SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

x **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended September 30, 2011

OR

.. **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from to

Commission File Number 001-35077

WINTRUST FINANCIAL CORPORATION

(Exact name of registrant as specified in its charter)

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

Illinois
(State of incorporation
or organization)

36-3873352
(I.R.S. Employer
Identification No.)

727 North Bank Lane

Lake Forest, Illinois 60045

(Address of principal executive offices)

(847) 615-4096

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Common Stock no par value, 35,934,784 shares, as of November 2, 2011

WINTRUST FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(1) Basis of Presentation

The consolidated financial statements of Wintrust Financial Corporation and Subsidiaries (Wintrust or the Company) presented herein are unaudited, but in the opinion of management reflect all necessary adjustments of a normal or recurring nature for a fair presentation of results as of the dates and for the periods covered by the consolidated financial statements.

The accompanying consolidated financial statements are unaudited and do not include information or footnotes necessary for a complete presentation of financial condition, results of operations or cash flows in accordance with U.S. generally accepted accounting principles. The consolidated financial statements should be read in conjunction with the consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2010 (2010 Form 10-K). Operating results reported for the three-month and year-to-date periods are not necessarily indicative of the results which may be expected for the entire year. Reclassifications of certain prior period amounts have been made to conform to the current period presentation.

The preparation of the financial statements requires management to make estimates, assumptions and judgments that affect the reported amounts of assets and liabilities. Management believes that the estimates made are reasonable, however, changes in estimates may be required if economic or other conditions develop differently from management's expectations. Certain policies and accounting principles inherently have a greater reliance on the use of estimates, assumptions and judgments and as such have a greater possibility of producing results that could be materially different than originally reported. Management views critical accounting policies to be those which are highly dependent on subjective or complex judgments, estimates and assumptions, and where changes in those estimates and assumptions could have a significant impact on the financial statements. Management currently views the determination of the allowance for loan losses, covered loan losses, and losses on lending-related commitments, estimations of fair value, the valuations required for impairment testing of goodwill, the valuation and accounting for derivative instruments and income taxes as the accounting areas that require the most subjective and complex judgments, and as such could be the most subject to revision as new information becomes available. Descriptions of our significant accounting policies are included in Note 1 Summary of Significant Accounting Policies of the Company's 2010 Form 10-K.

(2) Recent Accounting Developments

Goodwill Impairment Testing

In September 2011, the FASB issued ASU No. 2011-08, Intangibles—Goodwill and Other (Topic 350): Testing Goodwill for Impairment, which presents a qualitative approach to test goodwill for impairment. This ASU provides entities the option to assess qualitative factors to determine if impairment of goodwill exists. If examination of the qualitative factors yields a determination that it is not more likely than not that impairment exists, then it is not necessary for the Company to perform the two-step impairment test. This guidance is effective for fiscal periods beginning after December 15, 2011. As this guidance primarily seeks to simplify goodwill impairment testing, the Company does not expect adoption of this new guidance to have a material impact on its consolidated financial statements.

Presentation of Comprehensive Income

In June 2011, the FASB issued ASU No. 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income, which amends the presentation formats permitted for reporting other comprehensive income. This ASU no longer allows other comprehensive income to be presented as part of the statement of changes in stockholder's equity. Entities must present other comprehensive income and its components in a single statement along with net income or in a separate, consecutive statement of other comprehensive income. This guidance is effective for fiscal and interim periods beginning after December 15, 2011. However, in October 2011, the FASB proposed to defer one of the standard's provisions which requires companies to present reclassification adjustments for each component of other comprehensive income in both net income and other comprehensive income on the face of the financial statements. This deferral does not change the requirement to present items of net income, other comprehensive income and total comprehensive income in either a continuous statement or consecutive statements as of the effective date noted above. Upon adoption of ASU No. 2011-05, the Company will present comprehensive income in accordance with the above guidance.

Amended Guidance for Fair Value Measurement and Disclosure

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

In May 2011, the FASB issued ASU No. 2011-04, Fair Value Measurements (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS, which amends the language used to describe U.S. GAAP requirements for measuring fair value and for disclosing information about fair value measurements. The amended language seeks to clarify the application of existing guidance as well as change the measurement and disclosure of a few specific items. The principles

Table of Contents

changed include measurement of financial instruments that are managed within a portfolio and application of premiums and discounts in fair value measurement. The new guidance will also require additional disclosures including expanded disclosures for measurements categorized within level three, disclosures for nonfinancial assets at fair value and disclosure displaying the fair value hierarchy by level for items in the statement of financial position that are not measured at fair value but for which a fair value is required to be disclosed. The guidance is effective during interim and annual periods beginning after December 15, 2011. The Company is currently evaluating the impact of adopting this new guidance on the consolidated financial statements.

Changes to the Effective Control Assessment in Accounting for Transfers

In April 2011, the FASB issued ASU No. 2011-03, *Transfers and Servicing (Topic 860): Reconsideration of Effective Control for Repurchase Agreements*, which amends the criteria used to determine when an entity may or may not recognize a sale upon the transfer of financial assets subject to repurchase agreements. The changes presented in this ASU are intended to improve the accounting for these transactions by removing the criterion requiring the transferor to have the ability to repurchase or redeem the transferred financial assets from the assessment of effective control. The guidance in this update is effective for the first interim or annual period beginning on or after December 15, 2011 and should be applied prospectively. The Company is currently evaluating the impact of adopting this new guidance on the consolidated financial statements.

Credit Quality Disclosures of Financing Receivables and Allowance for Credit Losses

In July 2010, the FASB issued ASU No. 2010-20, *Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*, which required more information in disclosures related to the credit quality of financing receivables and the credit reserves held against them. This guidance required the Company to provide a greater level of disaggregated information about the credit quality of the Company's loans and the allowance for loan losses as well as to disclose additional information related to credit quality indicators, past due information, and impaired loans. This ASU also included disclosure requirements for information related to loans modified in a troubled debt restructuring, however these disclosures were deferred in January 2011 upon FASB's issuance of ASU No. 2011-01 *Receivables (Topic 310): Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings* in update No. 2010-20 to become effective for reporting periods beginning on or after June 15, 2011. All other provisions of ASU 2010-20, except for the summary of activity in the allowance for credit losses by loan portfolio, were effective for the Company's reporting period ending on or after December 15, 2010. Although not required, the Company disclosed the summary of activity in the allowance for credit losses for the year ending December 31, 2010. Additional credit quality disclosures are included in our consolidated financial statements to provide disaggregated information with respect to the Company's loan portfolio and the allowance for loan losses. See Item 2 - Loan Portfolio and Asset Quality for further detail.

Determination of a Troubled Debt Restructuring

In April 2011, the FASB issued ASU No. 2011-02, *Receivables (Topic 310): A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring*, which sought to clarify guidance used to evaluate troubled debt restructurings resulting in consistent application of U.S. GAAP. The update provided guidance to evaluate what is considered to be an economic concession as well as circumstances which indicate that a debtor is experiencing financial difficulties. The effective periods for application of the amendments in this update were interim and annual periods beginning on or after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. As such this new guidance was adopted effective July 1, 2011 and did not result in a significant change to the Company's troubled debt restructuring determination process or have a material impact on its consolidated financial statements.

(3) Business Combinations*FDIC-Assisted Transactions*

Since April 2010, the Company has acquired the banking operations, including the acquisition of certain assets and the assumption of liabilities, of six financial institutions in FDIC-assisted transactions.

The following table presents details related to these transactions:

(Dollars in thousands)	Lincoln Park	Wheatland	Ravenswood	Community First Bank - Chicago	The Bank of Commerce	First Chicago
Date of acquisition	April 23, 2010	April 23, 2010	August 6, 2010	February 4, 2011	March 25, 2011	July 8, 2011

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

Fair value of assets acquired, at the acquisition date	\$	157,078	\$	343,870	\$	173,919	\$	50,891	\$	173,986	\$	768,873
Fair value of loans acquired, at the acquisition date		103,420		175,277		97,956		27,332		77,887		330,203
Fair value of liabilities assumed, at the acquisition date		192,018		415,560		122,943		49,779		168,472		741,508

Table of Contents

Loans comprise the majority of the assets acquired in these transactions and are subject to loss sharing agreements with the FDIC whereby the FDIC has agreed to reimburse the Company for 80% of losses incurred on the purchased loans, other real estate owned (OREO), and certain other assets. Additionally, the loss share agreements with the FDIC require the Company to reimburse the FDIC in the event that actual losses on covered assets are lower than the original loss estimates agreed upon with the FDIC with respect of such assets in the loss share agreements. The Company refers to the loans subject to these loss-sharing agreements as covered loans and use the term covered assets to refer to covered loans, covered OREO and certain other covered assets. At their respective acquisition dates, the Company estimated the fair value of the reimbursable losses to be approximately \$273.3 million for the First Chicago Bank & Trust (First Chicago) acquisition, \$48.9 million for The Bank of Commerce (TBOC) acquisition and \$6.7 million for the Community First Bank-Chicago (CFBC) acquisition. For the three acquisitions subject to loss share agreements in 2010, the Company estimated the fair value of the reimbursable losses to be approximately \$44.0 million for the Ravenswood acquisition, and \$113.8 million for the Lincoln Park and Wheatland acquisitions. The agreements with the FDIC require that the Company follow certain servicing procedures or risk losing the FDIC reimbursement of covered asset losses.

The loans covered by the loss sharing agreements are classified and presented as covered loans and the estimated reimbursable losses are recorded as an FDIC indemnification asset in the Consolidated Statements of Condition. The Company recorded the acquired assets and liabilities at their estimated fair values at the acquisition date. The fair value for loans reflected expected credit losses at the acquisition date. Therefore, the Company will only recognize a provision for credit losses and charge-offs on the acquired loans for any further credit deterioration. See Note 7 Allowance for Loan Losses, Allowance for Losses on Lending-Related Commitments and Impaired Loans for further discussion of the allowance on covered loans. These transactions resulted in bargain purchase gains of a total of \$38.0 million in 2011, including \$27.4 million for First Chicago, \$8.6 million for TBOC and \$2.0 million for CFBC, and are shown as a component of non-interest income on the Company's Consolidated Statements of Income. In 2010, FDIC-assisted transactions resulted in bargain purchase gains of a total of \$33.3 million, including \$6.8 million for Ravenswood, \$22.3 million for Wheatland, and \$4.2 million for Lincoln Park.

As stated above, in conjunction with FDIC-assisted transactions, the Company entered into loss share agreements with the FDIC. These agreements cover realized losses on loans, foreclosed real estate and certain other assets. These loss share assets are measured separately from the loan portfolios because they are not contractually embedded in the loans and are not transferable with the loans should the Company choose to dispose of them. Fair values at the acquisition dates were estimated based on projected cash flows available for loss-share based on the credit adjustments estimated for each loan pool and the loss share percentages. The loss share assets are also separately measured from the related loans and foreclosed real estate and recorded as FDIC indemnification assets on the Consolidated Statements of Condition. Subsequent to the acquisition date, reimbursements received from the FDIC for actual incurred losses will reduce the loss share assets. Reductions to expected losses, to the extent such reductions to expected losses are the result of an improvement to the actual or expected cash flows from the covered assets, will also reduce the loss share assets. Additions to expected losses, will require an increase to the allowance for loan losses, and a corresponding increase to the loss share assets.

The following table summarizes the activity in the Company's FDIC indemnification asset during the periods indicated:

(Dollars in thousands)	Three Months Ended		Nine Months Ended	
	September 30, 2011	September 30, 2010	September 30, 2011	September 30, 2010
Balance at beginning of period	\$ 110,049	\$ 114,102	\$ 118,182	\$ 118,182
Additions	277,018	47,028	337,616	160,795
Accretion	393	530	1,057	865
Expected reimbursements from the FDIC for changes in expected credit losses	(344)		(12,508)	
Payments received from the FDIC	(7,810)	(20)	(65,041)	(20)
Balance at end of period	\$ 379,306	\$ 161,640	\$ 379,306	\$ 161,640

Other Bank Acquisitions

On September 30, 2011, the Company acquired Elgin State Bancorp, Inc. (ESBI). ESBI was the parent company of Elgin State Bank, which operated three banking locations in Elgin, Illinois. As part of this transaction, Elgin State Bank was merged into the Company's wholly-owned subsidiary bank, St. Charles Bank & Trust Company (St. Charles). St. Charles acquired assets with a fair value of approximately \$263.2 million, including \$145.7 million of loans, and assumed liabilities with a fair value of approximately \$248.4 million, including \$241.1 million of deposits. Additionally, the Company recorded goodwill of \$3.8 million on the acquisition. Certain purchase price allocations for ESBI, such as

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

the fair value of loans, are preliminary. The final allocation is not expected to result in material changes.

On October 22, 2010, Wheaton Bank and Trust Company (Wheaton Bank) acquired a branch from an unaffiliated bank that is located in Naperville, Illinois. The acquired operations are operating as Naperville Bank & Trust. Wheaton Bank acquired assets with a fair value of approximately \$22.9 million, including \$10.7 million of loans, and assumed liabilities with a fair value of approximately \$22.9 million, including \$22.8 million of deposits. The Company recorded goodwill of \$1.7 million on the acquisition.

Table of Contents

Wealth Management Acquisition

On July 1, 2011, the Company acquired Great Lakes Advisors, Inc. (Great Lakes Advisors), a Chicago-based investment manager with approximately \$2.4 billion in assets under management. The Company acquired assets with a fair value of approximately \$24.8 million and assumed liabilities with a fair value of approximately \$7.6 million. The Company recorded goodwill of \$15.2 million on the acquisition. Certain purchase price allocations for Great Lakes Advisors are preliminary. The final allocation is not expected to result in material changes.

Mortgage Banking Acquisitions

On April 13, 2011, the Company acquired certain assets and assumed certain liabilities of the mortgage banking business of River City Mortgage, LLC (River City) of Bloomington, Minnesota. Licensed to originate loans in five states, and with offices in Minnesota, Nebraska and North Dakota, River City originated nearly \$500 million in mortgage loans in 2010.

On February 3, 2011, the Company acquired certain assets and assumed certain liabilities of the mortgage banking business of Woodfield Planning Corporation (Woodfield) of Rolling Meadows, Illinois. With offices in Rolling Meadows, Illinois and Crystal Lake, Illinois, Woodfield originated approximately \$180 million in mortgage loans in 2010.

Purchased loans with evidence of credit quality deterioration since origination

Purchased loans acquired in a business combination are recorded at estimated fair value on their purchase date. Expected future cash flows at the purchase date in excess of the fair value of loans are recorded as interest income over the life of the loans if the timing and amount of the future cash flows is reasonably estimable (accretable yield). The difference between contractually required payments and the cash flows expected to be collected at acquisition is referred to as the non-accretable difference and represents probable losses in the portfolio.

In determining the acquisition date fair value of purchased impaired loans, and in subsequent accounting, the Company aggregates these purchased loans into pools of loans with common risk characteristics. Subsequent to the purchase date, increases in cash flows over those expected at the purchase date are recognized as interest income prospectively. Subsequent decreases to the expected cash flows will generally result in a provision for loan losses.

The Company purchased a portfolio of life insurance premium finance receivables in 2009. These purchased life insurance premium finance receivables are valued on an individual basis with the accretable component being recognized into interest income using the effective yield method over the estimated remaining life of the loans. The non-accretable portion is evaluated each quarter and if the loans credit related conditions improve, a portion is transferred to the accretable component and accreted over future periods. In the event a specific loan prepays in whole, any remaining accretable and non-accretable discount is recognized in income immediately. If credit related conditions deteriorate, an allowance related to these loans will be established as part of the provision for credit losses.

See Note 6 Loans, for more information on loans acquired with evidence of credit quality deterioration since origination.

(4) Cash and Cash Equivalents

For purposes of the Consolidated Statements of Cash Flows, the Company considers cash and cash equivalents to include cash on hand, cash items in the process of collection, non-interest bearing amounts due from correspondent banks, federal funds sold and securities purchased under resale agreements with original maturities of three months or less.

Table of Contents**(5) Available-for-sale Securities**

Table of Contents

The Company conducts a regular assessment of its investment securities to determine whether securities are other-than-temporarily impaired considering, among other factors, the nature of the securities, credit ratings or financial condition of the issuer, the extent and duration of the unrealized loss, expected cash flows, market conditions and the Company's ability to hold the securities through the anticipated recovery period.

The Company does not consider securities with unrealized losses at September 30, 2011 to be other-than-temporarily impaired. The Company does not intend to sell these investments and it is more likely than not that the Company will not be required to sell these investments before recovery of the amortized cost bases, which may be the maturity dates of the securities. The unrealized losses within each category have occurred as a result of changes in interest rates, market spreads and market conditions subsequent to purchase. Securities with continuous unrealized losses existing for more than twelve months were primarily corporate securities of financial issuers. The corporate securities of financial issuers in this category were comprised of three trust-preferred securities with high investment grades. These obligations have interest rates significantly below the rates at which these types of obligations are currently issued, and have maturity dates in 2027. Although they are currently callable by the issuers, it is unlikely that they will be called in the near future as the interest rates are very attractive to the issuers. A review of the issuers indicated that they have recently raised equity capital and/or have strong capital ratios. The Company does not own any pooled trust-preferred securities.

The following table provides information as to the amount of gross gains and gross losses realized and proceeds received through the sales of available-for-sale investment securities:

(Dollars in thousands)	Three Months Ended September 30, 2011		Nine Months Ended September 30, 2010	
	2011	2010	2011	2010
Realized gains	\$ 292	\$ 9,236	\$ 1,550	\$ 9,785
Realized losses	(67)	(1)	(67)	(112)
Net realized gains	\$ 225	\$ 9,235	\$ 1,483	\$ 9,673
Other than temporary impairment charges				
Gains on available- for-sale securities, net	\$ 225	\$ 9,235	\$ 1,483	\$ 9,673
Proceeds from sales of available-for-sale securities	\$ 551,515	\$ 357,808	\$ 605,026	\$ 628,462

The amortized cost and fair value of securities as of September 30, 2011 and December 31, 2010, by contractual maturity, are shown in the following table. Contractual maturities may differ from actual maturities as borrowers may have the right to call or repay obligations with or without call or prepayment penalties. Mortgage-backed securities are not included in the maturity categories in the following maturity summary as actual maturities may differ from contractual maturities because the underlying mortgages may be called or prepaid without penalties:

(Dollars in thousands)	September 30, 2011		December 31, 2010	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	\$ 139,866	\$ 140,056	\$ 647,494	\$ 647,987
Due in one to five years	601,962	602,226	309,795	310,663
Due in five to ten years	116,716	118,788	194,442	185,938
Due after ten years	89,419	91,033	147,835	149,782
Mortgage-backed	258,605	272,547	151,711	161,681
Other equity securities	42,983	43,032	40,636	40,251
Total available-for-sale securities	\$ 1,249,551	\$ 1,267,682	\$ 1,491,913	\$ 1,496,302

At September 30, 2011 and December 31, 2010, securities having a carrying value of \$1.1 billion and \$876 million, respectively, which include securities traded but not yet settled, were pledged as collateral for public deposits, trust deposits, FHLB advances, securities sold under repurchase agreements and derivatives. At September 30, 2011, there were no securities of a single issuer, other than U.S. Government-sponsored agency securities, which exceeded 10% of shareholders' equity.

Table of Contents**(6) Loans**

The following table shows the Company's loan portfolio by category as of the dates shown:

(Dollars in thousands)	September 30, 2011	December 31, 2010	September 30, 2010
Balance:			
Commercial	\$ 2,337,098	\$ 2,049,326	\$ 1,952,791
Commercial real-estate	3,465,321	3,338,007	3,331,498
Home equity	879,180	914,412	919,824
Residential real-estate	326,207	353,336	342,009
Premium finance receivables - commercial	1,417,572	1,265,500	1,323,934
Premium finance receivables - life insurance	1,671,443	1,521,886	1,434,994
Indirect consumer	62,452	51,147	56,575
Consumer and other	113,438	106,272	99,530
Total loans, net of unearned income, excluding covered loans	\$ 10,272,711	\$ 9,599,886	\$ 9,461,155
Covered loans	680,075	334,353	353,840
Total loans	\$ 10,952,786	\$ 9,934,239	\$ 9,814,995
Mix:			
Commercial	21%	21%	20%
Commercial real-estate	32	34	34
Home equity	8	9	9
Residential real-estate	3	3	3
Premium finance receivables - commercial	13	13	13
Premium finance receivables - life insurance	15	15	15
Indirect consumer	1	1	1
Consumer and other	1	1	1
Total loans, net of unearned income, excluding covered loans	94%	97%	96%
Covered loans	6	3	4
Total loans	100%	100%	100%

Certain premium finance receivables are recorded net of unearned income. The unearned income portions of such premium finance receivables were \$36.4 million at September 30, 2011, \$32.3 million at December 31, 2010 and \$34.8 million at September 30, 2010. Certain life insurance premium finance receivables attributable to the life insurance premium finance loan acquisition in 2009 as well as the covered loans acquired in the FDIC-assisted acquisitions during 2010 and 2011 are recorded net of credit discounts. See [Acquired Loan Information at Acquisition](#) below.

Indirect consumer loans include auto, boat and other indirect consumer loans. Total loans, excluding loans acquired with evidence of credit quality deterioration since origination, include net deferred loan fees and costs and fair value purchase accounting adjustments totaling \$13.5 million at September 30, 2011, \$12.5 million at December 31, 2010 and \$12.6 million at September 30, 2010.

The Company's loan portfolio is generally comprised of loans to consumers and small to medium-sized businesses located within the geographic market areas that the Company serves. The premium finance receivables portfolios are made to customers on a national basis and the majority of the indirect consumer loans were generated through a network of local automobile dealers. As a result, the Company strives to maintain a loan portfolio that is diverse in terms of loan type, industry, borrower and geographic concentrations. Such diversification reduces the exposure to economic downturns that may occur in different segments of the economy or in different industries.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

It is the policy of the Company to review each prospective credit in order to determine the appropriateness and, when required, the adequacy of security or collateral necessary to obtain when making a loan. The type of collateral, when required, will vary from liquid assets to real estate. The Company seeks to ensure access to collateral, in the event of default, through adherence to state lending laws and the Company's credit monitoring procedures.

Acquired Loan Information at Acquisition – Loans with evidence of credit quality deterioration since origination

As part of our acquisition of a portfolio of life insurance premium finance loans in 2009 as well as the bank acquisitions in 2010 and 2011, we acquired loans for which there was evidence of credit quality deterioration since origination and we determined that it was probable that the Company would be unable to collect all contractually required principal and interest payments.

Table of Contents

The following table presents the unpaid principal balance and carrying value for these acquired loans:

(Dollars in thousands)	September 30, 2011		December 31, 2010	
	Unpaid Principal Balance	Carrying Value	Unpaid Principal Balance	Carrying Value
Bank acquisitions	978,920	603,374	432,566	331,295
Life insurance premium finance loans acquisition	672,999	635,776	752,129	695,587

For the loans acquired as a result of acquisitions during the nine months ended September 30, 2011, the following table provides estimated details on these loans at the date of each acquisition:

(Dollars in thousands)	The Bank of Commerce	Community First Bank - Chicago	First Chicago	Elgin State Bank
	Contractually required payments including interest	\$ 127,122	\$ 22,178	\$ 564,346
Less: Nonaccretable difference	56,257	6,313	321,117	12,733
Cash flows expected to be collected ⁽¹⁾	70,865	15,865	243,229	66,570
Less: Accretable yield	4,414	688	20,132	4,563
Fair value of loans acquired with evidence of credit quality deterioration since origination	\$ 66,451	\$ 15,177	\$ 223,097	\$ 62,007

(1) Represents undiscounted expected principal and interest cash flows at acquisition.

See Note 7 Allowance for Loan Losses, Allowance for Losses on Lending-Related Commitments and Impaired Loans for further discussion regarding the allowance for loan losses associated with the covered loan portfolio at September 30, 2011.

Accretable Yield Activity

Changes in expected cash flows may vary from period to period as the Company periodically updates its cash flow model assumptions. The factors that most significantly affect the estimates of gross cash flows expected to be collected, and accordingly the accretable yield, include changes in the benchmark interest rate indices for variable-rate products and changes in prepayment assumptions. The following table provides activity for the accretable yield of loans acquired with evidence of credit quality deterioration since origination:

(Dollars in thousands)	Three Months Ended September 30, 2011		Nine Months Ended September 30, 2011	
	Bank Acquisitions	Life Insurance Premium Finance Loans	Bank Acquisitions	Life Insurance Premium Finance Loans
Accretable yield, beginning balance	\$ 80,748	\$ 24,891	\$ 39,809	\$ 33,315
Acquisitions	24,695		31,802	
Accretable yield amortized to interest income	(14,187)	(5,127)	(41,914)	(19,301)
Reclassification from non-accretable difference	2,145		52,820	3,857
Increases (decreases) in interest cash flows due to payments and changes in interest rates	(6,904)	432	3,980	2,325

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

Accretable yield, ending balance	\$ 86,497	\$ 20,196	\$ 86,497	\$ 20,196

(1) Purchased loans represent loans acquired with evidence of credit quality deterioration since origination, in accordance with ASC 310-30. Loan agings are based upon contractually required payments.

Our ability to manage credit risk depends in large part on our ability to properly identify and manage problem loans. To do so, we operate a credit risk rating system under which our credit management personnel assign a credit risk rating (1 to 10 rating) to each loan at the time of origination and review loans on a regular basis.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

Each loan officer is responsible for monitoring his or her loan portfolio, recommending a credit risk rating for each loan in his or her portfolio and ensuring the credit risk ratings are appropriate. These credit risk ratings are then ratified by the bank's chief credit officer and/or concurrence credit officer. Credit risk ratings are determined by evaluating a number of factors including: a borrower's financial strength, cash flow coverage, collateral protection and guarantees.

The Company's Problem Loan Reporting system automatically includes all loans with credit risk ratings of 6 through 9. This system is designed to provide an on-going detailed tracking mechanism for each problem loan. Once management determines that a loan has deteriorated to a point where it has a credit risk rating of 6 or worse, the Company's Managed Asset Division performs an overall credit and collateral review. As part of this review, all underlying collateral is identified and the valuation methodology is analyzed and tracked. As a result of this initial review by the Company's Managed Asset Division, the credit risk rating is reviewed and a

Table of Contents

portion of the outstanding loan balance may be deemed uncollectible or an impairment reserve may be established. The Company's impairment analysis utilizes an independent re-appraisal of the collateral (unless such a third-party evaluation is not possible due to the unique nature of the collateral, such as a closely-held business or thinly traded securities). In the case of commercial real estate collateral, an independent third party appraisal is ordered by the Company's Real Estate Services Group to determine if there has been any change in the underlying collateral value. These independent appraisals are reviewed by the Real Estate Services Group and sometimes by independent third party valuation experts and may be adjusted depending upon market conditions.

Through the credit risk rating process, loans are reviewed to determine if they are performing in accordance with the original contractual terms. If the borrower has failed to comply with the original contractual terms, further action may be required by the Company, including a downgrade in the credit risk rating, movement to non-accrual status, a charge-off or the establishment of a specific impairment reserve. If we determine that a loan amount, or portion thereof, is uncollectible the loan's credit risk rating is immediately downgraded to an 8 or 9 and the uncollectible amount is charged-off. Any loan that has a partial charge-off continues to be assigned a credit risk rating of an 8 or 9 for the duration of time that a balance remains outstanding. The Company undertakes a thorough and ongoing analysis to determine if additional impairment and/or charge-offs are appropriate and to begin a workout plan for the credit to minimize actual losses.

If, based on current information and events, it is probable that the Company will be unable to collect all amounts due to it according to the contractual terms of the loan agreement, a specific impairment reserve is established. In determining the appropriate charge-off for collateral-dependent loans, the Company considers the results of appraisals for the associated collateral.

Non-performing loans include all non-accrual loans (8 and 9 risk ratings) as well as loans 90 days past due and still accruing interest, excluding loans acquired with evidence of credit quality deterioration since origination. The remainder of the portfolio not classified as non-performing are considered performing under the contractual terms of the loan agreement. The following table presents the recorded investment based on performance of loans by class, excluding covered loans, per the most recent analysis at September 30, 2011, December 31, 2010, and September 30, 2010:

(Dollars in thousands)	Performing			Non-performing			Total

Table of Contents

A summary of activity in the allowance for covered loan losses for the three months and nine months ended September 30, 2011 and 2010 is as follows:

(Dollars in thousands)	Three Months Ended		Nine Months Ended	
	September 30, 2011	September 30, 2010	September 30, 2011	September 30, 2010
Balance at beginning of period	\$ 7,443	\$	\$	\$
Provision for covered loan losses before benefit attributable to FDIC loss share agreements	5,139		12,582	
Benefit attributable to FDIC loss share agreements	(4,112)		(10,066)	
Net provision for covered loan losses	1,027		2,516	
Increase in FDIC indemnification asset	4,112		10,064	
Loans charged-off	(88)		(88)	
Recoveries of loans charged-off			2	
Net charge-offs	(88)		(86)	
Balance at end of period	\$ 12,494	\$	\$ 12,494	\$

In conjunction with FDIC-assisted transactions, the Company entered into loss share agreements with the FDIC. Additional expected losses, to the extent such expected losses result in the recognition of an allowance for loan losses, will increase the loss share assets. The allowance for loan losses for loans acquired in FDIC-assisted transactions is determined without giving consideration to the amounts recoverable through loss share agreements (since the loss share agreements are separately accounted for and thus presented gross on the balance sheet). On the Consolidated Statements of Income, the provision for credit losses is reported net of changes in the amount recoverable under the loss share agreements. Reductions to expected losses, to the extent such reductions to expected losses are the result of an improvement to the actual or expected cash flows from the covered assets, will reduce the loss share assets. Additions to expected losses will require an increase to the allowance for loan losses, and a corresponding increase to the loss share assets.

Impaired Loans

A summary of impaired loans, including restructured loans, is as follows:

(Dollars in thousands)	September 30, 2011	December 31, 2010	September 30, 2010
Impaired loans (included in non-performing and restructured loans):			
Impaired loans with an allowance for loan loss required ⁽²⁾	\$ 83,191	\$ 115,381	\$ 89,338
Impaired loans with no allowance for loan loss required	120,379	86,893	97,371
Total impaired loans ⁽¹⁾	\$ 203,570	\$ 202,274	\$ 186,709
Allowance for loan losses related to impaired loans	\$ 28,447	\$ 30,626	\$ 27,289
Restructured loans	\$ 104,392	\$ 101,190	\$ 93,666

(1) Impaired loans are considered by the Company to be non-accrual loans, restructured loans or loans with principal and/or interest at risk, even if the loan is current with all payments of principal and interest.

- (2) *These impaired loans require an allowance for loan losses because the estimated fair value of the loans or related collateral is less than the recorded investment in the loans.*

Restructured Loans

At September 30, 2011, the Company had \$104.4 million in loans with modified terms. The \$104.4 million in modified loans represents 136 credit relationships in which economic concessions were granted to certain borrowers to better align the terms of their loans with their current ability to pay.

The Company's approach to restructuring loans is built on its credit risk rating system which requires credit management personnel to assign a credit risk rating to each loan. In each case, the loan officer is responsible for recommending a credit risk rating for each loan and ensuring the credit risk ratings are appropriate. These credit risk ratings are then reviewed and approved by the bank's chief credit officer and/or concurrence credit officer. Credit risk ratings are determined by evaluating a number of factors including a borrower's financial strength, cash flow coverage, collateral protection and guarantees. The Company's credit risk rating scale is one through ten with higher scores indicating higher risk. In the case of loans rated six or worse following modification, the Company's Managed Assets Division evaluates the loan and the credit risk rating and determines that the loan has been restructured to be reasonably assured of repayment and of performance according to the modified terms and is supported by a current, well-documented credit assessment of the borrower's financial condition and prospects for repayment under the revised terms.

A modification of a loan with an existing credit risk rating of six or worse or a modification of any other credit, which will result in a restructured credit risk rating of six or worse must be reviewed for troubled debt restructuring (TDR) classification. In that event, our Managed Assets Division conducts an overall credit and collateral review. A modification of a loan is considered to be a TDR if both (1) the borrower is experiencing financial difficulty and (2) for economic or legal reasons, the bank grants a concession to a borrower that it would not otherwise consider. The modification of a loan where the credit risk rating is five or better both before and after such modification are not reviewed for TDR status. Based on the Company's credit risk rating system, it considers that borrowers whose credit risk rating is five or better are not experiencing financial difficulties and therefore, are not considered TDRs.

TDRs are reviewed at the time of modification and on a quarterly basis to determine if a specific reserve is needed. The carrying amount of the loan is compared to the expected payments to be received, discounted at the loan's original rate, or for collateral dependent loans, to the fair value of the collateral. Any shortfall is recorded as a specific reserve.

All credits determined to be a TDR will continue to be classified as a TDR in all subsequent periods, unless the borrower has been in compliance with the loan's modified terms for a period of six months (including over a calendar year-end) and the modified interest rate represented a market rate at the time of a restructuring. Additionally, before removing a loan from TDR classification, a review of the current or previously measured impairment on the loan and any concerns related to future performance by the borrower is conducted. If concerns exist about the future ability of the borrower to meet its obligations under the loans based on a credit review by the Managed Assets Division, the TDR classification is not removed from the loan.

Each restructured loan was reviewed for collateral impairment at September 30, 2011 and approximately \$6.3 million of collateral impairment was present and appropriately reserved for through the Company's normal reserving methodology in the Company's allowance for loan losses.

Table of Contents

The tables below present a summary of the post-modification balance of loans restructured during the three months ended September 30, 2011 and 2010, which represent a troubled debt restructuring:

Three months ended September 30, 2011	Total ⁽¹⁾		Extension at Below Market Terms		Reduction of Interest Rate		Modification to Interest-only Payments		Forgiveness of Debt	
	Count	Balance	Count	Balance	Count	Balance	Count	Balance	Count	Balance
(Dollars in thousands)

(1) Restructured loans may have more than one modification representing a concession. As such, restructured loans during the period may be represented in more than one of the categories noted above.

During the three months ended September 30, 2011, \$13.5 million, or 26 loans, were determined to be troubled debt restructurings, compared to \$24.1 million, or 31 loans, in the same period of 2010. Of these loans extended at below market terms, the weighted average extension had a term of approximately 14 months during 2011 compared to 15 months in 2010. Further, the weighted average decrease in the stated interest rate

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

for loans with a reduction of interest rate during the period was approximately 201 basis points and 153 basis points during the three months ending September 30, 2011 and 2010, respectively. Interest-only payment terms were approximately 11 months during the same period in 2011 and 2010. Additionally, no principal balances were forgiven during the third quarter of 2011, compared to \$1.2 million forgiven during the third quarter of 2010.

Table of Contents

The tables below present a summary of the post-modification balance of loans restructured during the nine months ended September 30, 2011 and 2010, which represent a troubled debt restructuring:

Nine months ended September 30, 2011

(1) Restructured loans may have more than one modification representing a concession. As such, restructured loans during the period may be represented in more than one of the categories noted above.

During the nine months ended September 30, 2011, \$56.0 million, or 70 loans, were determined to be troubled debt restructurings, compared to \$80.0 million, or 91 loans, in the same period of 2010. Of these loans extended at below market terms, the weighted average extension had a term of approximately 10 months during that period in 2011 compared to 13 months in 2010. Further, the weighted average decrease in the stated interest rate for loans with a reduction of interest rate during the period was approximately 201 basis points and 176 basis points during the nine months ending September 30, 2011 and 2010, respectively. Interest-only payment terms were approximately 10 months during the nine months ended 2011 compared to 11 months during the same period in 2010. Additionally, approximately \$67,000 of principal balance was forgiven during the nine months ended 2011, compared to \$5.7 million forgiven during the same period of 2010.

Table of Contents

The tables below present a summary of loans restructured during the three months and twelve months ended September 30, 2011 and 2010, and subsequently defaulted under the restructured terms during the relevant period:

(Dollars in thousands)	Three Months Ended September 30, 2011				Three Months Ended September 30, 2010

(8) Loan Securitization

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

During the third quarter of 2009, the Company entered into a revolving period securitization transaction sponsored by FIFC. In connection with the securitization, premium finance receivables commercial were transferred to FIFC Premium Funding, LLC (the securitization entity). Provided that certain coverage test criteria continue to be met, principal collections on loans in the securitization entity are used to subsequently acquire and transfer additional loans into the securitization entity during the stated revolving period. Additionally, upon the occurrence of certain events established in the representations and warranties, FIFC may be required to repurchase ineligible loans that were transferred to the entity. The Company's primary continuing involvement includes servicing the loans, retaining an undivided interest (the seller's interest) in the loans, and holding certain retained interests.

Instruments issued by the securitization entity included \$600 million Class A notes that bear an annual interest rate of one-month LIBOR plus 1.45% (the Notes) and have an expected average term of 2.93 years with any unpaid balance due and payable in full on February 17, 2014. At the time of issuance, the Notes were eligible collateral under the Federal Reserve Bank of New York's Term Asset-Backed Securities Loan Facility (TALF). Class B and Class C notes (Subordinated securities), which are recorded in the form of zero coupon bonds, were also issued and were retained by the Company.

Table of Contents

This securitization transaction is accounted for as a secured borrowing and the securitization entity is treated as a consolidated subsidiary of the Company under ASC 810, Consolidation. The securitization entity's receivables underlying third-party investors' interests are recorded in loans, net of unearned income, excluding covered loans, an allowance for loan losses was established and the related debt issued is reported in secured borrowings owed to securitization investors. Additionally, the Company's retained interests in the transaction, principally consisting of subordinated securities, cash collateral, and overcollateralization of loans, constitute intercompany positions, which are eliminated in the preparation of the Company's Consolidated Statements of Condition.

Upon transfer of premium finance receivables - commercial to the securitization entity, the receivables and certain cash flows derived from them become restricted for use in meeting obligations to the securitization entity's creditors. The securitization entity has ownership of interest-bearing deposit balances that also have restrictions, the amounts of which are reported in interest-bearing deposits with other banks. Investment of the interest-bearing deposit balances is limited to investments that are permitted under the governing documents of the transaction. With the exception of the seller's interest in the transferred receivables, the Company's interests in the securitization entity's assets are generally subordinate to the interests of third-party investors and, as such, may not be realized by the Company if needed to absorb deficiencies in cash flows that are allocated to the investors in the securitization entity's debt.

The carrying values and classification of the restricted assets and liabilities relating to the securitization activities are shown in the table below.

(Dollars in thousands)	September 30, 2011	December 31, 2010	September 30, 2010
Cash collateral accounts	\$ 1,759	\$ 1,759	\$ 1,759
Collections and interest funding accounts	35,406	34,861	46,021
Interest-bearing deposits with banks - restricted for securitization investors	\$ 37,165	\$ 36,620	\$ 47,780
Loans, net of unearned income - restricted for securitization investors	\$ 645,621	\$ 648,439	\$ 637,850
Allowance for loan losses	(2,155)	(2,171)	(2,095)
Net loans - restricted for securitization investors	\$ 643,466	\$ 646,268	\$ 635,755
Other assets	2,568	2,289	2,278
Total assets	\$ 683,199	\$ 685,177	\$ 685,813
Secured borrowings - owed to securitization investors	\$ 600,000	\$ 600,000	\$ 600,000
Other liabilities	4,490	4,458	4,442
Total liabilities	\$ 604,490	\$ 604,458	\$ 604,442

The assets of the consolidated securitization entity are subject to credit, payment and interest rate risks on the transferred premium finance receivables - commercial. To protect investors, the securitization structure includes certain features that could result in earlier-than-expected repayment of the securities. Investors are allocated cash flows derived from activities related to the accounts comprising the securitized pool of receivables, the amounts of which reflect finance charges collected net of agent fees, certain fee assessments, and recoveries on charged-off accounts. From these cash flows, investors are reimbursed for charge-offs occurring within the securitized pool of receivables and receive the contractual rate of return and FIFC is paid a servicing fee as servicer. Any cash flows remaining in excess of these requirements are reported to investors as net yield and remitted to the Company. A net yield rate of less than 0% for a three month period would trigger an economic early amortization event. In addition to this performance measurement associated with the transferred loans, there are additional performance measurements and other events or conditions which could trigger an early amortization event. As of September 30, 2011, no economic or other early amortization events have occurred. Apart from the restricted assets related to securitization activities, the investors and the securitization entity have no recourse to the Company's other assets or credit for a shortage in cash flows.

The Company continues to service the loan receivables held by the securitization entity. FIFC receives a monthly servicing fee from the securitization entity based on a percentage of the monthly investor principal balance outstanding. Although the fee income to FIFC offsets the

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

fee expense to the securitization entity and thus is eliminated in consolidation, failure to service the transferred loan receivables in accordance with contractual requirements could lead to a termination of the servicing rights and the loss of future servicing income.

Table of Contents**(9) Goodwill and Other Intangible Assets**

A summary of the Company's goodwill assets by business segment is presented in the following table:

(Dollars in thousands)	January 1, 2011	Goodwill Acquired	Impairment Loss	September 30, 2011
Community banking	\$ 250,766	\$ 5,951	\$	\$ 256,717
Specialty finance	16,095			16,095
Wealth management	14,329	15,228		29,557
Total	\$ 281,190	\$ 21,179	\$	\$ 302,369

The Community banking segment's goodwill increased \$6.0 million in 2011 as a result of the ESBI acquisition as well as the acquisition of certain assets and the assumption of certain liabilities of the mortgage banking businesses of Woodfield and River City. The acquisition of ESBI, Woodfield and River City increased goodwill \$3.8 million, \$750,000 and \$1.4 million, respectively. Further, the Wealth management segment's goodwill increased \$15.2 million in 2011 as a result of the acquisition of Great Lakes Advisors.

Pursuant to the acquisition of Professional Mortgage Partners (PMP) in December 2008, Wintrust may be required to pay contingent consideration to the former owner of PMP as a result of attaining certain performance measures through December 2011. Any contingent payments made pursuant to this transaction would be reflected as increases in the Community banking segment's goodwill.

A summary of finite-lived intangible assets as of the dates shown and the expected amortization as of September 30, 2011 is as follows:

(Dollars in thousands)	September 30, 2011	December 31, 2010	September 30, 2010
Specialty finance segment:			
Customer list intangibles:			
Gross carrying amount	\$ 1,800	\$ 1,800	\$ 5,052

Gross carrying amount	\$ 35,567	\$ 29,608	\$ 29,508
Accumulated amortization	(20,547)	(18,580)	(17,916)
Net carrying amount	\$ 15,020	\$ 11,028	\$ 11,592
Wealth management segment:			
Customer list and other intangibles:			
Gross carrying amount	\$ 6,090	\$	\$
Accumulated amortization	(86)		
Net carrying amount	\$ 6,004	\$	\$
Total other intangible assets, net	\$ 22,413	\$ 12,575	\$ 13,194

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

Estimated amortization

Actual in nine months ended September 30, 2011	\$	2,363
Estimated remaining in 2011		1,042
Estimated - 2012		4,073
Estimated - 2013		3,860
Estimated - 2014		3,384
Estimated - 2015		1,898

The customer list intangibles recognized in connection with the purchase of life insurance premium finance assets in 2009 are being amortized over an 18-year period on an accelerated basis.

The increase in core deposit intangibles from 2010 was related to the acquisition of Elgin State Bank and the FDIC-assisted acquisitions of First Chicago, CFBC and TBOC during 2011. Core deposit intangibles recognized in connection with the Company's

Table of Contents

bank acquisitions are being amortized over ten-year periods on an accelerated basis.

Intangibles within the Wealth management segment were recognized in connection with the Company's acquisition of Great Lakes Advisors during the third quarter of 2011. These intangibles consist of customer list and trademark intangibles, which are being amortized over a 20-year period, as well as the value of certain executive non-compete agreements, which are being amortized over a two-year period.

Total amortization expense associated with finite-lived intangibles totaled approximately \$2.4 million and \$2.0 million for the nine months ended September 30, 2011 and 2010, respectively.

(10) Deposits

The following table is a summary of deposits as of the dates shown:

(Dollars in thousands)	September 30, 2011	December 31, 2010	September 30, 2010
<u>Balance:</u>			
Non-interest bearing	\$ 1,631,709	\$ 1,201,194	\$ 1,042,730
NOW	1,633,752	1,561,507	1,551,749
Wealth management deposits	730,315	658,660	710,435
Money market	2,190,117	1,759,866	1,746,168
Savings	867,483	744,534	713,823
Time certificates of deposit	5,252,632	4,877,912	5,197,334
 Total deposits	 \$ 12,306,008	 \$ 10,803,673	 \$ 10,962,239
<u>Mix:</u>			
Non-interest bearing	13 %	11 %	10 %

Money market	18	16	16
Savings	7	7	7
Time certificates of deposit	43	45	47
 Total deposits	 100 %	 100 %	 100 %

Wealth management deposits represent deposit balances (primarily money market accounts) at the Company's subsidiary banks from brokerage customers of Wayne Hummer Investments, trust and asset management customers of The Chicago Trust Company and brokerage customers from unaffiliated companies.

(11) Notes Payable, Federal Home Loan Bank Advances, Other Borrowings, Secured Borrowings and Subordinated Notes

The following table is a summary of notes payable, Federal Home Loan Bank advances, other borrowings, secured borrowings and subordinated notes as of the dates shown:

(Dollars in thousands)	September 30, 2011	December 31, 2010	September 30, 2010
Notes payable	\$ 3,004	\$ 1,000	\$ 1,000
Federal Home Loan Bank advances	474,570	423,500	414,832
<u>Other borrowings:</u>			
Securities sold under repurchase agreements	414,333	217,289	241,522

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

Other	33,749	43,331	
Total other borrowings	448,082	260,620	241,522
Secured borrowings - owed to securitization investors	600,000	600,000	600,000
Subordinated notes	40,000	50,000	55,000
Total notes payable, Federal Home Loan Bank advances, other borrowings, secured borrowings, and subordinated notes	\$ 1,565,656	\$ 1,335,120	\$ 1,312,354

At September 30, 2011, the Company had notes payable of \$3.0 million. The Company continued to have a \$1.0 million outstanding balance of notes payable, with an interest rate of 4.50%, under a \$51.0 million loan agreement (Agreement) with unaffiliated banks. The Agreement consisted of a \$50.0 million revolving note, which matured on October 28, 2011, and a \$1.0 million note maturing on June 1, 2015. At September 30, 2011, there was no outstanding balance on the \$50.0 million revolving note. Borrowings under the

Table of Contents

Agreement that are considered Base Rate Loans will bear interest at a rate equal to the higher of (1) 450 basis points and (2) for the applicable period, the highest of (a) the federal funds rate plus 100 basis points, (b) the lender's prime rate plus 50 basis points, and (c) the Eurodollar Rate (as defined below) that would be applicable for an interest period of one month plus 150 basis points. Borrowings under the Agreement that are considered Eurodollar Rate Loans will bear interest at a rate equal to the higher of (1) the British Bankers Association's LIBOR rate for the applicable period plus 350 basis points (the Eurodollar Rate) and (2) 450 basis points.

Commencing August 2009, a commitment fee is payable quarterly equal to 0.50% of the actual daily amount by which the lender's commitment under the revolving note exceeds the amount outstanding under such facility.

The Agreement is secured by the stock of some of the banks and contains several restrictive covenants, including the maintenance of various capital adequacy levels, asset quality and profitability ratios, and certain restrictions on dividends and other indebtedness. At September 30, 2011, the Company was in compliance with all debt covenants. The Agreement is available to be utilized, as needed, to provide capital to fund continued growth at the Company's banks and to serve as an interim source of funds for acquisitions, common stock repurchases or other general corporate purposes.

As more fully described in Note 18 Subsequent Events, on October 28, 2011, the Company entered into an Amended and Restated Credit Agreement, which altered the terms of the Agreement, and which provides for a \$1.0 million term loan and a \$75.0 million revolving credit facility, which mature on June 1, 2015 and October 26, 2012, respectively.

As a result of the acquisition of Great Lakes Advisors, the Company assumed an unsecured promissory note to a Great Lakes Advisor shareholder (Promissory Note) with an outstanding balance of \$2.0 million as of September 30, 2011. Under the Promissory Note, the Company will make quarterly principal payments and pay interest at a rate of the federal funds rate plus 100 basis points. As of September 30, 2011, the current interest rate was 1.25%.

Federal Home Loan Bank advances consist of fixed rate obligations of the banks and are collateralized by qualifying residential real estate and home equity loans and certain securities. FHLB advances are stated at par value of the debt adjusted for unamortized fair value adjustments recorded in connection with advances acquired through acquisitions. The Company did not restructure any FHLB advances in 2011, but restructured \$36.0 million of FHLB advances, paying \$1.5 million in prepayment fees, in the third quarter of 2010. Total restructurings in 2010 were \$220.0 million, requiring \$10.1 million in prepayment fees. These prepayment fees are classified in other assets on the Consolidated Statements of Condition and are amortized as an adjustment to interest expense using the effective interest method. The restructurings in 2010 were done in order to achieve lower interest rates and extend maturities.

At September 30, 2011 securities sold under repurchase agreements represent \$100.6 million of customer balances in sweep accounts in connection with master repurchase agreements at the banks and \$313.7 million of short-term borrowings from brokers. Securities pledged for customer balances in sweep accounts are maintained under the Company's control and consist of U.S. Government agency, mortgage-backed and corporate securities. These securities are included in the available-for-sale securities portfolio as reflected on the Company's Consolidated Statements of Condition.

Other borrowings at September 30, 2011 represent the junior subordinated amortizing notes issued by the Company in connection with the issuance of the Tangible Equity Units (TEUs) in December 2010. These junior subordinated notes were recorded at their initial principal balance of \$44.7 million, net of issuance costs. These notes have a stated interest rate of 9.5% and require quarterly principal and interest payments of \$4.3 million, with an initial payment of \$4.6 million that was paid on March 15, 2011. The issuance costs are being amortized to interest expense using the effective-interest method. The scheduled final installment payment on the notes is December 15, 2013, subject to extension. See Note 17 Shareholders' Equity and Earnings Per Share for further discussion of the TEUs.

During the third quarter of 2009, the Company entered into an off-balance sheet securitization transaction sponsored by FIFC. In connection with the securitization, premium finance receivables - commercial were transferred to FIFC Premium Funding, LLC, a qualifying special purpose entity (the QSPE). The QSPE issued \$600 million Class A notes that bear an annual interest rate of one-month LIBOR plus 1.45% (the Notes) and have an expected average term of 2.93 years with any unpaid balance due and payable in full on February 17, 2014. At the time of issuance, the Notes were eligible collateral under TALF. These notes are reflected on the Company's Consolidated Statements of Condition as secured borrowings owed to securitization investors. See Note 8 Loan Securitization, for more information on the QSPE.

The subordinated notes represent three notes, issued in October 2002, April 2003 and October 2005 (funded in May 2006). The balances of the notes as of September 30, 2011 were \$10.0 million, \$10.0 million and \$20.0 million, respectively. Each subordinated note requires annual principal payments of \$5.0 million beginning in the sixth year, with final maturities in the tenth year. The Company may redeem the subordinated notes at any time prior to maturity. Interest on each note is calculated at a rate equal to three-month LIBOR plus 130 basis points.

Table of Contents**(12) Junior Subordinated Debentures**

As of September 30, 2011, the Company owned 100% of the common securities of nine trusts, Wintrust Capital Trust III, Wintrust Statutory Trust IV, Wintrust Statutory Trust V, Wintrust Capital Trust VII, Wintrust Capital Trust VIII, Wintrust Capital Trust IX, Northview Capital Trust I, Town Bankshares Capital Trust I, and First Northwest Capital Trust I (the Trusts) set up to provide long-term financing. The Northview, Town and First Northwest capital trusts were acquired as part of the acquisitions of Northview Financial Corporation, Town Bankshares, Ltd., and First Northwest Bancorp, Inc., respectively. The Trusts were formed for purposes of issuing trust preferred securities to third-party investors and investing the proceeds from the issuance of the trust preferred securities and common securities solely in junior subordinated debentures issued by the Company (or assumed by the Company in connection with an acquisition), with the same maturities and interest rates as the trust preferred securities. The junior subordinated debentures are the sole assets of the Trusts. In each Trust, the common securities represent approximately 3% of the junior subordinated debentures and the trust preferred securities represent approximately 97% of the junior subordinated debentures.

The Trusts are reported in the Company's consolidated financial statements as unconsolidated subsidiaries. Accordingly, in the Consolidated Statements of Condition, the junior subordinated debentures issued by the Company to the Trusts are reported as liabilities and the common securities of the Trusts, all of which are owned by the Company, are included in available-for-sale securities.

The following table provides a summary of the Company's junior subordinated debentures as of September 30, 2011. The junior subordinated debentures represent the par value of the obligations owed to the Trusts.

(Dollars in thousands)	Common Securities	Trust Preferred Securities	Junior Subordinated Debentures	Rate Structure	Contractual rate at 9/30/11	Issue Date	Maturity Date	Earliest Redemption Date
Wintrust Capital Trust III	\$ 774	\$ 25,000	\$ 25,774	L+3.25	3.50%	04/2003	04/2033	04/2008
Wintrust Statutory Trust IV	619	20,000	20,619	L+2.80	2.97%	12/2003	12/2033	12/2008
Wintrust Statutory Trust V	1,238	40,000	41,238	L+2.60	2.97%	05/2004	05/2034	06/2009
Wintrust Capital Trust VII	1,550	50,000	51,550	L+1.95	2.30%	12/2004	03/2035	03/2010
Wintrust Capital Trust VIII	1,238	40,000	41,238	L+1.45	1.82%	08/2005	09/2035	09/2010
Wintrust Capital Trust IX	1,547	50,000	51,547	L+1.63	1.98%	09/2006	09/2036	09/2011
Northview Capital Trust I	186	6,000	6,186	L+3.00	3.25%	08/2003	11/2033	08/2008
Town Bankshares Capital Trust I	186	6,000	6,186	L+3.00	3.25%	08/2003	11/2033	08/2008
First Northwest Capital Trust I	155	5,000	5,155	L+3.00	3.37%	05/2004	05/2034	05/2009
Total			\$ 249,493		2.51%			

The junior subordinated debentures totaled \$249.5 million at September 30, 2011, December 31, 2010 and September 30, 2010.

The interest rates on the variable rate junior subordinated debentures are based on the three-month LIBOR rate and reset on a quarterly basis. The interest rate on the Wintrust Capital Trust IX junior subordinated debentures, previously fixed at 6.84%, changed to a variable rate equal to three-month LIBOR plus 1.63% effective September 15, 2011. At September 30, 2011, the weighted average contractual interest rate on the junior subordinated debentures was 2.51%. The Company entered into \$225 million of interest rate swaps and caps to hedge the variable cash flows on certain junior subordinated debentures. The hedge-adjusted rate on the junior subordinated debentures as of September 30, 2011, was 5.18%. Distributions on the common and preferred securities issued by the Trusts are payable quarterly at a rate per annum equal to the interest rates being earned by the Trusts on the junior subordinated debentures. Interest expense on the junior subordinated debentures is deductible for income tax purposes.

The Company has guaranteed the payment of distributions and payments upon liquidation or redemption of the trust preferred securities, in each case to the extent of funds held by the Trusts. The Company and the Trusts believe that, taken together, the obligations of the Company under the guarantees, the junior subordinated debentures, and other related agreements provide, in the aggregate, a full, irrevocable and unconditional guarantee, on a subordinated basis, of all of the obligations of the Trusts under the trust preferred securities. Subject to certain limitations, the Company has the right to defer the payment of interest on the junior subordinated debentures at any time, or from time to time, for a period not to exceed 20 consecutive quarters. The trust preferred securities are subject to mandatory redemption, in whole or in part, upon repayment of the junior subordinated debentures at maturity or their earlier redemption. The junior subordinated debentures are redeemable in whole or in part prior to maturity at any time after the earliest redemption dates shown in the table, and earlier at the discretion of the Company if certain conditions are met, and, in any event, only after the Company has obtained Federal Reserve approval, if then required under applicable

guidelines or regulations.

The junior subordinated debentures, subject to certain limitations, qualify as Tier 1 capital of the Company for regulatory purposes. The amount of junior subordinated debentures and certain other capital elements in excess of those certain limitations could be included in Tier 2 capital, subject to restrictions. At September 30, 2011, all of the junior subordinated debentures, net of the Common Securities, were included in the Company's Tier 1 regulatory capital.

Table of Contents

(13) Segment Information

The Company's operations consist of three primary segments: community banking, specialty finance and wealth management.

The three reportable segments are strategic business units that are separately managed as they offer different products and services and have different marketing strategies. In addition, each segment's customer base has varying characteristics. The community banking segment has a different regulatory environment than the specialty finance and wealth management segments. While the Company's management monitors each of the fifteen bank subsidiaries' operations and profitability separately, these subsidiaries have been aggregated into one reportable operating segment due to the similarities in products and services, customer base, operations, profitability measures, and economic characteristics.

The net interest income, net revenue and segment profit of the community banking segment includes income and related interest costs from portfolio loans that were purchased from the specialty finance segment. For purposes of internal segment profitability analysis, management reviews the results of its specialty finance segment as if all loans originated and sold to the community banking segment were retained within that segment's operations, thereby causing inter-segment eliminations. Similarly, for purposes of analyzing the contribution from the wealth management segment, management allocates a portion of the net interest income earned by the community banking segment on deposit balances of customers of the wealth management segment to the wealth management segment. See Note 10 Deposits, for more information on these deposits.

The segment financial information provided in the following tables has been derived from the internal profitability reporting system used by management to monitor and manage the financial performance of the Company. The accounting policies of the segments are generally the same as those described in Summary of Significant Accounting Policies in Note 1 of the Company's 2010 Form 10-K. The Company evaluates segment performance based on after-tax profit or loss and other appropriate profitability measures common to each segment. Certain indirect expenses have been allocated based on actual volume measurements and other criteria, as appropriate. Intersegment revenue and transfers are generally accounted for at current market prices. The parent and intersegment eliminations reflected parent company information and intersegment eliminations.

Table of Contents

NM - Not Meaningful

Table of Contents**(14) Derivative Financial Instruments**

The Company enters into derivative financial instruments as part of its strategy to manage its exposure to changes in interest rates. Derivative instruments represent contracts between parties that result in one party delivering cash to the other party based on a notional amount and an underlying (such as a rate, security price or price index) as specified in the contract. The amount of cash delivered from one party to the other is determined based on the interaction of the notional amount of the contract with the underlying. Derivatives are also implicit in certain contracts and commitments.

The derivative financial instruments currently used by the Company to manage its exposure to interest rate risk include: (1) interest rate swaps and caps to manage the interest rate risk of certain variable rate liabilities; (2) interest rate lock commitments provided to customers to fund certain mortgage loans to be sold into the secondary market; (3) forward commitments for the future delivery of such mortgage loans to protect the Company from adverse changes in interest rates and corresponding changes in the value of mortgage loans available-for-sale; and (4) covered call options related to specific investment securities to enhance the overall yield on such securities. The Company also enters into derivatives (typically interest rate swaps) with certain qualified borrowers to facilitate the borrowers' risk management strategies and concurrently enters into mirror-image derivatives with a third party counterparty, effectively making a market in the derivatives for such borrowers.

As required by ASC 815, the Company recognizes derivative financial instruments in the consolidated financial statements at fair value regardless of the purpose or intent for holding the instrument. Derivative financial instruments are included in other assets or other liabilities, as appropriate, on the Consolidated Statements of Condition. Changes in the fair value of derivative financial instruments are either recognized in income or in shareholders' equity as a component of other comprehensive income depending on whether the derivative financial instrument qualifies for hedge accounting and, if so, whether it qualifies as a fair value hedge or cash flow hedge. Generally, changes in fair values of derivatives accounted for as fair value hedges are recorded in income in the same period and in the same income statement line as changes in the fair values of the hedged items that relate to the hedged risk(s). Changes in fair values of derivative financial instruments accounted for as cash flow hedges, to the extent they are effective hedges, are recorded as a component of other comprehensive income, net of deferred taxes, and reclassified to earnings when the hedged transaction affects earnings. Changes in fair values of derivative financial instruments not designated in a hedging relationship pursuant to ASC 815, including changes in fair value related to the ineffective portion of cash flow hedges, are reported in non-interest income during the period of the change. Derivative financial instruments are valued by a third party and are periodically validated by comparison with valuations provided by the respective counterparties. Fair values of certain mortgage banking derivatives (interest rate lock commitments and forward commitments to sell mortgage loans on a best efforts basis) are estimated based on changes in mortgage interest rates from the date of the loan commitment.

The table below presents the fair value of the Company's derivative financial instruments as well as their classification on the Consolidated Statements of Condition as of September 30, 2011 and 2010:

	Balance Sheet Location	Derivative Assets Fair Value		Balance Sheet Location	Derivative Liabilities Fair Value	
		September 30, 2011	September 30, 2010		September 30, 2011	September 30, 2010
<i>Derivatives designated as hedging instruments under ASC 815:</i>						
Interest rate derivatives designated as Cash Flow Hedges	Other assets	\$ 132	\$	Other liabilities	\$ 12,339	\$ 15,543
<i>Derivatives not designated as hedging instruments under ASC 815:</i>						
Interest rate derivatives	Other assets	32,882	18,313	Other liabilities	32,908	18,999
Interest rate lock commitments	Other assets	6,506	6,198	Other liabilities	249	179
Forward commitments to sell mortgage loans	Other assets	283	211	Other liabilities	5,116	4,261

Table of Contents**Cash Flow Hedges of Interest Rate Risk**

The Company's objectives in using interest rate derivatives are to add stability to net interest income and to manage its exposure to interest rate movements. To accomplish these objectives, the Company primarily uses interest rate swaps and interest rate caps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges involve the receipt of variable-rate amounts from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without the exchange of the underlying notional amount. Interest rate caps designated as cash flow hedges involve the receipt of payments at the end of each period in which the interest rate specified in the contract exceed the agreed upon strike price.

In May 2011, the Company entered into four new interest rate derivatives, two interest rate swaps and two interest rate caps, to replace derivatives maturing in the third and fourth quarters of 2011 that hedge the variable cash outflows associated with interest expense on the Company's junior subordinated debentures and create a hedge associated with the interest rate expense on Wintrust Capital Trust IX which changed from a fixed rate to a variable rate in September 2011. See Note 12 Junior Subordinated Debentures for more detail. The two new interest rate swap derivatives designated as cash flow hedges have an aggregate notional value of \$75 million and one of the swaps is forward-starting with an effective date in October 2011. The two new interest rate cap derivatives designated as cash flow hedges have an aggregate notional value of \$60 million.

As of September 30, 2011, the Company had five interest rate swaps and two interest rate caps with an aggregate notional amount of \$250 million that were designated as cash flow hedges of interest rate risk. The table below provides details on each of these cash flow hedges as of September 30, 2011:

September 30, 2011		
(Dollars in thousands)		
Maturity Date	Notional Amount	Fair Value Gain (Loss)
<i>Interest Rate Swaps:</i>		
October 2011	25,000	(30)
September 2013	50,000	(4,642)
September 2013	40,000	(3,787)
September 2016	50,000	(2,565)
October 2016*	25,000	(1,315)
Total Interest Rate Swaps	190,000	(12,339)
<i>Interest Rate Caps:</i>		
September 2014	20,000	44
September 2014	40,000	88
Total Interest Rate Caps	60,000	132
Total Cash Flow Hedges	\$ 250,000	\$ (12,207)

* Forward starting in the fourth quarter of 2011

Since entering into these interest rate derivatives, the Company has used them to hedge the variable cash outflows associated with interest expense on the Company's junior subordinated debentures. The effective portion of changes in the fair value of these cash flow hedges is recorded in accumulated other comprehensive income and is subsequently reclassified to interest expense as interest payments are made on the Company's variable rate junior subordinated debentures. The changes in fair value (net of tax) are separately disclosed in the statements of changes in shareholders' equity as a component of comprehensive income. The ineffective portion of the change in fair value of these derivatives is recognized directly in earnings; however, no hedge ineffectiveness was recognized during the nine months ended September 30, 2011 or September 30, 2010. The Company uses the hypothetical derivative method to assess and measure effectiveness.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

A rollforward of the amounts in accumulated other comprehensive income related to interest rate derivatives designated as cash flow hedges follows:

(Dollars in thousands)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Unrealized loss at beginning of period	\$ (10,120)	\$ (15,969)	\$ (13,323)	\$ (15,487)
Amount reclassified from accumulated other comprehensive income to interest expense on junior subordinated debentures	2,246	2,124	6,615	6,516
Amount of loss recognized in other comprehensive income	(4,333)	(2,146)	(5,499)	(7,020)
Unrealized loss at end of period	\$ (12,207)	\$ (15,991)	\$ (12,207)	\$ (15,991)

As of September 30, 2011, the Company estimates that during the next twelve months, \$5.7 million will be reclassified from accumulated other comprehensive income as an increase to interest expense.

Table of Contents**Non-Designated Hedges**

The Company does not use derivatives for speculative purposes. Derivatives not designated as hedges are used to manage the Company's exposure to interest rate movements and other identified risks but do not meet the strict hedge accounting requirements of ASC 815. Changes in the fair value of derivatives not designated in hedging relationships are recorded directly in earnings.

Interest Rate Derivatives The Company has interest rate derivatives, including swaps and option products, resulting from a service the Company provides to certain qualified borrowers. The Company's banking subsidiaries execute certain derivative products (typically interest rate swaps) directly with qualified commercial borrowers to facilitate their respective risk management strategies. For example, these arrangements allow the Company's commercial borrowers to effectively convert a variable rate loan to a fixed rate. In order to minimize the Company's exposure on these transactions, the Company simultaneously executes offsetting derivatives with third parties. In most cases, the offsetting derivatives have mirror-image terms, which result in the positions' changes in fair value substantially offsetting through earnings each period. However, to the extent that the derivatives are not a mirror-image and because of differences in counterparty credit risk, changes in fair value will not completely offset resulting in some earnings impact each period. Changes in the fair value of these derivatives are included in other non-interest income. At September 30, 2011, the Company had approximately 428 derivative transactions (214 with customers and 214 with third parties) with an aggregate notional amount of approximately \$1.2 billion (all interest rate swaps) related to this program. These interest rate derivatives had maturity dates ranging from October 2011 to January 2033.

Mortgage Banking Derivatives These derivatives include interest rate lock commitments provided to customers to fund certain mortgage loans to be sold into the secondary market and forward commitments for the future delivery of such loans. It is the Company's practice to enter into forward commitments for the future delivery of residential mortgage loans when interest rate lock commitments are entered into in order to economically hedge the effect of future changes in interest rates on its commitments to fund the loans as well as on its portfolio of mortgage loans held-for-sale. The Company's mortgage banking derivatives have not been designated as being in hedge relationships. At September 30, 2011, the Company had forward commitments to sell mortgage loans with an aggregate notional amount of approximately \$665.2 million. At September 30, 2011, the Company had interest rate lock commitments with an aggregate notional amount of approximately \$483.1 million. Additionally, the Company's total mortgage loans held-for-sale at September 30, 2011 was \$213.0 million. The fair values of these derivatives were estimated based on changes in mortgage rates from the dates of the commitments. Changes in the fair value of these mortgage banking derivatives are included in mortgage banking revenue.

Other Derivatives Periodically, the Company will sell options to a bank or dealer for the right to purchase certain securities held within the Banks' investment portfolios (covered call options). These option transactions are designed primarily to increase the total return associated with the investment securities portfolio. These options do not qualify as hedges pursuant to ASC 815, and, accordingly, changes in fair value of these contracts are recognized as other non-interest income. There were no covered call options outstanding as of September 30, 2011, December 31, 2010 or September 30, 2010.

Amounts included in the consolidated statements of income related to derivative instruments not designated in hedge relationships were as follows:

(Dollars in thousands)	Derivative	Location in income statement	Three Months Ended		Nine Months Ended	
			September 30, 2011	2010	September 30, 2011	2010
	Interest rate swaps and floors	Trading gains/losses	\$ 535	\$ (36)	\$ (93)	\$ (339)
	Mortgage banking derivatives	Mortgage banking revenue	448	(4,593)	(1,060)	(13,194)
	Covered call options	Other income	3,436	703	8,193	1,162

Credit Risk

Derivative instruments have inherent risks, primarily market risk and credit risk. Market risk is associated with changes in interest rates and credit risk relates to the risk that the counterparty will fail to perform according to the terms of the agreement. The amounts potentially subject to market and credit risks are the streams of interest payments under the contracts and the market value of the derivative instrument and not the notional principal amounts used to express the volume of the transactions. Market and credit risks are managed and monitored as part of the Company's overall asset-liability management process, except that the credit risk related to derivatives entered into with certain qualified borrowers is managed through the Company's standard loan underwriting process since these derivatives are secured through collateral provided by the loan agreements. Actual exposures are monitored against various types of credit limits established to contain risk within parameters. When deemed necessary, appropriate types and amounts of collateral are obtained to minimize credit exposure.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

The Company has agreements with certain of its interest rate derivative counterparties that contain cross-default provisions, which provide that if the Company defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be declared in default on its derivative obligations. The Company also has agreements with certain of its derivative counterparties that contain a provision allowing the counter party to terminate the derivative positions if the Company fails to maintain its status as a well or adequate capitalized institution, which would require the Company to

Table of Contents

settle its obligations under the agreements. As of September 30, 2011, the fair value of interest rate derivatives in a net liability position, which includes accrued interest related to these agreements, was \$46.2 million. As of September 30, 2011 the Company has minimum collateral posting thresholds with certain of its derivative counterparties and has posted collateral consisting of \$10.5 million of cash and \$34.5 million of securities. If the Company had breached any of these provisions at September 30, 2011 it would have been required to settle its obligations under the agreements at the termination value and would have been required to pay any additional amounts due in excess of amounts previously posted as collateral with the respective counterparty.

The Company is also exposed to the credit risk of its commercial borrowers who are counterparties to interest rate derivatives with the Banks. This counterparty risk related to the commercial borrowers is managed and monitored through the Banks' standard underwriting process applicable to loans since these derivatives are secured through collateral provided by the loan agreement. The counterparty risk associated with the mirror-image swaps executed with third parties is monitored and managed in connection with the Company's overall asset liability management process.

(15) Fair Values of Assets and Liabilities

The Company measures, monitors and discloses certain of its assets and liabilities on a fair value basis. These financial assets and financial liabilities are measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the observability of the assumptions used to determine fair value. These levels are:

Level 1 unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 significant unobservable inputs that reflect the Company's own assumptions that market participants would use in pricing the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

A financial instrument's categorization within the above valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the assets or liabilities. Following is a description of the valuation methodologies used for the Company's assets and liabilities measured at fair value on a recurring basis.

Available-for-sale and trading account securities Fair values for available-for-sale and trading account securities are based on quoted market prices when available or through the use of alternative approaches, such as matrix or model pricing or indicators from market makers.

Mortgage loans held-for-sale Mortgage loans originated by Wintrust Mortgage are carried at fair value. The fair value of mortgage loans held-for-sale is determined by reference to investor price sheets for loan products with similar characteristics.

Mortgage servicing rights Fair value for mortgage servicing rights is determined utilizing a third party valuation model which stratifies the servicing rights into pools based on product type and interest rate. The fair value of each servicing rights pool is calculated based on the present value of estimated future cash flows using a discount rate commensurate with the risk associated with that pool, given current market conditions. Estimates of fair value include assumptions about prepayment speeds, interest rates and other factors which are subject to change over time.

Derivative instruments The Company's derivative instruments include interest rate swaps and caps, commitments to fund mortgages for sale into the secondary market (interest rate locks) and forward commitments to end investors for the sale of mortgage loans. Interest rate swaps and caps are valued by a third party, using models that primarily use market observable inputs, such as yield curves, and are validated by comparison with valuations provided by the respective counterparties. The fair value for mortgage derivatives is based on changes in mortgage rates from the date of the commitments.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

Nonqualified deferred compensation assets The underlying assets relating to the nonqualified deferred compensation plan are included in a trust and primarily consist of non-exchange traded institutional funds which are priced based by an independent third party service.

Table of Contents

The following tables present the balances of assets and liabilities measured at fair value on a recurring basis for the periods presented:

(Dollars in thousands)	Total	September 30, 2011		
		Level 1	Level 2	Level 3
Available-for-sale securities

The aggregate remaining contractual principal balance outstanding as of September 30, 2011 and 2010 for mortgage loans held-for-sale measured at fair value was \$200.4 million and \$297.2 million, respectively, while the aggregate fair value of mortgage loans held-for-sale was \$204.1 million and \$307.2 million, respectively, as shown in the above tables. There were no nonaccrual loans or loans past due greater than 90 days and still accruing in the mortgage loans held-for-sale portfolio measured at fair value as of September 30, 2011 and 2010.

(1) Income for Corporate notes and other debt, and mortgage-backed are recognized as a component of interest income on securities. Additionally, changes in the balance of mortgage servicing rights are recorded as a component of mortgage banking revenue in non-interest income.

(2) The transfer of U.S. Agency and Municipal securities and Corporate Notes into Level 3 is the result of the use of unobservable inputs that reflect the Company's own assumptions that market participants would use in pricing these securities.

The changes in Level 3 assets and liabilities measured at fair value on a recurring basis during the three and nine months ended September 30, 2010 are summarized as follows:

(Dollars in thousands)	Municipal	Corporate notes and other debt	Mortgage-backed	Equity securities	Trading Account Securities	Mortgage servicing rights	Retained interests
Balance at June 30, 2010	\$ 14,028	\$ 11,352	\$ 145,331	\$ 26,891	\$ 36,809	\$ 5,347	\$

(1) Income for Corporate notes, other debt and mortgage-backed is recognized as a component of interest income on securities. Income for trading account securities is recognized as a component of trading income in non-interest income and trading account securities interest income. Changes in the balance of mortgage servicing rights are recorded as a component of mortgage banking revenue in non-interest income.

Table of Contents

Also, the Company may be required, from time to time, to measure certain other financial assets at fair value on a nonrecurring basis in accordance with GAAP. These adjustments to fair value usually result from application of lower of cost or market accounting or impairment charges of individual assets. For assets measured at fair value on a nonrecurring basis that were still held in the balance sheet at the end of the period, the following table provides the carrying value of the related individual assets or portfolios at September 30, 2011.

(Dollars in thousands)	Total	September 30, 2011			Three Months Ended September 30, 2011	Nine Months Ended September 30, 2011
		Level 1	Level 2	Level 3	Fair Value Losses Recognized	Fair Value Losses Recognized
Impaired loans	\$ 203,570	\$	\$	\$ 203,570	\$ 6,017	\$ 36,601
Other real estate owned	96,924			96,924	5,506	19,121
Mortgage loans held-for-sale, at lower of cost or market	8,955		8,955			(358)
Total	\$ 309,449	\$	\$ 8,955	\$ 300,494	\$ 11,523	\$ 55,364

Impaired loans A loan is considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due pursuant to the contractual terms of the loan agreement. A loan restructured in a troubled debt restructuring is an impaired loan according to applicable accounting guidance. Impairment is measured by estimating the fair value of the loan based on the present value of expected cash flows, the market price of the loan, or the fair value of the underlying collateral. Impaired loans are considered a fair value measurement where an allowance is established based on the fair value of collateral. Appraised values, which may require adjustments to market-based valuation inputs, are generally used on real estate collateral-dependant impaired loans.

Other real estate owned Other real estate owned is comprised of real estate acquired in partial or full satisfaction of loans and is included in other assets. Other real estate owned is recorded at its estimated fair value less estimated selling costs at the date of transfer, with any excess of the related loan balance over the fair value less expected selling costs charged to the allowance for loan losses. Subsequent changes in value are reported as adjustments to the carrying amount and are recorded in other non-interest expense. Gains and losses upon sale, if any, are also charged to other non-interest expense. Fair value is generally based on third party appraisals and internal estimates and is therefore considered a Level 3 valuation.

Mortgage loans held-for-sale, at lower of cost or market Fair value is based on either quoted prices for the same or similar loans, or values obtained from third parties, or is estimated for portfolios of loans with similar financial characteristics and is therefore considered a Level 2 valuation.

Table of Contents

The Company is required under applicable accounting guidance to report the fair value of all financial instruments on the consolidated statements of condition, including those financial instruments carried at cost. The carrying amounts and estimated fair values of the Company's financial instruments as of the dates shown:

(Dollars in thousands)	At September 30, 2011		At December 31, 2010

The following methods and assumptions were used by the Company in estimating fair values of financial instruments that were not previously disclosed.

Cash and cash equivalents. Cash and cash equivalents include cash and demand balances from banks, Federal funds sold and securities purchased under resale agreements. The carrying value of cash and cash equivalents approximates fair value due to the short maturity of those instruments.

Interest bearing deposits with banks. The carrying value of interest bearing deposits with banks approximates fair value due to the short maturity of those instruments.

Brokerage customer receivables. The carrying value of brokerage customer receivables approximates fair value due to the relatively short period of time to repricing of variable interest rates.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

Loans held-for-sale, at lower of cost or market. Fair value is based on either quoted prices for the same or similar loans, or values obtained from third parties, or is estimated for portfolios of loans with similar financial characteristics.

Loans. Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are analyzed by type such as commercial, residential real estate, etc. Each category is further segmented by interest rate type (fixed and variable) and term. For variable-rate loans that reprice frequently, estimated fair values are based on carrying values. The fair value of residential loans is based on secondary market sources for securities backed by similar loans, adjusted for differences in loan characteristics. The fair value for other fixed rate loans is estimated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect credit and interest rate risks inherent in the loan. The primary impact of credit risk on the present value of the loan portfolio, however, was accommodated through the use of the allowance for loan losses, which is believed to

Table of Contents

represent the current fair value of probable incurred losses for purposes of the fair value calculation.

FDIC indemnification asset. The fair value of the FDIC indemnification asset is based on the discounted value of cash flows to be received from the FDIC.

Accrued interest receivable and accrued interest payable. The carrying values of accrued interest receivable and accrued interest payable approximate market values due to the relatively short period of time to expected realization.

Deposit liabilities. The fair value of deposits with no stated maturity, such as non-interest bearing deposits, savings, NOW accounts and money market accounts, is equal to the amount payable on demand as of period-end (i.e. the carrying value). The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently in effect for deposits of similar remaining maturities.

Notes payable. The carrying value of notes payable approximates fair value due to the relatively short period of time to repricing of variable interest rates.

Federal Home Loan Bank advances. The fair value of Federal Home Loan Bank advances is obtained from the Federal Home Loan Bank which uses a discounted cash flow analysis based on current market rates of similar maturity debt securities to discount cash flows.

Subordinated notes. The carrying value of the subordinated notes payable approximates fair value due to the relatively short period of time to repricing of variable interest rates.

Other borrowings. Carrying value of other borrowings approximates fair value due to the relatively short period of time to maturity or repricing.

Junior subordinated debentures. The fair value of the junior subordinated debentures is based on the discounted value of contractual cash flows.

(16) Stock-Based Compensation Plans

The 2007 Stock Incentive Plan (the 2007 Plan), which was approved by the Company s shareholders in January 2007, permits the grant of incentive stock options, nonqualified stock options, rights and restricted share awards, as well as the conversion of outstanding options of acquired companies to Wintrust options. The 2007 Plan initially provided for the issuance of up to 500,000 shares of common stock. In May 2009 and May 2011, the Company s shareholders approved an additional 325,000 shares and 2,860,000 shares, respectively, of common stock that may be offered under the 2007 Plan. All grants made after 2006 were made pursuant to the 2007 Plan, and as of September 30, 2011, 2,480,879 shares were available for future grant. The 2007 Plan replaced the Wintrust Financial Corporation 1997 Stock Incentive Plan (the 1997 Plan) which had substantially similar terms. The 2007 Plan and the 1997 Plan are collectively referred to as the Plans. The Plans cover substantially all employees of Wintrust.

The Company typically awards stock-based compensation in the form of stock options and restricted share awards. Stock options provide the holder of the option the right to purchase shares of Wintrust s common stock at the fair market value of the stock on the date the options are granted. Options generally vest ratably over a five-year period and expire at such time as the Compensation Committee determines at the time of grant. The 2007 Plan provides for a maximum term of seven years from the date of grant while the 1997 Plan provided for a maximum term of ten years. Restricted share awards entitle the holders to receive, at no cost, shares of the Company s common stock. Restricted share awards generally vest over periods of one to five years from the date of grant. Holders of the restricted share awards are not entitled to vote or receive cash dividends (or cash payments equal to the cash dividends) on the underlying common shares until the awards are vested. Except in limited circumstances, these awards are canceled upon termination of employment without any payment of consideration by the Company.

Stock-based compensation cost is measured as the fair value of an award on the date of grant and is recognized on a straight-line basis over the vesting period. The fair value of restricted share awards is determined based on the average of the high and low trading prices on the grant date. The fair value of stock options is estimated at the date of grant using a Black-Scholes option-pricing model that utilizes the assumptions outlined in the following table. Option-pricing models require the input of highly subjective assumptions and are sensitive to changes in the option s expected life and the price volatility of the underlying stock, which can materially affect the fair value estimate. Expected life is based on historical exercise and termination behavior as well as the term of the option, and expected stock price volatility is based on historical volatility of the Company s common stock, which correlates with the expected term of the options. The risk-free interest rate is based on comparable U.S. Treasury rates. Management reviews and adjusts the assumptions used to calculate the fair value of an option on a periodic basis to better reflect expected trends.

Table of Contents

The following table presents the weighted average assumptions used to determine the fair value of options granted in the nine months ending September 30, 2011 and 2010.

	Nine Months Ended September 30,	
	2011	2010
Expected dividend yield	0.6%	0.5%
Expected volatility	50.3%	48.3%
Risk-free rate	1.2%	2.7%
Expected option life (in years)	6.1	6.2

Stock based compensation is recognized based upon the number of awards that are ultimately expected to vest. As a result, compensation expense recognized for stock options and restricted share awards was reduced for estimated forfeitures prior to vesting. Forfeiture rates are estimated for each type of award based on historical forfeiture experience. Estimated forfeitures will be reassessed in subsequent periods and may change based on new facts and circumstances.

Compensation cost charged to income for stock options was \$192,000 and \$349,000 in the third quarters of 2011 and 2010, respectively, and \$567,000 and \$1.3 million for the 2011 and 2010 year-to-date periods, respectively. Compensation cost charged to income for restricted share awards was \$828,000 and \$672,000 in the third quarters of 2011 and 2010, respectively, and \$2.4 million and \$2.0 million for the nine months ended September 30, 2011 and 2010, respectively.

A summary of stock option activity under the Plans for the nine months ended September 30, 2011 and September 30, 2010 is presented below:

	Common Shares	Weighted Average Strike Price	Remaining Contractual Term ⁽¹⁾	Intrinsic Value ⁽²⁾ (\$000)
<i>Stock Options</i>				
Outstanding at January 1, 2011	2,040,701	\$ 38.92		
Granted	10,000	31.00		
Exercised	(48,883)	15.90		
Forfeited or canceled	(103,149)	46.30		
Outstanding at September 30, 2011	1,898,669	\$ 39.07	2.6	\$ 3,028
Exercisable at September 30, 2011	1,717,762	\$ 39.85	2.3	\$ 2,818
<i>Stock Options</i>				
Outstanding at January 1, 2010	2,156,209	\$ 37.61		
Granted	66,365	34.63		
Exercised	(141,362)	15.23		
Forfeited or canceled	(42,736)	51.46		
Outstanding at September 30, 2010	2,038,476	\$ 38.78	3.4	\$ 7,884
Exercisable at September 30, 2010	1,792,223	\$ 39.41	3.2	\$ 7,290

⁽¹⁾ Represents the weighted average contractual life remaining in years.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

⁽²⁾ *Aggregate intrinsic value represents the total pre-tax intrinsic value (i.e., the difference between the Company's average of the high and low stock price on the last trading day of the quarter and the option exercise price, multiplied by the number of shares) that would have been received by the option holders if they had exercised their options on the last day of the quarter. This amount will change based on the fair market value of the Company's stock.*

The weighted average grant date fair value per share of options granted during the nine months ended September 30, 2011 and 2010 was \$14.24 and \$16.39, respectively. The aggregate intrinsic value of options exercised during the nine months ended September 30, 2011 and 2010, was \$823,000 and \$2.8 million, respectively.

Table of Contents

A summary of restricted share award activity under the Plans for the nine months ended September 30, 2011 and September 30, 2010 is presented below:

	Nine Months Ended September 30, 2011		Nine Months Ended September 30, 2010	
	Common Shares	Weighted Average Grant-Date Fair Value	Common Shares	Weighted Average Grant-Date Fair Value
<i>Restricted Shares</i>				
Outstanding at January 1	299,040	\$ 39.44	208,430	\$ 43.24
Granted	90,285	33.16	137,656	35.66
Vested and issued	(37,651)	32.71	(52,170)	43.71
Forfeited	(2,000)	33.53	(635)	34.74
Outstanding at September 30	349,674	\$ 38.58	293,281	\$ 39.63
Vested, but not issuable at September 30	85,000	\$ 51.88	85,000	\$ 51.88

From the third quarter of 2009 to the first quarter of 2011, the Company began paying a portion of the base pay of two senior executives in the Company's stock. The number of shares granted as of each payroll date was based on the compensation earned during the period and the average of the high and low price of the Company's common stock on such date. In the first quarter of 2011, 446 shares were granted under this arrangement at an average stock price of \$32.59 per share.

As of September 30, 2011, there was \$7.3 million of total unrecognized compensation cost related to non-vested share based arrangements under the Plans. That cost is expected to be recognized over a weighted average period of approximately two years.

The Company issues new shares to satisfy option exercises, vesting of restricted shares and issuance of base pay salary shares.

The Long-Term Incentive Program

In August 2011, the Compensation Committee of the Board of Directors awarded grants to key employees under a Long-Term Incentive Program (LTIP), designed in part to align the interests of management with the interests of shareholders, foster retention and create a long-term focus based on sustainable results. The LTIP was designed to provide participants a target long-term incentive opportunity, expressed as a percentage of base salary, set by the Compensation Committee. The target awards include three components—time vested stock option, performance-vested stock award and a performance-vested cash award. The stock options have a 7-year term and will generally vest equally over three years based on continued service, and the performance stock awards and performance cash awards are measured based on the achievement of pre-established targets at the end of the performance period. The actual performance-based award payouts will vary based on the achievement of the pre-established targets and can range from 0% to 200% of the target award. The first grant of these awards has a final vesting date and a performance measurement date of December 31, 2013, resulting in an initial period of less than three years. It is anticipated that awards will be granted annually.

The awards granted in August 2011 were weighted as follows: 25% time-vested stock options, 25% performance-vested stock award and 50% performance-vested cash award. The weighting of future awards between cash and shares can change each performance cycle depending in part on the availability of shares.

Table of Contents

A summary of the August 2011 grants is as follows. These grants are not included in the previous tables and disclosures in this note.

	Time vested stock options	Performance- vested Stock Units	Performance- vested Cash	Total
Target # of shares / units granted	211,000	101,000		
Target value	\$ 3,359,000	\$ 3,359,000	\$ 6,718,000	\$ 13,436,000
Maximum # of shares / units granted	211,000	202,000		
Maximum value	\$ 3,359,000	\$ 6,718,000	\$ 13,436,000	\$ 23,513,000
Weighted average stock price at grant	\$ 33.28	\$ 33.28		
Weighted average fair value at grant	\$ 15.93	\$ 33.28		
Compensation cost charged to income in 2011	\$ 181,000	\$ 181,000	\$ 362,000	\$ 724,000

Weighted average assumptions to determine the fair value of options granted:

Expected dividend yield	0.5%
Expected volatility	62.3%
Risk-free rate	1.1%
Expected option life (in years)	4.4

An estimate of the number of shares expected to vest as a result of actual performance against the performance criteria is made at the time of grant to determine total compensation expense to be recognized. The estimate will be reevaluated annually and total compensation expense will be adjusted for any changes in the estimate, with a cumulative catch up adjustment (i.e., the cumulative effect of applying the change in estimate retrospectively) recognized in the period of change. Compensation expense is recognized for these awards over the applicable vesting period, generally three years. As of September 30, 2011, there was \$12.7 million of unrecognized compensation expense related to the LTIP awards, which is expected to be recognized over a weighted average period of 2.2 years.

(17) Shareholders' Equity and Earnings Per Share*Common Stock Offering*

In March 2010, the Company issued through a public offering a total of 6.7 million shares of its common stock at \$33.25 per share. Net proceeds to the Company totaled \$210.3 million. Additionally, in December 2010, the Company issued through a public offering a total of 3.7 million shares of common stock at \$30.00 per share. Net proceeds to the Company totaled \$104.8 million.

Tangible Equity Units

In December 2010, the Company sold 4.6 million 7.50% tangible equity units (TEU) at a public offering price of \$50.00 per unit. The Company received net proceeds of \$222.7 million after deducting underwriting discounts and commissions and estimated offering expenses. Each tangible equity unit is composed of a prepaid common stock purchase contract and a junior subordinated amortizing note due December 15, 2013. The prepaid stock purchase contracts have been recorded as surplus (a component of shareholders' equity), net of issuance costs, and the junior subordinated amortizing notes have been recorded as debt within other borrowings. Issuance costs associated with the debt component are recorded as a discount within other borrowings and will be amortized over the term of the instrument to December 15, 2013. The Company allocated the proceeds from the issuance of the TEU to equity and debt based on the relative fair values of the respective components of each unit.

Table of Contents

The aggregate fair values assigned to each component of the TEU offering are as follows:

(Dollars in thousands, except per unit amounts)	Equity Component	Debt Component	TEU Total
Units issued ⁽¹⁾	4,600	4,600	4,600
Unit price	\$ 40.271818	\$ 9.728182	\$ 50.00
Gross proceeds	185,250	44,750	230,000
Issuance costs, including discount	5,934	1,419	7,353
Net proceeds	\$ 179,316	\$ 43,331	\$ 222,647
<i>Balance sheet impact</i>			
Other borrowings		43,331	43,331
Surplus	179,316		179,316

(1) Each TEU consists of two components: 4.6 million units of the equity component and 4.6 million units of the debt component.

The fair value of the debt component was determined using a discounted cash flow model using the following assumptions: (1) quarterly cash payments of 7.5%; (2) a maturity date of December 15, 2013; and (3) an assumed discount rate of 9.5%. The discount rate used for estimating the fair value was determined by obtaining yields for comparably-rated issuers trading in the market. The debt component was recorded at fair value, and the discount is being amortized using the level yield method over the term of the instrument to the settlement date of December 15, 2013.

The fair value of the equity component was determined using Black-Scholes valuation models applied to the range of stock prices contemplated by the terms of the TEU and using the following assumptions: (1) risk-free interest rate of 0.95%; (2) expected stock price volatility in the range of 35%-45%; (c) dividend yield plus stock borrow cost of 0.85%; and (4) term of 3.02 years.

Each junior subordinated amortizing note, which had an initial principal amount of \$9.728182, is bearing interest at 9.50% per annum, and has a scheduled final installment payment date of December 15, 2013. On each March 15, June 15, September 15 and December 15, the Company will pay equal quarterly installments of \$0.9375 on each amortizing note. The quarterly installment payable at March 15, 2011, however, was \$0.989583. Each payment will constitute a payment of interest and a partial repayment of principal. The Company may defer installment payments at any time and from time to time, under certain circumstances and subject to certain conditions, by extending the installment period so long as such period of time does not extend beyond December 15, 2015.

Each prepaid common stock purchase contract will automatically settle on December 15, 2013 and the Company will deliver not more than 1.6666 shares and not less than 1.3333 shares of its common stock based on the applicable market value (the average of the volume weighted average price of Company common stock for the twenty (20) consecutive trading days ending on the third trading day immediately preceding December 15, 2013) as follows:

Applicable market value of Company common stock	Settlement Rate
Less than or equal to \$30.00	1.6666
Greater than \$30.00 but less than \$37.50	\$50.00, divided by the applicable market value
Greater than or equal to \$37.50	1.3333

At any time prior to the third business day immediately preceding December 15, 2013, the holder may settle the purchase contract early and receive 1.3333 shares of Company common stock, subject to anti-dilution adjustments. Upon settlement, an amount equal to \$1.00 per common share issued will be reclassified from additional paid-in capital to common stock.

Series A Preferred Stock

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

In August 2008, the Company issued and sold 50,000 shares of non-cumulative perpetual convertible preferred stock, Series A, liquidation preference \$1,000 per share (the Series A Preferred Stock) for \$50 million in a private transaction. If declared, dividends on the Series A Preferred Stock are payable quarterly in arrears at a rate of 8.00% per annum. The Series A Preferred Stock is convertible into common stock at the option of the holder at a conversion rate of 38.88 shares of common stock per share of Series A Preferred Stock. On and after August 26, 2010, the Series A Preferred Stock are subject to mandatory conversion into common stock in connection with a fundamental transaction, or on and after August 26, 2013 if the closing price of the Company's common stock exceeds a certain amount.

Table of Contents*Series B Preferred Stock*

Pursuant to the U.S. Department of the Treasury's (the "U.S. Treasury") Capital Purchase Program, on December 19, 2008, the Company issued to the U.S. Treasury, in exchange for aggregate consideration of \$250 million, (i) 250,000 shares of the Company's fixed rate cumulative perpetual preferred stock, Series B, liquidation preference \$1,000 per share (the "Series B Preferred Stock"), and (ii) a warrant to purchase 1,643,295 shares of Wintrust common stock at a per share exercise price of \$22.82 and with a term of 10 years. The Series B Preferred Stock paid a cumulative dividend at a coupon rate of 5%.

In December 2010, the Company repurchased all 250,000 shares of its Series B Preferred Stock. The Series B Preferred Stock was repurchased at a price of \$251.3 million, which included accrued and unpaid dividends of \$1.3 million. The repurchase of the Series B Preferred Stock resulted in a non-cash deemed preferred stock dividend that reduced net income applicable to common shares in the fourth quarter of 2010 by approximately \$11.4 million. This amount represents the difference between the repurchase price and the carrying amount of the Series B Preferred Stock, or the accelerated accretion of the applicable discount on the preferred shares. In February 2011, the Treasury sold all of its interest in the warrant issued to it in a secondary underwritten public offering.

Other

In July 2011, the Company issued 529,087 shares of its common stock in the acquisition of Great Lakes Advisors. In September 2011, the Company issued 353,650 shares of its common stock in the acquisition of ESBI.

The Company has also issued other warrants to acquire common stock. These warrants entitle the holders to purchase one share of the Company's common stock at a purchase price of \$30.50 per share. Warrants outstanding at September 30, 2011 and 2010 totaled 19,000. The expiration date on these remaining outstanding warrants is February 2013.

Earnings per Share

The following table shows the computation of basic and diluted earnings per share for the periods indicated:

(In thousands, except per share data)		For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
		2011	2010	2011	2010
Net income		\$ 30,202	\$ 20,098	\$ 58,354	\$ 49,125
Less: Preferred stock dividends and discount accretion		1,032	4,943	3,096	14,830
Net income applicable to common shares - Basic	(A)	29,170	15,155	55,258	34,295
Add: Dividends on convertible preferred stock		1,000			
Net income applicable to common shares - Diluted	(B)	30,170	15,155	55,258	34,295
Weighted average common shares outstanding	(C)	35,550	31,117	35,152	29,396
Effect of dilutive potential common shares		10,551	988	8,683	1,132
Weighted average common shares and effect of dilutive potential common shares	(D)	46,101	32,105	43,835	30,528
Net income per common share:					
Basic	(A/C)	\$ 0.82	\$ 0.49	\$ 1.57	\$ 1.17
Diluted	(B/D)	\$ 0.65	\$ 0.47	\$ 1.26	\$ 1.12

Potentially dilutive common shares can result from stock options, restricted stock unit awards, stock warrants, the Company's convertible preferred stock, tangible equity unit shares and shares to be issued under the Employee Stock Purchase Plan and the Directors Deferred Fee and

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

Stock Plan, being treated as if they had been either exercised or issued, computed by application of the treasury stock method. While potentially dilutive common shares are typically included in the computation of diluted earnings per share, potentially dilutive common shares are excluded from this computation in periods in which the effect would reduce the loss per share or increase the income per share. For diluted earnings per share, net income applicable to common shares can be affected by the conversion of the Company's convertible preferred stock. Where the effect of this conversion would reduce the loss per share or increase the income per share, net income applicable to common shares is adjusted by the associated preferred dividends.

Table of Contents

(18) Subsequent Events

On October 28, 2011, the Company entered into a Fourth Amendment Agreement, (the Amendment) to the Amended and Restated Credit Agreement dated as of October 30, 2009 (as amended, the Credit Agreement) among the Company, the lenders named therein, and an unaffiliated bank as administrative agent.

Pursuant to the Amendment, an additional unaffiliated bank has agreed to become an additional revolving credit lender under the Credit Agreement, with a revolving commitment of \$25.0 million. After giving effect to the Amendment, the total revolving commitment of all lenders under the Credit Agreement is \$75.0 million. As of the date hereof, the Company has no outstanding balance under the revolving credit facility and has \$1.0 million outstanding under its term facility.

ITEM 2

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS**

The following discussion and analysis of financial condition as of September 30, 2011, compared with December 31, 2010 and September 30, 2010, and the results of operations for the nine month periods ended September 30, 2011 and 2010, should be read in conjunction with the unaudited consolidated financial statements and notes contained in this report and the Risk Factors discussed herein and under Item 1A of the Company's 2010 Annual Report on Form 10-K. This discussion contains forward-looking statements that involve risks and uncertainties and, as such, future results could differ significantly from management's current expectations. See the last section of this discussion for further information on forward-looking statements.

Introduction

Wintrust is a financial holding company that provides traditional community banking services, primarily in the Chicago metropolitan area and southeastern Wisconsin, and operates other financing businesses on a national basis through several non-bank subsidiaries. Additionally, Wintrust offers a full array of wealth management services primarily to customers in the Chicago metropolitan area and southeastern Wisconsin.

Overview

Third Quarter Highlights

The Company recorded net income of \$30.2 for the third quarter of 2011 compared to \$20.1 million in the third quarter of 2010. The results for the third quarter of 2011 demonstrate continued operating strengths as credit related costs remain at levels similar to recent quarters, loans outstanding increased, demand deposits related to this loan growth increased, and the beneficial shift in our deposit mix away from single-product CD customers continued. The Company also continues to take advantage of the opportunities that have resulted from distressed credit markets—specifically, a dislocation of assets, banks and people in the overall market. For more information, see *Overview* Acquisition Transactions.

The Company increased its loan portfolio, excluding covered loans, from \$9.5 billion at September 30, 2010 to \$10.3 billion at September 30, 2011. This increase was primarily a result of the Company's commercial banking initiative, loans obtained in the acquisition of Elgin State Bank, as well as growth in the premium finance receivables—life insurance portfolio. The Company continues to make new loans, including in the commercial and commercial real estate sector, where opportunities that meet our underwriting standards exist. The withdrawal of many banks in our area from active lending combined with our strong local relationships has presented us with opportunities to make new loans to well qualified borrowers who have been displaced from other institutions. For more information regarding changes in the Company's loan portfolio, see *Financial Condition* Interest Earning Assets and Note 6 Loans of the Financial Statements presented under Item 1 of this report.

Management considers the maintenance of adequate liquidity to be important to the management of risk. Accordingly, during the third quarter of 2011, the Company continued its practice of maintaining appropriate funding capacity to provide the Company with adequate liquidity for its ongoing operations. In this regard, the Company benefited from its strong deposit base, a liquid short-term investment portfolio and its access to funding from a variety of external funding sources. At September 30, 2011, the Company had over \$1.2 billion in overnight liquid funds and interest-bearing deposits with banks.

The Company experienced a 40% decline in mortgage origination volumes compared to the third quarter of 2010. Over the past twelve months, the Company's period end balances of mortgages held-for-sale and our niche mortgage warehouse lending have declined by \$120.4 million. This decline in originations resulted from an industry-wide fall-off in residential real-estate loan originations due to the interest rate environment and market conditions relative to real estate.

The Company recorded net interest income of \$118.4 million in the third quarter of 2011 compared to \$103.0 million in the third quarter of 2010. The higher level of net interest income recorded in the third quarter of 2011 compared to the third quarter of 2010 resulted from an increase in average earning assets for the third quarter of 2011 by \$1.2 billion compared to the third quarter of 2010. Average earning asset growth over the past 12 months was primarily a result of the \$597.2 million increase in average loans, \$354.3 million of average covered loan growth from the FDIC-assisted bank acquisitions and a \$275.1 million increase in average liquidity management and other earning assets. The \$597.2 million increase in average loans was comprised of a \$360.1 million increase in commercial and industrial loans, a \$241.4 million increase in life insurance premium finance loans, a \$175.5 million increase in commercial premium finance loans and a \$48.0 million increase in

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

commercial real estate loans, partially offset by a decrease in mortgages held for sale of \$135.2 million, a decrease in mortgage warehouse lending of \$54.1 million and a decrease in all other loans of \$38.5 million. The decrease in all other loans was primarily related to home equity loans. The shift in growth over the past 12 months toward commercial and industrial loans is a reflection of the commercial initiatives the Company has implemented. The

Table of Contents

average earning asset growth of \$1.2 billion over the past 12 months was primarily funded by a \$619.4 million increase in the average balances of interest-bearing deposits, an increase in the average balance of net free funds of \$322.4 million and an increase in wholesale funding of \$284.7 million.

Non-interest income totaled \$67.2 million in the third quarter of 2011, decreasing \$12.6 million, or 23%, compared to the third quarter of 2010. The increase is primarily attributable to the higher bargain purchase gain recorded during the current period as a result of the First Chicago FDIC-assisted transaction, offset by lower net gains on available-for-sale securities in 2011.

Non-interest expense totaled \$106.3 million in the third quarter of 2011, increasing \$6.6 million, or 7%, compared to the third quarter of 2010. The increase compared to the third quarter of 2010 was primarily attributable to a \$4.8 million increase in salaries and employee benefits. The increase in salaries and employee benefits was attributable to a \$6.1 million increase in salaries caused by the addition of employees from various acquisition transactions and larger staffing related to organic Company growth, and a \$1.1 million increase from employee benefits (primarily related to health plans and payroll taxes), partially offset by a \$2.4 million decrease in bonus and commissions attributable to variable pay based revenue.

The Current Economic Environment

The Company's results during the quarter continued to be impacted by the existing stressed economic environment and depressed real estate valuations that affected both the U.S. economy, generally, and the Company's local markets, specifically. In response to these conditions, Management continued to carefully monitor the impact on the Company of the financial markets, the depressed values of real property and other assets, loan performance, default rates and other financial and macro-economic indicators in order to navigate the challenging economic environment.

In particular:

The Company's provision for credit losses in the third quarter of 2011 totaled \$29.3 million, an increase of \$3.8 million when compared to the third quarter of 2010. The provision for credit losses in the first nine months of 2011 totaled \$83.8 million, a decrease of \$12.1 million compared to the first nine months of 2010. Net charge-offs increased to \$26.9 million in the third quarter of 2011 (of which \$23.1 million related to commercial and commercial real estate loans), compared to \$21.4 million for the same period in 2010 (of which \$18.3 million related to commercial and commercial real estate loans). Net charge-offs decreased to \$78.3 million in the first nine months of 2011 (of which \$72.5 million related to commercial and commercial real estate loans), compared to \$86.1 million for the same period in 2010 (of which \$59.1 million related to commercial and commercial real estate loans).

The Company increased its allowance for loan losses, excluding covered loans, to \$118.6 million at September 30, 2011, reflecting an increase of \$8.2 million, or 7%, when compared to the same period in 2010 and an increase of \$4.7 million, or 4%, when compared to December 31, 2010. At September 30, 2011, approximately \$64.4 million, or 54%, of the allowance for loan losses was associated with commercial real estate loans and another \$33.8 million, or 28%, was associated with commercial loans. The increase in the allowance for loan losses, excluding covered loans, in the current period is primarily related to loan growth.

The Company has significant exposure to commercial real estate. At September 30, 2011, \$3.5 billion, or 34%, of our loan portfolio, excluding covered loans, was commercial real estate, with more than 91% located in the greater Chicago metropolitan and southeastern Wisconsin market areas. As of September 30, 2011, the commercial real estate loan portfolio was comprised of \$431.5 million related to land, residential and commercial construction, \$533.9 million related to office buildings, \$519.2 million related to retail, \$538.2 million related to industrial use, \$324.8 million related to multi-family and \$1.1 billion related to mixed use and other use types. In analyzing the commercial real estate market, the Company does not rely upon the assessment of broad market statistical data, in large part because the Company's market area is diverse and covers many communities, each of which is impacted differently by economic forces affecting the Company's general market area. As such, the extent of the decline in real estate valuations can vary meaningfully among the different types of commercial and other real estate loans made by the Company. The Company uses its multi-chartered structure and local management knowledge to analyze and manage the local market conditions at each of its banks. Despite these efforts, as of September 30, 2011, the Company had approximately \$70.8 million of non-performing commercial real estate loans representing approximately 2% of the total commercial real estate loan portfolio. \$36.4 million, or 51%, of the total non-performing commercial real estate loan portfolio related to the land, residential and commercial construction sector which remains under stress due to the significant

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

oversupply of new homes in certain portions of our market area.

Total non-performing loans (loans on non-accrual status and loans more than 90 days past due and still accruing interest), excluding covered loans, were \$134.0 million (of which \$70.8 million, or 53%, was related to commercial real estate) at September 30, 2011, a decrease of approximately \$347,000 compared to September 30, 2010.

Table of Contents

The Company's other real estate owned, excluding covered other real estate owned, increased by \$20.2 million, to \$96.9 million during the third quarter of 2011, from \$76.7 million at September 30, 2010. The increase in other real estate owned in the third quarter of 2011 resulted primarily from the acquisition of approximately \$10.3 million of other real estate owned obtained in the Company's acquisition of Elgin State Bank. The \$96.9 million of other real estate owned as of September 30, 2011 was comprised of \$18.5 million of residential real estate development property, \$71.5 million of commercial real estate property and \$6.9 million of residential real estate property.

An acceleration or continuation of real estate valuation and macroeconomic deterioration could result in higher default levels, a significant increase in foreclosure activity, and a material decline in the value of the Company's assets.

During the quarter, Management continued its strategic efforts to aggressively resolve problem loans through liquidation, rather than retention, of loans or real estate acquired as collateral through the foreclosure process. For more information regarding these efforts, see Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation Overview and Strategy in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2010. The level of loans past due 30 days or more and still accruing interest, excluding covered loans, totaled \$157.4 million as of September 30, 2011, increasing \$10.4 million compared to the balance of \$147.0 million as of December 31, 2010.

At September 30, 2011, the Company had a \$7.8 million estimated liability on loans expected to be repurchased from loans sold to investors compared to an \$8.7 million liability as of September 30, 2010. Investors request the Company to indemnify them against losses on certain loans or to repurchase loans which the investors believe do not comply with applicable representations. For more information regarding requests for indemnification on loans sold, see Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation Overview and Strategy in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

In addition, during the third quarter of 2011, the Company restructured certain loans in the amount of \$13.5 million (representing 26 credit relationships) by providing economic concessions to borrowers to better align the terms of their loans with their current ability to pay. At September 30, 2011, approximately \$104.4 million in loans had terms modified, with \$85.4 million of these modified loans in accruing status.

Trends in Our Three Operating Segments During the Third Quarter

Community Banking

Net interest income and margin. Net interest income totaled \$118.4 million for the third quarter of 2011 compared to \$108.7 million for the second quarter of 2011 and \$103.0 million for the third quarter of 2010. The net interest margin for the third quarter of 2011 was 3.37% compared to 3.40% for the second quarter of 2011 and 3.22% for the third quarter of 2010. The 15 basis point increase in the third quarter of 2011 compared to the third quarter of 2010 was primarily attributable to a 43 basis point decline in the cost of interest-bearing deposits over the last 12 months. Partially offsetting this improvement was a decrease in accretible discount recognized as interest income on the purchased life insurance premium portfolio as prepayments declined and the negative impact of pricing pressures on the commercial premium finance portfolio.

The three basis point decrease in net interest margin in the third quarter of 2011 compared to the second quarter of 2011 resulted from the large increase in interest-bearing cash balances which yielded only 32 basis points in the third quarter and continued negative pricing pressures on the commercial premium finance portfolio. Excess liquidity balances continue to restrict net interest margin expansion as deposit growth exceeded strong loan growth. Partially offsetting these items was continued lower repricing of interest-bearing deposits, as the cost of this funding source declined by 12 basis points in the third quarter.

Funding mix and related costs. Community banking profitability has been bolstered in recent quarters as fixed term certificates of deposit have been renewing at lower rates given the historically low interest rate levels in place recently and growth in non-interest bearing deposits as a result of the Company's commercial banking initiative.

Level of non-performing loans and other real estate owned. Given the current economic conditions, these costs, specifically problem loan expenses, have been at elevated levels in recent quarters. However, non-performing loans decreased in the third quarter of 2011 as compared to the second quarter of 2011 and third quarter of 2010 whereas other real-estate owned increased in the third quarter of 2011 as compared to the second quarter of 2011 and third quarter of 2010.

Mortgage banking revenue. The third quarter of 2011 was characterized by the continuation of an industry wide decline in real-estate loan originations which resulted in a decrease in the Company's real-estate loan originations in the third quarter of 2011 as compared to the third quarter of 2010. The decrease in mortgage banking revenue in the third quarter of 2011 as compared to the third quarter of 2010 resulted

primarily from a decrease in gain on sales of loans, which was driven by lower origination volumes in the current quarter.

Table of Contents

For more information regarding our community banking business, please see *Overview and Strategy Community Banking* under *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation* in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

Specialty Finance

Financing of Commercial Insurance Premiums. FIFC originated approximately \$867.7 million in commercial insurance premium finance loans in the third quarter of 2011 compared to \$902.8 million in the second quarter of 2011 and \$772.9 million in the third quarter of 2010. The increase in originations in the third quarter of 2011 compared to the third quarter of 2010 was due to the hiring of several new sales people who joined FIFC with strong existing business relationships. The decrease in originations in the current quarter as compared to the second quarter of 2011 is seasonal in nature.

Financing of Life Insurance Premiums. FIFC originated approximately \$91.3 million in life insurance premium finance loans in the third quarter of 2011 compared to \$121.1 million in the second quarter of 2011, and compared to \$115.0 million in the third quarter of 2010. The decrease in life insurance premium finance loan origination activity in the current quarter was a result of FIFC ending a relationship with one of its larger producing brokers as well as experiencing increased competition for larger transactions.

For more information regarding our specialty finance business, please see *Overview and Strategy Specialty Finance* under *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation* in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

Wealth Management Activities

The wealth management segment recorded higher revenues in the third quarter of 2011 compared to the third quarter of 2010 primarily as a result of the acquisition of Great Lakes Advisors. For more information on the Great Lakes Advisors transaction, see *Overview Acquisition Transactions*.

For more information regarding our wealth management business, please see *Overview and Strategy Wealth Management Activities* under *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation* in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

Acquisition Transactions

In response to market dislocations, during the third quarter and first nine months of 2011, the Company continued to engage in a number of opportunistic acquisitions. These transactions, which are described below, included both FDIC-assisted and non-FDIC-assisted acquisitions by the Company.

FDIC-Assisted Transactions

On July 8, 2011, the Company announced that its wholly-owned subsidiary bank, Northbrook Bank, acquired certain assets and liabilities and the banking operations of First Chicago Bank & Trust (*First Chicago*) in an FDIC-assisted transaction. First Chicago operated seven locations in Illinois: three in Chicago, one each in Bloomingdale, Itasca, Norridge and Park Ridge, and had approximately \$768.9 million in total assets and \$667.8 million in total deposits as of the acquisition date. Northbrook Bank acquired substantially all of First Chicago's assets at a discount of approximately 12% and assumed all of the non-brokered deposits at a premium of approximately 0.5%.

On March 25, 2011, the Company announced that its wholly-owned subsidiary bank, Advantage National Bank Group (*Advantage*), acquired certain assets and liabilities and the banking operations of The Bank of Commerce (*TBOC*) in an FDIC-assisted transaction. TBOC operated one location in Wood Dale, Illinois and had approximately \$174.0 million in total assets and \$164.7 million in total deposits as of the acquisition date. Advantage acquired substantially all of TBOC's assets at a discount of approximately 14% and assumed all of the non-brokered deposits at a premium of approximately 0.1%. Advantage subsequently changed its name to Schaumburg Bank and Trust Company, N.A. (*Schaumburg*).

On February 4, 2011, the Company announced that its wholly-owned subsidiary bank, Northbrook Bank, acquired certain assets and liabilities and the banking operations of Community First Bank-Chicago (*CFBC*) in an FDIC-assisted transaction. CFBC operated one location in Chicago and had approximately \$50.9 million in total assets and \$48.7 million in total deposits as of the acquisition date. Northbrook Bank acquired substantially all of CFBC's assets at a discount of approximately 8% and assumed all of the non-brokered deposits at a premium of approximately 0.5%.

Table of Contents

Loans comprise the majority of the assets acquired in FDIC-assisted transactions and are subject to loss sharing agreements with the FDIC whereby the FDIC has agreed to reimburse the Company for 80% of losses incurred on the purchased loans, other real estate owned (OREO), and certain other assets. Additionally, the loss share agreements with the FDIC require the Company to reimburse the FDIC in the event that actual losses on covered assets are lower than the original loss estimates agreed upon with the FDIC with respect of such assets in the loss share agreements. The Company refers to the loans subject to loss-sharing agreements as covered loans and use the term covered assets to refer to covered loans, covered OREO and certain other covered assets. At their respective acquisition dates, the Company estimated the fair value of the reimbursable losses, which were approximately \$273.3 million, \$48.9 million and \$6.7 million related to the First Chicago, TBOC and CFBC acquisitions, respectively. The agreements with the FDIC require that the Company follow certain servicing procedures or risk losing the FDIC reimbursement of covered asset losses.

The loans covered by the loss sharing agreements are classified and presented as covered loans and the estimated reimbursable losses are recorded as FDIC indemnification assets, both in the Consolidated Statements of Condition. The Company recorded the acquired assets and liabilities at their estimated fair values at the acquisition date. The fair value for loans reflected expected credit losses at the acquisition date, therefore the Company will only recognize a provision for credit losses and charge-offs on the acquired loans for any further credit deterioration. The FDIC-assisted transactions resulted in bargain purchase gains of \$27.4 million for First Chicago, \$8.6 million for TBOC and \$2.0 million for CFBC, which are shown as a component of non-interest income on the Company's Consolidated Statements of Income.

Other Transactions

Acquisition of Elgin State Bank

On September 30, 2011, the Company completed its acquisition of Elgin State Bancorp, Inc. (ESBI). ESBI was the parent company of Elgin State Bank, which operated three banking locations in Elgin, Illinois. As part of the transaction, Elgin State Bank merged into the Company's wholly-owned subsidiary bank, St. Charles Bank & Trust Company (St. Charles), and the three acquired banking locations are operating as branches of St. Charles under the brand name Elgin State Bank. Elgin State Bank had approximately \$263.2 million in assets and \$241.1 million in deposits as of September 30, 2011.

Acquisition of Great Lakes Advisors

On July 1, 2011, the Company acquired Great Lakes Advisors, Inc. (Great Lakes Advisors), a Chicago-based investment manager with approximately \$2.4 billion in assets under management. Great Lakes Advisors merged with Wintrust's existing asset management business, Wintrust Capital Management, LLC and operates as Great Lakes Advisors, LLC, a Wintrust Wealth Management Company. Wintrust Wealth Management, which includes Great Lakes Advisors, Wayne Hummer Investments and the Chicago Trust Company, now has \$12.8 billion assets under administration.

Acquisition of River City Mortgage

On April 13, 2011, the Company announced the acquisition of certain assets and the assumption of certain liabilities of the mortgage banking business of River City Mortgage, LLC (River City) of Bloomington, Minnesota. With offices in Minnesota, Nebraska and North Dakota, River City originated nearly \$500 million in mortgage loans in 2010.

Acquisition of Woodfield Planning Corporation

On February 3, 2011, the Company acquired certain assets and assumed certain liabilities of the mortgage banking business of Woodfield Planning Corporation (Woodfield) of Rolling Meadows, Illinois. With offices in Rolling Meadows, Illinois and Crystal Lake, Illinois, Woodfield originated approximately \$180 million in mortgage loans in 2010.

Table of Contents**RESULTS OF OPERATIONS****Earnings Summary**

The Company's key operating measures for the three and nine month periods ended September 30, 2011, as compared to the same periods last year, are shown below:

Allowance for loan losses to total loans ⁽⁵⁾	1.15 %	1.17 %	(2) bp
Allowance for credit losses to total loans ⁽⁵⁾	1.29	1.19	10
Non-performing loans to total loans	1.30	1.42	(12)

(1) *Net revenue is net interest income plus non-interest income.*

(2) *See following section titled, **Supplementary Financial Measures/Ratios** for additional information on this performance measure/ratio.*

(3) *The net overhead ratio is calculated by netting total non-interest expense and total non-interest income, annualizing this amount, and dividing by that period's total average assets. A lower ratio indicates a higher degree of efficiency.*

(4) *The efficiency ratio is calculated by dividing total non-interest expense by tax-equivalent net revenues (less securities gains or losses). A lower ratio indicates more efficient revenue generation.*

(5) *The allowance for credit losses includes both the allowance for loan losses and the allowance for lending-related commitments.*

(6) *Pre-tax adjusted earnings excludes the provision for credit losses and certain significant items.*

Certain returns, yields, performance ratios, and quarterly growth rates are annualized in this presentation and throughout this report to represent an annual time period. This is done for analytical purposes to better discern for decision-making purposes underlying performance trends when compared to full-year or year-over-year amounts. For example, balance sheet growth rates are most often expressed in terms of an annual rate. As such, 5% growth during a quarter would represent an annualized growth rate of 20%.

Table of Contents

Supplemental Financial Measures/Ratios

The accounting and reporting policies of Wintrust conform to generally accepted accounting principles (GAAP) in the United States and prevailing practices in the banking industry. However, certain non-GAAP performance measures and ratios are used by management to evaluate and measure the Company s performance. These include taxable-equivalent net interest income (including its individual components), net interest margin (including its individual components), the efficiency ratio, tangible common equity ratio, tangible common book value per share and pre-tax adjusted earnings. Management believes that these measures and ratios provide users of the Company s financial information a more meaningful view of the performance of the interest-earning assets and interest-bearing liabilities and of the Company s operating efficiency. Other financial holding companies may define or calculate these measures and ratios differently.

Management reviews yields on certain asset categories and the net interest margin of the Company and its banking subsidiaries on a fully taxable-equivalent (FTE) basis. In this non-GAAP presentation, net interest income is adjusted to reflect tax-exempt interest income on an equivalent before-tax basis. This measure ensures comparability of net interest income arising from both taxable and tax-exempt sources. Net interest income on a FTE basis is also used in the calculation of the Company s efficiency ratio. The efficiency ratio, which is calculated by dividing non-interest expense by total taxable-equivalent net revenue (less securities gains or losses), measures how much it costs to produce one dollar of revenue. Securities gains or losses are excluded from this calculation to better match revenue from daily operations to operational expenses. Management considers the tangible common equity ratio and tangible book value per common share as useful measurements of the Company s equity. Pre-tax adjusted earnings is a significant metric in assessing the Company s operating performance. Pre-tax adjusted earnings is adjusted to exclude the provision for credit losses and certain significant items.

Table of Contents

A reconciliation of certain non-GAAP performance measures and ratios used by the Company to evaluate and measure the Company's performance to the most directly comparable GAAP financial measures is shown below:

(Dollars in thousands)	Three Months Ended September 30,		Nine Months Ended September 30,

Critical Accounting Policies

The Company's Consolidated Financial Statements are prepared in accordance with generally accepted accounting principles in the United States and prevailing practices of the banking industry. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the financial statements and accompanying notes. Certain policies and accounting principles inherently have a greater reliance on the use of estimates, assumptions and judgments, and as such have a greater possibility that changes in those estimates and assumptions could produce financial results that are materially different than originally reported. Estimates, assumptions and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event, are based on information available as of the date of the financial statements; accordingly, as information changes, the financial statements could reflect different estimates and assumptions. Management views critical accounting policies to be those which are highly dependent on subjective or complex judgments, estimates and assumptions, and where changes in those estimates and assumptions could have a significant impact on the financial statements. Management currently views critical accounting policies to include the determination of the allowance for loan losses, covered loan losses, and the allowance for losses on lending-related commitments, estimations of fair value, the valuations required for impairment testing of goodwill, the valuation and accounting for derivative instruments and income taxes as the accounting areas that require the most subjective and complex judgments, and as such could be most subject to revision as new information becomes available. For a more detailed discussion on these critical accounting policies, see Summary of Critical Accounting Policies beginning on page 45 of the Company's 2010 Form 10-K.

Net Income

Net income for the quarter ended September 30, 2011 totaled \$30.2 million, an increase of \$10.1 million, or 50%, compared to the third quarter of 2010, and an increase of approximately \$18.4 million, or 157%, compared to the second quarter of 2011. On a per share basis, net income for the third quarter of 2011 totaled \$0.65 per diluted common share compared to \$0.47 in the third quarter of 2010. Net income per diluted common share in the third quarter of 2011 increased \$0.40, compared to \$0.25 per diluted common share in the second quarter of 2011. Average common shares and dilutive common shares in the third quarter of 2011 increased by approximately 14.0 million shares, or 44%, compared to the same period in 2010.

The most significant factors impacting net income for the third quarter of 2011 as compared to the same period in the prior year include an increase in bargain purchase gains recognized and reduced costs on interest-bearing deposits as rates decline, offset by a decrease in mortgage banking revenue driven by lower origination volumes and an increase in salary expense caused by the addition of employees from acquisitions. The return on average common equity for the third quarter of 2011 was 7.94%, compared to 5.44% for the prior year third quarter and 3.05% for the second quarter of 2011.

Net Interest Income

The primary source of the Company's revenue is net interest income. Net interest income is the difference between interest income and fees on earnings assets, such as loans and securities, and interest expense on the liabilities to fund those assets, including interest bearing deposits and other borrowings. The amount of net interest income is affected by both changes in the level of interest rates and the amount and composition of earning assets and interest bearing liabilities. Net interest margin represents tax-equivalent net interest income as a percentage of the average earning assets during the period.

Table of Contents

Quarter Ended September 30, 2011 compared to the Quarter Ended September 30, 2010

The following table presents a summary of the Company's net interest income and related net interest margin, calculated on a fully taxable equivalent basis, for the third quarter of 2011 as compared to the third quarter of 2010 (linked quarters):

(Dollars in thousands)	For the Three Months Ended September 30, 2011			For the Three Months Ended September 30, 2010		
	Average	Interest	Rate	Average	Interest	Rate
Liquidity management assets ^{(1) (2) (7)}	\$ 3,083,508	\$ 14,508	1.87 %	\$ 2,802,964	\$ 9,625	1.36 %

Subordinated notes	40,000	168	1.65	55,000	265	1.89
Junior subordinated notes	249,493	4,437	6.96	249,493	4,448	6.98
Total interest-bearing liabilities	\$ 12,279,899	\$ 36,541	1.18 %	\$ 11,375,798	\$ 44,421	1.55 %
Non-interest bearing deposits	1,553,769			1,005,170		
Other liabilities	185,042			243,282		
Equity	1,507,717			1,391,507		
Total liabilities and shareholders' equity	\$ 15,526,427			\$ 14,015,757		
Interest rate spread ^{(5) (7)}			3.23 %			3.04 %
Net free funds/contribution ⁽⁶⁾	\$ 1,713,179		0.14 %	\$ 1,390,741		0.18 %
Net interest income/Net interest margin ⁽⁷⁾		\$ 118,828	3.37 %		\$ 103,396	3.22 %

(1) Liquidity management assets include available-for-sale securities, interest earning deposits with banks, federal funds sold and securities purchased under resale agreements.

(2) Interest income on tax-advantaged loans, trading securities and securities reflects a tax-equivalent adjustment based on a marginal federal corporate tax rate of 35%. The total adjustments for the three months ended September 30, 2011 and 2010 were \$418,000 and \$416,000, respectively.

(3) Other earning assets include brokerage customer receivables and trading account securities.

(4) Loans, net of unearned income, include loans held-for-sale and non-accrual loans.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

- (5) Interest rate spread is the difference between the yield earned on earning assets and the rate paid on interest-bearing liabilities.
- (6) Net free funds are the difference between total average earning assets and total average interest-bearing liabilities. The estimated contribution to net interest margin from net free funds is calculated using the rate paid for total interest-bearing liabilities.
- (7) See Supplemental Financial Measures/Ratios for additional information on this performance ratio.

The net interest margin increased 15 basis points in the third quarter of 2011 compared to the third quarter of 2010. This increase was primarily attributable to a 43 basis point decline in the cost of interest-bearing deposits over the last 12 months. Partially offsetting this improvement was a decrease on the yield on earning assets, primarily as a result of lower yields on loans due to lower amounts of accretable discount recognized as interest income on the purchased life insurance premium portfolio as prepayments declined and the negative impact of pricing pressures on the commercial premium finance portfolio.

The majority of covered loans are accounted for in accordance with ASC 310-30. As such, the yield on these loans at the acquisition date represents a fair value risk-free loan yield. In periods subsequent to the quarter of acquisition, the Company has experienced cash collections generally better than estimated for the initial valuation. Overall, expected losses and expected estimated lives have decreased, which has led to generally higher effective yields as estimated cash flows on the pools of loans has improved.

Table of Contents

Quarter Ended September 30, 2011 compared to the Quarter Ended June 30, 2011

The following table presents a summary of the Company's net interest income and related net interest margin, calculated on a fully taxable equivalent basis, for the third quarter of 2011 as compared to the second quarter of 2011 (sequential quarters):

(Dollars in thousands)	For the Three Months Ended September 30, 2011			For the Three Months Ended June 30, 2011

Net free funds/contribution ⁽⁶⁾	\$ 1,713,179		0.14 %	\$ 1,751,685		0.18 %
Net interest income/Net interest margin ⁽⁷⁾		\$ 118,828	3.37 %		\$ 109,114	3.40 %

(1) Liquidity management assets include available-for-sale securities, interest earning deposits with banks, federal funds sold and securities purchased under resale agreements.

(2) Interest income on tax-advantaged loans, trading securities and securities reflects a tax-equivalent adjustment based on a marginal federal corporate tax rate of 35%. The total adjustments for the three months ended September 30, 2011 and June 30, 2011 were \$418,000 and \$408,000, respectively.

(3) Other earning assets include brokerage customer receivables and trading account securities.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

- (4) Loans, net of unearned income, include loans held-for-sale and non-accrual loans.
- (5) Interest rate spread is the difference between the yield earned on earning assets and the rate paid on interest-bearing liabilities.
- (6) Net free funds are the difference between total average earning assets and total average interest-bearing liabilities. The estimated contribution to net interest margin from net free funds is calculated using the rate paid for total interest-bearing liabilities.
- (7) See Supplemental Financial Measures/Ratios for additional information on this performance ratio.

The net interest margin for the third quarter of 2011 was 3.37% compared to 3.40% in the second quarter of 2011. The three basis point decrease in net interest margin in the third quarter of 2011 compared to the second quarter of 2011 resulted from the large increase in interest-bearing cash balances yielding 32 basis points in the third quarter and continued negative pricing pressures on the commercial premium finance portfolio. Excess liquidity balances continue to restrict net interest margin expansion as deposit growth exceeded strong loan growth. Partially offsetting these items was continued lower repricing of interest-bearing deposits, as the cost of this funding source declined by 12 basis points in the third quarter.

The majority of covered loans are accounted for in accordance with ASC 310-30. As such, the yield on these loans at the acquisition date represents a fair value risk-free loan yield. In periods subsequent to the quarter of acquisition, the Company has experienced cash collections generally better than estimated for the initial valuation. Overall, expected losses and expected estimated lives have decreased, which has led to generally higher effective yields as estimated cash flows on the pools of loans has improved. The yield on covered loans decreased in the third quarter of 2011 compared to the second quarter of 2011 as a result of the First Chicago acquisition during the third quarter of 2011.

Table of Contents

Nine months ended September 30, 2011 compared to the Nine months Ended September 30, 2010

The following table presents a summary of the Company's net interest income and related net interest margin, calculated on a fully taxable equivalent basis, for the first nine months of 2011 as compared to the first nine months of 2010 (sequential quarters):

(Dollars in thousands)	For the Nine Months Ended September 30, 2011			For the Nine Months Ended September 30, 2010		
	Average	Interest	Rate	Average	Interest	Rate
Liquidity management assets ^{(1) (2) (7)}	\$ 2,768,817	\$ 39,060	1.89 %	\$ 2,592,751	\$ 36,084	1.86 %

Net interest income/Net interest margin ⁽⁷⁾		\$ 337,970	3.41 %		\$ 304,480	3.34 %

(1) Liquidity management assets include available-for-sale securities, interest earning deposits with banks, federal funds sold and securities purchased under resale agreements.

(2) Interest income on tax-advantaged loans, trading securities and securities reflects a tax-equivalent adjustment based on a marginal federal corporate tax rate of 35%. The total adjustments for the nine months ended September 30, 2011 and 2010 were \$1.2 million and \$1.3 million, respectively.

(3) Other earning assets include brokerage customer receivables and trading account securities.

(4) Loans, net of unearned income, include loans held-for-sale and non-accrual loans.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

- (5) Interest rate spread is the difference between the yield earned on earning assets and the rate paid on interest-bearing liabilities.
- (6) Net free funds are the difference between total average earning assets and total average interest-bearing liabilities. The estimated contribution to net interest margin from net free funds is calculated using the rate paid for total interest-bearing liabilities.
- (7) See Supplemental Financial Measures/Ratios for additional information on this performance ratio.

The net interest margin for the first nine months of 2011 was 3.41%, compared to 3.34% in the first nine months of 2010. Average earning assets for the first nine months of 2011 increased by \$1.1 billion compared to the first nine months of 2010. This average earning asset growth was primarily a result of the \$599.9 million increase in average loans, \$297.7 million of average covered loan growth from the FDIC-assisted bank acquisitions and a \$154.4 million increase in liquidity management and other earning assets. Growth in the life insurance premium finance portfolio of \$285.6 million and growth in the commercial and industrial portfolio of \$263.7 million accounted for the majority of the total average loan growth over the past 12 months. The average earning asset growth of \$1.1 billion over the past 12 months was primarily funded by a \$468.7 million increase in the average balances of interest-bearing deposits and an increase in the average balance of net free funds of \$444.2 million.

Table of Contents*Analysis of Changes in Tax-equivalent Net Interest Income*

The following table presents an analysis of the changes in the Company's tax-equivalent net interest income comparing the three month periods ended September 30, 2011 and June 30, 2011, the nine month periods ended September 30, 2011 and September 30, 2010 and the three month periods ended September 30, 2011 and September 30, 2010. The reconciliations set forth the changes in the tax-equivalent net interest income as a result of changes in volumes, changes in rates and differing number of days in each period:

(Dollars in thousands)	Third Quarter of 2011 Compared to Second Quarter of 2011	First Nine Months of 2011 Compared to First Nine Months of 2010	Third Quarter of 2011 Compared to Third Quarter of 2010
Tax-equivalent net interest income for comparative period	\$ 109,114	\$ 304,480	\$ 103,396
Change due to mix and growth of earning assets and interest-bearing liabilities (volume)	7,973	34,367	10,746
Change due to interest rate fluctuations (rate)	555	(877)	4,686
Change due to number of days in each period	1,186		
Tax-equivalent net interest income for the period ended September 30, 2011	\$ 118,828	\$ 337,970	\$ 118,828

Table of Contents**Non-interest Income**

For the third quarter of 2011, non-interest income totaled \$67.2 million, an increase of \$12.6 million, or 23%, compared to the third quarter of 2010. The increase in the third quarter of 2011 as compared to the prior year quarter was primarily attributable to higher bargain purchase gains, wealth management revenues, and fees from covered call options, partially offset by decreases in mortgage banking revenue and gains on available-for-sale securities. On a year-to-date basis, non-interest income for the first nine months of 2011 totaled \$144.8 million and decreased \$2.9 million, or 2%, compared to the same period in 2010.

The following table presents non-interest income by category for the periods presented:

NM - Not Meaningful

The significant changes in non-interest income for the three and nine month periods ended September 30, 2011 compared to same periods in the prior year are discussed below.

Wealth management revenue is comprised of the trust and asset management revenue of The Chicago Trust Company and Great Lakes Advisors; and brokerage commissions, managed money fees and insurance product commissions at Wayne Hummer

Table of Contents

Investments. Wealth management revenue totaled \$12.0 million in the third quarter of 2011 and \$9.0 million in the third quarter of 2010, an increase of 34%. This increase is mostly attributable to the acquisition of Great Lakes Advisors. On a year-to-date basis, wealth management revenues totaled \$32.8 million in the first nine months of 2011, compared to \$26.8 million in the first nine months of 2010. Higher asset levels associated with growth in the wealth management customer base, including those added as a result of the Great Lakes Advisors acquisition, over the first nine months of 2011 have helped drive revenue growth and more than offset the third quarter decline in equity markets.

Mortgage banking revenue includes revenue from activities related to originating, selling and servicing residential real estate loans for the secondary market. For the quarter ended September 30, 2011, mortgage banking revenue totaled \$14.5 million, a decrease of \$6.5 million when compared to the third quarter of 2010. For the nine months ended September 30, 2011, mortgage banking revenue totaled \$38.9 million as compared to \$38.7 million for the nine months ended September 30, 2010. Mortgages originated and sold totaled \$642 million in the third quarter of 2011 compared to \$1.1 billion in the third quarter of 2010. The decrease in mortgage banking revenue in the third quarter of 2011 as compared to the third quarter of 2010 resulted primarily from a decrease in gain on sales of loans, which was driven by lower origination volumes in the current quarter. Additionally, the Company enters into residential mortgage loan sale agreements with investors in the normal course of business. These agreements provide recourse to investors through certain representations concerning credit information, loan documentation, collateral and insurability. Investors request the Company to indemnify them against losses on certain loans or to repurchase loans which the investors believe do not comply with applicable representations. An increase in requests for loss indemnification can negatively impact mortgage banking revenue as additional recourse expense. The loss reserves established for loans expected to be repurchased is based on trends in repurchase and indemnification requests, actual loss experience, known and inherent risks in the loans that have been sold, and current economic conditions. The decrease in 2011 on a quarter and year-to-date basis in loss reserves established for loans expected to be repurchased primarily resulted from estimations of fewer loss indemnification requests from investors.

A summary of the mortgage banking revenue components is shown below:

Mortgage banking revenue

(Dollars in thousands)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010
Mortgage loans originated and sold	\$ 641,742	\$ 1,076,736	\$ 1,662,368	\$ 2,495,880
Mortgage loans serviced for others	952,257	787,923		
Fair value of mortgage servicing rights (MSRs)	6,740	5,179		
MSRs as a percentage of loans serviced	0.71%	0.66%		
Gain on sales of loans and other fees	\$ 17,366	\$ 23,884	\$ 41,996	\$ 52,087
Mortgage servicing rights fair value adjustments	(2,631)	(1,472)	(3,626)	(3,789)
Recourse obligation on loans previously sold	(266)	(1,432)	547	(9,605)
Total mortgage banking revenue	\$ 14,469	\$ 20,980	\$ 38,917	\$ 38,693
Gain on sales of loans and other fees as a percentage of loans sold	2.71%	2.22%	2.53%	2.09%

The gain on bargain purchases of \$38.0 million recognized in the first nine months of 2011 relates to the FDIC-assisted acquisitions of TBOC by Advantage and CFBC by Northbrook in the first quarter of 2011 and First Chicago by Northbrook in the third quarter of 2011. See Note 3 of the Financial Statements presented under Item 1 of this report for details of FDIC-assisted acquisitions. The gain on bargain purchases of \$44.0 million in the first nine months of 2010 relate to the FDIC acquisitions in the second and third quarters of 2010 and gains of \$10.9 million related to loans acquired in the Company's acquisition of a life insurance premium finance loan portfolio.

Trading gains of \$591,000 were recognized by the Company in the third quarter of 2011 compared to gains of \$210,000 in the third quarter of 2010. On a year-to-date basis, trading gains totaled \$121,000 in 2011 compared to trading gains of \$4.6 million in the first nine months of 2010. Lower trading income in 2011 resulted primarily from realizing larger market value increases in the prior year on certain collateralized mortgage obligations held in trading.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

The Company recognized \$225,000 of net gains on available-for-sale securities in the third quarter of 2011 compared to a net gain of \$9.2 million in the prior year third quarter. On a year-to-date basis, net gains on available-for-sale securities totaled \$1.5 million 2011 compared to \$9.7 million in 2010. The net gains in the third quarter of 2010 primarily related to the sale of certain collateralized mortgage obligations.

Table of Contents

Other non-interest income for the third quarter of 2011 totaled \$8.5 million and \$22.5 million for the first nine months of 2011, compared to \$5.3 million and \$13.9 million for the first three and nine month periods of 2010, respectively. Fees from certain covered call option transactions increased by \$2.7 million in the third quarter of 2011 and \$7.0 million in the first nine months of 2011 as compared to the same periods in the prior year. Compression in the net interest margin has historically been and continues to be effectively offset by the Company's covered call strategy. Miscellaneous income is primarily comprised of revenue from interest rate hedging transactions related to both customer-based trades and the related matched trades with inter-bank dealer counterparties. The Company recognized \$2.7 million in revenue from interest rate hedging transactions in the third quarter of 2011 compared to \$502,000 in the third quarter of 2010. On a year-to-date basis, the Company recognized \$5.2 million in revenue from interest rate hedging transactions in 2011 compared to \$592,000 in 2010. The revenue recognized on this customer-based activity is sensitive to the pace of organic loan growth, the shape of the LIBOR curve and the customers' expectations of interest rates.

Table of Contents**Non-interest Expense**

Non-interest expense for the third quarter of 2011 totaled \$106.3 million and increased approximately \$6.6 million, or 7%, compared to the third quarter of 2010. On a year-to-date basis, non-interest expense for the first nine months of 2011 totaled \$301.6 million and increased \$25.3 million, or 9%, over the same period in 2010.

The following table presents non-interest expense by category for the periods presented:

Table of Contents

The significant changes in non-interest expense for the three and nine month periods ended September 30, 2011 compared to same periods in the prior year are discussed below.

Salaries and employee benefits comprised 58% of total non-interest expense in the third quarter of 2011 as compared to 57% of total non-interest expense in the prior year quarter. Salaries and employee benefits expense increased \$4.8 million, or 9%, in the third quarter of 2011 compared to the third quarter of 2010 primarily as a result of a \$6.1 million increase in salaries caused by the addition of employees from the various acquisitions and larger staffing as the Company grows and a \$1.1 million increase from employee benefits (primarily health plan and payroll taxes related), partially offset by a \$2.4 million decrease in bonus and commissions attributable to variable pay based revenue. On a year-to-date basis, salaries and employee benefits expense increased \$14.3 million, or 9%, in the first nine months of 2011 compared to the first nine months of 2010, primarily as a result of a \$13.4 million increase in salaries caused by the addition of employees from the various acquisitions and larger staffing as the Company grows and a \$4.5 million increase from employee benefits (primarily health plan and payroll taxes related), partially offset by a \$3.6 million decrease in bonus and commissions attributable to variable pay based revenue.

Occupancy expense includes depreciation on premises, real estate taxes, utilities and maintenance of premises, as well as net rent expense for leased premises. For the third quarter of 2011 occupancy expense was \$7.5 million, an increase of \$1.3 million, or 20%, compared to the same period in 2010. For the first nine months of 2011, occupancy expense was \$20.8 million, an increase of \$2.3 million compared to the same period in 2010. These increases are primarily the result of rent expense on additional leased premises and depreciation on owned locations which were obtained in the FDIC-assisted acquisitions.

Professional fees include legal, audit and tax fees, external loan review costs and normal regulatory exam assessments. Professional fees for the third quarter of 2011 were \$5.1 million, an increase of \$530,000, or 12%, compared to the same period in 2010. On a year-to-date basis, professional fees increased \$1.6 million to \$13.2 million for the first nine months of 2011 compared to \$11.6 million for the first nine months of 2010. These increases are primarily a result of increased legal costs related to non-performing assets and recent acquisitions.

FDIC insurance expense for the third quarter of 2011 was \$3.1 million, a decrease of \$1.5 million, or 33%, compared to the same period in 2010. Additionally, on a year-to-date basis, FDIC insurance expense decreased \$2.6 million to \$10.9 million for the first nine months of 2011 compared to \$13.5 million in the first nine months of 2010. Effective April 1, 2011, standards applied in FDIC assessments set forth in the Federal Deposit Insurance Act were revised by the Dodd-Frank Wall Street Reform and Consumer Protection Act. These revisions modified definitions of a company's insurance assessment base and assessment rates which led to the Company's decreased FDIC expense for the third quarter and first nine months of 2011 as compared to the same periods in the prior year.

OREO expenses include all costs related to obtaining, maintaining and selling of other real estate owned properties. This expense totaled \$5.1 million in the third quarter of 2011, an increase of \$367,000 compared to \$4.8 million in the third quarter of 2010. On year-to-date basis, OREO expenses totaled \$17.5 million in the first nine months of 2011 compared to \$11.9 million in the first nine months of 2010. The increase in OREO expenses is primarily related to higher valuation adjustments of properties held in OREO in the first nine months of 2011.

Income Taxes

The Company recorded income tax expense of \$19.8 million for the three months ended September 30, 2011, compared to \$12.3 million for same period of 2010. Income tax expense was \$37.7 million and \$29.5 million for the nine months ended September 30, 2011 and 2010, respectively. The effective tax rates were 39.7% and 37.9% for the third quarters of 2011 and 2010, respectively and 39.3% and 37.6% for the 2011 and 2010 year-to-date periods, respectively. The higher effective tax rate in the 2011 periods as compared to the 2010 periods reflects a higher level of state income tax expense, including the effect of the 2.2% increase Illinois corporate income tax rate effective January 1, 2011 on 2011 earnings, and a charge of \$300,000 in the first quarter of 2011 to increase the recorded value of deferred tax liabilities as a result of this change in rates.

Operating Segment Results

The Company's operations consist of three primary segments: community banking, specialty finance and wealth management. The Company's profitability is primarily dependent on the net interest income, provision for credit losses, non-interest income and operating expenses of its community banking segment. The net interest income of the community banking segment includes interest income and related interest costs from portfolio loans that were purchased from the specialty finance segment. For purposes of internal segment profitability analysis, management reviews the results of its specialty finance segment as if all loans originated and sold to the community banking segment were retained within that segment's operations.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

Similarly, for purposes of analyzing the contribution from the wealth management segment, management allocates a portion of the net interest income earned by the community banking segment on deposit balances of customers of the wealth management segment to

Table of Contents

the wealth management segment. (See wealth management deposits discussion in the Deposits section of this report for more information on these deposits).

The community banking segment's net interest income for the quarter ended September 30, 2011 totaled \$109.2 million as compared to \$95.4 million for the same period in 2010, an increase of \$13.8 million, or 14%. On a year-to-date basis, net interest income totaled \$312.1 million for the first nine months of 2011, an increase of \$31.3 million, or 11%, as compared to the \$280.8 million recorded last year. These increases are primarily attributable to the FDIC-assisted bank acquisitions and the ability to raise interest-bearing deposits at more reasonable rates. The community banking segment's non-interest income totaled \$55.7 million in the third quarter of 2011, an increase of \$11.4 million, or 26%, when compared to the third quarter of 2010 total of \$44.3 million. On a year-to-date basis, the segment's non-interest income totaled \$109.2 million for the first nine months of 2011, an increase of \$8.1 million, or 8%, when compared to the first nine months of 2010 total of \$101.1 million. These increases are primarily attributable to increased bargain purchase gains in the third quarter of 2011 as a result of the First Chicago acquisition. The community banking segment's net income for the quarter ended September 30, 2011 totaled \$32.9 million, an increase of \$10.5 million, as compared to net income in the third quarter of 2010 of \$22.4 million. The after-tax profit for the nine months ended September 30, 2011, totaled \$61.2 million, an increase of \$8.1 million, or 15% as compared to the prior year total of \$53.1 million.

Net interest income for the specialty finance segment totaled \$28.8 million for the quarter ended September 30, 2011, compared to \$22.8 million for the same period in 2010, an increase of \$6.0 million or 26%. On a year-to-date basis, net interest income totaled \$84.8 million for the first nine months of 2011, an increase of \$16.5 million, or 24%, as compared to the \$68.3 million recorded last year. Our commercial premium finance operations, life insurance finance operations and accounts receivable finance operations accounted for 56%, 37% and 7% respectively, of the total revenues of our specialty finance business for the three and nine month periods ending September 30, 2011. The increases in net interest income are primarily attributable to lower interest expense in the third quarter and first nine months of 2011 as compared to the same periods in 2010. The specialty finance segment's non-interest income totaled \$784,000 for the quarter ended September 30, 2011, compared to \$745,000 for the same period in 2010, an increase of \$39,000. Non-interest income decreased \$10.6 million to \$2.3 million in the first nine months of 2011 as compared to the same period in the prior year. This decrease is attributable to the impact of the life insurance premium finance receivable portfolio bargain purchase gain in the first nine months of 2010. The after-tax profit of the specialty finance segment for the quarter ended September 30, 2011 totaled \$12.8 million as compared to \$9.2 million for the quarter ended September 30, 2010. The specialty finance segment's after-tax profit for the nine months ended September 30, 2011 totaled \$40.7 million, an increase of \$16.1 million, or 66%, as compared to the prior year total of \$24.6 million.

The wealth management segment reported net interest income of \$2.9 million for the third quarter of 2011 compared to \$399,000 in the same quarter of 2010. Net interest income is comprised of the net interest earned on brokerage customer receivables at WHI and an allocation of the net interest income earned by the community banking segment on non-interest bearing and interest-bearing wealth management customer account balances on deposit at the banks (wealth management deposits). The allocated net interest income included in this segment's profitability was \$2.7 million (\$1.7 million after tax) in the third quarter of 2011 compared to \$264,000 (\$151,000 after tax) in the third quarter of 2010. This segment recorded non-interest income of \$14.3 million for the third quarter of 2011 compared to \$11.0 million for the third quarter of 2010. This increase is mostly attributable to the acquisition of Great Lakes Advisors in the third quarter of 2011. The wealth management segment's net income totaled \$2.4 million for the third quarter of 2011 compared to a net loss of \$11,000 for the third quarter of 2010. On a year-to-date basis, net interest income totaled \$6.3 million for the first nine months of 2011, an increase of \$944,000 or 18%, as compared to the \$5.4 million recorded last year. The allocated net interest income included in this segment's profitability was \$5.9 million (\$3.6 million after tax) in the first nine months of 2011 and \$5.0 million (\$3.1 million after tax) in the first nine months of 2010. This segment's after-tax net income for the nine months ended September 30, 2011 totaled \$5.1 million compared to \$2.4 million for the nine months ended September 30, 2010, an increase of \$2.7 million.

Financial Condition

Total assets were \$15.9 billion at September 30, 2011, representing an increase of \$1.8 billion, or 12.9%, when compared to September 30, 2010 and approximately \$1.3 billion, or 35.5% on an annualized basis, when compared to June 30, 2011. Total funding, which includes deposits, all notes and advances, including the junior subordinated debentures, was \$14.1 billion at September 30, 2011, \$12.5 billion at September 30, 2010 and \$13.0 billion at June 30, 2011. See Notes 5, 6, 10, 11 and 12 of the Financial Statements presented under Item 1 of this report for additional period-end detail on the Company's interest-earning assets and funding liabilities.

Table of Contents**Interest-Earning Assets**

The following table sets forth, by category, the composition of average earning asset balances and the relative percentage of total average earning assets for the periods presented:

(Dollars in thousands)	September 30, 2011		Three Months Ended June 30, 2011		September 30, 2010	
	Balance	Percent	Balance	Percent	Balance	Percent
Loans:

Other loans	120,082	2	99,660	1	96,758	1
Total loans, net of unearned income ⁽²⁾ excluding covered loans	\$ 10,200,733	73 %	\$ 9,859,789	77 %	\$ 9,603,561	76 %
Covered loans	680,003	5	418,129	3	325,751	2
Total average loans ⁽²⁾	\$ 10,880,736	78 %	\$ 10,277,918	80 %	\$ 9,929,312	78 %
Liquidity management assets ⁽³⁾	\$ 3,083,508	22	2,591,398	20	2,802,964	22
Other earning assets ⁽⁴⁾	28,834		28,886		34,263	
Total average earning assets	\$ 13,993,078	100 %	\$ 12,898,202	100 %	\$ 12,766,539	100 %
Total average assets	\$ 15,526,427		\$ 14,105,136		\$ 14,015,757	
Total average earning assets to total average assets		90 %		91 %		91 %

(1) Includes mortgage loans held-for-sale

(2) Includes loans held-for-sale and non-accrual loans

(3) Liquidity management assets include available-for-sale securities, other securities, interest earning deposits with banks, federal funds sold and securities purchased under resale agreements

(4) Other earning assets include brokerage customer receivables and trading account securities

Total average earning assets for the third quarter of 2011 increased \$1.2 billion, or 9.6%, to \$14.0 billion, compared to the third quarter of 2010, and increased \$1.1 billion, or 34.0% on an annualized basis, compared to the second quarter of 2011. The ratio of total average earning assets as a percent of total average assets was 90% at September 30, 2011 compared to 91% at June 30, 2011 and September 30, 2010.

Total average loans during the third quarter of 2011 increased \$951.4 million, or 9.6%, over the previous year third quarter. Approximately \$354.3 million of this increase relates to the covered loans portfolio, which relates to the various FDIC-assisted acquisitions during 2010 and 2011. The remaining increase from period to period was the result of significant increases within the commercial and premium finance receivable portfolios.

Average commercial loans totaled \$2.2 billion in the third quarter of 2011, and increased \$305.2 million, or 16.5%, over the average balance in the same period of 2010, while average commercial real estate loans totaled \$3.4 billion in 2011, slightly increasing \$48.8 million, or 1.5%, compared to the third quarter of 2010. Combined, these categories comprised 51% and 52% of the average loan portfolio in the third quarter of 2011 and 2010, respectively. The growth realized in these categories for the third quarter of 2011 as compared to the prior year period is

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

primarily attributable to increased business development efforts. Average balances increased compared to the quarter ended June 30, 2011, with average commercial loans increasing by \$141.8 million, or 28.2% annualized, and average commercial real estate loans increasing slightly by \$18.6 million, or 2.2% annualized.

Home equity loans averaged \$875.2 million in the third quarter of 2011, and decreased \$48.1 million, or 5.2%, when compared to the average balance in the same period of 2010 and \$13.5 million, or 6.1% annualized, when compared to quarter ended June 30, 2011. As a result of economic conditions, the Company has been actively managing its home equity portfolio to ensure that diligent pricing, appraisal and other underwriting activities continue to exist. The Company has not sacrificed asset quality or pricing standards when originating new home equity loans to grow outstanding loan balances.

Table of Contents

Residential real estate loans averaged \$457.5 million in the third quarter of 2011, and decreased \$146.8 million, or 24.3% from the average balance of \$604.3 million in same period of 2010. Additionally, compared to the quarter ended June 30, 2011, the average balance increased \$15.8 million, or 14.3%, from \$441.7 million as a result of increases in mortgage loans held-for-sale. Mortgage interest rates, on average, have been higher in the first nine months of 2011 as compared to the same period in the prior year, which has resulted in lower origination volumes in 2011. By selling residential mortgage loans into the secondary market, the Company eliminates the interest-rate risk associated with these loans, as they are predominantly long-term fixed rate loans, and provides a source of non-interest revenue.

Average premium finance receivables totaled \$3.1 billion in the third quarter of 2011, and accounted for 29% of the Company's average total loans. Premium finance receivables consist of a commercial portfolio and a life portfolio, comprising 47% and 53%, respectively, of the average total balance for the third quarter of 2011, compared to 48% and 52%, respectively, for the same period in 2010. Average premium finance receivables in the third quarter of 2011 increased \$416.9 million, or 15.3%, from the average balance of \$2.7 billion at the same period of 2010. Additionally, the average balance increased \$152.3 million, or 20.4% annualized, from the average balance of \$3.0 billion in the quarter ended June 30, 2011. The increase during 2011 compared to both periods was the result of continued originations within the portfolio due to the effective marketing and customer servicing. Approximately \$958.9 million of premium finance receivables were originated in the third quarter of 2011 compared to \$887.9 million in the same period of 2010 and \$1.0 billion in the second quarter of 2011.

Indirect consumer loans are comprised primarily of automobile loans originated at Hinsdale Bank. These loans are financed from networks of unaffiliated automobile dealers located throughout the Chicago metropolitan area with which the Company has established relationships. The risks associated with the Company's portfolios are diversified among many individual borrowers. Like other consumer loans, the indirect consumer loans are subject to the Banks' established credit standards. Management regards substantially all of these loans as prime quality loans. In the third quarter of 2008, as a result of competitive pricing pressures, the Company ceased the origination of indirect automobile loans through Hinsdale Bank. However as a result of current favorable pricing opportunities coupled with reduced competition in the indirect consumer automobile lending business, the Company re-entered this business with originations through Hinsdale Bank in the fourth quarter of 2010.

Other loans represent a wide variety of personal and consumer loans to individuals as well as high-yielding short-term accounts receivable financing to clients in the temporary staffing industry located throughout the United States. Consumer loans generally have shorter terms and higher interest rates than mortgage loans but generally involve more credit risk due to the type and nature of the collateral. Additionally, short-term accounts receivable financing may also involve greater credit risks than generally associated with the loan portfolios of more traditional community banks depending on the marketability of the collateral.

Covered loans represent loans acquired in FDIC-assisted transactions. These loans are subject to loss sharing agreements with the FDIC. The FDIC has agreed to reimburse the Company for 80% of losses incurred on the purchased loans, foreclosed real estate, and certain other assets. See Note 3 – Business Combinations for a discussion of these acquisitions.

Liquidity management assets include available-for-sale securities, other securities, interest earning deposits with banks, federal funds sold and securities purchased under resale agreements. The balances of these assets can fluctuate based on management's ongoing effort to manage liquidity and for asset liability management purposes.

Other earning assets include brokerage customer receivables and trading account securities. In the normal course of business, Wayne Hummer Investments, LLC (WHI) activities involve the execution, settlement, and financing of various securities transactions. WHI's customer securities activities are transacted on either a cash or margin basis. In margin transactions, WHI, under an agreement with an out-sourced securities firm, extends credit to its customers, subject to various regulatory and internal margin requirements, collateralized by cash and securities in customer's accounts. In connection with these activities, WHI executes and the out-sourced firm clears customer transactions relating to the sale of securities not yet purchased, substantially all of which are transacted on a margin basis subject to individual exchange regulations. Such transactions may expose WHI to off-balance-sheet risk, particularly in volatile trading markets, in the event margin requirements are not sufficient to fully cover losses that customers may incur. In the event a customer fails to satisfy its obligations, WHI under an agreement with the outsourced securities firm, may be required to purchase or sell financial instruments at prevailing market prices to fulfill the customer's obligations. WHI seeks to control the risks associated with its customers' activities by requiring customers to maintain margin collateral in compliance with various regulatory and internal guidelines. WHI monitors required margin levels daily and, pursuant to such guidelines, requires customers to deposit additional collateral or to reduce positions when necessary.

Table of Contents

(1) Includes mortgage loans held-for-sale

(2) Includes loans held-for-sale and non-accrual loans

(3) Liquidity management assets include available-for-sale securities, other securities, interest earning deposits with banks, federal funds sold and securities purchased under resale agreements

(4) Other earning assets include brokerage customer receivables and trading account securities

Total average loans for the first nine months of 2011 increased \$897.6 million, or 9.4%, over the previous year period. Similar to the quarterly discussion above, approximately \$262.4 million of this increase relates to the commercial portfolio, \$409.1 million of this increase relates to the premium finance receivables portfolio, and \$297.7 million of this increase relates to covered loans.

Deposits

Total deposits at September 30, 2011, were \$12.3 billion and increased \$1.3 billion, or 12%, compared to total deposits at September 30, 2010. See Note 10 to the financial statements presented under Item 1 of this report for a summary of period end deposit balances.

The following table sets forth, by category, the maturity of deposits as of September 30, 2011:

(Dollars in thousands)	Non-Interest Bearing and NOW ⁽¹⁾	Savings and Money Market ⁽¹⁾	Wealth Management ⁽¹⁾	Time Certificates of Deposit	Total Deposits	Weighted-Average Interest Rate of Maturing Time Certificates of Deposit ⁽²⁾

- (1) Balances of non-contractual maturity deposits are shown as maturing in the earliest time frame. These deposits re-price in varying degrees to changes in interest rates.
- (2) Weighted-average rate excludes the impact of purchase accounting fair value adjustments.

Table of Contents

The following table sets forth, by category, the composition of average deposit balances and the relative percentage of total average deposits for the periods presented:

(Dollars in thousands)	September 30, 2011		Three Months Ended June 30, 2011		September 30, 2010	
	Balance	Percent	Balance	Percent	Balance	Percent
Non-interest bearing	\$ 1,553,769	13 %	\$ 1,349,549	13 %	\$ 1,005,170	9 %
NOW	1,587,710	13	1,542,323	14	1,537,308	14
Wealth management deposits	735,231	6	657,725	6	713,688	7
Money market	2,050,383	17	1,871,668	17	1,710,299	16
Savings	813,304	7	741,719	7	652,257	6
Time certificates of deposit	5,256,259	44	4,678,343	43	5,209,973	48
Total average deposits	\$ 11,996,656	100 %	\$ 10,841,327	100 %	\$ 10,828,695	100 %

Total average deposits for the third quarter of 2011 were \$12.0 billion, an increase of \$1.2 billion, or 11%, from the third quarter of 2010. The increase in average deposits is primarily attributable to the Company's acquisition activity in 2011. The Company continues to see a beneficial shift in its deposit mix as average non-interest bearing deposits increased \$548.6 million, or 55%, in the third quarter of 2011 compared to the third quarter of 2010.

Wealth management deposits are funds from the brokerage customers of Wayne Hummer Investments, the trust and asset management customers of The Chicago Trust Company and brokerage customers from unaffiliated companies which have been placed into deposit accounts of the banks (wealth management deposits in the table above). Wealth Management deposits consist primarily of money market accounts. Consistent with reasonable interest rate risk parameters, these funds have generally been invested in loan production of the banks as well as other investments suitable for banks.

Brokered Deposits

The Company uses brokered deposits primarily as an asset-liability management tool to assist in the management of interest rate risk. The Company does not consider brokered deposits to be a vital component of its current liquidity resources. As has historically been the case, brokered deposits represented a small component of the Company's total deposits outstanding, as set forth in the table below:

(Dollars in thousands)	September 30,		December 31,		
	2011	2010	2010	2009	2008
Total deposits	\$ 12,306,008	\$ 10,962,239	\$ 10,803,673	\$ 9,917,074	\$ 8,376,750
Brokered deposits	726,411	820,131	639,687	927,722	800,042
Brokered deposits as a percentage of total deposits	5.9%	7.5%	5.9%	9.4%	9.6%

Brokered deposits include certificates of deposit obtained through deposit brokers, deposits received through the Certificate of Deposit Account Registry Program (CDARS), and wealth management deposits of brokerage customers from unaffiliated companies which have been placed into deposit accounts of the banks.

Other Funding Sources

Although deposits are the Company's primary source of funding its interest-earning assets, the Company's ability to manage the types and terms of deposits is somewhat limited by customer preferences and market competition. As a result, in addition to deposits and the issuance of equity securities and the retention of earnings, the Company uses several other funding sources to support its growth. These sources include short-term borrowings, notes payable, Federal Home Loan Bank advances, subordinated debt, secured borrowings and junior subordinated debentures. The Company evaluates the terms and unique characteristics of each source, as well as its asset-liability management position, in determining the use of such funding sources.

Average total interest-bearing funding, from sources other than deposits and including junior subordinated debentures, totaled \$1.8 billion in the third quarter of 2011 compared to \$1.6 billion in the third quarter of 2010.

Table of Contents

The following table sets forth, by category, the composition of average other funding sources for the quarterly periods presented:

(Dollars in thousands)	Three Months Ended		
	September 30, 2011	June 30, 2011	September 30, 2010
Notes payable	\$ 3,259	\$ 1,000	\$ 1,000
Federal Home Loan Bank advances	486,379	421,502	414,789
Other borrowings:			
Federal funds purchased	160	348	111
Securities sold under repurchase agreements	421,262	297,354	231,880
Other	36,460	39,602	
Total other borrowings	\$ 457,882	\$ 337,304	\$ 231,991
Secured borrowings - owed to securitization investors	600,000	600,000	600,000
Subordinated notes	40,000	45,440	55,000
Junior subordinated debentures	249,493	249,493	249,493
Total other borrowings	\$ 1,837,013	\$ 1,654,739	\$ 1,552,273

Notes payable balances represent the balances on a credit agreement with an unaffiliated bank and an unsecured promissory note as a result of the Great Lakes Advisors acquisition. The credit agreement is a \$51.0 million credit facility available for corporate purposes such as to provide capital to fund continued growth at existing bank subsidiaries, possible future acquisitions and for other general corporate matters. At September 30, 2011, the Company had \$3.0 million of notes payable outstanding compared to \$1.0 million at September 30, 2010.

FHLB advances provide the banks with access to fixed rate funds which are useful in mitigating interest rate risk and achieving an acceptable interest rate spread on fixed rate loans or securities. FHLB advances to the banks totaled \$474.6 million at September 30, 2011, compared to \$423.5 million at June 30, 2011 and \$414.8 million at September 30, 2010.

Securities sold under repurchase agreements represent sweep accounts for certain customers in connection with master repurchase agreements at the banks and short-term borrowings from brokers. This funding category fluctuates based on customer preferences and daily liquidity needs of the banks, their customers and the banks' operating subsidiaries.

Debt issued by the Company in conjunction with its tangible equity unit offering in December 2010 is recorded within other borrowings. The total proceeds attributed to the debt component of the offering, net of issuance costs, was \$43.3 million at the issue date.

The \$600 million average balance of secured borrowings represents the consolidation of a qualifying special purpose entity (the "QSPE") that was previously accounted for as an off-balance sheet securitization transaction sponsored by FIFC. Pursuant to ASC 810 and ASC 860, effective January 1, 2010, the QSPE is accounted for as a consolidated subsidiary of the Company. In connection with the securitization, premium finance receivables - commercial were transferred to FIFC Premium Funding, LLC, a QSPE. Instruments issued by the QSPE included \$600 million Class A notes that bear an annual interest rate of LIBOR plus 1.45% (the "Notes") and have an expected average term of 2.93 years with any unpaid balance due and payable in full on February 17, 2014. At the time of issuance, the Notes were eligible collateral under the Federal Reserve Bank of New York's Term Asset-Backed Securities Loan Facility ("TALF").

The Company borrowed \$75.0 million under three separate \$25.0 million subordinated note agreements. Each subordinated note requires annual principal payments of \$5.0 million beginning in the sixth year of the note and has a term of ten years. These notes mature in 2012, 2013, and 2015. These notes qualify as Tier 2 regulatory capital. Subordinated notes totaled \$40.0 million at September 30, 2011, \$40.0 million at June 30, 2011, and \$55.0 million at September 30, 2010.

Junior subordinated debentures were issued to nine trusts by the Company and equal the amount of the preferred and common securities issued by the trusts. These junior subordinated debentures, subject to certain limitations, qualify as Tier 1 capital of the Company for regulatory purposes. The amount of junior subordinated debentures and certain other capital elements in excess of those certain limitations could be

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

included in Tier 2 capital, subject to restrictions. Interest expense on these debentures is deductible for tax purposes, resulting in a cost-efficient form of regulatory capital.

See Notes 8, 11 and 12 of the Financial Statements presented under Item 1 of this report for details of period end balances and other information for these various funding sources. There were no material changes outside the ordinary course of business in the Company's contractual obligations during the third quarter of 2011 as compared to December 31, 2010.

Table of Contents**Shareholders Equity**

Total shareholders equity was \$1.5 billion at September 30, 2011, reflecting an increase of \$129.3 million since September 30, 2010 and \$91.6 million since December 31, 2010. The increase from December 31, 2010 was the result of net income of \$58.4 million less common stock dividends of \$6.3 million and preferred stock dividends of \$3.0 million, \$3.4 million credited to surplus for stock-based compensation costs, \$30.1 million from the issuance of shares of the Company's common stock (and related tax benefit) related to acquisitions and pursuant to various stock compensation plans and \$9.0 million in higher net unrealized gains from available-for-sale securities and net unrealized gains from cash flow hedges, net of tax.

The following tables reflect various consolidated measures of capital as of the dates presented and the capital guidelines established by the Federal Reserve Bank for a bank holding company:

	September 30, 2011	June 30, 2011	September 30, 2010
Leverage ratio	9.6 %	10.3 %	9.9 %
Tier 1 capital to risk-weighted assets	11.9	12.3	12.4
Total capital to risk-weighted assets	13.2	13.5	13.7
Total average equity-to-total average assets ⁽¹⁾	9.7	10.4	9.9

(1) Based on quarterly average balances.

	Minimum Capital Requirements	Well Capitalized
Leverage ratio	4.0 %	5.0 %
Tier 1 capital to risk-weighted assets	4.0	6.0
Total capital to risk-weighted assets	8.0	10.0

The Company's principal sources of funds at the holding company level are dividends from its subsidiaries, borrowings under its loan agreement with unaffiliated banks and proceeds from the issuances of subordinated debt, junior subordinated debentures and additional common or preferred equity. Refer to Notes 11, 12 and 17 of the Financial Statements presented under Item 1 of this report for further information on these various funding sources. The issuances of subordinated debt, junior subordinated debentures, preferred stock and additional common stock are the primary forms of regulatory capital that are considered as the Company evaluates increasing its capital position. Management is committed to maintaining the Company's capital levels above the Well Capitalized levels established by the Federal Reserve for bank holding companies.

The Company's Board of Directors approved the first semi-annual dividend on the Company's common stock in January 2000 and has continued to approve semi-annual dividends since that time; however, our ability to declare a dividend is limited by our financial condition, the terms of our 8.00% non-cumulative perpetual convertible preferred stock, Series A, the terms of the Company's Trust Preferred Securities offerings, the Company's 7.5% tangible equity units and under certain financial covenants in the Company's credit agreement. In each of January and July of 2011, Wintrust declared a semi-annual cash dividend of \$0.09 per common share. Additionally, in each of January and July 2010, Wintrust declared a semi-annual cash dividend of \$0.09 per common share.

See Note 17 of the Financial Statements presented under Item 1 of this report for details on the Company's issuance of common stock in March and December of 2010, tangible equity units in December 2010, preferred stock in August 2008 through a private transaction, and Series B preferred stock and a warrant to the federal government in December 2008 in connection with the Company's participation in Treasury's CPP. In December 2010, the Company repurchased all 250,000 shares of its Series B Preferred Stock, and in February 2011, the Treasury sold all of its interest in the warrant issued to it in a secondary underwritten public offering.

Our commercial real estate loans are generally secured by a first mortgage lien and assignment of rents on the property. Since most of our bank branches are located in the Chicago metropolitan area and southeastern Wisconsin, 91.7% of our commercial real estate loan portfolio is located

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

in this region. Commercial real estate market conditions continued to be under stress in the third quarter of 2011 as they were in 2010, and we expect this trend to continue. As of September 30, 2011, our allowance for loan losses related to this portfolio is \$64.4 million compared to \$57.3 million as of September 30, 2010.

We make commercial loans for many purposes, including: working capital lines, which are generally renewable annually and supported by business assets, personal guarantees and additional collateral; loans to condominium and homeowner associations originated through Barrington Bank's Community Advantage program; small aircraft financing, an earning asset niche developed at Crystal Lake Bank; and franchise lending at Lake Forest Bank. Commercial business lending is generally considered to involve a higher degree of risk than traditional consumer bank lending, and as a result of the economic recession, our allowance for loan losses in our commercial loan portfolio is \$33.8 million as of September 30, 2011 compared to \$32.0 million as of September 30, 2010.

The Company also participates in mortgage warehouse lending by providing interim funding to unaffiliated mortgage bankers to finance residential mortgages originated by such bankers for sale into the secondary market. The Company's loans to the mortgage bankers are secured by the business assets of the mortgage companies as well as the specific mortgage loans funded by the Company, after they have been pre-approved for purchase by third party end lenders. End lender re-payments are sent directly to the Company upon end-lenders' acceptance of final loan documentation. The Company may also provide interim financing for packages of mortgage loans on a bulk basis in circumstances where the mortgage bankers desire to competitively bid on a number of mortgages for sale as a package in the secondary market. Typically, the Company will serve as sole funding source for its mortgage warehouse lending customers under short-term revolving credit agreements. Amounts advanced with respect to any particular mortgage loan are usually required to be repaid within 21 days. Despite poor economic conditions generally, and the particularly difficult conditions in

Table of Contents

the U.S. residential real estate market experienced since 2008, our mortgage warehouse lending business expanded in 2010 due to the high demand for mortgage re-financings given the historically low interest rate environment at that time and the fact that many of our competitors exited the market in late 2008 and early 2009. However, as a result of declining demand for re-financing and increased competition as competitors return to the market, our mortgage warehouse lines decreased to \$74.3 million as of September 30, 2011 from \$131.3 million as of December 31, 2010. Additionally, our allowance for loan losses with respect to these loans is \$1.0 million as of September 30, 2011. Since the inception of this business, the Company has not suffered any related loan losses on these loans.

Home equity loans. Our home equity loans and lines of credit are originated by each of our banks in their local markets where we have a strong understanding of the underlying real estate value. Our banks monitor and manage these loans, and we conduct an automated review of all home equity loans and lines of credit at least twice per year. This review collects current credit performance for each home equity borrower and identifies situations where the credit strength of the borrower is declining, or where there are events that may influence repayment, such as tax liens or judgments. Our banks use this information to manage loans that may be higher risk and to determine whether to obtain additional credit information or updated property valuations. As a result of this work and general market conditions, we have modified our home equity offerings and changed our policies regarding home equity renewals and requests for subordination. In a limited number of situations, the unused availability on home equity lines of credit was frozen.

The rates we offer on new home equity lending are based on several factors, including appraisals and valuation due diligence, in order to reflect inherent risk, and we place additional scrutiny on larger home equity requests. In a limited number of cases, we issue home equity credit together with first mortgage financing, and requests for such financing are evaluated on a combined basis. It is not our practice to advance more than 85% of the appraised value of the underlying asset, which ratio we refer to as the loan-to-value ratio, or LTV ratio, and a majority of the credit we previously extended, when issued, had an LTV ratio of less than 80%.

Our home equity loan portfolio has performed well in light of the deterioration in the overall residential real estate market. The number of new home equity line of credit commitments originated by us has decreased due to declines in housing valuations that have decreased the amount of equity against which homeowners may borrow, and a decline in homeowners' desire to use their remaining equity as collateral.

Residential real estate mortgages. Our residential real estate portfolio predominantly includes one to four-family adjustable rate mortgages that have repricing terms generally from one to three years, construction loans to individuals and bridge financing loans for qualifying customers. As of September 30, 2011, our residential loan portfolio totaled \$326.2 million, or 3% of our total outstanding loans.

Our adjustable rate mortgages relate to properties located principally in the Chicago metropolitan area and southeastern Wisconsin or vacation homes owned by local residents, and may have terms based on differing indexes. These adjustable rate mortgages are often non-agency conforming because the outstanding balance of these loans exceeds the maximum balance that can be sold into the secondary market. Adjustable rate mortgage loans decrease the interest rate risk we face on our mortgage portfolio. However, this risk is not eliminated because, among other things, such loans generally provide for periodic and lifetime limits on the interest rate adjustments. Additionally, adjustable rate mortgages may pose a higher risk of delinquency and default because they require borrowers to make larger payments when interest rates rise. To date, we have not seen a significant elevation in delinquencies and foreclosures in our residential loan portfolio. As of September 30, 2011, \$7.5 million of our residential real estate mortgages, or 2.3% of our residential real estate loan portfolio, were classified as nonaccrual, \$2.8 million were 30 to 89 days past due (0.9%) and \$315.9 million were current (96.8%). We believe that since our loan portfolio consists primarily of locally originated loans, and since the majority of our borrowers are longer-term customers with lower LTV ratios, we face a relatively low risk of borrower default and delinquency.

While we generally do not originate loans for our own portfolio with long-term fixed rates due to interest rate risk considerations, we can accommodate customer requests for fixed rate loans by originating such loans and then selling them into the secondary market, for which we receive fee income, or by selectively retaining certain of these loans within the banks' own portfolios where they are non-agency conforming, or where the terms of the loans make them favorable to retain. A portion of the loans we sold into the secondary market were sold into the secondary market with the servicing of those loans retained. The amount of loans serviced for others as of September 30, 2011 and 2010 was \$952.3 million and \$787.9 million, respectively. All other mortgage loans sold into the secondary market were sold without the retention of servicing rights.

It is not our current practice to underwrite, and we have no plans to underwrite, subprime, Alt A, no or little documentation loans, or option ARM loans. As of September 30, 2011, approximately \$25.9 million of our mortgage loans consist of interest-only loans.

Premium finance receivables – commercial. FIFC originated approximately \$867.7 million in commercial insurance premium finance receivables during the third quarter of 2011. FIFC makes loans to businesses to finance the insurance premiums they pay on their commercial insurance policies. The loans are originated by FIFC working through independent medium and large insurance agents and brokers located throughout the United States. The insurance premiums financed are primarily for commercial customers.

Table of Contents

purchases of liability, property and casualty and other commercial insurance.

This lending involves relatively rapid turnover of the loan portfolio and high volume of loan originations. Because of the indirect nature of this lending and because the borrowers are located nationwide, this segment is more susceptible to third party fraud than relationship lending. In the second quarter of 2010, fraud perpetrated against a number of premium finance companies in the industry, including the property and casualty division of our premium financing subsidiary, increased both the Company's net charge-offs and provision for credit losses by \$15.7 million. In the second quarter of 2011, the Company recovered \$5.0 million from insurance coverage of the \$15.7 million fraud loss recorded in the second quarter of 2010. Actions have been taken by the Company to decrease the likelihood of this type of loss from recurring in this line of business for the Company by the enhancement of various control procedures to mitigate the risks associated with this lending. The Company has conducted a thorough review of the premium finance commercial portfolio and found no signs of similar situations.

The majority of these loans are purchased by the banks in order to more fully utilize their lending capacity as these loans generally provide the banks with higher yields than alternative investments. Historically, FIFC originations that were not purchased by the banks were sold to unrelated third parties with servicing retained. However, during the third quarter of 2009, FIFC initially sold \$695 million in commercial premium finance receivables to our indirect subsidiary, FIFC Premium Funding I, LLC, which in turn sold \$600 million in aggregate principal amount of notes backed by such premium finance receivables in a securitization transaction sponsored by FIFC. See Note 8 of the Consolidated Financial Statements presented under Item 8 of this report for a discussion of this securitization transaction. Accordingly, beginning on January 1, 2010, all of the assets and liabilities of the securitization entity are included directly on the Company's Consolidated Statements of Condition.

Premium finance receivables - life insurance. In 2007, FIFC began financing life insurance policy premiums generally for high net-worth individuals. In 2009, FIFC expanded this niche lending business segment when it purchased a portfolio of domestic life insurance premium finance loans for a total aggregate purchase price of \$745.9 million.

FIFC originated approximately \$91.3 million in life insurance premium finance receivables in the third quarter of 2011. These loans are originated directly with the borrowers with assistance from life insurance carriers, independent insurance agents, financial advisors and legal counsel. The life insurance policy is the primary form of collateral. In addition, these loans often are secured with a letter of credit, marketable securities or certificates of deposit. In some cases, FIFC may make a loan that has a partially unsecured position.

Indirect consumer loans. As part of its strategy to pursue specialized earning asset niches to augment loan generation within the Banks' target markets, the Company established fixed-rate automobile loan financing at Hinsdale Bank funded indirectly through unaffiliated automobile dealers. The risks associated with the Company's portfolios are diversified among many individual borrowers. Like other consumer loans, the indirect consumer loans are subject to the Banks' established credit standards. Management regards substantially all of these loans as prime quality loans. In the third quarter of 2008, the Company, as a result of competitive pricing pressures, ceased the origination of indirect automobile loans through Hinsdale Bank. However, as a result of current favorable pricing opportunities coupled with reduced competition in the indirect consumer auto business, the Company re-entered this business in the fourth quarter of 2010 with originations through Hinsdale Bank.

Other Loans. Included in the other loan category is a wide variety of personal and consumer loans to individuals as well as high yielding short-term accounts receivable financing to clients in the temporary staffing industry located throughout the United States. The Banks originate consumer loans in order to provide a wider range of financial services to their customers.

Consumer loans generally have shorter terms and higher interest rates than mortgage loans but generally involve more credit risk than mortgage loans due to the type and nature of the collateral. Additionally, short-term accounts receivable financing may also involve greater credit risks than generally associated with the loan portfolios of more traditional community banks depending on the marketability of the collateral.

Table of Contents*Variable Rate Loan Repricing and Rate Floors*

The following table classifies the commercial and commercial real-estate loan portfolio at September 30, 2011 by date at which the loans reprice and the type of rate:

As of September 30, 2011			Variable Rate From one to five years	Over five years	
(Dollars in thousands)	Fixed Rate	One year or less			Total

Total commercial real-estate	1,596,200	1,724,325	128,886	15,910	3,465,321

Past Due Loans and Non-Performing Assets

Our ability to manage credit risk depends in large part on our ability to properly identify and manage problem loans. To do so, we operate a credit risk rating system under which our credit management personnel assign a credit risk rating to each loan at the time of origination and review loans on a regular basis to determine each loan's credit risk rating on a scale of 1 through 10 with higher scores indicating higher risk. The credit risk rating structure used is shown below:

1 Rating	Minimal Risk (Loss Potential none or extremely low) (Superior asset quality, excellent liquidity, minimal leverage)
2 Rating	Modest Risk (Loss Potential demonstrably low) (Very good asset quality and liquidity, strong leverage capacity)
3 Rating	Average Risk (Loss Potential low but no longer refutable) (Mostly satisfactory asset quality and liquidity, good leverage capacity)
4 Rating	Above Average Risk (Loss Potential variable, but some potential for deterioration) (Acceptable asset quality, little excess liquidity, modest leverage capacity)
5 Rating	Management Attention Risk (Loss Potential moderate if corrective action not taken) (Generally acceptable asset quality, somewhat strained liquidity, minimal leverage capacity)
6 Rating	Special Mention (Loss Potential moderate if corrective action not taken) (Assets in this category are currently protected, potentially weak, but not to the point of substandard classification)
7 Rating	Substandard Accrual (Loss Potential distinct possibility that the bank may sustain some loss, but no discernable impairment) (Must have well defined weaknesses that jeopardize the liquidation of the debt)
8 Rating	Substandard Non-accrual (Loss Potential well documented probability of loss, including potential impairment) (Must have well defined weaknesses that jeopardize the liquidation of the debt)
9 Rating	

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

Doubtful (Loss Potential extremely high) (These assets have all the weaknesses in those classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of current existing facts, conditions, and values, highly improbable)

10 Rating Loss (fully charged-off) (Loans in this category are considered fully uncollectible.)

Table of Contents

In the first quarter of 2010, the Company modified its credit risk rating scale to the above 1 through 10 risk ratings. Prior to this, the Company employed a 1 through 9 credit risk rating scale. The change to the 1 through 10 scale enabled the Company to use two separate credit risk ratings for Substandard loans. They are Substandard Accrual (credit risk rating 7) and Substandard Nonaccrual (credit risk rating 8). Previously, there was only one risk rating for loans classified as Substandard. This change allows the Company to better monitor credit risk of the portfolio.

Each loan officer is responsible for monitoring his or her loan portfolio, recommending a credit risk rating for each loan in his or her portfolio and ensuring the credit risk ratings are appropriate. These credit risk ratings are then ratified by the bank's chief credit officer and/or concurrence credit officer. Credit risk ratings are determined by evaluating a number of factors including, a borrower's financial strength, cash flow coverage, collateral protection and guarantees. A third party loan review firm independently reviews a significant portion of the loan portfolio at each of the Company's subsidiary banks to evaluate the appropriateness of the management-assigned credit risk ratings. These ratings are subject to further review at each of our bank subsidiaries by the applicable regulatory authority, including the Federal Reserve Bank of Chicago, the Office of the Comptroller of the Currency, the State of Illinois and the State of Wisconsin and our internal audit staff.

The Company's Problem Loan Reporting system automatically includes all loans with credit risk ratings of 6 through 9. This system is designed to provide an on-going detailed tracking mechanism for each problem loan. Once management determines that a loan has deteriorated to a point where it has a credit risk rating of 6 or worse, the Company's Managed Asset Division performs an overall credit and collateral review. As part of this review, all underlying collateral is identified and the valuation methodology is analyzed and tracked. As a result of this initial review by the Company's Managed Asset Division, the credit risk rating is reviewed and a portion of the outstanding loan balance may be deemed uncollectible or an impairment reserve may be established. The Company's impairment analysis utilizes an independent re-appraisal of the collateral (unless such a third-party evaluation is not possible due to the unique nature of the collateral, such as a closely-held business or thinly traded securities). In the case of commercial real estate collateral, an independent third party appraisal is ordered by the Company's Real Estate Services Group to determine if there has been any change in the underlying collateral value. These independent appraisals are reviewed by the Real Estate Services Group and sometimes by independent third party valuation experts and may be adjusted depending upon market conditions. An appraisal is ordered at least once a year for these loans, or more often if market conditions dictate. In the event that the underlying value of the collateral cannot be easily determined, a detailed valuation methodology is prepared by the Managed Asset Division. A summary of this analysis is provided to the directors' loan committee of the bank which originated the credit for approval of a charge-off, if necessary.

Through the credit risk rating process, loans are reviewed to determine if they are performing in accordance with the original contractual terms. If the borrower has failed to comply with the original contractual terms, further action may be required by the Company, including a downgrade in the credit risk rating, movement to non-accrual status, a charge-off or the establishment of a specific impairment reserve. In the event a collateral shortfall is identified during the credit review process, the Company will work with the borrower for a principal reduction and/or a pledge of additional collateral and/or additional guarantees. In the event that these options are not available, the loan may be subject to a downgrade of the credit risk rating. If we determine that a loan amount or portion thereof, is uncollectible the loan's credit risk rating is immediately downgraded to an 8 or 9 and the uncollectible amount is charged-off. Any loan that has a partial charge-off continues to be assigned a credit risk rating of an 8 or 9 for the duration of time that a balance remains outstanding. The Managed Asset Division undertakes a thorough and ongoing analysis to determine if additional impairment and/or charge-offs are appropriate and to begin a workout plan for the credit to minimize actual losses.

If, based on current information and events, it is probable that the Company will be unable to collect all amounts due to it according to the contractual terms of the loan agreement, a loan is considered impaired, and a specific impairment reserve analysis is performed and if necessary, a specific reserve is established. In determining the appropriate charge-off for collateral-dependent loans, the Company considers the results of appraisals for the associated collateral.

Table of Contents*Non-performing Assets, excluding covered assets*

The following table sets forth Wintrust's non-performing assets, excluding covered assets, and loans acquired with credit quality deterioration since origination, as of the dates shown:

(Dollars in thousands)	September 30, 2011	June 30, 2011	December 31, 2010	September 30, 2010

Total non-performing assets, as a percentage of total assets	1.45 %	1.63 %	1.53 %	1.50 %
Allowance for loan losses as a percentage of total non-performing loans	88.56 %	75.20 %	80.14 %	82.21 %

Table of Contents*Non-performing Commercial and Commercial Real-Estate*

The commercial non-performing loan category totaled \$24.8 million as of September 30, 2011 compared to \$16.9 million as of December 31, 2010 and \$19.4 million as of September 30, 2010, while the commercial real estate loan category totaled \$70.8 million as of September 30, 2011 compared to \$94.0 million as of December 31, 2010 and \$83.3 million as of September 30, 2010.

Management is pursuing the resolution of all credits in this category. At this time, management believes reserves are adequate to absorb inherent losses that may occur upon the ultimate resolution of these credits.

Non-performing Residential Real Estate and Home Equity

The non-performing residential real estate and home equity loans totaled \$23.0 million as of September 30, 2011. The balance increased \$9.5 million from December 31, 2010 and increased \$10.2 million from September 30, 2010. The September 30, 2011 non-performing balance is comprised of \$7.5 million of residential real estate (34 individual credits) and \$15.4 million of home equity loans (38 individual credits). On average, this is approximately five non-performing residential real estate loans and home equity loans per chartered bank within the Company. The Company believes control and collection of these loans is very manageable. At this time, management believes reserves are adequate to absorb inherent losses that may occur upon the ultimate resolution of these credits.

Non-performing Commercial Premium Finance Receivables

The table below presents the level of non-performing property and casualty premium finance receivables as of September 30, 2011 and 2010, and the amount of net charge-offs for the quarters then ended.

(Dollars in thousands)	September 30, 2011	September 30, 2010
Non-performing premium finance receivables - commercial	\$ 11,541	\$ 15,935
- as a percent of premium finance receivables - commercial outstanding	0.81 %	1.20 %
Net (recoveries) charge-offs of premium finance receivables - commercial	\$ 1,579	\$ 1,285
- annualized as a percent of average premium finance receivables - commercial	0.42 %	0.39 %

Fluctuations in this category may occur due to timing and nature of account collections from insurance carriers. The Company's underwriting standards, regardless of the condition of the economy, have remained consistent. We anticipate that net charge-offs and non-performing asset levels in the near term will continue to be at levels that are within acceptable operating ranges for this category of loans. Management is comfortable with administering the collections at this level of non-performing property and casualty premium finance receivables and believes reserves are adequate to absorb inherent losses that may occur upon the ultimate resolution of these credits.

Non-performing Indirect Consumer Loans

Total non-performing indirect consumer loans were \$438,000 at September 30, 2011, compared to \$509,000 at December 31, 2010 and \$801,000 at September 30, 2010. The ratio of these non-performing loans to total indirect consumer loans was 0.70% at September 30, 2011 compared to 0.99% at December 31, 2010 and 1.42% at September 30, 2010. Net recoveries as a percent of total indirect consumer loans were 0.33% for the quarter ended September 30, 2011 compared to net charge-offs as a percent of total indirect consumer loans 1.08 % in the same period in 2010. The indirect consumer loan portfolio has decreased 10% since September 30, 2010 to a balance of \$62.5 million at September 30, 2011.

Loan Portfolio Aging

The following table shows, as of September 30, 2011, only 1.6% of the entire portfolio, excluding covered loans, is non-accrual or greater than 90 days past due and still accruing interest with only 1.5%, either one or two payments past due. In total, 96.9% of the Company's total loan portfolio, excluding covered loans, as of September 30, 2011 is current according to the original contractual terms of the loan agreements.

Table of Contents

The tables below show the aging of the Company's loan portfolio at September 30, 2011 and June 30, 2011:

As of September 30, 2011, only \$51.0 million of all loans, excluding covered loans, or 0.4%, were 60 to 89 days past due and \$96.3 million or 1.1%, were 30 to 59 days (or one payment) past due. As of June 30, 2011, \$61.0 million of all loans, excluding covered loans, or 0.6%, were 60 to 89 days past due and \$93.6 million, or 0.9%, were 30 to 59 days (or one payment) past due.

The majority of the commercial and commercial real estate loans shown as 60 to 89 days and 30 to 59 days past due are included on the Company's internal problem loan reporting system. Loans on this system are closely monitored by management on a monthly basis. Near-term delinquencies (30 to 59 days past due) decreased \$1.8 million since June 30, 2011.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

The Company's home equity and residential loan portfolios continue to exhibit low delinquency ratios. Home equity loans at September 30, 2011 that are current with regard to the contractual terms of the loan agreement represent 97.4% of the total home equity portfolio. Residential real estate loans at September 30, 2011 that are current with regards to the contractual terms of the loan agreements comprise 96.8% of total residential real estate loans outstanding.

The ratio of non-performing commercial premium finance receivables fluctuates throughout the year due to the nature and timing of canceled account collections from insurance carriers. Due to the nature of collateral for commercial premium finance receivables, it customarily takes 60-150 days to convert the collateral into cash. Accordingly, the level of non-performing commercial premium finance receivables is not necessarily indicative of the loss inherent in the portfolio. In the event of default, Wintrust has the power to cancel the insurance policy and collect the unearned portion of the premium from the insurance carrier. In the event of cancellation, the cash returned in payment of the unearned premium by the insurer should generally be sufficient to cover the receivable balance, the interest and other charges due. Due to notification requirements and processing time by most insurance carriers, many receivables will become delinquent beyond 90 days while the insurer is processing the return of the unearned premium. Management continues to accrue interest until maturity as the unearned premium is ordinarily sufficient to pay-off the outstanding balance and contractual interest due.

Table of Contents*Nonperforming Loans Rollforward*

The table below presents a summary of non-performing loans, excluding covered loans, and loans acquired with credit quality deterioration since origination as of September 30, 2011 and shows the changes in the balance from June 30, 2011:

(Dollars in thousands)	Non-performing Loans
Balance at June 30, 2011	\$ 156,072
Additions, net	39,500
Return to performing status	(2,147)
Payments received	(20,236)
Transfers to OREO	(17,670)
Charge-offs	(18,283)
Net change for niche loans ⁽¹⁾	(3,260)
Balance at September 30, 2011	\$ 133,976

⁽¹⁾ This includes activity for premium finance receivables, mortgages held for investment by Wintrust Mortgage and indirect consumer loans
Allowance for Loan Losses

The allowance for loan losses represents management's estimate of the probable and reasonably estimable loan losses that our loan portfolio is expected to incur. The allowance for loan losses is determined quarterly using a methodology that incorporates important risk characteristics of each loan, as described below under *How We Determine the Allowance for Credit Losses*. This process is subject to review at each of our bank subsidiaries by the applicable regulatory authority, including the Federal Reserve Bank of Chicago, the Office of the Comptroller of the Currency, the State of Illinois and the State of Wisconsin.

Management has determined that the allowance for loan losses was appropriate at September 30, 2011, and that the loan portfolio is well diversified and well secured, without undue concentration in any specific risk area. This process involves a high degree of management judgment, however the allowance for credit losses is based on a comprehensive, well documented, and consistently applied analysis of the Company's loan portfolio. This analysis takes into consideration all available information existing as of the financial statement date, including environmental factors such as economic, industry, geographical and political factors. The relative level of allowance for credit losses is reviewed and compared to industry peers. This review encompasses levels of total nonperforming loans, portfolio mix, portfolio concentrations, current geographic risks and overall levels of net charge-offs. Historical trending of both the Company's results and the industry peers is also reviewed to analyze comparative significance.

Table of Contents*Allowance for Credit Losses, excluding covered loans*

The following table summarizes the activity in our allowance for credit losses during the periods indicated.

(Dollars in thousands)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2011	2010	2011	2010

Allowance for credit losses as a percentage of loans at period end			1.29 %	1.19 %

Table of Contents

The allowance for credit losses is comprised of an allowance for loan losses, which is determined with respect to loans that we have originated, and an allowance for lending-related commitments. Our allowance for lending-related commitments is determined with respect to funds that we have committed to lend but for which funds have not yet been disbursed and is computed using a methodology similar to that used to determine the allowance for loan losses. Additions to the allowance for loan losses are charged to earnings through the provision for credit losses. Charge-offs represent the amount of loans that have been determined to be uncollectible during a given period, and are deducted from the allowance for loan losses, and recoveries represent the amount of collections received from loans that had previously been charged off, and are credited to the allowance for loan losses.

How We Determine the Allowance for Credit Losses

The allowance for loan losses includes an element for estimated probable but undetected losses and for imprecision in the credit risk models used to calculate the allowance. As part of the Problem Loan Reporting system review, the Company analyzes the loan for purposes of calculating our specific impairment reserves and a general reserve.

Specific Impairment Reserves:

Loans with a credit risk rating of a 6 through 9 are reviewed on a monthly basis to determine if (a) an amount is deemed uncollectible (a charge-off) or (b) it is probable that the Company will be unable to collect amounts due in accordance with the original contractual terms of the loan (impaired loan). If a loan is impaired, the carrying amount of the loan is compared to the expected payments to be reserved, discounted at the loan's original rate, or for collateral dependent loans, to the fair value of the collateral. Any shortfall is recorded as a specific reserve.

General Reserves:

For loans with a credit risk rating of 1 through 7, reserves are established based on the type of loan collateral, if any, and the assigned credit risk rating. Determination of the allowance is inherently subjective as it requires significant estimates, including the amounts and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience, and consideration of current environmental factors and economic trends, all of which may be susceptible to significant change.

We determine this component of the allowance for loan losses by classifying each loan into (i) categories based on the type of collateral that secures the loan (if any), and (ii) one of ten categories based on the credit risk rating of the loan, as described above under *Past Due Loans and Non-Performing Assets*. Each combination of collateral and credit risk rating is then assigned a specific loss factor that incorporates the following factors:

historical underwriting loss factor;

changes in lending policies and procedures, including changes in underwriting standards and collection, charge-off, and recovery practices not considered elsewhere in estimating credit losses;

changes in national, regional, and local economic and business conditions and developments that affect the collectibility of the portfolio;

changes in the nature and volume of the portfolio and in the terms of the loans;

changes in the experience, ability, and depth of lending management and other relevant staff;

changes in the volume and severity of past due loans, the volume of non-accrual loans, and the volume and severity of adversely classified or graded loans;

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

changes in the quality of the bank's loan review system;

changes in the underlying collateral for collateral dependent loans;

the existence and effect of any concentrations of credit, and changes in the level of such concentrations; and

the effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the bank's existing portfolio.

Table of Contents

Home Equity and Residential Real Estate Loans:

The determination of the appropriate allowance for loan losses for residential real estate and home equity loans differs slightly from the process used for commercial and commercial real estate loans. The same credit risk rating system, Problem Loan Reporting system, collateral coding methodology and loss factor assignment are used. The only significant difference is in how the credit risk ratings are assigned to these loans.

The home equity loan portfolio is reviewed on a loan by loan basis by analyzing current FICO scores of the borrowers, line availability, recent line usage and the aging status of the loan. Certain of these factors, or combination of these factors, may cause a portion of the credit risk ratings of home equity loans across all banks to be downgraded. Similar to commercial and commercial real estate loans, once a home equity loan's credit risk rating is downgraded to a 6 through 9, the Company's Managed Asset Division reviews and advises the subsidiary banks as to collateral valuations and as to the ultimate resolution of the credits that deteriorate to a non-accrual status to minimize losses.

Residential real estate loans that are downgraded to a credit risk rating of 6 through 9 also enter the Problem Loan Reporting system and have the underlying collateral evaluated by the Managed Assets Division.

Premium Finance Receivables and Indirect Consumer Loans:

The determination of the appropriate allowance for loan losses for premium finance receivables and indirect consumer loans is based solely on the aging (collection status) of the portfolios. Due to the large number of generally smaller sized and homogenous credits in these portfolios, these loans are not individually assigned a credit risk rating. Loss factors are assigned to each delinquency category in order to calculate an allowance for credit losses. The allowance for loan losses for these categories is entirely a general reserve.

Effects of Economic Recession and Real Estate Market:

The Company's primary markets, which are mostly in suburban Chicago, have not experienced the same levels of credit deterioration in residential mortgage and home equity loans as certain other major metropolitan markets, such as Miami, Phoenix or Southern California, however the Company's markets have clearly been under stress. As of September 30, 2011, home equity loans and residential mortgages comprised 8% and 3%, respectively, of the Company's total loan portfolio. At September 30, 2011 (excluding covered loans), approximately only 3.2% of all of the Company's residential mortgage loans and approximately only 2.6% of all of the Company's home equity loans are more than one payment past due. Current delinquency statistics of these two portfolios, demonstrating that although there is stress in the Chicago metropolitan and southeastern Wisconsin markets, our portfolios of residential mortgages and home equity loans are performing reasonably well as reflected in the aging of the Company's loan portfolio table shown earlier in this section.

Methodology in Assessing Impairment and Charge-off Amounts

In determining the amount of impairment or charge-offs associated with collateral dependent loans, the Company values the loan generally by starting with a valuation obtained from an appraisal of the underlying collateral and then deducting estimated selling costs to arrive at a net appraised value. We obtain the appraisals of the underlying collateral from one of a pre-approved list of independent, third party appraisal firms.

In many cases, the Company simultaneously values the underlying collateral by marketing the property to market participants interested in purchasing properties of the same type. If the Company receives offers or indications of interest, we will analyze the price and review market conditions to assess whether in light of such information the appraised value overstates the likely price and that a lower price would be a better assessment of the market value of the property and would enable us to liquidate the collateral. Additionally, the Company takes into account the strength of any guarantees and the ability of the borrower to provide value related to those guarantees in determining the ultimate charge-off or reserve associated with any impaired loans. Accordingly, the Company may charge-off a loan to a value below the net appraised value if it believes that an expeditious liquidation is desirable in the circumstance and it has legitimate offers or other indications of interest to support a value that is less than the net appraised value. Alternatively, the Company may carry a loan at a value that is in excess of the appraised value if the Company has a guarantee from a borrower that the Company believes has realizable value. In evaluating the strength of any guarantee, the Company evaluates the financial wherewithal of the guarantor, the guarantor's reputation, and the guarantor's willingness and desire to work with the Company. The Company then conducts a review of the strength of a guarantee on a frequency established as the circumstances and conditions of the borrower warrant.

In circumstances where the Company has received an appraisal but has no third party offers or indications of interest, the Company may enlist the input of realtors in the local market as to the highest valuation that the realtor believes would result in a liquidation of the property given a reasonable marketing period of approximately 90 days. To the extent that the realtor's indication of market clearing price under such scenario is less than the net appraised valuation, the Company may take a charge-off on the loan to a

Table of Contents

valuation that is less than the net appraised valuation.

The Company may also charge-off a loan below the net appraised valuation if the Company holds a junior mortgage position in a piece of collateral whereby the risk to acquiring control of the property through the purchase of the senior mortgage position is deemed to potentially increase the risk of loss upon liquidation due to the amount of time to ultimately market the property and the volatile market conditions. In such cases, the Company may abandon its junior mortgage and charge-off the loan balance in full.

In other cases, the Company may allow the borrower to conduct a short sale, which is a sale where the Company allows the borrower to sell the property at a value less than the amount of the loan. Many times, it is possible for the current owner to receive a better price than if the property is marketed by a financial institution which the market place perceives to have a greater desire to liquidate the property at a lower price. To the extent that we allow a short sale at a price below the value indicated by an appraisal, we may take a charge-off beyond the value that an appraisal would have indicated.

Other market conditions may require a reserve to bring the carrying value of the loan below the net appraised valuation such as litigation surrounding the borrower and/or property securing our loan or other market conditions impacting the value of the collateral.

Having determined the net value based on the factors such as those noted above and compared that value to the book value of the loan, the Company arrives at a charge-off amount or a specific reserve included in the allowance for loan losses. In summary, for collateral dependent loans, appraisals are used as the fair value starting point in the estimate of net value. Estimated costs to sell are deducted from the appraised value to arrive at the net appraised value. Although an external appraisal is the primary source of valuation utilized for charge-offs on collateral dependent loans, we may utilize values obtained through purchase and sale agreements, legitimate indications of interest, negotiated short sales, realtor price opinions, sale of the note or support from guarantors as the basis for charge-offs. These alternative sources of value are used only if deemed to be more representative of value based on updated information regarding collateral resolution. In addition, if an appraisal is not deemed current, a discount to appraised value may be utilized. Any adjustments from appraised value to net value are detailed and justified in an impairment analysis, which is reviewed and approved by the Company's Managed Assets Division.

Restructured Loans

The table below presents a summary of restructured loans for the respective periods, presented by loan category and accrual status:

(Dollars in thousands)	September 30, 2011	June 30, 2011	September 30, 2010
Accruing:			
Commercial	\$ 7,726	\$ 12,396	\$ 7,690
Commercial real estate	74,307	72,363	65,149
Residential real estate and other	3,326	1,079	1,121
Total accrual	\$ 85,359	\$ 85,838	\$ 73,960
Non-accrual: ⁽¹⁾			
Commercial	\$ 3,793	\$ 3,587	\$ 3,959
Commercial real estate	13,322	12,308	13,812
Residential real estate and other	1,918	1,311	1,935
Total non-accrual	\$ 19,033	\$ 17,206	\$ 19,706
Total restructured loans:			
Commercial	\$ 11,519	\$ 15,983	\$ 11,649
Commercial real estate	87,629	84,671	78,961
Residential real estate and other	5,244	2,390	3,056
Total restructured loans	\$ 104,392	\$ 103,044	\$ 93,666

⁽¹⁾ Included in total non-performing loans.

At September 30, 2011, the Company had \$104.4 million in loans with modified terms. The \$104.4 million in modified loans represents 136 credit relationships in which economic concessions were granted to financially distressed borrowers to better align the terms of their loans with their current ability to pay. These actions were taken on a case-by-case basis working with financially distressed borrowers to find a concession that would assist them in retaining their businesses or their homes and attempt to keep these loans in an accruing status for the Company. See Note 7 of the Financial Statements presented under Item 1 of this report for further details on the Company's troubled debt restructurings.

Table of Contents*Other Real Estate Owned*

The table below presents a summary of other real estate owned, excluding covered other real estate owned, as of September 30, 2011, June 30, 2011, and September 30, 2010 and shows the activity for the respective periods and the balance for each property type:

	0000000	0000000	0000000
	Three Months Ended

Residential real estate development	18,535	16,591	22,600
Commercial real estate	71,451	58,985	45,276
Total	\$ 96,924	\$ 82,772	\$ 76,654

LIQUIDITY

Wintrust manages the liquidity position of its banking operations to ensure that sufficient funds are available to meet customers' needs for loans and deposit withdrawals. The liquidity to meet these demands is provided by maturing assets, liquid assets that can be converted to cash and the ability to attract funds from external sources. Liquid assets refer to money market assets such as Federal funds sold and interest bearing deposits with banks, as well as available-for-sale debt securities which are not pledged to secure public funds.

The Company believes that it has sufficient funds and access to funds to meet its working capital and other needs. Please refer to the Interest-Earning Assets, Deposits, Other Funding Sources and Shareholders' Equity discussions of this report for additional information regarding the Company's liquidity position.

INFLATION

A banking organization's assets and liabilities are primarily monetary. Changes in the rate of inflation do not have as great an impact on the financial condition of a bank as do changes in interest rates. Moreover, interest rates do not necessarily change at the same percentage as inflation. Accordingly, changes in inflation are not expected to have a material impact on the Company. An analysis of the Company's asset and liability structure provides the best indication of how the organization is positioned to respond to changing interest rates. See Quantitative and Qualitative Disclosures About Market Risks section of this report for additional information.

FORWARD-LOOKING STATEMENTS

This document contains, and the documents into which it may be incorporated by reference may contain, forward-looking statements within the meaning of federal securities laws. Forward-looking information can be identified through the use of words such as intend, plan, project, expect, anticipate, believe, estimate, contemplate, possible, point, will, may, should, would and could. Forward-looking statements, not historical facts, are premised on many factors and assumptions, and represent only management's expectations, estimates and projections.

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

regarding future events. Similarly, these statements are not guarantees of future performance and involve certain risks and uncertainties that are difficult to predict, which may include, but are not limited to, those listed below and the Risk Factors discussed under Item 1A of the Company's 2010 Annual Report on Form 10-K and in any of the Company's subsequent SEC filings. The Company intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and is including this statement for purposes of invoking these safe harbor provisions. Such forward-looking statements may be deemed to include, among other things, statements relating to the Company's future financial performance, the performance of its loan portfolio, the expected amount of future credit reserves and charge-offs, delinquency trends, growth plans, regulatory developments, securities that the Company may offer from time to time, and management's long-term performance goals, as well as statements relating to the anticipated effects on financial condition and results of operations from expected developments or events, the

Table of Contents

Company's business and growth strategies, including future acquisitions of banks, specialty finance or wealth management businesses, internal growth and plans to form additional *de novo* banks or branch offices. Actual results could differ materially from those addressed in the forward-looking statements as a result of numerous factors, including the following:

negative economic conditions that adversely affect the economy, housing prices, the job market and other factors that may affect the Company's liquidity and the performance of its loan portfolios, particularly in the markets in which it operates;

the extent of defaults and losses on the Company's loan portfolio, which may require further increases in its allowance for credit losses;

estimates of fair value of certain of the Company's assets and liabilities, which could change in value significantly from period to period;

changes in the level and volatility of interest rates, the capital markets and other market indices that may affect, among other things, the Company's liquidity and the value of its assets and liabilities;

a decrease in the Company's regulatory capital ratios, including as a result of further declines in the value of its loan portfolios, or otherwise;

legislative or regulatory changes, particularly changes in regulation of financial services companies and/or the products and services offered by financial services companies, including those resulting from the Dodd-Frank Act;

restrictions upon our ability to market our products to consumers and limitations on our ability to profitably operate our mortgage business resulting from the Dodd-Frank Act;

increased costs of compliance, heightened regulatory capital requirements and other risks associated with changes in regulation and the current regulatory environment, including the Dodd-Frank Act;

changes in capital requirements resulting from Basel II and III initiatives;

increases in the Company's FDIC insurance premiums, or the collection of special assessments by the FDIC;

losses incurred in connection with repurchases and indemnification payments related to mortgages;

competitive pressures in the financial services business which may affect the pricing of the Company's loan and deposit products as well as its services (including wealth management services);

delinquencies or fraud with respect to the Company's premium finance business;

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

failure to identify and complete favorable acquisitions in the future or unexpected difficulties or developments related to the integration of recent or future acquisitions;

unexpected difficulties and losses related to FDIC-assisted acquisitions, including those resulting from our loss-sharing arrangements with the FDIC;

credit downgrades among commercial and life insurance providers that could negatively affect the value of collateral securing the Company's premium finance loans;

any negative perception of the Company's reputation or financial strength;

the loss of customers as a result of technological changes allowing consumers to complete their financial transactions without the use of a bank;

the ability of the Company to attract and retain senior management experienced in the banking and financial services industries;

the Company's ability to comply with covenants under its securitization facility and credit facility;

Table of Contents

unexpected difficulties or unanticipated developments related to the Company's strategy of *de novo* bank formations and openings, which typically require over 13 months of operations before becoming profitable due to the impact of organizational and overhead expenses, the startup phase of generating deposits and the time lag typically involved in redeploying deposits into attractively priced loans and other higher yielding earning assets;

changes in accounting standards, rules and interpretations and the impact on the Company's financial statements;

adverse effects on our operational systems resulting from failures, human error or tampering;

significant litigation involving the Company; and

the ability of the Company to receive dividends from its subsidiaries.

Therefore, there can be no assurances that future actual results will correspond to these forward-looking statements. The reader is cautioned not to place undue reliance on any forward-looking statement made by the Company. Forward-looking statements speak only as of the date they are made, and the Company undertakes no obligation to update any forward-looking statement to reflect the impact of circumstances or events that arise after the date the forward-looking statement was made. Persons are advised, however, to consult further disclosures management makes on related subjects in its reports filed with the Securities and Exchange Commission and in its press releases.

Table of Contents**ITEM 3****QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS**

As an ongoing part of its financial strategy, the Company attempts to manage the impact of fluctuations in market interest rates on net interest income. This effort entails providing a reasonable balance between interest rate risk, credit risk, liquidity risk and maintenance of yield. Asset-liability management policies are established and monitored by management in conjunction with the boards of directors of the banks, subject to general oversight by the Risk Management Committee of the Company's Board of Directors. The policies establish guidelines for acceptable limits on the sensitivity of the market value of assets and liabilities to changes in interest rates.

Interest rate risk arises when the maturity or repricing periods and interest rate indices of the interest earning assets, interest bearing liabilities, and derivative financial instruments are different. It is the risk that changes in the level of market interest rates will result in disproportionate changes in the value of, and the net earnings generated from, the Company's interest earning assets, interest bearing liabilities and derivative financial instruments. The Company continuously monitors not only the organization's current net interest margin, but also the historical trends of these margins. In addition, management attempts to identify potential adverse changes in net interest income in future years as a result of interest rate fluctuations by performing simulation analysis of various interest rate environments. If a potential adverse change in net interest margin and/or net income is identified, management would take appropriate actions with its asset-liability structure to mitigate these potentially adverse situations. Please refer to Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations for further discussion of the net interest margin.

Since the Company's primary source of interest bearing liabilities is from customer deposits, the Company's ability to manage the types and terms of such deposits may be somewhat limited by customer preferences and local competition in the market areas in which the banks operate. The rates, terms and interest rate indices of the Company's interest earning assets result primarily from the Company's strategy of investing in loans and securities that permit the Company to limit its exposure to interest rate risk, together with credit risk, while at the same time achieving an acceptable interest rate spread.

The Company's exposure to interest rate risk is reviewed on a regular basis by management and the Risk Management Committees of the boards of directors of the banks and the Company. The objective is to measure the effect on net income and to adjust balance sheet and derivative financial instruments to minimize the inherent risk while at the same time maximize net interest income.

Management measures its exposure to changes in interest rates using many different interest rate scenarios. One interest rate scenario utilized is to measure the percentage change in net interest income assuming a ramped increase and decrease of 100 and 200 basis points that occurs in equal steps over a twelve-month time horizon. Utilizing this measurement concept, the interest rate risk of the Company, expressed as a percentage change in net interest income over a one-year time horizon due to changes in interest rates, at September 30, 2011, December 31, 2010 and September 30, 2010 is as follows:

	+200 Basis Points	+100 Basis Points	-100 Basis Points	-200 Basis Points
Percentage change in net interest income due to a ramped 100 and 200 basis point shift in the yield curve:				
September 30, 2011	7.9%	3.2%	(3.5)%	(8.5)%
December 31, 2010	5.3%	2.4%	(2.9)%	(7.0)%
September 30, 2010	5.8%	2.7%	(3.0)%	(7.4)%

This simulation analysis is based upon actual cash flows and repricing characteristics for balance sheet instruments and incorporates management's projections of the future volume and pricing of each of the product lines offered by the Company as well as other pertinent assumptions. Actual results may differ from these simulated results due to timing, magnitude, and frequency of interest rate changes as well as changes in market conditions and management strategies.

One method utilized by financial institutions to manage interest rate risk is to enter into derivative financial instruments. A derivative financial instrument includes interest rate swaps, interest rate caps and floors, futures, forwards, option contracts and other financial instruments with similar characteristics. Additionally, the Company enters into commitments to fund certain mortgage loans (interest rate locks) to be sold into the secondary market and forward commitments for the future delivery of mortgage loans to third party investors. See Note 14 of the Financial

Edgar Filing: WINTRUST FINANCIAL CORP - Form 10-Q

Statements presented under Item 1 of this report for further information on the Company's derivative financial instruments.

During the third quarter of 2011, the Company entered into certain covered call option transactions related to certain securities held by the Company. The Company uses these option transactions (rather than entering into other derivative interest rate contracts, such as interest rate floors) to increase the total return associated with the related securities. Although the revenue received from these options is recorded as non-interest income rather than interest income, the increased return attributable to the related securities from these

Table of Contents

options contributes to the Company's overall profitability. The Company's exposure to interest rate risk may be impacted by these transactions. To mitigate this risk, the Company may acquire fixed rate term debt or use financial derivative instruments. There were no covered call options outstanding as of September 30, 2011.

ITEM 4

CONTROLS AND PROCEDURES

As of the end of the period covered by this report, the Company's Chief Executive Officer and Chief Financial Officer carried out an evaluation under their supervision, with the participation of other members of management as they deemed appropriate, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as contemplated by Exchange Act Rule 13a-15. Based upon, and as of the date of that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective, in all material respects, in timely alerting them to material information relating to the Company (and its consolidated subsidiaries) required to be included in the periodic reports the Company is required to file and submit to the SEC under the Exchange Act.

There were no changes in the Company's internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) during the period that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II

Item 1A: Risk Factors

The following risks and uncertainties should be considered in addition to those risk factors set forth under Part I, Item 1A "Risk Factors" in the Company's Form 10-K for the fiscal year ended December 31, 2010.

Our premium finance business may involve a higher risk of delinquency or collection than our other lending operations, and could expose us to losses.

We provide financing for the payment of commercial insurance premiums and life insurance premiums on a national basis through our wholly owned subsidiary, FIFC. Commercial insurance premium finance loans involve a different, and possibly higher, risk of delinquency or collection than life insurance premium finance loans and the loan portfolios of our bank subsidiaries because these loans are issued primarily through relationships with a large number of unaffiliated insurance agents and because the borrowers are located nationwide. As a result, risk management and general supervisory oversight may be difficult. As of December 31, 2010, we had \$1.3 billion of commercial insurance premium finance loans outstanding, which represented 13% of our total loan portfolio as of such date.

FIFC may also be more susceptible to third party fraud with respect to commercial insurance premium finance loans because these loans are originated and many times funded through relationships with unaffiliated insurance agents and brokers. In the second quarter of 2010, fraud perpetrated against a number of premium finance companies in the industry, including the property and casualty division of FIFC, increased both the Company's net charge-offs and provision for credit losses by \$15.7 million. Acts of fraud are difficult to detect and deter, and we cannot assure investors that FIFC's risk management procedures and controls will prevent losses from fraudulent activity.

FIFC may be exposed to the risk of loss in our life insurance premium finance business because of fraud. While FIFC maintains a policy prohibiting the knowing financing of stranger-originated life insurance and has established procedures to identify and prevent the company from financing such policies, FIFC cannot be certain that it will never provide loans with respect to such a policy. In the event such policies were financed, a carrier could potentially put at risk the cash surrender value of a policy, which serves as FIFC's primary collateral, by challenging the validity of the insurance contract for lack of an insurable interest.

See the below risk factor "Widespread financial difficulties or credit downgrades among commercial and life insurance providers could lessen the value of the collateral securing our premium finance loans and impair the financial condition and liquidity of FIFC" for a discussion of further risks associated with our insurance premium finance activities.

While FIFC is licensed as required and carefully monitors compliance with regulation of each of its businesses, there can be no assurance that FIFC will not be negatively impacted by material changes in the regulatory environment.

Additionally, to the extent that affiliates of insurance carriers, banks, and other lending institutions add greater service and flexibility to their financing practices in the future, our competitive position and results of operations could be adversely affected. FIFC's life insurance premium finance business could be materially negatively impacted by changes in the federal or state estate tax provisions. There can be no assurance that FIFC will be able to continue to compete successfully in its markets.

Table of Contents

Widespread financial difficulties or credit downgrades among commercial and life insurance providers could lessen the value of the collateral securing our premium finance loans and impair the financial condition and liquidity of FIFC.

FIFC's premium finance loans are primarily secured by the insurance policies financed by the loans. These insurance policies are written by a large number of insurance companies geographically dispersed throughout the country. Our premium finance receivables balances finance insurance policies which are spread among a large number of insurers, however one of the insurers represents approximately 15% of such balances and two additional insurers each represent approximately 5% of such balances. FIFC consistently monitors carrier ratings and financial performance of our carriers. While FIFC can mitigate its risks as a result of this monitoring, the extent that commercial or life insurance providers experience widespread difficulties or credit downgrades, the value of our collateral will be reduced and FIFC is subject to the possibility of insolvency of insurance carriers in the commercial and life insurance businesses that are in possession of our collateral. If one or more large nationwide insurers were to fail, the value of our portfolio could be significantly negatively impacted. A significant downgrade in the value of the collateral supporting our premium finance business could impair our ability to create liquidity for this business, which, in turn could negatively impact our ability to expand.

Item 2: Unregistered Sales of Equity Securities and Use of Proceeds

On May 4, 2011 the Company entered into an Agreement and Plan of Merger to acquire Great Lakes Advisors, Inc (Great Lakes Advisors). The transaction closed on July 1, 2011. At closing, the Company issued 529,087 shares of common stock to the shareholders of Great Lakes Advisors as consideration for the merger. Based on representations and warranties made by the shareholders of Great Lakes Advisors, including representations to the Company as to their accredited investor status, their investment intent and financial sophistication, the common stock was issued in a transaction exempt from the registration and prospectus delivery requirements of the Securities Act of 1933 by virtue of Section 4(2) and Regulation D.

On July 26, 2011 the Company entered into an Agreement and Plan of Merger to acquire Elgin State Bancorp, Inc. (ESBI). The transaction closed on September 30, 2011. At closing, the Company issued 353,650 shares of common stock to the shareholders of ESBI as consideration for the merger. Based on representations and warranties made by the shareholders of ESBI, including representation to the Company as to their accredited investor status, their investment intent and financial sophistication, the common stock was issued in a transaction exempt from the registration and prospectus delivery requirements of the Securities Act of 1933 by virtue of Section 4(2) and Regulation D.
