PROTOCOL AND JUSTIFICATION OF THE SHARE EXCHANGE BETWEEN

BRASIL TELECOM S.A.

AND

COARI PARTICIPAÇÕES S.A.

BRASIL TELECOM S.A., a publicly-held company with head offices in the City of Brasília, Federal District, at SIA SUL ASP Lot D Block B, registered with the Treasury Ministry on the National Corporate Taxpayers Register under CNPJ/MF No. 76.535.764/0001-43, represented herein as set forth in its Corporate By-laws (BrT);

COARI PARTICIPAÇÕES S.A., a publicly-held company with head offices in the City of Rio de Janeiro, State of Rio de Janeiro, at Rua Humberto de Campos, No. 425, 8th floor (part), registered with the Treasury Ministry on the National Corporate Taxpayers Register under No. 04.030.087/0001-09, represented herein as set forth in its Corporate By-laws (Coari);

BrT and Coari are referred to herein, jointly, simply as the Parties or the Companies;

WHEREAS:

- (i) BrT is a publicly-held company that is a direct subsidiary of Coari, whose purpose is to render telecommunications services and conduct the activities required or useful for the performance of these services, in compliance with the concessions, authorizations and permits granted to it. In order to achieve its purpose, BrT may include among its assets third-party assets and rights, as well as: (i) hold stakes in the capital of other companies, provided that it maintains compliance with Brazil's National Telecommunications Policy; (ii) establish wholly-owned subsidiaries in order to perform the activities encompassed by its corporate purpose and that should preferably be decentralized; (iii) undertake imports of goods and services required to perform the activities encompassed by its corporate purpose; (iv) provide post-sale and technical assistance services to telecommunications enterprises, performing activities of common interest; (v) engage in study and research activities designed to foster the development of the telecommunications sector; (vi) execute contracts and agreements with other companies engaged in rendering telecommunications services or with any persons or entities, in order to ensure the operation services, without adversely affecting its duties and responsibilities, and (vii) participate in other activities that are similar to or correlated with its corporate purpose;
- (ii) Coari is a publicly-held company that is a direct subsidiary of Telemar Norte Leste S.A. (Telemar), whose purpose is (i) to exercise control over public fixed-line telephone companies; (ii) to promote through controlled or affiliated companies the expansion and establishment of fixed-line telephone services in their respective concession areas; (iii) to promote, carry out or direct funding from domestic and foreign sources to be invested by Coari or by its controlled companies; (iv) to promote and encourage the study and research of activities aimed at the development of the fixed-line telephone sector; (v) to provide through controlled or affiliated companies skilled technical services in the fixed-line telephone sector; (vi) to promote, encourage and coordinate either directly or through controlled or affiliated companies the education and training of personnel necessary to the fixed-line telephone sector; (vii) to carry out or promote the import of goods and services to or through controlled and/or affiliated companies; (viii) to engage in other activities that are similar to or related to its corporate purposes; and (ix) to participate in the capital of other companies.
- (iii) on January 8, 2009, Telemar (1) acquired, through its indirect subsidiary Copart 1 Participações S.A. (Copart 1), all the shares issued by Invitel S.A. (Invitel), the controlling shareholder of Solpart Participações S.A. (Solpart), which was the controlling shareholder of Brasil Telecom Participações S.A. (BrT Part), the controlling shareholder of BrT, and (2) as a result, held BrT Part common shares representing the share control of BrT Part and BrT;

- (iv) as disclosed in the Relevant Facts released on April 25, 2008 and August 12, 2009, the managements of Telemar, BrT Part and BrT commenced a corporate reorganization of the companies that are part of the controlling structure of BrT Part and BrT through a series of corporate transactions in order to simplify the shareholding structure of these companies, unifying the shareholders of BrT Part and BrT in Telemar and strengthening these companies (the Corporate Reorganization);
- (v) on July 31, 2009, as the first step of the Corporate Reorganization, the shareholders of Invitel, Solpart, Copart 1, Copart 2 Participações S.A. (Copart 2), BrT Part and BrT, gathered at the General Shareholders Meetings of the respective companies, approved the mergers of Invitel with and into Solpart, Solpart with and into Copart 1, and Copart 1 with and into BrT Part and Copart 2 with and into BrT;
- (vi) as a result of the mergers described above, BrT Part absorbed the assets and liabilities of Invitel, Solpart and Copart 1, which ceased to exist, and BrT absorbed the assets and liabilities of Copart 2, which ceased to exist, and Coari received common and preferred shares issued by BrT Part and BrT, as a result of which Coari directly controls BrT Part and indirectly controls BrT;
- (vii) on September 30, 2009, in the second step of the Corporate Reorganization, the shareholders of BrT Part and BrT, gathered at the General Shareholders Meetings of these companies, approved the merger of BrT Part with and into BrT;
- (viii) as a result of the merger of BrT Part with and into BrT, BrT absorbed all the assets and liabilities of BrT Part, which ceased to exist, and the shareholders of BrT Part received common and preferred shares of BrT, in accordance with the approved exchange ratio, and, as a consequence, Coari directly controls BrT;
- (ix) the management of BrT Part will not summon a General Shareholders Meeting of BrT Part to either ratify or unwind the merger of BrT Part with and into BrT;
- (x) on September 11, 2009, the shareholders of Coari approved modifications to the composition of the equity capital of Coari in order that the capital of Coari precisely reflects the number of shares of BrT that Coari will hold after the settlement of the merger of BrT Part into BrT; and
- (xi) the share exchange between BrT and Coari represents the third step in the implementation of the Corporate Reorganization. Being in full and fair agreement, the Parties execute this Protocol and Justification of Share Exchange, (the Protocol and Justification), in compliance with Articles 224, 225 and 252 of Law No. 6,404/76, as amended (the Brazilian Corporation Law), pursuant to the following terms and conditions.

CLAUSE ONE PROPOSED TRANSACTION AND JUSTIFICATION

1.1. Proposed Transaction. The transaction consists of a share exchange between BrT and Coari, through the transfer of all the shares of BrT (except those shares already held by Coari) to Coari, as a result of which BrT will become a wholly-owned subsidiary of Coari, pursuant to Article 252 of the Brazilian Corporation Law (the Share Exchange).

1.2. Justification of the Share Exchange. The Share Exchange is one of the steps in the Corporate Reorganization, the purpose of which is to simplify the shareholding structure of Telemar, BrT Part and BrT, unifying the shareholders of BrT Part and BrT in Telemar and strengthening these companies. In addition, the managements of BrT and Coari believe that the Share Exchange satisfies the interests of its shareholders, for the reasons described in Clause Seven of this Protocol and Justification.

CLAUSE TWO NUMBER, TYPE AND CLASS OF SHARES TO BE ATTRIBUTED TO BRT SHAREHOLDERS

- 2.1. Number, Type and Class of Shares to be Attributed. As a result of the Share Exchange, one common share of Coari will be attributed to the shareholders of BrT in substitution for each outstanding common share of BrT, and one preferred share of Coari will be attributed to the shareholders of BrT in substitution for each outstanding preferred share of BrT (the Exchange Ratios).
- 2.2. Criteria Used to Determine the Exchange Ratios. The Exchange Ratios were determined by the managements of BrT and Coari considering the following premises: (i) the shareholder s equity of Coari is composed substantially by BrT common and preferred shares, (ii) excluding Coari s interest in BrT, the shareholders equity balance of Coari is positive, and (iii) the composition of the equity capital of Coari after the Share Exchange, in accordance with the Exchange Ratio, will reflect the exact current composition of BrT s equity capital.
- 2.3. Share Fractions. The Exchange Ratio will not result in the issuance of fractional shares of Coari.

CLAUSE THREE NET WORTH APPRAISAL CRITERIA FOR BRT AND COARI

3.1. Net Worth Appraisal. The shares of BrT were appraised on the basis of its book value, as shown in the audited financial statements of BrT as of May 31, 2009 (the Base Date) and taking into account the following events which occurred after the Base Date: (i) the merger of Copart 2 with and into BrT, on July 31, 2009; (ii) the merger of BrT Part with and into BrT, on September 30, 2009; (iii) the registration of disbursement of goodwill amortization related to the months of August, September, October, November and December of 2009, in the amount of R\$186,666,757.92 (one hundred and eighty six million, six hundred and sixty six thousand, seven hundred and fifty seven *reais* and ninety two *centavos*); and (iv) the registration of the reversion of the goodwill provision established in the companies that were merged into BrT (Copart 2 and BrT Part), in the amount of R\$70,336,848.76 (seventy million, three hundred and thirty six thousand, eight hundred and forty eight *reais* and seventy six *centavos*). Pursuant to the provisions set forth in Articles 226 and 252 of the Brazilian Corporation Law, the specialized firm Apsis Consultoria Empresarial Ltda., with head offices at Rua São José 90, suite 1,082, in the City and State of Rio de Janeiro, registered with the Treasury Ministry on the National Corporate Taxpayers Register under CNPJ/MF No. 27.281.922/0001-70 (Apsis), was selected to conduct the appraisal of the shares of BrT that will be acquired by Coari. The selection and hiring of Apsis must be ratified and approved by the shareholders of BrT and Coari. As set forth in the Appraisal Report presented in Attachment I (the Appraisal Report), the book value of the net equity of BrT as of the Base Date, taking into account the adjustments described above, corresponds to R\$ 11,115,033,954.78 (eleven billion, one hundred and fifteen million, thirty three thousand, nine hundred and fifty four *reais* and seventy eight *centavos*) or R\$ 18.845781 (eighteen *reais* and eight hundred forty five thousand seven hundred eighty one millionths *centavos*) per share of BrT.

3.2. Appraisal of the Net Worth of BrT and Coari at Market Prices. In compliance with the provisions set forth in Article 264 of the Brazilian Corporation Law, Apsis was selected to prepare the Net Worth Appraisal Report of BrT and Coari at market prices. The appraisals of the net worth of BrT and Coari at market prices were prepared using the same criteria and as of the Base Date, taking into account the following events which occurred after the Base Date: (i) in the case of BrT, (a) the merger of Copart 2 with and into BrT, on July 31, 2009; (b) the registration of disbursement of goodwill amortization related to the months of August, September, October, November and December of 2009, in the amount of R\$186,666,757.92 (one hundred and eighty six million, six hundred and sixty six thousand, seven hundred and fifty seven *reais* and ninety two *centavos*); and (c) the registration of the reversion of the goodwill provision established in the companies that were merged into BrT (Copart 2 and BrT Part), in the amount of R\$70,336,848.76 (seventy million, three hundred and thirty six thousand, eight hundred and forty eight *reais* and seventy six *centavos*), on the valuation of the net equity of BrT; and (ii) in the case of Coari, (a) the capitalization of an advance for future capital increase in the amount of R\$ 3,683,934,973.95 (three billion, six hundred and eighty three million, nine hundred and thirty four thousand, nine hundred and seventy three *reais* and ninety five *centavos*), on June 30, 2009, and (b) the effects of the merger of BrT Part into BrT, on September 30, 2009, on the valuation of the net equity of Coari, in each case pursuant to the Appraisal Report presented in Attachment II (the Net Worth Appraisal Report at Market Prices), resulting in, solely for the purposes of Article 264 of the Brazilian Corporation Law, an exchange ratio of 0.999995 outstanding Coari shares for each outstanding share of BrT.

3.3. Treatment of Equity Variations. The equity variations that occur at BrT and Coari from May 31, 2009, the Base Date of the Share Exchange, until the date of the approval of the Share Exchange, will be absorbed directly by the respective companies.

CLAUSE FOUR SHARES OF ONE COMPANY HELD BY ANOTHER COMPANY AND SHARES HELD IN TREASURY

4.1. Treatment of Shares of One Company Held by Another Company. The shares issued by BrT that are held by Coari will continue to be held by Coari. There are no shares issued by Coari which are held by BrT.

4.2. Treatment of Shares Held in Treasury. BrT holds 13,231,556 of its preferred shares in Treasury, which will be cancelled. Coari does not hold any of its preferred shares in Treasury.

CLAUSE FIVE INCREASE IN THE EQUITY CAPITAL OF COARI

5.1. Increase in the Equity Capital of Coari. The Share Exchange will result in an increase in the equity capital of Coari in the amount of R\$5,637,224,265.10 (five billion, six hundred and thirty seven million, two hundred and twenty four thousand, two hundred and sixty five *reais* and ten *centavos*), through the transfer of the shares issued by BrT (except those already held by Coari) to Coari, in compliance with the Appraisal Report and as set forth in Article 252 of the Brazilian Corporation Law. Coari will issue 41,433,175 (forty one million, four hundred and thirty three thousand and one hundred and seventy five) registered common shares and 257,690,765 (two hundred fifty-seven million, six hundred ninety thousand, seventy hundred sixty-five) registered preferred shares, without par value (collectively, the Shares), to the current shareholders of BrT.

5.2. Composition of Equity Capital of Coari After the Share Exchange. Due to the above-mentioned capital increase, the equity capital of Coari will increase to R\$17,971,288,655.01 (seventeen billion, nine hundred and seventy one million, two hundred and eighty eight thousand, six hundred and fifty five *reais* and one *centavo*). The composition of Coari's equity capital after the Share Exchange will reflect the exact current composition of BrT's equity capital (considering the cancelation of the shares held in treasury), so as to be represented by 203,423,176 (two hundred and three million, four hundred twenty-three thousand, one hundred and seventy-six) registered common shares and 386,365,814 (three hundred and eighty six million, three hundred and sixty five thousand, eight hundred and fourteen) registered preferred shares, each without par value.

5.3. Wholly-Owned Subsidiary. As a result of the Share Exchange, BrT shall become a wholly-owned subsidiary of Coari.

CLAUSE SIX AMENDMENT OF THE CORPORATE BY-LAWS OF COARI

6.1. Amendment of Coari's Bylaws. Due to the Share Exchange, the corporate bylaws of Coari must be amended in order to reflect the change in the value and number of shares into which its share capital is divided. Thus, the following proposal of amendment to the main section of Article 5 of Coari's By-laws will be submitted to its shareholders:

Article 5 The Equity Capital is R\$17,971,288,655.01 (seventeen billion, nine hundred and seventy one million, two hundred and eighty eight thousand, six hundred and fifty five *reais* and one *centavo*), divided into 589,788,990 (five hundred and eighty nine million, seven hundred and eighty eight thousand, nine hundred and ninety) shares, consisting of 203,423,176 (two hundred and three million, four hundred twenty-three thousand, one hundred and seventy-six) common shares and 386,365,814 (three hundred and eighty six million, three hundred and sixty five thousand, eight hundred and fourteen) preferred shares, all registered and without par value.

CLAUSE SEVEN REASONS FOR THE SHARE EXCHANGE

7.1. Reasons for the Share Exchange. The managements of BrT, Coari and Telemar decided to conduct the Share Exchange as they believe that it is a necessary step in the Corporate Reorganization,

and that the Share Exchange will further the best interests of BrT, Coari, Telemar and their shareholders, in particular through:

- (i) simplifying the capital and corporate structures of BrT and Coari, reducing administrative costs;
- (ii) aligning the interests of the shareholders of BrT, Coari and Telemar;
- (iii) avoiding a circular shareholding between Coari and Telemar, which is prohibited by law and which would occur if the shares of BrT were exchanged directly for shares of Telemar resulting in the shares of BrT held by Coari being converted into shares of Telemar; and
- (iv) eliminating the costs of separate listings of the shares of BrT and Coari as well as costs arising from the public disclosure obligations for information released separately by BrT and Coari.

CLAUSE EIGHT ALLOCATION OF THE VALUE OF BRT SHARES

8.1. Value of BrT Shares. The book value of the shares of BrT is R\$18,845,781 (eighteen *reais* and eight hundred forty five thousand seven hundred eighty one millionths *centavos*) per share, in accordance with the Appraisal Report, and the transfer to Coari of 299,123,940 (two hundred and ninety nine million, one hundred and twenty three thousand and nine hundred and forty) shares of BrT will result in an increase in the capital of Coari in the amount of R\$5,637,224,265.10 (five billion, six hundred and thirty seven million, two hundred and twenty four thousand, two hundred and sixty five *reais* and ten *centavos*), which will be entirely allocated to an increase in the equity capital of Coari.

CLAUSE NINE CLASSES OF SHARES TO BE ISSUED TO THE BRT SHAREHOLDERS

9.1. Shares to be Issued to BrT Shareholders. The holders of common shares of BrT will receive common shares issued by Coari and the holders of preferred shares of BrT will receive preferred shares issued by Coari. The common and preferred shares issued by Coari to BrT shareholders will entitle them to the same rights as those conferred by the other common and preferred shares issued by Coari, respectively, including full receipt of dividends and/or interest on shareholders' equity that may be declared by Coari after the date on which the Share Exchange is approved.

CLAUSE TEN WITHDRAWAL RIGHTS

10.1. Withdrawal Rights of BrT and Coari Shareholders. Pursuant to the provisions set forth in Article 137 of the Brazilian Corporation Law, shareholders of BrT and Coari that do not approve the Share Exchange, either through dissent, abstention or not attending the extraordinary general shareholders' meetings of BrT and Coari called to consider the Share Exchange, are entitled to withdrawal rights, unless the shares owned by such shareholders possess liquidity and dispersion in the market under the terms of Article 137, II of the Brazilian Corporation Law.

10.1.1. Shareholders owning common shares of BrT will have withdrawal rights. Shareholders owning preferred shares of BrT will not have withdrawal rights because the preferred shares possess liquidity and dispersion in the market.

10.1.2. Shareholders owning common and preferred shares of Coari will have withdrawal rights. Nevertheless, given that at the moment of the resolution about the Share Exchange, Telemar and the directors of Coari will be the only shareholders of Coari, there is not an expectation that any shareholder of Coari will exercise its withdrawal rights.

10.1.3. A shareholder must specifically express its intention to exercise its withdrawal right within thirty (30) days as from the date of publication of the minutes of the General Shareholders' Meeting of BrT at which the Share Exchange is approved.

10.2. Payment of Reimbursement. The payment of the reimbursement value for the withdrawn shares will depend on the effective completion of the Share Exchange, as set forth in Article 230 of the Brazilian Corporation Law. In accordance with Article 137 of the Brazilian Corporation Law, the reimbursement

of the values of the withdrawn shares will only be assured only in respect of shares proven to be owned by the shareholder at the close of trading on April 25, 2008, the date of publication of the Relevant Fact announcing the Corporate Reorganization.

10.3. Rescission of the Share Exchange. Pursuant to Article 137, §3 of the Brazilian Corporation Law, in the event that the amount to be paid to shareholders of BrT or Coari in connection with the exercise of withdrawal rights would, in the opinion of the management of BrT or Coari, jeopardize the financial stability of the respective companies, the Share Exchange may be rescinded through a proposal presented by the management of BrT or Coari.

10.4. Value of Reimbursement of BrT Shareholders. Shareholders of BrT that do not approve the Share Exchange at the extraordinary general shareholders meeting of BrT that approves the Share Exchange will have the right to reimbursement for their shares in the amount of R\$11.40 (eleven *reais* and forty *centavos*) per share, in compliance with the most recently approved balance sheet of BrT, which was dated December 31, 2008.

10.4.1. Given that the Exchange Ratios proposed to the non-controlling shareholders of BrT, pursuant to Clause 2.1, is more favorable than the one resulting from the comparison of the net worth of BrT and Coari at market prices, as set forth on the Net Worth Appraisal Report at Market Prices, as set forth in §3 of Article 264 of the Brazilian Corporation Law, the shareholders of BrT that do not approve the Share Exchange at the extraordinary general shareholders meeting of BrT that approves the Share Exchange proposal won't be able to choose to exercise their withdrawal rights based on the net worth at market prices value, but only based on the book value of BrT net worth, as disclosed above.

10.4.2. The shareholders that do not approve the Share Exchange may, upon withdrawal, request the preparation of a special balance sheet for BrT, as set forth in §2 of Article 45 of the Brazilian Corporation Law. In this event, following the expiration of the deadline set for the reconsideration of the Share Exchange, pursuant to §3 of Article 137 of the Brazilian Corporation Law, the shareholder will receive 80% of the reimbursement value, and the balance, if any, to be paid within one hundred and twenty (120) days from the date of the General Shareholders Meeting of BrT that approves the Share Exchange.

10.5. Value of Reimbursement of Coari Shares. Shareholders of Coari that do not approve the Share Exchange at the extraordinary general shareholders meeting of Coari that approves the Share Exchange will have the right to reimbursement for their shares in the amount of R\$1.00 (one *real*) per share, in compliance with the most recently approved balance sheet of Coari, which was dated December 31, 2008.

CLAUSE ELEVEN APPROVAL BY THE GENERAL SHAREHOLDERS MEETINGS OF BRT AND COARI

11.1. General Shareholders Meetings. In order to approve the Share Exchange, General Shareholders Meetings of BrT and Coari will be held to consider the Share Exchange.

CLAUSE TWELVE GENERAL PROVISIONS

12.1. Absence of Succession. With the effective completion of the Share Exchange, Coari will not absorb the assets, rights, obligations and liabilities of BrT, and BrT will maintain its legal personality, becoming a wholly-owned subsidiary of Coari, without succession.

12.2. Auditing the Financial Statements of BrT. In compliance with Article 12 of CVM Instruction No. 319/99, the financial statements of BrT that served as the basis for the Share Exchange were audited by Deloitte Touche Tohmatsu.

12.3. Documents Available to the Shareholders. In compliance with the provisions set forth in Article 3 of CVM Instruction No. 319/99 all documents mentioned in this Protocol and Justification will be made available to the respective shareholders of BrT and Coari as from the date hereof, and may be consulted by their shareholders at the following addresses: (i) SIA SUL ASP, Lot D, Block B, City of Brasília, Federal District, Brazil; and (ii) Rua Humberto de Campos 425, 5th floor (part), Leblon, City of Rio de Janeiro, State of Rio de Janeiro, Brazil.

12.4. Notification of the Share Exchange to Authorities. The Share Exchange was analyzed by the National Telecommunications Agency (*Agência Nacional de Telecomunicações*), or ANATEL, the Brazilian federal telecommunications regulator, as of the time of the acquisition of the indirect control of BrT by Telemar. Any other notifications required in connection with the Share Exchange will be submitted to the competent government authorities pursuant to governing law.

12.5. Registration with the U.S. Securities and Exchange Commission. The issuance of new shares by Coari, as a result of the Share Exchange, is conditioned on the effectiveness of the applicable registration with SEC.

12.6. Survival of Valid Clauses. Should any clause, provision, term or condition in this Protocol and Justification be deemed invalid, the other clauses, provisions, terms and conditions hereof not affected by such invalidity will continue to remain in effect.

12.7. Election of Courts of Law. The Central Law Courts of the Rio de Janeiro State Capital Assizes are hereby elected to settle all matters arising from this Protocol and Justification, to the exclusion of any other regardless of how much more privileged it is or may be.

REPORT RJ-0325/09-01

2. PRINCIPLES AND QUALIFICATIONS

This report strictly complies with the fundamental principles described below.

The consultants do not have any direct or indirect interest in the companies involved or in the operation, nor are there any other relevant circumstances which may characterize a conflict of interest.

To the best of the consultants' knowledge and belief, the analyses, opinions and conclusions expressed in this Report are based on data, diligence, research and surveys that are true and correct.

The report presents all the limiting conditions imposed by the adopted methodologies, which affect the analyses, opinions and conclusions contained therein.

APSiS professional fees are not in any way whatsoever subject to the conclusions of this report.

APSiS assumes full responsibility for the matter of Appraisal Engineering, including implicit appraisals, and for the exercise of its honorable duties, primarily established in the appropriate laws, codes or regulations.

In this report, it is assumed that the information received from third parties is correct, and the sources thereof are contained in said report.

The report was prepared by APSiS and no one other than the consultants themselves prepared the analyses and respective conclusions.

For projection purposes, we start with the premise of the inexistence of liens or encumbrances of any nature, whether judicial or extrajudicial, affecting the companies in question, other than those listed in this report.

This Report complies with the specifications and criteria prescribed by USPAP (Uniform Standards of Professional Appraisal Practice), in addition to the requirements imposed by different bodies and regulations, where applicable, such as: the Ministry of Treasury, the Central Bank of Brazil, Bank of Brazil, CVM (Brazilian Securities and Exchange Commission), SUSEP (Superintendence of Private Insurance), Income Tax Regulations (RIR), etc.

The managers of the companies involved did not direct, restrict, hinder or do any acts which have or may have compromised access to, use or knowledge of information, assets, documents, or work methods applicable to the quality of the respective conclusions contained herein.

REPORT RJ-0325/09-01

3. RESPONSIBILITY LIMITS

To prepare this report, APSIS used historic data and information, audited by third parties or unaudited, and unaudited projected data provided in writing or verbally by the company's management or obtained from the sources mentioned. Therefore, APSIS has assumed as true the data and information obtained for this report and does not have any responsibility in connection with its truthfulness.

The scope of this work did not include an audit of the financial statements or a revision of the work performed by the company's auditors.

Our work was developed for use by the applicant in connection with the previously described objectives. Therefore, it may be disclosed as part of the documents related to the acquisition of control of the BRASIL TELECOM Group, and the mention of this work in related publications is authorized. It may also be filed with the Brazilian Securities and Exchange Commission - CVM and with the U.S. Securities and Exchange Commission - SEC, as well as made available to shareholders and third parties, including through the websites of the involved companies.

We emphasize that understanding of the conclusion of this report will take place by reading it and its attachments in full. Therefore, conclusions from partial reading should not be drawn.

Our work was developed to be used by COARI and the other companies involved in the project, aiming at the previously described objective.

We do not take responsibility for occasional losses to COARI or to other parties as a result of the use of data and information provided by the company and contained herein.

4. APPRAISAL METHODOLOGY

Analysis of the previously mentioned supporting documents designed to ascertain whether bookkeeping was accurately conducted and was in compliance with the legal, regulatory, normative, statutory and contractual provisions which govern the matter, within the scope of Generally Accepted Accounting Principles and Conventions .

We examined the balance sheet of BRTO, as well as all other documents required for the preparation of this report, which was prepared on the basis of BRTO s balance sheet for the period ended May 31, 2009.

It was ascertained that the assets and liabilities of BRTO have been duly accounted for.

REPORT RJ-0325/09-01

5. NET EQUITY APPRAISAL

We examined the account books of BRTO, as well as all other documents required for the preparation of this report.

We contemplated the following subsequent events to occur after the base date of this report:

Merger of COPART 2 PARTICIPAÇÕES S.A. (COPART 2) on July, 31, 2009, as per appraisal report prepared by APSIS (RJ-0190/09-04);

Merger of BRASIL TELECOM PARTICIPAÇÕES S.A. (BRTP) on September, 30, 2009, as per appraisal report prepared by APSIS (RJ-0278/09-01);

Goodwill amortization expenses to be recorded for the months of August, September and October 2009, in the amount of R\$ 186,666,757.92 (one hundred eighty six million, six hundred and sixty six thousand, seven-hundred and fifty seven reais and ninety two centavos);

Reversion of goodwill provisions made in the merged company (COPART 2 and BRTP), in the amount of R\$ 70,336,848.76 (seventy million, three hundred and thirty six thousand, eight hundred and forty eight reais and seventy six centavos), according to CVM Instruction No. 319/099, article 6, paragraph 1, and alterations made by CVM Instruction 349/01.

The experts have ascertained that the book net equity value of BRTO, after giving effect to the occurrence of the above-described events stated on the pro forma balance sheet presented on the following page is R\$ 11,115,033,954.78 (eleven billion, one hundred and fifteen million, thirty three thousand, nine hundred and fifty four reais and seventy eight centavos), as of May 31, 2009.

GLOSSARY

GLOSSARY

ASSETS APPROACH - valuation methodology in which all assets and liabilities (including unregistered ones) have their value adjusted according to their market values.

BETA - measurement of a stock systematic risk, price trend of a certain stock to be related to changes in a certain index.

BUSINESS RISK - uncertainty level for realizing future returns expected for the business, which do not result from financial leverage.

CAPITAL STRUCTURE - breakdown of the capital invested in a company, including own capital (equity) and third-party capital (indebtedness).

CAPITALIZATION - conversion of a simple period of economic benefits into value.

CAPITALIZATION RATE - any divisor used for converting economic benefits into value in a simple period.

CAPM - Capital Asset Pricing Model - model in which the cost of capital for any stock or group of stocks is equivalent to the risk-free rate added to a risk premium, provided by the systematic risk of the stock or group of stocks under analysis.

CASH FLOW - cash generated by an asset, group of assets or company during a certain period of time. Usually, such term is complemented by a qualification, depending on the context (operating, non-operating, etc)

COMPANY - commercial, industrial, service or investment entity performing an economic entity.

CONSTRUCTION EQUIVALENT AREA - constructed area on which the corresponding construction unit cost equivalence is applied, as provided by the principles of NB-140 of ABNT (Brazilian Association of Technical Rules).

CONTROL - power to direct the company's management.

CONTROLLING PREMIUM - value or percentage of a controlling stocks pro rata value over the non-controlling stocks pro rata value, which reflect controlling power.

COST OF CAPITAL - expected return rate required by the market for attracting funds for a determined investment.

CURRENT VALUE - value for replacing an existing asset for a new one, depreciated according its physical conditions.

DISCOUNT FOR LACK OF CONTROL - value or percentage deducted from the 100%-pro rata value of a company value, which reflects the lack of part or whole control.

DISCOUNT FOR LACK OF LIQUIDITY - value or percentage deducted from the 100% pro rata value of a company value, which reflects the lack of liquidity.

DISCOUNT RATE - any divisor used for converting a future economic benefit flow into present value.

EBITDA - Earnings Before Interest, Taxes, Depreciation and Amortization.

ECONOMIC BENEFIT - benefits such as revenues, net income, net cash flow, etc.

ELECTRIC DAMAGE VALUE - estimation of the cost for repairing or replacing the parts of an asset in case of electric damage. Values are scheduled in percentages of the Replacing Value and were calculated through manual analysis of the equipment and the repairing maintenance expertise of APSIS technicians.

AP SIS CONSULTORIA

1

FAIR MARKET VALUE - value for which a certain asset changes ownership between a potential seller and a potential buyer, when both parties are aware of relevant facts and none of them are under pressure to make the deal.

GOODWILL - intangible asset referring to name, reputation, client portfolio, loyalty, localization and other similar items that cannot be identified separately.

HOMOGENIZED AREA - usable, private or constructed area with mathematical treatments for valuation purposes, according to criteria set forth by APSIS, based on the real state market.

INCOME APPROACH - valuation methodology by converting to present value expected economic benefits.

INSURANCE MAXIMUM VALUE -the maximum value of an asset for which it is advisable to insure it. Such criterion establishes that the asset which depreciation is higher than 50% should have a Insurance Maximum Value equivalent to twice the Current Value; and, an asset which depreciation is lower than 50%, should have a Insurance Maximum Value equivalent to the Replacing Value.

INSURANCE VALUE -the value for which the insurance company assumes the risks, excluding land and foundations, except in special cases.

INTANGIBLE ASSETS - non-physical assets such as brands, patents, rights, contracts, industrial secrets that provide the owner with rights and values.

INTERNAL RETURN RATE - discount rate in which the present value of the future cash flow is equivalent to the investment cost.

INVESTED CAPITAL - sum of own capital and third-party capital invested in a company. Third-party capital is usually related to debts with short and long term interest to be specified in the valuation context.

INVESTED CAPITAL CASH FLOW - cash flow generated by the company to be reverted to financiers (interests and amortizations) and shareholders (dividends) after operating costs and expenses and capital expenditures.

INVESTMENT VALUE - value for a particular investor, based on particular interests for a certain asset such as synergy with other companies of a investor, different perceptions of risk and future performances, etc.

ISSUE DATE - date on which the valuation report is issued, when valuation conclusions are presented to the client.

LEVERAGED BETA - beta value reflecting the indebtedness in the capital structure.

LIQUIDATION VALUE - the value of a sale in the market, out of its original productive process. In other words, it is the value that would be verified in case the asset was deactivated and put up for sale separately, considering costs of disassembly or demolition (in case of real estate), storage and transportation.

LIQUIDITY - capacity to rapidly convert a certain asset into cash or into a debt payment.

MARKET APPROACH - valuation methodology, which utilizes multiples that result from the sale price of similar assets.

MARKET NET EQUITY - see assets approach.

MULTIPLE - market value of a company, stock or invested capital, divided by a company's measurement (revenues, income, client volume, etc.).

NON-OPERATING ASSETS assets that are not directly related to the company operating activity (whether they generate revenue or not) and that may be sold without affecting its operation.

OPERATING ASSETS assets that are necessary for the company's operations.

PERPETUITY VALUE value at the end of the projective period to be added to the cash flow.

PRESENT VALUE value of a future economic benefit on a specific date, calculated by the application of a discount rate.

PRIVATE AREA usable area including building elements (such as walls, columns, etc.) and elevators hall (in some cases).

REFERENCE DATE specific date (day, month and year) to apply the valuation.

RESIDUAL VALUE the value of a new or old asset projected for a certain date, limited to the date on which such asset turns into scrap, considering that during such period of time, the asset will be operating.

REPLACING VALUE (FOR A NEW ASSET) value based on the price (usually at market current prices) or replacing an asset for a new equal or similar one.

SCRAP VALUE the asset value at the end of its useful life, considering its disassembly or demolition value (in case of real estate), storage and transportation.

SUPPORTING DOCUMENTATION discount rate is a return rate used to convert into present value a payable or receivable amount.

TANGIBLE ASSETS physical assets such as lands, constructions, machines and equipment, furniture and appliances, etc.

USEFUL AREA usable area of real estate, measured by the internal face of its walls.

USEFUL LIFE period of time during which an asset may generate economic benefits

VALUATION act or process through which the value of a company, stock interest or other asset is determined.

VALUATION METHODOLOGY the approaches used for preparing value calculations in order to indicate the value of a company, stock interest or other asset.

VALUE price denominated in monetary quantity.

WACC (Weighted Average Cost of Capital) model in which the cost of capital is determined by the weighted average of the value.

Appraisal of the Net Worth of BrT and Coari at Market Prices

APPRAISAL REPORT

RJ-0325/09-02

1/3 COPIES

REPORT: RJ-0278/09-02

BASE DATE: May 31, 2009

APPLICANT: **TELE NORTE LESTE PARTICIPAÇÕES S.A.**, with its head office located at Rua Humberto de Campos, 425, 8º andar, Leblon, in the city of Rio de Janeiro, State of Rio de Janeiro, registered with the General Roster of Corporate Taxpayers (CNPJ) under number 02.558.134/0001-58, hereinafter referred to as **TNL**.

OBJECTS: **BRASIL TELECOM S.A.**, with its head office located at SIA Sul, Lote D, Bloco B 1º andar, SIA, Brasília, Distrito Federal, registered with the General Roster of Corporate Taxpayers (CNPJ) under number 76.535.764/0001-43, hereinafter referred to as **BrT, and;**

COARI PARTICIPAÇÕES S.A., with its head office located at Rua Humberto de Campos, nº 425, 8º andar (parte), Bairro Leblon, in the city of Rio de Janeiro, State of Rio de Janeiro, registered with the General Roster of Corporate Taxpayers (CNPJ) under number 04.030.087/0001-09, hereinafter referred to as **COARI**.

PURPOSE: Calculation of the Net Equity of both **BrT** and **COARI**, following the appraisal of the equity of each of these companies pursuant to the same criteria and as of the same date, at market prices, for the purposes of article 264 of Law number 6,404 of 12/15/1976 (Corporate Law).

EXECUTIVE SUMMARY

AP SIS CONSULTORIA EMPRESARIAL Ltda. (AP SIS) was hired by TNL to calculate the Net Equity of each of BrT and COARI, following the appraisal of the equity of each of these companies pursuant to the same criteria and as of the same date, at market prices, for the purposes of article 264 of Law number 6,404 of 12/15/1976 (Corporate Law).

The technical procedures used in this report are in accordance with the criteria set forth by appraisal standards. Appraisal calculations to assess the value of assets were devised on the basis of the income, asset and market approaches.

This report presents the market values of the companies' assets and liabilities used to adjust the book Net Equity of each of BrT and COARI through asset approaches.

ACQUISITION OF THE BRASIL TELECOM GROUP: SUMMARY OF THE OPERATION

On January 8, 2009, TELEMAR NORTE LESTE S.A. (TMAR) acquired, through its subsidiary COPART 1 PARTICIPAÇÕES S.A. (COPART 1), the shareholding control of Brasil Telecom Participações S.A. (BrT PART) and BrT, indirectly becoming owner of 81,092,986 ordinary shares issued by BrT PART, which is equivalent to 61.2% of the voting capital.

The required investment for the acquisition was R\$ 5,371,098,527.04 (five billion, three hundred and seventy-one million, ninety-eight thousand, five hundred and twenty-seven reais and four centavos), which represents the amount of R\$ 77.04 (seventy-seven reais and four centavos) per share, in connection with an agreed upon price of R\$ 5,863,495,791.40 (five billion, eight hundred and sixty-three million, four hundred and ninety-five thousand, seven hundred and ninety-one reais and forty centavos) updated for the daily average variation of the Interbank Deposit Certificate (CDI) less the net debt of R\$ 998,053,465.69 (nine hundred and ninety-eight million, fifty-three thousand, four hundred and sixty-five reais and sixty-nine centavos) of INVITEL S.A. (INVITEL), which entity was subsequently merged into COPART 1, and finally adjusted for the stated revenues between January 1st, 2009 and the closing date.

The acquisition of BrT and its subsequent integration into TMAR's operations, will give rise to a telecommunications company with 100% national shareholder control, present throughout the Brazilian territory and with the managerial, operational and financial capacity to expand its operations, including on an international basis.

As described in the Material Fact Change of Shareholder Control , published on January 8, 2009, the following steps will be followed:

1. Conclusion of Mandatory Public Offerings for the Acquisition of Shares;
2. Corporate reorganization of the companies involved in the operation;
3. Approval, introduction or registration of various regulatory bodies;
4. Creation of one or more American Depositary Share programs by TMAR.

1. INTRODUCTION

AP SIS CONSULTORIA EMPRESARIAL Ltda. (AP SIS) was appointed by TNL to calculate the Net Equity of each of BrT and COARI, following the appraisal of the equity of both companies pursuant to the same criteria and as of the same date, at market prices, for the purpose of article 264 of Law No. 6,404 of 12/15/1976 (Corporate Law).

In preparing this report, data and information supplied by third parties were used, in the form of documents and verbal interviews with the clients. The estimates used in this process are based on documents and information which include, among others, the following:

Bylaws or Articles of Incorporation of the companies;

Financial statements of the group's companies;

Organization chart and corporate holdings;

List of permanent assets;

IAN (Annual Reports) and ITR (Quarterly Reports) of the companies;

Set of architectural plans;

Areas chart; and

Documents with technical specifications of the equipment appraised.
Inspections of the operational sites were conducted in March and April 2009.

The AP SIS team responsible for the coordination and performance of this report consists of the following professionals:

ANA CRISTINA FRANÇA DE SOUZA
Civil Engineer

Post-graduated in Accounting Sciences (CREA/RJ 91.1.03043-4)

AMILCAR DE CASTO
Project Manager

CARLOS SANCHES
BS in finance

FELLIPE FRANCO
Economist

CESAR DE FREITAS SILVESTRE
Accountant (CRC/RJ 044779/O-3)

LUIZ PAULO CESAR SILVEIRA
Mechanical Engineer

Master of Business Management

(CREA/RJ 89.1.00165-1)

MARGARETH GUIZAN DA SILVA OLIVEIRA
Civil Engineer, (CREA/RJ 91.1.03035-3)

RICARDO DUARTE CARNEIRO MONTEIRO
Civil engineer

Post-graduated in Economic Engineering (CREA/RJ 30137-D)

SÉRGIO FREITAS DE SOUZA
Economist (CORECON/RJ 23521-0)

WASHINGTON FERREIRA BRAGA
Accountant (CRC/RJ 024100-6 / CVM 6734)

2. PRINCIPLES AND QUALIFICATIONS

This report strictly complies with the fundamental principles described below.

The consultants and appraisers have no personal bias towards the subject matter involved in this report nor do they derive any advantages from it.

The professional fees of APSIS are not, in any way, subject to the conclusions of this report.

The report was prepared by APSIS and no one, other than the consultants themselves, prepared the analyses and respective conclusions.

In this report, it is assumed that the information received from third parties is correct, and the sources thereof are contained in said report.

To the best knowledge and belief of the consultants, the analyses, opinions and conclusions presented in this report are based on data, diligence, research and surveys that are true and correct.

APSYS assumes full responsibility for the matter of Appraisal Engineering, including implicit appraisals, and for the exercise of its honorable duties, primarily established in the appropriate laws, codes or regulations.

For projection purposes, we start from the premise of the nonexistence of liens or encumbrances of any nature, whether judicial or extrajudicial, affecting the object of the relevant work, other than those listed in this report.

This report meets the specifications and criteria established by the standards of the Brazilian Association of Technical Standards (ABNT), the specifications and criteria established by USPAP (Uniform Standards of Professional Appraisal Practice), in addition to the requirements imposed by different bodies, such as: the Treasury Department, the Central Bank of Brazil, CVM (the Brazilian Securities and Exchange Commission), SUSEP (Private Insurance Superintendence), etc.

The report presents all the restrictive conditions imposed by the methodologies adopted, which affect the analyses, opinions and conclusions contained in the same.

APSYS declares that it does not have any direct or indirect interest in the companies contemplated in this report, in their respective controllers, or in the operation to which the Protocol and Justification refer, there being no relevant circumstances which may characterize conflict or communion of interests, whether potential or actual, towards the issuance of this report.

In the course of our work, controllers and managers of the companies contemplated in this report did not direct, limit, hinder or practice any acts, which have or may have compromised access, use or knowledge of information, property, documents or work methodologies relevant to the quality of our conclusions.

The Report was prepared in strict compliance with the postulates set forth in the Professional Code of Ethics of CONFEA - Federal Council of Engineering, Architecture and Agronomy and of the Legal Institute of Engineering.

APSYS CONSULTORIA
REPORT RJ-0325/09-02

10

3. RESPONSIBILITY LIMITS

To prepare this report, APSIS used historic data and information, audited by third parties or unaudited, and projected unaudited data supplied in writing or verbally by the companies' management or obtained from the sources mentioned. Therefore, APSIS assumed as true the data and information obtained for this report and does not have any responsibility in connection with its truthfulness.

The scope of this work did not include an audit of the financial statements or a revision of the work performed by the companies' auditors.

Our work was developed for use by the applicant in connection with the previously described objectives. Therefore, it may be disclosed as part of the documents related to the acquisition of control of the BRASIL TELECOM Group, and the mention of this work in related publications is authorized. It may also be filed with the Brazilian Securities and Exchange Commission - CVM and with the U.S. Securities and Exchange Commission - SEC, as well as made available to shareholders and third parties, including through the websites of the involved companies.

We emphasize that understanding the conclusion of this report will require reading it and its attachments in full. Therefore, conclusions from partial reading should not be drawn.

We are not responsible for occasional losses to the applicant, its shareholders, directors, creditors or to other parties as a result of the use of data and information supplied by the company and contained in this report.

The analyses and conclusions contained herein are based on several premises, held as of this date, of future operational projections, such as: macroeconomic factors, values used in the market, exchange rate variations, sale prices, volumes, market share, revenues, taxes, investments, operational margins, etc. Thus, future results may differ from any forecast or estimate contained in this report.

This appraisal does not reflect events and their respective impacts, occurring after the date of issue of this report.

4. APPRAISAL METHODOLOGY
ASSETS APPROACH - NET EQUITY AT MARKET PRICES

This methodology is derived from generally accepted accounting principles (*GAAP*), where financial statements are prepared based on the principle of historic or acquisition cost.

Due to this principle and to the fundamental principle of accounting, the book value of the assets of a company less the book value of its liabilities equals the book value of its net equity.

The application of this methodology contemplates, as a starting point, the book values of assets and liabilities and requires that some of these items be adjusted so as to reflect their probable realization values. The result from the application of this method may provide an initial basis for the estimate of the company's value, as well as a useful basis of comparison with results from other methodologies.

On the other hand, the basic principles of economics allow us to create the following appraisal technique: the value defined for assets less the value defined for liabilities equals the value defined for a company's net equity. From an appraisal perspective, the relevant value definitions are those appropriate to the purpose of the appraisal.

The assets approach, therefore, aims at appraising a company by adjusting of the book value (net balance) to respective fair market values. The assets and liabilities deemed relevant are appraised for their fair market value, with a comparison made between this value and its book value (net balance).

The general appraisal criteria applicable to the adjustment of assets subject to being appraised at market prices can be found in detail in Chapter 6 of this report.

After being duly analyzed, these adjustments are added to the book Net Equity value, in this way determining the company's market value through the assets approach. The company's fair market value is the Net Equity value after giving effect to the adjustments for the assets and liabilities appraised.

It is worth pointing out that the identification and quantification of liabilities that were neither recorded nor disclosed by the companies managements were not within the scope of our work.

The methodology and scope adopted in this assessment aimed at appraising the companies going concern values. Therefore, expenses incurred in asset realization or liability requirements, as well as related to the companies bankruptcy or liquidation processes were not contemplated in the calculations.

PRINCIPLE STEPS OF THE APPRAISAL

Reading and analysis of the companies balance sheets.

Analysis of asset and liability accounts recorded on the companies balance sheets, to identify accounts subject to adjustments, as well as calculations of their probable market values.

Adjustment of the companies fixed assets in accordance with their respective market values on the basis of equity appraisals performed by Apsis.

Adjustment of relevant intangible operating assets in accordance with their respective market values, on the basis of premises and appraisal criteria developed by Apsis.

Application of the equity method of accounting to the net equity at market value of subsidiary and affiliated companies for the purpose of calculating the value of investments.

Calculation of the market value of the companies net equity.

5. PROFILE OF THE BRASIL TELECOM GROUP

Brasil Telecom Participações S.A. is a publicly-held holding company, whose shares are traded on the Brazilian Securities, Commodities and Futures Exchange (BM&FBOVESPA) under the ticker symbol BRTP3 and BRTP4 and on the New York Stock Exchange under the ticker symbol BRP. The corporate structure of the Brasil Telecom Group can be found in the Executive Summary of this report.

In Brazil, Brasil Telecom provides telephony services to millions of Brazilians who live in Region II, comprising the states of Acre, Rondônia, Mato Grosso, Mato Grosso do Sul, Tocantins, Goiás, Paraná, Santa Catarina and Rio Grande do Sul, in addition to the Federal District.

With its headquarters in Brasília (Federal District) and approximately 20 thousand employees on its staff, its client base comprises 8.1 million fixed terminals in operation, over 5.6 million mobile subscribers, 282 thousand public-use terminals and 1.8 million ADSL subscribers (broadband).

The company, the first to offer a full line of services in the telecommunications field in Brazil, caters to all market demands in an integrated manner and combines its fixed and mobile operations, data and voice, domestic and international long-distance calls, data center,

free internet access, broadband and dial-up access into convergent solutions for home, business and government.

Brasil Telecom has provided local fixed telephony services in the Federal District and in the states of Acre, Rondônia, Tocantins, Mato Grosso, Mato Grosso do Sul, Goiás, Paraná, Santa Catarina and Rio Grande do Sul since 1998. In July 1999, it started providing Code CSP 14 for long-distance calls and in January, 2004, Code CSP 14 started operating nationally and for international calls. In addition, the company also provides high-speed internet connection services with Turbo, which uses ADSL technology so that individuals and companies may have quick access to the internet without occupying their telephone line, and offers 100% broadband content through the BrTurbo and BrTurbo Company providers. Additionally, the company offers mobile access to the wireless network with BrTurbo ASAS. For dial-up internet access, Brasil Telecom offers iBest, the second largest cost-free provider in the Brazilian market.

In 2004, the company was authorized by Anatel to provide Personal Mobile Services (PMS) in Region II and launched public mobile telephony operations with an aggressive business plan geared towards convergence, in addition to innovative offers which enabled the attainment of a 14.4% market share in a little less than four years of operations. In 2007, the Internet access providers (iG, iBest and BrTurbo) which make up the Internet Group, the Internet unit of Brasil

Telecom, had nearly 1.4 million broadband customers and over 4 million dial-up customers. These figures make this internet portal the third most widely used in the nation, with over 11.2 million unique home visitors per month, according to the measurement method of domiciles that access the internet during the period.

iG Brasil's operations are based on the provision of both dial-up and broadband internet access. It also provides value-added services geared towards the residential and entrepreneurial markets, including its Internet connection accelerator. In addition to these services, iG Brasil also sells advertising space in its portal.

Through Brasil Telecom Cabos Submarinos (Globenet), the company owns 22 thousand kilometers of submarine cables connecting Brazil with Venezuela, Bermuda and North America, with points of presence in Rio de Janeiro, Fortaleza, Caracas, Miami, New York and Bermuda. This network has strengthened the group's leadership position within the data communications market.

The company's subsidiary Brasil Telecom Comunicação Multimídia operates in, among other areas, the three most important cities in the country outside the company's concession area: São Paulo, Rio de Janeiro and Belo Horizonte, with a focus on the corporate and entrepreneurial markets. Both companies offer complete solutions of national and international scope, including the Cyber Data Center.

In order to further strengthen its position as a leading telecommunications provider, Brasil Telecom has acquired the entire optical fiber submarine cable system from the Globenet group, connecting connection points in the United States, Bermuda, Brazil and Venezuela. With the acquisition of MetroRED, a provider of private telecommunications network services through digital optical fiber networks, Brasil Telecom started providing access to Brazil's major corporate clients in large urban centers, such as São Paulo, Rio de Janeiro and Belo Horizonte, in addition to Porto Alegre, Curitiba and Brasília, and other international urban centers.

Vant is a division of the company, operating in major Brazilian capitals, whose purpose is to provide multimedia communication services, acquisition and for-consideration assignment of facilities and other means. This subsidiary was also acquired for the purpose of expanding solutions to the corporate market throughout Brazil.

Brasil Telecom has expanded its operations by investing in Brasil Telecom Call Center S.A. (BrT Call Center), previously named Santa Bárbara dos Pinhais S.A. This company provides call center services to third parties, composed of customer service, active and passive telemarketing, as well as training, and support and advisory services and activities, among others. Its operational activities started in November 2007 with the provision of call center services to Brasil Telecom S.A. and its subsidiary companies, which require this type of service. Call center services were previously provided by outsourced parties.

To provide managerial, supervisory and advisory services for the development and sale of financial products and services, the company acquired, in July 2008, BrT Card Serviços Financeiros Ltda (BrT Card). Its capital stock subscription took place on September 17, 2008, with 99.99% interest belonging to the company. BrT is holder of the remaining interest. At year-end, BrT Card held only marketable securities, assets from resources obtained in the capital subscription, and had not started its operational activities.

This diversified portfolio has contributed towards the company being able to maintain a large client base, with such distinctive needs as those of residential subscribers and corporate clients.

This challenging scenario has required the company to react in order to maintain the innovation of its offerings. Brasil Telecom was a pioneer in the launching of products, such as: IPTV (transmission of pay per view films, using its broadband network as a platform); Único (cell phone service which transmits signals through the fixed network when used in the home environment, reducing utilization costs for the subscriber); and Pula-Pula (free minutes provided on the basis of the volume of Traffic received).

In 2008, Brasil Telecom continued launching innovative services, such as third-generation mobile telephony services and minute conversion packs for fixed and cell phones. The search for innovation is important in an increasingly competitive market, which competition was fostered by the start of number portability in Brazil.

FIXED TELEPHONY

In 2008, there was an increase in competition with regards to fixed telephony services, whether from cable television companies or from other fixed telephony companies, or from mobile telephone operators which positioned themselves in the market with alternative plans and solutions to traditional fixed telephony services.

During the year, penetration of fixed telephony continued to decrease as a consequence of the fixed to mobile migration phenomenon. In addition, the year was marked by an increase in competition due to number portability.

Within this competitive environment, Brasil Telecom has focused its main actions on the maintenance and profitability of its terminal base, as well as on the expansion of service and alternative plan offers.

At the end of 2008, Brasil Telecom was providing nearly 4 million lines with local alternative plans for fixed telephony. The Company has been keeping its leadership rank in the long-distance market and has recorded an average market share of 90% in the intra-sector segment and 85.2% in the inter-sector segment. At the end of 2008, Brasil Telecom had a 65.7% market share in the inter-region segment and 40.4% in the international segment.

Among long-distance plans, we can highlight: 14 Simples, with 30-minutes included for domestic long-distance calls; 14 Meu Perfil, with special rates for in-state calls; and 14 Minhas Cidades, with more economical rates for three cities of the customer's choice.

MOBILE TELEPHONY

In 2008, Brasil Telecom Móvel completed four years of operations and surpassed the mark of 5.6 million subscribers, 919 thousand of whom were postpaid and 4,626 thousand prepaid subscribers. The Company has been increasing its revenues in this segment by creating functionalities through internet services and content, such as: Orkut, Glu (games), Som Livre (music) and Discovery. Partnerships have also been entered into with content companies, such as: Dada.net, Blinko, Spin My Mobile, Flycell, Ligaki, Memo, Sony Pictures, Neo Network and Móvel Streams, in addition to the provision of the Escritório Móvel e-mail pack by way of the Nokia Intellisync solution. Several special offers and actions on services and content which are already available to customers have been realized.

DATA COMMUNICATION

At the end of the year, Brasil Telecom attained 1,806 thousand subscribers in the broadband segment (ADSL).

Convergent Products

Responding to the requirements of a vast number of consumers, Brasil Telecom has invested in the development of solutions which combine fixed and mobile voice services, broadband and video. Thus, the company entered into a commercial relationship with SKY cable TV, which has enabled the offering of integrated packages including digital cable TV.

Telefone Único - Employs CTP (Cordless Telephony Profile) technology, which enables voice services for fixed and mobile telephony to be used on the same cell phone. With this product, Brasil Telecom has maintained its fixed telephony client base, increased its mobile telephony market share, offered new value-added services, fostered the sale of postpaid plans and heightened the efficiency of its fixed and cellular networks.

Cartão Único - Through the purchase of credits (R\$ 15, R\$ 20, R\$ 30 and R\$ 60), this card enables customers to recharge all prepaid services, fixed terminals (AICE, Controle Total and Ligmix) and mobile terminals of Brasil Telecom.

Unique Virtual PBX - Unique Virtual PBX is a convergent solution to cater to business necessities. With this solution, customers no longer have purchase, operation or maintenance costs relative to PBX equipment, as all such infrastructure remains at Brasil Telecom. Therefore, the company has become the first operator to converge fixed and mobile telephones as extension lines.

Quadruple Play: SKY Cable TV Partnership - In this commercial relationship with SKY Cable TV, Brasil Telecom offers packages comprising fixed and mobile telephony, broadband and Digital TV subscription services. This offer established itself during 2007 as a competitive advantage in view of other Triple Play offers from competitors. The package contributes approximately 10% of the total broadband sales of Brasil Telecom.

Internet Providers

The Internet Group, which comprises the operations of iG, iBest and BrTurbo providers, is the largest Internet access provider in Brazil with 4 million cost-free dial-up access users, and the second largest broadband provider in the Brazilian market.

According to the Ibope/NetRatings of December 2007, the Internet Group ranked in third place among the main national competitors, with over 11.2 million unique home visitors, which represents an annual growth of 43%.

Financial Highlights

Within its consolidated financial results, Brasil Telecom closed 2008 with net income of R\$ 11,297 million and EBITDA of R\$ 3,937 million, which represented an EBITDA margin of 34.8%, compared to 34.2% in 2007.

Net profit assessed was R\$ 782 million, 16.2% higher than the prior year's, influenced by the consistency in the evolution of cost and revenue lines and from significant growth in broadband and mobile telephony.

On May 31, 2009, Brasil Telecom had gross debt of R\$4,856.8 million, with R\$779.9 million in foreign currency, of which R\$399.2 million was not hedged, resulting in a net exposure of US\$170.8 million. The net debt was R\$ 1,385 million.

In 2008, CAPEX was R\$ 2,678 million. Of the investments made, fixed telephony stood out, mainly as a result of the expansion of the data network, Transmission Backbone, intelligent network, information technology and regulations.

6. GENERAL APPRAISAL CRITERIA

This report was prepared for the purpose of complying with current legislation in connection with the acquisition of control of the BRASIL TELECOM Group, as described in the Executive Summary of this report.

EVENTS AND ADJUSTMENTS CONTEMPLATED IN THE APPRAISAL

The Financial Statements considered as the basis for this report were prepared by the companies, having already fully complied with Act No. 11.638/07. The table below shows the general criteria defined for the appraisal of each account and/or group of accounts of the companies involved in the operation:

ACCOUNT GROUP	PREMISES	APPRAISAL CRITERIA
GENERAL	Accounts whose value is less than R\$500 thousand reais were not analyzed; the book value was kept, with the exception of those that were consolidated in a specific group.	Market value identical to book value.
Available Funds	Represented by:	Cash and Banks - Market value identical to book value.
	Cash and Banks	Cash equivalents - Market value identical to book value.
	Cash Equivalents - Short-term investments, with original maturity being ninety days or less and immediately convertible into cash.	
Financial Investments	Represented by investments in bonds, classified in the following manner:	Bonds kept for trading and available for sale - Market value identical to book value.

ACCOUNT GROUP	PREMISES	APPRAISAL CRITERIA
	Kept for trading	Bonds kept until maturity were measured by their acquisition cost increased by revenues ascertained, less provision for adjustments to recoverable value, when applicable.
	Kept until maturity	
	Available for sale	
Accounts Receivable from Clients	Substantially represented by:	Invoiced and uninvoiced credit accounts with users of telecommunication services, entered as per rate value or service value charged on the date of its provision, whose book value does not differ from fair value.
	Services for billing 61%	
	Billed services 37%	Accounts receivable resulting from the sale of cell phones and accessories have been entered for the value of sales performed at the moment of delivery to and acceptance by the client, reduced to the recoverable value whose provision is set forth when there is concrete evidence of the non-realization of values due according to the original terms of the constituting credits.
	Sales of Goods 2%	
	Provision for doubtful accounts constituted on the basis of individual analyses and on the analyses of groups of assets of similar risk, for which criteria for establishing the provision contemplates the ascertainment of percentiles of losses occurring in each maturity range of accounts receivable and, on the grounds of such loss percentiles, future losses are estimated over the current balance of accounts receivable.	

ACCOUNT GROUP

PREMISES

APPRAISAL CRITERIA

Credits receivable from other operators under litigation (DETRAF) are recognized on a cash basis. Adjustment at market value was ascertained on the basis of the application of the historical percentage of success in these litigations, per operator, over the respective values receivable on the base date.

Credits written off against provisions made and credits provided. Adjustment to market value was ascertained on the basis of the application of 5% over these credits. This percentage results from the market value appraised by jointly considering the following parameters:

Historical percentage of recovery;

ACCOUNT GROUP	PREMISES	APPRAISAL CRITERIA Percentage of guaranteed credits;
		Percentage of sector recovery; and
		Current sector outlook.
Inventories	Substantially represented by cell phones and accessories for resale, net of provision for losses or for adjustments to the forecast in which they should be realized.	Market value identical to book value.
Loans and Financing	Represented by:	Market value identical to book value.
	Loans and financing referring to lendings of financial resources to the company for the production of telephone directories and levied pursuant to the variation of the IGP-DI (General Price Index - Internal Availability).	

ACCOUNT GROUP	PREMISES	APPRAISAL CRITERIA
Derivative Financial Instruments	Represented by:	Market value identical to book value.
(Assets and Liabilities)	Assets Dollar options	
	Liabilities:	
	Dollar options	
	Cross currency swaps Yen x IDC	
	<p>Hedge operations entered into with financial institutions to minimize the risks of foreign currency loans and financing, without leverage, due to the possibility of the existence of exchange rate fluctuations which may increase the balances thereof. The portion of the foreign currency out of the foreign currency denominated debt covered by these operations and financial investments in foreign currency is 60.5%.</p>	
Deferred and Recoverable Taxes	Represented by:	<p>The book balance was adjusted for the reversal of the provision to the value recoverable from subsidiary BrT Part., bearing in mind the re-examination of the recovery outlook of its credits conducted in connection with the corporate restructuring.</p>
	<p>Deferred Income Tax and Social Contribution Calculated over temporary differences, tax losses and the negative base of social contribution, and accounted for to the extent of the existence of future taxable profit at sufficient level for the total or partial use of deferred taxes.</p>	

ACCOUNT GROUP

	<p>Adjustments at Market Value- Resulting from the appraisal of Assets, Rights and Obligations, appraised at market value, net of tax effects.</p>	

7. APPRAISAL OF THE NET EQUITY AT MARKET PRICE OF BRT AND COARI

The operational activities of the Brasil Telecom Group start with the company Brasil Telecom S.A. (BrT). Parent companies in the corporate chain (COARI), perform simple holding company functions. This report adopted the assets approach for the appraisal of the Net Equity at market price of BrT. In this approach, relevant assets and liabilities were appraised so as to reflect their fair market value, according to the criteria detailed in Chapter 6.

RELEVANT ASSETS

BrT is a company which serves a dual function within the structure of the Brasil Telecom Group: (i) as a holding company of the group's operating investments; and (ii) as an operational company, with operations in the fixed telephony segment, and therefore, owner of operating assets alike.

Therefore, to arrive at the value of the Net Equity at market prices of BrT, it will be necessary for us to proceed to the appraisal of its relevant operating assets, and also of relevant investments in other companies of the group.

FIXED ASSETS

Property that integrates the fixed assets relating to equipment accounts are of the utmost relevance among the set of BrT's assets. Land and buildings are assets of secondary importance within the telephony segment. Appraisal of these assets can be found in Attachment 2 hereof and in specific reports for the main real estate, and is summarized on the following table:

	Million R\$
Property, Plant and Equipment	Market
- Work in Progress	285
- Automatic Equipment	1,180
- Transmission Equipment	4,457
- Communication Data Equipment	1,630
- Infrastructure	1,395
- Terminals	124
- Land	238
- Buildings	1,031
- General Goods	395
Total	10,735

The average remaining economic useful life of BrT's fixed assets is seven years. Disclosures per class of assets can be found in Attachment 2.

INTANGIBLE ASSETS

In the appraisal of the intangible assets of BrT, the methodology chosen was the income approach, recommended when an industry owns relevant contracts which guarantee long-term profitability (*Valuation of Intellectual Property and Intangible Assets - Smith, Parr*). The following relevant category of intangible operating assets can be considered significant in fixed telephony operation companies, such as BrT:

Public Service Concession Contract - Fixed Telephony

As to the brand value, each business segment has intangible assets with greater or lesser influence in the operation. In the case of fixed telephony, the brand does not have relevant influence in cash generation, but rather the guarantee of service exclusivity for the inhabitants of a particular region, including the assignment of the client base existent at the time the service was privatized.

For appraising the Concession Contract, we analyzed the cash flow of the fixed telephony business during the remaining useful life of the concession (17 years), on a stand-alone basis, contemplating potential synergies resulting from the acquisition process described in this report.

We also added the residual value of fixed assets and working capital at the end of the concession.

After calculating the present value of this flow through a discount rate appropriate for the segment, we deducted tangible operating assets (working capital and fixed assets) at market prices, so as to draw out the intrinsic value of the Concession Contract, as shown on the table below:

expected rate of return	8.8%	9.0%	9.2%
ECONOMIC VALUE - BrT FIXED TELEPHONY CONCESSION			
	(R\$ millions)		
DISCOUNTED CASH FLOW	24,866	24,536	24,213
RESIDUAL VALUE (WORKING CAPITAL and FIXED ASSETS)	6,193	6,193	6,193
DISCOUNTED RESIDUAL VALUE	1,476	1,431	1,387
OPERATIONAL VALUE - FIXED TELEPHONY	26,343	25,967	25,600
CARRYING CHARGE - WORKING CAPITAL	(423)	(423)	(423)
CARRYING CHARGE - FIXED ASSETS AT MARKET PRICE	(11,026)	(11,026)	(11,026)
BrT FIXED TELEPHONY CONCESSION VALUE - 12/31/08	14,894	14,518	14,151
<i>amortization term (months)</i>		204	
BrT FIXED CONCESSION VALUE - 05/31/09		14,162	

Appraisal calculations, as well as the methodology used can be found in detail in Attachment 4.

APPRAISAL OF INVESTMENTS IN MOBILE TELEPHONY

Investments in the mobile telephony segment are represented by their direct participation in the company 14 BRASIL TELECOM CELULAR S.A. (14 BRASIL), which concentrates the operating assets of this segment.

The main adjustments in 14 BRASIL are centered on the following groups:

FIXED ASSETS

The table below summarizes the adjustments made, specified in Attachment 2:

	Million R\$ Market
Property, Plant and Equipment	
- Work in Progress	207
- Automatic Equipment	229
- Transmission Equipment	786
- Communication Data Equipment	10
- Infrastructure	97
- Terminals	1
- Buildings	0
- Other Investments	90
Total	1.421

The average remaining economic useful life of the fixed assets of 14 BRASIL is 10 years. Disclosure per class of assets can be found in Attachment 2.

INTANGIBLE ASSETS

In mobile telephony operating companies, such as 14 BRASIL, authorizations granted by the Federal Government do not guarantee a market share in the potential market, or an initial client base, such as with fixed telephony. For the purpose of this report, we assumed that the value paid to the Federal Government by 14 BRASIL with regards to authorizations in a bidding process, constitutes the best approximation of the respective market value, therefore not requiring adjustment.

Nevertheless, we shall consider the following category of intangible assets relevant within the mobile telephony segment, not included in the financial statements:

Portfolio of Active Clients

We used the reproduction cost to appraise this intangible asset, as shown in Attachment 4. The table below shows the market value suggested, as of the base date of this report:

CLIENT BASE VALUE - MOBILE TELEPHONY	2006	2007	2008
TOTAL USERS (IN MILLIONS)	3.4	4.3	5.6
POSTPAID CLIENTS (TOTAL %)	29%	20%	17.56%

EQUIPMENT APPRAISAL

APPRAISAL OF MACHINERY AND EQUIPMENT

The technical procedures used in this report are in accordance with the criteria set forth by Appraisal Standards **NBR 14653-1:2001** and **NBR 14653-2:2004** of ABNT **Brazilian Association of Technical Standards**, and appraisal calculations for assessing values were devised based on the direct market data comparative method and the replacement cost method.

Based on prior experiences, APSIS developed a method for assessing values based on comparative elements drawn out of appraised operational systems.

Set forth below are the references used in the performance of our work and the criteria used for the main items of the appraisal:

REFERENCES

- a) Equity control of fixed assets, supplied by BrT for all the group's companies;
- b) Quotations for the relevant equipment in each functional class;
- c) Analysis of BrT's new operational projects for the purpose of harmonizing concepts and premises (APSYS Engineering and BrT Engineering);
- d) Data supplied by managers of several central offices during technical visitations; and
- e) Appraisal of specific features of each facility.

METHODOLOGY

The method used consists of arriving at the value of new, equal or similar machinery and/or equipment through market research conducted with manufacturers, suppliers and/or representatives, in addition to, as the case may be, assembly, installation and transportation expenses.

We adopted a simplified model as a result of the size of the data base analyzed (1,938 thousand items), which grouped assets by operating functional unit.

After connecting all items to functional units, we adopted the following appraisal criteria/premises:

For all equipment deemed obsolete, with no market value, the value of a MODERN EQUIVALENT will be considered.

The functional classes devised by APSIS defined technology used by demand, and not by manufacturer or model, noting that, with regards to the market, technology is within the reach of all, and values are similar among manufacturers.

The relevant equipment was selected by functional class to be quoted with manufacturers, or the equivalent, contained in the same data bank supplied, with a purchase date in 2008.

A correction factor was used for each functional class for sampling, with reference to the relevant quoted equipment and adopting the premise that the value of all equipment belonging to the same functional class is affected in the same manner.

The economic useful life of fixed assets installed on the plant was defined as a result of field visitations and data collected from the manufacturers of the equipment. We contemplated the following factors for assessing economic useful life: the need of replacement due to technological advances in demand, competition, market trends and the useful life of the equipment.

Therefore, we arrived at the following probable estimates, per engineering group:

- Commutation => 10 years

- Transmission => 10 years

- Infrastructure => 20 years, with towers being = 25 years

- Access Network => 10 years

- Termination => 10 years

Some functional classes were identified as non-relevant and therefore associated to other similar classes, namely:

CRITERIA FOR REPLACEMENT VALUE ASSESSMENT NON-RELEVANT CLASSES

CLASSES

CAB, C-B, C-O

CEL-, CEL-A

D-DEL, D-E

SAT-A, SAT-E

E-B, E-T

F-I, S-A

T-E, T-O

TE-CP, TE-O, TE-VC, TE-WLL, TE-DA, TE-DEL

The current value of each equipment was arrived at by considering depreciation of the replacement value based on a new economic useful life term beginning from the date of purchase.

MÉDIAN OF CLASSES

C-CG, C-M, C-P.

CEL-B.

D-DO.

D-DO, D-DEL, D-MO, D-MUL, D-RO.

E-A, E-G, E-R.

C-G, C-M, C-P, T-A, T-ANA, T-DEL, T-DO.

T-A, T-ANA, T-DEL, T-DO.

TE-AS, TE-TP.

With regards to installations, these were assessed as an integral part of the respective equipment.

REAL ESTATE APPRAISAL

REAL ESTATE APPRAISAL

APSYS devised appraisal reports to assess market values for the purpose of the purchase and sale of the 30 largest commercial buildings belonging to **BrT, corresponding to 48% of the total net equity of the company's buildings**. The value arrived at was used to validate the market values introduced by the company's management, which are updated yearly by the responsible sector.

The technical procedures used in the report prepared by APSYS are in accordance with the criteria set forth by **Appraisal Standards NBR 14653-1:2001** and **NBR 14653-2:2004** of **ABNT - Brazilian Association of Technical Standards**, and appraisal calculations to assess market values were prepared on the basis of the evolution method (direct market data comparative method for land, and cost quantification method for buildings and improvements) and on the basis of the direct market data comparative method.

Furthermore, the reports comply with the specifications and criteria set forth by Appraisal Standards NBR 14653-1:2001, NBR 14653-2:2004 and NBR 14653-5:2004 of **ABNT - Brazilian Association of Technical Standards** and with the specifications and criteria set forth by USPAP (Uniform Standards of Professional Appraisal Practice), in addition to requirements imposed by different bodies, such as: the Ministry of Treasury, the Brazilian Central Bank, Bank of Brazil, CVM (Brazilian Securities and Exchange Commission), SUSEP (Superintendence of Private Insurance), RIR/99 (Income Tax Regulation/99), etc. The postulates comprised in the Professional Codes of Ethics set forth by CONFEA Federal Council of Engineering, Architecture and Agronomy and by the Institute of Legal Engineering have also been complied with.

1. METHODOLOGY FOR REAL ESTATE APPRAISAL

The methodology used in the reports is described as follows.

1.1 ASSESSMENT OF THE REAL ESTATE S VALUE EVOLUTION METHOD

This method defines the total value of the real estate based on a combination of the direct comparative method for assessing the value of land and the cost quantification method for assessing the value of improvements.

DIRECT COMPARATIVE METHOD (Handling by Factors) - LAND

DEFINITION

This method defines land value by comparing market data from similar land. Firstly, market research is carried out aiming at producing a representative sampling of market data on land with features, inasmuch as possible, similar to that under appraisal through the use of all available data. This stage, which involves research structures and strategies, starts with the profiling and outlining of the market under analysis with the assistance of existing theories and concepts or hypotheses originated from experiences acquired by the appraiser on value formation. Within the research structure, variables are chosen which, in principle, are relevant for explaining value formation, and presumed relations between them and dependent variables are established. Researched items are then submitted to technical homogenization through the assistance of approved empirical weighting factors, which aim to weigh the features and qualities of the data researched.

IDENTIFICATION OF THE SAMPLE S VARIABLES

Dependent variables

In order to correctly specify dependent variables, market investigation in connection with their behavior and ways in which prices are expressed (for instance, total or unit price, reference currency, payment forms) is required, as well as the homogenization of measurement units.

Independent variables

Independent variables refer to physical features (for instance, area and façade), location features (such as the district, street, avenue, and distance to centers of influence, among others), and economic features (such as bid or transaction, business period cycle and condition - payment in cash or in installments). Independent variables must be chosen on the basis of existing theories, knowledge acquired, common sense and other features which have revealed themselves as important during the performance of our work, as some variables contemplated during research planning may have revealed themselves to be of little relevance or vice-versa. Whenever possible, adoption of quantitative variables is recommended.

UNIFICATION FACTORS NORMALLY USED IN THE REPORTS

According to Appraisal Standard NBR 14653-2:2004 of ABNT, for foundation level I to be attained, the adjustment interval acceptable for each factor or set of factors is 0.50 to 1.50. The following factors were used in this appraisal:

F1 - Bid Factor

This factor has been adopted for items under bid, bearing in mind that it normally suffers a reduction in value for the purpose of closing the deal. It varies from 0.8 to 1.0.

F2 - Transposition Factor

This factor has been adopted for the purpose of unifying researched items with the real estate under appraisal, as a function of the relative location.

F3 - Area Factor

This factor has been adopted for the purpose of unifying researched items with the real estate under appraisal, as a function of the relative area.

ü $F3 = (s/S)^{1/4}$

Where: s = area of researched item

S= area of real estate under appraisal

When variation between two areas is less than 30%; or

ü $F3 = (s/S)^{1/8}$

When variation between two areas is over 30%.

F4 - Topography Factor

This factor has been adopted to unify researched items with the real estate under appraisal as a function of the relative topography.

F5 - Frontage Factor

This factor has been adopted to unify researched items with the real estate under appraisal, as a function of the relative frontage.

ü $F5 = (TA/Ta)^{1/4}$

Where: TA = frontage of the real estate under appraisal

Ta = frontage of the researched item

With expression being limited to the interval of $0.5 \leq TA/Ta \leq 2.0$

After unification, these values are subjected to a statistical assessment to determine the unit value to be adopted for the real estate under appraisal.

After researched items have been duly unified, Student's Percentile-T Method is adopted for assessing the possible interval with 80% confidence. Within this interval, the appraiser, at his discretion, adopts the unit value deemed appropriate. This value is multiplied by the constructed area of the real estate under appraisal, thus arriving at the value thereof.

COST QUANTIFICATION METHOD - BUILDINGS AND IMPROVEMENTS

The cost quantification method determines value on the basis of the cost of reproduction minus depreciation of buildings and improvements, with all original features or re-allocation thereof considered, and contemplating depreciation due to physical deterioration, functionality and economic/external obsolescence.

The unit value (new value) for buildings and construction is defined through the adoption of the basic unit cost of construction, which is determined through inquiries made to magazines specializing in civil construction indexes and costs (PINI EDITORS). This value is multiplied by the equivalent construction area of the improvements.

A percentage representing factors not included in the cost of construction, such as: BDI (Indirect Costs and Profits) rate, project cost, fees, etc., is added to this sum, thereby established the building's cost of reproduction.

Depreciation results from the items' wear and tear. Functional obsolescence occurs as a result of a decrease in value based on the internal condition of the real estate, due to inadequate design, materials, or processes that give rise to inadequacies, capability, under-utilization or excess operational costs.

Economic/external obsolescence is an irreparable injury to the value of buildings and improvements caused by unfavorable conditions of the local economy and industrial sector, such as: unavailability of financing, loss of sources of raw material and labor, lack of efficient transportation, change in the center of business, change in legislation and changes in customs.

A depreciation factor set forth by the **Ross-Heidecke Method** (accounting for the state of conservation and apparent age of the building) is applied to the previously resulting cost of reproduction of the building, thus arriving at the building's cost of reproduction minus depreciation.

CALCULATION OF THE REAL ESTATE'S FINAL VALUE

The market value for the purchase and sale of the real estate is obtained from the sum of land, construction and improvement portions. If the resulting value is not appropriate to the current status of the regional real estate market within the segment under analysis, we adopt a commercialization factor.

1.2 DIRECT COMPARATIVE METHOD (Adjustment by Factors)

DEFINITION

This method defines land value by comparing market data from similar land. First, market research is carried out to produce a representative sampling of market data on real estate with features, inasmuch as possible, similar to that under appraisal through the use of all available evidence. This stage, which involves research structures and strategies, starts with the profiling and outlining of the market under analysis, with the assistance of existing theories and concepts or hypotheses originated from experiences acquired by the appraiser on value formation. Within the research structure, variables are chosen which, in principle, are relevant for explaining value formation, and presumed relations between them and dependent variables are established. Researched items are then submitted to technical homogenization through the assistance of approved empirical weighting factors, which aim to weight the features and qualities of the data researched.

IDENTIFICATION OF THE SAMPLE S VARIABLES

Dependent variables

In order to correctly specify dependent variables, market investigation in connection with their behavior and ways in which prices are expressed (for instance, total or unit price, reference currency, payment forms) is required, as well as the homogenization of measurement units.

Independent variables

Independent variables refer to physical features (for instance, area and façade), location features (such as the district, street, avenue and distance to centers of influence, among others), and economic features (such as bid or transaction, business cycle and condition – payment in cash or in installments). Independent variables must be chosen on the basis of existing theories, knowledge acquired, common sense and other features which have revealed themselves as important during performance of our work, as some variables contemplated during research planning may have revealed themselves to be of little relevance or vice-versa. Whenever possible, adoption of quantitative variables is recommended.

UNIFICATION FACTORS NORMALLY USED IN THE REPORTS

According to Appraisal Standard NBR 14653-2:2004 of ABNT, for foundation level I to be attained, the adjustment interval acceptable for each factor or set of factors is 0.50 to 1.50. The following factors were used in this appraisal:

F1 - Bid Factor

This factor has been adopted for items under bid, bearing in mind that it normally suffers a reduction in value for the purpose of closing the deal. It varies from 0.8 to 1.0.

F2 - Transposition Factor

This factor has been adopted for the purpose of unifying researched items with the real estate under appraisal, as a function of the relative location.

F3 - Area Factor

This factor has been adopted for the purpose of unifying researched items with the real estate under appraisal, as a function of the relative area.

$F3 = (s/S)^{1/4}$ when variation between two areas is less than 30%; or

$F3 = (s/S)^{1/8}$ when variation between two areas is over 30%; Where:

s = area of researched item

S = area of real estate under appraisal

F4 - Age Factor

This factor has been adopted to unify researched items with the real estate under appraisal, as a function of the relative age.

F5 - Construction Pattern Factor

This factor has been adopted to unify researched items with the real estate under appraisal, as a function of the construction pattern.

After being unified, these values are subjected to a statistical assessment to determine the unit value to be adopted for the real estate under appraisal.

After researched items have been duly unified, Student's Percentile-T Method is adopted for assessing the possible interval with 80% confidence. Within this interval, the appraiser, at his discretion, adopts the unit value deemed appropriate. This value is multiplied by the constructed area of the real estate under appraisal, thus arriving at the value thereof.

ATTACHMENT 4

INTANGIBLE ASSETS APPRAISAL

**BRASIL TELECOM
APPRAISAL OF INTANGIBLE ASSETS**

Report: RJ-0325/09-02

The acknowledgment of the importance of intangible assets in the business world has been rapidly growing, as companies have increasingly been bought and sold due to their off-balance sheet assets.

The work of appraising intellectual property and intangible assets is not predisposed to determining a specific value with accuracy, but rather to gathering the largest possible amount of data and information about the business and its market, which analyzed and modeled jointly, should enable the appraiser to assess a probable value for the object under analysis, as a function of the specific features of the situation and purpose analyzed.

Every company has a portfolio of assets, which are responsible for the accomplishment and continuity of operations, aiming at the generation of profit which would represent a satisfactory return on invested capital. These assets are divided into three categories:

Monetary assets represented by the net current capital, which is the difference between current assets (cash, short-term investments, trade bills receivable, inventories, etc.) and current liabilities (suppliers, accounts payable, income tax, etc.).

Fixed assets (tangible) those which can be handled, that is, which have physical existence. They include machines and equipment, land, vehicles and real estate, among others;

Intangible assets and intellectual property Intangible assets are those which do not have physical existence, but provide rights and privileges to their owners. They are mainly represented by client portfolios, contracts, the relationship with clients, franchising, etc. Intellectual property generally refers to trademarks and patents, copyrights and know-how. It represents a special classification within intangible assets, as its owner is protected by law against illegal exploitation of the intellectual property by third-parties.

All approaches for appraising assets start with the principle of substitution. This principle presumes that a prudent buyer will not pay a value for a piece of property that is higher than the cost of acquisition of a substitute piece of property with the same utility.

Starting with the principle of substitution, three types of approaches have been defined, which can be used to assess the value of an intangible asset. For each appraisal, one should choose the most appropriate approach. However, more than one approach may be used jointly. They are:

The market approach it aims at comparing the assets under analysis to other similar assets which have been recently sold or are being offered for sale;

The cost approach it measures the investment required to produce similar assets which would present an identical capacity to generate benefits;

The income approach it defines the value of assets as the current value of future benefits which will result from their property rights.

AP SIS Consultoria Ltda

BRASIL TELECOM

Report: RJ-0325/09-02

APPRAISAL OF CONCESSION/AUTHORIZATION CONTRACTS

In the appraisal of the intangible assets of BrT, the methodology chosen was the income approach, recommended when an industry owns relevant contracts which guarantee long-term profitability (*Valuation of Intellectual Property and Intangible Assets - Smith, Parr*). The following relevant category of intangible operating assets can be considered in fixed telephony operation companies, such as BrT:

Public Service Concession Contract - Fixed Telephony

As to the brand value, each business segment has intangible assets with greater or lesser influence on the operations. In the case of fixed telephony, the brand does not have relevant influence on cash generation, but rather the guarantee of service exclusivity for the inhabitants of a particular region, including the assignment of the client base existent at the time the service was privatized.

For appraising the Concession Contract, we analyzed the cash flow of the fixed telephony business during the remaining useful life of the concession (17 years), on a stand-alone basis, contemplating potential synergies resulting from the acquisition process described in this report. We also added the residual value of fixed assets and working capital at the end of the concession.

After calculating the present value of this cash flow through a discount rate appropriate for the segment, we deducted tangible operating assets (working capital and fixed assets) at market prices, so as to draw out the intrinsic value of the Concession Contract, as shown on the table below:

expected rate of return	8.8%	9.0%	9.2%
ECONOMIC VALUE - BrT FIXED TELEPHONY CONCESSION (R\$ millions)			
DISCOUNTED CASH FLOW	24,866	24,536	24,213
RESIDUAL VALUE (WORKING CAPITAL and FIXED ASSETS)	6,193	6,193	6,193
DISCOUNTED RESIDUAL VALUE	1,476	1,431	1,387
OPERATING VALUE - FIXED TELEPHONY	26,343	25,967	25,600
CARRYING CHARGE - WORKING CAPITAL	(423)	(423)	(423)
CARRYING CHARGE - FIXED ASSETS AT MARKET PRICE	(11,026)	(11,026)	(11,026)
BrT FIXED TELEPHONY CONCESSION VALUE - 12/31/08	14,894	14,518	14,151
<i>amortization term (months)</i>		204	
BrT FIXED CONCESSION VALUE - 05/31/09		14,162

BRASIL TELECOM

Report: RJ-0325/09-02

APPRAISAL OF THE MOBILE TELEPHONY CLIENT PORTFOLIO

The client portfolio is the main operating intangible asset of the mobile telephony segment. The calculation of this portfolio's market value was established by the increase in the number of users between 2007 and 2008, and also by the commercial expenses per additional client in 2008. Therefore, we have derived the value of the client portfolio in 2008, which is shown and summarized below:

CLIENT PORTFOLIO VALUE - MOBILE	2006	2007	2008
TOTAL USERS (MILLIONS)	3.4	4.3	5.6
POST-PAID CLIENTS (% TOTAL)	29%	20%	17.5%
TOTAL CAPITAL RAISING EXPENSES (R\$ thousands)	432,432	454,139	525,081
CLIENT PORTFOLIO VALUE (R\$ thousands)			
USER INCREASE IN THE PERIOD (MILLIONS)		0.89	1.34
COMMERCIAL EXPENSES PER ADDITIONAL CLIENT		R\$ 512.63	R\$ 392.64
CLIENT PORTFOLIO VALUE (2008 BASE)			384,790

AP SIS Consultoria Ltda

BRASIL TELECOM

Report: RJ-0325/09-02

APPRAISAL OF BRAND AND INTERNET DOMAIN NAMES

Other intangible assets of lesser relevance are brand and internet domain names. The calculation of the values of the Brand and Internet Domain names IG, BRTURBO and IBEST were accomplished through the methodology of market multiples, where the company UOL was used as a means of comparison. The result obtained through the market multiples analysis was accomplished for the total number of broadband users and the value of the brand/domain name per each subscriber. The value found according to the adopted methodology is as follows:

VALUE OF THE BRAND AND DOMAIN NAMES IG, BRTURBO and IBEST (R\$ thousands)	116,030.43
---	------------

GLOSSARY

GLOSSARY

ASSETS APPROACH - valuation methodology in which all assets and liabilities (including unregistered ones) have their value adjusted according to their market values.

BETA - measurement of a stock systematic risk, price trend of a certain stock to be related to changes in a certain index.

BUSINESS RISK - uncertainty level for realizing future returns expected for the business, which do not result from financial leverage.

CAPITAL STRUCTURE - breakdown of the capital invested in a company, including own capital (equity) and third-party capital (indebtedness).

CAPITALIZATION - conversion of a simple period of economic benefits into value.

CAPITALIZATION RATE - any divisor used for converting economic benefits into value in a simple period.

CAPM - Capital Asset Pricing Model - model in which the cost of capital for any stock or group of stocks is equivalent to the risk-free rate added to a risk premium, provided by the systematic risk of the stock or group of stocks under analysis.

CASH FLOW - cash generated by an asset, group of assets or company during a certain period of time. Usually, such term is complemented by a qualification, depending on the context (operating, non-operating, etc)

COMPANY - commercial, industrial, service or investment entity performing an economic entity.

CONSTRUCTION EQUIVALENT AREA - constructed area on which the corresponding construction unit cost equivalence is applied, as provided by the principles of NB-140 of ABNT (Brazilian Association of Technical Rules).

CONTROL - power to direct the company's management.

CONTROLLING PREMIUM - value or percentage of a controlling stocks pro rata value over the non-controlling stocks pro rata value, which reflect controlling power.

COST OF CAPITAL - expected return rate required by the market for attracting funds for a determined investment.

CURRENT VALUE - value for replacing an existing asset for a new one, depreciated according its physical conditions.

DISCOUNT FOR LACK OF CONTROL - value or percentage deducted from the 100%-pro rata value of a company value, which reflects the lack of part or whole control.

DISCOUNT FOR LACK OF LIQUIDITY - value or percentage deducted from the 100% pro rata value of a company value, which reflects the lack of liquidity.

DISCOUNT RATE - any divisor used for converting a future economic benefit flow into present value.

EBITDA - Earnings Before Interest, Taxes, Depreciation and Amortization.

ECONOMIC BENEFIT - benefits such as revenues, net income, net cash flow, etc.

ELECTRIC DAMAGE VALUE - estimation of the cost for repairing or replacing the parts of an asset in case of electric damage. Values are scheduled in percentages of the Replacing Value and were calculated through manual analysis of the equipment and the repairing maintenance

expertise of APSIS technicians.

APSIS CONSULTORIA

1

FAIR MARKET VALUE - value for which a certain asset changes ownership between a potential seller and a potential buyer, when both parties are aware of relevant facts and none of them are under pressure to make the deal.

GOODWILL - intangible asset referring to name, reputation, client portfolio, loyalty, localization and other similar items that cannot be identified separately.

HOMOGENIZED AREA - usable, private or constructed area with mathematical treatments for valuation purposes, according to criteria set forth by APSIS, based on the real state market.

INCOME APPROACH - valuation methodology by converting to present value expected economic benefits.

INSURANCE MAXIMUM VALUE - the maximum value of an asset for which it is advisable to insure it. Such criterion establishes that the asset which depreciation is higher than 50% should have a Insurance Maximum Value equivalent to twice the Current Value; and, an asset which depreciation is lower than 50%, should have a Insurance Maximum Value equivalent to the Replacing Value.

INSURANCE VALUE - the value for which the insurance company assumes the risks, excluding land and foundations, except in special cases.

INTANGIBLE ASSETS - non-physical assets such as brands, patents, rights, contracts, industrial secrets that provide the owner with rights and values.

INTERNAL RETURN RATE - discount rate in which the present value of the future cash flow is equivalent to the investment cost.

INVESTED CAPITAL - sum of own capital and third-party capital invested in a company. Third-party capital is usually related to debts with short and long term interest to be specified in the valuation context.

INVESTED CAPITAL CASH FLOW - cash flow generated by the company to be reverted to financiers (interests and amortizations) and shareholders (dividends) after operating costs and expenses and capital expenditures.

INVESTMENT VALUE - value for a particular investor, based on particular interests for a certain asset such as synergy with other companies of a investor, different perceptions of risk and future performances, etc.

ISSUE DATE - date on which the valuation report is issued, when valuation conclusions are presented to the client.

LEVERAGED BETA - beta value reflecting the indebtedness in the capital structure.

LIQUIDATION VALUE - the value of a sale in the market, out of its original productive process. In other words, it is the value that would be verified in case the asset was deactivated and put up for sale separately, considering costs of disassembly or demolition (in case of real estate), storage and transportation.

LIQUIDITY - capacity to rapidly convert a certain asset into cash or into a debt payment.

MARKET APPROACH - valuation methodology, which utilizes multiples that result from the sale price of similar assets.

MARKET NET EQUITY - see assets approach.

MULTIPLE - market value of a company, stock or invested capital, divided by a company's measurement (revenues, income, client volume, etc.).

NON-OPERATING ASSETS - assets that are not directly related to the company operating activity (whether they generate revenue or not) and that may be sold without affecting its operation.

AP SIS CONSULTORIA

2

OPERATING ASSETS assets that are necessary for the company's operations.

PERPETUITY VALUE value at the end of the projective period to be added to the cash flow.

PRESENT VALUE value of a future economic benefit on a specific date, calculated by the application of a discount rate.

PRIVATE AREA usable area including building elements (such as walls, columns, etc.) and elevators hall (in some cases).

REFERENCE DATE specific date (day, month and year) to apply the valuation.

RESIDUAL VALUE the value of a new or old asset projected for a certain date, limited to the date on which such asset turns into scrap, considering that during such period of time, the asset will be operating.

REPLACING VALUE (FOR A NEW ASSET) value based on the price (usually at market current prices) or replacing an asset for a new equal or similar one.

SCRAP VALUE the asset value at the end of its useful life, considering its disassembly or demolition value (in case of real estate), storage and transportation.

SUPPORTING DOCUMENTATION discount rate is a return rate used to convert into present value a payable or receivable amount.

TANGIBLE ASSETS physical assets such as lands, constructions, machines and equipment, furniture and appliances, etc.

USEFUL AREA usable area of real estate, measured by the internal face of its walls.

USEFUL LIFE period of time during which an asset may generate economic benefits

VALUATION act or process through which the value of a company, stock interest or other asset is determined.

VALUATION METHODOLOGY the approaches used for preparing value calculations in order to indicate the value of a company, stock interest or other asset.

VALUE price denominated in monetary quantity.

WACC (Weighted Average Cost of Capital) model in which the cost of capital is determined by the weighted average of the value.
