potential

should

Wright  
and  
Tornier  
use  
non-GAAP  
financial  
measures,  
including

EBITDA,  
as  
adjusted.  
Their  
respective  
management  
teams  
believe  
that  
the  
presentation  
of  
these  
measures  
provides  
useful  
information  
to  
investors  
and

measures  
may  
assist  
investors  
in  
evaluating  
their  
respective  
company s  
operations,  
period  
over  
period.  
EBITDA  
is  
calculated  
by  
adding  
back  
to  
net  
income  
charges  
for  
interest,  
income  
taxes  
and

depreciation  
and  
amortization  
expenses.  
While  
it  
is  
not

the

forecast  
excludes  
non-cash  
stock  
based  
compensation  
expense  
and  
non-operating  
income  
and

expense,  
as  
well  
as  
the  
expected  
impact  
of  
such  
items  
as  
transaction  
and  
transition  
costs,  
impacts  
from  
the  
sale  
of  
Wright's  
OrthoRecon  
business  
and  
costs  
associated  
with  
distributor  
conversions  
and  
non-competes,  
all  
of  
which  
may  
be  
highly  
variable,

on  
the  
combined  
company's

operations  
for

period.

Investors  
should  
consider  
these  
non-  
GAAP  
measures  
only  
as  
a  
supplement
