On April 17, 2007, CADE (Economic Defense Council) issued an Injunction to maintain conditions that would allow to revert of the asset acquisition by Braskem and Petrobras, as described in the Significant Event Notice published on April 18, 2007. The provisions related to Petrochemical Assets were reviewed on April 25, 2007 in the decision approved by CADE, with signature by Braskem of agreement for protection of reversibility of operation (APRO).

With said changes, CADE acknowledges the maintenance of the minority interest of Petrobras in COPESUL after the acquisition. In relation to fuel distribution, CADE granted 10 days so that Petrobras and Ultrapar present an alternative corporate governance model that preserves competition within the industry.

**25 SUMMARY AND RECONCILIATION OF THE DIFFERENCES BETWEEN ACCOUNTING PRACTICES ADOPTED IN BRAZIL AND GENERALLY ACCEPTED ACCOUNTING PRINCIPLES IN THE UNITED STATES OF AMERICA**

**I - Narrative description of GAAP differences**

The consolidated financial statements of the Company are prepared in accordance with Brazilian GAAP. Accounting policies, which differ significantly from U.S. GAAP, are summarized below.

**(a) Inflation accounting**

Under Brazilian GAAP, the Company accounts for the effects of inflation in its financial statements prepared in accordance with Brazilian GAAP through December 31, 1995. Through December 31, 1995, the Company used for this remeasurement the Fiscal Reference Unit (UFIR), the index established by the tax authorities for preparation of financial statements under Brazilian corporate law as well as the index selected by the CVM.

The reconciliation presents the effect of adjusting property, plant and equipment for U.S. GAAP purposes through December 31, 1997. Under U.S. GAAP, management of the Company considers that Brazil was considered to be a highly inflationary economy until December 31, 1997 and, as such, property, plant and equipment should be adjusted for inflation through such date.

In determining amounts under U.S. GAAP, the effects of inflation for the years ended December 31, 1996 and 1997 were determined using the Índice Geral de Preços Disponibilidade Interna IGP-DI index, which is a widely-accepted and respected index published monthly by the Fundação Getúlio Vargas.

## **Table of Contents**

Because the Company's management believes that the IGP-DI is an appropriate and consistent measure of the general price inflation in Brazil and because of its availability, for U.S. GAAP purposes the Company adopted the IGP-DI for restatement of its financial statements also for periods through December 31, 1995, replacing the Government mandated index. As a result, property, plant and equipment have been monetarily adjusted for inflation using the IGP-DI since its acquisition through December 31, 1997.

### **(b) Capitalization of interest in relation to construction in progress**

Under Brazilian GAAP, prior to 1996 the Company was not required to capitalize the interest cost of borrowed funds as part of the cost of the related asset. Under U.S. GAAP, capitalization of borrowed funds during construction of major facilities is recognized as part of the cost of the related assets.

Under U.S. GAAP, interest on construction-period financing denominated in foreign currencies is capitalized using contractual interest rates excluding foreign exchange gains or losses.

### **(c) Pension and other post-employment benefits**

#### **(c.1) Pension benefits**

Pension benefit obligations for Brazilian GAAP should be accounted for following CVM Instruction No. 371/00, which requires the mandatory application of Brazilian Accounting Standard IBRACON NPC 26. Under IBRACON NPC 26 the Company has accounted for the plan administered by FFMB (and to which several Petróleo Ipiranga companies contribute) by recognizing a percentage attributed to the Company of the funded status and of the cost of the plan.

Under U.S. GAAP, considering that the financial information of the Company does not consolidate all the sponsors of the FFMB Benefit Plan and such financial information does not represent the financial statements of the parent company of the Petróleo Ipiranga companies, the Company has accounted for its participation in the pension plan administered by FFMB as if it were a multi-employer plan.

As a result, the reconciliation presents: (a) the reversal of the pension plan asset/liability recognized for Brazilian GAAP as of each reporting date and the reversal of the related pension cost, and (b) the recognition as expense of the contribution due to the plan over the corresponding period.

#### **(c.2) Other post-retirement benefits**

As explained in Note 18, the accompanying financial statements account for other post-retirement benefits following IBRACON NPC 26. Other post-retirement benefits are unfunded and are the sole responsibility of each Petróleo Ipiranga company. Under IBRACON NPC 26 actuarial gains and losses are deferred and recognized in income over the estimated remaining service period of the employees to the extent that those actuarial gains and losses exceed 10% of the higher of the plan assets and the projected benefit obligation.

Under U.S. GAAP such benefits are accounted for following SFAS No. 106, *Employers' Accounting for Post-retirement Benefits Other Than Pensions*, and, as from December 31, 2006, following SFAS 158 *Employers' Accounting for Defined Benefit Pension and Other Post-retirement Plans* an amendment of FASB Statements No. 87, 88, 106 and 132(R). Under SFAS No.158, the funded status of the other post-retirement benefits must be recognized as a liability with an offsetting amount in accumulated other comprehensive income. As required by SFAS No. 158, provisions of SFAS No.158 were applied on a prospective basis as from December 31, 2006.

---

## **Table of Contents**

Although projected benefit obligations are the same under Brazilian GAAP and U.S. GAAP, differences arise in the amounts recorded in the financial statements as a result of: (i) that the date of initial measurement of funded status is different for Brazilian GAAP and U.S. GAAP and that under Brazilian GAAP there is no requirement to recognize an additional minimum liability, and (ii) the recognition as from December 31, 2006 as a liability for U.S. GAAP purposes of the funded status against accumulated other comprehensive income.

### **(d) Tax incentives**

Under Brazilian GAAP, tax incentives are accounted for directly as an increase in a capital reserve account in shareholders' equity. The Company records the taxes as expense in the consolidated statement of income for the amounts that would be due absent the benefit, and recognizes a reduction in the tax payable against the capital reserve.

For U.S. GAAP reconciliation purposes the amount of those incentives is recognized as reduction of the tax expense directly in the statement of income.

### **(e) Accounting for derivative financial instruments**

As mentioned in Note 21, the Company has entered into swap transactions. Under Brazilian GAAP swaps are valued at their accrued amount determined as the difference between the amount receivable and the amount payable under the swap. The amounts receivable and payable are computed as their respective notional amount plus accrued charges based on their contractual terms.

Under U.S. GAAP, SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, establishes accounting and reporting standards requiring that all derivative instruments be recorded in the balance sheet as either an asset or a liability measured at its fair value. Changes in the derivative's fair value are recognized in earnings unless specific hedge accounting criteria are met. The Company has not accounted for any derivative instrument following hedge accounting.

The reconciliation presents the differences resulting from valuing the swaps at its fair value under U.S. GAAP as opposed to valuing them at the accrued amount used under Brazilian GAAP. As of December 31, 2006 no significant difference was identified between the accrued amount and the fair value.

### **(f) Fair value of guarantees under FIN 45**

Under Brazilian GAAP, the Company is not required to record any liability related to guarantees given to third parties unless contingent obligations to make future payments under the guarantees are considered probable.

The Company has not recorded any liability related to these guarantees under Brazilian GAAP as of any of the dates presented.

Under U.S. GAAP, the Company recognizes, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing guarantees in accordance with FIN 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. In the event that, at inception of the guarantee, the Company is required to recognize a liability under SFAS No. 5, *Accounting for Contingencies*, the liability initially recognized would be the greater of: (a) the amount of fair value of the value of the obligation undertaken in issuing guarantee, or (b) the contingent liability amount required to be recognized at inception of the guarantee by applying SFAS No. 5.

Guarantees granted include those disclosed in Note 20 as well as guarantees provided to financial institutions that finance sales to selected customers under the vendor program. Under the vendor program the Company is the secondary obligor to the financial institutions.

## **Table of Contents**

The reconciliation presents the effect of recognizing a liability for the fair value of these guarantees and the related effect in the statement of income.

### **(g) Accounting for asset retirement obligation**

Under Brazilian GAAP, the Company's practice is to expense amounts relating to retirement of certain assets as incurred.

Under U.S. GAAP, the Company adopts SFAS No. 143, Accounting for Asset Retirement Obligations. Asset retirement obligations correspond to the legally required obligation to remove fuel tanks upon retirement. Under SFAS No. 143, the fair value of asset retirement obligations are recorded as liabilities on a discounted basis when they are incurred, which is typically at the time the related assets are installed. Amounts recorded for the related assets will be increased by the amount of these obligations and depreciated over the related useful lives of such assets. Over time, the amounts recognized as liabilities will be accreted for the change in their present value until the related assets are retired or sold.

### **(h) Gain on change in equity interest in Maxfácil**

In December 2006, the business recognized a capital gain, in the amount of R\$ 85,494, regarding to the gain on change in equity interest in Maxfácil as described in Note 2.

The gain has been determined as a result of Maxfácil having issued new shares to UNIBANCO at a price higher than the carrying amount per share of the investment recorded by the Company in Maxfácil.

Under U.S. GAAP, considering that Maxfácil is a newly formed entity, the Company believes it does not meet the criteria for gain recognition established in SAB Topic 5-H.

The reconciliation presents the effect of reverting for U.S. GAAP the capital gain recognized under Brazilian GAAP.

### **(i) Provision for dividends and interest on capital**

Under Brazilian GAAP, at each balance sheet date the Board of Directors is required to propose a dividend distribution which, if not yet paid during the year, is accrued as a liability in the financial statements.

Under U.S. GAAP, since proposed dividends in excess of the mandatory minimum dividend required to be paid by the bylaws may be ratified or modified at the annual Shareholders' Meeting, such proposed dividends in excess of the mandatory minimum dividends are not considered declared at the balance sheet date and therefore are not accrued. However, dividends accrued or interest on own capital already paid is considered declared for U.S. GAAP purposes. Dividends declared as of December 31, 2004 exceeded mandatory minimum dividends and for that reason the provision for dividends recorded under Brazilian GAAP in excess of mandatory minimum dividends is being reverted in the reconciliation to U.S. GAAP.

At December 31, 2006 and 2005 all dividends declared for the year were paid before year-end.

### **(j) U.S. GAAP adjustments on net equity and net income of affiliates**

The investments in Termogaúcha Usina Termelétrica S.A., IQ, TSB and IQAG are accounted for under the equity method under Brazilian GAAP.

Such investment would also be accounted for following the equity method under U.S. GAAP.

## **Table of Contents**

Differences between net equity and net income of the affiliates correspond mainly to: accounting for deferred charges, accounting for business combination and goodwill, accounting for pension benefits, revaluation of property, plant and equipment, capitalization of interest on property, plant and equipment, recognition of tax incentives, accounting for derivative financial instruments, accounting for dividends and interest on capital, and accounting for the provision for programmed maintenance.

The net effects of those adjustments are presented in the reconciliation to U.S. GAAP.

### **(k) Accounting for convertible debentures issued by Ipiranga Química S.A. and warrants purchased by the Company**

#### **k.1) Accounting for convertible debentures issued by IQ**

Under Brazilian GAAP, convertible debentures issued by IQ described in Note 7 are accounted for as a single instrument at its cost plus accrued interest following the contractual terms.

Under U.S. GAAP the Company has concluded that the non-detachable conversion option included in the convertible debentures issued by IPQ does not meet the definition of a derivative under SFAS 133 Accounting for Derivative Instruments and Hedging Activities, as amended and interpreted . The Company accounted for the convertible debentures in accordance with FAS 115 Accounting for Certain Investments in Debt and Equity Securities and classified the instrument as a trading security. At the date of issuance, the total amount of the proceeds equals the fair value of the instrument so there is no GAAP difference at initial recording.

However, the convertible debenture was marked to market at every reporting period with charges to the statements of income for US GAAP purposes, creating a difference in valuation of the convertible instrument held by DPPI under US GAAP of R\$ 29 million and of the convertible instrument held by the subsidiary, CBPI, in the amount of R\$21 million at the date of the modification of the terms.

#### **k.2) Accounting for the modification of terms of the debentures, issuance of warrants and sale of warrants by the Company**

In October 2005, a modification was introduced in the terms of the debentures such that they were modified from convertible to non-convertible; no other term of the debentures has been modified. At the same moment, IQ issued to the holders of the debentures, detachable warrants which allow the holders of the warrants to acquire shares of IQ in the exact same terms as the previously existing non-detachable conversion option included in the debentures.

Under Brazilian GAAP, warrants are not separately recorded. The modification of the terms of the debentures and the issuance of warrants in October 2005 did not have any impact in the accounting for the debentures (which were originally convertible and in October 2005 were modified to non-convertible) under Brazilian GAAP which continued to be accounted for at its cost plus accrued interest and warrants issued by IQ are not accounted for.

For U.S. GAAP purposes, the Company has also classified the new debt instrument received as a trading security under FAS 115. In addition, the Company has concluded that the fair value of the warrant and non-convertible debenture received approximates the fair value of the convertible debenture prior to modification. Therefore, upon modification the Company recorded the warrant and debt at their fair values with no gain or loss recognized.

Contemporaneously with the modification of the terms of the debenture and the issuance of warrants, the Company sold the warrants received to RPI for R\$ 29 million. This amount approximates the fair value of the

## **Table of Contents**

warrants at the date of modification of the convertible debentures and issuance of warrants, so no gain or loss was recorded by the Company upon sale under U.S. GAAP. Under Brazilian GAAP no value was recognized for the warrant received and therefore, a gain for the sales price of R\$ 29 million was recognized.

After the modification, the Company continued to mark to market the non-convertible debt instruments with charges to the statements of income. The warrant held by its subsidiary, CBPI, does not meet the definition of a derivative under SFAS 133, so it is accounted for under the cost method.

The U.S. GAAP reconciliation reflects the difference in the mark to market of the convertible debt instrument through the date of modification, and of the non-convertible debt instrument after the modification, compared to the amortized cost value recorded for Brazilian GAAP purposes.

### **(l) Accounting for refunds**

The Company and its subsidiary CBPI offer to certain of its customers refunds in cash if they meet a specified cumulative volume of sales over a specified period. Under Brazilian GAAP, the refund is recognized as an expense when the cumulative volume of sales has been met. Such refunds are offered to a reduced group of customers and have begun to be offered recently.

Under U.S. GAAP, EITF 01-9, Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products), a Company should recognize a liability based on a systematic and rational allocation of the cost of honoring the commitment in each of the underlying transactions that result in progress toward earning the refund. Considering the reduced customers to which the refund is offered and the reduced historical experience, the Company believes that it cannot reasonably estimate the ultimate amount that will be earned by customers. As a result, under U.S. GAAP a liability is recognized for the maximum potential amount of the refund.

### **(m) Goodwill and business combinations**

Under Brazilian GAAP assets and liabilities of entities acquired are reflected at book value. Goodwill is determined as the excess of purchase price paid over the book value of net assets acquired. Goodwill is amortized on a straight-line basis over the periods estimated to be benefited limited to 10 years.

In July 1998, the subsidiary CBPI made a capital contribution to IQ. Under Brazilian GAAP, such transaction generated a goodwill at the date of the transaction in the amount of R\$ 49,393 and resulted in obtaining an interest in IQ of 41.47%.

Goodwill under Brazilian GAAP was totally amortized as of December 31, 2006 and 2005.

Under U.S. GAAP, business combinations are accounted for following the purchase method. Under the purchase method assets and liabilities of the business acquired are recorded, to the extent of the percentage acquired, using fair values. Goodwill is determined as the difference between purchase price consideration and the fair value of assets acquired and liabilities assumed. If there is an excess of the fair value of net assets acquired over the purchase price such amount is used to reduce the carrying value of long-term assets. As from January 1, 2002 goodwill is not amortized but is tested, at least annually, for impairment.

The reconciliation of net equity between Brazilian GAAP and U.S. GAAP presents: (i) the reversal of the balance of goodwill recorded under Brazilian GAAP at each balance sheet date, (ii) the recognition for U.S. GAAP purposes of the difference resulting from adjusting assets and liabilities of the entity acquired at fair value, most significantly property, plant and equipment and investment in equity investees, (iii) the recognition of resulting goodwill under U.S. GAAP, and (iv) the related deferred taxes.

**Table of Contents**

The reconciliation of net income between Brazilian GAAP and U.S. GAAP presents: (i) the reversal of goodwill amortization recorded under Brazilian GAAP, (ii) the recognition in income of adjustments of assets and liability at fair value, mostly depreciation of property, plant and equipment and equity in investees, and (iii) the related deferred tax effects.

**II - Reconciliation of the differences between U.S. GAAP and Brazilian GAAP in net income**

|                                                                                           | Note 25.I. | 2006     | 2005     |

| Total comprehensive income | 112,557 | 98,829 |
|----------------------------|---------|--------|

F-207

**Table of Contents****V - Additional disclosures****(a) Earnings per share**

Under Brazilian GAAP, net income per share is calculated by dividing net income by the number of shares outstanding at the balance sheet date. In these consolidated financial statements, information is disclosed per lot of one thousand shares, because this is the minimum number of shares that can be traded on the Brazilian stock exchanges.

Under U.S. GAAP earnings per share are retroactively restated to reflect in all periods presented the effect of stock dividends. As disclosed in Note 19 in April 2006 the Company approved a stock dividend and earnings per share have been retroactively restated to reflect the effect of such stock dividend.

Since the preferred and common shareholders have different dividend rights (see Note 19), basic earnings per share have been calculated using the two-class method for U.S. GAAP purposes. The following table provides a reconciliation of the numerators and denominators used in computing earnings per share as required by SFAS No. 128:

|                                                                                                      | For the year ended December 31, 2006 |               |                |
|------------------------------------------------------------------------------------------------------|--------------------------------------|---------------|----------------|
|                                                                                                      | Common                               | Preferred     | Total          |
| Undistributed net income                                                                             | 14,853                               | 32,496        | 47,349         |

**Table of Contents****(b) Statement of cash flows**

Brazilian GAAP does not require the presentation of a statement of cash flows as required by U.S. GAAP. Changes in working capital are presented in the statement of changes in financial position. U.S. GAAP requires the presentation of a statement of cash flows describing the Company's cash flows from operating, financing and investing activities. Statements of cash flows derived from the information based on Brazilian GAAP are as follows:

**CONSOLIDATED STATEMENTS OF CASH FLOWS****FOR THE YEARS ENDED DECEMBER 31, 2006, 2005 AND 2004****(In thousands of Brazilian reais R\$, unless otherwise stated)**

|                                                                                  | 2006           | 2005           | 2004           |

**Report of Independent Auditors**

To the Board of Directors

and Shareholders of

Companhia Brasileira de Petróleo Ipiranga

We have audited the accompanying consolidated balance sheets of Companhia Brasileira de Petróleo Ipiranga and its subsidiaries as of December 31, 2006 and 2005, and the related consolidated statements of income, of changes in financial position and of changes in shareholders equity for the years ended December 31, 2006, 2005 and 2004. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Companhia Brasileira de Petróleo Ipiranga and its subsidiaries at December 31, 2006 and 2005, and the results of their operations and their changes in financial position for the years ended December 31, 2006, 2005 and 2004 in conformity with accounting practices adopted in Brazil.

Our audits were performed for the purpose of issuing an opinion on the financial statements referred to in the first paragraph, prepared in conformity with accounting practices adopted in Brazil. The consolidated statement of cash flows, which provides supplemental information about the Company and its subsidiaries, is not a required component of the financial statements. We also applied the audit procedures described above to the statement of cash flows for the years ended December 31, 2006, 2005 and 2004 and, in our opinion, it is fairly stated in all material respects in relation to the financial statements taken as a whole.

Accounting practices adopted in Brazil vary in certain significant respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in Note 25 to the consolidated financial statements.

PricewaterhouseCoopers Auditores Independentes

Rio de Janeiro, Brazil

September 28, 2007, except with respect to Note 25 as to which the date is November 9, 2007

**COMPANHIA BRASILEIRA DE PETRÓLEO IPIRANGA AND SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEARS ENDED**

**DECEMBER 31, 2006, 2005 AND 2004**

**(Amounts in thousands of Brazilian reais - R\$, unless otherwise stated)**

**1 Operations**

Companhia Brasileira de Petróleo Ipiranga (the Company) and subsidiaries is a public company whose shares are traded on the São Paulo Stock Exchange (BOVESPA) and is controlled by members of the Bastos, Mello, Ormazabal, Tellechea and Gouvêa Vieira families.

The Company and its subsidiaries and affiliated companies are primarily engaged in the distribution of oil derivatives and related products, transportation, convenience stores and petrochemical industry and also hold non-controlling interests in companies engaged in the chemical and petrochemical business.

**2 Presentation of consolidated financial statements**

These financial statements were prepared in accordance with accounting practices adopted in Brazil (Brazilian GAAP), based on the corporate law and on the standards established by the Brazilian Securities Commission (CVM).

In order to improve the information provided to the market, the Company is including the statements of cash flows (parent company and consolidated) as an additional information in accordance with the determinations of the NPC 20 of IBRACON - Brazilian Institute of Independent Auditors.

The financial statements presented herein are different from the ones prepared by the Company for statutory purposes because they do not include the holding company's stand-alone financial statements, have been adjusted with respect to the financial statements for statutory purposes to include in Note 25 a reconciliation of net equity and net income between the amounts under Brazilian GAAP Brazil and accounting principles generally accepted in the United States of America (U.S. GAAP) and have also been adjusted to present certain additional disclosures to facilitate its understanding by readers not familiar with accounting practices adopted in Brazil.

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosures of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Significant estimates include, but are not limited to, estimates relating to the useful lives of property, plant and equipment, accounting for contingencies and provisions for income taxes, among others. Actual results could differ in relation to these estimates.

**3 Summary of significant accounting practices**

The accounting practices adopted in Brazil (Brazilian GAAP) to record transactions and prepare the consolidated financial statements comply with those prescribed by Brazilian corporate law and specific standards established by the Brazilian Securities Commission (CVM), which differ in certain respects from U.S. GAAP. See Note 25 for further discussions of these differences and a reconciliation of shareholders' equity and consolidated net income between Brazilian GAAP and U.S. GAAP.

The following is a summary of significant accounting policies followed in the preparation of the accompanying consolidated financial statements:

**(a) Cash and cash equivalents**

Cash and cash equivalents comprise highly-liquid temporary cash investments (with maturities of 3 months or less when acquired and readily convertible to cash).

## **Table of Contents**

Financial investments are stated at cost plus contracted remuneration, proportionally recognized up to the date of the financial statement date. Carrying amounts approximates fair value as of all dates presented.

### **(b) Allowance for doubtful accounts**

The Company has individual customer credit information, which is used to assess customer ability to pay. The allowance is recorded in an amount considered sufficient by management to cover probable losses on realization of accounts receivable.

### **(c) Inventories**

Stated at the lower of average acquisition or production cost or net realizable value.

### **(d) Investments in affiliates and goodwill**

Accounted following the equity method with a corresponding entry to operating income.

Goodwill on the acquisition of subsidiaries is amortized over 10 years, the estimated period of realization.

### **(e) Property, plant and equipment**

Stated at acquisition or construction cost, monetarily adjusted through December 31, 1995. Depreciation is calculated following the straight-line method based on the estimated economic useful lives of the assets. Leasehold improvements are depreciated over the term of the agreement or the economic useful lives of the assets, whichever is shorter.

### **(f) Loans and financing**

Stated at the amount of principal, plus financial charges incurred on a pro rata basis through the balance sheet date. Foreign currency-denominated loans were converted into Brazilian reais at the exchange rates prevailing at the balance sheet date.

### **(g) Income and social contribution taxes**

Tax expense is calculated based on the income tax rate of 15% plus a 10% surtax and social contribution tax rate of 9%.

### **(h) Deferred income and social contribution taxes**

Calculated on temporary differences and on tax loss carryforwards using the income tax and social contribution tax rates effective for the period in which the tax effects are expected to be realized.

Deferred income and social contribution tax assets are only recognized up to the amount that is likely to be realized within the next 10 years as established by CVM Instruction No. 371/02.

### **(i) Provision for contingencies**

Recorded for contingent risks whose likelihood of loss is probable, based on the opinion of management and inside and outside legal counsel. The provision is recorded based on the estimated losses upon the final resolution of lawsuits.

## **Table of Contents**

### **(j) Interest on capital**

Interest on capital can be paid by Brazilian companies in lieu of, or in addition to, mandatory dividend stipulated by the respective company's bylaws. Interest on capital is calculated within the limits established by Law No. 9,249/95 for a maximum amount computed as the TJLP (long term interest rate) applied on the respective shareholders' equity.

Interest on capital received from affiliates is recorded as a receivable. Interest on capital payable, since it represents in essence dividends, is recorded as a reduction in Retained earnings.

### **(k) Pension and other post-employment benefits**

Pension and other post-employment benefits liabilities to employees, retirees and pensioners (net of the assets of the plans) are recorded based on the actuarial calculation prepared by an independent actuary, using the Projected Unit Credit Method.

### **(l) Other assets and liabilities**

Other assets and liabilities, classified as current and long term, are stated at realizable or estimated settlement amounts. These assets and liabilities are stated at cost or realizable value and known or estimated amounts, respectively, including, when applicable, interest and monetary and exchange variations.

### **(m) Results of operations**

Revenue from sale of products is recognized when significant risks and benefits related to the product ownership pass to customer. Other income, expenses and costs are recognized when incurred and/or realized. The result includes interest and monetary and exchange variations, at contractual indexes or official rates, applicable to current and long-term assets and liabilities and, when applicable, the effects of adjustments of assets to its net realizable value.

Sales incentives are generally recognized as expenses and include, but are not limited to, discounts and rebates. Volume-based incentives payable in cash include amounts paid in advance with the commitment of the customer to reach specified minimum volumes over a certain period of time and incentives payable only after the minimum volumes have been met in a defined period of time. Volume-based incentives paid in advance are recognized as asset and subsequently recorded as cost of revenues in the statement of revenues and direct expenses over the period of the commitment of minimum sales. Volume-based incentives payable only after meeting the minimum volume are recognized as expense at the moment when the target volume has been achieved.

**4 Consolidation criteria**

The consolidated financial statements have been prepared in accordance with the consolidation principles established by Brazilian GAAP and include the accounts of the Company and the following subsidiaries:

| Consolidated subsidiaries                          | Location               | Shareholding<br>% |
|----------------------------------------------------|------------------------|-------------------|
| am/pm Comestíveis Ltda.                            | Brazil                 | 99.99999          |
| Empresa Carioca de Produtos Químicos S.A.          | Brazil                 | 99.99800          |
| Ipiranga Asfaltos S.A.                             | Brazil                 | 99.99175          |
| Ipiranga Comercial Importadora e Exportadora Ltda. | Brazil                 | 99.00000          |
| Ipiranga Trading Ltda.                             | British Virgin Islands | 100.00000         |
| Tropical Transportes Ipiranga Ltda.                | Brazil                 | 99.99685          |
| Ipiranga Imobiliária Ltda.                         | Brazil                 | 99.99998          |
| Ipiranga Logística Ltda.                           | Brazil                 | 99.00000          |
| Maxfácil Participações S.A. (*)                    | Brazil                 | 34.00000          |

(\*) Shared control with Distribuidora de Petróleo Ipiranga S.A. ( DPPI ) which holds a 16.0% interest and with União de Bancos Brasileiros S.A. UNIBANCO which holds 50.0%. Change in Ipiranga Participações Societárias S.A. s corporate name. Maxfácil was incorporated by the Company and DPPI. Subsequently, UNIBANCO contributed in cash the amount of R\$ 171 million for a 50.0% interest resulting in the recognition by the Company of a gain in change of interest of R\$ 58,136. Maxfácil is a joint-venture which business purpose is to offer financial services to the customers and distributors of Ipiranga products for a period of 10 years.

The following practices were adopted in the preparation of the consolidated financial statements:

(a) Intercompany balances and transactions and unrealized profits have been eliminated; and

(b) Minority interest in fully-consolidated subsidiaries is presented in a separated caption.

**5 Cash and cash equivalents**

|                                    | 2006    | 2005   |
|------------------------------------|---------|--------|
| Cash and banks                     | 9,639   | 13,749 |
| Certificates of Deposit (CDBs)     | 69,924  | 1,873  |
| Debt securities                    | 7,491   | 5,001  |
| Sale and repurchase agreements (*) | 60,677  |        |
|                                    | 147,731 | 20,623 |
| (-) Current                        | 89,902  | 20,623 |
| Long term                          | 57,829  |        |

(\*) Sale and repurchase agreements of debentures carrying interest at 100% of the CDI.

**6 Trade accounts receivable**

|                             | 2006      | 2005      |
|-----------------------------|-----------|-----------|
| Domestic market:            |           |           |
| Trade notes receivable      | 964,352   | 895,941   |
| Customer financing          | 292,905   | 273,405   |
|                             | 1,257,257 | 1,169,346 |
| Foreign market- Receivables | 3,542     | 3,370     |
|                             | 1,260,799 | 1,172,716 |
| (-) Current                 | 1,101,168 | 1,033,354 |
| Long term                   | 159,631   | 139,362   |

Long-term portion is mainly represented by customer financing. Under customer financing, cash loans are provided to gas stations using the Ipiranga brand. Such loans are generally used by the gas stations to finance renovation and modernization of fuel stations, as well as for working capital including acquisition of products and investing in marketing. Customer financing are generally for periods up to 10 years and carry interest of 1% per month.

**7 Related-party transactions**

Intercompany transactions are conducted under price and period conditions similar to those adopted for transactions with unrelated parties and are as follows:

F-223

*(a) Debentures issued by Ipiranga Química in 2003*

The Extraordinary Shareholders Meeting of Ipiranga Química S.A. held on May 26, 2003 approved the issuance of two series of private convertible debentures, consisting of 11,000 Series A debentures, with face value of R\$ 10 each, amounting to R\$ 110,000, and 80,000 Series B debentures, with face value of R\$ 1 each, amounting to R\$ 80,000. Both series of debentures mature on June 1, 2008.

On June 12, 2003, DPPI fully subscribed the Series A and the Company fully subscribed the Series B.

The subscribed debentures pay interest based on the CDI interest rate, plus spread subject to renegotiation every 6 months (for Series A) and every 5 months (for Series B) as established by the indenture dated June 1, 2003.

The spread for Series A debentures, for the most part of 2005, was 1.5% per year, and changed to 1.0% per year on December 1, 2005, remaining the same for 2006. The spread for Series B debentures was 1.0% per year in 2005 remaining the same for 2006.

Debentures are convertible into common shares of Ipiranga Química S.A. at any time after its issuance and until its maturity or redemption at the option of the holder.

The conversion price is a fixed amount established in the Indenture of the debentures. However, the quantity of common shares to be received upon conversion will be higher than the amount determined as face value of the debentures divided by the conversion price if they are converted before June 1, 2007. The quantity of additional shares to be received will be 25% if converted up to June 1, 2004, 18.2177% if converted before June 1, 2005, 11.8034% if converted before June 1, 2006 and 5.7371% if converted before June 1, 2007.

*(b) Early partial redemption of the debentures in 2006*

The shareholders meetings of Ipiranga Petroquímica S.A. ( IPQ , a subsidiary of IQ) held on April 28, 2006 approved the payment of supplementary dividends and a capital reduction, scheduled for June 13, 2006 and July 31, 2006, respectively. Considering that IQ, due to its interest in IPQ, received funds on said dates, the Board of Directors of IQ, at a meeting held on May 2, 2006, resolved that IQ would partially early redeem its debentures, which were issued on June 1, 2003 due to the financial cost of this debt.

As a result, in 2006, IQ partially amortized 71.6% of the Series B debentures, subscribed by CBPI, in the amount of R\$ 101,062 thousand (there was no amortization in 2005).

*(c) Modification of terms of the debentures and sale of warrants by the Company*

Pursuant to a Memorandum of Understanding signed on October 3, 2005, the Company, DPPI and Refinaria de Petróleo Ipiranga S.A. (the controlling shareholder of IQ) agreed to hold an Extraordinary Shareholders Meeting of IQ to approve a change in the type of debentures, issued by IQ on June 1, 2003.

The changes approved on the meeting held on October 6, 2005 were: (i) to change the debentures from convertible to nonconvertible without making any other change in the terms or conditions of the debentures, and (ii) the issuance of warrants to the holders of the debentures, without any charge, replacing the conversion right established for the debentures; the terms of the warrants allow their holder to purchase common shares of IQ in exactly the same terms than the conversion features originally included in the debentures.

Subsequently, on December 1, 2005, a Sale Agreement was signed whereby DPPI sold for R\$ 29 million to Refinaria de Petróleo Ipiranga S.A. the warrants it has obtained. The amount for the sale of the warrants is payable on October 3, 2007, and carries interest at the CDI interest rate.

## (i) Impairment on investment in Termogaúcha and liquidation

At the Extraordinary Shareholders' Meeting held on September 12, 2006, the shareholders of Termogaúcha approved its liquidation, considering the conditions of natural gas supply and higher costs of maintenance, preservation and storage of the already acquired generating equipment. The Company recorded a provision for impairment in the equity investee of R\$ 64,541. On the same date, the Annual and Extraordinary Shareholders' Meeting approved a capital increase in Termogaúcha and the subsidiary CBPI paid R\$ 3,850, corresponding to several advances for future capital increase, which were previously recorded in long-term assets.

On December 14, 2006, a new Extraordinary Shareholders' Meeting of Termogaúcha approved the distribution of cash (resulting from the liquidation process) to the shareholders, under article 215 of the Brazilian corporate law. CBPI received R\$ 24,396.

(ii) At the Extraordinary Shareholders' Meeting held on November 16, 2006, the name of Ipiranga Comercial Química S.A. changed to Ipiranga Química S.A.

(iii) During 2006 the Company recognized a full impairment on the goodwill of TSB for R\$ 2,164.

- (b) On April 18, 2006, the Company registered with the Brazilian Securities Commission (CVM) a public offering of 35,000 debentures, of a single series, nonconvertible, with face value of R\$ 10 each, and issued on April 1, 2006, in the amount of R\$ 350,000. The debentures mature on April 1, 2011 with principal repaid in three annual instalments. They pay interest, from the issuance date, on their unit face value, of 103.80% of the daily average rate of interbank deposits ( Taxa DI over extra grupo ), disclosed by the Clearinghouse for the Custody and Financial Settlement of Securities ( CETIP ). Interest is payable every 6 months from the issuance date of the debentures. The long-term portion matures as follows:

|      | 2006    | 2005    |
|------|---------|---------|
| 2007 |         | 10,706  |
| 2008 | 193,710 | 323,047 |
| 2009 | 126,187 | 6,774   |
| 2010 | 124,716 | 1,243   |
| 2011 | 117,988 |         |
|      | 562,601 | 341,770 |

**Civil lawsuits**

As of December 31, 2006 and 2005, civil lawsuits of the Company's subsidiaries are mostly related to clauses of lease and supply agreements entered into with customers and indemnity claims arising from these agreements and civil liability.

**Labor lawsuits**

Labor lawsuits of the Company and its subsidiaries refer mainly to lawsuits filed by former employees and outsourced professionals claiming payroll charges, such as overtime, hazardous duty premium, etc.

**Tax lawsuits**

Tax lawsuits referred mainly to: (1) requirement of reversal of credits for ICMS on the provision of proper transportation services during the period the system of freight reimbursement by DNC (currently National Oil, Natural Gas and Biofuel Agency - ANP) was in effect and, although the freight reimbursements have always been made by DNC without the ICMS amount, previous court decisions have been unfavorable to the Company's arguments; (2) requirement of ICMS/Tax Substitution on interstate sales to end consumers under ICMS Agreement No. 105/92, subsequently amended by Agreement No. 112/93, in which the STF (Federal Supreme Court) resolved the matter, defining that the ICMS on fuel belongs to the State that consumes the fuel, even if the fuel is sold to the end consumer; (3) requirement of reversal of credits for ICMS, in Minas Gerais State, on interstate shipments made pursuant to article 33 of ICMS Agreement No. 66/88, which allowed the maintenance of the credit and which was suspended by an injunction granted by the STF; and (4) assessments due to undue deduction of discounts from the ICMS tax basis, in Minas Gerais State, owed on a tax substitution basis.

**(b) Possible losses**

Lawsuits for which management assessed the probability of loss as possible, based on the opinion of its internal and external legal counsel, are not accrued in the financial statements and are composed of:

|                | 2006    | 2005    |
|----------------|---------|---------|
| Tax lawsuits   | 225,806 | 178,226 |
| Civil lawsuits | 69,143  | 57,387  |
| Labor lawsuits | 14,400  | 21,975  |
| Total          | 309,349 | 257,588 |

**Tax lawsuits**

Tax lawsuits of the Company included in this classification were principally related with: (1) requirements for the reversal of ICMS credits, except in the Minas Gerais State, upon interstate outflows, as defined in the article 33 of ICMS Agreement 66/88, which allowed the maintenance of credit and which was suspended by an injunction conceded by the STF; (2) assessment for ICMS and reversals of credits of the tax due on the purchases of basic oils, interstate shipments which were not taxed, based on a constitutional rule of non-incidence; (3) demands to reverse ICMS credits related with the provision of transport services related to interstate operations which were not taxed, based on a constitutional rule of non-incidence; (4) demands to reverse ICMS credits derived from excess taxation generated on the purchase of products in the Petroleum Refinery under the tax substitution system, appropriated on the basis of the non-occurrence of one of the commercialization stages defined as the presumed originator, in direct sales to clients which were the final consumers; and (5) demands for ICMS payment on the sales to

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

Pará s clients in the fishing sector that benefit from tax exemption due to a presumed lack of authorization of SEFAZ/PA. These suits are at different stages, in the administrative and judicial sphere, such as production of proof and of jurisprudence consolidation in the higher courts.

F-231

**Civil lawsuits**

Civil lawsuits of the Company and its subsidiaries are mostly related to clauses of lease and supply agreements entered into with customers and indemnity claims arising from these agreements and civil liability.

**Labor lawsuits**

Labor lawsuits of the Company and its subsidiaries refer to lawsuits filed by former employees and outsourced professionals claiming specific payroll benefits, lawsuits filed by former employees, outsourced professionals and employees of gas stations that are customers of the Company, related to payroll charges, such as overtime, hazardous duty premium, etc., which are in progress at the stage of providing evidence, without a decision having been reached.

**(c) Contingent assets**

The Company and its subsidiaries filed judicial and/or administrative proceedings with Federal and State tax authorities to recover taxes unduly paid or overpaid. These proceedings, when concluded, may represent income that, due to its contingent nature, is not recorded in the financial statements as of December 31, 2006.

Due to the progress of lawsuits and based on their legal counsel's opinion, the companies' management assessed the likelihood of a favorable outcome in the aforementioned lawsuits as probable or possible, depending on the specific circumstances. As of December 31, 2006 said lawsuits may be summarized as follows:

**Federal level**

|                                                     |        |
|-----------------------------------------------------|--------|
| Corporate income tax rate increase                  | 7,087  |
| FGTS (severance pay fund) refund of tax             | 263    |
| National Telecommunication Fund                     | 2,077  |
| PIS/COFINS (taxes on revenue) increase in tax basis | 26,828 |
|                                                     | 36,255 |

**State level**

|                            |        |
|----------------------------|--------|
| State income surtax (AIRE) | 12,390 |
|----------------------------|--------|

**17 Employee and management profit sharing**

Profit sharing is calculated based on net income for the year, after deducting accumulated deficit, if any, and provision for income and social contribution taxes, and is distributed as follows:

**(a) Employee profit sharing**

Calculated based on 3% of net income from operations, which will be computed excluding income from investments in companies (recorded in the stand-alone individual statements of income of the Company as equity in subsidiaries and affiliates), amortization of goodwill or negative goodwill, sale or write-off of investments in companies and, finally, interest paid or received by the Company as interest on capital.

**(b) Management profit sharing**

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

At the discretion of the Board of Directors, management profit sharing will be calculated based on up to 10% of income after deducting employee profit sharing and cannot exceed the annual global compensation established at the Shareholders Meeting.

**18 Provision for pension and other post-employment benefits****(a) Pension benefits provided by Fundação Francisco Martin Bastos**

The Company, together with other Petróleo Ipiranga companies, sponsors Fundação Francisco Martins Bastos (FFMB), a closed pension entity that manages and operates pension plans for the employees of Petróleo Ipiranga companies.

FFMB Benefit Plan was created in 1993. Initially, only the basic benefit was established (a defined benefit plan) and in July 1998 the supplementary benefit (structured as a defined contribution plan in the phase of capitalization of estimated benefits) was implemented, whose contribution is computed as a percentage over variable compensation. The pension plan is funded by the sponsors and participants.

On August 31, 2005, the SPC (Secretariat for Pension Plan), through Official Letter No. 1003/SPC/DETEC/CGAT, approved the new Ruling of FFMB Benefit Plan. New regulations were introduced related to portability, deferred proportional benefit, self-sponsorship and redemption provided for in CGPC (Supplemental Pension Management Council) Resolution No. 6 of October 30, 2003, as well as changes in the calculation of benefits, new GAM-83 life expectancy table and change in the actuarial method from unit credit to projected unit credit became effective as actuarial adjustments.

The main changes in the calculations of benefits, approved in the new regulation, refer to the adjustment of the employee salary, gradual elimination of bonus for length of service credited for the purpose of calculating benefits and the increase in the percentage of reduction of the early retirement basic benefit.

These changes reduced the plan's total cost for the sponsors by 36%, as defined by the actuary based on the percentage of the participants' payroll for 2006.

In 2006, SPC, by means of CGPC Resolution No. 18, of March 28, 2006, established new technical/actuarial parameters for private pension plan entities. Therefore, the minimum life expectancy table that was adopted is AT-1983, increasing the life expectancy of active participants by approximately 2 years.

**(b) Other post-employment benefits**

According to CVM Resolution No. 371/00, the Company, in addition to the pension plan, recognizes a provision for other post-employment benefits related to bonus for length of service, FGTS (severance pay fund), health-care plan and life insurance for eligible retirees. Other post-employment benefits are unfunded and are provided directly by the Company and each of its subsidiaries of the Petróleo Ipiranga Group.

The reconciliation of pension and other post-employment benefit liabilities as of December 31 is as follows:

|                                         | 2006      | 2005      | 2004      |
|-----------------------------------------|-----------|-----------|-----------|
| Present value of funded obligations     | (351,258) | (308,875) | (311,194) |
| Present value of unfunded obligations   | (68,049)  | (63,843)  | (56,539)  |
| Fair value of plan assets               | 362,335   | 301,316   | 254,243   |
| Unrecognized actuarial gains (losses)   | 3,501     | 9,946     | 11,727    |
| Net post-employment benefit liabilities | (53,471)  | (61,456)  | (101,763) |
| (-) Current                             | 4,822     | 1,701     | 11,097    |
| Long term                               | (48,649)  | (59,755)  | (90,666)  |

**Table of Contents**

F-233

The portion of actuarial gains or losses to be recognized as income or expense is the amount of unrecognized gains and losses that exceed, in each year, the higher of the following amounts:

- (i) 10% of the present value of the total actuarial obligation of the defined benefit; and
- (ii) 10% of the fair value of plan assets.

The portion that exceeds such limits will be annually amortized dividing its amount by the remaining average length service estimated for the plan's participants.

The amounts recognized in the statements of income are as follows:

|                                         | 2006     | 2005     | 2004     |
|-----------------------------------------|----------|----------|----------|
| Cost of current service                 | 8,967    | 8,501    | 8,189    |
| Cost of interest                        | 40,878   | 40,332   | 37,927   |
| Expected return on assets               | (46,595) | (38,266) | (27,995) |
| Amortization of actuarial gain (losses) | 963      | 753      | 867      |
| Employees' contributions                | (2,890)  | (3,552)  | (3,966)  |
| Total expenses in the year              | 1,323    | 7,768    | 15,022   |

Changes in net pension and other post-employment benefit liabilities may be shown as follows:

|                                                                  | 2006     | 2005      | 2004      |
|------------------------------------------------------------------|----------|-----------|-----------|
| Net liability at beginning of year                               | (61,456) | (101,763) | (101,329) |
| Expenses in the year                                             | (1,323)  | (7,768)   | (15,022)  |
| Company's contributions in the year                              | 5,938    | 8,513     | 12,858    |
| Benefits paid in the year                                        | 224      | 3,479     | 1,730     |
| Adjustment to the present value of obligations/other adjustments | 3,146    | 36,083    |           |
| Net liability at end of year                                     | (53,471) | (61,456)  | (101,763) |

The main actuarial assumptions applied are as follows:

Discount rate of actuarial obligation at present value - 10.8% per year

Expected long-term rate of return on assets - 13.2% per year

Projected average salary growth rate - 6.6% per year

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

Inflation rate (long term) - 4.5% per year

Medical services growth rate - 7.6% per year

Biometric assumptions used:

Mortality table - AT 1983 basic rated down by 10% (\*)

Turnover table - adjusted Towers Perrin

Disabled mortality table - RRB 1983

Disability table - amended RRB 1944 rated

---

(\*) For life insurance benefit, the CSO-80 mortality table was used

**Table of Contents****19 Shareholders equity****(a) Capital**

At December 31, 2006, the capital is comprised of 105,952,000 (2005 - 52,976,000) shares without a par value, of which 35,409,306 (2005 - 17,704,653) are common and 70,542,694 (2005 - 35,271,347) are preferred shares.

Preferred shares have no voting rights and have priority in the distribution of dividends and in the reimbursement of capital in the event of liquidation of the Company.

**(b) Reserves**

The Extraordinary Shareholders Meeting held on April 28, 2006 approved amendment to article 34 of the bylaws so that the Company has only one profit reserve, named Reserve for Working Capital and Conservation and Improvement of Installations. With this amendment, the Company's bylaws establish that the balance of the retained earnings account shall be allocated to the Reserve for Working Capital and Conservation and Improvement of Installations, after distribution of dividends, up to the limit of the capital.

**(c) Distribution of dividends**

Shareholders are annually entitled to receive mandatory minimum dividends, corresponding to 30% of net income, after allocation of 5% to the legal reserve. Preferred shareholders are entitled to receive dividends or interest on capital 10% higher than those paid on common shares.

**(d) Interest on capital and dividends**

Interest on capital, in the amount of R\$ 106,296 (2005 - R\$ 112,771 and 2004 - R\$ 93,161), was calculated according to the limits established by Law No. 9,249/95.

In addition, dividends in the amount of R\$ 12,431 were paid on December 27, 2006.

Interest on capital and dividends are calculated as follows:

|                                                                          | 2006           | 2005           | 2004           |
|--------------------------------------------------------------------------|----------------|----------------|----------------|
| Net income of the Parent Company                                         | 323,549        | 325,477        | 317,891        |
| Legal reserve (5%)                                                       | (16,177)       | (16,274)       | (15,895)       |
| <b>Calculation basis for dividends</b>                                   | <b>307,372</b> | <b>309,203</b> | <b>301,996</b> |
| Total interest on capital                                                | 106,296        | 112,771        | 93,161         |
| Total interest on capital, net of withholding income tax (IRRF)          | 90,352         | 95,855         | 79,187         |
| Dividends                                                                | 12,431         | 19,611         | 17,516         |
| <b>Total distributed dividends and interest on capital (net of IRRF)</b> | <b>102,783</b> | <b>115,466</b> | <b>96,703</b>  |

**Table of Contents****20 Collaterals and guarantees**

The Company provides collaterals and guarantees for some loan operations conducted directly or indirectly by certain subsidiaries, affiliates and other related parties.

As of December 31, 2006 and 2005 amounts referring to these operations are as follows:

| Guaranteed company | Parent Company and consolidated |         |          |
|--------------------|---------------------------------|---------|----------|
|                    | 2006                            | 2005    | Maturity |
|                    |                                 | 9,872   | 2006     |
|                    | 11,763                          |         | 2007     |

**21 Financial instruments**

In accordance with CVM Instruction No. 235/95, the Company and its subsidiaries estimated the fair value of their financial instruments, using available market information and appropriate estimation methodologies. However, both the interpretation of market data and the selection of estimation methodologies require reasonable judgment and estimates to determine the most adequate realizable value. Accordingly, the estimates presented are not necessarily indicative of the amounts that could be obtained in active market trading. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair values.

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

The Company and its subsidiaries conduct transactions involving financial instruments, all of which are recorded in balance sheet accounts, and are intended to meet their needs and reduce the exposure to credit, market, and currency risks. Management of these risks is performed by establishing strategies and control systems and setting position limits.

The main risks affecting the Company's business are as follows:

**(a) Currency risk**

This risk arises from the possibility of the Company incurring material losses because of exchange rate fluctuations, which may affect the balances of foreign currency-denominated loans and financing.

F-235

**Table of Contents**

The exposure to fluctuations in exchange rates is as follows.

|                                 | 2006   | 2005        |
|---------------------------------|--------|-------------|
| <b>Amounts in US\$ thousand</b> |        |             |
| Loans and financing             | 65,419 | 180,029     |
| Swap transactions               |        | (36,775)    |
| Net exposure                    | 65,419 | 143,254     |
| <b>Amounts in ¥ thousand</b>    |        |             |
| Loans and financing             |        | 3,464,393   |
| Swap transactions               |        | (3,464,393) |
| Net exposure                    |        |             |

Rates as of December 31, 2005 = R\$ 2.3407/US\$ and R\$ 0.01983/¥.

Rates as of December 31, 2006 = R\$ 2.1380/US\$

**(b) Credit risk**

This is the risk of the Company incurring losses due to customers' failure to pay accounts and financing. The Company reduces this risk by means of a credit policy and by obtaining collaterals for supply agreements signed with its customers for significant balances.

**(c) Interest rate risk**

This risk arises from the possibility of the Company incurring losses due to interest rate fluctuations that increase interest expenses on loans and financing.

The Company continuously monitors the market interest rates in order to evaluate the need for hedging against the volatility of these rates.

**(d) Financial income (expenses)**

|                                  | 2006     | 2005     | 2004      |

**23 Insurance**

The Petróleo Ipiranga companies have an insurance and risk management program that allows coverage and protection for all their insurable assets, including insurance coverage for risks of disruption of production, by means of an operational risk policy traded in the domestic and foreign insurance markets through the Brazilian Reinsurance Institute (IRB).

The insurance coverages and limits are based on a detailed study of risks and losses performed by local insurance brokers, and the insurance contracted is considered sufficient to cover possible losses, considering the nature of the companies' activities.

The main insurance coverages are for operational risks, loss of profits, industrial and office multiperils, named risk-pools and civil liability.

**24 Subsequent events****Acquisition of Ipiranga**

On April 18, 2007, Ultrapar Participações S.A. for itself, and also as a commission agent of Braskem S.A. and Petróleo Brasileiro S.A. - Petrobras, acquired for R\$ 2,113,107, from the controlling shareholders of Petróleo Ipiranga Group, 66.2% common shares and 13.9% preferred shares issued by Refinaria de Petróleo Ipiranga S.A. ( RPI ), 69.2% common shares and 13.5% preferred shares issued by Distribuidora de Produtos de Petróleo Ipiranga S.A. ( DPPI ), and 3.8% common shares and 0.4% preferred shares issued by Companhia Brasileira de Petróleo Ipiranga ( CBPI ). Of the total amount, Braskem and Petrobras paid R\$ 1,394,675 under the terms of the commission among the parties.

Under the terms of the agreement among Ultrapar, Braskem and Petrobras, once all steps of the transaction mentioned below are finalized, Ultrapar will hold the distribution of fuel and lubricants in the Southern and Southeastern Regions ( South Distribution Assets ); Petrobras will hold the distribution of fuel and lubricants in the Northern, Northeastern and Central-Western regions ( North Distribution Assets ); and Braskem and Petrobras will hold 60% and 40%, respectively, of the petrochemical assets, represented by Ipiranga Química S.A. ( IQ ), its subsidiary Ipiranga Petroquímica SA ( IPQ ) and by the interest of the latter in Copesul Companhia Petroquímica do Sul ( COPESUL ) ( Petrochemical Assets ). Assets related to oil refining held by RPI will be equally shared by Petrobras, Ultrapar and Braskem.

**Table of Contents**

F-238

In the same agreement the parties established that Ultrapar is responsible for conducting a corporate restructuring in the companies acquired to separate the assets assigned to each acquiring company. The stages are as follows:

- a) Public Tag Along Offering to acquire common shares issued by RPI, DPPI, CBPI and IPQ held by other shareholders;
- b) Merger into Ultrapar of the preferred and any remaining common shares issued by RPI, DPPI and CBPI;
- c) Segregation of assets by means of: (i) capital reduction of RPI and CBPI to transfer the Petrochemical Assets directly to Ultrapar, for subsequent transfer to Braskem and Petrobras, under the terms of the commission, and (ii) spin-off of CBPI to transfer the North Distribution Assets to a company controlled by Petrobras.

On April 17, 2007, CADE (Economic Defense Council) issued an Injunction to maintain conditions that would allow to revert the asset acquisition by Braskem and Petrobras, as described in the Significant Event Notice published on April 18, 2007. The provisions related to Petrochemical Assets were reviewed on April 25, 2007 in the decision approved by CADE, with signature by Braskem of agreement for protection of reversibility of operation (APRO).

With said changes, CADE acknowledges the maintenance of the minority interest of Petrobras in COPESUL after the acquisition. In relation to fuel distribution, CADE granted 10 days so that Petrobras and Ultrapar present an alternative corporate governance model that preserves competition within the industry.

## **25 SUMMARY AND RECONCILIATION OF THE DIFFERENCES BETWEEN ACCOUNTING PRACTICES ADOPTED IN BRAZIL AND GENERALLY ACCEPTED ACCOUNTING PRINCIPLES IN THE UNITED STATES OF AMERICA**

### **I - Narrative description of GAAP differences**

The consolidated financial statements of the Company are prepared in accordance with Brazilian GAAP. Accounting policies, which differ significantly from U.S. GAAP, are summarized below.

#### **(a) Inflation accounting**

Under Brazilian GAAP, the Company accounts for the effects of inflation in its financial statements prepared in accordance with Brazilian GAAP through December 31, 1995. Through December 31, 1995, the Company used for this remeasurement the Fiscal Reference Unit (UFIR), the index established by the tax authorities for preparation of financial statements under Brazilian corporate law as well as the index selected by the CVM.

The reconciliation presents the effect of adjusting property, plant and equipment for U.S. GAAP purposes through December 31, 1997. Under U.S. GAAP, management of the Company considers that Brazil was considered to be a highly inflationary economy until December 31, 1997 and, as such, property, plant and equipment should be adjusted for inflation through such date.

In determining amounts under U.S. GAAP, the effects of inflation for the years ended December 31, 1996 and 1997 were determined using the Índice Geral de Preços - Disponibilidade Interna - IGP-DI index, which is a widely-accepted and respected index published monthly by the Fundação Getúlio Vargas.

Because the Company's management believes that the IGP-DI is an appropriate and consistent measure of the general price inflation in Brazil and because of its availability, for U.S. GAAP purposes the Company adopted the IGP-DI for restatement of its financial statements also for periods through December 31, 1995,

## **Table of Contents**

replacing the Government mandated index. As a result, property, plant and equipment has been monetarily adjusted for inflation using the IGP-DI since its acquisition through December 31, 1997.

### **(b) Capitalization of interest during construction in progress**

Under Brazilian GAAP, prior to 1996 the Company was not required to capitalize the interest cost of borrowed funds as part of the cost of the related asset. Under U.S. GAAP, capitalization of borrowed funds during construction of major facilities is recognized as part of the cost of the related assets.

Under U.S. GAAP, interest on construction-period financing denominated in foreign currencies is capitalized using contractual interest rates excluding foreign exchange gains or losses.

### **(c) Pension and other post-employment benefits**

#### **(c.1) Pension benefits**

Pension benefit obligations for Brazilian GAAP should be accounted for following CVM Instruction No. 371/00, which requires the mandatory application of Brazilian Accounting Standard IBRACON NPC 26. Under IBRACON NPC 26 the Company has accounted for the plan administered by FFMB (and to which several Petróleo Ipiranga companies contribute) by recognizing a percentage attributed to the Company of the funded status and of the cost of the plan.

Under U.S. GAAP, considering that the financial information of the Company does not consolidate all the sponsors of the FFMB and such financial information does not represent the financial statements of the parent company of the Petróleo Ipiranga companies, the Company has accounted for its participation in the pension plan administered by FFMB as if it were a multi-employer plan.

As a result, the reconciliation presents: (a) the reversal of the pension plan asset/liability recognized for Brazilian GAAP as of each reporting date and the reversal of the related pension cost, and (b) the recognition as expense of the contribution due to the plan over the corresponding period.

#### **(c.2) Other post-retirement benefits**

As explained in Note 18, the accompanying financial statements account for other post-retirement benefits following IBRACON NPC 26. Other post-retirement benefits are unfunded and are the sole responsibility of each Petróleo Ipiranga company. Under IBRACON NPC 26 actuarial gains and losses are deferred and recognized in income over the estimated remaining service period of the employees to the extent that those actuarial gains and losses exceed 10% of the higher of the plan assets and the projected benefit obligation.

Under U.S. GAAP such benefits are accounted for following SFAS No. 106, *Employers' Accounting for Post-retirement Benefits Other Than Pensions* and, as from December 31, 2006, following SFAS No. 158 *Employers' Accounting for Defined Benefit Pension and Other Post-retirement Plans* an amendment of FASB Statements No. 87, 88, 106 and 132(R). Under SFAS No. 158 the funded status of the other postretirement benefits must be recognized as a liability with an offsetting amount in accumulated other comprehensive income. As required by SFAS No. 158, provisions of SFAS No. 158 were applied on a prospective basis as from December 31, 2006.

Although projected benefit obligations are the same under Brazilian GAAP and U.S. GAAP, differences arise in the amounts recorded in the financial statements as result of: (i) that the date of initial measurement of funded status is different for Brazilian GAAP and U.S. GAAP and that under Brazilian GAAP there is no requirement to recognize an additional minimum liability, and (ii) the recognition, as from December 31, 2006, as a liability for U.S. GAAP purposes, of the funded status against accumulated other comprehensive income.

---

**Table of Contents**

**(d) Tax incentives**

Under Brazilian GAAP, tax incentives are accounted for directly as an increase in a capital reserve account in shareholders' equity. The Company records the taxes as expense in the consolidated statement of income for the amounts that would be due absent the benefit, and recognizes a reduction in the tax payable against the capital reserve.

For U.S. GAAP reconciliation purposes the amount of those incentives is recognized as reduction of the tax expense directly in the statement of income.

**(e) Accounting for derivative financial instruments**

As mentioned in Note 21, the Company has entered into swap transactions. Under Brazilian GAAP swaps are valued at its accrued amount determined as the difference as the amount receivable and the amount payable under the swap. The amounts receivable and payable are computed as their respective notional amount plus accrued charges based on their contractual terms.

Under U.S. GAAP, SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, established accounting and reporting standards requiring that all derivative instruments be recorded in the balance sheet as either an asset or a liability measured at its fair value. Changes in the derivative's fair value are recognized currently in earnings unless specific hedge accounting criteria are met. The Company has not accounted for any derivative instrument following hedge accounting.

The reconciliation presents the differences resulting from valuing the swaps at fair value under U.S. GAAP as opposed to valuing them at the accrued amount used under Brazilian GAAP. As of December 31, 2006 no significant difference was identified between the accrued amount and the fair value.

**(f) Fair value of guarantees under FIN 45**

Under Brazilian GAAP, the Company is not required to record any liability related to guarantees given to third parties unless contingent obligations to make future payments under the guarantees are considered probable.

The Company has not recorded any liability related to these guarantees under Brazilian GAAP as of any of the dates presented.

Under U.S. GAAP, the Company recognizes, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing guarantees in accordance with FIN 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. In the event that, at inception of the guarantee, the Company is required to recognize a liability under SFAS No. 5,

Accounting for Contingencies, the liability initially recognized would be the greater of: (a) the amount of fair value of the value of the obligation undertaken in issuing guarantee, or (b) the contingent liability amount required to be recognized at inception of the guarantee by applying SFAS No. 5.

Guarantees granted include those disclosed in Note 20 as well as guarantees provided to financial institutions that finance sales to selected customers under the vendor program. Under the vendor program the Company is the secondary obligor to the financial institutions

The reconciliation presents the effect of recognizing a liability for the fair value of these guarantees and the related effect in the statement of income.

**(g) Accounting for asset retirement obligation**

Under Brazilian GAAP, the Company's practice is to expense amounts relating to retirement of certain assets as incurred.

**Table of Contents**

F-241

Under U.S. GAAP, the Company adopts SFAS No. 143, *Accounting for Asset Retirement Obligations*. Asset retirement obligations correspond to the legally required obligation to remove fuel tanks upon retirement. Under SFAS No. 143, the fair value of asset retirement obligations are recorded as liabilities on a discounted basis when they are incurred, which is typically at the time the related assets are installed. Amounts recorded for the related assets will be increased by the amount of these obligations and depreciated over the related useful lives of such assets. Over time, the amounts recognized as liabilities will be accreted for the change in their present value until the related assets are retired or sold.

**(h) Gain on change in equity interest in Maxfácil**

In December 2006, the business recognized a capital gain, in the amount of R\$ 58,136, regarding the gain on change in equity interest in Maxfácil as described in Note 4.

The gain has been determined as a result of Maxfácil having issued new shares to UNIBANCO at a price higher than the carrying amount per share of the investment recorded by the Company in Maxfácil.

Under U.S. GAAP, considering that Maxfácil is a newly formed entity, the Company believes it does not meet the criteria for gain recognition established in SAB Topic 5-H.

The reconciliation presents the effect of reverting for U.S. GAAP the capital gain recognized under Brazilian GAAP.

**(i) U.S. GAAP adjustments on net equity and net income of affiliates**

The investments in Termogaúcha - Usina Termelétrica S.A., Ipiranga Química S.A. ( IQ ), and Transportadora Sulbrasileira de Gás S.A. ( TSB ) are accounted under the equity method under Brazilian GAAP.

Such investment would also be accounted for following the equity method under U.S. GAAP.

Differences between net equity and net income of the affiliates correspond mainly to: accounting for deferred charges, accounting for business combination and goodwill, accounting for pension and other post-employment benefits, revaluation of property, plant and equipment, capitalization of interest on property, plant and equipment, recognition of tax incentives, accounting for derivative financial instruments, accounting for dividends and interest on capital, and accounting for the provision for programmed maintenance.

The net effects of those adjustments are presented in the reconciliation to U.S. GAAP.

**(j) Accounting for convertible debentures issued by Ipiranga Química S.A. and related warrants****j.1) Accounting for convertible debentures issued by IQ**

Under Brazilian GAAP, convertible debentures issued by IQ described in Note 7 are accounted for as a single instrument at its cost plus accrued interest following the contractual terms.

Under U.S. GAAP the Company has concluded that the non-detachable conversion option included in the convertible debentures issued by IQ does not meet the definition of a derivative under SFAS 133 *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted. The company accounted for the convertible debentures in accordance with FAS 115 *Accounting for Certain Investments in Debt and Equity Securities* and classified the instrument as a trading security. At the date of issuance, the total amount of the proceeds equals the fair value of the instrument so there is no GAAP difference at initial recording.

However, the convertible debenture was marked to market at every reporting period with charges to the statements of income for US GAAP purposes, creating a difference in valuation of the convertible instrument for US GAAP of R\$ 21 million at the date of the modification of the terms.

---

**Table of Contents**

F-242

**j.2) Accounting for the modification of terms of the debentures and issuance of warrants**

In October 2005, a modification was introduced in the terms of the debentures such that they were modified from convertible to non-convertible; no other terms of the debentures have been modified. At the same moment, IQ issued to the holders of the debentures, detachable warrants which allow the holders of the warrants to acquire shares of IQ in the exact same terms as the previously existing non-detachable conversion option included in the debentures.

Under Brazilian GAAP, warrants are not separately recorded. The modification of the terms of the debentures and the issuance of warrants in October 2005 did not have any impact in the accounting for the debentures (which were originally convertible and in October 2005 were modified to non-convertible) under Brazilian GAAP which continued to be accounted for at its cost plus accrued interest and warrants issued by IQ are not accounted for.

For U.S. GAAP purposes, the Company has also classified the new debt instrument received as a trading security under FAS 115. In addition, the Company has concluded that the fair value of the warrant and non-convertible debenture received approximates the fair value of the convertible debenture prior to modification. Therefore, upon modification the Company recorded the warrant and debt at their fair values with no gain or loss recognized.

After the modification, the Company continued to mark to market the non-convertible debt instrument with charges to the statement of income. The warrant does not meet the definition of a derivative under SFAS 133, so it is accounted for under the cost method.

The US GAAP reconciliation reflects the difference in the mark to market of the convertible debt instrument through the date of modification, and of the non-convertible debt instrument after the modification, compared to the amortized cost value recorded for Brazilian GAAP purposes.

**(k) Accounting for refunds**

The Company and its subsidiary CBPI offer to certain of their customers refunds in cash if they meet a specified cumulative volume of sales over a specified period of time. Under Brazilian GAAP, the refund is recognized as an expense when the cumulative volume of sales has been met. Such refunds are offered to a reduced group of customers and have begun to be offered recently.

Under U.S. GAAP, EITF 01-9, Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products), a Company should recognize a liability based on a systematic and rational allocation of the cost of honoring the commitment in each of the underlying transactions that result in progress toward earning the refund. Considering the reduced customers to which the refund is offered and the reduced historical experience, the Company believes that it cannot reasonably estimate the ultimate amount that will be earned by customers. As a result, under U.S. GAAP a liability is recognized for the maximum potential amount of the refund.

**(l) Goodwill and business combinations**

Under Brazilian GAAP assets and liabilities of entities acquired are reflected at book values. Goodwill is determined as the excess of purchase price paid over the book value of net assets acquired. Goodwill is amortized on a straight-line basis over the periods estimated to be benefited limited to 10 years.

In July 1998, the Company made a capital contribution to IQ. Under Brazilian GAAP, such transaction generated goodwill at the date of the transaction in the amount of R\$ 49,393 and resulted in obtaining an interest in IQ of 41.47%.

**Table of Contents**

Goodwill under Brazilian GAAP was totally amortized as of December 31, 2006 and 2005.

Under U.S. GAAP, business combinations are accounted for following the purchase method. Under the purchase method assets and liabilities of the business acquired are recorded, to the extent of the percentage acquired, using fair values. Goodwill is determined as the difference between purchase price consideration and the fair value of assets acquired and liabilities assumed. If there is an excess of the fair value of net assets acquired over the purchase price such amount is used to reduce the carrying value of long-term assets. As from January 1, 2002 goodwill is not amortized but is tested, at least annually, for impairment.

The reconciliation of net equity between Brazilian GAAP and U.S. GAAP presents: (i) the reversal of the balance of goodwill recorded under Brazilian GAAP at each balance sheet date, (ii) the recognition for U.S. GAAP purposes of the difference resulting from adjusting assets and liabilities of the entity acquired at fair value, most significantly property, plant and equipment and investment in equity investees, (iii) the recognition of resulting goodwill under U.S. GAAP, and (iv) the related deferred taxes.

The reconciliation of net income between Brazilian GAAP and U.S. GAAP presents: (i) the reversal of goodwill amortization recorded under Brazilian GAAP, (ii) the recognition in income of adjustments of assets and liability at fair value, mostly depreciation of property, plant and equipment and equity in investees, and (iii) the related deferred tax effects.

**m) Provision for dividends and interest on capital**

Under Brazilian GAAP, at each balance sheet date the Board of Directors is required to propose a dividend distribution which, if not yet paid during the year, is accrued as a liability in the financial statements.

Under US GAAP, since proposed dividends in excess of the mandatory minimum dividend required to be paid by by-laws may be ratified or modified at the annual Shareholders Meeting, such proposed dividends in excess of the mandatory minimum dividends are not considered declared at the balance sheet date and therefore are not accrued. However, dividends accrued or interest on own capital already paid is considered declared for US GAAP purposes. Dividends declared as of December 31, 2004 exceeded mandatory minimum dividends and for that reason the provision for dividends recorded under Brazilian GAAP in excess of mandatory minimum dividends is being reverted in the reconciliation to US GAAP.

At December 31, 2006 and 2005 all dividends declared for the year were paid before year-end.

**V - Additional disclosures required by U.S. GAAP****(a) Earnings per share**

Under Brazilian GAAP, net income per share is calculated on the number of shares outstanding at the balance sheet date. In these consolidated financial statements, information is disclosed per lot of one thousand shares, because this is the minimum number of shares that can be traded on the Brazilian stock exchanges.

Under U.S. GAAP earnings per share is retroactively restated to reflect in all periods presented the effect of stock dividends. During 2006 a stock split has been approved for one new share per existing share. Earnings per share has been retroactively restated to reflect the effect of such stock dividend.

Since the preferred and common shareholders have different dividends and voting rights (see Note 19), basic earnings per share have been calculated using the two-class method for U.S. GAAP purposes. The following table provides a reconciliation of the numerators and denominators used in computing earnings per share as required by SFAS No. 128:

|                                                                                                      | <b>December 31, 2006</b> |                  |              |

**REFINARIA DE PETRÓLEO IPIRANGA S.A.**

**NOTES TO THE UNAUDITED INTERIM FINANCIAL INFORMATION**

**FOR THE SIX-MONTH PERIODS ENDED JUNE 30, 2007 AND 2006**

**(Amounts in thousands of Brazilian reais R\$, unless otherwise stated)**

**1. Operations**

Refinaria de Petróleo Ipiranga S.A. (the Company) is a public company whose shares are traded on the São Paulo Stock Exchange (BOVESPA). Until April 18, 2007, the Company was controlled by members of the Bastos, Mello, Ormazabal, Tellechea and Gouvêa Vieira families.

On April 18, 2007, Ultrapar Participações S.A. (Ultrapar), for itself and also as commission agent of Petróleo Brasileiro S.A. (Petrobras) and Braskem S.A. (Braskem), acquired from the controlling shareholders of the Petróleo Ipiranga companies, 66.2% of the common shares and 13.9% of preferred shares issued by the Company, 69.2% of the common shares and 13.5% of the preferred shares issued by Distribuidora de Produtos de Petróleo Ipiranga S.A. (DPPI) and 3.8% of the common shares and 0.4% of the preferred shares issued by Companhia Brasileira de Petróleo Ipiranga (CBPI).

The Company is primarily engaged in oil refining and sale of its by-products.

**2. Presentation of financial statements**

These consolidated financial statements were prepared in accordance with accounting practices adopted in Brazil (Brazilian GAAP). The financial statements presented herein are different from the ones prepared by the Company for statutory purposes because they do not include the holding Company's stand-alone financial statements as of December 31, 2006, have been adjusted with respect to the financial statements for statutory purposes to include in Note 24 a reconciliation of net equity and net income between the amounts under Brazilian GAAP and generally accepted accounting principles in the United States of America (U.S. GAAP) and have also been adjusted to present certain additional disclosures to facilitate its understanding by readers not familiar with Brazilian GAAP.

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosures of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Significant estimates include, but are not limited to, estimates relating to the useful lives of property, plant and equipment, accounting for contingencies and provisions for income taxes among others. Actual results could differ in relation to these estimates.

**3. Summary of significant accounting practices**

Accounting practices adopted in Brazil (Brazilian GAAP) to record transactions and prepare the financial statements comply with those prescribed by Brazilian corporate law and specific standards established by the Brazilian Securities Commission (CVM), which differ in certain respects from U.S. GAAP. See Note 24 for a discussion of these differences and a reconciliation of consolidated shareholders' equity and consolidated net income between Brazilian GAAP and U.S. GAAP.

The following is a summary of significant accounting policies followed in the preparation of the accompanying financial statements:

**a) Cash and cash equivalents**

Cash and cash equivalents comprise highly-liquid temporary cash investments (with maturities of three months or less when acquired and readily convertible to cash).

## **Table of Contents**

### **b) Short - term investments and derivatives**

Short-term investments correspond to temporary investments. Derivative instruments included swap transactions and options which are recorded at cost plus accrued income or expense based on the contractual rates included in each agreement.

### **c) Allowance for doubtful accounts**

The Company's management has individual customer credit information, enabling it to assess customers ability to pay. The allowance is recognized in an amount considered sufficient to cover probable losses on realization of accounts receivables.

### **d) Restricted export drafts**

Correspond to receivables from exports to customers that have been transferred to financial institutions as repayment of export pre-financing or post-financing obtained.

### **e) Inventories**

Stated at the lower of average acquisition or production cost or market or estimated net realizable value.

### **f) Investments in subsidiaries and goodwill**

Accounted following the equity method with a corresponding entry to income.

Goodwill on the acquisition of subsidiaries is amortized over 10 years, the estimated period of realization.

### **g) Property, plant and equipment**

Stated at acquisition or construction cost, monetarily restated through December 1995. Depreciation is calculated following the straight-line method based on the estimated economic useful lives of the assets.

### **h) Loans and financing**

Stated at the amount of principal, plus financial charges incurred on a pro rata basis through the balance sheet date. Foreign currency-denominated loan were converted into Brazilian reais at the exchange rates prevailing at the balance sheet date.

### **i) Income and social contribution taxes**

Tax expense is calculated based on the income tax rate of 15% plus a 10% surtax and social contribution tax rate of 9%.

### **j) Deferred income and social contribution taxes**

Calculated on temporary differences and tax loss carryforwards using the income and social contribution tax rates effective for the period in which the tax effects are expected to be realized.

Deferred income and social contribution tax assets are only recognized up to the amount that is likely to be realized within the next ten years as established by CVM Instruction No. 371/02.

**Table of Contents****k) Provision for contingencies**

Recorded for contingent whose likelihood of loss is probable, based on the opinion of management and inside and outside legal counsel. The accrual is recorded based on the estimated costs upon the final resolution of lawsuits.

**l) Provision for other post-employment benefit obligations**

Pension and other post-employment benefits liabilities to employees, retirees and pensioners (net of assets of the benefit plans) are recorded based on the actuarial calculation prepared by an independent actuary, using the Projected Unit Credit Method.

**m) Other assets and liabilities**

Other assets and liabilities, classified as current and noncurrent, are stated at realizable or estimated settlement amounts. These assets and liabilities are stated at cost or realizable value and known or estimated amounts, respectively, including, when applicable, interest and monetary and exchange variations.

**n) Interest on capital**

Interest on capital can be paid by Brazilian companies in lieu of, or in addition to, mandatory dividend stipulated by the respective company's bylaws. Interest on capital is calculated within the limits established by Law No. 9,249/95 for a maximum amount computed as the TJLP (noncurrent interest rate) applied on the respective shareholders' equity.

Interest on capital received from affiliates is recorded as a receivable. Interest on capital payable, since it represents in essence dividends, is recorded as a reduction in Retained earnings.

**o) Results of operations**

Revenue from sale of products is recognized when significant risks and benefits related to the product ownership pass to customer. Revenue from sale of services is recognized when services are provided. Other income, expenses and costs are recognized when incurred and/or realized. The result includes interest and monetary and exchange variations, at official indexes and rates, applicable to current and noncurrent assets and liabilities and, when applicable, the effects of adjustments of assets to market or realizable value.

**4. Consolidation criteria**

The consolidated financial statements have been prepared in accordance with the consolidation principles established by Brazilian GAAP and include the accounts of the Company and the following subsidiaries as of December 31, 2006 and as of June 30, 2006 and for the six-months then ended:

**Table of Contents**

- (\*) BVI British Virgin Islands.
- (\*\*) COPEsul is a jointly-controlled entity which under Brazilian GAAP is proportionately consolidated.
- (\*\*\*) On December 26, 2006, Ipiranga Petroquímica S.A. ( Ipiranga Petroquímica or IPQ ) repurchased all its shares held up to such date by the minority shareholder International Finance Corporation-IFC and those shares were cancelled. As a result the interest of shareholders other than IFC in Ipiranga Petroquímica increased. The interest of Ipiranga Química S.A. ( Ipiranga Química ) increased from 88.4800% to 92.32863%.
- (\*\*\*\*) The interest of the Company in such subsidiaries remained the same as of June 30, 2007. However, as further explained below the subsidiaries are not consolidated as from April 18, 2007 but accounted for following the equity method.

The following practices were adopted in the preparation of the consolidated financial statements:

- (a) Intercompany balances, transactions and unrealized profit have been eliminated.
- (b) Minority interest in subsidiaries is presented in a separated caption.
- (c) Assets and liabilities, revenues and expenses of the jointly-controlled entity Copesul were included in the consolidated financial statements in proportion to the investor's interest in the investee's capital, pursuant to CVM Instruction No. 247/96. The consolidated balance sheet as of December 31, 2006 and statement of income for the six-month period ended June 30, 2006 of the jointly-controlled entity Copesul are presented on a condensed basis in note 24 I e).

**Non consolidation of subsidiaries as from April 18, 2007**

As commented in Note 1, on April 18, 2007 Ultrapar together with Braskem and Petrobras, acquired from controlling shareholders of the Petroleo Ipiranga companies 66.2% of common shares and 13.2% of preferred shares of the Company, 69.2% of common shares and 13.5% of preferred shares of DPPI, and 3.8% of common shares and 0.4% of preferred shares of CBPI.

Under the terms of the agreement between Ultrapar, Braskem and Petrobras, once all steps of the transaction mentioned in Note 1 are finalized, Ultrapar will hold the control of the distribution of fuel and lubricants located in the South and Southeast regions of Brazil ( South Distribution Assets ), Petrobras will hold the control of the distribution of fuel and lubricants located in the North, Northeast and Center West regions of Brazil ( North Distribution Assets ) and Braskem will and Petrobras will hold 60% and 40%, respectively, of the petrochemical assets, represented by Ipiranga Química, its subsidiary Ipiranga Petroquímica and by the interest of the latter in Copesul Companhia Petroquímica do Sul (Copesul) ( Petrochemical Assets ). Assets related to the oil refining business carried out by the Company will be equally shared by Petrobras, Ultrapar and Braskem.

The Company continues to have a majority voting interest in Ipiranga Química and its subsidiaries which are part of the Petrochemical Assets. However, the Company does no longer have control over its subsidiaries after April 18, 2007. As part of the acquisition a shareholders agreement has been entered into between Ultrapar, Petrobras and Braskem through which, among other provisions, established that as from April 18, 2007 : (i) it is agreed that the Petrochemical Assets will be controlled by Braskem, (ii) Ultrapar will vote the shares of Ipiranga Química owned by the Company following instructions from Braskem, and (iii) Ultrapar will vote for the members of the Board of Ipiranga Quimica appointed by Braskem and Petrobras.

As a result of the terms of the shareholders agreement Ipiranga Química and its subsidiaries are no longer consolidated in the Company's financial statements, but rather, the investments in such subsidiaries are accounted for following the equity method since the date of acquisition.

**Table of Contents****Equity pick-up**

Additionally, according to the terms of the agreement between Ultrapar, Braskem and Petrobras, all results generated by Ipiranga Química and DPPI and CBPI into RPI's equity pick-up, since March 18, 2007, should be transferred, in the case of Ipiranga Química to Braskem and Petrobras, and in the case of DPPI and CBPI to Ultrapar and Petrobras. These transfers should occur upon completion of all steps of the acquisition.

**5. Short term investments**

**6. Derivatives receivable and payable**

Amounts as of December 2006 correspond to operations entered into by COPESUL involving options with respect to U.S. dollars called box options as commented below. Its purpose has been to invest cash resources at rates higher than other available investment options. COPESUL also entered into swap operations which were entered into by Fundo de Investimento Financeiro Multimercado Copesul, a fund consolidated by COPESUL, whose custodian and manager is Banco Santander Brasil S.A.

Swaps correspond to cross-currency interest rate swaps by which the Company pays a fixed interest rate and receives a variable rate based on the Interbank Deposit Certificates (CDI) rate.

| Swap transactions payable |                  | 6,704                |
| <b>Total</b>              |                  | <b>6,704</b>         |

Box options are combined operations that involve both the purchase and the sale of options in US dollars for the same maturity at a certain price, so that, regardless of the future U.S. dollar rate, the Company knows in advance the net result of such operations providing what the Company views as a fixed return over its investment. The value paid for the options, called premium, corresponds to the amount invested by the Company and the sum redeemed will be the premium plus a pre-fixed rate of return.

**Table of Contents****7. Trade accounts receivable**

|                        | June 30,<br>2007 | December 31,<br>2006 |

**(a) Debentures issued by Ipiranga Química in 2003**

The Extraordinary Shareholders Meeting of Ipiranga Química S.A. held on May 26, 2003 approved the issuance of two series of private convertible debentures, consisting of 11,000 Series A debentures, with face value of R\$ 10 each, amounting to R\$110,000, and 80,000 Series B debentures, with face value of R\$1 each, amounting to R\$80,000.

Both series of debentures mature on June 1, 2008.

On June 12, 2003, Distribuidora de Produtos de Petróleo Ipiranga S.A. fully subscribed the Series A debentures and Cia Brasileira de Petróleo Ipiranga fully subscribed the Series B debentures.

The subscribed debentures pay interest based on the CDI interest rate, plus spread subject to renegotiation every 6 months (Series A) and every 5 months (Series B) as established by the indenture dated June 1, 2003.

The spread for Series A debentures was 1.5% per year, as from December 1, 2005. The spread for Series B debentures was 1.0%.

Debentures were convertible into common shares of Ipiranga Química S.A. at any time after their issuance and until their maturity or redemption at the option of the holder.

The conversion price was a fixed amount established in the indenture of the debentures. However, the quantity of common shares to be received upon conversion will be higher than the amount determined as face value of the debentures divided by the conversion price. The quantity of additional shares to be received will be 25% if converted up to June 1, 2004, 18.2177% if converted before June 1, 2005, 11.8034% if converted before June 1, 2006 and 5.7371% if converted before June 1, 2007. No conversion has occurred to date.

**Table of Contents****(b) Modification of terms of the debentures and purchase of warrants by the Company**

Pursuant to a Memorandum of Understanding signed on October 3, 2005, Distribuidora de Produtos de Petróleo Ipiranga S.A., Companhia Brasileira de Petróleo Ipiranga and the Company agreed to hold an Extraordinary Shareholders Meeting of Ipiranga Química S.A. to approve a change in the type of debentures, issued by Ipiranga Química S.A. on June 1, 2003.

The changes approved on the meeting held on October 6, 2005 were: (i) to change the debentures from convertible to nonconvertible without making any other change in the terms or conditions of the debentures, and (ii) to issue warrants to the holders of the debentures, without any charge, replacing the conversion right established for the debentures; the terms of the warrants allow their holder to purchase common shares of Ipiranga Química in exactly the same terms than the conversion features originally included in the debentures.

Contemporaneously, the parties agreed that Distribuidora de Produtos de Petróleo Ipiranga S.A. would sell for R\$29.0 million the warrants obtained to the Company. The amount for the purchase of the warrants is payable on October 3, 2007, and carries interest at the CDI interest rate.

Upon acquisition of the warrants, the Company recognized the cost of R\$29.0 million as an asset within Permanent Assets and the corresponding payable to Distribuidora de Produtos de Petróleo Ipiranga S.A. The warrant is recorded at cost by the Company.

**(c) Early partial redemption of the debentures in 2006**

The Board of Directors of Ipiranga Química S.A., at the meetings held on May 2, 2006 and December 28, 2006, decided to make an early partial redemption of its debentures, issued on June 1, 2003, considering the financial cost that this debt has been generating for Ipiranga Química S.A.

Funds used to pay for the redemption were received by Ipiranga Química S.A. from its investee Ipiranga Petroquímica S.A. resulting from a reduction in capital approved by it on April 28, 2006 and from distribution of dividends.

Out of the outstanding balance of debentures of R\$ 307.0 million, R\$ 240.8 million was early redeemed in 2006.

**(d) Warrants**

However, upon completion of Company's acquisition process, as further described in note 1, these warrants should be fully transferred to Braskem and Petrobras, at no value, based on the terms of the agreement entered into by Ultrapar, Braskem and Petrobras.

**11. Income and social contribution taxes****a) Deferred**

Considering the uncertainties with respect to future taxable income, as mentioned in Note 1, management maintained the decision of not recording any deferred income and social contribution tax assets as of June 30, 2007, December 31, 2006 or June 30, 2006 for the oil refining business.

On January 1, 2003, the subsidiary Ipiranga Petroquímica S.A. (IPQ) changed the criteria to tax unrealized foreign exchange gains and losses from the accrual basis to the cash basis. Considering the foreign currency exposure of IPQ, the foreign exchange variation significantly influenced the determination of taxable income in prior periods.

Considering the change in the taxation criteria and also considering the then existing economic scenario, the exposure of IPQ to several international market conditions, as well as the operating and business cycles of the petrochemical industry (which has presented significant changes in profit margins in periods which are shorter than most of other industry segments), IPQ management concluded that income projections for periods longer than 3 years may have uncertainty concerning the realization of its assumptions.

As a result of the above, as of December 31, 2004 and 2005 IPQ limited the amounts of deferred tax assets recognized to the amount considered probable to be recovered which was determined to be the amounts to be realized over the subsequent 3 years based on projections of taxable income as of each respective date.

As of December 31, 2006, due to the improvement of macroeconomic condition in Brazil and more accurate projections of the domestic and foreign market variables in the petrochemical industry, management of IPQ reviewed the initial estimate and decided to recognize as deferred tax assets an amount equal to the amounts expected to be realized over the subsequent 10 years based on projections of taxable income.

Recognition of deferred taxes is based on several factors including history of profitability of subsidiaries and budgets, approved by management, which estimates future income for the realization of this asset.

**Table of Contents**

Deferred tax assets and liabilities are as follows:

|                                                          | June 30,<br>2007 | December 31,<br>2006 |

| 2008       |                  | 109,578              |
| 2009       |                  | 141,408              |
| 2010       |                  | 130,640              |
| After 2011 |                  | 238,653              |
|            |                  | 620,279              |

On August 28, 2005, IPQ signed a noncurrent loan pre-agreement in the amount of US\$ 150 million, structured by IFC, which can be fully or partially withdrawn, as needed. As of the date of these financial statements, no amounts have been withdrawn.

**15. Taxes payable**

|                                           | June 30,<br>2007 | December 31,<br>2006 |
|-------------------------------------------|------------------|----------------------|
| Income tax                                | 40               | 16,440               |
| Social contribution tax                   |                  | 6                    |
| PIS/COFINS (taxes on revenue)             | 25,521           | 36,817               |
| IPI (federal VAT)                         |                  | 7,243                |
| IPI PAES (tax debt refinancing program)   |                  | 9,228                |
| ICMS                                      | 4,257            | 15,726               |
| CIDE (economic intervention contribution) | 4,121            | 9,402                |
| Other                                     | 4                | 5,286                |
| <b>Total</b>                              | <b>33,943</b>    | <b>100,148</b>       |
| (-) Current                               | 8,637            | 59,018               |
| <b>Noncurrent</b>                         | <b>25,306</b>    | <b>41,130</b>        |

The amount recorded in noncurrent liabilities refers to the provision for CIDE using PIS and COFINS credits, in accordance with article 8 of Law No. 10,336/01.

**16. Contingencies****a) Probable losses**

A provision was recognized to cover probable losses estimated by management, supported by legal counsel, arising from the following lawsuits:

|                | June 30,<br>2007 | December 31,<br>2006 |
|----------------|------------------|----------------------|
| Tax lawsuits   | 543              | 9,517                |
| Civil lawsuits |                  | 695                  |
| Labor lawsuits | 1,249            | 11,620               |
| <b>Total</b>   | <b>1,792</b>     | <b>21,832</b>        |

|             |       |        |
|-------------|-------|--------|
| (-) Current | 668   | 10,014 |
| Noncurrent  | 1,124 | 11,818 |

F-266

**Table of Contents****Tax lawsuits**

- As of June 30, 2007 and December 31, 2006, the tax lawsuits of Refinaria de Petróleo Ipiranga S.A. refer mainly to: (1) claim by the INSS (National Institute of Social Security) of additional contribution on the SAT (Occupational Accident Insurance), and (2) assessment issued by the INSS related to presentation of the GFIP (FGTS (severance pay fund) Payment and Social Security Information Form) with incomplete data about taxable events contained in the payroll.
- As of December 31, 2006, tax lawsuit of Ipiranga Química S.A. refers to the tax deficiency notice issued by the Bahia State alleging an error in the recording of tax documents and in the determination of ICMS tax basis lack of evidence of storage of products intended to be shipped to the Manaus Free Trade Zone and the non-taxation of consignment sale.
- As of December 31, 2006, tax lawsuit of IPQ included in this classification refers to IRRF (withholding income tax) levied on dividends received from a subsidiary in 1994 and 1995 for which the Company formalized a refund request to the Federal Revenue Service (SRF) since at that time there were no objective conditions for offset since: (i) dividends were no longer subject to taxation beginning January 1, 1996, and (ii) it was not possible to pay dividends up to calendar year 2004 due to accumulated deficit. The SRF, by means of Regulatory Instruction No. 12/99, regulated the matter and started to allow the offset of said IRRF against tax payable on interest on capital paid by the IPQ to its shareholders. Based on income for 2005 and 2006, IPQ paid interest on capital to its shareholders and offset, in 2006, the prepaid IRRF tax asset against the IRRF levied on interest on capital. Considering that the IRRF asset was considered contingent, IPQ's management recognized a provision for contingencies related to the amount of IRRF subject to offset and, simultaneously, maintains the discussion about the matter at the administrative level.

**Labor lawsuits**

Corresponds to lawsuits filed by former employees and outsourced professionals of the Company as of June 30, 2007 and December 31, 2006 and of IPQ, Ipiranga Química S.A. and the jointly-controlled entity COPESUL as of December 31, 2006 which refer basically to salary equalization and overtime.

**b) Possible losses**

Lawsuits for which management assessed the probability of loss as possible, based on the opinion of its legal counsel, are not accrued in the financial statements and are composed of:

|                | June 30,<br>2007 | December 31,<br>2006 |
|----------------|------------------|----------------------|
| Tax lawsuits   | 395              | 56,166               |
| Civil lawsuits |                  | 185                  |
| Labor lawsuits | 182              | 4,874                |
| Total          | 577              | 61,225               |

**Tax lawsuits**

- As of June 30, 2007, the tax lawsuits of Refinaria de Petróleo Ipiranga S.A. included in this classification refer mainly to: (1) collection action due to the lack of payment of fees of the securities market; (2) notice to pay amounts arising from disallowance of deductions of salary premium for education considered incorrect, based on a supposedly lack of information to the FNDE (National Fund for the Development of Education) and (3) voluntary reporting through which PIS and COFINS (taxes on revenue)

due were paid, with interest, but without fine.

F-267

**Table of Contents**

2. As of December 31, 2006, the tax lawsuits of Ipiranga Química S.A. refer mainly to: (1) requirement of ICMS (state VAT) for sales made in the International Painting Convention in disagreement with the special regime granted, and (2) tax deficiency notice arising from the tax reclassification of imported product, requirement of IPI (federal VAT) and II (import tax).
3. As of December 31, 2006, the tax lawsuits of IPQ refer mainly to: (1) requirement of reversal of deemed IPI credits to refund PIS/COFINS on exported products; (2) tax deficiency notice arising from adjustments of the amount stated upon import of petrochemical plants, relating to the levy of import tax and IPI (federal VAT) on license for plants and transfer of know how and (3) tax deficiency notice arising from the tax reclassification of imported product, requirement of IPI and II, whose amount was partially reduced due to a decision favorable to the administrative rejection filed, and the corresponding amount was transferred to contingent liabilities assessed as remote losses.

**Labor lawsuits**

Corresponds to lawsuits filed by former employees and outsourced professionals of the Company as of June 30, 2007 and December 31, 2006 and its subsidiaries IPQ and Ipiranga Química S.A. as of December 31, 2006 referring to payroll charges and overtime.

**c) Contingent assets**

The Company and its subsidiaries filed judicial and/or administrative proceedings with Federal and State tax authorities to recover taxes unduly paid or overpaid. These proceedings, when concluded, may represent income that, due to its contingent nature, is not recorded in the financial statements as of June 30, 2007, December 31, 2006 or June 30, 2006.

Due to the progress of lawsuits and based on their legal counsel's opinion, the companies' management assessed the likelihood of a favorable outcome in the aforementioned lawsuits as probable and possible, depending on the specific circumstances. Lawsuits may be summarized as follows:

|                                                                               | June 30,<br>2007 | December 31,<br>2006 |
|-------------------------------------------------------------------------------|------------------|----------------------|
| <b>Federal level</b>                                                          |                  |                      |
| PIS/COFINS (taxes on revenue) increase in tax basis                           | 3,110            | 12,232               |
| Maintenance of IPI credits on acquisition of products subject to zero rate(*) |                  | 578,410              |
|                                                                               | 3,110            | 590,642              |
| <b>State level</b>                                                            |                  |                      |
| State income surtax (AIRE)                                                    | 3,421            | 2,810                |

(\*) The purpose of this lawsuit is the recognition of the right to IPI credits levied on inputs acquired and used in the manufacture of end products subject to IPI.

**17. Employee and management profit sharing**

Profit sharing is calculated based on income for the year, after deducting accumulated deficit, if any, and provision for income and social contribution taxes, and is distributed as follows:

**a) Employee profit sharing**

Calculated based on 3% of net income, which will be computed excluding income from investments in companies (recorded in the individual statements of income of the Company as equity in subsidiaries and affiliates), amortization of goodwill or negative goodwill, sale or write-off of investments in companies and, additionally, interest paid or received by the Company as interest on capital.

## **Table of Contents**

### **b) Management profit sharing**

Calculated, at year end, at 10% of income after deducting employee profit sharing and cannot exceed the annual global compensation established at the Shareholders Meeting.

## **18. Provision for pension and other post-employment benefits**

### **a) Pension benefits provided by Fundação Francisco Martin Bastos**

The Company, together with other Petróleo Ipiranga companies, sponsors Fundação Francisco Martins Bastos (FFMB), a closed pension entity that manages and operates pension plan for the employees of Petróleo Ipiranga companies.

The value of the Company contribution, for the period ended June 30, 2007, for the pension plan was R\$ 161 (R\$430 for the six months ended June 30, 2006).

### **b) Other post-employment benefits**

According to CVM Resolution No. 371/2000, the Company, in addition to the pension plan, recognizes a provision for other post-employment benefits related to bonus for length of service, FGTS (severance pay fund), health care plan and life insurance for eligible retirees. Other post-employment benefits are unfunded and are provided directly by the Company and each of its subsidiaries of the Petróleo Ipiranga group.

### **c) Information about pension and other post-employment benefits**

Net liabilities recorded as of June 30, 2007 are R\$40,379, of which R\$3,857 are accounted as current liabilities and R\$36,522 as noncurrent liabilities (R\$4,086 accounted as current liabilities and R\$47,267 as noncurrent liabilities as of December 31, 2006).

These additional retirement benefits were calculated in an actuarial evaluation.

Actuarial liabilities on June 30, 2007 maintaining the biometric assumptions and rates disclosed in the financial statements of December 31, 2006.

## **19. Shareholders equity**

### **a) Capital**

As of June 30, 2007, capital is represented by 29,600,000 shares without par value, of which 9,982,404 are common shares and 19,617,596 are preferred shares.

Preferred shares have no voting right, are entitled to dividends 10% higher than those paid on common shares, and have priority in the reimbursement in the event of liquidation.

**Table of Contents****b) Reserves**

|                                                                       | June 30,<br>2007 | December 31,<br>2006 |
|-----------------------------------------------------------------------|------------------|----------------------|
| Revaluation reserve:                                                  |                  |                      |
| Own assets                                                            | 6,186            | 6,186                |
| Profit reserves:                                                      |                  |                      |
| Legal                                                                 | 17,943           | 18,876               |
| For payment of dividends                                              |                  |                      |
| For working capital and conservation and improvement of installations |                  | 109,067              |
| Unrealized profit:                                                    |                  |                      |
| 2004                                                                  | 27,374           | 27,374               |
| 2005                                                                  | 21,941           | 19,165               |
| 2006                                                                  | 28,856           | 28,960               |
|                                                                       | 96,114           | 203,442              |

The Extraordinary Shareholders Meeting, held on April 18, 2007, approved the capital increase from R\$365 million to R\$475 million, incorporating the total of the profit reserve working capital (R\$109.067 thousand) and part of the profit reserve legal reserve (R\$933 thousand).

The Extraordinary Shareholders Meeting held on April 26, 2006 approved an increase in the Company's capital from R\$180,000 to R\$365,000, through the capitalization of profit reserves, with the issuance of 14,800,000 new shares, of which 4,991,202 are common shares and 9,808,798 are preferred shares, distributed for free to shareholders at a ratio of one new share for each share of the same type they held on the date of the meeting.

**c) Distribution of dividends**

Shareholders are annually entitled to receive mandatory minimum dividends, corresponding to 30% of net income, after allocation of 5% to the legal reserve. Preferred shareholders are entitled to receive dividends or interest on capital 10% higher than those paid on common shares. Said dividends are calculated based on article 202 of Law No. 6404/76.

**20. Collaterals and guarantees**

The Company provides collaterals and guarantees for some loan operations conducted directly or indirectly by certain subsidiaries and other related parties.

**Table of Contents**

As of June 30, 2007 and December 31, 2006 amounts referring to the operations guaranteed by the Company are as follows:

| <b>Guaranteed Company</b> | <b>June 30,<br/>2007</b> | <b>December 31,<br/>2006</b> | <b>Maturity</b> |
|---------------------------|--------------------------|------------------------------|-----------------|
| DPPI                      | 441                      | 646                          | 2010            |

**21. Financial instruments**

In accordance with CVM Instruction No. 235/95, the Company and its subsidiaries estimated the fair value of their financial instruments, using available market information and appropriate estimation methodologies. However, both the interpretation of market data and the selection of estimation methodologies require reasonable judgment and estimates to determine the most adequate realizable value. Accordingly, the estimates presented are not necessarily indicative of the amounts that could be obtained in active market trading. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair values. Book values of financial instruments approximate their fair value.

The Company and its subsidiaries conduct transactions involving financial instruments, all of which are recorded in balance sheet accounts, and are intended to meet their needs and reduce the exposure to credit, market, and currency risks. Management of these risks is performed by establishing strategies and control systems and setting position limits.

The main risks affecting the Company's business are as follows:

**a) Currency risk**

This risk arises from the possibility of the Company incurring material losses because of exchange rate fluctuations, which may affect the balances of foreign currency-denominated loans and financing.

F-271

**Table of Contents****b) Credit risk**

This is the risk of the Company incurring losses due to customers' failure to pay accounts and financing. The Company reduces this risk by means of a credit policy and by obtaining collaterals for supply agreements signed with its customers for significant balances.

**c) Price risk**

The oil refining activity is subject to this risk when variations in the price of petroleum in the market are not transferred to petroleum products. To reduce this risk, the Company has been seeking alternatives with the Federal Government and Petrobras, as further described in Note 1.

**d) Financial income (expenses)**

|                          | June 30,<br>2007 | June 30,<br>2006 |

**22. Insurance**

The Petróleo Ipiranga companies have an insurance and risk management program that allows coverage and protection for all their insurable assets, including insurance coverage for risks of disruption of production, by means of an operational risk policy with the domestic and foreign insurance companies through the Brazilian Reinsurance Institute (IRB).

The insurance coverages and limits are based on a detailed study of risks and losses performed by local insurance brokers, and the insurance contracted is considered sufficient to cover possible losses, considering the nature of the companies' activities.

The main insurance coverages are for operational risks, loss of profits, industrial and office multiperils, named risk-pools and civil liability.

**23. Subsequent events**

As mentioned in Note 1, in April of 2007 Ultrapar acquired the control of certain companies of Ipiranga Group. The acquisition process is structured in four stages. The first one was concluded in April 18 with the transfer of control. Currently the second stage of the process is being finished, which corresponds to the tag along public offering (OPA) by Refinaria de Petróleo Ipiranga S.A. (RPI), Distribuidora de Produtos de Petróleo Ipiranga S.A. (DPPI) and Companhia Brasileira de Petróleo Ipiranga (CBPI). In October 22, the public offerings of DPPI and RPI were carried out. The auction of CBPI is foreseen for November 8, 2007.

**Table of Contents**

**24. SUMMARY AND RECONCILIATION OF THE DIFFERENCES BETWEEN ACCOUNTING PRACTICES ADOPTED IN BRAZIL AND GENERALLY ACCEPTED ACCOUNTING PRINCIPLES IN THE UNITED STATES OF AMERICA**

**I Narrative description of GAAP differences**

The financial statements of the Company are prepared in accordance with Brazilian GAAP. Accounting policies, which differ significantly from U.S. GAAP, are summarized below:

**a) Inflation accounting**

Under Brazilian GAAP, the Company accounts for the effects of inflation in its financial statements prepared in accordance with Brazilian GAAP through December 31, 1995. Through December 31, 1995, the Company used for this remeasurement the Fiscal Reference Unit (UFIR), the index established by the tax authorities for preparation of financial statements under Brazilian Corporate Law as well as the index selected by the CVM.

The reconciliation presents the effect of adjusting property, plant and equipment for U.S. GAAP purposes through December 31, 1997. Under U.S. GAAP, management of the Company considers that Brazil was considered to be a highly inflationary economy until December 31, 1997 and, as such, property, plant and equipment should be adjusted for inflation through such date.

In determining amounts under U.S. GAAP, the effects of inflation for the years ended December 31, 1996 and 1997 were determined using the Índice Geral de Preços-Disponibilidade Interna-IGP-DI index, which is a widely-accepted and respected index published monthly by the Fundação Getúlio Vargas.

Because the Company's management believes that the IGP-DI is an appropriate and consistent measure of the general price inflation in Brazil and because of its availability, for U.S. GAAP purposes the Company adopted the IGP-DI for restatement of its financial statements also for periods through December 31, 1995, replacing the Government mandated index. As a result, property, plant and equipment have been monetarily adjusted for inflation using the IGP-DI since its acquisition through December 31, 1997.

**b) Reversal of fixed asset revaluation**

For U.S. GAAP reconciliation purposes, the revaluation of land recorded in the financial statements prepared in accordance with Brazilian GAAP have been eliminated in order to present fixed assets at historical cost less accumulated depreciation.

**c) Deferred charges**

Brazilian GAAP permits the deferral of pre-operating and industrial expansion expenses incurred in the construction or expansion of a new facility until the facility begins commercial operations. Deferred charges are amortized over 10 years and are recorded under deferred charges and other current assets.

For U.S. GAAP reconciliation purposes, they have been charged to income and the related amortization under Brazilian GAAP has been reversed for U.S. GAAP purposes.

**d) Investments in affiliated companies**

The Company accounts under Brazilian GAAP for its investments in CBPI and DPPI following the equity method of accounting. Brazilian corporate law allows certain less than 20% owned affiliated companies in which an investor owns more than 10% of voting stock to be accounted for under the equity method.

**Table of Contents**

For U.S. GAAP reconciliation purposes, the investment in DPPI on which the Company has a less than 20% voting interest and no ability to exercise significant influence, is not accounted following the equity method. Shares in DPPI, a publicly traded company, are considered available-for-sale securities.

In the reconciliation of equity, a reconciling item is recognized to adjust the investment in CBPI to its cost and subsequently to adjust, against other comprehensive income, the difference between cost and the fair value of the shares of DPPI based on its quoted market price as of each date. In the reconciliation of net income, equity in income of DPPI recorded under Brazilian GAAP is eliminated and gains are recorded for dividends received.

**e) Differences between Brazilian GAAP and U.S. GAAP of COPESUL**

As discussed in Note 4 under Brazilian GAAP as of June 30, 2006 and December 31, 2006, the Company proportionally consolidated COPESUL, a publicly traded company, in which its subsidiary IPQ holds an interest of 29.46%.

Under U.S. GAAP, proportional consolidation is generally not appropriate except in certain specific circumstances.

Under U.S. GAAP the investment in COPESUL would be accounted for using the equity method of accounting. This is a presentation difference that does not affect the net income or shareholders' equity as determined under U.S. GAAP.

The following table presents the amounts proportionally consolidated in the financial statements of the Company in Brazilian GAAP with respect to COPESUL:

|                                                   | <b>December 31,<br/>2006</b> |
|---------------------------------------------------|------------------------------|
| Current assets                                    | 200,887                      |
| Noncurrents assets                                | 192,125                      |
| <b>Total assets</b>                               | <b>393,012</b>               |
| Current Liabilities                               | 133,978                      |
| Noncurrent liabilities and shareholders' equity   | 259,034                      |
| <b>Total liabilities and shareholders' equity</b> | <b>393,012</b>               |

|                                            | <b>Six-months ended<br/>June 30, 2006</b> |
|--------------------------------------------|-------------------------------------------|
| Operating revenues                         | 469,941                                   |
| Operating income                           | 64,569                                    |
| Cash flow by operating activities          | 76,501                                    |
| Cash flow used in investing activities     | (10,626)                                  |
| Cash flow provided by financing activities | (59,848)                                  |

See item (h) below with respect to difference in net equity and net income of COPESUL between Brazilian GAAP and U.S. GAAP.

**f) Goodwill, acquisitions and business combinations**

Under Brazilian GAAP, assets and liabilities of entities acquired are reflected at book value. Goodwill is determined as the difference between the purchase price paid over the book value of net assets acquired. Goodwill is amortized on a straight-line basis over the periods estimated to be benefited, not exceeding ten years.

**Table of Contents**

The most significant business combinations entered into by the Company are:

In 1998 the subsidiary Ipiranga Química S.A. acquired an additional 46% interest in IPQ for a total purchase price of R\$174,806 resulting in goodwill at the date of the transaction of R\$113,062 under Brazilian GAAP. As a result of this acquisition, Ipiranga Química S.A. increased its interest in IPQ to 54.08%.

In May 2003, Ipiranga Química S.A. made a capital contribution to IPQ. Under Brazilian GAAP, such transaction has generated goodwill at the date of the transaction in the amount of R\$ 67,401 and resulted in an increase of its interest in IPQ to 88.48%.

In December 2006, IPQ redeemed the shares held by International Finance Corporation IFC which were canceled. As per the cancellation of shares, the Company increased its indirect interest in IPQ to 92.39% and recorded a loss in the amount of R\$32,964, as per Brazilian GAAP since the purchase price per share paid to redeem the shares exceeded the book value per share. No goodwill was recorded under Brazilian GAAP for this transaction.

In 2007 the subsidiary EDSP 67 Participações S.A. acquired an interest of 7,61% in IPQ for a total purchase price of R\$117,937 resulting in goodwill at the date of the transaction of R\$68,529 under Brazilian GAAP.

The Company acquired of all outstanding shares of Forlab Chitec S.A. Comércio Internacional ( Forlab ) that resulted in goodwill of R\$6,823 recorded as Goodwill as of December 31, 2005 and reclassified to Deferred Charges upon merger of Forlab into the Company. No significant difference resulted from the acquisition of Forlab between Brazilian GAAP and U.S. GAAP.

During 2000, IPQ acquired additional interests of 1.85% in COPESUL that resulted in the recognition of goodwill of R\$11,989 which is fully amortized in all the periods presented. No goodwill resulted from this acquisition under U.S. GAAP.

Goodwill, net of accumulated amortization, as of June 30, 2007 and as of December 31, 2006 under Brazilian GAAP is composed as follows:

|                      | June 30,<br>2007 | December 31,<br>2006 |
|----------------------|------------------|----------------------|
| Goodwill related to: |                  |                      |
| IPQ                  | 117,075          | 62,284               |
| Forlab               | 5,856            | 6,197                |
| Total                | 122,931          | 68,481               |

Under U.S. GAAP, business combinations are accounted for following the purchase method of accounting. Under the purchase method assets and liabilities of the business acquired are recorded, to the extent of the percentage acquired, using fair values. Goodwill is determined as the difference between purchase price consideration and the fair value of assets acquired and liabilities assumed. If there is an excess of the fair value of net assets acquired over the purchase price such amount is used to reduce the carrying value of noncurrent assets. As from January 1, 2002 goodwill is not amortized but tested, at least annually, for impairment.

The reconciliation of net equity between Brazilian GAAP and U.S. GAAP presents, for each business combination: (i) the reversal of the balance of goodwill recorded under Brazilian GAAP at each balance sheet date, (ii) the recognition for U.S. GAAP purposes of the difference resulting from adjusting assets and liabilities of the entity acquired at fair value, most significantly property, plant and equipment and the equity investment of IPQ in COPESUL (iii) the recognition of resulting goodwill under U.S. GAAP, and (iv) the related deferred taxes.

---

## **Table of Contents**

The reconciliation of net income between Brazilian GAAP and US GAAP presents: (i) the reversal of goodwill amortization recorded under Brazilian GAAP, (ii) the recognition in income of adjustments of assets and liability at fair value, mostly depreciation of property, plant and equipment and equity in COPESUL and (iii) the related deferred tax effects.

### **g) Pension and other post-employment benefits**

#### **g.1) Pension benefits**

Pension benefit obligations for Brazilian GAAP should be accounted for following CVM Instruction No. 371 /00, which requires the mandatory, application of Brazilian Accounting Standard IBRACON NPC 26. Under IBRACON NPC 26 the Company has accounted for the plan administered by FFMB (and to which several Petróleo Ipiranga companies contribute) by recognizing a percentage attributed to the Company of the funded status and of the cost of the plan.

Under U.S. GAAP, considering that the financial information of the Company does not consolidate all the sponsors of the FFMB Benefit Plan and such financial information does not represent the financial statements of the parent company of the Petróleo Ipiranga companies, the Company has accounted for its participation in the pension plan administered by FFMB as if it were a multi-employer plan.

As a result, the reconciliation presents: (a) the reversal of the pension plan asset/liability recognized for Brazilian GAAP as of each reporting date and the reversal of the related pension cost, and (b) the recognition as expense of the contribution due to the plan over the corresponding period.

#### **g.2) Other post-retirement benefits**

As explained in Note 18, the accompanying financial statements account for other post-retirement benefits following IBRACON NPC 26. Other post-retirement benefits are unfunded and are the sole responsibility of each Petróleo Ipiranga company. Under IBRACON NPC 26 actuarial gains and losses are deferred and recognized in income over the estimated remaining service period of the employees to the extent that those actuarial gains and losses exceed 10% of the higher of the plan assets and the projected benefit obligation.

Under U.S. GAAP such benefits are accounted for following SFAS No. 106, *Employers' Accounting for Post-retirement Benefits Other Than Pensions*, and, as from December 31, 2006, following SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Post-retirement Plans-an amendment of FASB Statements Nos. 87, 88, 106 and 132(R)*. Under SFAS No. 158 the funded status of the other post-retirement benefits must be recognized as a liability with an offsetting amount in accumulated other comprehensive income. As required by SFAS No. 158, provisions of SFAS No. 158 were applied on a prospective basis as from December 31, 2006.

Although projected benefit obligations are the same under Brazilian GAAP and U.S. GAAP, differences arise in the amounts recorded in the financial statements as a result of: (i) the date of initial measurement of funded status is different for Brazilian GAAP and U.S. GAAP and that under Brazilian GAAP there is no requirement to recognize a liability for unfunded plans, and (ii) the recognition as from December 31, 2006 as a liability for U.S. GAAP purposes of the funded status against accumulated other comprehensive income.

### **h) U.S. GAAP adjustments on net equity and net income of affiliates**

#### **h.1) COPESUL**

Until April 18, 2007, COPESUL-Companhia Petroquímica do Sul was accounted for using proportional consolidation under Brazilian GAAP.

Under U.S. GAAP, the investment in COPESUL would be accounted for using the equity method of accounting.

## **Table of Contents**

Differences between net equity and net income of COPESUL between Brazilian and U.S. GAAP correspond mainly to: inflation accounting, reversal for U.S. GAAP of revaluation of property, plant and equipment, capitalization of interest on property, plant and equipment, accounting for pension benefits, accounting for deferred charges, recognition of tax incentives, accounting for derivative financial instruments, and accounting for the provision for programmed maintenance.

The net effects of those adjustments are presented in the reconciliation to U.S. GAAP.

### **h.2) CBPI**

CBPI is accounted under the equity method under Brazilian GAAP and would also be accounted following the equity method under U.S. GAAP.

Differences between net equity and net income of CBPI between Brazilian and U.S. GAAP correspond mainly to: inflation accounting, capitalization of interest on property, plant and equipment, accounting for pension and other post-employment benefits, asset retirement obligation, derivative financial instruments, goodwill and business combinations, and gain on change in interest in subsidiaries.

The net effects of those adjustments are presented in the reconciliation to U.S. GAAP.

### **i) Fair value of guarantees under FIN 45**

Under Brazilian GAAP, the Company is not required to record any liability related to guarantees given to third parties unless contingent obligations to make future payments under the guarantees are probable.

Under Brazilian GAAP, as of June 30, 2007 and December 31, 2006, the Company has not recorded any liability related to these guarantees.

Under U.S. GAAP, the Company recognizes, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing guarantees in accordance with FIN 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. In the event that, at inception of the guarantee, the Company is required to recognize a liability under SFAS No. 5,

*Accounting for Contingencies*, the liability initially recognized would be the greater of: (a) the amount of fair value of the value of the obligation undertaken in issuing guarantee, or (b) the contingent liability amount required to be recognized at inception of the guarantee by applying SFAS No. 5.

Guarantees granted include those disclosed in Note 20 as well as guarantees provided to financial institutions that finance sales to selected customers under the vendor program. Under the vendor program the Company is the secondary obligor to the financial institutions.

### **j) Valuation allowance for deferred taxes**

Under Brazilian GAAP, deferred income tax is recognized based on the amount of future expected taxes to be paid. Deferred income tax assets related to deductible temporary differences (expenses that are accrued but not deductible until future periods) or tax loss carryforwards are recognized when there is a reasonable certainty that the Company will generate profits against which it can offset such an asset. A valuation allowance is recorded when it is probable that such deferred tax assets will be realized limited to the amount expected to be realized in the following 10 years.

Under U.S. GAAP, deferred income tax assets related to deductible temporary differences or tax loss carryforwards are recognized and, if necessary, a valuation allowance is recorded if it is more likely than not that such assets will not be realized.

---

## **Table of Contents**

As of result of such differences as of June 30, 2007 and December 31, 2006 the amount of deferred tax asset recognized under Brazilian GAAP for the subsidiary IPQ was less the total amount of deferred tax assets resulting in having a partial valuation allowance over deferred tax assets.

Under U.S. GAAP a prescriptive time limit (such as the 10 years existing in U.S. GAAP) does not exist and management considers more likely than not that as of June 30, 2007 and December 31, 2006 all deferred tax assets will be realized. For that reason the reconciliation of shareholders equity presents a reversal of the partial valuation allowance recognized under Brazilian GAAP in the amount of R\$ 161,534 as of June 30, 2007 and R\$169,950 as of December 31, 2006.

### **k) Accounting for convertible debentures issued by IQ and warrants purchased by the Company**

#### **k.1) Accounting for convertible debentures issued by IQ**

Under Brazilian GAAP, convertible debentures issued by Ipiranga Química S.A. described in Note 8 are accounted for as a single instrument at its cost plus accrued interest following the contractual terms.

Under U.S. GAAP the Company has concluded that the non-detachable conversion option included in the convertible debentures issued by IQ does not meet the definition of a derivative under SFAS 133 Accounting for Derivative Instruments and Hedging Activities, as amended and interpreted. Also, the Company concluded that the conversion option did not have, as of the date of issuance, intrinsic value, therefore, the total amount of the proceeds has been allocated to the convertible debenture. This has resulted in no difference between Brazilian GAAP and U.S. GAAP with respect to the accounting of the convertible debenture issued by IQ until the modification of its terms.

#### **k.2) Accounting for the modification of terms of the debentures and issuance of warrants**

In October 2005, a modification was introduced in the terms of the debentures such that they were modified from convertible to non-convertible; no other term of the debentures has been modified. At the same moment, IQ issued to the holders of the debentures, detachable warrants which allow the holders of the warrants to acquire shares of IQ in the exact same terms as the previously existing non-detachable conversion option included in the debentures.

Under Brazilian GAAP, warrants are not separately recorded. The modification of the terms of the debentures and the issuance of warrants in October 2005 did not have any impact in the accounting for the debentures (which were originally convertible and in October 2005 were modified to non-convertible) under Brazilian GAAP which continued to be accounted for at its cost plus accrued interest and warrants issued by IQ are not accounted for. For U.S. GAAP purposes, the Company has concluded that the elimination of the conversion feature previously included in the debentures results in a substantial modification under EITF 06-06 Debtor's Accounting for a Modification (or Exchange) of Convertible Debt Instruments. The Company has concluded that the warrant do not qualify to be accounted in equity and should be accounted for as a liability.

For U.S. GAAP, upon modification the Company recognized an asset for the estimated fair value of the warrants as of the date of modification as it cost on the non-convertible debenture issued at such time.

#### **k.3) Accounting for the purchase of warrants by the Company**

Contemporaneously with the modification of the terms of the debenture and the issuance of warrants, the Company acquired the warrants received by DPPI for R\$29 million. The Company accounts for the warrants issued by its subsidiary IQ as an asset at its cost. Warrants issued by IQ and held by the Company are eliminated in consolidation as of December 31, 2006 and for the six-month period ended June 30, 2006.

**Table of Contents****V - Additional disclosures required by U.S. GAAP****a) Earnings per share**

Under Brazilian GAAP, net income per share is calculated by dividing net income by the number of shares outstanding at each balance sheet date. In these financial statements, information is disclosed per lot of one thousand shares, because this is the minimum number of shares that can be traded on the Brazilian stock exchanges.

Under U.S. GAAP, earnings per share are retroactively restated to reflect in all periods presented the effect of stock dividends. As disclosed in Note 19 in April 2006 the Company approved a stock dividend and earnings per share have been retroactively restated to reflect the effect of such stock dividend.

Since preferred and common shareholders have different dividends rights (see Note 19), basic earnings per share have been calculated using the two-class method for U.S. GAAP purposes.

The following table provides a reconciliation of the numerators and denominators used in computing earnings per share as required by SFAS No. 128:

|                                                                          | <b>For the period ended June 30, 2007</b> |                  |              |

**b) Statement of cash flows**

Brazilian GAAP does not require the presentation of a statement of cash flows as required by U.S. GAAP. Changes in working capital are presented in the statement of changes in financial position. U.S. GAAP requires the presentation of a statement of cash flows describing the Company's cash flows from operating, financing and investing activities. Statements of cash flows derived from the information based on Brazilian GAAP are as follows:

**DISTRIBUIDORA DE PRODUTOS DE PETRÓLEO IPIRANGA S.A. AND SUBSIDIARIES**

**NOTES TO THE UNAUDITED INTERIM CONSOLIDATED FINANCIAL INFORMATION**

**FOR THE PERIODS ENDED JUNE 30, 2007 AND 2006**

**(Amounts in thousands of Brazilian reais - R\$, unless otherwise stated)**

**1. Operations**

Distribuidora de Produtos de Petróleo Ipiranga S.A. (the Company) is a public company whose shares are traded on the São Paulo Stock Exchange (BOVESPA). Until April 18, 2007, the Company was controlled by members of the Bastos, Mello, Ormazabal, Tellechea and Gouvêa Vieira families.

On April 18, 2007, Ultrapar Participações S.A. (Ultrapar), for itself and also as commission agent of Petróleo Brasileiro S.A. (Petrobras) and Braskem S.A. (Braskem), acquired from the controlling shareholders of the Petróleo Ipiranga companies, 66.2% of the common shares and 13.9% of the preferred shares issued by Refinaria de Petróleo Ipiranga S.A. (RPI), 69.2% of the common shares and 13.5% of the preferred shares issued by the Company and 3.8% of the common shares and 0.4% of the preferred shares issued by Companhia Brasileira de Petróleo Ipiranga (CBPI).

The Company, and its subsidiaries are engaged in the distribution of petroleum and related products, convenience stores and also hold non-controlling interests in companies engaged in the chemical and petrochemical business.

**2. Presentation of consolidated financial statements**

These financial statements were prepared in accordance with accounting practices adopted in Brazil (Brazilian GAAP). The financial statements presented herein are different from the ones prepared by the Company for statutory purposes because they do not include the holding Company's stand-alone financial statements, have been adjusted with respect to the financial statements for statutory purposes to include in Note 25 a reconciliation of net equity and net income between the amounts under Brazilian GAAP and generally accepted accounting principles in the United States of America (U.S. GAAP) and have also been adjusted to present certain additional disclosures to facilitate their understanding by readers not familiar with Brazilian GAAP.

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosures of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Significant estimates include, but are not limited to, estimates relating to the useful lives of property, plant and equipment, accounting for contingencies and provisions for income taxes among others. Actual results could differ in relation to these estimates.

**3. Summary of significant accounting practices**

The accounting practices adopted in Brazil (Brazilian GAAP) to record transactions and prepare the consolidated financial statements comply with those prescribed by Brazilian corporate law and specific standards established by the Brazilian Securities Commission (CVM), which differ in certain respects from U.S. GAAP. See Note 25 for further discussions of these differences and a reconciliation of shareholders' equity and consolidated net income between Brazilian GAAP and U.S. GAAP.

The following is a summary of significant accounting policies followed in the preparation of the accompanying consolidated financial statements:

**a) Cash and cash equivalents**

Cash and cash equivalents comprise highly-liquid temporary cash investments (with maturities of 3 months or less when acquired and readily convertible to cash).

## **Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

### **b) Allowance for doubtful accounts**

The Company has individual customer credit information, which is used to assess customer ability to pay. The allowance is recorded in an amount considered sufficient by management to cover probable losses on the realization of accounts receivable.

### **c) Inventories**

Stated at the lower of average acquisition or production cost or net realizable value.

### **d) Investments in affiliates and goodwill**

Accounted following the equity method with a corresponding entry to operating income.

Goodwill on the acquisition of subsidiaries is amortized over 10 years based on the estimated period of realization.

### **e) Property, plant and equipment**

Stated at acquisition or construction cost, monetarily adjusted through December 31, 1995. Depreciation is calculated following the straight-line method based on the estimated economic useful lives of the assets. Leasehold improvements are depreciated over the term of the agreement or the economic useful lives of the assets, whichever is shorter.

### **f) Loans and financing**

Stated at the amount of principal, plus financial charges incurred on a pro rata basis through the balance sheet date. Foreign currency-denominated loans were converted into Brazilian Reais at the exchange rates prevailing at the balance sheet date.

### **g) Income and social contribution taxes**

Tax expense is calculated based on the income tax rate of 15% plus a 10% surtax and social contribution tax rate of 9%.

### **h) Deferred income and social contribution taxes**

Calculated on temporary differences and on tax loss carryforwards using the income tax and social contribution tax rates effective for the period in which the tax effects are expected to be realized.

Deferred income and social contribution tax assets are only recognized up to the amount that is likely to be realized within the next 10 years, as established by CVM Instruction No. 371/02.

### **i) Provision for contingencies**

Recorded for contingent risks whose likelihood of loss is probable, based on the opinion of management, and inside and outside legal counsel. The provision is recorded based on the estimated losses upon the final resolution of lawsuits.

## **Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

### **j) Interest on capital**

Interest on capital can be paid by Brazilian companies in lieu of, or in addition to, mandatory dividend stipulated by the respective company's bylaws. Interest on capital is calculated within the limits established by Law No. 9,249/95 for a maximum amount computed as the TJLP (long term interest rate) applied on the respective shareholders' equity.

Interest on capital received from affiliates is recorded as a receivable. Interest on capital payable, since it represents in essence dividends, is recorded as a reduction in Retained earnings.

### **k) Pension and other post-employment benefits**

Pension and other post-employment benefit liabilities to employees, retirees and pensioners (net of the assets of the plans) are recorded based on the actuarial calculation prepared by an independent actuary, using the Projected Unit Credit Method.

### **l) Other assets and liabilities**

Other assets and liabilities, classified as current and noncurrent, are stated at realizable or estimated settlement amounts. These assets and liabilities are stated at cost or realizable value and known or estimated amounts, respectively, including, when applicable, interest and monetary and exchange rate variations.

### **m) Results of operations**

Revenue from sale of products is recognized when significant risks and benefits related to the product ownership pass to customer. Other income, expenses and costs are recognized when incurred and/or realized. The result includes interest and monetary and exchange rate variations, at contractual indexes or official rates, applicable to current and noncurrent assets and liabilities and, when applicable, the effects of adjustments of assets to their net realizable value.

Sales incentives are generally recognized as expenses and include, but are not limited to, discounts and rebates. Volume-based incentives payable in cash include amounts paid in advance with the commitment of the customer to reach specified minimum volumes over a certain period of time and incentives are payable only after the minimum volumes have been met in a defined period of time. Volume-based incentives paid in advance are recognized as assets and subsequently recorded as cost of revenues in the statement of income over the period of the commitment of minimum sales. Volume-based incentives payable only after meeting the minimum volume are recognized as expense, at the moment when the target volume has been achieved.

(\*) The Company holds 22,264 thousand common shares out of the total 35,409 thousand common shares of Companhia Brasileira de Petróleo Ipiranga, corresponding to 62.88% of the voting capital.

(\*\*) The subsidiary CBPI holds a 34% interest totalling an interest of 50% in these consolidated financial statements, and União de Bancos Brasileiros S.A.-UNIBANCO holds another 50% interest. Maxfácil was incorporated by the Company and CBPI, which contributed a nominal amount of capital. Subsequently, UNIBANCO contributed in cash the amount of R\$ 171 million for a 50% interest resulting in the recognition by the Company of a gain in change of interest of R\$ 85,494, as of December 31, 2006. Maxfácil is a joint-venture whose business purpose is to offer financial services to the customers and distributors of Ipiranga products for a period of 10 years. Maxfácil is proportionally consolidated.

(\*\*\*) Incorporated during 2006.

The following practices were adopted in the preparation of the consolidated financial statements:

- (a) The Company and its subsidiaries adopt similar accounting practices to record their operations.
- (b) Intercompany balances, transactions and unrealized profits have been eliminated; and
- (c) Minority interest in fully-consolidated subsidiaries is presented in a separated caption.

Noncurrent portion is mainly represented by customers financing. Under customers financing, cash loans are provided to gas stations using the Ipiranga brand. Such loans are generally used by the gas stations to finance renovation and modernization of fuel stations, as well as for working capital including acquisition of products and investing in marketing. Customers financing carries interest of 1% per month.

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

(a) Debentures issued by Ipiranga Química in 2003

The Extraordinary Shareholders Meeting of Ipiranga Química S.A. ( IQ ) held on May 26, 2003 approved the issuance of two series of private convertible debentures, consisting of 11,000 Series A debentures, with face value of R\$ 10 each, amounting to R\$ 110,000, and 80,000 Series B debentures, with face value of R\$ 1 each, amounting to R\$ 80,000. Both series of debentures mature on June 1, 2008.

On June 12, 2003, the Company fully subscribed the Series A and its subsidiary CBPI fully subscribed the Series B.

The subscribed debentures pay interest based on the CDI interest rate, plus spread subject to renegotiation every 6 months (for Series A) and every 5 months (for Series B) as established by the indenture dated June 1, 2003.

The spread for Series A debentures is 1.0% per year as from December 1, 2005. The spread for Series B debentures is 1.0% per year.

Debentures are convertible into common shares of Ipiranga Química S.A. at any time after its issuance and until its maturity or redemption at the option of the holder.

The conversion price is a fixed amount established in the indenture of the debentures. However, the quantity of common shares to be received upon conversion will be higher than the amount determined as the face value of the debentures divided by the conversion price. No conversion has occurred to date. The quantity of additional shares to be received will be 25% if converted up to June 1, 2004, 18.2177% if converted before June 1, 2005, 11.8034% if converted before June 1, 2006 and 5.7371% if converted before June 1, 2007 no conversion has occurred to date.

In 2007, after partial redemptions performed by IQ as described below, the Company remains with 2,489 nonconvertible debentures. During the period, the interest income over the referred debentures was R\$3,299 as of June 30, 2007 (R\$13,999 as of June 30, 2006).

(b) Early partial redemption of the debentures in 2006 and 2007

The shareholders meetings of Ipiranga Petroquímica S.A. ( IPQ , a subsidiary of IQ) held on April 28, 2006 approved the payment of supplementary dividends and a capital reduction, scheduled for June 13, 2006 and July 31, 2006, respectively. Considering that IQ, due to its interest in IPQ, received funds on said dates, the Board of Directors of IQ, at a meeting held on May 2, 2006 resolved that IQ would partially early redeem its debentures, which were issued on June 1, 2003 due to the financial cost of this debt.

As a result, in 2006, IQ partially amortized 71.6% of the Series A debentures, subscribed by the Company, in the amount of R\$ 135,695 and of 71.6% of the Series B debentures, subscribed by CBPI, in the amount of R\$ 101,062 (there was no amortization in 2005). In February 2007, IQ performed a partial redemption of Serie B Debentures subscribed by DPPI in an amount of R\$ 12,206.

(c) Modification of terms of the debentures and sale of warrants by the Company

Pursuant to a Memorandum of Understanding signed on October 3, 2005, the Company, CBPI and Refinaria de Petróleo Ipiranga S.A. (the controlling shareholder of IQ) agreed to hold an Extraordinary Shareholders Meeting of IQ to approve a change in the type of debentures issued by IQ on June 1, 2003.

The changes approved on the meeting held on October 6, 2005 were: (i) to change the debentures from convertible to nonconvertible without making any other change in the terms or conditions of the debentures, and (ii) the issuance of warrants to the holders of the debentures, without any charge, replacing the conversion right established for the debentures; the terms of the warrants allow their holder to purchase common shares of IQ in exactly the same terms than the conversion features originally included in the debentures.

Subsequently, on December 1, 2005, a Sale Agreement was signed whereby the Company sold for R\$ 29.0 million to Refinaria de Petróleo Ipiranga S.A. the warrants it has obtained. The amount for the sale

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

of the warrants is payable on October 3, 2007, and carries interest at the CDI interest rate. During the period, interest income on such receivable amounted to R\$1,814 (R\$1,943 in the six-month period of 2006).

The Company recognized in 2005 income on the sale of warrants in the amount of R\$ 29 million.

(d) The acquisition of goods from Refinaria de Petróleo Ipiranga S.A. includes taxes calculated based on tax substitution, which are not considered income for Refinaria de Petróleo Ipiranga S.A.

(e) Warrants

However, upon completion of Company's acquisition process, as further described in Note 1, these warrants should be fully transferred to Braskem and Petrobras, at no value, based on the terms of the agreement entered into by Ultrapar, Braskem and Petrobras.

## (i) Impairment on investment in Termogaúcha and liquidation

At the Extraordinary Shareholders' Meeting held on September 12, 2006, the shareholders of Termogaúcha approved its liquidation, considering the conditions of natural gas supply and higher costs of maintenance, preservation and storage of the already acquired generating equipment. The Company recorded a provision for impairment in the equity investee of R\$ 64,541. On the same date, the Extraordinary Shareholders' Meeting approved a capital increase in Termogaúcha and the subsidiary CBPI paid R\$ 3,850, corresponding to several advances for future capital increase, which were previously recorded in noncurrent assets.

On December 14, 2006, a new Extraordinary Shareholders' Meeting of Termogaúcha approved the distribution of cash (resulting from the liquidation process) to the shareholders, under article 215 of the Brazilian corporate law. The subsidiary CBPI received R\$ 24,396.

- (ii) During 2006, the Company recognized a full impairment on the goodwill of TSB for R\$ 2,164. On April 2007, the subsidiary CBPI acquired an additional 5% of TSB shares, generating a goodwill of R\$2.274, which was written off as of June 30, 2007 based on an impairment test.

(\*) TJLP Noncurrent interest rate

(\*\*) CDI Interbank Deposit Rate

(a) On August 1, 2003, CBPI issued US\$ 135 million in notes in the international market. On August 1, 2005, when interest increased from 7.875% per year to 9.875% per year, some of the holders decided to early redeem their notes in the amount of US\$ 1,285 or R\$ 3,072. In 2006, the subsidiary made an offer to repurchase the notes, as a result of which there was a partial redemption in the amount of US\$ 79,574 or R\$ 164,877.

(b) On April 18, 2006, CBPI registered with the Brazilian Securities Commission (CVM) a public offering of 35,000 debentures, of a single series, nonconvertible, with face value of R\$ 10 each, which was issued on April 1, 2006, in the amount of R\$ 350,000. The debentures mature on April 1, 2011 with principal repaid in three annual installments. They pay interest, from the issuance date, on their unit face value, of 103.80% of the daily average rate of interbank deposits ( Taxa DI over extra grupo ), disclosed by the Clearinghouse for the Custody and Financial Settlement of Securities (CETIP). Interest is payable every 6 months from the issuance date of the debentures.

The noncurrent portion matures as follows:

|      | June 30,<br>2007 | December 31,<br>2006 |
|------|------------------|----------------------|
| 2008 | 214,256          | 221,835              |
| 2009 | 130,494          | 128,178              |
| 2010 | 121,943          | 126,085              |
| 2011 | 117,759          | 118,723              |
|      | 584,452          | 594,821              |

|                         | 96,505           | 55,772               |

**16. Contingencies****a) Probable losses**

A provision was recognized to cover probable losses estimated by management, supported by external and internal legal counsel, arising from the following lawsuits:

|                | June 30,<br>2007 | December 31,<br>2006 |
|----------------|------------------|----------------------|
| Tax lawsuits   | 74,032           | 76,079               |
| Civil lawsuits | 6,988            | 5,759                |
| Labor lawsuits | 15,238           | 12,576               |
| Total          | 96,258           | 94,414               |
| (-) Current    | 37,268           | 35,397               |
| Noncurrent     | 58,990           | 59,017               |

**Tax lawsuits**

Tax lawsuits of the subsidiaries referred mainly to: (1) requirement of reversal of credits for ICMS on the provision of proper transportation services during the period the system of freight reimbursement by DNC (currently National Oil, Natural Gas and Biofuel Agency-ANP) was in effect and, although the freight reimbursements have always been made by DNC without the ICMS amount, previous court decisions have been unfavorable to the Company's arguments; (2) requirement of ICMS/Tax Substitution on interstate sales to end consumers under ICMS Agreement No. 105/92, subsequently amended by Agreement No. 112/93, in which the STF (Federal Supreme Court) resolved the matter, defining that the ICMS on fuel belongs to the State that consumes the fuel, even if the fuel is sold to the end consumer; (3) requirement of reversal of credits for ICMS, in Minas Gerais State, on interstate shipments made pursuant to article 33 of ICMS Agreement No. 66/88, which allowed the maintenance of the credit and which was suspended by an injunction granted by the STF; and (4) assessments due to undue deduction of discounts from the ICMS tax basis, in Minas Gerais State, owed on a tax substitution basis.

**Civil lawsuits**

Civil lawsuits of the Company and its subsidiaries are mostly related to lease and supply agreements entered into with customers and indemnity claims arising from these agreements and civil liability.

**Labor lawsuits**

Labor lawsuits of the Company and its subsidiaries refer mainly to lawsuits filed by former employees and outsourced professionals claiming payroll charges, such as overtime, hazardous duty premium, etc.

F-305

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

**b) Possible losses**

Lawsuits for which management assessed the probability of loss as possible, based on the opinion of its internal and external legal counsel, are not accrued in the financial statements and are composed of:

|                | <b>June 30,<br/>2007</b> | <b>December 31,<br/>2006</b> |
|----------------|--------------------------|------------------------------|
| Tax lawsuits   | 295,565                  | 253,629                      |
| Civil lawsuits | 74,789                   | 69,687                       |
| Labor lawsuits | 15,615                   | 15,083                       |
| Total          | 385,969                  | 338,399                      |

**Tax lawsuits**

Tax lawsuits of the Company and its subsidiaries included in this classification refer mainly to: (1) requirement of reversal of credits for ICMS on operations with anhydrous alcohol in São Paulo State; (2) requirement of reversal of credits for ICMS, supposedly transferred to third parties at amounts higher than that allowed by São Paulo State legislation; (3) requirement of IRRF (withholding income tax) on payment of interest on capital made to pension plan entities; (4) requirement of INSS (social security contribution) supposedly due by third parties and service providers engaged who did not present clear evidence of payment of their obligations, causing the Company to be jointly liable for this tax; (5) non-approval of the offset of IPI credits recorded on the receiving of inputs subject to taxation whose subsequent shipments were tax immune; and (6) assessment due to invoices issued without fiscal delivery of the good (anhydrous alcohol) in operations in São Paulo State.

**Civil lawsuits**

Civil lawsuits of the Company and its subsidiaries are mostly related to indemnity claims arising from lease and supply agreements, commercial and service agreements.

**Labor lawsuits**

Labor lawsuits of the Company and its subsidiaries refer to lawsuits filed by former employees and outsourced professionals claiming specific payroll benefits, lawsuits filed by former employees, outsourced professionals and employees of gas stations that are customers of the Company, related to payroll charges, such as overtime, hazardous duty premium, etc., which are in progress at the stage of providing evidence, without a decision having been reached yet.

**c) Contingent assets**

The Company and its subsidiaries filed judicial and/or administrative proceedings with Federal and State tax authorities to recover taxes unduly paid or overpaid. These proceedings, when concluded, may represent income that, due to its contingent nature, is not recorded in the financial statements.

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

Due to the progress of lawsuits and based on their legal counsel's opinion, the companies' management assessed the likelihood of a favorable outcome in the aforementioned lawsuits as probable or possible, depending on the specific circumstances. As of June 30, 2007 and December 31, 2006 said lawsuits may be summarized as follows:

|                                                     | June 30,<br>2007 | December 31,<br>2006 |
|-----------------------------------------------------|------------------|----------------------|
| <b>Federal level</b>                                |                  |                      |
| Corporate income tax-rate increase                  | 7,241            | 7,087                |
| FGTS (severance pay fund)-refund of tax             | 300              | 263                  |
| National Telecommunication Fund                     | 4,927            | 2,077                |
| PIS/COFINS (taxes on revenue)-increase in tax basis | 35,802           | 34,747               |
|                                                     | 48,270           | 44,174               |
| <b>State level</b>                                  |                  |                      |
| State income surtax (AIRE)                          | 14,354           | 13,483               |

**17. Employee and management profit sharing**

Profit sharing is calculated based on net income for the year, after deducting accumulated deficit, if any, and provision for income and social contribution taxes, and is distributed as follows:

**a) Employee profit sharing**

Calculated based on 3% of net income from operations, which will be computed excluding income from investments in companies (recorded in the stand-alone individual statements of income of the Company as equity in subsidiaries and affiliates), amortization of goodwill or negative goodwill, sale or write-off of investments in companies and, interest paid or received by the Company as interest on capital.

**b) Management profit sharing**

At the discretion of the Board of Directors, management profit sharing will be calculated based on up to 10% of income after deducting employee profit sharing and cannot exceed the annual global compensation established at the Shareholders' Meeting.

**18. Provision for pension and other post-employment benefits****a) Pension benefits provided by Fundação Francisco Martin Bastos**

The Company, together with other Petróleo Ipiranga companies, sponsors Fundação Francisco Martins Bastos (FFMB), a closed pension entity that manages and operates pension plans for the employees of Petróleo Ipiranga companies.

The accumulated amount of the Company contributions, for the period ending June 30, 2007, for the pension plan was R\$ 5,011 (R\$5,483 in June 30, 2006).

**b) Other post-employment benefits**

According to CVM Resolution No. 371/2000, the Company, in addition to the pension plan, recognizes a provision for other post-employment benefits related to bonus for length of service, FGTS (severance pay fund), health care plan and life insurance for eligible retirees. Other post-employment benefits are unfunded and are provided directly by the Company and each of its subsidiaries of the Petróleo Ipiranga group.

F-307

## **Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

### **c) Information about pension and other post-employment benefits**

Net liabilities recorded as of June 30, 2007, are R\$ 81,408, of which R\$ 7,234 are accounted as current liabilities and R\$ 74,174 as noncurrent liabilities.

Actuarial liabilities on June 30, 2007, reflect the report drawn up by the independent actuary on May 30, 2007, maintaining the biometric assumptions and rates disclosed in the financial statements of December 31, 2006.

## **19. Shareholders equity**

### **a) Capital**

Capital stock as of June 30, 2007, is represented by 32,000,000 shares without par value, composed of 10,706,368 common shares and 21,293,632 preferred shares.

The Extraordinary Shareholders Meeting, held on April 18, 2007, approved the increase on the capital from R\$ 555,000 to R\$ 615,000, through capitalization of Profit reserve for working capital (R\$60,000).

Preferred shares have no voting rights and are entitled to dividends 10% higher than those paid on common shares and have priority in the distribution of dividends and in the reimbursement of capital, in the event of liquidation of the Company.

### **b) Reserves**

The company by law determine that the residual amount in the retained earnings account, after results distributions, shall be transferred to the working capital reserve, until the limit of the capital account. Eventual exceeds will be incorporated by the capital, through Ordinary Management Meeting approval of financial statements.

### **c) Distribution of dividends**

Shareholders are annually entitled to receive mandatory minimum dividends, corresponding to 30% of net income, after allocation of 5% to the legal reserve. Preferred shareholders are entitled to receive dividends or interest on capital 10% higher than those paid on common shares.

### **d) Interest on capital and dividends**

Interest on capital, in the amount of R\$ 55,761, was calculated as of December, 2006, according to the limits established by Law No. 9,249/95 and generated tax benefits of R\$ 18,959. No interest on capital was paid or declared for the period ended June 30, 2007.

In addition, dividends in the amount of R\$ 9,447 were paid on December 27, 2006. No dividends was paid or declared for the period ended June 30, 2007.

## **20. Collaterals and guarantees**

The Company provides collaterals and guarantees for some loan operations conducted directly or indirectly by certain subsidiaries, affiliates and other related parties.

- (3) Entity accounted by the Company following the equity method.

**21. Financial instruments**

In accordance with CVM Instruction No. 235/95, the Company and its subsidiaries estimated the fair value of their financial instruments, using available market information and appropriate estimation methodologies. However, both the interpretation of market data and the selection of estimation methodologies require reasonable judgment and estimates to determine the most adequate realizable value. Accordingly, the estimates presented are not necessarily indicative of the amounts that could be obtained in active market trading. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair values. Book values of financial interests appropriate their fair values.

The Company and its subsidiaries conduct transactions involving financial instruments, all of which are recorded in balance sheet accounts, and are intended to meet their needs and reduce the exposure to credit, market, and currency risks. Management of these risks is performed by establishing strategies and control systems and setting position limits.

The main risks affecting the Company's business are as follows:

**a) Currency risk**

This risk arises from the possibility of the Company incurring material losses because of exchange rate fluctuations, which may affect the balances of foreign currency-denominated loans and financing.

F-309

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

The exposure to fluctuations in exchange rates is as follows:

| Amounts in US\$ thousand | June 30,<br>2007 | December 31,<br>2006 |
|--------------------------|------------------|----------------------|
| Loans and financing      | 62,519           | 76,173               |
| Swap transactions        |                  | (10,759)             |
| <b>Net exposure</b>      | <b>62,519</b>    | <b>65,414</b>        |

Rates as of June 30, 2007 = R\$ 1.9262/US\$

Rates as of December 31, 2006 = R\$ 2.1380/US\$

**b) Credit risk**

This is the risk of the Company incurring losses due to customers' failure to pay accounts and financing. The Company reduces this risk by means of a credit policy and by obtaining collaterals for supply agreements signed with its customers for significant balances.

**c) Interest rate risk**

This risk arises from the possibility of the Company incurring losses due to interest rate fluctuations that increase interest expenses on loans and financing.

The Company continuously monitors the market interest rates in order to evaluate the need for hedging against the volatility of these rates.

**d) Financial income (expenses)**

|                                 | June 30,<br>2007 | June 30,<br>2006 |

**23. Insurance**

The Petróleo Ipiranga companies have an insurance and risk management program that allows coverage and protection for all their insurable assets, including insurance coverage for risks of production disruption by means of an operational risk policy traded in the domestic and foreign insurance markets through the Brazilian Reinsurance Institute (IRB).

The insurance coverages and limits are based on a detailed study of risks and losses performed by local insurance brokers, and the insurance contracted is considered sufficient to cover possible losses, considering the nature of the companies' activities.

The main insurance coverages are for operational risks, loss of profits, industrial and office multiperils, named risk-pools and civil liability.

**24. Subsequent events****Ipiranga acquisition Tag alongs**

As mentioned in Note 1, in April of 2007 Ultrapar acquired the control of certain companies of Ipiranga Group. The acquisition process is structured in four stages. The first one was concluded in April 18 with the transfer of control. Currently the second stage of the process is being finished, which corresponds to the tag along public offering (OPA) by Refinaria de Petróleo Ipiranga S.A. (RPI), Distribuidora de Produtos de Petróleo Ipiranga S.A. (DPPI) and Companhia Brasileira de Petróleo Ipiranga (CBPI). In October 22, the public offerings of DPPI and RPI were carried out. The auction of CBPI is foreseen for November 8, 2007.

**25. SUMMARY AND RECONCILIATION OF THE DIFFERENCES BETWEEN ACCOUNTING PRACTICES ADOPTED IN BRAZIL AND GENERALLY ACCEPTED ACCOUNTING PRINCIPLES IN THE UNITED STATES OF AMERICA****I Narrative description of GAAP differences**

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

The consolidated financial statements of the Company are prepared in accordance with Brazilian GAAP. Accounting policies, which differ significantly from U.S. GAAP, are summarized below.

F-311

## **Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

### **a) Inflation accounting**

Under Brazilian GAAP, the Company accounts for the effects of inflation in its financial statements prepared in accordance with Brazilian GAAP through December 31, 1995. Through December 31, 1995, the Company used for this remeasurement the Fiscal Reference Unit (UFIR), the index established by the tax authorities for preparation of financial statements under Brazilian corporate law as well as the index selected by the CVM.

The reconciliation presents the effect of adjusting property, plant and equipment for U.S. GAAP purposes through December 31, 1997. Under U.S. GAAP, management of the Company considers that Brazil was considered to be a highly inflationary economy until December 31, 1997 and, as such, property, plant and equipment should be adjusted for inflation through such date.

In determining amounts under U.S. GAAP, the effects of inflation for the years ended December 31, 1996 and 1997 were determined using the Índice Geral de Preços Disponibilidade Interna IGP-DI index, which is a widely-accepted and respected index published monthly by the fundação Getúlio Vargas.

Because the Company's management believes that the IGP-DI is an appropriate and consistent measure of the general price inflation in Brazil and because of its availability, for U.S. GAAP purposes the Company adopted the IGP-DI for restatement of its financial statements also for periods through December 31, 1995, replacing the Government mandated index. As a result, property, plant and equipment have been monetarily adjusted for inflation using the IGP-DI since its acquisition through December 31, 1997.

### **b) Capitalization of interest in relation to construction in progress**

Under Brazilian GAAP, prior to 1996 the Company was not required to capitalize the interest cost of borrowed funds as part of the cost of the related asset. Under U.S. GAAP, capitalization of borrowed funds during construction of major facilities is recognized as part of the cost of the related assets.

Under U.S. GAAP, interest on construction-period financing denominated in foreign currencies is capitalized using contractual interest rates excluding foreign exchange gains or losses.

### **c) Pension and other post-employment benefits**

#### **c.1. Pension benefits**

Pension benefit obligations for Brazilian GAAP should be accounted for following CVM Instruction No. 371/00, which requires the mandatory application of Brazilian Accounting Standard IBRACON NPC 26. Under IBRACON NPC 26 the Company has accounted for the plan administered by FFMB (and to which several Petróleo Ipiranga companies contribute) by recognizing a percentage attributed to the Company of the funded status and of the cost of the plan.

Under U.S. GAAP, considering that the financial information of the Company does not consolidate all the sponsors of the FFMB Benefit Plan and such financial information does not represent the financial statements of the parent company of the Petróleo Ipiranga companies, the Company has accounted for its participation in the pension plan administered by FFMB, as if it were a multi-employer plan.

As a result, the reconciliation presents: (a) the reversal of the pension plan asset/liability recognized for Brazilian GAAP as of each reporting date, and (b) the recognition, as liability, of, the contribution due to the plan over the corresponding period.

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

**c.2. Other post-retirement benefits**

As explained in Note 18, the accompanying financial statements account for other post-retirement benefits following IBRACON NPC 26. Other post-retirement benefits are unfunded and are the sole responsibility of each Petróleo Ipiranga company. Under IBRACON NPC 26, actuarial gains and losses are deferred and recognized in income over the estimated remaining service period of the employees to the extent that those actuarial gains and losses exceed 10% of the higher of the plan assets and the projected benefit obligation.

Under U.S. GAAP such benefits are accounted for following SFAS No. 106, *Employers' Accounting for Post-retirement Benefits Other Than Pensions*, and, as from December 31, 2006, following SFAS 158 *Employers' Accounting for Defined Benefit Pension and Other Post-retirement Plans-an amendment of FASB Statements No. 87, 88, 106 and 132(R)*. Under SFAS No.158, the funded status of the other post-retirement benefits must be recognized as a liability with an offsetting amount in accumulated other comprehensive income. As required by SFAS No. 158, provisions of SFAS No.158 were applied on a prospective basis as from December 31, 2006.

Although projected benefit obligations are the same under Brazilian GAAP and U.S. GAAP, differences arise in the amounts recorded in the financial statements as a result of: (i) the date of initial measurement of funded status is different for Brazilian GAAP and U.S. GAAP and under Brazilian GAAP, there is no requirement to recognize a liability for uncovered plans, and (ii) the recognition as from December 31, 2006 as a liability for U.S. GAAP purposes, of the funded status against accumulated other comprehensive income.

**d) Accounting for derivative financial instruments**

As mentioned in Note 21, the Company has entered into swap transactions. Under Brazilian GAAP, swaps are valued at their accrued amount determined as the difference between the amount receivable and the amount payable under the swap. The amounts receivable and payable are computed as their respective notional amount plus accrued charges based on their contractual terms.

Under U.S. GAAP, SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, establishes accounting and reporting standards requiring that all derivative instruments be recorded in the balance sheet as either an asset or a liability measured at its fair value. Changes in the derivative's fair value are recognized in earnings unless specific hedge accounting criteria are met. The Company has not accounted for any derivative instrument following hedge accounting.

The reconciliation presents the differences resulting from valuing the swaps at its fair value under U.S. GAAP, as opposed to valuing them at the accrued amount used under Brazilian GAAP. As of June 30, 2007 no difference was identified between the accrued amount and the fair value.

**e) Fair value of guarantees under FIN 45**

Under Brazilian GAAP, the Company is not required to record any liability related to guarantees given to third parties unless contingent obligations to make future payments under the guarantees are considered probable.

The Company has not recorded any liability related to these guarantees under Brazilian GAAP as of any of the dates presented.

Under U.S. GAAP, the Company recognizes, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing guarantees in accordance with FIN 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. In the event that, at inception of the guarantee, the Company is required to recognize a liability under SFAS No. 5,

---

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

Accounting for Contingencies, the liability initially recognized would be the greater of: (a) the amount of fair value of the value of the obligation undertaken in issuing guarantee, or (b) the contingent liability amount required to be recognized at inception of the guarantee by applying SFAS No. 5.

Guarantees granted include those disclosed in Note 20 as well as guarantees provided to financial institutions that finance sales to selected customers under the vendor program. Under the vendor program the Company is the secondary obligor to the financial institutions.

The reconciliation presents the effect of recognizing a liability for the fair value of these guarantees and the related effect in the statement of income.

**f) Accounting for asset retirement obligation**

Under Brazilian GAAP, the Company's practice is to expense amounts relating to retirement of certain assets as incurred.

Under U.S. GAAP, the Company adopts SFAS No. 143, Accounting for Asset Retirement Obligations. Asset retirement obligations correspond to the legally required obligation to remove fuel tanks upon retirement. Under SFAS No. 143, the fair value of asset retirement obligations are recorded as liabilities on a discounted basis when they are incurred, which is typically at the time the related assets are installed. Amounts recorded for the related assets will be increased by the amount of these obligations and depreciated over the related useful lives of such assets. Over time, the amounts recognized as liabilities will be accreted for the change in their present value until the related assets are retired or sold.

**g) Gain on change in equity interest in Maxfácil**

In December 2006, the Company and its subsidiaries recognized a capital gain, in the amount of R\$ 85,494, relating to the gain on change in equity interest in Maxfácil as described in Note 4.

The gain was determined as a result of Maxfácil having issued new shares to UNIBANCO at a price higher than the carrying amount per share of the investment recorded by the Company in Maxfácil.

Under U.S. GAAP, considering that Maxfácil is a newly formed entity, the Company believes it does not meet the criteria for gain recognition established in SAB Topic 5-H.

The reconciliation presents the effect of reverting for U.S. GAAP the capital gain recognized under Brazilian GAAP.

**h) Accounting for uncertain income tax position FIN No. 48**

Under Brazilian GAAP, the Company is not required to record any liability related to uncertainty in income taxes, unless contingent obligation to make future payments under income taxes are probable.

Under U.S. GAAP, in June 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes, which clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with Statement of Financial Accounting Standards (SFAS) No. 109, Accounting for Income Taxes. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN No. 48 was effective for fiscal years beginning after December 15, 2006.

## **Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

On January 1, 2007, the Company adopted the provisions of FIN No. 48. The cumulative effect of adoption was a R\$6.2 million reduction of retained earnings. During the period ended June 30, 2007, an amount of R\$261 was recorded in profit and loss as an expense.

### **i) U.S. GAAP adjustments on net equity and net income of affiliates**

The investments in Termogaúcha-Usina Termelétrica S.A., IQ, TSB and IQAG are accounted for under the equity method under Brazilian GAAP.

Such investment would also be accounted for following the equity method under U.S. GAAP.

Differences between net equity and net income of the affiliates correspond mainly to: accounting for deferred charges, accounting for business combination and goodwill, accounting for pension benefits, revaluation of property, plant and equipment, capitalization of interest on property, plant and equipment, recognition of tax incentives, accounting for derivative financial instruments, accounting for dividends and interest on capital, and accounting for the provision for programmed maintenance.

The net effects of those adjustments are presented in the reconciliation to U.S. GAAP.

### **j) Accounting for convertible debentures issued by Ipiranga Química S.A. and warrants purchased by the Company**

#### **j.1. Accounting for convertible debentures issued by IQ**

Under Brazilian GAAP, convertible debentures issued by IQ described in Note 7 are accounted for as a single instrument at its cost plus accrued interest following the contractual terms.

Under U.S. GAAP the Company has concluded that the non-detachable conversion option included in the convertible debentures issued by IQ does not meet the definition of a derivative under SFAS 133 Accounting for Derivative Instruments and Hedging Activities, as amended and interpreted. Also, the Company concluded that the conversion option did not have, as of the date of issuance, intrinsic value, therefore, the total amount of the proceeds has been allocated to the convertible debenture. This has resulted in no difference between Brazilian GAAP and U.S. GAAP with respect to the accounting of the convertible debenture issued by IQ until the modification of its terms.

However, the convertible debenture was marked to market at every reporting period with charges to the statements of income for US GAAP purposes, creating a difference in valuation of the convertible instrument for US GAAP of R\$ 29 million at the date of the modification of the terms.

#### **j.2. Accounting for the modification of terms of the debentures, issuance of warrants and sale of warrants by the Company**

In October 2005, a modification was introduced in the terms of the debentures such that they were modified from convertible to non-convertible; no other term of the debentures has been modified. At the same moment, IQ issued to the holders of the debentures, detachable warrants which allow the holders of the warrants to acquire shares of IQ in the exact same terms as the previously existing non-detachable conversion option included in the debentures.

Under Brazilian GAAP, warrants are not separately recorded. The modification of the terms of the debentures and the issuance of warrants in October 2005 did not have any impact in the accounting for the

## **Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

debentures (which were originally convertible and in October 2005 were modified to non-convertible) under Brazilian GAAP which continued to be accounted for at its cost plus accrued interest and warrants issued by IQ are not accounted for.

For U.S. GAAP purposes, the Company has also classified the new debt instrument received as a trading security under FAS 115. In addition, the Company has concluded that the fair value of the warrant and non-convertible debenture received approximates the fair value of the convertible debenture prior to modification. Therefore, upon modification the Company recorded the warrant and debt at their fair values.

Contemporaneously with the modification of the terms of the debenture and the issuance of warrants, the Company sold the warrants received to RPI for R\$ 29 million. This amount approximates the fair value of the warrants at the date of modification of the convertible debentures and issuance of warrants, so no gain or loss was recorded by the Company upon sale under U.S. GAAP. Under Brazilian GAAP no value was recognized for the warrant received and therefore, a gain for the sales price of R\$ 29 million was recognized.

The U.S. GAAP reconciliation reflects the difference in the mark to market of the convertible debt instrument through the date of modification, compared to the amortized cost value recorded for Brazilian GAAP purposes. The U.S. GAAP reconciliation also reverses the \$29 million gain for the sale of the warrants recognized under Brazilian GAAP.

### **k) Accounting for refunds**

The Company and its subsidiary CBPI offer to certain of its customers refunds in cash if they meet a specified cumulative volume of sales over a specified period. Under Brazilian GAAP, the refund is recognized as an expense when the cumulative volume of sales has been met. Such refunds are offered to a reduced group of customers and have begun to be offered recently.

Under U.S. GAAP, EITF 01-9, Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products), a Company should recognize a reduction in sales and a liability based on a systematic and rational allocation of the cost of honoring the commitment in each of the underlying transactions that result in progress toward earning the refund. Considering the reduced number of customers to which the refund is offered and the reduced historical experience, the Company believes that it cannot reasonably estimate the ultimate amount that will be earned by customers. As a result, under U.S. GAAP a liability is recognized for the maximum potential amount of the refund.

### **l) Goodwill and business combinations**

Under Brazilian GAAP assets and liabilities of entities acquired are reflected at book value. Goodwill is determined as the excess of purchase price paid over the book value of net assets acquired. Goodwill is amortized on a straight-line basis over the periods estimated to be benefited limited to 10 years.

In July 1998, the subsidiary CBPI made a capital contribution to IQ. Under Brazilian GAAP, such transaction generated a goodwill at the date of the transaction in the amount of R\$ 49,393 and resulted in obtaining an interest in IQ of 41.47%.

Goodwill under Brazilian GAAP was totally amortized as of December 31, 2005.

Under U.S. GAAP, business combinations are accounted for following the purchase method. Under the purchase method assets and liabilities of the business acquired are recorded, to the extent of the percentage acquired, using fair values. Goodwill is determined as the difference between purchase price consideration and

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

the fair value of assets acquired and liabilities assumed. If there is an excess of the fair value of net assets acquired over the purchase price such amount is used to reduce the carrying value of noncurrent assets. As from January 1, 2002 goodwill is not amortized but is tested, at least annually, for impairment.

The reconciliation of net equity between Brazilian GAAP and U.S. GAAP presents: (i) the reversal of the balance of goodwill recorded under Brazilian GAAP at each balance sheet date, (ii) the recognition for U.S. GAAP purposes of the difference resulting from adjusting assets and liabilities of the entity acquired at fair value, most significantly property, plant and equipment and investment in equity investees, (iii) the recognition of resulting goodwill under U.S. GAAP, and (iv) the related deferred taxes.

The reconciliation of net income between Brazilian GAAP and U.S. GAAP presents: (i) the reversal of goodwill amortization recorded under Brazilian GAAP, (ii) the recognition in income of adjustments of assets and liability at fair value, mostly depreciation of property, plant and equipment and equity in investees, and (iii) the related deferred tax effects.

**II - Reconciliation of the differences between U.S. GAAP and Brazilian GAAP in net income**

|                                                                                           | Note 25.I. | June 30,<br>2007 | June 30,<br>2006 |

**V - Additional disclosures****a) Earnings per share**

Under Brazilian GAAP, net income per share is calculated by dividing net income by the number of shares outstanding at the balance sheet date. In these consolidated financial statements, information is disclosed per lot of one thousand shares, because this is the minimum number of shares that can be traded on the Brazilian stock exchanges.

Under U.S. GAAP earnings per share are retroactively restated to reflect in all periods presented the effect of stock dividends. As disclosed in Note 19 in April 2006 the Company approved a stock dividend and earnings per share have been retroactively restated to reflect the effect of such stock dividend.

Since the preferred and common shareholders have different dividend rights (see Note 19), basic earnings per share have been calculated using the two-class method for U.S. GAAP purposes. The following table provides a reconciliation of the numerators and denominators used in computing earnings per share as required by SFAS No. 128:

|                                                                                                      | June 30, 2007 |           |        |
|------------------------------------------------------------------------------------------------------|---------------|-----------|--------|
|                                                                                                      | Common        | Preferred | Total  |

**b) Consolidated Statement of cash flows**

Brazilian GAAP does not require the presentation of a statement of cash flows as required by U.S. GAAP. Changes in working capital are presented in the statement of changes in financial position. U.S. GAAP requires the presentation of a statement of cash flows describing the Company's cash flows from operating, financing and investing activities. Statements of cash flows derived from the information based on Brazilian GAAP are as follows:

|                                                                              | Six months ended    |                                 |
|------------------------------------------------------------------------------|---------------------|---------------------------------|
|                                                                              | 2007<br>(unaudited) | June 30,<br>2006<br>(unaudited) |

**COMPANHIA BRASILEIRA DE PETRÓLEO IPIRANGA AND SUBSIDIARIES**

**NOTES TO THE UNAUDITED INTERIM CONSOLIDATED FINANCIAL INFORMATION FOR THE PERIODS ENDED AS OF  
JUNE 30, 2007 AND 2006**

**(Amounts in thousands of Brazilian reais - R\$, unless otherwise stated)**

**1. Operations**

Companhia Brasileira de Petróleo Ipiranga (the Company) and subsidiaries is a listed company whose shares are traded on the São Paulo Stock Exchange (BOVESPA). Until April 18, 2007, the Company was controlled by members of the Bastos, Mello, Ormazabal, Tellechea and Gouvêa Vieira families.

On April 18, 2007, Ultrapar Participações S.A. (Ultrapar), for itself and also as commission agent of Petróleo Brasileiro S.A. (Petrobras) and Braskem S.A. (Braskem), acquired from the controlling shareholders of the Petróleo Ipiranga companies, 66.2% of the common shares and 13.9% of the preferred shares issued by Refinaria de Petróleo Ipiranga S.A. (RPI), 69.2% of the common shares and 13.5% of the preferred shares issued by Distribuidora de Produtos de Petróleo Ipiranga S.A. (DPPI) and 3.8% of the common shares and 0.4% of the preferred shares issued by the Company.

The Company and its subsidiaries and affiliated companies are primarily engaged in the distribution of oil derivatives and related products, transportation and convenience stores. The Company also holds non-controlling interests in companies engaged in the chemical and petrochemical business.

**2. Presentation of consolidated financial statements**

These financial statements were prepared in accordance with accounting practices adopted in Brazil (Brazilian GAAP). The financial statements presented herein are different from the ones prepared by the Company for statutory purposes because they do not include the holding Company's stand-alone financial statements, have been adjusted with respect to the financial statements for statutory purposes to include in Note 25 a reconciliation of net equity and net income between the amounts under Brazilian GAAP and generally accepted accounting principles in the United States of America (U.S. GAAP) and have also been adjusted to present certain additional disclosures to facilitate their understanding by readers not familiar with Brazilian GAAP.

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosures of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Significant estimates include, but are not limited to, estimates relating to the useful lives of property, plant and equipment, accounting for contingencies and provisions for income taxes, among others. Actual results could differ in relation to these estimates.

**3. Summary of significant accounting practices**

The accounting practices adopted in Brazil (Brazilian GAAP) to record transactions and prepare the consolidated financial statements comply with those prescribed by Brazilian corporate law and specific standards established by the Brazilian Securities Commission (CVM), which differ in certain respects from U.S. GAAP. See Note 25 for further discussions of these differences and a reconciliation of shareholders' equity and consolidated net income between Brazilian GAAP and U.S. GAAP.

The following is a summary of significant accounting policies followed in the preparation of the accompanying consolidated financial statements:

**a) Cash and cash equivalents**

Cash and cash equivalents comprise highly-liquid temporary cash investments (with maturities of 3 months or less when acquired and readily convertible to cash).

## **Table of Contents**

### **b) Allowance for doubtful accounts**

The Company has individual customer credit information, which is used to assess customer ability to pay. The allowance is recorded in an amount considered sufficient by management to cover probable losses on realization of accounts receivable.

### **c) Inventories**

Stated at the lower of average acquisition or production cost or net realizable value.

### **d) Investments in affiliates and goodwill**

Accounted following the equity method with a corresponding entry to operating income.

Goodwill on the acquisition of subsidiaries is amortized over 10 years, based on the estimated period of realization.

### **e) Property, plant and equipment**

Stated at acquisition or construction cost, monetarily adjusted through December 31, 1995. Depreciation is calculated following the straight-line method based on the estimated economic useful lives of the assets. Leasehold improvements are depreciated over the term of the agreement or the economic useful lives of the assets, whichever is shorter.

### **f) Loans and financing**

Stated at the amount of principal, plus financial charges incurred on a pro rata basis through the balance sheet date. Foreign currency-denominated loans were converted into Brazilian reais at the exchange rates prevailing at the balance sheet date.

### **g) Income and social contribution taxes**

Tax expense is calculated based on the income tax rate of 15% plus a 10% surtax and social contribution tax rate of 9%.

### **h) Deferred income and social contribution taxes**

Calculated on temporary differences and on tax loss carryforwards using the income tax and social contribution tax rates effective for the period in which the tax effects are expected to be realized.

Deferred income and social contribution tax assets are only recognized up to the amount that is likely to be realized within the next 10 years as established by CVM Instruction No. 371/02.

### **i) Provision for contingencies**

Recorded for contingent risks whose likelihood of loss is probable, based on the opinion of management and inside and outside legal counsel. The provision is recorded based on the estimated losses upon the final resolution of lawsuits.

### **j) Interest on capital**

Interest on capital can be paid by Brazilian companies in lieu of, or in addition to, mandatory dividend stipulated by the respective company's bylaws. Interest on capital is calculated within the limits established by Law No. 9,249/95 for a maximum amount computed as the TJLP (long term interest rate) applied on the respective shareholders' equity.

Interest on capital received from affiliates is recorded as a receivable. Interest on capital payable, since it represents in essence dividends, is recorded as a reduction in Retained earnings.

**Table of Contents****k) Pension and other post-employment benefits**

Pension and other post-employment benefits liabilities to employees, retirees and pensioners (net of the assets of the plans) are recorded based on the actuarial calculation prepared by an independent actuary, using the Projected Unit Credit Method.

**l) Other assets and liabilities**

Other assets and liabilities, classified as current and noncurrent, are stated at realizable or estimated settlement amounts. These assets and liabilities are stated at cost or realizable value and known or estimated amounts, respectively, including, when applicable, interest and monetary and exchange variations.

**m) Results of operations**

Revenue from sale of products is recognized when significant risks and benefits related to the product ownership pass to customer. Other income, expenses and costs are recognized when incurred and/or realized. The result includes interest and monetary and exchange variations, at contractual indexes or official rates, applicable to current and noncurrent assets and liabilities and, when applicable, the effects of adjustments of assets to their net realizable value.

Sales incentives are generally recognized as expenses and include, but are not limited to, discounts and rebates. Volume-based incentives payable in cash include amounts paid in advance with the commitment of the customer to reach specified minimum volumes over a certain period of time and incentives are payable only after the minimum volumes have been met in a defined period of time. Volume-based incentives paid in advance are recognized as assets and subsequently recorded as cost of revenues over the period of the commitment of minimum sales. Volume-based incentives payable only after meeting the minimum volume are recognized as expense at the moment when the target volume has been achieved.

**4. Consolidation criteria**

The consolidated financial statements have been prepared in accordance with the consolidation principles established by Brazilian GAAP and include the accounts of the Company and the following subsidiaries as of June 30, 2007 and 2006 and as of December 31, 2006:

|                                                    | Location               | Shareholding - % |              |
|----------------------------------------------------|------------------------|------------------|--------------|

(\*) Shared control with Distribuidora de Petróleo Ipiranga S.A. ( DPPI ) which holds a 16.0% interest and with União de Bancos Brasileiros S.A. UNIBANCO which holds 50.0%. Change in Ipiranga Participações Societárias S.A. s corporate name. Maxfácil was incorporated by the Company and DPPI. Subsequently, UNIBANCO contributed in cash the amount of R\$ 171 million for a 50.0% interest resulting in the

**Table of Contents**

recognition by the Company of a gain in change of interest of R\$ 58,136, during December 2006. Maxfácil is a joint-venture which business purpose is to offer financial services to the customers and distributors of Ipiranga products for a period of 10 years. The following practices were adopted in the preparation of the consolidated financial statements:

- a) The Company and its subsidiaries adopt similar accounting practices to record their operations,
- b) Intercompany balances and transactions and unrealized profits have been eliminated; and
- c) Minority interest in fully-consolidated subsidiaries is presented in a separated caption.

**5. Cash and cash equivalents**

|                                   | June 30,<br>2007 | December 31,<br>2006 |

(\*) Sale and repurchase agreements of debentures carrying interest at 100% of the Interbank Deposit Certificate (CDI).

**6. Trade accounts receivable**

|                            | June 30,<br>2007 | December 31,<br>2006 |
|----------------------------|------------------|----------------------|
| Domestic market:           |                  |                      |
| Trade notes receivable     | 1,046,738        | 964,352              |
| Customer financing         | 289,228          | 292,905              |
|                            | 1,335,966        | 1,257,257            |
| Foreign market-Receivables | 3,263            | 3,542                |
|                            | 1,339,229        | 1,260,799            |
| (-) Current                | 1,180,700        | 1,101,168            |
| Noncurrent                 | 158,529          | 159,631              |

Noncurrent portion is mainly represented by customer financing. Under customer financing, cash loans are provided to gas stations using the Ipiranga brand. Such loans are generally used by the gas stations to finance renovation and modernization of fuel stations, as well as for working capital including acquisition of products and investing in marketing. Customer financing carries interest of 1% per month.

**(a) Debentures issued by Ipiranga Química in 2003**

The Extraordinary Shareholders Meeting of Ipiranga Química S.A. held on May 26, 2003 approved the issuance of two series of private convertible debentures, consisting of 11,000 Series A debentures, with face value of R\$ 10 each, amounting to R\$ 110,000, and 80,000 Series B debentures, with face value of R\$ 1 each, amounting to R\$ 80,000. Both series of debentures mature on June 1, 2008.

On June 12, 2003, DPPI fully subscribed the Series A and the Company fully subscribed the Series B.

The subscribed debentures pay interest based on the CDI interest rate, plus spread subject to renegotiation every 6 months (for Series A) and every 5 months (for Series B) as established by the indenture dated June 1, 2003. Since March 2007, the remuneration spread of serie B debentures is 1.0% per year.

The spread for Series A debentures is 1.0% per year as from December 1, 2005. The spread for Series B debentures is 1.0% per year in 2005 remaining the same for 2006.

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

Debentures are convertible into common shares of Ipiranga Química S.A. at any time after its issuance and until its maturity or redemption at the option of the holder.

F-333

**Table of Contents**

The conversion price is a fixed amount established in the Indenture of the debentures. However, the quantity of common shares to be received upon conversion will be higher than the amount determined as face value of the debentures divided by the conversion price, no conversion has occurred to date. The quantity of additional shares to be received will be 25% if converted up to June 1, 2004, 18.2177% if converted before June 1, 2005, 11.8034% if converted before June 1, 2006 and 5.7371% if converted before June 1, 2007. No conversion has occurred to date.

**(b) Early partial redemption of the debentures in 2006 and 2007**

The shareholders' meetings of Ipiranga Petroquímica S.A. ( IPQ , a subsidiary of IQ) held on April 28, 2006 approved the payment of supplementary dividends and a capital reduction, scheduled for June 13, 2006 and July 31, 2006, respectively. Considering that IQ, due to its interest in IPQ, received funds on said dates, the Board of Directors of IQ, at a meeting held on May 2, 2006, resolved that IQ would partially redeem its debentures, which were issued on June 1, 2003 due to the financial cost of this debt.

As a result, in 2006, IQ partially amortized 71.6% of the Series B debentures, subscribed by CBPI, in the amount of R\$ 101,062 thousand. In February 2007, IQ performed a partial redemption of 5.8% of Serie B Debentures subscribed by CBPI in an amount of R\$ 8,827.

**(c) Modification of terms of the debentures, issuance of warrants and sale of warrants**

Pursuant to a Memorandum of Understanding signed on October 3, 2005, the Company, DPPI and Refinaria de Petróleo Ipiranga S.A. (the controlling shareholder of IQ) agreed to hold an Extraordinary Shareholders' Meeting of IQ to approve a change in the type of debentures, issued by IQ on June 1, 2003.

The changes approved on the meeting held on October 6, 2005 were: (i) to change the debentures from convertible to nonconvertible without making any other change in the terms or conditions of the debentures, and (ii) the issuance of warrants to the holders of the debentures, without any charge, replacing the conversion right established for the debentures; the terms of the warrants allow their holder to purchase common shares of IQ in exactly the same terms than the conversion features originally included in the debentures.

**(d) Warrants**

However, upon completion of Company's acquisition process, as further described in Note 1, these warrants should be fully transferred to Braskem and Petrobras, at no value, based on the terms of the agreement entered into by Ultrapar, Braskem and Petrobras.

**Table of Contents****b) Estimated realization of deferred tax assets**

The realization of tax credits and debts is based on future taxable income projections limited to 10 years after each balance sheet date.

Considering that the deferred tax assets are related mainly to deductible temporary differences, the realization of such deferred tax assets will occur as a result of the settlement of the correspondent liability. Management, based on the estimation of liquidation of the existing claims and considering the nature of each of the provisions, estimates the recovery of these credits as follows:

|                                                | June 30,<br>2007 | December 31,<br>2006 |
|------------------------------------------------|------------------|----------------------|
| 2007 (from June 30, 2007 to December 31, 2007) | 30,916           | 50,838               |
| 2008                                           | 11,556           | 20,525               |
| 2009                                           | 9,326            | 2,038                |

**(i) Impairment on investment in Termogaúcha and liquidation**

At the Extraordinary Shareholders Meeting held on September 12, 2006, the shareholders of Termogaúcha approved its liquidation, considering the conditions of natural gas supply and higher costs of maintenance, preservation and storage of the already acquired generating equipment. The Company recorded impairment in the equity investee of R\$ 64,541. On the same date, the Extraordinary Shareholders Meeting approved a capital increase in Termogaúcha and the Company paid R\$ 3,850, corresponding to several advances for future capital increase, which were previously recorded as noncurrent assets.

On December 14, 2006, a new Extraordinary Shareholders Meeting of Termogaúcha approved the distribution of cash (resulting from the liquidation process) to the shareholders, under article 215 of the Brazilian corporate law. The Company received R\$ 24,396.

**(ii)** During 2006 the Company recognized a full impairment on the goodwill of TSB for R\$ 2,164. On April 2007, the subsidiary CDPI acquired an additional 5% of shares in TSB, generating a goodwill of R\$2,274, which was written off as of June 30, 2007 based on an impairment test.

On April 18, 2006, the Company registered with the Brazilian Securities Commission (CVM) a public offering of 35,000 debentures, of a single series, nonconvertible, with face value of R\$ 10 each, and issued on April 1, 2006, in the amount of R\$ 350,000. The debentures mature on April 1, 2011 with principal repaid in three annual installments. They pay interest, from the issuance date, on their unit face value, of 103.80% of the daily average rate of interbank deposits ( Taxa DI over extra grupo ), disclosed by the Clearing House for the Custody and Financial Settlement of Securities ( CETIP ). Interest is payable every 6 months from the issuance date of the debentures.

The Noncurrent portion of loans and financings and debentures matures as follows:

|      | June 30,<br>2007 | December 31,<br>2006 |

**Table of Contents****16. Contingencies****a) Probable losses**

A provision was recognized to cover probable losses estimated by management, supported by external and internal legal counsel, arising from the following lawsuits:

|            | June 30,<br>2007 | December 31,<br>2006 |
|------------|------------------|----------------------|
| Tax        | 73,207           | 75,828               |
| Civil      | 6,916            | 5,659                |
| Labour     | 12,624           | 9,884                |
| Total      | 92,747           | 91,371               |
| (-)Current | 34,570           | 32,354               |
| Noncurrent | 58,177           | 59,017               |

**Tax lawsuits**

Tax lawsuits referred mainly to: (1) requirement of reversal of credits for ICMS on the provision of proper transportation services during the period the system of freight reimbursement by DNC (currently National Oil, Natural Gas and Biofuel Agency ANP) was in effect and, although the freight reimbursements have always been made by DNC without the ICMS amount, previous court decisions have been unfavorable to the Company's arguments; (2) requirement of ICMS/Tax Substitution on interstate sales to end consumers under ICMS Agreement No. 105/92, subsequently amended by Agreement No. 112/93, in which the STF (Federal Supreme Court) resolved the matter, defining that the ICMS on fuel belongs to the State that consumes the fuel, even if the fuel is sold to the end consumer; (3) requirement of reversal of credits for ICMS, in Minas Gerais State, on interstate shipments made pursuant to article 33 of ICMS Agreement No. 66/88, which allowed the maintenance of the credit and which was suspended by an injunction granted by the STF; and (4) assessments due to undue deduction of discounts from the ICMS tax basis, in Minas Gerais State, owed on a tax substitution basis.

**Civil lawsuits**

Civil lawsuits of the Company's subsidiaries are mostly related to clauses of lease and supply agreements entered into with customers and indemnity claims arising from these agreements and civil liability.

**Labor lawsuits**

Labor lawsuits of the Company and its subsidiaries refer mainly to lawsuits filed by former employees and outsourced professionals claiming payroll charges, such as overtime, hazardous duty premium, etc.

**b) Possible losses**

Lawsuits for which management assessed the probability of loss as possible, based on the opinion of its internal and external legal counsel, are not accrued in the financial statements and are composed of:

| June 30,<br>2007 | December 31,<br>2006 |
|------------------|----------------------|
|------------------|----------------------|

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

| Total          | 351,646 | 309,349 |

F-340

**Table of Contents****Tax lawsuits**

Tax lawsuits of the Company included in this classification were principally related with: (1) requirements for the reversal of ICMS credits, except in the Minas Gerais State, upon interstate outflows, as defined in the article 33 of ICMS Agreement 66/88, which allowed the maintenance of credit and which was suspended by an injunction conceded by the STF; (2) assessment for ICMS and reversals of credits of the tax due on the purchases of basic oils, interstate shipments which were not taxed, based on a constitutional rule of non-incidence; (3) demands to reverse ICMS credits related with the provision of transportation services related to interstate operations which were not taxed, based on a constitutional rule of non-incidence; (4) demands to reverse ICMS credits derived from excess taxation generated on the purchase of products in the Petroleum Refinery under the tax substitution system, appropriated on the basis of the non-occurrence of one of the commercialization stages defined as the presumed originator, in direct sales to customers which were the final consumers; (5) demands for ICMS payment on the sales to Pará s clients in the fishing sector that benefit from tax exemption due to a presumed lack of authorization of SEFAZ/PA; and (6) non-ratification of IPI credit compensation appropriated on entry of taxed inputs whose subsequent shipping was carried out under the protection of immunity. These suits are at different stages, in the administrative and judicial sphere, such as production of proof and of jurisprudence consolidation in the higher courts.

**Civil lawsuits**

Civil lawsuits of the Company and its subsidiaries are mostly related to clauses of lease and supply agreements entered into with customers and indemnity claims arising from these agreements.

**Labor lawsuits**

Labor lawsuits of the Company and its subsidiaries refer to lawsuits filed by former employees and outsourced professionals claiming specific payroll benefits, lawsuits filed by former employees, outsourced professionals and employees of gas stations that are customers of the Company, related to payroll charges, such as overtime, hazardous duty premium, etc., which are in progress at the stage of providing evidence, without a decision having been reached yet.

**c) Contingent assets**

The Company and its subsidiaries filed judicial and/or administrative proceedings with Federal and State tax authorities to recover taxes unduly paid or overpaid. These proceedings, when concluded, may represent income that, due to its contingent nature, is not recorded in the financial statements as of June 30, 2007.

Due to the progress of lawsuits and based on their legal counsel s opinion, the Companies management assessed the likelihood of a favorable outcome in the aforementioned lawsuits as probable or possible, depending on the specific circumstances. As of June 30, 2007 and December 31, 2006 these lawsuits may be summarized as follows:

|                                                     | June 30,<br>2007 | December 31,<br>2006 |
|-----------------------------------------------------|------------------|----------------------|
| <b>Federal level:</b>                               |                  |                      |
| Corporate income tax rate increase                  | 7,241            | 7,087                |
| FGTS (severance pay fund) refund of tax             | 271              | 263                  |
| National Telecommunication Fund                     | 4,927            | 2,077                |
| PIS/COFINS (taxes on revenue) increase in tax basis | 27,642           | 26,828               |
|                                                     | 40,081           | 36,255               |
| <b>State level:</b>                                 |                  |                      |
| State income surtax (AIRE)                          | 12,660           | 12,390               |

## **Table of Contents**

### **17. Employee and management profit sharing**

Profit sharing is calculated based on net income for the year, after deducting accumulated deficit, if any, and provision for income and social contribution taxes, and is distributed as follows:

#### **a) Employee profit sharing**

Calculated based on 3% of net income from operations, which will be computed excluding income from investments in companies (recorded in the stand-alone individual statements of income of the Company as equity in subsidiaries and affiliates), amortization of goodwill or negative goodwill, sale or write-off of investments in companies and interest paid or received by the Company as interest on capital.

#### **b) Management profit sharing**

At the discretion of the Board of Directors, management profit sharing will be calculated based on up to 10% of income after deducting employee profit sharing and cannot exceed the annual global compensation established at the Shareholders Meeting.

### **18. Provision for pension and other post-employment benefits**

#### **a) Pension benefits provided by Fundação Francisco Martin Bastos**

The Company, together with other Petróleo Ipiranga companies, sponsors Fundação Francisco Martins Bastos (FFMB), a closed pension entity that manages and operates pension plans for the employees of Petróleo Ipiranga companies.

The accumulated amount of Company contributions, for the period ending June 30, 2007, for the pension plan was R\$4,678 (R\$5,010 on June 30, 2006).

#### **b) Other post-employment benefits**

According to CVM Resolution No. 371/2000, the Company, in addition to the pension plan, recognizes a provision for other post-employment benefits related to bonus for length of service, FGTS (severance pay fund), health care plan and life insurance for eligible retirees. Other post-employment benefits are unfunded and are provided directly by the Company and each of its subsidiaries of the Petróleo Ipiranga group.

#### **c) Information about pension and other post-employment benefits**

Net liabilities recorded as of June 30, 2007, amount to R\$49,723, of which R\$4,822 are accounted as current liabilities and R\$44,901 as noncurrent liabilities.

Actuarial liabilities on June 30, 2007, reflect the report drawn up by the independent actuary on May 30, 2007, maintaining the biometric assumptions and rates disclosed in the financial statements of December 31, 2006.

### **19. Shareholders equity**

#### **a) Capital**

Capital Stock on June 30, 2007 is represented by 105,952,000 shares without par value, composed of 35,409,306 common shares and 70,542,694 preferred shares.

Preferred shares are not entitled to vote and have priority during dividend distribution and capital repayments, in the event of liquidation.

**Table of Contents****b) Reserves**

Company by laws state that the balance of the accumulated profit account after distributions pursuant to Corporation Law, shall be used as reserve working capital and to conserve and improve installations, up to the limit of capital stock. Any excesses shall be incorporated into the capital stock at the Ordinary General Meeting approving the financial statements for the fiscal period.

The Extraordinary Shareholders Meeting held on April 18, 2007 approved a capital increase of R\$ 5,000, capitalizing part of the balance of the Reserve for Working Capital and Conservation and Improvement of Installations without issuing new shares.

**c) Distribution of dividends**

Shareholders are annually entitled to receive mandatory minimum dividends, corresponding to 30% of net income, after allocation of 5% to the legal reserve. Preferred shareholders are entitled to receive dividends or interest on capital 10% higher than those paid on common shares.

**d) Interest on capital and dividends**

Interest on capital, in the amount of R\$ 106,295, was calculated according to the limits established by Law No. 9,249/95. No interest on capital was paid or declared for the period ended June 30, 2007.

In addition, dividends in the amount of R\$ 12,432 were paid on December 27, 2006. No dividends were paid or declared for the period ended June 30, 2007.

**20. Collaterals and guarantees**

The Company provides collaterals and guarantees for some loan operations conducted directly or indirectly by certain subsidiaries, affiliates and other related parties.

As of June 30, 2007 and December 31, 2006 amounts referring to these operations are as follows:

| Guaranteed company | Parent Company and consolidated |                      | Maturity |
|--------------------|---------------------------------|----------------------|----------|
|                    | June 30,<br>2007                | December 31,<br>2006 |          |
|                    | 8,738                           | 11,763               | 2007     |
|                    | 2,246                           |                      | 2008     |

 REFINARIA Refinaria de Petróleo Ipiranga S.A.

- (1) Related-party.
- (2) Entity consolidated by the Company.
- (3) Entity accounted by the Company following the equity method.

**21. Financial instruments**

In accordance with CVM Instruction No. 235/95, the Company and its subsidiaries estimated the fair value of their financial instruments, using available market information and appropriate estimation methodologies. However, both the interpretation of market data and the selection of estimation methodologies require reasonable judgment and estimates to determine the most adequate realizable value. Accordingly, the estimates presented are not necessarily indicative of the amounts that could be obtained in active market trading. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair values. Book value of financial interests appropriate their fair value.

The Company and its subsidiaries conduct transactions involving financial instruments, all of which are recorded in balance sheet accounts, and are intended to meet their needs and reduce the exposure to credit, market, and currency risks. Management of these risks is performed by establishing strategies and control systems and setting position limits.

The main risks affecting the Company's business are as follows:

**a) Currency risk**

This risk arises from the possibility of the Company incurring material losses because of exchange rate fluctuations, which may affect the balances of foreign currency-denominated loans and financing.

The exposure to fluctuations in exchange rates is as follows.

|                                  | June 30,<br>2007 | December 31,<br>2006 |
|----------------------------------|------------------|----------------------|
| <b>Amounts in US\$ thousand:</b> |                  |                      |
| Loans and financing              | 64,073           | 65,419               |
| Net exposure                     | 64,073           | 65,419               |

Rates as of June 30, 2007 = R\$ 1.9262/US\$

Rates as of December 31, 2006 = R\$ 2.1380/US\$

**b) Credit risk**

This is the risk of the Company incurring losses due to customers' failure to pay accounts and financing. The Company reduces this risk by means of a credit policy and by obtaining collaterals for supply agreements signed with its customers for significant balances.

**c) Interest rate risk**

This risk arises from the possibility of the Company incurring losses due to interest rate fluctuations that increase interest expenses on loans and financing.

**Table of Contents**

The Company continuously monitors the market interest rates in order to evaluate the need for hedging against the volatility of these rates.

**d) Financial expenses, net**

**23. Insurance**

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

The Petróleo Ipiranga companies have an insurance and risk management program that allows coverage and protection for all their insurable assets, including insurance coverage for risks of disruption of production, by means of an operational risk policy traded in the domestic and foreign insurance markets through the Brazilian Reinsurance Institute (IRB).

F-345

## **Table of Contents**

The insurance coverages and limits are based on a detailed study of risks and losses performed by local insurance brokers, and the insurance contracted is considered sufficient to cover possible losses, considering the nature of Companies' activities.

The main insurance coverages are for operational risks, loss of profits, industrial and office multiperils, named risk-pools and civil liability.

### **24. Subsequent events**

#### **Ipiranga acquisition Tag alongs**

As mentioned in Note 1, in April of 2007 Ultrapar acquired the control of certain companies of Ipiranga Group. The acquisition process is structured in four stages. The first one was concluded in April 18 with the transfer of control. Currently the second stage of the process is being finished, which corresponds to the tag along public offering (OPA) by Refinaria de Petróleo Ipiranga S.A. (RPI), Distribuidora de Produtos de Petróleo Ipiranga S.A. (DPPI) and Companhia Brasileira de Petróleo Ipiranga (CBPI). In October 22, the public offerings of DPPI and RPI were carried out. The auction of CBPI is foreseen for November 8, 2007.

### **25. SUMMARY AND RECONCILIATION OF THE DIFFERENCES BETWEEN ACCOUNTING PRACTICES ADOPTED IN BRAZIL AND GENERALLY ACCEPTED ACCOUNTING PRINCIPLES IN THE UNITED STATES OF AMERICA**

#### **I - Narrative description of GAAP differences**

The consolidated financial statements of the Company are prepared in accordance with Brazilian GAAP. Accounting policies, which differ significantly from U.S. GAAP, are summarized below.

##### **a) Inflation accounting**

Under Brazilian GAAP, the Company accounts for the effects of inflation in its financial statements prepared in accordance with Brazilian GAAP through December 31, 1995. Through December 31, 1995, the Company used for this remeasurement the Fiscal Reference Unit (UFIR), the index established by the tax authorities for preparation of financial statements under Brazilian corporate law as well as the index selected by the CVM.

The reconciliation presents the effect of adjusting property, plant and equipment for U.S. GAAP purposes through December 31, 1997. Under U.S. GAAP, management of the Company considers that Brazil was considered to be a highly inflationary economy until December 31, 1997 and, as such, property, plant and equipment should be adjusted for inflation through such date.

In determining amounts under U.S. GAAP, the effects of inflation for the years ended December 31, 1996 and 1997 were determined using the Índice Geral de Preços Disponibilidade Interna (IGP-DI) index, which is a widely-accepted and a respected index published on a monthly basis by the Fundação Getúlio Vargas.

Because the Company's management believes that the IGP-DI is an appropriate and consistent measure of the general price inflation in Brazil and because of its availability, for U.S. GAAP purposes the Company adopted the IGP-DI for restatement of its financial statements also for periods through December 31, 1995, replacing the Government mandated index. As a result, property, plant and equipment has been monetarily adjusted for inflation using the IGP-DI since its acquisition through December 31, 1997.

##### **b) Capitalization of interest during construction in progress**

Under Brazilian GAAP, prior to 1996 the Company was not required to capitalize the interest cost of borrowed funds as part of the cost of the related asset. Under U.S. GAAP, capitalization of borrowed funds during construction of major facilities is recognized as part of the cost of the related assets.

---

## **Table of Contents**

Under U.S. GAAP, interest on construction-period financing denominated in foreign currencies is capitalized using contractual interest rates excluding foreign exchange gains or losses.

### **c) Pension and other post-employment benefits**

#### **c.1) Pension benefits**

Pension benefit obligations for Brazilian GAAP should be accounted for following CVM Instruction No. 371/00, which requires the mandatory application of Brazilian Accounting Standard IBRACON NPC 26. Under IBRACON NPC 26 the Company has accounted for the plan administered by FFMB (and to which several Petróleo Ipiranga companies contribute) by recognizing a percentage attributed to the Company of the funded status and of the cost of the plan.

Under U.S. GAAP, considering that the financial information of the Company does not consolidate all the sponsors of the FFMB and such financial information does not represent the financial statements of the parent company of the Petróleo Ipiranga companies, the Company has accounted for its participation in the pension plan administered by FFMB as if it was a multi-employer plan.

As a result, the reconciliation presents: (a) the reversal of the pension plan asset/liability recognized for Brazilian GAAP as of each reporting date and the reversal of the related pension cost, and (b) the recognition as liability of the contribution due to the plan over the corresponding period.

#### **c.2) Other post-retirement benefits**

As explained in Note 18, the accompanying financial statements account for other post-retirement benefits following IBRACON NPC 26. Other post-retirement benefits are unfunded and are the sole responsibility of each Petróleo Ipiranga company. Under IBRACON NPC 26 actuarial gains and losses are deferred and recognized in income over the estimated remaining service period of the employees to the extent that those actuarial gains and losses exceed 10% of the higher of the plan assets and the projected benefit obligation.

Under U.S. GAAP, such benefits are accounted for following SFAS No. 106, *Employers' Accounting for Post-retirement Benefits Other Than Pensions* and, as from December 31, 2006, following SFAS No. 158 *Employers' Accounting for Defined Benefit Pension and Other Post-retirement Plans* an amendment of FASB Statements No. 87, 88, 106 and 132(R). Under SFAS No. 158, the funded status of the other postretirement benefits must be recognized as a liability with an offsetting amount in accumulated other comprehensive income. As required by SFAS No. 158, provisions of SFAS No. 158 were applied on a prospective basis as from December 31, 2006.

Although projected benefit obligations are the same under Brazilian GAAP and U.S. GAAP, differences arise in the amounts recorded in the financial statements as result of: (i) the date of initial measurement of funded status is different for Brazilian GAAP and U.S. GAAP and that under Brazilian GAAP there is no requirement to recognize a liability for uncovered plans, and (ii) the recognition, as from December 31, 2006, as a liability for U.S. GAAP purposes, of the funded status against accumulated other comprehensive income.

### **d) Accounting for derivative financial instruments**

The Company has entered as of December 31, 2005 and during the six months ended June 30, 2006 into swap transactions. Under Brazilian GAAP swaps are valued at its accrued amount determined as the difference as the amount receivable and the amount payable under the swap. The amounts receivable and payable are computed as their respective notional amount plus accrued charges based on their contractual terms.

Under U.S. GAAP, SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, established accounting and reporting standards requiring that all derivative instruments be recorded in the

## **Table of Contents**

balance sheet as either an asset or a liability measured at its fair value. Changes in the derivative's fair value are recognized currently in earnings unless specific hedge accounting criteria are met. The Company has not accounted for any derivative instrument following hedge accounting.

The reconciliation presents the differences resulting from valuing the swaps at fair value under U.S. GAAP as opposed to valuing them at the accrued amount used under Brazilian GAAP. As of June 30, 2007 no difference was identified between the accrued amount and the fair value.

### **e) Fair value of guarantees under FIN 45**

Under Brazilian GAAP, the Company is not required to record any liability related to guarantees given to third parties unless contingent obligations to make future payments under the guarantees are considered probable.

The Company has not recorded any liability related to these guarantees under Brazilian GAAP as of any of the dates presented.

Under U.S. GAAP, the Company recognizes, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing guarantees in accordance with FIN 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. In the event that, at inception of the guarantee, the Company is required to recognize a liability under SFAS No. 5, *Accounting for Contingencies*, the liability initially recognized would be the greater of: (a) the amount of fair value of the value of the obligation undertaken in issuing guarantee, or (b) the contingent liability amount required to be recognized at inception of the guarantee by applying SFAS No. 5.

Guarantees granted include those disclosed in Note 20 as well as guarantees provided to financial institutions that finance sales to selected customers under the vendor program. Under the vendor program the Company is the secondary obligor to the financial institutions.

The reconciliation presents the effect of recognizing a liability for the fair value of these guarantees and the related effect in the statement of income.

### **f) Accounting for asset retirement obligation**

Under Brazilian GAAP, the Company's practice is to expense amounts relating to retirement of certain assets as incurred.

Under U.S. GAAP, the Company adopts SFAS No. 143, *Accounting for Asset Retirement Obligations*. Asset retirement obligations correspond to the legally required obligation to remove fuel tanks upon retirement. Under SFAS No. 143, the fair value of asset retirement obligations are recorded as liabilities on a discounted basis when they are incurred, which is typically at the time the related assets are installed. Amounts recorded for the related assets will be increased by the amount of these obligations and depreciated over the related useful lives of such assets. Over time, the amounts recognized as liabilities will be accreted for the change in their present value until the related assets are retired or sold.

### **g) Gain on change in equity interest in Maxfácil**

In December 2006, the Company recognized a capital gain, in the amount of R\$ 58,136, relating to the gain on change in equity interest in Maxfácil as described in Note 4.

The gain has been determined as a result of Maxfácil having issued new shares to UNIBANCO at a price higher than the carrying amount per share of the investment recorded by the Company in Maxfácil.

## **Table of Contents**

Under U.S. GAAP, considering that Maxfácil is a newly formed entity, the Company believes it does not meet the criteria for gain recognition established in SAB Topic 5-H.

The reconciliation presents the effect of reverting for U.S. GAAP the capital gain recognized under Brazilian GAAP.

### **h) U.S. GAAP adjustments on net equity and net income of affiliates**

The investments in Termogaúcha Usina Termelétrica S.A., Ipiranga Química S.A. ( IQ ), and Transportadora Sulbrasileira de Gás S.A. ( TSB ) are accounted under the equity method under Brazilian GAAP.

Such investment would also be accounted for following the equity method under U.S. GAAP.

Differences between net equity and net income of the affiliates correspond mainly to: accounting for deferred charges, accounting for business combination and goodwill, accounting for pension and other post-employment benefits, revaluation of property, plant and equipment, capitalization of interest on property, plant and equipment, recognition of tax incentives, accounting for derivative financial instruments, accounting for dividends and interest on capital, and accounting for the provision for programmed maintenance.

The net effects of those adjustments are presented in the reconciliation to U.S. GAAP.

### **i) Accounting for convertible debentures issued by Ipiranga Química S.A. and related warrants**

#### **i.1) Accounting for convertible debentures issued by IQ**

Under Brazilian GAAP, convertible debentures issued by IQ described in Note 7 are accounted for as a single instrument at its cost plus accrued interest following the contractual terms.

Under U.S. GAAP, the Company has concluded that the non-detachable conversion option included in the convertible debentures issued by IQ does not meet the definition of a derivative under SFAS 133 Accounting for Derivative Instruments and Hedging Activities, as amended and interpreted . Also , the Company concluded that the conversion option did not have, as of the date of issuance, intrinsic value, therefore, the total amount of the proceeds has been allocated to the convertible debenture. This has resulted in no difference between Brazilian GAAP and U.S. GAAP with respect to the accounting of the convertible debenture issued by IQ until the modification of its terms.

However, the convertible debenture was marked-to-market at every reporting period with charges to the statements of income for US GAAP purposes, creating a difference in valuation of the convertible instrument for US GAAP of R\$ 21 million at the date of the modification of the terms.

#### **i.2) Accounting for the modification of terms of the debentures and issuance of warrants**

In October 2005, a modification was introduced in the terms of the debentures such that they were modified from convertible to non-convertible; no other terms of the debentures have been modified. At the same moment, IQ issued to the holders of the debentures, detachable warrants which allow the holders of the warrants to acquire shares of IQ in the exact same terms as the previously existing non-detachable conversion option included in the debentures.

Under Brazilian GAAP, warrants are not separately recorded. The modification of the terms of the debentures and the issuance of warrants in October 2005 did not have any impact in the accounting for the debentures (which were originally convertible and in October 2005 were modified to non-convertible) under Brazilian GAAP which continued to be accounted for at its cost plus accrued interest and warrants issued by IQ are not accounted for.

## **Table of Contents**

For U.S. GAAP purposes, the Company has also classified the new debt instrument received as a trading security under FAS 115. In addition, the Company has concluded that the fair value of the warrant and non-convertible debenture received approximates the fair value of the convertible debenture prior to modification. Therefore, upon modification the Company recorded the warrant and debt at their fair values.

The warrant does not meet the definition of a derivative under SFAS 133, so it is accounted for under the cost method.

The US GAAP reconciliation reflects the difference in the mark to market of the convertible debt instrument through the date of modification, compared to the amortized cost value recorded for Brazilian GAAP purposes.

### **j) Accounting for refunds**

The Company and its subsidiaries offer, to certain customers, refunds in cash if they meet a specified cumulative volume of sales over a specified period of time. Under Brazilian GAAP, the refund is recognized as an expense when the cumulative volume of sales has been met. Such refunds are offered to a reduced group of customers and have begun to be offered recently.

Under U.S. GAAP, EITF 01-9, Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products), a Company should recognize as a reduction of sales a liability based on a systematic and rational allocation of the cost of honoring the commitment in each of the underlying transactions that result in progress toward earning the refund. Considering the reduced number of customers to which the refund is offered and the reduced historical experience, the Company believes that it cannot reasonably estimate the ultimate amount that will be earned by customers. As a result, under U.S. GAAP a liability is recognized for the maximum potential amount of the refund.

### **k) Goodwill and business combinations**

Under Brazilian GAAP, assets and liabilities of entities acquired are reflected at book values. Goodwill is determined as the excess of purchase price paid over the book value of net assets acquired. Goodwill is amortized on a straight-line basis over the periods estimated to be benefited, limited to 10 years.

In July 1998, the Company made a capital contribution to IQ. Under Brazilian GAAP, such transaction generated goodwill at the date of the transaction in the amount of R\$ 49,393 and resulted in obtaining an interest in IQ of 41.47%.

Goodwill under Brazilian GAAP was totally amortized as of December 31, 2005.

Under U.S. GAAP, business combinations are accounted for following the purchase method. Under the purchase method assets and liabilities of the business acquired are recorded, to the extent of the percentage acquired, using fair values. Goodwill is determined as the difference between purchase price consideration and the fair value of assets acquired and liabilities assumed. If there is an excess of the fair value of net assets acquired over the purchase price such amount is used to reduce the carrying value of Noncurrent assets. As from January 1, 2002 goodwill is not amortized but is tested, at least annually, for impairment.

The reconciliation of net equity between Brazilian GAAP and U.S. GAAP presents: (i) the reversal of the balance of goodwill recorded under Brazilian GAAP at each balance sheet date, (ii) the recognition for U.S. GAAP purposes of the difference resulting from adjusting assets and liabilities of the entity acquired at fair value, most significantly property, plant and equipment and investment in equity investees, (iii) the recognition of resulting goodwill under U.S. GAAP, and (iv) the related deferred taxes.

The reconciliation of net income between Brazilian GAAP and U.S. GAAP presents: (i) the reversal of goodwill amortization recorded under Brazilian GAAP, (ii) the recognition in income of adjustments of assets and liability at fair value, mostly depreciation of property, plant and equipment and equity in investees, and (iii) the related deferred tax effects.

**Table of Contents****I) Accounting for uncertain income tax position FIN No. 48**

Under Brazilian GAAP, the Company is not required to record any liability related to uncertainty in income taxes, unless contingent obligation to make future payments under income taxes are probable. In addition, any income tax benefit is recognized only when realized.

Under U.S. GAAP, in June 2006, the Financial Accounting Standards Board ( FASB ) issued FASB Interpretation ( FIN ) No. 48, Accounting for Uncertainty in Income Taxes, which clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with Statement of Financial Accounting Standards ( SFAS ) No. 109, Accounting for Income Taxes. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN No. 48 was effective for fiscal years beginning after December 15, 2006.

On January 1, 2007, the Company adopted the provisions of FIN No. 48. The cumulative effect of adoption was a R\$6.0 million reduction of retained earnings. During the period ended June 30, 2007, an amount of R\$253 was recorded in the statement of income as an expense.

**II - Reconciliation of the differences between U.S. GAAP and Brazilian GAAP in net income**

**V - Additional disclosures****a) Earnings per share**

Under Brazilian GAAP, net income per share is calculated on the number of shares outstanding at the balance sheet date. In these consolidated financial statements, information is disclosed per lot of one thousand shares, because this is the minimum number of shares that can be traded on the Brazilian stock exchanges.

Under U.S. GAAP earnings per share is retroactively restated to reflect in all periods presented the effect of stock dividends. During 2006 a stock split has been approved for one new share per existing share. Earnings per share has been retroactively restated to reflect the effect of such stock dividend.

Since the preferred and common shareholders have different dividends and voting rights (see Note 19), basic earnings per share have been calculated using the two-class method for U.S. GAAP purposes. The following table provides a reconciliation of the numerators and denominators used in computing earnings per share as required by SFAS No. 128:

|                                                                                                      | June 30, 2007 |           |         |
|------------------------------------------------------------------------------------------------------|---------------|-----------|---------|
|                                                                                                      | Common        | Preferred | Total   |
| Net income for the period                                                                            | 42,637        | 93,435    | 136,072 |
| Weighted average shares outstanding (per thousand shares) basic and diluted (retroactively restated) | 35,409        | 70,543    | 105,952 |
| Basic and diluted earnings per share                                                                 | 1.2041        | 1.3245    |         |

| Basic and diluted earnings per share                                                                 | 0.9777               | 1.0755           |              |

**b) Consolidated Statement of cash flows**

Brazilian GAAP does not require the presentation of a statement of cash flows as required by U.S. GAAP. U.S. GAAP requires the presentation of a statement of cash flows describing the Company's cash flows from operating, financing and investing activities. Statements of cash flows derived from the information based on Brazilian GAAP are as follows:

|                                                                          | <b>Six months ended<br/>June 30,</b> |                    |
|--------------------------------------------------------------------------|--------------------------------------|--------------------|
|                                                                          | <b>2007</b>                          | <b>2006</b>        |
|                                                                          | <b>(unaudited)</b>                   | <b>(unaudited)</b> |
| <b>Cash flows from operating activities:</b>                             |                                      |                    |
| Net income                                                               | 179,648                              | 154,737            |
| Adjustment to reconcile net income to cash know by operating activities: |                                      |                    |
| Equity in affiliates                                                     | (68,348)                             | (47,315)           |

**REFINARIA DE PETRÓLEO IPIRANGA S.A.**

**NOTES TO THE INTERIM FINANCIAL INFORMATION**

**NINE-MONTH PERIOD ENDED SEPTEMBER 30, 2007**

**(Unaudited)**

**(In thousands of Reais)**

**1 Operations**

Refinaria de Petróleo Ipiranga S.A. (the Company) is a public-held company with shares traded on the São Paulo Stock Exchange BOVESPA.

The Company is primarily engaged in oil refining and the sale of its by-products.

**2 Presentation of the interim financial information**

The interim financial information was prepared in accordance with accounting practices derived from the Brazilian Corporation Law and the rules of the Brazilian Securities and Exchange Commission (CVM).

With the objective of improving the information presented to the market, the Company is presenting, as supplementary information, the statement of cash flows.

**3 Description of significant accounting policies**

The main accounting practices adopted by the Company, its subsidiaries and affiliated companies in preparing the interim financial information is described as follows:

**a. Temporary cash investments**

Temporary cash investments are recorded at cost plus income accrued up to the interim financial information date, which do not exceed their market value.

**b. Provision for doubtful accounts**

The Company's management has individual customer credit information, which is used to evaluate customers' ability to make payments. The allowance is recorded for an amount considered sufficient to cover probable losses on realization of accounts receivables.

**c. Inventories**

Inventories are stated at the lower of average acquisition cost or production cost and the market value or net realizable value.

**d. Investments in subsidiaries and affiliated companies**

Investments in subsidiaries and affiliated companies were valued using the equity method being recorded as operating results. Goodwill on the acquisition of investments is amortized over 10 years, the projected term of realization.

**e. Property, plant and equipment**

Property, plant and equipment are stated at the cost of acquisition or construction. Depreciation is calculated using the straight-line method, which takes into account the estimated useful lives of the assets.

**Table of Contents**

**REFINARIA DE PETRÓLEO IPIRANGA S.A.**

**NOTES TO THE INTERIM FINANCIAL INFORMATION**

**(Unaudited)**

**(In thousands of Reais)**

**f. Financing and loans**

Stated at original amounts plus financial charges incurred *pro rata temporis* until the interim financial information date. Loans acquired in foreign currency were translated into reais using the spot exchange rate at the interim financial information date.

**g. Income and social contribution taxes**

The income and social contribution taxes are calculated based on the rates of 15% plus a surcharge of 10% and 9% on taxable income for social contribution tax.

**h. Provision for contingencies**

The provision for contingencies is recorded for contingent risks that represent an estimated probable loss, based on the opinion of the internal and external legal advisors and administrators, and is recognized based on the estimated cost for the outcome of the lawsuits.

**i. Actuarial commitment with post-retirement benefits**

Actuarial commitments with the post-employment benefits plan granted and to be granted to employees, retired employees and pensioners (net of plan assets) are provisioned based on the actuarial calculation prepared by an independent actuary in accordance with the projected credit unit method.

**j. Other assets and liabilities**

Other assets and liabilities, classified as current and non-current, are recorded based on the expected timeframe of realization or payment. These other assets and liabilities are stated at known or estimated amounts, plus, when applicable, the corresponding income, charges and monetary and exchange variations incurred up to the balance sheet date.

**k. Interest on equity reserve**

Interest on capital to be received or paid/provisioned is recorded as income or financial expenses, respectively. For presentation purposes of the interim financial information, since it refers mainly to dividends, the amount was reclassified to the investments account and retained earnings, respectively. The interest paid/provisioned is calculated up to the limit established by Law no. 9.249/95, based on the long-term interest rate over the equity, and it will be paid in substitution or to complement the compulsory dividends foreseen in the Company's by-law.

**l. Statement of income**

Revenue from the sale of goods is recognized in the statement of income when the significant risks and rewards of ownership have been transferred to the buyer. Other revenues, expenses and costs are recognized when incurred and/or realized. The income statement includes surplus, charges and monetary and exchange variations, as determined by the contracts and official rates applicable to current and non-current assets and liabilities and, when applicable, the effects of the market value adjustments or realization.

**Table of Contents****REFINARIA DE PETRÓLEO IPIRANGA S.A.****NOTES TO THE INTERIM FINANCIAL INFORMATION****(Unaudited)****(In thousands of Reais)****m. Accounting estimates**

The preparation of interim financial information in accordance with accounting practices adopted in Brazil requires that management make estimates and assumptions for the Company and its subsidiaries that affect the reported amounts of assets and liabilities at the balance sheet dates and the reported amounts of revenues, costs and expenses for the years presented. Although these estimates are based on management's best available knowledge of current and expected future events, actual results could differ from these estimates.

**4 Trade account receivable**

**Table of Contents****REFINARIA DE PETRÓLEO IPIRANGA S.A.****NOTES TO THE INTERIM FINANCIAL INFORMATION****(Unaudited)****(In thousands of Reais)**

- (a) The Extraordinary General Meeting of Ipiranga Química (IQ), held on May 26, 2003 approved the issuance of two series of private convertible debentures, consisting of 11,000 Series A, with face value of R\$ 10 each, amounting to R\$ 110,000 and 80,000 Series B debentures, with face value of R\$ 1 each, amounting to R\$ 80,000. Both series mature on June 1, 2008. On June 12, 2003 the debentures were acquired by DPPI and CBPI, the Series A were fully acquired by DPPI and the series B fully acquired by CBPI. The subscribed debentures pay interest based on the CDI interest rate, plus spread subject to renegotiation every 6 months (for Series A) and every 5 months (for Series B) as established by the indenture dated June 1, 2003. Since March 2007, the remuneration spread of Series B debentures is 1.0% per year.
- (b) The Extraordinary General Meeting of Ipiranga Química (IQ) held on October 6, 2005, approved the changes to the type of debentures, issued by IQ on June 1, 2003. The changes approved were: (i) to change the debentures from convertible to nonconvertible without making any other change in the terms or conditions of the debentures, and (ii) the issuance of warrants to the holders of the debentures, without any charge, replacing the conversion right established for the debentures; the terms of the warrants allow their holders to purchase common shares of IQ under exactly the same terms as the conversion features originally included for the debentures. Subsequently, on December 1, 2005, a Sale Agreement was signed whereby DPPI sold for R\$ 29 million to Refinaria de Petróleo Ipiranga S.A. the warrants it had obtained. The amount for the sale of the warrants is payable on October 3, 2007, and bears interest at the CDI interest rate.
- (c) The acquisition of goods from Refinaria de Petróleo Ipiranga S.A. includes tax obtained from tax substitution, and there is no revenue in Refinaria de Petróleo Ipiranga S.A.

**Additional information:****Tax lawsuits**

At September 30, 2007 and June 30, 2007 tax lawsuits were related to: (1) social security contribution assessment related to disclosure of GFIP with incomplete information on the taxable events from the payroll; and (2) tax assessment due to the non-payment of the future market and exchange commission. The decrease refers to the payment of the lawsuit related to SAT, collected by INSS.

**Labor lawsuits**

At September 30, 2007 and June 30, 2007, the Company's labor lawsuits refer mainly to lawsuits filed by former employees and outsourced professionals claiming payroll charges, such as overtime, hazardous duty premium, etc. The decrease presented at the quarter refers mainly to the payment of a labor claim.

**b. Contingent liabilities Possible**

The lawsuits considered as representing possible risk of losses by management, based on internal and external legal advisors, are not provisioned in the interim financial information and comprised of:

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

|       | September 30,<br>2007 | June 30,<br>2007 |

F-368

**Table of Contents****REFINARIA DE PETRÓLEO IPIRANGA S.A.****NOTES TO THE INTERIM FINANCIAL INFORMATION****(Unaudited)****(In thousands of Reais)****Additional information:****Tax lawsuits**

At September 30, 2007 and June 30, 2007, fiscal lawsuits refer mainly to: (1) tax assessment due to non payment of inspection from stock market; (2) notification to pay amounts originated from deductions of education-allowance incorrectly made, based on the absence of information to the National Fund for Development of Education (FNDE) and (3) voluntary denouncement of incorrect payment of PIS/COFINS without the payment of penalties.

**Labor lawsuits**

At September 30, 2007 and June 30, 2007, labor lawsuits in this classification referred mainly to cases brought by former employees and outsourced personnel, which claim for salary charges.

**c. Contingent assets**

The Company and its subsidiaries have filed administrative and judicial claims at Federal and State courts to recover incorrect payments or overpayment of taxes, charges and contributions, which may, when ended, represents income which, given their contingent nature, have not been recorded in the interim financial information as at September 30, 2007.

As a result of the changes in lawsuits, management, based on its legal counsel, has classified the lawsuit as representing a probable successful outcome. At September 30, 2007, the aforementioned lawsuits have been summarized as follows:

**Federal**

|                                  |       |
|----------------------------------|-------|
| PIS/COFINS Increase in tax basis | 3,154 |
|----------------------------------|-------|

**State**

|                          |       |
|--------------------------|-------|
| State income surtax AIRE | 3,453 |
|--------------------------|-------|

**14 Management and employees interest**

These interests are calculated based on the net income, after the deductions of accumulated losses, if any, and income and social contribution taxes, being calculated in this respective order, as follows:

**a. Employees interest**

Calculated at 3% of net income, which is calculated after excluding all results from investments, recorded in the statements of income as income or expenses of equity in income of affiliated companies, amortization of goodwill (negative or positive), write-off of investments and interest on capital received or paid by the Company during the period.

**b. Management interest**

Calculated at the end of the period, at 10% on net income after employees' interest, which can not exceed the global annual remuneration fixed for management in the General Meeting.

F-369

**Table of Contents****REFINARIA DE PETRÓLEO IPIRANGA S.A.****NOTES TO THE INTERIM FINANCIAL INFORMATION****(Unaudited)****(In thousands of Reais)****15 Provision for post-retirement benefits**

The Company, together with other Petróleo Ipiranga Companies, sponsors Fundação Francisco Martins Bastos, a separate entity offering complementary private pensions, whose retirement supplement plan covers all employees.

The accumulated amount for the Company's contribution, for the period ended September 30, 2007, was R\$ 238. (R\$ 329 at September 30, 2006)

Net liabilities registered at September 30, 2007, were R\$ 40,446, of which R\$ 3,857 was recorded as current liabilities and R\$ 36,589 as non-current liabilities.

These additional retirement benefits were calculated in an actuarial evaluation conducted by independent actuaries, Towers Perrin Forster & Crosby Ltda.

Actuarial liabilities at September 30, 2007, reflect the appraisal report prepared by the independent actuary on May 30, 2007, maintaining the biometric assumptions and rates disclosed in the financial statements as of December 31, 2006.

**16 Shareholders equity****a. Capital**

At September 30, 2007, capital comprised 29,600,000 shares with no par value, composed of 9,982,404 common shares and 19,617,596 preferred shares.

Preferred shares have no voting rights and are entitled to dividends 10% higher than those paid on common shares and have priority in the distribution of dividends and in the reimbursement of capital, in the event the Company is liquidated.

**b. Reserves**

|                                                                       | <b>September 30,<br/>2007</b> | <b>June 30,<br/>2007</b> |

| Unrealized profits                                                    |                               |                          |
| Year 2004                                                             | 27,374                        | 27,374                   |
| Year 2005                                                             | 21,941                        | 21,941                   |
| Year 2006                                                             | 28,856                        | 28,856                   |

The Extraordinary General Meeting, held on April 18, 2007, approved the capital increase from R\$ 365 million to R\$ 475 million, incorporating the total of the profit reserve working capital and improvement to facilities of R\$ 109,067 and part of the profit reserve legal reserve in the amount of R\$ 933.

F-370

**Table of Contents****REFINARIA DE PETRÓLEO IPIRANGA S.A.****NOTES TO THE INTERIM FINANCIAL INFORMATION****(Unaudited)****(In thousands of Reais)****c. Distribution of dividends**

Shareholders are guaranteed an annual distribution of minimum mandatory dividends corresponding to 30% of the net profit for the fiscal period, after 5% has been set aside for the legal reserve. Shareholders holding preferred shares are entitled to receive dividends or interest on own capital 10% higher than those holding common shares. The aforementioned dividends are calculated in accordance with Article 202 of Law 6.404/76.

**d. Interest on equity reserve**

The Ordinary General Meeting, held on April 18, 2007, approved the payment after June 15, 2007, of interest on equity reserve related to the 2006 year-end, related to the part of realized net income, based on the share position held by the shareholders at that date. The amount of interest on capital approved per share has been summarized as follows:

|              | <b>Common</b> | <b>Preferred</b> |
|--------------|---------------|------------------|
| Gross amount | 0.5668        | 0.6235           |
| Net amount   | 0.4818        | 0.5300           |

**17 Sureties and warranties provided**

In the normal course of business, the Company issues sureties, warranties and pledges on certain fund-raising transactions carried out by affiliates and direct or indirect subsidiaries.

At September 30, 2007, the values referring to these transaction guarantees by DPPI were as follows:

| <b>Guaranteed</b> | <b>September 30,<br/>2007</b> | <b>June 30,<br/>2007</b> | <b>Maturity</b> |
|-------------------|-------------------------------|--------------------------|-----------------|

**NOTES TO THE INTERIM FINANCIAL INFORMATION**

**(Unaudited)**

**(In thousands of Reais)**

**18 Financial instruments**

Considering the terms of CVM Instruction 235/95, the Company and its subsidiaries conducted an evaluation of current book assets and liabilities in relation to their market values, based on information available and appropriate evaluation methodologies. The market values of the Company's main financial instruments are close to their book values. However, the interpretation of market data and the selection of evaluation methods require considerable judgment and reasonable estimates to produce the most appropriate realization value. As a result, the estimates presented do not necessarily indicate the amounts that may be realized in the current market. The use of different market assumptions and/or estimate methodologies may have a material effect on the estimated market values.

The Company and its subsidiaries take part in transactions that involve financial instruments, registered in equity accounts, used to meet requirements and reduce exposure to credit, market and currency risks. Administration of these risks is carried out by defining strategies, establishing control systems and defining position limits.

The Company's assets and liabilities were evaluated to fair-value on the balance date. The result of this evaluation did not result in the need to make adjustments to those amounts disclosed in the interim financial information.

The main bases for the financial instruments affecting the Company's businesses are listed below:

**a. Currency risk**

This risk arises from the possibility of the Company incurring significant losses due to the fluctuations in exchange rates which may affect foreign currency loan and finance balances.

**b. Credit risk**

The risk of the Company incurring losses following defaults on customer financing and accounts receivable. In order to reduce this type of risk, the Company has a policy for granting credit and executes supply agreements with its customers obtaining real guarantees for significant balances.

**c. Price risk**

The oil refining activity is subject to this risk when variations in the price of petroleum in the market are not transferred to petroleum products. To reduce this risk, the Company has been seeking alternatives with the Federal Government and Petrobrás.

**d. Interest rate risk**

This risk arises from the possibility of the Company incurring losses due to interest rate fluctuations that increase financial expenses on loans and financing raised on the markets. The Company continuously monitors market interest rates in order to evaluate the need for hedging against interest rate volatility.

**19 Insurance**

The Company has an insurance and risk management program that provides coverage and protection for all insurable assets, including insurance coverage for risks arising from suspended production, in an operational risk policy negotiated with national and international insurers through the Brazilian Reinsurance Institute.

Coverage and limits insured in the contracted policies are based on rational studies of risks and losses carried out by local insurance consultants, and the board believes that the type of insurance contracted is sufficient to cover any claims that may occur, in light of the nature of the Company's activities.

Main insurance coverage is related to operating risks, loss of profits, industrial multi-risk, office multi-risk, named risks pools and civil liability.

**20 Subsequent events**

In April, 2007 Ultrapar acquired the control of certain companies from the Ipiranga Group. The acquisition process is structured in four stages. The first stage was concluded on April 18 with the control transference. Currently the second stage of the process is being concluded, which is the accomplishment of tag along public offering (OPA) by Refinaria de Petróleo Ipiranga S.A. (RPI), Distribuidora de Produtos de Petróleo Ipiranga S.A. (DPPI) and Companhia Brasileira de Petróleo Ipiranga S.A. (CBPI). On October 22, the auctions were made through public offering by DPPI and RPI. A total of 1,274,718 shares were acquired by DPPI, equivalent to 77% of the shares offered by the target and 2,771,781 shares by RPI, equivalent to 82% of the shares offered by the target. The auction of OPA by CBPI is anticipated for November 8,

2007.

**NOTES TO THE INTERIM FINANCIAL INFORMATION**

**NINE-MONTH PERIOD ENDED SEPTEMBER 30, 2007**

**(Unaudited)**

**(In thousands of Reais)**

**1 Operations**

Distribuidora de Produtos de Petróleo Ipiranga S.A. (the Company) is a publicly-held Company with shares traded on the São Paulo Stock Exchange BOVESPA. Until April 18, 2007, the shareholder control was held by the families Bastos, Mello, Ormazabal, Tellechea and Gouvêa Vieira.

On April 18, 2007, Ultrapar Participações S.A. (Ultrapar), for itself and also as commission agent of Petróleo Brasileiro (Petrobrás) and Braskem S.A. (Braskem), acquired from the controlling shareholders of Ipiranga Group, 66.2% of the common shares and 13.9 % of the preferred shares issued by Refinaria de Petróleo Ipiranga S.A., 69.2% of the common shares and 13.5 % of the preferred shares issued by Distribuidora de Produtos de Petróleo Ipiranga S.A. and 3.8% of the common shares and 0.4 % of the preferred shares issued by Companhia Brasileira de Petróleo Ipiranga.

The Company, its subsidiaries and affiliated companies are engaged in the distribution of fuels, lubricants and related products, convenience stores and also the petrochemical business.

**2 Presentation of the interim financial information**

The interim financial information was prepared in accordance with accounting practices derived from the Brazilian Corporation Law and the rules of the Brazilian Securities and Exchange Commission (CVM).

With the objective of improving the presentation of the information provided to the market, the Company has presented, as supplementary information, the statement of cash flows prepared in accordance with NPC 20 Statement of Cash Flows, issued by IBRACON (Brazilian Institute of Independent Auditors).

**3 Description of significant accounting policies**

The main accounting practices adopted by the Company, its subsidiaries and affiliated companies in preparing the interim financial information are consistent with those adopted for the previous interim financial information and the financial statements as at December 31, 2006, as presented below:

**a. Temporary cash investments**

Temporary cash investments are recorded at cost plus income accrued up to the interim financial information date, which do not exceed their market value.

**b. Provision for doubtful accounts**

Provision for doubtful accounts was calculated at an amount considered adequate by management to cover any losses arising on collection of accounts receivable.

**c. Inventories**

Inventories are stated at the lower of average acquisition cost or production cost and the market value or net realizable value.

F-380

## **Table of Contents**

### **d. Investments in subsidiaries and affiliated companies**

Investments in subsidiaries and affiliated companies were valued using the equity method being recorded as operating results.

### **e. Property, plant and equipment**

Property, plant and equipment are stated at acquisition or construction cost. Depreciation is calculated using the straight-line method, which takes into account the estimated useful lives of the assets. Leasehold improvements are depreciated over the effective contract terms or the useful life of the assets, if shorter.

### **f. Loans and financing**

Stated at original amounts plus financial charges incurred *pro rata temporis* until the interim financial information date. Loans acquired in foreign currency were translated into reais using the spot exchange rate at the interim financial information date.

### **g. Income and social contribution taxes**

The income and social contribution taxes, current and deferred (CVM deliberation no. 273/98), are calculated using the effective income and social contribution tax rates, as mentioned in note no. 9.

### **h. Provision for contingences**

The provision for contingencies is recorded for contingent risks that represent an estimated probable loss, based on the opinion of the internal and external legal advisors and administrators, and recognized based on the estimated cost from the outcome of the lawsuits.

### **i. Actuarial commitment with post-retirement benefits**

Actuarial commitments with the post-retirement benefits plan granted and to be granted to employees, retired employees and pensioners (net of plan assets) are provisioned based on the actuarial calculation prepared by an independent actuary in accordance with the projected credit unit method.

### **j. Other assets and liabilities**

Other assets and liabilities, classified as current and non-current, are recorded based on the expected timeframe of realization or payment. These other assets and liabilities are stated at known or estimated amounts, plus, when applicable, the corresponding incomes, charges and monetary and exchange variations incurred up to the balance sheet date.

### **k. Statement of income**

Revenue from the sale of goods is recognized in the statement of income when the significant risks and rewards of ownership have been transferred to the buyer. Other revenues, expenses and costs are recognized when incurred and/or realized. The income statement includes surplus, charges and monetary and exchange variations, as determined by the contracts and official rates applicable to current and non-current assets and liabilities and, when applicable, the effects of the market value adjustments or realization.

### **l. Accounting estimates**

The preparation of interim financial information in accordance with accounting practices adopted in Brazil requires management to make estimates and assumptions for the Company and its subsidiaries that affect the

**Table of Contents**

reported amounts of assets and liabilities at the balance sheet dates and the reported amounts of revenues, costs and expenses for the years presented. Although these estimates are based on management's best available knowledge of current and expected future events, actual results could differ from these estimates.

**4 Consolidation criteria**

The consolidated interim financial information was prepared in accordance with basic consolidation principles derived from the Brazilian Corporation Law and the rules of the Brazilian Securities and Exchange Commission (CVM), which comprise Distribuidora de Produtos de Petróleo Ipiranga S.A. (parent company) and the following subsidiaries:

(a) On June 12, 2003, Distribuidora de Produtos de Petróleo Ipiranga (DPPI) subscribed in full to 11,000 debentures, Series A, for the nominal amount of R\$ 10 each, amounting to R\$ 110,000, issued by Ipiranga

**Table of Contents**

Química (IQ). The remuneration for the debentures corresponds to the Interbank Deposit Certificate (CDI), plus spread subject to six-month period. This spread, from December 1, 2005 is set at 1% per year. In 2007, IQ surrender 636 debentures, Series A per R\$ 12,206, with R\$ 6,360 as principal and R\$ 5,846 as interest. On September 30, 2007 after several surrenders by IQ, DPPI remained with 2,489 debentures. For this quarter, the financial income from the remuneration of these debentures amounted to R\$ 1,519 (R\$ 3,805 at September 30, 2006).

- (b) Through the Understanding Protocol signed on October 3, 2005, Distribuidora de Produtos de Petróleo Ipiranga S.A. (DPPI), Companhia Brasileira de Petróleo Ipiranga (CBPI) and Refinaria de Petróleo Ipiranga S.A. (RPI), agreed to hold the Extraordinary General Meeting (AGE) of Ipiranga Química (IQ) which defined the change in the debenture category, issued by IQ on June 2003 from convertible to non-convertible shares and the issuance of subscription bonus to be delivered to DPPI and CBPI, without encumbrance, to substitute the conversion rights.

The aforementioned AGE was held on October 6, 2005 and all of the transactions foreseen in the Understanding Protocol were rendered. On December 1st, 2005 an agreement was signed for the sale and purchase and DPPI sold its subscription bonus to Refinaria de Petróleo Ipiranga S.A., amounting to R\$ 29 million and as consequence, kept its participation in IQ. The referred amount will be paid by RPI to DPPI by October 3, 2007, remunerated by the Interbank Deposit Certificates(CDI). For this quarter, the financial income from this transaction amounted to R\$ 998. (R\$ 1,114 at September 30, 2006)

- (c) The acquisitions of goods from Refinaria de Petróleo Ipiranga include taxes charged through taxation substitution, which are not revenues for Refinaria de Petróleo Ipiranga S.A.

**Table of Contents****9 Income and social contribution taxes****a. Deferred**

The register of the deferred tax asset is based upon the Company's past profitability, and considers the Company's budget which projects profitable operations to enable the realization of these credits within a period not exceeding 10 years. The basis for the constitution of these tax assets are as follows:

|                                               | September 30,<br>2007 | June 30,<br>2007 |
|-----------------------------------------------|-----------------------|------------------|
| <b>Assets</b>                                 |                       |                  |
| Provision for post-retirement benefits        | 30,229                | 30,229           |
| Provision for contingencies                   | 2,602                 | 3,055            |
| Provision for variable remuneration           | 2,985                 | 2,047            |
| Provision for losses on taxes                 | 5,550                 | 6,035            |
| Other provisions                              | 4,722                 | 2,101            |
| Calculation basis                             | 46,088                | 43,467           |
| Tax rate                                      | 34%                   | 34%              |
| Deferred income and social contribution taxes | 15,670                | 14,779           |
| (-) Current                                   | 3,678                 | 3,234            |
| Non-current                                   | 11,992                | 11,545           |

**b. Estimated recovery of deferred income tax and social contribution**

The estimated recovery of deferred income and social contribution tax is based on projections of taxable income.

Considering that the fiscal credits relate mainly to temporary differences (provision for contingencies and provision for post-retirement benefits granted and to be granted), the realization of credits will occur with the settlement of the correspondent liability. Management, based on the estimate of the final decision on the existing claims and considering the nature of the provisions which gave rise to such, estimates the recovery of these credits as follows:

|              |        |
|--------------|--------|
| 2007         | 3,678  |
| 2008         | 3,218  |
| 2009         | 919    |
| 2010         | 906    |
| 2011 to 2013 | 3,121  |
| 2014 to 2016 | 3,828  |
|              | 15,670 |

| Non-current | 1,675                 |                  | 106                   |                  | 1,569                 |                  |

**Additional information:****Tax lawsuits**

At September 30, 2007 and June 30, 2007, fiscal lawsuits refer mainly to taxation of Value-Added Tax on Sales and Services (ICMS) in the State of Mato Grosso due to the fuel alcohol acquisition at the Company's paulista branch, destined for sale in the State of Rio Grande do Sul state, due to noncompliance with the accessory obligation foreseen in the ICMS Agreement 54/02.

**Labor lawsuits**

At September 30, 2007 and June 30, 2007, labor lawsuits of the Company and its subsidiaries refer mainly to lawsuits filed by former employees and outsourced professionals claiming payroll charges, such as overtime, hazardous duty premium, etc. The decrease presented refers to the calculation review of the lawsuits.

**b. Contingent liabilities Possible**

The lawsuits considered as representing possible risk of losses by management, based on the opinion of the internal and external legal advisors, are not provisioned in the interim financial information and comprise of:

|       | September 30,<br>2007 | June 30,<br>2007 |
|-------|-----------------------|------------------|
| Tax   | 31,402                | 31,841           |
| Civil | 1,889                 | 742              |
| Labor | 4,614                 | 726              |
|       | 37,905                | 33,309           |

*Additional information:*

**Tax lawsuits**

At September 30, 2007, fiscal lawsuits in this classification related mainly to: (1) demand to revert ICMS credits in operations with anhydrous alcohol in the State of Sao Paulo; (2) demand to revert ICMS credits, supposedly transferred to third parties for amounts in excess of those allowed by the São Paulo state law;

F-389

**Table of Contents**

(3) demand of social security contributions supposedly owned by third parties, services entities, which did not prove clearly its payments;  
 (4) non-homologation of IPI credits originated from manufacturing materials purchases and (5) assessment due to invoices issued without physical delivery of the good (anhydrous alcohol) from transactions of loan returns of products made to plant producer in the State of São Paulo.

**Civil lawsuits**

At September 30, 2007 and June 30, 2007, civil lawsuits were mostly litigation of indemnity due to the lease agreement, commercial and service rendering by the Company. The variation presented refers to the review of the calculation of the lawsuits.

**Labor lawsuits**

At September 30, 2007 and June 30, 2007, labor lawsuits in this classification mostly referred to cases brought by former employees and outsourced personnel, claiming for salary payments. The variation verified for this quarter is due to the review of the calculation of the lawsuits and inclusion of some suits that has not been recorded in internal controls.

**c. Contingent assets****Tax lawsuits**

The Company and its subsidiaries have filed administrative and judicial claims at Federal and State courts to recover improper payment or overpayment of taxes, charges and contributions, which may, when ended, represent income which, given its contingent nature, has not been recorded at September 30, 2007 and June 30, 2007 in the interim financial information.

As a result of the changes in lawsuits, management, based on its legal counsel, has classified the lawsuit as having a probable successful outcome. At September 30, 2007 and June 30, 2007, the aforementioned lawsuits have been summarized as follows:

|                                  | September 30,<br>2007 | June 30,<br>2007 |
|----------------------------------|-----------------------|------------------|
| <b>Federal</b>                   |                       |                  |
| FGTS Refund of contribution      |                       | 27               |
| PIS/COFINS Increase in tax basis | 8,144                 | 8,033            |
|                                  | 8,144                 | 8,060            |
| <b>State</b>                     |                       |                  |
| State income surtax AIRE         | 1,711                 | 1,694            |

**16 Provision for post-retirement benefits**

The Company, jointly with other Petróleo Ipiranga Companies, sponsors Fundação Francisco Martins Bastos, a separate entity offering complementary private pensions, whose retirement supplement plan covers all employees.

The accumulated amount of the Company's contribution, for the period ended September 30, 2007, was R\$ 498. (R\$ 685 at September 30, 2006)

Net liabilities registered on September 30, 2007, was R\$ 30,229, of which R\$ 2,309 has been recorded as current liabilities and R\$ 27,920 as non-current liabilities.

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

These additional retirement benefits were calculated in an actuarial evaluation conducted by independent actuaries Towers Perrin Forster & Crosby Ltda.

F-390

**Table of Contents**

Actuarial liabilities at September 30, 2007, reflect the appraisal report prepared by the independent actuary on May 30, 2007, maintaining the biometric assumptions and rates disclosed in the financial statements as of December 31, 2006.

**17 Shareholders equity****a. Capital**

At September 30, 2007, capital was represented by 32,000,000 shares with no par value, composed of 10,706,368 common shares and 21,293,632 preferred shares.

Preferred shares have no voting rights and are entitled to dividends 10% higher than those paid on common shares and have priority in the distribution of dividends and in the reimbursement of capital, in the event of the Company's liquidation.

The Extraordinary General Meeting, held on April 18, 2007, approved the increase in capital from R\$ 555,000 to R\$ 615,000, through capitalization of part of the revenue reserve for working capital (R\$60,000), with no new shares issue.

**b. Reserves**

The Company's by-laws determine that the residual amount in the retained earnings account, after income distribution, shall be transferred to the working capital reserve, conservation and improvement of facilities, up to the limit of the capital account. Any remaining amounts should be incorporated as part of capital, through Ordinary Stockholders approval of year-end financial statements.

| Subsidy for investments (income tax fiscal incentives) | 50                    | 50               |
|                                                        | 50                    | 50               |
| <b>Profit reserves</b>                                 |                       |                  |
| Legal                                                  | 59,921                | 59,921           |
| Working capital                                        | 129,058               | 129,058          |
|                                                        | 188,979               | 188,979          |

**c. Distribution of dividends**

Shareholders are guaranteed an annual distribution of the minimum mandatory dividends corresponding to 30% of the net profit for the fiscal period, after 5% has been set aside for the legal reserve. Shareholders holding preferred shares are entitled to receive dividends or interest on own capital 10% higher than those holding common shares.

**18 Sureties and warranties provided**

In the normal course of business, the Company issues sureties, warranties and pledges on certain fund-raising transactions carried out by affiliates and direct or indirect subsidiaries.

**Table of Contents**

At September 30, 2007, the amounts that refer to these transactions and guaranteed by DPPI are as follows:

| Guarantee | Guaranteed | September | June 30, | Maturity |
|-----------|------------|-----------|----------|----------|
|           |            | 30, 2007  | 2007     |          |
| DPPI      | CBPI       | 2,674     | 3,096    | 2009     |

DPPI Distribuidora de Produtos de Petróleo Ipiranga S.A.

CBPI Companhia Brasileira de Petróleo Ipiranga

IQ Ipiranga Química S.A.

IQAG Ipiranga Química Armazéns Gerais Ltda.

**19 Financial instruments**

Considering the terms of CVM Instruction 235/95, the Company and its subsidiaries conducted an evaluation of current book assets and liabilities in relation to their market values, based on information available and appropriate evaluation methodologies. The Market values of the Company's main financial instruments are close to their book values. However, the interpretation of market data and the selection of evaluation methods require considerable judgment and reasonable estimates to produce the most appropriate realization value. As a result, the estimates presented do not necessarily indicate the amounts that may be realized in the current market. The use of different market assumptions and/or estimate methodologies may have a material effect on the estimated market values.

The Company and its subsidiaries take part in transactions that involve financial instruments, registered in equity accounts, used to meet requirements and reduce exposure to credit, market and currency risks. Administration of these risks is carried out by defining strategies, establishing control systems and defining position limits.

The main bases for the financial instruments affecting the Company's businesses are listed below:

**a. Currency risk**

This risk arises from the possibility of the Company incurring significant losses because of fluctuations in exchange rates which may affect foreign currency loan and finance balances.

**b. Credit risk**

The risk of the Company incurring losses following defaults on customer financing and accounts receivable. In order to reduce this type of risk, the Company has a policy for granting credit and executes supply agreements with its customers obtaining real guarantees for significant balances.

**c. Interest rate risk**

This risk arises from the possibility of the Company incurring losses due to interest rate fluctuations that increase financial expenses on loans and financing raised on the markets. The Company continuously monitors market interest rates in order to evaluate the need for hedging against interest rate volatility.

**20 Insurance**

The Company has an insurance and risk management program that provides coverage and protection for all insurable assets, including insurance coverage for risks arising from suspended production, in an operational risk policy negotiated with national and international insurers through the Brazilian Reinsurance Institute.

Coverage and limits insured in the contracted policies are based on rational studies of risks and losses carried out by local insurance consultants, and the board believes that the type of insurance contracted is sufficient to cover any claims that may occur, in light of the nature of the Company's activities.

Main insurance coverage is related to operating risks, loss of profits, industrial multi-risk, office multi-risk, named risks pools and civil liability.

**21 Subsequent events**

As mentioned in Note 1, in April, 2007 Ultrapar acquired the control of certain companies from the Ipiranga Group. The acquisition process is structured in four stages. The first stage was concluded on April 18 with the control transference. Currently the second stage of the process is being concluded, which is the accomplishment of tag along public offering (OPA) by Refinaria de Petróleo Ipiranga S.A. (RPI), Distribuidora de Produtos de Petróleo Ipiranga S.A. (DPPI) and Companhia Brasileira de Petróleo Ipiranga S.A. (CBPI). On October 22, the auctions were made through public offering by DPPI and RPI. A total of 1,274,718 shares were acquired by DPPI, equivalent to 77% of the shares offered by the target and 2,771,781 shares by RPI, equivalent to 82% of the shares offered by the target. The auction of OPA by CBPI is anticipated for November 8, 2007.

**NOTES TO THE INTERIM FINANCIAL INFORMATION**

**NINE-MONTH PERIOD ENDED SEPTEMBER 30, 2007**

**(Unaudited)**

**(In thousands of Reais)**

**1 Operations**

Companhia Brasileira de Petróleo Ipiranga (the Company) is a listed Company with shares traded on the São Paulo Stock Exchange BOVESPA. Until April 18, 2007, the shareholding control was held by the families Bastos, Mello, Ormazabal, Tellechea and Gouvêa Vieira.

On April 18, 2007, Ultrapar Participações S.A. (Ultrapar), by itself and also as the commission agent of Petróleo Brasileiro (Petrobrás) and Braskem S.A. (Braskem), acquired from the controlling shareholders of Ipiranga Petroleum Companies, 66.2% of the common shares and 13.9% of the preferred shares issued by Refinaria de Petróleo Ipiranga S.A. 69.2% of the common shares and 13.5% of the preferred shares issued by Distribuidora de Produtos de Petróleo Ipiranga S.A. and 3.8% of the common shares and 0.4% of the preferred shares issued by Companhia Brasileira de Petróleo Ipiranga.

The Company and its subsidiaries and affiliated companies are engaged in the distribution of petroleum derivatives and related products, transportation, convenience stores and the petrochemical segment.

**2 Presentation of the interim financial information**

The interim financial information was prepared and is being presented in accordance with the rules derived from the Brazilian Corporate Law and the Brazilian Securities Commission CVM.

To improve the presentation of the financial information provided to the market, the Company is presenting as additional information, the statements of cash flow (controlling company and consolidated) in accordance with the criteria established by the NPC 20 of the IBRACON The Brazilian Institute of Independent Auditors.

According to CVM Deliberation n° 489/05, the Company began to classify the judicial deposits as a reduction account against the provision for contingencies.

**3 Description of significant accounting policies**

The main accounting practices adopted by the Company, its subsidiaries and affiliated companies to prepare these interim financial information are consistent with the practices adopted in the previous interim financial information and financial statement on December 31, 2006. The accounting practices are presented below:

**a. Temporary cash investments**

Temporary cash investments are stated at cost, plus income accrued up to the interim financial information date (on a pro rata temporis basis), which does not exceed their market value.

**b. Allowance for doubtful accounts**

The allowance for doubtful accounts was calculated for an amount considered adequate by the Company to cover the estimated losses arising on collection of accounts receivable.

**c. Inventories**

Inventories are stated at the lower of average cost or production cost and the market value or net realizable value.

F-400

## **Table of Contents**

### **d. Investments in subsidiaries and affiliated companies**

Investments in subsidiaries and affiliated companies are valued using the equity method and the results are recorded as operating result.

### **e. Property, plant and equipment**

Property, plant and equipment are stated at acquisition or construction cost. Depreciation is calculated using the straight-line method, which takes into account the estimated useful lives of the assets. Leasehold improvements are depreciated over the remaining period of the contract or the estimated useful lives of the assets, whichever is shorter.

### **f. Loans and financing**

Stated at original amounts plus financial charges incurred pro rata temporis until the interim financial information date. Loans in foreign currency were converted into reais by the exchange rate at the interim financial information date.

### **g. Income and social contribution taxes**

The income and social contribution taxes, both current and deferred, are calculated based on the rates of 15% plus a surcharge of 10% for income tax and 9% on taxable income for social contribution on net income.

### **h. Deferred income and social contribution taxes**

The deferred income and social contribution taxes are calculated based on the rate of income taxes and social contribution for which the Company expects that these taxes will be recovered. The deferred income and social contribution taxes are only recognized for amounts considered sufficient for future realization.

### **i. Provision for contingences**

The provision for contingencies is recorded for contingent risks with expectancy of loss considered as probable, based on the opinion of the Company's internal and external legal advisors, and the amounts are recognized based on the estimated cost from the outcome of the lawsuits.

### **j. Actuarial commitment with post-retirement benefits**

Actuarial commitments with the post-retirement benefits plan granted and to be granted to employees, retired employees and pensioners (net of plan assets) are recorded based on the actuarial calculation prepared by an independent actuary in accordance with the projected credit unit method.

### **k. Other assets and liabilities**

Other assets and liabilities, classified as current and non-current, are recorded based on the expected timeframe for realization or payment. These other assets and liabilities are stated at known or estimated amounts, plus, when applicable, the corresponding income, charges and monetary and exchange variations incurred up to the balance sheet date.

### **l. Statement of income**

Revenue from the sale of goods is recognized in the statement of income when the significant risks and rewards of ownership have been transferred to the buyer. Other revenues, expenses and costs are recognized

**Table of Contents**

when incurred and/or realized. The income statement includes surplus, charges and monetary and exchange variations, as determined by the contracts and official rates applicable to current and non current assets and liabilities and, when applicable, the effects of the market value adjustments.

**m. Accounting estimates**

The preparation of the interim financial information in accordance with accounting practices adopted in Brazil requires management to make estimates and assumptions for the Company that affect the reported amounts of assets and liabilities at the balance sheet dates and the reported amounts of revenues, costs and expenses for the years presented. Although these estimates are based on management's best available knowledge of current and expected future events, the actual results could differ from these estimates.

**4 Consolidation criteria**

The consolidated interim financial information has been prepared in accordance with the basic consolidation principles established by the Brazilian Corporate Law and by the Brazilian Securities Commission (CVM), and include the financial information of Companhia Brasileira de Petróleo Ipiranga (CBPI) and the following direct and indirect subsidiaries:

| <b>Consolidated subsidiaries</b>                   | <b>Location</b>        | <b>% of ownership<br/>Interest</b> |
|----------------------------------------------------|------------------------|------------------------------------|
| am/pm Comestíveis Ltda.                            | Brazil                 | 99,99999                           |

| Ipiranga Logística Ltda.                           | Brazil                 | 99,00000                           |
| Maxfácil Participações S.A.(*)                     | Brazil                 | 34,00000                           |

(\* ) Shared control with Distribuidora de Petróleo Ipiranga S.A. DPPI, which holds an investment interest of 16%, and with União de Bancos Brasileiros S.A. UNIBANCO, which holds 50%.

For purposes of preparing the consolidated financial information, we highlight the following practices:

- a. The parent company and its subsidiaries adopt uniform accounting practices to record their operations and to value balance sheet items;
- b. The result of the balance sheet accounts and the result of transactions between the parent company and the subsidiaries are eliminated; and
- c. The minority interest held in the subsidiaries has disclosed separately.

- (1) The Extraordinary General Meeting of Ipiranga Química (IQ), held on May 26, 2003 approved the issuance of two series of private convertible debentures, consisting of 11,000 Series A, with face value of R\$ 10 each, amounting R\$ 110,000 and 80,000 Series B debentures, with face value of R\$ 1 each, amounting to R\$ 80,000. Both series mature on June 1, 2008. On June 12, 2003 the debentures were acquired by DPPI and CBPI, the Series A were fully acquired by DPPI and series B fully acquired by CBPI. The subscribed

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

debentures pay interest based on the CDI interest rate, plus spread subject to renegotiation every 6 months (for Series A) and every 5 months (for Series B), as established by the contract dated June 1, 2003. Since March 2007, the remuneration spread of Series B debentures is 1.0% per year.

The Extraordinary General Meeting of Ipiranga Química (IQ) held on October 6, 2005, approved the change in the type of debentures, issued by IQ on June 1, 2003. The changes approved were: (i) to change the debentures from convertible to non-convertible and the issuance of a subscription bonus to be submitted to

F-404

**Table of Contents**

DPPI and CBPI, without any encumbrance, to replace the right of conversion established in the terms for the debentures of both Companies. On December 1, 2005 a sales and purchase contract was signed, whereby DPPI sold for R\$ 29 million the referred subscription bonus to Refinaria de Petróleo Ipiranga S.A. consequently the Company maintained its shareholding participation in IQ.

The Extraordinary General Meeting of Ipiranga Petroquímica (IPQ) held on April 28, 2006, approved the payment of complementary dividends and a capital reduction to be realized on June 13, 2006 and July 31, 2006 respectively. Due to the fact that IQ, based on its shareholding interest in IPQ, receives the financial resources on the dates stated above, the Board of Directors from IQ, in meeting realized on May 2, 2006, approved that the Company should invest these financial resources totally in the partial redemption of its debentures, issued on June 1, 2003 and subscribed by DPPI (series A ) and CBPI (series B ), considering the negative impacts that this debt has had on IQ.

On February, 2007, IQ made a partial payment for the debentures acquired by CBPI, amounting to R\$ 8,827.

**b. Estimated recovery of deferred income tax and social contribution**

The realization of tax credits and debits, parent company and consolidated, is based on future taxable income projections limited to 10 years.

Considering that the deferred tax assets are related mainly to deductible temporary differences, the realization of these deferred tax assets will occur upon settlement of the corresponding liability. Management, based on estimated liquidation of the existing claims and considering the nature of each of the provisions, estimates the recovery of these credits as follows:

|              | Parent Company | Consolidated |
|--------------|----------------|--------------|
| 2007         | 30,347         | 31,145       |
| 2008         | 11,956         | 12,194       |
| 2009         | 9,572          | 9,742        |
| 2010         | 1,703          | 1,881        |
| 2011 to 2013 | 13,447         | 14,054       |
| 2014 to 2016 | 5,333          | 6,069        |

During the Extraordinary General Meeting, held on October 22, 2007, extinction of the Company Termogaúcha Usina Termelétrica S.A. was approved. This fact will result in the realization of the deferred income tax in the 4<sup>th</sup> quarter of 2007, amounting to R\$ 19,672.

 REPISA Refinaria de Petróleo Ipiranga S.A.

(\*) On August 1, 2003, the Company issued US\$ 135 million in notes on the international market. On August 1, 2005, when interest increased from 7.875% per year to 9.875% per year, some of the holders opted for anticipated redemption of their notes in the amount of US\$ 1,285 or R\$ 3,072. In 2006, there was a partial redemption in the amount of US\$ 79,574 or R\$ 164,811, which represents the acceptance of the repurchase offer made by the Company to the bondholders.

**b. Debentures**

On April 18, 2006, the Company registered with the Brazilian Securities Commission (CVM) a public offering of 35,000 debentures, for a single series, non-convertible, with face value of R\$ 10 each, and issued on April 1, 2006, in the amount of R\$ 350,000.

The debentures mature on April 1, 2011 with principal to be repaid in three annual installments. They bear interest, as from the issuance date, on their unit face value, of 103.80% of the daily average rate of interbank deposits ( Taxa DI over extra grupo ), disclosed by the Clearing House for the Custody and Financial Settlement of Securities ( CETIP ). Interest is payable every 6 months from the issuance date of the debentures.

*Additional information:*

**Tax lawsuits**

On September 30, 2007 and June 30, 2007, the tax lawsuits referred mainly to: (1) requirement to reverse ICMS credits on the provision of proper transportation services during the period the freight reimbursement system implemented by DNC (currently National Oil, Natural Gas and Biofuel Agency ANP) was in effect and, although the freight reimbursements have always been made by DNC without the ICMS amount, previous

F-413

**Table of Contents**

court decisions have been unfavorable to the arguments presented by the Company; (2) requirement for ICMS/ Tax Substitution on interstate sales to end consumers under ICMS Agreement No. 105/92, subsequently amended by Agreement No. 112/93, in which the STF (Federal Supreme Court) resolved the matter, defining that the ICMS on fuel belongs to the State that consumes the fuel, even if the fuel is sold to the end consumer; (3) requirement to reverse ICMS credits, in Minas Gerais State, on interstate shipments made pursuant to article 33 of ICMS Agreement No. 66/88, which permitted the credit to be maintained and which was suspended by an injunction granted by the STF; and (4) assessments due to incorrect deduction of discounts from the ICMS tax basis, in Minas Gerais State, owed on a tax substitution basis.

**Civil lawsuits**

On September 30, 2007 and June 30, 2007, civil lawsuits of the Company's subsidiaries are mostly related to clauses in lease and supply agreements entered into with customers and indemnity claims arising from these agreements and civil liability.

**Labor lawsuits**

On September 30, 2007 and June 30, 2007, labor lawsuits of the Company and its subsidiaries refer mainly to lawsuits filed by former employees and outsourced professionals claiming payroll charges, such as overtime, hazardous duty premium, etc.

**b. Contingent liabilities possible**

The lawsuits considered to represent possible losses by the Company Board, based on internal and external legal counsel, have not been provisioned in the interim financial information and are comprised of:

|       | Parent Company        |                  | Consolidated          |                  |

*Additional information:*

**Tax lawsuits**

On September 30, 2007 and June 30, 2007, the tax lawsuits of the Company included in this classification referred mainly to: (1) requirements for the reversal of ICMS credits, except in the Minas Gerais State, upon interstate outflows, as defined in article 33 of ICMS Agreement 66/88, which permitted the credits to be maintained and which was suspended by an injunction conceded by the STF; (2) assessment for ICMS and reversals of credits of the tax due on the purchases of basic oils, interstate shipments which were not taxed, based on a constitutional rule of non-incidence; (3) demands to reverse ICMS credits that referred to the transportation services provided related to interstate operations which were not taxed, based on a constitutional rule of non-incidence; (4) demands to reverse ICMS credits derived from excess taxation generated on the purchase of products in the Petroleum Refinery under the tax substitution system, appropriated on the basis of the non-occurrence of one of the commercialization stages defined as the presumed taxable event, from direct sales to the final consumers; (5) demands for ICMS payment on the sales to clients in the state of Pará, from the fishing sector that benefit from tax exemption due to a presumed lack of authorization from SEFAZ/PA; (6) non-ratification of IPI credit compensation appropriated on entry of taxed inputs with subsequent shipping carried out under the protection of immunity; and (7) demands for ICMS payment, mainly in the State of Goiás, on supposed physical inventory differences due to variations in the temperature. These suits are at different stages, in the administrative and judicial sphere, ranging from production of evidence to jurisprudence consolidation in the higher courts.

F-414

**Table of Contents****Civil lawsuits**

On September 30, 2007 and June 30, 2007, civil lawsuits referred mainly to litigation on supply and lease agreement clauses executed with customers and indemnities arising from these agreements and civil liability.

**Labor lawsuits**

On September 30, 2007 and June 30, 2007, the labor lawsuits referred mainly to cases brought by former employees, outsourced personnel and employees at gas stations, which are Company's customers, on salary issues, including overtime, danger payments, etc, which are at the stage of evidence being presented and for which no sentences have been issued.

**c. Contingent assets**

The Company has filed administrative and judicial claims with Federal and State courts to recover incorrect payment or overpayment of taxes, charges and contributions, which may, when concluded, represent income which, given its contingent nature, has not been recorded in the interim financial information at September 30, 2007.

As a result of lawsuit process evolution, the Company's management, based on legal counsel, have classified these cases as representing probable successful outcomes. On September 30, 2007, the following cases have been summarized as follows:

|                                  | <b>Parent</b>  |                     |

**17 Provision for post-retirement benefits**

The Company, together with other Petróleo Ipiranga Companies, sponsors Fundação Francisco Martins Bastos, a separate entity offering complementary private pensions, whose retirement supplement plan covers all employees.

The accumulated amount of the Company contribution, for the period ending September 30, 2007, for this pension plan was R\$ 5,390 (R\$ 6,020 on September 30, 2006).

Net liabilities registered on September 30, 2007, are R\$ 44,010, R\$ 4,665 as current liabilities and R\$ 39,345 as non-current liabilities. On consolidation, the amount is R\$ 49,723, R\$ 4,822 accounted as current liabilities and R\$ 44,901 as non-current liabilities.

These additional retirement benefits were calculated in an actuarial evaluation prepared by the independent actuaries Towers Perrin Forster & Crosby Ltda.

Actuarial liabilities at September 30, 2007, reflect the report prepared by the independent actuary on May 30, 2007, maintaining the biometric assumptions and rates disclosed in the financial statements at December 31, 2006.

**Table of Contents****18 Shareholders equity****a. Capital**

Capital Stock on June 30, 2007, is represented by 105,952,000 shares with no par value, composed of 35,409,306 common shares and 70,542,694 preferred shares.

Preferred shares have no voting rights and have priority during dividend distribution and capital repayments, in the event of liquidation.

**b. Reserves**

|                                                       | September 30,<br>2007 | June 30,<br>2007 |

| Legal                                                 | 106,894               | 106,894          |
| Working capital                                       | 417,671               | 417,671          |
|                                                       | 524,565               | 524,565          |

The Company's by-laws state that the balance for retained earnings, after distributions pursuant to Corporation Law, shall be used as working capital and to conserve and improve installations reserves, up to the limit of capital stock. Any excesses shall be incorporated to the capital stock at the Ordinary General Meeting approving the financial statements for the fiscal period.

The Extraordinary Shareholders Meeting, held on April 18, 2007, approved a capital increase of R\$ 5,000, capitalizing part of the balance of the Reserve for Working Capital and Conservation and Improvement of Installations without issuing new shares.

**c. Dividends distribution**

Shareholders are guaranteed an annual distribution of minimum mandatory dividends corresponding to 30% of the net income for the fiscal period, after 5% has been set aside to the legal reserve. Shareholders holding preferred shares are entitled to receive dividends or interest on own capital 10% higher than those who hold common shares.

**19 Sureties and warranties provided**

In the normal course of business, the Company issues sureties, warranties and pledges on certain fund-raising transactions carried out by affiliates and direct or indirect subsidiaries.

**Table of Contents**

At September 30, 2007 and June 30, 2007, these transactions guaranteed by CBPI were as follows:

**20 Financial Instruments**

Considering the terms of CVM Instruction 235/95, the Company and its subsidiaries conducted an evaluation of current book assets and liabilities in relation to their market values, based on information available and appropriate evaluation methodologies. The market values of the Company's main financial instruments approximate their book values. However, the interpretation of market data and the selection of evaluation methods require considerable judgment and reasonable estimates to produce the most appropriate realization value. As a result, the estimates presented do not necessarily indicate the amounts that may be realized in the current market. The use of different market assumptions and/or estimate methodologies may have a material effect on the estimated market values.

The Company and its subsidiaries take part in transactions that involve financial instruments, registered in equity accounts, used to meet requirements and reduce exposure to credit, market and currency risks. Administration of these risks is carried out by defining strategies, establishing control systems and defining position limits.

The main bases for the financial instruments affecting the Company's businesses are listed below:

**a. Currency risk**

This risk arises from the possibility of the Company incurring significant losses because of fluctuations in exchange rates which may affect foreign currency loans and finance balances.

The Company uses hedge instruments (mainly CDI and US dollar) available on the financial market to cover its liabilities in foreign currency, with the objective of reducing the effects of exchange variation on its income statement.

**Table of Contents**

Exposure to fluctuations in the exchange rates is demonstrated as follow:

|                                   | Parent Company        |                  | Consolidated          |                  |
|-----------------------------------|-----------------------|------------------|-----------------------|------------------|
|                                   | September 30,<br>2007 | June 30,<br>2007 | September 30,<br>2007 | June 30,<br>2007 |
| <b>Amounts in million of US\$</b> |                       |                  |                       |                  |
| Loans and finances                | 57,023                | 58,408           | 61,108                | 63,386           |
| Swap operations                   | (30,000)              |                  | (31,520)              |                  |
| Net exposure                      | 27,023                | 58,408           | 29,588                | 63,386           |

Exchange rate on September 30, 2007: R\$ 1.8389/US\$ 1.

At September 30, 2007, the charges on the swap operations were on average, 135.23% of the CDI Certificate Interbank Deposits.

**b. Credit risk**

The risk of the Company incurring losses following defaults on customer financing and accounts receivable. In order to reduce this type of risk, the Company has a policy for granting credit and executes supply agreements with its customers obtaining real guarantees for significant balances.

**c. Interest rate risk**

This risk arises from the possibility of the Company incurring losses due to interest rate fluctuations that increase financial expenses on loans and financing raised in the markets. The Company continuously monitors market interest rates, in order to evaluate the need for hedging against interest rate volatility.

**d. Financial Result**

|                                         | Parent Company        |                  | Consolidated          |                  |

## **Table of Contents**

### **21 Insurance**

The Petróleo Ipiranga companies have an insurance and risk management program that enables coverage and protection for all their insurable assets, including insurance coverage for risks of disruption to production, by means of an operational risk policy traded in the domestic and foreign insurance markets through the Brazilian Reinsurance Institute (IRB).

The insurance coverage and limits are based on a detailed study of risks and losses performed by local insurance brokers, and the insurance contracted is considered sufficient to cover possible losses, considering the nature of the Companies' activities.

The main insurance coverage is for operational risks, loss of profits, industrial and office multiperils, named risk-pools and civil liability.

### **22 Subsequent events**

As mentioned in Note 9, in April 2007 Ultrapar acquired the control of certain companies from the Ipiranga Group. The acquisition process is structured in four stages. The first stage was concluded on April 18 with the control transference. Currently the second stage of the process is being concluded, which is the accomplishment of the tag along public offering (OPA) by Refinaria de Petróleo Ipiranga S.A. (RPI), Distribuidora de Produtos de Petróleo Ipiranga S.A. (DPPI) and Companhia Brasileira de Petróleo Ipiranga S.A. (CBPI). On October 22, the auctions were held for the public offering of DPPI and RPI. A total of 1,274,718 shares in DPPI were acquired, equivalent to 77% of the shares offered and 2,771,781 shares in RPI, equivalent to 82% of the shares offered, resulting in a total disbursement of R\$ 441 million. The corresponding amount for Ultrapar was R\$ 122 million, financed through the issuance of a second series of single debentures, non convertible, with a yield of 102.5% of CDI, maturing in one year (see Note 15 and 2). The auction of the OPA by CBPI is anticipated for November 8, 2007.

**Report of Independent Auditors**

To the Board of Directors

and Shareholders of

Refinaria de Petróleo Ipiranga S.A.

We have audited the accompanying carve-out balance sheets of the Oil Refining Business of Refinaria de Petróleo Ipiranga S.A. as of December 31, 2006 and 2005, and the related carve-out statements of operations, of changes in financial position and of changes in net assets for the years ended December 31, 2006, 2005 and 2004. These carve-out financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these carve-out financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the carve-out financial statements referred to above present fairly, in all material respects, the financial position of the Oil Refining Business of Refinaria de Petróleo Ipiranga S.A. at December 31, 2006 and 2005, and the results of its operations and its changes in financial position for the years ended December 31, 2006, 2005 and 2004 in conformity with accounting practices adopted in Brazil.

Our audits were performed for the purpose of issuing an opinion on the carve-out financial statements referred to in the first paragraph, prepared in conformity with accounting practices adopted in Brazil. The carve-out statement of cash flows, which provides supplemental information about the Oil Refining Business of Refinaria de Petróleo Ipiranga S.A., is not a required component of the financial statements. We also applied the audit procedures described above to the carve-out statement of cash flows for the years ended December 31, 2006, 2005 and 2004 and, in our opinion, it is fairly stated in all material respects in relation to the financial statements taken as a whole.

Accounting practices adopted in Brazil vary in certain significant respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in Note 16 to the carve-out financial statements.

**OIL REFINING BUSINESS OF REFINARIA DE PETRÓLEO IPIRANGA S.A.**

**NOTES TO THE CARVE-OUT FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2006, 2005 AND 2004**

**(Amounts in thousands of Brazilian reais - R\$, unless otherwise stated)**

**1 Basis of presentation and operations**

**(a) Description of the business acquired by Ultrapar Participações S.A. and presentation of financial information**

As further described in Note 15, on March 18, 2007, Ultrapar Participações S.A. ( Ultrapar ) entered into, and Petróleo Brasileiro S.A. ( Petrobras ) and Braskem S.A. ( Braskem ) acknowledged, a Stock Purchase Agreement, ( SPA ), with the Key Shareholders of the principal companies of the Ipiranga Group which comprised Refinaria de Petróleo Ipiranga ( RPI or the Company ), Distribuidora de Produtos de Petróleo Ipiranga ( DPPI ) and Companhia Brasileira de Petróleo Ipiranga ( CBPI ). As discussed further below, in connection with the Acquisition, Ultrapar is acting on its own behalf and on behalf of Petrobras and Braskem pursuant to the agreements of the transaction.

After completion of additional steps of the transaction (which include, among others, public offers to acquire shares held by minority shareholders of the companies acquired and exchange offers to other minority shareholders of RPI, DPPI and CPBI into Ultrapar) the businesses of Ipiranga Group will be divided among Petrobras, Ultrapar and Braskem. Ultrapar will retain the fuel and lubricant distribution businesses located in the South and Southeast regions of Brazil (the South and Southeast Distribution Business ).

The activities of the Company included the oil refining business and also to be the controlling shareholder of Ipiranga Química S.A. ( IQ ), the holding company for the petrochemical activities conducted by the Petróleo Ipiranga companies.

These carve-out financial statements of the oil refining business of the Company have been prepared with the purpose of presenting the business carried out by the Company in which, based on the terms of the transaction, it is expected that Ultrapar will have an equity interest. These carve-out financial statements are not intended to be a complete presentation of the consolidated financial position and results of operations of the company.

The investment in IQ is consolidated in the consolidated financial statements of the Company for statutory and regulatory purposes and in this carve-out financial statements the Company does not present the investment in IQ.

**(b) Description of the business acquired by Ultrapar Participações S.A. and presentation of financial information**

Refinaria de Petróleo Ipiranga S.A. (the Company ) is a public company whose shares are traded on the São Paulo Stock Exchange (BOVESPA), and is controlled by the Bastos, Mello, Ormazabal, Tellechea and Gouvêa Vieira families.

The Company is primarily engaged in oil refining and sale of its by-products.

The Company's economic performance in oil refining in 2006 continued to reflect difficulties caused by the incompatibility between oil prices in the international market and by-products prices in Brazil, in the prior year. In order to minimize operating losses and as happened in most part of 2005, the Company's management interrupted the production from June to October of 2006.

As part of the actions to ensure continuity of its operations, the Company's management intensified contacts and negotiations with the regulatory agencies of the industry, the Federal Government and the Government of

## **Table of Contents**

Oil Refining Business of Refinaria de Petróleo Ipiranga S.A.

Rio Grande do Sul State. In July 2006, the Company and the State Government started to study the possibility of producing petrochemical naphtha in order to have an alternative that allowed the operational continuity of the Company and an increase in tax collection for Rio Grande do Sul State.

On November 1, 2006, Decree No. 44,714 was published in the Official Gazette of Rio Grande do Sul State, permitting to use, as deemed tax credit, up to 8.5% of the ICMS (State VAT) levied on petrochemical naphtha produced in facilities located in the South region of Rio Grande do Sul State and sold in the same State, according to the Agreement signed on November 27, 2006.

As a result, operations were resumed according to the agreement signed with Rio Grande do Sul State Government and Refinaria Ipiranga. Management believes that, from now on, there may be a better condition to continue operations by means of an alternative structured with Government and/or more consistent domestic price policies, including market conditions.

The Oil Refining Business of the Company has presented operating losses during the periods presented and has generated limited cash flows from operations. As part of the acquisition of the Petróleo Ipiranga companies described in Note 15 it is expected that after all steps are finalized, each of Ultrapar, Petrobras and Braskem will hold 33.33% of the Oil Refining Business of the Company. As part of the terms of the acquisition Ultrapar, Petrobras and Braskem have agreed to use their best efforts to maintain the economic equilibrium of the Oil Refining Business. Also, Petrobras has committed to sell raw material to the Company and both Ultrapar and Braskem have committed to purchase final products which are necessary to its respective operations.

## **2 Summary of significant accounting practices**

The accounting practices adopted in Brazil (Brazilian GAAP) to record transactions and prepare the consolidated financial statements comply with those prescribed by Brazilian corporate law and specific standards established by the Brazilian Securities Commission (CVM), which differ in certain respects from generally accepted accounting principles in the United States of America (U.S. GAAP). See Note 16 for further discussions of these differences and a reconciliation of stockholders' equity and consolidated net income under both sets of principles.

The following is a summary of significant accounting policies followed in the preparation of the financial statements:

### **(a) Cash and cash equivalents**

Cash and cash equivalents comprise highly-liquid temporary cash investments (with maturities of 3 months or less when acquired and readily convertible to cash).

### **(b) Short-term investments**

Related to temporary cash investments stated at cost, plus income earned through the balance sheet date, not in excess of the fair value.

### **(c) Allowance for doubtful accounts**

The Company's management has individual customer credit information, enabling it to measure customers' ability to pay. Thus, when applicable, the allowance is recognized in an amount considered sufficient to cover probable losses on realization of receivables.

### **(d) Inventories**

Stated at the lower of average acquisition or production cost or market or net realizable value.

**Table of Contents**

Oil Refining Business of Refinaria de Petróleo Ipiranga S.A.

**(e) Property, plant and equipment**

Stated at acquisition or construction cost, monetarily restated through December 1995. Depreciation is calculated under the straight-line method based on the estimated economic useful lives of the assets.

**(f) Income and social contribution taxes**

Tax charges are calculated based on the income tax rate of 15% plus a 10% surtax and social contribution tax rate of 9%.

**(g) Accrual for contingencies**

Recorded for contingent risks whose likelihood of loss is probable, based on the opinion of management and inside and outside legal counsel. The accrual is recorded based on the estimated costs upon the final resolution of lawsuits.

**(h) Post-employment benefit obligations**

Post-employment benefits paid or payable to employees, retirees and pensioners (net of assets guaranteeing the benefit plans) are recorded based on the actuarial calculation prepared by an independent actuary, using the Projected Unit Credit Method.

**(i) Payable to other business**

Cash dividends and related tax benefits generated from interest on capital paid originated in a controlled company engaged in a different type of business.

**(j) Other assets and liabilities**

Other assets and liabilities, classified as current and long-term, are stated at realizable or settlement amounts. These assets and liabilities are stated at cost or realizable value and known or estimated amounts, respectively, including, when applicable, interest and monetary and exchange variations.

**(k) Results of operations**

Revenue from sale of products is recognized when significant risks and benefits related to the product ownership pass to customer. Revenue from sale of services is recognized when services are provided. Other income, expenses and costs are recognized when incurred and/or realized. The result includes interest and monetary and exchange variations, at official indexes and rates, applicable to current and long-term assets and liabilities and, when applicable, the effects of adjustments of assets to market or realizable value.

(\*) As of December 31, 2005, the amount was recorded as noncurrent long-term liabilities, and was reclassified to current liabilities as of December 31, 2006 considering its maturity date.

(a) Warrants issued by Ipiranga Química S.A. purchased by the Company

(a.i) Debentures issued by Ipiranga Química S.A. in 2003

The Extraordinary Shareholders Meeting of Ipiranga Química S.A., a subsidiary of the Company, held on May 26, 2003 approved the issuance of two series of private convertible debentures, consisting of 11,000 Series A debentures, with face value of R\$ 10 each, amounting to R\$ 110,000, and 80,000 Series B debentures, with face value of R\$ 1 each, amounting to R\$ 80,000. Both series of debentures mature on June 1, 2008. On June 12, 2003, Distribuidora de Produtos de Petróleo Ipiranga fully subscribed the Series A and Cia Brasileira de Petróleo Ipiranga fully subscribed the Series B. The subscribed debentures pay interest based on the CDI interest rate, plus spread subject to renegotiation every 6 months (for Series A) and every 5 months (for Series B) as established by the indenture dated June 1, 2003. The spread for Series A debentures, for the most part of 2005, was 1.5% per year, and changed to 1.0% per year on December 1, 2005 remaining the same in 2006. The spread for Series B debentures was 1.0% per year in 2005.

Debentures were convertible into common shares of Ipiranga Química S.A. at any time after its issuance and until its maturity or redemption at the option of the holder. The conversion price is a fixed amount established in the Indenture of the debentures.

However, the quantity of common shares to be received upon conversion will be higher than the amount determined as face value of the debentures divided by the conversion price if they are converted before June 1, 2007. The quantity of additional shares to be received will be 25% if converted up to June 1, 2004, 18.2177% if converted before June 1, 2005, 11.8034% if converted before June 1, 2006 and 5.7371% if converted before June 1, 2007.

Oil Refining Business of Refinaria de Petróleo Ipiranga S.A.

*(a.2) Modification of terms of the debentures and purchase of warrants by the Company*

Pursuant to a Memorandum of Understanding signed on October 3, 2005, Distribuidora de Produtos de Petróleo Ipiranga S.A., Cia Brasileira de Petróleo Ipiranga and the Company agreed to hold an Extraordinary Shareholders Meeting of Ipiranga Química S.A. to approve a change in the type of debentures, issued by Ipiranga Química S.A. on June 1, 2003 and to the sale of warrants by the Company.

The changes approved on the meeting held on October 6, 2005 were: (i) to change the debentures from convertible to nonconvertible without making any other change in the terms or conditions of the debentures, and (ii) the issuance of warrants to the holders of the debentures, without any charge, replacing the conversion right established for the debentures; the terms of the warrants allow its holder to purchase common shares of Ipiranga Química in exactly the same terms than the conversion features originally included in the debentures.

Subsequently on December 1, 2005, a Sale Agreement was signed whereby Distribuidora de Produtos de Petróleo Ipiranga S.A. sold for R\$ 29.0 million the warrants it has obtained to the Company. The amount for the purchase of the warrants is payable on October 3, 2007, and carries interest at the CDI interest rate.

The amount recorded in long-term liabilities refers to the provision for CIDE using PIS and COFINS credits, in accordance with article 8 of Law No. 10,336/01.

**9 Contingencies****(a) Probable losses**

A reserve was recognized to cover probable losses estimated by management, supported by the legal counsel, arising from the following lawsuits:

|                  | 2006         | 2005       |
|------------------|--------------|------------|
| Tax lawsuits     | 481          | 318        |
| Labor lawsuits   | 890          |            |
| <b>Total</b>     | <b>1,371</b> | <b>318</b> |
| (-) Current      | 523          |            |
| <b>Long-term</b> | <b>848</b>   | <b>318</b> |

**Tax lawsuits**

The tax lawsuit of the Company included in this classification refer mainly to: (1) collection by the INSS (National Institute of Social Security) of additional contribution on the SAT (Occupational Accident Insurance); and (2) infraction notice issued by the INSS for presentation of the GFIP (FGTS (severance pay) fund Payment and Social Security Information Form) with incomplete data about taxable events contained in the payroll.

**Labor lawsuits**

Lawsuits filed by former employees and outsourced professionals of the Company refer basically to salary equalization and overtime.

**(b) Possible losses**

Lawsuits assessed as possible loss by the Company's management, based on the opinion of its legal counsel, are not accrued in the financial statements and are composed of:

|                | 2006       | 2005         |
|----------------|------------|--------------|
| Tax lawsuits   | 393        | 198          |
| Labor lawsuits | 202        | 1,401        |
| <b>Total</b>   | <b>595</b> | <b>1,599</b> |

**Tax lawsuits**

The tax lawsuit of the Company included in this classification refer mainly to: (1) collection action due to the lack of payment of fees of the securities market; (2) notice to pay amounts arising from disallowance of deductions of salary premium for education considered incorrect, based on a supposedly lack of information to the FNDE (National Fund for the Development of Education); and (3) voluntary reporting through which PIS and COFINS (taxes on revenue) due were paid, with interest, without fine.

**Labor lawsuits**

Lawsuits filed by former employees and outsourced professionals of the Company and its subsidiaries Ipiranga Petroquímica S.A. and Ipiranga Química S.A. refer to payroll charges and overtime.

F-434

**Table of Contents**

Oil Refining Business of Refinaria de Petróleo Ipiranga S.A.

**(c) Contingent assets**

The Company filed judicial and/or administrative proceedings with Federal and State tax authorities to recover taxes unduly paid or overpaid. These proceedings, when concluded, may represent income that, due to the contingent nature, are not recorded in the financial statements as of December 31, 2006, 2005 and 2004.

Due to the progress of lawsuits and based on their legal counsel's opinion, the Company management assessed the likelihood of a favorable outcome in the aforementioned lawsuits might be as probable or possible, depending on the specific circumstances. As of December 31, 2006 said lawsuits may be summarized as follows:

|                                                     | 2006  | 2005  |
|-----------------------------------------------------|-------|-------|
| <b>Federal level</b>                                |       |       |
| PIS/COFINS (taxes on revenue) increase in tax basis | 3,019 | 2,799 |
| <b>State level</b>                                  |       |       |
| State income surtax (AIRE)                          | 2,810 | 2,697 |

**10 Employee and management profit sharing**

Profit sharing is calculated based on income for the year, after deducting accumulated deficit, if any, and provision for income and social contribution taxes, and is distributed as follows:

**(a) Employee profit sharing**

Calculated based on 3% of net income, which will be computed excluding income from investments in companies, recorded in the statements of income as equity in subsidiaries and affiliates, amortization of goodwill or negative goodwill and sale or write-off of investments in companies and, additionally, interest paid or received by the Company as interest on capital.

**(b) Management profit sharing**

Calculated, at year end, at 10% of income after deducting employee profit sharing and cannot exceed the annual global compensation established at the Shareholders' Meeting.

**11 Provision for post-employment benefits****(a) Pension benefits provided by Fundação Francisco Martin Bastos**

The Company, together with other Petróleo Ipiranga companies, sponsors Fundação Francisco Martins Bastos (FFMB), a closed pension entity that manages and operates pension plans for the employees of Petróleo Ipiranga companies.

FFMB benefit plan was created in 1993. Initially, only the basic benefit was established (a defined benefit plan) and in July 1998 the supplementary benefit (structured as a defined contribution plan in the phase of capitalization of estimated benefits) was implemented, whose contribution percentage is applicable to possible variable compensations. The pension plan is funded by the sponsors and participants.

On August 31, 2005, the SPC (Secretariat for Pension Plan), through Official Letter no. 1003/SPC/DETEC/CGAT, approved the new Ruling of FFMB Benefit Plan. New regulations related to portability, deferred proportional benefit, self-sponsorship and redemption provided for in CGPC (Supplemental Pension Management Council) Resolution No. 6, of October 30, 2003, were introduced, and changes in the calculation of benefits, new GAM-83 life expectancy table and change in the actuarial method from unit credit to projected unit credit became effective as actuarial adjustments.

**Table of Contents**

Oil Refining Business of Refinaria de Petróleo Ipiranga S.A.

The main changes in the calculations of benefits, approved in the new regulation, refer to the adjustment of the employee salary, gradual elimination of bonus for length of service credited for the purpose of calculating benefits and the increase in the percentage of reduction of the early retirement basic benefit.

These changes reduced the plan's total cost for the Petróleo Ipiranga companies (joint sponsors) by 36%, as defined by the actuary based on the percentage of the participants payroll for 2006.

In 2006, SPC, by means of CGPC Resolution No. 18, of March 28, 2006, established new technical/actuarial parameters for private pension plan entities. Therefore, the minimum life expectancy table that was adopted is AT-1983, increasing the life expectancy of active participants by approximately 2 years.

**(b) Other post-employment benefits**

According to CVM Resolution No. 371/2000, the Company, in addition to the pension plan, recognizes a provision for other post-employment benefits related to bonus for length of service, FGTS (severance pay fund), health care plan and life insurance for eligible retirees. Other post-employment benefits are unfunded and are provided directly by the Company and each of its subsidiaries of the Petróleo Ipiranga group.

**(c) Information about pension and other post-employment benefits**

The reconciliation of pension and other post-employment benefit liabilities as of December 31 is as follows:

|                                                | 2006            | 2005            |
|------------------------------------------------|-----------------|-----------------|
| Present value of funded obligations            | (23,362)        | (20,971)        |
| Present value of unfunded obligations          | (36,688)        | (33,621)        |
| Fair value of plan assets                      | 24,099          | 20,457          |
| Unrecognized actuarial (gains) losses          | (3,798)         | (5,612)         |
| <b>Net post-employment benefit liabilities</b> | <b>(39,749)</b> | <b>(39,747)</b> |
| Current                                        | (3,857)         | (3,346)         |
| Long-term                                      | (35,892)        | (36,401)        |

The portion of actuarial gains or losses to be recognized as income or expense is the amount of unrecognized gains and losses that exceed, in each year, the higher of the following limits:

(i) 10% of the present value of the total actuarial obligation of the defined benefit; and

(ii) 10% of the fair value of plan assets.

The portion that exceeds the limits will be annually amortized dividing its amount by the remaining average length service estimated for the plan's participants.

The amounts recognized in the statements of income are as follows:

2006      2005      2004

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

|                                         |                |                |                |
|-----------------------------------------|----------------|----------------|----------------|
| Cost of current service                 | (724)          | (719)          | (810)          |
| Cost of interest                        | (6,005)        | (5,881)        | (6,182)        |
| Expected return on assets               | 3,182          | 2,729          | 2,455          |
| Amortization of actuarial (gain) losses | 4              | 175            | 62             |
| Employees contributions                 | 197            | 257            | 348            |
| Adjustment of actuarial liability       |                |                |                |

Changes in net post-employment benefit liabilities may be shown as follows:

|                                            | 2006            | 2005            | 2004            |
|--------------------------------------------|-----------------|-----------------|-----------------|
| Net liability at beginning of year         | (39,747)        | (41,741)        | (40,763)        |
| Expenses                                   | (3,346)         | (3,439)         | (4,127)         |
| Company contributions                      | 368             | 623             | 1,005           |
| Benefits paid                              | 1,660           | 2,533           | 2,144           |
| Reduction effect                           |                 | 2,506           |                 |
| Adjustment to present value of obligations | 1,316           | (229)           |                 |
| <b>Net liability at end of year</b>        | <b>(39,749)</b> | <b>(39,747)</b> | <b>(41,741)</b> |

The main actuarial assumptions applied are as follows:

Discount rate of actuarial obligation at present value 10.8% per year

Expected long-term rate of return on assets 13.2% per year

Projected average salary growth rate 6.6% per year

Inflation rate (long-term) 4.5% per year

Medical services growth rate 7.6% per year

Biometric assumptions used:

Mortality table AT 1983 basic rated down by 10% (\*)

Turnover table adjusted Towers Perrin

Disabled mortality table RRB 1983

Disability table amended RRB 1944 rated

(\*) For life insurance benefit, the CSO-80 mortality table was used.

**13 Financial instruments**

In accordance with CVM Instruction No. 235/95, the Company estimated the fair value of their financial instruments, using available market information and appropriate estimation methodologies. However, both the interpretation of market data and the selection of estimation methodologies require reasonable judgment and estimates to determine the most adequate realizable value. Accordingly, the estimates presented are not necessarily indicative of the amounts that could be obtained in active market trading. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair values.

The Company conducts transactions involving financial instruments, all of which are recorded in balance sheet accounts, and are intended to meet their needs and reduce the exposure to credit, market, and currency risks. Management of these risks is performed by establishing strategies and control systems and setting position limits.

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

The Company's assets and liabilities were evaluated in relation to the fair values at the balance sheet dates. The result of this valuation did not indicate any adjustments that should be made to the amounts presented in the financial statements.

F-438

**Table of Contents**

Oil Refining Business of Refinaria de Petróleo Ipiranga S.A.

The main risks affecting the Company's business are as follows:

**(a) Credit risk**

This is the risk of the Company incurring losses due to customers' failure to pay accounts. The Company reduces this risk by means of a credit policy and by obtaining collaterals for supply agreements signed with its customers for significant balances.

**(b) Price risk**

The oil refining activity is subject to this risk when variations in the price of petroleum in the market are not transferred to petroleum products. To reduce this risk, the Company has been seeking alternatives with the Federal Government and Petrobras.

**(c) Financial income (expenses)**

|                                         | 2006           | 2005           | 2004         |

**14 Insurance**

The Company has an insurance and risk management program that allows coverage and protection for all their insurable assets, including insurance coverage for risks of disruption of production, by means of an operational risk policy with the domestic and foreign insurance companies through the Brazilian Reinsurance Institute (IRB).

The insurance coverages and limits are based on a detailed study of risks and losses performed by local insurance brokers, and the insurance contracted is considered sufficient to cover possible losses, considering the nature of the companies' activities.

The main insurance coverages are for operational risks, loss of profits, industrial and office multiperils, named risk-pools and civil liability.

### **15 Subsequent events**

#### **Acquisition of Ipiranga**

On April 18, 2007, Ultrapar Participações S.A. for itself, and also as a commission agent of Braskem S.A. and Petróleo Brasileiro S.A. Petrobras, acquired for R\$ 2,113,107, from the controlling shareholders of the Petróleo Ipiranga companies, 66.2% common shares and 13.9% preferred shares issued by the Company, 69.2% common shares and 13.5% preferred shares issued by Distribuidora de Produtos de Petróleo Ipiranga S.A. (DPPI), and 3.8% common shares and 0.4% preferred shares issued by Companhia Brasileira de Petróleo Ipiranga (CBPI). Of the total amount, Braskem and Petrobras paid R\$ 1,394,675 under the terms of the commission among the parties.

Under the terms of the agreement among Ultrapar, Braskem and Petrobras, once all steps of the transaction mentioned below are finalized, Ultrapar will hold the distribution of fuel and lubricants in the Southern and Southeastern regions of Brazil ( South Distribution Assets ); Petrobras will hold the distribution of fuel and lubricants in the Northern, Northeastern and Central-Western regions ( North Distribution Assets ); and Braskem and Petrobras will hold 60% and 40%, respectively, of the petrochemical assets, represented by Ipiranga Química S.A., its subsidiary IPQ and by the interest of the latter in COPESUL ( Petrochemical Assets ). Assets related to oil petroleum refining held by RPI will be equally shared by Petrobras, Ultrapar and Braskem.

In the same agreement the parties established that Ultrapar is responsible for conducting a corporate restructuring in the companies acquired to separate the assets assigned to each acquiring company. The stages are as follows:

- a) Public Tag Along Offering to acquire common shares issued by RPI, DPPI, CBPI and IPQ held by other shareholders;
- b) Merger into Ultrapar of the common shares issued by RPI, DPPI and CBPI;
- c) Segregation of assets by means of: (i) capital reduction of RPI and CBPI to transfer the Petrochemical Assets directly to Ultrapar, for subsequent transfer to Braskem and Petrobras, under the terms of the commission, and (ii) spin-off of CBPI to transfer the North Distribution Assets to a company controlled by Petrobras.

On April 17, 2007, CADE (Economic Defense Council) issued an Injunction to maintain conditions that would allow to revert the asset acquisition by Braskem and Petrobras, as described in the Significant Event Notice published on April 18, 2007. The provisions related to Petrochemical Assets were reviewed on April 25, 2007 in the decision approved by CADE, with signature by Braskem of agreement for protection of reversibility of operation (APRO).

With said changes, CADE acknowledges the maintenance of the minority interest of Petrobras in COPESUL after the acquisition. In relation to fuel distribution, CADE granted 10 days so that Petrobras and Ultrapar present an alternative corporate governance model that preserves competition within the industry.

### **16 SUMMARY AND RECONCILIATION OF THE DIFFERENCES BETWEEN ACCOUNTING PRACTICES ADOPTED IN BRAZIL AND GENERALLY ACCEPTED ACCOUNTING PRINCIPLES IN THE UNITED STATES OF AMERICA**

#### **I - Narrative description of GAAP differences**

The carve-out financial statements of the Company are prepared in accordance with Brazilian GAAP. Accounting policies, which differ significantly from U.S. GAAP, are summarized below:

**a) Inflation accounting**

Under Brazilian GAAP, the Company accounts for the effects of inflation in its financial statements prepared in accordance with Brazilian GAAP through December 31, 1995. Through December 31, 1995, the

F-440

## **Table of Contents**

Oil Refining Business of Refinaria de Petróleo Ipiranga S.A.

Company used for this remeasurement the Fiscal Reference Unit (UFIR), the index established by the tax authorities for preparation of financial statements under Brazilian Corporate Law as well as the index selected by the CVM.

The reconciliation presents the effect of adjusting property, plant and equipment for U.S. GAAP purposes through December 31, 1997. Under U.S. GAAP, management of the Company considers that Brazil was considered to be a highly inflationary economy until December 31, 1997 and, as such, property, plant and equipment should be adjusted for inflation through such date.

In determining amounts under U.S. GAAP, the effects of inflation for the years ended December 31, 1996 and 1997 were determined using the IGP-DI index, which is a widely-accepted and respected index published monthly by the Fundação Getúlio Vargas.

Because the Company's management believes that the IGP-DI is an appropriate and consistent measure of the general price inflation in Brazil and because of its availability, for U.S. GAAP purposes the Company adopted the IGP-DI for restatement of its financial statements also for periods through December 31, 1995, replacing the Government mandated index. As a result, property, plant and equipment have been monetarily adjusted for inflation using the IGP-DI since its acquisition through December 31, 1997.

### **b) Reversal of fixed asset revaluations**

For U.S. GAAP reconciliation purposes, the revaluation of fixed assets recorded in the financial statements prepared in accordance with Brazilian GAAP has been eliminated in order to present fixed assets at historical cost.

### **c) Pension and other post-employment benefits**

#### **c.1) Pension benefits**

Pension benefit obligations for Brazilian GAAP should be accounted for following CVM Instruction No. 371/00, which requires the mandatory application of Brazilian Accounting Standard IBRACON NPC 26. Under IBRACON NPC 26 the Company has accounted for the plan administered by FFMB (and to which several Petróleo Ipiranga companies contribute) by recognizing a percentage attributed to the Company of the funded status and of the cost of the plan.

Under U.S. GAAP, considering that the financial information of the Company does not consolidate all the sponsors of the FFMB Pension Plan and such financial information does not represent the financial statements of the parent company of the Petróleo Ipiranga companies, the Company has accounted for its participation in the pension plan administered by FFMB as if it were a multi-employer plan.

As a result, the reconciliation presents: (a) the reversal of the pension plan asset/liability recognized for Brazilian GAAP as of each reporting date and the reversal of the related pension cost, and (b) the recognition as expense of the contribution due to the plan over the corresponding period.

#### **c.2) Other post-retirement benefits**

As explained in Note 12, the accompanying financial statements account for other post-retirement benefits following IBRACON NPC 26. Other post-retirement benefits are unfunded and are the sole responsibility of each Petróleo Ipiranga company. Under IBRACON NPC 26 actuarial gains and losses are deferred and recognized in income over the estimated remaining service period of the employees to the extent that those actuarial gains and losses exceed 10% of the higher of the plan assets and the projected benefit obligation.

**Table of Contents**

Oil Refining Business of Refinaria de Petróleo Ipiranga S.A.

Under US GAAP such benefits are accounted for following SFAS No. 106 Employers Accounting for Postretirement Benefits Other Than Pensions and, as from December 31, 2006, following SFAS 158 Employers Accounting for Defined Benefit Pension and Other Postretirement Plans - an amendment of FASB Statements No. 87, 88, 106 and 132(R) . Under SFAS 158 the funded status of the other postretirement benefits must be recognized as a liability with an offsetting amount in accumulated other comprehensive income. As required by SFAS 158, provisions of SFAS 158 were applied on a prospective basis as from December 31, 2006.

Although projected benefit obligations are the same under Brazilian GAAP and US GAAP, differences arise in the amounts recorded in the financial statements as result of : (i) that the date of initial measurement of funded status is different for Brazilian GAAP and U.S. GAAP and that under Brazilian GAAP there is no requirement to recognize an additional minimum liability, and (ii) the recognition as from December 31, 2006 as a liability for US GAAP purposes of the funded status against accumulated other comprehensive income.

**d) Fair value of guarantees under FIN 45**

Under Brazilian GAAP, the Company is not required to record any liability related to guarantees given to third parties unless contingent obligations to make future payments under the guarantees are considered probable.

The Company has not recorded any liability related to these guarantees under Brazilian GAAP as of any of the dates presented.

Under U.S. GAAP, the Company recognizes, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing guarantees in accordance with FIN 45, Guarantor s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others . In the event that, at inception of the guarantee, the Company is required to recognize a liability under SFAS 5,

Accounting for Contingencies , the liability initially recognized would be the greater of: (a) the amount of fair value of the value of the obligation undertaken in issuing guarantee, or (b) the contingent liability amount required to be recognized at inception of the guarantee by applying SFAS 5.

Guarantees granted include those disclosed in Note 15 to DPPI, EMCA and IASA.

**Table of Contents**

Oil Refining Business of Refinaria de Petróleo Ipiranga S.A.

The reconciliation presents the effect of recognizing a liability for the fair value of these guarantees and the related effect in the statement of income.

**II - Reconciliation of the differences between U.S. GAAP and Brazilian GAAP in net income**

|                                                                                                   | Note 16.I. | 2006     | 2005     |

**V - Additional disclosures****a) Loss per share**

Under Brazilian GAAP, net loss per share is calculated on the number of shares outstanding at the balance sheet date. In these financial statements, information is disclosed per lot of one thousand shares, because this is the minimum number of shares that can be traded on the Brazilian stock exchanges.

The computation of loss per share has been performed considering the quantity of shares of Refinaria de Petróleo Ipiranga S.A.

While preferred and common shareholders have different dividends and voting rights, they do share equally in losses. Earnings per share are retroactively adjusted by stock dividends granted to the shareholders in April, 2006. The following table provides a reconciliation of the numerators and denominators used in computing loss per share as required by SFAS 128:

|                                                                            | Common   | 2006<br>Preferred | Total    |
|----------------------------------------------------------------------------|----------|-------------------|----------|
| Loss of the year                                                           | (3,621)  | (7,116)           | (10,737) |
| Weighted average under U.S. GAAP (per thousand shares) - basic and diluted | 9,982    | 19,618            | 29,600   |
| Basic and diluted loss per share                                           | (0.3627) | (0.3627)          |          |

|                                                                            | Common   | 2005<br>Preferred | Total    |
|----------------------------------------------------------------------------|----------|-------------------|----------|
| Loss of the year                                                           | (9,836)  | (19,330)          | (29,166) |
| Weighted average under U.S. GAAP (per thousand shares) - basic and diluted | 9,982    | 19,618            | 29,600   |
| Basic and diluted loss per share                                           | (0.9853) | (0.9853)          |          |

The convertible debentures of IQ have anti-dilutive effects.

**b) Statement of cash flows**

Brazilian GAAP not require the presentation of a statement of cash flows as required by U.S. GAAP. Changes in working capital are presented in the statement of changes in financial position. U.S. GAAP requires the presentation of a statement of cash flows describing the Company's cash flows from operating, financing and investing activities. Statements of cash flows derived from the information based on Brazilian GAAP are as follows:

**STATEMENTS OF CASH FLOWS****FOR THE YEARS ENDED DECEMBER 31, 2006, 2005 AND 2004****(In thousands of Brazilian reais - R\$, unless otherwise stated)**

|                                                                            | <b>2006</b> | <b>2005</b> | <b>2004</b> |

**Report of Independent Auditors**

To the Board of Directors and Shareholders of

Distribuidora de Produtos de Petróleo Ipiranga S.A.

We have audited the accompanying carve-out consolidated balance sheets of the South Fuel and Lubricant Distribution Business of Distribuidora de Produtos de Petróleo Ipiranga S.A. and its subsidiaries as of December 31, 2006 and 2005, and the related consolidated carve-out statements of income, of changes in financial position and of changes in net assets for the years ended December 31, 2006, 2005 and 2004. These carve-out consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these carve-out financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the carve-out consolidated financial statements referred to above present fairly, in all material respects, the financial position of the South Fuel and Lubricant Distribution Business of Distribuidora de Produtos de Petróleo Ipiranga S.A. and its subsidiaries at December 31, 2006 and 2005, and the results of their operations and their changes in financial position for the years ended December 31, 2006, 2005 and 2004 in conformity with accounting practices adopted in Brazil.

Our audits were performed for the purpose of issuing an opinion on the financial statements referred to in the first paragraph, prepared in conformity with accounting practices adopted in Brazil. The consolidated statement of cash flows, which provides supplemental information about the Company and its subsidiaries, is not a required component of the financial statements. We also applied the audit procedures described above to the statement of cash flows for the years ended December 31, 2006, 2005 and 2004 and, in our opinion, it is fairly stated in all material respects in relation to the financial statements taken as a whole.

Accounting practices adopted in Brazil vary in certain significant respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in Note 25 to the carve-out consolidated financial statements.

**NOTES TO THE CARVE-OUT CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2006,  
2005 AND 2004**

**(Amounts in thousands of Brazilian reais R\$, unless otherwise stated)**

**1 Basis of presentation and operations**

**1.a Description of the business acquired by Ultrapar Participações S.A. and presentation of financial information**

As further described in Note 23, on March 18, 2007, Ultrapar Participações S.A. ( Ultrapar ) entered into, and Petróleo Brasileiro S.A. ( Petrobras ) and Braskem S.A. ( Braskem ) acknowledged, a Stock Purchase Agreement ( SPA ), with the Key Shareholders of the principal companies of the Ipiranga Group which comprised Refinaria de Petróleo Ipiranga S.A. ( RPI ), Distribuidora de Produtos de Petróleo Ipiranga S.A. (the Company ) and Companhia Brasileira de Petróleo Ipiranga ( CBPI ). As discussed further below, in connection with the Acquisition, Ultrapar is acting on its own behalf and on behalf of Petrobras and Braskem pursuant to the agreements of the transaction.

After completion of additional steps of the transaction (which include, among others, public offers to acquire shares held by minority shareholders of the companies acquired and exchange offers to other minority shareholders of RPI, DPPI and CPBI into Ultrapar) the businesses of Ipiranga Group will be divided among Petrobras, Ultrapar and Braskem. Ultrapar will retain the fuel and lubricant distribution businesses located in the South and Southeast regions of Brazil (the South and Southeast Distribution Business ).

The fuel and lubricant distribution business of the Petróleo Ipiranga companies was operated through two companies: the Company and CBPI. For all periods presented the Company had a majority of voting shares of CBPI, which results in the Company controlling CBPI. Whereas DPPI only operates in parts of the South region of Brazil, CBPI has operations in all regions of the country, with exception of those covered by DPPI. Both are public companies with separate and different minority shareholder bases. Although the Company had a controlling interest over CBPI, the former shareholders operated the two companies on a completely independent basis so that they were managed by different executives, pursued different strategies and possessed different information and accounting systems.

These carve-out financial statements of the fuel distribution business of the Company have been prepared with the special purpose of complying with the rules and regulations of the Securities and Exchange Commission, presenting the business carried out by the Company that based on the terms of the transaction is expected to be transferred to Ultrapar. These carve-out financial statements are not intended to be a complete presentation of the consolidated financial position and results of operations of the Company. The financial information of the South and Southeast Distribution Business is presented as follows:

(a) South and Southeast Distribution Business carried out by CBPI is separately presented on an abbreviated basis on a separate set of financial information which includes a Statement of Assets Acquired and Liabilities Assumed, a Statement of Revenues and Direct Expenses and the corresponding notes to such financial information.

(b) the South Distribution Business carried out by the Company which is presented on a carve-out basis. The carve-out financial statements differ from the consolidated financial statements of the Company for statutory and regulatory purposes because they exclude the investment of the Company in CBPI. The investment in CBPI is consolidated in the consolidated financial statements of the Company for statutory and regulatory purposes. In this carve-out financial statements the Company does not present the investment in CBPI. All the business carried out by the Company are part of the South Distribution Business acquired by Ultrapar and, as such, no other activities have been excluded in these carve-out financial statements.

## **Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

### **1.b Operations**

The Company is a public company whose shares are traded on the São Paulo Stock Exchange (BOVESPA), and is controlled by members of the Bastos, Mello, Ormazabal, Tellechea and Gouvêa Vieira families.

The Company and its subsidiaries are engaged in the distribution of petroleum, related products and convenience stores.

### **2 Presentation of carve-out consolidated financial statements**

These carve-out financial statements were prepared in accordance with accounting practices adopted in Brazil (Brazilian GAAP).

The financial statements presented herein are different from the consolidated financial statements prepared by the Company for statutory purposes because they exclude, as explained in Note 1, the investment in CBPI, include in Note 25 a reconciliation of net equity and net income between the amounts under Brazilian GAAP and accounting principles generally accepted in the United States of America (U.S. GAAP) and have also been adjusted to present certain additional disclosures to facilitate its understanding by readers not familiar with Brazilian GAAP.

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosures of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Significant estimates include, but are not limited to estimates relating to the useful lives of property, plant and equipment, accounting for contingencies and provisions for income taxes, among others. Actual results could differ in relation to these estimates.

### **3 Summary of significant accounting practices**

The accounting practices adopted in Brazil ( Brazilian GAAP ) to record transactions and prepare the consolidated financial statements comply with those prescribed by Brazilian corporate law and specific standards established by the Brazilian Securities Commission (CVM), which differ in certain respects from U.S. GAAP.

The following is a summary of significant accounting policies followed in the preparation of the carve-out consolidated financial statements:

#### **(a) Cash and cash equivalents**

Cash and cash equivalents comprise highly-liquid temporary cash investments (with maturities of 3 months or less when acquired and readily convertible to cash).

#### **(b) Allowance for doubtful accounts**

The Company has individual customer credit information, which is used to assess customer ability to pay. The allowance is recognized in an amount considered sufficient by management to cover probable losses on realization of receivables.

#### **(c) Inventories**

Stated at the lower of average acquisition or production cost or net realizable value.

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

**(d) Investments in affiliates**

Accounted following the equity method with a corresponding entry to operating income. Goodwill on the acquisition of subsidiaries is amortized over 10 years, the estimated period of realization.

**(e) Property, plant and equipment**

Stated at acquisition or construction cost, monetarily adjusted through December 31, 1995. Depreciation is calculated following the straight-line method based on the estimated economic useful lives of the assets. Leasehold improvements are depreciated over the term of the agreement or the economic useful lives of the assets, whichever is shorter.

**(f) Loans and financing**

Stated at the amount of principal, plus financial charges incurred on a pro rata basis through the balance sheet date. Foreign currency-denominated loans were converted into Brazilian reais at the exchange rates prevailing at the balance sheet date.

**(g) Income and social contribution taxes**

Tax expense is calculated based on the income tax rate of 15% plus a 10% surtax and social contribution tax rate of 9%.

**(h) Deferred income and social contribution taxes**

Calculated on temporary differences and on tax loss carryforwards using the income tax and social contribution tax rates effective for the period in which the tax effects are expected to be realized.

Deferred income and social contribution tax assets are only recognized up to the amount that is likely to be realized within the next 10 years as established by CVM Instruction No. 371/02.

**(i) Provision for contingencies**

Recorded for contingent risks whose likelihood of loss is probable, based on the opinion of management and inside and outside legal counsel. The provision is recorded based on the estimated losses upon the final resolution of lawsuits.

**(j) Dividend and interest on capital paid**

Interest on capital and dividends have been calculated and paid based on the South and Southeast Distribution Business carried by the Company, which exclude the distribution business handled by CBPI. Accordingly, the interest on capital and dividends paid by the Company are net of the interest on capital and dividends paid by CBPI to the Company.

**(k) Pension and other post-employment benefits**

Pension and other post-employment benefit liabilities to employees, retirees and pensioners (net of the assets of the plans) are recorded based on the actuarial calculation prepared by an independent actuary, using the Projected Unit Credit Method.

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A. and Subsidiaries

**(l) Other assets and liabilities**

Other assets and liabilities, classified as current and long term, are stated at realizable or estimated amounts. These assets and liabilities are stated at cost or realizable value and known or estimated amounts, respectively, including, when applicable, interest and monetary and exchange variations.

**(m) Results of operations**

Revenue from sale of products is recognized when significant risks and benefits related to the product ownership pass to customer. Other income, expenses and costs are recognized when incurred and/or realized. The result includes interest and monetary and exchange variations, at contractual indexes or official rates, applicable to current and long-term assets and liabilities and, when applicable, the effects of adjustments of assets to its net realizable value.

**4 Consolidation criteria**

The carve-out consolidated financial statements have been prepared in accordance with the consolidation principles established by Brazilian GAAP and include the accounts of Distribuidora de Produtos de Petróleo Ipiranga S.A. (Company) and the following subsidiaries and exclude, as described in Note 1, the investment in the subsidiary CBPI:

| Subsidiaries                                | Location | Ownership Interest - % |          |         |          |
|---------------------------------------------|----------|------------------------|----------|---------|----------|
|                                             |          | 2006                   |          | 2005    |          |
|                                             |          | Direct                 | Indirect | Direct  | Indirect |
| Isa-Sul Administração e Participações Ltda. | Brazil   | 99.9995                |          | 99.9999 |          |
| Comercial Farroupilha Ltda.                 | Brazil   | 99.9998                | 0.0002   | 99.9998 | 0.0002   |
| Ipiranga Administração de Bens Móveis Ltda. | Brazil   | 99.9900                | 0.0100   |         |          |

The following practices were adopted in the preparation of the carve-out consolidated financial statements:

(a) Intercompany balances and transactions and unrealized profits have been eliminated; and

(b) Minority interest in fully-consolidated subsidiaries is presented in a separated caption.

**5 Cash and cash equivalents**

|                                | 2006   | 2005   |
|--------------------------------|--------|--------|
| Cash and banks                 | 21,720 | 31,853 |
| Certificates of Deposit (CDBs) |        | 469    |
| Debt securities                | 3,350  |        |
|                                | 25,070 | 32,322 |

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

**6 Trade accounts receivable**

|                            | <b>2006</b> | <b>2005</b> |
|----------------------------|-------------|-------------|
| Domestic market:           |             |             |
| Trade notes receivable     | 145,743     | 152,485     |
| Customer financing         | 53,871      | 49,773      |
| Foreign market-Receivables | 4,415       | 2,779       |
|                            | 204,029     | 205,037     |
| (-) Current                | (165,591)   | (167,884)   |
| Long term                  | 38,438      | 37,153      |

Long-term portion is mainly represented by customer financing. Under customer financing, cash loans are provided to gas stations using the Ipiranga brand. Such loans are generally used by the gas stations to finance renovation and modernization of fuel stations, as well as for working capital including acquisition of products and investing in marketing. Customer financing carry interest of 1% per month.

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

*(a) Debentures issued by Ipiranga Química in 2003*

The Extraordinary Shareholders Meeting of Ipiranga Química S.A. held on May 26, 2003 approved the issuance of two series of private convertible debentures, consisting of 11,000 Series A debentures, with face value of R\$ 10 each, amounting to R\$ 110,000, and 80,000 Series B debentures, with face value of R\$ 1 each, amounting to R\$ 80,000. Both series of debentures mature on June 1, 2008.

---

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

On June 12, 2003, the Company fully subscribed the Series A and its subsidiary CBPI (not presented in this carve-out consolidated financial statements) fully subscribed the Series B.

The subscribed debentures pay interest based on the CDI interest rate, plus spread subject to renegotiation every 6 months (for Series A) and every 5 months (for Series B) as established by the indenture dated June 1, 2003.

The spread for Series A debentures, for the most part of 2005, was 1.5% per year, and changed to 1.0% per year on December 1, 2005, remaining the same for 2006. The spread for Series B debentures was 1.0% per year in 2005 remaining the same for 2006.

Debentures are convertible into common shares of Ipiranga Química S.A. at any time after its issuance and until its maturity or redemption at the option of the holder.

The conversion price is a fixed amount established in the Indenture of the debentures. However, the quantity of common shares to be received upon conversion will be higher than the amount determined as face value of the debentures divided by the conversion price if they are converted before June 1, 2007. The quantity of additional shares to be received will be 25% if converted up to June 1, 2004, 18.2177% if converted before June 1, 2005, 11.8034% if converted before June 1, 2006 and 5.7371% if converted before June 1, 2007.

*(b) Early partial redemption of the debentures in 2006*

The shareholders' meetings of Ipiranga Petroquímica S.A. ( IPQ ) held on April 28, 2006 approved the payment of supplementary dividends and a capital reduction, scheduled for June 13, 2006 and July 31, 2006, respectively. Considering that IQ, due to its interest in IPQ, received funds on said dates, the Board of Directors of IQ, at a meeting held on May 2, 2006, resolved that IQ would partially early redeem its debentures, which were issued on June 1, 2003, due to the financial cost of this debt.

As a result, in 2006, IQ partially amortized 71.6% of the Series A debentures, subscribed by the Company, in the amount of R\$ 139.695 thousand (there was no amortization in 2005).

*(c) Modification of terms of the debentures and sale of warrants by the Company*

Pursuant to a Memorandum of Understanding signed on October 3, 2005, the Company, CBPI and Refinaria de Petróleo Ipiranga S.A. (the controlling shareholder of IQ) agreed to hold an Extraordinary Shareholders' Meeting of IQ to approve a change in the type of debentures, issued by IQ on June 1, 2003.

The changes approved on the meeting held on October 6, 2005 were: (i) to change the debentures from convertible to nonconvertible without making any other change in the terms or conditions of the debentures, and (ii) the issuance of warrants to the holders of the debentures, without any charge, replacing the conversion right established for the debentures; the terms of the warrants allow its holder to purchase common shares of IQ in exactly the same terms than the conversion features originally included in the debentures.

Subsequently, on December 1, 2005, a Sale Agreement was signed whereby the Company sold for R\$ 29.0 million to Refinaria de Petróleo Ipiranga S.A. the warrants it has obtained. The amount for the sale of the warrants is payable on October 3, 2007, and carries interest at the CDI interest rate.

The Company recognized income on the sale of warrants in the amount of R\$ 29.0 million.

(d) The acquisition of goods from Refinaria de Petróleo Ipiranga S.A. includes taxes calculated based on tax substitution, which are not income for Refinaria de Petróleo Ipiranga S.A.

**16 Contingencies****(a) Probable losses**

A provision was recognized to cover probable losses estimated by management, supported by external and internal legal counsel, arising from the following lawsuits:

|                | <b>2006</b>  | <b>2005</b>  |
|----------------|--------------|--------------|
| Tax lawsuits   | 251          | 251          |
| Civil lawsuits | 100          | 2,723        |
| Labor lawsuits | 2,692        | 1,392        |
| Total          | <b>3,043</b> | <b>4,366</b> |

**Civil lawsuits**

As of December 31, 2006, the only accrued civil lawsuit of the Company involved an indemnity claim. The reduction in provision for civil contingencies in 2006 is due mainly to the conclusion of lawsuits filed against the Company seeking repossession of a property of the Company and a claim of damages. In December 2006 property returned to the Company and the courts decided that no damages should be paid by the Company and the lawsuits were concluded. Another factor that led to the decrease refers to the revaluation of the likelihood of loss of the damage claim, considering the consolidation of previous court decisions favorable to the position of the Company.

**Labor lawsuits**

As of December 31, 2006 and 2005, labor lawsuits of the Company refer mainly to lawsuits filed by former employees and outsourced professionals claiming payroll charges, such as overtime, hazardous duty premium, etc.

**(b) Possible losses**

Lawsuits for which management assessed the probability of loss as possible, based on the opinion of its legal counsel, are not accrued in the financial statements and are composed of:

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

|                | 2006   | 2005  |
|----------------|--------|-------|
| Tax lawsuits   | 27,823 | 7,412 |
| Civil lawsuits | 544    | 544   |

| Total          | 29,050 | 8,669 |

F-464

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

**Tax lawsuits**

Tax lawsuits of the Company included in this classification refer mainly to: (1) requirement of reversal of credits for ICMS on operations with anhydrous alcohol in São Paulo State; (2) requirement of reversal of credits for ICMS accumulated credit, supposedly transferred to third parties at amounts higher than that allowed by São Paulo State legislation; (3) requirement of IRRF (withholding income tax) on payment of interest on capital made to pension plan entities; (4) requirement of ICMS by Mato Grosso State, on the acquisition of fuel ethanol by the Company's branch in São Paulo State, intended to be sold in Rio Grande do Sul State, due to non-compliance with accessory obligations provided for in ICMS Agreement No. 54/02; (5) requirement of INSS (social security contribution) supposedly due by third parties and service providers engaged who did not present clear evidence of payment of their obligations, causing the Company to be jointly liable for this tax; and (6) non-approval of the offset of IPI credits recorded on the receiving of inputs subject to taxation whose subsequent shipments were tax immune.

**Civil lawsuits**

Civil lawsuits of the Company are mostly related indemnity claims arising from lease, commercial and service agreements entered into by the Company.

**Labor lawsuits**

Labor lawsuits of the Company refer to lawsuits filed by former employees and outsourced professionals claiming to payroll charges.

**(c) Contingent assets**

The Company filed judicial and/or administrative proceedings with Federal and State tax authorities to recover taxes unduly paid or overpaid. These proceedings, when concluded, may represent income that, due to its contingent nature, is not recorded in the financial statements as of December 31, 2006.

Due to the progress of lawsuits and based on their legal counsel's opinion, the companies' management assessed the likelihood of a favorable outcome in the aforementioned lawsuits as probable or possible, depending on the specific circumstances. As of December 31, 2006 said lawsuits may be summarized as follows:

|                                                     |       |
|-----------------------------------------------------|-------|
| <b>Federal level</b>                                |       |
| PIS/COFINS (taxes on revenue) increase in tax basis | 7,919 |
| <b>State level</b>                                  |       |
| State income surtax (AIRE)                          | 1,093 |

**17 Employee and management profit sharing**

Profit sharing is calculated based on net income for the year, after deducting accumulated deficit, if any, and provision for income and social contribution taxes, and is distributed as follows:

**(a) Employee profit sharing**

Calculated based on 3% of net income from operations, which will be computed excluding investments in companies (recorded in the stand-alone individual statements of income of the Company for statutory and regulatory purposes as equity in subsidiaries and affiliates), amortization of goodwill or negative goodwill, sale or write-off of investments in companies, and, finally, interest paid or received by the Company as interest on capital.

F-465

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

**(b) Management profit sharing**

At the discretion of the Board of Directors, management profit sharing will be calculated based on up to 10% of income after deducting employee profit sharing and cannot exceed the annual global compensation established at the Shareholders Meeting.

**18 Provision for pension and other post-employment benefits**

**(a) Pension benefits provided by Fundação Francisco Martin Bastos**

The Company, together with other Petróleo Ipiranga companies, sponsors Fundação Francisco Martins Bastos (FFMB), a closed pension entity that manages and operates pension plans for the employees of Petróleo Ipiranga companies.

FFMB Benefit Plan was created in 1993. Initially, only the basic benefit was established (a defined benefit plan) and in July 1998 the supplementary benefit (structured as a defined contribution plan in the phase of capitalization of estimated benefits) was implemented, whose contribution percentage is applicable to possible variable compensation. The pension plan is funded by the sponsors and participants.

On August 31, 2005, the SPC (Secretariat for Pension Plan), through Official Letter No. 1003/SPC/DETEC/CGAT, approved the new Ruling of FFMB Benefit Plan. New regulations were introduced related to portability, deferred proportional benefit, self-sponsorship and redemption provided for in CGPC (Supplemental Pension Management Council) Resolution No. 6, of October 30, 2003, as well as changes in the calculation of benefits, new GAM-83 life expectancy table and change in the actuarial method from unit credit to projected unit credit became effective as actuarial adjustments.

The main changes in the calculations of benefits, approved in the new regulation, refer to the adjustment of the employee salary, gradual elimination of bonus for length of service credited for the purpose of calculating benefits and the increase in the percentage of reduction of the early retirement basic benefit.

These changes reduced the plan's total cost for the sponsors by 36%, as defined by the actuary based on the percentage of the participants' payroll for 2006.

In 2006, SPC, by means of CGPC Resolution No. 18, of March 28, 2006, established new technical/actuarial parameters for private pension plan entities. Therefore, the minimum life expectancy table that will be adopted is AT-1983, increasing the life expectancy of active participants by approximately 2 years.

**(b) Other post-employment benefits**

According to CVM Resolution No. 371/00, the Company, in addition to the pension plan, recognizes a provision for other post-employment benefits related to bonus for length of service, FGTS (severance pay fund), health-care plan and life insurance for eligible retirees. Other post-employment benefits are unfunded and are provided directly by the Company and each of its subsidiaries of the Petróleo Ipiranga Group.

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

The reconciliation of pension and other post-employment benefit liabilities as of December 31 is as follows:

|                                         | 2006     | 2005     | 2004     |
|-----------------------------------------|----------|----------|----------|
| Present value of funded obligations     | (44,721) | (40,325) | (50,983) |
| Present value of unfunded obligations   | (27,273) | (24,711) | (20,743) |
| Fair value of plan assets               | 46,133   | 39,337   | 41,662   |
| Unrecognized actuarial gains (losses)   | (5,317)  | (6,229)  | (7,471)  |
| Net post-employment benefit liabilities | (31,178) | (31,928) | (37,535) |
| (-) Current                             | (2,412)  | (1,677)  | (2,639)  |
| Long term                               | (28,766) | (30,251) | (34,896) |

The portion of actuarial gains or losses to be recognized as income or expense is the amount of unrecognized gains and losses that exceed, in each year, the higher of the following amounts:

(i) 10% of the present value of the total actuarial obligation of the defined benefit; and

(ii) 10% of the fair value of plan assets.

The portion that exceeds such limits will be annually amortized dividing its amount by the remaining average length service estimated for the plan's participants.

The amounts recognized in the statements of income are as follows:

|                                         | 2006    | 2005    | 2004    |
|-----------------------------------------|---------|---------|---------|
| Cost of current service                 | (1,189) | (1,112) | (1,191) |
| Cost of interest                        | (7,237) | (6,863) | (7,074) |
| Expected return on assets               | 6,130   | 4,930   | 4,077   |
| Amortization of actuarial gain (losses) | 236     | 418     | 363     |
| Employees' contributions                | 381     | 455     | 578     |
| Total expenses in the year              | (1,679) | (2,172) | (3,247) |

Changes in net pension and other post-employment benefit liabilities may be shown as follows:

|                                                                  | 2006     | 2005     | 2004     |
|------------------------------------------------------------------|----------|----------|----------|
| Net liability at beginning of year                               | (31,928) | (37,535) | (36,931) |
| Expenses in the year                                             | (1,679)  | (2,172)  | (3,247)  |
| Company's contributions in the year                              | 861      | 1,253    | 1,856    |
| Benefits paid in the year                                        | 840      | 1,722    | 787      |
| Adjustment to the present value of obligations/other adjustments | 728      | 4,804    |          |

|                              |          |          |          |
|------------------------------|----------|----------|----------|
| Net liability at end of year | (31,178) | (31,928) | (37,535) |
|------------------------------|----------|----------|----------|

The main actuarial assumptions applied are as follows:

Discount rate of actuarial obligation at present value 10.8% per year

Expected long-term rate of return on assets 13.2% per year

Projected average salary growth rate 6.6% per year

F-467

**19 Net assets**

Net assets correspond to the shareholders equity of DPPI less the investment in CBPI which for the purpose of this carve-out statement has been eliminated.

**20 Collaterals and guarantees**

The Company provides collaterals and guarantees for some loan operations conducted directly or indirectly by subsidiaries and affiliates.

As of December 31, 2006 and 2005 amounts referring to these operations are as follows:

| Guarantor | Borrower | 2006   | 2005   | Maturity |
|-----------|----------|--------|--------|----------|
| DPPI      | CBPI(1)  | 3,931  | 3,054  | 2009     |
| DPPI      | IQ(2)    | 1,547  | 533    | 2010     |

IQAG Ipiranga Química Armazéns Gerais Ltda.

- (1) Entity controlled by the Company
- (2) Affiliate of CBPI

**21 Financial instruments**

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

In accordance with CVM Instruction No. 235/95, the Company and its subsidiaries estimated the fair value of their financial instruments, using available market information and appropriate estimation methodologies. However, both the interpretation of market data and the selection of estimation methodologies require reasonable judgment and estimates to determine the most adequate realizable value. Accordingly, the estimates presented are not necessarily indicative of the amounts that could be obtained in active market trading. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair values.

The Company conducts transactions involving financial instruments, all of which are recorded in balance sheet accounts, and are intended to meet their needs and reduce the exposure to credit, market, and currency risks. Management of these risks is performed by establishing strategies and control systems and setting position limits.

F-468

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

The main risks affecting the Company's business are as follows:

**(a) Currency risk**

This risk arises from the possibility of the Company incurring material losses because of exchange rate fluctuations, which may affect the balances of foreign currency-denominated loans and financing.

The exposure to fluctuations in exchange rates is as follows:

| Amounts in US\$ thousand | 2006     | 2005     |
|--------------------------|----------|----------|
| Loans and financing      | 10,759   | 44,101   |
| Swap transactions        | (10,759) | (44,101) |
| Net exposure             |          |          |

**(b) Credit risk**

This is the risk of the Company incurring losses due to customers' failure to pay accounts and financing. The Company reduces this risk by means of a credit policy and by obtaining collaterals for supply agreements signed with its customers for significant balances.

**(c) Interest rate risk**

This risk arises from the possibility of the Company incurring losses due to interest rate fluctuations that increase interest expenses on loans and financing.

The Company continuously monitors the market interest rates in order to evaluate the need for hedging against the volatility of these rates.

**(d) Financial income (expenses)**

|                                         | 2006     | 2005     | 2004     |

**23 Insurance**

The Petróleo Ipiranga companies have an insurance and risk management program that allows coverage and protection for all their insurable assets, including insurance coverage for risks of disruption of production, by means of an operational risk policy traded in the domestic and foreign insurance markets through the Brazilian Reinsurance Institute (IRB).

The insurance coverages and limits are based on a detailed study of risks and losses performed by local insurance brokers, and the insurance contracted is considered sufficient to cover possible losses, considering the nature of the companies' activities.

The main insurance coverages are for operational risks, loss of profits, industrial and office multiperils, named risk-pools and civil liability.

**24 Subsequent events****Acquisition of Ipiranga**

On April 18, 2007, Ultrapar for itself, and also as a commission agent of Braskem and Petrobras, acquired for R\$ 2,113,107, from the controlling shareholders of the Petróleo Ipiranga companies, 66.2% common shares and 13.9% preferred shares issued by RPI, 69.2% common shares and 13.5% preferred shares issued by the Company, and 3.8% common shares and 0.4% preferred shares issued by Companhia Brasileira de Petróleo Ipiranga ( CBPI ). Of the total amount, Braskem and Petrobras paid R\$1,394,675 under the terms of the commission among the parties.

Under the terms of the agreement among Ultrapar, Braskem and Petrobras, once all steps of the transaction mentioned below are finalized, Ultrapar will hold the distribution of fuel and lubricants in the Southern and Southeastern Regions ( South Distribution Assets ); Petrobras will hold the distribution of fuel and lubricants in the Northern, Northeastern and Central-Western Regions ( North Distribution Assets ); and Braskem and Petrobras will hold 60% and 40%, respectively, of the petrochemical assets, represented by Ipiranga Química S.A., IPQ and by the interest of the latter in COPESUL - Companhia Petroquímica do Sul (COPESUL) ( Petrochemical Assets ). Assets related to oil refining held by RPI will be equally shared by Petrobras, Ultrapar and Braskem.

---

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

In the same agreement the parties established that Ultrapar is responsible for conducting a corporate restructuring in the companies acquired to separate the assets assigned to each acquiring company. The stages are as follows:

- a) Public Tag Along Offering to acquire common shares issued by RPI, DPPI, CBPI and IPQ held by other shareholders;
- b) Merger into Ultrapar of the preferred and any remaining common shares issued by RPI, DPPI and CBPI;
- c) Segregation of assets by means of: (i) capital reduction of RPI and CBPI to transfer the Petrochemical Assets directly to Ultrapar, for subsequent transfer to Braskem and Petrobras, under the terms of the commission, and (ii) spin-off of CBPI to transfer the North Distribution Assets to a company controlled by Petrobras.

On April 17, 2007, CADE (Economic Defense Council) issued an Injunction to maintain the conditions that would allow to revert the asset acquisition by Braskem and Petrobras, as described in the Significant Event Notice published on April 18, 2007. The provisions related to Petrochemical Assets were reviewed on April 25, 2007 in the decision approved by CADE, with signature by Braskem of agreement for protection of reversibility of operation (APRO).

With said changes, CADE acknowledges the maintenance of the minority interest of Petrobras in COPESUL1 after the acquisition. In relation to fuel distribution, CADE granted 10 days so that Petrobras and Ultrapar present an alternative corporate governance model that preserves competition within the industry.

**25 SUMMARY AND RECONCILIATION OF THE DIFFERENCES BETWEEN ACCOUNTING PRACTICES ADOPTED IN BRAZIL AND GENERALLY ACCEPTED ACCOUNTING PRINCIPLES IN THE UNITED STATES OF AMERICA**

**I Narrative description of GAAP differences**

The consolidated financial statements of the Company are prepared in accordance with Brazilian GAAP. Accounting policies, which differ significantly from U.S. GAAP, are summarized below.

**(a) Inflation accounting**

Under Brazilian GAAP, the Company accounts for the effects of inflation in its financial statements prepared in accordance with Brazilian GAAP through December 31, 1995. Through December 31, 1995, the Company used for this remeasurement the Fiscal Reference Unit (UFIR), the index established by the tax authorities for preparation of financial statements under Brazilian corporate law as well as the index selected by the CVM.

The reconciliation presents the effect of adjusting property, plant and equipment for US GAAP purposes through December 31, 1997. Under U.S. GAAP, management of the Company considers that Brazil was considered to be a highly inflationary economy until December 31, 1997 and, as such, property, plant and equipment should be adjusted for inflation through such date.

In determining amounts under U.S. GAAP, the effects of inflation for the years ended December 31, 1996 and 1997 were determined using the Índice Geral de Preços Disponibilidade Interna IGP-DI index, which is a widely-accepted and respected index published monthly by the Fundação Getúlio Vargas.

Because the Company's management believes that the IGP-DI is an appropriate and consistent measure of the general price inflation in Brazil and because of its availability, for U.S. GAAP purposes the Company

F-471

## **Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

adopted the IGP-DI for restatement of its financial statements also for periods through December 31, 1995, replacing the Government mandated index. As a result, property, plant and equipment has been monetarily adjusted for inflation using the IGP-DI since its acquisition through December 31, 1997.

### **(b) Capitalization of interest in relation to construction in progress**

Under Brazilian GAAP the Company was not required to capitalize the interest cost of borrowed funds as part of the cost of the related asset. Under U.S. GAAP, capitalization of borrowed funds during construction of major facilities is recognized as part of the cost of the related assets.

Under U.S. GAAP, interest on construction-period financing denominated in foreign currencies is capitalized using contractual interest rates, exclusive of foreign exchange gains or losses.

### **(c) Pension and other post-retirement benefits**

#### **(c.1) Pension benefits**

Pension benefit obligations for Brazilian GAAP should be accounted for following CVM Instruction No. 371/00, which requires the mandatory application of Brazilian Accounting Standard IBRACON NPC 26. Under IBRACON NPC 26 the Company has accounted for the plan administered by FFMB (and to which several Petróleo Ipiranga companies contribute) by recognizing a percentage attributed to the Company of the funded status and of the cost of the plan.

Under U.S. GAAP, considering that the financial information of the Company does not consolidate all the sponsors of the FFMB Pension Plan and such financial information does not represent the financial statements of the parent company of the Petróleo Ipiranga companies, the Company has accounted for its participation in the pension plan administered by FFMB as if it were a multi-employer plan.

As a result, the reconciliation presents: (a) the reversal of the pension plan asset/liability recognized for Brazilian GAAP as of each reporting date and the reversal of the related pension cost, and (b) the recognition as expense of the contribution due to the plan over the corresponding period.

#### **(c.2) Other post-retirement benefits**

As explained in Note 17, the accompanying financial statements account for other post-retirement benefits following IBRACON NPC 26. Other post-retirement benefits are unfunded and are the sole responsibility of each Petróleo Ipiranga company. Under IBRACON NPC 26 actuarial gains and losses are deferred and recognized in income over the estimated remaining service period of the employees to the extent that those actuarial gains and losses exceed 10% of the higher of the plan assets and the projected benefit obligation.

Under U.S. GAAP such benefits are accounted for following SFAS No. 106, *Employers' Accounting for Post-retirement Benefits Other Than Pensions* and, as from December 31, 2006, following SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Post-retirement Plans* an amendment of FASB Statements No. 87, 88, 106 and 132(R). Under SFAS No. 158 the funded status of the other post-retirement benefits must be recognized as a liability with an offsetting amount in accumulated other comprehensive income. As required by SFAS No. 158, provisions of SFAS No. 158 were applied on a prospective basis as from December 31, 2006.

Although projected benefit obligations are the same under Brazilian GAAP and U.S. GAAP, differences arise in the amounts recorded in the financial statements as result of: (i) the date of initial measurement of funded

## **Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

status is different for Brazilian GAAP and U.S. GAAP and that under Brazilian GAAP there is no requirement to recognize an additional minimum liability, and (ii) the recognition as from December 31, 2006, as a liability for U.S. GAAP purposes of the funded status against accumulated other comprehensive income.

### **(d) Tax incentives**

Under Brazilian GAAP, the tax incentives are accounted for directly as an increase in a capital reserve account in shareholders' equity. The Company records the taxes as expense in the consolidated statement of income for the amounts that would be due absent the benefit, and recognizes a reduction in the tax payable against the capital reserve.

For U.S. GAAP reconciliation purposes the amount of those incentives is recognized as a reduction of the tax expense directly in the statement of income.

### **(e) Fair value of guarantees under FIN 45**

Under Brazilian GAAP, the Company is not required to record any liability related to guarantees given to third parties unless contingent obligations to make future payments under the guarantees are probable.

The Company has not recorded any liability related to these guarantees under Brazilian GAAP as of any of the dates presented.

Under U.S. GAAP, the Company recognizes, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing guarantees in accordance with FIN 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. In the event that, at inception of the guarantee, the Company is required to recognize a liability under SFAS No. 5,

*Accounting for Contingencies*, the liability initially recognized would be the greater of: (a) the amount of fair value of the value of the obligation undertaken in issuing guarantee, or (b) the contingent liability amount required to be recognized at inception of the guarantee by applying SFAS No. 5.

Guarantees granted include those disclosed in Note 20 as well as guarantees provided to financial institutions that finance sales to selected customers under the vendor program. Under the vendor program the Company is the secondary obligor to the financial institutions.

The reconciliation presents the effect of recognizing a liability for the fair value of these guarantees and the related effect in the statement of income.

### **(f) Accounting for asset retirement obligation**

Under Brazilian GAAP, the company's practice is to expense amounts relating to retirement of certain assets as retired as incurred.

Under U.S. GAAP, the Company adopts SFAS No. 143, *Accounting for Asset Retirement Obligations*. Asset retirement obligations correspond to the legally required obligation to remove fuel tanks upon retirement. Under SFAS No. 143, the fair values of asset retirement obligations are recorded as liabilities on a discounted basis when they are incurred, which is typically at the time the related assets are installed. Amounts recorded for the related assets will be increased by the amount of these obligations and depreciated over the related useful lives of such assets. Over time, the amounts recognized as liabilities will be accreted for the change in their present value until the related assets are retired or sold.

## **Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

### **(g) Gain on change in equity interest in Maxfácil**

In December 2006, the business recognized a capital gain, in the amount of R\$ 27,358, regarding to the gain on change in equity interest in Maxfácil as described in Note 12.

The gain has been determined as a result of Maxfácil having issued new shares to UNIBANCO at a price higher than the carrying amount per share of the investment recorded by the Company in Maxfácil.

Under U.S. GAAP, considering that Maxfácil is a newly formed entity, the Company believes it does not meet the criteria for gain recognition established in SAB Topic 5-H.

The reconciliation presents the effect of reverting for U.S. GAAP the capital gain recognized under Brazilian GAAP.

### **Accounting for convertible debentures issued by Ipiranga Química S.A. and warrants purchased by the Company**

#### **h.1) Accounting for convertible debentures issued by IQ**

Under Brazilian GAAP, convertible debentures issued by Ipiranga Química S.A. described in Note 7 are accounted by the business for as a single instrument at its cost plus accrued interest following the contractual terms.

Under U.S. GAAP the Company has concluded that the non-detachable conversion option included in the convertible debentures issued by IPQ does not meet the definition of a derivative under SFAS 133 Accounting for Derivative Instruments and Hedging Activities, as amended and interpreted . The Company accounted for the convertible debentures in accordance with FAS 115 Accounting for Certain Investments in Debt and Equity Securities and classified the instrument as a trading security. At the date of issuance, the total amount of the proceeds equals the fair value of the instrument so there is no GAAP difference at initial recording.

However, the convertible debenture was marked to market at every reporting period with charges to the statements of income for U.S. GAAP purposes, creating a difference in valuation of the convertible instrument for U.S. GAAP of R\$ 29 million at the date of the modification of the terms.

#### **h.2) Accounting for the modification of terms of the debentures and issuance of warrants**

In October 2005, a modification was introduced in the terms of the debentures such that they were modified from convertible to non-convertible; no other terms of the debentures have been modified. At the same moment, IQ issued to the holders of the debentures, detachable warrants which allow the holders of the warrants to acquire shares of IQ in the exact same terms as the previously existing non-detachable conversion option included in the debentures.

Under Brazilian GAAP, warrants are not separately recorded. The modification of the terms of the debentures and the issuance of warrants in October 2005 did not have any impact in the accounting for the debentures (which were originally convertible and in October 2005 were modified to non-convertible) under Brazilian GAAP which continued to be accounted for at its cost plus accrued interest and warrants issued by IQ are not accounted for.

For U.S. GAAP purposes, the Company has also classified the new debt instrument received as a trading security under FAS 115. In addition, the Company has concluded that the fair value of the warrant and non-convertible debenture received approximates the fair value of the convertible debenture prior to modification.

**Table of Contents**

Distribuidora de Produtos de Petróleo Ipiranga S.A.

Therefore, upon modification the Company recorded the warrant and debt at their fair values with no gain or loss recognized.

Contemporaneously with the modification of the terms of the debenture and the issuance of warrants, the Company sold the warrants received to RPI for R\$ 29 million. This amount approximates the fair value of the warrants at the date of modification of the convertible debentures and issuance of warrants, so no gain or loss was recorded by the Company upon sale under U.S. GAAP. Under Brazilian GAAP no value was recognized for the warrant received and therefore, a gain for the sales price of R\$ 29 million was recognized.

After the modification, the Company continued to mark to market the non-convertible debt instruments with charges to the statements of income.

The U.S. GAAP reconciliation reflects the difference in the mark to market of the convertible debt instrument through the date of modification, and of the non-convertible debt instrument after the modification, compared to the amortized cost value recorded for Brazilian GAAP purposes.

**V Additional disclosures****(a) Earnings per share**

Under Brazilian GAAP, net income per share is calculated by dividing net income by the number of shares outstanding at the balance sheet date. In these consolidated financial statements, information is disclosed per lot of one thousand shares, because this is the minimum number of shares that can be traded on the Brazilian stock exchanges.

Under U.S. GAAP earnings per share are retroactively restated to reflect in all periods presented the effect of stock dividends. As disclosed in Note 18 in April 2006 the Company approved a stock dividend and earnings per share have been retroactively restated to reflect the effect of such stock dividend.

Since the preferred and common shareholders have different dividends and voting rights (see Note 18), basic earnings per share have been calculated using the two-class method for U.S. GAAP purposes. The following table provides a reconciliation of the numerators and denominators used in computing earnings per share as required by SFAS No. 128:

|                                                                                                      | <b>For the year ended<br/>December 31, 2006</b> |                  |              |

**(b) Statement of cash flows**

Brazilian GAAP does not require the presentation of a statement of cash flows as required by U.S. GAAP. Changes in working capital are presented in the statement of changes in financial position. U.S. GAAP requires the presentation of a statement of cash flows describing the Company's cash flows from operating, financing and investing activities. Statements of cash flows derived from the information based on Brazilian GAAP are as follows:

**Report of Independent Auditors**

To the Board of Directors

and Shareholders of

Companhia Brasileira de Petróleo Ipiranga

We have audited the accompanying statements of assets acquired and liabilities assumed of the South and Southeast Fuel and Lubricant Distribution Business of Companhia Brasileira de Petróleo Ipiranga as of December 31, 2006 and 2005 and the related statements of net revenues and direct expenses for the years ended December 31, 2006, 2005 and 2004. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets acquired and liabilities assumed of the South and Southeast Fuel and Lubricant Distribution Business of Companhia Brasileira de Petróleo Ipiranga as of December 31, 2006 and 2005 and the related net revenues and direct expenses for the years ended December 31, 2006, 2005 and 2004 in conformity with accounting practices adopted in Brazil.

Accounting practices adopted in Brazil vary in certain significant respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in Note 11 to the financial statements.

As discussed in Notes 1 and 2, the accompanying financial statements were prepared for the purpose of complying with the rules and regulations of the Securities and Exchange Commission, and are not intended to be a complete presentation of the assets, liabilities, revenues, expenses, and cash flows of South and Southeast Oil and Lubricant Distribution Business of Companhia Brasileira de Petróleo Ipiranga.

**SOUTH AND SOUTHEAST DISTRIBUTION BUSINESS OF COMPANHIA BRASILEIRA DE PETRÓLEO IPIRANGA**

**AS OF DECEMBER 31, 2006, 2005, AND 2004**

**(In thousands of Brazilian reais R\$)**

**NOTES TO THE STATEMENTS OF ASSETS ACQUIRED AND LIABILITIES ASSUMED AND STATEMENTS OF REVENUES AND DIRECT EXPENSES**

**(1) Description of the Business Acquired**

On March 18, 2007, Ultrapar Participações S.A. ( Ultrapar ) entered into, and Petróleo Brasileiro S.A. -Petrobras ( Petrobras ) and Braskem S.A. ( Braskem ) acknowledged, a Stock Purchase Agreement, ( SPA ), with the Key Shareholders of the principal Petróleo Ipiranga companies which comprise Refinaria de Petróleo Ipiranga ( RPI ), Distribuidora de Produtos de Petróleo Ipiranga ( DPPI ) and Companhia Brasileira de Petróleo Ipiranga ( CBPI ). As discussed further below, in connection with the acquisition, Ultrapar is acting on its own behalf and on behalf of Petrobras and Braskem pursuant to the agreements of the transaction.

After completion of additional steps of the transaction (which include, among others, public offers to acquire shares held by minority shareholders of the companies acquired and exchange offers to other minority shareholders of RPI, DPPI and CPBI into Ultrapar) the businesses of the Petróleo Ipiranga companies will be divided among Petrobras, Ultrapar and Braskem. Ultrapar will retain the fuel and lubricant distribution businesses located in the South and Southeast regions of Brazil; Petrobras will receive the fuel and lubricant distribution businesses located in the North, Northeast and Central-West regions of Brazil; and Petrobras and Braskem will receive the petrochemical business, in the proportion of 60% for Braskem and 40% for Petrobras. RPI's oil refining business will be shared equally among Petrobras, Ultrapar and Braskem.

The fuel and lubricant distribution business of the Petróleo Ipiranga was operated through two companies: DPPI and CBPI. For all periods presented DPPI had a majority of voting shares of CBPI, which results in DPPI controlling CBPI. Whereas DPPI only operates in parts of the South region of Brazil, CBPI has operations in all regions of the country, with exception of those covered by DPPI. Both are public companies with separate and different minority shareholder bases. Although DPPI had a controlling interest over CBPI, the Petróleo Ipiranga companies operated the two companies on a completely independent basis so that they were managed by different executives, pursued different strategies and possessed different information and accounting systems.

The fuel and lubricant distribution businesses located in the South and Southeast regions of Brazil operated by CBPI ( South and Southeast Distribution Business or the Business ) have not been managed as a stand-alone business or a separate entity, subsidiary or division of the Petróleo Ipiranga companies or of CBPI, and, consequently, its financial statements have never previously been prepared. Neither the Petróleo Ipiranga companies nor CBPI have ever allocated certain corporate expenses to the Business, including interest expense, corporate overhead expenses and income taxes. This information is not otherwise readily available and any allocation would be subjective and may not be relevant due to differences in corporate structures between the structure existing when the Business was operated by the Petróleo Ipiranga companies and the planned structure for operating the business by Ultrapar.

**(2) Basis of Preparation**

The statements of assets acquired and liabilities assumed as of December 31, 2006 and 2005 and the statements of revenues and direct expenses for the years ended December 31, 2006, 2005 and 2004 (together referred to as financial information ) have been prepared in accordance with accounting practices adopted in Brazil (Brazilian GAAP). Note 3 to this accompanying financial information summarizes the accounting policies adopted by the Business. Accounting policies, which differ significantly from the accounting principles generally accepted in the United States of America (U.S. GAAP), are summarized in Note 11.

## **Table of Contents**

Prior to the Acquisition, CBPI's fuel and lubricant distribution business was managed along countrywide business lines (aggregated under retail and large consumer operations), as opposed to a segmentation based on geographical regions. Consequently, an important set of information relating to profit from operations was not segmented by geographical region and items such as property, plant and equipment not directly related to revenue generating activities, overhead expenses, debt and related costs and cash balances, among others, were recorded on Company wide basis. As a result the following items were excluded from the financial information:

Cash and marketable securities and related interest income;

Debt and related interest expense;

Overhead costs;

Property, plant and equipment not directly related to revenue generating activities;

Taxes, other than State VAT, which is a direct tax, and related tax expense, receivables and payable;

Other sundry assets and liabilities not directly related to revenue generating activities including accounts payable and receivable from related parties.

The financial information has been obtained from the Business' historical records and reflects allocations of direct costs and expenses. All the allocations and estimates in the statements of revenues and direct expenses are based on assumptions that management of CBPI believes are reasonable.

The accompanying financial information has been prepared with the purpose of complying with specific disclosure requirements of the Securities and Exchange Commission (SEC) and do not purport to reflect the assets, liabilities, and revenues and expenses that would have resulted if the Business had operated as an unaffiliated independent company.

### **(3) Significant Accounting Policies**

#### *Use of estimates*

The preparation of financial statements in conformity with Brazilian GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities as of the dates of the financial information and the reported amounts of revenues and direct expenses during the years presented in this financial information. Significant estimates include, but are not limited to, the allowance for doubtful accounts, impairment of long-lived assets, and useful lives of long-lived assets. Actual results could differ from those estimates.

#### *Presentation principles*

The accompanying financial information includes the assets acquired and liabilities assumed of the Business and its subsidiaries that are part of the acquisition. Intercompany assets and liabilities balances, income and expenses, as well as the effects arising from significant intercompany transactions, have been eliminated in the accompanying financial information. The following subsidiaries of CBPI are part of the acquisition and the financial information includes consolidated information of assets acquired, liabilities assumed and revenues and direct expenses of those subsidiaries:

F-486

## **Table of Contents**

### ***Trade and other accounts receivable***

Trade and other accounts receivable are stated at estimated net realizable values. The allowance for doubtful accounts is based on estimated losses based on individual analysis of each customer, and is considered by management to be sufficient to cover probable losses on accounts receivable.

### ***Inventories***

Inventories are stated at the lower of average cost of acquisition or production and net realizable value.

### ***Investments***

Corresponds to investments in affiliated companies not controlled by the Business but over which it has significant influence and that are accounted for using the equity method.

### ***Property, plant and equipment, net***

Property, plant and equipment are recorded at historical cost of acquisition, or construction, monetarily restated through December 31, 1995. The amounts for disposals are removed from property, plant and equipment and accumulated depreciation accounts and any resulting gain or loss is included in the statements of revenues and direct of expenses under the caption Other operating income, net.

Depreciation is calculated on a straight-line basis at the annual rates described in Note 8, and is based on the estimated useful lives of the corresponding assets. Improvements on land leased to third parties are amortized based on the lower of the term of the leasing agreement and the useful live of the related improvement.

### ***Pension and other post-retirement benefit obligations***

Post-retirement benefits consist of pension benefits and other post-retirement benefits. Other post-retirement benefits include for eligible retirees bonus for length of service, payment upon retirement of one-time retirement severance, health-care benefits and life insurance benefits.

Post-retirement benefits paid or payable to employees, retirees and pensioners (net of the assets of the plan in the case of pension benefits) are recorded based on actuarial calculations prepared by an independent actuary, using the Projected Unit Credit Method.

### ***Provision for State VAT contingencies***

The provisions for State VAT contingencies are recorded based on the opinions of the legal advisors and of other experts and are recorded when unfavorable outcomes are considered probable by management and the related value can be estimated (Note 9).

### ***Other assets and liabilities***

Other assets and liabilities (such as State VAT receivable and payable, prepaid expenses, trade accounts payable, payroll and related charges payable, and profit sharing) classified as current or long term, are stated at realizable or settlement amounts. These assets and liabilities are stated at cost or realizable value and known or estimated amounts, respectively, including, when applicable, monetary and exchange variations.

### ***Revenue recognition***

Revenue on sale of products is recognized when risk and benefits of ownership passes to the buyer, persuasive evidence of an arrangement exists, the price to the buyer is fixed or determinable and collectibility is reasonably assured.

**Table of Contents**

Sales incentives are generally recognized as expenses and include, but are not limited to, discounts and rebates. Volume-based incentives payable in cash include amounts paid in advance with the commitment of the customer to reach specified minimum volumes over a certain period of time and incentives payable only after the minimum volumes have been met in a defined period of time. Volume-based incentives paid in advance are recognized as asset and subsequently recorded as cost of revenues in the statement of revenues and direct expenses over the period of the commitment of minimum sales.

Volume-based incentives, payable only after the minimum volumes are met, are recognized as expense at the moment when the target volume has been achieved.

**Cost of sales**

Cost of sales and services provided includes materials (mainly oil and fuel) and production, distribution and storage costs.

**Direct income (expenses)**

The statement of revenues and direct expenses for the Business include all income and expenses directly incurred to generate the revenue. These income and expenses include selling expenses and general and administrative expenses consisting mainly of personnel, third-party labor costs, consulting and travel expenses and materials, and interest income on customers financing. Other operating income includes revenues related to merchandise fees received from certain suppliers of the am/pm convenience stores.

**(4) Trade and Other Accounts Receivable**

Trade and other accounts receivable consist of the following:

|                            | 2006           | 2005           |
|----------------------------|----------------|----------------|
| Domestic market:           |                |                |
| Trade notes receivable     | 609,320        | 571,224        |
| Customer financing         | 206,343        | 187,960        |
| Foreign market Receivables | 3,076          | 3,231          |
| <b>Total</b>               | <b>818,739</b> | <b>762,415</b> |
| (-) Current                | (708,558)      | (667,338)      |
| <b>Long term</b>           | <b>110,181</b> | <b>95,077</b>  |

Long term portion is mainly represented by customer financing. Under customer financing, cash loans are provided to gas stations using the Ipiranga brand. Such loans are generally used by the gas stations to finance renovation and modernization of fuel stations, as well as for working capital including acquisition of products and investing in marketing. Customer financing carries interest of 1% per month.

**(5) Inventories**

Inventories consist of the following:

|                             | 2006           | 2005           |
|-----------------------------|----------------|----------------|
| Fuel                        | 165,662        | 204,985        |
| Lubricants and greases      | 21,410         | 15,417         |
| Raw materials and packaging | 34,466         | 28,725         |
| Advances to suppliers       | 39,998         | 11,165         |
| <b>Total</b>                | <b>261,536</b> | <b>260,292</b> |

F-488

**Table of Contents****(6) Prepaid expenses**

Prepaid expenses consist of the following:

|                        | 2006    | 2005    |
|------------------------|---------|---------|
| Lease contracts        | 10,963  | 11,349  |
| Prepaid insurance      | 452     | 398     |
| Other prepaid expenses | 784     | 627     |
| Total                  | 12,199  | 12,374  |
| (-) Current            | (2,775) | (2,515) |
| Long term              | 9,424   | 9,859   |

Long term portion refers substantially to prepaid lease contracts

**(7) Investments**

Investments in affiliated companies consist of the following:

**Termogaúcha Usina Termelétrica S.A.** (in liquidation): Entity created for the purpose of installing and operating a thermoelectric power plant in the South Petrochemical Complex, in the city of Triunfo, Rio Grande do Sul State.

**Transportadora Sulbrasileira de Gás S.A. ( TSB )**: Responsible for the construction and operation of a gas pipeline between the cities of Uruguaiana and Porto Alegre, in the Rio Grande do Sul State.

**Maxfácil Participações S.A. ( Maxfácil )**: Entity that provides financial services.

|                                          | 2006            |         |               | Total    | Total   |        |

| Ending balance | 271 | 5,867 | 59,512 | 65,650 | 93,665 | 90,466 |

- (i) At the Extraordinary Shareholders' Meeting held on September 12, 2006, the shareholders of Termogaúcha approved its liquidation, considering the conditions of natural gas supply and higher than expected costs of maintenance, preservation and storage of the already acquired generating equipment. Thus, the Business, recorded a provision for impairment in the equity investee in the amount of R\$ 64,541. On the same date, the Annual and Extraordinary Shareholders Meeting approved a capital increase in Termogaúcha. The

F-489

**Table of Contents**

Business made a capital contribution of R\$ 3,849, corresponding to several advances for future capital increase, recorded in long-term assets. On December 14, 2006, a new Extraordinary Shareholders Meeting of Termogaúcha approved the distribution of cash (resulting from the liquidation process) to the shareholders, under article 215 of the Brazilian corporate law for which the Business received R\$ 24,396.

- (ii) CBPI holds a 34.00% interest in Maxfácil, the controlling shareholder DPPI holds a 16% interest, and União de Bancos Brasileiros S.A. - UNIBANCO holds another 50.00% interest. Maxfácil was incorporated by CBPI and DPPI which contributed a nominal amount of capital. Subsequently, UNIBANCO contributed in cash the amount of R\$ 171 million for a 50.0% interest resulting in the recognition by the Company of a gain in change of interest of R\$ 58,136. Maxfácil is a joint-venture which has as its business purpose to offer financial services to the customers and distributors of Ipiranga products for a period of 10 years.

**(8) Property, Plant and Equipment, Net**

Property, plant and equipment consist of the following:

(1) Leasehold improvements are depreciated over the term of the agreement or the useful life of the asset, whichever is shorter.

**(9) Contingencies for State VAT Tax**

Tax lawsuits refer mainly to: (1) requirement of reversal of credits for ICMS on the provision of proper transportation services during the period the system of freight reimbursement by DNC (currently National Oil, Natural Gas and Biofuel Agency - ANP) was in effect and, although the freight reimbursements have always been made by DNC without the ICMS amount, previous court decisions have been unfavorable to the Company's arguments; (2) requirement of ICMS/Tax Substitution on interstate sales to end consumers under ICMS Agreement No. 105/92, subsequently amended by Agreement No. 112/93, in which the STF (Federal Supreme Court) resolved the matter, defining that the ICMS on fuel belongs to the State that consumes the fuel, even if the fuel is sold to the end consumer; (3) requirement of reversal of credits for ICMS, in Minas Gerais State, on interstate shipments made pursuant to article 33 of ICMS Agreement No. 66/88, which allowed the maintenance of the credit and which was suspended by an injunction granted by the STF; and (4) assessments due to undue deduction of discounts from the ICMS tax basis, in Minas Gerais State, owed on a tax substitution basis.

**(10) Pension and Other Post-employment Benefits****(a) Pension benefits provided by Fundação Francisco Martin Bastos**

CBPI, together with other Petróleo Ipiranga companies, sponsors Fundação Francisco Martins Bastos (FFMB), a closed pension entity that manages and operates pension plans for the employees of Petróleo Ipiranga companies.

**Table of Contents**

FFMB Pension Plan was created in 1993. Initially, only the basic benefit was established (a defined benefit plan) and in July 1998 a supplementary benefit (structured as a defined contribution plan in the phase of capitalization of estimated benefits) was implemented, whose contribution is computed as a percentage over variable compensation. The pension plan is funded by the sponsors and the participants.

On August 31, 2005, the SPC (Secretariat for Pension Plan), through Official Letter No. 1003/SPC/DETEC/CGAT, approved the new Ruling of the FFMB Benefit Plan. New regulations related to portability, deferred proportional benefit, self-sponsorship and redemption provided for in CGPC (Supplemental Pension Management Council) Resolution No. 6 of October 30, 2003 were introduced, and changes in the calculation of benefits, new GAM-83 life expectancy table and change in the actuarial method from unit credit to projected unit credit became effective as actuarial adjustments.

The main changes in the calculations of benefits, approved in the new regulation, refer to the adjustment of the employee salary, gradual elimination of bonus for length of service credited for the purpose of calculating benefits and the increase in the percentage of reduction of the early retirement basic benefit.

These changes in the FFMB Pension Plan reduced the plan's total cost for the sponsors by 36%, as defined by the actuary based on the percentage of the participants' payroll for 2006.

In 2006, SPC, by means of CGPC Resolution No. 18, of March 28, 2006, established new technical/actuarial parameters for private pension plan entities. Therefore, the minimum life expectancy table that was adopted is AT-1983, which results in increasing life expectancy of active participants by approximately two years.

The amounts related to supplementary benefits and pension plan were calculated annually by independent actuaries and are recognized in the financial statements according to CVM Resolution No. 371/00.

**(b) Other post-employment benefits**

According to CVM Resolution No. 371/00, the Business, in addition to the pension plan, recognizes a provision for other post-retirement benefits corresponding to bonus for length of service, FGTS (severance pay fund), health-care plan and life insurance for eligible retirees. Other post-employment benefits are unfunded and are provided directly by the Business and each of its subsidiaries of the Petróleo Ipiranga Group.

The reconciliation of pension and other post-retirement benefit liabilities of the Business as of December 31 is as follows:

|                                                          | 2006         | 2005          | 2004          |
|----------------------------------------------------------|--------------|---------------|---------------|
| Present value of funded obligations                      | 68,489       | 58,290        | 61,316        |
| Present value of unfunded obligations                    | 13,315       | 12,062        | 11,534        |
| Fair value of plan assets                                | (70,649)     | (56,863)      | (50,118)      |
| Unrecognized gains losses                                | (1,173)      | (2,365)       | (3,288)       |
| <b>Net pension and other post-retirement liabilities</b> | <b>9,982</b> | <b>11,124</b> | <b>19,644</b> |
| (-) Current                                              | (834)        | (258)         | (2,313)       |
| <b>Long term</b>                                         | <b>9,148</b> | <b>10,866</b> | <b>17,331</b> |

The amounts recognized in the statements of income are as follows:

|                                | 2006    | 2005    | 2004    |
|--------------------------------|---------|---------|---------|
| Cost of current service        | 1,755   | 1,610   | 1,576   |
| Cost of interest               | 7,989   | 7,628   | 7,314   |
| Expected return on assets      | (9,107) | (7,234) | (5,342) |
| Amortization of actuarial gain | 197     | 154     | 184     |
| Employees' contributions       | (565)   | (672)   | (757)   |

|                            |     |       |       |
|----------------------------|-----|-------|-------|
| Total expenses in the year | 269 | 1,486 | 2,975 |
|----------------------------|-----|-------|-------|

F-491

**Table of Contents**

Changes in net post-employment benefit liabilities may be shown as follows:

|                                      | 2006    | 2005    | 2004    |
|--------------------------------------|---------|---------|---------|
| Net liability at beginning of year   | 11,124  | 19,644  | 19,481  |
| Expenses for the year                | 269     | 1,486   | 2,975   |
| Business s contributions in the year | (1,157) | (1,631) | (2,450) |
| Benefits paid in the year            | (45)    | (671)   | (362)   |
| Unrecognized gains                   | (209)   | (7,704) |         |
| Net liability at end of year         | 9,982   | 11,124  | 19,644  |

The main actuarial assumptions applied are as follows:

Discount rate of actuarial obligation at present value 10.8% per year

Expected long-term rate of return on assets 13.2% per year

Projected average salary growth rate 6.6% per year

Inflation rate (long term) 4.5% per year

Medical services growth rate 7.6% per year

Biometric assumptions used:

Mortality table AT 1983 basic rated down by 10% (\*)

Turnover table Adjusted Towers Perrin experience

Disabled mortality table RRB 1983

Disability table amended RRB 1944 rated

(\*) For life Insurance benefit, the CSO-80 mortality table was used.

**Narrative description of GAAP differences**

As mentioned in Note 2 ( Basis of Preparation ), the accompanying financial information was prepared in accordance with Brazilian GAAP. Brazilian GAAP differs significantly from U.S. GAAP, as summarized below:

**(a) Inflation accounting**

Under Brazilian GAAP, the Business accounts for the effects of inflation in its financial information prepared in accordance with Brazilian GAAP through December 31, 1995. Through December 31, 1995, the Business used for this remeasurement the Fiscal Reference Unit (UFIR), the index established by the tax authorities for preparation of financial statements under Brazilian corporate law as well as the index selected by the CVM.

The reconciliation presents the effect of adjusting property, plant and equipment for U.S. GAAP purposes through December 31, 1997. Under U.S. GAAP, management of CBPI considers that Brazil was considered to be a highly inflationary economy until December 31, 1997 and, as such, property, plant and equipment should be adjusted for inflation through such date.

In determining amounts under U.S. GAAP, the effects of inflation for the years ended December 31, 1996 and 1997 were determined using the Índice Geral de Preços Disponibilidade Interna IGP-DI index, which is widely-accepted and respected index published monthly by the Fundação Getúlio Vargas.

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

Because the Business's management believes that the IGP-DI is an appropriate and consistent measure of the general price inflation in Brazil and because of its availability, for U.S. GAAP purposes the Business adopted

F-493

## **Table of Contents**

the IGP-DI for restatement of its financial statements also for periods through December 31, 1995, replacing the government mandated index. As a result, property, plant and equipment have been monetarily adjusted for inflation using the IGP-DI since its acquisition through December 31, 1997.

### **(b) Pension and other post-employment benefits**

#### **(b.1) Pension benefits**

Pension benefit obligations for Brazilian GAAP purposes should be accounted for following CVM Instruction No. 371/2000, which requires the mandatory application of Brazilian Accounting Standard IBRACON NPC 26. Under IBRACON NPC 26 the Business has accounted for the plan administered by FFMB (and to which several Petr leo Ipiranga companies contribute) by recognizing a percentage attributed to the Business of the funded status and of the cost of the plan.

Under U.S. GAAP, considering that the financial information of the Business does not consolidate all the sponsors of the FFMB and such financial information does not represent the financial statements of the parent company of the Petr leo Ipiranga companies, the Business has accounted for its participation in the pension plan administered by FFMB as if it were a multi-employer plan.

As a result the reconciliation presents: (a) the reversal of the pension plan asset/liability recognized for Brazilian GAAP as of each reporting date and the reversal of the related pension cost, and (b) the recognition as expense of the contribution due to the plan over the corresponding period.

#### **(b.2) Other post-retirement benefits**

As explained in Note 10, the accompanying financial information accounts for other post-retirement benefits following IBRACON NPC 26. Other post-retirement benefits are unfunded and are the sole responsibility of each company of the Petr leo Ipiranga companies including CBPI. Under IBRACON NPC 26 actuarial gains and losses are deferred and recognized in income over the estimated remaining service period of the employees to the extent that those actuarial gains and losses exceed 10% of the higher of the plan assets and the projected benefit obligation.

Under US GAAP such benefits are accounted for following SFAS No. 106 and, as from December 31, 2006, following SFAS No. 158,

Employers Accounting for Defined Benefit Pension and Other Post-retirement Plans an amendment of FASB Statements No. 87, 88, 106 and 132(R). Under SFAS No. 158 the funded status of the other post-retirement benefits must be recognized as a liability with an offsetting amount in accumulated other comprehensive income. As required by SFAS No. 158, provisions of SFAS No. 158 were applied on a prospective basis as from December 31, 2006.

Although projected benefit obligations are the same under Brazilian GAAP and U.S. GAAP, differences arise in the amounts recorded in the financial statements as a result of : (i) that, for periods before implementation of SFAS No. 158, the date of initial measurement of funded status is different for Brazilian GAAP and US GAAP and that under Brazilian GAAP there is no requirement to recognize our additional minimum liability, and (ii) the recognition as from December 31, 2006 as a liability for US GAAP purposes of the funded status against accumulated other comprehensive income.

## **Table of Contents**

### **(c) Accounting for asset retirement obligation**

Under Brazilian GAAP, the Business expenses the amounts to be incurred when certain assets are retired when incurred.

Under U.S. GAAP, the Company adopted SFAS No. 143 Accounting for Asset Retirement Obligations . Asset retirement obligations correspond to the legally required obligation to remove fuel tanks upon retirement. Under SFAS No. 143, the fair value of asset retirement obligations are recorded as liabilities on a discounted basis when they are incurred, which is typically at the time the related assets are installed. Amounts recorded for the related assets will be increased by the amount of these obligations and depreciated over the related useful lives of such assets. Over time, the amounts recognized as liabilities will be accreted for the change in their present value until the related assets are retired or sold.

### **(d) Gain on change in equity interest in Maxfácil**

In December 2006, the business recognized a capital gain, in the amount of R\$ 58,136, regarding to the gain on change in equity interest in Maxfácil as described in Note 7.

The gain has been determined as result of Maxfácil having issued new shares to UNIBANCO at a price higher than the carrying amount per share of the investment recorded by the Company in Maxfácil .

Under U.S. GAAP considering that Maxfácil is a newly formed entity, the Company believes it does not meets the criteria for gain recognition established in SAB Topic 5-H.

The reconciliation presents the effect of reverting for U.S. GAAP the capital gain recognized under Brazilian GAAP.

### **(e) Accounting for refunds**

The Company offers to certain of its customers refunds in cash if they meet a specified cumulative volume of sales over a specified period. Under Brazilian GAAP, the refund is recognized as an expense when the cumulative volume of sales has been met. Such refunds are offered to a reduced group of customers and have begun to be offered recently.

Under U.S. GAAP, EITF 01-9 Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products) , a Company should recognize a liability based on a systematic and rational allocation of the cost of honoring the commitment in each of the underlying transactions that result in progress toward earning the refund. Considering the reduced customers to which the refund is offered and the reduced historical experience, the Company believes that it can t reasonably estimate the ultimate amount that will be earned by customers. As a result, under U.S. GAAP, a liability is recognizing for the maximum potential amount of the refund.

**Table of Contents**

**INTRODUCTION**

Ultrapar is one of Brazil's largest corporate groups and a leader in the distribution of liquefied petroleum gas, or LPG, production of chemicals, and the provision of integrated logistics services. Our wholly owned subsidiary, Ultragas, is the largest LPG distributor in Brazil, with a national market share of approximately 24%. In the chemicals business, our wholly owned subsidiary, Oxiteno, is the largest producer of ethylene oxide and its principal derivatives in South America and a major producer of specialty chemicals. Through our wholly owned subsidiary, Ultracargo, we believe we are a leading provider of integrated road transport, storage, handling and logistics planning services for special bulk cargo. On April 18, 2007, Ultrapar expanded its distribution operations, having closed the acquisition of Ipiranga Group, the second largest Brazilian fuel distributor.

References in this annual report to Ultrapar, we, our, us and the company are to Ultrapar Participações S.A. and its consolidated subsidiaries (unless the context otherwise requires). In addition, all references in this annual report to:

financial statements. The audited consolidated balance sheets as of December 31, 2004, 2003 and 2002 and the related consolidated statements of income, cash flows, changes in financial position and changes in shareholders' equity, including the notes thereto for the years ended December 31, 2003 and 2002 are not included in this annual report. The financial information presented in this annual report should be read in conjunction with our consolidated financial statements.

On May 31, 2007 the exchange rate for *reais* into U.S. dollars was R\$1.929 to US\$1.00, based on the commercial selling rate as reported by the Central Bank of Brazil (Banco Central do Brasil). The commercial selling rate was R\$2.138 to US\$1.00 at December 31, 2006 and R\$2.341 to US\$1.00 at December 31, 2005. The *real*/dollar exchange rate fluctuates widely, and the current commercial selling rate may not be indicative of future exchange rates. See Item 3.A. Key Information - Selected Consolidated Financial Data - Exchange Rates for information regarding exchange rates for the Brazilian currency.

Solely for the convenience of the reader, we have translated some amounts included in Item 3A. Selected Consolidated Financial Information and elsewhere in this annual report from *reais* into U.S. dollars using the commercial selling rate as reported by the Central Bank at December 31, 2006 of R\$2.138 to US\$1.00. These translations should not be considered representations that any such amounts have been, could have been or could be converted into U.S. dollars at that or at any other exchange rate. Such translations should not be construed as representations that the *real* amounts represent or have been or could be converted into U.S. dollars as of that or any other date.

Segment information for our businesses are presented on an unconsolidated basis. Consequently, intercompany transactions have not been eliminated in segment information and therefore this information will not sum to consolidated financial information provided. See Item 7.B. Major Shareholders and Related Party Transactions - Related Party Transactions for more information on intercompany transactions.

Certain figures included in this annual report have been subject to rounding adjustments. Accordingly, figures shown as totals in certain tables may not be an arithmetic aggregation of the figures that precede them.

### *Brazilian GAAP and U.S. GAAP*

Our consolidated financial statements are prepared in accordance with accounting practices adopted in Brazil (Brazilian GAAP), which include accounting principles emanating from the Brazilian corporate law and accounting standards and supplementary procedures established by the CVM (the Brazilian Securities and Exchange Commission) and the Brazilian Institute of Independent Auditors (Instituto dos Auditores Independentes do Brasil), or IBRACON. Such accounting practices differ in certain material respects from accounting principles generally accepted in the United States of America, or U.S. GAAP. See Note 24 to our consolidated financial statements for a summary of the differences between Brazilian GAAP and U.S. GAAP, and a reconciliation of shareholders' equity as of December 31, 2006 and 2005 and net income for the years ended December 31, 2006, 2005 and 2004 from Brazilian GAAP to U.S. GAAP.

### *Market share and economic information*

All market share information for the LPG and fuel distribution businesses in Brazil were obtained from Sindigás, the Brazilian Association of LPG Distributors, SINDICOM, the Brazilian Association of Fuel Distributors, and ANP. Unless otherwise specified, all macroeconomic data is obtained from Instituto Brasileiro de Geografia e Estatística - IBGE, Fundação Getúlio Vargas - FGV and the Central Bank.

## **FORWARD-LOOKING STATEMENTS**

The statements contained in this annual report in relation to our plans, forecasts, expectations regarding future events, strategies, and projections, are forward-looking statements which involve risks and uncertainties and which are therefore not guarantees of future results. Forward-looking statements speak only as of the date they were made, and we undertake no obligation to update publicly or revise any forward-looking statements after we distribute this

**Table of Contents**

annual report because of new information, future events and other factors. Words such as believe, expect, may, will, plan, strategy, prospect, foresee, estimate, project, anticipate, can, intend and similar words are intended to identify forward-looking statements. We have made forward-looking statements which cover, among other things, our:

strategy for marketing and operational expansion;

capital expenditures forecasts; and

development of additional sources of revenue.

These forward-looking statements are subject to risks and uncertainties, which could mean that our actual results and performance could differ significantly from those anticipated and that anticipated events or circumstances might not occur. The risks and uncertainties include, but are not limited to:

general economic and business conditions, including the price of crude oil and other commodities, refining margins and prevailing foreign exchange rates;

competition;

ability to produce and deliver products on a timely basis;

ability to anticipate trends in the LPG industry, including changes in capacity and industry price movements;

changes in official regulations;

receipt of official authorizations and licenses;

political, economic and social events in Brazil;

access to sources of financing and our level of debt;

ability to integrate acquisitions;

regulatory issues relating to acquisitions;

availability of tax benefits; and

other factors contained in this 20-F under Item 3D. Risk Factors.

**ITEM 3. KEY INFORMATION****A. Selected Consolidated Financial Data**

We have selected the following consolidated financial data from our audited consolidated annual financial statements, for the periods indicated. You should read our selected financial data in conjunction with Item 5. Operating and Financial Review and Prospects and our consolidated financial statements and notes to the consolidated financial statements included in this annual report.

Our consolidated financial statements are prepared in Brazilian *reais* in accordance with accounting practices adopted in Brazil, which differ in certain material respects from accounting principles generally accepted in the United States of America, or U.S. GAAP. See Note 24 to our consolidated financial statements for a summary of the differences between the accounting practices adopted in Brazil, and U.S. GAAP.

The following table presents our selected financial information at the dates and for each of the periods indicated in Brazilian GAAP, and U.S. GAAP where indicated. The consolidated balance sheet information as of December 31, 2006 and 2005 and the consolidated statements of income, cash flows, changes in financial position and changes in shareholders' equity for the years ended December 31, 2006, 2005 and 2004 are derived from our audited consolidated financial statements included in this annual report. The consolidated balance sheet information as of December 31, 2004, 2003 and 2002 and the related consolidated statements of income, cash flows, changes in financial position and changes in shareholders' equity for the years ended December 31, 2003 and 2002 are derived from our audited consolidated financial statements that are not included in this annual report.

- (1) The *real* amounts for December 31, 2006 have been converted into dollars using the exchange rate of US\$1.00 = R\$2.138, which is the commercial rate reported by the Central Bank on this date. This information is presented solely for the convenience of the reader. You should not interpret the currency conversions in this annual report as a statement that the amounts in *reais* currently represent such values in U.S. dollars. Additionally, you should not interpret such conversions as statements that the amounts in *reais* have been, could have been or could be converted into U.S. dollars at this or any other foreign exchange rates. See Item 3A. Selected Consolidated Financial Data Exchange Rates.
- (2) Net earnings per share are calculated on the weighted average shares outstanding during each of the periods presented. Under Brazilian GAAP, net earnings per share are not retroactively adjusted for the stock dividend but are retroactively adjusted for the reverse stock split described under Item 4.B. Information on the Company Business Overview.
- (3) See Item 8.A. Consolidated Statements and Other Financial Information Dividend and Distribution Policy for information regarding declaration and payment of dividends. Dividends per share do not reflect any adjustments related to the stock dividend described under Item 4.B. Information on the Company Business Overview.
- (4) Cash flow information has been derived from our consolidated financial statements prepared in accordance with Brazilian GAAP.
- (5) See Note 24(V)(g) to our consolidated financial statements.
- (6) Represents depreciation and amortization expenses included in cost of sales and services and in selling, general and administrative expenses.
- (7) The inclusion of adjusted EBITDA information is to provide a measure of assessing our ability to generate cash from our operations. Adjusted EBITDA is equal to operating income before financial items plus depreciation and amortization. In managing our business we rely on adjusted EBITDA as a means of assessing our operating performance and a portion of our management's compensation and employee profit sharing plan is linked to adjusted EBITDA performance. Because adjusted EBITDA excludes non-operating expenses (income), interest, income taxes, depreciation and amortization, it provides an indicator of general economic performance that is not affected by debt restructurings, fluctuations in interest rates or effective tax rates, or levels of non-operating expenses (income), depreciation and amortization. Accordingly, we believe that this type of measurement is useful for comparing general operating performance from period to period and making certain related management decisions. We also calculate adjusted EBITDA in connection with covenants related to some of our financings. We believe that adjusted EBITDA enhances the understanding of our financial performance and our ability to satisfy principal and interest obligations with respect to our indebtedness as well as to fund capital expenditures and working capital requirements. Adjusted EBITDA is not a measure of financial performance under U.S. GAAP or Brazilian GAAP. Adjusted EBITDA should not be considered in isolation, or as a substitute for net income, as a measure of operating performance, as a substitute for cash flows from operations or as a measure of liquidity. Adjusted EBITDA has material limitations that impair its value as a measure of a company's overall profitability since it does not address certain ongoing costs of our business that could significantly affect profitability such as financial expenses and income taxes, depreciation or capital expenditures and associated charges.

**Table of Contents**

The tables below provide a reconciliation of net income to adjusted EBITDA and of operating income before financial items to adjusted EBITDA for the years ended December 31, 2006, 2005, 2004, 2003 and 2002:

(8) Net cash (debt) is included in this document in order to provide the reader with information relating to our overall indebtedness and financial position. Net cash (debt) is not a measure of financial performance or liquidity under U.S. GAAP or Brazilian GAAP. In managing our business we rely on net cash (debt) as a means of assessing our financial condition. We believe that this type of measurement is useful for comparing our financial condition from period to period and making related management decisions. Net cash (debt) is also used in connection with covenants related to some of our financings. The table below provides a reconciliation of our consolidated balance sheet data to the net cash (debt) positions shown in the table, for the years ended December 2006, 2005, 2004, 2003 and 2002.

- (1) The *real* amounts for December 31, 2006 have been converted into dollars using the exchange rate of US\$1.00 = R\$2.138, which is the commercial rate reported by the Central Bank on this date. This information is presented solely for the convenience of the reader. You should not interpret the currency conversions in this annual report as a statement that the

**Table of Contents**

amounts in *reais* currently represent such values in U.S. dollars. Additionally, you should not interpret such conversions as statements that the amounts in *reais* have been, could have been or could be converted into U.S. dollars at this or any other foreign exchange rates. See Item 3A. Selected Consolidated Financial Data Exchange Rates.

- (2) Shareholders' equity as of December 31, 2005, 2004, 2003 and 2002 was retroactively adjusted to reflect changes in accounting policies as from January 2006. See Item 5A. Operating and Financial Review and Prospects Operating Results U.S. GAAP Reconciliation and Note 24 I(q) for a better understanding of these changes.

**Exchange Rates**

Before March 14, 2005, there were two principal foreign exchange markets in Brazil, in which notes were freely negotiated but could be strongly influenced by Central Bank intervention:

the commercial rate exchange market dedicated principally to trade and financial foreign exchange transactions such as the buying and selling of registered investments by foreign entities, the purchase or sale of shares, or the payment of dividends or interest with respect to shares; and

the floating rate exchange market that was generally used for transactions not conducted through the commercial foreign exchange market.

On March 4, 2005, the National Monetary Council enacted Resolution No. 3265, pursuant to which the commercial rate exchange market and the floating rate exchange market were unified in a sole exchange market, effective as of March 14, 2005. The new resolution allows, subject to certain procedures and specific regulatory provisions, the purchase and sale of foreign currency and the international transfer of *reais* by a person or legal entity, without limitation of the amount involved; provided, however, the legality of the transaction. Foreign currencies may only be purchased through financial institutions domiciled in Brazil authorized to operate in the exchange market.

Following the introduction of the *real* in 1994 and through 1998, the Central Bank maintained a band system exchange rate, under which the exchange rate between the *real* and the U.S. dollar would fluctuate within a pre-established moving band. In January 1999, due to market pressures, the Central Bank abolished the band system and allowed the *real*/U.S. dollar exchange rate to float freely. Since then, the exchange rate has been established by the market and has fluctuated considerably, reporting a maximum quotation of R\$3.955 per US\$ 1.00 on October 22, 2002. Since the liberalization of the exchange rate, the Central Bank has intervened occasionally to control unstable movements in the foreign exchange rate. It is not possible to predict whether the Central Bank will continue to let the *real* float freely or whether the *real* will remain at its present level. Accordingly, it is not possible to predict what impact the Brazilian government's exchange rate policies may have on us. The Brazilian government could impose a band system in the future or the *real* could devalue or appreciate substantially. See Item 3.D. Key Information Risk factors Risks Relating to Brazil.

On May 31, 2007, the exchange rate for *reais* into U.S. dollars was R\$1.929 to US\$1.00, based on the commercial selling rate as reported by the Central Bank. The following table sets forth information on prevailing commercial foreign exchange selling rates for the periods indicated, as published by the Central Bank on its electronic information system, SISBACEN, using PTAX 800, Option 5.

| <b>Year Ended</b>  | <b>Exchange rates of nominal reais per US\$1.00</b> |            |                |                     |

Not applicable.

### **C. Reasons for the Offer and Use of Proceeds**

Not applicable.

### **D. Risk Factors**

*You should carefully consider the risks described below, as well as the other information contained in this annual report in evaluating an investment in our preferred shares or ADSs. Our business, results of operations or financial condition could be harmed if any of these materializes and, as a result, the trading price of the preferred shares or the ADSs could decline and you could lose a substantial part or even all of your investment.*

*We have included information in these risk factors concerning Brazil based on information that is publicly available.*

#### **Risks Relating to Ultrapar and Its Industry**

***Petrobras is effectively the only supplier of LPG in Brazil. LPG distributors in Brazil, including Ultragas, do not have formal contracts with Petrobras for the supply of LPG. Any interruption in the supply of LPG from Petrobras immediately affects Ultragas' ability to provide LPG to its customers.***

Prior to 1995, Petrobras held a constitutional monopoly for the production and importation of petroleum products in Brazil. Although the Brazilian government absolved Petrobras' monopoly in November 1995, Petrobras effectively remains the sole provider of LPG in Brazil. Currently, Ultragas and all other LPG distributors in Brazil purchase all or nearly all LPG from Petrobras. Ultragas' net sales and services represented 64.0% of our consolidated net sales and services for the year ended December 31, 2006. The last significant interruption in the supply of LPG by Petrobras to the distributors occurred in 1995, due to a 15-day strike by Petrobras employees. See Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Industry and Regulatory Overview. Furthermore, all Brazilian LPG distributors, including Ultragas, currently purchase all their LPG requirements from Petrobras without a formal LPG supply contract. The procedures for ordering and purchasing LPG from Petrobras are generally common to all LPG distributors including Ultragas. For more details, see Item 4.B. Information on the Company Business Overview Ultragas Supply of LPG.

Significant interruptions to LPG supplies from Petrobras may occur in the future. Any interruption in the supply of LPG from Petrobras immediately affects Ultragas' ability to provide LPG to its customers. If we are not able to obtain an adequate supply of LPG from Petrobras under acceptable terms, we may seek to meet our demands through LPG purchased on the international market. The cost of LPG on the international market is currently more expensive than the LPG we obtain through Petrobras.

**Table of Contents*****Intense competition in the LPG distribution market may affect our operating margins.***

The Brazilian LPG market is very competitive in all segments – residential, commercial and industrial. Petrobras, our supplier of LPG, and other major companies with greater resources than we possess have entered the Brazilian LPG distribution market. Intense competition in the LPG distribution market could lead to lower sales volumes and increased marketing expenses which may have a material adverse effect on our operating margins. See Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Industry and Regulatory Overview The role of Petrobras and Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Competition.

***LPG competes with alternative sources of energy. Competition with and the development of alternate sources of energy in the future may adversely affect the LPG market.***

LPG competes with natural gas, wood, diesel, fuel oil and electricity. Natural gas is currently the principal source of energy against which we compete. Natural gas is currently less expensive than LPG for industrial consumers who purchase large volumes, but more expensive for residential consumers. In addition, supply of natural gas requires significant investments in pipelines. The development of alternative sources of energy in the future may adversely affect the LPG market and consequently our business, financial results and results of operations. See Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Competition.

***Ethylene, the principal raw material used in our petrochemical operations, comes from limited supply sources. Any reduction in the supply of ethylene would have an immediate impact on Oxiteno's production and results of operation.***

All second generation petrochemical producers in Brazil that use ethylene as their key raw material, including Oxiteno, our subsidiary involved in the production and sale of chemical and petrochemical products, purchase ethylene from Brazilian suppliers. Approximately 25% of our net sales are derived from the sale of chemical products that require ethylene. Oxiteno purchases ethylene from two of Brazil's three naphtha crackers, which are the sole sources of ethylene in Brazil. Braskem S.A., or Braskem, supplies all of our ethylene requirements at our plant located at Camaçari pursuant to a long-term contract, and Petroquímica União S.A., or PQU, supplies all of our ethylene requirements at our plant located at Mauá. Oxiteno, like other purchasers from PQU, does not have a long-term contract for the purchase of ethylene from PQU. Because of its characteristics, ethylene is difficult and expensive to store and transport, and cannot be easily imported into Brazil. Therefore, Oxiteno is almost totally dependent on ethylene produced at Braskem and PQU for its supply of ethylene. For the year ended December 31, 2006, Brazilian ethylene imports totaled approximately 1.4 tons, representing less than 0.01% of Brazil's installed capacity.

Due to ethylene's chemical characteristics, Oxiteno does not store significant quantities of ethylene, and reductions in supply from Braskem and PQU would have an immediate impact on our production and results of operations. We are currently investing in the ethylene oxide production capacity expansion and we have agreed with Braskem and PQU the additional ethylene supply for this expansion. See Item 4.A. Information on the Company History and Development of the Company Investments. If we further expand our production capacity, there is no assurance that we will be able to obtain additional ethylene from Braskem and PQU. In addition, Petrobras is the principal supplier of naphtha to crackers in Brazil, and any interruption in the supply of naphtha from Petrobras to the crackers could adversely impact their ability to supply ethylene to Oxiteno.

***The Brazilian petrochemical industry is very closely influenced by the performance of the international petrochemical industry and its cyclical behavior.***

The international petrochemical market is cyclical in nature, with alternating periods of tight supply, increased prices and high margins, and overcapacity, declining prices and low margins. The decrease in Brazilian tariff rates on petrochemical products, the increase in demand for such products in Brazil, and the ongoing integration of regional and world markets for commodities, among other factors, have contributed to the increasing integration of the Brazilian petrochemical industry into the international petrochemical marketplace. As a consequence, events affecting the petrochemical industry worldwide could have a material adverse effect on our business, financial condition and results of operations.

---

**Table of Contents*****The price of ethylene is subject to fluctuations in international oil prices.***

The price of ethylene, which is the principal component of Oxiteno's cost of sales and services, is directly linked to the price of naphtha, which, in turn, is largely linked to the price of crude oil. Consequently, ethylene prices are subject to fluctuations in international oil prices. A significant increase in the price of crude oil and, consequently, naphtha and ethylene, could increase our costs, which could have a material adverse effect on our results of operations.

***The reduction in import tariffs on petrochemical products can reduce our competitiveness in relation to imported products.***

Final prices paid by importers of petrochemical products include import tariffs. Consequently, import tariffs imposed by the Brazilian government affect the prices we can charge for our products. The Brazilian government's negotiation of commercial and free trade agreements, principally with NAFTA, the European Union and Cooperation Council for the Arab States of the Gulf, may result in reductions in Brazilian import duties on petrochemical products, which generally range between 12% and 14%, and may reduce the competitiveness of our products vis-à-vis imported petrochemical products.

***We may be adversely affected by the imposition and enforcement of more stringent environmental laws and regulations.***

We are subject to stringent environmental laws and regulations in Brazil and Mexico. Petrochemical companies like ours are required to obtain licenses for their manufacturing facilities from environmental authorities which may also regulate their operations by prescribing specific environmental standards in their operating licenses. Environmental regulations apply particularly to the discharge, handling and disposal of gaseous, liquid and solid products and by-products from manufacturing activities. Changes in these laws and regulations or changes in the enforcement policy of these laws and regulations, could adversely affect us by increasing our cost of compliance or operation. In addition, it is possible that new laws or additional regulations will come into force, or that the relevant enforcement agencies will seek a more stringent interpretation of existing laws and regulations that would require us to spend additional funds on environmental matters in order to continue to keep our plants and operations in compliance with current legislation. See Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Industry and Regulatory Overview Environmental, health and safety standards, Item 4.B. Information on the Company Business Overview Petrochemicals and Chemicals Overview of the sector and applicable regulations Environmental, health and safety standards and Item 4.B. Information on the Company Business Overview Logistics of Chemical Products and Fuels Ultracargo Transportation Transportation Regulation.

***The production, storage and transportation of petrochemicals and chemicals are inherently hazardous.***

The complex manufacturing operations we perform at our plants involve a variety of safety and other operating risks, including the handling, production and transportation of highly inflammable, explosive and toxic materials. These risks could result in personal injury and loss of life, severe damage to or destruction of property and equipment and environmental damage. A sufficiently large accident at one of our plants or storage facilities could force us to suspend our operations temporarily and result in significant remediation costs and lost revenue. In addition, insurance proceeds may not be available on a timely basis and may be insufficient to cover all losses. Equipment breakdowns, natural disasters, and delays in obtaining imports or required replacement parts or equipment can also affect our manufacturing operations and consequently our results from operations.

***Our insurance coverage may be insufficient to cover losses that we might incur.***

The operation of any chemical manufacturing plant and the distribution of petrochemicals, as well as the operations of logistics of oil and chemical products and LPG distribution involve substantial risks of property

**Table of Contents**

contamination and personal injury and may result in material costs and liabilities. Although we believe that current insurance levels are adequate, the occurrence of losses or other liabilities that are not covered by insurance or that exceed the limits of our insurance coverage could result in significant unexpected additional costs.

***The suspension, cancellation or non-renewal of certain federal tax benefits may adversely affect our results of operations.***

We are entitled to federal tax benefits providing for income tax exemption or reduction for our activities in the northeast region of Brazil. These benefits may be cancelled or suspended if we do not comply with our commitment not to distribute to our shareholders the amounts under the benefits or if the relevant tax authorities decide to suspend or cancel our benefits. As a result, we may become liable for the payment of related taxes at the full tax rates. If we are not able to renew the tax benefits, or if we are only able to renew them under terms that are substantially less favorable than expected, our results of operations may be adversely affected. Tax exemptions amounted to R\$50.3 million, R\$63.8 million and R\$93.5 million, respectively, for the years ended December 31, 2006, 2005 and 2004. See Item 4.B. Information on the Company Business Overview Distribution of Liquefied Petroleum Gas Ultragas Tax exemption status, Item 4.B. Information on the Company Business Overview Petrochemicals and Chemicals Oxiteno Tax exemption status and Item 4.B. Information on the Company Business Overview Logistics of Chemical Products and Fuels Ultracargo Tax exemption status.

The federal tax authorities may decline to renew these benefits or may modify the terms upon which such renewals will be granted. The failure to renew such benefits on favorable terms could adversely affect our results of operations.

***We are currently controlled by members of our founding family and our senior management, which substantially limits the ability of other shareholders to control the direction of our business.***

Our senior management and the members of our founding family indirectly control approximately 66% of our voting share capital through their control of Ultra S.A. This level of control enables Ultra to elect the majority of our directors and to determine the outcome of substantially all actions requiring shareholder approval. See Item 7.A. Major Shareholders and Related Party Transactions Major Shareholders Shareholders Agreements.

***Our status as a holding company may limit our ability to pay dividends on the preferred shares and consequently, on the ADSs.***

As a holding company, we have no significant operating assets other than our ownership of shares of our subsidiaries. Substantially all of our operating income comes from our subsidiaries. Consequently, our ability to pay dividends depends solely upon our receipt of dividends and other cash flows from our subsidiaries.

**Risks Relating to the Target Operations, the Ipiranga Group and their Industry*****Petrobras is the main supplier of gasoline and diesel fuel in Brazil. Any interruption in the supply of gasoline or diesel fuel from Petrobras may adversely affect the Target Operations' ability to provide fuel to its customers.***

Prior to 1995, Petrobras held a constitutional monopoly for the production and importation of petroleum products in Brazil. Although the Brazilian government terminated Petrobras' monopoly in November 1995, Petrobras effectively remains the major provider of oil-based fuels in Brazil. Currently, the Target Operations and all other fuels distributors in Brazil purchase all or nearly all oil-based fuels from Petrobras. The last significant interruption in the supply of fuels from Petrobras to the distributors occurred in 1995, due to a 15-day strike by Petrobras employees. The procedures for ordering and purchasing fuels from Petrobras are generally common to all fuel distributors including the Target Operations.

Significant interruptions to fuel supplies from Petrobras may occur in the future. Any interruption in the supply of fuels from Petrobras immediately affects the Target Operations' ability to provide oil-based fuels to its customers. If we are not able to obtain an adequate supply of oil-based fuels from Petrobras under acceptable terms, we may seek to meet our demands through fuels purchased on the international market, which could be more expensive than the fuels we would obtain through Petrobras, which could adversely affect our results of operations.

## **Table of Contents**

### ***Anticompetitive Practices***

In the last few years, anticompetitive practices have been one of the main problems affecting fuel distributors in Brazil, including the Target Operations. Such practices on the part of certain distributors have caused a large supply of fuel products to be sold at prices lower than those offered by the major distributors, including the Target Operations, which has resulted in a considerable increase in the sales volumes of the distributors who have adopted these practices. The practices have involved, among other actions, tax evasion and the dilution of gasoline through the addition of solvents or an amount of anhydrous ethanol higher than that permitted under applicable laws. If these practices become more prevalent, the Company could suffer from a reduction in sales volume, consequently negatively impacting its earnings.

### ***Taxes***

Taxes constitute a significant portion of the cost of fuel sold in Brazil. For this reason, in the past, tax evasion on the part of fuel distributors has been prevalent, which contributed to a distortion of the prices charged by distributors which, in certain cases, were actually below their operational costs. In addition, the end prices of the products sold by distributors, including the Target Operations, are calculated based on, among other factors, the amount of taxes levied on the purchase and sale of these fuels. Should there be any increase in the taxes levied on fuel, it is not possible to guarantee that there will not be an increase in tax evasion on the part of market participants and, as a consequence, lower prices being charged by such participants that could increase competition and negatively affect our results of operations.

### ***Intense competition in the fuels distribution market may adversely affect the Target Operations' operating margins***

The Brazilian fuel market is highly competitive and other major companies with greater resources than we possess are present in the market. The Target Operations purchase a large portion of their products from suppliers who are also current or potential competitors. Intense competition in the fuels distribution market could lead to lower sales volumes and increased marketing expenses which may have a material adverse effect on our operating margins.

### ***Safety and Other Operational Risks***

The transport and storage of fuels, which are flammable, explosive and toxic, implies a series of safety risks as well as other operational risks. These activities can result in bodily injury or death, damage or destruction of installations or equipment, and environmental damage. An accident of sufficient size in the Target Companies' operations could force them to suspend or temporarily reduce their activities, resulting in significant cleanup or other costs and the loss of revenues. The Target Companies' insurance coverage may not be available on a timely basis, or may be insufficient to cover all losses incurred. The breakage of equipment, natural disasters and delays in the obtaining of replacement parts or replacement equipment could also affect the Target Companies' distribution processes, and as a consequence, our results of its operations.

### ***We may be adversely affected by the imposition and enforcement of more stringent environmental laws and regulations.***

The distribution of oil products is subject to extensive federal and state legislation and regulation by Brazilian governmental agencies responsible for the implementation of environmental and health laws and policies. Changes in these laws and regulations or changes in the enforcement policy of these laws and regulations, could adversely affect us by increasing our cost of compliance or operation. In addition, it is possible that new laws or additional regulations will come into force, or that the relevant enforcement agencies will seek a more stringent interpretation of existing laws and regulations that would require us to spend additional funds on environmental matters in order to continue to keep our plants and operations in compliance with current legislation.

## **Table of Contents**

### **Risks Relating to the Acquisition**

*The integration of Ultrapar and the Target Operations following the Acquisition may present significant challenges.*

There is a significant degree of difficulty and management distraction inherent in the process of integrating Ultrapar's businesses and the Target Operations. These difficulties include:

the need to consolidate organizations with headquarters located in different cities;

the challenge of integrating the business cultures of the Target Companies with that of Ultrapar; and

the need to retain key officers and personnel of the Target Companies.

The process of integrating operations could cause an interruption of, or loss of momentum in, the activities of one or more of Ultrapar and the Target Companies' businesses. Following completion of the Acquisition, Ultrapar's senior management team may be required to devote considerable amounts of time to this integration process, which will decrease the time they will have to manage the business of Ultrapar, service existing customers, attract new customers and develop new products or strategies. If Ultrapar's senior management is not able to effectively manage the integration process, or if any significant business activities are interrupted as a result of the integration process, Ultrapar's business could suffer. Ultrapar and the Target Companies cannot assure you that they will successfully or cost-effectively integrate the Target Companies and Ultrapar's existing businesses. The failure to do so could have a material adverse effect on Ultrapar's business, financial condition and results of operations following completion of the Acquisition.

*Regulatory agencies may delay or impose conditions on approval of the Acquisition, which may diminish the anticipated benefits of the Acquisition.*

The CVM, the Brazilian securities regulator, has authority over the Proposed Offers. The registration of the Mandatory Tender Offering defined below in Item 4.A. Information on the Company History and Development of the Company Recent Developments Acquisition of the Ipiranga Group is subject to CVM approval. Also, pursuant to CVM Rule nº 372 and article 124, paragraph 5 of Brazilian Corporate Law (Law n. 6,404/76, modified by Law n.10,303/2001), the CVM may delay the shareholders meetings duly called to approve the Share Exchange for up to 15 days, or increase the term to publish the first notice for the call of the general meeting of a publicly-held company by up to thirty (30) days, counted from the date in which the documents related to the matters to be resolved are made available to the shareholders in order to analyze the transaction and verify that it does not breach applicable laws or regulations. Although we believe that the Proposed Offers described in this annual report comply with applicable laws and regulations and provide equitable treatment to the shareholders of Ultrapar and the Target Companies, we cannot predict the outcome of any such analysis of the transaction by the CVM. See Item 4.A. Information on the Company History and Development of the Company Recent Developments Acquisition of the Ipiranga Group for additional information about the Proposed Offers.

While Ultrapar and the Target Companies intend to pursue vigorously all required governmental approvals and do not know of any reason why they would not be able to obtain the necessary approvals in a timely manner, the requirement that these approvals be given before all the steps of the Acquisition are consummated could delay the completion of the Proposed Offers and the Acquisition, possibly for a significant period of time after the Acquiring Companies have approved the Acquisition. In addition, these governmental agencies may attempt to condition their approval of the Proposed Offers and the Acquisition on the imposition of conditions that could have an adverse effect on Ultrapar's operating results or the value of Ultrapar's preferred stock. Any delay in the completion of the Acquisition could diminish anticipated benefits of the Acquisition or result in additional transaction costs, loss of revenue or other effects associated with uncertainty about the transaction.

## **Table of Contents**

*As a result of the Acquisition, Ultrapar will assume certain liabilities of the Target Companies and will assume all the risks relating to those liabilities.*

You should be aware that because Ultrapar will assume certain liabilities of the Target Companies as a result of the Acquisition, certain existing known or unknown financial obligations, legal liabilities or other contingent liabilities or risks of the Target Companies will become the responsibility of Ultrapar. See Item 5B. Operating and Financial Prospects Liquidity and Capital Resources Indebtedness for more information regarding the financial obligations to be assumed by Ultrapar in connection with the Acquisition. These liabilities could cause Ultrapar to be required to make payments, incur charges or take other actions that could adversely affect Ultrapar's financial position and results of operations and the price of Ultrapar's preferred shares.

### **Risks Relating to Brazil**

*The Brazilian government has exercised, and continues to exercise, significant influence over the Brazilian economy. Brazilian political and economic conditions could adversely affect our business and the market price of our preferred shares and the ADSs.*

The Brazilian government frequently intervenes in the Brazilian economy and occasionally makes drastic changes in policy and regulations. The Brazilian government's actions to control inflation and effect other policies and regulations have often involved wage and price controls, currency devaluations, capital controls, and limits on imports, among other measures. Our business, financial condition and results of operations may be adversely affected by changes in policy or regulations involving or affecting tariffs, exchange controls and other matters, as well as factors such as:

currency fluctuations;

inflation;

interest rates;

price instability;

energy shortages;

liquidity of domestic capital and lending markets;

fiscal policy; and

other political, diplomatic, social and economic developments in or affecting Brazil.

Uncertainty over whether the Brazilian government may implement changes in policy or regulation affecting these or other factors in the future may contribute to economic uncertainty in Brazil and to heightened volatility in the Brazilian securities markets and securities issued abroad by Brazilian issuers. These and other future developments in the Brazilian economy and governmental policies may adversely affect us and our business and results of operations and may adversely affect the trading price of the ADSs and our preferred shares.

**Table of Contents**

***Inflation and certain governmental measures to curb inflation may contribute significantly to economic uncertainty in Brazil and could harm our business and the market value of the ADSs and our preferred shares.***

Brazil has in the past experienced extremely high rates of inflation. Inflation and some of the Brazilian government's measures taken in an attempt to curb inflation have had significant negative effects on the Brazilian economy. Since the introduction of the *real* in 1994, Brazil's inflation rate has been substantially lower than in previous periods. However, inflationary pressures persist, and actions taken in an effort to curb inflation, coupled with speculation about possible future governmental actions, have contributed to economic uncertainty in Brazil and heightened volatility in the Brazilian securities market. According to the Índice Geral de Preços-Mercado, or IGP-M, a general price inflation index, the Brazilian general price inflation rates were 8.7%, 12.4%, 1.2% and 3.9% in 2003, 2004, 2005 and 2006, respectively.

Brazil may experience high levels of inflation in the future. Our cash operating expenses are substantially in *reais* and tend to increase with Brazilian inflation. Inflationary pressures may also hinder our ability to access foreign financial markets or may lead to further government intervention in the economy, including the introduction of government policies that could harm our business or adversely affect the market value of our preferred shares and, as a result, our ADSs.

***Exchange rate instability may adversely affect our financial condition and results of operations and the market price of the ADSs and our preferred shares.***

As a result of inflationary pressures, the Brazilian currency has been devalued periodically during the last four decades. Throughout this period, the Brazilian government has implemented various economic plans and utilized a number of exchange rate policies, including sudden devaluations, periodic mini-devaluations during which the frequency of adjustments has ranged from daily to monthly, floating exchange rate systems, exchange controls and dual exchange rate markets. Although over long periods depreciation of the Brazilian currency generally has correlated with the rate of inflation in Brazil, devaluation over shorter periods has resulted in significant fluctuations in the exchange rate between the Brazilian currency and the U.S. dollar and other currencies.

The *real* depreciated against the U.S. dollar by 18.7% in 2001. In 2002, the *real* depreciated 52.3% against the U.S. dollar, due in part to political uncertainty surrounding the Brazilian presidential elections and the global economic slowdown. Although the *real* has appreciated since then (18.2% in 2003, 8.1% in 2004, 11.8% in 2005, 8.7% in 2006 and an additional 4.9% from January to April 2007), no assurance can be given that the *real* will not depreciate or be devalued against the U.S. dollar again. See Item 3.A. Key Information Selected Consolidated Financial Data Exchange Rates.

There are no guarantees that the exchange rate between the *real* and the U.S. dollar will stabilize at current levels. Although we have managed our existing U.S. dollar debt obligations in order to protect against fluctuations in the dollar/*real* exchange rate, we could in the future experience monetary losses relating to these fluctuations. See Item 11. Quantitative and Qualitative Disclosures about Market Risk Foreign exchange risk for information about our foreign exchange risk hedging policy.

Depreciations of the *real* relative to the U.S. dollar also create additional inflationary pressures in Brazil that may negatively affect us. Depreciations generally curtail access to foreign financial markets and may prompt government intervention, including recessionary governmental policies. Depreciations also reduce the U.S. dollar value of distributions and dividends on the ADSs and the U.S. dollar equivalent of the market price of our preferred shares and, as a result, the ADSs. On the other hand, appreciation of the *real* against the U.S. dollar may lead to a deterioration of the country's current account and the balance of payments, as well as to a dampening of export-driven growth.

Although a large part of our sales is denominated in *reais*, prices and certain costs (particularly ethylene, purchased by our subsidiary Oxiteno) in the chemical business are benchmarked to prices prevailing in the international markets. Hence, we are exposed to foreign exchange rate risks that could materially adversely affect our business, financial condition and results of operations as well as our capacity to service our debt.

---

## **Table of Contents**

***Developments and the perception of risk in other countries, especially emerging market countries may adversely affect the results of our operations and the market price of the preferred shares and ADSs.***

The market value of securities of Brazilian companies is affected to varying degrees by economic and market conditions in other countries, including other Latin American and emerging market countries. Although economic conditions in such countries may differ significantly from economic conditions in Brazil, investors' reactions to developments in these other countries may have an adverse effect on the market value of securities of Brazilian issuers. Crises in other emerging market countries may diminish investor interest in securities of Brazilian issuers, including ours. This could also make it more difficult for us to access the capital markets and finance our operations in the future on acceptable terms or at all.

***United States investors may not be able to obtain jurisdiction over or enforce judgments against us.***

We are a company incorporated under the laws of the Federative Republic of Brazil. All members of our Board of Directors, executive officers and experts named in this annual report are residents of Brazil. All or a substantial part of the assets pertaining to these individuals and to Ultrapar are located outside the United States. As a result, it is possible that investors may not be able to obtain jurisdiction over these individuals or Ultrapar in the United States, or enforce judgments handed down by United States courts of law based on provisions for civil liability under federal law in relation to securities of the United States or otherwise.

### **Risks Relating to the Preferred Shares and the American Depositary Shares**

***The preferred shares and the ADSs generally do not give you voting rights.***

Generally under Brazilian corporate law and in the case of our bylaws, holders of preferred shares do not have the right to vote at shareholders meetings except in limited circumstances. This means, among other things, that holders of our preferred shares and our ADSs, which represent preferred shares, are not entitled to vote on important corporate transactions including mergers or consolidations with other companies. See Item 10.B. Additional Information – Memorandum and Bylaws.

***The preferred shares and ADSs do not entitle you to a fixed or minimum dividend.***

Under our bylaws, unless otherwise proposed by the Board of Directors and approved by the voting shareholders in the Annual General Meeting, we must pay our shareholders a mandatory distribution equal to at least 50% of our adjusted net income. The net income may be capitalized, used to set off losses and/or retained in accordance with the Brazilian corporate law and may not be available for the payment of dividends. Therefore, whether or not you receive a dividend depends on the amount of the mandatory distribution, if any, and whether the Board of Directors and the voting shareholders exercise their discretion to suspend these payments. See Item 8. Financial Information – Consolidated Statements and Other Financial Information – Dividend Policy for a more detailed discussion of mandatory distributions.

***You might be unable to exercise preemptive rights with respect to the preferred shares.***

In the event of a rights offering or a capital increase which would maintain or increase the proportion of capital represented by preferred shares, preferred shareholders would have preemptive rights to subscribe to newly issued preferred shares. In the event of a capital increase which would reduce the proportion of capital represented by preferred shares, preferred shareholders would have preemptive rights to subscribe for preferred shares in proportion to their shareholdings and for common shares only to the extent necessary to prevent dilution of their interest in the company.

Our bylaws establish that the Board of Directors may exclude preemptive rights to the current shareholders, holding either common or preferred shares, in the case of an offering of new shares to be sold on a registered stock exchange or through public subscription.

The holders of preferred shares or ADSs may be unable to exercise their preemptive rights in relation to the preferred shares represented by the ADSs, unless we file a registration statement pursuant to the United States

---

**Table of Contents**

Securities Act of 1933 or an exemption from the registration requirements applies. We are not obliged to file registration statements with respect to the preemptive rights and therefore do not assure holders that such a registration will be obtained. If the rights are not registered as required, the depositary will try to sell the preemptive rights held by holder of the ADSs and you will have the right to the net sale value, if any. However, the preemptive rights will expire without compensation to you should the depositary not succeed in selling them.

*If you exchange the ADSs for preferred shares, you risk losing certain foreign currency remittance and Brazilian tax advantages.*

The ADSs benefit from the depositary's certificate of foreign capital registration, which permits the depositary to convert dividends and other distributions with respect to the preferred shares into foreign currency and remit the proceeds abroad. If you exchange your ADSs for preferred shares, you will be entitled to rely on the depositary's certificate of foreign capital registration for five business days from the date of exchange. Thereafter, you will not be able to remit abroad non-Brazilian currency unless you obtain your own certificate of foreign capital registration or you qualify under National Monetary Council Resolution 2,689, dated January 26, 2000, known as Resolution 2,689, which entitles certain investors to buy and sell shares on Brazilian stock exchanges without obtaining separate certificates of registration. If you do not qualify under Resolution 2,689, you will generally be subject to less favorable tax treatment on distributions with respect to the preferred shares. The depositary's certificate of registration or any certificate of foreign capital registration obtained by you may be affected by future legislative or regulatory changes, and additional Brazilian law restrictions applicable to your investment in the ADSs may be imposed in the future. For a more complete description of Brazilian tax regulations, see Item 10.E. Additional Information Taxation Brazilian Tax Consequences.

*The relative volatility and illiquidity of the Brazilian securities markets may adversely affect you.*

Investing in securities, such as the preferred shares or ADSs, of issuers from emerging market countries, including Brazil, involves a higher degree of risk than investing in securities of issuers from more developed countries. For the reasons above, investments involving risks relating to Brazil, such as investments in ADSs, are generally considered speculative in nature and are subject to certain economic and political risks, including but not limited to:

changes to the regulatory, tax, economic and political environment that may affect the ability of investors to receive payments, in whole or in part, in respect of their investments; and

restrictions on foreign investment and on repatriation of capital invested.

The Brazilian securities market is substantially smaller, less liquid, more concentrated and more volatile than major securities markets in the United States. This may limit your ability to sell the preferred shares underlying your ADSs at the price and time at which you wish to do so. The São Paulo Stock Exchange, known as BOVESPA, the only Brazilian stock exchange, had a market capitalization of approximately US\$723 billion as of December 31, 2006 and an average monthly trading volume of approximately US\$23.0 billion for 2006. In comparison, the New York Stock Exchange had a market capitalization of US\$25.0 trillion as of December 31, 2006 and an average monthly trading volume of approximately US\$1.4 trillion for 2006.

There is also a large concentration in the Brazilian securities market. The ten largest companies in terms of market capitalization represented approximately 51% of the aggregate market capitalization of the BOVESPA as of December 31, 2006. The top ten stocks in terms of trading volume accounted for approximately 46% of all shares traded on the BOVESPA in 2006. Ultrapar's average daily trading volume on both stock exchanges in 2006, 2005 and 2004 was R\$4.6 million, R\$5.5 million and R\$3.7 million, respectively.

---

**Table of Contents**

***Controls and restrictions on the remittance of foreign currency could negatively affect your ability to convert and remit dividends, distributions or the proceeds from the sale of our preferred shares, Ultrapar's capacity to make dividend payments to non-Brazilian investors and the market price of our preferred shares and ADSs.***

Brazilian law provides that whenever there is a serious imbalance in the Brazilian balance of payments, or reasons for believing that there will be a serious imbalance in the future, the Brazilian government can impose temporary restrictions on remittances of income on investments by non-Brazilian investors in Brazil. The probability that the Brazilian government might impose such restrictions is related to the level of the country's foreign currency reserves, the availability of currency in the foreign exchange markets on the maturity date of a payment, the amount of the Brazilian debt servicing requirement in relation to the economy as a whole, and the Brazilian policy towards the International Monetary Fund, among other factors. We are unable to give assurances that the Central Bank will not modify its policies or that the Brazilian government will not introduce restrictions or cause delays in payments by Brazilian entities of dividends relating to securities issued in the overseas capital markets up to the present. Such restrictions or delays could negatively affect your ability to convert and remit dividends, distributions or the proceeds from the sale of our preferred shares, Ultrapar's capacity to make dividend payments to non-Brazilian investors and the market price of our preferred shares and the ADSs.

***Changes in Brazilian tax laws may have an adverse impact on the taxes applicable to a disposition of our ADSs.***

According to Law No. 10,833, enacted on December 29, 2003, the disposition of assets located in Brazil by a non-resident to either a Brazilian resident or a non-resident is subject to taxation in Brazil, regardless of whether the disposition occurs outside or within Brazil. In the event that the disposition of assets is interpreted to include a disposition of our ADSs, this tax law could result in the imposition of withholding taxes on a disposition of our ADSs by a non-resident of Brazil to another non-resident of Brazil. Due to the fact that Law No. 10,833 has been enacted and no judicial guidance as to its application yet exists, we are unable to predict whether an interpretation applying such tax laws to dispositions of the ADSs between non-residents could ultimately prevail in the courts of Brazil.

***Substantial sales of our shares or our ADSs could cause the price of our preferred shares or our ADSs to decrease.***

Shareholders of Ultra S.A. Participações have the right to withdraw and convert common shares owned through Ultra S.A. Participações into our preferred shares as more fully described under Item 7.A. Major Shareholders and Related Party Transactions Major Shareholders Shareholders Agreements. Two other shareholders, who may freely sell their respective shares, hold a substantial portion of our remaining common shares. A sale of a significant number of shares could negatively affect the market value of the preferred shares and ADSs. The market price of our preferred shares and the ADSs could drop significantly if the holders of shares or the ADSs sell them or the market perceives that they intend to sell them.

***If we were treated as a passive foreign investment company, U.S. Holders of our preferred shares or our ADSs would be subject to disadvantageous rules under the U.S. tax laws.***

If we were characterized as a passive foreign investment company, or PFIC, in any year, U.S. holders of our preferred shares or our ADSs could be subject to unfavorable U.S. federal income tax treatment. Although we do not believe that we were a PFIC in 2006 and we do not expect to be a PFIC in the foreseeable future, there can be no assurance that our business and activities will not lead to PFIC status for us in the future. PFIC classification is a factual determination made annually and thus is subject to change. See Item 10.E. Additional Information Taxation U.S. Federal Income Tax Consequences for a description of the PFIC rules.

---

**Table of Contents**

**ITEM 4. INFORMATION ON THE COMPANY**

**A. History and Development of the Company**

Ultrapar Participações S.A., or Ultrapar, is a *sociedade anônima* incorporated under the laws of the Federative Republic of Brazil. We have a significant market presence in the business areas in which we operate. We are the leader in LPG distribution in Brazil through Ultragas with a 24% market share and one of the largest independent distributors in the world in terms of volume sold. We deliver LPG to an estimated 10 million households using our own vehicle fleet and also approximately 4,000 independent retailers. We are the largest producer of ethylene oxide and its principal derivatives in South America, with an extensive business in the domestic and international markets. Through Ultracargo, we are a leading provider of integrated logistics for special bulk cargo in Brazil. We offer integrated multimodal transportation, loading and unloading services and the management of third-party fleets. Our high-storage capacity, together with the strategic location of our assets, facilitates product movement along an integrated multimodal logistics system. With the acquisition of Ipiranga's fuel distribution business in the South and Southeast regions of Brazil we became the second largest Brazilian fuel distributor with approximately 15% market share. In 2006, we estimate that the Target Operations' net sales amounted to approximately R\$19 billion.

We were incorporated on December 20, 1953, with our origins going back to 1937, when Ernesto Igel founded Companhia Ultragas S.A and brought LPG to be used as cooking gas in Brazil using cylinders acquired from Companhia Zeppelin. The gas stove began to replace the traditional wood stove and, to a lesser degree, kerosene and coal, which dominated Brazilian kitchens at the time.

In 1966, Transultra Armazenamento e Transporte Especializado Ltda, or Transultra, was formed to satisfy the demand for high-quality transportation services and focused in the transportation of chemicals, petrochemicals and LPG. In 1978, Terminal Químico de Aratu - Tequimar, or Tequimar, was founded for the specific purpose of operating the storage business. Transultra and Tequimar are operating subsidiaries of Ultracargo.

We were also one of the pioneers in developing the Brazilian petrochemicals industry with the creation of Oxiteno in 1970, located in the Mauá petrochemical complex in São Paulo. In 1974, Oxiteno inaugurated its second industrial unit, in the Camaçari petrochemical complex in Bahia. In 1986, Oxiteno established its own research and development center in order to respond to specific customer needs.

In 1997, through Ultragas, we introduced UltraSystem - a small bulk distribution system - to commercial and industrial segments, and we started the process of geographical expansion through the construction of new LPG filling plants. We also concluded the expansion of capacity of Oxiteno's industrial unit in Camaçari Petrochemical Complex, in the state of Bahia.

On October 6, 1999, we concluded our Initial Public Offering of preferred shares, listing our shares on the São Paulo Stock Exchange (BOVESPA) and on the New York Stock Exchange (NYSE).

In 2000, Ultragas started the construction of four new filling plants, therefore covering the entire Brazilian territory. In August 2000, the first of the four new plants, located in Goiânia, in the state of Goiás, started operations. In 2001, Ultragas started two new plants: in Fortaleza, in the state of Ceará, and in Duque de Caxias, in the state of Rio de Janeiro. In 2002, the company started operations at the new plant in Betim, Minas Gerais.

On May 23, 2001, we acquired the 35% voting interest of Transultra that we did not yet own, from Petrobras Distribuidora S.A. We made this acquisition through our wholly owned subsidiary, Ultracargo, in an auction held at BOVESPA.

In March 2002, Oxiteno made a tender offer for the acquisition of the shares of its subsidiary Oxiteno Nordeste S.A. Indústria e Comércio, known as Oxiteno Nordeste. The tender offer was completed on April 16, 2002, through the acquisition of 93,871 shares of Oxiteno Nordeste by Oxiteno, representing approximately 73.3% of the shares held by minority shareholders. Oxiteno increased its share ownership from 97% to 98.9% for approximately R\$4.4 million.

**Table of Contents**

On December 20, 2002, we completed a corporate restructuring process which we began on October 15, 2002. The effects of the corporate restructuring were:

the merger of Gipóia Ltda, a company which held a 23% direct stake in Ultragas and was owned by Ultra S.A., into Ultrapar, increasing Ultrapar's ownership in Ultragas to 100% from 77% of total share capital. Ultrapar issued approximately 7.8 billion common shares in connection with this merger; and

the exchange of shares issued by Oxiteno for shares issued by Ultrapar, increasing Ultrapar's ownership in Oxiteno to 100% from 48% of total share capital. The holders of approximately 12 million of Oxiteno's shares elected to exchange their shares for shares in Ultrapar, triggering the issue of approximately 5.4 billion common shares and 3.4 billion preferred shares by Ultrapar. We paid R\$208.1 million representing approximately 13 million shares to Oxiteno's minority shareholders who exercised their statutory withdrawal rights.

The table below shows the effects of the corporate restructuring in our share capital:

|                                   | <b>Total capital</b>   |                |                  |                |
|-----------------------------------|------------------------|----------------|------------------|----------------|
|                                   | (in millions of reais) | Common shares  | Preferred shares | Total shares   |
| As of December 31, 2001           | 433.9                  | 37,984,012,500 | 15,015,987,500   | 53,000,000,000 |

In August 2003, Ultragas acquired Shell Gás, Royal Dutch/Shell N.V.'s LPG operations in Brazil, for a total consideration of R\$170.6 million. With the acquisition, Ultragas has become the Brazilian market leader in LPG, with a 24% share of the Brazilian market.

On December 4, 2003, we concluded the acquisition of the chemical business of the Berci Group (CANAMEX), a Mexican specialty chemicals company. CANAMEX has two plants in Mexico (Guadalajara and Coatzacoalcos). The acquisition amount was US\$10.25 million, without assuming any residual debt. In June 30, 2004, we acquired the operational assets of Rhodia Especialidades S.A. de C.V. in Mexico for US\$2.7 million. Both acquisitions had the target to establish a stronger presence in the Mexican petrochemical market and to create a production and distribution platform to the United States.

On May 18, 2004, at an Extraordinary General Meeting, the shareholders of Ultrapar approved the addition of tag-along rights to the company's bylaws, for all shareholders, at 100% of the offer price, which has improved a right that was already conceived through a shareholders agreement dated March 22, 2000.

On September 22, 2004, the shareholders of Ultra S.A., a holding company that controls Ultrapar, signed a shareholders agreement primarily aimed at maintaining the controlling shareholder block in Ultrapar.

Igel Participações S.A. and Avaré Participações S.A., former controlling shareholders of Ultra S.A., were dissolved on December 16, 2004, and their shareholders received shares in Ultra S.A. as reimbursement for their shares in the respective paid-up capital, in the same proportion and of the same share class as previously held by Igel and Avaré.

In December 2004, we invested R\$10.0 million to acquire a 7.3% interest in Companhia Ultragas from Nacional Investimentos S.A.

At our Board of Directors meeting held on February 2, 2005, our directors approved a stock dividend of 10,453,690,324 preferred shares of Ultrapar, or 15 shares for each 100 outstanding common or preferred shares as of February 16, 2005. As a result of the stock dividend, we have issued 10,453,690,324 new preferred shares to our shareholders through a capitalization of reserves. At an extraordinary shareholders meeting held on February 22, 2005, our shareholders approved the issuance of additional preferred shares of Ultrapar to permit certain

## **Table of Contents**

shareholders, including Ultra, to exchange common shares of Ultrapar held by them into preferred shares at a ratio of one common share for one preferred share. Common shares tendered for exchange into preferred shares were cancelled.

On April 8, 2005, we completed our first offering of unsecured debentures in the aggregate principal amount of R\$300 million with a term of three years, at a rate of 102.5% of CDI. Standard & Poor's assigned the company and its debentures its brAA+ corporate credit rating from its Brazil National Scale.

On April 28, 2005, we concluded a primary and secondary offering of our preferred shares. The offering was constituted of 7,869,671,318 preferred shares owned by Monteiro Aranha S.A. and certain shareholders of Ultra S.A., and 1,180,450,697 newly issued preferred shares pursuant to an over-allotment option. Shares were distributed at a price of R\$40.00 per thousand preferred shares, totaling approximately R\$362 million. At the end of the distribution, Ultrapar's total capital increased by R\$47 million, to a total of approximately R\$946 million, and there were 81,325,409,849 total shares outstanding, with 49,429,897,261 common shares and 31,895,512,588 preferred shares.

At a special meeting of our shareholders held on July 20, 2005, our shareholders approved a reverse stock split of all our issued common and preferred shares. As a result, each 1,000 shares of any class would be converted into one share of each such class. In connection with this reverse stock split, we authorized a change to the ADS ratio of our ADR program from one ADS representing 1,000 preferred shares to one ADS representing one preferred share. This reverse stock split and ratio change became effective on August 23, 2005. As a result of the reverse stock split, we have amended our bylaws. As of April 30, 2006, we had 81,325,409 shares outstanding, with 49,429,897 common shares and 31,895,512 preferred shares.

In July 2005, Ultracargo inaugurated a new terminal in Santos, its second port installation that integrates road, rail and maritime transportation systems. The new terminal has a storage capacity of 33,500 m<sup>3</sup> for chemical products, 40,000 m<sup>3</sup> for ethanol and 38,000 m<sup>3</sup> for vegetable oil.

On December 20, 2005, Ultrapar, through its subsidiary LPG International Inc., issued US\$250 million in notes in the international market, with the aim of lengthening the company's debt profile, financing possible acquisitions and other corporate purposes. The notes mature in December 2015, have a coupon of 7.25% per annum and were priced at 98.75% of par value, resulting in a yield of 7.429% per annum. Standard & Poor's assigned its BB+ credit rating on a global scale for the company and the securities issued. The credit rating is above the credit rating of Brazilian sovereign debt, and only one degree below that of investment grade.

In August 2006, Ultrapar announced the signing of a Memorandum of Understanding between its subsidiary Oxiteno Nordeste and Braskem, for a 265 thousand tons/year supply of ethylene, with a 15-year term. The 265 thousand tons/year volume of ethylene represents an addition of 68 thousand tons/year to the previous contractual amount, and will be fully available beginning in 2009. In 2007 and 2008, Oxiteno will have access to 13 thousand tons/year out of the total additional 68 thousand tons/year of ethylene. The newly agreed upon supply price will be indexed to ethylene prices in the international market and to the volume effectively purchased by Oxiteno. Ultrapar also announced its plans to expand its ethylene oxide and specialty chemicals production capacity at Oxiteno's plant located in Camaçari, Bahia.

In August 2006, Oxiteno's first commercial office in Buenos Ayres, Argentina - Oxiteno Argentina S.R.L. - was opened.

## **Recent Developments**

### ***Acquisition of the Ipiranga Group***

*Summary.* On March 19, 2007, Ultrapar, Petrobras and Braskem announced their intent to acquire the Ipiranga Group and that on March 18, 2007, Ultrapar had entered into, and Petrobras and Braskem had acknowledged, a Stock Purchase Agreement, the SPA, with the Key Shareholders of the principal companies comprising the Ipiranga Group, RPI, DPPI and CBPI. As discussed further below, in connection with the Acquisition, Ultrapar is acting on its own behalf and on behalf of Petrobras and Braskem pursuant to the Transaction Agreements. See Item 10C. Additional Information - Material Contracts.

**Table of Contents**

The Ipiranga Group is Brazil's second-largest fuel distributor, with a network of approximately 4,200 service stations and a 19% market share as of December 31, 2006. The Ipiranga Group also has a significant presence in the petrochemical market, with the production of 650 thousand tons of petrochemical resins a year. The Ipiranga Group conducts its fuel distribution business through CBPI and DPPI, its oil refining business through RPI and its petrochemical business through IQ and IPQ and a 29.5% interest in Copesul (with Braskem owning another 29.5%), which is Brazil's second-largest producer of petrochemicals. In 2006, the consolidated net revenues of the Ipiranga Group totaled R\$29 billion, with EBITDA of R\$1 billion and net income of R\$534 million.

To finance part of the Ipiranga Group Acquisition, on April 11, 2007, we completed our second offering of unsecured debentures in the aggregate principal amount of R\$889 million, in two series. The first series, in the aggregate amount of R\$675 million, was issued on April 11, 2007. The second series, in the aggregate amount of R\$214 million, will be issued on the financial settlement of the Mandatory Tender Offers for the shares of RPI, DPPI and CBPI. For more information see Item 4.A. Information on the Company History and Developments of the Company Recent Developments Acquisition of the Ipiranga Group Phases of the Acquisition. The debentures have a term of one year, and a coupon rate of 102.5% of CDI.

After the completion of the Acquisition, the businesses of the Ipiranga Group will be divided among Petrobras, Ultrapar and Braskem. Ultrapar will retain the fuel and lubricant distribution businesses located in the South and Southeast regions of Brazil; Petrobras will receive the fuel and lubricant distribution businesses located in the North, Northeast and Central West regions of Brazil; and Petrobras and Braskem will receive the petrochemical business, in the proportion of 60% for Braskem and 40% for Petrobras. RPI's oil refining business will be shared equally among Petrobras, Ultrapar and Braskem. Following the successful completion of the transactions, Ultrapar will become the second leading company in the fuel distribution business in Brazil, holding approximately 15% of the market, based on Ipiranga's management's estimates.

*Phases of the Acquisition.* The Acquisition is divided into five phases: (1) acquisition of the shares held by the Key Shareholders by Ultrapar; (2) mandatory tender offers (pursuant to tag along rights held by minority shareholders under Brazilian Corporate Law and CVM rules) for the acquisition of the remaining common shares of RPI, DPPI, CBPI and IPQ (Mandatory Tender Offers); (3) tender offer by Braskem for the delisting of Copesul's common shares from the BOVESPA (Public Tender Offer); (4) exchange of the remaining common and preferred shares of RPI, DPPI and CBPI for preferred shares of Ultrapar (Share Exchange Transactions); and (5) separation of the Target Companies' assets (Separation of Assets). The completion of the transaction is expected to occur in the fourth quarter of 2007.

Phase 1 Acquisition of the shares of the Key Shareholders. On April 18, 2007, pursuant to the SPA, Ultrapar acquired, from the Key Shareholders, shares issued by RPI, DPPI and CBPI, as described below. The total consideration paid for this acquisition was R\$2 billion, of which R\$0.7 billion was effectively paid by Ultrapar.

---

**Table of Contents**

Phase 2 Mandatory Tender Offers for the common shares of RPI, DPPI and CBPI. As a result of the change of control of RPI, DPPI and CBPI, under Art. 254-A of Law 6,404/76 and CVM Rule N° 361, Ultrapar filed on May 2, 2007 with the CVM, a request to register the Mandatory Tender Offers for approximately R\$0.7 billion, of which R\$0.2 billion will be paid by Ultrapar following reimbursements received from Petrobras and Braskem, calculated based on a per share price defined by laws and regulations regarding changes in control of 80% of the per share price paid to controlling shareholders for their common shares.

Under the same law and rule Braskem and Petrobras must also carry out a mandatory tender offer for the purchase of common shares held by the minority shareholders of IPQ, which is expected to be completed by July 31, 2007.

Phase 3 Public Tender Offer for the delisting of Copesul's common shares from the BOVESPA. In April 2007, Braskem filed a request with the CVM for the registration of the Public Tender Offer for the delisting of Copesul's common shares, under Art. 4, § 4, of Law 6,404/76 and CVM Rule No. 361.

Phase 4 Share Exchange Transactions. After the conclusion of the Mandatory Tender Offers, Ultrapar will carry out share exchange transactions, under Art. 252 of Law 6,404/76, in which it will exchange its preferred shares for the remaining outstanding common and preferred shares of RPI, DPPI and CBPI. Following the completion of the Share Exchange Transactions, RPI, DPPI and CBPI will become wholly owned subsidiaries of Ultrapar. Ultrapar expects to issue approximately 54 million shares to complete these Share Exchange Transactions. If any holder of the preferred and common shares issued by Ultrapar, RPI, DPPI and CBPI dissents from the Share Exchange Transaction, the shareholder will have the right to withdraw as a Ultrapar, RPI, DPPI or CBPI shareholder, as applicable. The shareholder rights relevant to the Share Exchange Transaction are described below:

Ultrapar Shares. Ultrapar's bylaws will be amended in order to reflect the increase in paid-in capital and the issuance of new preferred shares. The new preferred shares to be issued will confer to their holders the same rights and privileges that are available to Ultrapar's existing preferred shareholders. Ultrapar's preferred shares confer the right to receive the same price as that paid to Ultrapar's controlling shareholders in the event that a change of control transaction were to occur (constituting tag along rights of 100%).

Right of Withdrawal from Ultrapar. Under the terms of Art. 252, §2 of Law No. 6.404/76, the holders of the preferred and common shares issued by Ultrapar who dissent from the Share Exchange Transactions will have the right of withdrawal as Ultrapar shareholders. The amounts to be received for a dissenter's shares will be communicated in a timely manner to shareholders immediately following the public announcement discussed above.

Right of Withdrawal from the Target Companies. Under Art. 264, §3, of Law No. 6.404/76, the holders of common and preferred shares of RPI, DPPI and CBPI who dissent from the Share Exchange Transactions will have the right of withdrawal from such companies. The amounts to be paid for a dissenter's shares will be communicated in a timely manner to shareholders.

Phase 5 Separation of Assets. After the completion of the Share Exchange Transactions, Ultrapar will carry out the Separation of Assets, a series of corporate restructurings in order to divide the Ipiranga Group assets among itself, Petrobras and Braskem.

*Relationship between Ultrapar, Braskem and Petrobras.* Ultrapar is acting as a commission agent, under Articles 693 through 709 of the Brazilian Civil Code, for Petrobras and Braskem for the purpose of the acquisition of RPI and CBPI's petrochemical business, and for Petrobras for the acquisition of CBPI's Northern Distribution Business. The general conditions of the commission set forth in the Investment Agreement executed by Ultrapar, Petrobras and Braskem on March 19, 2007, which regulates the relationship between these companies during the Acquisition process and the other Transaction Agreements executed in connection with the Acquisition, are as follows:

Commission. Ultrapar is acting as a commission agent for Petrobras and Braskem, under Articles 693 through 709 of the Brazilian Civil Code. The object of the commission is (A) the acquisition by Ultrapar on behalf of Petrobras of the Northern Distribution

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

Business, as well as the acquisition, on behalf of Braskem and Petrobras, of the Petrochemical Business; and (B) the transfer to Braskem and Petrobras of the Petrochemical Business and to Petrobras of the Northern Distribution Business. Braskem and Petrobras shall pay Ultrapar a commission on the date of the transfer of the Northern Distribution Business and the Petrochemical Business in the amount of R\$5,000,000.00.

A-22

---

**Table of Contents**

Price to Be Paid for the Petrochemical Business. The price to be paid for the Petrochemical Business is R\$2.5 billion, and shall be paid by Braskem and Petrobras to Ultrapar in three installments, as follows: (a) a first installment of R\$0.7 billion paid by Braskem and R\$0.4 billion by Petrobras, (b) a second installment of R\$0.3 billion paid by Braskem and R\$0.2 billion by Petrobras and (c) a third installment of R\$0.6 billion paid by Braskem and R\$0.4 billion by Petrobras.

Price to Be Paid for the Northern Distribution Business. The price to be paid for the Northern Distribution Business is R\$1.1 billion, and shall be paid by Petrobras to Ultrapar in three installments, as follows: (a) a first installment of R\$0.3 billion, (b) a second installment of R\$0.1 billion and (c) a third installment of R\$0.7 billion.

Date of Asset Transfer. The Northern Distribution Business and the Petrochemical Business will be delivered after Ultrapar receives the three installments indicated above, which is expected to occur after the completion of the conditions regarding transfer of the assets.

Payment Dates. Braskem and Petrobras must pay Ultrapar each installment of the price of the Northern Distribution Business and the Petrochemical Business on the following dates, respectively: (a) April, 18, 2007, (b) the date of financial settlement by Ultrapar of the Mandatory Tender Offers and (c) the date of the effective transfer of the Northern Distribution Business to Petrobras and the Petrochemical Business to Braskem and Petrobras.

Guarantees. Ultrapar has pledged the following:

In favor of Braskem and Petrobras, in the proportions of 60% and 40%, respectively, all the common shares and 50% of the preferred shares issued by RPI and acquired from the Key Shareholders. The shares issued by RPI acquired in the Mandatory Tender Offers will also be pledged in favor of Braskem and Petrobras, in the same proportion. After the exchange offer for the shares of RPI, Ultrapar must ensure that the pledge of RPI's shares will be substituted by the pledge of IQ's shares.

In favor of Petrobras, 31% of the common shares of DPPI and 100% of the preferred shares issued by DPPI that were acquired from the Key Shareholders, as well as 100% of the common shares of CBPI acquired from the Key Shareholders. After the Mandatory Tender Offers, Ultrapar will pledge, in substitution for 1,482,751 common shares issued by DPPI, 3,013,903 common shares issued by CBPI that will be acquired, assuming that all the common shares issued by CBPI will be acquired in the Mandatory Tender Offers.

Transfer of the Assets. After the completion of the asset separation, Ultrapar shall transfer (A) the Petrochemical Business to Braskem, through the transfer of the common shares representing 60% of IQ's capital, and to Petrobras through the transfer of common shares representing 40% of IQ's capital and (B) the Northern Distribution Business, through the transfer to Petrobras of all the shares of the company spun-off from CBPI and then holding the Northern Distribution Business.

Delays or Justified Impediments to the Transfer of Assets. The commission is irrevocable; thus, in the event the transfer of the Northern Distribution Business and/or the Petrochemical Business (A) is in any way restricted or suspended, due to legal, judicial or administrative order, and remains restricted for a period of more than 120 days, or (B) has not occurred by April 18, 2008, an alternative reorganization will be implemented that, among other things, spins off CBPI, DPPI and RPI, in order to separate the Northern Distribution Business and the Petrochemical Business into the spun-off companies, the shares of these spun-off companies being subsequently transferred to Petrobras and Braskem, as applicable.

---

## **Table of Contents**

*Shareholders Agreement.* The parties to the SPA also entered into a Shareholders Agreement, whereby: (i) the distribution business other than the Northern Distribution Business will be controlled and managed by Ultrapar, (ii) the Petrochemical Business will be controlled and managed by Braskem and Petrobras, in the respective proportions of 60% and 40%, (iii) the Northern Distribution Business will be controlled and managed by Petrobras and (iv) the assets related to RPI's oil refinery business will be controlled and managed jointly by Petrobras, Ultrapar and Braskem.

### ***Operations Expansion in Mexico***

In April 2007, Ultrapar, through its subsidiary CANAMEX, entered into an agreement for the purchase of the sulfates and sulfonates operating assets of Unión Química S.A. de C.V., in San Juan del Río, Mexico. These assets include a plant with an installed production capacity of sulfates/sulfonates of 8,600 tons/year that serves mainly the cosmetics and detergents industries, with potential annual revenues of approximately US\$10.0 million. The investment for this acquisition totaled US\$4.0 million, without the assumption of any debt, and was financed entirely by CANAMEX in the local market.

### ***Acquisition of Petrolog***

In May, 2007, Ultracargo completed the acquisition of Petrolog Serviços e Armazéns Gerais Ltda for approximately R\$10.0 million. Petrolog is a provider of in-house logistics operations for management of finished products, packaging, inventories control, storage and dispatch to domestic and international markets. The acquired operations generated annual revenues of approximately R\$10.0 million in 2006.

### **Investments**

We have made substantial investments in our operations in the last five years. At Ultragaz, we have invested heavily in LPG small bulk delivery distribution (UltraSystem) and in the restructuring of our distribution logistics. We have also invested in the consolidation of our national coverage over the past years. Oxiteno has invested in increasing installed production capacity, mainly for specialty chemical production, in the modernization of its industrial plants and in the development of new products. Ultracargo has invested in storage facilities and in the truck fleet in response to strong demand for a better logistics infrastructure in Brazil, deregulation of the oil and oil products industry and the strong growth in the international trade of vegetable oils and alcohol. We have invested in information technology at all our businesses for integrating processes, improving the quality of information, increasing the response time in decision-making and improving our services.

We have also made several acquisitions to maintain our growth and to consolidate our position in the markets where we operate. In 2002, we acquired minority shareholders' interests in Oxiteno for R\$212.6 million. In 2003, we acquired the Brazilian LPG distribution operations of Royal Dutch/Shell N.V. The operations of Shell Gás have been fully integrated into our LPG distribution business. In addition, we entered the petrochemical production market in Mexico through the acquisition of CANAMEX, a specialty chemicals company, in December 2003, for \$10.3 million, and the acquisition of the operating assets of Rhodia Especialidades Mexico for US\$2.7 million in June 2004. In April 2007, we acquired the sulfates and sulfonates operating assets of Unión Química S.A. de C.V., in San Juan del Río, Mexico. These investments were motivated by our desire to establish a presence in the Mexican petrochemical market as a platform for production and distribution to supply the United States market, and to geographically diversify Oxiteno's production facilities.

In addition to the discussion below, see Item 4.A. Information on the Company History and Development Recent Developments for additional discussion of our investments.

**Table of Contents****Investments in Permanent Assets and Deferred Charges**

The following table shows our capital expenditures in permanent assets and deferred charges in the years indicated below:

| Disposals                                           | (20.7)                  | (12.0)       | (6.0)        |
| <b>Total capital expenditures, net of disposals</b> | <b>318.9</b>            | <b>218.7</b> | <b>267.7</b> |

(1) Includes expenditures related to maintenance of our headquarters, which is performed by our wholly owned subsidiary Imaven Imóveis e Agropecuária Ltda.

At Ultragaz, our investment strategy has been to expand small bulk delivery distribution, to consolidate our geographic coverage and to invest in the modernization of our assets. During the years ended December 31, 2006, 2005 and 2004, investments focused on expanding the small bulk market segment (UltraSystem), on fleet renewal and on the replacement of cylinders.

At Oxitenó, during the years ended December 31, 2006, 2005 and 2004, capital expenditures were largely focused on increasing installed production capacity of specialty chemicals, the modernization of industrial plants and the development of new products.

At Ultracargo, during previous years we have invested in expanding our storage facilities and truck fleet. For the years ended December 31, 2006, 2005 and 2004, Ultracargo's capital expenditures focused on the construction of Santos Intermodal Terminal, the expansion of the Suape Terminal, the Liquid Fuels Terminal in Montes Claros and fleet expansion.

Our investment plan for 2007 has a total budget of R\$546 million, R\$414 million to be invested in Oxitenó, R\$100 million in Ultragaz and R\$31 million in Ultracargo. Investments at Oxitenó constitute (i) the completion of the fatty alcohols plant, whose opening is scheduled for late 2007, (ii) expansion of the ethylene oxide production capacity a significant part of the expansion in the unit of Mauá and the start of expansion in Camaçari and (iii) expansion in the production capacity of specialty chemicals. At Ultragaz, in addition to the investments started in 2006, other investments will be made in information technology to support its distribution structure review program. At Ultracargo, investments will be allocated to the expansion of assets, particularly the Aratu terminal in Bahia, which will store palm kernel oil, the main raw material for Oxitenó's new fatty alcohols plant. Ultracargo will also continue to invest in information technology.

**Investment in fatty alcohols plant.** On February 16, 2005, we announced the investment in the construction of a fatty alcohols plant, through our subsidiary Oxitenó, with co-production of fatty acids and glycerin. The total investment is estimated to be US\$120 million, of which US\$34 million had been invested as of December 31, 2006. This plant will be a pioneer unit in Latin America for the production of fatty alcohols. Fatty alcohols are raw materials used in the production of specialty chemicals derived from ethylene oxide, widely used in personal care products and for various applications in domestic cleaning products, agrichemicals and textiles, among others. Fatty alcohols and its derivatives are currently imported and already widely used in Oxitenó's surfactant line. We are the largest consumer of fatty alcohols in Brazil and we estimate that 30% of the total volume produced by the new plant will be used by us. Total production capacity should amount to approximately 100,000 tons per year, considering the entire product line. Besides adding value to the existing surfactants product line, this new plant is expected to generate additional net sales of US\$80 million per year when running at full capacity. Oxitenó's fatty alcohols plant will use vegetable oils as feedstock, especially palm kernel oil. We expect that the plant will be operational in late 2007.

**Table of Contents**

**Other projects under study.** We have signed a protocol with Petróleo Brasileiro S.A., or Petrobras, to study the feasibility of a project to produce basic petrochemicals, including ethylene, from heavy oil. Currently, we purchase ethylene from Brazilian suppliers whose production is based on naphtha. We have hired Technip Italy Spa, an engineering company, to help us in the assessment of available technologies, optimization of the conceptual project and pilot tests. Together with our partner Petrobras, we have chosen to locate the project in the municipalities of Itaboraí and São Gonçalo, in Rio de Janeiro state. We have not made any commitments to invest in this project should it prove to be feasible and we can give no assurance that the project will prove feasible or, if so, that we will participate or make an investment in such project.

We are also analyzing the feasibility of building a bio-refinery to produce chemical products from renewable sources, in particular the use of ethanol as an alternative for the production of hydrogenated solvents and glycols.

**Equity Investments**

The table below shows our investments in shareholding stakes for the years ended December 31, 2006, 2005 and 2004:

|              | Year ended December 31, |      |             |
|--------------|-------------------------|------|-------------|
|              | 2006                    | 2005 | 2004        |
|              | (in millions of reais)  |      |             |
| Ultragaz     | 0.1                     |      | 10.3        |
| Oxíteno      | 0.1                     |      |             |
| Ultracargo   |                         |      |             |

**B. Business Overview**

Ultrapar is one of Brazil's largest corporate groups and a leader in the distribution of LPG, the production of chemicals, and the provision of integrated logistics services. Our wholly owned subsidiary, Ultragaz, is the largest LPG distributor in Brazil with a national market share of 24%. In the chemicals business, our wholly owned subsidiary, Oxíteno, is the largest producer of ethylene oxide and its principal derivatives in South America and a major producer of specialty chemicals. Through our wholly owned subsidiary, Ultracargo, we believe we are a leading provider of integrated road transport, storage and handling services for special bulk cargo. In April 2007, we acquired the controlling stake of Ipiranga Group. See Item 4.A. Information on the Company History and Development Recent Developments Acquisition of the Ipiranga Group. With the acquisition of the Ipiranga Group's fuel distribution business in the South and Southeast regions of Brazil we became the second largest Brazilian fuel distributor with approximately 15% market share. In 2006, we estimate that the Target Operations net sales amounted to approximately R\$19 billion.

The following chart simplifies our organizational structure as of December 31, 2006. For a more detailed information about our current organizational structure, see Item 4.C. Information on the Company Organizational Structure.

## **Table of Contents**

### **Our Strengths**

#### ***Leading market positions across businesses***

Ultragaz is the largest LPG distributor in Brazil. It has a national market share of 24% and is present in every state, excluding the north region, reaching approximately 10 million homes. For the year ended December 31, 2006, Ultragaz total volume sold reached 1.5 million tons of LPG.

Oxiteno is the sole producer of ethylene oxide and its principal derivatives in the Mercosur region and is also a major producer of specialty chemicals. Our chemical operations supply a broad range of market segments, particularly agricultural chemicals, food, cosmetics, leather, detergents, packaging for beverages, thread and polyester filaments, brake fluids, petroleum, paints and varnishes. For the year ended December 31, 2006, Oxiteno sold approximately 542 thousand tons of chemical products. In the Brazilian market for these products we compete principally with imports. Imports of ethylene glycol and methyl-ethyl-ketone, two of our most important products, represented approximately 24% and 7%, respectively, of the volumes sold in Brazil during the year ended December 31, 2006.

Ultracargo is one of the leading providers of integrated logistics for special bulk cargo, with 26% of Brazil's tank storage capacity for chemical products in 2006. Ultracargo accounts for approximately 70% of all tank capacity for liquids at the Aratu terminal in the State of Bahia, which serves South America's largest petrochemical complex.

#### ***Balanced business mix***

Our operations encompass the distribution of LPG, the production of ethylene oxide and its derivatives and the transportation and storage of chemicals and fuels. We believe our businesses provide us with increased financial capability and flexibility across the businesses in which we operate. Our balanced business mix makes us less vulnerable to economic fluctuations and allows us to pursue growth opportunities as they arise in any of our business segments.

#### ***Highly efficient LPG distribution network***

In addition to making direct sales of bottled LPG, Ultragaz is the only LPG distributor in Brazil with an exclusive network of independent dealers. This network constitutes approximately 4,000 dealers who represent Ultragaz. This has enabled Ultragaz to control the quality and productivity of its dealers leading to a strong brand name recognition associated with quality, safety and efficiency, and also allows frequent contact with its customers. In addition, Ultragaz was the first to introduce LPG small bulk delivery in Brazil, with lower distribution costs than bottled distribution, and over the years has built a strong client base.

#### ***Flexibility across the petrochemical cycle***

Oxiteno is the largest producer of ethylene oxide and its principal derivatives in South America. Approximately 97% of its ethylene oxide production is used internally in the production of ethylene oxide derivatives, which can be

## **Table of Contents**

classified in two groups: specialty and commodity chemicals. Oxiteno is a major producer of specialty chemicals, which are traditionally products with better margins and less exposure to petrochemical cycles than commodity chemicals.

### ***Cost-efficient operations***

Oxiteno's operations have a high degree of production efficiency derived from a scale similar to that of the largest producers in the world. Ultragaz has significant market presence in densely populated areas, which allows it to operate its filling plants and distribution system with a high level of capacity utilization and efficiency.

### ***Strong operational track record***

Our business has exhibited a solid operational track record. Our accumulated adjusted EBITDA for the last five years reached R\$2.8 billion, in spite of the overall macroeconomic volatility in Brazil during this same period. Our adjusted EBITDA is used to provide a measure of assessing the company's ability to generate cash from its operations. See Item 3A. Key Information Selected Consolidated Financial Data for more information about adjusted EBITDA. Our accumulated net earnings for the last five years reached R\$1.5 billion.

### ***Experienced management team***

We are led by a strong and experienced management team with a proven track record in the LPG, petrochemical and specialized logistics industries. Our senior management team possesses an average of 20 years of experience in the company and its subsidiaries, is a significant shareholder of Ultrapar and has a performance-linked remuneration based on an economic value-added model (EVA<sup>®</sup>).

### ***Alignment of shareholders' interests***

Our bylaws provide important rights that align the interests of all our shareholders, including our controlling shareholders, management shareholders and minority shareholders. If our controlling shareholders sell their controlling stake in our Company, our bylaws provide that holders of our preferred and common shares are entitled to sell their shares in a public tender offer at the same price and with the same payment terms as our controlling shareholders.

## **Our Strategy**

### ***Build on the strength of our LPG brand***

Our LPG distribution business has a high brand recognition associated with quality, safety and efficiency. We intend to reinforce this market perception by continuing to supply high-quality products and services and introducing new services and distribution channels.

### ***Maintain exclusivity in LPG distribution***

We intend to preserve our strong relationship with dealers by keeping their distribution exclusivity and avoiding geographic overlap. We plan to continue to invest in training our dealers, in order to maximize efficiency, further strengthen our relationships with them and promote the high standards of our distribution network. In parallel, we plan to increase our operational efficiency and productivity at Ultragaz.

### ***Continuously improve cost and capital efficiency in LPG distribution***

We plan to continue to invest in the cost and capital efficiency of our distribution system. Current initiatives include the enhanced discipline in capital allocation and a program to revise Ultragaz' distribution structure, both prompted by changing market conditions such as market stability and new sales channels.

**Table of Contents*****Expand capacity at Oxiteno***

We intend to continue to expand Oxiteno's production capacity ahead of demand in Brazil. As we expand, we plan to continue our efforts to apply the best global practices to Oxiteno's plants and production processes with a view to remain technologically competitive.

***Continue to enhance product mix at Oxiteno***

We plan to increase Oxiteno's capacity to produce a variety of value-added ethylene oxide derivatives in order to optimize its sales mix across petrochemical cycles. Oxiteno's investments in research and development have resulted in the introduction of 112 new applications for its products during the last three years. Oxiteno will continue to invest in research and development focused on developing new product applications to meet clients' needs. In addition, we intend to focus Oxiteno's sales on the domestic market, which allows us to have higher margins.

***Maintain financial strength***

We seek to maintain a sound financial position to allow us to pursue investment opportunities and enhance our shareholders' return on their investment in our Company. Our net cash position for the year ended December 31, 2006 was R\$121 million. Additionally, all foreign currency denominated debt is hedged until its maturity.

We have been consistently distributing dividends to our shareholders. During the last five years we have paid yearly dividends representing an average of approximately 41% of our net income.

***Continue to grow our businesses***

Our principal corporate objective is to enhance shareholder value and strengthen our market presence by growing our business. Historically, we have grown our business organically and through acquisitions and we intend to continue this strategy. In March 2007, we announced the acquisition of Ipiranga Group's fuels and lubricants business in the South and Southeast regions in Brazil, as well as one third of Ipiranga's oil refinery. To complement Ultrapar's growth strategy, we are also focused on expansion abroad, which we commenced with the acquisition of specialty chemicals producer CANAMEX in Mexico in 2003. In late 2006, we announced the intention to open commercial offices in Argentina, United States, Europe and Asia, in order to expand Oxiteno's presence in these regions' specialty chemicals market. We have also announced several investments in the expansion of our existing operations which will result in a 40% increase in our ethylene oxide production capacity. We constantly analyze acquisition opportunities in the segments in which we operate and in complementary segments that could add value to our company.

**Key Financial Information**

The table below sets forth certain financial information for us and our principal businesses:

|                            | 2006    | Year ended December 31, |         |         | 2002    |

**Distribution of Liquefied Petroleum Gas**

***Industry and Regulatory Overview***

LPG is a fuel derived from the oil and natural gas refining process. In Brazil, approximately 87% of local demand in 2006 was produced in local refineries and the remaining 13% was imported. LPG has the following primary uses in Brazil:

Bottled LPG used primarily by residential consumers for cooking; and

Bulk LPG used primarily for cooking and water heating in shopping malls, hotels, residential buildings, restaurants, laundries and hospitals.

**Table of Contents**

The following chart shows the process of LPG distribution:

Historically, bottled LPG has represented more than 70% of the LPG distributed in Brazil, and is primarily used for cooking. The use of LPG for domestic heating in Brazil is immaterial compared with its use in other developed and emerging countries, primarily because of Brazil's generally warm climate. Consequently, consumer seasonality throughout the year is significantly smaller. In addition, because LPG is not used to a significant extent for domestic heating in Brazil, overall consumption of LPG per capita is lower in Brazil compared to countries where domestic heating is a major element of LPG demand, making low distribution costs a major competitive differential in the market for Brazilian LPG.

Prior to 1990, extensive governmental regulation of the LPG industry essentially limited the use of LPG to domestic cooking. Since 1990, regulations have permitted the use of LPG for certain commercial and industrial uses, and the use of LPG has increased accordingly.

The primary international suppliers of LPG are major oil companies and independent producers of both natural gas liquids and oil. However, due to Petrobras' monopoly over the production and import of petroleum and petroleum products until the end of 2001, Petrobras is currently the sole de facto supplier of LPG in Brazil.

**Table of Contents**

Currently, the LPG distribution industry in Brazil consists of 16 LPG distribution companies or groups of companies, and is regulated by the National Oil Agency, or ANP, which reports to the Ministry of Mines and Energy. The LPG distribution industry includes purchasing LPG from Petrobras, filling LPG cylinders and bulk delivery trucks at filling stations, selling LPG to dealers and end users, controlling product quality and providing technical assistance to LPG consumers. See Item 4.B, Business's Overview The role of the ANP.

LPG produced by Petrobras, which represented approximately 87% of total LPG sold in Brazil in 2006, is transported in pipelines and by trucks from Petrobras' production and storage facilities to filling stations maintained by LPG distributors. The balance is imported by Petrobras into Brazil and stored in large storage facilities maintained by Petrobras. The imported LPG is then transported from the storage facilities by pipeline and truck to the LPG distributors' filling stations.

LPG can be delivered to end users either in cylinders or in bulk. The cylinders are filled in the LPG distributors' filling stations. Distribution of bottled LPG is conducted through the use of cylinders via two principal channels:

home delivery of LPG cylinders; and

the sale of LPG cylinders in retail stores and at filling stations.

In both cases, the cylinders are either delivered by the LPG distributors themselves or by independent dealers.

Bulk delivery is the principal delivery method to large volume consumers, such as residential buildings, hospitals, small- and medium-sized businesses and industries. In the case of bulk delivery, LPG is pumped directly into tanker trucks at filling stations, transported to customers and pumped into a bulk storage tank located at the customer's premises.

***The role of the Brazilian government.*** The Brazilian government historically regulated the sale and distribution of LPG in Brazil. The period from 1960 to 1990 was characterized by heavy governmental regulation, including price controls, regulation of the areas in which each LPG distributor could operate, regulation of the services offered by distributors and governmental quotas for the LPG sold by distributors, thus restricting the growth of larger LPG distributors. In 1990, the government started a deregulation process with the purpose of establishing a largely unregulated LPG market. This process included easing the requirements for the entry into the market of new distribution companies, reducing certain administrative burdens and removing restrictions on the areas in which distributors could conduct their business and on sales quotas. There are currently no restrictions on foreign ownership of LPG companies.

Since May 2001, distributors have been allowed to freely establish retail prices, which were previously set by the government. Until the end of 2001, the LPG refinery price, which is charged by Petrobras to all LPG distributors, was determined by the government and was the same for all LPG distributors in all regions of Brazil. Historically, refinery prices have been subsidized by the government. In January 2002, the government abolished subsidies to refinery prices and created a new tax system, the CIDE, which equalized the tax charges on the local market with the imported product in order to open up the market for LPG. Consequently, from January 2002, Petrobras started to freely price LPG in the domestic market, adopting the international price plus surcharges as its benchmark. However, the Petrobras price of LPG is still subject to government intervention when the government deems appropriate, such as occurred between August and October of 2002. Prices of LPG in *reais* have been unchanged since May 2003. In 2006, Petrobras' average refinery price was approximately US\$431 per ton compared with the average international price of US\$534 per ton.

***The role of Petrobras.*** Petrobras, Brazil's national oil and oil products company, had a legal monopoly in the exploration, production, refining, importing and transporting of crude oil and oil products in Brazil and Brazil's continental waters since its establishment in 1953. This monopoly was confirmed in Brazil's federal constitution enacted in 1988. As a result, Petrobras was historically the sole supplier in Brazil of oil and oil-related products, including naphtha and LPG.

## Table of Contents

In November 1995, Petrobras' monopoly was removed from the federal constitution by a constitutional amendment approved by the Brazilian Congress. According to this amendment, other state and private companies would be able to compete with Petrobras in virtually all fields in which Petrobras operated. This amendment was implemented through Law No. 9,478, dated August 6, 1997, which effectively allowed Petrobras' monopoly to continue for a maximum period of three years. Law No. 9,478 prescribed that the termination of Petrobras' monopoly would be accompanied by the deregulation of prices for oil, gas and oil products, and created a new regulatory agency, the ANP, to oversee oil-related activities. However, in practice, Petrobras still remains the sole LPG supplier in Brazil, even though there are no legal restrictions to the operation of other suppliers.

On June 25, 2004, Petrobras entered the LPG distribution market in Brazil through the acquisition of Agip do Brasil S.A. which had a market share of 21.8% for the year 2004. Agip's market share remained substantially unchanged in 2005 and 2006.

**The role of the ANP.** The ANP is responsible for the control, supervision and implementation of the government's oil and gas policies. The ANP regulates all aspects of the production, distribution and sale of oil and oil products in Brazil, product quality standards, and minimum storage capacities required to be maintained by distributors.

In order to operate in Brazil, an LPG distributor must be licensed with the ANP and must comply with certain minimum operating requirements, including:

maintenance of sufficient LPG storage capacity;

maintenance of an adequate quantity of LPG cylinders;

use of cylinders stamped with the distributor's own brand name;

possession of its own filling plant;

appropriate maintenance of LPG filling units;

distribution of LPG exclusively in areas where it can provide technical assistance to the consumer either directly or indirectly through an authorized dealer; and

full compliance with the Unified Suppliers Registration System – Sistema Único de Cadastramento Unificado de Fornecedores SICAF.

LPG distributors are required to provide the ANP with monthly reports showing their previous month's sales and the volume of LPG ordered from Petrobras for the next four months. The ANP limits the volume of LPG that may be ordered by each distributor based on the number of cylinders and infrastructure owned by the distributor. Based on the information provided by the distributors, Petrobras supplies the volume of LPG ordered, provided its production and imports of LPG are sufficient to meet the demand.

LPG distribution to the end consumer may be carried out directly by the LPG distribution companies or by independent dealers. Each LPG distributor must provide the ANP with information regarding its contracted independent dealers on a monthly basis. The construction of LPG filling plants and storage facilities is subject to the prior approval of the ANP, and filling plants and storage facilities may only begin operations after ANP inspection.

**The self-regulatory code.** In August 1996, most of the Brazilian LPG distributors, representing more than 90% of the market, cylinder manufacturers, LPG transportation companies and certain LPG retail stores, under the supervision of the Brazilian government, entered into a statement of intent regarding the establishment of a program for requalifying LPG cylinders (a process under which they undergo safety and

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

quality checks) and other safety procedures, known as the Self-Regulatory Code or Código de Auto-Regulamentação. See Ultragas Cylinder swapping centers and Ultragas Requalification of cylinders. Before the Self-Regulatory Code came into effect, certain LPG distributors, not including Ultragas, would fill cylinders stamped with another distributor's brand. This practice resulted in a low level of investment in new cylinders, giving rise to concerns regarding the safety of older cylinders. The Self-Regulatory Code provides, among other things, that:

each LPG distributor may only fill and sell cylinders that are stamped with its own trademark;

A-33

---

**Table of Contents**

each LPG distributor is responsible for the quality and safety control of its cylinders; and

each LPG distributor must maintain a sufficient number of cylinders to service its sales volume.

Under the Ministry of Mines and Energy Normative Ruling No. 334 of November 1, 1996, or Ruling 334, any party that defaults on its obligations under the Self-Regulatory Code will be subject to the legal penalties, ranging from payment of a fine and suspension of supply of LPG to such party to suspension of such party's LPG distribution operations.

Ruling 334 sets forth the following timetable for the implementation of the measures adopted under the Self-Regulatory Code:

the construction of at least 15 cylinder swapping centers, starting in November 1996 (See 4.B. Business Overview Distribution of Liquefied Petroleum Gas Ultragaz Cylinder swapping centers and 4.B. Business Overview Distribution of Liquefied Petroleum Gas Ultragaz Requalification of cylinders );

the filling of third-party cylinders to have ceased by October 1997;

by November 1, 2006, the requalification of 68.8 million cylinders manufactured up to 1991; and

by November 1, 2011, the requalification of 12.8 million cylinders manufactured between 1992 and 1996.

Ultragaz itself was required to requalify 13.8 million cylinders until November 2006 and an additional 1.3 million cylinders by November 2011. As of December 31, 2006, Ultragaz had already requalified 100% of these cylinders.

***Environmental, health and safety standards.*** LPG distributors are subject to Brazilian federal, state and local laws and regulations relating to the protection of the environment, public health and safety. The National Council of the Environment, or Conselho Nacional do Meio Ambiente CONAMA and the Ministry of Labor, or Ministério do Trabalho, are the primary environmental regulators of Ultragaz at the federal level.

Brazilian federal and state environmental laws and regulations require LPG distributors to obtain operating permits from the state environmental agencies and from the fire department. In order to obtain such permits, distributors must satisfy regulatory authorities that the operation, maintenance and reclaiming of facilities are in compliance with regulations and are not prejudicial to the environment. In addition, regulations establish standard procedures for transporting, delivering and storing LPG and for testing and requalification of LPG cylinders. Civil, administrative and criminal sanctions, including fines and the revocation of licenses, may apply to violations of environmental regulations. Under applicable law, distributors are strictly liable for environmental damages.

Distributors are also subject to federal, state and local laws and regulations that prescribe occupational health and safety standards. In accordance with such laws and regulations, it is mandatory for distributors to prepare reports on their occupational health and safety records on an annual basis to the local office of the Ministry of Labor in each of the states in which they operate. In addition, they are also subject to all federal, state and local governmental regulation and supervision generally applicable to companies doing business in Brazil, including labor laws, social security laws, and public health and consumer protection laws.

## Table of Contents

### *Ultragaz*

We distribute LPG through Ultragaz. Founded in 1937, we were the first LPG distributor in Brazil. At that time, Brazilians used wood stoves and, to a lesser extent, alcohol, kerosene and coal stoves. At present, Ultragaz is the leading company by sales volume in the Brazilian LPG market.

Ultragaz operates nationwide in the distribution of both bottled and bulk LPG, including the most highly populated states in Brazil, such as São Paulo, Rio de Janeiro and Bahia, and sells bottled LPG through its own retail stores and through independent dealers as well as its own truck fleet, which operates on a door-to-door basis. Bulk LPG is serviced through its own truck fleet.

In August 2003, Ultragaz acquired Shell Gás, Royal Dutch/Shell N.V.'s LPG operations in Brazil, for a total price of R\$170.6 million. Shell Gás had about a 4.5% market share in Brazilian LPG distribution, selling approximately 287,400 tons of LPG in 2002. With this acquisition, Ultragaz has become the Brazilian market leader in LPG with a 24% share of the Brazilian market at the date of the acquisition and has also improved its economies of scale for distribution and reduced its logistics cost.

Ultragaz has four operating subsidiaries:

Companhia Ultragaz S.A., or Cia. Ultragaz, the company that pioneered our LPG operations;

Bahiana Distribuidora de Gas Ltda., or Bahiana, which is a wholly owned subsidiary of Ultragaz;

SP Gás Distribuidora de Gás Ltda., acquired in August 2003, formerly known as Shell Gas; and

Utingás Armazenadora S.A., or Utingás, which was incorporated in 1967 when Ultragaz and other LPG distributors joined to construct LPG storage facilities based in the states of São Paulo and Paraná. Ultragaz currently controls 56% of the storage operations. See [Storage of LPG](#).

**Markets and marketing.** When Ultragaz began its operations, it served only the southeast region of Brazil. Currently, Ultragaz is present in all of Brazil's significant population centers, with the exception of the north region. Ultragaz provides this service through 16 filling plants in its principal operating areas.

Distribution of bottled LPG includes direct home delivery and retail stores, both carried out by Ultragaz or its dealership network using 13 kg ANP (National Oil Agency) approved cylinders. In the case of Ultragaz, the cylinders are painted blue, which we believe is an important element in recognizing the Ultragaz brand. Ultragaz's operating margins for bottled LPG vary from region to region and reflect market share and the distribution channel in the region.

Until recently, Ultragaz's sales strategy for bottled LPG delivery was to increase market share through geographical expansion as well as protecting and incrementing market participation in regions where it already operated. With the acquisition of Shell Gás, Ultragaz became the Brazilian market leader in LPG, and the focus of its strategy evolved to investing in the brand and protecting market share. The LPG bottled market in Brazil is a mature one and Ultragaz believes that growth in demand will be a function of an increasing number of households consuming the product as well as an increasing level of household income.

Distribution of bulk LPG is largely carried out through 190 kg storage tanks installed on its clients' premises. Since 1994, Ultragaz has been investing in small- and medium-sized bulk delivery facilities and in bob-tail trucks, known together as UltraSystem, which deliver LPG in bulk to commercial clients. Ultragaz's clients in the commercial sector include shopping centers, hotels, residential buildings, restaurants, laundries and hospitals. Ultragaz's trucks supply clients' stationary tanks using a system that is quick, safe and cost effective.

Ultragaz's industrial clients consist mostly of companies in the food, metallurgical, steel and ceramics industries that have large fixed tanks at their plants and consume monthly volumes in excess of 5 tons of LPG. These clients represent a very small portion of Ultragaz's sales volume since, in the case of large volume consumers, Ultragaz is competing with other highly competitive energy sources such as natural gas.

**Table of Contents**

Ultragaz supplies its bulk delivery clients on the basis of supply contracts with terms ranging from two to five years. This type of contract limits fluctuations in sales given that the installation of the tanks is carried out by Ultragaz, and any change in supplier would imply the client's reimbursing Ultragaz's investments. The contract also requires that any tank supplied by Ultragaz may only be filled with LPG delivered by the company. When the bulk delivery contract expires, it can be renegotiated or the tank is removed. Since the installation of the tank represents a significant investment for Ultragaz, it seeks to achieve a return on its investment within the term of the contract.

Ultragaz's strategy for bulk LPG distribution is to continue its process of product and service innovation and to increase the profile of its trademark. Ultragaz also has a team to identify the needs of each bulk LPG client and develop practical solutions for using LPG as an energy source.

The table below shows Ultragaz's sales of LPG to clients of bottled and bulk LPG:

| Client category                  | Year ended December 31, |                |                |
|----------------------------------|-------------------------|----------------|----------------|
|                                  | 2006                    | 2005           | 2004           |
|                                  | (in thousands of tons)  |                |                |
| Bottled LPG cylinder             |                         |                |                |
| Residential delivery by Ultragaz | 101.2                   | 137.6          | 178.8          |
| Ultragaz retail stores           | 3.5                     | 3.6            | 7.0            |
| Independent dealers(1)           | 949.6                   | 904.7          | 866.0          |
| <b>Total bottled LPG</b>         | <b>1,054.3</b>          | <b>1,045.8</b> | <b>1,051.8</b> |
| Total bulk LPG                   | 489.6                   | 484.9          | 496.7          |
| <b>Total tons delivered</b>      | <b>1,543.9</b>          | <b>1,530.7</b> | <b>1,548.5</b> |

(1) Includes residential deliveries and distribution through retailers' stores.

**Distribution infrastructure.** Ultragaz's distribution strategy includes having its own distribution infrastructure, since it believes proximity to customers is a significant factor in successful distribution and sales strategies. The services associated with Ultragaz's home deliveries strongly influence the ranking of the Ultragaz brand name in the bottled market. Ultragaz seeks to expand its home delivery services by having its delivery personnel provide safety recommendations to household customers and by scheduling deliveries on the same weekday in each covered area. For both bottled and bulk LPG, deliveries are made by employees wearing Ultragaz uniforms and driving vehicles with Ultragaz's logo.

Ultragaz delivers bottled LPG using a distribution network, which in 2006 included 84 company-owned retail stores, and approximately 4,000 independent dealers. In 2006, Ultragaz had a fleet of 661 vehicles for delivering gas cylinders to homes and commercial establishments.

Bottled sales capacity derives from the number of cylinders owned by Ultragaz and the number of cylinders owned by its independent dealers. Ultragaz estimates that as of December 31, 2006, there were some 20 million 13kg Ultragaz cylinders in the market.

**Independent dealers.** Ultragaz's independent distribution network ranges from large dealers, which carry out extensive home delivery, to single retail stores, which sell small quantities of LPG cylinders. Until the enactment of ANP Rule 297 on November 18, 2003, independent dealers needed only to be registered with ANP for the sale of LPG cylinders. No licenses were required except for those required by the fire department and the municipal authorities. Rule 297 established that the independent dealers must be registered with ANP and comply with a list of prerequisites contained in such rule, as well as those required by law for the storage of cylinders up to 90 kg. Also, each municipality sets forth its own safety regulations applicable to stores that sell LPG, including a minimum distance from certain locations, such as schools. For the year ended December 31, 2006, approximately 90% of Ultragaz's bottled LPG sales were made through independent dealers.

The agreements entered into between Ultragaz and independent dealers require the use of the Ultragaz brand and the display of the Ultragaz logo in the delivery vehicles and on the uniforms worn by delivery personnel. Proprietary rights in the trademark and logo are retained by Ultragaz and are duly registered with the National

## **Table of Contents**

Institute of Industrial Property (INPI Instituto Nacional de Propriedade Industrial). All contracted dealers are Ultragaz exclusive representatives. Under the terms of the respective contracts, each dealer agrees not to deliver non-Ultragaz LPG cylinders.

In order to strengthen the relationship with its network of independent dealers, Ultragaz has created Project SOMAR (Marketing Solutions Applied to Independent Dealers), as part of which it recommends changes to dealers operating procedures, helps to improve the efficiency of their operations and encourages their adoption of best practices. Ultragaz believes that improving the efficiency of independent dealers is a key factor in improving the profitability of the distribution chain of LPG.

***Distribution channels to bulk consumers.*** Large bulk distribution, classified by Ultragaz as consumption of more than five tons per month and constituted almost exclusively of industrial users, is made by tanker trucks that deliver the LPG directly to the storage tanks located at the customers premises. Small bulk distribution, classified by Ultragaz as consumption of between 0.5 and five tons per month and constituted of commercial users and smaller industrial users, is made primarily by bob-tail trucks, to enable delivery to be made to commercial users whose tanks are not readily accessible by traditional bulk delivery equipment. Ultragaz uses the UltraSystem trade name in connection with its small bulk distribution through bob-tail trucks. Ultragaz makes bulk sales directly to customers using its own fleet and transportation provided by Ultracargo and by third-party transportation companies.

***Payment terms.*** Ultragaz sales through its retail stores and through home delivery are made on a cash basis. Ultragaz sales to independent dealers and to industrial and commercial users have payment terms of 24 days on average.

***Cylinder swapping centers.*** Pursuant to the Self-Regulatory Code, the LPG distributors have established sixteen operating swapping centers to facilitate the return of third-party cylinders to the appropriate distributor. Under the Self-Regulatory Code, while LPG distributors may pick up any empty LPG cylinders tendered by customers in exchange for full LPG cylinders, whether or not such empty cylinders were put in circulation by that distributor, after October 1997, LPG distributors were not permitted to refill third-party cylinders. Accordingly, LPG distributors may deliver third-party cylinders to a swapping center where such cylinders may be exchanged for cylinders placed in circulation by such LPG distributor. The swapping centers currently charge a fee of R\$0.21 per exchanged LPG cylinder. In areas where only one LPG distributor has a sizable market share, it is customary to use the facilities of that distributor as an unofficial swapping center for which that distributor may charge an additional fee.

Prior to the establishment of the swapping centers, Ultragaz incurred significant costs associated with the return of its cylinders, as it did not follow the widespread industry practice of filling third-party cylinders. As the swapping centers costs are shared amongst LPG distributors, Ultragaz costs from the return of cylinders were significantly reduced when the swapping centers were created, but have since then increased due to Ultragaz geographic expansion.

***Requalification of cylinders.*** The useful life of a cylinder varies depending on a number of factors, the two most important of which are the extent to which the cylinder has been exposed to corrosion from the atmosphere and whether the cylinder has been damaged. The Self-Regulatory Code provides that all cylinders must be requalified after their first 15 years use, and every ten years thereafter. Each cylinder is visually inspected for damage and corrosion to determine if it can be requalified or if it should be discarded as scrap metal. In the case of cylinders which pass the quality and safety checks, several procedures are followed before the cylinders are stamped with the year of requalification and the next year in which they are due for requalification.

***Supply of LPG.*** Currently, Ultragaz and all other LPG distributors in Brazil purchase all or nearly all LPG from Petrobras without a formal LPG supply contract. The procedures for ordering and purchasing LPG from Petrobras are generally common to all LPG distributors, including Ultragaz, which basically consists of sending an estimate of our needs to Petrobras four months in advance and a more precise estimate of our needs one month in advance. There have been no significant interruptions in the supply of LPG by Petrobras to the distributors with the exception of an interruption in 1995 due to a 15-day strike by Petrobras employees.

**Table of Contents**

**Storage of LPG.** In 2006, Ultragas storage capacity was approximately 17,900 tons. Based on its 2006 average LPG sales, Ultragas could store approximately two days supply of LPG. Petrobras maintains approximately two days supply of LPG at its refineries and other facilities. Accordingly, any interruption in the production of LPG can result in shortages, such as the one that occurred during the Petrobras strike in 1995.

Ultragas stores its LPG in large tanks at each of its filling plants located throughout the regions in which it operates. Primary filling plants receive LPG directly from Petrobras by pipeline; secondary filling plants are supplied by truck; and satellite plants primarily hold LPG which is used to fill bob-tail trucks for small bulk distribution to customers that are not located near a primary or secondary filling plant in order to optimize the LPG distribution process. See Item 4D. Property, Plants and Equipment.

**Competition.** Ultragas main competitors are:

SHV Gas, formed by the merger of Minasgás S.A. and Supergasbrás S.A. and controlled by SHV Energy, a major multinational LPG distributor, which operates through its two separate brands, Minasgás and Supergasbrás ;

Liquigás, formerly controlled by ENI Group and acquired by Petrobras in June 2004, which has been operating in the Brazilian LPG distribution sector for more than 40 years; and

Butano, a domestic Brazilian LPG distributor which has been present in the market for more than 45 years.

The following table sets forth the market share of Ultragas and its competitors:

| LPG Distributor             | Year ended December 31, |               |               |
|-----------------------------|-------------------------|---------------|---------------|
|                             | 2006                    | 2005          | 2004          |
| Ultragas                    | 23.9%                   | 24.0%         | 24.1%         |
| SHV Gas (1)                 | 23.3%                   | 23.4%         | 20.5%         |
| Liquigás                    | 21.7%                   | 21.8%         | 21.8%         |
| Butano                      | 18.5%                   | 18.3%         | 18.7%         |
| Others                      | 12.6%                   | 12.5%         | 14.9%         |
| <b>Total tons delivered</b> | <b>100.0%</b>           | <b>100.0%</b> | <b>100.0%</b> |

(1) Proportional to SHV equity stakes in the operating companies. As of July 2004, SHV Gas owned 100% of its operating subsidiaries in Brazil.

Prior to 1990, the government specified the areas in which LPG distributors were permitted to operate and each LPG distributor was allocated a limit in its LPG sales for each Brazilian geographic region in which it operated. These limits impacted the growth of larger LPG distributors and limited competition among LPG distributors. These restrictions were removed as part of the deregulation process, resulting in a substantial increase in competition among domestic LPG distributors.

The bottled market for LPG is a mature market with relatively low consumption growth and thus competition is largely based upon attempts by LPG distributors to increase market share at the expense of their competitors. LPG distributors in the bottled market compete primarily on brand awareness and reliability of delivery and the service provided to customers. Ultragas believes that it is competitive in these aspects. Since per capita consumption is small, low distribution costs is the critical factor in dictating profitability. Therefore, LPG distributors largely compete on the basis of efficiencies in distribution and delivery as all LPG distributors currently purchase all of their LPG requirements from Petrobras, and as Petrobras refinery price charged to the distributors is the same to all LPG distributors. Ultragas principal markets, including the cities of São Paulo, Salvador and Curitiba, contain heavy concentrations of residential consumers and therefore distribution to this market can be carried out with great economies of scale resulting in lower distribution costs to Ultragas. Additionally, Ultragas enjoys low bulk LPG distribution costs through UltraSystem.

**Table of Contents**

In addition to competing with other LPG distributors, Ultragas competes with companies that offer alternative energy sources to LPG, mainly natural gas, and other sources such as wood, diesel, fuel oil and electricity. Natural gas is currently the principal source of energy against which we compete. Natural gas is currently less expensive than LPG for industrial consumers who purchase large volumes, but more expensive for residential consumers. In addition, supply of natural gas requires significant investments in pipelines. While fuel oil is less expensive than LPG, LPG has performance and environmental advantages over fuel oil in industrial use.

From January 2002, the LPG refinery price charged by Petrobras to its distributors was set at international market levels. This change has meant that domestic prices may be affected by the fluctuations in prices on the overseas market as well as foreign exchange rate variation. The *real* depreciation against the U.S. dollar increased the ex-refinery price of LPG by approximately 123% in 2002, resulting in a 5% decline in consumption in the Brazilian market in the same year. This increase in LPG prices during 2002 continued to impact sales volume in 2003, which together with the average loss in disposable incomes in Brazil, translated into a 6% decline. Ultragas posted a 5% growth in sales volumes during 2003, principally due to the acquisition of the LPG distribution business of Shell in Brazil in August 2003. Ignoring the additional volume from the acquisition of Shell Gás, Ultragas posted an approximately 4% decline in sales volume. For the year ended December 31, 2004, growth in the Brazilian economy, improvement in personal incomes among the population and the enhanced stability of the LPG price charged by Petrobras contributed to the increase of the LPG sales in the Brazilian market, which reported an increase of approximately 3% compared to 2003. For this period, Ultragas sales volume increased 14% compared to 2003, due to the acquisition of Shell Gás in August 2003 and growth in the LPG market. In the year ended December 31, 2005, the weaker performance of the Brazilian economy, driven by high interest rates, led to a 1% decline in both the LPG market and Ultragas sales. In 2006, the Brazilian LPG market grew by 1%, substantially as a result of the intensification by the Brazilian Government of social programs, which contributed to an increase in Brazilian income. Additionally, the nationalization of the natural gas reserves in Bolivia generated uncertainties related to the natural gas supply from Bolivia to Brazil.

The following graph shows LPG sales volume for the Brazilian market and Ultragas for the periods indicated:

Source: Sindigás

**Tax exemption status.** Pursuant to legislation which provides tax relief for industries located in the northeast region of Brazil, Ultragas benefits from an income tax exemption on operating income with respect to the filling plant at Suape, expiring in 2007, a 75% tax reduction at the Mataripe and Caucáia filling plants, expiring in 2013 and 2012, respectively, and a 25% reduction at the filling plants in Ilhéus and Aracaju, valid through 2008. Tax exemptions amounted to R\$8.8 million, R\$4.7 million and R\$7.3 million for the years ended December 31, 2006, 2005 and 2004, respectively. We cannot guarantee that there will be no amendments to the current tax legislation. For further information see Note 21(d) to our consolidated financial statements.

**Quality.** We were the first Brazilian LPG distributor to receive ISO (International Standards Organization) certification for excellence in quality management.

## **Table of Contents**

### **Petrochemicals and Chemicals**

#### ***Overview of the sector and applicable regulations***

The petrochemical industry transforms crude oil or natural gas into widely used consumer and industrial goods. The Brazilian petrochemical industry is generally divided in three sectors, depending on the stage of transformation of the petrochemical raw material. The companies that operate in these different stages are known as first, second and third generation companies.

***First generation companies.*** Brazil's first generation companies, which are referred to as crackers, break down or crack naphtha (a by-product of the oil refining process), their principal feedstock, into basic petrochemicals. In Brazil, the crackers supply their naphtha requirements from Petrobras and through imports. Currently, Petrobras is the major Brazilian producer of naphtha. The basic petrochemicals produced by the crackers include olefins, primarily ethylene, propylene and butadiene, and aromatics, such as benzene, toluene and xylenes. Braskem S.A, Companhia Petroquímica do Sul, known as Copesul, and Petroquímica União, known as PQU Brazil's three crackers sell these basic petrochemicals to second generation companies. The basic petrochemicals, which are in the form of either gases or liquids, are transported to the second generation companies through pipelines for further processing.

***Second generation companies.*** Second generation companies process the basic petrochemicals produced by the crackers to obtain intermediate petrochemicals, such as:

polyethylene, ethylene oxide, polystyrene and polyvinyl chloride, or PVC, each produced from ethylene;

polypropylene, oxo-alcohols and acrylonitrile, each produced from propylene;

styrene butadiene rubber, or SBR, and polybutadiene, each produced from butadiene;

caprolactam, produced from benzene; and

purified terephthalic acid, or PTA, produced from p-xylene.

In 2006, there were approximately 45 second generation companies operating in Brazil, including Oxiteno. The intermediate petrochemicals are produced in solid form (as plastic pellets or powders) and in liquid form and are transported through roads, railroads or by ship to third generation companies.

***Third generation companies.*** Third generation companies, known as transformers, purchase the intermediate petrochemicals from the second generation companies and transform them into final products, including:

polyester produced from PTA and ethylene glycol (ethylene glycols produced from ethylene oxide);

plastics produced from polyethylene, polypropylene and PVC;

elastomers produced from butadiene;

acrylic fibers produced from acrylonitrile; and

nylon produced from caprolactam.

Third generation companies produce a variety of consumer and industrial goods, including containers and packaging materials, such as bags, film and bottles, textiles, detergents and paints as well as automobile parts, toys and consumer electronic goods. There are over 6,000 third generation companies operating in Brazil.

***Petrochemical complexes.*** The production of first and second generation petrochemicals in Brazil centers around three complexes: the northeast complex, the São Paulo petrochemical complex and the southern petrochemical complex. Each complex has a single first generation producer or cracker and several second generation companies.

## **Table of Contents**

The northeast complex, located in the municipality of Camaçari in the state of Bahia, began operations in 1978. It consists of approximately 15 second generation companies, including Oxiteno, situated around Braskem. Braskem currently has an ethylene production capacity of 1.3 million tons per annum.

The São Paulo complex, at Capuava in the state of São Paulo, was created in 1972 and is the oldest petrochemical complex in Brazil. Its cracker, PQU, supplies first generation petrochemicals to 23 second generation companies including Oxiteno. PQU has an ethylene production capacity of 500,000 tons per annum.

The southern complex, located in the municipality of Triunfo in the state of Rio Grande do Sul, is based around the raw materials cracker, Copesul, and includes seven second generation companies. Copesul has an ethylene production capacity of 1.1 million tons per annum. Oxiteno does not purchase ethylene from Copesul. Oxiteno purchases C4 from Copesul, a raw material used in the production of Methyl-ethyl-ketone, or MEK.

In December 2005, RioPol, located in the state of Rio de Janeiro, started operations of its ethylene production plant based on natural gas. RioPol has an ethylene production capacity of 520,000 tons per year. All of RioPol's ethylene production is used in its own polyethylene production.

**Role of Petrobras.** Naphtha is the raw material used in Brazil for the production of basic petrochemicals such as ethylene and propylene. Petrobras is still the only producer and the most important naphtha supplier in Brazil, even though its legal monopoly ended in August 2000. See 4.B. Business Overview Distribution of Liquefied Petroleum Gas Industry and Regulatory Overview for a discussion of the termination of the Petrobras monopoly.

Naphtha prices have been freely negotiated since August 9, 2000.

**Environmental, health and safety standards.** Petrochemical companies are subject to Brazilian federal, state and local laws and regulations governing the protection of the environment. At the federal level the main regulators are CONAMA and the Ministry of Labor.

In accordance with environmental laws and regulations, petrochemical companies are required to obtain licenses for their manufacturing facilities from competent environmental authorities, which may also regulate its operations by prescribing specific environmental standards in its operating licenses. Petrochemical companies must satisfy regulatory authorities that the operation, maintenance, and reclaiming of facilities comply with regulations and do not cause damage to the environment.

Environmental regulations apply particularly to the discharge, handling and disposal of gaseous, liquid and solid products and by-products from manufacturing activities. Rules issued by CONAMA and by state authorities also prescribe preventive measures relating to environmental pollution and waste treatment requirements. In addition, the transportation, storage and supply of products are subject to specific standards designed to prevent spills, leakages and other accidents.

Historically, environmental regulations have imposed increasingly stricter standards, higher fines, and greater exposure to liability and increased operating costs and capital expenditures. In addition, civil, administrative and criminal sanctions, including fines and the revocation of licenses may apply to violations of environmental regulations. Under applicable law, Oxiteno is strictly liable for environmental damages.

Petrochemical companies are also subject to federal, state and local laws and regulations that establish occupational health and safety standards. In accordance with such laws and regulations, these companies are also required to report on their occupational, health and safety records on a yearly basis to the local office of the Ministry of Labor in each of the states in which they operate. They are also subject to all federal, state and local government regulation and supervision generally applicable to companies doing business in Brazil, including labor laws, social security laws, public health, consumer protection, securities laws and antitrust laws.

**Table of Contents**

***Oxiten***

We operate in the chemical sector through the second generation company, Oxiten, a wholly owned subsidiary of Ultrapar. Oxiten is the only Brazilian producer of ethylene oxide, ethylene glycols, ethanolamines, glycol ethers and methyl-ethyl-ketone. Oxiten is also a major producer of specialty chemicals. With the exception of a small plant in Venezuela, Oxiten is the only ethylene oxide producer in South America. Its products are used in a broad range of industrial sectors, such as polyester, packaging, paints, varnishes and cosmetics. During the year ended December 31, 2006, Oxiten sold approximately 542 thousand tons of chemical and petrochemical products.

Oxiten's strategic focus is to provide a broad coverage of the ethylene oxide and derivatives, maintaining a leading position in these markets that strengthens barriers to entry. Oxiten's strategy is to increase its specialty chemical production capacity and its geographic reach.

***Products and markets.*** Although a portion of Oxiten's products could be classified as either a commodity or a specialty chemical depending on the use of each product by our customer, for ease of understanding, Oxiten's products are here divided into two principal groups: (i) commodity chemicals, which are generally higher-volume products, with standard specifications, and (ii) specialty chemicals, which tend to be lower-volume products sold on the basis of chemical features and suitability to meet a particular end-use requirement. Oxiten's principal commodity chemicals are ethylene oxide, ethylene glycol and methyl-ethyl-ketone, or MEK. Oxiten's principal specialty chemicals include a wide variety of products that are used as surfactants, softeners, dispersants, emulsifiers and hydraulic fluids.

The following chart outlines the principal raw materials used by Oxiten and their intermediate and final products.

**Table of Contents**

*Commodity products.* The following are Oxiteno's principal commodity products and their principal uses and markets:

*Ethylene oxide.* Ethylene oxide is a colorless and highly flammable gas at room temperature and atmospheric pressure. Ethylene oxide is produced in a continuous production process by gaseous phase catalytic partial oxidation of ethylene by oxygen at high temperature and pressure. In 2006, Oxiteno used approximately 97% of its ethylene oxide production in the production of derivatives and sold the remaining 3% to other petrochemical companies.

A-43

**Table of Contents**

**Ethylene glycols.** The principal ethylene glycol produced by Oxiteno is mono-ethylene glycol, known as MEG. Oxiteno also produces di- and tri-ethylene glycol. Mono-ethylene glycol is a clear, non-flammable, non-volatile liquid at room temperature and atmospheric pressure. Ethylene glycols are produced in a continuous process from an ethylene oxide solution and principally sold to chemical companies for the manufacture of polyester fibers and polyethylene terephthalate, known as PET, with the remainder sold for use in the production of antifreeze, brake fluids, solvent and other chemicals.

**Methyl-ethyl-ketone.** Methyl-ethyl-ketone, or MEK, a clear, volatile, flammable liquid at room temperature and atmospheric pressure, is Oxiteno's principal commodity chemical not produced from ethylene oxide. MEK is used as a fast evaporation solvent for thinners, paints, lacquers and adhesives and also as an active solvent for several resins such as cellulosics, acrylics, polyesters, polyuretanics, PVC, neoprene and maleic.

**Specialty chemicals.** The following table sets forth Oxiteno's principal specialty chemical products and their principal uses and markets.

| Major Markets          | Specialty Chemicals                                                                                                                                                                                                                    | Examples of uses and effects                                                                                                                                                                                                   |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Detergents             | Alkylbenzene sulfonic acids, alkylsulfates, alkyl ether sulfates, ethoxylated alkylphenols, ethoxylated fatty alcohols, polyethyleneglycols, alkanolamides, betaines, sulphosuccinates, block copolymers EO/PO                         | Used in detergents, the specialty chemicals are added mainly to improve cleaning power and foaming and to reduce skin irritability.                                                                                            |
| Agricultural chemicals | Ethoxylated fatty amines, ethoxylated alkylphenols, alkyl ether sulfates, blends, naphthalene sulfonate, ethoxylated vegetable oil, copolymers EO/PO                                                                                   | Used as part of the composition of agricultural chemical defensives, such as herbicides. Increases their efficiency, by improving soil penetration and adherence of the products to plant surfaces.                            |
| Cosmetics              | Alkylsulfates, alkyl ether sulfates, betaines, ethoxylated fatty alcohols, polyethyleneglycols, alkanolamides, ethoxylated sorbitan esters, sorbitan fatty esters                                                                      | Used in cosmetics as moisturizers, detergents for foaming and residue removal, and reduction of eye irritation in shampoos.                                                                                                    |
| Foods                  | Sorbitan fatty esters, ethoxylated sorbitan esters, emulsifiers, stabilizers, dispersants                                                                                                                                              | Principally used as additives for breads and cakes, improving their texture and consistency, and as an emulsifier responsible for ice cream creaminess.                                                                        |
| Textiles               | Ethoxylated alkylphenols, ethoxylated fatty alcohols, ethoxylated vegetable oils, ethoxylated fatty amines, antistatic agents, lubricants, softeners, emulsifiers, antifoamers, mercerizing additives, humectants, low foam detergents | Used in the processing of textiles, improving spinning and weaving performance. Permits greater evenness in the mixing of fibers, dyeing, bleaching and improving the softness of the final cloth.                             |
| Leather                | Ethoxylated alkylphenols, polyethyleneglycols, naphthalenes, sulfonates                                                                                                                                                                | Applied from the beginning of the leather processing stage up to the finishing stage as an emulsifier, detergent, degreaser, dispersant, moistener, color penetrating agent and vulcanization additive (manufacture of soles). |
| Oil field chemicals    | Block copolymers EO/PO, condensed naphthalenes, sulphonates, sorbitan fatty esters                                                                                                                                                     | Used directly as hydraulic fluids in vehicles. Brake fluids guarantee brake system performance and safe braking. Cooling liquids help to cool the motor and maintain the correct operating temperature.                        |

**Domestic sales.** The Brazilian petrochemicals industry seeks to prioritize demand from the domestic market, where there is greater value added, although sales are also made to the overseas market. While Oxiteno sells the larger part of its commodities and specialty chemicals in Brazil, production capacity exceeds domestic market demand, with Oxiteno exporting surplus production to more than 40 countries in Asia, Latin America, Europe and North America. Oxiteno maintains production capacity above local demand for strategic reasons. For the years

**Table of Contents**

ended December 31, 2006, 2005 and 2004, 28%, 29% and 32% of Oxiteno's net sales, respectively, were from exports. For the years ended December 31, 2006, 2005 and 2004, 29%, 30% and 34% of Oxiteno's volume, respectively, were from exports.

In the Brazilian market, mono-ethylene glycol, or MEG, produced by Oxiteno, is sold mainly to chemical companies that manufacture polyester fiber, which is used to produce a variety of fabrics, and is also sold to producers of polyethylene terephthalate, or PET, which is a polymer used to make packaging, such as soft drink bottles. The polyester market constitutes the single most important market for Oxiteno's products representing approximately 21% of its sales in Brazil in 2006. The remainder of Oxiteno's domestic sales are made to roughly ten different industry segments, from chemical industries to cosmetics and leather.

The following table shows Oxiteno's domestic market sales volume by market segment for the period indicated:

| Market sector                | Year Ended December 31,   |              |              |
|------------------------------|---------------------------|--------------|--------------|
|                              | 2006                      | 2005(2)      | 2004(2)      |
|                              | (in thousand metric tons) |              |              |
| Polyester (fabrics and PET)  | 81.9                      | 94.8         | 83.0         |
| Paints and varnishes         | 24.7                      | 21.6         | 18.5         |
| Chemical industries          | 50.7                      | 43.1         | 44.3         |
| Detergents                   | 36.7                      | 30.3         | 25.1         |
| Hydraulic fluids             | 27.7                      | 28.4         | 26.1         |
| Agricultural chemical        | 47.2                      | 43.0         | 38.3         |
| Resins                       | 21.2                      | 16.6         | 20.6         |
| Cosmetics                    | 15.7                      | 16.3         | 13.8         |
| Leather                      | 11.0                      | 10.5         | 10.7         |
| Textiles                     | 6.0                       | 5.9          | 6.0          |
| Food                         | 3.3                       | 3.2          | 2.8          |
| Distributors                 | 43.7                      | 38.4         | 37.8         |
| Others (1)                   | 16.5                      | 13.2         | 14.5         |
| <b>Total domestic market</b> | <b>386.3</b>              | <b>365.3</b> | <b>341.4</b> |

(1) Includes catalysts, civil construction, pharmaceutical and veterinary product manufacturers.

(2) Figures in 2005 and 2004 were reclassified among the Distributor segment and other segments because some clients who were previously served by the Distributor segment increased their annual purchases and were thus reclassified into their own respective segments.

Many of Oxiteno's commodity product prices in the Brazilian market are set by reference to international contract prices in U.S. dollars, although the prices are denominated in *reais*. For specialty products, sales are individually negotiated and are generally not made pursuant to long-term written contracts. Specialty chemicals are designed to meet specific customer needs and are not easily substituted by imported products.

Accordingly, specialty chemicals have a higher value added and Oxiteno has more flexibility in pricing for these products.

**Sales outside Brazil.** Oxiteno's export sales are made principally to customers in Europe, in the Far East and in the Mercosur region. In Europe, Oxiteno exports principally to Belgium, Italy and Netherlands. In the Far East, Oxiteno exports principally to South Korea, China and Taiwan.

The following table sets forth Oxiteno's sales by volume for each geographic market served by Oxiteno in the periods indicated:

| Market                          | Year Ended December 31,                               |     |      |     |      |     |
|---------------------------------|-------------------------------------------------------|-----|------|-----|------|-----|
|                                 | 2006                                                  |     | 2005 |     | 2004 |     |
|                                 | (in thousand metric tons and percentage of the total) |     |      |     |      |     |
| Mercosur (not including Brazil) | 59.4                                                  | 38% | 62.7 | 39% | 72.8 | 41% |
| Remainder of Latin America      | 7.7                                                   | 5%  | 7.1  | 4%  | 6.5  | 4%  |
| NAFTA                           | 13.8                                                  | 9%  | 7.4  | 5%  | 8.5  | 5%  |
| Europe                          | 24.6                                                  | 16% | 23.2 | 14% | 11.0 | 6%  |
| Africa                          | 3.9                                                   | 2%  | 4.6  | 3%  | 6.0  | 3%  |

**Table of Contents**

---

(1) CANAMEX sales volume to the local market (Mexico) and exports.

Oxitenos exports a wide variety of chemical products including glycols, MEK, ethoxylated alkylphenols, glycol ether acetates, glycol ethers, ethanolamines, ethoxylated fatty amines and other ethoxylated products.

With the acquisition in December 2003 of CANAMEX, a Mexican specialty chemicals company, Oxitenos expects to establish a growing presence in the Mexican market for specialty chemicals and create a distribution platform for its product sales to the United States. CANAMEX has two production units, manufacturing principally ethoxylates, which were operating at 25% production capacity on the acquisition date due to serious financial difficulties being faced by CANAMEX. Currently, most of CANAMEX's sales are destined to the domestic Mexican market, largely for the food, agricultural, oil and textile segments. The remaining sales volume is exported, mainly to the United States.

For the year ended December 31, 2006, CANAMEX's sales volume of 28,461 tons was incorporated in Oxitenos's results.

In most cases, Oxitenos's sales prices for its commodity chemicals in the export markets are based on international contract prices rather than international spot prices. International contract prices are fixed by reference to published data regarding the price at which industry participants have sold the relevant product. In general, Oxitenos's operating margins on products sold in the international market are lower than operating margins for similar products sold in the domestic market. Nevertheless, Oxitenos deems it important to maintain a presence in international markets. Oxitenos intends to shift sales to the domestic market as local demand for its products increases, but will continue to export and will maintain its presence in the international market.

**Customers.** Oxitenos's most important customers for its commodity chemicals are chemical companies, surface coating producers and polyester producers. In turn, the customers for specialty chemicals constitute a variety of industrial and commercial enterprises including brake fluid distributors, agrochemical producers, manufacturers of food additives and manufacturers of detergents and cosmetics. Oxitenos believes that by distributing its products to a variety of markets it is able to protect itself, to a certain extent, from the effects of a decrease in economic activity in any particular market.

Oxitenos's principal customers in the domestic market include Mossi-Ghisolfi (formerly Rhodia Ster), which principally purchases ethylene glycols, Monsanto, which principally purchases ethanolamines, Clariant S.A., which principally purchases ethylene oxide and ethoxylated products, Industrias Gessy Lever Ltda (Unilever), which principally purchases surfactants, and Braskem S.A., which principally purchases ethylene glycol. In the international market, Oxitenos sells both to industrial customers, including Manufacturas de Fibras Sintéticas S.A. (Mafissa), Voridian Argentina S.R.L., Unilever de Argentina S.A. and Cognis S.A., as well as trading companies and other third-party distributors. Oxitenos's largest customer in the international market is Oxyde Chemicals, Inc., a major European trading company for glycol, which accounted for approximately 3% of Oxitenos's total revenues in 2006. In 2006, Oxitenos's ten largest customers accounted for 35% of its net sales. No single customer accounted for more than 10% of Oxitenos's net sales in such year.

---

**Table of Contents**

**Competition.** Oxiteno competes in the domestic market largely with imported products. Since 1990, it has had to operate in an increasingly competitive environment due to imports from international and transnational petrochemical industries. As imported products are mostly commodity chemicals, competition is based principally on price. Importers incur additional costs when selling their products in the Brazilian market, due to import tariffs which generally range between 12% and 14%, and additional freight charges. However, factors such as product quality, timely delivery, reliability of supply and technical service and support are also important competitive factors. Because it is a local producer, Oxiteno believes it has a particular competitive advantage over imports with regard to timely delivery and reliability of supply.

In the case of specialty chemicals, Oxiteno competes primarily with other Brazilian producers (which buy ethylene oxide from Oxiteno) and pricing is a less decisive competitive factor than with true commodity chemicals, while conformity with specifications, product performance and reliability of service are comparatively more important. Access to technology, technical assistance and research and development are important factors with regard to conformity to specifications and product performance, especially in the development of new products to meet customers needs. Oxiteno's strategy involves ensuring access to technology through its own research and development activity, licensing and joint ventures, if appropriate opportunities become available.

Oxiteno's principal competitors are Shell Brasil Ltda., Exxon Mobil Química Ltda., Dow Brasil S.A., Lyondell Química do Brasil Ltda., Cognis Brasil Ltda., Clariant S.A. and BASF S.A.

**Research and development.** Oxiteno carries on a wide range of research and development activities, principally related to the application of specialty chemicals and improvements in production processes. As of December 31, 2006, 126 employees of Oxiteno were engaged in research and development and engineering activities. Oxiteno's research and development expenditures in 2006, 2005 and 2004 were R\$18.4 million, R\$17.4 million and R\$15.4 million, respectively. In 2004, Oxiteno founded its own Science and Technology Council, with six of the world's major specialists in tensoactives being members. The Council, which first met from December 7 to 10, 2004 and again in September 2005 and October 2006, analyzes critically the company's research and development projects portfolio, as well as the methodology used. These recommendations enable the company to increase its efficiency in research and development, as well as enlarge its partnerships with international entities.

**Raw materials.** Oxiteno's principal raw material is ethylene. For the year ended December 31, 2006, ethylene was responsible for 50% of Oxiteno's variable costs of production and approximately 44% of its total cost of sales and services. Among Oxiteno's other raw materials, the principal include butenes, ethyl, butyl and lauryl alcohols, oxygen and acetic acid.

Supply of ethylene constitutes an entry barrier for new ethylene oxide producers in the country since the current production capacity of ethylene by Brazilian crackers is committed to existing second generation companies, including Oxiteno, and significant investments are needed for the construction of a new cracker. Ethylene is difficult and expensive to transport and store because it must be kept at a temperature below -200 degrees Fahrenheit (-100 degrees Celsius) during transportation and storage, therefore importing and exporting of ethylene is generally uneconomical. Accordingly, the naphtha crackers, including Braskem and PQU, are largely dependent for their sales upon the second generation petrochemical companies, such as Oxiteno, located in the respective petrochemical complexes. However, ethylene oxide derivatives are regularly imported by the major international petrochemical companies and by international and domestic trading companies.

**Ethylene supply.** Ethylene is used for the production of ethylene oxide at the Camaçari plant and the Mauá plant. Braskem and PQU supply all of Oxiteno's ethylene requirements for the Camaçari plant and Mauá plant, respectively, through pipelines, thus minimizing the costs of delivery of ethylene and helping to ensure the reliability of supply. See Item 4.B. Business Overview Petrochemicals and Chemicals Overview of the sector and applicable regulations.

In August 2006, Oxiteno signed a Memorandum of Understanding with Braskem amending the existing ethylene supply contract. According to this Memorandum of Understanding, Oxiteno is required to purchase at least 190,000 tons of ethylene per year, and Braskem is required to supply Oxiteno with up to 210,000 during 2007 and 2008. From 2009 to 2021, Braskem is required to supply Oxiteno with up to 265,000 tons of ethylene per year. Prior

**Table of Contents**

to the signing of this Memorandum of Understanding, Braskem was required to supply Oxiteno with up to 197,000 tons of ethylene per year. The newly agreed upon supply price is indexed to ethylene prices on international markets and on the volume purchased by Oxiteno.

In the case of ethylene supply from PQU, Oxiteno, like other purchasers from PQU, does not have a formal long-term contract relating to the volume or price of ethylene. However, PQU has made a formal commitment for the ethylene supply volume for Oxiteno.

Oxiteno does not maintain any significant storage of ethylene and any unexpected interruptions in supply from the crackers would have an immediate impact on Oxiteno's production. The last unexpected interruption in the ethylene supply was in 1993, due to a pipeline fire that affected the naphtha delivery from Petrobras to Braskem, which caused a shutdown in the naphtha cracking operations, resulting in a 14-day shutdown in the Camaçari plant's operations.

First generation petrochemical companies undergo scheduled maintenance stoppages. Oxiteno anticipates these stoppages by building up inventory. Oxiteno also uses these planned stoppages for regular maintenance work on its own plants or eventual substitution of catalysts or for expansion of installed capacity. Braskem's last scheduled downtime was in January 2004 and there were no problems in the re-start.

*Price of ethylene.* The price of ethylene supplied by Braskem to Oxiteno for the production of goods to be sold in Brazil is indexed to ethylene prices on international markets as from August 2006. Until July 2006, the price of ethylene supplied by Braskem was determined by a margin sharing mechanism established in March 1997. Prior to March 1997, the price of ethylene was negotiated between Braskem and its ethylene customers on a monthly basis.

The following table shows the listed prices provided by Braskem and PQU for ethylene per metric ton for the periods indicated (period averages, except for maximum and minimum prices):

|                       | <b>Braskem</b>   | <b>PQU</b> |
|-----------------------|------------------|------------|
|                       | <b>(R\$/ton)</b> |            |
| <b>2006</b>           |                  |            |
| First Quarter         | 2,502.33         | 2,614.00   |
| Second Quarter        | 2,479.67         | 2,666.67   |
| Third Quarter         | 2,703.05         | 2,820.00   |
| Fourth Quarter        | 2,688.65         | 2,823.33   |

## **Table of Contents**

As naphtha is the main raw material for the production of ethylene in Brazil, fluctuations in the price of naphtha strongly influence fluctuations in the price of ethylene. Because the main determinant of the price of naphtha is the price of crude oil, the price of naphtha, and thus ethylene, is subject to fluctuations based on changes in the international oil price. The increases in the price of ethylene could affect Oxiteno's competitiveness in the petrochemical market. See Item 3.D. Key Information Risk Factors Risks Relating to Ultrapar and Its Industry.

*Other raw materials.* For the year ended December 31, 2006, other raw materials, principally oxygen, lauryl alcohol, ethanol, C4, butyl alcohol, acetic acid, nonene, phenol, primary fatty amine, fuel oil and LAB accounted for approximately 30% of Oxiteno's variable costs and 26% of its total costs of sales and services.

Oxiteno generally obtains these other raw materials from a variety of sources, except for phenol, which Oxiteno purchases principally from a single supplier, Rhodia Poliamida Especialidades Ltda., and for C4, which is supplied by Copesul.

*Utilities.* Steam, electric power and natural gas are the main utilities required for Oxiteno's production. Part of the electricity and steam used by Oxiteno is generated internally and part is purchased from electricity companies and third-party suppliers of steam in the regions where Oxiteno's plants are located. Natural gas is purchased from local companies.

*Tax exemption status.* Pursuant to legislation that provides tax relief for industries located in the northeast region of Brazil, Oxiteno benefited from an income tax exemption on operating profits from sales of its products at the Camaçari plant through 2006. In December 2006, the Camaçari plant's tax exemption expired and a request was filed with ADENE (Northeast Development Agency), the agency in charge of managing this incentive program, seeking a 75% income tax reduction until 2016. The income tax reduction was approved by ADENE in May 2007, and Oxiteno is waiting for the ruling of the Brazilian Tax Authorities, which has 120 days to make it. After this period, we expect to record the value of the reduction in its financial statements retroactively to January 01, 2007. Tax exemptions amounted to R\$40.5 million, R\$56.0 million and R\$81.9 million for the years ended December 31, 2006, 2005 and 2004, respectively. We cannot guarantee that there will be no amendments to the current tax legislation. For further information see Note 21(d) to our consolidated financial statements.

*Maintenance and quality control.* Oxiteno carries out a program of preventive maintenance at each of its plants and uses statistical analysis to help predict production problems. The stoppages due to the maintenance program take place at the same time as the stoppages for the change of the ethylene oxide catalyst. In the case of the ethylene oxide and ethylene glycol units at the Mauá and Camaçari plants, which have continuous production processes, maintenance is preferably scheduled for periods when the relevant cracker, which supplies ethylene to the plant, is scheduled to be shut down for maintenance. Each cracker is typically shut down for maintenance for a period of approximately 20 days every 36 to 48 months. The same happens to the Triunfo plant, which receives butane from Copesul. In the case of the other production units at such plants and the Tremembé plants, maintenance is performed during scheduled breaks in production. Oxiteno uses its own employees for specialized maintenance and uses third-party contractors for routine maintenance. In addition, Oxiteno has a team of employees responsible for quality control that operates continuously.

*Health, safety and environmental matters.* Oxiteno continuously monitors its compliance with federal, state and municipal legislation applicable to its various places of operation. In accordance with applicable law, Oxiteno is strictly liable for losses and damages of an environmental nature. See Item 4.B. Business Overview Distribution of Liquefied Petroleum Gas Industry and Regulatory Overview.

Each of Oxiteno's plants is licensed by the competent environmental authorities. Licenses granted are valid for a fixed period of time and then must be renewed. The other terms of the licenses vary according to the applicable legislation and to the periodic inspections performed by environmental authorities.

Waste products from Oxiteno's industrial plants are discharged in accordance with legal requirements. Effluents are discharged and treated in Oxiteno's own treatment centers or by petrochemical complexes where it has activities. Oxiteno seeks to reprocess solid waste products in cement furnaces. Where reprocessing is not possible, these products are incinerated or deposited in landfills owned by Oxiteno. Oxiteno periodically monitors these discharge areas and to date there are no significant liabilities.

## **Table of Contents**

Oxiteno's health and safety indicators are comparable to relevant international standards and are a priority in Oxiteno's activities and in the action plans for the upcoming years.

In March 2002, Oxiteno obtained an SA 8000 certification, which establishes the parameters for a Quality Management System Focused on Social Responsibility. This certification covers various matters, including health, safety, labor relations and compliance with the current legislation.

In addition to the legal requirements, Oxiteno voluntarily complies with other requirements, such as those related to the Responsible Care Program, issued by ABIQUIM, the Brazilian Chemical Industries Association, which sets forth international standards for environmental protection and occupational health as well as safety measures to be followed by chemical product producers.

## **Logistics of Chemical Products and Fuels**

### ***Ultracargo***

Ultracargo is a leading provider of integrated logistics for special bulk cargo in Brazil. Ultracargo's main differentiating characteristic is its integration of different transport modes—road transportation facilities to storage facilities through warehousing at port terminals and rail junctions for the handling of products that require special handling. Transportation services include integrated multimodal transportation as well as the receiving and dispatching of customer's goods. Ultracargo also offers ship loading and unloading services, the operation of pipelines, logistics programming and installation engineering. Ultracargo is one of the few companies in the Brazilian market to offer integrated transport and storage services to special bulk cargo. Ultracargo's ten largest clients accounted for 64% of its revenues in 2006, with its three largest clients, Braskem, Ultragaz and Oxiteno accounting for 20%, 9% and 7%, respectively, of Ultracargo's revenues.

Ultracargo's strategic location of its operations, close to the main Brazilian port terminals, railroad junctions and roads, is one of the company's main strengths and a key driver of integrated services profitability. The latest available data shows that Ultracargo accounted for approximately 70% of all tank capacity for liquids at the Aratu Terminal in the State of Bahia, which serves South America's largest petrochemicals complex. The company is also present in the port of Santos, in the state of São Paulo, which was responsible for approximately 27% of the Brazilian foreign trade in 2005 (US\$ 192 billion in 2005), according to last available data. The Santos Intermodal Terminal (TIS) is the second largest storage facility operated by Ultracargo and was inaugurated in mid-2005.

As of December 31, 2006, Ultracargo operated a fleet of approximately 590 tanker trucks and storage facilities with a capacity of 336,137 cubic meters and 11,200 square meters.

Ultracargo's history is one of pioneering logistics solutions in the Brazilian market. Ultracargo implemented a radar-operated tank measurement system in 1996, increasing the safety of product loading and unloading. In addition, Ultracargo has introduced web-based systems allowing customers to monitor transportation and storage. This includes services such as e-cargo for producing customized reports and monitoring operations in real time and estoque.net, for consulting inventory positions—accessed through any Internet-enabled computer, permitting clients to effectively participate at all stages of transportation and storage.

**Transportation.** Ultracargo's principal market for transportation is the chemical industry, for which transportation is provided by trucks between and among port terminals and first, second and third generation petrochemical companies operating at the various petrochemical complexes. Ultracargo has been establishing long-term relationships with key companies in the chemical industry, and provides its services on a negotiated basis with each individual customer.

Ultracargo, through a fleet of tanker trucks, offers transportation services for chemical products, fuels and other special bulk cargo in several major industrial regions in Brazil, as well as transportation services to Chile and Argentina. In 2006, Ultracargo operated a fleet of approximately 590 trucks and, in the years ended December 31, 2006, 2005 and 2004, transported approximately 2.1 million, 2.7 million and 2.6 million tons, respectively.

---

**Table of Contents**

In the LPG distribution industry, Ultracargo provides transportation from Petrobras facilities to filling stations of the distributors and between the distributors and their final industrial clients, although in this case, on a reduced scale.

In 1997, Ultracargo began operating in the market for bulk transportation of solid chemical products, an important sector of the transport business in the domestic market in which products are transported utilizing special silos and semi-trailers. Ultracargo believes that there are good opportunities for growth in this market. For the year ended December 31, 2006, Ultracargo transported approximately 342,000 tons of solid chemical products which accounted for approximately 17% of Ultracargo's revenues in this period.

*Transportation regulation.* Ultracargo's principal market for transportation is the chemical industry. Therefore, besides the general Brazilian transportation regulation (National Code of Traffic Law 9,503/1997), Ultracargo is subject to specific legislation that rules the transportation of hazardous products, mainly Decree 96,044/88 and Portaria 204 of the Ministry of Transportation. According to these regulations, a vehicle transporting hazardous materials must have clear indication of what kind of products they are transporting as well as carry symbols identifying that the material is inflammable. The vehicle is also subject to INMETRO Instituto Nacional de Metrologia, Normalização e Qualidade Industrial inspection every three years in order to attest that it complies with the current legislation. The regulation also provides specific rules regarding parking, travel itinerary, documentation and emergency procedures. Violations of the legislation are subject to monetary fines and cancellation of the registry for products transportation.

*Storage.* Ultracargo provides storage facilities to Braskem and most of the second-generation petrochemical companies in the Northeastern Petrochemical Complex, including Oxiteno. Transactions between Ultracargo and Oxiteno are carried out strictly on an arm's-length basis. At the end of 2003, Ultracargo maintained five storage terminals in Aratu and Camaçari in the state of Bahia, in Paulínia and Santos in the state of São Paulo, and in Suape in the state of Pernambuco. In early 2004, Ultracargo completed construction of an intermodal terminal in Tatuf in the state of São Paulo and later in the year inaugurated another in Montes Claros, in the state of Minas Gerais.

Ultracargo completed the construction of a new intermodal terminal in Santos (TIS) in mid-2005. This project is Ultracargo's second port installation to integrate road, rail and maritime transportation systems, the first being Aratu. Ultracargo's investment in this terminal was approximately R\$80 million. The terminal occupies an area of approximately 64,000 square meters that hosts 33,500 cubic meters of tankage space for chemical products, 40,000 cubic meters for alcohol and 38,000 cubic meters for vegetable oils. The terminal was built in partnership with Crystalsev and Cargill/ Coinbra.

In December 2006, Ultracargo completed the expansion of its terminal in Suape, adding 11,260 cubic meters to the previous capacity.

*Tax exemption status.* Pursuant to legislation which offers tax relief to industries located in the northeast region of Brazil, Ultracargo enjoys a 75% reduction in income tax on the total operating profits from its Aratu terminal, valid through 2012, and a 75% reduction in income tax on operating profits from acetic acids and butadiene product storage activities at the Suape Terminal, valid through 2015. For the years ended December 31, 2006, 2005 and 2004, tax breaks totaled R\$1.0 million, R\$3.1 million and R\$3.4 million, respectively. We cannot assure that there will be no amendments to the current legislation. For further information see Note 21(d) to our consolidated financial statements.

*Quality.* In 2006, Ultracargo completed its ISO 9001:2000 recertification process. The evaluation process occurred under a unified Quality Management System for the entire country. In 2005, Ultracargo was the first Brazilian company to go through the recertification process by SASSMAQ (Safety, Health, Environment and Quality Evaluation System), a program from ABIQUIM, the Brazilian Chemical Industries Association. The purpose of the system is to ensure that service providers in this industry comply with the technical standards required by the chemical industry, reducing, therefore, the risks in transportation and distribution. Paulínia Intermodal Terminal (TIP) obtained the ISO 14000 certification in 2004.

## **Table of Contents**

### **Insurance**

We maintain insurance policies covering all our facilities and which we consider appropriate to cover the risks to which we believe we are exposed, including loss and damage from fire, lightning, explosion of any nature, windstorm, plane crash and electrical damage. Our insurance policies provide coverage of up to a maximum of US\$396 million as of December 31, 2006.

Oxiteno S.A. Indústria e Comércio and its subsidiaries, Oxiteno Nordeste S.A. Indústria e Comércio and CANAMEX Químicos S.A. de C.V., also maintain business interruption insurance against losses from potential accidents affecting their assets, with coverage of up to a maximum of US\$233 million as of December 31, 2006.

We have additional insurance that covers all of our companies, with coverage of up to a maximum of US\$200 million, for losses and damage incurred by third parties as a result of any accidents that occur in connection with our commercial/industrial operations and/or the distribution and sale of our products and services.

Finally, we also have group life insurance, personal accident insurance, health insurance and domestic and international transportation insurance.

We believe that our insurance covers, in all material respects, the risks to which we are exposed and is in line with industry standards in Brazil. However, the occurrence of losses or other liabilities that are not covered by insurance or that exceed the limits of our insurance coverage could result in significant unexpected additional costs to us.

### **Businesses of the Ipiranga Group**

The Ipiranga Group was founded in 1937, through the creation of an oil refinery in the state of Rio Grande do Sul, in the Southern region of Brazil, which is currently part of RPI's assets.

In the late 1950s, the Ipiranga Group started its fuel distribution business in the Southern region of Brazil through its subsidiary DPPI. Ipiranga expanded its business to other regions through the acquisition of Gulf Oil Corporation's operations in Brazil, creating CBPI.

During the 1970s the Ipiranga Group began its operations in the Brazilian petrochemical industry. Through IPQ, the Ipiranga Group shared control of Copesul with Braskem, a naphtha-based cracker in the Southern region of Brazil.

Until April 18, 2007, the Ipiranga Group was controlled by 63 individuals, all related to the five founding families of the group.

## **Table of Contents**

The organizational structure of Ipiranga Group's main subsidiaries as of December 31, 2006 was as follows:

\* ON means Common Shares

In April 2007, we acquired, on our behalf and on behalf of Petrobras and Braskem, a controlling stake in the Ipiranga Group. See Item 4.A. Information on the Company History and Development Recent Developments Acquisition of the Ipiranga Group.

After the completion of the Acquisition, the businesses of the Ipiranga Group will be divided among Petrobras, Ultrapar and Braskem. Ultrapar will retain the fuel and lubricant distribution businesses located in the South and Southeast regions of Brazil; Petrobras will receive the fuel and lubricant distribution businesses located in the North, Northeast and Central West regions of Brazil; and Petrobras and Braskem will receive the Petrochemical Business, in the proportion of 60% for Braskem and 40% for Petrobras. RPI's oil refining operations will be shared equally among Petrobras, Ultrapar and Braskem.

### ***Fuel Distribution Business***

As of December 31, 2006, Ipiranga, through its subsidiaries CBPI and DPPI, was the second largest fuel distribution company in Brazil, with a total volume sold of more than 14 thousand cubic meters, including gasoline, diesel, fuel oil, ethanol, kerosene and natural gas.

Ipiranga operates in the following three segments in the fuel distribution industry:

Retail Ipiranga's main segment in terms of volume sold, which primarily includes a service station network;

Industrial Comprised of road transport companies, railroads and government entities; and

Wholesale Primarily consisting of diesel sales to the agricultural sector.

As of December 31, 2006, Ipiranga had a network of approximately 4,200 service stations throughout Brazil, all operated by third parties, using the same brand name Ipiranga. Of these service stations, the Southeast Distribution Business that we have acquired includes 3,300 service stations. According to ANP, Ipiranga had a 19% total market share in the Brazilian fuel distribution market in 2006.

Petrobras is the main supplier of oil-based fuels to Ipiranga. The supply of these products is based on a contract under which Petrobras is obligated to supply Ipiranga with a fixed volume of gasoline, diesel and fuel oil. The ethanol Ipiranga sells is acquired in the Brazilian market from various producers and a portion of the ethanol volume it sells is acquired through supply contracts.

## **Table of Contents**

The five largest fuel distributors in Brazil, which are all associated with SINDICOM, were responsible for more than 70% of the total volume of gasoline, ethanol, diesel and natural gas for vehicles sold in Brazil in 2006. These companies are BR Distribuidora, Petrobras subsidiary, Ipiranga, through CBPI and DPPI, Shell, Texaco and Esso.

Growth of the fuel distribution business in Brazil is primarily influenced by GDP and population income and indirectly influenced by credit availability, which influences the growth in the automobile sector.

### ***Oil Refinery Business***

The Ipiranga Group operates a small refinery in the state of Rio Grande do Sul, in the Southern region of Brazil. Ipiranga's refinery's nominal capacity is 17,000 barrels per day, and its principal products include gasoline, diesel, naphtha, fuel oil, LPG and kerosene. During 2006, Ipiranga faced difficulties in keeping its refinery operating at full capacity, due to an increase in international oil prices, to which Ipiranga's refinery's costs are linked, without a corresponding increase in oil derivatives prices in Brazil. This led Ipiranga to suspend its operations for five months during the year. In 2006, the average production of the refinery was 7,158 barrels per day, which represented 42% of the refinery's nominal capacity, and the refinery's market share reached 0.4% of the Brazilian market, according to ANP data.

### ***Petrochemicals Business***

The Ipiranga Group's operations in the petrochemical business are conducted by two main subsidiaries, IQ and IPQ, through which it shares the control of Copesul with Braskem. IQ is primarily engaged in the distribution and production of solvents and petrochemical products and serves several market segments such as the adhesives, agrochemicals, cosmetics, leather, textiles, resins and lubricants. IPQ is the largest Latin American producer of high density polyethylene, with production capacity of 350,000 tons per year, and operates five industrial plants in the southern petrochemical complex in Brazil. IPQ also produces low density polyethylene and polypropylene, with production capacity of 150,000 tons per year of each product.

Copesul is a naphtha-based cracker located in the southern petrochemical complex, in the state of Rio Grande do Sul, with production capacity of approximately 3.2 million tons per year of petrochemicals. The main goods produced by Copesul are ethylene, of which Copesul is responsible for 33% of total Brazilian supply, benzene, propylene, butadiene, fuels and solvents. Copesul primarily serves the second generation companies in the southern petrochemical complex, with approximately 70% of its production being sold to such companies. In 2006, Copesul sold 3.0 million tons of petrochemicals, of which 40% was ethylene. In 2006, 42% of Copesul's raw material was purchased from Petrobras and the remainder was imported.

## **Table of Contents**

### **C. Organizational Structure**

The following chart shows our organizational structure(1) for our principal subsidiaries as of December 31, 2006:

- 
- (1) Percentages represent approximate ownership of voting share capital and total capital (voting capital/total capital).
  - (2) Minority participations in Utingás are mainly held by Liquigás Distribuidora S.A. and SHV Gas (31% and 8% of voting capital, respectively).

We conduct LPG distribution through our wholly owned subsidiary, Ultragas. Ultragas operates through its four primary subsidiaries, Companhia Ultragas S.A., Bahiana, SP Gás and Utingás. The first three companies operate in the filling and distribution of LPG cylinders. Bahiana operates primarily in the northeast region of Brazil, and Companhia Ultragas and SP Gas serve the rest of Brazil. Utingás is an LPG storage company, with facilities in the states of São Paulo and Paraná.

We conduct petrochemical and chemical activities through our wholly owned subsidiary, Oxiteno. Oxiteno operates in the petrochemical and chemical sector directly and through its subsidiaries, Oxiteno Nordeste S.A. and CANAMEX. Oxiteno operates two plants located in the state of São Paulo, and Oxiteno Nordeste operates one plant in Camaçari, in the state of Bahia, and a second plant in Triunfo, in the state of Rio Grande do Sul. We acquired CANAMEX, which has two plants in Mexico, in December 2003. Oleoquímica is the subsidiary through which we are constructing the fatty alcohol plant.

We conduct chemical products and fuel logistics through our wholly owned subsidiary, Ultracargo, which operates through its subsidiaries Transultra and Tequimar. Transultra provides transportation services throughout Brazil, as well as in Argentina and Chile. Tequimar maintains storage facilities at four port terminals located near two of the main petrochemical complexes in Brazil, Camaçari and São Paulo.

**Table of Contents**

Ultragaz, Oxiteno and Ultracargo are each incorporated under the laws of Brazil.

**D. Property, Plants and Equipment****Ultragaz**

**Plants.** Ultragaz LPG distribution network includes 15 filling plants. LPG is carried to the filling plants either via gas pipelines from Petrobras installations, or by tanker truck. When LPG transportation is via gas pipeline the bases are known as primary and when transportation is via tanker truck, the bases are known as secondary. Ultragaz also operates LPG storage bases, known as satellite bases for supplying our trucks. Ultragaz maintains storage facilities for LPG cylinders and satellite bulk distribution plants at strategic locations in order to maintain supplies closer to its customer bases and thus to reduce transportation costs. Most of the LPG transported by truck from Petrobras to Ultragaz secondary plants is transported by Ultracargo's fleet of tanker trucks on an arm's-length basis. LPG is stored in the filling plants in large LPG storage tanks with a capacity of 60 tons per tank. In the case of LPG to be delivered in bulk, the LPG is pumped directly from the storage tanks into the bulk tankers. In the case of LPG to be delivered in cylinders, the LPG is pumped from the storage tanks into a number of filling heads, which deliver the LPG cylinders.

The following table sets forth the total storage capacity, total filling capacity (assuming one 8-hour shift per day) during 2006 and the 2006 average filling utilization for each of Ultragaz primary and secondary filling stations and satellite stations.

| Base                  | Type      | Total storage capacity (in tons) | Filing                       | 2006 average             |
|-----------------------|-----------|----------------------------------|------------------------------|--------------------------|
|                       |           |                                  | capacity (in tons per month) | filling utilization rate |
| Capuava               | Primary   | 720                              | 13,136                       | 94%                      |
| Santos                | Primary   | 960                              | 3,727                        | 76%                      |
| São José dos Campos   | Primary   | 960                              | 4,725                        | 86%                      |
| Rio de Janeiro        | Primary   | 500                              | 6,767                        | 84%                      |
| Barueri               | Secondary | 1,500                            | 4,100(1)                     | 137%                     |
| Araraquara            | Satellite | 60                               |                              |                          |
| Mauá                  | Satellite | 720                              |                              |                          |
| Pouso Alegre          | Satellite | 60                               |                              |                          |
| Paulínia              | Primary   | 1,500                            | 9,827                        | 98%                      |
| Araucária             | Primary   | 240                              | 9,677                        | 81%                      |

(1) These bases operated above capacity with more than one 8-hour shift per day.

**Table of Contents**

In addition, Ultragas maintains headquarters in the city of São Paulo and regional offices in the areas in which it operates. Ultragas also maintains 84 retail stores.

**Oxitenó**

Oxitenó has five plants in Brazil: Camaçari, in the northeast complex, the Mauá plant in the São Paulo complex, the Triunfo plant in the southern complex and the Tremembé and Suzano plants in the state of São Paulo.

The following table sets forth the current ethylene oxide production capacity of Oxitenó's plants in Brazil.

| Units    | Capacity<br>(in tons per year) |
|----------|--------------------------------|
| Camaçari | 260,000                        |
| Mauá     | 52,000                         |
| Tremembé |                                |
| Triunfo  |                                |
| Suzano   |                                |
| Total    | 312,000                        |

Ethylene oxide is primarily an intermediate material used in the production of ethylene oxide derivatives. Only approximately 3% of Oxitenó's sales volume in the year ended December 31, 2006 were ethylene oxide. Therefore, Oxitenó's total production output may not be determined by adding the capacities of ethylene oxide and its derivatives.

As Oxitenó's capacity for ethylene oxide derivatives exceeds its ethylene oxide production capacity, Oxitenó cannot produce the maximum amount of each derivative product in any year and, accordingly, actual production of ethylene oxide derivatives is less than its capacity shown in the tables below.

However, the excess production capacity of ethylene oxide derivatives provides a degree of operating flexibility that enables the company to switch production partially to other products and re-manage its ethylene oxide output for derivative products depending on relative demand, thus mitigating the effects of reductions in demand for certain products resulting from downturns in the petrochemical business cycle.

**Camaçari plant.** The Camaçari plant, located in the Northeast Complex, was built by Oxitenó and commenced production in 1978. The Camaçari plant produces ethylene oxide and ethylene oxide derivatives, such as ethylene glycols, ethanolamines, glycol ethers and ethoxylated derivatives. In July 1997, a major modernization of this plant was completed adding 105 thousand tons of ethylene oxide production capacity.

**Table of Contents**

The following table sets forth the production capacity of the Camaçari plant for each of its principal products.

| Units                   | Capacity<br>(in metric tons per year) |
|-------------------------|---------------------------------------|
| Ethylene oxide          | 260,000                               |
| Ethylene glycols        | 285,000                               |
| Ethanolamines           | 45,000                                |
| Glycol ethers           | 25,000                                |
| Ethoxylated derivatives | 130,000                               |

In 2006, the Camaçari plant operated at approximately 91% of its production capacity.

**Mauá plant.** The Mauá plant, located in the São Paulo Complex, was the first plant built by Oxiteno and it commenced production in 1974. The Mauá plant has process units for ethylene oxide, ethylene glycols, glycol ethers, glycol ether acetates, natural alcohols and ethoxylated derivatives. In addition to the production units, the plant has drumming, storage, warehouse and maintenance facilities and also houses Oxiteno's principal research and development laboratory.

**Table of Contents**

The following table sets forth the current production capacity of the Mauá plant for each of its principal products.

| Units                   | Capacity<br>(in metric tons per year) |
|-------------------------|---------------------------------------|
| Ethylene Oxide          | 52,000                                |
| Ethylene Glycols        | 35,000                                |
| Glycol Ethers           | 40,000                                |
| Acetates                | 32,000                                |
| C4+C5 Alcohols          | 10,000                                |
| Ethoxylated Derivatives | 25,000                                |
| Alkylation              | 17,000                                |
| Esterification          | 4,000                                 |
| Emulsification          | 3,000                                 |
| Hydraulic fluids        | 30,000                                |

In 2006, the Mauá plant operated at approximately 84% of its production capacity.

**Tremembé plant.** The Tremembé plant, located at Bairro dos Guedes, Tremembé, in the state of São Paulo, has three principal production units, a sulfonation/sulfation unit and two multipurpose units. The Tremembé plant commenced production in 1970 and was subsequently acquired by us in 1985.

The following table shows the current capacity of the principal units at the Tremembé plant.

| Units                   | Capacity<br>(in metric tons per year) |
|-------------------------|---------------------------------------|
| Esterification          | 10,000                                |
| Specialties             | 15,000                                |
| Sulfonation/Sulfation   | 30,000                                |
| Betaines                | 10,000                                |
| Hydraulic fluids        | 3,200                                 |
| Naphthalenes Sulfonates | 9,000                                 |
| Agricultural Blends     | 11,000                                |

In 2006, the Tremembé plant operated at approximately 83% of its production capacity.

**Suzano plant.** In 2007, Oxiteno began operating a sulfonation and sulfation plant in Suzano, with a production capacity of 13,300 tons per year. This plant is managed by the Tremembé plant staff.

**Triunfo plant.** The Triunfo plant is located in the Southern Complex. The Triunfo plant was built by Oxiteno and started production in October 1989. The Triunfo plant has two process units, one for the production of secondary butyl alcohol, which is used in the production of MEK, and one for the production of MEK.

The following table shows the current capacity of the principal units at the Triunfo plant.

| Units               | Capacity<br>(in metric tons per year) |
|---------------------|---------------------------------------|
| Oxygenated solvents | 40,000                                |

In 2006, the Triunfo plant operated at approximately 83% of its production capacity.

**Table of Contents**

With the acquisition of CANAMEX in December 2003, Oxiteno acquired two specialty chemical plants in Mexico. As of December 31, 2006, the Coatzacoalcos plant has a production capacity of 44,000 tons per year of ethoxylates and the Guadalajara plant has a production capacity of 24,000 tons per year of specialty chemicals. In December 2006, the Guadalajara and the Coatzacoalcos plants operated at approximately 60% and 63% of their production capacity, respectively.

The following table sets forth Oxiteno's overseas production plants:

| Units                                       | Capacity<br>(in metric tons per year) |
|---------------------------------------------|---------------------------------------|
| Ethoxylated derivatives Coatzacoalcos plant | 44,000                                |
| Ethoxylated derivatives Guadalajara plant   | 12,000                                |
| Esterification Guadalajara plant            | 12,000                                |

**Ultracargo**

The following tables set forth the principal products stored at, and the storage capacity operated by, Ultracargo's facilities at December 31, 2006, and the average utilization of Ultracargo's facilities during 2006.

| Facility                                                                         | Capacity (in cubic meters) | Average utilization % | Product Lines                                                                                                                                                                                       |

None.

**Table of Contents****ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS****A. Operating Results**

You should read this discussion together with our consolidated financial statements, including the notes thereto, and other financial information included elsewhere in this annual report and in conjunction with the financial information included under Item 3A. Selected Consolidated Financial Information. Our consolidated financial statements have been prepared in accordance with Brazilian GAAP and the accompanying notes contain a description of the principal differences between such practices and U.S. GAAP, and a reconciliation to U.S. GAAP of net income for each of the three years in the period ended December 31, 2006 and shareholders' equity for the periods ended December 31, 2006 and 2005. Our consolidated financial statements for the years ended December 31, 2006, 2005 and 2004 were audited by the independent registered public accounting firm, Deloitte Touche Tohmatsu Auditores Independentes.

**Overview**

Our three principal businesses are:

the LPG distribution business, conducted by our wholly owned subsidiary Ultragaz;

the chemical and petrochemical business, conducted by our wholly owned subsidiary Oxiteno; and

logistics services for special bulk cargo, conducted by our wholly owned subsidiary Ultracargo.

Ultragaz sells LPG to the residential, commercial and industrial market segments. Oxiteno produces ethylene oxide and its principal derivatives, and is also a significant producer of specialty chemicals. It manufactures approximately 700 products used in various industrial sectors such as polyethylene terephthalate, or PET, packaging, polyester, textiles, paints, cosmetics and detergents. Ultracargo operates a fleet of trucks specialized in the transport of products that require special handling and maintains storage facilities at railroad junctions and port terminals.

**Recent Development- Acquisition of the Ipiranga Group**

**Terms of Transaction.** On March 19, 2007, Ultrapar, Petróleo Brasileiro S.A., or Petrobras, and Braskem S.A., or Braskem, announced the acquisition of Ipiranga Group, or the Acquisition. See Item 4. Information of the Company Business Overview Business of Ipiranga Group. After the completion of the Acquisition, the fuel distribution, petrochemical and oil refinery businesses of the Ipiranga Group will be separated and then owned and managed by Petrobras, Ultrapar and Braskem. Ultrapar will, following the successful completion of the transactions, retain the fuel distribution business in the south and southeast regions of Brazil and become the second-largest company in the fuel distribution business in Brazil, holding 15% of the market. See Item 4.A. Information of the Company History and Development of the Company Recent Developments Acquisition of the Ipiranga Group.

**Phases of Transaction.** The Acquisition is divided into five phases: (1) acquisition of the shares held by the Key Shareholders by Ultrapar; (2) mandatory tender offers (pursuant to tag along rights held by minority shareholders under Brazilian Corporate Law and CVM rules) for the acquisition of the remaining common shares of RPI, DPPI, CBPI and IPQ; (3) tender offer for the delisting of Copesul's common shares from the BOVESPA; (4) exchange offer by Ultrapar of the remaining common and preferred shares of RPI, DPPI and CBPI; and (5) separation of the Target Companies' assets and the transfer of the Petrochemical Business to Braskem and Petrobras and the Northern Distribution Business to Petrobras. The completion of the transaction is expected to occur in the fourth quarter of 2007.

**Table of Contents****Brazilian economic background**

Since most of our operating businesses are located in Brazil, we are significantly affected by Brazil's economic and social conditions, including, but not limited to, gross domestic product, or GDP, growth rates, the domestic rate of inflation and exchange rate fluctuations.

**Gross domestic product.** In 2002, Brazil's GDP grew by 1.5%, as a result of the political instability surrounding the presidential elections of October 2002, which caused foreign exchange rate devaluation, and an increase in interest rates, and undermined consumer confidence. In 2003, the GDP grew 0.5%, largely a reflection of the economic policy of holding the basic interest rate at high levels throughout the year as a means of controlling inflation. As government became more confident regarding inflation trends, interest rates were lowered, and Brazilian GDP grew by 4.9% in 2004. However, in order to meet inflation targets, the Central Bank increased interest rates again in 2005, and GDP growth decreased to 2.3% in the year ended December 31, 2005. During 2006, the Brazilian economy presented the same trend shown in the previous year and GDP grew by 2.9%. Our operations are significantly impacted by Brazilian GDP growth, specifically, sales of LPG to the commercial and industrial customers, Oxiteno's sales to the domestic market and Ultracargo's logistics operations. In addition, sales of LPG to residential customers are affected by the level of household income, which often bears a relation to GDP performance.

**Inflation and currency fluctuations.** Our cash operating expenses are substantially in *reais* and tend to increase with inflation. However, a significant portion of our costs of sales and services rendered are linked to the U.S. dollar and are not substantially affected by the Brazilian inflation rate. In addition, some of our *real*-denominated debt is indexed to take into account the effects of inflation. In 2002, the inflation rate as measured by the *Índice Geral de Preços Mercado*, or the IGP-M, increased to 25.3%, reflecting the foreign exchange rate devaluation of 52.3%, largely due to uncertainties and risks inherent in the Brazilian presidential succession campaign. In 2003, the *real* appreciated 18% against the U.S. dollar, consequently diminishing inflationary pressures and resulting in an IGP-M of 8.7%. In 2004, the *real* appreciated further against the U.S. dollar and IGP-M for the year was 12.4%. In 2005 and 2006, the *real* continued to appreciate against the U.S. dollar, which, together with the increased average interest rates, resulted in an inflation rate of 1.2% and 3.9%, respectively, as measured by the IGP-M. Future governmental actions, including actions to adjust the value of the *real* in relation to the dollar, may increase inflation.

The principal foreign exchange risk we face arises from certain U.S. dollar denominated costs and expenses. Although a substantial part of our debt is dollar-denominated, it is currently hedged against currency devaluation through the use of various derivative instruments or matching investments in the same currency. Additionally, a significant part of our raw materials is also denominated or indexed to the U.S. dollar. A large part of our sales is denominated in *reais*, although prices in the chemical business are benchmarked to prices prevailing in the international markets and denominated in U.S. dollars. Hence, we are exposed to foreign exchange rate risks which could negatively impact our businesses, financial situation and operating results as well as our capacity to service our debt.

The table below shows the inflation rate for the periods indicated, as measured by the IGP-M as well as the devaluation of the *real* against the U.S. dollar.

| Index                                                                 | Year ended December 31, |         |        |
|-----------------------------------------------------------------------|-------------------------|---------|--------|
|                                                                       | 2006                    | 2005    | 2004   |
| General Price Index IGP-M                                             | 3.9%                    | 1.2%    | 12.4%  |

**Table of Contents**

We manage the foreign exchange risk associated with the scheduled payments under the terms of our U.S. dollar indebtedness by investing in U.S. dollar-denominated securities and foreign currency/interest swap contracts, under which we pay variable interest in *reais* based on the interbank certificate of deposit rate, or CDI, and receive fixed interest in U.S. currency. As of December 31, 2006 our total obligations denominated in foreign currency were R\$901.0 million, including pre-export finance contracts and import payables. At the same date our total asset position in foreign currency was R\$897.1 million, composed of investments indexed to U.S. dollars and swap instruments used to manage fluctuations of exchange rates and foreign currency receivables exposures. See Item 11. Quantitative and Qualitative Disclosures About Market Risk Foreign exchange risk for information about our foreign exchange risk hedging policy and Notes 13 and 18 to our consolidated financial statements.

**Critical accounting policies and estimates**

The presentation of our financial condition and results of operations requires our management to make judgments regarding the effects of matters that are inherently uncertain on the carrying value of our assets and liabilities and may affect the reported amount of them as well as our revenues and expenses. Actual results may differ from those estimated under different variables, assumptions or conditions, even though our management believes that its accounting estimates are reasonable. The following paragraphs review the critical accounting estimates that management considers most important for understanding our financial condition, results of operations and cash flows. An accounting estimate is considered a critical accounting estimate if it meets the following criteria:

The accounting estimate requires management to make assumptions about matters that were highly uncertain at the time the accounting estimate was made; and

Different estimates that management reasonably could have used for the accounting estimate in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, would have a material impact on our financial condition, results of operations or cash flows.

We have identified the following four of our accounting policies that can be considered critical.

**Allowance for doubtful accounts.** We maintain allowances for doubtful accounts for estimated losses resulting from the subsequent inability of our customers to make required payments. The allowance for doubtful accounts is recorded in an amount we consider sufficient to cover any probable losses on realization of our accounts receivable from our customers, as well as other receivables, and is included as selling expenses; no adjustment is made to net sales and services revenue. In order to establish the allowance for doubtful accounts, our management constantly evaluates the amount and characteristics of our accounts receivable. When significant delays occur and the likelihood of receiving these payments decreases, a provision is made. In case receivables in arrears are guaranteed or there are reasonable grounds to believe they will be paid, no provision is made. If the financial conditions of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances would be required in future periods. However, because we cannot predict with certainty the future financial stability of our customers, we cannot guarantee that our reserves will continue to be adequate. Actual credit losses may be greater than the allowance we have established, which could have a significant impact on our selling expenses. See Note 6 to our consolidated financial statements for additional information about our allowance for doubtful accounts.

**Deferred Taxes.** We recognize deferred tax assets and liabilities which do not expire, arising from tax loss carry forwards, temporary add-backs, revaluation of property, plant and equipment and other procedures. We periodically review the deferred tax assets for recoverability and establish a valuation allowance, as required, based on historical taxable income, projected future taxable income, and the expected timing of the reversals of existing temporary differences. In the event we or one of our subsidiaries operate at a loss or are unable to generate sufficient future taxable income, or if there is a material change in the actual effective tax rates or time period within which the

**Table of Contents**

underlying temporary differences become taxable or deductible, we evaluate the need to establish a valuation allowance against all or a significant portion of our deferred tax assets, resulting in an increase in our effective tax rate, thereby decreasing net income. If we determine that we can realize a deferred tax in excess of our net recorded amount, we decrease the valuation allowance, thereby increasing net income. Significant management judgment is required in determining any valuation allowance. The principal uncertainty relates to the likelihood of future taxable income from the subsidiary that generated the deferred tax asset. A change in our projections of profitability could result in the need to record a valuation allowance against deferred tax assets, resulting in a negative impact of future results. See Note 21 to our consolidated financial statements for additional information on taxes.

**Contingent liabilities.** We are currently involved in certain legal and administrative proceedings that arise from our normal course of business as described in Note 19 to our consolidated financial statements and Item 8. Financial Information Legal Proceedings. We believe that the extent to which these contingencies are recognized in our consolidated financial statements is adequate. It is our policy to record accrued liabilities in regard to contingencies that can be reasonably estimated and could have a material adverse impact on the result of our operations or our financial condition, to the extent not covered by insurance, and that are likely to occur in the opinion of our management, based on information available to us including information obtained from our legal advisors. Future results of operations for any particular quarterly or annual period could be materially affected by changes in our assumptions, by the effectiveness of our strategies relating to these proceedings, by future developments in each matter being discussed or by changes in approach, such as a change in settlement strategy in dealing with these matters.

**Fair value of financial instruments.** We enter into foreign currency swap agreements in order to hedge our foreign exchange exposure. Under Brazilian GAAP, these swap agreements are recorded at their net settlement prices as determined on each balance sheet date in accordance with their contractual terms. In applying U.S. GAAP to our swap agreements we adopted SFAS 133, Accounting for Derivative Instruments and Hedging Activities. The accounting required under SFAS 133 is broader than under Brazilian GAAP, especially with respect to the overall treatment and definition of a derivative, when to record a derivative, the classification of derivatives, and when to designate a derivative as a hedge. Under this method of accounting we adjusted our foreign currency swaps to their fair values, with changes in fair values being recognized in earnings. Note 24I (i) to our consolidated financial statements provides additional information regarding the accounting of our swap agreements.

In order to estimate fair values, we consider several variables, such as interest rates, discount rates, foreign exchange rates and future cash flows. Our most important sources of information concerning these variables are the market projections of future exchange and interest rates provided by the Brazilian Mercantile & Future Exchange (BMF). We believe BMF to be the most adequate and reliable source of information available for our calculations. However, given the volatility inherent in financial markets, estimates concerning the variables used to calculate fair values are subject to constant change. As a consequence, our judgment related to, among other issues, the behavior of these variables, the selection of sources of information and the timing of calculation, directly affects the fair values of our swaps and the amount of gains or losses recorded in the income statement under U.S. GAAP.

**Effects on Our Future Results of Operations Acquisition of the Ipiranga Group**

The Ipiranga Group operates a network of approximately 4,200 service stations through its operational companies CBPI and DPPI, and an oil refinery, through its operational company, RPI. It also has a major share of the petrochemical market, with the production of 650,000 tons of petrochemical resins through Ipiranga Petroquímica S.A., or IPQ, as well as joint control with Braskem of Copesul, Brazil's second-largest petrochemical raw materials complex. Due to the nature of the fuel distribution business, fuel distributors generally earn lower margins than companies in Ultrapar's sectors. Thus, Ipiranga's EBITDA margins are lower than Ultrapar's. In 2006 for example, the consolidated net revenues of DPPI totaled R\$25 billion, with EBITDA of R\$469 million and net income of R\$161 million, whereas Ultrapar's net revenues, EBITDA and net income were R\$4.8 billion, R\$516 million and R\$282 million, respectively. As Ipiranga's results will be consolidated into Ultrapar's following the Acquisition, we expect Ultrapar's margins will be lower than those reported for the year ended December 31, 2006.

**Results of operations**

The following discussion of our results of operations is based on the financial information derived from our consolidated financial statements prepared in accordance with Brazilian GAAP.

**Table of Contents****Year ended December 31, 2006 compared to the year ended December 31, 2005.**

The following table shows a summary of our results of operations for the years ended December 31, 2006 and 2005:

(1) See footnote 7 under Item 3A. Selected Consolidated Financial Data for additional discussion of adjusted EBITDA and its reconciliation to other information in our financial statements.

*Net sales and services.* Net sales and services for the year ended December 31, 2006 increased by 2% to R\$4,794.1 million from R\$4,693.8 million for the year ended December 31, 2005.

The following table illustrates the change in sales in each of our segments:

|            | Year ended<br>December 31,<br>2006 2005<br>(in millions of<br>reais) |         | Percent<br>change |
|------------|----------------------------------------------------------------------|---------|-------------------|
| Ultragaz   | 3,066.9                                                              | 2,902.4 | 6%                |
| Oxiteno    | 1,549.5                                                              | 1,610.1 | (4)%              |
| Ultracargo | 226.1                                                                | 234.2   | (3)%              |

Ultragaz net sales and services increased by 6% to R\$3,066.9 million for the year ended December 31, 2006 compared to R\$2,902.4 million for the year ended December 31, 2005. The increase in net sales was driven by the 1% growth in sales volume, a more favorable market and the benefits derived from a distribution program review at Ultragaz. During 2006 Ultragaz implemented a series of initiatives aimed at improving its profitability, including the redesign of its distribution structure in order to optimize its logistics assets, the implementation of new tools for sales channels management and the closing of certain facilities, among others.

Oxiteno's net sales and services decreased 4% to R\$1,549.5 million for the year ended December 31, 2006 compared to R\$1,610.1 million for the year ended December 31, 2005. The decrease in Oxiteno's net sales and services was mainly due to the 8.7% appreciation of the Brazilian real against the U.S. dollar in 2006 compared to 2005, since prices at Oxiteno are benchmarked to prices prevailing in international markets. The appreciation of the real was partially offset by the 4% increase in volume sold and by an improvement in Oxiteno's sales mix, with increased proportion of sales volume (i) of specialty chemicals, which are higher added value products, and (ii) in the domestic market.

Ultracargo's net sales and services decreased 3% to R\$226.1 million for the year ended December 31, 2006, compared to R\$234.2 million for the year ended December 31, 2005. Although the effective storage levels in the liquid and gas segments were 8% higher than in 2005 as a result of

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

the consolidation of the company's operations at the Santos Terminal TIS, the total kilometrage traveled was 19% lower than that in 2005 due to a restructuring of the company's customer portfolio in the transport segment, which focused on services with a higher aggregate value.

*Cost of sales and services.* Cost of sales and services increased by 2% to R\$3,859.9 million for the year ended December 31, 2006, compared to R\$3,783.4 million for the year ended December 31, 2005.

A-65

**Table of Contents**

Ultragaz's cost of sales and services increased by 2% to R\$2,572.6 million for the year ended December 31, 2006 compared to R\$2,530.8 million for the year ended December 31, 2005, mainly due to higher sales volume.

Oxiteno's cost of sales and services increased by 4% to R\$1,192.4 million for the year ended December 31, 2006 compared to R\$1,150.7 million for the year ended December 31, 2005. This increase was mainly due to an 18% increase in the dollar cost of ethylene, its main raw material, and a 4% increase in sales volume, which were partly offset by the appreciation of the *real* against the U.S. dollar.

Ultracargo's cost of sales and services decreased by 7% to R\$143.6 million for the year ended December 31, 2006 from R\$154.9 million for the year ended December 31, 2005. This decrease was a result of the reduction in the company's transport operations.

*Gross profit.* Gross profit increased by 3% to R\$934.2 million for the year ended December 31, 2006 compared to R\$910.4 million for the year ended December 31, 2005. Ultragaz's gross profit was R\$494.3 million for the year ended December 31, 2006, a 33% increase compared to R\$371.6 million for the year ended December 31, 2005. Oxiteno's gross profit was R\$357.1 million for the year ended December 31, 2006, a 22% decrease compared to R\$459.4 million for the year ended December 31, 2005. Ultracargo's gross profit was R\$82.5 million for the year ended December 31, 2006, a 4% increase compared with R\$79.3 million for the year ended December 31, 2005.

*Selling, general and administrative expenses.* Our selling, general and administrative expenses increased by 10% to R\$605.1 million for the year ended December 31, 2006 from R\$551.7 million for the year ended December 31, 2005.

Ultragaz's selling, general and administrative expenses increased by 12% to R\$327.0 million for the year ended December 31, 2006 compared to R\$291.9 million for the year ended December 31, 2005. This increase reflects (i) salary increases as a result of the annual collective wage agreement and (ii) an increase in variable remuneration and profit sharing, reflecting the improvement in the company's results.

Oxiteno's selling, general and administrative expenses increased by 4% to R\$212.2 million for the year ended December 31, 2006 compared to R\$203.3 million for the year ended December 31, 2005, principally due to (i) an increase in volume sold, (ii) salary increases as a result of the annual collective wage agreement, and (iii) an increase in expenses at CANAMEX, which presented a 49% increase in volume sold in 2006.

Ultracargo's selling, general and administrative expenses increased by 15% to R\$71.0 million for the year ended December 31, 2006 compared to R\$61.9 million for the year ended December 31, 2005, principally due to salary increases as a result of the annual collective wage agreement, in addition to extraordinary expenses related to the downsizing of the workforce during the second half of 2006 due to the restructuring in operations in the transport segment.

*Operating income before financial items.* Operating income before financial items decreased by 8% to R\$330.4 million for the year ended December 31, 2006 compared to R\$358.3 million for the year ended December 31, 2005. Ultragaz's operating income before financial items for the year ended December 31, 2006 was R\$167.3 million, a 115% increase compared to R\$77.8 million compared to the year ended December 31, 2005. Oxiteno's operating income before financial items was R\$146.3 million for the year ended December 31, 2006, a 43% decrease compared to R\$257.9 million for the year ended December 31, 2005. Ultracargo's operating income before financial items was R\$11.4 million for the year ended December 31, 2006, a 34% decrease compared to the R\$17.2 million for the year ended December 31, 2005.

*Financial income (expense), net.* We reported net financial income of R\$30.6 million for the year ended December 31, 2006, compared to a net financial expense of R\$27.3 million for the year ended December 31, 2005. The R\$57.9 million improvement was principally due to the non-recurring revenues of R\$49.7 million as a result of favorable outcomes of lawsuits related to the payment of PIS and COFINS taxes by the company's subsidiaries Oxiteno Nordeste, Oxiteno S.A., Companhia Ultragaz, Transultra and Ultracargo. Through its subsidiaries, Ultrapar had filed lawsuits questioning the levy of PIS and COFINS taxes on sources of income other than revenues. The Federal Supreme Court ruled in favor of Ultrapar, resulting in the addition of R\$49.7 million to the company's financial income in 2006. Ultrapar has other subsidiaries that are also appealing the levying of these taxes, which have yet to be ruled on. See Note 15 and 19(a) to our consolidated financial statements for more information.

---

**Table of Contents**

As of December 31, 2006, we had a net cash position of R\$120.7 million and a net foreign exchange rate exposure of R\$(3.9) million. As of December 31, 2006 our total debt denominated in foreign currency was R\$901.0 million, including pre-export finance contracts and import payables. At the same date our total asset position in foreign currency was R\$897.1 million, composed of investments indexed to U.S. dollars and swap instruments used to manage fluctuations of exchange rates and foreign currency receivables exposures. See footnote 8 under Item 3A. Selected Consolidated Financial Data for a more complete discussion of net cash (debt) and its reconciliation to information in our financial statements.

*Non-operating income (expense), net.* We reported a net non-operating expense of R\$18.5 million for the year ended December 31, 2006 compared to a net non-operating expense of R\$1.8 million for the year ended December 31, 2005. This net expense is primarily attributable to (i) the write-off of deferred assets related to studies and projects in the amount of R\$13.7 million, and (ii) the result on the sale of property, plant and equipment, mainly gas cylinders and vehicles, and allowance for losses of investments in the amount of R\$4.8 million.

*Income and social contribution taxes.* Income and social contribution tax expenses amounted to R\$56.1 million for the year ended December 31, 2006, an increase of 95% from R\$28.8 million for the year ended December 31, 2005. This increase is primarily due to higher pre-tax profit for Ultragaz, which is subject to greater tax rates than Oxiteno and Ultracargo, and a decrease in non-taxable revenues.

*Minority interest/equity in earnings of affiliates.* Minority interest and equity in earnings of affiliates was R\$4.3 million for the year ended December 31, 2006, compared to R\$1.2 million for the year ended December 31, 2005. Minority interest reflects our remaining minority stakes in certain subsidiaries, such as Utingás Armazenadora S.A. and Cia. Ultragaz S.A., which are not wholly owned by us.

*Net income.* As a result of the foregoing, net income for the year ended December 31, 2006 was R\$282.1 million, a decrease of 6% compared to R\$299.2 million for the year ended December 31, 2005.

*Adjusted EBITDA.* Adjusted EBITDA decreased by 5% to R\$516.2 million for the year ended December 31, 2006, from R\$546.0 million for the year ended December 31, 2005. Ultragaz reported adjusted EBITDA of R\$280.5 million for the year ended December 31, 2006, a 44% increase compared to 2005, primarily due to benefits coming from the company's distribution structure review and the improvement in the Brazilian LPG market. Oxiteno's adjusted EBITDA amounted to R\$191.6 million for the year ended December 31, 2006, a 36% decrease compared to 2005. This decrease was principally attributable to (i) the appreciation of the *real* and (ii) the increase in the cost of raw materials, especially ethylene, driven by higher oil prices. Ultracargo reported adjusted EBITDA of R\$38.0 million for the year ended December 31, 2006, a 14% decrease compared to R\$44.3 million in 2005, principally as a result of extraordinary costs and expenses as a result of discontinuing certain transport operations with lower aggregate value. See footnote 7 under Item 3A. Selected Consolidated Financial Data for a more complete discussion of adjusted EBITDA and its reconciliation to information in our consolidated financial statements.

On March 19, 2007 Ultrapar announced the Acquisition, the first phase of which, the purchase of the voting shares from the Key Shareholders of the Target Companies, was completed on April 18, 2007. See Item 4A. History and Development of the Company Recent developments for more information about the Acquisition and Item 5.A. Operating and Financial Review and Prospects Effects on Our Future Results of Operations Acquisition of the Ipiranga Group for more information on the effects of this transaction on our future results of operations.

**Table of Contents****Year ended December 31, 2005 compared to the year ended December 31, 2004.**

The following table shows a summary of our results of operations for the years ended December 31, 2005 and 2004:

|                                                    | Year ended<br>December 31,<br>2005 | Percentage of<br>net sales and<br>services<br><br>(in millions of <i>reais</i> , except percentages) | Year ended<br>December 31,<br>2004 | Percentage of<br>net sales and<br>services | Percent<br>change |
|----------------------------------------------------|------------------------------------|------------------------------------------------------------------------------------------------------|------------------------------------|--------------------------------------------|-------------------|

(1) See footnote 7 under Item 3A. Selected Consolidated Financial Data for a more complete discussion of adjusted EBITDA and its reconciliation to information in our financial statements.

*Net sales and services.* Net sales and services for the year ended December 31, 2005 decreased to R\$4,693.8 million from R\$4,784.2 million for the year ended December 31, 2004.

The following table illustrates the change in sales in each of our segments:

|            | Year ended<br>December 31,<br>2005 2004<br>(in millions of<br><i>reais</i> ) |         | Percent<br>change |
|------------|------------------------------------------------------------------------------|---------|-------------------|
| Ultragaz   | 2,902.4                                                                      | 2,968.1 | (2)%              |
| Oxiteno    | 1,610.1                                                                      | 1,662.7 | (3)%              |
| Ultracargo | 234.2                                                                        | 197.3   | 19%               |

Ultragaz net sales and services were R\$2,902.4 million for the year ended December 31, 2005, a decrease of 2% compared to R\$2,968.1 million for the year ended December 31, 2004. The decrease in net sales was largely driven by the 1% lower sales volume and the effect of a retraction in the Brazilian LPG market.

Oxiteno's net sales and services decreased to R\$1,610.1 million for the year ended December 31, 2005, a 3% reduction compared to R\$1,662.7 million for the year ended December 31, 2004. The decrease in Oxiteno's net sales and services was mainly due to the 17% appreciation in the Brazilian *real* against the U.S. dollar in 2005 compared to 2004, since prices at Oxiteno are benchmarked to prices prevailing in the international markets. The appreciation of the *real* was partially offset by an improvement in sales mix, with sales growth in the domestic market. Domestic sales grew as a function of the increased market share in the customers served by Oxiteno, mainly in the cosmetics and detergents, paints and varnishes and polyester industries.

Ultracargo's net sales and services increased to R\$234.2 million for the year ended December 31, 2005, a growth of 19% compared to R\$197.3 million for the year ended December 31, 2004. This increase in net sales and services reflects an increased volume of operations and contractual

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

tariffs readjustments. Ultracargo's average stored volumes of liquids and gases increased by 8% for the year ended December 31, 2005 compared to the same period in 2004, largely as a result of a growth in its number of customers and the commencement of operations of the Santos Terminal in July 2005 and the Montes Claros Terminal in November 2004. Total kilometers traveled by Ultracargo's transport segment increased by 5% for the year ended December 31, 2005 compared to 2004.

*Cost of sales and services.* Cost of sales and services increased by 3% to R\$3,783.4 million for the year ended December 31, 2005, compared to R\$3,669.9 million for the year ended December 31, 2004.

A-68

**Table of Contents**

Ultragaz cost of sales and services were nearly unchanged at R\$2,530.8 million for the year ended December 31, 2005, compared to R\$2,519.8 million for the year ended December 31, 2004, despite a 1% decrease in sales volume, primarily as a result of the increases in the cost of fuel and freight.

Oxiteno's cost of sales and services rose by 8% to R\$1,150.7 million for the year ended December 31, 2005 from R\$1,069.0 million in 2004. This increase was mainly due to (i) an increase in the cost of raw materials, particularly ethylene, arising from higher oil prices and (ii) the growth in sales volumes.

Ultracargo's cost of sales and services increased 24% to R\$154.9 million for the year ended December 31, 2005 from R\$125.0 million for the year ended December 31, 2004. This increase was principally attributable to its new operations in Santos and Montes Claros intermodal terminals and was constituted of (i) a R\$10.9 million increase in third-party freight costs and costs of fuel, tires and spare parts (ii) a R\$9.6 million increase in depreciation due to an increase in permanent assets and (iii) a R\$3.2 million increase in personnel costs under its annual collective wage agreements and expansion in the size of the workforce to staff its new operations.

*Gross profit.* Gross profit decreased by 18% to R\$910.4 million for the year ended December 31, 2005 from R\$1,114.3 million for the year ended December 31, 2004. Ultragaz gross profit was R\$371.6 million for the year ended December 31, 2005, 17% lower than the gross profit of R\$448.3 million reported in 2004. Oxiteno's gross profit was R\$459.4 million for the year ended December 31, 2005, a 23% decrease compared with R\$593.7 million in 2004. Ultracargo's gross profit was R\$79.3 million for the year ended December 31, 2005, a 10% increase compared with R\$72.3 million in 2004.

*Selling, general and administrative expenses.* Our selling, general and administrative expenses decreased by 1% to R\$551.7 million for the year ended December 31, 2005 from R\$555.9 million for the year ended December 31, 2004.

Ultragaz selling, general and administrative expenses decreased by 2% to R\$291.9 million for the year ended December 31, 2005 from R\$298.2 million for the year ended December 31, 2004. This decrease reflects (i) a decrease of 1% in sales volume; (ii) expense rationalization programs and optimization initiatives developed during the year; and (iii) lower provision for employee profit sharing.

Oxiteno's selling, general and administrative expenses decreased by 5% to R\$203.3 million for the year ended December 31, 2005 from R\$213.1 million in 2004, principally as a result of (i) lower provision for employee profit sharing and (ii) lower export freight expenses due to lower export sales.

Ultracargo's selling, general and administrative expenses rose 22% to R\$61.9 million for the year ended December 31, 2005 from R\$50.8 million in 2004. General and administrative expenses increased R\$11.0 million, principally as a result of (i) higher operational volume and (ii) wage increases in accordance with the terms of its annual collective wage agreements.

*Operating income before financial items.* Our operating income before financial items decreased by 36% to R\$358.3 million for the year ended December 31, 2005 from R\$563.9 million for the year ended December 31, 2004. This was mainly due to the decrease in Ultragaz and Oxiteno's operating results. Ultragaz operating income before financial items for the year ended December 31, 2005 was R\$77.8 million, a 49% decrease compared to R\$152.7 million in 2004. At Oxiteno, operating income before financial items was R\$257.9 million for the year ended December 31, 2005, a 33% decrease compared to R\$382.9 million in 2004. Ultracargo's operating income before financial items was R\$17.2 million for the year ended December 31, 2005, a 25% decrease compared to the R\$23.0 million in 2004.

*Financial income (expense), net.* We reported net financial expenses of R\$27.3 million for the year ended December 31, 2005, a decrease of 39% compared to a net financial expense of R\$45.0 million for the year ended December 31, 2004. The R\$17.7 million improvement was principally due to the R\$56.7 million increase in interest income from financial investments, as a result of our higher average cash position, which was partially offset by the R\$39.1 million increase in interest expenses.

**Table of Contents**

As of December 31, 2005, we had a net cash position of R\$191.2 million and a net asset foreign exchange rate exposure of R\$13.6 million. As of December 31, 2005 our total liabilities denominated in foreign currency was R\$860.3 million, including pre-export finance contracts and import payables. At the same date our total asset position in foreign currency was R\$873.9 million, composed of investments indexed to U.S. dollars and swap instruments used to manage fluctuations of exchange rates and foreign currency receivables exposures. See footnote 8 under Item 3A. Selected Consolidated Financial Data for a more complete discussion of net cash (debt) and its reconciliation to information in our financial statements.

*Non-operating income (expense), net.* We reported a net non-operating expense of R\$1.8 million for the year ended December 31, 2005 compared to a net non-operating expense of R\$16.0 million for the year ended December 31, 2004. This net expense is primarily attributable to the scrapping of storage cylinders by Ultragaz in both periods.

*Income and social contribution taxes.* Income and social contribution tax expenses amounted to R\$28.8 million for the year ended December 31, 2005, a decrease of 65% from R\$83.0 million for the year ended December 31, 2004. This decrease is primarily due to lower pre-tax profit and an increase in non-taxable revenues.

*Minority interest/equity in earnings of affiliates.* Minority interest and equity in earnings of affiliates was R\$1.2 million for the year ended December 31, 2005, compared to R\$5.4 million for the same period in 2004. Minority interest reflects remaining minority stakes in certain of our subsidiaries, such as Utingás Armazenadora S.A. and Cia. Ultragaz S.A., which are not wholly owned by us. The decrease in minority interest for the year ended December 31, 2005 compared to 2004 is due to a decrease in the results of operations of these subsidiaries. In addition, Ultrapar invested R\$10.0 million to acquire a 7.3% interest in Companhia Ultragaz held by Nacional Investimentos S.A. in December 2004, which reduced minority interests in the company.

*Net income.* As a result of the foregoing, net income for the year ended December 31, 2005 was R\$299.2 million, a decrease of 28% compared to R\$414.5 million in 2004.

*Adjusted EBITDA.* Adjusted EBITDA decreased by 26% to R\$546.0 million for the year ended December 31, 2005, from R\$736.6 million for the year ended December 31, 2004. Ultragaz reported adjusted EBITDA of R\$195.1 million for the year ended December 31, 2005, a 27% decrease compared to 2004, driven by the reduction of 1% in the LPG market and the impact of oil price increases on the company's distribution costs. Oxiteno's adjusted EBITDA amounted to R\$300.2 million for the year ended December 31, 2005, a 29% decrease compared to 2004. This decrease was principally attributable to the appreciation of the *real* and the increase in the cost of raw materials, especially ethylene, driven by higher oil prices. Ultracargo reported adjusted EBITDA of R\$44.3 million for the year ended December 31, 2005, a 9% increase compared to R\$40.5 million in 2004, principally as a result of expansion in operational volume. See footnote 7 under Item 3A. Selected Consolidated Financial Data for a more complete discussion of adjusted EBITDA and its reconciliation to information in our consolidated financial statements.

**B. Liquidity and Capital Resources**

Our principal sources of liquidity are cash generated from operations and financing. We believe that these sources will continue to be sufficient to satisfy our current funding requirements, which include, but are not limited to, working capital, capital expenditures, amortization of debt and payment of dividends.

From time to time, we examine the opportunities for acquisitions and investments. We consider different types of investments, either direct or through subsidiaries, joint ventures, or affiliated companies. We finance such investments using cash generated from our operations, through funding raised in the capital markets, through capital increases or through a combination of these methods.

**Sources and uses of funds**

Net cash flow from operations was R\$384.3 million, R\$410.0 million and R\$539.6 million for 2006, 2005 and 2004, respectively. Our cash flow from operations decreased by R\$25.7 million in 2006 compared to 2005 and R\$129.6 million in 2005 compared to 2004, mainly reflecting the decrease in our net income. Net cash flow from

---

**Table of Contents**

financing activities amounted to R\$(183.6) million, R\$762.0 million and R\$(176.8) million in the years ended December 31, 2006, 2005 and 2004, respectively. The decrease in cash flow from financing activities in 2006 compared to 2005 reflects no major new debt issuances in 2006. The increase in cash flow from financing in 2005, compared to 2004 was mainly due to the issue of (i) R\$300 million in debentures in the domestic market in April 2005 and (ii) US\$250 million in notes in the international market in December 2005.

Investing activities consumed net cash of R\$915.5 million, R\$676.3 million and R\$303.1 million in the years ended December 31, 2006, 2005 and 2004, respectively. Acquisitions of property, plant and equipment and additions to intangible assets and deferred charges consumed R\$339.6 million, R\$230.7 million and R\$273.7 million in 2006, 2005 and 2004, respectively. For the year ended December 31, 2006, investing activities were mainly composed of fixed asset modernization and expansion of production capacity for specialty chemicals.

We made several acquisitions during the period presented in this annual report which are reflected in our results from operations and financial condition. The acquisition of ownership interests, including the acquisitions of Nacional Investimentos S.A.'s interest in Ultragas and the operating assets of Rhodia Especialidades Mexico in 2004 used cash of R\$18.4 million. None of these acquisitions is significant as defined in Rule 11-01(b) of Regulation S-X of the Securities Act of 1933, as amended. For more information on our investments and capital expenditures, see Item 5.B. Liquidity and Capital Resources Investments.

We believe we have sufficient working capital for our present requirements. We have R\$167.9 million in debt maturing from January 2007 through December 2007. Additionally we have a R\$546 million capital expenditures budget for 2007.

On December 20, 2005, we issued US\$250 million in notes with a ten-year term in the international capital markets. The proceeds from these notes will be used to refinance existing debt obligations, extend maturities, fund potential acquisitions and for general corporate purposes.

As of December 2006, we had R\$1,670.4 million in cash, cash equivalents, short-and long-term investments.

We anticipate that we will spend approximately R\$3.1 billion in the next five years to meet long-term contractual obligations described in the Tabular Disclosure of Contractual Obligations below and budgeted capital expenditures. We expect to meet these cash requirements through a combination of cash generated from operating activities and cash generated by financing activities, including new debt financing and the refinancing of some of our indebtedness as it becomes due.

Additionally, in connection with the Acquisition, we anticipate that we will spend approximately R\$0.9 billion during 2007, as follows:

Approximately R\$0.7 billion paid in April 18, 2007 for the shares owned by the Key Shareholders, which was financed primarily with proceeds from the first tranche of the issuance of debentures in Brazil totaling R\$675 million; and

Approximately R\$0.2 billion to be paid in connection with the tender offers for the voting shares of minority shareholders of the Ipiranga Group, which will be financed primarily with proceeds from the second tranche of the issuance of debentures in Brazil totaling R\$214 million.

After the completion of the Separation of the Assets of Ipiranga among Ultrapar, Petrobras and Braskem, as described in, Petrobras and Braskem will pay Ultrapar approximately R\$1.7 billion cash for the assets they will receive and for the 54 million shares that Ultrapar will issue to complete the Share Exchange Transactions. See Item 4.B. Information on the Company Business Overview History and Development of the Company Recent Events.

**Table of Contents****Indebtedness**

As of December 31, 2006, our consolidated short-and long-term debt was as follows:

| Indebtedness*                                           | Currency    | Interest Rate(1)        | Principal amount of outstanding and accrued interest through December 31, |                |              |
|---------------------------------------------------------|-------------|-------------------------|---------------------------------------------------------------------------|----------------|--------------|
|                                                         |             |                         | 2006                                                                      | 2005           | 2004         |
| (in millions of reais)                                  |             |                         |                                                                           |                |              |

(2) Net of linked operations.

(3) UMBNDES is based on the average currency basket of the BNDES. The currency basket is a composition of all BNDES foreign currency debts.

(4) MX\$ is the Mexican currency and TIIE is the Mexican interbank interest rate.

(5) TJLP (Long-Term Interest Rate) is a nominal rate of interest established quarterly. On December 31, 2006, TJLP was fixed at 6.85% p.a.

(6) IGPM is the General Market Price Index in Brazil.

**Table of Contents**

Our consolidated debt as of December 31, 2006 had the following maturity schedule:

| Maturity                             | Amount<br>(in millions of reais) |
|--------------------------------------|----------------------------------|
| January 1, 2007 to December 31, 2007 | 167.9                            |
| January 1, 2008 to December 31, 2008 | 529.3                            |
| January 1, 2009 to December 31, 2009 | 101.5                            |
| January 1, 2010 to December 31, 2010 | 37.4                             |
| January 1, 2011 to December 31, 2011 | 21.7                             |
| Thereafter                           | 691.9                            |
| <b>Total</b>                         | <b>1,549.7</b>                   |

As of December 31, 2006, R\$42.7 million of our consolidated debt was secured by property, plant and equipment, R\$7.0 million was secured by shares of affiliated companies and by guarantees provided by minority shareholders. As of December 31, 2006, we guaranteed a portion of our subsidiaries' indebtedness in the amount of R\$1,073.1 million.

**Ultragaz notes.** In June 1997, Ultragaz issued US\$60 million in notes (the "Original Notes") maturing in 2005. In June 2005, maturity was extended to June 2020, with put/call options in June 2008.

In June 2005, Oxiteno's subsidiary Oxiteno Overseas Corp., or Oxiteno Overseas, acquired the full amount of Original Notes issued by Ultragaz, with funds from a syndicated loan in the amount of US\$60 million with maturity in June 2008 and interest rate of 5.05% per year. The syndicated loan was guaranteed by the Company and the subsidiary Oxiteno.

In April 2006, Oxiteno Overseas sold the Original Notes to a financial institution. Concurrently, the subsidiary acquired from this financial institution a credit linked note backed by the Original Notes, as mentioned in Note 5 to our consolidated financial statements, thus obtaining an additional return on this investment. The transaction matures in 2020, and either Oxiteno or the financial institution may redeem it early, although the subsidiary has only an annual option of redemption (purchase) from June 2008 onward. In the event of insolvency of the financial institution, Ultragaz would be required to settle the Original Notes, although Oxiteno Overseas would continue to be creditor of the credit linked note. Thus, the Company is no longer eliminating the Original Notes from its financial statements.

**LPG International Notes.** In December 2005, Ultragaz's subsidiary, LPG International Inc., issued notes in the amount of US\$250 million, maturing in December 2015, with annual interest rate of 7.25% paid semiannually, with the first payment made in June 2006. The issue price was 98.75% of the notes' face value, which represented a total yield for investors of 7.429% per year upon issuance. The notes were guaranteed by the Company and Oxiteno.

As a result of the issuance these notes and the syndicated loan, the Company and its subsidiaries mentioned above are subject to covenants that, among other things:

limit transactions with shareholders that hold 5% or more of any class of Capital Stock of the Company, except upon fair and reasonable terms no less favorable to the Company than could be obtained in a comparable arm's-length transaction with a third-party;

require board approval for transactions with related parties totaling more than US\$15 million (except transactions with or between subsidiaries);

restrict the sale of all or substantially all assets of the Company and its subsidiaries;

**Table of Contents**

restrict encumbrances on assets in excess of US\$150 million or 15% of the value of consolidated tangible assets;

require us to maintain a ratio between consolidated net debt and consolidated EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization) of no more than 3.5; and

require us to maintain a ratio between consolidated EBITDA and consolidated net financial expenses of at least 1.5.

The restrictions imposed on the Company and its subsidiaries are customary for transactions of this nature and have not limited their abilities to conduct their businesses to date.

***Indebtedness related to the Ipiranga Group***

In connection with the Acquisition, Ultrapar will also assume the net debt of CBPI and DPPI, which, as of December 31, 2006, consisted of:

R\$706 million in gross financial debt, primarily comprised of R\$350 million in debentures issued in 2006 in Brazil, with a 5-year term, at 103.8% of the CDI rate and approximately R\$120 million in notes held overseas and due in 2008, with a 9.875% coupon;

R\$194 million related to pension funds, dividends payable and other contingencies; and

R\$327 million in cash, cash equivalents and receivables from related parties.

Additionally, Ultrapar's payment in the Acquisition will be financed by the issuance of debentures in Brazil, as described above in Item 5.B. Liquidity and Capital Resources Sources and uses of funds.

**Investments*****Equity investments***

The table below shows our investments in shareholding stakes for the years ended December 31, 2006, 2005 and 2004. For more details on these acquisitions see Item 4.A. Key Information History and Development of the Company Investments.

| <b>Total capital expenditures, net of disposals</b> | <b>318.9</b>              | <b>218.7</b> | <b>267.7</b> |

(1) Includes expenditures related to maintenance of our headquarters which is performed by our wholly owned subsidiary Imaven Imóveis e Agropecuária Ltda.

At Ultragaz, our investment strategy has been to expand the small bulk delivery distribution, enhance our assets and to consolidate our geographic coverage. During the years ended December 31, 2006, 2005 and 2004, investments focused on expanding the small bulk market segment (UltraSystem), on fleet renewal and on the replacement of cylinders.

At Oxitenó, during the years ended December 31, 2006, 2005 and 2004, capital expenditures were largely focused on increasing installed production capacity of specialty chemicals, including the construction of fatty alcohols plant in Camaçari, the modernization of industrial plants, and the development of new products.

At Ultracargo, during 2006 we have invested in expanding the Suape terminal and in the maintenance of our existing storage facilities and truck fleet. For the years ended December 31, 2005 and 2004, Ultracargo's capital expenditures focused on the construction of the Santos terminal and on fleet expansion.

The investment plan for 2007 has a total budget of R\$546 million, R\$414 million to be invested in Oxitenó, R\$100 million in Ultragaz and R\$31 million in Ultracargo. Investments at Oxitenó consist of (i) the completion of the fatty alcohols plant, whose opening is scheduled for late 2007, (ii) expansion of ethylene oxide production capacity – a significant part of the expansion of the unit in Mauá and the start of an expansion in Camaçari – and (iii) expansion in the production capacity of specialty chemicals. At Ultragaz, in addition to the investments started in 2006, other investments will be made in information technology to support its distribution structure review program, whereby it implemented a series of initiatives aiming at improving its profitability, including the redesign of its distribution structure in order to optimize its logistics assets, the implementation of new tools for sales channels management and the closing of facilities, among others. At Ultracargo, investments will be allocated to the expansion of its assets, particularly the Aratu terminal in Bahia, which will store palm oil, the main raw material for Oxitenó's new fatty alcohols plant. Ultracargo will also continue to invest in information technology.

**Investments in Connection with the Ipiranga Group**

See Item 4.A. Information on the Company – History and Development of the Company – Recent Developments for more information about Ultrapar's investment in the acquisition of the Ipiranga Group.

The 2007 capex budget for Ipiranga's business that Ultrapar will retain following completion of the Acquisition is approximately R\$200 million.

**U.S. GAAP reconciliation**

Our net income under Brazilian GAAP was R\$282.1 million, R\$299.2 million and R\$414.5 million for the years ended December 31, 2006, 2005 and 2004, respectively. Under U.S. GAAP, we had net income of R\$280.5 million, R\$288.9 million and R\$413.3 million, respectively, for the years ended December 31, 2006, 2005 and 2004, respectively.

Our shareholders' equity under Brazilian GAAP as of December 31, 2006 and 2005 was R\$1,933.5 million and R\$1,790.1 million, respectively. Under U.S. GAAP, we had shareholders' equity of R\$1,872.9 million and

**Table of Contents**

R\$1,730.2 million, respectively, as of December 31, 2006 and 2005. Shareholders' equity and net income in 2004 and 2005 were retroactively adjusted to reflect changes in accounting policies as from January 2006. See Item 5.A. Operating and Financial Review and Prospects Operating Results Critical Accounting Policies and Estimates and Note 24 I(q) to our consolidated financial statements for more information regarding these changes in accounting policies.

The principal differences between Brazilian GAAP and U.S. GAAP that affect our net income and shareholders' equity relate to the treatment of the following items:

capitalized interest;

fixed assets revaluation reversal;

reversal of deferred charges;

restatement of property, plant and equipment to adjust for the effects of inflation between January 1, 1996 and December 31, 1997, and its respective depreciation, not required by Brazilian GAAP;

differences in equity accounting;

differences in goodwill accounting;

securities available for sale;

purchase value adjustments relating to business combinations (including the 2002 corporate restructuring);

fair value adjustments of derivatives; and

deferred tax effects on the foregoing adjustments.

See Note 24 to our consolidated financial statements for a description of the differences above as they relate to us and a reconciliation to U.S. GAAP of net income and total shareholders' equity.

**C. Research and Development, Patents and Licenses, etc.**

Oxiteno carries on a wide range of research and development activities, principally related to the application of specialty chemicals and improvements in production processes. As of December 31, 2006, 126 employees of Oxiteno were engaged in research and development and engineering activities. Oxiteno's research and development expenditures in 2006, 2005 and 2004 were R\$18.4 million, R\$17.4 million and R\$15.4 million, respectively. In 2004, Oxiteno founded its own Science and Technology Council (the Council) with six of the world's major specialists in tensoactives being members. The Council, which first met from December 7 to 10, 2004, analyzed critically the company's research and development projects portfolio, as well as the methodology used. Many of these recommendations will enable the company to increase its efficiency in research and development, as well as enlarge its partnerships with international entities. The Council met again in September 2005 and October 2006. In December 2005, Oxiteno signed a contract with PMD Project Management and Development Co., or PMD, a private Saudi-Arabian company with their head-office in the industrial city of Al Jubail, for the license of technologies for the production of

ethanolamines and ethoxylates. The technologies licensed by Oxiteno will be used in the petrochemical complex located in Al Jubail, currently being built by PMD. The plants that will use the Oxiteno technologies will have a production capacity of 100,000 tons/year of ethanolamines and 40,000 tons/year of ethoxylates.

**D. Trend Information**

In April 2007, we acquired Ipiranga Group's fuel distribution businesses in the South and Southeast regions of Brazil. See Item 4.A. Information on the Company History and Development of the Company Recent Developments Acquisition of the Ipiranga Group for more information about the Acquisition. See Item 5.A. Operating and Financial Review and Prospects Effects on Our Future Results of Operations Acquisition of the Ipiranga Group for more information on the effects of this transaction on our future results of operations.

**Table of Contents**

price as at December 31, 2006. On August 16, 2006, Oxiteno signed a memorandum of understanding, altering the ethylene supply contract with Braskem S.A. described above. The memorandum of understanding regulates new conditions of ethylene supply through 2021, and in 2007 and 2008, Oxiteno will receive an increased volume of ethylene, with the minimum quantity in tons increasing to 180 thousand and 190 thousand, respectively. The new condition provided for in the memorandum of understanding is reflected in the minimum purchase commitments discussed in the table above.

- (5) Our subsidiary company Terminal Químico de Aratu S.A. Indústria e Comércio has contracts with CODEBA Companhia Docas do Estado da Bahia, and Complexo Industrial Portuário Governador Eraldo Gueiros, in connection with its port facilities in Aratu and Suape, respectively. Such contracts establish a minimum cargo movement of products of 1,000,000 tons per year in Aratu, effective through 2022 and 250,000 tons per year in Suape, effective through 2027. If the annual movement is less than the minimum contractual movement, the subsidiary is liable to pay the difference between the effective movement and the minimum contractual movement based on the port tariff rates on the date established for payment. As of December 31, 2006, these rates were R\$3.67 for Aratu and R\$3.44 for Suape. The Company has been in compliance with the minimum movement of products since the inception of the contracts.

Summarized below is information regarding the business experience, areas of experience and principal outside business interest of the current members of our Board of Directors and our senior management.

*Paulo Guilherme Aguiar Cunha.* Mr. Cunha has been the chairman of our board of directors since 1998 and was our Chief Executive Officer until January 2007. Mr. Cunha was also the chief executive officer of Oxiteno from 1981 to 2006 and a member of the board of directors of Monteiro Aranha since 1997. Mr. Cunha joined Ultrapar in 1967 and was appointed vice president in 1973 and chief executive officer in 1981. Mr. Cunha has also been a member of the National Monetary Council, BNDESPAR, a subsidiary of BNDES, president of the Brazilian Association of Technical Standards ABNT, and President of IBP, the Brazilian Petroleum Institute. Mr. Cunha is a member of the consulting board of ABIQUIM, the Brazilian Chemical Industry Association, a board member of the Superior Council of Economy and of the Consultative Council for Industry of FIESP, the state of São Paulo Industry Association and ex-President of IEDI Research Institution for the Industrial Development. Mr. Cunha is also a member of the board of IBMEC Business School and of the board of IPT Technological Research Institution. Mr. Cunha received a degree in industrial mechanical engineering from Catholic University in Rio de Janeiro in 1962. Mr. Cunha also was a Professor of Engineering at the Catholic University and at the Federal University of Rio de Janeiro from 1963 to 1966.

*Lucio de Castro Andrade Filho.* Mr. Andrade Filho is the vice chairman of our board of directors since 1998. He was also vice president of Ultrapar from 1982 to 2006. He joined Ultrapar in 1977. Mr. Andrade Filho has held a number of positions with Ultrapar's subsidiaries in both the LPG as well as logistics, engineering and chemicals segments. Mr. Andrade Filho is also the chief executive officer of GLP Qualidade Compartilhada, an LPG industry association and a member of the board of directors of the Brazilian Petroleum Institute (Instituto Brasileiro de Petróleo IBP). Mr. Andrade Filho received degrees in civil engineering and in administration from Mackenzie University in São Paulo in 1968 and 1972, respectively.

*Ana Maria Levy Villela Igel.* Ms. Villela Igel joined us as a member of the board of directors in October 1998. She is also a member of the board of directors of Ultra S.A. since 1988. She has served as a secretary in the finance department at the United Nations and as a counselor for CIEE Centro de Integração Empresa Escola, an organization which assists students in transitioning to the professional environment, and as a counselor and member of the executive committee of Alumni Association Bi-National Cultural Center. She is also involved in several organizations that promote social welfare activities for children and the elderly throughout Brazil.

**Table of Contents**

*Renato Ochman.* Mr. Ochman joined us in April 2001 as a member of the board of directors. Mr. Ochman is a partner in the law firm Ochman, Real Amadeo Advogados Associados S/C and General Secretary of the Chamber of Commerce and Industry of Brazil-Israel. Mr. Ochman is a member of the Youth's Committee of the United Nations – Brazil, a member of the Board of Grendene and is also a member of the audit committee of the Association for Assistance to Handicapped Infants. Previously, Mr. Ochman taught commercial law at the Fundação Getúlio Vargas and acted as legal counsel for the Brazilian Association of Supermarkets. Mr. Ochman has obtained a law degree from the Catholic University of Rio Grande do Sul and a commercial law masters degree and post-graduate degree from the Catholic University of São Paulo.

*Nildemar Secches.* Mr. Secches joined us in April 2002 as a member of the board of directors. Mr. Secches is the chief executive officer of Empresas Perdigão since 1995. Mr. Secches is also Chairman of the board of directors of WEG S.A. From 1972 to 1990, Mr. Secches worked for Banco Nacional de Desenvolvimento Econômico e Social – BNDES, serving as an executive officer from 1987 to 1990. From 1990 to 1994, Mr. Secches served as chief executive officer of Grupo Iochpe-Maxion. Mr. Secches was chief executive officer of ABEP – Brazilian Association of Chicken Producers and Exporters and vice-president of ABIPECS – Brazilian Association of Pork Producers and Exporters Industries. Mr. Secches received a degree in mechanical engineering from the University of São Paulo, a master's degree in finance from Pontifícia Universidade Católica of Rio de Janeiro and a doctoral degree in economics from the University of Campinas (state of São Paulo).

*Paulo Vieira Belotti.* Mr. Belotti joined us in October 1998 as a member of our board of directors. Mr. Belotti has also served as chief executive officer of several companies including Petrobras Distribuidora S.A., Petrobras Mineração S.A., Petrobras Química S.A., Petrobras Comércio Internacional S.A., Petrobras Fertilizantes S.A. and Norcell S.A. He has also served as a member of the board of directors of Nordon Indústria Metalúrgica S.A. Mr. Belotti received a degree in civil engineering from the National School of Engineering at the University of Brazil, a bachelor's degree in mathematics from the University of Guanabara and a degree in nuclear engineering from Oak Ridge School of Technology in Tennessee.

*Olavo Egidio Monteiro de Carvalho.* Mr. Monteiro de Carvalho joined our company in December 2002 as a member of the board of directors. He is chairman of the board of directors of Monteiro Aranha S.A. and a member on the board of Klabin S.A. He is also a member of the Brazil-United States Business Council, member of the Brazil-Japan Conceptual Group and President of Associação Comercial do Rio de Janeiro. He holds a mechanical engineering degree from Technische Hochschule in Munich.

*Pedro Wongtschowski.* Mr. Wongtschowski has served as an officer since 1985 and took over the Chief Executive Officer position in January 2007. Mr. Wongtschowski was a member of the board of directors of Ultraprev from 1989 to 2006, and an officer of Oxiteno and Oxiteno Nordeste from 1992 to 2006. Mr. Wongtschowski was employed at our chemical fertilizer company from 1970 until 1972 and rejoined Ultrapar in 1977. Mr. Wongtschowski is a member of the Board of the Brazilian Association for Chemical Engineering, Vice-President of the board of directors of ABIQUIM, Brazilian Chemical Industries Association, and Vice-President of Latin American Petrochemical and Chemical Associations – APLA. Mr. Wongtschowski received a degree in chemical engineering, master's degree in chemical engineering and a doctoral degree in chemical engineering from the Escola Politécnica da Universidade de São Paulo. Mr. Wongtschowski is the author of the book *Indústria Química – Riscos e Oportunidades* (Chemical Industry – Risks and Opportunities), published in 2002 (2nd edition).

*André Covre.* Mr. Covre joined Ultrapar in 2003 as Corporate Planning and Investor Relations Director. Mr. Covre has been the company's Chief Financial and Investor Relations Officer since March 2007. Mr. Covre has 15 years of experience in corporate finance, mergers & acquisitions and capital markets. Mr. Covre began his career with Unisys Corp. in the United States, and was formerly a director of ABN AMRO Capital in Amsterdam, a private equity and venture capital fund. Mr. Covre holds an MBA from INSEAD, in France, and a bachelor degree in government studies from Fundação Getúlio Vargas in São Paulo.

**Table of Contents**

*Eduardo de Toledo.* Mr Toledo is an officer of Ultrapar since April 2005. He joined the company in 1987 at Ultrapar controlling area. Mr. Toledo was responsible for the treasury department between 1990 and 1996. From 1996 to 2003, he has held the position of Administrative and Controlling Officer at Oxiteno. Mr. Toledo has been Ultracargo's Chief Operating Officer since 2003. He is also Chairman of the board of directors of Odontoprev S.A. He holds Bachelor of Science degrees in Industrial Engineering (Escola Politécnica da Universidade de São Paulo) and Economics (Faculdade de Economia e Administração da Universidade de São Paulo). Mr. Toledo received a degree in the International Executive Program at INSEAD, in Fontainebleau, France in 1995. He taught, for 4 years, the subject of Introduction to Accounting and Expense at Fundação Carlos Alberto Vanzolini - Universidade de São Paulo.

*João Benjamin Parolin.* Mr. Parolin joined the company in 1986, working in Oxiteno's commercial area prior to assuming the position of Oxiteno's Chief Operating Officer. Mr. Parolin formerly served as marketing manager from 1989 to 1992 and sales manager from 1992 to 2000. From 2000 to 2006 he held the Sales Director position at Oxiteno. Prior to joining Oxiteno, he worked in the commercial area at Dow Química S.A. Mr. Parolin received a bachelor degree in chemical engineering from Escola Politécnica da Universidade de São Paulo in 1980, a post-graduation degree in Marketing Administration at Fundação Getúlio Vargas and a master's degree in business administration from Fundação Instituto de Administração - Universidade de São Paulo in 2003. As a complement to his academic background he attended the STC Skills, Tools and Competences from Fundação Dom Cabral/J.L Kellogg Graduate School of Management (Northwestern University) in 2000 and the Advanced Management Program at Wharton University in 2005.

*Pedro Jorge Filho.* Mr. Jorge is an officer of Ultrapar since April 2005. He has been with the company since 1977 and has held a number of positions with the company, including officer at Utingás and Director of Engineering and Marketing at Ultragaz. Mr. Jorge was also responsible for the southeastern and midwest regions. Mr. Jorge Filho became Ultragaz's Chief Operating Officer in 2002. He earned a degree in Industrial and Chemical Engineering from Universidade Mackenzie. He also earned a certificate from the Advanced Management Program at INSEAD, in Fontainebleau, France in 1998, and from the program HR's Contribution to Continuous Improvement at Instituto IESE of Universidade de Navarra, Barcelona, Spain in 1999.

**B. Compensation**

For the year ended December 31, 2006, the aggregate compensation of our directors and executive officers was approximately R\$15.9 million. A portion of such amount is represented by variable compensation, dependent on business performance as measured by metrics such as Economic Value Added - EVA and adjusted EBITDA. Except for the expenses related to Ultraprev - Associação de Previdência Complementar, known as Ultraprev, which manages our pension plan, we have not set aside or accrued any additional amounts for pension, retirement or similar benefits for our directors and executive officers. See Item 6.D. Employees.

On April 27, 2001, the General Shareholders' Meeting approved a plan for granting stock options ( The Stock Option Plan ) to members of management and employees in executive positions in the Company and its subsidiaries. On November 26, 2003, the Extraordinary General Shareholders' Meeting approved certain amendments to the original plan of 2001 (the Deferred Stock Plan ). In the Deferred Stock Plan, certain members of management have the voting and economic rights of preferred shares held as treasury stock and the ownership of these shares is retained by Ultrapar. The Deferred Stock Plan provides for the transfer of the ownership of the shares to those eligible members of management after ten years from the initial concession of the rights subject to uninterrupted employment of the Deferred Stock Plan participant by the Company during the period. The Board of Directors determines the number of shares to which each eligible participant shall have rights. The total number of shares to be used for the Deferred Stock Plan is subject to the availability in treasury of such shares. It is incumbent on Ultrapar's executive officers to select the members of management eligible for the plan and propose the number of shares in each case for approval by the Board of Directors. As of December 31, 2006, the amount granted to the Company's executives, including tax charges, totaled R\$12.3 million. This amount is amortized over a ten year period, the amortization for 2006 amounts to R\$0.9 million and is recorded as an operational expense for 2006.

Some of our executive officers are entitled to receive variable compensation dependent on the performance of our company stock over the course of 5 years, or until the end of 2011, payable as a cash bonus at the end of such period if the stock price appreciates at a pre-determined level. As of the date of this annual report, no compensation was paid to our executives based on such methodology.

---

**Table of Contents****C. Board Practices**

We are managed by our board of directors (i.e., Conselho de Administração) and by our executive officers (i.e., *Diretoria*). Our Board of Directors consists of seven members, of whom four are independent, non-executive members and two were executive officers until December 2006. Our Board of Directors generally meets quarterly or whenever called by its chairman or by any two directors. During 2006, ten board meetings were held. Each meeting of the Board of Directors requires a quorum of a minimum of three members, including the chairman or the vice-chairman. The Board of Directors is responsible for our general policies, for electing our executive officers and supervising their management, and for deliberating on capital increases up to the authorized capital, distributions of dividends and interest on shareholders' equity, investments in other companies, our dissolution or incorporation and the appointment of independent auditors. Pursuant to Brazilian law, each member of the Board of Directors must hold at least one of our common or preferred shares and be elected by the holders of our common or preferred shares at the General Shareholders' Meeting.

Members of the Board of Directors are elected by the common or preferred shareholders for a period of one year and may be reelected. According to Law 10,303/2001, minority shareholders that together hold common shares representing at least 15% of the voting capital, are entitled to appoint one Board member. Holders of preferred shares representing 10% or more of our capital stocks have the right to elect one member of our Board of Directors. If minority holders of our voting and preferred shares do not reach the minimum percentage required for the right to elect a member of the Board of Directors in the manners described above, they may jointly elect a single member to the Board. In this case, such shareholders should jointly represent a minimum of 10% of the corporate capital. Until the general shareholders' meeting of 2005, preferred shareholders had the right to elect a Board member from a short list of three names drawn up by the controlling shareholder. As from the general shareholders' meeting of 2006, the election of this member will be unrestricted. In 2002, we granted our minority shareholders the right to elect a member of our Board of Directors, a corporate governance change that Brazilian companies were not required to make until 2006.

Minority holders of voting shares and preferred shareholders must prove uninterrupted title to a shareholding interest in our shares for a period of at least three months immediately prior to the holding of the general shareholders' meeting in order to exercise their rights related to the election of directors.

Law 10,303/2001 granted members of the Board of Directors elected by minority holders of voting shares and/or preferred shareholders, veto powers over the appointment and dismissal of our independent auditors, provided such veto is reasonably justified.

**Executive Officers**

Our executive officers include our chief executive officer and a minimum of three and a maximum of five other members. Each of our current executive officers has been appointed by the Board of Directors for a one-year term, which began on April 25, 2007, and they may remain in office until the Board of Directors meeting that will appoint the executive officers in 2008. Sitting members can be reelected for additional one-year terms.

**Fiscal Council and Audit Committee Exemption**

Brazilian Corporate Law requires us to establish a Fiscal Council (*Conselho Fiscal*), which may have permanent or non-permanent operations. A Fiscal Council with non-permanent operations is required to be formed when requested by 10% of our voting shareholders or 5% of our non-voting shareholders in a general shareholders' meeting, but remains in place only until the following general shareholders' meeting. At such general shareholders' meeting the Fiscal Council with non-permanent operations may be reconstituted by our shareholders. In July 2005, our bylaws were revised to provide for a Fiscal Council with permanent operations. Our Fiscal Council acts as an audit committee pursuant to the requirements of the Sarbanes-Oxley Act. Under Rule 10A-3(c)(3) of the Exchange Act, non-U.S. issuers, such as Ultrapar, are exempt from the audit committee requirements of Section 303A of the New York Stock Exchange Listed Company Manual if they establish, according to their local law or regulations, another body that acts as an audit committee.

**Table of Contents**

Our Fiscal Council is constituted of five members and their respective alternate members. The Fiscal Council is a separate corporate body independent of our management and our external independent registered public accounting firm. According to the Brazilian Corporate Law, the Fiscal Council must meet at least four times per year. Since its establishment, in July 2005, our Fiscal Council has been meeting on a monthly basis, and in 2006, they held thirteen meetings. Our Fiscal Council is responsible for reviewing the accuracy and integrity of quarterly and annual financial statements in accordance with applicable accounting, internal control and auditing requirements and in compliance with the provisions of Brazilian corporate law; the forms of the CVM and requirements for listing on the BOVESPA; the rules of the SEC and the requirements for listing on the New York Stock Exchange. Our Fiscal Council also (1) makes recommendations to our board of directors regarding the appointment, retention and oversight of our independent auditors, (2) discusses matters related to interim and annual financial statements with the management of the company and the independent auditors, (3) reviews and evaluates the performance of internal auditing and (4) discusses matters related to effectiveness of the internal controls of the company with management and independent auditors. Our Fiscal Council is supporting the implementation by the company of improved procedures for receiving, retaining and addressing complaints regarding accounting, internal control and auditing matters, including the submission of confidential, anonymous complaints from employees regarding questionable accounting or auditing matters. Our Fiscal Council may hire outside advisors to assist it with matters related to the course of their duties, and such expenses are covered by the company. The members of our Fiscal Council are elected by our shareholders at the annual general shareholders meeting for one-year terms and are eligible for reelection. The terms of the members of our Fiscal Council expire at the next annual general shareholders meeting. Under the Brazilian Corporation Law, individuals who are members of our board of directors or our board of executive officers or are employees or spouses or relatives of any member of our management are not eligible to serve on the Fiscal Council. To be eligible to serve on our Fiscal Council, a person must be a resident of Brazil and either a university graduate or has been a company officer or Fiscal Council member of another Brazilian company for at least three years prior to election to our Fiscal Council.

On April 25, 2007, the General Shareholders Meeting approved compensation for the members of the Fiscal Council of R\$7,000 per month for each effective (non-alternate) member, except for the President of the Fiscal Council, whose compensation was set at R\$7,500 per month.

The following table lists the current members of our Fiscal Council and their alternates who served on the Fiscal Council during 2006:

| <b>Name</b>                                  | <b>First Year of Appointment</b> |
|----------------------------------------------|----------------------------------|
| Wolfgang Eberhard Rohrbach                   | 2005                             |
| Tania Maria Camilo (alternate)               | 2006                             |
| John Michael Pimenta de Moraes Streithorst   | 2005                             |
| Ricardo José Arruda de Negreiros (alternate) | 2005                             |
| Flavio César Maia Luz                        | 2005                             |
| Argemiro Pasetto Jr. (alternate)             | 2005                             |
| Mário Probst                                 | 2005                             |
| Katuyoshi Utiyama (alternate)                | 2005                             |
| Raul Murgel Braga                            | 2005                             |
| Pedro Ozires Predeus (alternate)             | 2005                             |

An election of the Fiscal Council was held on April 25, 2007, at which all members were reelected, except for Mr. Argemiro Pasetto Jr., who was replaced by Mr. Márcio Augustus Ribeiro. Summarized below is information regarding the business experience, areas of experience and principal outside business interests of the current members of our Fiscal Council.

## **Table of Contents**

*Flavio César Maia Luz.* Mr. Luz is our Fiscal Council member since 2005. Mr. Luz is corporate and finance Vice-President of Cofra Latin America Ltda C&A Group since 2001. From 1999 to 2001, Mr. Luz served as executive director and Vice-President of the board of directors at Eletropaulo. From 1976 to 1998, Mr. Luz worked at Duratex, where he occupied the Executive Vice-President position from 1993 to 1998. Mr. Luz received a degree in civil engineering from Escola Politécnica da Universidade de São Paulo and a post-graduate degree in business administration from Escola de Administração de Empresas de São Paulo da Fundação Getúlio Vargas. He also holds certificates of continuing education programs in Finance, Marketing and Mergers & Acquisitions, from Harvard Business School, Stanford University and Wharton Business School, respectively.

*Mario Probst.* Mr. Probst served as partner at KPMG Auditores Independentes from 1991 to 2004, and is currently retired. Mr. Probst is a member of the board of directors of Fundação Visconde de Porto Seguro, a member of the board of directors at Hospital Alemão Oswaldo Cruz and a member of the Fiscal Council at Odontoprev S.A. Mr. Probst received a degree in business administration from Escola de Administração de Empresas de São Paulo da Fundação Getúlio Vargas and accountancy from Faculdade de Ciências Políticas e Econômicas do Rio de Janeiro.

*John Michael Pimenta de Moraes Streithorst.* Mr. Streithorst manages the private equity department at Neo Gestão de Recursos Ltda. Mr. Streithorst has formerly served as partner-director of Icatu Equity Partners. Mr. Streithorst has also served as a member of the board of directors and the Fiscal Council of many companies such as Brazil Fast Food (controlling shareholder of Bob's Fast Food and listed at NASDAQ), American Glass Products, Refrigerantes Frevo and Biscoitos Mabel. He was executive officer at Idéiasnet S.A. and has formerly worked with the Capital Markets and Mergers and Acquisition departments at Banco Icatu and Banco Pactual, respectively. Mr. Streithorst received a degree in Computer Science from Universidade de Campinas Unicamp.

*Raul Murgel Braga.* Mr. Braga served as legal consultant at Ultrapar until 1992 and at Getec Group until 1997. He also served as President of Ultraprev, President of the Fiscal Council at Copene-Petroquímica do Nordeste S.A. and Globex, until March, 2002 and April, 2005, respectively, and as a member of the Fiscal Council at Oxiten S.A. until December 2002. Mr. Braga received a law degree from Faculdade Nacional de Direito da Universidade do Brasil, in Rio de Janeiro.

*Wolfgang Ebehard Rohrbach.* Mr. Rohrbach is the investment controller at Monteiro Aranha Group, and a member of the Fiscal Council of its affiliates, including Klabin S.A. Mr. Rohrbach also served as member of the Fiscal Council at Ericsson, Volkswagen do Brasil, Matel Tecnologia de Teleinformática S.A. MATEC and Oxiten S.A. Indústria e Comércio. As member of the Fiscal Council of Ericsson do Brasil he introduced the Audit Committee in the company. Mr. Rohrbach received a degree in economics from Universidade de São Paulo.

## **Corporate Governance**

We are incorporated under the laws of Brazil and we are subject to Brazilian laws related to corporate governance. Under Brazilian law, there are no regulatory requirements with respect to corporate governance such as (i) the independence of our Board of Directors, (ii) meetings of non-management directors, (iii) the establishment and composition of certain board committees or (iv) the adoption and disclosure of corporate governance guidelines or codes of business conduct and ethics. As a non-U.S. issuer we are exempt from adopting certain New York Stock Exchange corporate governance requirements and other requirements will only apply to us in the future. However, we aim to ensure that best practices, recommendations and standards of corporate governance are employed in our functioning and operations. We have adopted corporate governance guidelines, such as the requirement that a majority of the members of the Board of Directors be independent, the implementation of a code of ethics for senior officers and the implementation of the audit committee, which we believe are in compliance with applicable U.S. corporate governance requirements.

In 2000, the São Paulo Stock Exchange, or the BOVESPA, introduced three special listing segments, known as Level 1 and 2 of Differentiated Corporate Governance Practices and New Market (Novo Mercado), aiming at fostering a secondary market for securities issued by Brazilian companies with securities listed on the BOVESPA, by prompting such companies to follow good practices of corporate governance. The listing segments were designed for the trading of shares issued by companies voluntarily undertaking to abide by corporate governance practices and disclosure requirements in addition to those already imposed by Brazilian law. These rules generally increase shareholders' rights and enhance the disclosure of information provided to shareholders.

**Table of Contents**

In October 2005, we entered into an agreement with the BOVESPA and have complied with the requirements to become a Level 1 company. In becoming a Level 1 company, we have:

ensured that shares representing at least 25% of our total share capital are available for trading;

adopted offering procedures that favor widespread ownership of our shares whenever making a public offering;

complied with minimum quarterly disclosure standards;

followed stricter disclosure policies with respect to transactions involving our securities made by our controlling shareholder and our directors and executive officers;

disclosed any existing shareholders agreements and stock option plans; and

made a schedule of corporate events available to our shareholders.

**D. Employees**

As of December 31, 2006, we had 6,885 employees.

The following table sets forth our number of employees per line of business at the dates indicated.

|            | <b>Number of employees</b> |             |             |
|------------|----------------------------|-------------|-------------|
|            | <b>2006</b>                | <b>2005</b> | <b>2004</b> |
| Ultragaz   | 4,424                      | 4,424       | 4,438       |
| Oxiteno    | 1,263                      | 1,210       | 1,121       |
| Ultracargo | 981                        | 1,151       | 966         |
| Others(1)  | 217                        | 207         | 199         |
| Ultrapar   | 6,885                      | 6,992       | 6,724       |

(1) Includes headquarters personnel from the maintenance, IT, finance and accountant departments.

Ultragaz employees are covered by collective agreements with the labor unions representing the employees in the LPG industry. According to Brazilian legislation, Oxiteno's employees are represented by labor unions, and are currently covered by collective agreements, which are renewed annually.

All Ultracargo's employees are covered by a collective agreement, which incorporates clauses of a social, financial, labor union and labor relations nature signed by the companies, labor unions and employees.

In February 2001, our Board of Directors approved the adoption of a defined contribution pension plan to be sponsored by Ultrapar and each of its subsidiaries. Participating employees have been contributing to this plan, managed by Ultraprev Associação de Previdência Complementar, known as Ultraprev, since August 2001. Under the terms of the plan, every year each participating employee chooses his or her basic contribution to the plan. Each sponsoring company provides a matching contribution in an amount equivalent to each basic contribution, up to a limit of 11% of the employee's reference salary, according to the rules of the plan. As participating employees retire, they may choose to receive either (i) a monthly sum ranging between 0.5% and 1.0% of their respective contribution in Ultraprev or (ii) a fixed monthly amount which will exhaust their respective contribution over a period of 5 to 25 years. The sponsoring company does not guarantee the amounts or the duration of the benefits received by each employee that retires. The total number of participating employees as of December 31, 2006 was 5,632.

**Table of Contents****E. Share Ownership**

In accordance with our bylaws, there are two classes of capital stock authorized and outstanding, the common shares and the preferred shares, of which only the common shares have voting rights.

The table below sets forth the number of our total shares (common and preferred shares) beneficially owned by each of our directors and executive officers as of April 30, 2007, including through their participation in our controlling parent company Ultra S.A. Participações.

|                                           | Common            |     | Preferred         |    | Total             |     |
|-------------------------------------------|-------------------|-----|-------------------|----|-------------------|-----|
|                                           | Shares            | %   | Shares            | %  | Shares            | %   |
| <b>Board of directors</b>                 |                   |     |                   |    |                   |     |

(1) Parth Investments Company and Ultra-DI Participações S.A., which together hold 19.8% of our common shares, are controlled by Daisy Igel.

**Ownership and Capital Structure of Ultra S.A. Participações**

As of April 30, 2007, Ultra S.A. Participações, or Ultra S.A., owned approximately 66% of Ultrapar's voting shares. Historically, the voting stock of Ultra S.A. was owned primarily by two holding companies, Igel

**Table of Contents**

Participações S.A. and Avaré Participações S.A., owned primarily by members of the Igel family and certain members of our senior management, respectively. Igel Participações S.A. and Avaré Participações S.A. were dissolved on December 16, 2004, and the shares of Ultra owned by these companies were distributed to their respective shareholders.

As of April 30, 2007, the capital stock of Ultra S.A. was owned as follows:

|                                 | Common            |             | Preferred         |             | Total             |             |

All of the securities are held in Brazil and there are 18 record holders of these securities in Brazil.

**Shareholders Agreements**

On March 22, 2000, our controlling shareholders entered into a Shareholders Agreement designed to ensure the equal treatment of all non-controlling shareholders in the event of any change in control. On May 18, 2004, the Extraordinary General Shareholders Meeting and the Special Meeting of Preferred Shareholders approved an amendment of our bylaws to register tag along rights for all Company shareholders, at 100% of the offer price. The registration of the tag along rights in our bylaws is intended to improve on the rights already conceded through the Shareholders Agreement.

On September 22, 2004, the shareholders of Ultra S.A. entered into a new Shareholders Agreement (the New Shareholders Agreement) replacing a prior Shareholders Agreement entered into on May 22, 1997, to ensure the continuation of the controlling shareholder block upon the contemplated dissolution and distribution of Ultra S.A. shares held by its shareholders, Igel Participações S.A. and Avaré Participações S.A.

The New Shareholders Agreement has a term of five years from December 16, 2004 and provides principally that:

all shares of Ultrapar that are held by Ultra will be voted as a block;

Ultra S.A. shares will be voted in accordance with the instructions of the absolute majority of its common shares except for certain significant matters (including changes to the bylaws of either company, changes to our capital structure, mergers, material acquisitions or sales of assets, and election of Board members) which require the vote of 66% of the common shares;

Chairman of our Board of Directors must convene a meeting of, and provide all requested information and available documents to, all parties to the New Shareholders Agreement before or after any meeting of our Board of Directors considering key issues such as our strategic plan and general policies, our organizational structure, the election of executive officers, our dividend policy, and any other material decisions as determined by the Board of Directors;

A-87

---

**Table of Contents**

any party purchasing shares of Ultra S.A. must agree to be bound by the terms of the New Shareholders Agreement; and

any party to the New Shareholders Agreement may exchange his or her shares in Ultra S.A. into our preferred shares at an exchange ratio necessary to obtain the same percentage of our capital stock as was held in Ultra S.A., unless the exchange would result in (i) Ultra S.A. no longer having more than the majority of our voting shares or (ii) a violation of the number of preferred shares as a percentage of total capital stock legally permitted to be issued by us or by Ultra S.A.

**B. Related Party Transactions**

None of the members of our board of directors or executives or their family members has any direct participation in any material transaction involving the Company or that is relevant to our businesses.

Utingás bylaws provide for each of its shareholders to use a proportion of Utingás total storage capacity equal to such shareholder's proportionate ownership of Utingás. Accordingly, Ultragas is entitled to use 4.2 thousand tons of LPG storage capacity at Utingás facilities, reflecting Ultragas 56% ownership in Utingás. The amount of payments made by Ultragas to Utingás in 2006 with respect to the use of storage capacity at Utingás facilities totaled R\$3.2 million.

See Note 20 to our consolidated financial statements for a detailed breakdown of related party transactions as of December 31, 2006.

**C. Interests of Expert and Counsel**

Not applicable.

**ITEM 8. FINANCIAL INFORMATION**

**A. Consolidated Statements and Other Financial Information**

For our consolidated financial statements and notes thereto see Item 18. Financial Statements.

**Dividend and Distribution Policy**

*Dividend policy*

The bylaws of a Brazilian company may establish a minimum percentage of the profit that must be paid to shareholders as mandatory dividends. The amounts due as dividends may be paid as interest on net equity. Our bylaws provide for a mandatory distribution equal to 50% of the Distributable Amount (as defined below). In addition, until May 18, 2004, under our bylaws, the amount we distributed in respect of each preferred share was equal to 110% of the amount we distributed in respect of each of our common shares. On May 18, 2004, we held an Extraordinary General Meeting which approved amendments of our bylaws. The amendments were (i) the inclusion in our bylaws of tag along rights for all of the Company's shareholders, at 100% of the offer price, which was a provision that was previously provided for in our 2000 shareholders' agreement; and (ii) to make the dividend right of preferred shareholders equal to those of common shareholders by abolishing the right of preferred shareholders to receive dividends at least 10% higher than those received by common shareholders.

Brazilian corporate law defines the net profit as the results of the relevant fiscal year, reduced by accumulated losses of prior fiscal years, provisions for income tax and social contribution on the net profit for such fiscal year, and amounts allocated to employees' and management's participation on the results in such fiscal year. The amount available for distribution of dividends, referred to as the Distributable Amount, is the net profit, as reduced or increased by the following:

amounts allocated to the legal reserve;

**Table of Contents**

amounts allocated to the statutory reserve, if any;

amounts allocated to the contingency reserve, if required;

amounts allocated to the unrealized profit reserve;

amounts allocated to the retained profit reserve;

reversions of reserves registered in prior years, in accordance with Brazilian GAAP; and

reversions of the amounts allocated to the unrealized profit reserve, when realized and not absorbed by losses.

**Legal reserves.** We are required to maintain a legal reserve to which we must allocate 5% of our net profit until the amount of our legal reserve equals 20% of paid-in capital. We are not required to make any allocations to the legal reserve for any fiscal year in which such reserve, when added to our capital reserves, exceeds 30% of our capital stock. Accumulated losses, if any, may be charged against the legal reserve. Other than that, the legal reserve can only be used to increase our capital.

**Statutory reserves.** Under Brazilian corporate law, any corporation may create statutory reserves, in which case it shall be provided in its respective bylaws. In this case, the bylaws must also indicate the reserve purpose, allocation criteria and maximum amount of reserve. Our bylaws do not provide for, and thus we do not maintain, a statutory reserve.

**Contingency reserves.** Under Brazilian corporate law, our shareholders may decide, upon a proposal of our Board of Directors, to allocate a discretionary amount of our net profit to a contingency reserve for estimated future losses which are deemed probable. The distributable amount may be further increased by the reversal of such reserve in the fiscal year when the reasons that justified the creation of such reserve cease to exist or in which the anticipated loss occurs. Accordingly, there is no specific percentage of net profit allocable to this type of reserve.

**Unrealized profits reserves.** Under Brazilian corporate law, when the mandatory dividend amount exceeds the realized net profits in a given fiscal year, our shareholders may elect, upon a proposal of our Board of Directors, to allocate some or all of the excess dividend amount to any unrealized profits reserve. Brazilian corporate law defines realized net profits as the amount by which the Company's net profits exceed the sum of (1) its net positive results, if any, from the equity method of accounting for earnings and losses of the Company's subsidiaries and certain of its affiliates and (2) the profits, gains or returns that will be received by the Company after the end of the next fiscal year. The distributable amount is increased by the profits that were allocated to such reserve when they are realized.

**Retained profits reserve.** Under Brazilian corporate law, our shareholders may decide to retain a discretionary amount of our net profits that is provided for in a budget approved in the general shareholders' meeting, upon the proposal of its board of directors, for the expansion of our installations and other investment projects. After the conclusion of the relevant investments, we may retain the reserve until the shareholders approve the transfer of the reserve, in full or in part, to its capital or to the accumulated profits reserve. In accordance with Brazilian corporate law, if a project to which part of the reserve has been allocated has a term exceeding one year, the budget for such project must be approved by the general shareholders' meeting each fiscal year through the conclusion of the project.

Brazilian corporate law provides that all statutory allocations of net profit, including the unrealized profits reserve and the reserve for investment projects, are subject to approval by the shareholders voting at a general shareholders' meeting and may be used for capital increases or for the payment of dividends in subsequent years. The legal reserve is also subject to approval by the general shareholders' meeting and may be transferred to capital or used to absorb losses, but are not available for the payment of dividends in subsequent years.

---

**Table of Contents**

The balance for the profit reserve accounts, except for the contingency reserve and unrealized profits reserve, may not exceed the share capital. If this happens, our shareholders must determine whether the excess will be applied to pay in the subscribed and unpaid capital, to increase and pay in the subscribed stock capital or to distribute dividends.

The profits unallocated to the accounts mentioned above must be distributed as dividends.

A company is permitted to allocate to the unrealized profits reserves all income from equity gains in subsidiaries that are not distributed to the company in the form of cash dividends. When such gains are distributed to the company in the form of cash dividends, the company is required to reverse the reserve. See Item 3.D. Key Information Risk Factors Risks Relating to the Preferred Shares and ADSs. In addition to the mandatory distribution, the Board of Directors may recommend to the shareholders the payment of interim distributions from other funds that are legally available for such purposes. Any payment of an interim dividend may be set off against the amount of the mandatory dividend distribution for that fiscal year.

As an alternative form of payment of dividends, Brazilian companies may distribute interest attributed to shareholders' equity, which payments may be treated by a company as a deductible expense for income tax and social contribution purposes. Payments of interest attributed to shareholders' equity may be made at the discretion of our Board of Directors, subject to the approval of the holders of our common shares. Payments of interest attributed to shareholders' equity, net of withholding tax, may be used to satisfy a company's mandatory distribution obligation. This interest is calculated in accordance with the daily pro rata variation of the Brazilian government's long-term interest rate, (TJLP), as determined by the Central Bank from time to time, and cannot exceed the greater of:

50% of net income (after the deduction of the social contribution on profits and before the provision for corporate income tax and the amounts attributable to shareholders as net interest on equity) related to the period in respect of which the payment is made; or

50% of the sum of retained profits and profit reserves in the beginning of the period with respect to which the payment is made.

Under Brazilian corporate law, a company may suspend the mandatory distribution either in the form of dividends or payments of interest on shareholders' equity if the shareholders at the general shareholders' meeting determine, based on the Board of Directors' proposal, which is reviewed by the Fiscal Council, that payment of the mandatory distribution for the preceding fiscal year would be inadvisable in light of the company's financial condition. Our managers must report to the CVM such suspension within five days of the relevant general shareholders' meeting. Under Brazilian law, mandatory distributions that are suspended and not offset against losses in future years must be paid as soon as the financial condition of the company permits.

We declare and pay dividends and/or interest attributed to shareholders' equity, pursuant to Brazilian corporate law and our bylaws. Our Board of Directors may approve the distribution of dividends and/or interest attributed to shareholders' equity, calculated based on our annual or semi-annual financial statements or on financial statements relating to shorter periods. The amount of any distributions will depend on a series of factors, such as our financial condition, prospects, macroeconomic conditions, tariff adjustments, regulatory changes, growth strategies and other issues our Board of Directors and our shareholders may consider relevant.

For 2006 and 2005, we declared dividends to our shareholders in the amounts of R\$144 million and R\$157 million, corresponding to 51% and 53% of our net income for each period, respectively.

The following table sets forth the dividends per share distributed by us with respect to our capital stock in the past five years.

- (1) The amounts in *reais* have been converted into dollars using the exchange rates at each respective payment date.  
(2) Dividends per share were not retroactively adjusted for the stock dividend described under Item 4.B. Information on the Company Business Overview.

Holders of our preferred shares are entitled to receive dividends declared by us solely from the date of the subscription and/or acquisition of such shares.

**Payment of dividends**

Within the four months following the end of each fiscal year, our shareholders are required to hold an annual shareholders meeting to decide, among other things, on the allocation of our net profits with respect to the fiscal year ended immediately prior to the shareholders meeting and the payment of an annual dividend. Additionally, interim dividends may be declared by our Board of Directors. Under Brazilian corporate law, dividends are generally required to be paid within 60 days following the date the dividend was declared, unless a shareholders resolution sets forth another date of payment, which, in either case, must occur prior to the end of the fiscal year in which such dividend was declared. Unclaimed dividends revert to us three years after the date when we begin to pay such declared dividends.

Shareholders who are not residents of Brazil must register with the Central Bank to have dividends, sales proceeds or other amounts with respect to their shares eligible to be remitted in foreign currency outside of Brazil. The preferred shares underlying the ADSs will be held in Brazil by the Custodian, Banco Itaú S.A., as agent for the Depository. For purposes of the registration requirement, the Depository is deemed to be the stockholder of the preferred shares underlying the ADSs. The Depository will register such preferred shares with the Central Bank.

Payments of cash dividends and distributions, if any, will be made in Brazilian currency to the Custodian on behalf of the Depository. The Custodian will then convert such proceeds into U.S. dollars and will cause such U.S. dollars to be delivered to the Depository for distribution to holders of ADSs. See Description of American Depositary Receipts in our Registration Statement filed on Form F-1, declared effective on April 12, 2005. In the event that the Custodian is unable to convert immediately the Brazilian currency received as dividends into U.S. dollars, the amount of U.S. dollars payable to holders of ADSs may be adversely affected by devaluations of the Brazilian currency that may occur before such dividends are converted and remitted. See Item 3.A. Key Information Selected Consolidated Financial Data Exchange Rates and Item 3.D. Key Information Risk factors Risks Relating to Brazil. Dividends in respect of the preferred shares paid to shareholders who are not Brazilian residents, including holders of ADSs, are exempt from Brazilian withholding tax except for dividends declared based on profits generated prior to December 31, 1995. Distributions of interest on net worth are currently subject to withholding tax at a rate of 15%, or 25% in the case of a shareholder domiciled in a tax haven. See Item 10.E. Additional Information Taxation Brazilian Tax Consequences.

**Legal proceedings**

We are party to administrative proceedings and lawsuits that are incidental to the normal course of our business. We believe that our provisions for legal proceedings are sufficient to meet probable and reasonably estimable losses in the event of unfavorable court decisions and that the ultimate outcome of these matters will not have a material effect on our financial condition or results of operations. The majority of our legal proceedings are pending in the courts of the States of São Paulo, Minas Gerais, Rio de Janeiro, Rio Grande do Sul and Bahia.

---

**Table of Contents*****Labor matters***

We are involved in legal proceedings with former and current employees mainly relating to overtime, health and safety premiums and job reintegration. Although we cannot estimate the exact amount involved in these labor claims, we believe in the event they are decided against us they would not, collectively or individually, have a material adverse effect on our financial condition or results of operation. Our total payments relating to labor matters, charged as operational expenses to the consolidated statement of income, were R\$5.7 million in 2006, R\$3.0 million in 2005 and R\$4.2 million in 2004.

The Petrochemical Industry Labor Union, of which the employees of our indirect subsidiary Oxiteno Nordeste S.A. Indústria e Comércio are members, filed a lawsuit against Oxiteno Nordeste in 1990, demanding that Oxiteno Nordeste comply with salary adjustments set forth in applicable collective labor agreements, in lieu of the salary policies Oxiteno Nordeste effectively followed. The union also proposed a new collective bargaining agreement, which included an interpretation and clarification of the fourth clause of the previous collective bargaining agreement, which described the relevant salary policies that Oxiteno Nordeste was to follow. Based on the opinion of our legal counsel, who analyzed the last decision of the Federal Supreme Court (STF) on the collective bargaining agreement as well as the status of the individual lawsuit of our subsidiary regarding such agreement, our management believes that an accrual for a potential loss was not necessary as of December 31, 2006. See Note 19 (a) to our consolidated financial statements.

***Civil claims***

The civil claims against us relate mainly to accidents originated from fires or explosions of LPG cylinders and traffic accidents with Ultragaz and Ultracargo trucks.

There are also approximately 100 claims filed by former employees of Ultragaz, regarding bodily harm suits in which the plaintiffs are claiming damages for the loss of economic benefit and for pain and suffering arising from labor accidents. According to Ultragaz estimate, our exposure in any individual suit ranges from R\$30,000 to R\$250,000. Such amounts are generally covered by Ultragaz third-party insurance policies, subject to the terms of such policies. For those suits involving death or permanent disabilities, the value of the claim is established by the courts and is based on the average salary and age of the victim.

Ultragaz is a defendant in lawsuits relating to damages caused by an explosion in 1996 in a shopping mall in the city of Osasco, State of São Paulo. These lawsuits involve: (i) individual suits filed by victims of the explosion claiming damages from Ultragaz for the loss of economic benefit and for pain and suffering, (ii) indemnifications of management of the shopping mall and its insurance company, and (iii) a class action lawsuit seeking indemnification for material damages and pain and suffering for all the victims injured and deceased. Of the 58 lawsuits adjudicated through December 2006, 57 judgments were rendered in our favor, of which 16 have already been dismissed. The one unfavorable decision, which we may appeal, was for damages in the amount of R\$17,000. Ultragaz has insurance coverage for these lawsuits, and the uninsured contingent amount is R\$23.6 million. The Company has not recorded any provision for this amount, since it believes the probability of loss is remote. We believe that we have presented evidence that defective gas pipes in the shopping mall caused the accident and that Ultragaz on-site LPG storage facilities did not contribute to the explosion.

***Tax matters***

We filed suits challenging the constitutionality of several taxes applicable to us. Among the main tax matters are individual lawsuits filed by Ultragaz, Oxiteno and some of our subsidiaries against the Brazilian tax authorities contesting the increase in certain taxes introduced by Law 9,718 of November 28, 1998. We obtained injunctions to pay contributions to PIS and COFINS without the changes introduced by Law 9,718 of November 28, 1998 in its original version. The ongoing questioning refers to the levy of these taxes on sources of income other than revenues. The unpaid amounts were recorded in our financial statements, totaling R\$14.5 million as of December 31, 2006. In

**Table of Contents**

2006 final decisions were rendered in favor of subsidiaries Ultragaz, Transultra-Armazenagem e Transporte Especializado Ltda., Oxiteno and Ultraquímica Florestal Ltda. (which has been merged into Ultracargo Operações Logísticas e Participações Ltda.), and the subsidiaries reversed the existing provisions in the amount of R\$15.9 million, R\$1.3 million, R\$5.7 million and R\$0.6 million, respectively, net of attorney's fees, as financial income in the statement of income for the year. Likewise, a final decision was rendered in the lawsuit related to subsidiary Oxiteno Nordeste S.A. Indústria e Comércio. As this subsidiary had not obtained an injunction, it overpaid PIS and COFINS in prior periods. The amount of R\$26.2, related to the favorable outcome of this lawsuit, net of attorney's fees, was recorded as financial income and is being used to offset of federal taxes. Although it is a favorable precedent, the decision does not automatically apply to lawsuits filed by other companies, since each company has to await judgment of its own lawsuit. The Company has other subsidiaries whose lawsuits have not been adjudicated in the amount of R\$14.1 million, net of attorney's fees. Utingás has been challenging an ISS (service tax) assessment issued by the municipal government of Santo André, in the state of São Paulo. Utingás' legal advisors classify the risk as being low, since a significant portion of the lower-court decision on this matter was favorable to Utingás. Utingás' position is supported by the opinion of a tax specialist. The updated unprovisioned amount of the contingency as of December 31, 2006 was R\$33.4 million. We believe that a reserve for a potential loss is not currently necessary.

Oxiteno and its subsidiary Oxiteno Nordeste accrued R\$15.6 million for ICMS tax assessments that were adjudicated by lower-level administrative courts. Oxiteno and Oxiteno Nordeste are currently awaiting decision on the appeal.

On October 7, 2005, through our indirect subsidiaries in the LPG business, we filed for and obtained an injunction to support the offset of PIS and COFINS credits against other federal taxes, notably income and social contribution taxes. In accordance with this injunction, these subsidiaries have been making escrow deposits for these debits and recognizing the corresponding liability for this purpose.

On December 29, 2006 the subsidiaries Oxiteno S.A. Indústria e Comércio, Oxiteno Nordeste S.A. Indústria e Comércio, Companhia Ultragaz and Transultra Armazenamento e Transporte Especializado Ltda filed for an injunction seeking the deduction of ICMS from their PIS and COFINS tax bases.

Ultrapar and its subsidiaries filed a request for injunction seeking not to be subject to the legislation that restricted the offset of corporate income tax (IRPJ) and social contribution (CSLL) tax loss carryforwards computed through December 31, 1994 to 30% of income for the year, as well as petitioning for the full and immediate utilization of supplementary monetary adjustment based on the Consumer Price Index (IPC)/National Treasury Bonds (BTN) for 1990 (Law No. 8.200/91). We believe these to be good precedent for when there is only a postponement of payment of IRPJ and CSLL for the following years, as is the case with the Company's subsidiaries. Our legal counsel has advised us that the chances of success of a judicial challenge is possible. The contingency is estimated at R\$21.4 million.

We have other ongoing administrative and judicial proceedings. Our legal counsel classified the risks relating to these proceedings as possible and/or remote and, therefore, no reserves for potential losses relating to these proceedings have been recorded.

The table below summarizes our provisions related to legal proceedings as of December 31, 2006, 2005 and 2004:

|                                      | 2006                   | 2005        | 2004        |
|--------------------------------------|------------------------|-------------|-------------|
|                                      | (in millions of reais) |             |             |
| Income and social contribution taxes | 36.0                   | 9.3         | 2.9         |
| PIS and COFINS on other gains        | 14.4                   | 37.0        | 33.7        |
| ICMS                                 | 15.8                   | 14.5        | 9.4         |
| Other                                | 2.5                    |             | 6.1         |
| <b>Total</b>                         | <b>68.7</b>            | <b>60.8</b> | <b>52.1</b> |

**Table of Contents****Antitrust matters**

*Ultragaz in Minas Gerais.* The subsidiaries Companhia Ultragaz S.A. and SPGás Distribuidora de Gás Ltda. are parties to an administrative proceeding at the SDE ( Secretaria de Direito Econômico ), one of the Brazilian antitrust authorities, in which they have been accused of engaging in anti-competitive practices in the State of Minas Gerais in 2001. In September 2005, the SDE issued a technical notice recommending CADE to rule against the companies involved in this proceeding. We believe that there is no evidence to support the allegations of anti-competitive practices. Our defense includes, among others, that: (i) under the terms of the notice issued by the Company's chief executive officer on July 4, 2000, the subsidiaries' employees were forbidden to discuss with third parties matters related to prices and (ii) no consistent proof was attached to the proceeding's records. In view of the arguments presented by Companhia Ultragaz S.A. and SPGás Distribuidora de Gás Ltda., the fact that the technical notice has no binding effect on CADE's decision, and our legal counsel's opinion, the subsidiaries did not record a provision for this issue. Should CADE's decision be unfavorable, the issue would be brought to judicial courts.

*Acquisition of the Ipiranga Group.*

On April 17, 2007, the CADE (Administrative Council for Economic Defense) issued a writ of prevention to ensure the reversibility of the acquisitions by Braskem and Petrobras under the Acquisition. On April 25, 2007, CADE's plenary assembly approved a Transaction Reversibility Preservation Agreement (APRO - Acordo de Preservação de Reversibilidade da Operação ) with Braskem, that set forth that all the assets acquired by Braskem in the Acquisition will be preserved. With regard to the Ipiranga Group's fuel distribution business, Petrobras and Ultrapar were requested to present to CADE an alternative management model that would preserve the competition in the sector. On May 16, CADE approved an APRO with Petrobras regarding the fuel distribution business that replaced and revoked the writ of prevention issued on April 17, 2007. The APRO requests the nomination of an independent manager to administrate the distribution business that Petrobras acquired and establishes guidelines for operating the business. The APRO also imposes restrictions on Petrobras including limitations on asset sales, business reorganizations, changes in commercial policies and lay-offs. The exchange of commercial and strategic data between Ultrapar and Petrobras regarding the fuel distribution business is also restricted in order to protect free competition in the segment. The APRO remains in force until CADE's final decision. The APRO does not affect the completion of any of the steps of the Acquisition.

**B. Significant Changes**

None.

**ITEM 9. THE OFFER AND LISTING****A. Offer and Listing Details**

The table below sets forth, for the indicated periods, the high and low closing prices of the ADSs on The New York Stock Exchange, in U.S. dollars, and the preferred shares on the São Paulo Stock Exchange, in *reais*:

|                                     | New York Stock Exchange |       |           | São Paulo Stock Exchange       |       |           |

**C. Material Contracts**

**US\$60 million 9% Eurobond**

In 1997, our indirect subsidiary Companhia Ultragaz issued US\$60 million in a 9% US dollar-denominated Eurobond due in 2005 with a put/call option exercisable in 2002. We and our subsidiary Ultragaz jointly, severally and unconditionally guaranteed this Eurobond and are thus subject to covenants which restrict, among other things, our ability to incur indebtedness, constitute liens, make dividend payments and other distributions and conduct sale-leaseback transactions, mergers and asset sales. None of these covenants have restricted our ability to conduct our ordinary course of business as of the date of this annual report. This Eurobond was purchased in June 2002 by our indirect subsidiary, LPG International Inc., with funds obtained from a syndicated loan, with maturity in August 2004. In January 2004, taking advantage of surplus international liquidity, this syndicated loan was refinanced through a new Eurobond issue by LPG with the same maturity of the original bond. On June 20, 2005, we entered in to a third supplemental indenture to this bond extending its maturity to 2020. Our indirect subsidiary Oxiteno Overseas Corporation is the new holder of the Eurobond, and financed the acquisition of this bond through a US\$60 million syndicated loan maturing in June 2008, at an annual interest rate of 5.05%.

**March 22, 2000 shareholders agreement**

On March 22, 2000, our controlling shareholders entered into a shareholders agreement designed to ensure the equal treatment of all non-controlling shareholders in the event of any change in control. On May 18, 2004, the Extraordinary General Shareholders Meeting and the Special Meeting of Preferred Shareholders approved an amendment of our bylaws to register tag along rights for all Company shareholders, at 100% of the offer price. The registration of the tag along rights in our bylaws is intended to improve on the rights already conceded through the Shareholders Agreement.

**September 22, 2004 shareholders agreement**

On September 22, 2004, the shareholders of Ultra S.A. entered into a new shareholders agreement replacing a prior shareholders agreement entered into on May 22, 1997, to ensure the continuation of the controlling shareholder block upon the contemplated dissolution and distribution of Ultra S.A. shares held by its shareholders, Igel Participações S.A. and Avaré Participações S.A. For information regarding the shareholders agreements, see Item 7. Major Shareholders and Related Party Transactions Major Shareholders.

**R\$300 million aggregate amount of 102.5% of CDI debentures due 2008**

On April 8, 2005, we completed our first issue of debentures, not convertible into shares of Ultrapar, unsecured and without special privileges, amounting to R\$300 million with a term of 3 years, at a rate of 102.5% of CDI.

---

## **Table of Contents**

### **US\$250 million aggregate amount of 7.25% notes due 2015**

On December 20, 2005, Ultrapar, through its subsidiary LPG International Inc., issued US\$250 million in notes in the international market, with the aim of lengthening the company's debt profile, financing possible acquisitions and other corporate purposes. The notes mature in December 2015, have a coupon of 7.25% per annum and were priced at 98.75% of par value, resulting in a yield to maturity of 7.429% per annum. Standard & Poor's assigned its BB+ credit rating on a global scale for the company and the securities issued. The credit rating is above the credit rating of Brazilian sovereign debt and only one degree below that of investment grade. The notes:

are unsecured unsubordinated obligations of LPG International Inc., ranking equally in right of payment with all existing and future unsecured unsubordinated obligations of LPG International Inc.;

are issued in an original aggregate principal amount of US\$250,000,000 in minimum denominations of US\$100,000 of original principal amount and integral multiples of US\$1,000 above such amount;

bear interest commencing the date of issue at 7.25% per annum on the outstanding principal amount, payable semiannually on each June 20 and December 20 of each year, commencing June 20, 2006 to holders of record on June 5 or December 5 immediately preceding the interest payment date; and

bear interest on overdue principal, and pay interest on overdue interest, at 1% per annum higher than the per annum rate set forth on the cover of the offering memorandum for the notes.

The notes will be redeemable at the option of LPG International Inc. at any time or from time to time prior to their maturity, upon no more than 60 and not less than 30 days' notice to the noteholders by mail. LPG International Inc. may redeem the notes either as a whole or in part at a redemption price equal to the greater of (i) 100% of the principal amount of the notes being redeemed and (ii) the sum of the present values of each remaining scheduled payment of principal and interest thereon (exclusive of any such interest accrued to the date of redemption) discounted (for purposes of determining present value) to the redemption date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the treasury rate plus 50 basis points, plus accrued interest thereon to the date of redemption.

The guarantees for the notes are unsecured unsubordinated obligations of Ultrapar and Oxiteno, ranking equally in right of payment with all existing and future unsecured unsubordinated obligations of Ultrapar and Oxiteno.

The notes and the guarantees have the benefit of registration rights pursuant to a Registration Rights Agreement dated as of December 20, 2005, under which the notes and the guarantees will be required to be exchanged for notes and guarantees identical in terms to the original notes and guarantees except for restrictions on transfer, in a transaction registered with the Securities and Exchange Commission, prior to September 30, 2006.

The registration statement of the notes was filed on May 15, 2006 and was declared effective by the U.S. Securities and Exchange Commission on May 23, 2006. Ultrapar carried out an exchange offer for its outstanding US\$250,000,000 7.25% Notes due 2015, issued on December 20, 2005, which expired at 5:00 p.m. New York City time on June 22, 2006. At the close of the exchange offer, LPG International, Ultrapar and Oxiteno were advised by the exchange agent that an aggregate amount of US\$246,000,000 of the old notes had been tendered in exchange for an equivalent amount of new notes. All old notes tendered in exchange for new notes have been accepted and new notes have been issued to the tendering holders of such old notes. The remaining outstanding aggregate amount of old notes is US\$4,000,000.

### **Agreements Related to the Acquisition of the Ipiranga Group – the Transaction Agreements**

In March 2007, the Company entered into the Transaction Agreements that together effected its acquisition, along with Petrobras and Braskem, of the Ipiranga Group. Each Transaction Agreement is discussed briefly below and translated in full in this annual report as an exhibit.

**Investment Agreement.** The Investment Agreement executed by Ultrapar, Petrobras and Braskem on March 18, 2007 and amended on April 18, 2007 (the "Investment Agreement"), which regulates the relationship among the

**Table of Contents**

companies, is the principal Transaction Agreement. See Item 4.A, Information on the Company Recent Developments The Acquisition of the Ipiranga Group Relationship between Ultrapar, Braskem and Petrobras for more information on the Investment Agreement.

**Share Purchase Agreement.** On March 18, 2007, Ultrapar, with the consent of Petrobras and Braskem, and the Key Shareholders entered into a Stock Purchase Agreement ( SPA ), which sets forth the conditions of Acquiring Companies acquisition of a controlling stake of Ipiranga Group that closed on April 18, 2007.

**Target Companies Shareholders Agreement.** On April 18, 2007, Ultrapar, Petrobras and Braskem entered into a Target Companies Shareholders Agreement (the Target Companies Shareholders Agreement ), which sets forth the relationships among Ultrapar, Petrobras and Braskem regarding how the Target Companies businesses will be managed.

**RPI Shareholders Agreement.** On April 18, 2007, Ultrapar, Braskem and Petrobras entered into an RPI Shareholders Agreement (the RPI Shareholders Agreement ), and which sets forth the relationships among Ultrapar, Petrobras and Braskem regarding how the Oil Refining Operations will be managed.

**Braskem/Petrobras Asset Security Agreement.** On April 18, 2007, Ultrapar, Braskem and Petrobras entered into a Braskem/Petrobras Asset Security Agreement (the Braskem/Petrobras Asset Security Agreement ), whereby Ultrapar pledged to Braskem and Petrobras, in the proportions of 60% and 40%, respectively, all of its common shares and 50% of the RPI preferred shares it acquired from the Key Shareholders. The shares issued by RPI acquired in the Mandatory Tender Offers will also be pledged in favor of Braskem and Petrobras, in the same proportions. After the exchange offer of the shares of RPI, Ultrapar must ensure that the pledge of RPI s shares will be substituted by a pledge of ICQ s shares.

**Petrobras Asset Security Agreement.** On April 18, 2007, Ultrapar and Petrobras entered into a Petrobras Asset Security Agreement (the Petrobras Asset Security Agreement ), whereby Ultrapar pledged in favor of Petrobras, 31% of the common shares and 78% of the preferred shares of DPPI that it acquired from the Key Shareholders, as well as 100% of the common shares of CBPI that it acquired from the Key Shareholders. After the Mandatory Tender Offers, Ultrapar will pledge, in substitution for 1,482,751 common shares issued by DPPI, 3,013,903 common shares issued by CBPI that will be acquired, assuming that all the common shares issued by CBPI will be acquired in the Mandatory Tender Offers.

**R\$889 million aggregate amount of 102.5% of CDI debentures due 2008.** To finance part of the Acquisition, on April 11, 2007, we completed a second offering of unsecured debentures in the aggregate principal amount of R\$889 million, in two series. The first series in the amount of R\$675 million was issued on April 11, 2007. The second series in the amount of R\$214 million will be issued upon financial settlement of the Mandatory Tender Offers. For more information see Item 4.B. Information on the Company History and Development of the Company Recent Developments Acquisition of the Ipiranga Group and Item 5.B. Operating and Financial Review and Prospects Liquidity and Capital Resources . The debentures have a term of one year and a rate of 102.5% of CDI.

**Other material contracts are described in other sections of this report.**

For information regarding the acquisition of Shell Gás, see Item 4.A. Information on the Company History and Development of the Company Investments Equity Investments. For information regarding our contract with Braskem relating to the supply of ethylene, see Item 4.B. Information on the Company Business Overview Petrochemicals and Chemicals Oxiteno Raw materials, Item 5.B. Operating and Financial Review and Prospects Operating and Financial Results Liquidity and Capital Reserves Indebtedness and Item 5.F. Operating and Financial Review and Prospects Tabular Disclosure of Contractual Obligations.

**D. Exchange Controls**

There are no restrictions on ownership of our preferred shares by individual or legal entities domiciled outside Brazil. However, the right to convert dividend payments and proceeds from the sale of our shares into foreign

## Table of Contents

currency and to remit such amounts abroad is subject to restrictions under foreign investment legislation which generally require, among other things, that the relevant investment be registered with the Central Bank and the CVM.

Foreign investors may register their investment in our shares under Law 4,131 of September 3, 1962 or Resolution 2,689 of January 26, 2000, both as amended. Registration under Resolution 2,689 affords favorable tax treatment to non-Brazilian investors who are not residents in a tax haven jurisdiction (i.e. countries that do not impose income tax or where the maximum income tax rate is lower than 20%), as defined by Brazilian tax laws.

Under Resolution 2,689, non-Brazilian investors may invest in almost all financial assets and engage in almost all transactions available in the Brazilian financial and capital markets, provided that certain requirements are fulfilled. In accordance with Resolution 2,689, the definition of non-Brazilian investor includes individuals, legal entities, mutual funds and other collective investment entities, domiciled or headquartered abroad.

Under Resolution 2,689, a non-Brazilian investor must:

appoint at least one representative in Brazil, with powers to perform actions relating to its investment;

appoint an authorized custodian in Brazil for its investment;

register as a non-Brazilian investor with the CVM; and

register its foreign investment with the Central Bank.

When the investor operating under the provisions of Resolution 2,689 must be registered with the Brazilian internal revenue service ( Receita Federal ) pursuant to the latter's Regulatory Instruction 568, dated as of September 8, 2005. This registration process is undertaken by the investor's legal representative in Brazil.

Securities and other financial assets held by non-Brazilian investors pursuant to Resolution 2,689 must be registered or maintained in deposit accounts or under the custody of an entity duly licensed by the Central Bank or the CVM. In addition, securities trading is restricted to transactions carried out in the stock exchanges or through organized over-the-counter markets licensed by the CVM, except for transfers resulting from a corporate reorganization, or occurring upon the death of an investor by operation of law or will. See Item 10.E. Additional Information Taxation Brazilian Tax Consequences for more information.

Resolution 1,927 of the National Monetary Council provides for the issuance of depositary receipts in foreign markets in respect of shares of Brazilian issuers. Accordingly, the proceeds from the sale of ADSs by holders of American Depositary Receipts outside Brazil are free of Brazilian foreign investment controls and holders of ADSs who are not resident in a tax haven jurisdiction will be entitled to favorable tax treatment.

The right to convert dividend payments and proceeds from the sale of our shares into foreign currency and to remit such amounts outside Brazil is subject to restrictions under foreign investment legislation which generally requires, among other things, that the relevant investment be registered with the Central Bank. Restrictions on the remittance of foreign capital abroad could hinder or prevent the custodian for the preferred shares represented by ADSs, or holders who have exchanged ADSs for preferred shares, from converting dividends, distributions or the proceeds from any sale of preferred shares, as the case may be, into U.S. dollars and remitting such U.S. dollars abroad. Delays in, or refusal to, granting the required government approval for conversions of Brazilian currency payments and remittances abroad could adversely affect holders of ADSs.

We have obtained a certificate of registration in the name of The Bank of New York, the depositary. Pursuant to this certificate, the custodian and the depositary are able to convert dividends and other distributions with respect to the preferred shares represented by ADSs into foreign currency and to remit the proceeds outside Brazil. If a holder exchanges ADSs for preferred shares, such holder may continue to rely on the depositary's certificate of capital registration for only five business days after such exchange. After that, such holder must seek to register its investment directly with the Central Bank. Thereafter, unless the holder has registered its investment with the Central Bank, such holder may not

convert into foreign currency and remit outside Brazil the proceeds from the disposition of, or distributions with respect to, such preferred shares. Such holder generally will be subject to less favorable Brazilian tax treatment than a holder of ADSs.

---

## **Table of Contents**

Before March 14, 2005, there were two principal foreign exchange markets in Brazil, in which notes were freely negotiated but could be strongly influenced by Central Bank intervention:

the commercial rate exchange market dedicated principally to trade and financial foreign exchange transactions such as the buying and selling of registered investments by foreign entities, the purchase or sale of shares, or the payment of dividends or interest with respect to shares; and

the floating rate exchange market that was generally used for transactions not conducted through the commercial foreign exchange market.

On March 4, 2005, the National Monetary Council enacted Resolution No. 3265, pursuant to which the commercial rate exchange market and the floating rate exchange market were unified in a sole exchange market, effective as of March 14, 2005. The new regulation allows, subject to certain procedures and specific regulatory provisions, the purchase and sale of foreign currency and the international transfer of *reais* by a person or legal entity, without limitation of the amount involved, provided that the transaction is legal.

Under Brazilian law, whenever there is a serious imbalance in Brazil's balance of payments or reasons to foresee a serious imbalance, the Brazilian government may impose temporary restriction on the remittance of foreign currency abroad and on the conversion of Brazilian currency into foreign currencies. Such restrictions may hinder or prevent the custodian or holders who have exchanged ADSs for underlying preferred shares from converting distributions or the proceeds from any sale of such shares, as the case may be, into U.S. dollars and remitting such U.S. dollars abroad.

### **E. Taxation**

This description does not purport to be a comprehensive description of all of the tax considerations that may be relevant to any particular investor, including tax considerations that arise from rules of general application to all taxpayers or to certain classes of investors or that are generally assumed to be known by investors.

This summary is based upon tax laws of Brazil and the United States as in effect on the date of this annual report, which are subject to change, possibly with retroactive effect, and to differing interpretations. You should consult your own tax advisors as to the Brazilian, United States or other tax consequences of the purchase, ownership and disposition of preferred shares or ADSs, including, in particular, the effect of any non U.S., state or local tax laws.

Although there is at present no income tax treaty between Brazil and the United States, the tax authorities of the two countries have had discussions that may culminate in such a treaty. No assurance can be given, however, as to whether or when a treaty will enter into force or how it will affect the U.S. holders of preferred shares or ADSs.

### ***Brazilian Tax Consequences***

**General.** The following discussion summarizes the main Brazilian tax consequences of the acquisition, ownership and disposition of our preferred shares or ADSs, as the case may be, by a holder that is not domiciled in Brazil for purposes of Brazilian taxation and, in the case of preferred shares, has registered its investment in such securities with the Central Bank as a U.S. dollar investment (in each case, a Non-Brazilian Holder). The following discussion does not address all of the Brazilian tax considerations applicable to any particular Non-Brazilian Holder. Therefore, each Non-Brazilian Holder should consult his or her own tax adviser concerning the Brazilian tax consequences of an investment in our preferred shares or ADSs.

**Taxation of dividends.** Dividends paid by us, including stock dividends and other dividends paid in property, to the depositary in respect of the preferred shares, or to a Non-Brazilian Holder in respect of preferred shares, are currently exempted from withholding tax in Brazil to the extent that the dividends are paid out of profits as of January 1, 1996. Dividends relating to profits generated prior to January 1, 1996 may be subject to Brazilian withholding tax at varying rates, depending on the year the profits were generated.

---

**Table of Contents**

***Payments of Interest on Capital.*** Law No. 9,249, dated as of December 26, 1995, as amended, permits Brazilian corporations to make distributions to shareholders of interest on net equity, or interest attributed to shareholders' equity. These distributions may be paid in cash. Such payments represent a deductible expense from the payor's corporate income tax and social contribution tax basis. This interest is limited to the daily pro rata variation of the Federal Government's long-term interest rate, as determined by the Central Bank from time to time, and cannot exceed the greater of:

50% of net income (after the social contribution on net profits and before the provision for corporate income tax, and the amounts attributable to shareholders as interest on net equity) for the period in respect of which the payment is made; or

50% of the sum of retained profits and profits reserves as of the date of the beginning of the period in respect of which the payment is made.

Any payment of interest on capital to shareholders (including holders of ADSs in respect of preferred shares) is subject to a withholding tax at a rate of 15%, or 25% if the Non-Brazilian Holder is domiciled in a jurisdiction that does not impose income tax or where the maximum income tax rate is lower than 20% or where the local legislation imposes restrictions on disclosing the shareholding composition or the ownership of the investment (Tax Haven Holder). These payments may be included, at their net value, as part of any mandatory dividend.

To the extent that payments of interest on capital are included as part of a mandatory dividend, we are required to distribute an additional amount to ensure that the net amount received by shareholders, after payment of the applicable withholding tax is at least equal to the mandatory dividend.

Distributions of interest on net equity to foreign holders may be converted into U.S. dollars and remitted outside Brazil, subject to applicable exchange controls, to the extent that the investment is registered with the Central Bank.

We cannot assure you if our Board of Directors will determine that future distributions should be made by means of dividends or interest on capital.

***Taxation of gains.*** According to Law no. 10,833/03, the gains recognized on a disposition of assets located in Brazil, such as our preferred shares, by a Non-Brazilian Holder, are subject to income tax in Brazil. This rule is applicable regardless of whether the disposition is conducted in Brazil or abroad and/or if the disposition is made or not to an individual or entity resident or domiciled in Brazil.

As a general rule, capital gains realized as a result of a disposition transaction are the positive difference between the amount realized on the disposition of the preferred shares and the respective acquisition cost. There is a controversy regarding the currency that should be considered for the purposes of determining the acquisition cost of the investment in Brazil, more specifically if such cost of acquisition is to be determined in foreign or local currency.

Capital gains realized by Non-Brazilian Holders on the disposition of preferred shares sold on the Brazilian stock exchange (which includes the transactions carried out on the organized over-the-counter market):

are exempt from income tax, when realized by a Non-Brazilian Holder that (i) has registered its investment in Brazil before the Central Bank under the rules of the Brazilian Monetary Counsel (Registered Holder) and (ii) is not a Tax Haven Holder; and

are subject to income tax at a rate of 15% with respect to gains realized by a Non-Brazilian Holder that is not a Registered Holder (including a Non-Brazilian Holder who qualifies under Law No. 4.131) and gains earned by Tax Haven Holders that are Registered Holders.

## **Table of Contents**

A withholding income tax of 0.005% shall be applicable and can be offset against any income tax due on the capital gain.

Any other gains realized on the disposition of preferred shares that are sold on the Brazilian stock exchange:

are subject to income tax at a rate of 15% when realized by any Non-Brazilian Holder that is not a Tax Haven Holder, no matter if a Registered Holder or not; and

are subject to income tax at a rate of 25% when realized by a Tax Haven Holder, no matter if a Registered Holder or not.

In the cases above, if the gains are related to transactions conducted on the Brazilian non-organized over-the-counter market with intermediation, the withholding income tax of 0.005% shall also be applicable and can be offset against any income tax due on the capital gain.

Any exercise of preemptive rights relating to preferred shares will not be subject to Brazilian income tax. Gains realized by a Non-Brazilian Holder on the disposition of preemptive rights will be subject to Brazilian income tax according to the same rules applicable to disposition of preferred shares.

There can be no assurance that the current favorable tax treatment of Registered Holders will continue in the future.

### *Sale of ADS and preferred shares by U.S. Holders to other non-residents in Brazil*

Pursuant to Article 26 of Law No. 10,833, published on December 29, 2003, the sale of property located in Brazil involving non-resident investors is subject to Brazilian income tax as of February 1, 2004. Our understanding is that ADSs do not qualify as property located in Brazil and, thus, should not be subject to the Brazilian withholding tax. Insofar as the regulatory norm referred to in Article 26 is recent and generic and has not been tested through the administrative or judicial courts, we are unable to assure the final outcome of such discussion.

### *Gains on the exchange of ADS for preferred shares*

The exchange of ADSs for preferred shares is not subject to Brazilian tax. Non-Brazilian Holders may exchange their ADSs for the underlying preferred shares, sell the preferred shares on a Brazilian stock exchange and remit abroad the proceeds of the sale within five business days from the date of exchange (in reliance on the depositary's electronic registration), with no tax consequences.

Upon receipt of the underlying preferred shares in exchange for ADSs, Non-Brazilian Holders may also elect to register with the Central Bank the U.S. dollar value of such preferred shares as a foreign portfolio investment under the rules of the Brazilian Monetary Counsel, which will entitle them to the tax treatment referred above in connection with Registered Holders.

Alternatively, the Non-Brazilian Holder is also entitled to register with the Central Bank the U.S. dollar value of such preferred shares as a foreign direct investment under Law 4,131/62, in which case the respective sale would be subject to the tax treatment of Non-Brazilian Holders that are not Registered Holders.

### *Gains on the exchange of preferred shares for ADS*

The deposit of preferred shares in exchange for the ADSs may be subject to Brazilian income tax on capital gains if the amount previously registered with the Central Bank as a foreign investment in preferred shares (4,131 investor) or, in the case of Registered Holders, the acquisition cost of the preferred shares, as the case may be, is lower than:

the average price per preferred share on the Brazilian stock exchange on which the greatest number of such preferred shares were sold on the day of the deposit; or

## **Table of Contents**

if no preferred shares were sold on that day, the average price on the Brazilian stock exchange on which the greatest number of preferred shares were sold during the 15 preceding trading sessions.

The difference between the amount previously registered, or the acquisition cost, as the case may be, and the average price of the preferred shares, calculated as set forth above, is considered a capital gain subject to income tax at a rate of 15%, or 25% for Tax Haven Holders.

***Taxation of Foreign Exchange Transactions.*** A financial transaction tax is imposed on the conversion of *reais* into foreign currency and on the conversion of foreign currency into *reais*. Although the current applicable rate for almost all foreign currency exchange transactions is zero, the Ministry of Finance may increase the rate at any time, up to 25%. However, it may only do so with respect to future transactions.

***Taxation of Bonds and Securities Transactions.*** Law No. 8,894, dated as of June 21, 1994, created the Tax on Financial Transactions, or IOF, which may be imposed on any transaction involving bonds and securities, even if the transaction includes Brazilian stock, futures or commodities exchanges. The rate of IOF/Títulos with respect to transactions of preferred shares and ADSs is currently zero, although the executive branch may increase the rate up to 1.5% per day of the terms of the securities, but only with respect to future transactions relating to preferred shares or ADSs.

***Other Brazilian Taxes.*** Some Brazilian states impose gift and inheritance tax on gifts or bequests made by individuals or entities not domiciled or residing in Brazil to individuals or entities domiciled or residing within such states. There are no Brazilian stamp, issue, registration, or similar taxes or duties payable by holders of preferred shares or ADSs.

Contribuição Provisória sobre Movimentação Financeira, or CPMF, is imposed on bank account debits at 0.38%. Constitutional Amendment No. 42/2003 approved the continued imposition of the CPMF tax until December 31, 2007. The responsibility for the collection of the CPMF tax is borne by the financial institution that carries out the relevant financial transaction.

When the Non-Brazilian Holder transfers the proceeds from the sale or assignment of preferred shares by a currency exchange transaction, the CPMF tax will be levied on the amount to be remitted abroad in *reais*. If we perform any exchange transaction in connection with ADSs or preferred shares, we will bear the CPMF tax.

Considering that CPMF applies on the movement of funds out of the Brazilian banking accounts, the tax is not likely to apply on transactions with ADSs, except if it involves a Brazilian source of payment. Therefore, each such investor should consult its own legal and financial advisors with respect to the applicability of CPMF to its purchase as well as other tax consequences of such investment.

Non-Brazilian Holders investing in the Brazilian stock exchange are granted a CPMF exemption upon the entrance of funds into Brazil and the remittance abroad.

### ***U.S. Federal Income Tax Consequences***

The following is a discussion of the material U.S. federal income tax consequences of the acquisition, ownership and disposition of preferred shares or ADSs, but it does not purport to be a comprehensive description of all of the tax considerations that may be relevant to preferred shares or ADSs, and does not address state, local or other tax laws. The discussion applies only to holders that hold preferred shares or ADSs as capital assets for tax purposes, and does not address special classes of holders, such as dealers and traders in securities or foreign currencies, financial institutions, insurance companies, tax exempt entities, persons owning, directly, indirectly or constructively, 10% or more of our voting shares, persons holding preferred shares or ADSs as part of a hedging or conversion transaction or straddle, persons entering into a constructive sale with respect to preferred shares or ADSs, persons whose functional currency for U.S. federal income tax purposes is not the U.S. dollar, persons liable for alternative minimum tax, partnerships or other entities classified as partnerships for U.S. federal income tax purposes, or persons who have ceased to be United States citizens or to be taxed as resident aliens, or persons who acquired our ADSs or preferred shares pursuant to the exercise of any employee stock option or otherwise as compensation.

## **Table of Contents**

You are advised to consult your own tax advisors concerning the overall tax consequences to you, including the consequences under foreign, state and local laws, of the acquisition, ownership and disposition of preferred shares or ADSs.

This discussion is based on the tax laws of the United States, including the Internal Revenue Code of 1986, as amended, administrative pronouncements, judicial decisions and final, temporary and proposed Treasury Regulations, all as currently in effect and changes to any of which may affect the tax consequences described herein, possibly with retroactive effect. In addition, this discussion is based in part on representations of the depositary and assumes that each obligation provided for in or otherwise contemplated by the Deposit Agreement and any other related document will be performed in accordance with its terms.

This discussion applies to you only if you are a U.S. Holder. For purposes of this discussion, a U.S. Holder is a beneficial owner of preferred shares or ADSs that is for U.S. federal income tax purposes (i) a citizen or resident of the United States of America, (ii) a corporation, or other entity taxable as a corporation, organized under the laws of the United States of America or any political subdivision thereof or (iii) an estate or trust the income of which is subject to United States federal income taxation regardless of its source. We believe, and this discussion assumes, that we are not, and will not become, a passive foreign investment company (as discussed below).

In general, U.S. Holders of ADSs will be treated for U.S. federal income tax purposes as owners of the preferred shares underlying the ADSs. Accordingly, except as noted, the U.S. federal income tax consequences discussed below apply equally to U.S. Holders of ADSs and preferred shares, and references to preferred shares should also be treated as references to ADSs. Exchanges of preferred shares for ADSs and ADSs for preferred shares will not be subject to U.S. federal income tax.

The U.S. Treasury has expressed concerns that parties to whom ADSs are pre-released may be taking actions that are inconsistent with the claiming of foreign tax credits by U.S. Holders of ADSs. Such actions would also be inconsistent with claiming the 15% rate applicable to non-corporate holders. Accordingly, the analysis of the creditability of Brazilian taxes and the availability of the 15% rate received by certain non-corporate holders, each as described below, could be affected by actions that may be taken by the parties to whom ADSs are pre-released.

***Taxation of dividends.*** Distributions paid with respect to preferred shares will be includable in the income of a U.S. Holder as ordinary dividend income to the extent paid out of current or accumulated earnings and profits of Ultrapar, as determined for U.S. federal income tax purposes. Subject to applicable limitations and the discussion above regarding concerns expressed by the U.S. Treasury, under current law, dividends received by non-corporate U.S. Holders on preferred shares or ADSs may be subject to U.S. federal income tax at lower rates (generally 15%) than other types of ordinary income. U.S. Holders should consult their own tax advisors regarding the availability of this lower tax rate in their particular circumstances. For purposes of these rules, the amount of any distribution of property other than cash will be the fair market value of such property on the date of distribution. In addition, the taxable amount of any distribution will include the amount of Brazilian tax withheld on the amount distributed, if any, and the amount of a distribution paid in *reais* will be measured by reference to the exchange rate for converting *reais* into U.S. dollars in effect on the date the distribution is received by the depositary, in the case of ADSs, or the U.S. Holder, in the case of preferred shares directly held by a U.S. Holder. The U.S. Holder may have foreign currency gain or loss if the amount of such dividend is not converted into U.S. dollars on the date of its receipt.

Dividends paid by us generally will be treated as foreign source dividend income to U.S. Holders and will not be eligible for the dividends received deduction. Subject to certain limitations, and the discussion above regarding concerns expressed by the U.S. Treasury, Brazilian withholding tax, if any, paid in connection with any distribution with respect to preferred shares may be claimed as a credit against the U.S. federal income tax liability of a U.S. Holder if such U.S. Holder elects for that year to credit all foreign income taxes; otherwise, such Brazilian withholding tax may be taken as a deduction. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. U.S. Holders should consult their own tax advisors concerning the availability and utilization of the foreign tax credit.

---

**Table of Contents**

***Taxation of capital gains.*** Gain or loss realized by a U.S. Holder upon the sale, exchange or other disposition of a preferred share or ADS will be subject to United States federal income tax as U.S. source capital gain or loss in an amount equal to the difference between the amount realized on the disposition of the preferred share or ADS and the U.S. Holder's tax basis in the preferred share or ADS. The gain or loss will be long term capital gain or loss if the U.S. Holder's holding period in the preferred share or ADS exceeds one year. If a Brazilian income tax is imposed on the sale or disposition of preferred shares or ADS, and the U.S. Holder does not receive significant foreign source income from other sources, the U.S. Holder may not be able effectively to credit such Brazilian tax against its U.S. tax liability. U.S. Holders should consult their tax advisors regarding the U.S. federal tax treatment of capital gains, which may be taxed at lower rates than ordinary income for individuals, and losses, the deductibility of which is subject to limitations.

***Passive foreign investment company.*** Special U.S. tax rules apply to U.S. Holders that own shares or ADSs in a passive foreign investment company, known as a PFIC. In general, we will be classified as a PFIC in a particular taxable year if either:

75% or more of our gross income consists of passive income, such as dividends, interest, rents and royalties; or

50% or more of our assets, by value, determined on the basis of a quarterly average, consists of assets that produce, or are held for the production of, passive income.

Based on a review of our income and assets, we believe that we are not a PFIC for U.S. federal income tax purposes and we do not expect to be a PFIC in the foreseeable future. However, since PFIC status depends upon the composition of a company's income and assets and the market value of its assets (including, among others, less than 25 percent equity investments) from time to time, there can be no assurance that we will not be considered a PFIC for any taxable year.

If we are treated as a PFIC in any taxable year during which a U.S. Holder owns preferred shares or ADSs, gain recognized by such U.S. Holder on the sale or other disposition of the preferred shares or ADSs will be allocated ratably over the U.S. Holder's holding period for the preferred shares. The amounts allocated to the taxable year of the sale or other exchange and to any year before we become a PFIC will be taxable as ordinary income. The amount allocated to each other taxable year will be subject to tax at the highest rate in effect for that year for individuals or corporations, as appropriate, and an interest charge will be imposed on the amount allocated to such taxable year. Further, any distribution in respect of the preferred shares or ADSs in excess of 125 percent of the average of the annual distributions on preferred shares or ADSs received by the U.S. Holder during the preceding three years or the U.S. Holder's holding period, whichever is shorter, will be subject to taxation as described above. Certain elections may be available (including a mark-to-market election) to U.S. persons that may mitigate the adverse consequences resulting from PFIC status.

In addition, if we are treated as a PFIC in a taxable year in which we pay a dividend or the prior taxable year, the 15% dividend rate discussed above with respect to dividends paid to non-corporate holders will not apply in that year or the next year.

***United States backup withholding and information reporting.*** Payment of dividends and other proceeds in connection with the preferred shares or ADSs made within the United States or through certain U.S.-related financial intermediaries generally are subject to information reporting and may be subject to backup withholding unless the U.S. Holder (i) is a corporation or comes within certain other exempt categories and, when required, demonstrates this fact, or (ii) in the case of backup withholding, provides a taxpayer identification number on a properly completed Internal Revenue Service Form W-9 or a substitute form and certifies that no loss of exemption from backup withholding has occurred. The amount of any backup withholding is creditable against the U.S. Holder's federal income tax liability and may entitle the U.S. Holder to a refund, provided that the required information is furnished to the Internal Revenue Service.

**G. Statement by Experts**

Not applicable.

**H. Documents on Display**

Statements contained in this annual report as to the contents of any contract or other document referred to are not necessarily complete, and each of these statements is qualified in all respects by reference to the full text of such contract or other document filed as an exhibit hereto. A copy of the complete annual report including the exhibits and schedules filed herewith may be inspected without charge at the public reference facilities maintained by the SEC at Room 1024, 450 Fifth Street, N.W., Washington, D.C. 20549, and at the SEC's regional offices located at 233 Broadway, New York, N.Y., 10279 and North Western Atrium Center, 500 West Madison Street, Suite 1400, Chicago, Illinois 60661-2511. Copies of such materials may be obtained by mail from the Public Reference Section of the SEC, 450 Fifth Street, N.W., Washington, D.C. 20549, at prescribed rates. Such reports and other information may also be inspected at the offices of the New York Stock Exchange, 11 Wall Street, New York, New York 10005, on which ADSs are listed. In addition the SEC maintains a website that contains information filed electronically with the SEC, which can be accessed over the Internet at <http://www.sec.gov>.

We are subject to the information and periodic reporting requirements of the Securities Exchange Act of 1934 as amended, and, in accordance therewith, file periodic reports and other information with the SEC. However, as a foreign private issuer, we are exempt from the rules under the Exchange Act relating to the furnishing and content of proxy statements and relating to short-swing profits reporting and liability.

We furnish to The Bank of New York, as depositary, copies of all reports we are required to file with the SEC under the Exchange Act, including our annual reports in English, containing a brief description of our operations and our audited annual consolidated financial statements which are prepared in accordance with accounting practices adopted in Brazil and include a reconciliation to U.S. GAAP. In addition, we are required under the Deposit Agreement to furnish the depositary with copies of English translations to the extent required under the rules of the SEC of all notices of meetings of holders of preferred shares and other reports and communications that are generally made available to holders of preferred shares. Under certain circumstances, the depositary will arrange for the mailing, at our expense, of these notices, other reports and communications to all ADS holders.

We also file financial statements and other periodic reports with the CVM located as Rua Sete de Setembro, 111, Rio de Janeiro, Brazil 20159-900.

**I. Subsidiary Information**

Not applicable.

**ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We are exposed to various market risks, primarily related to variable interest rates and foreign exchange rates. Market risk is the potential loss arising from adverse changes in market rates and prices, such as foreign currency exchange rates and interest rates. We do not enter into derivative financial instruments for speculative purposes. Our market risks are mitigated by our high level of financial investments.

See Notes 4, 18 and 24 I (i) to our consolidated financial statements for a discussion of the accounting policies for derivative instruments and information with respect to financial instruments.

**Table of Contents****Interest rate risk**

Substantially all of our debt obligations in *reais* are subject to variable rates of interest based on either the TJLP, the CDI interest rate or the IGP-M inflation index. Our foreign currency borrowings, however, are substantially subject to fixed rates of interest. As of December 31, 2006, we did not have any derivative contracts outstanding which could limit exposure to variations in the TJLP or the IGP-M, primarily because such instruments are not available in the Brazilian market at reasonable prices. Nevertheless, our exposure to interest rate risk is partially limited by our Brazilian currency variable interest investments, which generally earn the overnight interest rates paid on CDI. In addition to the exposure with respect to existing borrowings, we would be exposed to interest rate volatility with respect to any future debt issuance.

The table below provides information as of December 31, 2006 about our debt obligations in foreign currency and in *reais* that are subject to variable and fixed rates of interest. The table summarizes information on instruments and transactions that are sensitive to foreign currency exchange rates and interest rates:

| Debt                                    | Average interest rate | Fair value | Outstanding debt R\$<br>(in millions of <i>reais</i> ) | Principal by year of maturity* |       |       |      |                     |
|-----------------------------------------|-----------------------|------------|--------------------------------------------------------|--------------------------------|-------|-------|------|---------------------|
|                                         |                       |            |                                                        | 2007                           | 2008  | 2009  | 2010 | 2011 and thereafter |
| U.S. dollar borrowings                  | 7.2%                  | 862.0      | 841.4                                                  | 8.2                            | 137.5 | 27.9  | 2.2  | 665.6               |
| Borrowings indexed to the UMBNDES       | 9.7%                  | 13.3       | 12.9                                                   | 6.0                            | 3.8   | 2.5   | 0.6  |                     |
| Borrowings indexed to the TIIE + MX\$   | 1.5%                  | 15.8       | 15.8                                                   | 3.9                            | 4.1   | 4.1   | 2.1  | 1.6                 |
| Borrowings indexed to the TJLP          | 2.5%                  | 291.0      | 287.5                                                  | 79.6                           | 81.6  | 65.9  | 30.3 | 30.1                |
| Borrowings indexed to the CDI           | 102.5%                | 312.8      | 312.8                                                  | 12.8                           | 300.0 |       |      |                     |

| Total                                   |                       | 1,578.1    | 1,549.7                                                | 124.0                          | 573.2 | 101.5 | 37.4 | 713.6               |

\* Figures in 2007 include interest accrued until December 31, 2006.

(1) Accounts for a 15% reduction in the interest rate as a premium for complying with established payment dates.

**Foreign exchange risk**

A substantial portion of our debt obligations is denominated in U.S. dollars. In addition, a significant portion of our raw materials, are denominated in, or indexed to, U.S. dollar. Most of our revenues are denominated in *reais*, although sales prices of products of the chemicals segment are linked to international market prices established in U.S. dollars. As a result, we are exposed to currency exchange risks that may adversely affect our business, financial condition and results of operations, as well as our ability to meet our debt service obligations.

We manage the foreign exchange risks associated with the scheduled payments related to our obligations by investing in U.S. dollar-denominated assets and in foreign currency swap contracts, under which we pay variable interest in *reais* based on the interbank certificate of deposit rate, or CDI, and receive fixed interest in U.S. currency.

**Table of Contents**

The table below presents our U.S. dollar net swap position at December 31, 2006:

| Swap                                                       | Maturity         |                  | 2009 and thereafter |
|------------------------------------------------------------|------------------|------------------|---------------------|
|                                                            | 2007             | 2008             |                     |

**ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES**

Not applicable.

**PART II****ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES**

None.

**ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS**

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

At the Special Meeting of the Preferred Shareholders of Ultrapar held on May 18, 2004, our preferred shareholders approved a change in dividend rights to make the dividend right of preferred shareholders equal to those of common shareholders by abolishing the right of preferred shareholders to receive dividends that are at least 10% higher than those received by common shareholders.

A-108

## **Table of Contents**

On May 18, 2004, we held an Extraordinary General Meeting which approved amendments of our bylaws. The amendments were (i) the registration in our bylaws of tag along rights for all Company shareholders, at 100% of the offer price, a provision that was previously provided for in our 2000 shareholders' agreement; and (ii) to make the dividend right of preferred shareholders equal to those of common shareholders as described above.

On September 22, 2004, the shareholders of Ultra S.A., a holding company that controls Ultrapar, signed a shareholders' agreement that primarily aimed at maintaining the controlling shareholder block in Ultrapar. For more information, see Item 7.A. Major Shareholders and Related Party Transactions - Major Shareholders.

## **ITEM 15. CONTROLS AND PROCEDURES**

### ***(a) Disclosure Controls and Procedures***

As of December 31, 2006, under management's supervision and with its participation, including our chief executive officer and chief financial officer, we performed an evaluation of our disclosure controls and procedures for the period relating to the information contained in this 20F report. Based on this evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures are effective as of December 31, 2006 at the reasonable assurance level for the purpose of collecting, analyzing and disclosing the information that we are required to disclose in the reports we file under the Securities Exchange Act of 1934, within the time periods specified in the SEC's rules and forms. Our management necessarily applied its judgment in assessing the costs and benefits of such controls and procedures.

### ***(b) Management's Annual Report on Internal Control over Financial Reporting***

Management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act). Ultrapar's internal control system was designed to provide reasonable assurance as to the integrity and reliability of the published financial statements. All internal control systems, no matter how well designed, have inherent limitations and can provide only reasonable assurance that the objectives of the control system are met.

Management evaluated the internal control over financial reporting under the supervision of our Chief Executive Officer, or CEO and Chief Financial Officer, or CFO as of December 31, 2006. Management evaluated the effectiveness of our internal control over financial reporting based on the criteria set out in the Committee of Sponsoring Organizations of the Treadway Commission ( COSO ) framework. Ultrapar's management concluded that as of December 31, 2006, our internal control over financial reporting were adequate and effective, based on those criteria.

Our independent registered public accounting firm, Deloitte Touche Tohmatsu Auditores Independentes, has issued an attestation report on management's assessment of our internal controls over financial reporting as of December 31, 2006. The report on the audit of our internal control over financial reporting is included below.

### ***(c) Attestation Report of the Registered Public Accounting Firm***

The Report of independent registered public accounting firm on internal control over financial reporting issued by our independent registered public accounting firm, Deloitte Touche Tohmatsu Auditores Independentes, is presented below.

## **REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

To the Board of Directors and Stockholders of

Ultrapar Participações S.A.

---

**Table of Contents**

1. We have audited management's assessment, included in the accompanying Management's Report on Internal Control over Financial Reporting, that Ultrapar Participações S.A. and subsidiaries (the "Ultrapar") maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission. Ultrapar's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of Ultrapar's internal control over financial reporting based on our audit.
  2. We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States of America). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.
  3. A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the consolidated financial statements.
  4. Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.
  5. In our opinion, management's assessment that Ultrapar maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission. Also in our opinion, Ultrapar maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission.
  6. We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States of America), the consolidated financial statements as of and for the year ended December 31, 2006 of Ultrapar and our report dated January 31, 2007, except for the Notes 24 and 25 as to which the date is May 24, 2007, expressed an unqualified opinion on those financial statements.

Deloitte Touche Tohmatsu Auditores Independentes

São Paulo, Brazil

January 31, 2007, except for the control activities related to the Notes 24 and 25 of the Ultrapar's financial statements as to which the date is May 24, 2007.

***(d) Changes in Internal Control over Financial Reporting***

There have been no significant changes in our internal controls over financial reporting or other factors during the annual period covered by this Form 20-F that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

**ITEM 16. [Reserved]**

**ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT**

In July 2005, our bylaws were revised to provide for the establishment of a Fiscal Council with permanent operations constituted of no less than three and no more than five members and their respective alternate members. The Fiscal Council is a separate corporate body independent of our management and our external independent registered public accounting firm.

Our Fiscal Council acts as an audit committee pursuant to the requirements of the Sarbanes-Oxley Act. Under Rule 10A-3(c)(3) of the Exchange Act, non-U.S. issuers, such as Ultrapar, are exempt from the audit committee requirements of Section 303A of the New York Stock Exchange Listed Company Manual if they establish, according to their local law or regulations, another body that acts as an audit committee.

Ultrapar has determined that it will not appoint an audit committee financial expert. We believe that more than one of our Fiscal Council members have the skills, experience and education that qualify them to be an audit committee financial expert, as defined by current SEC rules.

**ITEM 16B. CODE OF ETHICS**

In 2004 we established a code of ethics which covered (i) the Board of Directors; (ii) the Executive Board (including the chief executive officer and the chief financial officer); (iii) the Fiscal Council of Ultrapar; (iv) the Board of Directors and Executive Board of its subsidiaries; and (v) remaining bodies with technical or advisory functions that are directly subordinated to the Board of Directors, to the Executive Board or to the Fiscal Committee of Ultrapar. In 2006 our code of ethics was modified to cover all our employees. The objective of this code is (i) to reduce the subjectivity of personal interpretations of ethical principles; (ii) to be a formal and institutional benchmark for the professional conduct of the employees, including the ethical handling of actual or apparent conflicts of interests, becoming a standard for the internal and external relationship of the Company with its stakeholders, namely: shareholders, clients, employees, partners, suppliers, service providers, labor unions, competitors, society, government and the communities in which it operates; and (iii) to ensure that the daily concerns with efficiency, competitiveness and profitability do not override ethical behavior.

You can obtain a copy of our code of ethics, free of charge, at our website ([www.ultra.com.br](http://www.ultra.com.br)), or by requesting a copy from the Investor Relations Department (e-mail: [invest@ultra.com.br](mailto:invest@ultra.com.br)).

**ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES**

The relationship with our independent auditors in respect to the contracting of services unrelated to the external audit is based on principles that preserve the independence of the auditor. Our board of directors approves our financial statements, the performance by our auditors of audit and permissible non-audit services, and associated fees, supported by our Fiscal Council, which acts as an audit committee pursuant to the requirements of the Sarbanes-Oxley Act. See Item 6.C. Directors, Senior Management and Employees Board Practices Fiscal Council and Audit Committee for more information about the responsibilities of the Fiscal Council. For the fiscal years ending December 31, 2006, 2005, 2004, 2003 and 2002, Deloitte Touche Tohmatsu Auditores Independentes ( Deloitte ) acted as our independent registered public accounting firm.

**Table of Contents**

The following table describes the total amount billed to us by Deloitte for services performed in 2006 and 2005 and the respective remuneration for these services.

|                               | 2006                    | 2005    |
|-------------------------------|-------------------------|---------|
|                               | (in thousands of reais) |         |
| Audit Fees                    | 1,430.9                 | 1,116.1 |
| Audit Related Fees            | 120.7                   | 347.1   |
| Tax Fees                      | 68.5                    | 76.1    |
| All Other Fees                |                         |         |
| Total Consolidated Audit Fees | 1,620.1                 | 1,539.3 |

Audit Fees are the aggregate fees billed by Deloitte Touche Tohmatsu for the audit of our consolidated and annual financial statements, reviews of interim financial statements and attestation services that are provided in connection with statutory and regulatory filings or engagements.

Audit-Related Fees are fees charged by Deloitte Touche Tohmatsu for assurance and related services that are reasonably related to the performance of the audit or review of our financial statements and in 2005 were principally related to audit services on the comfort letter relating to the primary and secondary offering of our preferred shares in April 2005. Tax Fees are fees for professional services rendered by Deloitte Touche Tohmatsu for tax advice services.

**ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES**

In July 2005, our bylaws were revised to provide for the establishment of a Fiscal Council with permanent operations. Our Fiscal Council also meets the requirements for exemption from audit committee independence pursuant to the requirements of the Sarbanes-Oxley Act. Under Rule 10A-3(c)(3) of the Exchange Act, non-U.S. issuers, such as Ultrapar, are exempt from the audit committee independence requirements of Section 303A of the New York Stock Exchange Listed Company Manual if they establish, according to their local law or regulations, another body that meets certain requirements. See Item 6C. Directors, Senior Management and Employees Fiscal Council and Audit Committee Exemption.

The Fiscal Council meets the following requirements of the general exemption contained in Rule 10A-3(c)(3):

the Fiscal Council is established pursuant to Brazilian Corporate Law and our bylaws;

under the requirements of Brazilian Corporate Law, our Fiscal Council is a separate body from our board of directors;

the Fiscal Council is not elected by Ultrapar's management and no executive officer of Ultrapar is a member of the Fiscal Council;

all of the members of the Fiscal Council meet the independence requirements from Ultrapar, the management and the auditors, as set forth by Brazilian Corporate Law and/or listing provisions in Brazil;

the Fiscal Council makes recommendations to our board of directors regarding the appointment, retention and oversight of the work of the independent auditors engaged for the purpose of preparing or issuing audit reports for Ultrapar;

the Fiscal Council adopted a complaints procedure in accordance with Rule 10A-3(b)(3) of the Exchange Act;

the Fiscal Council is authorized to engage independent counsel and other advisers, as it deems appropriate; and

**Table of Contents**

Ultrapar has provided for appropriate funding, as determined by the Fiscal Council, for the payment of (i) compensation to Ultrapar's auditors engaged for the purpose of issuing audit reports, (ii) compensation to independent counsel and other advisers engaged by the Fiscal Council, and (iii) ordinary administrative expenses of the Fiscal Council in carrying out its duties.

Ultrapar's reliance on Rule 10A-3(c)(3) does not, in its opinion, materially adversely affect the ability of its Fiscal Council to act independently and to satisfy the other requirements of Rule 10A-3.

**ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS**

In August 2006, the Board of Directors approved a share repurchase program with a 12-month term under which we can acquire our own preferred shares at market price and hold them in treasury for subsequent sale or cancellation. The maximum number of shares that may be repurchased is 2,723,106 shares. The total shares repurchased through December 31, 2006 under this program, were 30,800 preferred shares, as follows:

| Period                                 | Total number of shares repurchased | Average price per share in <i>reais</i> | Total number of shares repurchased as part of publicly announced plans or programs | Maximum number of shares that may yet be repurchased under the plans or program |
|----------------------------------------|------------------------------------|-----------------------------------------|------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|
| August 2, 2006 - August 31, 2006*      | 29,900                             | 36.47                                   | 29,900                                                                             | 2,693,206                                                                       |
| September 1, 2006 - September 30, 2006 | 900                                | 37.48                                   | 900                                                                                | 2,692,306                                                                       |
| October 1, 2006 - October 31, 2006     | 0                                  |                                         | 0                                                                                  | 2,692,306                                                                       |
| November 1, 2006 - November 30, 2006   | 0                                  |                                         | 0                                                                                  | 2,692,306                                                                       |
| December 1, 2006 - December 31, 2006   | 0                                  |                                         | 0                                                                                  | 2,692,306                                                                       |
| Total shares repurchased during 2006   | 30,800                             |                                         | 30,800                                                                             |                                                                                 |

\* Our share repurchase program began on August 2, 2006, before which we had no other share repurchase program that year.

**GLOSSARY OF PETROCHEMICAL INDUSTRY TERMS**

|                       |                                                                                                                                                                                                            |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Acetates              | Chemical substances derived from acetic acid, which are used as solvents in the production of paints and coatings.                                                                                         |
| Acetic Acid           | One of the largest produced organic acids and is used in the production of acetates.                                                                                                                       |
| Acrylates             | Derivatives from acrylic acid, that are used in the plastic industry.                                                                                                                                      |
| Acrylonitrile         | Derivative compounds from propylene having a nitrile group.                                                                                                                                                |
| Alcohol               | Flammable liquid obtained by fermentation of sugary substances, or by synthetics operations.                                                                                                               |
| Alcohol Sulfates      | Fatty alcohol-derived sulfates, with surfactant characteristics, mainly used in the production of detergents.                                                                                              |
| Alkanolamides         | Substances produced by reaction of fatty acids with alkanolamines, mainly used as emulsifiers in cosmetic preparation.                                                                                     |
| Alkyl Benzene         | Substance with an aromatic ring and an aliphatic chain.                                                                                                                                                    |
| Aromatics             | A major group of organic chemical compounds with a ring shaped carbon chain. Aromatics are derived chiefly from petroleum and coal tar, and used to make a broad range of downstream chemical products.    |
| Butadiene             | By-product of the cracking process; used primarily as a feedstock for synthetic rubber, elastomers and fibers.                                                                                             |
| Butyl Alcohol         | An alcohol used primarily in the production of solvents and plasticizers.                                                                                                                                  |
| Commodity Chemicals   | A term applied to chemical substances, which are sold on a generic basis and, unlike specialty chemicals, are not generally manufactured to meet specific end-use performance characteristics.             |
| Condensed Naphthalene | Polymer mainly used as a super-fluidizer and curing agent for cement preparation.                                                                                                                          |
| Crackers              | First generation companies that thermally breakdown or crack ethane, naphtha and gas oil into basic petrochemicals, such as ethylene and propylene.                                                        |
| Dispersants           | Class of chemicals whose main property is to maintain the stability of a mixture by preventing particles from settling out of the mixture.                                                                 |
| EDC                   | Ethylene Dichloride, raw material of VCM.                                                                                                                                                                  |
| Elastomer             | Broad category of rubber polymers which may be natural or synthetic, such as natural rubber, nitrile rubber and styrene-butadiene rubbers.                                                                 |
| Emulsifiers           | A class of chemical generally used to promote the dispersion of materials throughout a solution or mixture.                                                                                                |
| Ethanol               | Flammable liquid obtained by fermentation of sugary substances, largely used as fuel for vehicles.                                                                                                         |
| Ethanolamines         | Ethanolamines, comprising mono-, di-, and tri-ethanolamines, are clear, non-flammable, liquids at atmospheric pressure and room temperature conditions, and are produced from ethylene oxide and ammonium. |
| Ethers                | Organic compound with one oxygen atom interpolated between two carbon atoms.                                                                                                                               |

**Table of Contents**

|                             |                                                                                                                                                                                                                                     |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Ethoxylated Alcohol         | Produced by reaction of ethylene oxide with alcohols. Ethoxylated alcohols are used mainly as surfactants.                                                                                                                          |
| Ethoxylated Alkylphenols    | Ethoxylated alkylphenols range from clear liquids to colored solids and is produced by the reaction of ethylene oxide with alkylphenol.                                                                                             |
| Ethoxylated Fatty Alcohols  | Substances produced by reaction of ethylene oxide with fatty alcohols and are used mainly as a raw material for detergent production.                                                                                               |
| Ethoxylated Fatty Amines    | Substances produced by reaction of ethylene oxide with fatty amines and are used mainly as emulsifiers for agrochemicals.                                                                                                           |
| Ethoxylated Fatty Esters    | Substances produced by reaction of ethylene oxide with hydroxylated fatty esters and are used mainly as emulsifiers in the cosmetic industry.                                                                                       |
| Ethoxylated Sorbitan Esters | Substances produced by reaction of ethylene oxide with sorbitan esters and are mainly used as food emulsifiers, especially for bakery products.                                                                                     |
| Ethyl Alcohol               | A flammable liquid known as ethanol. It is used as automotive fuel, alone or in mixture with gasoline, and as a solvent in personal care products, such as aftershave lotion and mouthwashes.                                       |
| Ethylene                    | A chemical substance, mainly derived from thermal cracking of ethane, gas oil and naphtha, and used to make polyethylene and many organic chemical intermediates, such as ethylene oxide, vinyl chloride, styrene and acetaldehyde. |
| Ethylene Glycols            | Includes mono-, di-, tri- and other ethylene glycols. Mono-ethylene glycol or MEG is a clear, non-flammable, non-volatile liquid at room temperature and atmospheric pressure. Ethylene glycols are produced from ethylene oxide.   |
| Ethylene Oxide              | Ethylene oxide is a colorless and highly flammable gas at room temperature and atmospheric pressure and is produced by catalytic partial oxidation of ethylene by oxygen, at high temperature and pressure.                         |
| Fatty Alcohols              | Fatty alcohols are alcohols derived from fat or vegetable oil (natural fatty alcohol) or petrochemical sources (synthetic fatty alcohol), largely used in the cosmetics and detergents production.                                  |
| First Generation Company    | A petrochemical cracker.                                                                                                                                                                                                            |
| Fuels                       | Any substance that involves energy in a chemical reaction.                                                                                                                                                                          |
| Glycol Ether Acetate        | Flammable liquids at room temperature and atmospheric pressure produced by reaction with acetic acid and glycol ether.                                                                                                              |
| Glycols                     | Alcohols containing two hydroxyl groups.                                                                                                                                                                                            |
| Glycol Ethers               | Substances produced by reaction of ethylene oxide and an alcohol, or methyl, ethyl and butyl alcohol.                                                                                                                               |
| Hydraulic Fluids            | Mixture of high molecular weight glycols and glycol ethers used as cooling medium and mechanical action transmitters in automotive braking systems.                                                                                 |
| Lauryl Alcohol              | Substance of twelve-carbon fatty alcohol raw material for ethoxylated fatty alcohol, alcohol sulfate and ethoxylated alcohol sulfate production, which are intermediates for detergent production.                                  |
| Linear Alkyl Benzene (LAB)  | Straight chain alkyl benzene used as surfactant intermediate.                                                                                                                                                                       |

**Table of Contents**

|                               |                                                                                                                                                                                                                                                         |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Linear Alkyl Sulphonate (LAS) | Straight chain alkyl benzene sulfate used as surfactant intermediate.                                                                                                                                                                                   |
| Lubricants                    | Broad class of chemicals which are generally used to provide a film between the moving parts of machines and engines.                                                                                                                                   |
| Methyl Ethyl Ketone (MEK)     | A clear, volatile, flammables liquid at room temperature and atmospheric pressure and is mainly used as a solvent.                                                                                                                                      |
| Metric Ton                    | Equal to 1,000 kilograms (2,204.62 pounds).                                                                                                                                                                                                             |
| Naphtha                       | A by-product of crude oil refining which is used by crackers as feedstock.                                                                                                                                                                              |
| Nitrile                       | Organic compound containing CN group.                                                                                                                                                                                                                   |
| Normal Paraffins              | Class of aliphatic hydrocarbons with a single carbon chain.                                                                                                                                                                                             |
| Olefin                        | Hydrocarbons with double bonds with the general chemical formula $C_nH_{2n}$ . Olefins, along with aromatics, are produced mainly in crackers and are regarded as the building blocks of the petrochemical industry.                                    |
| Paraxylene                    | Organic compound with two methyl radicals in p-position.                                                                                                                                                                                                |
| PET                           | Polyethylene terephthalate, a polymer produced by polycondensation of ethylene glycol with either Dimethyl Terephthalate, or therephthalic acid. Used to produce fibers, resins and packaging such as carbonated soft drink bottles (PET bottle grade). |
| Phosphate Esters              | Phosphoric acid derived esters, used primarily as detergent builders in powder detergent production.                                                                                                                                                    |
| Polyethylene                  | Intermediate petrochemical produced by second generation companies from ethylene; used in many plastic applications.                                                                                                                                    |
| Polyethylene Glycols          | Ethylene oxide derived polymers used in many applications, including as fillers, lubricants and viscosity builders.                                                                                                                                     |
| Polystyrene                   | Intermediate petrochemical produced by second generation companies from styrene.                                                                                                                                                                        |
| Polyvinyl Chloride            | Intermediate petrochemical produced by companies from basic petrochemicals.                                                                                                                                                                             |
| Propylene                     | A chemical substance, mainly derived as a co-product with ethylene through the cracking process of gas oil or naphtha, often used to make polypropylene, which is a common plastic.                                                                     |
| Raffinate II                  | A by-product of naphtha cracking mainly composed of butane and used in the production of MEK.                                                                                                                                                           |
| Sec-Butanol                   | A secondary four-carbon atom alcohol obtained by the hydration of butanes, contained in raffinate II. Sec-butanol is the raw material for methyl-ethyl-ketone production.                                                                               |
| Second Generation Company     | A producer of intermediate chemical products based largely on raw materials purchased from upstream, first generation companies, also known as crackers.                                                                                                |
| Softeners                     | A class of surfactant products mainly used as co-agents in the textile industry and domestic laundries.                                                                                                                                                 |
| Solvents                      | Chemical compounds, usually in liquid form, capable of dissolving another substance; often used as a medium in which other chemical reactions may take place.                                                                                           |
| Sorbitan Esters               | Substances produced by the reaction of sorbitan with fatty acids used as a raw material for ethoxylated sorbitan esters.                                                                                                                                |

|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Soybean Oil              | Oil from soy beans                                                                                                                                                                                                                                                                                                  |
| Styrene                  | Aromatic compound with ethylene group. Monomer of polystyrene.                                                                                                                                                                                                                                                      |
| Specialty Chemicals      | Chemicals which are usually produced in smaller quantities than commodity chemicals and which performances are more relevant than the specification.                                                                                                                                                                |
| Stabilizers              | Chemicals which are used to prevent chemical degradation of a product or chemical compound.                                                                                                                                                                                                                         |
| Sulfonates/Sulfates      | Class of sulfur trioxide modified surfactants, used as a raw material for detergent production.                                                                                                                                                                                                                     |
| Surfactants              | Generally defines a group of chemicals which, when dissolved in a solvent, modify the liquid properties at a liquid/liquid or liquid/solid interface, including increased solubilization, foaming, frothing, emulsification, dispersing or wetting; a major end-use market for surfactants is the detergent market. |
| TDI                      | Toluene diisocyanate used as raw material of polyurethane.                                                                                                                                                                                                                                                          |
| Third Generation Company | A producer that transforms intermediate products into end products such as films, piping and containers.                                                                                                                                                                                                            |
| Tons                     | Metric tons.                                                                                                                                                                                                                                                                                                        |
| VAM                      | Vinyl acetate monomer. Monomer of PVA polyvinyl acetate.                                                                                                                                                                                                                                                            |
| VCM                      | Vinyl chloride monomer.                                                                                                                                                                                                                                                                                             |

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Board of Directors and Stockholders of

Ultrapar Participações S.A.

1. We have audited the accompanying consolidated balance sheets of Ultrapar Participações S.A. and subsidiaries ( Ultrapar ) as of December 31, 2006 and 2005, and the related consolidated statements of operations, changes in stockholders' equity and changes in financial position for each of the three years in the period ended December 31, 2006, all expressed in Brazilian reais. These consolidated financial statements are the responsibility of Ultrapar's management. Our responsibility is to express an opinion on the consolidated financial statements based on our audits.
2. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States of America). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.
3. In our opinion, such consolidated financial statements present fairly, in all material respects, the consolidated financial position of Ultrapar as of December 31, 2006 and 2005, and the consolidated results of its operations, changes in its stockholders' equity and its financial position for each of the three years in the period ended December 31, 2006, in conformity with accounting practices adopted in Brazil.
4. Accounting practices adopted in Brazil vary in certain significant respects from accounting principles generally accepted in the United States of America (U.S. GAAP). Ultrapar has presented the nature and effect of such differences in Note 24 to the consolidated financial statements.
5. We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States of America), the effectiveness of Ultrapar's internal control over financial reporting as of December 31, 2006, based on the criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations - COSO - of the Treadway Commission and our report dated January 31, 2007, except for the control activities related to the Notes 24 and 25 as to which the date is May 24, 2007, expressed an unqualified opinion on management's assessment of the effectiveness of Ultrapar's internal control over financial reporting and an unqualified opinion on the effectiveness of Ultrapar's internal control over financial reporting.

Ultrapar Participações S.A. and Subsidiaries

**ULTRAPAR PARTICIPAÇÕES S.A. AND SUBSIDIARIES**

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED DECEMBER 31, 2006, 2005 AND 2004

(Amounts in millions of Brazilian reais - R\$, unless otherwise stated)

---

**1. OPERATIONS**

Ultrapar Participações S.A. (the Company or Ultrapar ) is a holding company with headquarters in the city of São Paulo, organized under the laws of the Federative Republic of Brazil, which, through its operating subsidiaries, is engaged in the distribution of Liquefied Petroleum Gas (LPG) (Ultragaz), the production and sale of chemicals (Oxiten), and logistic services of chemicals and fuels (Ultracargo).

**2. PRESENTATION OF THE FINANCIAL STATEMENTS AND SIGNIFICANT ACCOUNTING POLICIES**

These financial statements were prepared in accordance with accounting practices adopted in Brazil. They have been translated into English from the original financial statements issued in Portuguese. In addition, certain terminology changes have been made and the notes to the financial statements have been adjusted to conform more closely to reporting practices prevailing in the United States of America.

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The accounting practices adopted in Brazil to record transactions and prepare the financial statements comply with those prescribed by Brazilian corporate law and specific standards established by the Brazilian Securities Commission (CVM), which differ in certain respects from accounting principles generally accepted in the United States of America (U.S. GAAP). See Note 24 for further discussions of these differences and a reconciliation of stockholders' equity and net income under both sets of principles.

The following is a summary of significant accounting policies followed in the preparation of the financial statements:

a) Consolidation principles

The consolidated financial statements include the accounts of the Company and all of the subsidiaries in which the Company directly or indirectly controls more than 50% of the voting share capital, as listed below. Intercompany investments, asset and liability balances, income and expenses, as well as the effects arising from significant intercompany transactions, have been eliminated. Minority interest in subsidiaries is presented separately in the financial statements.

On December 29, 2004, the Company, through its subsidiary Ultragaz Participações Ltda., acquired an additional 7.31% of Companhia Ultragaz S.A. total share capital. This acquisition amounted to R\$10.0, with goodwill of R\$1.8, based on its expected future profitability, being amortized over five years, starting January 2005.

On April 29, 2005, Ultragaz Participações Ltda. conducted a capital increase in its subsidiary Companhia Ultragaz S.A. increasing its ownership interest from 93.94% to 98.53%.

On August 3, 2006, the subsidiaries Oxiten S.A. - Indústria e Comércio and Oxiten Nordeste S.A. Indústria e Comércio formed the subsidiary Oxiten Argentina Sociedad de Responsabilidad Ltda., which operates as a commercial representation office, and as of December 31, 2006 had four employees.

## b) Cash and cash equivalents

Cash and cash equivalents comprise highly-liquid temporary cash investments (with maturities of three months or less when acquired and readily convertible to cash).

## c) Short-term investments

Short-term investments are stated at cost plus accrued income earned (on a pro rata temporis basis), which approximates market value.

## d) Trade accounts receivable

Trade accounts receivable are stated at estimated net realizable values. The allowance for doubtful accounts is based on estimated losses and is considered by management to be sufficient to cover probable losses on accounts receivable.

A-F-8

**Table of Contents**

Ultrapar Participações S.A. and Subsidiaries

e) Inventories

Inventories are stated at the lower of average cost of acquisition or production, market or net realizable value.

f) Long-term investments

Long-term investments are stated at cost plus accrued income earned (on a pro rata temporis basis), which approximates market value.

g) Investments in affiliated companies

Investments in operating companies not controlled by the Company, but over which it has significant influence, are accounted for using the equity method (see Note 9).

h) Other investments

Other investments are recorded at cost less provision for losses, if expected to be other than temporary.

i) Property, plant and equipment

Property, plant and equipment are stated at historical cost of acquisition, process or construction, monetarily restated through December 31, 1995, including financial charges incurred on constructions in progress and revaluation adjustments based on appraisal reports issued by independent appraisers, in accordance with item 68, letter b), of CVM Resolution No. 183/95, as well as costs related to the maintenance of significant assets during scheduled factory maintenance operations, less accumulated depreciation. Revaluation increases are credited to the revaluation reserve component of stockholders' equity and subsequently transferred to retained earnings as the related assets are depreciated or disposed of.

Depreciation is calculated on a straight-line basis at the annual rates described in Note 10, and is based on the estimated useful lives of the corresponding assets.

j) Intangible assets

Stated at acquisition cost, less an allowance for losses, should the losses not be considered temporary, as shown in Note 11.

k) Deferred charges

Deferred charges consist mainly of costs incurred in the installation of Company equipment at customers' facilities amortized over the terms of the LPG supply contracts with these customers, project expenses and goodwill arising from acquisition of subsidiaries, as stated in Note 12.

l) Income and social contribution taxes on income

Income and social contribution taxes (the latter of which is a federally mandated tax based on income) are accrued on taxable income at the applicable rates.

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

The accrual for income tax includes the effects of tax holidays, where applicable. Deferred income and social contribution taxes on temporary differences are recognized in accordance with CVM Resolution No. 273/98, as mentioned in Note 21.

m) Compensated absences

The liability for future compensation for employee vacations is fully accrued as earned.

A-F-9

**Table of Contents**

Ultrapar Participações S.A. and Subsidiaries

n) Assets and liabilities denominated in foreign currency or subject to indexation

Assets and liabilities denominated in foreign currencies are translated into Brazilian reais at the exchange rate reported by the Brazilian Central Bank (BACEN) at each balance sheet date. Transaction gains and losses are recognized in income.

Assets and liabilities denominated in reais and contractually or legally subject to indexation are restated to the balance sheet date by applying the corresponding index, with related gains and losses recognized in income.

o) Revenues and expenses

Revenues from sales are recognized when products are delivered to the customer or services are performed, and the transfer of risks, rights and obligations associated with the ownership of products takes place. Expenses are recognized on the accrual basis. Advertising expenses, which are expensed as incurred, amounted to R\$3.4, R\$3.8 and R\$6.3 for the years ended December 31, 2006, 2005 and 2004, respectively. Shipping and handling costs, classified as selling expenses and expensed as incurred, amounted to R\$66.6, R\$69.0 and R\$63.4 for the years ended December 31, 2006, 2005 and 2004, respectively.

p) Cost of sales and services

Cost of sales and services provided includes raw materials (mainly LPG and chemicals) and production, distribution, storage and filling costs.

q) Earnings per share

Earnings per share are calculated based on the annual weighted average of shares outstanding during each of the years presented, giving retroactive effect to stock splits. Stock dividends are not included in such retroactive earnings per share calculation. See Note 14.

**Table of Contents**

## Ultrapar Participações S.A. and Subsidiaries

## r) Use of estimates

The preparation of financial statements in accordance with accounting practices adopted in Brazil requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the balance sheet dates and the reported amounts of revenues, costs and expenses for the years presented. Although these estimates are based on management's best available knowledge of current and expected future events, actual results could differ from those estimates.

## s) Basis for translation of the financial statements of foreign subsidiaries

The financial statements of foreign subsidiaries are translated into Brazilian reais at the current exchange rate in effect at the balance sheet date. The criteria for preparation of the financial statements have been adapted to conform to accounting practices adopted in Brazil.

## t) Reclassification

Due to the adoption of CVM Resolution No. 489/05, the balances of escrow deposits as of December 31, 2005, for which the Company and its subsidiaries had recognized allowances, were offset against these under the heading "Other taxes" in non-current liabilities.

## 4. CASH AND CASH EQUIVALENTS

Cash equivalents consist of investments, contracted with banks of good standing, mostly represented by certificates of deposit and funds linked to the Brazilian interbank certificates of deposit (CDI) rate, and are stated at cost plus accrued income on a pro rata temporis basis. In addition as at December 31, 2005, funds in the amount of R\$410.1, raised through notes issued by the subsidiary LPG International Inc. were invested in certificates of deposit denominated in U.S. dollars issued by foreign banks of good standing.

|                                             | 2006  | 2005    |
|---------------------------------------------|-------|---------|
| Cash                                        | 32.0  | 32.7    |
| Certificates of deposit and funds in Brazil | 303.6 | 571.8   |
| Foreign investments                         | 49.5  | 509.7   |
| Total                                       | 385.1 | 1,114.2 |

## 5. SHORT AND LONG-TERM INVESTMENTS

Short-term investments relate to the amount invested by the indirect subsidiary Oxiteno Overseas Corp. in debt securities of U.S. corporations. As of December 31, 2006, funds in the amount of R\$553.1, raised through notes issued by the subsidiary of LPG International Inc. were invested in certificates of deposit (Dual Currency Deposits) denominated in U.S. dollars issued by foreign banks of good standing. Dual Currency Deposits are investments of the subsidiary Oxiteno Overseas Corp., whose yield can be in US dollars or Brazilian reais, depending on the US dollar rate as of the maturity date. If the US dollar rate is lower than the strike rate on the maturity date, the yield of this operation will be in US dollars plus interest of 7.5% per year; otherwise, it will be in Brazilian reais plus average interest of 26% per year. The subsidiary records the investment at the lower of the two alternative yields, which in 2006 was represented by the US dollar. In 2006 the exchange rate always remained below the strike rate.

Long-term investments are mainly represented by a debt security of an European corporation denominated in U.S. dollars, bearing interest of six-month LIBOR plus interest of 3.25% per annum and maturing on September 27, 2009 and by notes issued by the Austrian Government.

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

In April 2006, subsidiary Oxiteno Overseas Corp., owner of notes in the amount of US\$60 million issued by Companhia Ultragas S.A. in the international market in 1997 (Original Notes), sold these Original Notes to a foreign financial institution. Concurrently, subsidiary Oxiteno Overseas Corp. acquired from this financial institution a credit linked note backed by the Original Notes. This transaction provides a financial gain for the Company corresponding to the difference between the interest rate paid for the credit linked note and the Original Notes, as mentioned in Note 13.b).

| Balance as of December 31, 2006 | 2.1   |

**8. RECOVERABLE TAXES**

Represented, substantially, by credit balances of ICMS (State Value Added Tax - VAT), PIS and COFINS (taxes on revenue), and income and social contribution taxes.

|                                                 | 2006         | 2005         |
|-------------------------------------------------|--------------|--------------|
| Income and social contribution taxes            | 75.3         | 68.0         |
| ICMS                                            | 101.0        | 70.9         |
| Provision for losses - ICMS (*)                 | (31.4)       | (36.0)       |
| PIS and COFINS                                  | 28.4         | 3.0          |
| VAT of subsidiary Canamex Químicos S.A. de C.V. | 8.5          | 3.5          |
| Other                                           | 1.3          | 0.3          |
| <b>Total</b>                                    | <b>183.1</b> | <b>109.7</b> |
| Current portion                                 | 117.8        | 62.9         |
| Noncurrent portion                              | 65.3         | 46.8         |

(\*) The provision refers to balances that the Company's subsidiaries estimate not being able to recover in the future.

**Table of Contents**

Ultrapar Participações S.A. and Subsidiaries

The changes in the provision for losses on ICMS are shown below:

|                                 |       |
|---------------------------------|-------|
| Balance as of December 31, 2004 | 33.7  |
| Additions                       | 9.5   |
| Deductions write-off            | (7.2) |
| Balance as of December 31, 2005 | 36.0  |
| Additions                       | 4.5   |
| Deductions write-off            | (9.1) |
| Balance as of December 31, 2006 | 31.4  |

The increase in the balance of recoverable taxes is mainly due to the increase in ICMS credits of the Camaçari (Bahia State) plant of the subsidiary Oxiteno Nordeste S.A. - Indústria e Comércio and the credit of PIS and COFINS recorded by this same subsidiary. The increase in this plant's ICMS balance occurred mainly in the second half of 2006, due to measures by Bahia State, which made it difficult to utilize credits for import payment or to transfer them to third parties. The total balance of credits from the Camaçari plant corresponds to R\$50.2 as of December 31, 2006 (R\$22.0 in 2005) of which R\$22.8 have already been reviewed by the tax authorities and are awaiting release by the state finance department of Bahia for commercialization. In addition to these credits, the subsidiary's management is working on a series of measures for realization of the plant's ICMS balance. The allowance for loss of the plant's credits was recognized on the basis of the maximum discount expected on their commercialization. The PIS and COFINS credits arose from the favorable outcome of a lawsuit and can be utilized to offset other federal taxes, as mentioned in Note 19.a).

**9. INVESTMENTS IN AFFILIATED COMPANIES**

A summary of financial information for the Company's equity investments is as follows:

|                                     | December 31, 2006               |                                                 | Total |

|                            |                                     | 117.7 | (56.7)                              | 61.0                 | 59.1                         |

Aggregate amortization expense for the above intangible assets amounted to R\$12.9, R\$12.2 and R\$10.0 for the years ended December 31, 2006, 2005 and 2004, respectively.

The estimated aggregate amortization expense for the next five years is as follows:

|              |             |
|--------------|-------------|
| 2007         | 15.3        |
| 2008         | 12.7        |
| 2009         | 8.1         |
| 2010         | 6.8         |
| 2011         | 4.5         |
| Thereafter   | 13.6        |
| <b>Total</b> | <b>61.0</b> |

Commercial property rights, refer mainly to those described below:

On July 11, 2002, the indirect subsidiary Terminal Químico de Aratu S.A. Tequimar signed a contract with CODEBA Companhia Docas do Estado da Bahia for use of the site on which it operates its Aratu Terminal for 20 years, renewable for another 20 years. The amount of R\$12.0 paid by Tequimar is being amortized from August, 2002 to July 2042.

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

Further, subsidiary Terminal Químico de Aratu S.A. Tequimar has a 20-year lease of an area adjacent to the Santos harbor which allows it to build, operate and exploit the terminal, intended for the distribution of liquid bulk renewable for another 20 years. The price paid by Tequimar was R\$4.3 and is being amortized from August 2005 until December 2022.

## b) Notes in the foreign market and syndicated loan

In June 1997, the subsidiary Companhia Ultragaz S.A. issued US\$60 million in notes, (Original Notes) maturing in 2005. In June 2005, maturity was extended to June 2020 with put/call options in June 2008.

In June 2005, the subsidiary Oxiteno Overseas Corp. acquired the full amount of Original Notes issued by Companhia Ultragaz S.A., with funds from a syndicated loan in the amount of US\$60 million with maturity in June 2008 and interest rate of 5.05% per year. The syndicated loan was guaranteed by the Company and the subsidiary Oxiteno S.A. Indústria e Comércio.

In April 2006, the subsidiary Oxiteno Overseas Corp. sold the Original Notes to a financial institution. Concurrently, the subsidiary acquired from this financial institution a credit linked note backed by the Original Notes, as mentioned in Note 5, thus obtaining an additional return on this investment. The transaction matures in 2020, and the subsidiary as well as the financial institution may redeem it early, although the subsidiary has only an annual option of redemption (purchase) in or after June 2008. In the event of insolvency of the financial institution, Companhia Ultragaz S.A. would be required to settle the Original Notes, although Oxiteno Overseas Corp. would continue to be creditor of the credit linked note. Thus, the Company is no longer eliminating the Original Notes in its consolidated financial statements.

## c) Notes in the foreign market

In December 2005, the subsidiary LPG International Inc. issued notes in the amount of US\$250 million, maturing in December 2015, with annual interest rate of 7.25% paid semiannually, with the first payment scheduled for June 2006. The issue price was 98.75% of the notes face value, which represented a total yield for investors of 7.429% per annum upon issuance. The notes were guaranteed by the Company and by Oxiteno S.A.- Indústria e Comércio.

As a result of the issuance of notes and the syndicated loan, the Company and its subsidiaries mentioned previously are subject to covenants that limit, among other things:

Transactions with shareholders that hold amounts of 5% or more of any class of Capital Stock of the Company, except upon fair and reasonable terms no less favorable to the Company than could be obtained in a comparable arm's-length transaction with a third party.

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

Obligation of having Board of Directors resolution for transactions with related parties higher than US\$15 million (excepting transactions by the Company with subsidiaries and between subsidiaries).

Restriction of disposal of the totality or near totality of the assets of Company and subsidiaries.

Restriction of encumbrances on assets in excess of US\$150 million or 15% of the value of consolidated tangible assets.

A-F-19

**Table of Contents**

Ultrapar Participações S.A. and Subsidiaries

Maintenance of financial ratio, between consolidated net debt and consolidated EBITDA (Earning Before Interest, Taxes, Depreciation and Amortization), less than or equal to 3.5.

Maintenance of financial ratio, between consolidated EBITDA and consolidated net financial expenses higher than or equal to 1.5.

The restrictions imposed on the Company and its subsidiaries are usual in transactions of this nature and have not limited their ability to conduct their business to date.

d) Debentures

On March 1, 2005, the Company issued single series of 30,000 nonconvertible debentures, whose main features are:

|                        |                                        |
|------------------------|----------------------------------------|
| Nominal unit value:    | R\$10.000 (ten thousands reais).       |
| Final maturity:        | March 1, 2008.                         |
| Nominal value payment: | Lump sum at final maturity.            |
| Yield:                 | 102.5% of CDI.                         |
| Yield payment:         | Semiannually, beginning March 1, 2005. |
| Repricing:             | None.                                  |

The debentures are subject to commitments that restrict, among other things, certain operations of merger or spin-off, as well as the disposal of operating assets that would result in a reduction of more than 25% of consolidated net sales, and include the obligation to maintain a consolidated net debt to consolidated EBITDA ratio less than or equal to 3.5. None of these commitments have restricted the ability of Company and its subsidiaries to conduct business.

e) Collateral

A portion of the financing is collateralized by liens on property, plant and equipment, shares of investee and guarantees provided by the Company and its subsidiaries and by minority stockholders, as shown below:

|                                                         | 2006 | 2005 |
|---------------------------------------------------------|------|------|
| Amount of financing secured by:                         |      |      |
| Property, plant and equipment                           | 42.7 | 53.8 |
| Shares of investee minority and stockholders guarantees | 7.0  | 11.2 |
| Total                                                   | 49.7 | 65.0 |

Other loans are collateralized by guarantees issued by Company and by the future flow of exports. The Company is responsible for sureties and guarantees offered on behalf of its subsidiaries, amounting to R\$1,073.1 (R\$1,017.9 in 2005).

Certain subsidiaries have issued guarantees to financial institutions related to amounts owed to those institutions by certain of their customers (vendor financing). There are no recourse provisions or collaterals that would enable the Company or its subsidiaries to recover any amounts paid to the financial institutions under these agreements. In the event such payments are made, the subsidiaries may recover such amounts paid

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

directly from their customers. Maximum future payments related to these guarantees amount to R\$34.9 (R\$33.2 in 2005), with terms of up to 210 days. As of December 31, 2006, the Company and its subsidiaries have not incurred any loss nor recorded any liability related these guarantees.

14. STOCKHOLDERS EQUITY

a) Capital

The Company is a listed corporation with shares traded on the São Paulo and New York Stock Exchanges. Subscribed and paid-up capital is represented by 81,325,409 shares without par value, comprised of 49,429,897 common shares and 31,895,512 preferred shares.

As of December 31, 2006, 12,534,161 preferred shares were outstanding abroad, in the form of American Depositary Receipts ADRs.

The Extraordinary Stockholders Meeting held on July 20, 2005 approved reverse stock split, attributing 1 (one) share in substitution for every 1,000 (thousand) existing shares. Likewise, each American Depositary Share ADS, previously representative of a lot of 1,000 (thousand) preferred shares, became representative of 1 (one) preferred share.

Preferred shares are not convertible into common shares, do not entail voting rights, and have priority in capital redemption, without premium, in the event of liquidation of the Company.

At the beginning of 2000, the Company granted, through a stockholders agreement, tag along rights, which assure to minority stockholders identical conditions to those negotiated by the controlling shareholders in case of disposal of shareholding control of the Company. The tag-along rights guarantee 100% of the offer price for all types of shares issued by the Company. On May 18, 2004, the Company included the tag-along rights in its bylaws.

The Company is authorized to increase its capital, regardless of amendment to the bylaws, through a resolution of the Board of Directors, until it reaches R\$1,500,000, by means of issuance of common or preferred shares, without keeping the existing ratio, observing the limit of 2/3 of preferred shares, to the total of the shares issued.

b) Treasury shares

The Company acquired its own shares at market prices, without capital reduction, for holding in treasury and subsequent disposal or cancellation, in accordance with the provisions of Brazilian Securities Commission (CVM) Instructions No. 10 of February 14, 1980 and No. 268 of November 13, 1997.

As of December 31, 2006, the Company and its subsidiaries held 408,647 preferred shares (161,697 preferred shares, net of shares provided to certain executives of these subsidiaries as described in Note 22) and 6,617 common shares in treasury, which had been acquired at the average cost of R\$25.27 (whole Brazilian reais) and R\$19.30 (whole Brazilian reais) per share, respectively. The average acquisition cost, was adjusted to reflect the stock dividends and reverse stock split.

The market price of preferred shares issued by the Company as of December 31, 2006 on the BOVESPA (São Paulo Stock Exchange) was R\$48.99.

c) Capital reserve

The capital reserve in the amount of R\$0.6 reflects the goodwill of the sale of shares at market price to be held in treasury in the Company's subsidiaries, at the average price of R\$36.00 (whole Brazilian reais) per share. These shares were provided to certain executives of these subsidiaries as described in Note 22.

d) Revaluation reserve

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

This reserve reflects the revaluation write-up of assets of subsidiaries and is realized based upon depreciation, write-off or disposal of revalued assets, including the related tax effects.

A-F-21

**Table of Contents**

Ultrapar Participações S.A. and Subsidiaries

In some cases, taxes on the revaluation reserve of certain subsidiaries are recognized only upon the realization of this reserve since the revaluations occurred prior to the publication of CVM Resolution No.183/95, as mentioned in Note 10.

e) Profit reserves

Legal reserve

Under Brazilian corporate law, the Company is required to appropriate 5% of annual earnings to a legal reserve, until the balance reaches 20% of capital stock. This reserve may be used to increase capital or absorb losses, but may not be distributed as dividends.

Reserve for retention of profits

This reserve is supported by the investment program, in conformity with article 196 of Brazilian corporate law, and includes both a portion of net income and the realization of the revaluation reserve.

Unrealized profit reserve

This reserve is established in conformity with article 197 of Brazilian corporate law, based on the equity pick-up in subsidiaries and affiliated companies. The realization of this reserve usually occurs on receipt of dividends, sale and write-off of investments.

f) Dividends and appropriation of net income (Company)

According to the Company's bylaws, stockholders are entitled to a minimum annual dividend of 50% of adjusted net income, calculated under the terms of accounting practices adopted in Brazil.

Proposed dividends as stated in the Company's financial statements, subject to approval at the Annual Stockholders Meeting, are as follows:

|                                                                                         |             |
|-----------------------------------------------------------------------------------------|-------------|
|                                                                                         | <b>2006</b> |
| Net income                                                                              | 288.4       |
| Legal reserve                                                                           | (14.4)      |
| Retention of profits reserve                                                            | (137.0)     |
| Realizable profits reserve                                                              | (61.0)      |
| <br>                                                                                    |             |
| Dividends balance                                                                       | 76.0        |
| Realization of realized profits reserve                                                 | 68.2        |
| Interim dividends (R\$0.887398 (whole Brazilian reais) per common and preferred share)  | (72.0)      |
| Proposed dividends (R\$0.889633 (whole Brazilian reais) per common and preferred share) | (72.2)      |

| Other expenses                                                         | (8.0)   | (2.5)   | (3.3)   |
|                                                                        | (125.3) | (146.0) | (113.9) |
| Financial income (expenses), net                                       | 30.6    | (27.3)  | (45.0)  |

(\*) In 2006, includes R\$23.5 referring to the reversal of the provision for PIS and COFINS contingencies and R\$26.2 related to the recovery of PIS and COFINS mentioned in Note 19 a), as they were originally recorded as financial expenses.

## 16. NONOPERATING INCOME (EXPENSES), NET

Composed mainly of R\$13.7 (R\$0.4 in 2005 and R\$2.0 in 2004) in write-off of deferred assets related to studies and projects, and R\$4.8 (R\$1.4 in 2005 and R\$14.0 in 2004) of result on the sale of property, plant and equipment, mainly gas cylinders and vehicles and allowance for losses of investments.

## 17. SEGMENT INFORMATION

The Company has three reportable segments: gas, chemical and logistics. The gas segment distributes LPG to residential, commercial and industrial consumers mainly in the South, Southeast and Northeast regions of Brazil. The chemical segment primarily produces ethylene oxide and byproducts, which are raw materials for the textiles, foods, cosmetics, detergents, agricultural chemicals, paints and varnishes industries, among other. Operations in the logistics segment include storage and transportation, mainly in the Southeast and Northeast regions of Brazil. Reportable segments are strategic business units that provide different products and services. Intersegment sales are transacted at prices that are freely negotiated and approximate those that could be obtained with third parties.

**Table of Contents**

Ultrapar Participações S.A. and Subsidiaries

The principal financial information about each of the Company's reportable segments is as follows:

|                                                                                           | 2006     |         |            |       | 2005         | 2004         |
|-------------------------------------------------------------------------------------------|----------|---------|------------|-------|--------------|--------------|
|                                                                                           | Ultragaz | Oxiteno | Ultracargo | Other | Consolidated | Consolidated |
| Net sales, net of intercompany transactions                                               | 3,066.0  | 1,549.5 | 178.6      |       | 4,794.1      | 4,693.8      |
| Operating income before financial items and equity in subsidiary and affiliated companies | 167.3    | 146.3   | 11.4       | 5.4   | 330.4        | 358.3        |
| Total assets, net of related parties                                                      | 961.4    | 2,307.8 | 310.1      | 322.8 | 3,902.1      | 2,667.2      |

Disclosures of segments in accordance with U.S. GAAP are made in Note 24.V.j).

#### 18. RISKS AND FINANCIAL INSTRUMENTS

The main risk factors to which the Company and its subsidiaries are exposed reflect strategic-operating and economic-financial aspects. Strategic-operating risks (such as behavior of demand, competition, technological innovation and significant structural changes in industry, among others) are addressed by the Company's management model. Economic-financial risks mainly reflect customer default and macroeconomic variables, such as exchange and interest rates, as well as the characteristics of the financial instruments used by the Company. These risks are managed through control policies, specific strategies and the determination of limits, as follows:

**Customer default** These risks are managed by specific policies for accepting customers and analyzing credit and are mitigated by diversification of sales. As of December 31, 2006, Oxiteno S.A. Indústria e Comércio and its subsidiaries maintained R\$1.6 (2005 R\$0.8) and the subsidiaries of Ultragaz Participações Ltda, maintained R\$20.0 (2005 R\$25.2) as an allowance for doubtful accounts.

**Interest rates** The Company and its subsidiaries adopt conservative policies to obtain and invest funds and to minimize the cost of capital. The temporary cash investments of the Company and its subsidiaries are comprised substantially of transactions linked to the CDI, as described in Note 4. A portion of the financial assets is intended for foreign currency hedges, as mentioned below. Borrowings are mainly originated from the BNDES, debentures and foreign currency financing are disclosed in Note 13.

**Exchange rate** The Company's subsidiaries use foreign currency swap instruments (mainly US\$ and CDI) available in the financial market to cover assets and liabilities in foreign currency, so as to reduce the exchange rate variation effects on their results. Such swap instruments have amounts, periods and indexes equivalent to the assets and liabilities in foreign currency to which they are linked. The following summary shows assets and liabilities in foreign currency, translated into Brazilian reais at December 31, 2006 and 2005 at the corresponding year end exchange rates:

## 19. CONTINGENCIES AND COMMITMENTS

## a) Labor, civil and tax lawsuits

The Petrochemical Industry Labor Union, of which the employees of Oxiteno Nordeste S.A. Indústria e Comércio are members, filed a lawsuit against the subsidiary in 1990, demanding compliance with the adjustments established in collective labor agreement, in lieu of the salary policies effectively followed. At the same time, the employers' association proposed a collective bargaining for the interpretation and clarification of the fourth clause of the agreement. Based on the opinion of its legal counsel, who analyzed the last decision of the Federal Supreme Court (STF) on the collective bargaining, as well as the status of the individual lawsuit of the subsidiary, management believes that an accrual for a potential loss is not necessary as of December 31, 2006.

The subsidiaries Companhia Ultragas S.A. and SPGás Distribuidora de Gás Ltda. are parties to an administrative proceeding at the SDE (Economic Law Department), linked to CADE (Administrative Council for Economic Defense), under the allegation of anticompetitive practice in certain municipalities of the State of Minas Gerais in 2001. In September 2005, the SDE issued a technical notice recommending to CADE a ruling against the companies involved in this proceeding. In their defense, the subsidiaries' arguments, among others, are that: (i) under the terms of the notice issued by the Company's chief executive officer on July 4, 2000, the subsidiaries' employees were forbidden to discuss with third parties matters related to prices; and (ii) no consistent proof was attached to the proceeding's records. In view of the arguments presented, the fact that the technical notice has no binding effect on CADE's decision, and their legal counsel's opinion, the subsidiaries did not record a provision for this issue. Should CADE's decision be unfavorable, the subsidiaries could still discuss the issue at the judicial level.

The subsidiary Companhia Ultragas S.A. is a defendant in lawsuits relating to damages caused by an explosion in 1996 in a shopping mall in the city of Osasco, State of São Paulo. Such lawsuits involve: (i) individual suits filed by victims of the explosion claiming damages from Ultragas for the loss of economic benefit and for pain and suffering, (ii) reimbursement of expenses from management of the shopping mall and its insurance company, and (iii) a class action lawsuit seeking indemnification for material damages and pain and suffering for all the victims injured and deceased. The subsidiary believes that it has presented evidence that defective gas pipes in the shopping mall caused the accident and that Ultragas's on-site LPG storage facilities did not contribute to the explosion. Of the 58 lawsuits judged thus far, a favorable judgment was obtained for 57, and of these 16 have already been dismissed; only 1 had an unfavorable decision, which is still subject to appeal, and whose amount, should the decision be upheld, is seventeen thousands reais. Two lawsuits have not yet been judged. The subsidiary has insurance coverage for these lawsuits, and the uninsured contingent amount is R\$23.6. The Company has not recorded any provision for this amount, since it believes the probability of loss is remote.

The Company and its subsidiaries obtained injunctions to pay PIS and COFINS (taxes on revenues) without the changes introduced by Law No. 9718/98 in its original version. The ongoing questioning refers to the levy of these taxes on sources of income other than revenues. The unpaid amounts were recorded in the financial statements of the Company and its subsidiaries, totaling R\$14.5 as of December 31, 2006 (R\$37.0 in 2005). Recently the STF has decided the matter favorable to the taxpayer. Although it is a precedent, the effect of this decision does not automatically apply to all the companies, since they have to await judgment of their own lawsuit. In 2006 final decisions were rendered on the lawsuits of subsidiaries Companhia Ultragas S.A., Transultra Armazenagem e Transporte Especializado Ltda., Oxiteno S.A Indústria e Comércio and Ultraquímica Florestal Ltda. (company merged into Ultracargo Operações Logísticas e Participações Ltda.), and the subsidiaries reversed the existing provisions in the amount of R\$15.9, R\$1.3, R\$5.7 and R\$0.6, respectively, net of attorney's fees, as financial income in the statement of income for the year. Likewise, a final decision was rendered on the lawsuit related to subsidiary Oxiteno Nordeste S.A. Indústria e Comércio. As this subsidiary had not obtained an injunction, it paid undue PIS and COFINS in prior periods. The amount of R\$26.2, related to the favorable outcome in this lawsuit, net of attorney's fees, was recorded as financial income and is being used for offset of federal taxes. The Company has other subsidiaries whose lawsuits have not yet been judged in the amount of R\$14.1, net of attorney's fees.

The Company's subsidiary Oxiteno S.A. Indústria e Comércio and its subsidiary Oxiteno Nordeste S.A. Indústria e Comércio accrued R\$15.6 (R\$14.5 in 2005) for ICMS tax assessments being judged at lower-level and appeal-level administrative courts. The subsidiaries are currently awaiting decisions on the appeals.

**Table of Contents**

## Ultrapar Participações S.A. and Subsidiaries

The Company's subsidiary Utingás Armazenadora S.A. has challenged in court ISS (Service Tax) tax assessments issued by the municipal government of Santo André. Legal counsel of the subsidiary classifies the risk as low, since a significant portion of the lower-court decisions was favorable to the subsidiary. The thesis defended by the subsidiary is supported by the opinion of a renowned tax specialist. The unprovisioned updated amount of the contingency as of December 31, 2006 is R\$33.4 (R\$30.0 as of December 31, 2005).

On October 07, 2005, the subsidiaries of Ultragas Participações Ltda. filed for and obtained an injunction to support the offset of PIS and COFINS credits against other federal taxes administered by the Federal Revenue Service (SRF), notably corporate income tax and social contribution taxes. According to the injunction obtained, the subsidiaries have been making escrow deposits for these debits and recognizing the corresponding liability for this purpose.

On December 29, 2006 the subsidiaries Oxiteno S.A Indústria e Comércio, Oxiteno Nordeste S.A Indústria e Comércio, Companhia Ultragas S.A. and Transultra Armazenamento e Transporte Especializado Ltda filed for an injunction seeking the deduction of ICMS from PIS and COFINS tax basis.

The Company and its subsidiaries filed a request for injunction seeking not to be subject to the legislation that restricted the offset of corporate income tax (IRPJ) and social contribution (CSLL) tax loss carryforwards computed through December 31, 1994 to 30% of income for the year, as well as petitioning the full and immediate utilization of supplementary monetary adjustment based on the Consumer Price Index (IPC)/National Treasury Bonds (BTN) for 1990 (Law No. 8.200/91). There are good precedents for these discussions when it is proven that there was only a postponement of payment of IRPJ and CSLL to the following years, as is the case of the Company's subsidiaries, and legal counsel understands that the chances of success of the challenge in the judicial sphere is possible. The contingency is estimated at R\$21.4.

The Company and its subsidiaries have other ongoing administrative and judicial proceedings. Legal counsel classified the risks on these proceedings as possible and/or remote and, therefore, no reserves for potential losses on these proceedings have been recorded.

Accruals and escrow deposits are summarized below:

| Accrual                                      | Balance<br>in 2005 | Additions  | Write-off     | Monetary<br>update | Balance<br>in 2006 |

## b) Take or pay commitments

The Company's subsidiary Terminal Químico de Aratu S.A. Tequimar has contracts with CODEBA and Complexo Industrial Portuário Governador Eraldo Gueiros, in connection with their port facilities in Aratu and Suape, respectively. Such contracts establish minimum cargo movement of 1,000,000 tons per year for Aratu, effective through 2022, and

**Table of Contents**

## Ultrapar Participações S.A. and Subsidiaries

250,000 tons per year for Suape, effective through 2027. If annual movement is less than the established minimum, the subsidiary is required to pay the difference between the actual movement and the minimum contractual movement using the port rates in effect at the date of payment. As of December 31, 2006, such rates were R\$3.67 and R\$3.44 per ton for Aratu and Suape, respectively. The subsidiary has met the minimum cargo movement limits since inception of the contracts. At December 31, 2006, future minimum lease payments under these operating leases are: R\$4.5 in 2007, R\$4.5 in 2008, R\$4.5 in 2009, R\$4.5 in 2010, R\$4.5 in 2011 and thereafter R\$52.1. A substantial part of these leases are paid directly to the port authorities by Tequimar's customers. The part of such lease expenses paid by Tequimar amounted to R\$2.2 in 2006, R\$2.0 in 2005 and R\$1.6 in 2004.

The Company's subsidiary Oxiteno Nordeste S.A. Indústria e Comércio has a supply contract with Braskem S.A., that establishes a minimum annual consumption level of ethylene per year. The minimum purchase commitment and the actual demand for the years ended December 31, 2006 and 2005, expressed in tons of ethylene, are summarized below. Should the minimum purchase commitment not be met, the subsidiary would be liable for a fine of 40% of the current ethylene price for the quantity not purchased.

|         | Minimum<br>purchase<br>commitment | Actual demand (real) |           |
|---------|-----------------------------------|----------------------|-----------|
|         |                                   | 2006                 | 2005      |
|         |                                   | Unaudited            | Unaudited |
| In tons | 137,900                           | 181,496              | 192,190   |

At December 31, 2006, future minimum purchase commitments under this contract, based on the price prevailing at that date, are: R\$224.4 in 2007, R\$236.9 in 2008, R\$249.4 in 2009, R\$261.8 in 2010, R\$274.3 in 2011 and thereafter R\$2,905.1. Total purchases made under this contract were R\$621.5 in 2006, R\$624.9 in 2005 and R\$576.9 in 2004.

On August 16, 2006 the subsidiary signed a memorandum of understanding, altering the ethylene supply contract with Braskem S.A. described above. The memorandum of understanding regulates new conditions of ethylene supply through 2021, and in 2007 and 2008 the subsidiary will have an additional volume of ethylene, with the minimum quantity in tons increasing to 180 thousand and 190 thousand, respectively. The new condition provided for in the memorandum of understanding are reflected in future minimum purchase commitments mentioned above.

## c) Insurance coverage for subsidiaries

The Company has insurance policies to cover various risks, including loss and damage from fire, lightning, explosion of any nature, windstorm, plane crash and electrical damage, among others, protecting the plants and other branches of all subsidiaries, with coverage amounting to US\$396 million.

For the plants of Oxiteno S.A. Indústria e Comércio, Oxiteno Nordeste S.A. Indústria e Comércio and Canamex Químicos S.A. de C.V., there is also a loss of income insurance against losses from potential accidents related to their assets, with coverage amounting to US\$233 million.

A civil liability insurance program covers the Company and its subsidiaries, with global coverage of US\$200 million, for losses and damages from accidents caused by third parties, related to the commercial and industrial operations and/or distribution and sale of products and services.

Group life insurance, personal accident insurance, health insurance, and domestic and international transportation insurance are also contracted.

The loan balance with Química da Bahia Indústria e Comércio S.A. is adjusted based on the Brazilian long-term interest rate (TJLP). Other loans are not subject to financial charges. Purchase and sale transactions refer, substantially, to purchases of raw materials, other materials and storage and transportation services, carried out at market prices and conditions.

## 21. INCOME AND SOCIAL CONTRIBUTION TAXES

- a) Deferred income and social contribution taxes

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

The Company and its subsidiaries recognize tax assets and liabilities, which do not expire, arising from tax loss carryforwards, temporary add-backs, revaluation of property, plant and equipment and other procedures. Tax credits are based on the continuing profitability from operations. Deferred income and social contribution taxes are presented in the following principal categories:

|                                                          | 2006        | 2005        |
|----------------------------------------------------------|-------------|-------------|
| <b>Assets:</b>                                           |             |             |
| Deferred income and social contribution taxes on:        |             |             |
| Provision for losses in assets                           | 20.4        | 22.8        |
| Provision for contingencies                              | 13.3        | 17.1        |
| Other provisions                                         | 25.8        | 18.8        |
| Income and social contribution on tax loss carryforwards | 26.0        | 24.3        |

|                                    |                          | Ilhéus plant   | 25              | 2008 |
|                                    |                          | Aracaju plant  | 25              | 2008 |
|                                    |                          | Caucaia plant  | 75              | 2012 |
| Terminal Químico de Aratu S.A.     | Tequimar                 | Aratu Terminal | 75              | 2012 |
|                                    |                          | Suape Terminal | 75              | 2015 |

(\*) In December 2006, this plant's exemption expired and a request was filed with ADENE (Northeast Development Agency), the agency in charge of managing this incentive program, seeking a 75% income tax reduction until 2016. The subsidiary expects to have a response to this request by May 2007, having been successful in previous similar requests. Should this 75% reduction not be approved, the subsidiary will file a new request with ADENE, for 25% income tax reduction until 2008 and 12.5% from 2009 to 2013, to which it is entitled for being located in a development region and exercising an economic activity that is considered as priority for the area.

## 22. STOCK COMPENSATION PLAN

The Extraordinary Stockholders Meeting held on November 26, 2003 approved a compensation plan for management of the Company and its subsidiaries, which provides for: (i) the initial grant of usufruct of shares issued by the Company and held in treasury by the subsidiaries in which the beneficiaries are employed, and (ii) the transfer of the beneficial ownership of the shares after ten years of the initial concession provided that the professional relationship between the beneficiary and the Company and its subsidiaries is not interrupted. The total value granted to executives until December 31, 2006, including taxes, was R\$12.3 (R\$8.9 in 2005). Such value is being amortized over a period of ten years and the amortization related to the year ended December 31, 2006, in the amount of R\$0.9 (R\$0.8 in 2005 and R\$0.6 in 2004), was recorded as an operating expense for the period.

## 23. EMPLOYEE BENEFITS AND PRIVATE PENSION PLAN

The Company and its subsidiaries offer benefits to their employees, such as life insurance, health care and a pension plan. In addition, certain subsidiaries offer loans for the acquisition of vehicles and personal computers to some of their employees. These benefits are recorded on the accrual basis and terminate at the end of the employment relationship.

In August 2001, the Company and its subsidiaries began to offer their employees a defined contribution pension plan, managed by Ultraprev Associação de Previdência Complementar. Under the terms of the plan, the basic contribution of each participating employee is defined annually by the participant between 0% and 11%, of his/her salary. The sponsoring companies provide a matching contribution to the basic contribution. As participants retire, they may opt to receive monthly: (i) a percentage varying between 0.5% and 1.0% of the fund accumulated in his/her name at Ultraprev, or (ii) a fixed-monthly amount that will extinguish the fund accumulated in his/her name in a period between 5 and 25 years. As such, neither the Company nor its subsidiaries assume responsibility for guaranteeing amounts or periods of receipt

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

for the participants that retire. In 2006, the Company and its subsidiaries contributed R\$3.3 (R\$3.0 2005 and R\$4.0 2004) to Ultraprev, which was charged to income for

A-F-32

---

Ultrapar Participações S.A. and Subsidiaries

the year. The total number of employee participants as of December 31, 2006 was 5,632, with no participants retired to date. Additionally, Ultraprev has 1 active participant and 31 former employees receiving benefits according to the policies of a previous plan.

**24. SUMMARY AND RECONCILIATION OF THE DIFFERENCES BETWEEN ACCOUNTING PRACTICES ADOPTED IN BRAZIL AND ACCOUNTING PRINCIPLES GENERALLY ACCEPTED IN THE UNITED STATES OF AMERICA (U.S. GAAP)**

**I Description of GAAP differences**

The consolidated financial statements of the Company are prepared in accordance with accounting practices adopted in Brazil, which comply with those prescribed by Brazilian corporate law and specific standards established by the Brazilian Securities Commission (CVM). Note 3 to the consolidated financial statements summarizes the accounting policies adopted by the Company. Accounting policies, which differ significantly from U.S. GAAP, are summarized below.

**a) Inflation accounting**

The Company, as described in Note 3.i), accounts for the effects of inflation in its consolidated financial statements through December 31, 1995. Under U.S. GAAP, Brazil was considered to be a highly inflationary economy until July 1, 1997, and the effect of inflation was recognized until December 31, 1997.

In determining amounts under U.S. GAAP, the effects of inflation for the years ended December 31, 1996 and 1997 were determined using the Índice Geral de Preços -Disponibilidade Interna IGP-DI index, which is widely-accepted and respected index published monthly by the Fundação Getúlio Vargas.

Through December 31, 1995, the Company used indexes established by the government to restate balances and transactions for purposes of its corporate law financial statements. Such indexes do not necessarily represent changes in general price levels, as would be required under U.S. GAAP.

Because the Company's management believes that the Índice Geral de Preços -Disponibilidade Interna IGP-DI is an appropriate and consistent measure of the general price inflation in Brazil and because of its availability, for U.S. GAAP purposes the Company adopted the IGP-DI for restatement of its financial statements through December 31, 1995, replacing the government mandated index. This procedure is consistent with the recommendation by the Brazilian Task Force (organized under the AICPA International Practices Task Force to review the issue of the appropriate index to be used for preparing price-level adjusted financial statements of Brazilian companies filing with the SEC) of using the IGP-M or IGP-DI for such purposes. Thus, all nonmonetary assets and liabilities were restated using the IGP-DI since the inception of the Company, through December 31, 1997.

**b) Reversal of fixed asset revaluations and related deferred tax liabilities**

For U.S. GAAP reconciliation purposes, the revaluation of fixed assets and the related deferred income tax effects recorded in the financial statements prepared in accordance with accounting practices adopted in Brazil have been eliminated in order to present fixed assets at historical cost less accumulated depreciation. Accordingly, the depreciation on such revaluation charged to income has also been eliminated for U.S. GAAP reconciliation purposes.

**c) Deferred charges**

Accounting practices adopted in Brazil permit the deferral of research and development costs and of pre-operating expenses incurred in the construction or expansion of a new facility until the facility begins commercial operations. Deferred charges are amortized over a period of five to ten years.

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

For U.S. GAAP reconciliation purposes, such amounts do not meet the conditions established for deferral and, accordingly, have been charged to income and the related amortization under accounting practices adopted in Brazil has been reversed.

A-F-33

## Table of Contents

### Ultrapar Participações S.A. and Subsidiaries

#### d) Investments in affiliated companies

As from 1996, Brazilian corporate law allows certain less than 20% owned affiliated companies in which an investor owns more than 10% of voting stock to be accounted for under the equity method. In addition, certain more than 20% and less than 50% owned affiliated companies deemed not significant in relation to their parent company are accounted at cost.

For U.S. GAAP reconciliation purposes, less than 20% owned affiliated companies have been accounted for on the basis of cost and more than 20% and less than 50% owned affiliated companies have been accounted for on the equity method for all years presented.

#### e) Capitalization of interest in relation to construction in progress

Under accounting practices adopted in Brazil, prior to January 1, 1996 the Company was not required to capitalize the interest cost of borrowed funds as part of the cost of the related asset. Under U.S. GAAP, capitalization of borrowed funds during construction of major facilities is recognized as part of the cost of the related assets.

Under U.S. GAAP, interest on construction-period financing denominated in foreign currencies is capitalized using contractual interest rates, exclusive of foreign exchange or monetary correction gains or losses. Interest on construction-period financing denominated in Brazilian reais is capitalized.

#### f) Acquisitions and business combinations

Under accounting practices adopted in Brazil, assets and liabilities of acquired entities are reflected at book values. Goodwill is represented by the excess of purchase price paid over the book value of net assets and is amortized on a straight-line basis over the periods estimated to be benefited.

Under U.S. GAAP, business combinations are accounted for by the purchase method utilizing fair values. Goodwill is not amortized and should be tested for impairment. An impairment test of goodwill is performed annually or more frequently if events or changes in circumstances indicate that the goodwill might be impaired. Such impairment test is performed utilizing a two-step method. The first step compares the fair value of a reporting unit with its carrying amount, including goodwill. If the carrying amount of a reporting unit exceeds its fair value, the second step is performed to measure the amount of impairment loss, if any. The second step compares the implied fair value of reporting unit goodwill with the carrying amount of that goodwill. If the implied fair value of reporting unit goodwill is lower than the carrying amount of such goodwill, an impairment loss is recognized.

Under Brazilian corporate law, purchases by subsidiaries of their own stock from minority stockholders are initially recorded at cost. Upon cancellation of these shares, the difference between cost and the related book value of the subsidiary's stockholders' equity is recorded by the parent company and in the consolidated financial statements as a capital gain or loss. Direct purchases by the parent company of the subsidiary stock from minority stockholders are recorded at cost, with the difference between cost and the related book value of the subsidiary stockholders' equity recorded as positive or negative goodwill by the parent company and in the consolidated financial statements.

Under U.S. GAAP, purchases of treasury stock by subsidiaries from minority stockholders and direct purchases by the parent company of the subsidiary stock from minority stockholders are recorded as step acquisitions under the purchase method, with assignment of the purchase price to the underlying assets and liabilities based on their fair values and recording of goodwill to the extent that the purchase price exceeds the proportionate amount of the net fair value of the assets and liabilities. No gain or loss is recognized upon either purchase or cancellation of the shares.

#### Acquisition of subsidiary shares from minority stockholders 2004

As mentioned in Note 3, on December 29, 2004 the Company acquired, through its subsidiary Ultragaz Participações Ltda., an additional 7.31% of Companhia Ultragaz S.A. total share capital. This acquisition amounted to R\$10.0. Under accounting practices adopted in Brazil, the goodwill of R\$1.8 generated in this acquisition was based on its expected future profitability and will be amortized over five years beginning

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

January 2005. As a result of this acquisition, the Company increased its indirect interest in Companhia Ultragaz S.A. to 94%.

A-F-34

**Table of Contents**

Ultrapar Participações S.A. and Subsidiaries

Under U.S. GAAP, the Company has accounted for this transaction as an acquisition of minority interest. The purchase price of this acquisition was R\$3.7 million, net of tax, higher than the historical book value recorded under U.S. GAAP. This difference was allocated as an increase of property, plant and equipment, in the amount of R\$3.2 million (net of deferred income taxes) and as an increase of inventories, in the amount of R\$0.5 million (net of deferred income taxes), based on the estimated fair value of the net assets of Companhia Ultragaz S.A.

g) Earnings per share

Under accounting practices adopted in Brazil, it is permitted to determine earnings per share based upon the weighted average number of shares outstanding during each year that earnings are reported. Subsequent changes in the Company's share capital, such as stock dividends, are not retroactively reflected in the disclosure of number of shares outstanding and in the calculation of earnings per share under accounting practices adopted in Brazil, except for the reverse stock split.

A-F-35

**Table of Contents**

Ultrapar Participações S.A. and Subsidiaries

Under U.S. GAAP, earnings per share are determined based upon the weighted average number of shares outstanding during the period, giving retroactive effect to stock dividends and stock splits. Nonvested shares granted to certain executives of the Company as disclosed in Note 24.I.k) are not included in the computation of basic earnings per share even though the shares are legally issued, since such shares are considered contingently returnable because if the executives do not render the requisite service, the shares are returned to the Company. These nonvested shares are included in diluted earnings per share applying the treasury stock method. The calculation of earnings per share under U.S. GAAP is shown in Note 24.V.a).

The Extraordinary Stockholders Meeting held on July 20, 2005 approved a reverse stock split of the Company's shares, attributing 1 (one) share in substitution for every 1,000 (thousand) existing shares. Likewise, each American Depositary Share ADS, previously representative of a lot of 1,000 (thousand) preferred shares, became representative of 1 (one) preferred share.

h) Available-for-sale securities

Equity securities

Under accounting practices adopted in Brazil, available-for-sale equity securities are generally carried at cost, less provision charged to the statement of income if a loss in value is considered to be other than temporary.

For U.S. GAAP reconciliation purposes, the available-for-sale equity security has been recorded at estimated fair value, and the resulting accumulated adjustment, in the amount of R\$4.1 (positive) and R\$5.1 (positive) as of December 31, 2006 and 2005, respectively, net of deferred tax effect, when applicable, has been recognized as a separate component of stockholders' equity until realization. The estimated fair values of the equity security carried by the Company are R\$22.2 and R\$23.7 as of December 31, 2006 and 2005, respectively. During the years presented, no equity security classified under U.S. GAAP as available-for-sale was disposed of.

Debt securities

Under accounting practices adopted in Brazil, available-for-sale debt securities are generally carried at cost, plus interest income earned less provisions, when applicable, charged to the statement of income to reduce its carrying value to market value.

For U.S. GAAP reconciliation purposes, available-for-sale debt securities have been recorded at estimated fair value, and the resulting accumulated adjustment, in the amount of R\$9.0 positive in 2006 (zero in 2005), has been recognized as a separate component of stockholders' equity, net of deferred tax effects and minority interest, when applicable, until realization.

As of December 31, 2006 and 2005, the fair values of available-for-sale debt securities amounted to R\$871.8 and R\$177.8, respectively, and the gross unrealized gains amount to R\$13.7 in 2006 (zero in 2005).

As of December 31, 2006, the amount of R\$704.3 of available-for-sale debt securities mature within one year, R\$128.3 mature between one and two years, and R\$25.7 mature between two and three years.

For the year ended December 31, 2006, the Company sold debt securities for R\$315.2 (R\$12.6 in 2005 and R\$18.7 in 2004), generating a gross realized loss of R\$6.1 (R\$3.0 in 2005 and R\$2.2 in 2004), recorded in the statement of income. The cost of such securities was based on specific identification.

As of December 31, 2006, the amount of R\$33.0 of held to maturity debt securities mature within one year, R\$386.8 mature between one and two years, and R\$7.2 mature in 2018. Under accounting practices adopted in Brazil and for U.S. GAAP, held to maturity debt securities are treated similarly.

Ultrapar Participações S.A. and Subsidiaries

i) Accounting for derivative financial instruments

In the Company's financial statements prepared in accordance with accounting practices adopted in Brazil derivative financial instruments are recorded at net settlement price as determined on each balance sheet date.

Under U.S. GAAP, effective January 1, 2001, all derivative financial instruments must be reported at fair value on each balance sheet date and classified as a derivative asset or liability. Also under U.S. GAAP, the requirements for a derivative instrument to qualify for hedge accounting and deferral of gains and losses are more restrictive than under Brazilian corporate law.

The following table provides a detail of our derivative financial instruments outstanding at the end of each year for which income statement is being presented.

## Ultrapar Participações S.A. and Subsidiaries

## j) Expenses for public offering of shares

Under accounting practices adopted in Brazil, costs associated with the offering of shares to the public, in the amount of R\$2.4, are recorded as financial expenses in 2005.

Under U.S. GAAP, these costs directly reduce the proceeds of the offering recorded in capital.

## k) Accounting for stock compensation plan

As mentioned in Note 22, the Company has approved a stock compensation plan on November 26, 2003.

The table below summarizes the information related to the shares granted to the Company's executives:

| Grant date        | Restricted shares granted | Fair value of shares (whole Brazilian reais) | Total compensation costs, including tax | Accumulated recognized compensation costs | Unrecognized compensation costs |
|-------------------|---------------------------|----------------------------------------------|-----------------------------------------|-------------------------------------------|---------------------------------|

|                   | 246,950                   |                                              | 12.3                                    | (2.3)                                     | 10.0                            |

Those shares were granted at no cost to the Company's executives. The grant-date fair values were determined based on the market value of these shares on the BOVESPA. These executives have the right to receive dividends on these shares provided that the professional relationship between them and the Company and its subsidiaries is not interrupted. These shares will cliff vest after ten years of the initial award. As of December 31, 2006, none of these shares granted to the executives were forfeited. As of December 31, 2006, the total compensation cost related to nonvested awards not yet recognized amounts to R\$10.0, and 8.4 years is the weighted-average period over which this compensation cost is expected to be recognized.

(\*)Retroactively adjusted for the stock dividend and reverse stock split as mentioned in Note 24.I.g).

Under accounting practices adopted in Brazil, the Company records compensation costs from its stock compensation plan similarly to the requirements of SFAS 123 (R) Share-Based Payment, using the fair value of the award. Compensation cost is charged to earnings on a straight-line basis. The fair value of the award equals its intrinsic value at the grant date.

No adjustments are included in the U.S. GAAP reconciliation related to the Company's stock compensation plan since the Company applies SFAS 123 (R) Share-Based Payment to account for the plan for U.S. GAAP purposes.

For U.S. GAAP purposes, dividends declared under these unvested restricted shares are accounted for initially as a charge to retained earnings. If the restricted shares do not vest, all previously declared dividends associated with the restricted shares are reversed from retained earnings and charged to compensation expense. As of December 31, 2006, accumulated dividends declared under all unvested restricted shares outstanding amounted to R\$0.9 (R\$0.5 in 2005).

## l) Fair value of guarantees under FIN 45

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

Under accounting practices adopted in Brazil, the Company is not required to record any liability related to guarantees given to third parties unless contingent obligations to make future payments under the guarantees are probable.

Under accounting practices adopted in Brazil, as of December 31, 2006, the Company has not recorded any liability related to these guarantees, as disclosed in Note 13.

A-F-40

**Table of Contents**

## Ultrapar Participações S.A. and Subsidiaries

Under U.S. GAAP, the Company recognizes, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing guarantees in accordance with FIN 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. In the event that, at inception of the guarantee, the Company is required to recognize a liability under SFAS 5, Accounting for Contingencies, the liability initially recognized would be the greater of: (a) the amount of fair value of the value of the obligation undertaken in issuing guarantee, or (b) the contingent liability amount required to be recognized at inception of the guarantee by applying SFAS 5.

Under U.S. GAAP, as of December 31, 2006 and 2005 the Company recorded a liability in the amount of R\$0.8 and R\$0.8, respectively, related to these guarantees based on their fair value. The respective offsetting entry of this liability was recorded as an expense. The net effect of this matter in the income statement as per U.S. GAAP is R\$0.0, R\$0.3 (expenses) and R\$0.6 (expenses), per the year ended on December 31, 2006, 2005 and 2004, respectively, at the time those guarantees were issued. The Company reduces the liability (by a credit to earnings) as it is released from risk under the guarantees.

## m) Translation adjustments Canamex

Under accounting practices adopted in Brazil, assets and liabilities of foreign subsidiaries are translated into Brazilian reais at the exchange rate in effect at the end of the reporting period, and revenues, expenses, gains and losses are translated into Brazilian reais at the exchange rates prevailing in the end of each month. The net translation gain or loss is reported, net of tax, in the statement of income as Other operating income (loss).

Under U.S. GAAP, the functional currency of Canamex Químicos S.A. de C.V. (Canamex) is the Mexican Peso. As a consequence, the financial statements of Canamex are translated into Brazilian reais in accordance with the criteria set forth in Statement of Financial Accounting Standards No. 52 (SFAS 52). Under these criteria, assets and liabilities are translated into Brazilian reais at the exchange rate in effect at the end of the reporting period, and revenues, expenses, gains and losses are translated into Brazilian reais at the average rates prevailing during the respective months. The net translation gain or loss resulting from this translation process is excluded from income and is presented as cumulative translation adjustments (CTA) in Other comprehensive income (loss) as a separate component of stockholders' equity.

As a result of this difference, the net translation gain or loss, net of tax, reported in the statement of income under accounting practices adopted in Brazil in the amount of R\$1.2 (loss) for the year ended December 31, 2006 (2005 R\$3.0 gain) was reclassified to Accumulated other comprehensive income (loss) in stockholders' equity under U.S. GAAP. Such difference has no total stockholders' equity effect.

## n) Classification of export notes

Certain subsidiaries of the Company have discounted certain export notes under recourse financing arrangements with financial institutions operating in Brazil. If the original debtors fail to pay their obligations when due, these subsidiaries would be required to repay the financed amounts. Under accounting practices adopted in Brazil, such transactions are classified as a reduction of accounts receivable as mentioned in Note 6. Under U.S. GAAP, these transactions are recorded gross as accounts receivable and bank loans. As a consequence, current assets and liabilities under U.S. GAAP would be increased by R\$50.9 and R\$39.0 at December 31, 2006 and 2005, respectively. This U.S. GAAP difference has no net income or equity effect.

## o) Operating income

Under accounting practices adopted in Brazil, nonoperating income (expenses) includes certain items that would be classified within operating income for U.S. GAAP purposes. These items amounted to R\$14.8 (loss), R\$1.6 (loss) and R\$15.1 (loss) for the years ended December 31, 2006, 2005 and 2004, respectively, and are composed as follows:

Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

|                                                                                        | 2006   | 2005  | 2004   |
|----------------------------------------------------------------------------------------|--------|-------|--------|
| Total nonoperating expenses, net reported under accounting practices adopted in Brazil | (18.5) | (1.8) | (16.0) |
| Operating items under U.S. GAAP:                                                       |        |       |        |
| Loss on disposals of fixed assets                                                      | 1.1    | 1.6   | 15.1   |

**Table of Contents**

## Ultrapar Participações S.A. and Subsidiaries

## p) Escrow deposits

Under accounting practices adopted in Brazil, the balances of escrow deposits are offset against these under the heading Other taxes and contributions contingent liabilities in non-current liabilities. Under U.S. GAAP, these balances are recorded gross as escrow deposits and other taxes and contributions contingent liabilities. As a consequence, non-current assets and liabilities under U.S. GAAP would be increased by R\$32.2 and R\$6.1 at December 31, 2006 and 2005, respectively. This U.S. GAAP difference has no net income or equity effect.

## q) Accounting for planned major maintenance activities change in accounting principle

Under accounting practices adopted in Brazil, the Company used the accrue-in-advance method of accounting for planned major maintenance activities until January 1, 2006. In accordance with the provisions contained in CVM Resolution No. 489, dated of October 3, 2005 and the Accounting Pronouncement and Standard-NPC 22 about Provisions, Liabilities and Contingencies, issued by the Brazilian Institute of Independent Auditors IBRACON, the accrue-in-advance method of accounting for planned major maintenance was prohibited to be used as from January 1, 2006. As a result, as from January 1, 2006, the Company changed its accounting principle in regards to planned major maintenance activities and selected to use the deferral method by which the Company capitalizes the amounts expended on the planned major maintenance activities and amortizes them through the period to the next planned major maintenance. The effect of such change in accounting principle is recorded as a prior year adjustment to retained earnings as of January 1, 2006 not restating prior periods.

Under U.S. GAAP, the Company also used the accrue-in-advance method of accounting for planned major maintenance activities until January 1, 2006. In order to be consistent with Company's view and accounting practices adopted in Brazil, the Company early adopted the FSP AUG AIR Accounting for Planned Maintenance Activities as of January 1, 2006. As a result, as from January 1, 2006, the Company changed its accounting principle in regards to planned major maintenance activities and selected to use the deferral method consistently with accounting principles adopted in Brazil. The Company applied the FSP guidance and SFAS No. 154 Accounting Changes and Error Corrections to record retrospectively the effect of the change in accounting principle for all periods presented. All effects related to this matter concerns the chemical segment. The table below summarizes this change in accounting principles:

| Description                            | Amount<br>previously<br>reported<br>under<br>U.S.<br>GAAP | Gross<br>effect of<br>change in<br>accounting<br>principle | Income<br>tax on<br>change in<br>accounting<br>principle | Net effect<br>of change in<br>accounting<br>principle | Amount<br>reported<br>under<br>U.S. GAAP<br>in these<br>financial<br>statements |

**Table of Contents**

Ultrapar Participações S.A. and Subsidiaries

The cumulative effect of the change to new accounting principle prior to January 1, 2004 in the carrying amounts of assets and liabilities as of January 1, 2004 amounts to R\$10.5. See item IV Statement of changes in stockholders' equity in accordance with U.S. GAAP.

r) Financial statement note disclosures

Under accounting practices adopted in Brazil, a certain set of information is required to be disclosed in the notes to the financial statements. The additional disclosures required by U.S. GAAP, which are relevant to the accompanying financial statements, are included herein.

s) New pronouncements

In December 2006, the FASB issued FASB Staff Position (FSP) No. EITF 00-19-2, *Accounting for Registration Payment Arrangements*, which includes most registration rights agreements in security issuances and certain contingent interest features in debt instruments. The FSP specifies that the contingent obligation to make future payments or otherwise transfer consideration under a registration payment arrangement, whether issued as a separate agreement or included as a provision of a financial instrument or other agreement, should be separately recognized and measured in accordance with SFAS No. 5, *Accounting for Contingencies*. The FSP is effective immediately for registration payment arrangements and the financial instruments subject to those arrangements that are entered into or modified subsequent to December 21, 2006. The Company will apply this statement as the need arises.

In September 2006, the FASB issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, which requires employers to recognize the over funded or under funded status of defined benefit postretirement plans as an asset or a liability and to recognize the changes in the funded status through comprehensive income. This statement also requires that defined benefit plan assets and obligations be measured as of the fiscal year-end. The Company will apply this statement as circumstances arise.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*, which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expand disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. The Company will apply this statement as of November 15, 2007 as the need arises.

In July 2006, the FASB issued FIN 48, *Accounting for Uncertainty in Income Taxes*, which prescribes a comprehensive model for how a company should recognize, measure, update and disclose in its financial statements uncertain tax positions that the company has taken or expects to take on a tax return (including a decision whether to file or not file a return in a particular jurisdiction). Under the Interpretation, the financial statements will reflect expected future tax consequences of such positions presuming the taxing authorities' full knowledge of the position and all relevant facts, but without considering time values. The Company will apply this Interpretation for its 2007 financials and does not expect any material impact resulting from this application.

In March 2006, the FASB issued SFAS No. 156 *Accounting for Servicing of Financial Assets*. SFAS No. 156 amends SFAS No. 140 *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, that

**Table of Contents**

## Ultrapar Participações S.A. and Subsidiaries

establishes, among other things, the accounting for all separately recognized servicing assets and servicing liabilities. SFAS No. 156 amends Statement 140 to require that all separately recognized servicing assets and servicing liabilities be initially measured at fair value, if practicable. SFAS No. 156 permits, but does not require, the subsequent measurement of separately recognized servicing assets and servicing liabilities at fair value. An entity that uses derivative instruments to mitigate the risks inherent in servicing assets and servicing liabilities is required to account for those derivative instruments at fair value. The Company will begin applying this interpretation as circumstances arise.

In February 2006, the FASB issued SFAS No. 155 *Accounting for Certain Hybrid Financial Instruments*. SFAS No. 155 amends FASB Statements No. 133 *Accounting for Derivative Instruments and Hedging Activities* and No. 140 *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. SFAS No. 155 resolves issues addressed in Statement 133 Implementation Issue No. D1 *Application of Statement 133 to Beneficial Interests in Securitized Financial Assets*, and in general terms:

- (a) Permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation;
- (b) Clarifies which interest-only strips and principal-only strips are not subject to the requirements of Statement 133;
- (c) Establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation
- (d) Clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives;
- (e) Amends Statement 140 to eliminate the prohibition on a qualifying special purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument.

This Statement is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. The Company will begin applying this statement as circumstances arise.

## II Reconciliation of the differences between U.S. GAAP and accounting practices adopted in Brazil in net income

## V Additional disclosures required by U.S. GAAP

## a) Earnings per share

The following table provides a reconciliation of the numerators and denominators used in computing earnings per share as required by SFAS 128. The calculation of earnings per share as summarized below is retroactively adjusted for the stock dividend and reverse stock split as mentioned in Note 24.I.g). As discussed in Notes 22 and 24.I.k), the Company has a share compensation plan. For all periods presented, the impact of this share compensation plan on diluted earnings per share was minimis and, consequently, the Company has not presented a separate calculation of the diluted earnings per share amount.

## Table of Contents

### Ultrapar Participações S.A. and Subsidiaries

#### b) Concentrations of credit risk

Financial instruments which potentially subject the Company to credit risk are cash and cash equivalents, financial investments and trade receivables. Based on the factors described below, the Company considers the risk of counterparty default to be minimal.

The Company manages its credit risk with respect to cash equivalents and financial investments by investing only in liquid instruments with highly-rated financial institutions. In addition, investments are diversified in several institutions, and credit limits are established for each individual institution.

Credit risk from accounts receivable is managed following specific criteria for each of the segments in which the Company operates, as follows:

#### Chemical segment (Oxiteno)

Oxiteno's customers of commodity chemicals are principally chemical companies, surface coating producers and polyester resin producers, while customers of specialty chemicals comprise a variety of industrial and commercial enterprises. No single customer or group accounts for more than 10% of total revenue. Management believes that by distributing its products to a variety of markets it is able to protect itself, to a certain extent, from the effects of negative trends in any particular market. Oxiteno acts as a member of a Credit Committee of the Brazilian chemical manufacturers which meets monthly to review the financial position of clients showing past-due accounts.

Historically, the Company has not experienced significant losses on trade receivables.

#### Gas segment (Ultragaz)

Ultragaz sells its products to the residential, commercial and industrial markets.

Sales to the residential market are carried out directly by Ultragaz using cash terms, from which no significant credit risk exists, or through outside distributors. Credit risk in sales to outside distributors is reduced due to the large customer base, the ongoing control procedures that monitor the creditworthiness of distributors, and by short payment terms (24 days on average) that permit continuous monitoring of distributors compliance.

Sales to the commercial and industrial markets are usually made to customers that have signed a credit agreement with the Company and have provided guarantees or collateral. Periodic monitoring of these accounts is performed by specific staff with the support of financial information systems.

**Table of Contents**

## Ultrapar Participações S.A. and Subsidiaries

No single customer or group accounts for more than 10% of total revenue.

Historically, the Company has not experienced significant losses on trade receivables.

**Logistic segment (Ultracargo)**

The main customers of Ultracargo are chemical companies. The average-term payment is 34 days.

Historically, the Company has not experienced significant losses on trade receivables.

**Company is dependent on few major suppliers**

The Company is dependent on third-party manufacturers for all of its supply of ethylene and LPG. In 2006, 2005 and 2004, products purchased from the Company's three largest suppliers accounted for approximately 72%, 73% and 76% of cost of sales and services, respectively. The Company is dependent on the ability of its suppliers to provide products on a timely basis and on favorable pricing terms. The loss of certain principal suppliers or a significant reduction in product availability from principal suppliers could have a material adverse effect on the Company. The Company believes that its relationship with its suppliers is satisfactory.

## c) Impairment of long-lived assets

The Company reviews the carrying value of property, plant, and equipment for impairment whenever events and circumstances indicate that the carrying value of an asset may not be recoverable from the estimated future cash flows expected to result from its use and eventual disposition. In cases where undiscounted expected future cash flows are less than the carrying value, an impairment loss is recognized equal to an amount by which the carrying value exceeds the fair value of assets. The factors considered by management in performing this assessment include current operating results, trends, and prospects, as well as the effects of obsolescence, demand, competition, and other economic factors.

No impairment has been recorded in the consolidated financial statements as of December 31, 2006.

## d) Impairment of goodwill

Under U.S. GAAP financial statements, goodwill consists of the excess of the cost paid for the acquisitions of SPGás and Canamex over the net of the fair value assigned to assets acquired and liabilities assumed of these companies.

The Company has recorded the following amounts of goodwill under the U.S. GAAP financial statements:

| Description                            | 2006 | 2005 |
|----------------------------------------|------|------|
| <b>Gas segment (Ultragas):</b>         |      |      |
| Goodwill on the acquisition of SPGás   | 39.9 | 39.9 |
| <b>Chemical segment (Oxiteno):</b>     |      |      |
| Goodwill on the acquisition of Canamex | 2.6  | 2.6  |

As mentioned in Note 24.I.(f), goodwill is not amortized and is tested for impairment annually.

## e) Fair value of financial instruments

## Edgar Filing: ULTRAPAR HOLDINGS INC - Form F-4/A

The fair values of accounts receivables and trade suppliers approximate their book values. The fair value of financial assets and financial liabilities, including cash and cash equivalents, short and long-term investments, financing, debentures and swap instruments are disclosed in Note 18.

Ultrapar Participações S.A. and Subsidiaries

f) Environmental issues

The Company and its subsidiaries are subject to federal, state and local laws and regulations relating to the environment. These laws generally provide for control of air and effluent emissions and require responsible parties to undertake remediation of hazardous waste disposal sites. Civil penalties may be imposed for noncompliance. The Company provides for remediation costs and penalties when a loss is probable and the amount is reasonably determinable. It is not presently possible to estimate the amount of all remediation costs that might be incurred or penalties that may be imposed; however, management does not presently expect that such costs and penalties will have a material effect on the Company's consolidated financial position or results of operations. Recurring costs associated with managing hazardous substances and pollution in on-going operations, mainly composed of costs for treatment of effluents and for incinerations, amounted to R\$4.4, R\$3.6 and R\$2.7 for the years ended December 31, 2006, 2005 and 2004, respectively. Capital expenditures to limit or monitor hazardous substances and pollutants amounted to R\$5.0, R\$8.3 and R\$4.2 for the years ended December 31, 2006, 2005 and 2004, respectively.

The Company's subsidiary Ultracargo Operações Logísticas e Participações Ltda. has controlled environmental liabilities in two of its terminals, situated in Santos and Paulínia, which are in monitoring and remediation phase, respectively.

We have no historical mandated expenditures to remediate previously contaminated sites, and other infrequent or non-recurring clean-up expenditures that can be anticipated but which are not required in the present circumstances.

g) Statement of cash flows

Accounting practices adopted in Brazil do not require the presentation of a statement of cash flows as required by U.S. GAAP. Changes in working capital are presented in the statement of changes in financial position. U.S. GAAP requires the presentation of a statement of cash flows describing the Company's cash flows from operating, financing and investing activities. Statements of cash flows derived from the information based on accounting practices adopted in Brazil are as follows:

- 
- (1) Net revenue from sales to unassociated companies of the chemical segment includes the amounts of R\$441.8, R\$559.2 and R\$638.3 for the years ended December 31, 2006, 2005 and 2004, respectively, related to Glycols. Glycols is the only one of our chemical products families that represents more than 10% of total sales. An important portion of our products could be classified as a commodity and a specialty chemical, depending on the use of such products by our customers. As a consequence we consider that an exact split of sales between commodity and specialty chemicals would be impractical.

i) Financial information for subsidiary guarantors and non-guarantor subsidiaries  
 Ultrapar Participações S.A. (Company) and Oxiteno S.A. (a wholly-owned subsidiary of Ultrapar Participações) are guarantors of LPG International Inc.'s obligations in connection with the issuance of registered notes. The guarantees are full and unconditional and are joint and several. We are presenting, pursuant to Rule 3 - 10 of Regulation S-X, condensed consolidating financial information, according to accounting practices adopted in Brazil, of the guarantors and other Ultrapar subsidiaries, as follow:

## j) Geographical area information

All long-lived assets are located in Brazil, except for long-lived assets located in Mexico, in the amount of R\$26.5, as of December 31, 2006 (R\$25.9 in 2005).

The Company generates revenues from operations in Brazil and, as from December 2003, from Mexico, as well as from exports of products to clients located in foreign countries as shown below:

|                                  | 2006    | 2005    | 2004    |
|----------------------------------|---------|---------|---------|
| Gross sales:                     |         |         |         |
| Brazil                           | 4,789.3 | 4,683.7 | 4,713.5 |
| Latin America, other than Brazil | 240.4   | 244.3   | 283.5   |
| Far East                         | 71.8    | 110.8   | 166.6   |
| Europe                           | 70.9    | 67.0    | 36.3    |
| North America                    | 36.6    | 28.8    | 24.6    |
| Other                            | 20.9    | 23.4    | 26.1    |
| Total                            | 5,229.9 | 5,158.0 | 5,250.6 |

## k) Research and development expenses

Total research and development expenses amounted to R\$18.4, R\$17.4 and R\$15.4 for the years ended December 31, 2006, 2005 and 2004, respectively.

## l) Employee severance fund and termination payments

The Company is required to contribute 8% of each employee's gross pay to an account maintained in the employee's name in the Government Severance Indemnity Fund (FGTS). No other contributions to the FGTS are required. Additionally, effective September 2001, the Company is required to pay an additional tax equal to 0.5% of gross pay. Contributions are expensed as incurred.

Under Brazilian law, the Company is also required to pay termination benefits to employees who have been dismissed. The amount of the benefit is calculated as 40% of the accumulated contributions made by the Company to the FGTS during the employee's period of service. Additionally, effective September 2001, the Company is required to pay a social tax of 10% of these accumulated contributions.

The Company does not accrue for these termination costs before a decision to terminate has been made, since the benefits are neither probable nor reasonably estimable. Actual termination costs paid on dismissal totaled R\$6.3, R\$5.3 and R\$4.1 for the years ended December 31, 2006, 2005 and 2004, respectively.

25. SUBSEQUENT EVENT  
ACQUISITION OF THE IPIRANGA GROUP

On April 18, 2007, Ultrapar (for itself), and acting as a commission agent of Braskem S.A. and Petróleo Brasileiro S.A. Petrobras, acquired for R\$2,113.1 from the controlling stockholders of Grupo Ipiranga 66.2% of common shares and 13.9% of preferred shares issued by Refinaria de Petróleo Ipiranga S.A. ( RPI ), 69.2% of common shares and 13.5% of preferred shares issued by Distribuidora de Produtos de Petróleo Ipiranga S.A. ( DPPI ), and 3.8% of common shares and 0.4% of preferred shares issued by Companhia Brasileira de Petróleo Ipiranga ( CBPI ). Of the total amount paid, Braskem and Petrobras paid R\$1,394.7 to Ultrapar under the terms of the commission established between the parties. Ultrapar will begin to consolidate this acquired business as from April 2007.

Under the terms of the agreement entered into among Ultrapar, Braskem and Petrobras, Ultrapar holds the control of the fuel distribution and lubricant businesses located in the South and Southeastern regions ( South Distribution Business ), Petrobras holds the control of fuel distribution and lubricant business located in the North, Northeast and Center-West regions ( North Distribution Business ), and Braskem holds control of the petrochemical assets, represented by Ipiranga Química S.A., Ipiranga Petroquímica S.A. (IPQ) and the ownership stake in Copesul Companhia Petroquímica do Sul (Petrochemical Business). The oil refining operations held by RPI are equally shared among Petrobras, Ultrapar and Braskem.

In the same agreement, the parties established that Ultrapar is responsible for executing a corporate restructuring of the acquired companies, with the objective of separating the assets attributed to each one of the acquirors, whose stages are:

- a) Tag Along Share Offering for the purchase of common shares issued by RPI, DPPI, CBPI and IPQ.
- b) Merger of shares issued by RPI, DPPI and CBPI into Ultrapar.
- c) Segregation of the assets through: (i) capital reduction of RPI and CBPI, in order to directly transfer the Petrochemical Business to Ultrapar, and subsequent transfer to Braskem and Petrobras, and (ii) split of CBPI to transfer the North Distribution Assets to a Petrobras subsidiary.

For this acquisition, Ultrapar issued, on April 11, 2007, debentures in the amount of R\$889.0, of which the first series was received on April 18, 2007, in the total amount of R\$675.0 with maturity on April 11, 2008 and semiannual interest payment of 102.5% of CDI, and the second series in the amount of R\$214.0 remains to be issued.

**Table of Contents**

On April 17, 2007 the CADE (Administrative Council for Economic Defense) issued a writ of prevention aiming to keep the reversibility of the asset acquisition by Braskem and Petrobras, as described in the press release of April 18, 2007. The determination with regard to the Petrochemical Business effectively were reviewed on April 25, 2007, in a decision homologated by CADE's Plenary assembly, with celebration, for Braskem, of a protection agreement for the operation reversibility (APRO). CADE recognized maintenance of the minority participation maintenance by Petrobras in Copesul after the acquisition. With regard to the fuel distribution, Petrobras and Ultrapar were requested to present to CADE an alternative model of corporate governance, which preserves the competition in the sector. Such measures do not affect the Offers conclusion.

ANNEX C

**Ultrapar s Material Event, dated April 18, 2007, regarding review of Ipiranga Group  
acquisition by the Administrative Council for Economic Defense**

**Table of Contents**

**MATERIAL EVENT**

Petróleo Brasileiro S.A. ( Petrobras ), Ultrapar Participações S.A. ( Ultrapar ) and Braskem S.A. ( Braskem ), in compliance with the order contained in the writ of prevention N° 087000.001707/2007-80 ( Writ of Prevention ) issued by the Administrative Council for Economic Defense CADE (the Brazilian anti-trust authority), in the context of CADE's review of the acquisition by Petrobras, Ultrapar and Braskem of the companies that form the Ipiranga Group (the transaction), as described in the Material Event notice published on March 19, 2007, hereby inform interested parties that:

The companies appreciate the concern that motivated CADE to issue the Writ of Prevention and have already started to prepare analyses and information to be submitted to CADE, demonstrating that the transaction would benefit competitiveness of the petrochemical sector and would consolidate the Brazilian fuel distribution market without causing any harm to consumer interests.

The Writ of Prevention did not affect the closing of the acquisition of the controlling interest of Ipiranga Group as described in the Material Event released on March 19 this year which was concluded today.

The companies will comply with the provisions contained in the Writ of Prevention, as set forth below:

- (i) *Petróleo Brasileiro S.A. Petrobras, or any of its subsidiaries or affiliates, is forbidden to take part in deliberating, negotiating, discussing or any meeting, under any excuse, on matters concerning commercial and strategic aspects of Copesul Companhia Petroquímica do Sul, as well as to request, as a shareholder, documents, papers and information which cover, even indirectly, decisions taken in these matters;*
- (ii) *Braskem S.A., or any of its subsidiaries or affiliates, is forbidden to take part in deliberating, negotiating, discussing or any meeting, under any excuse, on matters concerning commercial aspects and business development of the acquired Ipiranga Química S.A. and Ipiranga Petroquímica S.A. except in what regards those assets covered under item i as well as to request, as a shareholder, documents, papers and information which cover, even indirectly, decisions taken in these matters;*
- (iii) *Petrochemical assets of the Ipiranga group except for those assets covered in item (i) and those related to these assets and the assets of Petrobras referred to in item (b), above, must remain a legally independent unit, including the continuance of the line of products, brand and distribution network;*
- (iv) *Decisions related to the development of the businesses of Copesul Companhia Petroquímica do Sul must preserve the economic value of the petrochemical assets covered in item (ii);*
- (v) *Petróleo Brasileiro S.A. Petrobras, or any of its subsidiaries or affiliates, is forbidden to participate in deliberating, negotiating, discussing and any meeting, under any pretext, on commercially and strategically related matters related to the acquired fuel distribution business;*
- (vi) *With regard to items (i), (ii), (v), the independent manager that will be constituted, must preserve the competitive relationships previously existing in their operation;*

**Table of Contents**

- (vii) *The petitioners must publish a Material Event announcement, under the terms of the applicable legislation, with the objective of informing the market of the conditions established by CADE in its writ of prevention, to preserve the competitive conditions in the sectors affected by the operation, as well as preserving the reversible nature of the transaction;*
- (viii) *The writ of prevention here presented may be reviewed at any time, at the behest of CADE or at the request of the petitioners, if in the judgement of the General Assembly of CADE, they do not affect the requirements that motivated its issuance, or that the measures adopted show themselves to be insufficient to guarantee the preservation of the reversible nature of the transaction;*
- (ix) *Infringement of any of these obligations herein established, declared by the Plenary Session of CADE, will be penalized with a daily fine, which will be registered against the company as an executed tax debt, of 100.000 (one hundred thousand) UFIRs, per item infringed, without any harm to the other applicable civil or criminal sanctions applicable, as well as the legal implementation of this decision, which constitutes an extrajudicial execution instrument for all legal purposes.*

The closing of the acquisition of the shares of the controlling shareholders of Ipiranga occurred today, under the terms agreed in the Sale and Purchase Agreement signed on March 18, 2007. The amounts of ordinary and preferred shares in each Ipiranga Group company set forth below were acquired from the Controlling Shareholders:

|                                                                 | RPI       | DPPI      | CBPI      |
|-----------------------------------------------------------------|-----------|-----------|-----------|
| Ordinary shares linked to the Shareholders Agreement            | 5,746,232 | 5,447,868 | n.a.      |
| % of Total Capital                                              | 19.41%    | 17.02%    | n.a.      |
| Ordinary shares <u>not</u> linked to the Shareholders Agreement | 860,599   | 1,959,258 | 1,341,319 |
| % of Total Capital                                              | 2.91%     | 6.12%     | 1.27%     |
| Preferred shares                                                | 2,276,295 | 2,239,771 | 402       |
| % of Total Capital                                              | 7.69%     | 7.00%     | 0.00%     |

Payment for the acquisition of the shares described above amounted to R\$2.1 billion.

All other information contained in the Material Event notice released on March 19, 2007 remains in effect.

São Paulo, April 18, 2007.

**PUBLICLY LISTED COMPANY**

CNPJ nº 33.256.439/0001- 39

**MATERIAL NOTICE**

Pursuant to CVM Instruction nº 358 of January 3, 2002, **ULTRAPAR PARTICIPAÇÕES S.A.** informs its Shareholders that, at a meeting held on August 8, 2007, the Board of Directors approved, in accordance with Article 7º of the Company Bylaws, CVM Instruction nº 10 of February 14, 1980, amended by CVM Instructions nº 268 of November 13, 1997 and nº 390 of July 08, 2003, and CVM explanatory Note nº 16/80, the continuance of the share repurchase program of its own nominative preferred shares, for cancellation or holding as treasury stock, with no reduction in capital stock, and subsequent sale. The Board of Directors understands that the acquisition of preferred shares for holding as treasury stock is an attractive option for investing the Company's available financial resources. The share repurchase program will adopt the following criteria:

1. Repurchase limit, as per Articles 3º and 5º of the said CVM Instruction nº 10/80 and the ownership structure as of August 8, 2007: up to 2,362,131 (two million, three hundred and sixty two thousand, one hundred and thirty one) preferred shares, corresponding to 10% of the free float in preferred shares, excluding the 798,047 (seven hundred and ninety eight thousand and forty seven) preferred shares currently held as treasury stock.

D-1

**Table of Contents**

Total preferred shares outstanding: 31,895,512 (thirty one million, eight hundred and ninety five thousand, five hundred and twelve) preferred shares, from which 293,732 (two hundred and ninety three thousand, seven hundred and thirty two) preferred shares held by the controlling shareholders were excluded;

2. Repurchase period: 365 (three hundred and sixty five) days  
Beginning: August 9, 2007  
Ending: August 8, 2008;
3. Acquisition price: market price;

RELEVANT NOTICE

In compliance with the provisions of CVM (Brazilian Securities and Exchange Commission) Instructions Nos. 319/99 and 358/02, Ultrapar Participações S.A. ( *Ultrapar* ), together with its controlled companies Refinaria de Petróleo Ipiranga S.A. ( *RPI* ), Distribuidora de Produtos de Petróleo Ipiranga S.A. ( *DPPI* ) and Companhia Brasileira de Petróleo Ipiranga ( *CBPI* ) (RPI, DPPI and CBPI are jointly referred to as the Ipiranga Group ), inform that they intend to carry out a corporate restructuring, as follows:

As disclosed by Ultrapar, Petróleo Brasileiro S.A. Petrobras ( *Petrobras* ) and Braskem S.A. ( *Braskem* ) in the relevant notices of March 19, 2007, April 18, 2007 and April 19, 2007, Ultrapar, on its own behalf and as a commission agent for and on behalf of Braskem and Petrobras, purchased all of the shares in RPI, DPPI and CBPI held by the former controlling shareholders of the Ipiranga Group.

The Ipiranga Group has a complex shareholding structure, consisting of three companies engaged in the same sectors, with cross shareholdings, and with an asymmetrical shareholding structure, to the extent that there are three universes of minority shareholders.

This shareholding structure compromises the operational, administrative and corporate efficiency of such companies, and also it does not allow the shareholders to have interests in a single company that concentrates the liquidity of the whole shareholding base of the Ipiranga Group with a high corporate governance standard and aligned interests.

Ultrapar, in the capacity of controlling shareholder of the companies that comprise the Ipiranga Group, is interested in strengthening such companies and adopting measures that assure greater efficiency.

RPI, CBPI, DPPI and Ultrapar believe that the share exchange is the most adequate and effective measure to resolve these issues in the interest of all companies, to the extent that it will simplify the corporate structure of the companies comprising the Ipiranga Group, increasing their size and operational freedom, and ensuring their strengthening. In view of this, they decided to call special general meetings for December 18, 2007, at which their shareholders will deliberate upon the share exchange of RPI, DPPI and CBPI, as applicable, by Ultrapar ( *Share Exchange Transactions* ).

## **Table of Contents**

### 1. OBJECTIVES AND COSTS.

1.1. *Objectives.* The Share Exchange Transactions are aimed at making the corporate structure of the Ipiranga Group simpler, and specializing and developing the businesses of Ipiranga Group. The following objectives are planned to be achieved through the Share Exchange Transactions, to the benefit of the relevant companies and their shareholders:

simplification of the complex corporate structure of the Ipiranga Group;

strengthening of the Ipiranga Group companies by eliminating the complex capital and corporate structure, thus enabling an improved operational and administrative efficiency and a greater capacity to make investments;

specialization and development of the companies that comprise the Ipiranga Group;

alignment of the interests of all shareholders of the companies;

increase in the liquidity of the shares of all companies, to the extent that the shareholder base will be widened through the concentration of all shareholders of the companies in a single company, with shares traded in stock exchanges in Brazil, and in New York through ADRs; and

extension of ULTRAPAR's recognized corporate governance standards to all shareholders of RPI, particularly with regard to the 100% tag-along right for preferred shares.

1.2. *Costs.* Ultrapar, RPI, DPPI and CBPI estimate that they will incur costs in the Share Exchange Transactions of around five million reais (R\$ 5,000,000.00), including expenses related to publishing, preparation of valuation reports and economic/financial valuations, domestic and foreign auditors, appraisers, consultants and attorneys' fees, filings with the SEC and other related expenses.

### 2. BUSINESS AND CORPORATE ACTIONS THAT PRECEDED THE SHARE EXCHANGE TRANSACTIONS.

No business or corporate actions related to the Share Exchange Transactions were taken other than those disclosed in this relevant notice and in the relevant notices of March 19, 2007, April 18, 2007 and April 19, 2007 referred to above.

### 3. NUMBER, TYPE AND CLASS OF SHARES TO BE DELIVERED.

#### 3.1. *Shares to be Delivered.*

(a) upon the share exchange by Ultrapar of shares in RPI, 0.79850 preferred share issued by Ultrapar shall be attributed to each one (1) common or preferred share issued by RPI;

(b) upon the share exchange by Ultrapar of shares in DPPI, 0.64048 preferred share issued by Ultrapar shall be attributed to each one (1) common or preferred share issued by DPPI; and

(c) upon the share exchange by Ultrapar of shares in CBPI, 0.41846 preferred share issued by Ultrapar shall be attributed to each one (1) common or preferred share issued by CBPI.

3.2. *Fractions of Shares.* Fractions of shares issued by Ultrapar resulting from the substitution in the position of each shareholder of RPI, DPPI and CBPI as a result of the Share Exchange Transactions shall be sold in an auction at the Bolsa de Valores de São Paulo - BOVESPA, and the proceeds resulting from this selling will be delivered to the respective shareholder after the financial settlement of the shares sold in the auction.

3.3. *Criteria Used to Determine the Exchange Ratios.* The exchange ratios set for the Share Exchange Transactions were determined based on economic/financial valuations of the relevant companies according to the same criterion of future profitability prospects. For the purposes of setting the exchange ratios, Ultrapar's management relied upon a valuation prepared by Deutsche Bank (qualified in *item 11.1*), while the Managements of RPI, DPPI and CBPI relied upon the valuation prepared by Credit Suisse (qualified in *item 11.1*) for the purpose of the Share Exchange Transactions. In this regard, see *item 6* below and sub-items thereof.

**Table of Contents**

3.4 *Reasons for the Operation to be Deemed Equitable for the Shareholders.* The exchange ratio set for the Shareholders is fair and equitable, as demonstrated by valuations made by Deutsche Bank and Credit Suisse.

4. POLITICAL AND EQUITY RIGHTS AND ADVANTAGES OF THE SHARES.

4.1. *Comparison Between the Political and Equity Rights and Advantages of the Shares.* The political and equity rights and advantages of the shares issued by Ultrapar are different in certain aspects from the rights and advantages of the shares issued by RPI, DPPI and CBPI, and it should be highlighted that the shares in Ultrapar have rights that align the interests of all shareholders, as a reference of good corporate governance, which are superior to those of the shares in RPI, DPPI and CBPI, particularly the tag-along right at 100% of the price in the event of sale of control, as explained below:

| Corporation | Type of Share | Voting Right | Profit Sharing/                                                                             |  | Tag-Along*                                                           | Liquidation                                                | Share Repayment Amount                                                              | Exclusion of Preemptive Right                                                                                                                                     |
|-------------|---------------|--------------|---------------------------------------------------------------------------------------------|--|----------------------------------------------------------------------|------------------------------------------------------------|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|             |               |              | Priority Upon Liquidation                                                                   |  |                                                                      |                                                            |                                                                                     |                                                                                                                                                                   |
| Ultrapar    | Common        | Yes          | Minimum compulsory dividend of 50% of the adjusted profit.                                  |  | 100% of the sale price of shares owned by controlling block members. | It is up to common shareholders to appoint the liquidator. | The share amount for repayment purposes is set based on the company's equity value. | Shares, convertible debentures and/or warrants may be issued without preemptive right to former shareholders in the events set forth in art. 172 of Law 6.404/76. |
|             | Preferred     | No           | Minimum compulsory dividend of 50% of the adjusted profit.                                  |  | Same as common shares.                                               | No right to appoint liquidator.                            | Same as common shares.                                                              | Same as common shares.                                                                                                                                            |
|             |               |              | Priority in capital repayment, without premium, in the event of liquidation of the company. |  |                                                                      |                                                            |                                                                                     |                                                                                                                                                                   |

\* Tag-along right in the event of sale of control, pursuant to art. 254-A of Law 6.404/76

4.2. *Change of Rights of Preferred Shareholders.* Upon the Share Exchange Transactions, the holders of common or preferred shares in RPI, DPPI e CBPI shall then hold preferred shares in Ultrapar, and their rights will be changed according to the table above, consistently with the best corporate governance practices.

4.3. *Profit Sharing for the Year 2007.* The shares to be issued by Ultrapar as a result of the Share Exchange Transactions shall be fully entitled to all dividends and interest on equity capital that may be declared after the issuance thereof.

**Table of Contents**

5. SHARES TO BE RECEIVED BY THE SHAREHOLDERS.

The shareholders of RPI, DPPI and CBPI will receive preferred shares in Ultrapar in exchange for the shares held thereby, in order to allow for a single class of preferred shares, with the unification of the whole shareholding base in the same share in Ultrapar where the liquidity is concentrated and which is permitted to be traded in Brazil and in the New York Stock Exchange.

6. CALCULATION OF THE EXCHANGE RATIOS AND SHAREHOLDERS' EQUITY VALUATION CRITERIA.

6.1. *Accounting Valuation.* RPI, DPPI and CBPI shares to be exchanged by Ultrapar shares were evaluated at the book value, based on the balance sheets of said companies as of September 30, 2007, audited by KPMG Auditores Independentes ( KPMG ). Said valuations were prepared by KPMG, and determined the amounts of R\$769,503,076.33 for the total shares in RPI, R\$909,971,402.47 for the total shares in DPPI, and R\$1,839,874,344.03 for the total shares in CBPI.

6.2. *Valuation Based on Future Profitability Prospects.* As explained in *item 3.3*, Deutsche Bank (qualified in *item 11.1*) was engaged by Ultrapar to evaluate RPI, DPPI, CBPI and Ultrapar based on their future profitability prospects. The valuations resulted in the following ranges of values: (a) R\$51.63 to R\$57.06 per share issued by RPI; (b) R\$41.11 to R\$45.44 per share issued by DPPI; (c) R\$26.97 to R\$29.81 per share issued by CBPI; and (d) R\$64.48 to R\$71.26 per share issued by Ultrapar. Likewise, Credit Suisse (also qualified in *item 11.1*) prepared, upon request of RPI's, DPPI's and CBPI's management, economic/financial valuations, also based on RPI's, DPPI's, CBPI's and Ultrapar's future profitability prospects. Credit Suisse's valuations resulted in the following ranges of values: (a) R\$50.90 to R\$56.26 per share issued by RPI; (b) R\$42.00 to R\$46.42 per share issued by DPPI; (c) R\$27.65 to R\$30.57 per share issued by CBPI; and (d) R\$64.50 to R\$71.29 per share issued by Ultrapar. Based on such valuations, Ultrapar's, RPI's, DPPI's and CBPI's management set the ratios for exchange of shares in RPI, DPPI and CBPI for shares in Ultrapar, as set forth in *item 3.1*.

6.3. *Valuation of the Shareholders' Equity at Market Value.* For the purposes of article 264 of Law 6.404/76, the shareholders' equities of Ultrapar, RPI, DPPI and CBPI were valued at market value, following the same criteria and as of the same date, September 30, 2007, by APSIS, a specialized company qualified in *item 11.1*.

6.3.1 *Exchange Ratios based on Shareholders' Equity Values at Market Value.* APSIS' valuation reports resulted in the following exchange rates: (a) 0.722591 share in Ultrapar for each one (1) share in RPI; (b) 0.644359 share in Ultrapar for each one (1) share in DPPI; and (c) 0.409277 share in Ultrapar for each one (1) share in CBPI.

6.4. *Treatment of Subsequent Equity Variations.* The base date of the Share Exchange Transactions is September 30, 2007. Equity variations occurring after said date until the date of the completion of the Share Exchange Transactions shall be accounted for in Ultrapar by equity in earnings of affiliated.

7. SOLUTION REGARDING SHARES IN THE CAPITAL OF A COMPANY HELD BY THE OTHER.

As of this date, there are no shares issued by Ultrapar that are held by RPI, DPPI or CBPI. The shares that Ultrapar will hold in RPI, DPPI and CBPI as a result of the Share Exchange Transactions shall continue to be held by Ultrapar. Eventual reciprocal interests, if any, that may result from the Share Exchange Transactions shall be eliminated within the legal period, pursuant to art. 224, paragraph 5, of the Brazilian Corporation Act.

8. ULTRAPAR'S CAPITAL STOCK COMPOSITION AND CORPORATE STRUCTURE AFTER THE SHARE EXCHANGE TRANSACTIONS.

8.1. *Ultrapar's Capital Stock Composition.* Ultrapar's subscribed capital stock is currently represented by 81,325,409 registered shares without par value, of which 49,429,897 are common shares and 31,895,512 are

---

**Table of Contents**

preferred shares, in the total amount of nine hundred and forty-six million thirty-four thousand six hundred and sixty-two reais and ninety-seven cents (R\$ 946,034,662.97), and the following changes may occur as a result of the Share Exchange Transactions assuming that the right of withdrawal is not exercised:

(a) exclusively with the RPI's Share Exchange Transaction, Ultrapar's subscribed capital stock would be R\$ 1,654,973,814.40, represented by 49,429,897 common shares and 46,011,214 preferred shares;

(b) exclusively with the DPPI's Share Exchange Transaction, Ultrapar's subscribed capital stock would be R\$ 1,541,849,759.76, represented by 49,429,897 common shares and 43,758,798 preferred shares; and

(c) exclusively with the CBPI's Share Exchange Transaction, Ultrapar's subscribed capital stock would be R\$ 2,388,751,309.05, represented by 49,429,897 common shares and 60,621,472 preferred shares.

With the Share Exchange Transactions, Ultrapar's total capital stock would be R\$ 3,693,505,560.28, represented by 136,030,357 registered shares without par value, of which 49,429,897 would be common shares and 86,600,460 would be preferred shares.

9. AMOUNT TO BE PAID FOR THE APPRAISAL RIGHTS.

9.1. *Appraisal Rights.* As explained below, the shareholders (a) of Ultrapar and RPI holding common or preferred shares, with regard to the RPI's Share Exchange Transaction, (b) of Ultrapar and DPPI holding common or preferred shares, with regard to the DPPI's Share Exchange Transaction, and (c) of Ultrapar holding common or preferred shares, and of CBPI holding common shares, with regard to the CBPI's Share Exchange Transaction, that dissent from or abstain on resolutions that may result in appraisal rights, or who fail to attend the relevant Special General Meeting, shall be assured appraisal right upon notice to such effect within thirty (30) days counted from the date of publication of the minutes of the respective Special Shareholders Meeting that approves the corporate transaction that is the cause of the appraisal right. The respective amount to be paid for the appraisal right shall depend on the accomplishment of the transaction, as set forth in article 230 of Law 6.404/76, and the payment thereof shall be made by the respective company up to the third business day next following the date of completion of the respective transaction. The appraisal rights shall only be assured to the shareholder that, as of March 16, 2007, the last day prior to the date of publication of the relevant fact of March 19, 2007, is proven to be the owner of the shares regarding which the appraisal rights were exercised, pursuant to art. 137, paragraph 1, of Law 6.404/76.

9.2. Amount to be paid. The dissenting shareholders shall be entitled to repayment of their shares according to the last balance sheet approved.

(a) Ultrapar's dissenting shareholders shall be entitled to repayment of their shares at the amount of twenty-three reais and eighty-six cents (R\$ 23.86) per share, according to the last balance sheet approved, that is, as of December 31, 2006;

(b) RPI's dissenting shareholders shall be entitled to repayment of their shares at the amount of nineteen reais and fifty cents (R\$ 19.50) per share, according to the last balance sheet approved, that is, as of December 31, 2006;

(c) DPPI's dissenting shareholders shall be entitled to repayment of their shares at the amount of twenty-five reais and thirteen cents (R\$ 25.13) per share, according to the last balance sheet approved, that is, as of December 31, 2006;

(d) CBPI's dissenting common shareholders shall be entitled to repayment of their shares at the amount of fourteen reais and sixty-eight cents (R\$ 14.68) per share, according to the last balance sheet approved, that is, as of December 31, 2006.

9.2.1. Pursuant to article 264, par. 3 of Law 6.404/76, DPPI's shareholders may choose to have their shares repaid based on the shareholders equity amount at market value of such company, which is thirty-three reais and fifty-five cents (R\$ 33.55) per share, according to the Market Value Shareholders' Equity Report.

## **Table of Contents**

9.2.2. The dissenting shareholders may, upon the exercise of the appraisal rights, request a special balance sheet for the company, according to the provisions of article 45, par. 2 of the Brazilian Corporation Act. In such event, after the expiration of the period determined for the Share Exchange Transactions to be reconsidered, pursuant to article 137, par. 3, of the Brazilian Corporation Act, the shareholder will receive 80% of the amount to be paid for the appraisal rights, and the balance, if any, shall be paid within one hundred and twenty (120) days counted from the date of the resolution by the Special Shareholders Meeting.

### 10. UNDISCLOSED LIABILITIES.

No relevant liabilities not disclosed in the balance sheets of RIP, DPPI and CBPI are known.

### 11. SPECIALIZED COMPANIES INVOLVED.

#### 11.1. *Identification of the Specialized Companies Involved.*

(a) Valuation of Shareholders Equity at Book Value: KPMG Auditores Independentes, a company with its headquarter at Rua Dr. Renato Paes de Barros, 33, 14º andar, São Paulo, SP, registered with the Brazilian Roll of Corporate Taxpayers of the Ministry of Finance under No. 57.755.217/0001-29 ( KPMG );

(b) Valuation of the Shareholders Equity at Market Value: Apsis Consultoria Empresarial S/C Ltda., a company with its headquarter at Rua São José 90, grupo 1.802, in the capital of the State of Rio de Janeiro, registered with the Brazilian Roll of Corporate Taxpayers of the Ministry of Finance under No. 27.281.922/0001-70 ( APSIS );

(c) Economic/Financial Appraisal of Ultrapar, RPI, DPPI and CBPI:

(c.1) *Company Engaged by Ultrapar:* Deutsche Bank Securities, Inc., a company with its headquarter at 60, Wall Street, New York, NY, United States of America ( *Deutsche Bank* ); and

(c.2) *Company Engaged by RPI, DPPI and CBPI:* Banco de Investimentos Credit Suisse (Brazil) S.A., a company with its headquarter at Avenida Brigadeiro Faria Lima, 3064, 13º andar, São Paulo, SP, registered with the Brazilian Roll of Corporate Taxpayers of the Ministry of Finance under No. 33.987.793/0001-33 ( *Credit Suisse* ).

11.2. *Declaration of No Conflicts of Interest.* KPMG, APSIS, Deutsche Bank and Credit Suisse, which are responsible for the valuation reports and the economic/financial valuations, hereby declare not to have any conflict of or common interests, whether actually or potentially, with RPI, DPPI, CBPI, Ultrapar or any minority shareholders, or with regard to the Share Exchange Transactions.

### 12. APPROVAL BY REGULATORY AUTHORITIES.

12.1. *Registration with the SEC.* The Share Exchange Transactions and the respective issue of new shares by Ultrapar are subject to the respective registration with the United States Securities and Exchange Commission.

12.2. *CADE.* The transaction of acquisition of the Ipiranga Group, including the phase of the Share Exchange Transactions, was reported to the Brazilian Administrative Council for Economic Defense CADE.

12.3. Any other communications required with regard to the Share Exchange Transactions shall be submitted to the competent governmental authorities, according to the applicable laws.

**Table of Contents**

13. OTHER CONDITIONS FOR THE SHARE EXCHANGE TRANSACTIONS.

13.1. *Trading on Bovespa.* As a result of the practices established by the São Paulo Stock Exchange Bovespa, Ultrapar shares issued within the context of the Share Incorporation Transactions will be traded under ticker symbol RPI, DPPI and CBPI until the Share Incorporation Transactions are ratified by the management of Ultrapar, RPI, DPPI and CBPI, after the expiration of the period for exercise of the right of withdrawal, or after the period of ten (10) days set forth in article 137, par. 3 of Law 6.404/76 has expired without a new meeting being called.

13.2. *Future Business Plans.* Ultrapar is planning significant investments in the following years in order to promote the growth of its business, based on investments in differentiated products, access to competitive raw materials and increase of the operational leverage. At Oxiteno, ongoing expansion projects of over US\$ 320 million, including the first fatty alcohol production unit in Latin America and a 40% increase in the production capacity of ethylene oxide and other specialty chemicals, will enable increased sales volumes and a growing operational leverage. Additionally, Oxiteno will continue its internalization process, particularly strengthening its leadership in the Americas whether by opening commercial offices or through acquisitions. At Ultragas we have planned to invest R\$ 50 million to strengthen our position in Brazil's North and Northeast, selling LPG in certain states where the potential market growth is above the country's average. At Ultracargo we will invest about R\$ 110 million between 2008-09 to expand its current liquid storage capacity by 35% due to the increase in the demand for logistics infrastructure in Brazil, which is related mainly to biofuels and the foreign trade flow. At Ipiranga we will continue to implement our business plan, which is based on enhancing the investment capacity and significantly increasing volumes, thus generating a growing operational leverage.

In the event that the Share Exchange Transactions are approved and, after the expiration of the legal period, RPI's, DPPI's, CBPI's and Ultrapar's shareholders, as applicable, do not reconsider the Share Exchange Transactions, it is expected that: (a) a capital reduction will be performed at RPI and CBPI in order to transfer directly to Ultrapar the petrochemical assets, represented by shares in Ipiranga Química S.A., to be subsequently delivered to Braskem and Petrobras pursuant to the Investment Agreement; and (b) CBPI will be split in order to transfer the fuel and lubricant distribution businesses located in the Northern, Northeastern and Midwestern regions to a company controlled by Petrobras.

14. SHARE EXCHANGE TRANSACTION DOCUMENTS.

14.1. *Available Documents.* The Share Exchange Transaction Documents (such as protocols and justifications, reports and others) are available at the websites of Ultrapar ([www.ultra.com.br](http://www.ultra.com.br)), RPI, DPPI and CBPI ([www.ipiranga.com.br](http://www.ipiranga.com.br)). Copies of such materials will also be made available at the websites of CVM ([www.cvm.gov.br](http://www.cvm.gov.br)) and the São Paulo Stock Exchange ([www.bovespa.com.br](http://www.bovespa.com.br)) as of this date. Any shareholder that wants to consult and examine the documents at the headquarters of Ultrapar, RPI, DPPI or CBPI shall schedule a visit date and time with the respective Investor Relations department of Ultrapar (telephone (55 11 3177 7014), RPI (telephone 55 53 3233 8061), DPPI (telephone 55 51 3216 4391) or CBPI (telephone 55 21 2574 5308).

MINUTES OF A MEETING OF THE BOARD OF DIRECTORS (12/2007)

Held on November 12, 2007

1. **DATE, TIME AND LOCATION.** Held on November 12, 2007 at 9 a.m. at the company headquarters, of Ultrapar Participações S.A. ( *ULTRAPAR* ), located at Avenida Brigadeiro Luiz Antonio, 1343, 9º andar, in the City of São Paulo, in the State of São Paulo.
2. **CONVENING AND PRESENCE.** Duly convened and assembled with the presence of (including participants by telephone) Mrs. Paulo Guilherme Aguiar Cunha, Lucio de Castro Andrade Filho, Ana Maria Levy Villela Igel, Renato Ochman, Nildemar Secches, Paulo Vieira Belotti and Olavo Egydio Monteiro de Carvalho, members of the Board of Directors of ULTRAPAR, in accordance with Articles 9 and 10 of ULTRAPAR S bylaws. Present also, under the terms of Article 163, §3º of Law N° 6.404/76, were members of the Fiscal Council of ULTRAPAR, Mrs. Flavio César Maia Luz, Mario Probst, Raul Murgel Braga, Wolfgang Eberhard Rohrbach and John Michael Streithorst and executive officers of ULTRAPAR, Srs. Pedro Wongtschowski and André Covre.
3. **PRESIDING AT THE BOARD.** Paulo Guilherme Aguiar Cunha Chairman and Lucio de Castro Andrade Filho Secretary.
4. **DELIBERATED MATTERS.** The Presiding Chairman announced that the object of the meeting was to deliberate on the exchange of shares issued by Refinaria de Petróleo Ipiranga S.A. ( *RPI* ), by Distribuidora de Produtos de Petróleo Ipiranga S.A. ( *DPPI* ) and by Companhia Brasileira de Petróleo Ipiranga ( *CBPI* ) by ULTRAPAR ( *Share Exchange* ). The members of the Board of Directors recognized that the Share Exchange is of the interest of ULTRAPAR and its shareholders, in order to simplify the corporate structure of the Ipiranga Group, concentrating all the shareholders into one publicly-traded company, allowing an alignment of all the shareholders interests, increasing the market capitalization and share liquidity of ULTRAPAR and the participation of the shareholders of RPI, DPPI and CBPI in a company that is recognized for its high standards of corporate governance. After the presentation of the necessary clarifications by the Executive Officers, and receiving a favourable opinion from the Fiscal Council for the Share Exchange, the members of the Board of Directors examined and discussed the documents presented by the directors including the Protocol and Justification for the Exchange of Share issued by Refinaria de Petróleo Ipiranga S.A. by Ultrapar Participações S.A. , the Protocol and Justification for the Exchange of Shares issued by Distribuidora de Produtos de Petróleo Ipiranga S.A. by Ultrapar Participações S.A. , the Protocol and Justification for the Exchange of Shares issued by Companhia Brasileira de Petróleo Ipiranga by Ultrapar Participações S.A. and the documents referring to therein. In particular, considering the position of certain minority shareholders with regard to the intended Share Exchange, they carefully examined and discussed the reports prepared by Deutsche Bank and Credit Suisse according to which RPI, DPPI, CBPI and ULTRAPAR were evaluated in order to establish the exchange ratio between the shares of RPI, DPPI, CBPI and ULTRAPAR. Based on this examination and discussion, the board members concluded that, in their best judgement, such reports were prepared according to the concepts and assumptions which these banks used freely and independently in the exercising of their tasks. Thus, exercising their fiduciary duty in the fulfilment of their responsibilities, under the terms of articles 153, 154 and 155 of Law N° 6.404/76, and having verified that the documents referred to below and the Share Exchange conform to legal and statutory requirements, decided to submit the proposal for the Share Exchange to the shareholders of ULTRAPAR under the terms and conditions of the Protocol and Justification for the Exchange of Shares issued by Refinaria de Petróleo Ipiranga S.A. by Ultrapar Participações S.A. , and its annexes, signed by the executive boards of RPI and ULTRAPAR on November 9, 2007, of the Protocol and Justification for the Exchange of Shares issued by Distribuidora de Produtos de Petróleo Ipiranga S.A. by Ultrapar Participações S.A. , and its annexes, signed by the executive boards of DPPI and ULTRAPAR on November 9, 2007 and the Protocol and

**Table of Contents**

Justification for the Exchange of Shares issued by Companhia Brasileira de Petróleo Ipiranga by Ultrapar Participações S.A. , and its annexes, signed by the executive boards of CBPI and ULTRAPAR on November 9, 2007. The Board of Directors authorised the Executive Officers to provide the publication of the Convening Notice for the convening of an Extraordinary Shareholders Meeting to deliberate on the Share Exchange, as well as practice all the necessary acts to implement these operation.

5. QUORUM FOR DELIBERATIONS: All the deliberations above were voted on and approved in their entirety by all the members present, except for Renato Ochman, who abstained from voting.

6. CLOSING OF THE MEETING. The Presiding Chairman, having offered the opportunity for any party to pronounce, none having done, declared the meeting closed, the minutes of which being duly transcript, read and approved by all those present undersigned.

MINUTES OF A MEETING OF THE BOARD OF DIRECTORS

Held on November 12, 2007

1. DATE, TIME AND LOCATION. Held on November 12, 2007 at 5 p.m. at Rua Antonio Carlos, N° 434, in the City of São Paulo, in the State of São Paulo.

2. CONVENING AND PRESENCE. Duly convened and assembled, with the presence of (including participants by telephone) Mrs. João Adolfo Oderich, Flavio do Couto Bezerra Cavalcanti, Eduardo de Toledo, Francisco Pais, Carlos José Fadigas, Roberto Pontes Lopes Simões and José Afonso Alves Castanheira, Members of the Board of Directors of Refinaria de Petróleo Ipiranga S.A. ( *RPI* ), in accordance with Articles 9 and 10 of the company bylaws of RPI. Present also, under the terms of Article 163, §3° of Law N° 6.404/76, were members of the Fiscal Council of RPI, Mrs. Roberto Kutschat Neto, Sérgio Túlio da Rosa Tinoco and Ricardo Magalhães Gomes, the executive officers of RPI, Mr. Sergio Roberto Weyne Ferreira da Costa, and representatives of KPMG Independent Auditors ( *KPMG* ), Banco de Investimentos Credit Suisse (Brasil) S.A. ( *Credit Suisse* ) and Apsis Consultoria Empresarial S/C Ltda. ( *Apsis* ), Srs. Alexandre Heinerman, Marco Gonçalves and Luiz Paulo César Silveira, respectively.

3. PRESIDING AT THE BOARD. João Adolfo Oderich Chairman and Eduardo de Toledo Secretary.

4. DELIBERATED MATTERS. The Presiding Chairman announced that the object of the meeting was to deliberate on the exchange of the shares issued by RPI by Ultrapar Participações S.A. ( *ULTRAPAR* ) ( *Share Exchange* ). The members of the Board of Directors recognized that the Share Exchange is of the interest of RPI, which will be strengthened together with the other companies in the Ipiranga group, and their shareholders, in order to simplify the corporate structure of the Ipiranga Group, concentrating all the shareholders into one publicly-traded company, allowing an alignment of all the shareholders' interests, increasing market capitalization and share liquidity and participating in a company recognized for its high standards of corporate governance. After the presentation of all the necessary clarifications by the Executive Officers, members of the Board of Directors examined and discussed all documents sent by the officers, including the Protocol and Justification for the Exchange of Shares Issued by Refinaria de Petróleo Ipiranga S.A. by Ultrapar Participações S.A. and the documents referred to therein. In particular, considering the position of certain minority shareholders regarding the intended Share Exchange, they carefully examined and discussed the results of the valuation reports prepared by Deutsche Bank Securities Inc. ( *Deutsche Bank* ) and Credit Suisse according to which RPI and ULTRAPAR were evaluated in order to establish the exchange ratio between the shares of RPI and ULTRAPAR. Although the members of the Board had previously discussed with Credit Suisse, they requested additional clarifications to Credit Suisse representatives related to the final version of the document. Subsequently, the members of the Board inquired the representatives of Credit Suisse, Apsis and KPMG if they, as specialists on this subject, considered all the pertinent legal requirements on the elaboration of their respective valuation reports, in particular Brazilian Corporate Law, regulations of the CVM (Brazilian Securities and Exchange Commission) and generally accepted accounting practices, to which the representatives of the three companies each individually confirmed the complete conformity of their respective valuation reports to the legal precepts applicable, with the representatives of Credit Suisse in addition confirming, based on the valuation reports that they prepared, that the exchange ratio offered for the Share Exchange is adequate. Based on this examination and discussion and considering the discussion at the meeting of the Board of Directors on November 6, 2007, during which the representatives of Credit Suisse answered to queries and clarified questions of the members present, in accordance with the minutes of such meeting, the members concluded, in their best judgement, that these valuation reports were prepared according to the concepts and assumptions which these banks used freely and independently in the exercising of their tasks. Thus, exercising their fiduciary duty in the fulfilment of their

**Table of Contents**

responsibilities, under the terms of articles 153, 154 and 155 of Law N° 6.404/76, and having verified that the documents referred to below and the Share Exchange conform to legal and statutory requirements, decided to submit the proposal for the Share Exchange to the approval of the Shareholders of RPI, under the terms and conditions of the Protocol and Justification for the Exchange of Shares issued by Refinaria de Petróleo Ipiranga S.A. by Ultrapar Participações S.A. , and its annexes, signed by the executive officers of RPI and ULTRAPAR on November 9, 2007. The Board of Directors authorised the Executive Officers to provide the publication of the Convening Notice for the convening of an Extraordinary Shareholders Meeting to deliberate on the Share Exchange, as well as practice all the necessary acts to implement these operation. The Board of Officers deliberated, in reason of the previous deliberations, to convene the Special Shareholders Meeting to deliberate and approve the intended Share Exchange, for December 18, 2007.

5. QUORUM FOR DELIBERATIONS: All the deliberations above were voted on and approved unanimously.

6. CLOSING OF THE MEETING. The presiding chairman, having offered the opportunity for any party to pronounce, none having done, declared the meeting closed, the minutes of which being duly transcript, read and approved by all those present undersigned.

MINUTES OF A MEETING OF THE BOARD OF DIRECTORS

Held on November 12, 2007

1. DATE, TIME AND LOCATION. Held on November 12, 2007 at 3 p.m. at Rua Antonio Carlos, N° 434, in the City of São Paulo, in the State of São Paulo.

2. CONVENING AND PRESENCE. Duly convened and assembled, with the presence of (including participants by telephone) Mrs. Pedro Wongtschowski, André Covre, Eduardo de Toledo, José Roberto Opice, Roberto Kutschat Neto and José Afonso Alves Castanheira, members of the Board of Directors of Distribuidora de Produtos de Petróleo Ipiranga ( *DPPI* ) in accordance with Articles 9 and 10 of the DPPI's bylaws. Present also, under the terms of Article 163, §3° of Law N° 6.404/76, were members of the Fiscal Council of DPPI, Mrs. Ubaldo Evangelista Neto, Carlos Mello and Eliana Chimenti, the executive officers of DPPI, Srs. Leocadio de Almeida Antunes Filho and Sergio Roberto Weyne Ferreira da Costa, and representatives of KPMG Independent Auditors ( *KPMG* ), Banco de Investimentos Credit Suisse (Brasil) S.A. ( *Credit Suisse* ) Apsis Consultoria Empresarial S/C Ltda. ( *Apsis* ), Mrs. Alexandre Heinerman, Marco Gonçalves and Luiz Paulo César Silveira, respectively.

3. PRESIDING AT THE BOARD. Pedro Wongtschowski Chairman and André Covre Secretary.

4. DELIBERATED MATTERS. The Presiding Chairman announced that the object of the meeting was to deliberate on the exchange of shares issued by DPPI by Ultrapar Participações S.A. ( *ULTRAPAR* ) ( *Share Exchange* ). The members of the Board of Directors recognized that the *Share Exchange* is of the interest of DPPI, which will be strengthened together with the other companies of the Ipiranga Group, and their shareholders, in order to simplify the corporate structure of the Ipiranga Group, concentrating all the shareholders into one publicly-traded company, aligning the interests of all the shareholders, increasing market capitalization and share liquidity, and participating in a company recognized for its high corporate governance standards. After the presentation of the necessary clarifications by the Executive Officers, the members of the Board of Directors examined and discussed the documents sent by the Executive Officers, including the Protocol and Justification for the Exchange of Shares issued by Distribuidora de Produtos de Petróleo Ipiranga S.A. by Ultrapar Participações S.A. and the documents referred to therein. In particular, considering the position of certain minority shareholders in relation to the intended Share Exchange, they carefully examined and discussed the results of the valuation reports prepared by Deutsche Bank Securities Inc. ( *Deutsche Bank* ) and Credit Suisse according to which DPPI and ULTRAPAR were evaluated in order to establish the exchange ratio between the shares of DPPI and ULTRAPAR. Although the members of the Board had previously discussed with Credit Suisse, they requested additional clarification to Credit Suisse representatives related to the final version of the document. Subsequently, the members of the Board inquired the representatives of Credit Suisse, Apsis and KPMG if they, as specialists on this subject, considered all the pertinent legal requirements on the elaboration of their respective valuation reports, in particular Brazilian Corporate Law, regulations of the CVM (Brazilian Securities and Exchange Commission) and generally accepted accounting practices, to which the representatives of the three companies each individually confirmed the complete conformity of their respective valuation reports to the legal precepts applicable, with the representatives of Credit Suisse in addition confirming, based on the valuation report that they prepared, that the exchange ratio offered for the Share Exchange, is adequate. Based on this examination and discussion and also considering the discussion at the meeting of the Board of Directors on November 6, 2007, during which the representatives of Credit Suisse answered to queries and clarified questions of the members present, in accordance with the minutes of such meeting, the members concluded, in their best judgement, that these valuation reports were prepared according to the concepts and assumptions which these banks used freely and independently in the exercising of their tasks. Thus, exercising their fiduciary duty in the fulfilment of their responsibilities, under the terms of articles 153, 154 and 155 of Law N° 6.404/76, and having

MINUTES OF A MEETING OF THE BOARD OF DIRECTORS

Held on November 12, 2007

1. DATE, TIME AND LOCATION. Held on November 12, 2007 at 4 p.m. at Rua Antonio Carlos, N° 434, in the City of São Paulo, in the State of São Paulo.

2. CONVENING AND PRESENCE. Duly convened and assembled, with the presence of (including participants by telephone) Ms. Maria das Graças Foster and Mrs. Pedro Wongtschowski, Eduardo de Toledo, José Roberto Opice, André Covre, Daniel Lima de Oliveira and Luiz Carlos Teixeira, members of the Board of Directors of CBPI, in accordance with Articles 9 and 10 of CBPI's bylaws. Present, also, under the terms of Article 163, §3° of Law N° 6.404/76, were members of the Fiscal Council of CBPI, Mrs. Carlos Mello, Tomaz Andres Barbosa and Edson Pena Júnior, the executive officers of CBPI, Mrs. Leocadio de Almeida Antunes Filho, Sergio Roberto Weyne Ferreira da Costa and José Manuel Alves Borges, and representatives of KPMG Independent Auditors ( *KPMG* ), Banco de Investimentos Credit Suisse (Brasil) S.A. ( *Credit Suisse* ) and Apsis Consultoria Empresarial S/C Ltda. ( *Apsis* ), Srs. Alexandre Heinerman, Marco Gonçalves and Luiz Paulo César Silveira, respectively.

3. PRESIDING AT THE BOARD. Pedro Wongtschowski Chairman; and Eduardo de Toledo Secretary.

4. DELIBERATED MATTERS. The Presiding Chairman announced that the object of the meeting was to deliberate on the Exchange of the Shares issued by CBPI by Ultrapar Participações S.A. ( *ULTRAPAR* ) ( Share Exchange ). The members of the Board of Directors recognize the Share Exchange is of the interest of CBPI, which will be strengthened together with the other companies of the Ipiranga Group, and their shareholders, in order to simplify the corporate structure of the Ipiranga Group, concentrating all the shares into one publicly-traded company, permitting an alignment of all its shareholders' interests, increasing market capitalization and share liquidity and participating in a company recognized for its high standards of corporate governance. After the presentation of the necessary clarifications by the Executive Officers, the members of the Board of Directors examined and discussed the documents sent by the executive officers, including the Protocol and Justification for the Exchange of the Shares Issued by Companhia Brasileira de Petróleo Ipiranga by Ultrapar Participações S.A. and the documents referred to therein. In particular, considering the position of some minority shareholders considering the intended Share Exchange, they carefully examined and discussed the results of the valuation reports prepared by Deutsche Bank Securities Inc. ( *Deutsche Bank* ) and Credit Suisse according to which CBPI and ULTRAPAR were valued in order to establish the exchange ratio between the shares of CBPI and ULTRAPAR. Although the members of the Board had previously discussed with Credit Suisse, they requested additional clarifications to Credit Suisse representatives related to the final version of the document. Subsequently, the members of the Board inquired of the representatives of Credit Suisse, Apsis and KPMG if they, as specialists on this subject, considered all the pertinent legal requirements on the elaboration of their respective valuation reports, in particular Brazilian Corporate Law, regulations of the CVM (Brazilian Securities and Exchange Commission) and generally accepted accounting practices, to which the representatives of the three companies each individually confirmed the complete conformity of their respective valuation reports to the legal precepts applicable, with the representatives of Credit Suisse in addition confirming, based on the valuation that they had prepared, that the exchange ratio offered for the Share Exchange is appropriate. Based on this examination and discussion and also considering the discussion at the meeting of the Board of Directors on November 6, 2007, during which the representatives of Credit Suisse answered to queries and clarified questions of the members present, in accordance with the minutes of such meeting, the members concluded, in their best judgement, that these valuation reports were prepared according to the concepts and assumptions which these banks used freely and independently in the exercising of their tasks. Thus, exercising their fiduciary duty in the fulfilment of their responsibilities, under the terms of articles 153, 154 and 155 of Law N° 6.404/76, and having

**Table of Contents**

verified that the documents referred to below and the Share Exchange conform to legal and statutory requirements, decided to submit the proposal for the Share Exchange to the approval of the shareholders of CBPI, under the terms and conditions of the Protocol and Justification for the Share Exchange issued by Companhia Brasileira de Petróleo Ipiranga by Ultrapar Participações S.A. , and its annexes, signed by the executive officers of CBPI and ULTRAPAR on November 9, 2007. The Board of Directors authorised the Executive Officers to provide the publication of the Convening Notice for the convening of an Special Shareholders Meeting to deliberate the Share Exchange, as well as to practice all the necessary acts to implement these operations. The Board of Officers deliberated, in reason of the previous deliberations, to convene the Special Shareholders Meeting to deliberate and approve the intended Share Exchange, for December 18, 2007.

5. QUORUM FOR DELIBERATIONS: All the deliberations above were voted on and approved unanimously.

6. CLOSING OF THE MEETING. The presiding chairman, having offered the opportunity for any party to pronounce, none having done, declared the meeting closed, the minutes of which being duly transcript, read and approved by all those present undersigned.

**Undertakings.**

(a) The undersigned registrant hereby undertakes:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

(i) To include any prospectus required by Section 10(a)(3) of the Securities Act of 1933;

(ii) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information in the registration statement. To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20 percent change in the maximum aggregate offering price set forth in the Calculation of Registration Fee table in the effective registration statement; and

(iii) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement.

(2) That, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

(4) That, for the purpose of determining liability under the Securities Act of 1933 to any purchaser, each prospectus filed pursuant to Rule 424(b) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A (§ 230.430A of this chapter), shall be deemed to be part of and included in the registration statement as of the date

**Table of Contents**

it is first used after effectiveness. Provided, however, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.

(5) to file a post-effective amendment to the registration statement to include any financial statements required by 17 CFR 210.3-19 at the start of any delayed offering or throughout a continuous offering. Financial statements and information otherwise required by Section 10(a)(3) of the Securities Act of 1933 need not be furnished, provided that the registrant includes in the prospectus, by means of a post-effective amendment, financial statements required pursuant to this paragraph and other information necessary to ensure that all other information in the prospectus is at least as current as the date of those financial statements. Notwithstanding the foregoing, with respect to registration statements on Form F-3 (§ 239.33 of this chapter), a post-effective amendment need not be filed to include financial statements and information required by Section 10(a)(3) of the Securities Act of 1933 or 17 CFR 210.3-19 if such financial statements and information are contained in periodic reports filed with or furnished to the Commission by the registrant pursuant to section 13 or section 15(d) of the Securities Exchange Act of 1934 that are incorporated by reference in the Form F-3.

(6) That prior to any public reoffering of the securities registered hereunder through use of a prospectus which is a part of this registration statement, by any person or party who is deemed to be an underwriter within the meaning of Rule 145(c), such reoffering prospectus will contain the information called for by the applicable registration form with respect to reofferings by persons who may be deemed underwriters, in addition to the information called for by the other items of the applicable form.

(7) That every prospectus (i) that is filed pursuant to paragraph (4) immediately preceding, or (ii) that purports to meet the requirements of Section 10(a)(3) of the Securities Act of 1933 and is used in connection with an offering of securities subject to Rule 415, will be filed as a part of an amendment to the registration statement and will not be used until such amendment is effective, and that, for purposes of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(8) To respond to requests for information that is incorporated by reference into the joint information statement/prospectus pursuant to Item 4, 10(b), 11 or 13 of this form, within one business day of receipt of such request, and to send the incorporated documents by first class mail or other equally prompt means and to arrange or provide for a facility in the United States for the purpose of responding to such requests. This includes information contained in documents filed subsequent to the effective date of the registration statement through the date of responding to the request.

(9) To supply by means of a post-effective amendment all information concerning a transaction, and the Company being acquired involved therein, that was not the subject of and included in the registration statement when it became effective.
