAS No. 87, Employers Accounting for Pensions, and SFAS No. 106, Employers Accounting for

Postretirement Benefits Other than Pensions. Generally, these amounts are amortized over the estimated future service of plan participants. The 2006 net periodic benefit cost increases approximately \$4 for pension and \$23 for postretirement plans, \$6 of which was included in the third quarter of 2006. Other comprehensive income (see Note L) included \$94 due to the reduction in the minimum pension liability, primarily resulting from the remeasurement of the plan liability.

F. Other Income, Net

	Third qu	arter ended	Nine months ended		
	Septe	mber 30,	Septem	ber 30,	
	2006	2005	2006	2005	
Equity income	\$ 15	\$ 21	\$ 61	\$	
Interest income	35	18	67	43	
Dividend income			24	19	
Foreign exchange losses	(9)	(11)	(25)	(11)	
Gain on sales of assets	4	67	12	409	
Other income (expense)	3	(3)	5	15	
	\$ 48	\$ 92	\$ 144	\$ 475	

G. Income Taxes The effective tax rate of 27.2% for the 2006 nine-month period differs from the U.S. federal statutory rate of 35% due to income being taxed in lower rate jurisdictions. It also differs from the 2005 nine-month period effective tax rate of 22.7% primarily due to the \$120 tax benefit resulting from the finalization of certain tax reviews and audits during the second quarter of 2005. This 2005 benefit was partially offset by a \$43 income tax impact of previously undistributed equity earnings related to Alcoa s stake in Elkem ASA that was recorded in the first quarter of 2005. The effective tax rate of 24.7% for the 2006 third quarter differs from the U.S. federal statutory rate of 35% primarily due to lower taxes on foreign income and a discrete tax benefit of \$18 related to the cumulative correction of Alcoa s deferred tax assets attributable to an international location.

H. Discontinued Operations and Assets Held for Sale In the third quarter of 2006, Alcoa reclassified its home exteriors business to discontinued operations upon the signing of a definitive sale agreement with Ply Gem Industries, Inc. (See Note N for more information). In the first quarter of 2006, Alcoa reclassified the Hawesville, KY automotive casting facility to discontinued operations upon closure of the facility. The condensed consolidated financial statements for all periods presented have been reclassified to reflect these businesses in discontinued operations. The operating results of the home exteriors business and the automotive casting facility are not included in the Extruded and End Products segment and the Engineered Solutions segment, respectively.

For the periods presented in the Condensed Consolidated Financial Statements, businesses classified as assets held for sale/discontinued operations included the home exteriors business, the telecommunications business, a small casting facility in Europe, and the Hawesville, KY automotive casting facility. The imaging and graphic communications business, the protective packaging business, and the flexible packaging business in South America were also included in the 2005 discontinued operations results.

In the third quarter of 2006, Alcoa recorded a loss of \$3 (after tax and minority interests) from discontinued operations, consisting primarily of operating losses. In the second quarter of 2006, Alcoa recorded a loss of \$5 (after tax and minority interests) from discontinued operations, consisting primarily of operating losses principally related to the casting facility in Europe that was permanently shutdown in the second quarter of 2006, Alcoa recorded a loss of \$6 (after tax and minority interests) from discontinued operations, consisting of 2006. In the first quarter of 2006, Alcoa recorded a loss of \$6 (after tax and minority interests) from discontinued operations, consisting of operating losses of \$3 and a loss of \$3 related to the 2005 sale of the imaging and graphics communications business.

In the third quarter of 2005, Alcoa recorded income of \$4 (after tax and minority interests) in discontinued operations, consisting of the following: \$9 in net operating income on businesses to be divested; a \$4 loss associated with the divestiture of the protective packaging business; and a \$1 impairment charge associated with the divestiture of Alcoa s interest in the AFL telecommunications business. In the second quarter of 2005, Alcoa recorded a loss of \$30 (after tax and minority interests) in discontinued operations, consisting of the following: a \$28 loss associated with the closure of the Hawesville, KY automotive casting facility, primarily related to asset impairments; \$7 in net operating income on businesses to be divested; a \$5 loss associated with the divestiture of Alcoa s interest in the AFL telecommunications business; and a \$4 impairment charge to reflect the estimated fair value of the

protective packaging business. In the first quarter of 2005, Alcoa recorded a loss of \$9 (after tax and minority interests) in discontinued operations consisting of the following: a loss of \$8 in connection with the divestiture of Alcoa s interest in the AFL telecommunications business; a \$4 impairment charge to reflect the estimated fair value of the protective packaging business and the casting facility in Europe; and net operating income of \$3.

The following table details selected financial information for the businesses included within discontinued operations.

	Third quarter ended September 30, 2006 2005			Nine mon	ths ended	
				·	Septem 2006	ber 30, 2005

Effect of dilutive securities:						
Shares issuable upon exercise of dilutive stock options		5		4	6	6
Average shares outstanding diluted		873		877	875	878

Options to purchase 70 million and 74 million shares of common stock each at an average exercise price of \$36.00 were outstanding as of September 30, 2006 and 2005, respectively, but were not included in the computation of diluted EPS because they were anti-dilutive, as the option exercise price was greater than the average market price of the common shares.

J. Inventories

	Sept	September 30,		ember 31,
		2006		2005
Finished goods	\$	1,245	\$	962
Work in process		1,268		1,024
Bauxite and alumina		507		486
Purchased raw materials		773		691
Operating supplies		271		229
	\$	4,064	\$	3,392

Approximately 45% of total inventories at September 30, 2006 was valued on a LIFO basis. If valued on an average cost basis, total inventories would have been \$1,019 and \$858 higher at September 30, 2006, and December 31, 2005, respectively. The increase in the LIFO reserve resulted in a charge to cost of goods sold of \$30 (\$19 after tax) and \$161 (\$104 after tax) in the 2006 third quarter and nine-month period, respectively.

K. Commitments and Contingencies Various lawsuits, claims and proceedings have been or may be instituted or asserted against Alcoa, including those pertaining to environmental, product liability, and safety and health matters. While the amounts claimed may be substantial, the ultimate liability cannot now be determined because of the considerable uncertainties that exist. Therefore, it is possible that results of operations or liquidity in a particular period could be materially affected by certain contingencies. However, based on facts currently available, Alcoa s management believes that the disposition of matters that are pending or asserted will not have a materially adverse effect on the financial position or liquidity of the company.

Environmental Matters

Alcoa continues to participate in environmental assessments and cleanups at a number of locations. These include approximately 36 owned or operating facilities and adjoining properties, approximately 34 previously owned or operating facilities and adjoining properties and approximately 65 waste sites, including Superfund sites. A liability is recorded for environmental remediation costs or damages when a cleanup program becomes probable and the costs or damages can be reasonably estimated.

As assessments and cleanups proceed, the liability is adjusted based on progress made in determining the extent of remedial actions and related costs and damages. The liability can change substantially due to factors such as the nature and extent of contamination, changes in remedial requirements, and technological changes. Therefore, it is not possible to determine the outcomes or to estimate with any degree of accuracy the potential costs for certain of these matters.

The following discussion provides additional details regarding the current status of Alcoa s significant sites where the final outcome cannot be determined or the potential costs in the future cannot be estimated.

Massena, **NY**. Alcoa has been conducting investigations and studies of the Grasse River, adjacent to Alcoa s Massena, New York plant site, under order from the U.S. Environmental Protection Agency (EPA) issued under the Comprehensive Environmental Response, Compensation and Liability Act, also known as Superfund. Sediments and fish in the river contain varying levels of polychlorinated biphenyl (PCB).

In 2002, Alcoa submitted an Analysis of Alternatives Report that detailed a variety of remedial alternatives with estimated costs ranging from \$2 to \$525. Because the selection of the \$2 alternative (natural recovery) was considered remote, Alcoa adjusted the reserve for the Grasse River in 2002 to \$30 representing the low end of the range of possible alternatives, as no single alternative could be identified as more probable than the others.

In June of 2003, based on river observations during the spring of 2003, the EPA requested that Alcoa gather additional field data to assess the potential for sediment erosion from winter river ice formation and breakup. The results of these additional studies, submitted in a report to the EPA in April of 2004, suggest that this phenomenon has the potential to occur approximately every 10 years and may impact sediments in certain portions of the river under all remedial scenarios. The EPA informed Alcoa that a final remedial decision for the river could not be made without substantially more information, including river pilot studies on the effects of ice formation and breakup on each of the remedial techniques. Alcoa submitted to the EPA and the EPA approved a Remedial Options Pilot Study (ROPS) to gather this information. The scope of this study includes sediment removal and capping, the installation of an ice control structure, and significant monitoring.

In May of 2004, Alcoa agreed to perform the study at an estimated cost of \$35. Most of the construction work was completed in 2005 with monitoring proposed for 2006. The findings will be incorporated into a revised Analysis of Alternatives Report, which is expected to be submitted in 2007. This information will be used by the EPA to propose a remedy for the entire river.

Alcoa adjusted the reserves in the second quarter of 2004 to include the \$35 for the ROPS. This is in addition to the \$30 previously reserved. With the exception of the natural recovery remedy, none of the existing alternatives in the 2002 Analysis of Alternatives Report is more probable than the others and the results of the ROPS are necessary to revise the scope and estimated cost of many of the current alternatives.

The EPA s ultimate selection of a remedy could result in additional liability. Alcoa may be required to record a subsequent reserve adjustment at the time the EPA s Record of Decision is issued, which is expected in 2007 or later.

Sherwin, TX. In connection with the sale of the Sherwin alumina refinery in Texas, which was required to be divested as part of the Reynolds merger in 2000, Alcoa has agreed to retain responsibility for the remediation of the then existing environmental conditions, as well as a pro rata share of the final closure of the active waste disposal areas, which remain in use. Alcoa s share of the closure costs is proportional to the total period of operation of the active waste disposal areas. Alcoa estimated its liability for the active disposal areas by making certain assumptions about the period of operation, the amount of material placed in the area prior to closure, and the appropriate technology, engineering, and regulatory status applicable to final closure. The most probable cost for remediation has been reserved. It is reasonably possible that an additional liability, not expected to exceed \$75, may be incurred if actual experience varies from the original assumptions used.

East St. Louis, IL. In response to questions regarding environmental conditions at the former East St. Louis, IL operations, Alcoa entered into an administrative order with the EPA in December 2002 to perform a remedial investigation and feasibility study of an area used for the disposal of bauxite residue from historic alumina refining operations. A draft feasibility study was submitted to the EPA in April 2005. The feasibility study includes remedial alternatives that range from no further action at \$0 to significant grading, stabilization, and water management of the bauxite residue disposal areas at \$75. Because the selection of the \$0 alternative was considered remote, Alcoa increased the environmental reserve for this location by \$15 in the second quarter of 2005, representing the low end of the range of possible alternatives which meets the remedy selection criteria, as no alternative could be identified as more probable than the others. The EPA has not completed a final review of the feasibility study and the EPA is selection of a remedy could result in additional liability. Alcoa may be required to record a subsequent reserve adjustment at the time the EPA is Record of Decision is issued.

Based on the foregoing, it is possible that Alcoa s results of operations, in a particular period, could be materially affected by matters relating to these sites. However, based on facts currently available, management believes that adequate reserves have been provided and that the disposition of these matters will not have a materially adverse effect on the financial position or liquidity of the company.

Alcoa s remediation reserve balance was \$345 and \$390 at September 30, 2006 and December 31, 2005 (of which \$52 and \$40 was classified as a current liability), respectively, and reflects the most probable costs to remediate identified environmental conditions for which costs can be

reasonably estimated. In the 2006 nine-month period, the remediation reserve was decreased by approximately \$15 primarily due to an adjustment for the liabilities at Russian fabricating facilities acquired in January 2005. This adjustment was made after further investigations were completed whereby Alcoa was able to obtain additional information about the environmental condition and the associated liabilities with these facilities. This adjustment was recorded as an opening balance sheet adjustment and had no impact on net income. Payments related to remediation expenses were approximately \$30 in the 2006 nine-month period. These amounts include expenditures currently mandated, as well as those not required by any regulatory authority or third-party.

Included in annual operating expenses are the recurring costs of managing hazardous substances and environmental programs. These costs are estimated to be about 2% of cost of goods sold.

Other

Alcoa Aluminio S.A. (Aluminio) is a participant in several hydroelectric power construction projects in Brazil for purposes of increasing its energy self-sufficiency and providing a long-term, low-cost source of power for its facilities. The Machadinho and Barra Grande projects have been completed. Aluminio s investment participation in these projects is 27.23% for Machadinho and 42.20% for Barra Grande.

Aluminio committed to taking a share of the output of the Machadinho project, completed in 2002, for 30 years at cost (including cost of financing the project). In the event that other participants in this project fail to fulfill their financial responsibilities, Aluminio may be required to fund a portion of the deficiency. In accordance with the agreement, if Aluminio funds any such deficiency, its participation and share of the output from the project will increase proportionately.

Barra Grande operations started up in November 2005 and full capacity was reached in February 2006. With Machadinho and Barra Grande, Aluminio s current power self-sufficiency is approximately 38%, to meet a total energy demand of approximately 690 megawatts from Brazilian primary plants. Aluminio accounts for the Machadinho and Barra Grande hydroelectric projects on the equity method.

Its total investment in these projects was \$170 and \$152 at September 30, 2006 and December 31, 2005, respectively. Alcoa s maximum exposure to loss on these completed projects is \$503, which represents Alcoa s investment and guarantees of debt.

In the first quarter of 2006, Aluminio acquired an additional 6.41% share in the Estreito hydroelectric power project, reaching 25.49% of total participation in the consortium. This additional share entitles Aluminio to 38 megawatts of assured energy. The project will have total installed capacity of 1,087 megawatts and assured power of 589 megawatts. In September 2005, the consortium submitted the necessary plans to obtain the environmental installation license. Upon completion of certain socioeconomic and cultural impact studies as required by a governmental agency, construction is expected to begin in the fourth quarter of 2006.

In 2004, Alcoa agreed to acquire a 20% interest in a consortium formed to acquire the Dampier to Bunbury Natural Gas Pipeline (DBNGP) in Western Australia in exchange for an initial cash investment of \$17, which was classified as an equity investment. Alcoa has made additional contributions of \$42, including \$6 in the third quarter of 2006, \$12 in the second quarter of 2006 and \$5 in the first quarter of 2006, and committed to invest an additional \$63 to be paid as the pipeline expands through 2008. The investment in the DBNGP was made in order to secure a competitively priced long-term supply of power to Alcoa s refineries in Western Australia. In addition to its equity ownership, Alcoa has an agreement to purchase gas transmission services from the DBNGP. Alcoa s maximum exposure to loss on the investment and the related contract is approximately \$300.

On July 20, 2006, the European Commission (EC) announced that it has opened an investigation to establish whether an extension of the regulated preferential electricity tariff granted by Italy to some energy intensive industries complies with European Union state aid rules. The new Italian power tariff modifies the preferential tariff that was in force until December 31, 2005 and extends it through 2010. Alcoa has been operating in Italy for more than 10 years under a power supply structure approved by the EC in 1996. That measure, like the new one, was based on Italian state legislation that provides a competitive power supply to the primary aluminum industry and is not considered state aid by the Italian Government. The EC s announcement states that it has doubts about the measure s compatibility with European Union legislation and concerns about distortion of competition in the European market of primary aluminum, where energy is an important part of the production costs. The opening of an in-depth investigation gives interested parties the opportunity to comment on the proposed measures. It does not prejudge the outcome of the procedure. It is Alcoa s understanding that the Italian Government s continuation of the electricity tariff was done in conformity with all applicable laws and regulations. Alcoa believes that the total potential impact from a loss of the tariff would be approximately \$17 (pre-tax) per month in higher power costs at its Italian smelters. While Alcoa believes that any additional cost would only be assessed prospectively from the date of the EC s decision on this matter, it is possible that the EC could rule that the assessment must be retroactively applied to January 2006. A decision by the EC is not expected until mid to late 2007.

L. Comprehensive Income

N. Acquisitions and Divestitures On September 25, 2006, Alcoa announced that it has signed a definitive agreement to sell its Alcoa Home Exteriors business to Ply Gem Industries, Inc., for more than \$300 in cash. This business manufactures and markets premium vinyl, metal, and injection-molded products for the residential construction and remodeling markets in the United States. Alcoa Home Exteriors has approximately 1,400 employees and had sales of approximately \$600 in 2005. The assets and liabilities of this business are classified as held for sale in the accompanying Condensed Consolidated Balance Sheet, and the results of its operations are classified as discontinued operations in the accompanying Condensed Statement of Consolidated Income, for all periods presented. The transaction is expected to be completed in the fourth quarter of 2006. Alcoa expects to recognize a gain on this sale of approximately \$80 to \$90 after tax.

In September 2006, Alcoa completed the acquisition of its 70% interest in the aluminum brazing sheet venture in Kunshan City, China. Alcoa will be the managing partner in the venture, with the remaining 30% shares held by Shanxi Yuncheng Engraving Group. The total acquisition price was approximately \$61.

On June 30, 2006, Alcoa completed the acquisition of the minority interests (including the purchase of certain raw material inventories) in its Intalco and Eastalco aluminum smelters in Ferndale, Washington, and Frederick, Maryland, respectively, in exchange for the assumption of certain liabilities related to the facilities and receipt of a net cash payment of \$25.

Report of Independent Registered Public Accounting Firm*

To the Shareholders and Board of Directors of Alcoa Inc.:

We have reviewed the accompanying condensed consolidated balance sheet of Alcoa Inc. and its subsidiaries (Alcoa) as of September 30, 2006, and the related condensed statement of consolidated income for each of the three-month and nine-month periods ended September 30, 2006 and 2005 and the condensed statement of consolidated cash flows for the nine-month periods ended September 30, 2006 and 2005. These interim financial statements are the responsibility of Alcoa s management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of December 31, 2005, and the related statements of consolidated income, shareholders equity and cash flows for the year then ended, management s assessment of the effectiveness of Alcoa s internal control over financial reporting as of December 31, 2005, and the related financial reporting as of December 31, 2005; and in our report dated February 17, 2006, we expressed unqualified opinions thereon. The consolidated financial statements and management s assessment of the effectiveness of internal control over financial reporting referred to above are not presented herein. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2005, is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

^{*} This report should not be considered a report within the meanings of Sections 7 and 11 of the 1933 Act and the independent registered public accounting firm s liability under Section 11 does not extend to it.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations.

(dollars in millions, except per share amounts and ingot prices; shipments in thousands of metric tons [kmt])

Certain statements in this report under this caption and elsewhere relate to future events and expectations and, as such, constitute forward-looking statements. Forward-looking statements include those containing such words as anticipates, believes, estimates, expects, hop targets, should, will, will likely result, forecast, outlook, projects or similar expressions. Such forward-looking statements involve kno unknown risks, uncertainties and other factors that may cause actual results, performance or achievements of Alcoa to be different from those expressed or implied in the forward-looking statements. For a discussion of some of the specific factors that may cause such a difference, see Note K to the Condensed Consolidated Financial Statements; the disclosures included below under Segment Information, Environmental Matters, and Quantitative and Qualitative Disclosures about Market Risks; and Alcoa s Form 10-K, Part I, Item 1A, for the year ended December 31, 2005. Alcoa disclaims any intention or obligation (other than as required by law) to update or revise any forward-looking statements.

Results of Operations

Selected Financial Data:

	Third quarter ended			Nine months ended				
	September 30, 2006 2005		Septem 2006			30, 2005		
Sales		7,631		6,401				19,032
Income from continuing operations (Loss) income from discontinued operations	\$	540 (3)	\$	285 4	\$	1,903 (14)	\$	1,044 (35)
Net income	\$	537	\$	289	\$	1,889	\$	1,009
Earnings per common share:								
Diluted Income from continuing operations	\$.62	\$.32	\$	2.17	\$	1.19
Diluted Net income		.61		.33		2.16		1.15
Shipments of aluminum products (kmt) Shipments of alumina (kmt)		1,396 2,205		1,412 2,017		4,146 6,336		4,080 5,891
Alcoa s average realized ingot price per metric ton	\$	2,620	\$	1,963	\$	2,628	\$	1,993
Average 3-month LME price per metric ton		2,527		1,846		2,551		1,843

Income from continuing operations for the 2006 third quarter and nine-month period was \$540, or \$0.62 per diluted share, and \$1,903, or \$2.17 per share, respectively. Income from continuing operations increased 89% in the 2006 third quarter and 82% in the 2006 nine-month period compared to the corresponding periods in 2005, primarily due to: higher realized prices for alumina, which increased 38% and 32% in the 2006 third quarter and nine-month period, respectively; higher realized prices for aluminum, which increased 33% and 32% in the 2006 third quarter and nine-month period, respectively; and higher volumes in businesses serving the aerospace, commercial transportation, and building and construction markets. The absence in 2006 of restructuring charges for layoffs and asset impairments recognized in the 2005 nine-month period also favorably impacted results in 2006. The 2006 results were negatively impacted by higher raw material, energy, labor and other input costs; the absence of the \$37 gain recognized on the sale of Alcoa s railroad assets; the absence of the \$180 net gain recognized on the sale of Alcoa s stake in Elkem ASA; and the absence of a tax benefit of \$120 related to the finalization of certain tax reviews and audits.

Net income for the 2006 third quarter and nine-month period was \$537, or \$0.61 per share, and \$1,889, or \$2.16 per share, respectively, compared with \$289, or \$0.33 per share, and \$1,009, or \$1.15 per share, for the corresponding periods of 2005. Net income in 2006 included losses from discontinued operations of \$3 in the third quarter, consisting primarily of operating losses, and \$14 in the nine-month period, consisting primarily of operating losses and a loss of \$3 related to the 2005 sale of the imaging and graphics communications business in the 2006 first quarter. Net income in 2005 included income from discontinued operations of \$4 in the third quarter, consisting primarily of operating losses, and a loss of \$4 associated with the divestiture of the protective packaging business, and a loss from discontinued operations of \$35 in the nine-month period, consisting primarily of a \$28 loss for asset impairments associated with the closure of the Hawesville, KY automotive casting facility.

Sales for the third quarter and nine-month period of 2006 increased \$1,230, or 19%, and \$3,507, or 18%, respectively, compared with the 2005 corresponding periods. The increase in both periods was driven by higher realized prices for alumina and aluminum, and increased demand in businesses serving the aerospace, building and construction, and commercial transportation markets. Increased sales related to metal purchased and subsequently resold also contributed favorably to the 2006 nine-month period. Partially offsetting these increases in the 2006 nine-month period were unfavorable foreign currency exchange movements and the impact of the Eastalco, MD smelter curtailment.

Cost of goods sold (COGS) as a percentage of sales was 78.8% in the third quarter of 2006 compared with 82.2% in the third quarter of 2005, and 76.3% in the 2006 nine-month period compared with 80.7% in the corresponding 2005 period. The percentage improvement for both periods was the result of higher realized prices, higher volumes and a favorable legal settlement related to a former Reynolds distribution business, which were somewhat offset by higher energy, raw material, labor and other input costs.

Selling, general administrative, and other expenses (SG&A) increased \$22 in the third quarter of 2006 and \$88 in the 2006 nine-month period compared with the corresponding periods of 2005. The increase in the 2006 third quarter was the result of an increase in employee benefits and marketing costs associated with the consumer products business. The increase in the 2006 nine-month period principally resulted from increases in stock-based compensation expense, procurement costs, deferred compensation costs, and marketing costs associated with consumer products. SG&A as a percentage of sales decreased from 4.7% in the 2005 third quarter to 4.3% in the 2006 third quarter, and from 5.0% in the 2005 nine-month period to 4.6% in the 2006 nine-month period.

Restructuring and other charges consisted of income of \$3 (\$2 after tax and minority interests) in the 2006 third quarter and \$11 (\$7 after tax and minority interests) in the 2006 nine-month period resulting from adjustments to prior year severance and other exit cost reserves due to changes in facts and circumstances. Restructuring and other charges were \$7 (\$5 after tax and minority interests) in the 2005 third quarter and \$266 (\$172 after tax and minority interests) in the 2005 nine-month period, resulting from the global realignment of Alcoa s organization structure. The charges for the 2005 nine-month period were comprised of \$192 for employee termination and severance costs, \$70 for asset impairments, and \$4 for other exit costs. As of September 30, 2006, approximately 5,150 of the 8,450 employees associated with the 2005 restructuring program had been terminated.

Cash payments of \$32 were made against total reserves in the first nine months of 2006. The remaining reserves are expected to be paid in cash through 2007, with the exception of approximately \$20 in reserves for ongoing site remediation work over the next several years.

Restructuring and other charges are not included in the segment results. The pre-tax impact of allocating these amounts to the segment results would have been as follows:

	Third qu	iarter e	nded	Nine months ended				
	•	mber 3	/	Septe				
	2006	06 2005		2006	2005			
Alumina	\$	\$	(2)	\$	\$	(6)		
Primary Metals	1		(2)	1		(23)		
Flat-Rolled Products
