**T-MOBILE USA ADDS ALMOST 1 MILLION NET NEW  
CUSTOMERS AND REPORTS FIRST QUARTER RESULTS**

**980,000 net new customers added in the first quarter of 2007**

**Postpay churn 1.9% in the first quarter, down from 2.1% in the first quarter of 2006**

**ARPU of \$52, up from \$51 in the first quarter of 2006**

**Over 26 million customers at the end of the quarter**

**For the fifth reporting period in a row, T-Mobile USA achieved the highest ranking in the J.D. Power and Associates Wireless Regional Customer Satisfaction Index**

**\$1.22 billion in Operating Income Before Depreciation and Amortization (OIBDA) in the first quarter of 2007, up 11% from the first quarter of 2006**

Bellevue, May 10th, 2007 T-Mobile USA, Inc (T-Mobile USA) today reported first quarter 2007 results. At the end of the quarter, the company had more than 26 million customers, adding over 980,000 net new customers during the quarter, of which 726,000 were postpay. T-Mobile USA also reported ARPU of \$52 in the quarter, OIBDA of \$1.22 billion, up 11% over the first quarter of 2006, and a reduction in postpay churn to 1.9%.

myFaves<sup>SM</sup> is the most successful offering we've had in the history of T-Mobile and it is changing the nature of our business," said Robert Dotson, Chief Executive Officer and President of T-Mobile USA, Inc. "We continue to add high quality customers to our ranks and myFaves is a key reason why. In the quarter we added almost one million new customers, of

T-Mobile USA

12920 SE 38th Street

Bellevue, Washington 98006

Phone 1-800-318-9270

Internet <http://www.T-Mobile.com>

which almost three quarters were again additions to our strong postpay customer base. In the quarter, we also captured our fifth consecutive J.D. Power and Associates award for Overall Customer Satisfaction. This type of honor underscores the consistent strength of everything from the quality of our calls to the responsiveness of our employees to solving our customers' communication needs. We know this kind of recognition is simply an indicator that we are on the right path. Our quest to provide the best service experience in America remains a goal for which we will forever strive.

T-Mobile USA is once again front and center as the leading growth driver for Deutsche Telekom, said René Obermann, Chief Executive Officer, Deutsche Telekom. The U.S. business continues to demonstrate how a committed service culture can play a foundational role in driving our business ever forward.

## Customers

In the first quarter of 2007, T-Mobile USA added 980,000 net new customers, up from 901,000 in the fourth quarter of 2006 and comparable with the 1.04 million in the first quarter of 2006.

Postpay customer net additions made up 74% of first quarter customer growth, up from 70% in the first quarter of 2006, and down from 87% in the fourth quarter of 2006.

Postpay customers comprised 84% of T-Mobile USA's total customer base at March 31, 2007.

## Churn

Postpay churn declined to 1.9% in the first quarter of 2007 from 2.1% in both the first and fourth quarters of 2006.

Blended churn, including both postpay and prepaid customers, was 2.6% in the first quarter of 2007, down from 2.9% in the fourth quarter of 2006 and 2.7% in the first quarter of 2006.

T-Mobile USA

12920 SE 38th Street

Bellevue, Washington 98006

Phone 1-800-318-9270

Internet <http://www.T-Mobile.com>

## OIBDA and Net Income

T-Mobile USA reported OIBDA of \$1.22 billion in the first quarter of 2007, up from \$1.17 billion in the fourth quarter of 2006 and \$1.10 billion in the first quarter of 2006.

Net income for the first quarter of 2007 was \$315 million, up from \$179 million in the fourth quarter of 2006 and \$241 million in the first quarter of 2006.

## Revenue

Service revenues, consisting of postpay, prepaid, roaming and other service revenues, rose to \$3.99 billion in the first quarter of 2007, up from \$3.81 billion in the fourth quarter of 2006 and \$3.39 billion in the first quarter of 2006.

The increase is primarily due to growth in the number of customers, supported by strong ARPU ( Average Revenue Per User as defined in note 1 to the Selected Data, below).

Other revenues were \$88 million in the first quarter of 2007, down from \$122 million in the fourth quarter of 2006 and \$198 million in the first quarter of 2006.

The ongoing migration of Cingular's customers to its own network following the dissolution of our network sharing venture in early 2005 continues to reduce other revenues.

In the quarter, WiFi revenues were reclassified to postpay revenues and roaming and other service revenues. See note 8 to the Selected Data below for further explanation.

Total revenues, including service, equipment, and other revenues were \$4.55 billion in the first quarter of 2007, up from \$4.52 billion in the fourth quarter of 2006 and \$4.04 billion in the first quarter of 2006.

T-Mobile USA

12920 SE 38th Street

Bellevue, Washington 98006

Phone 1-800-318-9270

Internet <http://www.T-Mobile.com>

## ARPU

Blended ARPU was \$52 in the first quarter of 2007, the same as the fourth quarter of 2006 and up from \$51 in the first quarter of 2006.

Postpay ARPU was \$56 in the first quarter of 2007, unchanged from the fourth quarter of 2006 and up from \$54 in the first quarter of 2006.

Data services revenues (see notes 1 and 8 below) continued to grow, reaching a total of \$570 million in the first quarter of 2007, representing 14.3% of blended ARPU, or \$7.50 per customer, compared to 12.5%, or \$6.50 in the fourth quarter of 2006, and 10.1%, or \$5.10 in first quarter of 2006.

In the first quarter of 2007, WiFi revenues were included in service revenues (see note 8 to the Selected Data, below for further explanation). Of the \$1 increase in data ARPU compared to the fourth quarter of 2006, \$0.60 was as a result of this change.

Strong growth in messaging continued to contribute to the increase in data ARPU. The total number of SMS and MMS messages increased to almost 16 billion in the first quarter of 2007, compared to almost 13 billion in the fourth quarter of 2006 and 7 billion in the first quarter of 2006.

The strong uptake of consumer converged devices continued in the quarter, such as the BlackBerry Pearl, Sidekick 3, and T-Mobile Dash.

## CPGA and CCPU

The average cost of acquiring a customer, Cost Per Gross Add ( CPGA ), as defined in note 3 to the Selected Data, below) was \$310 in the first quarter of 2007, up from \$300 in the fourth quarter of 2006 and \$280 in the first quarter of 2006.

The higher CPGA compared to the first quarter of 2006 is due to an increase in subsidy loss related to customer acquisition (see note 3 to the Selected Data, below).

T-Mobile USA

12920 SE 38th Street

Bellevue, Washington 98006

Phone 1-800-318-9270

Internet <http://www.T-Mobile.com>

The average cash cost of serving customers, Cash Cost Per User (CCPU), as defined in note 2 to the Selected Data, below, was \$25 per customer per month in the first quarter of 2007, in line with the fourth quarter of 2006 and down from \$26 in the first quarter of 2006.

The fall in CCPU compared to the first quarter of 2006 was driven by lower subsidy loss unrelated to customer acquisition (see note 2 to the Selected Data, below).

**Capital Expenditures**

Ongoing operational capital expenditures (purchases of property and equipment) were \$622 million in the first quarter of 2007, compared with \$675 million in the fourth quarter of 2006 and \$770 million in the first quarter of 2006.

The reduction in cash capital expenditures compared to the fourth and first quarters of 2006 was due to fewer cell sites being built and cash payment timing differences.

T-Mobile USA continued its commitment to invest in network coverage and quality in the first quarter of 2007, adding approximately 600 new cell sites, bringing the total number of cell sites to almost 36,700.

**Other Highlights**

For the fifth consecutive reporting period, according to the J.D. Power and Associates Wireless Regional Customer Satisfaction Index for the first period in 2007, T-Mobile USA was the only carrier to rank highest in overall customer satisfaction in all six regions.

Earlier in the first quarter of 2007, J.D. Power and Associates announced that T-Mobile also ranked highest in Wireless Customer Care for the fifth reporting period in a row.

This press release includes non-GAAP financial measures. The non-GAAP financial measures should be considered in addition to, but not as a substitute for, the information provided in accordance with GAAP. Reconciliations from the non-GAAP financial measures to the most directly comparable GAAP financial measures are provided below following Selected Data and the financial statements.

T-Mobile USA is the U.S. operation of T-Mobile International AG & Co. KG ( T-Mobile International ), the mobile communications subsidiary of Deutsche Telekom AG ( Deutsche Telekom ) (NYSE: DT). In order to provide comparability with the results of other US wireless carriers all financial amounts are in US dollars and are based on accounting principles generally accepted in the United States ( GAAP ). The impact of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, is not recognized in these financial statements, but will be recognized as of the second quarter of 2007 consistent with the implementation of the Interpretation by Deutsche Telekom. T-Mobile USA results are included in the consolidated results of Deutsche Telekom, but differ from the information contained herein as Deutsche Telekom reports financial results in accordance with International Financial Reporting Standards (IFRS).

Since all companies do not calculate these figures in the same manner, the information contained in this press release may not be comparable to similarly titled measures reported by other companies.

1 Average Revenue Per User ( ARPU ) represents the average monthly service revenue we earn from our customers. ARPU is calculated by dividing service revenues for the specified period by the average customers during the period, and further dividing by the number of months in the period. We believe ARPU provides management with useful information to evaluate the recurring revenues generated from our customer base.

T-Mobile USA

12920 SE 38th Street

Bellevue, Washington 98006

Phone 1-800-318-9270

Internet <http://www.T-Mobile.com>

Service revenues include postpay, prepaid, and roaming and other service revenues, and do not include equipment sales and other revenues. Data services revenues is a component of service revenues. Per the consolidated financial statements below, among other items other revenues include co-location rental income and wholesale revenues from the usage of our network in California, Nevada, and New York by Cingular customers, and are therefore not included in ARPU.

- 2 The average cash cost of serving customers, or Cash Cost Per User ( CCPU ) is a non-GAAP financial measure and includes all network and general and administrative costs as well as the subsidy loss unrelated to customer acquisition. Subsidy loss unrelated to customer acquisition includes upgrade handset costs offset by upgrade equipment revenues and other related direct costs. This measure is calculated as a per month average by dividing the total costs for the specified period by the average total customers during the period and further dividing by the number of months in the period. We believe that CCPU, which is a measure of the costs of serving a customer, provides relevant and useful information and is used by our management to evaluate the operating performance of our business.
- 3 Cost Per Gross Add ( CPGA ) is a non-GAAP financial measure and is calculated by dividing the costs of acquiring a new customer, consisting of customer acquisition costs plus the subsidy loss related to customer acquisition for the specified period, by gross customers added during the period. Subsidy loss related to customer acquisition consists primarily of the excess of handset and accessory costs over related revenues incurred to acquire new customers. We believe that CPGA, which is a measure of the cost of acquiring a customer, provides relevant and useful information and is used by our management to evaluate the operating performance of our business.
- 4 OIBDA is a non-GAAP financial measure, which we define as operating income before depreciation and amortization. In a capital-intensive industry such as wireless telecommunications, we believe OIBDA, as well as the associated percentage margin calculation, to be meaningful measures of our operating performance. OIBDA should not be construed as an alternative to operating income or net income as determined in accordance with GAAP, as an alternative to cash flows from operating activities as determined in accordance with GAAP or as a measure of liquidity. We use OIBDA as an integral part of our planning and internal financial reporting processes, to evaluate the performance of our senior management and to compare our performance with that of many of our competitors. We believe that operating income is the financial measure calculated and presented in accordance with GAAP that is the most directly comparable to OIBDA.
- 5 OIBDA margin is a non-GAAP financial measure, which we define as OIBDA (as described in note 4 above) divided by total revenues less equipment sales.
- 6 Capital expenditures include amounts paid by T-Mobile USA for purchases of property, plant and equipment.
- 7 The covered population statistic represents T-Mobile USA's GSM / GPRS 1900 voice and data network coverage, combined with roaming and other agreements.
- 8 Data ARPU is defined as total data revenues from postpay customers, prepaid customers, and other data revenues, divided by average postpay customers and prepaid customers during the period. WiFi revenues have historically been reported in other (non-service) revenues. Beginning in the first quarter of 2007, WiFi revenues are now shown as a component of service revenues. As a result of this change, data ARPU increased approximately \$0.60 in the first quarter of 2007. If this change was applied retrospectively it would have had similar impacts on data ARPU and data revenue in each of the four quarters of 2006. Since the impacts of this change on postpay ARPU, blended ARPU, and service revenues are immaterial, these metrics have not been retroactively adjusted in prior periods.
