SCHEDULE OF INVESTMENTS (continued)

At December 31, 2012

(unaudited)

NOTES TO SCHEDULE OF INVESTMENTS (all amounts in thousands):

* Floating or variable rate note. Rate is listed as of 12/31/2012.

^ All or a portion of this security is on loan. The value of all securities on loan is \$13,387.

The security has a perpetual maturity. The date shown is the next call date.

§ Illiquid. This security had a market value of \$874, or 0.60%, of the fund's net assets.

Rate shown reflects the yield at 12/31/2012.

P Aggregate cost for federal income tax purposes is \$145,735. Aggregate gross unrealized appreciation and depreciation for all securities in which there is an excess of value over tax cost were \$13,305 and \$933, respectively. Net unrealized appreciation for tax purposes is \$12,372.

D Restricted. At 12/31/2012, the fund owned the respective security which was restricted to public resale as follows:

<i>Investment Securities</i>	<i>Description</i>	<i>Acquisition Date</i>	<i>Cost</i>	<i>Value</i>	<i>Value as % of Net Assets</i>
Municipal Government Obligations	Rhode Island Economic Development Corp.	10/25/2010	\$835	\$874	0.60%

DEFINITIONS (all amounts in thousands):

144A 144A Securities are registered pursuant to Rule 144A of the Securities Act of 1933. These securities are deemed to be liquid for purposes of compliance limitations on holdings of illiquid securities and may be resold as transactions exempt from registration, normally to qualified institutional buyers. At 12/31/2012, these securities aggregated \$60,892, or 41.92% of the fund's net assets.

NOTES TO THE SCHEDULE OF INVESTMENTS

At December 31, 2012

(unaudited)

NOTE 1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Transamerica Income Shares, Inc. (the Fund) is a diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended (the 1940 Act). The following is a summary of significant accounting policies followed by the Fund.

Securities lending: Securities are lent to qualified financial institutions and brokers. The lending of securities exposes the Fund to risks such as the following: (i) the borrowers may fail to return the loaned securities; (ii) the borrowers may not be able to provide additional collateral; (iii) the Fund may experience delays in recovery of the loaned securities or delays in access to collateral; or (iv) the Fund may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash collateral equal to at least the market value of the securities loaned. Cash collateral received is invested in the State Street Navigator Securities Lending Trust-Prime Portfolio, a money market mutual fund registered under the 1940 Act. By lending such securities, the Fund seeks to increase its net investment income through the receipt of interest and fees.

The value of loaned securities and related collateral outstanding at December 31, 2012 are shown in the Schedule of Investments.

Repurchase agreements: Securities purchased subject to a repurchase agreement are held at the Fund's custodian and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Fund will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Foreign currency denominated investments: The accounting records of the Fund are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the closing exchange rate each day. The cost of foreign securities is translated at the exchange rates in effect when the investment was acquired.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Treasury inflation-protected securities (TIPS): The Fund invests in TIPS, specially structured bonds in which the principal amount is adjusted daily to keep pace with inflation as measured by the U.S. Consumer Price Index. The adjustments to principal due to inflation/deflation are reflected as increases/decreases to interest income with a corresponding adjustment to cost.

Restricted and illiquid securities: The Fund may invest in unregulated or otherwise restricted securities. Restricted and illiquid securities are subject to legal or contractual restrictions on resale or are illiquid. Restricted securities generally may be resold in transactions exempt from registration. A security may be considered illiquid if it lacks a readily available market or if its valuation has not changed for a certain period of time. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at the current valuation may be difficult.

The restricted and illiquid securities at December 31, 2012 are listed in the Schedule of Investments.

Real estate investment trusts (REITs): There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

NOTE 2. SECURITY VALUATIONS

Edgar Filing: TRANSAMERICA INCOME SHARES, INC. - Form N-Q

All investments in securities are recorded at their estimated fair value. The Fund values its investments at the close of the New York Stock Exchange (NYSE), normally 4 p.m. Eastern Time, each day the NYSE is open for business. The Fund utilizes various methods to measure the fair value of its investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three Levels of inputs of the fair value hierarchy are defined as follows:

Level 1 Unadjusted quoted prices in active markets for identical securities.

Level 2 Inputs, other than quoted prices included in Level 1, that are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3 Unobservable inputs, which may include Transamerica Asset Management, Inc. s (TAM) Valuation Committee s own assumptions in determining the fair value of investments. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the sub-adviser, issuer, analysts, or the appropriate stock exchange (for exchange-traded securities), analysis of the issuer s financial statements or other available documents and, if necessary, available information concerning other securities in similar circumstances.

Transamerica Income Shares, Inc.

NOTES TO THE SCHEDULE OF INVESTMENTS (continued)

At December 31, 2012

(unaudited)

NOTE 2. (continued)

The Fund's Board of Directors has delegated the valuation functions on a day-to-day basis to TAM, subject to board oversight. TAM has formed an internal valuation committee (the Valuation Committee) to monitor and implement the fair valuation policies and procedures as approved by the Board of Directors. These policies and procedures are reviewed at least annually by the Board of Directors. The Valuation Committee, among other tasks, monitors for when market quotations are not readily available or are unreliable and determines in good faith the fair value of portfolio investments. For instances in which daily market quotes are not readily available, securities may be valued, pursuant to procedures adopted by the Board of Directors, with reference to other instruments or indices. Depending on the relative significance of valuation inputs, these instruments may be classified in either Level 2 or Level 3 of the fair value hierarchy. The Valuation Committee may employ a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information for the security to determine the fair value of the security. An income-based valuation approach may also be used in which the anticipated future cash flows of the security are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of securities. When the Fund uses fair value methods that rely on significant unobservable inputs to determine a security's value, the Valuation Committee will choose the method that is believed to accurately reflect fair market value. These securities are categorized as Level 3 of the fair value hierarchy. The Valuation Committee reviews fair value measurements on a regular and ad hoc basis and may, as deemed appropriate, update the security valuations as well as the fair valuation guidelines.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, TAM's Valuation Committee's determination of values may differ significantly from values that would have been realized had a ready market for investments existed, and the differences could be material. The Valuation Committee employs various methods for calibrating these valuation approaches including a regular review of valuation methodologies, key inputs and assumptions, transactional back-testing and reviews of any market related activity.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety.

Fair value measurements: Descriptions of the valuation techniques applied to the Fund's major categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities (common and preferred stock): Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy.

Foreign securities, in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, Exchange Traded Funds, and the movement of the certain indices of securities based on a statistical analysis of their historical relationship; such valuations

Edgar Filing: TRANSAMERICA INCOME SHARES, INC. - Form N-Q

generally are categorized in Level 2.

Preferred stock, repurchase agreements, and other equities traded on inactive markets or valued by reference to similar instruments are also generally categorized in Level 2 or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the net asset value of the underlying securities and no valuation adjustments are applied. It is categorized in Level 1 of the fair value hierarchy.

Corporate bonds: The fair value of corporate bonds is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate bonds are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable inputs, they are categorized in Level 3.

Transamerica Income Shares, Inc.

NOTES TO THE SCHEDULE OF INVESTMENTS (continued)

At December 31, 2012

(unaudited)

NOTE 2. (continued)

Asset backed securities: The fair value of asset backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized as Level 3.

Short-term notes: Short-term notes are valued using amortized cost, which approximates fair value. To the extent the inputs are observable and timely, the values would be generally categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Government securities: Government securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Government securities generally are categorized in Level 2 of the fair value hierarchy, or in Level 3 if inputs are unobservable.

U.S. government agency securities: U.S. government agency securities are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government securities. Mortgage pass-throughs include to be announced (TBA) securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Restricted securities (equity and debt): The Fund may invest in unregulated or otherwise restricted securities. Restricted securities for which quotations are not readily available are valued at fair value as determined in good faith by TAM's Valuation Committee under the supervision of the Fund's Board of Directors. Restricted securities issued by publicly traded companies are generally valued at a discount to similar publicly traded securities. Restricted securities issued by nonpublic entities may be valued by reference to comparable public entities and/or fundamental data relating to the issuer. Depending on the relative significance of valuation inputs, these instruments may be classified in either Level 2 or Level 3 of the fair value hierarchy.

The hierarchy classification of inputs used to value the Fund's investments at December 31, 2012 is disclosed in the Valuation Summary of the Fund's Schedule of Investments.

Item 2. Controls and Procedures.

- (a) The Registrant's principal executive officer and principal financial officer evaluated the Registrant's controls and procedures within 90 days of this filing and have concluded that the Registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the "1940 Act")), are appropriately designed to ensure that information required to be disclosed by the Registrant in the reports that it files on Form N-Q (a) is accumulated and communicated to Registrant's management, including its principal executive officer and principal financial officer, to allow timely decisions regarding required disclosure, and (b) is recorded, processed, summarized and reported, within the time periods specified in the rules and forms adopted by the U.S. Securities and Exchange Commission.
- (b) The Registrant's principal executive officer and principal financial officer are aware of no change in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 3. Exhibits.

Separate certifications by the Registrant's principal executive officer and principal financial officer, as required by Rule 30a-2(a) under the 1940 Act, are attached.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the 1940 Act, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
