Notes to Condensed Consolidated Financial Statements

(Unaudited)

1. Basis of Presentation and Significant Accounting Policies

Basis of Presentation. The accompanying unaudited condensed consolidated financial statements of Advanced Micro Devices, Inc. and subsidiaries (the Company or AMD) have been prepared in accordance with generally accepted accounting principles for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. The results of operations for the interim periods shown in this report are not necessarily indicative of results to be expected for the full fiscal year ending December 29, 2007. In the opinion of the Company's management, the information contained herein reflects all adjustments necessary for a fair presentation of the Company's results of operations, financial position and cash flows. All such adjustments are of a normal recurring nature. The unaudited interim condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2006.

The Company uses a 52- to -53 week fiscal year. Prior to December 31, 2006, the Company's fiscal year ended on the last Sunday in December. Commencing in 2007, the Company began using a 52- to -53 week fiscal year ending on the last Saturday in December. The quarter and nine months ended September 29, 2007 consisted of 13 weeks and 39 weeks, respectively. The quarter and nine months ended October 1, 2006 consisted of 13 weeks and 40 weeks, respectively.

Certain prior period amounts have been reclassified to conform to the current period presentation. (See Note 6.)

Principles of Consolidation

Principles of Consolidation. The consolidated financial statements include the Company's accounts and those of its wholly-owned and majority-owned subsidiaries, including the operations of ATI Technologies ULC (ATI) from October 25, 2006. Upon consolidation, all significant intercompany accounts and transactions are eliminated, and amounts pertaining to the noncontrolling ownership interests held by third parties in the operating results and financial position of the Company's majority-owned subsidiaries are reported as minority interest.

Due to the initial public offering of Spansion Inc. (Spansion) on December 21, 2005, the Company used the equity method of accounting to reflect its share of Spansion's net losses from December 21, 2005 through September 19, 2007. Because the Company's share ownership in Spansion has decreased coupled with other factors that removed the Company's ability to significantly influence the strategic operating, investing and financing decisions of Spansion, the Company changed its accounting for this investment from the equity method of accounting to accounting for the investment as available-for-sale marketable securities under Financial Accounting Standards Board (FASB) Standard No. 115 *Accounting for Certain Investments in Debt and Equity Securities*. Effective September 20, 2007 the Company reclassified its remaining investment in Spansion to marketable securities.

Recently Issued Accounting Pronouncements. In June 2006, the Emerging Issue Task Force (EITF) reached a final consensus on EITF Issue No. 06-2, *Accounting for Sabbatical Leave and Other Similar Benefits Pursuant to FASB Statement No. 43, Accounting for Compensated Absences* (EITF 06-2). Under this consensus, sabbatical leave or other similar benefits provided to an employee are considered to accumulate, as that term is used in FASB Statement No. 43, provided that (a) the employee is required to complete a minimum service period to be entitled to the benefit, (b) there is no increase to the benefit if the employee provides additional years of service, (c) the employee continues to be a compensated employee during his or her absence, and (d) the employer does not require the employee to perform any duties during his or her absence. If these conditions are met, companies are required to accrue for sabbatical leave or other similar benefits as they are earned. The accounting required under this consensus was effective for fiscal years beginning after December 15, 2006. Upon adoption, companies had the option to apply the guidance using either of the following approaches: (a) a change in accounting principle through retrospective application to all periods presented; or (b) a change in accounting principle through a cumulative effect adjustment to the balance in retained earnings at the beginning of the year of adoption. The Company adopted the new accounting requirement on January 1, 2007, and recorded a cumulative effect adjustment of approximately \$23 million to its beginning retained earnings balance. Prior to adoption of EITF 06-2, the Company accrued for sabbatical leave expense only when employees were fully vested in this benefit.

Table of Contents

In June 2006, the Financial Accounting Standards Board (FASB) issued Interpretation No.48, *Accounting for Uncertainty in Income Taxes, an interpretation of FAS 109, Accounting for Income Taxes* (FIN 48). FIN 48 clarifies the accounting for income taxes by prescribing a minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. The Company adopted FIN 48 as of January 1, 2007 as required. (See Note 12).

In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements* (SFAS 157). SFAS 157 does not require any new fair value measurements but clarifies the fair value definition, establishes a fair value hierarchy that prioritizes the information used to develop assumptions used for measuring fair value, and expands disclosures about fair value measurements. SFAS 157 clarifies that the fair value is the exchange price in an orderly transaction between market participants to sell the asset or transfer the liability in the market. The fair value hierarchy gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data for example, the reporting entity's own data. It emphasizes that fair value is a market-based measurement, not an entity-specific measurement and a fair value measurement should therefore be based on the assumptions that market participants would use in pricing the asset or liability. SFAS 157 expands disclosures about the use of fair value to measure assets and liabilities in interim and annual periods subsequent to initial recognition, including the inputs used to measure fair value and the effect of such measurements on earnings for the period. As released it will be effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. However, the FASB recently stated that it would consider a potential deferral on the application of SFAS 157 to the fair value measurement of non-financial assets and liabilities. The Company is currently evaluating the accounting and disclosure requirements of SFAS 157 and plans to adopt it as required.

In February 2007, the FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities, Including an Amendment of FASB Statement No. 115*. This statement allows entities to voluntarily choose to measure many financial assets and financial liabilities as well as certain nonfinancial instruments that are similar to financial instruments (collectively, eligible items) at fair value (the fair value option). The election is made on an instrument-by-instrument basis and is irrevocable. If the fair value option is elected for an instrument, the statement specifies that all subsequent changes in fair value for that instrument shall be reported in earnings. The statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. Upon initial adoption, this statement provides entities with a one-time chance to elect the fair value option for the eligible items. The effect of the first measurement to fair value should be reported as a cumulative-effect adjustment to the opening balance of retained earnings in the year the statement is adopted. The Company is currently evaluating the impact, if any, of this statement upon its adoption.

Table of Contents

2. Stock-Based Incentive Compensation Plans

The following table summarizes stock-based compensation expense related to employee stock options, restricted stock and restricted stock units (RSUs) and employee stock purchases under the Company's Employee Stock Purchase Plan (ESPP) under FASB Statement No.123R (revised 2004), *Share-Based Payments* (Statement 123R) for the fiscal quarters and nine months ended September 29, 2007 and October 1, 2006, respectively, which was allocated in the condensed consolidated statements of operations:

	Quarter Ended		Nine Months Ended	
	September 29,	October 1,	September 29,	October 1,
	2007	2006	2007	2006
	(In millions)		(In millions)	
Cost of sales	\$ 2	\$ 2	\$ 6	\$ 6
Research and development	14	6	42	17
Marketing, general, and administrative	11	9	38	27
Total stock-based compensation expense related to employee stock options, restricted stock, restricted stock units and employee stock purchases	27	17	86	50
Tax benefit		(5)		(15)
Stock-based compensation expense related to employee stock options, restricted stock, restricted stock units, and employee stock purchases, net of tax	\$ 27	\$ 12	\$ 86	\$ 35

Stock Options. The weighted-average assumptions that the Company applied in the lattice-binomial model that the Company uses to value employee stock options are as follows:

	Quarters Ended		Nine Months Ended	
	September 29,	October 1,	September 29,	October 1,
	2007	2006	2007	2006
Expected volatility	60.05%	52.58%	52.53%	51.92%
Risk-free interest rate	4.33%	4.89%	4.58%	4.82%
Expected dividends	0.00%	0.00%	0.00%	0.00%
Expected life (in years)	3.55	4.14	3.55	4.13

For the quarters ended September 29, 2007 and October 1, 2006, the Company granted 704,000 and 402,000 employee stock options, respectively, with average estimated grant date fair values of \$5.52 and \$7.87. For the nine months ended September 29, 2007 and October 1, 2006, the Company granted 2,705,000 and 1,272,000 employee stock options, respectively, with average estimated grant date fair values of \$5.93 and \$12.67.

Restricted Stock Units and Awards. For the quarters ended September 29, 2007 and October 1, 2006, the Company granted 382,000 and 934,000 shares of restricted stock and restricted stock units, respectively, with an average grant date fair value of \$12.08 and \$19.66. For the nine months ended September 29, 2007 and October 1, 2006, the Company granted 6,163,000 and 3,209,000 shares of restricted stock and restricted stock units, respectively, with an average grant date fair value of \$15.01 and \$30.50.

Employee Stock Purchase Plan. The Company issued 1,217,000 shares and 454,000 shares under the ESPP during the fiscal quarters ended September 29, 2007 and October 1, 2006, respectively. The Company issued 3,063,000 shares and 1,093,000 shares under the ESPP during the nine months ended September 29, 2007 and October 1, 2006, respectively. ESPP compensation expense is calculated using the fair value of the employees' purchase rights at the grant date under the Black-Scholes-Merton model.

Table of Contents

3. Investment in Spansion Inc.

During the first quarter of 2007, the Company sold 984,799 shares of Spansion Class A common stock. The Company received \$13 million in net proceeds from the sales and realized a gain of \$0.6 million which was included in the caption, *Equity in net loss of Spansion Inc. and other*, on the Company's condensed consolidated statements of operations. The Company did not sell any shares of Spansion during the second quarter of 2007. As of June 30, 2007, the Company owned a total of 26,544,604 shares, or approximately 19.7 percent, of Spansion's outstanding common stock. The Company continued to use the equity method of accounting to reflect its share of Spansion's results of operations because the Company continued to have the ability to exercise significant influence over Spansion.

In July 2007, the Company sold 12,506,694 shares of Spansion Class A common stock. The Company received \$144 million in net proceeds from these sales and realized a loss of \$2 million which is included in the caption, *Equity in net loss of Spansion Inc. and other*, on the Company's condensed consolidated statements of operations. The Company continued to use the equity method of accounting to reflect its share of Spansion's results of operations because the Company continued to have the ability to exercise significant influence over Spansion because Dr. Hector de J. Ruiz, the CEO of the Company, still presided over the Board of Directors of Spansion as the Chairman of the Board.

On September 20, 2007, Dr. Ruiz resigned from the Board of Directors of Spansion and the Company no longer had any right to appoint a director to Spansion's Board of Directors. Therefore, the Company changed its accounting for this investment from the equity method of accounting to accounting for this investment as *available-for-sale marketable securities* under FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*.

After giving consideration to Spansion's operating results, its stock price changes in the past six months, and the Company's intention to liquidate its investment, the Company concluded that this investment was impaired as of September 29, 2007. Therefore, the Company recorded an other-than-temporary impairment charge of \$42 million in the third quarter of 2007, reflecting the write-down of this investment to its fair market value of approximately \$119 million, which is the revised carrying amount of this investment on our financial statements. This impairment charge is included in the caption, *Equity in net loss of Spansion Inc. and other*, on the Company's condensed consolidated statements of operations.

As of September 29, 2007, the Company owned a total of 14,037,910 shares, or approximately 10.4 percent, of Spansion's outstanding common stock. This investment is included in the caption *Marketable Securities* on the Company's condensed consolidated balance sheet dated September 29, 2007.

To the extent that the fair value of the Company's investment in Spansion changes in the future due to fluctuations in Spansion's stock price, the Company would record either an unrealized gain or an unrealized loss within *Accumulated Other Comprehensive Income*, a component of *Stockholders' Equity* on the Company's balance sheet. Should the Company sell shares of Spansion in the future, it would record either a realized gain or a realized loss. In addition, to the extent that the Company concludes that any unrealized loss is other-than-temporary, the Company would record further impairment charges.

4. Goodwill and Acquisition Related Intangible Assets

In conjunction with the acquisition of ATI in October 2006, the Company reorganized its operating segments and developed a new reporting structure comprised of three reportable segments: (i) Computing Solutions, (ii) Graphics, and (iii) Consumer Electronics. Goodwill by reportable segment is set forth in the table below.

The Company will perform its annual goodwill impairment analysis during the fourth quarter of 2007. At this time, the Company cannot estimate the outcome of the analysis. To the extent the Company concludes an impairment charge is required, such charge would be recorded in operating income in the fourth quarter of 2007.

Table of Contents

The changes in the carrying amount of goodwill by operating segment for the quarter ended September 29, 2007, were as follows:

	Computing Solutions	Graphics	Consumer Electronics	Total
	(In millions)			
Balance at December 31, 2006	\$	\$ 1,237	\$ 1,980	\$ 3,217
Reclassification due to change in segments ⁽¹⁾	166	(166)		
Goodwill adjustments ⁽²⁾	(4)	(34)	(14)	(52)
Balance at September 29, 2007	\$ 162	\$ 1,037	\$ 1,966	\$ 3,165

- (1) Starting in the first quarter of 2007, the Company began to include revenue from the sale of ATI's chipsets, which was included in the Graphics and Chipset segment in the fourth quarter of 2006, in the Computing Solutions segment. As a result of this change, the Company reclassified \$166 million of goodwill associated with the ATI chipset products from the Graphics segment to the Computing Solutions segment.
- (2) Adjustments to goodwill primarily represent changes in acquired pre-acquisition income tax liabilities assumed (which will continue to be applied to goodwill until ultimately settled with the tax authorities), including the cumulative accounting impact upon adoption of FIN 48 on pre-acquisition ATI tax contingencies.

The changes in the balances of acquisition-related intangible assets for the nine months ended September 29, 2007, and the net book value of acquisition-related intangible assets at September 29, 2007 were as follows:

Intangible Assets,								
(In millions)	Gross		Accumulated Amortization			Net Book Value		Weighted Average Amortization Period (in months)
	December 31, 2006	September 29, 2007	December 31, 2006	Nine Months Ended September 29, 2007 Expense	September 29, 2007	December 31, 2006	September 29, 2007	
Developed product Technology	\$ 752	\$ 752	\$ (25)	\$ (113)	\$ (138)	\$ 727	\$ 614	60

Table of Contents

Estimated future amortization expense related to acquisition-related intangible assets is as follows:

Fiscal Year	(In millions)
Remaining 2007	\$ 71
2008	253
2009	253
2010	242
2011	159
Thereafter	16
Total	\$ 994

5. Net Income (Loss) Per Common Share

The following table sets forth the components of basic and diluted income (loss) per common share:

	Quarter Ended September 29, 2007	Quarter Ended October 1, 2006	Nine Months Ended September 29, 2007	Nine Months Ended October 1, 2006
	(In millions except per share data)			
Numerator:				
Income (loss) per common share	\$ (396)	\$ 136	\$ (1,607)	\$ 410
Effect of assumed conversion of 4.75% Senior Convertible Debentures due 2022:				
Interest expense, net of tax				3
Profit sharing expense adjustment, net of tax				(1)
Diluted income (loss) per common share	\$ (396)	136	\$ (1,607)	\$ 412
Denominator:				
Denominator for basic income (loss) per share weighted-average shares	554	486	551	478
Effect of dilutive potential common shares:				
Employee stock options, restricted stock and RSUs		11		16
Effect of assumed conversion of 4.75% Senior Convertible Debentures due 2022				3
Dilutive potential common shares		11		19
Denominator for diluted income (loss) per common share-adjusted weighted-average shares	554	497	551	497

Table of Contents

Net income (loss) per common share:

Basic	\$ (0.71)	\$ 0.28	\$ (2.92)	\$ 0.86
Diluted	\$ (0.71)	\$ 0.27	\$ (2.92)	\$ 0.82

Potentially dilutive common shares totaling approximately 55 million for the quarter and nine months ended September 29, 2007, respectively, were not included in the net loss per common share calculation as their inclusion would have been anti-dilutive. Potentially dilutive common shares totaling approximately nine million for the quarter ended October 1, 2006 and three million for the nine months ended October 1, 2006, respectively, were not included in the net income per common share calculation as their inclusion would have been anti-dilutive.

6. Segment Reporting

Management, including the Chief Operating Decision Maker (CODM), who is the Company's Chief Executive Officer, reviews and assesses operating performance using segment net revenues and operating income (loss) before interest, other income (expense), equity in net loss of Spansion Inc. and other, income taxes and minority interest. These performance measures include the allocation of expenses to the operating segments based on management's judgment.

From December 26, 2005 through October 24, 2006, the Company had two reportable segments:

the Computation Products segment, which included microprocessors, chipsets that the Company sold prior to the ATI acquisition and related revenue; and

the Embedded Products segment, which included embedded processors and related revenue.

As a result of the acquisition of ATI, from October 25, 2006 through December 31, 2006, the Company had the following four reportable segments:

the Computation Products segment, which included microprocessors, chipsets that the Company sold prior to the ATI acquisition and related revenue;

the Embedded Products segment, which included embedded processors and related revenue;

the Graphics and Chipsets segment, which included graphics, video and multimedia products and ATI chipsets for use in desktop and notebook PCs, including home media PCs, professional workstations and servers, and related revenue; and

the Consumer Electronics segment, which included products and revenue related to mobile phones and PDAs, digital televisions and other consumer electronics and revenue from royalties received in connection with sales of game console systems that incorporate the Company's technology.

Starting in the first quarter of 2007, in conjunction with the integration of ATI's operations, the CODM began reviewing and addressing operating performance using the following three reportable segments:

the Computing Solutions segment, which includes what was formerly the Computation Products segment and the Embedded Products segment as well as revenue from sales of ATI chipsets;

Edgar Filing: ADVANCED MICRO DEVICES INC - Form 10-Q

the Graphics segment, which includes graphics, video and multimedia products developed for use in desktop and notebook computers, including home media PCs, professional workstations and servers; and

Table of Contents

the Consumer Electronics segment, which includes products and revenue related to mobile phones and PDAs, digital televisions and other consumer electronics and revenue from royalties received in connection with sales of game console systems that incorporate the Company's technology.

In addition to the reportable segments, the All Other category includes certain expenses and credits that are not allocated to any of the operating segments because the CODM does not consider these expenses and credits in evaluating the performance of the operating segments. Following the ATI acquisition, the Company began including employee stock-based compensation expense, profit sharing expense and ATI acquisition-related and integration charges in the All Other category. Prior period segment information has been reclassified to conform to the current period's presentation. For the quarter and nine months ended September 29, 2007, the All Other category also includes severance charges related to workforce reductions.

The following table is a summary of the Company's net revenue and operating income (loss) by segment with reconciliations to net income (loss) for the quarters and nine months ended September 29, 2007 and October 1, 2006:

	Quarter Ended		Nine Months Ended	
	September 29, 2007	October 1, 2006	September 29, 2007	October 1, 2006
	(In millions)

8. Commitments and Contingencies

Guarantees

Guarantees of Indebtedness Recorded on the Company's Condensed Consolidated Balance Sheet

The following table summarizes the principal guarantees issued as of September 29, 2007 related to underlying liabilities that are already recorded on the Company's condensed consolidated balance sheet as of September 29, 2007 and their expected expiration dates by year. No incremental liabilities are recorded on the Company's condensed consolidated balance sheet for these guarantees:

	Amounts Guaranteed	Remaining 2007	2008	2009
	(In millions)			
Repurchase obligations to Fab 36 partners ⁽¹⁾	\$ 137	\$ 46	\$ 46	\$ 45
Payment guarantees on behalf of consolidated subsidiaries ⁽²⁾	116	116		
Total guarantees	\$ 253	\$ 162	\$ 46	\$ 45

⁽¹⁾ This amount represents the amount of silent partnership contributions that the Company's German subsidiaries are required to repurchase from the unaffiliated limited partners of AMD Fab 36 KG and is exclusive of the guaranteed rate of return of an aggregate of approximately \$63 million, which is based on the Company's assumptions regarding wafer output. This is recorded within long term debt and capital lease obligations on the Company's condensed consolidated balance sheet.

Table of Contents

- (2) This amount represents the payment obligation due to a supplier arising out of the purchase of equipment by the Company's consolidated subsidiary, AMD Fab 36 KG. The Company has guaranteed these payment obligations on behalf of its subsidiary and recorded them as a payable on the Company's consolidated balance sheet.

Guarantees of Indebtedness Not Recorded on the Company's Condensed Consolidated Balance Sheet

The following table summarizes the principal guarantees issued as of September 29, 2007, for which the related underlying liabilities are not recorded on the Company's condensed consolidated balance sheet as of September 29, 2007 and their expected expiration dates:

	Amounts Guaranteed ⁽¹⁾	Remaining 2007	2008 (In millions)	2009	2010	2011 and Beyond
AMTC revolving loan guarantee	\$ 46	\$ 46	\$	\$	\$	\$
AMTC rental guarantee ⁽²⁾	94					94
Spanion operating lease guarantees ⁽³⁾	2	1	1			
Total guarantees	\$ 142	\$ 47	\$ 1	\$	\$	\$ 94

- (1) Amounts represent the principal amount of the underlying obligations guaranteed and are exclusive of obligations for interest, fees and expenses.

- (2) Amount of the guarantee diminishes as the rent is paid.

- (3) Notwithstanding the Spanion IPO, the Company agreed to maintain its guarantees of these Spanion obligations
AMTC and BAC Guarantees

The Advanced Mask Technology Center GmbH & Co. KG (AMTC) and Maskhouse Building Administration GmbH & Co., KG (BAC) are joint ventures formed by AMD, Infineon Technologies AG and DuPont Photomasks, Inc. for the purpose of constructing and operating an advanced photomask facility in Dresden, Germany. In April 2005, DuPont Photomasks, Inc. was acquired by Toppan Printing Co., Ltd. and became a wholly owned subsidiary of Toppan, named Toppan Photomasks, Inc. The Company procures advanced photomasks from AMTC and uses them in manufacturing its microprocessors. To finance the project, AMTC and BAC entered into a \$171 million revolving loan and a \$107 million term loan, respectively, in December 2002. Also in December 2002, in order to occupy

Table of Contents

the photomask facility, AMTC entered into a rental agreement with BAC. As of September 29, 2007, the Company guaranteed up to \$46 million plus interest and expenses under the revolving loan. The Company also guarantees the obligations under the rental agreement. The obligations under the rental agreement guarantee diminish over time through June 2012 as the term loan is repaid. However, under certain circumstances of default by the other tenant of the photomask facility under its rental agreement with BAC and certain circumstances of default by more than one joint venture partner under its rental agreement guarantee obligations, the maximum potential amount of the Company's obligations under the rental agreement guarantee is \$94 million. As of September 29, 2007, \$93 million was drawn under the revolving loan, and \$50 million was outstanding under the term loan. The Company has not recorded any liability in its consolidated financial statements associated with the guarantees because they were issued prior to December 31, 2002, the effective date of FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, including Indirect Guarantees of Indebtedness of Others* (FIN 45).

Spanion Operating Lease Guarantee

Prior to Spanion's IPO, the Company guaranteed certain operating leases entered into by Spanion and its subsidiaries totaling \$2 million as of September 29, 2007. The amounts guaranteed are reduced by the actual amount of lease payments paid by Spanion over the lease terms.

No liability has been recognized for these guarantees related to Spanion under the provisions of FIN 45 because the Company concluded the fair value of the guarantees is not significant after considering various factors, including Spanion's ability to service these obligations and the short maturity of the indebtedness.

Warranties and Indemnities

The Company generally warrants that microprocessor products sold to its customers will, at the time of shipment, be free from defects in workmanship and materials and conform to its approved specifications. Subject to certain exceptions, the Company generally offers a three-year limited warranty to end users for microprocessor products that are commonly referred to as processors in a box, a one-year limited warranty to direct purchasers of all other microprocessor products that are commonly referred to as tray microprocessor products, and a one-year limited warranty to direct purchasers of embedded processor products. The Company has offered extended limited warranties to certain customers of tray microprocessor products who have written agreements with the Company and target their computer systems at the commercial and/or embedded markets.

The Company generally warrants that its graphics and chipset products and products for consumer electronics devices will be free from defects in material and workmanship under normal use and service for a period of one year, beginning on the date first sold to an end user but not later than 90 days after shipment of such products to its customers. The Company generally warrants that ATI-branded PC workstation products will be free from defects in material and workmanship under normal use and service for a period of three years, beginning on the date first sold to an end user but not later than 90 days after shipment of such products to its customers.

Table of Contents

Changes in the Company's potential liability for product warranty during the nine months ended September 29, 2007 and October 1, 2006 were as follows:

	Nine Months Ended	
	September 29, 2007	October 1, 2006
	(In millions)	
Balance, beginning of the period	\$ 26	\$ 19
New warranties issued during the period	19	37
Settlements during the period	(22)	(25)
Changes in liability for pre-existing warranties during the period, including Expirations	(9)	(3)
Balance, end of the period	\$ 14	\$ 28

The decrease in the liability for product warranty balance was primarily driven by fewer new warranties being issued in the first nine months of 2007 compared to the first nine months of 2006 due to lower revenues in the Company's Computing Solutions segment and improved product return rates in the first nine months of 2007 compared to the first nine months of 2006.

In addition to product warranties, the Company, from time to time in its normal course of business, indemnifies other parties with whom it enters into contractual relationships, including customers, lessors and parties to other transactions with the Company, with respect to certain matters. The Company has agreed to hold the other party harmless against specified losses, such as those arising from a breach of representations or covenants, third-party claims that the Company's products when used for their intended purpose(s) infringe the intellectual property rights of a third party or other claims made against certain parties. It is not possible to determine the maximum potential amount of liability under these indemnification obligations due to the limited history of indemnification claims and the unique facts and circumstances that are likely to be involved in each particular claim and indemnification provision. Historically, payments made by the Company under these obligations have not been material.

Contingencies

The Company is a defendant or plaintiff in various actions that arose in the normal course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on the Company's financial condition or results of operations.

9. Restructuring Charges

2002 Restructuring Plan

In December 2002, the Company began implementing a restructuring plan (the 2002 Restructuring Plan) to further align its cost structure to the industry conditions at that time, including weak customer demand and industry-wide excess inventory. The Company has completed the activities associated with the 2002 Restructuring Plan.

The accruals under the 2002 Restructuring Plan at December 31, 2006 were \$67 million and consisted primarily of remaining lease payments on abandoned facilities, net of estimated sublease income, that are payable through 2011. During the quarter and nine months ended September 29, 2007, the Company paid an aggregate amount of \$4 million and \$13 million, respectively, related to facility exit costs. As a result, the accruals as of September 29, 2007 were \$54 million.

Table of Contents

As of September 29, 2007 and December 31, 2006, \$35 million and \$48 million, of the total restructuring accruals of \$54 million and \$67 million, respectively, were included in other long-term liabilities on the condensed consolidated balance sheets. See Note 10.

10. Other Long-Term Liabilities

The Company's other long-term liabilities at September 29, 2007 and December 31, 2006 consisted of:

	September 29, 2007	December 31, 2006
	(In millions)	
Fab 30/Fab 36 deferred grants and subsidies	\$ 403	\$ 364
Restructuring accrual (see Note 9)	35	48
Deferred gain on sale leaseback of building	17	18
Payables for technology licenses	115	66
Unrecognized tax benefits	50	
Accrued sabbatical and other	30	21
	\$ 650	\$ 517

11. Other Financial Matters

Issuance of 5.75% Convertible Senior Notes due 2012

On August 14, 2007, the Company issued \$1.5 billion aggregate principal amount of 5.75% Convertible Senior Notes due 2012 (the 5.75% Notes). The 5.75% Notes bear interest at 5.75% per annum. Interest is payable in arrears on February 15 and August 15 of each year beginning February 15, 2008. The 5.75% Notes mature on August 15, 2012. The terms of the 5.75% Notes are governed by an Indenture (the 5.75% Indenture), dated as of August 14, 2007, by and between the Company and Wells Fargo Bank, National Association, as Trustee.

The 5.75% Notes will be convertible, in whole or in part, at any time prior to the close of business on the business day immediately preceding the maturity date of the 5.75% Notes, into shares of the Company's common stock based on an initial conversion rate of 49.6771 shares of common stock per \$1,000 principal amount of the 5.75% Notes, which is equivalent to an initial conversion price of approximately \$20.13 per share. This initial conversion price represents a premium of 50% relative to the last reported sale price of our common stock on August 8, 2007 (the trading date preceding the date of pricing of the 5.75% Notes) of \$13.42 per share. This initial conversion rate will be adjusted for certain anti-dilution events. In addition, the conversion rate will be increased in the case of corporate events that constitute a fundamental change (as defined in the 5.75% Indenture) of the Company under certain circumstances. Holders of the 5.75% Notes may require the Company to repurchase the notes for cash equal to 100% of the principal amount to be repurchased plus accrued and unpaid interest upon the occurrence of a fundamental change or a termination of trading (as defined in the 5.75% Indenture). Additionally, an event of default (as defined in the 5.75% Indenture) may result in the acceleration of the maturity of the 5.75% Notes.

The 5.75% Notes rank equally in right of payment with the Company's existing and future senior debt and senior in right of payment to all of its future subordinated debt. The 5.75% Notes rank junior in right of payment to all of the Company's existing and future senior secured debt to the extent of the collateral securing such debt and are structurally subordinated to all existing and future debt and liabilities of the Company's subsidiaries.

Table of Contents

In connection with the issuance and sale of the 5.75% Notes, the Company also entered into a Registration Rights Agreement (the 5.75% Registration Rights Agreement), dated August 14, 2007, between the Company and Lehman Brothers Inc. (the initial purchaser), pursuant to which the Company has agreed to file a shelf registration statement with the Securities and Exchange Commission (SEC) for the resale by holders of the 5.75% Notes and the shares of common stock of the Company issuable upon conversion of the notes, use its reasonable best efforts to cause the registration statement to be declared effective and keep the registration statement effective for the period described in the 5.75% Registration Rights Agreement. The Company could be subject to paying additional interest on the 5.75% Notes for the period during which a default under the 5.75% Registration Rights Agreement exists.

The net proceeds from the offering, after deducting discounts, commissions and offering expenses payable by the Company, were approximately \$1,479 million. The Company used all of the net proceeds, together with available cash, to repay in full the remaining outstanding balance under a Credit Agreement with Morgan Stanley Funding Inc. dated October 24, 2006 (October 2006 Term Loan). All security interests under the October 2006 Term Loan were released. In connection with this repayment, the Company recorded a charge of approximately \$17 million for the remaining unamortized debt issuance costs associated with the October 2006 Term Loan, which is classified as Other income (expense), net on the Company's condensed consolidated statement of operations.

Issuance of 6.00% Convertible Senior Notes due 2015 and Purchase of Capped Call

On April 27, 2007, the Company issued \$2.2 billion aggregate principal amount of 6.00% Convertible Senior Notes due 2015 (the 6.00% Notes). The 6.00% Notes bear interest at 6.00% per annum. Interest is payable on May 1 and November 1 of each year beginning November 1, 2007 until the maturity date of May 1, 2015. The terms of the 6.00% Notes are governed by an Indenture (the 6.00% Indenture), dated April 27, 2007, by and between the Company and Wells Fargo Bank, National Association, as Trustee.

Upon the occurrence of certain events described in the 6.00% Indenture, the 6.00% Notes will be convertible into cash up to the principal amount, and if applicable, into shares of the Company's common stock issuable upon conversion of the 6.00% Notes (Conversion Shares) in respect of any conversion value above the principal amount, based on an initial conversion rate of 35.6125 shares of common stock per \$1,000 principal amount of 6.00% Notes, which is equivalent to an initial conversion price of \$28.08 per share. This initial conversion price represents a premium of 100% relative to the last reported sale price of the Company's common stock on April 23, 2007 (the trading date preceding the date of pricing of the 6.00% Notes) of \$14.04 per share. The conversion rate will be adjusted for certain anti-dilution events. In addition, the conversion rate will be increased in the case of corporate events that constitute a fundamental change (as defined in the 6.00% Indenture) of the Company under certain circumstances. Holders of the 6.00% Notes may require the Company to repurchase the 6.00% Notes for cash equal to 100% of the principal amount to be repurchased plus accrued and unpaid interest upon the occurrence of a fundamental change (as defined in the 6.00% Indenture) or a termination of trading (as defined in the 6.00% Indenture). Additionally, an event of default (as defined in the 6.00% Indenture) may result in the acceleration of the maturity of the 6.00% Notes.

The 6.00% Notes rank equally with the Company's existing and future senior debt and are senior to all of its future subordinated debt. The 6.00% Notes rank junior to all of the Company's existing and future senior secured debt to the extent of the collateral securing such debt and are structurally subordinated to all existing and future debt and liabilities of the Company's subsidiaries.

In connection with the issuance and sale of the 6.00% Notes, the Company also entered into a Registration Rights Agreement (the 6.00% Registration Rights Agreement), dated April 27, 2007, between the Company and Morgan Stanley & Co. Incorporated, as representative of the several initial purchasers of the 6.00% Notes, pursuant to which the Company has agreed to file a shelf registration statement with the SEC for the resale by holders of the 6.00% Notes and the Conversion Shares, use its reasonable best efforts to cause the registration statement to be declared effective and keep the registration statement effective for the period described in the 6.00% Registration Rights Agreement. On July 13, 2007 the Company filed a shelf registration statement that was automatically declared effective. The Company will file with the SEC a post-effective amendment to the shelf registration statement, prepare and file a supplement to the prospectus, or file a new shelf registration statement on a quarterly basis in order to include any additional selling security holders in the shelf registration statement.

Table of Contents

In connection with the issuance of the 6.00% Notes, on April 24, 2007, the Company purchased a capped call. The capped call has an initial strike price of \$28.08 per share, subject to certain adjustments, which matches the initial conversion price of the 6.00% Notes, and a cap price of \$42.12 per share. The capped call is intended to reduce the potential common stock dilution to then existing stockholders upon conversion of the 6.00% Notes because the call option allows the Company to receive shares of common stock from the counterparty generally equal to the number of shares of common stock issuable upon conversion of the 6.00% Notes. The Company does not anticipate experiencing an increase in the number of shares outstanding from the conversion of the 6.00% Notes unless the price of its common stock appreciates above \$42.12 per share. If, however, the market value per share of the Company's common stock, as measured under the terms of the capped call, exceeds the cap price of the capped call, there would be dilution to the extent that the then market value per share of the common stock exceeds the cap price. The Company analyzed the capped call under EITF Issue No. 00-19, *Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled In, a Company's Own Stock*, and determined that it meets the criteria for classification as an equity transaction. As a result, it recorded the purchase of the capped call as a reduction in additional paid-in capital and it will not recognize subsequent changes in its fair value.

The net proceeds from the offering, after deducting discounts, commissions and offering expenses payable by the Company, were approximately \$2,169 million. The Company used approximately \$182 million of the net proceeds to purchase the capped call and applied \$500 million of the net proceeds to prepay a portion of the amount outstanding under the October 2006 Term Loan. In connection with this repayment, the Company recorded a charge of approximately \$5 million for unamortized debt issuance costs.

Increase in Authorized Share Capital

On May 3, 2007, the stockholders of the Company approved an amendment to its Restated Certificate of Incorporation to increase the number of authorized shares of Common Stock from 750 million to 1.5 billion shares.

12. Income Taxes

The Company recorded an income tax provision of \$27 million, or -9 percent, on pre-tax losses in the third quarter of 2007 and an income tax benefit of \$21 million, or -17 percent of pre-tax income, for the third quarter of 2006. For the nine months ended September 29, 2007 the Company recorded an income tax provision of \$82 million or -6 percent, on pre-tax losses. For the nine months ended October 1, 2006, the Company recorded an income tax provision of \$32 million, or 7 percent of pre-tax income.

The income tax provisions recorded in the first three quarters of 2007 were primarily for deferred U.S. taxes related to indefinite-lived goodwill and foreign current taxes. The income tax provision in the first three quarters of 2006 was for taxes on income generated in both the U.S. and foreign jurisdictions.

On January 1, 2007, upon adoption of FIN 48, the cumulative effect of applying FIN 48 was reported as a reduction of the beginning balance of retained earnings of \$6 million and a decrease to goodwill of \$3 million.

As of the date of adoption, the Company's total gross unrecognized tax benefits were \$149 million, of which \$57 million, if recognized, would affect the effective tax rate. The recognition of the remaining unrecognized tax benefits would be reported as an adjustment to goodwill to the extent of pre-acquisition unrecognized tax benefits.

The Company recognizes potential accrued interest and penalties related to unrecognized tax benefits as interest expense and income tax expense, respectively. The Company had accrued interest and penalties of \$59 million as of the date of adoption of FIN 48.

As of the date of adoption of FIN 48, tax years 1994 – 2006 remain subject to examination in the U.S., 1999 – 2006 in Canada and 1999 – 2006 in various foreign jurisdictions.

As of September 29, 2007 substantially all of the Company's U.S. deferred tax assets, net of deferred tax liabilities, continue to be subject to a valuation allowance that was initially established in the fourth quarter of 2002. The realization of these assets is dependent on substantial future taxable income which at September 29, 2007 in management's estimate, is not more likely than not to be achieved.

As a result of the implementation of FIN 48, the Company has recognized \$56 million of current and long-term deferred tax assets, previously under a valuation allowance with \$56 million of current and non-current tax contingencies as of September 29, 2007.

Total gross unrecognized tax benefits decreased by \$15 million in the first nine months of 2007, of which \$11 million, if recognized, would affect the effective tax rate. Substantially all of this decrease occurred in the third quarter of 2007 and resulted from settlements with taxing authorities. Interest and penalties decreased by \$13 million and \$1 million respectively in the first nine months of 2007. Substantially all of the

Edgar Filing: ADVANCED MICRO DEVICES INC - Form 10-Q

reduction in interest and penalties occurred in the third quarter of 2007 and the reduction in interest was primarily due to the expiration of the statute of limitations in foreign jurisdictions.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The statements in this report include forward-looking statements. These forward-looking statements are based on current expectations and beliefs and involve numerous risks and uncertainties that could cause actual results to differ materially from expectations. These forward-looking statements should not be relied upon as predictions of future events as we cannot assure you that the events or circumstances reflected in these statements will be achieved or will occur. You can identify forward-looking statements by the use of forward-looking terminology including believes, expects, may, will, should, seeks, intends, plans, pro forma, estimates, or anticipates or the negative of these words and phrases or other variations of these words and phrases or comparable terminology. The forward-looking statements relate to, among other things: our cost reduction efforts; the timing of new product releases; the growth and competitive landscape of the markets in which we participate; our revenues; our capital expenditures; our operating expenses; our depreciation and amortization expense; our acquisition-related charges; our income tax expense; our aggregate contractual obligations; and availability of external financing. Material factors and assumptions that were applied in making these forward-looking statements include, without limitation, the following: (1) the expected rate of market growth and demand for our products and technologies (and the mix thereof); (2) our expected market share; (3) our expected product and manufacturing costs and average selling prices; (4) our overall competitive position and the competitiveness of our current and future products; (5) our ability to introduce new products and effect transitions to more advanced manufacturing process technologies, consistent with our current plans in terms of timing and capital expenditures; (6) our ability to raise sufficient capital on favorable terms; and (7) our ability to make additional investment in research and development and that such opportunities will be available. Material factors that could cause actual results to differ materially from current expectations include, without limitation, the following: (1) that Intel Corporation's pricing, marketing and rebating programs, product bundling, standard setting, new product introductions or other activities may negatively impact sales; (2) that our substantial indebtedness could adversely affect our financial position and prevent us from implementing our strategy or fulfilling our contractual obligations; (3) that our cost reduction plans may not be effective; (4) that we may be unable to raise sufficient capital, on favorable terms or at all; (5) that we may be unable to realize all of the anticipated benefits of our recent acquisition of ATI because, among other things, the revenues, cost savings, growth prospects and any other synergies expected from the transaction may not be fully realized or may take longer to realize than expected; (6) that we may be unable to maintain the level of investment in research and development and capacity that is required to remain competitive; (7) that we may be unable to develop, launch and ramp new products and technologies in the volumes and mix required by the market at mature yields and on a timely basis; (8) that we may be unable to transition to advanced manufacturing process technologies in a timely and effective way, consistent with planned capital expenditures; (9) that there may be unexpected variations in market growth and demand for our products and technologies in light of the product mix that we may have available at any particular time or a decline in demand; (10) that we may be unable to improve the efficiency of our supply chain; (11) that we may be unable to increase or even maintain sales to the distribution channel; (12) that we may be unable to obtain sufficient manufacturing capacity (either in our own facilities or at foundries) or components to meet demand for our products; (13) that we may under-utilize our microprocessor manufacturing facilities; and (14) the effect of political or economic instability, domestically or internationally, on our sales or production.

For a discussion of the factors that could cause actual results to differ materially from the forward-looking statements, see Part II, Item 1A Risk Factors and such other risks and uncertainties as set forth below in this report or detailed in our other Securities and Exchange Commission (SEC) reports and filings. We assume no obligation to update forward-looking statements.

Table of Contents

AMD, the AMD Arrow logo and combinations thereof, and ATI and the ATI logo are trademarks of Advanced Micro Devices, Inc. Microsoft, Windows and Windows Vista are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other jurisdictions. Other names are for informational purposes only and used to identify companies and products and may be trademarks of their respective owners.

In this section, we will describe the general financial condition and the results of operations for Advanced Micro Devices, Inc. and our consolidated subsidiaries, including a discussion of our results of operations for the third quarter of 2007 compared to the third quarter of 2006 and the second quarter of 2007, and the first nine months of 2007 compared to the first nine months of 2006, an analysis of changes in our financial condition and a discussion of our contractual obligations and off balance sheet arrangements.

Our results of operations for the first nine months of 2007 included sales of graphics, video, multimedia and chipset products, and products for consumer electronics devices attributable to our Computing Solutions, Consumer Electronics and Graphics segments. However, we are not able to provide any comparative information for the Consumer Electronics and Graphics segments for the third quarter and the first nine months of 2006 because prior to our acquisition of ATI Technologies Inc. in October 2006, we did not sell these products. Moreover, the results of operations for our Computing Solutions segment for the third quarter of 2007 and the first nine months of 2007 are not fully comparable to the results for the Computing Solutions segment for the third quarter of 2006 and the first nine months of 2006 because the results for the periods in 2006 excluded revenue from sales of chipsets historically sold by ATI (ATI chipsets). For the same reasons, total net revenues for the third quarter of 2007 and the first nine months of 2007 are not fully comparable to prior periods.

The following discussion should be read in conjunction with the unaudited condensed consolidated financial statements and related notes included in this report and our audited consolidated financial statements and related notes as of December 31, 2006 and December 25, 2005, and for each of the three years in the period ended December 31, 2006 as filed in our Annual Report on Form 10-K for the year ended December 31, 2006.

Overview

We are a global semiconductor company with facilities around the world. Within the global semiconductor industry, we offer primarily:

x86 microprocessors, for the commercial and consumer markets, embedded microprocessors for commercial, commercial client and consumer markets and chipsets for desktop and notebook PCs, professional workstations and servers;

graphics, video and multimedia products for desktop and notebook computers, including home media PCs, professional workstations and servers; and

products for consumer electronic devices such as mobile phones and digital televisions and technology for game consoles.

During the third quarter of 2007, we improved our gross margins, reduced our operating loss by more than half and improved our cash flow as compared to the second quarter of 2007. We also began shipping our Quad-Core AMD Opteron processors in the third quarter of 2007. Net revenue in the third quarter of 2007 was \$1.6 billion, an 18 percent increase compared to the second quarter of 2007 and a 23 percent increase from the third quarter of 2006. Net revenue in the third quarter of 2007 increased compared to the second quarter of 2007 primarily due to increased unit shipments of products included in our Computing Solutions segment, particularly microprocessors for desktop and notebook PCs, and increased sales of recently introduced products included in our Graphics segment. Net revenue in the third quarter of 2007 increased from the third quarter of 2006 due to the inclusion of revenue attributable to the Consumer Electronics and Graphics segments and to sales of ATI chipsets. This revenue was not included in the third quarter of 2006 because it was prior to the acquisition of ATI.

Gross margin, as a percentage of net revenue, for the third quarter of 2007 was 41 percent, an increase of eight percentage points compared to 33 percent in the second quarter of 2007 and a decrease of ten percentage points

Table of Contents

compared to 51 percent in the third quarter of 2006. Gross margin in the third quarter of 2007 increased compared to the second quarter of 2007 due to higher unit shipments, improved microprocessor manufacturing efficiencies, improved inventory management and a richer product mix of graphics processors and microprocessors. Gross margin in the third quarter of 2007 was ten percentage points lower than in the third quarter of 2006 primarily due to lower microprocessor average selling prices. In addition, consolidated gross margin in the third quarter of 2007 was unfavorably impacted due to the consolidation of ATI's lower margin operations into ours.

The net operating loss for the third quarter of 2007 was \$226 million, an improvement of \$231 million over the \$457 million operating loss we reported in the second quarter of 2007 and a deterioration of \$347 million compared to the operating profit of \$121 million we reported for the third quarter of 2006. While revenue in the third quarter of 2007 increased compared to the second quarter of 2007, our total operating costs, consisting of cost of goods sold, research and development expenses and marketing, general and administrative expenses, remained relatively flat resulting in the reduction to our operating loss. The year-on-year decline in our operating performance was due to lower microprocessor average selling prices, increased operating expenses from the inclusion of ATI's businesses, higher operating expenses for our Computing Solutions segment from marketing expenses and increased investment in new product development, and the addition of amortization expense for ATI acquisition-related intangibles from October 25, 2006.

Results for the third quarter of 2007 included ATI acquisition-related charges of \$76 million, an impairment charge on our investment in Spansion's common stock of \$42 million, stock-based compensation expense of \$27 million and a tax expense of \$27 million primarily due to the need for a deferred tax liability related to the large tax deductions we receive for the amortization of goodwill from the acquisition of ATI, which is not amortized through earnings for financial reporting purposes, and for foreign current taxes. Our cash, cash equivalents and marketable securities as of September 29, 2007 were \$1.5 billion, a decrease of \$66 million compared to June 30, 2007 due to the repayment of our October 2006 Term Loan, offset by positive cash flows from operations of \$223 million, net proceeds from the issuance of our 5.75% Convertible Senior Notes due 2012 and the inclusion of the fair market value of our ownership interest in Spansion Inc. of \$119 million in our marketable securities balance. Previously, the value of our investment in Spansion, Inc. was reported in our Investment in Spansion account on our condensed consolidated balance sheet.

We intend the discussion of our financial condition and results of operations that follows to provide information that will assist you in understanding our financial statements, the changes in certain key items in those financial statements from period to period, the primary factors that resulted in those changes and how certain accounting principles, policies and estimates affect our financial statements.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our condensed consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of our financial statements requires us to make estimates and judgments that affect the reported amounts in our condensed consolidated financial statements. We evaluate our estimates on an on-going basis, including those related to our revenues, inventories, asset impairments and income taxes. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances the results of which form the basis for making judgments about the carrying values of assets and liabilities. Although actual results have historically been reasonably consistent with management's expectations, the actual results may differ from these estimates or our estimates may be affected by different assumptions or conditions.

Upon adoption of FIN 48 as required at January 1, 2007, we have elected to recognize accrued interest and penalties associated with unrecognized tax benefits as interest expense and income tax expense, respectively.

Management believes there have been no significant changes during the quarter ended September 29, 2007 to the items that we disclosed as our critical accounting policies and estimates in the Management's Discussion and Analysis of Financial Condition and Results of Operations section of our Annual Report on Form 10-K for the year ended December 31, 2006.

Table of Contents

Results of Operations

By Reportable Segment

We review and assess operating performance using segment net revenues and operating income (loss) before interest, other income (expense), equity in net loss of Spansion Inc. and other, income taxes and minority interest. These performance measures include the allocation of expenses to the operating segments based on management's judgment.

From December 26, 2005 through October 24, 2006, we had two reportable segments:

the Computation Products segment, which included microprocessors, chipsets that we sold prior to the ATI acquisition and related revenue; and

the Embedded Products segment, which included embedded processors and related revenue.

As a result of the acquisition of ATI, from October 25, 2006 through December 31, 2006, we had the following four reportable segments:

the Computation Products segment, which included microprocessors, chipsets that we sold prior to the ATI acquisition and related revenue;

the Embedded Products segment, which included embedded processors and related revenue;

the Graphics and Chipsets segment, which included graphics, video and multimedia products and ATI chipsets sold for use in desktop and notebook PCs, including home media PCs, professional workstations and servers and related revenue; and

the Consumer Electronics segment, which included products for and revenue related to mobile phones and PDAs, digital televisions and other consumer electronics and royalties received in connection with sales of game console systems that incorporate our technology.

Starting in the first quarter of 2007, in conjunction with the integration of ATI's operations, the Chief Operating Decision Maker, or CODM, began reviewing and addressing operating performance using the following three reportable segments:

the Computing Solutions segment, which includes what was formerly the Computation Products segment and the Embedded Products segment as well as revenue from sales of ATI chipsets;

the Graphics segment, which includes graphics, video and multimedia products developed for use in desktop and notebook computers, including home media PCs, professional workstations and servers; and

the Consumer Electronics segment, which includes products for and revenue related to mobile phones and PDAs, digital televisions and other consumer electronics and royalties received in connection with the sale of game console systems that incorporate our technology.

In addition to the reportable segments, the All Other category includes certain expenses and credits that are not allocated to any of the operating segments because the CODM does not consider these expenses and credits in evaluating the performance of the operating segments. Following

Edgar Filing: ADVANCED MICRO DEVICES INC - Form 10-Q

the ATI acquisition, we began including employee stock-based compensation expense, profit sharing expense and ATI acquisition-related and integration charges in the All Other category. Prior period segment information has been reclassified to conform to the current period's presentation. For the quarter and nine months ended September 29, 2007, respectively, the All Other category also included severance charges related to workforce reductions.

Table of Contents

We use a 52- to 53-week fiscal year. Prior to December 31, 2006, our fiscal year ended on the last Sunday in December. Commencing in 2007, our fiscal year ends on the last Saturday in December. The quarters ended October 1, 2006, June 30, 2007 and September 29, 2007 each included 13 weeks. The nine months ended October 1, 2006 included 40 weeks, and the nine months ended September 29, 2007 included 39 weeks. The quarter and the nine months ended October 1, 2006 did not include any sales of products attributable to our Consumer Electronics and Graphics segments or any revenues from ATI chipsets as the acquisition of ATI did not occur until October 24, 2006.

The following is a summary of our net revenue and operating income (loss) by segment for the periods presented below:

	Quarter Ended			Nine Months Ended	
	September 29, 2007	June 30, 2007	October 1, 2006	September 29, 2007	October 1, 2006
	(In millions)			(In millions)	
Computing Solutions					
Net revenue	\$ 1,283	\$ 1,098	\$ 1,328	\$ 3,299	\$ 3,880
Operating income (loss)	(112)	(258)	167	(691)	615
Graphics					
Net revenue	252	195		644	
Operating income (loss)	(3)	(50)		(88)	
Consumer Electronics					
Net revenue	97	85		300	
Operating income (loss)	(3)	(22)		(29)	
All Other					
Net revenue					(4)
Operating income (loss)	(108)	(127)	(46)	(379)	(133)
Total					
Net revenue	1,632	1,378	1,328	4,243	3,876
Operating income (loss)	\$ (226)	\$ (457)	\$ 121	\$ (1,187)	\$ 482

Computing Solutions

Computing Solutions net revenue of \$1,283 million in the third quarter of 2007 decreased by \$45 million, or three percent, compared to net revenue of \$1,328 million in the third quarter of 2006 despite the inclusion of revenue from the sale of ATI chipsets in the third quarter of 2007. In the third quarter of 2006, we did not have sales of ATI chipsets because it was prior to the ATI acquisition. Net revenue decreased as a result of a 36 percent decrease in average selling prices of products included in our Computing Solutions segment, partially offset by a 51 percent increase in unit shipments. The decrease in average selling prices in the third quarter of 2007 was caused by a decrease in the average selling prices of our microprocessor products and the inclusion of sales of ATI chipsets. Chipsets generally have lower average selling prices than microprocessors. Microprocessor average selling prices decreased due to both competitive market conditions and a higher concentration of sales of processors for desktop and notebook PCs.

Table of Contents

which generally carry lower average selling prices than our processors for servers. Unit shipments increased primarily due to increased customer demand for our microprocessors for notebook and desktop PCs and the inclusion of ATI chipset sales. In the third quarter of 2007, neither overall Computing Solutions net revenue nor microprocessor average selling prices were significantly affected by sales of Quad-Core AMD Opteron processors which we began shipping late in the quarter.

Computing Solutions net revenue of \$1,283 million in the third quarter of 2007 increased 17 percent compared to net revenue of \$1,098 million in the second quarter of 2007 primarily as a result of an 11 percent increase in unit shipments and a five percent increase in average selling prices. The increase in unit shipments was primarily driven by a 16 percent increase in microprocessor unit shipments, driven by increased demand for our microprocessors for notebook and desktop PCs. The increase in average selling prices was primarily driven by sales of a richer mix of microprocessor products in the third quarter of 2007 compared to the second quarter of 2007.

Computing Solutions net revenue of \$3,299 million in the first nine months of 2007 decreased 15 percent compared to net revenue of \$3,880 million in the first nine months of 2006 despite the inclusion of revenue from sales of ATI chipsets in the first nine months of 2007. The decrease in net revenue was driven by a 41 percent decrease in average selling prices caused by a decline in microprocessor average selling prices due to competitive market conditions. The decline in net revenue was partially mitigated by a 43 percent increase in unit shipments primarily due to the inclusion of sales of ATI chipsets in the first nine months of 2007.

Computing Solutions operating loss was \$112 million in the third quarter of 2007 compared to operating income of \$167 million in the third quarter of 2006. The operating loss was primarily due to the \$45 million decrease in revenue described above, a \$119 million increase in manufacturing expenses, a \$91 million increase in research and development expenses and a \$25 million increase in marketing, general and administrative expenses. Research and development expenses and marketing, general and administrative expenses increased for the reasons set forth under Expenses, below. Manufacturing expenses increased predominantly due to the inclusion of ATI's chipset business in the Computing Solutions segment and higher microprocessor manufacturing costs to support the increased unit shipments in the third quarter of 2007.

Computing Solutions operating loss was \$112 million in the third quarter of 2007 compared to an operating loss of \$258 million in the second quarter of 2007. The reduction in operating loss was primarily due to a 17 percent increase in net revenue while cost of sales and operating expenses remained relatively flat. Compared to the second quarter of 2007, we also managed our inventory more efficiently. An inventory write-down charge of approximately \$30 million taken in the second quarter of 2007 for our older generation microprocessor inventory did not recur in the third quarter of 2007.

Computing Solutions operating loss was \$691 million in the first nine months of 2007 compared to operating income of \$615 million in the first nine months of 2006. The operating loss was primarily due to a 15 percent decrease in net revenue, higher cost of sales corresponding to the 43 percent increase in unit shipments, an inventory write-down charge of approximately \$30 million referenced above, a \$238 million increase in research and development expenses and a \$63 million increase in marketing, general and administrative expenses. Net revenue decreased for the reasons set forth above. Research and development expenses and marketing, general and administrative expenses increased for the reasons set forth under Expenses below.

Graphics

Graphics net revenue and operating loss in the third quarter of 2007 were \$252 million and \$3 million, respectively. Graphics net revenue and operating loss in the first nine months of 2007 were \$644 million and \$88 million, respectively. We did not sell comparable products in the third quarter or the first nine months of 2006 prior to the acquisition of ATI.

Graphics net revenue of \$252 million in the third quarter of 2007 increased 29 percent compared to net revenue of \$195 million in the second quarter of 2007 as a result of a 25 percent increase in unit shipments. Unit

Table of Contents

shipments increased primarily due to higher demand for our graphics products for desktop PCs and our recently introduced graphics products. Average selling prices increased three percent primarily due to a more favorable sales mix, with a shift in sales to higher-priced graphics products for desktop PCs.

Graphics operating loss of \$3 million in the third quarter of 2007 declined by \$47 million compared to an operating loss of \$50 million in the second quarter of 2007. The reduction in operating loss was primarily due to an increase of 29 percent in net revenue, an eight percent decrease in research and development expenses and a six percent decrease in marketing, general and administrative expenses in response to cost reduction efforts.

Consumer Electronics

Consumer Electronics net revenue and operating loss in the third quarter of 2007 were \$97 million and \$3 million, respectively. Consumer Electronics net revenue and operating loss in the first nine months of 2007 were \$300 million and \$29 million, respectively. We did not sell comparable products in the third quarter or the first nine months of 2006 prior to the acquisition of ATI.

Consumer Electronics net revenue of \$97 million in the third quarter of 2007 increased 14 percent compared to net revenue of \$85 million in the second quarter of 2007 primarily as a result of increased royalties from the sale of game console systems that incorporated our technology and a 31 percent increase in unit shipments of products for handheld devices. This increase was partially offset by a 17 percent decrease in average selling prices due to a less favorable sales mix, with a shift in sales to lower-priced products.

Consumer Electronics operating loss was \$3 million in the third quarter of 2007, an improvement of \$19 million compared to an operating loss of \$22 million in the second quarter of 2007. The decrease in operating loss was primarily due to the 14 percent increase in net revenue coupled with research and development and marketing, general and administrative expenses being relatively flat.

All Other Category

All Other operating loss of \$108 million in the third quarter of 2007 increased by \$62 million compared to an operating loss of \$46 million in the third quarter of 2006. The increase in our operating loss was primarily attributable to ATI acquisition-related intangible asset amortization of \$71 million and an increase in employee stock-based compensation expense of \$10 million, partially offset by a decrease in profit sharing expense of \$13 million. Additionally, in the third quarter of 2006 we wrote-off \$10 million of prepaid assets related to Personal Internet Communicator (PIC) products as a result of our decision to cease manufacturing processors for these products. There were no corresponding charges in the third quarter of 2007.

All Other operating loss of \$108 million in the third quarter of 2007 decreased by \$19 million compared to an operating loss of \$127 million in the second quarter of 2007. The decrease in operating loss was primarily attributable to a \$12 million decrease in severance charges for workforce reductions and a \$4 million decrease in employee stock-based compensation expense.

All Other operating loss of \$379 million in the first nine months of 2007 increased by \$246 million compared to an operating loss of \$133 million in the first nine months of 2006. The increase in operating loss was primarily attributable to a \$232 million increase in ATI acquisition-related charges, an increase in employee stock-based compensation expense of \$36 million, fair value adjustments of acquired inventory of \$29 million and severance charges of \$18 million. These increases were offset by a decrease in profit sharing expense of \$47 million. Additionally, in the first nine months of 2006 we wrote off \$20 million of inventory and prepaid assets related to PIC products as a result of our decision to cease manufacturing processors for these products. There were no corresponding charges in the first nine months of 2007.

Table of Contents**Comparison of Gross Margin, Expenses, Interest Income, Interest Expense, Other Income (Expense), Net, and Income Taxes**

The following is a summary of certain consolidated statement of operations data for the periods indicated:

	Quarter Ended			Nine Months Ended	
	September 29, 2007	June 30, 2007	October 1, 2006	September 29, 2007	October 1, 2006
	(In millions except for percentages)				
Cost of sales	\$ 963	\$ 917	\$ 645	\$ 2,766	\$ 1,724
Gross margin	669	461	683	1,477	2,152
Gross margin percentage	41%	33%	51%	35%	56%
Research and Development	\$ 467	\$ 475	\$ 277	\$ 1,374	\$ 820
Marketing, General and Administrative	352	365	279	1,052	844
Amortization of acquired intangible assets and integration charges	76	78	6	238	6
Interest income	19	19	31	54	94
Interest expense	(95)	(99)	(18)	(272)	(59)
Other income (expense), net	(1)	(9)	(2)	(8)	(15)
Income tax provision (benefit)	27	32	(21)	82	32
Gross Margin					

Gross margin, as a percentage of net revenue, decreased to 41 percent in the third quarter of 2007 compared to 51 percent in the third quarter of 2006 primarily due to lower average selling prices for our microprocessor products. In addition, consolidated gross margin was unfavorably impacted due to the consolidation of ATI's lower margin operations into ours in the third quarter of 2007.

Gross margin, as a percentage of net revenue, increased to 41 percent in the third quarter of 2007 compared to 33 percent in the second quarter of 2007. Higher unit shipments and improved microprocessor manufacturing efficiencies accounted for approximately 3 percentage points of improvement to the gross margin. A richer product mix of graphics processors and microprocessors contributed to higher average selling prices and approximately 2 percentage points of improvement to gross margin. Improved inventory management accounted for approximately 3 percentage points of improvement to gross margin, of which approximately 2 percentage points resulted from our recording an inventory write-down charge of \$30 million for older generation microprocessors in the second quarter of 2007.

Gross margin decreased to 35 percent in the first nine months of 2007 compared to 56 percent in the first nine months of 2006 due to lower average selling prices and higher manufacturing costs in the first nine months of 2007 compared to the first nine months of 2006. The increase in manufacturing costs was due to a shift in product mix to higher-end microprocessors and increased expenses associated with the ramp of Fab 36. Moreover, gross margin in the first nine months of 2007 was unfavorably impacted due to the consolidation of ATI's lower margin operations with ours. Gross margin was also negatively impacted during the first nine months of 2007 by an inventory write-down charge of approximately \$30 million, or one percentage point of year-to-date revenue, associated with older generation microprocessor inventory and the cost of fair value adjustments of \$29 million, or one percentage point, related to the inventory we acquired in the ATI acquisition and sold during the first quarter of 2007.

Table of Contents

We record grants and allowances that we receive from the State of Saxony and the Federal Republic of Germany for Fab 30 or Fab 36 as long-term liabilities on our financial statements. We amortize these amounts as they are earned as a reduction to operating expenses. We record the amortization of the production related grants and allowances as a credit to cost of sales. The credit to cost of sales totaled \$34 million in the third quarter of 2007, \$34 million in the second quarter of 2007 and \$30 million in the third quarter of 2006. The credit to cost of sales totaled \$101 million in the first nine months of 2007 and \$84 million in the first nine months of 2006. The fluctuations in the recognition of these credits have not significantly impacted our gross margins.

Expenses

Research and Development Expenses

Research and development expenses of \$467 million in the third quarter of 2007 increased 69 percent from \$277 million in the third quarter of 2006 primarily because the third quarter of 2007 included the operations of ATI and because of increased research and development expenses for our Computing Solutions segment. In the third quarter of 2007, research and development expenses attributable to the Graphics and Consumer Electronics segments were \$98 million. We did not incur comparable expenses in the third quarter of 2006. Research and development expense for our Computing Solutions segment in the third quarter of 2007 increased \$91 million compared to the third quarter of 2006 due to continued investment in development of quad-core processors and other future generation microprocessor products and 45 nanometer process technology as well as the addition of research and development expenses for ATI chipset products.

Research and development expenses of \$467 million in the third quarter of 2007 decreased 2 percent from \$475 million in the second quarter of 2007. This decrease is primarily due to the absence of \$7 million of severance charges for workforce reductions in the third quarter of 2007, which we incurred in the second quarter of 2007.

Research and development expenses of \$1,374 million in the first nine months of 2007 increased 68 percent from \$820 million in the first nine months of 2006 primarily because the first nine months of 2007 included the operations of ATI and because of increased research and development expenses for our Computing Solutions segment. In the first nine months of 2007, research and development expenses attributable to the Graphics and Consumer Electronics segments were \$309 million. We did not incur comparable expenses in the first nine months of 2006. Research and development expenses for the Computing Solutions segment increased by \$238 million due to continued investment in development of our future generation microprocessor products and manufacturing process technology as well as expenses for ATI chipset products, which were not incurred in the first nine months of 2006. Additionally, research and development expenses in the first nine months of 2007 included \$7 million in severance charges for workforce reductions, which we did not incur in the first nine months of 2006. A year-on-year decrease in bonus expenses of \$17 million partially offset the increased research and development expenses from the first nine months of 2006 to the first nine months of 2007.

We also apply for and obtain subsidies from the State of Saxony, the Federal Republic of Germany and the European Union for certain research and development projects. We record the amortization of the research and development related grants and allowances as well as the research and development subsidies as a reduction of research and development expenses when all conditions and requirements set forth in the subsidy are met. The credit to research and development expenses was \$11 million in the third quarter of 2007, \$9 million in the second quarter of 2007 and \$11 million in the third quarter of 2006. The credit to research and development expenses totaled \$24 million in the first nine months of 2007 and \$25 million in the first nine months of 2006.

Marketing, General and Administrative Expenses

Marketing, general and administrative expenses of \$352 million in the third quarter of 2007 increased 26 percent from \$279 million in the third quarter of 2006 primarily because the third quarter of 2007 included the operations of ATI and we experienced increased marketing and corporate administrative expenses attributable to the Computing Solutions segment. In the third quarter of 2007, marketing, general and administrative expenses for our Graphics and Consumer Electronics segments were \$45 million. We did not incur comparable expenses in the third quarter of 2006. Also, third quarter marketing, general and administrative expenses for our Computing Solutions segment increased \$25 million compared to the third quarter of 2006 due to increases in marketing programs with new and existing customers and legal expenses related to ongoing litigation. However, marketing, general and administrative expenses for the third quarter of 2006 included \$3 million in the All Other segment for PIC marketing expenses, which we did not incur in the third quarter of 2007.

Table of Contents

Marketing, general and administrative expenses of \$352 million in the third quarter of 2007 decreased 4 percent from \$365 million in the second quarter of 2007. This decrease was primarily due to a decrease of \$8 million in expenses related to marketing programs.

Marketing, general and administrative expenses of \$1,052 million in the first nine months of 2007 increased 25 percent from \$844 million in the first nine months of 2006 because the first nine months of 2007 included the operations of ATI, and the marketing, general and administrative expenses for our Computing Solutions segment increased. In the first nine months of 2007, marketing, general and administrative expenses for our Graphics and Consumer Electronics segments were \$136 million. We did not incur comparable expenses in the first nine months of 2006. Marketing, general and administrative expenses for our Computing Solutions segment increased \$63 million due to increases in marketing programs with new and existing customers and legal expenses related to ongoing litigation. Marketing, general and administrative expenses in the first nine months of 2007 in our All Other segment increased \$17 million, including an increase of \$10 million in severance charges for workforce reductions and \$8 million in corporate administrative costs.

Amortization of acquired intangible assets and integration charges

Amortization of acquired intangible assets and integration charges were \$76 million in the third quarter of 2007, consisting of \$71 million of acquisition-related intangible asset amortization and a charge of \$5 million related to the integration of AMD and ATI operations.

Amortization of acquired intangible assets and integration charges were \$78 million in the second quarter of 2007, consisting of \$71 million of acquisition-related intangible asset amortization and a charge of \$7 million related to the integration of AMD and ATI operations.

Amortization of acquired intangible assets and integration charges were \$238 million in the first nine months of 2007 compared to \$6 million in the first nine months of 2006. In the first nine months of 2007 we incurred amortization expense for acquisition-related intangibles of \$213 million and integration charges of \$25 million. We did not incur amortization expense for acquisition-related intangibles in the first nine months of 2006. The \$19 million increase in integration charges from the first nine months of 2006 to the first nine months of 2007 was attributable to post-acquisition integration activities.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of net tangible and identifiable intangible assets acquired. All of our goodwill and acquisition-related intangible assets outstanding as of September 29, 2007 were related to our acquisition of ATI. We will perform our annual goodwill impairment analysis during the fourth quarter of 2007. At this time, we cannot estimate the outcome of the analysis and to the extent we conclude that an impairment charge is required, we would record this charge in operating income in the fourth quarter of 2007.

Interest Income

Interest income of \$19 million in the third quarter of 2007 decreased from \$31 million in the third quarter of 2006 primarily due to lower average cash balances in the third quarter of 2007 as compared to the third quarter of 2006.

Interest income of \$19 million in the third quarter of 2007 was flat as compared to the second quarter of 2007.

Interest income of \$54 million in the first nine months of 2007 decreased from \$94 million in the first nine months of 2006, primarily due to lower average cash balances in the first nine months of 2007 as compared to the first nine months of 2006.

Table of Contents

Interest Expense

Interest expense of \$95 million in the third quarter of 2007 increased \$77 million compared to \$18 million in the third quarter of 2006 primarily due to increased outstanding indebtedness. Interest expense incurred in the third quarter of 2007 was as follows: \$34 million for the amount outstanding under the 6.00% Notes; \$19 million for the amount outstanding under the Fab 36 Term Loan; \$15 million for the amount outstanding under the October 2006 Term Loan and \$12 million for the amount outstanding under the 5.75% Notes. These borrowings were not outstanding in the third quarter of 2006. Interest expense in the third quarter of 2007 was partially offset by a credit of \$3 million related to the interest accrual on our FIN 48 tax liability due to the expiration of the statute of limitations in a foreign tax jurisdiction.

Interest expense of \$95 million in the third quarter of 2007 decreased \$4 million compared to \$99 million in the second quarter of 2007 primarily due to a decrease of \$20 million in interest expense incurred on the October 2006 Term Loan, which we repaid in full in August 2007. In addition, interest expense on our FIN 48 tax liability decreased by \$6 million compared to the second quarter of 2007 because we reversed a \$3 million accrual of interest due to the expiration of the statute of limitations in a foreign tax jurisdiction and recorded \$3 million less interest in the third quarter of 2007 compared to the second quarter of 2007. These factors were offset by an increase in interest expense incurred on our 5.75% Notes of \$12 million, which were not outstanding in the second quarter of 2007. In addition, the interest expense incurred on the 6.00% Notes increased by \$10 million because we incurred a full quarter of interest expense in the third quarter of 2007. We issued the 6.00% Notes in April 2007 and therefore incurred interest on these notes during only a portion of the second quarter of 2007.

Interest expense of \$272 million for the first nine months of 2007 increased \$213 million compared to \$59 million for the first nine months of 2006 primarily due to increased outstanding indebtedness. Interest expense incurred in the first nine months of 2007 was as follows: \$94 million for the amount outstanding under the October 2006 Term Loan; \$59 million for the amount outstanding under the 6.00% Notes; \$55 million for the amount outstanding under our Fab 36 Term Loan and \$12 million for the amount outstanding under the 5.75% Notes. These borrowings were not outstanding in the first nine months of 2006. These factors were offset in part by an increase of \$10 million of capitalized interest in the first nine months of 2007 compared to the first nine months of 2006 primarily in connection with the construction of our new campus in Austin, Texas.

In September 2007, the FASB exposed for comment a proposed FASB Staff Position (FSP) No. APB 14-a, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (including partial cash settlement)*. This proposed FSP would change the accounting for certain convertible debt instruments, including our 6.00% Notes. Under the proposed new rules, for convertible debt instruments that may be settled entirely or partially in cash upon conversion, an entity should separately account for the liability and equity components of the instrument in a manner that reflects the issuer's economic interest cost. The effect of the proposed new rules on our 6.00% Notes is that the equity component would be included in the paid-in-capital portion of stockholders' equity on our balance sheet and the value of the equity component would be treated as an original issue discount for purposes of accounting for the debt component of the 6.00% Notes. Higher interest expense would result by recognizing accretion of the discounted carrying value of the 6.00% Notes to their face amount as interest expense over the term of the 6.00% Notes. The FASB plans to issue the final FSP by December 2007 and, if issued as exposed, would provide final guidance effective for the fiscal years beginning after December 15, 2007, would not permit early application, and would require that the final FSP be applied retrospectively to all periods presented.

We are currently evaluating the proposed FSP and cannot currently quantify the exact impact on us. However, if the final FSP is issued as it is currently drafted, we expect to have higher interest expense starting in 2008 due to the interest expense accretion. In addition, if the final FSP retains the retrospective application provisions of the proposed FSP, our prior period interest expense associated with the 6.00% Notes would be higher than previously reported.

Other Income (Expense), Net

Other income (expense), net, of \$1 million expense in the third quarter of 2007 consisted primarily of a charge of \$17 million to write off unamortized debt issuance costs associated with the prepayment of \$1,694 million of the outstanding principal under the October 2006 Term Loan, a charge of \$3 million for an impairment loss on an equity investment and an offsetting gain of \$19 million on the sale of vacant land in Sunnyvale, California.

Table of Contents

Other income (expense), net, of \$2 million expense in the third quarter of 2006 consisted primarily of quarterly commitment fees related to the Fab 36 Term Loan.

Other income (expense), net, of \$9 million expense in the second quarter of 2007 consisted primarily of a charge of \$5 million to write off unamortized debt issuance costs associated with our prepayment of \$500 million of the outstanding principal on the October 2006 Term Loan.

Other income (expense), net, of \$8 million expense in the first nine months of 2007 consisted primarily of a charge of \$22 million to write off unamortized debt issuance costs associated with our prepayment of \$2,194 million of the outstanding principal under the October 2006 Term Loan and a charge of \$3 million for an impairment loss on an equity investment, partially offset by a gain of \$19 million on the sale of vacant land in Sunnyvale, California.

Other income (expense), net of \$14 million expense in the first nine months of 2006 consisted primarily of a charge of \$16 million related to a redemption premium and a charge of \$4 million related to unamortized issuance costs, incurred in connection with our redemption of 35 percent of the principal outstanding amount, or \$210 million, of our 7.75% Notes, and \$10 million of finance charges related to the Fab 36 Term Loan, partially offset by a gain of \$10 million associated with Spansion LLC's repurchase of its 12.75% Senior Subordinated Notes due 2016.

Equity in Net Loss of Spansion Inc. and other

During the first quarter of 2007, we sold 984,799 shares of Spansion Class A common stock. We received \$13 million in net proceeds from the sales and realized a gain of \$0.6 million which is included in the caption, *Equity in net loss of Spansion Inc. and other*, on our condensed consolidated statements of operations. We did not sell any shares of Spansion during the second quarter of 2007. As of June 30, 2007, we owned a total of 26,544,604 shares, or approximately 19.7 percent, of Spansion's outstanding common stock. We continued to use the equity method of accounting to reflect our share of Spansion's results of operations because we continued to have the ability to exercise significant influence over Spansion.

In July 2007, we sold 12,506,694 shares of Spansion Class A common stock. We received \$144 million in net proceeds from these sales and realized a loss of \$2 million which was included in the caption, *Equity in net loss of Spansion Inc. and other*, on our condensed consolidated statements of operations. We continued to use the equity method of accounting to reflect our share of Spansion's results of operations because we continued to have the ability to exercise significant influence over Spansion because Dr. Hector de J. Ruiz, our CEO, still presided over the Board of Directors of Spansion as the Chairman of the Board.

On September 20, 2007, Dr. Ruiz resigned from the Board of Directors of Spansion and we no longer had any right to appoint a director to Spansion's Board of Directors. Therefore, we changed our accounting for this investment from the equity method of accounting to accounting for this investment as *available-for-sale marketable securities* under FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*.

After giving consideration to Spansion's operating results, its stock price changes in the past six months, and our intention to liquidate our investment, we concluded that this investment was impaired as of September 29, 2007. Therefore, we recorded an other-than-temporary impairment charge of \$42 million in the third quarter of 2007, reflecting the write-down of this investment to its fair market value of approximately \$119 million, which is the revised carrying amount of this investment on our financial statements. This impairment charge was included in the caption, *Equity in net loss of Spansion, Inc. and other*, on our condensed consolidated statements of operations.

As of September 29, 2007, we owned a total of 14,037,910 shares, or approximately 10.4 percent, of Spansion's outstanding common stock. This investment was included in the caption, *Marketable securities*, on our condensed consolidated balance sheet dated September 29, 2007.

To the extent that the fair value of our investment in Spansion changes in the future due to fluctuations in Spansion's stock price, we would record either an unrealized gain or an unrealized loss within *Accumulated Other Comprehensive Income*, a component of Stockholders' Equity on our balance sheet. Should we sell shares of Spansion in the future, we would record either a realized gain or a realized loss. In addition, to the extent that we conclude any unrealized loss is deemed other-than-temporary, we would record further impairment charges.

Table of Contents

Income Taxes

We recorded an income tax provision of \$27 million, or -9 percent on pre-tax losses, in the third quarter of 2007 and an income tax benefit of \$21 million, or -17 percent of pre-tax income, for the third quarter of 2006. For the nine months ended September 29, 2007 we recorded an income tax provision of \$82 million, or -6 percent on pre-tax losses. For the nine months ended October 1, 2006, we recorded an income tax provision of \$32 million, or 7 percent of pre-tax income.

The income tax provisions recorded in the first three quarters of 2007 were primarily for deferred U.S. taxes related to indefinite-lived goodwill and foreign current taxes. The income tax provisions recorded in the first three quarters of 2006 were for taxes on income generated in both the U.S. and foreign jurisdictions.

As of September 29, 2007 substantially all of our U.S. deferred tax assets, net of deferred tax liabilities, continue to be subject to a valuation allowance that was initially established in the fourth quarter of 2002. The realization of these assets is dependent on substantial future taxable income which at September 29, 2007 in management's estimate, is not more likely than not to be achieved.

Stock-Based Compensation

The following table summarizes stock-based compensation expense related to employee stock options, restricted stock and restricted stock units and employee stock purchases under the Company's Employee Stock Purchase Plan (ESPP) under FASB Statement No. 123R (revised 2004), *Share-Based Payments* (Statement 123R) for the fiscal quarters and nine months ended September 29, 2007 and October 1, 2006, respectively, which we allocated in our condensed consolidated statements of operations as follows:

	Quarter Ended		Nine Months Ended	
	September 29, 2007	October 1, 2006	September 29, 2007	October 1, 2006
	(In millions)		(In millions)	
Cost of sales	\$ 2	\$ 2	\$ 6	\$ 6
Research and development	14	6	42	17
Marketing, general, and administrative	11	9	38	27
Total stock-based compensation expense related to employee stock options, restricted stock, restricted stock units and employee stock purchases	27	17	86	50
Tax benefit		(5)		(15)
Stock-based compensation expense related to employee stock options, restricted stock, restricted stock units, and employee stock purchases, net of tax	\$ 27	\$ 12	\$ 86	\$ 35

Table of Contents

Stock Options. The weighted-average assumptions applied in the lattice-binomial model that we used to value our employee stock options are as follows:

	Quarter Ended		Nine Months Ended	
	September 29, 2007	October 1, 2006	September 29, 2007	October 1, 2006
Expected volatility	60.05 %	52.58 %	52.53 %	51.92 %
Risk-free interest rate	4.33 %	4.89 %	4.58 %	4.82 %
Expected dividends	0.00 %	0.00 %	0.00 %	0.00 %
Expected life (in years)	3.55	4.14	3.55	4.13

For the quarters ended September 29, 2007 and October 1, 2006, we granted 704,000 and 402,000 employee stock options, respectively, with average estimated grant date fair values of \$5.52 and \$7.87. For the nine months ended September 29, 2007 and October 1, 2006, we granted 2,705,000 and 1,272,000 employee stock options, respectively, with average estimated grant date fair values of \$5.93 and \$12.67.

Restricted Stock Units and Awards. For the quarters ended September 29, 2007 and October 1, 2006, we granted 382,000 and 934,000 shares of restricted stock and restricted stock units, respectively, with an average grant date fair value of \$12.08 and \$19.66. For the nine months ended September 29, 2007 and October 1, 2006, we granted 6,163,000 and 3,209,000 shares of restricted stock and restricted stock units, respectively, with an average grant date fair value of \$15.01 and \$30.50.

Employee Stock Purchase Plan. We issued 1,217,000 shares and 454,000 shares under the ESPP during the fiscal quarters ended September 29, 2007 and October 1, 2006. We issued 3,063,000 shares and 1,093,000 shares under the ESPP during the nine months ended September 29, 2007 and October 1, 2006. We calculate ESPP compensation expense using the fair value of the employees' purchase rights at the grant date under the Black-Scholes-Merton model.

International Sales

International sales as a percent of worldwide net sales were 89 percent in the third quarter of 2007, 71 percent in the third quarter of 2006 and 86 percent in the second quarter of 2007. We expect international sales will continue to be a significant portion of our total sales in the foreseeable future. Our net sales were primarily denominated in the U.S. dollar. International sales during the third quarter of 2007 increased from the third quarter of 2006 because ATI's operations were consolidated with ours. Historically, ATI has had a greater proportion of its sales outside of the United States.

FINANCIAL CONDITION

Our cash, cash equivalents and marketable securities at September 29, 2007 totaled \$1.5 billion. This amount includes \$119 million of marketable securities, representing the revised carrying value of our remaining investment in Spansion. Previously, the value of our investment in Spansion, Inc. was reported in our Investment in Spansion account on our condensed consolidated balance sheet. Our debt and capital lease obligations totaled \$5.3 billion as of September 29, 2007.

Net Cash (Used in) Provided by Operating Activities

Net cash used in operating activities was \$371 million in the first nine months of 2007. Non-cash charges included in our net loss of \$1.6 billion consisted primarily of \$974 million of depreciation and amortization expense, \$86 million of stock-based compensation expense and \$86 million related to our share of Spansion's net loss. These charges were offset by amortization of foreign grants and subsidies of \$127 million. The net changes in operating assets for the first nine months of 2007 included a decrease of \$464 million in accounts receivable partially offset by an increase of \$180 million in prepaid and other assets and a decrease of \$72 million in accounts payable and accrued liabilities. Greater efficiency in management and collection of accounts receivables resulted in the decline of our accounts receivable balance. The increase in prepaid and other assets was driven by increases in receivables for foreign grants and subsidies, purchases of technology licenses and an increase in prepaid insurance.

Net cash provided by operating activities in the first nine months of 2006 was approximately \$1,015 million. Non-cash items included in our net income of \$410 million consisted primarily of \$567 million of depreciation and amortization expense, amortization of foreign grants and subsidies of \$110 million, stock-based compensation expense of \$50 million and equity share in Spansion's loss of \$41 million. The net changes in operating assets for

Table of Contents

the first nine months of 2006 included a decrease in accounts receivable of \$119 million and a decrease in payables to related parties of \$194 million, primarily related to the cessation of product shipments and customer invoicing on behalf of Spansion. Prior to the second quarter of 2006, we shipped products to and invoiced Spansion's customers in our name on behalf of Spansion. The \$170 million increase in other assets was primarily due to purchases of new technology licenses. The \$269 million increase in accounts payable and accrued liabilities was primarily related to purchases of equipment for Fab 36 and greater purchases of raw materials due to increased operations in our former Computation Products segment.

Net Cash Used in Investing Activities

Net cash used in investing activities was \$1.3 billion in the first nine months of 2007, primarily as a result of \$1.4 billion of cash used to purchase property, plant and equipment, and a net cash outflow of \$151 million from purchases and maturities of available-for-sale securities. This was partially offset by \$157 million proceeds from the sale of a portion of our ownership interest in Spansion.

Net cash used in investing activities was \$958 million in the first nine months of 2006, primarily as a result of \$1,191 million of cash used to purchase property, plant and equipment. In addition we received a net cash inflow of \$30 million from purchases and maturities of available-for-sale securities and proceeds of \$175 million from Spansion LLC's repurchase from us of its 12.75% Senior Subordinated Notes.

Net Cash Provided by Financing Activities

Net cash provided by financing activities was \$1,436 million in the first nine months of 2007, primarily due to net proceeds of \$2,169 million from the issuance of our 6.00% Notes during the second quarter of 2007, net proceeds of \$1,479 million from the issuance of our 5.75% Notes during the third quarter of 2007, \$210 million of capital investment grants and allowances from the Federal Republic of Germany and the State of Saxony for the Fab 36 project, and \$62 million in proceeds from the issuance of stock under our ESPP and the exercise of employee stock options. These amounts were offset by \$2,255 million of payments for debt and capital lease obligations, which included \$2,216 million to repay the full principal amount outstanding under our October 2006 Term Loan, and \$182 million for the purchase of the capped call in connection with the 6.00% Notes. During the first nine months of 2007, we did not realize any excess tax benefits related to stock-based compensation. Therefore, we did not record any financing cash flows due to our net operating loss carry-forward and 100 percent valuation allowance on our U.S. deferred tax assets.

Net cash provided by financing activities was \$694 million in the first nine months of 2006. This amount included \$495 million from the sale of 14,096,000 shares of our common stock in an equity offering, \$213 million in proceeds from the issuance of stock under our ESPP and the exercise of employee stock options and \$202 million of capital investment grants and allowances from the Federal Republic of Germany and the State of Saxony for the Fab 36 project. These amounts were partially offset by \$213 million in payments on debt and capital lease obligations and our redemption of 35 percent of the aggregate principal amount outstanding (or \$210 million) of our 7.75% Notes. During the first nine months of 2006, we did not realize any excess tax benefits related to stock-based compensation. Therefore, we did not record any related financing cash flow.

Liquidity

We believe that our current cash, cash equivalents and marketable securities balances at September 29, 2007, anticipated cash flow from operations and available external financing will be sufficient to fund our operations and capital investments in the next twelve months and over the longer term, including the approximately \$300 million we plan to spend for capital expenditures during the fourth quarter of fiscal 2007. Should additional funding be required, such as to meet payment obligations of our long-term debt when due, we may need to raise the required funds through borrowings or public or private sales of debt or equity securities, which may be issued from time to time under an effective registration statement, through the issuance of securities in a transaction exempt from registration under the Securities Act of 1933 or a combination of one or more of the foregoing.

We believe that, in the event additional funding is required, we will be able to access the capital markets on terms and in amounts adequate to meet our objectives. However, given the possibility of changes in market conditions or other occurrences, there can be no certainty that such funding will be available on terms favorable to us or at all.

Table of Contents

We have an ongoing authorization from our Board of Directors to repurchase up to \$300 million worth of our common stock over a period of time to be determined by management. These repurchases may be made in the open market or in privately negotiated transactions from time to time in compliance with applicable rules and regulations, subject to market conditions, applicable legal requirements and other factors. We are not required to repurchase any particular amount of our common stock and the program may be suspended at any time at our discretion. During the first nine months of 2007, we did not repurchase any of our equity securities pursuant to this Board authorized program.

Contractual Obligations

The following table summarizes our principal contractual cash obligations at September 29, 2007, and is supplemented by the discussion following the table.

Table of Contents

Contractual obligations at September 29, 2007 were:

Payment due by period

Payment due by period

	Total	Remaining Fiscal 2007	Fiscal 2008	Fiscal 2009	Fiscal 2010	Fiscal 2011	Fiscal 2012 and beyond
		(In millions)					
5.75% Senior Note due 2012	1,500	\$	\$	\$	\$	\$	\$ 1,500
6% Senior Notes Due 2015	2,200						2,200
Fab 36 Term Loan	866	27	178	268	304	89	
Repurchase obligations to Fab 36 Partners ⁽¹⁾	137	46	46	45			
7.75% Senior Notes Due 2012	390						390
Other debt	13		2	2	2	2	5

Total contractual obligations	\$ 10,098	\$ 460	\$ 1,201	\$ 1,308	\$ 950	\$ 605	\$ 5,574

⁽¹⁾ Represents the amount of silent partnership contributions that our subsidiaries are required to repurchase from the unaffiliated limited partners of AMD Fab 36 KG and is exclusive of the guaranteed rate of return. See Fab 36 Term Loan and Guarantee and Fab 36 Partnership Agreements, below.

⁽²⁾ Represents estimated aggregate interest obligations for our debt obligations, excluding capital lease obligations, including the guaranteed rate of return on the unaffiliated partners' silent partnership contributions, which is based on our assumptions regarding wafer output.

⁽³⁾ Includes principal and interest.

⁽⁴⁾ We have unconditional purchase commitments for goods and services where payments are based, in part, on volume or type of services we require. In those cases, we only included the minimum volume of purchase commitments in the table above. Also, purchase orders for goods and services that are cancelable upon notice and without significant penalties are not included in the amounts above.

Table of Contents

5.75% Convertible Senior Notes due 2012

On August 14, 2007, we issued \$1.5 billion aggregate principal amount of 5.75% Convertible Senior Notes due 2012 (the 5.75% Notes). The 5.75% Notes bear interest at 5.75% per annum. Interest is payable in arrears on February 15 and August 15 of each year beginning February 15, 2008 until the maturity date of August 15, 2012. The terms of the 5.75% Notes are governed by an Indenture (the 5.75% Indenture), dated as of August 14, 2007, by and between the Company and Wells Fargo Bank, National Association, as Trustee.

The 5.75% Notes will be convertible, in whole or in part, at any time prior to the close of business on the business day immediately preceding the maturity date of the 5.75% Notes, into shares of our common stock based on an initial conversion rate of 49.6771 shares of common stock per \$1,000 principal amount of the 5.75% Notes, which is equivalent to an initial conversion price of approximately \$20.13 per share. This initial conversion price represents a premium of 50% relative to the last reported sale price of our common stock on August 8, 2007 (the trading date preceding the date of pricing of the 5.75% Notes) of \$13.42 per share. This initial conversion rate will be adjusted for certain anti-dilution events. In addition, the conversion rate will be increased in the case of corporate events that constitute a fundamental change (as defined in the 5.75% Indenture) of the Company under certain circumstances. Holders of the 5.75% Notes may require us to repurchase the notes for cash equal to 100% of the principal amount to be repurchased plus accrued and unpaid interest upon the occurrence of a fundamental change (as defined in the 5.75% Indenture) or a termination of trading (as defined in the Indenture). Additionally, an event of default (as defined in the Indenture) may result in the acceleration of the maturity of the 5.75% Notes.

The 5.75% Notes rank equally in right of payment with our existing and future senior debt and senior in right of payment to all of our future subordinated debt. The 5.75% Notes rank junior in right of payment to all our existing and future senior secured debt to the extent of the collateral securing such debt and are structurally subordinated to all existing and future debt and liabilities of our subsidiaries.

In connection with the issuance and sale of the 5.75% Notes, we also entered into a Registration Rights Agreement (the 5.75% Registration Rights Agreement), dated August 14, 2007, between us and Lehman Brothers Inc. (the initial purchaser), pursuant to which we have agreed to file a shelf registration statement with the SEC for the resale by holders of the 5.75% Notes and the shares of our common stock issuable upon conversion of the notes, use our reasonable best efforts to cause the registration statement to be declared effective and keep the registration statement effective for the period described in the 5.75% Registration Rights Agreement. We could be subject to paying additional interest on the 5.75% Notes for the period during which a default under the 5.75% Registration Rights Agreement exists.

The net proceeds from the offering, after deducting discounts, commissions and offering expenses payable by us, were approximately \$1,479 million. We used all of the net proceeds, together with available cash, to repay in full the remaining outstanding balance of the October 2006 Term Loan. All security interests under the October 2006 Term Loan have been released. In connection with this repayment, we recorded a charge of approximately \$17 million to write off the remaining unamortized debt issuance costs associated with the October 2006 Term Loan.

We may elect to purchase or otherwise retire our 5.75% Notes with cash, stock or other assets from time to time in open market or privately negotiated transactions, either directly or through intermediaries, or by tender offer, when we believe the market conditions are favorable to do so. Such purchases may have a material effect on our liquidity, financial condition, and results of operations.

6.00% Convertible Senior Notes due 2015

On April 27, 2007, we issued \$2.2 billion aggregate principal amount of 6.00% Convertible Senior Notes due 2015 (the 6.00% Notes). The 6.00% Notes bear interest at 6.00% per annum. Interest is payable on May 1 and November 1 of each year beginning November 1, 2007 until the maturity date of May 1, 2015. The terms of the 6.00% Notes are governed by an Indenture (the 6.00% Indenture), dated April 27, 2007, by and between us and Wells Fargo Bank, National Association, as Trustee.

Table of Contents

Upon the occurrence of certain events described in the 6.00% Indenture, the 6.00% Notes will be convertible into cash up to the principal amount, and if applicable, into shares of our common stock issuable upon conversion of the 6.00% Notes (6.00% Conversion Shares) in respect of any conversion value above the principal amount, based on an initial conversion rate of 35.6125 shares of common stock per \$1,000 principal amount of 6.00% Notes, which is equivalent to an initial conversion price of \$28.08 per share. This initial conversion price represents a premium of 100% relative to the last reported sale price of our common stock on April 23, 2007 (the trading date preceding the date of pricing of the 6.00% Notes) of \$14.04 per share. The conversion rate will be adjusted for certain anti-dilution events. In addition, the conversion rate will be increased in the case of corporate events that constitute a fundamental change (as defined in the 6.00% Indenture) of us under certain circumstances. Holders of the 6.00% Notes may require us to repurchase the 6.00% Notes for cash equal to 100% of the principal amount to be repurchased plus accrued and unpaid interest upon the occurrence of a fundamental change or a termination of trading (as defined in the 6.00% Indenture). Additionally, an event of default (as defined in the 6.00% Indenture) may result in the acceleration of the maturity of the 6.00% Notes.

The 6.00% Notes rank equally with our existing and future senior debt and are senior to all of our future subordinated debt. The 6.00% Notes rank junior to all of our existing and future senior secured debt to the extent of the collateral securing such debt and are structurally subordinated to all existing and future debt and liabilities of our subsidiaries.

In connection with the issuance and sale of the 6.00% Notes, we also entered into a Registration Rights Agreement (the 6.00% Registration Rights Agreement), dated April 27, 2007, between us and Morgan Stanley & Co. Incorporated, as representative of the several initial purchasers of the 6.00% Notes, pursuant to which we have agreed to file a shelf registration statement with the SEC for the resale by holders of the 6.00% Notes and the 6.00% Conversion Shares, use our reasonable best efforts to cause the registration statement to be declared effective and keep the registration statement effective for the period described in the 6.00% Registration Rights Agreement. On July 13, 2007 we filed a shelf registration statement that was automatically declared effective. We will file with the SEC a post-effective amendment to the shelf registration statement, prepare and file a supplement to the prospectus, or file a new shelf registration statement on a quarterly basis in order to include any additional selling security holders in the shelf registration statement.

In connection with the issuance of the 6.00% Notes, on April 24, 2007, we purchased the Capped Call. The Capped Call has an initial strike price of \$28.08 per share, subject to certain adjustment, which matches the initial conversion price of the 6.00% Notes, and a cap price of \$42.12 per share. The Capped Call is intended to reduce the potential common stock dilution to then existing stockholders upon conversion of the 6.00% Notes because the call option allows us to receive shares of common stock from the counterparty generally equal to the number of shares of common stock issuable upon conversion of the 6.00% Notes. We do not anticipate experiencing an increase in the number of shares outstanding from the conversion of the 6.00% Notes unless the price of our common stock appreciates above \$42.12 per share. If, however, the market value per share of our common stock, as measured under the terms of the Capped Call, exceeds the cap price of the Capped Call, there would be dilution to the extent that the then market value per share of the common stock exceeds the cap price. We analyzed the Capped Call under EITF Issue No. 00-19, *Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled In, a Company's Own Stock*, and determined that it meets the criteria for classification as an equity transaction. As a result, we have recorded the purchase of the Capped Call as a reduction in additional paid-in capital and will not recognize subsequent changes in its fair value.

The net proceeds from the offering, after deducting discounts, commissions and offering expenses payable by us, were approximately \$2,169 million. We used approximately \$182 million of the net proceeds to purchase the Capped Call and applied \$500 million of the net proceeds to prepay a portion of the amount outstanding under the October 2006 Term Loan. In connection with this repayment, we recorded a charge of approximately \$5 million to write off unamortized debt issuance costs associated with the October 2006 Term Loan repayment.

In September 2007, the FASB exposed for comment a proposed FASB Staff Position (FSP) No. APB 14-a, *Accounting for Convertible Debt Instruments That May Be Settled in Cash Upon Conversion (including partial cash settlement)*. This proposed FSP would change the accounting for certain convertible debt instruments, including our 6.00% Notes. See Risk Factors Risks Related to Our Business under the caption The accounting method for convertible debt securities with net share settlement, like the 6.00% Notes, will be subject to change. See also, Management's Discussion and Analysis of Financial Condition and Results of Operations Interest Expense, above.

Table of Contents

We may elect to purchase or otherwise retire our 6.00% Notes with cash, stock or other assets from time to time in open market or privately negotiated transactions, either directly or through intermediaries, or by tender offer, when we believe the market conditions are, favorable to do so. Such purchases may have a material effect on our liquidity, financial condition and results of operations.

Fab 36 Term Loan and Guarantee and Fab 36 Partnership Agreements

Our 300-millimeter wafer fabrication facility, Fab 36, is located in Dresden, Germany adjacent to our other wafer manufacturing facility, Fab 30. Fab 36 is owned by AMD Fab 36 Limited Liability Company & Co. KG (or AMD Fab 36 KG), a German limited partnership. We control the management of AMD Fab 36 KG through a wholly owned Delaware subsidiary, AMD Fab 36 LLC, which is a general partner of AMD Fab 36 KG. AMD Fab 36 KG is our indirect consolidated subsidiary.

To date, we have provided a significant portion of financing for Fab 36. In addition to our financing, Leipziger Messe GmbH, a nominee of the State of Saxony, Fab 36 Beteiligungs GmbH, an investment consortium arranged by M+W Zander Facility Engineering GmbH, the general contractor for the project, and a consortium of banks have provided financing for the project. Leipziger Messe and Fab 36 Beteiligungs are limited partners in AMD Fab 36 KG. We also receive grants and allowances from federal and state German authorities for the Fab 36 project.

The funding to construct and facilitate Fab 36 consists of:

equity contributions from us of \$834 million under the partnership agreements which were fully completed as of September 29, 2007, revolving loans from us of up to approximately \$1,070 million, and guarantees from us for amounts owed by AMD Fab 36 KG and its affiliates to the lenders and unaffiliated partners;

investments of approximately \$456 million from Leipziger Messe and Fab 36 Beteiligungs, which were fully completed as of September 29, 2007;

loans of approximately \$893 million from a consortium of banks, which were fully drawn as of September 29, 2007;

up to approximately \$774 million of subsidies consisting of grants and allowances, from the Federal Republic of Germany and the State of Saxony, depending on the level of capital investments by AMD Fab 36 KG, of which \$541 million of cash has been received as of September 29, 2007; and

a loan guarantee from the Federal Republic of Germany and the State of Saxony of 80 percent of the losses sustained by the lenders referenced above after foreclosure on all other security.

We contributed to AMD Fab 36 KG the full amount of equity required under the partnership agreements, and as of September 29, 2007 no principal amount of inter-company revolving loans was outstanding. These amounts have been eliminated in our consolidated financial statements.

On April 21, 2004, AMD Fab 36 KG entered into a Term Loan Facility Agreement among AMD Fab 36 KG, as borrower, and a consortium of banks led by Dresdner Bank AG, as lenders, dated April 21, 2004 (Fab 36 Term Loan) and other related agreements (collectively, the Fab 36 Loan Agreements) to finance the purchase of equipment and tools required to operate Fab 36. The consortium of banks agreed to make available up to \$893 million in loans to AMD Fab 36 KG upon its achievement of specified milestones, including attainment of technical completion at Fab 36, which required certification by the banks technical advisor that AMD Fab 36 KG had a wafer fabrication process suitable for high-volume production of advanced microprocessors and had achieved specified levels of average wafer starts per week and average wafer yields, as well as cumulative capital expenditures of approximately \$1.35 billion.

On October 13, 2006, we executed an Amendment Agreement dated as of October 10, 2006, which amended the terms of the Fab 36 Term Loan. Under the amended and restated Fab 36 Term Loan, AMD Fab 36 KG had the option to borrow in U.S. dollars as long as our group consolidated cash (which is defined as the sum of our unsecured cash, cash equivalents and short-term investments less the aggregate amount outstanding under any revolving credit facility) was at least \$500 million. Moreover, to protect the lenders from currency risks, if our consolidated cash is

Edgar Filing: ADVANCED MICRO DEVICES INC - Form 10-Q

below \$1 billion or our credit rating drops below B3 by Moody's and B- by Standard & Poor's, AMD Fab 36 KG will be required to maintain a cash reserve account with deposits equal to 5 percent of the amount

Table of Contents

of U.S. dollar loans outstanding under the Fab 36 Term Loan and to make balancing payments into this account equal to the difference between (x) the total amount of U.S. dollar loans outstanding under the Fab 36 Term Loan and (y) the U.S dollar equivalent of 700 million euros (as reduced by repayments, prepayments, cancellations, and any outstanding loans denominated in euros).

In October 2006, AMD Fab 36 KG borrowed \$645 million in U.S. dollars under the Fab 36 Term Loan (the First Installment). In December 2006, AMD Fab 36 KG borrowed \$248 million in U.S. dollars under the Fab 36 Term Loan (the Second Installment). AMD Fab 36 KG has borrowed the full amount available under the Fab 36 Term Loan, and the total amount outstanding under the Fab 36 Term Loan as of September 29, 2007 was \$866 million. AMD Fab 36 KG may select an interest period of one, two, or three months or any other period agreed between AMD Fab 36 KG and the lenders. The rate of interest on each installment for the interest period selected is the percentage rate per annum which is the aggregate of the applicable margin, plus LIBOR plus minimum reserve cost if any. As of September 29, 2007, the rate of interest for the First Installment was approximately 7.235 percent and for the Second Installment was approximately 7.075 percent.

The amended and restated Fab 36 Term Loan also sets forth certain covenants applicable to AMD Fab 36 KG. For example, for as long as group consolidated cash is at least \$1 billion, our credit rating is at least B3 by Moody's and B- by Standard & Poor's, and no event of default has occurred, the only financial covenant that AMD Fab 36 KG is required to comply with is a loan to fixed asset value covenant. Specifically, the loan to fixed asset value (as defined in the agreement) as at the end of any relevant period specified in Column A below cannot exceed the percentage set out opposite such relevant period in Column B below:

Column A	Column B
(Relevant Period)	(Maximum Percentage of Loan to Fixed Asset Value)
up to and including 31 December 2008	50 percent
up to and including 31 December 2009	45 percent
Thereafter	40 percent

As of September 29, 2007, AMD Fab 36 KG was in compliance with this covenant.

If group consolidated cash is less than \$1 billion or our credit rating is below B3 by Moody's or B- by Standard & Poor's, AMD Fab 36 KG will also be required to maintain minimum cash balances equal to the lesser of 100 million euros or 50 percent of the total outstanding amount under the Fab 36 Term Loan. AMD Fab 36 KG may elect to maintain the minimum cash balance in an equivalent amount of U.S. dollars if group consolidated cash is at least \$500 million. If on any scheduled repayment date, our credit rating is Caa2 or lower by Moody's or CCC or lower by Standard & Poor's, AMD Fab 36 must increase the minimum cash balances by five percent of the total outstanding amount, and at each subsequent request of Dresdner Bank, by a further five percent of the total outstanding amount until such time as either the credit rating increases to at least Ba3 by Moody's and BB- by Standard & Poor's or the minimum cash balances are equal to the total outstanding amounts.

AMD Fab 36 KG pledged substantially all of its current and future assets as security under the Fab 36 Loan Agreements, we pledged our equity interest in AMD Fab 36 Holding and AMD Fab 36 LLC, AMD Fab 36 Holding pledged its equity interest in AMD Fab 36 Admin and its partnership interest in AMD Fab 36 KG and AMD Fab 36 Admin and AMD Fab 36 LLC pledged all of their partnership interests in AMD Fab 36 KG. We guaranteed the obligations of AMD Fab 36 KG to the lenders under the Fab 36 Loan Agreements. We also guaranteed repayment of grants and allowances by AMD Fab 36 KG, should such repayment be required pursuant to the terms of the subsidies provided by the federal and state German authorities.

Table of Contents

Pursuant to the terms of the Guarantee Agreement among us, as guarantor, AMD Fab 36 KG, Dresdner Bank AG and Dresdner Bank AG, Niederlassung Luxemburg, we have to comply with specified adjusted tangible net worth and EBITDA financial covenants if the sum of our group consolidated cash declines below the following amounts:

Amount (in millions)	if Moody's Rating is at least	and	if Standard & Poor's Rating is at least
\$500	B1 or lower	and	B+ or lower
425	Ba3	and	BB-
400	Ba2	and	BB
350	Ba1	and	BB+
300	Baa3 or better	and	BBB- or better

As of September 29, 2007, group consolidated cash was greater than \$500 million and therefore, the preceding financial covenants were not applicable.

If our group consolidated cash declines below the amounts set forth above, we would be required to maintain adjusted tangible net worth, determined as of the last day of each preceding fiscal quarter, of not less than \$1,750 million. In addition, if our group consolidated cash declines below the amounts set forth above, we would be required to maintain EBITDA (as defined in the agreement) as of the last day of each preceding fiscal period set forth below in an amount not less than the amount set forth below opposite the date of such preceding fiscal period:

Period	Amount (In millions)
For the four consecutive fiscal quarters ending December 2005 and for the four fiscal quarters ending on each fiscal quarter thereafter	\$850 and \$750 on an annualized basis for the two most recent fiscal quarters ending prior to December 31, 2006

Also on April 21, 2004, AMD, AMD Fab 36 KG, AMD Fab 36 LLC, AMD Fab 36 Holding GmbH, a German company and wholly owned subsidiary of AMD that owns substantially all of our limited partnership interest in AMD Fab 36 KG, and AMD Fab 36 Admin GmbH, a German company and wholly owned subsidiary of AMD Fab 36 Holding that owns the remainder of our limited partnership interest in AMD Fab 36 KG, (collectively referred to as the AMD companies) entered into a series of agreements (the partnership agreements) with Leipziger Messe and Fab 36 Beteiligungs relating to the rights and obligations with respect to their limited partner and silent partner contributions in AMD Fab 36 KG. The partnership was established for an indefinite period of time. A partner may terminate its participation in the partnership by giving twelve months advance notice to the other partners. The termination becomes effective at the end of the year following the year during which the notice is given. However, other than for good cause, a partner's termination will not be effective before December 31, 2015.

The partnership agreements set forth each limited partner's aggregate capital contribution to AMD Fab 36 KG and the milestones for such contributions. Pursuant to the terms of the partnership agreements, AMD, through AMD Fab 36 Holding and AMD Fab 36 Admin, agreed to provide an aggregate of \$834 million, Leipziger Messe agreed to provide an aggregate of \$285 million and Fab 36 Beteiligungs agreed to provide an aggregate of \$171 million. The capital contributions of Leipziger Messe and Fab 36 Beteiligungs are comprised of limited partnership contributions and silent partnership contributions. These contributions were due at various dates upon the achievement of milestones relating to the construction and operation of Fab 36. All capital contributions have been made in full.

The partnership agreements also specify that the unaffiliated limited partners will receive a guaranteed rate of return of between 11 percent and 13 percent per annum on their total investment depending upon the monthly wafer output of Fab 36. We guaranteed these payments by AMD Fab 36 KG.

In April 2005, we amended the partnership agreements in order to restructure the proportion of Leipziger Messe's silent partnership and limited partnership contributions. Although the total aggregate amount that Leipziger Messe has agreed to provide remained unchanged, the portion of its contribution that constitutes limited partnership interests was reduced by \$71 million while the portion of its contribution that constitutes silent partnership interests was increased by a corresponding amount. In this report, we refer to this additional silent partnership contribution as the New Silent Partnership Amount.

Edgar Filing: ADVANCED MICRO DEVICES INC - Form 10-Q

Pursuant to the terms of the partnership agreements and subject to the prior consent of the Federal Republic of Germany and the State of Saxony, AMD Fab 36 Holding and AMD Fab 36 Admin have a call option over the limited partnership interests held by Leipziger Messe and Fab 36 Beteiligungs, first exercisable three and one-half years after the relevant partner has completed the applicable capital contribution and every three years thereafter. Also, commencing five years after completion of the relevant partner's capital contribution, Leipziger Messe and

Table of Contents

Fab 36 Beteiligungs each have the right to sell their limited partnership interest to third parties (other than competitors), subject to a right of first refusal held by AMD Fab 36 Holding and AMD Fab 36 Admin, or to put their limited partnership interest to AMD Fab 36 Holding and AMD Fab 36 Admin. The put option is thereafter exercisable every three years. Leipziger Messe and Fab 36 Beteiligungs also have a put option in the event they are outvoted at AMD Fab 36 KG partners' meetings with respect to certain specified matters such as increases in the partners' capital contributions beyond those required by the partnership agreements, investments significantly in excess of the business plan, or certain dispositions of the limited partnership interests of AMD Fab 36 Holding and AMD Fab 36 Admin. The purchase price under the put option is the partner's capital account balance plus accumulated or accrued profits due to such limited partner. The purchase price under the call option is the same amount, plus a premium of \$5 million to Leipziger Messe and a premium of \$3 million to Fab 36 Beteiligungs. The right of first refusal price is the lower of the put option price or the price offered by the third party that triggered the right. We guaranteed the payments under the put options.

In addition, AMD Fab 36 Holding and AMD Fab 36 Admin are obligated to repurchase the silent partnership interest of Leipziger Messe's and Fab 36 Beteiligungs' contributions over time. This mandatory repurchase obligation does not apply to the New Silent Partnership Amount. Specifically, AMD Fab 36 Holding and AMD Fab 36 Admin are required to repurchase Leipziger Messe's silent partnership interest of \$114 million in annual 25 percent installments commencing in December 2006, and Fab 36 Beteiligungs' silent partnership interest of \$86 million in annual 20 percent installments commencing in October 2005. As of September 29, 2007, AMD Fab 36 Holding and AMD Fab 36 Admin have repurchased \$34 million of Fab 36 Beteiligungs' silent partnership contributions and \$29 million of Leipziger Messe's silent partnership contribution.

Under U.S. generally accepted accounting principles, we initially classified the portion of the silent partnership contribution that is mandatorily redeemable as debt on the consolidated balance sheet at its fair value at the time of issuance because of the mandatory redemption features described in the preceding paragraph. Each accounting period, we increase the carrying value of this debt towards its ultimate redemption value of the silent partnership contributions by the guaranteed annual rate of return of between 11 percent and 13 percent. We record this periodic accretion to redemption value as interest expense.

The limited partnership contributions that AMD Fab 36 KG received from Leipziger Messe and Fab 36 Beteiligungs and the New Silent Partnership Portion described above are not mandatorily redeemable, but rather are subject to redemption outside of the control of AMD Fab 36 Holding and AMD Fab 36 Admin. In consolidation, we initially record these contributions as minority interest, based on their fair value. Each accounting period, we increase the carrying value of this minority interest toward its ultimate redemption value of these contributions by the guaranteed rate of return of between 11 percent and 13 percent. We classify this periodic accretion of redemption value as an additional minority interest allocation. No separate accounting is required for the put and call options because they are not freestanding instruments and not considered derivatives under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*.

As of September 29, 2007, AMD Fab 36 KG had received \$200 million of silent partnership contributions and \$257 million of limited partnership contributions, which included a New Silent Partnership Amount of \$71 million, from the unaffiliated partners. These contributions were recorded as debt and minority interest, respectively, in the accompanying consolidated balance sheet.

In addition to support from us and the consortium of banks referred to above, the Federal Republic of Germany and the State of Saxony have agreed to support the Fab 36 project in the form of:

a loan guarantee equal to 80 percent of the losses sustained by the lenders after foreclosure on all other security; and

subsidies consisting of grants and allowances totaling up to approximately \$774 million, depending on the level of capital investments by AMD Fab 36 KG.

In connection with the receipt of subsidies for the Fab 36 project, AMD Fab 36 KG is required to attain a certain employee headcount by December 2007 and maintain this headcount through December 2012. We record the subsidies as long-term liabilities on our consolidated balance sheet and amortize them to operations ratably starting from December 2004 through December 2012. Initially, we amortized the grant amounts as a reduction to research and development expenses. Beginning in the first quarter of 2006 when Fab 36 began producing revenue generating

Table of Contents

products, we started amortizing these amounts as a reduction to cost of sales. For allowances, starting from the first quarter of 2006, we amortize the amounts as a reduction of depreciation expense ratably over the life of the equipment because these allowances are intended to subsidize the capital investments in equipment. Noncompliance with the covenants contained in the subsidy grant documents could result in forfeiture of all or a portion of the future amounts to be received, as well as the repayment of all or a portion of amounts received to date.

As of September 29, 2007, AMD Fab 36 KG received cash allowances of \$320 million for capital investments made in 2003 through 2006 as well as cash grants of \$221 million for capital investments made in 2003 through 2006 and a prepayment for capital investments in 2007 and the first half of 2008.

The Fab 36 Loan Agreements also require that we:

provide funding to AMD Fab 36 KG if cash shortfalls occur, including funding shortfalls in government subsidies resulting from any defaults caused by AMD Fab 36 KG or its affiliates; and

guarantee 100 percent of AMD Fab 36 KG's obligations under the Fab 36 Loan Agreements until the loans are repaid in full. Under the Fab 36 Loan Agreements, AMD Fab 36 KG, AMD Fab 36 Holding and AMD Fab 36 Admin are generally prevented from paying dividends or making other payments to us. In addition, AMD Fab 36 KG would be in default under the Fab 36 Loan Agreements if we or any of the AMD companies fail to comply with certain obligations thereunder or upon the occurrence of certain events and if, after the occurrence of the event, the lenders determine that their legal or risk position is adversely affected. Circumstances that could result in a default include:

Our failure to provide loans to AMD Fab 36 KG as required under the Fab 36 Loan Agreements;

failure to pay any amount due under the Fab 36 Loan Agreements within five days of the due date;

occurrence of any event which the lenders reasonably believe has had or is likely to have a material adverse effect on the business, assets or condition of AMD Fab 36 KG or AMD or their ability to perform under the Fab 36 Loan Agreements;

filings or proceedings in bankruptcy or insolvency with respect to us, AMD Fab 36 KG or any limited partner;

occurrence of a change in control (as defined in the Fab 36 Loan Agreements) of AMD;

AMD Fab 36 KG's noncompliance with certain affirmative and negative covenants, including restrictions on payment of profits, dividends or other distributions except in limited circumstances and restrictions on incurring additional indebtedness, disposing of assets and repaying subordinated debt; and

AMD Fab 36 KG's noncompliance with certain financial covenants, including loan to fixed asset value ratio and, in certain circumstances, a minimum cash covenant.

In general, any default with respect to other indebtedness of AMD or AMD Fab 36 KG that is not cured, would result in a cross-default under the Fab 36 Loan Agreements.

The occurrence of a default under the Fab 36 Loan Agreements would permit the lenders to accelerate the repayment of all amounts outstanding under the Fab 36 Term Loan. In addition, the occurrence of a default under this agreement could result in a cross-default under the indentures

Edgar Filing: ADVANCED MICRO DEVICES INC - Form 10-Q

governing our 7.75% Notes, 6.00% Notes and 5.75% Notes. We cannot provide assurance that we would be able to obtain the funds necessary to fulfill these obligations. Any such failure would have a material adverse effect on us.

7.75% Senior Notes Due 2012

On October 29, 2004, we issued \$600 million of 7.75% Notes due 2012 (the 7.75% Notes) in a private offering pursuant to Rule 144A and Regulation S under the Securities Act of 1933, as amended. On April 22, 2005, we exchanged these notes for publicly registered notes which have substantially identical terms as the old notes except that the publicly registered notes are registered under the Securities Act of 1933, and, therefore, do not contain legends restricting their transfer. The 7.75% Notes mature on November 1, 2012. Interest on the 7.75% Notes is payable semiannually in arrears on May 1 and November 1, beginning May 1, 2005. Prior to November 1, 2008, we may redeem some or all of the 7.75% Notes at a price equal to 100 percent of the principal amount plus accrued and unpaid interest plus a make-whole premium, as defined in the indenture governing the 7.75% Notes. Thereafter, we may redeem the 7.75% Notes for cash at the following specified prices plus accrued and unpaid interest:

Period	Price as Percentage of Principal Amount
Beginning on November 1, 2008 through October 31, 2009	103.875 percent
Beginning on November 1, 2009 through October 31, 2010	101.938 percent
Beginning on November 1, 2010 through October 31, 2011	100.000 percent
On November 1, 2011	100.000 percent

Table of Contents

Holders have the right to require us to repurchase all or a portion of our 7.75% Notes in the event that we undergo a change of control, as defined in the indenture governing the 7.75% Notes at a repurchase price of 101 percent of the principal amount plus accrued and unpaid interest.

The indenture governing the 7.75% Notes contains certain covenants that limit, among other things, our ability and the ability of our restricted subsidiaries, which include all of our subsidiaries, from:

incurring additional indebtedness;

paying dividends and making other restricted payments;

making certain investments, including investments in our unrestricted subsidiaries;

creating or permitting certain liens;

creating or permitting restrictions on the ability of the restricted subsidiaries to pay dividends or make other distributions to us;

using the proceeds from sales of assets;

entering into certain types of transactions with affiliates; and

consolidating, merging or selling our assets as an entirety or substantially as an entirety.

In February 2006, we redeemed 35 percent (or \$210 million) of the aggregate principal amount outstanding of the 7.75% Notes. The holders of the 7.75% Notes received 107.75 percent of the principal amount of the 7.75% Notes plus accrued interest.

We may elect to purchase or otherwise retire the remaining principal outstanding under our 7.75% Notes with cash, stock or other assets from time to time in open market or privately negotiated transactions, either directly or through intermediaries, or by tender offer, when we believe the market conditions are favorable to do so. Such purchases may have a material effect on our liquidity, financial condition and results of operations.

Other Long-Term Liabilities

Other Long-Term Liabilities in the Contractual Obligations table above includes \$115 million related to certain technology licenses that will be paid through 2008 and \$28 million related to employee benefit obligations. Other Long-Term Liabilities excludes amounts recorded on our consolidated balance sheet that do not require us to make cash payments, which, as of September 29, 2007, primarily consisted of \$403 million of deferred grants and subsidies related to the Fab 30 and Fab 36 projects and a \$17 million deferred gain as a result of the sale and leaseback of our headquarters in Sunnyvale, California in 1998.

Other Long Term Liabilities in the Contractual Obligations table above also excludes \$50 million of non-current uncertain tax benefits under FIN 48, which are included in the caption, Other Long Term Liabilities on our consolidated balance sheet at September 29, 2007. Included in the non-current uncertain tax benefits is a potential cash payment of approximately \$35 million that could be payable by us upon settlement. We have not included this amount in the Contractual Obligations table above as we cannot make a reasonably reliable estimate regarding the timing of any settlement with the respective taxing authority.

Table of Contents***Capital Lease Obligations***

As of September 29, 2007, we had aggregate outstanding capital lease obligations of \$229 million. Included in this amount is \$209 million in obligations under certain energy supply contracts which AMD Fab 36 KG entered into with local energy suppliers to provide Fab 36 with utilities (gas, electricity, heating and cooling) to meet the energy demand for our manufacturing requirements. We accounted for certain fixed payments due under these energy supply arrangements as capital leases pursuant to EITF Issue No. 01-8, *Determining Whether an Arrangement Contains a Lease* and SFAS No. 13, *Accounting for Leases*. The capital lease obligations under the energy supply arrangements are payable in monthly installments through 2020.

Operating Leases

We lease certain of our facilities, including our executive offices in Sunnyvale, California, and in some jurisdictions we lease the land on which these facilities are built, under non-cancelable lease agreements that expire at various dates through 2021. We lease certain of our manufacturing and office equipment for terms ranging from one to five years. Our total future non-cancelable lease obligations as of September 29, 2007, were \$352 million, of which \$54 million is accrued as a liability for certain facilities that were included in our 2002 Restructuring Plan. We will make these payments through 2011.

Unconditional Purchase Commitments

Total non-cancelable purchase commitments as of September 29, 2007, were \$2.3 billion for periods through 2020. These purchase commitments include \$890 million related to contractual obligations of Fab 30 and Fab 36 to purchase energy and gas and approximately \$430 million representing future payments to IBM for the period from September 30, 2007 through 2011 pursuant to our joint development agreement. As IBM's services are being performed ratably over the life of the agreement, we expense the payments as incurred. Purchase orders for goods and services that are cancelable without significant penalties are not included in the amount set forth in the table above.

In connection with the acquisition of ATI, we made several commitments to the Minister of Industry under the Investment Canada Act including that we will: increase spending on research and development in Canada to a specified amount over the course of a three-year period when compared to ATI's expenditures in this area in prior years; maintain Canadian employee headcount at specified levels by the end of the three-year anniversary of the acquisition; increase by a specified amount the number of our Canadian employees focusing on research and development; attain specified Canadian capital expenditures over a three-year period; maintain a presence in Canada through a variety of commercial activities for a period of five years; and nominate a Canadian for election to our Board of Directors over the next five years. Our minimum required Canadian capital expenditures and research and development commitments are included in our aggregate unconditional purchase commitments.

Off-Balance Sheet Arrangements***Guarantees of Indebtedness Recorded on our Unaudited Condensed Consolidated Balance Sheet***

The following table summarizes the principal guarantees issued as of September 29, 2007 related to underlying liabilities that are already recorded on our condensed consolidated balance sheet as of September 29, 2007 and their expected expiration dates by year. No incremental liabilities are recorded on our condensed consolidated balance sheet for these guarantees:

	Amounts Guaranteed	Remaining 2007 (In millions)	2008	2009
Repurchase obligations to Fab 36 partners ⁽¹⁾	\$ 137	\$ 46	\$ 46	\$ 45
Payment guarantees on behalf of consolidated subsidiaries ⁽²⁾	116	116		
Total guarantees	\$ 253	\$ 162	\$ 46	\$ 45

⁽¹⁾ This amount represents the amount of silent partnership contributions that our German subsidiaries are required to repurchase from the unaffiliated limited partners of AMD Fab 36 KG and is exclusive of the guaranteed rate of return of an aggregate of approximately \$63 million which is based on our assumptions regarding wafer output. This is recorded within long term debt and capital lease obligations on

our condensed consolidated balance sheet.

Table of Contents

- (2) This amount represents the payment obligation due to a supplier arising out of the purchase of equipment by our consolidated subsidiary, AMD Fab 36 KG. We guaranteed these payment obligations on behalf of our subsidiary and they are recorded as a payable on our consolidated balance sheet.

Guarantees of Indebtedness Not Recorded on Our Consolidated Balance Sheet

The following table summarizes the principal guarantees issued as of September 29, 2007, for which the related underlying liabilities are not recorded on our condensed consolidated balance sheet as of September 29, 2007 and their expected expiration dates:

	Amounts Guaranteed ⁽¹⁾	Remaining 2007	2008 (In millions)	2009	2010	2011 and beyond
AMTC revolving loan guarantee	\$ 46	\$ 46	\$	\$	\$	\$
AMTC rental guarantee ⁽²⁾	94					94
Spansion operating guarantees ⁽³⁾	2	1	1			
Total guarantees	\$ 142	\$ 47	\$ 1	\$	\$	\$ 94

- (1) Amounts represent the principal amount of the underlying obligations guaranteed and are exclusive of obligations for interest, fees and expenses.

- (2) Amount of the guarantee diminishes as the rent is paid.

- (3) Notwithstanding the Spansion IPO, we agreed to maintain our guarantees of these Spansion obligations

AMTC and BAC Guarantees

The Advanced Mask Technology Center GmbH & Co. KG (AMTC) and Maskhouse Building Administration GmbH & Co., KG (BAC) are joint ventures formed by us, Infineon Technologies AG and DuPont Photomasks, Inc. for the purpose of constructing and operating an advanced photomask facility in Dresden, Germany. In April 2005 DuPont Photomasks, Inc. was acquired by Toppan Printing Co., Ltd. and became a wholly owned subsidiary of Toppan, named Toppan Photomasks, Inc. We procure advanced photomasks from AMTC and use them in manufacturing our microprocessors. To finance the project, AMTC and BAC entered into a \$171 million revolving loan and a \$107 million term loan, respectively, in December 2002. Also in December 2002, in order to occupy the photomask facility, AMTC entered into a rental agreement with BAC. As of September 29, 2007, we guaranteed up to \$46 million plus interest and expenses under the revolving loan. We also guarantee the obligations under the rental agreement. The obligations under the rental agreement guarantee diminish over time through June 2012 as the term loan is repaid. However, under certain circumstances of default by the other tenant of the photomask facility under its rental agreement with BAC and certain circumstances of default by more than one joint venture partner under its rental agreement guarantee obligations, the maximum potential amount of our obligations under the rental agreement guarantee is \$94 million. As of September 29, 2007, \$93 million was outstanding under the revolving loan, and \$50 million was outstanding under the term loan. We have not recorded any liability in our consolidated financial statements associated with the guarantees because they were issued prior to December 31, 2002, the effective date of FASB Interpretation No. 45, *Guarantors' Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others* (FIN 45).

Table of Contents

Spansion Operating Lease Guarantee

Prior to Spansion's IPO, we guaranteed certain operating leases entered into by Spansion and its subsidiaries totaling \$2 million as of September 29, 2007. The amounts guaranteed are reduced by the actual amount of lease payments paid by Spansion over the lease terms.

No liability has been recognized for these guarantees related to Spansion under the provisions of FIN 45 because we concluded the fair value of the guarantees is not significant after considering various factors including the ability of Spansion to make the payments on these obligations and the short maturity of the indebtedness.

Outlook

Our outlook disclosure is based on current expectations and contains forward-looking statements. Reference should be made to "Cautionary Statement Regarding Forward-Looking Statements" at the beginning of Part I, Item 2 MD&A. For a discussion of the factors that could cause actual results to differ materially from the forward-looking statements in the following disclosure, see the "Risk Factors" section in this report and such other risks and uncertainties as set forth in this report or detailed in our other Securities and Exchange Commission reports and filings.

In the fourth quarter of 2007, we expect revenue to increase in line with seasonality. We also expect during the fourth quarter that: operating expenses, which include research and development expenses, marketing, general and administrative expenses and employee stock-based compensation expenses, will increase by approximately 6 percent compared to the third quarter primarily driven by investments in new manufacturing process technology; acquisition-related charges will be approximately \$75 million; income tax expense will be approximately \$25 million; and depreciation and amortization expense will be approximately \$290 million. We also expect capital expenditures to be approximately \$300 million in the fourth quarter of 2007, bringing the annual total capital expenditures to approximately \$1.7 billion for 2007.

Recently Issued Accounting Pronouncements

In June 2006, the Financial Accounting Standards Board issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, an interpretation of FAS 109, *Accounting for Income Taxes* (FIN 48). FIN 48 clarifies the accounting for income taxes by prescribing a minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. We adopted FIN 48 as of January 1, 2007 as required. We reported the cumulative effect of applying FIN 48 as a reduction of the beginning balance of retained earnings of \$6 million and a decrease to goodwill of \$3 million.

As of the date of adoption, our total gross unrecognized tax benefits were \$149 million, of which \$57 million, if recognized, would affect the effective tax rate. The recognition of the remaining unrecognized tax benefits would be reported as an adjustment to goodwill to the extent of pre-acquisition unrecognized tax benefits.

We recognize potential accrued interest and penalties related to unrecognized tax benefits as interest expense and income tax expense, respectively. We had accrued interest and penalties of \$59 million as of the date of adoption of FIN 48.

As of the date of adoption of FIN 48, tax years 1994–2006 remain subject to examination in the U.S., 1999–2006 in Canada and 1999–2006 in various foreign jurisdictions.

As a result of the implementation of FIN 48, we have recognized \$56 million of current and long-term deferred tax assets, previously under a valuation allowance with \$56 million of current and non-current tax contingencies as of September 29, 2007.

Table of Contents

Total gross unrecognized tax benefits decreased by \$15 million in the first nine months of 2007, of which \$11 million, if recognized, would affect the effective tax rate. Substantially all of this decrease occurred in the third quarter of 2007 and resulted from settlements with taxing authorities. Interest and penalties decreased by \$13 million and \$1 million respectively in the first nine months of 2007. Substantially all of the reductions in interest and penalties occurred in the third quarter of 2007 and the reduction in interest was primarily due to the expiration of the statute of limitations in foreign jurisdictions.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157). SFAS 157 does not require any new fair value measurements but clarifies the fair value definition, establishes a fair value hierarchy that prioritizes the information used to develop assumptions used for measuring fair value, and expands disclosures about fair value measurements. SFAS 157 clarifies that the fair value is the exchange price in an orderly transaction between market participants to sell the asset or transfer the liability in the market. The fair value hierarchy gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data for example, the reporting entity's own data. It emphasizes that fair value is a market-based measurement, not an entity-specific measurement and a fair value measurement should therefore be based on the assumptions that market participants would use in pricing the asset or liability. SFAS 157 expands disclosures about the use of fair value to measure assets and liabilities in interim and annual periods subsequent to initial recognition, including the inputs used to measure fair value and the effect of such measurements on earnings for the period. As released it will be effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. However, the FASB recently stated that it would consider a potential deferral on the application of SFAS 157 to the fair value measurement of non-financial assets and liabilities. We are currently evaluating the accounting and disclosure requirements of SFAS 157 and plan to adopt it as required at the beginning of our fiscal year 2008.

In February 2007, FASB issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities, including an Amendment of FASB Statement No. 115*. This statement allows entities to voluntarily choose to measure many financial assets and financial liabilities as well as certain non-financial instruments that are similar to financial instruments (collectively "eligible items") at fair value (the "fair value option"). The election is made on an instrument-by-instrument basis and is irrevocable. If the fair value option is elected for an instrument, the statement specifies that all subsequent changes in fair value for that instrument shall be reported in earnings. The statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. Upon initial adoption, this statement provides entities with a one-time chance to elect the fair value options for the eligible items. The effect of the first measurement to fair value should be reported as a cumulative-effect adjustment to the opening balance of retained earnings in the year the statement is adopted. We are currently evaluating the impact, if any, of this statement upon its adoption.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Reference is made to Part II, Item 7A, Quantitative and Qualitative Disclosures about Market Risk, in our Annual Report on Form 10-K for the fiscal year ended December 31, 2006. There have not been significant changes in the market risk since December 31, 2006, except as mentioned below relative to the interest rate risk:

In April 2007, we issued \$2.2 billion aggregate principal amount of 6.00% Notes. The 6.00% Notes bear interest at 6.00% per annum. Interest is payable on May 1 and November 1 of each year beginning November 1, 2007 until the maturity date of May 1, 2015 unless the 6.00 % Notes are repurchased or converted prior to the maturity date. We used \$500 million of the net proceeds to repay a portion of the amounts outstanding under our October 2006 Term Loan. As a result of this partial repayment, the margin on the interest rate for the October 2006 Term Loan was reduced from 2.25 percent to 2.00 percent. The remaining net proceeds of approximately \$1.5 billion were invested in investments with short maturities or with frequent interest reset terms.

In August 2007, we issued \$1.5 billion aggregate principal amount of 5.75% Notes. The 5.75% Notes bear interest at 5.75% per annum. Interest is payable in arrears on February 15 and August 15 of each year beginning February 15, 2008 until the maturity date of August 15, 2012 unless the 5.75% Notes are repurchased or converted prior to the maturity date. We used all of the net proceeds, together with available cash, to repay in full the outstanding balance of the October 2006 Term Loan.

With the full repayment of the October 2006 Term Loan we replaced a substantial amount of our floating rate debt with fixed rate debt. Accordingly, our exposure to market risk for changes in interest rates has decreased.

Table of Contents

We will continue to monitor our exposure to interest rate risk.

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As of September 29, 2007, the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

There was no change in our internal control over financial reporting during the third quarter of 2007 that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

GPU Class Actions

The court held a hearing on defendants' motions to dismiss in September 2007. On September 27, 2007, the court issued an order granting in part and denying in part defendants' motions to dismiss. Pursuant to the court's order, plaintiffs filed motions to amend their complaints on October 11, 2007, and defendants filed oppositions to plaintiffs' motions on October 18, 2007.

In re ATI Technologies, Inc. Securities Litigation

On August 8, 2007, the United States District Court of Pennsylvania granted our motion to dismiss.

U.S. Consumer Class Action Lawsuits

On December 1, 2006, plaintiffs filed a Motion for Class Certification. ATI filed its opposition to Plaintiff's Motion for Class Certification on March 29, 2007. The class certification hearing was held on May 21, 2007. On September 28, 2007, the Court entered an order denying Plaintiffs' Motion for Class Certification without prejudice, granting plaintiffs additional time to conduct class discovery and granting plaintiffs certain fees and costs.

ITEM 1A. RISK FACTORS

This description of our business risk factors includes any material changes to and supersedes risk factors previously disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2006 and in Part II, Item 1A of our Quarterly Reports on Form 10-Q for the fiscal quarters ended March 31, 2007 and June 30, 2007.

Table of Contents

Risks Related to Our Business

Intel Corporation's dominance of the microprocessor market and its aggressive business practices may limit our ability to compete effectively.

Intel has dominated the market for microprocessors for many years. Intel's significant financial resources enable it to market its products aggressively, to target our customers and our channel partners with special incentives, and to discipline customers who do business with us. These aggressive activities have in the past and are likely in the future to result in lower unit sales and average selling prices for our products and adversely affect our margins and profitability.

Intel also manufactures and sells integrated graphics chipsets bundled with their microprocessors and is a dominant competitor with respect to this portion of our business. Intel could leverage its dominance in the microprocessor market to sell its integrated chipsets. Also, Intel has stated that it intends to reenter the discrete GPU market. Either of these actions could shrink the total available market for certain of our graphics products. Intel could also take other actions that place our discrete GPUs and integrated chipsets at a competitive disadvantage such as giving one or more of our competitors in the graphics market, such as Nvidia Corporation, preferential access to its proprietary graphics interface or other useful information. Moreover, computer manufacturers are increasingly using integrated graphics chipsets, particularly for notebooks, because they cost significantly less than traditional discrete graphics components while offering reasonably good graphics performance for most mainstream PCs. If our graphics products do not successfully address the discrete GPU and integrated chipset markets, our graphics business could be adversely affected.

As long as Intel remains in this dominant position, we may be materially adversely affected by Intel's:

business practices, including rebating and allocation strategies and pricing actions, designed to limit our market share;

product mix and product introduction schedules;

product bundling, marketing and merchandising strategies;

exclusivity payments to its current and potential customers;

control over industry standards, PC manufacturers and other PC industry participants, including motherboard, memory, chipset and basic input/output system, or BIOS, suppliers and software companies as well as the graphics interface for Intel platforms; and

marketing and advertising expenditures in support of positioning the Intel brand over the brand of its OEM customers.

Intel exerts substantial influence over computer manufacturers and their channels of distribution through various brand and other marketing programs. Because of its dominant position in the microprocessor market, Intel has been able to control x86 microprocessor and computer system standards and to dictate the type of products the microprocessor market requires of Intel's competitors. Intel also dominates the computer system platform, which includes core logic chipsets, graphics chips, motherboards and other components necessary to assemble a computer system. As a result, OEMs that purchase microprocessors for computer systems are highly dependent on Intel, less innovative on their own and, to a large extent, are distributors of Intel technology. Additionally, Intel is able to drive de facto standards for x86 microprocessors that could cause us and other companies to have delayed access to such standards.

We expect Intel to maintain its dominant position and to continue to invest heavily in marketing, research and development, new manufacturing facilities and other technology companies. Intel has substantially greater financial resources than we do and accordingly spends substantially greater amounts on research and development and production capacity than we do. Moreover, Intel launched its quad-core multi-chip module processors during the fourth quarter of 2006. However, we only commenced initial shipments for revenue of our first quad-core products during the third quarter of 2007. To the extent Intel manufactures a significantly larger portion of its microprocessor products using more advanced

Edgar Filing: ADVANCED MICRO DEVICES INC - Form 10-Q

process technologies, or introduces competitive new products into the market before we do, we may be more vulnerable to Intel's aggressive marketing and pricing strategies for microprocessor products.

Intel's dominant position in the microprocessor market and integrated graphics chipset market, its existing relationships with top-tier OEMs and its aggressive marketing and pricing strategies could result in lower unit sales and average selling prices for our products, which could have a material adverse effect on us.

Table of Contents

If we cannot generate sufficient revenues and operating cash flow or obtain external financing, we may face a cash shortfall and be unable to make all of our planned capital expenditures.

Our capital expenditures, together with ongoing operating expenses, will be a substantial drain on our cash flow and may decrease our cash balances. As of September 29, 2007, we had \$1.5 billion in cash, cash equivalents and marketable securities. During the first nine months of 2007, net cash used in operating activities was \$371 million and net cash used in investing activities was \$1.3 billion. During the first nine months of 2007, we incurred substantial losses that have had a negative impact on cash balances. Moreover, during the fourth quarter of 2007, we plan to make approximately \$300 million of capital expenditures. However, our ability to fund these capital expenditures and our operating expenses in accordance with our business plan depends on generating sufficient revenues and cash flow from operations as well as the availability of external financing, if necessary. If we cannot generate sufficient revenues and operating cash flow or obtain external financing, we may face a cash shortfall.

The timing and amount of our capital requirements cannot be precisely determined at this time and will depend on a number of factors including future demand for products, product mix, changes in semiconductor industry conditions and market competition. We regularly assess markets for external financing opportunities, including debt and equity financing. Additional debt or equity financing may not be available when needed or, if available, may not be available on satisfactory terms. Our inability to obtain needed financing or to generate sufficient cash from operations may require us to abandon projects or curtail capital expenditures. If we curtail capital expenditures or abandon projects, we could be materially adversely affected.

We have a substantial amount of indebtedness that could adversely affect our financial position and prevent us from implementing our strategy or fulfilling our contractual obligations.

As of September 29, 2007 we had consolidated debt of approximately \$5.3 billion. Our substantial indebtedness may:

make it difficult for us to satisfy our financial obligations, including making scheduled principal and interest payments;

limit our ability to borrow additional funds for working capital, capital expenditures, acquisitions and general corporate and other purposes;

limit our ability to use our cash flow or obtain additional financing for future working capital, capital expenditures, acquisitions or other general corporate purposes;

require us to use a substantial portion of our cash flow from operations to make debt service payments;

limit our flexibility to plan for, or react to, changes in our business and industry;

place us at a competitive disadvantage compared to our less leveraged competitors; and

increase our vulnerability to the impact of adverse economic and industry conditions.

We may not be able to generate sufficient cash to service our debt obligations.

Our ability to make payments on and to refinance our debt, or our guarantees of other parties' debts, will depend on our financial and operating performance, which may fluctuate significantly from quarter to quarter, and is subject to prevailing economic conditions and financial, business and other factors, many of which are beyond our control. We cannot assure you that we will be able to generate sufficient cash flow or that we will be able to borrow funds in amounts sufficient to enable us to service our debt or to meet our working capital and capital expenditure requirements. If we are not able to generate sufficient cash flow from operations or to borrow sufficient funds to service our debt, we may be

Edgar Filing: ADVANCED MICRO DEVICES INC - Form 10-Q

required to sell assets or equity, reduce capital expenditures, refinance all or a portion of our existing debt or obtain additional financing. We cannot assure you that we will be able to refinance our debt, sell assets or equity or borrow more funds on terms acceptable to us, if at all.

Our debt instruments impose restrictions on us that may adversely affect our ability to operate our business.

The indenture governing our 7.75% Notes contain various covenants that limit our ability to:

incur additional indebtedness, except specified permitted debt;

pay dividends and make other restricted payments;

Table of Contents

make certain investments if a default or an event of default exists, or if specified financial conditions are not satisfied;

create or permit certain liens;

create or permit restrictions on the ability of certain restricted subsidiaries to pay dividends or make other distributions to us;

consolidate, merge or sell assets as an entirety or substantially as an entirety unless specified conditions are met; and

enter into certain types of transactions with affiliates.

In addition, the Fab 36 Loan Agreements contain restrictive covenants, including a prohibition on the ability of our German subsidiary, AMD Fab 36 Limited Liability Company & Co. KG, or AMD Fab 36 KG, and its affiliated limited partners to pay us dividends and other payments and also require us to maintain specified financial ratios when group consolidated cash is below specified amounts. Our ability to satisfy these covenants, financial ratios and tests can be affected by events beyond our control. We cannot assure you that we will meet those requirements. A breach of any of these covenants, financial ratios or tests could result in a default under the applicable agreement.

Our loan agreements contain cross-default provisions whereby a default under one agreement would likely result in cross defaults under agreements covering other borrowings. For example, the occurrence of a default with respect to any indebtedness or any failure to repay debt when due in an amount in excess of \$50 million would cause a cross default under the indentures governing our 5.75% Notes, 6.00% Notes and 7.75% Notes. The occurrence of a default under any of these borrowing arrangements would permit the applicable lenders or note holders to declare all amounts outstanding under those borrowing arrangements to be immediately due and payable. If the note holders or the trustee under the indentures governing our 5.75% Notes, 6.00% Notes or 7.75% Notes accelerates the repayment of borrowings, we cannot assure you that we will have sufficient assets to repay those borrowings and our other indebtedness.

If our cost management efforts are not effective, our business could be materially adversely affected.

For the third quarter of fiscal 2007, we incurred a net loss of approximately \$396 million. We have taken and plan to continue to undertake a number of actions to manage our expenses and realign our cost structure. However, we forecast that for the fourth quarter of 2007, our operating expenses will be approximately 6 percent higher than the third quarter of 2007, primarily driven by investments in new manufacturing process technology. We cannot assure you that we will be able to achieve our planned cost reduction strategy in a timely manner or at all, and if we are unable to do so, we could be materially adversely affected. In addition, if these reductions are not effectively implemented, we may experience unanticipated effects from these reductions causing harm to our business and customer relationships.

We may not realize all of the anticipated benefits of our acquisition of ATI.

The success of our acquisition of ATI depends, in part, on our ability to realize the anticipated synergies, cost savings and growth opportunities from integrating the businesses of ATI with the businesses of AMD, and failure to realize these anticipated benefits could cause our business to be materially adversely affected. In addition, all of our goodwill and acquisition-related intangible assets outstanding as of September 29, 2007 were related to our acquisition of ATI. We will perform our annual impairment analysis during the fourth quarter of 2007. Although we cannot estimate the outcome of the analysis at this time, the charge could have a material adverse impact on us. Our success in realizing these benefits and the timing of this realization depends upon our successful integration of ATI's operations. The integration of two independent companies is a complex, costly, and time-consuming process. The difficulties of combining the operations of the companies include, among others:

retaining key employees;

bridging possible differences in cultures and management philosophies;

Edgar Filing: ADVANCED MICRO DEVICES INC - Form 10-Q

consolidating corporate and administrative infrastructures and information technology systems;

coordinating sales and marketing functions;

preserving our customer, supplier, ecosystem partner and other important relationships;

aligning and executing on new product roadmaps;

minimizing the diversion of management's attention from ongoing business concerns; and

coordinating geographically separate organizations.

Table of Contents

We cannot assure you that our acquisition of ATI will result in the realization of the full benefits that we anticipated. For example, it is possible that as a result of the acquisition, previous ATI customers of discrete GPUs may decide to purchase our competitors' graphics products for use with their computer systems that incorporate Intel platforms, or that ecosystem partners will cease doing business with us because they view the former ATI operations as competitive with portions of their business. Any inability to integrate successfully could have a material adverse effect on us.

We cannot be certain that our substantial investments in research and development will lead to timely improvements in product designs or technology used to manufacture our products or that we will have sufficient resources to invest in the level of research and development that is required to remain competitive.

We make substantial investments in research and development for process technologies in an effort to design and manufacture leading-edge microprocessors. We also make substantial investments in research and development related to product designs, and we anticipate that we will continue to invest in research and development in the future. For example, in the fourth quarter of 2007, we expect operating expenses to increase by approximately 6 percent compared to the third quarter of 2007, primarily driven by investments in transitioning to 45 nanometer process technology. Also, we plan to continue to invest in research and development related to our graphics and chipset products and products for consumer electronics devices, including new integrated platforms and our design initiative called Fusion. We cannot be certain that we will be able to develop, obtain or successfully implement leading-edge process technologies needed to manufacture future generations of our products profitably or on a timely basis or that our competitors will not develop new technologies, products or processes that render our products uncompetitive or obsolete. If new competitors, technological advances by existing competitors or other competitive factors require us to invest significantly greater resources than anticipated in our research and development efforts, our operating expenses would increase. If we are required to invest significantly greater resources than anticipated in research and development efforts without an increase in revenue, our operating results could decline. Moreover, in connection with the ATI acquisition, we committed to the Minister of Industry of Canada to increase total expenditures on research and development in Canada when compared to ATI's expenditures in this area in prior years. However, we cannot assure you that we will have sufficient resources to achieve planned investments in research and development or to otherwise maintain the level of investment in research and development that is required for us to remain competitive.

We have a joint development agreement with IBM, pursuant to which we have agreed to work together to develop new process technologies through December 31, 2011. We anticipate that under this agreement, we will pay fees to IBM of between \$413 million and \$456 million in connection with joint development projects from September 30, 2007 to 2011.

If this agreement were to be terminated, we would either have to resume certain research and development activities internally or find an alternate partner. In either case, our research and development costs could increase, and we could experience delays or other setbacks in the development of new process technologies, any of which would materially adversely affect us. Moreover, the timely achievement of the milestones set forth in the joint development agreement is critical to our ability to continue to manufacture microprocessors using advanced process technologies.

The success of our business is dependent upon our ability to introduce products on a timely basis with required features and performance levels that provide value to our customers and support and coincide with significant industry transitions.

Our success depends to a significant extent on the development, qualification, implementation and acceptance of new product designs and improvements that provide value to our customers. Our ability to develop and qualify new products and related technologies to meet evolving industry requirements, at prices acceptable to our customers and on a timely basis are significant factors in determining our competitiveness in our target markets. If we are delayed in developing or qualifying new products or technologies, we may lose competitive positioning, which could cause us to lose market share and require us to discount the selling price of our products. For example, in the third quarter of 2007 we began shipping our Quad-Core AMD Opteron processors, but our initial production ramp of these processors has been slower than we anticipated because we had to undertake design and process tuning.

Delays in developing or qualifying new products can also cause us to miss our customers' product design windows. If our customers do not include our products in the initial design of their computer systems, they will typically not

Table of Contents

use our products in their systems until at least the next design configuration. The process of being qualified for inclusion in a customer's system can be lengthy and could cause us to further miss a cycle in the demand of end-users, which also could result in a loss of market share and harm our business.

Market demand requires that products incorporate new features and performance standards on an industry-wide basis. Over the life of a specific product, the average selling price undergoes regular price reductions. The introduction of new products and enhancements to existing products is necessary to maintain overall corporate average selling prices. If we are unable to introduce new products or launch new products with sufficient increases in average selling prices or increased unit sales volumes capable of offsetting these reductions in average selling prices of existing products, our revenues, inventories, gross margins and operating results could be materially adversely affected.

Our ability to design and introduce new products in a timely manner is dependent upon third party intellectual property.

In the design and development of new products and product enhancements, we rely on third-party intellectual property such as software development tools. Historically, ATI has experienced delays in the introduction of products as a result of the inability of then available software development tools to fully simulate the complex features and functionalities of its products. The design requirements necessary to meet consumer demands for more features and greater functionality from products in the future may exceed the capabilities of the software development tools available to us. If the third-party intellectual property that we use becomes unavailable or fails to produce designs that meet consumer demands, our business could be materially adversely affected.

The loss of a significant customer may have a material adverse effect on us.

Collectively, our top five customers accounted for almost half of our total revenue in the first nine months of 2007. Moreover, historically a significant portion of ATI's revenues were derived from sales to a small number of customers, and we expect that a small number of customers will continue to account for a substantial part of revenues from our graphics and consumer electronics businesses in the future. For example, for the first nine months of 2007, one handset manufacturer accounted for a significant percentage of the revenue of our Consumer Electronics segment. During this same period, three customers accounted for approximately one third of the revenue of our Graphics segment. If one of our top microprocessor, graphics business or consumer electronics customers decided to stop buying our products, or if one of these customers were to materially reduce its operations or its demand for our products, we would be materially adversely affected. For example, during the first and second quarters of 2007, the handset manufacturer referenced above purchased significantly less of our products than in the immediately preceding quarter. This decline contributed to lower unit shipments of our products for consumer electronics devices and negatively impacted net revenue for our Consumer Electronics segment in the first half of 2007.

The semiconductor industry is highly cyclical and has experienced severe downturns that materially adversely affected, and may in the future materially adversely affect, our business.

The semiconductor industry is highly cyclical and has experienced significant downturns, often in conjunction with constant and rapid technological change, wide fluctuations in supply and demand, continuous new product introductions, price erosion and declines in general economic conditions. Our historical financial results have also been subject to substantial fluctuations. Our financial performance has been, and may in the future be, negatively affected by these downturns. We incurred substantial losses in recent downturns, due to:

substantial declines in average selling prices;

the cyclical nature of supply/demand imbalances in the semiconductor industry;

a decline in demand for end-user products (such as PCs) that incorporate our products;

excess inventory levels in the channels of distribution, including those of our customers; and

excess production capacity.

Table of Contents

For example, in 2001 and 2002 we implemented restructuring plans due to weak customer demand associated with the downturn in the semiconductor industry. If the semiconductor industry were to experience a downturn in the future, we would be materially adversely affected.

The demand for our products depends in part on continued growth in the industries and geographies into which they are sold. Fluctuations in demand for our products or a market decline in any of these industries or geographies would have a material adverse effect on our results of operations.

Our microprocessor business is dependent upon the market for mobile and desktop PCs and servers. Industry-wide fluctuations in the computer marketplace have materially adversely affected us in the past and may materially adversely affect us in the future. Depending on the growth rate of computers sold, sales of our products may not grow and may even decrease. If demand for computers is below our expectations, the demand for our products may decrease and we could be materially adversely affected.

The business we acquired from ATI is also dependent upon the market for mobile, desktop and workstation PCs, the consumer electronics market and the markets for digital TVs, handheld devices, such as multimedia-enabled mobile phones, and game consoles. A market decline in any of these industries could cause the demand for our products to decrease and could have a material adverse effect on our results of operations.

The growth of our business is also dependent on continued demand for our products from high-growth global markets. If demand from these markets is below our expectations, sales of our products may not grow, and may even decrease, which would have a material adverse effect on us.

The markets in which our products are sold are highly competitive.

The markets in which our products are sold are very competitive and delivering the latest and best products to market on a timely basis is critical to achieving revenue growth. We expect competition to intensify due to rapid technological changes, frequent product introductions and aggressive pricing by competitors. We believe that the main factors that determine our competitiveness are product quality, power consumption, reliability, speed, size (or form factor), cost, selling price, adherence to industry standards, software and hardware compatibility and stability, brand recognition, timely product introductions and availability. After a product is introduced, costs and average selling prices normally decrease over time as production efficiency improves, and successive generations of products are developed and introduced for sale. We expect that competition will intensify in these markets and our competitors' products may be less costly, provide better performance or include additional features that render our products uncompetitive. With respect to our graphics products, Intel and Nvidia Corporation are our principal competitors. Some competitors may have greater access or rights to companion technologies, including interface, processor and memory technical information. Competitive pressures could adversely impact the demand for our products, which could harm our revenue and gross margin.

If we fail to improve the efficiency of our supply chain in order to respond to increases or changes in customer demand for our products, our business could be materially adversely affected.

Our ability to meet customer demand for our products depends, in part, on our ability to deliver the products our customers want on a timely basis. Accordingly, we must continually improve the management of our supply chain by synchronizing the entire supply chain, from sourcing through manufacturing, distribution and fulfillment. As we continue to grow our business, acquire new OEM customers and strengthen relationships with existing OEM customers, the efficiency of our supply chain will become increasingly important because OEMs tend to have specific requirements for particular products, and specific time-frames in which they require delivery of these products. Also, the breadth of our product portfolio increased significantly as a result of our acquisition of ATI, which put stress on our supply chain. We have recently experienced challenges related to the logistics of selling our products across a diverse set of customers and geographies and delivering these products on a timely basis. If we fail to adequately improve the efficiency of our supply chain and adjust our operations in response to future increases or changes in OEM demand for our products, our business could be materially adversely affected.

Table of Contents

We depend on third-party companies for the design, manufacture and supply of motherboards, BIOS software and other components.

We depend on third-party companies for the design, manufacture and supply of motherboards, BIOS software and other components that support our microprocessor offerings. In addition, despite our acquisition of ATI, we continue to work with other third parties for graphics chips in order to provide our customers with a greater choice of technologies to best meet their needs.

Our microprocessors are not designed to function with motherboards and chipsets designed to work with Intel microprocessors because our patent cross-license agreement with Intel does not extend to Intel's proprietary bus interface protocol. If we are unable to secure sufficient support for our microprocessor products from designers and manufacturers of motherboards and chipsets, our business would be materially adversely affected. Our acquisition of ATI could exacerbate this problem because we design and supply a significantly greater amount of graphics products ourselves. Doing so could cause third-party designers, manufacturers and suppliers to be less willing to do business with us or to support our products out of a perceived risk that we will be less willing to support their products or because we may compete with them. As a result, these third-party designers, manufacturers and suppliers could forge relationships, or strengthen their existing relationships, with our competitors. If the designers, manufacturers and suppliers of graphics chips, motherboards, and other components decrease their support for our product offerings and increase their support for the product offerings of our competitors, our business could be materially adversely affected.

If we are ultimately unsuccessful in any of our antitrust lawsuits against Intel, our business may be materially adversely affected.

On June 27, 2005, we filed an antitrust complaint against Intel Corporation and Intel's Japanese subsidiary, Intel Kabushiki Kaisha, which we refer to collectively as Intel, in the United States District Court for the District of Delaware under Section 2 of the Sherman Antitrust Act, Sections 4 and 16 of the Clayton Act, and the California Business and Professions Code. Our complaint alleges that Intel has unlawfully maintained a monopoly in the x86 microprocessor market by engaging in anti-competitive financial and exclusionary business practices that limit the ability and/or incentive of Intel's customers in dealing with AMD. Also, on June 30, 2005, our subsidiary in Japan, AMD Japan K.K., filed an action in Japan against Intel K.K. in the Tokyo High Court and the Tokyo District Court for damages arising from violations of Japan's Antimonopoly Act. On September 26, 2006, the United States District Court for the District of Delaware granted Intel's motion to dismiss foreign conduct claims. The effect of that decision was clarified by the Court's January 12, 2007, adoption of the Special Master's decision on our motion to compel foreign conduct discovery. As a result of these two decisions, we will be permitted to develop evidence of Intel's exclusionary practices wherever they occur, including practices foreclosing AMD from foreign customers or in foreign market segments. However, the court's ruling limits our damages to lost sales in the United States and lost sales abroad that would have originated from the United States. The Court also set an immovable trial date of April 27, 2009.

If our antitrust lawsuits against Intel are ultimately unsuccessful, our business, including our ability to increase market share in the microprocessor market, could be materially adversely affected.

Our operating results are subject to quarterly and seasonal sales patterns.

A substantial portion of our quarterly sales have historically been made in the last month of the quarter. This uneven sales pattern makes prediction of revenues for each financial period difficult and increases the risk of unanticipated variations in quarterly results and financial condition. In addition, our operating results tend to vary seasonally. For example, demand in the retail sector of the PC market is often stronger during the fourth quarter as a result of the winter holiday season. European sales are often weaker during the summer months. Many of the factors that create and affect seasonal trends are beyond our control.

Manufacturing capacity constraints and manufacturing capacity utilization rates may have a material adverse effect on us.

There may be situations in which our microprocessor manufacturing facilities are inadequate to meet the demand for certain of our microprocessor products. Our inability to obtain sufficient manufacturing capacity to meet forecasted demand, either in our own facilities or through foundry or similar arrangements with third parties, could result in an adverse effect on our relationships with customers, which could have a material adverse effect on us.

Table of Contents

In November 2004, we entered into sourcing and manufacturing technology agreements with Chartered Semiconductor Manufacturing whereby Chartered agreed to become a contract manufacturer for our AMD64-based microprocessors. Although Chartered has begun production, the ability of Chartered to continue to ramp production on a timely basis depends on several factors beyond our control, including Chartered's ability to continue to implement our technology at their facilities on a timely basis. In addition, we have slowed the conversion of Fab 30 into a 300-millimeter wafer manufacturing facility. If we cannot obtain sufficient manufacturing capacity to meet demand for our microprocessor products, either in our own facilities or through foundry or similar arrangements, we could be materially adversely affected.

We rely on third party foundries and other contractors to manufacture certain products.

We rely on independent foundries such as Taiwan Semiconductor Manufacturing Company and United Microelectronics Corp. to manufacture our graphics and chipset products. Chartered Semiconductor manufactures some of our microprocessor products and products for consumer electronics devices. We also rely on third party manufacturers to manufacture our high end graphics boards. Independent contractors also perform the assembly, testing and packaging of these products. We obtain these manufacturing services for our graphics and chipset products and products for consumer electronics devices on a purchase order basis and these manufacturers are not required to provide us with any specified minimum quantity of product. Accordingly, our graphics and consumer electronics businesses depend on these suppliers to allocate to us a portion of their manufacturing capacity sufficient to meet our needs, to produce products of acceptable quality and at acceptable manufacturing yields and to deliver those products to us on a timely basis at acceptable prices. We cannot assure you that these manufacturers will be able to meet our near-term or long-term manufacturing requirements. The manufacturers we use also fabricate wafers and assemble, test and package products for other companies, including certain of our competitors. They could choose to prioritize capacity for other users, reduce or eliminate deliveries to us, or increase the prices that they charge us on short notice.

We must have reliable relationships with our wafer manufacturers and subcontractors to ensure adequate product supply to respond to customer demand. If we move production of our products to new manufacturers or if current manufacturers implement new process technology or design rules, any transition difficulties may result in lower yields or poorer performance of our products. Because it could take several quarters to establish a strategic relationship with a new manufacturing partner, we may be unable to secure an alternative supply for any specific product in a short time frame. We could experience significant delays in the shipment of our products if we are required to find alternative foundries or contractors. Other risks associated with our dependence on third-party manufacturers include reduced control over delivery schedules, quality assurance, manufacturing yields and cost, lack of capacity in periods of excess demand, misappropriation of our intellectual property, dependence on several small undercapitalized subcontractors, reduced ability to manage inventory and parts, and exposure to foreign countries and operations. If we are unable to secure sufficient or reliable supplies of wafers, our ability to meet customer demand for our graphics and consumer electronics businesses may be adversely affected and this could have an adverse effect on us.

If essential equipment or materials are not available to manufacture our products, we could be materially adversely affected.

Our microprocessor manufacturing operations depend upon obtaining deliveries of equipment and adequate supplies of materials on a timely basis. We purchase equipment and materials from a number of suppliers. From time to time, suppliers may extend lead times, limit supply to us or increase prices due to capacity constraints or other factors. Because the equipment that we purchase is complex, it is difficult for us to substitute one supplier for another or one piece of equipment for another. Certain raw materials we use in manufacturing our microprocessor products or that are used in the manufacture of our graphics products are available only from a limited number of suppliers.

For example, we are largely dependent on one supplier for our silicon-on-insulator (SOI) wafers that we use to manufacture our microprocessor products. We are also dependent on key chemicals from a limited number of suppliers and rely on a limited number of foreign companies to supply the majority of certain types of integrated circuit packages for our microprocessor products. Similarly, certain non-proprietary materials or components such as memory, PCBs, substrates and capacitors used in the manufacture of our graphics products are currently available from only a limited number of sources and often subject to rapid changes in price and availability. Interruption of supply or increased demand in the industry could cause shortages and price increases in various essential materials. If we are unable to procure certain of these materials, we may have to reduce our manufacturing operations. Such a reduction has in the past and could in the future have a material adverse effect on us.

Table of Contents

Industry overcapacity could cause us to under-utilize our microprocessor manufacturing facilities and have a material adverse effect on us.

Both we and our competitor, Intel, have added significant capacity in recent years, both by expanding capacity at wafer fabrication facilities and by transitioning to more advanced manufacturing technologies. In the past, capacity additions sometimes exceeded demand requirements leading to oversupply situations and downturns in the industry. Fluctuations in the growth rate of industry capacity relative to the growth rate in demand for our products contribute to cyclicalities in the semiconductor market, which may in the future put pressure on our average selling prices and materially adversely affect us.

It is difficult to predict future growth or decline in the markets we serve, making it very difficult to estimate requirements for production capacity. If our target markets do not grow as we anticipate, we may under-utilize our manufacturing facilities, which may result in write-downs or write-offs of inventories and losses on products for which demand is lower than we anticipate.

In addition, during periods of industry overcapacity, customers do not generally order products as far in advance of the scheduled shipment date as they do during periods when our industry is operating closer to capacity, which can exacerbate the difficulty in forecasting capacity requirements. Many of our costs are fixed. Accordingly, during periods in which we under-utilize our manufacturing facilities as a result of reduced demand for certain of our products, our costs cannot be reduced in proportion to the reduced revenues for such a period. When this occurs, our operating results are materially adversely affected. If the demand for our microprocessor products is not consistent with our increased expectations, we may under-utilize our manufacturing facilities or we may not fully utilize the reserved capacity at Chartered's foundry. This may have a material adverse effect on us.

Unless we maintain manufacturing efficiency, our future profitability could be materially adversely affected.

Manufacturing our microprocessor products involves highly complex processes that require advanced equipment. Our manufacturing efficiency is an important factor in our profitability, and we cannot be sure that we will be able to maintain or increase our manufacturing efficiency to the same extent as our competitors. We continually modify manufacturing processes and transition to more advanced manufacturing process technologies in an effort to improve yields and product performance and decrease costs. We may fail to achieve acceptable yields or experience product delivery delays as a result of, among other things, capacity constraints, delays in the development or implementation of new process technologies, changes in our process technologies, upgrades or expansion of existing facilities, or impurities or other difficulties in the manufacturing process. Any decrease in manufacturing yields could result in an increase in our per unit costs or force us to allocate our reduced product supply among our customers, which could potentially harm our customer relationships, reputation, revenue and gross profit.

Improving our microprocessor manufacturing efficiency in future periods is dependent on our ability to:

develop advanced product and process technologies;

successfully transition to advanced process technologies;

ramp product and process technology improvements rapidly and effectively to commercial volumes across our facilities; and

achieve acceptable levels of manufacturing wafer output and yields, which may decrease as we implement more advanced technologies.

During periods when we are implementing new process technologies, manufacturing facilities may not be fully productive. A substantial delay in the technology transitions to smaller process technologies could have a material adverse effect on us, particularly if our competitors transition to more cost effective technologies earlier than we do. Our results of operations would also be adversely affected by the increase in fixed costs and operating expenses related to increases in production capacity if revenues do not increase proportionately.

Table of Contents

Similarly, the operating results of our graphics and consumer electronics businesses are dependent upon achieving planned semiconductor manufacturing yields. Our graphics and chipset products and products for consumer electronics devices are manufactured at independent foundries, but we have the responsibility for product design and the design and performance of the tooling required for manufacturing. Semiconductor manufacturing yields are a function of both product design and process technology, which is typically proprietary to the manufacturer, and low yields can result from either design or process technology failures. In addition, yield problems require cooperation by and communication between us and the manufacturer and sometimes the customer as well. The offshore location of our principal manufacturers compounds these risks, due to the increased effort and time required to identify, communicate and resolve manufacturing yield problems. We cannot assure you that we or our foundries will identify and fix problems in a timely manner, and achieve acceptable manufacturing yields in the future. Our inability, in cooperation with our independent foundries, to achieve planned production yields for these products could have a material adverse effect on us. In particular, failure to reach planned production yields over time could result in us not having sufficient product supply to meet demand and/or higher production costs and lower gross margins. This could materially adversely affect us.

The accounting method for convertible debt securities with net share settlement, like the 6.00% Notes, will be subject to change.

In September 2007, the FASB exposed for comment a proposed FASB Staff Position (FSP) No. *APB 14-a, Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (including partial cash settlement)*. This proposed FSP would change the accounting for certain convertible debt instruments, including our 6.00% Notes. Under the proposed new rules, for convertible debt instruments that may be settled entirely or partially in cash upon conversion, an entity should separately account for the liability and equity components of the instrument in a manner that reflects the issuer's economic interest cost. The effect of the proposed new rules for our 6.00% Notes is that the equity component would be included in the paid-in-capital portion of stockholders' equity on our balance sheet and the value of the equity component would be treated as an original issue discount for purposes of accounting for the debt component of the 6.00% Notes. Higher interest expense would result by recognizing accretion of the discounted carrying value of the 6.00% Notes to their face amount as interest expense over the term of the 6.00% Notes. The FASB plans to issue the final FSP by December 2007 and if issued as exposed would provide final guidance effective for the fiscal years beginning after December 15, 2007, would not permit early application, and would be applied retrospectively to all periods presented.

We cannot predict the exact accounting treatment that will be imposed (which may differ materially from the foregoing description) or when any change will be finally implemented. However, if the final FSP is issued as exposed, we expect to have higher interest expense starting in 2008 due to the interest expense accretion and, if the retrospective application provisions of the proposed FSP are retained in the final FSP, the prior period interest expense associated with the 6.00% Notes would be higher than previously reported interest expense due to retrospective application.

Conversion of the 5.75% Notes and 6.00% Notes may dilute the ownership interest of our existing stockholders.

The conversion of some or all of the 5.75% Notes and 6.00% Notes may dilute the ownership interests of our existing stockholders. Although the capped call transaction that we entered into in connection with the issuance of the 6.00% Notes is expected to reduce potential dilution upon conversion of the 6.00% Notes, the conversion of the 6.00% Notes could still have a dilutive effect on our earnings per share to the extent that the price of our common stock exceeds \$42.12, which is the cap price of the capped call. Any sales in the public market of our common stock issuable upon such conversion could adversely affect prevailing market prices of our common stock. In addition, the anticipated conversion of the 5.75% Notes or 6.00% Notes into cash and shares of our common stock could depress the price of our common stock.

The capped call transaction may affect the value of our common stock.

We entered into a capped call transaction in connection with the issuance of the 6.00% Notes. The capped call transaction is expected to reduce the potential dilution upon conversion of the 6.00% Notes in the event that the market value per share of our common stock, as measured under the terms of the capped call transaction, at the time of exercise is greater than the strike price of the capped call transaction, which corresponds to the initial conversion price of the 6.00% Notes and is subject to certain adjustments similar to those contained in the 6.00% Notes. If, however, the market value per share of our common stock exceeds the cap price of the capped call transaction, as measured under the terms of the capped call transaction, the dilution mitigation under the capped call transaction will be limited, which means that there would be dilution to the extent that the then market value per share of our

Table of Contents

common stock exceeds the cap price of the capped call transaction. In connection with hedging the capped call transaction, the counterparty or its affiliates: may enter into or unwind various derivatives and/or purchase or sell our common stock in secondary market transactions (and are likely to do so during any observation period related to the conversion of the 6.00% Notes). These activities could have the effect of decreasing the price of our common stock during any observation period related to a conversion of the 6.00% Notes. The counterparty or its affiliates are likely to modify their hedge positions in relation to the capped call transaction from time to time prior to conversion or maturity of the 6.00% Notes by purchasing and selling our common stock, other of our securities, or other instruments they may wish to use in connection with such hedging. In particular, such hedging modifications are likely to occur during any observation period related to a conversion of the 6.00% Notes, which may have a negative effect on the value of the consideration received upon conversion of those 6.00% Notes. In addition, we intend to exercise options we hold under the capped call transaction whenever the 6.00% Notes are converted. In order to unwind its hedge positions with respect to those exercised options, the counterparty or affiliates thereof expect to sell our common stock in secondary market transactions or unwind various derivative transactions with respect to our common stock during the observation period, if any, for the converted 6.00% Notes. If we elect to cash-settle the capped call transaction, which we are permitted to do, subject to certain conditions, it is likely the counterparty or its affiliates will sell an even greater number of shares. The effect, if any, of any of these transactions and activities on the market price of our common stock or the 6.00% Notes will depend in part on market conditions and cannot be ascertained at this time, but any of these activities could adversely affect the value of our common stock and the value of the 6.00% Notes.

If we lose Microsoft Corporation's support for our products, our ability to sell our products could be materially adversely affected.

Our ability to innovate beyond the x86 instruction set controlled by Intel depends partially on Microsoft designing and developing its operating systems to run on or support our microprocessor products. If Microsoft does not continue to design and develop its operating systems so that they work with our x86 instruction sets, independent software providers may forego designing their software applications to take advantage of our innovations and customers may not purchase PCs with our microprocessors. In addition, software drivers sold with our products are certified by Microsoft. If Microsoft did not certify a driver, or if we otherwise fail to retain the support of Microsoft, our ability to market our products would be materially adversely affected.

If we are unable to comply with the covenants in the subsidy grant documents that we receive from the State of Saxony, the Federal Republic of Germany and/or the European Union for Fab 30, Fab 36 or other research and development projects we may undertake in Germany, we may forfeit or have to repay our subsidies, which could materially adversely affect us.

We receive capital investment grants and allowances from the State of Saxony and the Federal Republic of Germany for Fab 36. We have also received capital investment grants and allowances as well as interest subsidies from these governmental entities for Fab 30. From time to time, we also apply for and obtain subsidies from the State of Saxony, the Federal Republic of Germany and the European Union for certain research and development projects. The subsidy grant documents typically contain covenants that must be complied with, and noncompliance with the conditions of the grants, allowances and subsidies could result in the forfeiture of all or a portion of any future amounts to be received, as well as the repayment of all or a portion of amounts received to date. If we are unable to comply with any of the covenants in the grant documents, we could be materially adversely affected.

If our products are not compatible with some or all industry-standard software and hardware, we could be materially adversely affected.

Our products may not be fully compatible with some or all industry-standard software and hardware. Further, we may be unsuccessful in correcting any such compatibility problems in a timely manner. If our customers are unable to achieve compatibility with software or hardware after our products are shipped in volume, we could be materially adversely affected. In addition, the mere announcement of an incompatibility problem relating to our products could have a material adverse effect on us.

Costs related to defective products could have a material adverse effect on us.

Products as complex as those we offer may contain defects or failures when first introduced or when new versions or enhancements to existing products are released. We cannot assure you that, despite our testing procedures, errors

Table of Contents

will not be found in new products or releases after commencement of commercial shipments in the future, which could result in loss of or delay in market acceptance of our products, material recall and replacement costs, delay in recognition or loss of revenues, writing down the inventory of defective products, the diversion of the attention of our engineering personnel from product development efforts, defending against litigation related to defective products or related property damage or personal injury, and damage to our reputation in the industry and could adversely affect our relationships with our customers. In addition, we may have difficulty identifying the end customers of the defective products in the field. As a result, we could incur substantial costs to implement modifications to correct defects. Any of these problems could materially adversely affect us.

In addition, because we sell directly to consumers, we could be subject to potential product liability claims if one of our products causes, or merely appears to have caused, an injury. Claims may be made by consumers or others selling our products, and we may be subject to claims against us even if an alleged injury is due to the actions of others. A product liability claim, recall or other claim with respect to uninsured liabilities or for amounts in excess of insured liabilities could have a material adverse effect on our business.

Our receipt of royalty revenues is dependent upon the success of third-party products.

Our graphics technology for the game console market is being used in the Nintendo GameCube, Nintendo Wii and Microsoft® Xbox 360 game consoles. The only revenues that we receive from these technology platforms are in the form of non-recurring engineering revenues, as well as royalties paid to us by Nintendo and Microsoft based upon the market success of their products. Accordingly, our royalty revenues will be directly related to the sales of these products. We anticipate royalties in future years resulting from our agreements with Nintendo and Microsoft. However, we have no control over the marketing efforts of Nintendo and Microsoft and we cannot assure you that sales of those products will achieve expected levels in the current or future fiscal years. Consequently, the revenues from royalties expected by us from these technology platforms may not be fully realized, and our operating results may be adversely affected.

Our entry into new consumer markets is subject to a number of uncertainties.

As a result of the ATI acquisition, we sell products for the consumer electronics market, including for digital TVs and color mobile phones. There are a significant number of competitors targeting this market. In addition, as the telecommunications, cable and consumer electronics industries and their suppliers undergo a period of convergence, we expect that competition will increase in these markets. Our ability to succeed in these new consumer markets is subject to a number of uncertainties, including acceptance of our graphics and multimedia processors, the development of new technologies sufficient to meet market demand, the need to develop customer relationships, different sales strategies and channels, new and different industry standards from those in the PC market and changing strategic alliances. We cannot assure you that we will be able to successfully compete in this new market. If we are unable to successfully introduce products and compete in this market, we could be materially adversely affected.

Our inability to continue to attract and retain qualified personnel may hinder our product development programs.

Our future success depends upon the continued service of numerous qualified engineering, manufacturing, marketing, sales and executive personnel. If we are not able to continue to attract, retain and motivate qualified personnel necessary for our business, the progress of our product development programs could be hindered, and we could be materially adversely affected.

We outsource to third parties certain supply-chain logistics functions, including physical distribution of our products, and co-source some information technology services.

We rely on a third-party provider to deliver our products to our customers and to distribute materials for some of our manufacturing facilities. In addition, we rely on a third party in India to provide certain information technology services to us, including helpdesk support, desktop application services, business and software support applications, server and storage administration, data center operations, database administration, and voice, video and remote access. Our relationships with these providers are governed by fixed term contracts. We cannot guarantee that these providers will fulfill their respective responsibilities in a timely manner in accordance with the contract terms, in which case our internal operations, the distribution of our products to our customers and the distribution of materials for some facilities could be materially adversely affected. Also, we cannot guarantee that our contracts with these

Table of Contents

third-party providers will be renewed, in which case we would have to transition these functions in-house or secure new providers, which could have a material adverse effect on us. In addition, we decided to outsource or co-source these functions to third parties primarily to lower our operating expenses and to create a more variable cost structure. However, if the costs related to administration, communication and coordination of these third-party providers are greater than we expect, then we will not realize our anticipated cost savings.

Uncertainties involving the ordering and shipment of, and payment for, our products could materially adversely affect us.

We typically sell our products pursuant to individual purchase orders. We generally do not have long-term supply arrangements with our customers or minimum purchase requirements. Generally, our customers may cancel orders more than 30 days prior to shipment without incurring a significant penalty. We base our inventory levels on customers' estimates of demand for their products, which may not accurately predict the quantity or type of our products that our consumers will want in the future or ultimately end up purchasing. For example, customers who are concerned about potential supply shortages may double order products by ordering more product from us than they ultimately need. Subsequently, these customers could cancel all or a portion of these orders when they realize they have sufficient supply. This behavior would increase our uncertainty regarding demand for our products and could materially adversely affect us. With respect to our graphics products, we do not have any commitment or requirements for minimum product purchases in our sales arrangements with Add-In-Board (AIB) customers, upon whom we rely to manufacture, market and sell our desktop GPUs. Such sales are subject to uncertainty as demand by our AIBs can be unpredictable and is susceptible to price competition. This difficulty may be compounded when we sell to OEMs indirectly through distributors, as our forecasts for demand are then based on estimates provided by multiple parties. Moreover, PC and consumer markets are characterized by short product lifecycles, which can lead to rapid obsolescence and price erosion. In addition, our customers may change their inventory practices on short notice for any reason. We may build inventories during periods of anticipated growth, and the cancellation or deferral of product orders, the return of previously sold products or overproduction due to failure of anticipated orders to materialize, could result in excess or obsolete inventory, which could result in write-downs of inventory and an adverse effect on profit margins. Factors that may result in excess or obsolete inventory, which could result in write-downs of the value of our inventory, a reduction in average selling prices, and/or a reduction in our gross margin include:

a sudden and significant decrease in demand for our products;

a higher incidence of inventory obsolescence because of rapidly changing technology and customer requirements;

a failure to estimate customer demand properly for our older products as our newer products are introduced; or

our competitors taking aggressive pricing actions.

Because market conditions are uncertain, these and other factors could materially adversely affect us.

Our reliance on third-party distributors subjects us to certain risks.

We market and sell our products directly and through third-party distributors pursuant to agreements that can generally be terminated for convenience by either party upon prior notice to the other party. These agreements are non-exclusive and permit our distributors to offer our competitors' products. Our third party distributors have been a significant factor in our ability to increase sales of our products in certain high growth international markets. We are dependent on our distributors to supplement our direct marketing and sales efforts. If any significant distributor or a substantial number of our distributors terminated their relationship with us or decided to market our competitors' products over our products, our ability to bring our products to market would be impacted and we would be materially adversely affected.

Additionally, distributors typically maintain an inventory of our products. In most instances, our agreements with distributors protect their inventory of our products against price reductions, as well as provide return rights for any product that we have removed from our price book and that is not more than twelve months older than the manufacturing code date. Some agreements with our distributors also contain standard stock rotation provisions permitting limited levels of product returns. We defer the gross margins on our sales to distributors, resulting from

Table of Contents

both our deferral of revenue and related product costs, until the applicable products are re-sold by the distributors. However, in the event of an unexpected significant decline in the price of our products, the price protection rights we offer to our distributors would materially adversely affect us because our revenue would decline.

Our operations in foreign countries are subject to political and economic risks, which could have a material adverse effect on us.

We maintain operations around the world, including in the United States, Canada, Europe and Asia. For example, all of our wafer fabrication capacity for microprocessors is located in Germany. Nearly all product assembly and final testing of our microprocessor products is performed at manufacturing facilities in China, Malaysia and Singapore. In addition, our graphics and chipset products and products for consumer electronics devices are manufactured, assembled and tested by independent third parties in the Asia-Pacific region and inventory related to those products is stored there. We also have international sales operations and as part of our business strategy, we are continuing to seek expansion of product sales in high growth markets. Our international sales as a percentage of our total consolidated revenue were 89 percent in the third quarter of 2007, 86 percent in the second quarter of 2007 and 71 percent in the third quarter of 2006, and China was one of our largest and fastest growing markets.

The political and economic risks associated with our operations in foreign countries include, without limitation:

expropriation;

changes in a specific country's or region's political or economic conditions;

changes in tax laws, trade protection measures and import or export licensing requirements;

difficulties in protecting our intellectual property;

difficulties in achieving headcount reductions;

changes in foreign currency exchange rates;

restrictions on transfers of funds and other assets of our subsidiaries between jurisdictions;

changes in freight and interest rates;

disruption in air transportation between the United States and our overseas facilities; and

loss or modification of exemptions for taxes and tariffs.

Any conflict or uncertainty in the countries in which we operate, including public health or safety, natural disasters or general economic factors, could have a material adverse effect on our business. Any of the above risks, should they occur, could result in an increase in the cost of components, production delays, general business interruptions, delays from difficulties in obtaining export licenses for certain technology, tariffs and other barriers and restrictions, potentially longer payment cycles, potentially increased taxes, restrictions on the repatriation of funds and the burdens of complying with a variety of foreign laws, any of which could ultimately have a material adverse effect on us.

Worldwide economic and political conditions may adversely affect demand for our products.

Worldwide economic conditions may adversely affect demand for our products. For example, China's economy has been growing at a fast pace over the past several years, and China was one of our largest and fastest growing markets. A decline in economic conditions in China could lead to declining worldwide economic conditions. If economic conditions decline, whether in China or worldwide, we could be materially adversely affected.

The occurrence and threat of terrorist attacks and the consequences of sustained military action in the Middle East have in the past, and may in the future, adversely affect demand for our products. Terrorist attacks may negatively affect our operations, directly or indirectly, and such attacks or related armed conflicts may directly impact our physical facilities or those of our suppliers or customers. Furthermore, these attacks may make travel and the transportation of our products more difficult and more expensive, which could materially adversely affect us.

The United States has been and may continue to be involved in armed conflicts that could have a further impact on our sales, and our supply chain. Political and economic instability in some regions of the world may also result and could negatively impact our business. The consequences of armed conflicts are unpredictable, and we may not be able to foresee events that could have a material adverse effect on us.

Table of Contents

More generally, any of these events could cause consumer confidence and spending to decrease or result in increased volatility in the United States economy and worldwide financial markets. Any of these occurrences could have a material adverse effect on us and also may result in volatility of the market price for our securities.

Unfavorable currency exchange rate fluctuations could adversely affect us.

We have costs, assets and liabilities that are denominated in foreign currencies, primarily the euro and as a result of our acquisition of ATI, the Canadian dollar. As a consequence, movements in exchange rates could cause our Canadian dollar and euro-denominated expenses to increase as a percentage of revenue, affecting our profitability and cash flows. Recently, the value of the U.S. dollar has fallen significantly, leading to increasingly unfavorable currency exchange rates on foreign denominated exposures. Whenever we believe appropriate, we hedge a portion of our foreign currency exposure to protect against fluctuations in currency exchange rates. We determine our total foreign currency exposure using projections of expenditures for items such as payroll, equipment and materials used in manufacturing. We cannot assure you that these activities will be effective in reducing foreign exchange rate exposure. Failure to do so could have an adverse effect on our business, financial condition, results of operations and cash flow.

In addition, the majority of our product sales are denominated in U.S. dollars. Fluctuations in the exchange rate between the U.S. dollar and the local currency can cause increases or decreases in the cost of our products in the local currency of such customers. An appreciation of the U.S. dollar relative to the local currency could reduce sales of our products.

Our inability to effectively control the sales of our products on the gray market could have a material adverse effect on us.

We market and sell our products directly to OEMs and through authorized third-party distributors. From time to time, our products are diverted from our authorized distribution channels and are sold on the gray market. Gray market products entering the market result in shadow inventory that is not visible to us, thus making it difficult to forecast demand accurately. Also, when gray market products enter the market, we and our distribution channel compete with heavily discounted gray market products, which adversely affect demand for our products. In addition, our inability to control gray market activities could result in customer satisfaction issues, because any time products are purchased outside our authorized distribution channel, there is a risk that our customers are buying counterfeit or substandard products, including products that may have been altered, mishandled or damaged, or used products represented as new. Our inability to control sales of our products on the gray market could have a material adverse effect on us.

If we cannot adequately protect our technology or other intellectual property in the United States and abroad, through patents, copyrights, trade secrets, trademarks and other measures, we may lose a competitive advantage and incur significant expenses.

We rely on a combination of protections provided by contracts, including confidentiality and nondisclosure agreements, copyrights, patents, trademarks and common law rights, such as trade secrets, to protect our intellectual property. However, we cannot assure you that we will be able to adequately protect our technology or other intellectual property from third party infringement or from misappropriation in the United States and abroad. Any patent licensed by us or issued to us could be challenged, invalidated or circumvented or rights granted thereunder may not provide a competitive advantage to us. Furthermore, patent applications that we file may not result in issuance of a patent or, if a patent is issued, the patent may not be issued in a form that is advantageous to us. Despite our efforts to protect our intellectual property rights, others may independently develop similar products, duplicate our products or design around our patents and other rights. In addition, it is difficult to monitor compliance with, and enforce, our intellectual property on a worldwide basis in a cost-effective manner. Foreign laws may provide less intellectual property protection than afforded in the United States. If we cannot adequately protect our technology or other intellectual property in the United States and abroad, we would be materially adversely affected.

Table of Contents

We are party to litigation, including intellectual property litigation, and may become a party to other claims or litigation that could cause us to incur substantial costs or pay substantial damages or prohibit us from selling our products.

From time to time we are a defendant or plaintiff in various legal actions. For example, our indirect wholly-owned subsidiary ATI is party to a consumer class action, among other litigation matters. Additionally, in November 2006 we received a subpoena for documents and information in connection with the U.S. Department of Justice's criminal investigation into potential antitrust violations related to graphics processing units and cards. We also sell products to consumers, which could increase our exposure to consumer actions such as product liability claims. Litigation can involve complex factual and legal questions and its outcome is uncertain. Any claim that is successfully asserted against us may cause us to pay substantial damages.

With respect to intellectual property litigation, from time to time, we have been notified, or third parties may bring actions against us, based on allegations that we are infringing the intellectual property rights of others. If any such claims are asserted against us, we may seek to obtain a license under the third party's intellectual property rights. We cannot assure you that we will be able to obtain all of the necessary licenses on satisfactory terms, if at all. In the event that we cannot obtain a license, these parties may file lawsuits against us seeking damages (potentially including treble damages) or an injunction against the sale of our products that incorporate allegedly infringed intellectual property or against the operation of our business as presently conducted, which could result in our having to stop the sale of some of our products or to increase the costs of selling some of our products or could damage our reputation. The award of damages, including material royalty payments, or the entry of an injunction against the manufacture and sale of some or all of our products, would have a material adverse effect on us. We could decide, in the alternative, to redesign our products or to resort to litigation to challenge such claims. Such challenges could be extremely expensive and time-consuming and could have a material adverse effect on us. We cannot assure you that litigation related to our intellectual property rights or the intellectual property rights of others can always be avoided or successfully concluded.

Even if we were to prevail, any litigation could be costly and time-consuming and would divert the attention of our management and key personnel from our business operations, which could have a material adverse effect on us.

We are subject to a variety of environmental laws that could result in liabilities.

Our operations and properties are subject to various United States and foreign environmental laws and regulations, including those relating to materials used in our products and manufacturing processes, discharge of pollutants into the environment, the treatment, transport, storage and disposal of solid and hazardous wastes, and remediation of contamination. These laws and regulations require us to obtain permits for our operations, including the discharge of air pollutants and wastewater. Although our management systems are designed to maintain compliance, we cannot assure you that we have been or will be at all times in complete compliance with such laws, regulations and permits. If we violate or fail to comply with any of them, a range of consequences could result, including fines, suspension of production, alteration of manufacturing processes, import/export restrictions, sales limitations, criminal and civil liabilities or other sanctions. We could also be held liable for any and all consequences arising out of exposure to hazardous materials used, stored, released, disposed of by us or located at or under our facilities or other environmental or natural resource damage.

Certain environmental laws, including the U.S. Comprehensive, Environmental Response, Compensation and Liability Act of 1980, or the Superfund Act, impose strict, joint and several liability on current and previous owners or operators of real property for the cost of removal or remediation of hazardous substances and impose liability for damages to natural resources. These laws often impose liability even if the owner or operator did not know of, or was not responsible for, the release of such hazardous substances. These environmental laws also assess liability on persons who arrange for hazardous substances to be sent to disposal or treatment facilities when such facilities are found to be contaminated. Such persons can be responsible for cleanup costs even if they never owned or operated the contaminated facility. We have been named as a responsible party on Superfund clean-up orders for three sites in Sunnyvale, California. Although we have not yet been, we could be named a potentially responsible party at other Superfund or contaminated sites in the future. In addition, contamination that has not yet been identified could exist at our other facilities.

Table of Contents

Environmental laws are complex, change frequently and have tended to become more stringent over time. For example, the European Union and China are two among a growing number of jurisdictions that have enacted restrictions on the use of lead, among other chemicals, in electronic products. These regulations affect semiconductor packaging, and we continue our work to ensure compliance across product lines. There is a risk that the cost, quality and manufacturing yields of lead-free products may be less favorable compared to lead-based products or that the transition to lead-free products may produce sudden changes in demand, which may result in excess inventory. Other regulatory requirements potentially affecting our manufacturing processes and the design and marketing of our products are in development throughout the world. We have management systems in place to identify and ensure compliance with such requirements and have budgeted for foreseeable associated expenditures. However, we cannot assure you that environmental legal requirements will not become more stringent or costly in the future. Therefore, we cannot assure you that our costs of complying with current and future environmental and health and safety laws, and our liabilities arising from past and future releases of, or exposure to, hazardous substances will not have a material adverse effect on us.

Our worldwide operations could be subject to natural disasters and other business disruptions, which could harm our future revenue and financial condition and increase our costs and expenses.

All of our wafer fabrication capacity for microprocessors is located in Germany. Nearly all product assembly and final testing of our microprocessor products is performed at manufacturing facilities in China, Malaysia and Singapore. The independent foundries we use to manufacture our graphics and chipset products and products for consumer electronics devices are located in Taiwan. A significant amount of our inventories for our graphics and consumer electronics businesses are stored in Taiwan prior to delivery to customers. Many of our assembly, testing and packaging suppliers for our graphics products are also located in southern Taiwan. On September 22, 1999, Taiwan suffered a major earthquake that measured 7.6 on the Richter scale and disrupted the operations of these manufacturing suppliers and contributed to a temporary shortage of graphics processors. Additional earthquakes, fires or other occurrences that disrupt our manufacturing suppliers may occur in the future. To the extent that the supply from our independent foundries or suppliers is interrupted for a prolonged period of time or terminated for any reason, we may not have sufficient time to replace our supply of products manufactured by those foundries.

Moreover, our corporate headquarters are located near major earthquake fault lines in California. In the event of a major earthquake, or other natural or manmade disaster, we could experience loss of life of our employees, destruction of facilities or business interruptions, any of which could materially adversely affect us.

Our business is subject to potential tax liabilities.

We are subject to income taxes in the United States, Canada and other foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. Although we believe our tax estimates are reasonable, we cannot assure you that the final determination of any tax audits and litigation will not be materially different from that which is reflected in historical income tax provisions and accruals. Should additional taxes be assessed as a result of an audit or litigation, there could be a material effect on our cash, income tax provision and net income in the period or periods for which that determination is made.

For example, the Canadian Revenue Agency, or CRA, is in the process of auditing ATI for the years 1999 -2004 with respect to transactions between ATI and its subsidiaries. We could be subject to significant tax liability as well as a loss of certain tax credits and other tax attributes as a result of the CRA audit.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

AMD held a special meeting of the stockholders on July 16, 2007. The following is the result of the voting on the proposal submitted to stockholders at the special meeting.

Proposal No. 1: The proposal to approve an amendment to the Company's Employee Stock Purchase Plan to increase the total number of shares to be issued under the plan from 17,500,000 shares to 25,500,000 shares was approved.

For: 290,376,224

Against: 10,312,238

Abstain: 3,232,724
