2. Accounting policies specifically applied for quarterly consolidated financial statements

(a) Income taxes

Honda computes interim income tax expense (benefit) by multiplying reasonably estimated annual effective tax rate, which includes the effects of deferred taxes, by year-to-date income before income taxes and equity in income of affiliates for the fiscal first half ended September 30, 2009. If a reliable estimate cannot be made, Honda utilizes the actual year-to-date effective tax rate.

3. Changes in accounting procedures for consolidated quarterly financial results

(a) Noncontrolling Interests in Consolidated Financial Statements

Honda adopted the FASB Accounting Standards Codification (ASC) 810 Consolidation, which is a replacement of Statement of Financial Accounting Standards No. 160, Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB No. 51, effective April 1, 2009. This statement requires that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements, and requires that changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary shall be accounted for as equity transactions. Upon the adoption of ASC 810, noncontrolling interests, which were previously referred to as minority interests and classified between total liabilities and stockholders' equity on the consolidated balance sheets, are now included as a separate component of total equity. In addition, the presentation of consolidated statements of income and cash flows has been changed. As the presentation and disclosure requirements of ASC 810 have been applied retrospectively, Honda has made reclassifications to the prior consolidated financial statements to conform to the presentation used for the three months and six months periods ended September 2009. The adoption of ASC 810 did not have a material impact on the Company's consolidated financial position or results of operations.

(b) Adjustment resulting from change in fiscal year-end of a subsidiary

During the fiscal year ended March 31, 2009, a subsidiary of the Company changed its fiscal year-end from December 31 to March 31. As a result, the Company eliminated the previously existed 3-month difference between the reporting periods of the Company and the subsidiary in the consolidated financial statements. The elimination of the lag period which was adjusted in the three months ended March 31, 2009 represented a change in accounting principles and was reported by retrospective application. The impact on the retained earnings balance as of April 1, 2008 was ¥6,214 million. Honda adjusted its consolidated financial statements for the six months ended September 30, 2008 to conform to the presentation used for the fiscal year ended March 31, 2009.
