PENDRELL CORPORATION

(Exact name of registrant as specified in its charter)

Edgar Filing: Pendrell Corp - Form 10-K

Washington
(State or other jurisdiction of

98-0221142
(IRS Employer

incorporation or organization)

Identification No.)

2300 Carillon Point, Kirkland, Washington 98033

(Address of principal executive offices including zip code)

(425) 278-7100

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Class A common stock, par value \$0.01 per share	The Nasdaq Global Market

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of June 30, 2014, the aggregate market value of common stock held by non-affiliates of the registrant was approximately \$304,995,185

Edgar Filing: Pendrell Corp - Form 10-K

As of February 26, 2015, the registrant had 212,811,443 shares of Class A common stock and 53,660,000 shares of Class B common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's Definitive Proxy Statement for its 2015 Annual Meeting of Shareholders are incorporated by reference in Part III of this Form 10-K.

PART I

This Annual Report on Form 10-K (Form 10-K) contains certain forward-looking statements regarding future events and our future operating results that are subject to the safe harbors created under the Securities Act of 1933, as amended (Securities Act), and the Securities Exchange Act of 1934, as amended (Exchange Act). These statements may include words such as anticipate, estimate, expect, project, plan, intend, believe, may, will, should, likely and other words and terms of similar meaning in connection with any discussion of the timing or nature of future operating or financial performance or other events. All of these forward-looking statements are subject to risks and uncertainties that could cause our actual results to differ materially from those contemplated by the relevant forward-looking statements. Factors that might cause or contribute to such a difference include, but are not limited to, those discussed under Item 1A of Part I Risk Factors and elsewhere in this Form 10-K. The forward-looking statements included in this document are made only as of the date of this report, and we undertake no obligation to publicly update these forward-looking statements to reflect subsequent events or circumstances.

Item 1. Business.
Overview

Pendrell Corporation (Pendrell), together with its consolidated subsidiaries, is referred to as us, we, or the Company. Through our consolidated subsidiaries, we have invested in, acquired and developed businesses with unique technologies that are often protected by intellectual property (IP) rights, and that present the opportunity to address large, global markets. Our subsidiaries create value from our innovations, both by making our IP available for use by third parties and by developing and bringing to market products using our IP. We regularly evaluate our existing investments to determine whether retention or disposition is appropriate, and we investigate new investment and business acquisition opportunities. We also advise clients on various IP strategies and transactions.

Pendrell was originally incorporated in 2000 as New ICO Global Communications (Holdings) Limited, a Delaware corporation. In July 2011, we changed our name to Pendrell Corporation. On November 14, 2012, we reincorporated from Delaware to Washington. The reincorporation merely changed our legal domicile. Our consolidated financial condition and results of operations immediately after consummation of the reincorporation were the same as those immediately prior to the reincorporation. Our principal executive office is located at 2300 Carillon Point, Kirkland, Washington 98033, and our telephone number is (425) 278-7100. Our website address is www.pendrell.com. The information contained in or that can be accessed through our website is not part of this Form 10-K.

Our Business

Revenue Generating Activities

We generate revenues by licensing and selling our IP rights to others, and by advising clients on various IP matters. We also develop products that rely on our IP rights, although these offerings do not presently generate revenue. Our subsidiaries held approximately 1,200 patents as of December 31, 2014, with expiration dates ranging from 2015 to 2033, and with an average remaining life of approximately 6.2 years. These patents support four IP licensing programs that we own and manage: (i) digital media, (ii) digital cinema, (iii) wireless technologies, and (iv) memory and storage technologies.

Our digital media program is supported by patents and patent applications designed to protect against unauthorized duplication and use of digital content that is transferred from a source to one or more electronic devices. The majority of our digital media patents and patent applications came to us through our October 2011 purchase of a 90.1% interest in ContentGuard, where we partnered with Time Warner to expand the development and licensing of ContentGuard's industry-leading portfolio of digital rights management (DRM) technologies. At that time, ContentGuard held more than 260 issued patents and more than 160 pending applications

Table of Contents

worldwide. Our digital media licensees include manufacturers, distributors and providers of consumer products, including Casio Hitachi Mobile Communications, Fujitsu, LG Electronics, Microsoft Corporation, Nokia, Panasonic, Pantech, Sharp, Sony, Toshiba, Technicolor, S.A., Time Warner and Xerox Corporation. Other companies that manufacture, distribute or provide DRM-enabled consumer products and that we believe use ContentGuard's innovations, including Amazon, Apple, Blackberry, DirecTV, Google, HTC, Huawei, Motorola Mobility and Samsung (the ContentGuard Defendants), have not agreed to license our digital media assets, which prompted us to file claims against them for patent infringement.

Our digital cinema program is supported by patents and patent applications designed to protect against unauthorized creation, duplication and use of digital cinema content that is authored and distributed to movie theaters globally, many of which also came to us through our acquisition of ContentGuard. Potential digital cinema licensees include distributors and exhibitors of digital content, including motion picture producers, motion picture distributors and equipment vendors. We launched our digital cinema program in June 2013, and have engaged in licensing discussions with leading feature film studios.

Our wireless technologies program is supported by approximately 800 U.S. and foreign patents and patent applications, many of which enable key functionality in cellular and digital wireless devices and infrastructure. These patents and patent applications were developed by leading innovators in the wireless space, including Philips, IBM and ETRI, and cover key innovations in the cellular industry and digital wireless arena. Key technologies covered include 3G (e.g., W-CDMA, HSDPA, HSUPA), 4G (e.g., LTE, VoLTE), Bluetooth, Wi-Fi, and NFC technologies. Potential licensees include suppliers, manufacturers, distributors, and providers of wireless devices and infrastructure, including manufacturers and distributors of handsets, tablets, laptops, and other connected devices. We launched our wireless technologies program in Fall 2012, and are in discussions with several manufacturers of products that we believe rely on our wireless innovations.

Our memory and storage technologies program is supported by approximately 160 patents and patent applications, the majority of which were acquired from Nokia Corporation in March 2013, of which 81 have been declared by Nokia to be essential to standards that are applicable to memory and storage technologies used in electronic devices. These patents cover embedded memory components and storage subsystems. Potential licensees include flash memory component suppliers, solid state disk manufacturers and device vendors. We commenced discussions with potential licensees in late 2013, and subsequently entered into two license agreements with leading technology companies in 2014, and another license with a leading technology company in early 2015. Currently, our memory and storage technologies licensees include Samsung Electronics and SK hynix.

We typically license our patents via agreements that cover entire patent portfolios or large segments of portfolios. We expect licensing negotiations with prospective licensees to take approximately 12 to 24 months, and perhaps longer, measured from inception of technical discussions regarding the scope of our patents. If we are unable to secure reasonable, negotiated licenses, we may resort to litigation to enforce our IP rights. For example, in late 2013 and early 2014, ContentGuard asserted infringement claims against the ContentGuard Defendants.

Our IP revenue generation activities are not limited to licensing and litigation. Patents that we believe may generate greater value through a sales transaction may be sold. In addition, we provide IP valuation services, analysis and strategic advice to third parties, including IP portfolio development, strategic assessment of IP assets, IP landscape analysis and risk mitigation strategies. Although our revenue may occur in different forms, we regard our IP monetization activities as integrated and not separate revenue streams.

Product Development Activities

Through our subsidiaries we continue our efforts to develop new solutions to complex problems, including the development of products that commercialize our IP rights. For instance, in December 2013, through ContentGuard, we launched a digital content protection application for mobile device users, the functionality of which we continued to expand throughout 2014. During October 2014, ContentGuard launched Yovo®, our next-generation ephemeral photo and messaging application. Yovo® facilitates ephemeral photo sharing. Designed for

Table of Contents

sending scrambled photo messages via email, texting, Facebook and Twitter, Yovo[®] offers features such as full encryption, screen capture scrambling and a self-destruct timer that allows a sender to grant viewing rights for as little as one second and as long as 24 hours. These mobile applications, based on technologies developed by ContentGuard over the past fifteen years, are designed to address consumer demand for enhanced Internet privacy through solutions that restrict access to and limit the life of content. Our continuing development of these ephemeral content protection solutions reflects our commitment to continued innovation, including the development of products to commercialize our IP rights.

In early 2015, we suspended further development of the Provitro[®] proprietary micro-propagation technology and related laboratory processes that are designed to facilitate production on a commercial scale of certain plants, particularly timber bamboo. Although we continued to pursue revenue generating business opportunities through the fourth quarter, we were unable to identify opportunities to justify continued commercialization efforts. In the absence of opportunities, we determined that we should not sustain the cost structure required for continued development of the technology. As a result, we began seeking a buyer for Provitro[®] s assets and took an impairment charge equal to our unamortized investment in the Provitro[®] technology and related goodwill in our 2014 results of operations. In addition, in early 2015, we reached agreement with Provitro[®] s minority partner to cancel the ownership interest in Provitro that we did not already own for nominal consideration, thereby leaving us with 100% ownership of Provitro.

Business Outlook

From 2011 through late 2014, we focused on acquiring and growing companies that developed or possess unique, innovative technologies that can be licensed to third parties or provide a competitive advantage to products we develop and bring to market. In pursuit of this strategy, we invested our capital in companies with IP that we believe is undervalued, underutilized or not fully commercialized, or directly in IP assets. We also regularly explored acquisition and investment opportunities to supplement our existing businesses or to expand the scope of our businesses.

We explored a number of business development opportunities during 2014. However, due to escalating valuations which we attribute to inexpensive and widely available capital, we did not complete any transactions during the year. We expect this trend to continue and have therefore slowed our exploratory activity and reduced our costs by eliminating certain positions, abandoning certain patent assets that do not support our existing licensing programs, and lowering facilities costs. This does not mean we discontinued our assessment of opportunities to commercialize unique technologies and related businesses or otherwise invest our capital in opportunities which may be unrelated to our historical IP monetization activities, but until market conditions change, we expect to take a thoughtful and measured approach to potential transactions. In the meantime, we will concentrate our efforts on generating revenue from our existing assets.

Competition

Due to the unique nature of our IP rights, we do not compete directly with other patent holders or patent applicants. However, to the extent that multiple parties seek royalties on the same product or service, we might as a practical matter compete for a share of reasonable royalties from manufacturers and distributors.

If we continue to pursue IP rights to strengthen our existing licensing programs or launch new ones, we may compete with well-capitalized companies pursuing those same IP rights. We may also face indirect competition from prospective licensees, some of whom may be evaluating and implementing technologies that obviate the need to obtain a license to our IP rights.

Divestiture of Satellite Assets

When we were formed in 2000, our intent was to develop and operate a next generation global mobile satellite communications system. In 2011, we started selling assets associated with the satellite business,

Table of Contents

including our interests in DBSD North America, Inc. and its subsidiaries (collectively referred to as "DBSD") to DISH Network Corporation for \$325 million, from which we recognized a gain of approximately \$301 million associated with the disposition. During 2012, we divested the remaining vestiges of our satellite business, including the sale of our remaining medium earth orbit satellites and related equipment and our real property in Brazil, the transfer to a liquidating trust (the "Liquidating Trust") of certain former subsidiaries associated with the satellite business (the "International Subsidiaries") to address the winding down of the International Subsidiaries, and the settlement of our litigation with The Boeing Company ("Boeing").

The 2012 disposal of our satellite assets and the transfer of the International Subsidiaries to the Liquidating Trust resulted in the elimination of approximately \$61.9 million in satellite-related liabilities, a one-time \$48.7 million gain, and the triggering of tax losses of approximately \$2.4 billion, which we believe can be carried forward for up to twenty years. Additionally, our settlement with Boeing yielded a \$10.0 million payment from Boeing and Boeing's waiver of its right to appellate costs in exchange for the withdrawal of our appeal of the Boeing judgment.

Employees

As of December 31, 2014, on a consolidated basis, we had 57 full-time employees located in Washington, California, Texas, Washington D.C. and Finland.

Available Information

The address of our website is www.pendrell.com. You can find additional information about us and our business on our website. We make available on this website, free of charge, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports, as soon as reasonably practicable after we electronically file or furnish such materials to the Securities and Exchange Commission ("SEC"). You may read and copy this Form 10-K at the SEC's public reference room at 100 F Street, NE, Washington, DC 20549-0102. Information on the operation of the public reference room can be obtained by calling the SEC at 1-800-SEC-0330. These filings are also accessible on the SEC's website at www.sec.gov.

We also make available on our website in a printable format the charters for certain of our various Board of Director committees, including the Audit Committee, the Compensation Committee and the Nominating and Governance Committee, and our Code of Conduct and Ethics in addition to our Articles of Incorporation, Bylaws and Tax Benefits Preservation Plan. This information is available in print without charge to any shareholder who requests it by sending a request to Pendrell Corporation, 2300 Carillon Point, Kirkland, Washington 98033, Attn: Corporate Secretary. The material on our website is not incorporated into or part of this Form 10-K.

Item 1A. Risk Factors.

The risks below address some of the factors that may affect our future operating results and financial performance. If any of the following risks develop into actual events, then our business, financial condition, results of operations or prospects could be materially adversely affected.

Risks Related to our Patents and Monetization Activities

Success of our licensing efforts depends on our ability to enter into new license agreements or otherwise enforce our intellectual property rights.

Our licensing business depends on sustaining and growing our IP licensing revenue. IP licensing revenues are dependent on our ability to enter into new license agreements with, or otherwise enforce our intellectual property rights against, users of our patented inventions. If users refuse to sign or renew license agreements, we may need to resort to litigation or other measures to compel the payment of fair consideration, which may or may

Table of Contents

not be effective. This risk applies not only to new license agreements, but to existing license agreements with fixed expiration dates. If we fail to sign or renew license agreements on terms that are favorable to us or obtain favorable outcomes through litigation or other enforcement actions, our business opportunity could be negatively impacted.

If we fail to expand our portfolios, revenue opportunities from our IP monetization efforts will be limited.

Patents have finite lives. Our IP portfolio currently consists of patents that expire between 2015 and 2033, as well as patent applications. Our portfolio has an average remaining life of approximately 6.2 years. If we fail to develop or acquire new patentable inventions prior to the expiration of our patents, our licensing opportunities will be limited.

We may have a limited number of prospective licensees.

The patent portfolios that we own and may acquire in the future may be applicable to only a limited number of prospective licensees. As such, if we are unable to enter into licenses with this limited group, and if we fail to expand the breadth and depth of our patent portfolios, licensing revenue will be adversely impacted.

Our licensing cycle is lengthy, and our licensing efforts may be unsuccessful.

The process of licensing to customers can be lengthy, sometimes spanning a number of years. We expect to incur significant legal and sales expenses prior to entering into license agreements and generating license revenues. We also expect to spend considerable resources educating prospective licensees on the benefits of a license arrangement with us. As such, we may incur significant losses in any particular period before any associated revenue is generated. Moreover, if our portfolio is not demonstrably applicable to prospective licensees' products or services, whether due to poor quality, lack of breadth or otherwise, parties may refuse to enter into license agreements.

Enforcement proceedings may be costly and ineffective and could lead to impairment of our IP assets.

We may choose to pursue litigation or other enforcement action to protect our intellectual property rights, such as the litigation we initiated against the ContentGuard Defendants. Enforcement proceedings are typically protracted and complex, and might require cooperation of inventors and others who are unwilling or unable to assist with enforcement. Litigation also involves several stages, including the potential for a prolonged appeals process. The costs are typically substantial, and the outcomes are unpredictable. We may receive a ruling or judgment, or we may enter into licenses or settlement agreements that might compel us to revalue the IP assets that we are enforcing or the goodwill value of our enforcing subsidiary, which in turn might result in a reduction to the financial statement carrying value of such assets through a corresponding impairment charge which would adversely affect our results of operations and our financial position. Enforcement actions will likely divert our managerial, technical, legal and financial resources from business operations. In certain cases, we may conclude that these costs and risks outweigh the potential benefits that would arise from successful enforcement, in which event we may opt not to pursue enforcement.

Our business could be negatively impacted if our inventions are not incorporated into products.

Our licensing revenues have been generated from manufacturers and distributors of products that incorporate our patented inventions. Our business prospects could be negatively impacted if prospective licensees do not include our inventions in their products, or if they later modify their products to eliminate use of our inventions.

As we incorporate our IP into product offerings, we could face new risks.

As we seek to commercialize our IP through product offerings, we could face risks that we have not previously confronted, including IP infringement risks, product liability risks, and other risks. The outcome of

Table of Contents

proceedings arising from or related to such risks could have a material adverse effect on our results of operations or cash flows in any particular period. In addition, any growth associated with product offerings is largely dependent on the timing and market acceptance of any new product offerings, including our ability to continually modernize our products and bring those products to market. If any products we offer are not commercially successful, our results of operation and reputation could be adversely affected.

We may not recover costs of our commercialization activities.

We may incur significant costs to advance our commercialization efforts that might not be recovered if our efforts are unsuccessful. Our failure to recover such costs could adversely affect our results of operations and our financial position.

Future innovations could make our inventions obsolete.

Our success depends, in part, on continued demand for products that incorporate our patented inventions. Changes in technology or customer requirements could render our patented inventions obsolete or unmarketable.

Challenges to the validity or enforceability of our key patents could significantly harm our business.

Our assets include patents that are integral to our business and revenues. Prospective licensees or competitors may challenge the validity, scope, enforceability and ownership of our patents. Their challenges may include review requests in the relevant patent and trademark office, such as the inter partes review and covered business method proceedings initiated by certain ContentGuard Defendants. Review proceedings are costly and time-consuming, and we cannot predict their outcome or consequences. Such proceedings may narrow the scope of our claims or may cancel some or all of our claims. If some or all of our patent claims are canceled, we could be prevented from enforcing or earning future revenues from such patents. Even if our claims are not canceled, enforcement actions against alleged infringers, such as our litigation against the ContentGuard Defendants, may be stayed pending resolution of reviews, or courts or tribunals reviewing our patent claims could make findings adverse to our interests based on facts presented in review proceedings. Irrespective of outcome, review challenges may result in substantial legal expenses and diversion of management's time and attention away from our other business operations. Adverse decisions could impair the value of our inventions or result in a loss of our proprietary rights and may adversely affect our results of operations and our financial position.

Delays in issuance of patents could harm our business.

We may acquire and pursue additional patents and related intellectual property rights. If we do, our patent applications will add to a growing number of patent applications, which may result in longer delays in obtaining approval of such patent applications. The application delays could cause delays in recognizing revenue from new patents and could cause us to miss opportunities to license or enforce patents before other competing technologies are developed or introduced into the market.

Changes in patent law could adversely impact our business.

Patent laws may continue to change, and may alter protections afforded to owners of patent rights, impose additional enforcement risks, increase the costs of enforcement, or increase our licensing cycles. For instance, during 2013, legislative initiatives were introduced to address perceived patent abuses by non-practicing entities. Although legislation was not enacted, similar legislation has been introduced in 2015. Even if legislative initiatives do not directly impact our business, such initiatives might encourage manufacturers to infringe our IP rights, lengthen our licensing cycles, increase the likelihood that we will litigate to enforce our IP rights, or make it more difficult and expensive to license our patents or enforce our patents against parties using our inventions without a license. Moreover, increased focus on the growing number of patent-related lawsuits may result in legislative changes which increase our costs and related risks of asserting patent enforcement actions.

Table of Contents

Changes of interpretations of patent law could adversely impact our business.

Our success in review and enforcement proceedings relies in part on the historically consistent application of patent laws and regulations. Interpretations of patent laws and regulations by the courts and applicable regulatory bodies have evolved, and may continue to evolve, particularly with the introduction of new laws and regulations. Changes or potential changes in judicial interpretation could have a negative impact on our ability to monetize our patent rights.

Risks Related to our Acquisition Activities

We may over-estimate the value of assets or businesses we acquire.

We make investments from which we intend to generate a return. We estimate the value of these investments prior to acquisition, using both objective and subjective methodologies. If we over-estimate such value, we may not generate desired returns on our investment, or we may need to adjust the value of the investments to fair value and record a corresponding impairment charge, either of which could adversely affect our results of operations and our financial position.

We may not capitalize on acquired assets.

Even if we accurately value the investments we make, we must succeed in generating a return on the investments. For instance, our subsidiaries that own IP rights must commercialize, license, or otherwise monetize the IP rights in order to generate a return on our investment. Our success in generating a return, particularly with respect to our IP rights, depends on effective efforts of our employees and outside professionals, which typically requires complex analysis, the exercise of sound professional judgment and effective education of prospective licensees and customers. If we do not generate desired returns on our investments or if we are compelled to adjust the value of the investments to fair value and record a corresponding impairment charge, it could adversely affect our results of operations and our financial position.

We may pursue other acquisition or investment opportunities that do not yield desired results.

We intend to continue investigating potential acquisitions that support our business objectives and strategy. Acquisitions are time-consuming, complex and costly. The terms of acquisition agreements tend to be heavily negotiated. As a result, we may incur significant transactional expenses, regardless of whether or not acquisitions are consummated. Moreover, the integration of acquired companies prompts significant challenges, and we can provide no assurances that the integration of acquired businesses with our business will result in the realization of the full benefits we anticipate from such acquisitions. Investigating businesses and assets and integrating newly acquired businesses or assets may be costly and time-consuming, and such activities could divert our attention from other business concerns. In addition, we might lose key employees while integrating new organizations. Acquisitions could also result in potentially dilutive issuances of equity securities or the incurrence of debt, the assumption or incurrence of contingent liabilities, possible impairment charges related to goodwill or other intangible assets or other unanticipated events or circumstances, any of which could negatively impact our financial position. We might not be successful in integrating acquired businesses, and might not achieve desired revenues and cost benefits.

We rely on representations, warranties and opinions from third parties that might not be accurate.

When we acquire assets or businesses or establish relationships with inventors or strategic partners, we may rely on representations and warranties made by third parties. We also may rely on opinions of lawyers and other professionals. We may not have the opportunity to independently investigate and verify the facts upon which such representations, warranties and opinions are made. By relying on these representations, warranties and opinions, we may be exposed to unforeseen liabilities that could have a material adverse effect on our operating results and financial condition.

Table of Contents

Risks Related to our Operations

Our financial and operating results have been and may continue to be uneven.

Our operating results may fluctuate and, as such, our operating results are difficult to predict. You should not rely on quarterly or annual comparisons of our results of operations as an indication of our future performance. Factors that could cause our operating results to fluctuate during any period or that could adversely affect our operating results include the timing of license, sales and consulting agreements, compliance with such agreements, the terms and conditions for payment under those agreements, our ability to protect and enforce our intellectual property rights, changes in demand for products that incorporate our inventions, the time period between commencement and completion of license negotiations or enforcement proceedings, revenue recognition principles, and changes in accounting policies.

Our revenues have not and may not offset our operating expenses.

Through 2014, we developed and expanded our business by acquiring IP assets, developing new solutions and products and expanding the reach and scope of our IP business. We also incurred expenses to hire new personnel, including employees for IP services, patent research and analysis, development of reporting systems and general and administrative functions and to pay legal fees for IP enforcement activities. As a result, our costs exceeded our revenues, and although we have recently scaled back our expansion efforts, we anticipate that costs will continue to exceed revenues until and unless we generate additional revenue from our existing assets. If we are not successful in generating revenue that is sufficient to offset our expenses, our financial position will be negatively impacted.

Failure to effectively manage the composition of our employee base could strain our business.

Our success depends, in large part, on continued contributions of our key managers and employees, many of whom are highly skilled and would be difficult to replace. Our success also depends on our ability to attract, train and retain highly skilled personnel, and on the abilities of new personnel to function effectively, both individually and as a group. Recently, we terminated the employment of certain individuals (including IP consultants) who we believe were redundant or unnecessary to advance our current and anticipated business initiatives. If we misjudged our ongoing personnel needs or lose any of our remaining senior managers or key personnel, it could lead to dissatisfaction among our clients or licensees, which could slow our growth or result in a loss of business. Moreover, if we fail to manage the composition of our employee base effectively or otherwise strain our relationships with our personnel, our business and financial results may be materially harmed.

Our provision of IP-related services could result in professional liability that may damage our reputation.

Our provision of IP-related services typically involves complex analysis and the exercise of professional judgment. As a result, we are subject to the risk of professional liability. If a client questions the quality of our work, the client could threaten or bring a lawsuit to recover damages or contest its obligation to pay fees. Litigation alleging that we performed negligently or breached any other obligations to a client could expose us to legal liabilities and, regardless of outcome, could be costly, distract our management and damage our reputation.

Rights of minority shareholders may limit future value.

The governing documents for certain subsidiaries which we do not wholly own describe certain actions that require unanimous consent of their respective shareholders. For instance, we entered into a voting agreement with Time Warner that survives so long as Time Warner holds a material interest in ContentGuard, and which requires the prior written consent of both us and Time Warner before ContentGuard commits its patents to a standards body or patent pool, grants any license that facilitates copyright theft, undertakes certain litigation, or sells or transfers any material patents free of these three restrictions. Historically, shareholder consent requirements have not adversely impacted our business, but circumstances could change. Moreover, we may enter into investments in the future that involve similar or more restrictive governance provisions. If our interests

Table of Contents

and the interests of our partners or other shareholders in these investments diverge, we may be unable to capitalize on business opportunities or prevented from realizing favorable returns on investments.

If we need financing and cannot obtain financing on favorable terms, our business may suffer.

We have relied on revenues from clients and licensees and existing cash reserves to finance our operations. If we deploy a significant portion of our capital or encounter unforeseen difficulties in the future that deplete our capital resources more rapidly than anticipated, we may need to obtain additional financing. Financing might not be available on favorable terms, if at all, may dilute our existing shareholders, and may prompt us to pursue structural changes that could impact shareholder concentration and liquidity. If we fail to obtain additional capital as and when needed, such failure could have a material adverse impact on our business, results of operations and financial condition.

Future changes in standards, rules, practices or interpretation may impact our financial results.

We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. These principles are subject to interpretations by the SEC and various accounting bodies. In addition, we are subject to various taxation rules in many jurisdictions. The existing taxation rules are generally complex, voluminous, frequently changing and often ambiguous. Changes to existing taxation rules, changes to the financial accounting standards, or any changes to the interpretations of these standards or rules, or changes in practices under these standards and rules, may adversely affect our reported financial results or the way we conduct our business.

Unauthorized use or disclosure of our confidential information could adversely affect our business.

We rely primarily on a combination of license agreements, nondisclosure agreements, other contractual relationships and patent, trademark, trade secret and copyright laws to protect our confidential and proprietary information, our technology and our intellectual property. We cannot be certain that these protections have not been and will not be breached, that we will be able to timely detect unauthorized use or transfer of our trade secrets or intellectual property, that we will have adequate remedies for any breach, or that our trade secrets will not otherwise become known or be independently discovered by competitors. If we are unable to detect in a timely manner the unauthorized use or disclosure of our proprietary or other confidential information or if we are unable to enforce our rights under our agreements or applicable laws, the misappropriation of such information could harm our business.

Risks Related to the Tax Losses Generated from Our Former Satellite Communications Business

Our ability to benefit from our United States federal income tax loss carryforward may be impacted by changes in the tax laws.

We have substantial historical net operating losses (NOLs) for United States federal income tax purposes. As of December 31, 2014, we had NOL carryforwards of approximately \$2.5 billion. A significant portion of our NOL was triggered when we disposed of our satellite business. We believe these NOLs can be carried forward to offset certain future taxable income. However, our ability to benefit from these historical NOLs is dependent on the generation of future taxable income during the loss carryforward period. The NOL carryforward period begins to expire in 2025 with the bulk of the NOLs expiring in 2032. If the tax laws are amended to limit or eliminate our ability to carryforward the NOLs for any reason, or to lower income tax rates, the value of the NOLs may be significantly reduced.

An Ownership Change under Section 382 of the Internal Revenue Code may significantly limit Pendrell's ability to use its NOLs to offset future taxable income.

Our use of our NOLs will be significantly limited if we undergo a Tax Ownership Change, as defined in Section 382 of the Internal Revenue Code. Broadly, Pendrell will have a Tax Ownership Change if, over a three-

Table of Contents

year testing period, the portion of all stock of Pendrell, by value, owned by one or more 5% shareholder increases by more than 50 percentage points. For purposes of this test, shareholders that own less than 5% of the stock of Pendrell are aggregated into one or more separate public groups, each of which is treated as a 5% shareholder. In general, shares traded within a public group are not included in the Tax Ownership Change test. Despite our adoption of certain protections against a Tax Ownership Change (such as our Tax Benefits Preservation Plan), we cannot control the trading activity of our significant shareholders. If significant shareholders divest their shares in a manner or at times that do not account for the loss-limiting provisions of the Internal Revenue Code or regulations adopted thereunder, a Tax Ownership Change could occur. If a Tax Ownership Change occurs when the value of the Class A Common Stock is low, Pendrell will be permanently unable to use most of its NOLs.

Our NOLs cannot be used to offset the Personal Holding Company tax.

The Internal Revenue Code imposes an additional tax on the undistributed income of a Personal Holding Company (PHC). In general, a corporation will be classified as a PHC if more than 50% of its outstanding shares, measured by value, are owned directly or indirectly by five or fewer individuals and at least 60% of its adjusted gross income is Personal Holding Company Income (PHCI). Broadly, PHCI includes income such as dividends, interest, rents and royalties, among others. We believe that any income from ContentGuard's resolution of its claims against the ContentGuard Defendants will be classified as PHCI. Due to the significant number of shares held by our largest shareholders, we must continually assess share ownership of Pendrell and each of our consolidated subsidiaries, including ContentGuard. To date neither Pendrell, as the parent company, nor any of our consolidated subsidiaries have incurred a PCH tax obligation. However, it is possible that action or inaction by significant shareholders could result in a future PHC tax liability. The PHC tax, which is in addition to the income tax, is currently levied at 20% of the net PHCI not distributed to the corporation's shareholders.

Our NOLs cannot be used to completely offset the Alternative Minimum Tax or other taxes.

We may also be subject to the corporate Alternative Minimum Tax (AMT) in a year in which we have net taxable income because the AMT cannot be completely offset by available NOLs, as losses carried forward generally can offset no more than 90% of a corporation's AMT liability. In addition, our federal NOLs will not shield us from foreign withholding taxes, state and local income taxes, or revenue-based taxes incurred in jurisdictions that impose such taxes.

Our ability to utilize our NOLs is dependent on the generation of future taxable income.

Our ability to utilize our NOLs is dependent upon the generation of future taxable income before the expiration of the carry forward period attributable to the NOLs, which begin to expire in 2025. We did not generate taxable income in 2013 or 2014 and we may not generate sufficient taxable income in future years to use the NOLs before they begin expiring.

Risks Related to Our Class A Common Stock

Future sales of our Class A common stock could depress the market price.

The average trading volume of our Class A common stock is low in relation to the number of outstanding shares of Class A common stock. As a result, the market price of our Class A common stock could decline as a result of sales of a large number of shares. These sales might also make it more difficult for us to sell shares in the future at a time and price that we deem appropriate.

A sale of a large number of shares by our largest shareholders could depress the market price of our Class A common stock.

A small number of our shareholders hold a majority of our Class A common stock and our Class B common stock, which is convertible at the option of the holders into Class A common stock. The sale or prospect of the

Table of Contents

sale of a substantial number of these shares could have an adverse effect on the market price of our Class A common stock.

The interests of our controlling shareholder may conflict with the interests of other Class A holders.

Eagle River Satellite Holdings, LLC, together with its affiliates Eagle River Investments, LLC, Eagle River, Inc. and Eagle River Partners, LLC (collectively, Eagle River) controls approximately 65% of the voting power of our outstanding capital stock. As a result, Eagle River has control over the outcome of matters requiring shareholder approval, including the election of directors, amendments to our governing documents, the adoption or prevention of mergers, consolidations or sales of all or substantially all of our assets, or control changes. Eagle River is not restricted or prohibited from competing with us.

We are a controlled company within the meaning of the NASD Marketplace Rules and, as a result, will qualify for, and may rely on, exemptions from certain corporate governance requirements.

Eagle River controls approximately 65% of the voting power of our outstanding capital stock. As a result, we are a controlled company within the meaning of the Nasdaq Global Select Market corporate governance standards, and therefore may elect not to comply with certain Nasdaq Global Select Market corporate governance requirements, including (i) the requirement that a majority of the board of directors consist of independent directors, (ii) the requirement that the compensation of officers be determined, or recommended to the board of directors for determination, by a majority of the independent directors or a compensation committee comprised solely of independent directors, and (iii) the requirement that director nominees be selected, or recommended for the board of directors selection, by a majority of the independent directors or a nominating committee comprised solely of independent directors with a written charter or board resolution addressing the nomination process. We do not currently rely on any of these exemptions, but reserve the right to do so in the future. If we choose to do so, our shareholders may not have the same protections afforded to shareholders of companies that are subject to all of the Nasdaq Global Select Market corporate governance requirements.

Our Tax Benefits Preservation Plan, as well as certain provisions in our restated articles of incorporation, may discourage takeovers, which could affect the rights of holders of our Class A common stock.

Our Tax Benefits Preservation Plan is intended to act as a deterrent against any person or group acquiring or otherwise obtaining beneficial ownership of more than 4.9% of our securities without the approval of our board of directors. In addition, our articles of incorporation require us to take all necessary and appropriate action to protect certain rights of our common shareholders, including voting, dividend and conversion rights and rights in the event of a liquidation, merger, consolidation or sale of substantially all of our assets. Our articles of incorporation also provide that we will not avoid or seek to avoid the observance or performance of those rights by charter amendment, entry into an inconsistent agreement or reorganization, recapitalization, transfer of assets, consolidation, merger, dissolution or the issuance or sale of securities. The rights protected by these provisions of the articles of incorporation include our Class B common shareholders right to ten votes per share on matters submitted to a vote of our shareholders and option to convert each share of Class B common stock into one share of Class A common stock. The provisions of the Tax Benefits Preservation Plan and our articles of incorporation could discourage takeovers of our company, which could adversely affect the rights of our shareholders.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our corporate headquarters are located in Kirkland, Washington, where we occupy approximately 8,050 square feet of space. Our employees are primarily located in offices in California, Texas and Washington. Upon expiration of our various leases, we do not anticipate any difficulty in obtaining renewals or alternative space.

Table of Contents

The following table lists our leased properties for our principal places of business as of December 31, 2014:

Location	Lease Term	Square Footage (Approx.)
Berkeley, CA	Expires October 31, 2017	5,671
Plano, TX	Expires December 31, 2018	2,995
Kirkland, WA	Expires July 31, 2019	8,050

We believe our facilities are adequate for our current business and operations.

Item 3. Legal Proceedings.

Enforcement Action against Amazon et. al. On December 18, 2013, ContentGuard filed a patent infringement lawsuit against Amazon.com, Inc., Apple Inc., Blackberry Corporation (fka Research in Motion Corporation), Huawei Device USA, Inc. and Motorola Mobility LLC in the Eastern District of Texas, in which ContentGuard alleged that these ContentGuard Defendants infringed and continue to infringe nine of its patents by making, using, selling or offering for sale certain mobile communication and computing devices (the Amazon Litigation). On January 17, 2014, ContentGuard filed an amended complaint in the Amazon Litigation adding certain affiliates of the original defendants, along with HTC Corporation, HTC America Inc., Samsung Electronics Co., Ltd., Samsung Electronics America, Inc. and Samsung Telecommunications America, LLC. In August 2014, DirecTV intervened in the case and thereby became an additional ContentGuard Defendant, against whom ContentGuard asserted additional infringement claims. In February 2015, the presiding judge heard claim construction arguments from all parties. Trials are scheduled for September 2015. We are unable to anticipate the timing or outcome of the Amazon Litigation.

Google Actions On January 31, 2014, Google Inc. (Google) filed a declaratory judgment suit in the Northern District of California alleging that Google does not infringe the nine patents asserted in the Amazon Litigation. On February 5, 2014, ContentGuard filed a patent infringement action in the Eastern District of Texas against Google, in which ContentGuard alleges that Google has infringed and continues to infringe the same nine patents. In April 2014, the presiding judge in the Eastern District of Texas, with the endorsement of the presiding judge in the Northern District of California, ruled that all claims by and against Google will be resolved in the Eastern District of Texas, and not in the Northern District of California. The presiding judge also declined to consolidate the Google actions with the Amazon Litigation. In February 2015, the presiding judge heard claim construction arguments. Trial is scheduled for September 2015. We are unable to anticipate the timing or outcome of the actions by and against Google.

IPR and CBM Petitions by ContentGuard Defendants In December 2014, Apple filed with the United States Patent and Trademark Office (the USPTO) twenty-nine inter partes review (IPR) petitions and three covered business method (CBM) petitions, through which Apple is challenging the validity of all nine patents asserted in the Amazon Litigation. Also in December 2014, Google filed three CBMs, challenging the validity of three of the nine asserted patents. The USPTO will decide in the coming months whether to initiate review proceedings on some or all of the IPR and CBM petitions. The USPTO's Patent Trial and Appeal Board (PTAB), which hears all IPR and CBM challenges, will administer and hear argument in any initiated proceedings. We are unable to predict whether or not proceedings will be initiated, or whether or not such proceedings will impact the timing or outcome of our claims against the ContentGuard Defendants.

ZTE IPRs In early 2012, ContentGuard and its subsidiaries filed lawsuits in United States and German courts, alleging that ZTE Corporation, ZTE (USA) Inc. and ZTE Deutschland GmbH (collectively ZTE) infringed and continue to infringe ContentGuard patents by making, using, selling or offering for sale certain mobile communication and computing devices. ZTE subsequently filed IPR petitions with the USPTO, challenging the validity of six U.S. patents asserted by ContentGuard against ZTE. The PTAB terminated proceedings with respect to two patents, both of which emerged with valid patent claims. ZTE's claims against

Table of Contents

the other four patents, all of which are also asserted against the ContentGuard Defendants, went to trial. Following trial, the PTAB rejected ZTE's remaining challenges, and confirmed the validity of all claims in the four patents. ZTE's time for appeal expired with no appeals filed. As a result, the decisions of the PTAB, as against ZTE, are now final. Nonetheless, all four affirmed patents have been challenged in fourteen new IPRs filed by Apple, as described in the paragraph above. We are unable to predict whether, and to what extent, the PTAB will allow Apple to challenge these patents in new proceedings.

ZTE Enforcement Actions Meanwhile, in response to the claims filed against ZTE in Germany, in which ContentGuard GmbH alleged infringement of three European patents, ZTE filed a nullity action against two of the patents and an opposition proceeding against the third patent. The infringement and nullity proceedings in Germany, along with all U.S. court actions, were put to rest or stayed as the result of a standstill agreement signed by ContentGuard and ZTE in December 2013. ZTE prevailed in the opposition proceeding, resulting in the revocation of one European patent. ContentGuard must decide whether to appeal the revocation prior to end of the first quarter of 2015. We are unable to anticipate the timing or outcome of the opposition proceedings.

J&J Collection In November 2012, we obtained an arbitration judgment in the U.K. against Jay and Jayendra (Pty), a South African corporation (J&J Group) for approximately \$4.0 million. J&J Group submitted multiple appeals to the U.K. courts, the last of which was rejected in July 2013. In December 2014, we obtained an enforcement judgment against J&J Group from a South African court. J&J's time to appeal the enforcement judgment expired with no appeals filed, and we have commenced action to enforce the judgment. Due to the uncertainty of collection, we have not recognized the gain associated with the judgment. We are unable to anticipate the timing or outcome of the collection proceedings against J&J Group.

Item 4. Mine Safety Disclosures.

Not Applicable.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.***Market for Our Class A Common Stock*

Our Class A common stock trades on the Nasdaq Global Select Market under the symbol PCO. Effective July 21, 2011, we changed our name from ICO Global Communications (Holdings) Limited to Pendrell Corporation, and adopted PCO as our new ticker symbol. Previously, our Class A common stock traded on the Nasdaq Global Select Market under the symbol ICOG.

The table below sets forth the high and low sales prices of our Class A common stock in U.S. dollars for each of the periods presented. Stock prices represent amounts published on the Nasdaq Global Select Market. As of February 26, 2015, the closing sales price of our Class A common stock was \$1.12 per share.

Period	2014		2013	
	High	Low	High	Low
First Quarter	\$ 1.91	\$ 1.34	\$ 1.66	\$ 1.26
Second Quarter	\$ 1.85	\$ 1.39	\$ 2.70	\$ 1.55
Third Quarter	\$ 1.84	\$ 1.31	\$ 2.70	\$ 1.88
Fourth Quarter	\$ 1.67	\$ 1.26	\$ 2.30	\$ 1.76

As of February 26, 2015, there were approximately 340 record holders of our Class A common stock.

Market for Our Class B Common Stock

There is no established trading market for our Class B common stock, of which we have 53,660,000 shares outstanding with two holders of record. Each share of Class B common stock is convertible at any time at the option of its holder into one share of Class A common stock.

Dividends

We have never paid a cash dividend on shares of our equity securities. So long as we do not become a personal holding company that is subject to personal holding company tax, we do not intend to pay any cash dividends on our common shares during the foreseeable future. It is anticipated that future earnings, if any, from our operations will be used to finance growth.

Table of Contents

Performance Measurement Comparison

The following graph shows the total shareholder return as of the dates indicated of an investment of \$100 in cash on December 31, 2009 for: (i) our Class A common stock; (ii) the Nasdaq Composite Index; and (iii) the Nasdaq 100 Technology Sector Index. All values assume reinvestment of the full amount of any dividends; however, no dividends have been declared on our Class A common stock to date.

The stock price performance graph below is not necessarily indicative of future performance.

*\$100 invested on 12/31/09 in stock or index, including reinvestment of dividends.

Fiscal year ending December 31.

	12/09	12/10	12/11	12/12	12/13	12/14
Pendrell Corporation	100.00	138.89	237.04	117.59	186.11	127.78

NASDAQ 100 Technology Sector	100.00	114.80	121.87	143.60	199.67	234.29

Table of Contents**Item 6. Selected Financial Data.**

The following selected consolidated financial data should be read in conjunction with Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and accompanying notes included in this Form 10-K.

	Year Ended December 31,				
	2014	2013	2012	2011	2010
	(in thousands, except per share data)				
Revenue(1)	\$ 42,534	\$ 13,128	\$ 33,775	\$ 2,637	\$
Operating expenses:					
Cost of revenues(2)	14,170	7,872	314		
Patent administration and related costs(2)	6,386	4,405	3,655	193	
Patent litigation(2)	9,880	4,564	2,538		
General and administrative(2)	27,467	25,939	29,844	21,822	14,392
Stock-based compensation	9,405	12,345	8,597	5,369	1,794
Amortization of intangibles	15,929	15,864	13,471	1,986	
Impairment of finite-lived intangibles and goodwill(3)	11,013				
Gain on contract settlements(4)/(5)				(4,735)	(15,666)
Operating expenses, net	94,250	70,989	58,419	24,635	520
Operating loss	(51,716)	(57,861)	(24,644)	(21,998)	(520)
Net interest expense	(99)	(64)	(2,245)	(4,450)	(4,316)
Gain on deconsolidation of subsidiaries(6)			48,685		
Gain on settlement of Boeing litigation(7)			10,000		
Gain associated with disposition of assets(8)			5,599	300,886	
Gain on liquidation of subsidiaries					2,459
Other income (expense)	(16)	(55)	1,588	1,223	(1,094)
Income (loss) before income taxes	(51,831)	(57,980)	38,983	275,661	(3,471)
Income tax benefit (expense)(9)	(6,303)		1,034	42,925	787
Net income (loss)	(58,134)	(57,980)	40,017	318,586	(2,684)
Net loss attributable to noncontrolling interest	(7,132)	(2,918)	(67)	(274)	
Net income (loss) attributable to Pendrell	\$ (51,002)	\$ (55,062)	\$ 40,084	\$ 318,860	\$ (2,684)
Basic income (loss) per share attributable to Pendrell	\$ (0.19)	\$ (0.21)	\$ 0.16	\$ 1.26	\$ (0.01)
Diluted income (loss) per share attributable to Pendrell	\$ (0.19)	\$ (0.21)	\$ 0.15	\$ 1.23	\$ (0.01)
Total assets	\$ 304,104	\$ 351,994	\$ 381,415	\$ 435,047	\$ 45,577
Long-term obligations, including current portion of capital lease obligations(10)	\$ 1,521	\$ 6,695	\$ 2,241	\$ 76,406	\$ 27,921

- (1) Prior to the acquisition of Ovidian and ContentGuard during the year ended December 31, 2011, we were a development stage enterprise and did not generate any revenue from operations.
- (2) Certain prior period amounts have been reclassified to conform to the current year presentation of expenses in our consolidated statements of operations, including the presentation of cost of revenues and patent litigation as separate captions; as such costs were previously included in patent administration, litigation and related costs and general and administrative in prior years.
- (3) During the fourth quarter of the year ended December 31, 2014, we recorded a non-cash impairment of Provitro's goodwill and proprietary micro-propagation technology. Although we believe the technology is sound, we were unable to identify near-term opportunities to commercialize the technology.

Table of Contents

- (4) During the year ended December 31, 2011, we recognized a \$4.7 million gain associated with a reduction of our estimated liability for gateway obligations as a result of our agreement to purchase Deutsche Telekom AG's claim against one of our subsidiaries.
- (5) Prior to 2013, certain of our subsidiaries had agreements with ten operators of gateways for our MEO satellite system. Nine of the ten operators terminated their agreements with us. Of these nine, five were settled with no further obligation by us. In 2010, upon reaching settlement with our Mexico operator, pursuant to which the operators' claims were legally released, we eliminated the corresponding accrued liability and recognized a gain on contract settlement of \$15.7 million. With respect to the gateways that had not been settled, we continued to accrue expenses according to our subsidiaries' contractual obligation until the liabilities were transferred to the Liquidating Trust.
- (6) During the year ended December 31, 2012, we transferred our International Subsidiaries to the Liquidating Trust and recognized a gain of \$48.7 million upon their deconsolidation.
- (7) We had been in litigation with Boeing regarding the development and launch of our former MEO satellites and related launch vehicles. In February 2009, the trial court entered judgment in our favor for approximately \$603 million. On April 13, 2012, the California Court of Appeal overturned the judgment. The reversal was the culmination of a three year Court of Appeal process. The Court of Appeal also ordered us to reimburse Boeing for its appellate costs. On June 25, 2012, we settled our litigation against Boeing. As part of the settlement, we agreed to withdraw our petition for review to the California Supreme Court in exchange for a \$10.0 million payment from Boeing and Boeing's waiver of its right to appellate costs. The settlement agreement and mutual release between ourselves and Boeing fully released and discharged any and all claims between us and Boeing. As a result of the settlement agreement, we recorded a gain of \$10.0 million during the year ended December 31, 2012.
- (8) In March 2011, upon the sale of our DBSD subsidiary for \$325 million we recognized a \$301 million gain associated with the disposition of DBSD and certain other assets pursuant to various agreements entered into with DISH Network. During the year ended December 31, 2012, we sold our real property located in Brazil for approximately \$5.6 million.
- (9) During the year ended December 31, 2014, we recorded a tax provision of \$6.3 million related to foreign taxes withheld on revenue generated from a license agreement executed with a licensee domiciled in a foreign jurisdiction. During the year ended December 31, 2011, as a result of recording net deferred tax liabilities pursuant to the acquisition of ContentGuard, we were able to reduce a portion of our deferred tax valuation allowance resulting in a tax benefit of \$40.7 million.
- (10) Long-term obligations at December 31, 2014, 2012 and 2011 consisted primarily of deferred tax liabilities. Long-term obligations at December 31, 2013 include an installment payment obligation arising from the 2013 acquisition of our memory and storage technologies portfolio, expense related to restricted stock awards that is required to be treated as a liability and deferred tax liabilities. Long-term obligations at December 31, 2010 consisted primarily of capital lease obligations and income tax obligations associated with uncertain tax positions.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis should be read in conjunction with our consolidated financial statements and accompanying notes included elsewhere in this Form 10-K.

Special Note Regarding Forward-Looking Statements

With the exception of historical facts, the statements contained in this management's discussion and analysis are forward-looking statements. All of these forward-looking statements are subject to risks and uncertainties that could cause our actual results to differ materially from those contemplated by the relevant forward-looking statements. Factors that might cause or contribute to such a difference include, but are not limited to, those discussed under Item 1A of Part I Risk Factors and elsewhere in this Form 10-K. The forward-looking statements included in this document are made only as of the date of this report, and we undertake no obligation to publicly update these forward-looking statements to reflect subsequent events or circumstances.

Table of Contents

Overview

Through our consolidated subsidiaries, we have invested in, acquired and developed businesses with unique technologies that are often protected by intellectual property (IP) rights, and that present the opportunity to address large, global markets. Our subsidiaries create value from our innovations, both by making our IP available for use by third parties and by developing and bringing to market products using our IP. We regularly evaluate our existing investments to determine whether retention or disposition is appropriate, and we investigate new investment and business acquisition opportunities. We also advise clients on various IP strategies and transactions.

During 2014, we entered into license agreements with two leading technology companies, under which we authorized the use of patents covering memory and storage technologies. One of the license agreements yielded a significant upfront license fee, while the other generated a smaller upfront license fee and future royalties. We followed those 2014 signings with an additional memory and storage license in January 2015 that generated another significant upfront license fee. We intend to continue licensing our memory and storage assets to flash memory component suppliers, solid state disk manufacturers and device vendors, among others.

We also continue to pursue and advance our other licensing programs. However, the programs supported by our DRM patents (digital media and digital cinema) have been slowed by ContentGuard s ongoing litigation with Amazon, Apple, DirecTV, Google, Huawei, HTC, Motorola Mobility and Samsung (the ContentGuard Defendants), which ContentGuard felt compelled to file after negotiations with ContentGuard Defendants failed to yield negotiated license agreements. Until a court rules on ContentGuard s claims against these companies, we anticipate that potential licensees of our DRM assets may eschew serious license negotiations.

ContentGuard s claims also elicited a series of IPR review petitions and CBM petitions by certain ContentGuard Defendants. Specifically, in December 2014, Google filed CBM petitions against three of the nine patents that ContentGuard asserted in the litigation. Apple filed twenty-nine IPR petitions and three CBM petitions challenging the validity of all nine asserted patents, including four patents that previously withstood IPR challenges by ZTE. The United States Patent and Trademark Office will decide in the coming months whether to initiate review proceedings on some or all of the IPR and CBM petitions. We are unable to predict whether or not proceedings will be initiated, or whether or not such proceedings will impact the timing or outcome of the litigation.

Meanwhile, in 2014, our ContentGuard subsidiary launched Yovo[®], our next-generation ephemeral photo and messaging application. Yovo[®] facilitates ephemeral posts on social networking sites, as well as private messaging via text and email. Designed for integration with Facebook and Twitter, Yovo[®] offers features such as forward lock, full encryption, screen capture scrambling and a self-destruct timer that allows a sender to grant viewing rights for as little as one second and as long as 24 hours. Yovo[®] follows on the heels of the ContentGuard mobile digital content protection application for business users that was initially launched in December 2013 and updated in May 2014. These mobile applications, based on technologies developed by ContentGuard over the past fifteen years, are designed to address consumer demand for enhanced Internet privacy through solutions that restrict access to and limit the life of content. Our continuing development of these ephemeral content protection solutions reflects our commitment to continued innovation, including the development of products to commercialize our IP rights.

We explored a number of business development opportunities during 2014. However, due to escalating valuations which we attribute to inexpensive and widely available capital, we did not complete any transactions during the year. We expect this trend to continue and have therefore slowed our exploratory activity and reduced our costs by eliminating certain positions, abandoning certain patent assets that do not support our existing licensing programs, and lowering facilities costs. This does not mean that we have discontinued our assessment of opportunities to commercialize unique technologies and related businesses or otherwise invest our capital in opportunities which may be unrelated to our historical IP monetization activities, but until market conditions change, we expect to take a thoughtful and measured approach to potential transactions. In the meantime, we will concentrate our efforts on generating revenue from our existing assets.

Table of Contents

In February 2013, we acquired a 68.75% interest in Provitro Biosciences LLC, the developer of the Provitro proprietary micro-propagation technology that is designed to facilitate the production on a commercial scale of certain plants, particularly timber bamboo. The activities of Provitro from the date of acquisition through December 31, 2014 have been included in our consolidated statement of operations. The assets and liabilities of Provitro were measured at fair value as of the acquisition date and included in our December 31, 2013 consolidated balance sheet.

In early 2015, we suspended further development of the Provitro proprietary micro-propagation technology and related laboratory processes that are designed to facilitate production on a commercial scale of certain plants, particularly timber bamboo. Although we continued to pursue revenue generating business opportunities through the fourth quarter, we were unable to identify opportunities to justify continued commercialization efforts. In the absence of opportunities, we determined that we should not sustain the cost structure required for continued development of the technology. As a result, we began seeking a buyer for Provitro's assets and took an impairment charge equal to our unamortized investment in the Provitro technology and related goodwill, reducing their fair values from approximately \$11.0 million to zero at December 31, 2014. In addition, in early 2015, we reached agreement with Provitro's minority partner to cancel the ownership interest in Provitro that we did not already own for nominal consideration, thereby leaving us with 100% ownership of Provitro.

2013 Events

In the first quarter of 2013, we acquired from Nokia Corporation 125 patents and patent applications worldwide, 81 of which have been declared by Nokia to be essential to standards that are applicable to memory and storage technologies used in electronic devices. In connection with the acquisition, we formed a wholly owned development company to continue innovation efforts in memory and storage technology begun by Nokia. Our resulting memory and storage technologies program has thus far generated three licenses, and we remain in active negotiations with other potential licensees.

2012 Events

During 2012, we completed our exit from the satellite business, which included (i) the receipt of the final payment associated with the sale of our interests in DBSD North America, Inc. and our subsidiaries to DISH Network Corporation, (ii) the sale of our medium earth orbit (MEO) satellite assets (MEO Assets) that had been in storage for nominal consideration, (iii) the transfer of our in-orbit MEO satellite (F2) to a new operator who assumed responsibility for all F2 operating costs, (iv) the sale of our property in Brazil, and (v) the deconsolidation of our MEO-related international subsidiaries (International Subsidiaries). Our exit from the satellite business generated approximately \$2.4 billion in net operating losses which we believe can be carried forward for up to twenty years.

Critical Accounting Policies

Critical accounting policies require difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Our estimates and judgments are based on information available at the time the estimates and judgments are made. Actual results could differ materially from those estimates. We make estimates and judgments when accounting for, among other matters, business combinations, goodwill and intangible assets, revenue recognition, stock-based compensation, income taxes and contingencies, as more fully described below.

Business Combinations. We account for business combinations using the acquisition method and, accordingly, the identifiable assets acquired and liabilities assumed are recorded at their acquisition date fair values. This valuation requires management to make significant estimates and assumptions, especially with respect to intangible assets. Valuation methodologies may include the cost, market or income approach. Critical

Table of Contents

estimates in valuing intangible assets include but are not limited to estimates about: future expected cash flows from customers, proprietary technology, the acquired company's brand awareness and market position and discount rates. Our estimates are based upon assumptions we believe to be reasonable, but which are inherently uncertain and unpredictable. Goodwill is calculated as the excess of the purchase price over the fair value of net assets, including the amount assigned to identifiable intangible assets. Subsequent changes to assets, liabilities, valuation allowance or uncertain tax positions that relate to the acquired company and existed at the acquisition date that occur both within the measurement period and as a result of new information about facts and circumstances that existed at the acquisition date are recognized as an adjustment to goodwill. Acquisition-related costs, including advisory, legal, accounting, valuation and other costs, are expensed in the periods in which the costs are incurred. The results of operations of acquired businesses are included in the consolidated financial statements from the acquisition date.

Intangible Assets and Goodwill. We amortize finite-lived intangible assets, including patents, acquired in purchase transactions over their expected useful lives. We assign goodwill and indefinite-lived intangible assets to our reporting units based on the expected benefit from the synergies arising from each business combination.

We evaluate finite-lived intangible assets when events or circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. These events or circumstances could include: a significant change in the business climate, legal factors, operating performance indicators, or changes in technology or customer requirements. Recoverability of an asset or asset group is measured by a comparison of the carrying amount to the future undiscounted net cash flows expected to be generated by the asset or asset group over its life. This comparison requires management to make judgments regarding estimated future cash flows. Our ability to realize the estimated future cash flows may be affected by factors such as changes in operating performance, changes in business strategy, invalidation of patents, unfavorable judgments in legal proceedings and changes in economic conditions. If our estimates of the undiscounted cash flows do not equal or exceed the carrying value of the asset or asset group, we recognize an impairment charge equal to the amount by which the recorded value of the asset or asset group exceeds its fair value.

We evaluate goodwill for impairment on an annual basis during the fourth quarter, or more frequently if circumstances indicate that the carrying value of a reporting unit exceeds fair value. When evaluating goodwill and indefinite-lived intangible assets for impairment, we first perform a qualitative assessment to determine if fair value of the reporting unit is more likely than not greater than the carrying amount. If this assessment indicates that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, then we further evaluate the estimated fair value of the reporting unit through the use of discounted cash flow models, which requires management to make significant judgments as to the estimated future cash flows utilized. Our ability to realize the future cash flows utilized in the fair value calculations may be affected by factors such as changes in operating performance, changes in business strategy, invalidation of patents, unfavorable judgments in legal proceedings and changes in economic conditions. The results of the models are compared to the carrying amount of the reporting unit. If such comparison indicates that the fair value of the reporting unit is lower than the carrying amount, impairment would exist and the impairment charge would be measured by comparing the implied fair value of the reporting unit's goodwill to its carrying value.

Revenue Recognition. We derive our operating revenue from IP monetization activities, including patent licensing and patent sales, and from IP consulting services. Although our revenue may occur in different forms, we regard our IP monetization activities as integrated and not separate revenue streams. For example, a third party relationship could involve consulting and licensing activities, or the acquisition of a patent portfolio can lead to licensing, consulting and patent sales revenue.

Our patent licensing agreements often provide for the payment of contractually determined upfront license fees representing all or a majority of the revenues that will be generated from such agreements for nonexclusive, nontransferable, limited duration licenses. These agreements typically grant (i) a nonexclusive license to make, sell, distribute, and use certain specified products that read on our patents, (ii) a covenant not to enforce patent rights against the licensee based on such activities, and (iii) the release of the licensee from certain claims.

Table of Contents

Certain of our patent licensing agreements provide for future royalties or future payment obligations triggered upon satisfaction of conditions. Future royalties and future payments are recognized in revenue upon satisfaction of any related conditions, provided that all revenue recognition criteria, as described below, have been met.

We sell patents from our portfolios from time to time. These sales are part of our ongoing operations. Consequently, the related proceeds are recorded as revenue. We recognize the revenue when (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred, (iii) amounts are fixed or determinable, and (iv) collectability is reasonably assured.

Fees earned from IP consulting services are generally recognized as the services are performed.

The timing and amount of revenue recognized from IP monetization activities depend on the specific terms of each agreement and the nature of the deliverables and obligations. For agreements that are deemed to contain multiple elements, consideration is allocated to each element of an agreement that has stand-alone value using the relative fair value method. We recognize revenue when (i) persuasive evidence of an arrangement exists, (ii) all material obligations have been substantially performed pursuant to agreement terms or services have been rendered to the customer, (iii) amounts are fixed or determinable, and (iv) collectability is reasonably assured. As a result of the contractual terms of our patent monetization agreements and the unpredictable nature, form and frequency of monetizing transactions, our revenue may fluctuate substantially from period to period.

Stock-Based Compensation. We record stock-based compensation on stock options, stock appreciation rights, performance stock awards, restricted stock awards, restricted stock units and other stock awards issued to employees, directors, consultants and/or advisors based on the estimated fair value on the date of grant and recognize compensation cost over the requisite service period for awards expected to vest. The fair value of stock options and stock appreciation rights is estimated on the date of grant using the Black-Scholes option pricing model (Black-Scholes Model) based on the single option award approach. The fair value of restricted stock awards and restricted stock units is determined based on the number of shares granted and either the quoted market price of our Class A common stock on the date of grant for time-based and performance-based awards, or the fair value on the date of grant using the Monte Carlo Simulation model (Monte Carlo Simulation) for market-based awards. The fair value of stock options, restricted stock awards and restricted stock units with service conditions are amortized to expense on a straight-line basis over the requisite service periods of the awards, which is generally the vesting period. The fair value of stock options, stock appreciation rights, restricted stock awards and restricted stock units with performance conditions deemed probable of being achieved and cliff vesting is amortized to expense over the requisite service period using the straight-line method of expense recognition. The fair value of restricted stock awards and restricted stock units with performance and market conditions are amortized to expense over the requisite service period using the straight-line method of expense recognition. The fair value of stock-based payment awards as determined by the Black-Scholes Model and the Monte Carlo Simulation are affected by our stock price as well as other assumptions. These assumptions include, but are not limited to, the expected stock price volatility over the term of the awards and actual and projected employee stock option exercise behaviors. Forfeitures are estimated at the date of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

Income Taxes. We must make certain estimates and judgments in determining income tax expense for financial statement purposes. These estimates and judgments occur in the calculation of tax credits, tax benefits and deductions. Significant changes to these estimates may result in an increase or decrease to our tax provision in a subsequent period.

We must assess the likelihood that we will be able to recover our deferred tax assets. If recovery is not likely, we must record a valuation allowance against the deferred tax assets that we estimate will not ultimately be recoverable. Since our utilization of our deferred tax assets is dependent upon future taxable income that is not assured, we have recorded a valuation allowance sufficient to reduce the deferred tax assets to an amount that is

Table of Contents

more likely than not to be realized. However, should there be a change in our ability to recover our deferred tax assets, our tax provision would decrease or may result in a tax benefit in the period in which we determined that the recovery was more likely than not to occur.

The application of income tax law is inherently complex. As such, we are required to make many assumptions and judgments regarding our income tax positions and the likelihood whether such tax positions would be sustained if challenged. Interpretations and guidance surrounding income tax laws and regulations change over time, and changes in our assumptions and judgments can materially affect amounts recognized in our consolidated financial statements.

Contingencies. The outcomes of legal proceedings and claims brought by and against us are subject to significant uncertainty. We accrue an estimated loss from a loss contingency, such as a legal claim against us, by a charge to income if it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated. We disclose a contingency if there is at least a reasonable possibility that a loss has been incurred. In determining whether a contingent loss should be accrued or disclosed, we evaluate, among other factors, the degree of probability of an unfavorable outcome and the ability to make a reasonable estimate of the amount of loss. Changes in these factors could materially impact our financial position, results of operations or cash flows. For contingencies that might result in a gain, we do not record the gain until realized.

New Accounting Pronouncements

In August 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-15, *Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern*, which requires management to assess an entity's ability to continue as a going concern every reporting period including interim periods, and to provide related footnote disclosure in certain circumstances. Compliance with this ASU is required for annual periods beginning after December 15, 2016. Early adoption is permitted. The adoption of this ASU in 2014 did not have an impact on our financial position, results of operations or cash flows.

In June 2014, the FASB issued ASU No. 2014-12, *Compensation-Stock Compensation (Topic 718)-Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period (a consensus of the FASB Emerging Issues Task Force)*. ASU No. 2014-12 requires that a performance target that affects vesting and could be achieved after the requisite service period shall be treated as a performance condition. Compliance with this ASU is required for annual periods beginning after December 15, 2015. Early adoption is permitted. The adoption of this ASU in 2014 did not have a material impact on our financial position, results of operations or cash flows.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue (Topic 606): Revenue from Contracts with Customers*, which supersedes existing revenue recognition guidance under GAAP. The core principle of ASU 2014-09 is to recognize as revenue the amount that an entity expects to be entitled for goods or services at the time the goods or services are transferred to customers. ASU 2014-09 defines a five step process to achieve this core principle that will likely require more judgment and estimates within the revenue recognition process than are required under existing GAAP. Compliance with this ASU is required for annual periods beginning after December 15, 2016, and interim periods therein. Early adoption is not permitted. We are currently assessing the impact, if any, of implementing this ASU.

Key Components of Results of Operations

Revenue We derive our operating revenue from IP monetization activities, including patent licensing and patent sales, and from IP consulting services, or a combination thereof. Although our revenue may occur in different forms, we regard our IP monetization activities as integrated and not separate revenue streams. For example, a third party relationship could involve consulting and licensing activities, or the acquisition of a patent

Table of Contents

portfolio could lead to licensing, consulting and patent sales revenue. Our revenues from IP monetization activities continue to depend in large part on our ability to enter into new license agreements with third parties. Because our licensing agreements often provide for the payment of upfront license fees rather than a royalty stream and as a result of the unpredictable nature, form and frequency of our transactions, our revenue may fluctuate substantially from period to period.

Cost of revenue Cost of revenue consists of certain costs that are variable in nature and are directly attributable to our revenue generating activities including (i) payments to third parties to whom we have an obligation to share revenue, (ii) commissions, and (iii) success fees. Additionally, in periods when patent sales occur, cost of revenue includes the net book value and other related costs associated with the sold patents. Depending on the patents being monetized, revenue share payments as a percentage of revenues may vary significantly.

Patent administration and related costs Patent administration and related costs are comprised of (i) patent-related maintenance and prosecution costs incurred to maintain our patents, (ii) other costs that support our patent monetization efforts, and (iii) costs associated with the abandonment of patents, including the write-off of any remaining net book value.

Patent litigation Patent litigation costs consist of costs and expenses incurred in connection with our patent-related enforcement and litigation activities. These may include non-contingent or contingent fee obligations to external counsel.

General and administrative General and administrative expenses are primarily comprised of (i) personnel costs, (ii) general legal fees, (iii) professional fees, (iv) acquisition investigation costs, and (v) general office related costs.

Stock-based compensation Stock-based compensation expense includes expense associated with the granting of stock options, stock appreciation rights, restricted stock awards, restricted stock units and other stock awards issued to employees, directors, consultants and/or advisors based on the estimated fair value on the date of grant and expensed over the requisite service period for awards expected to vest.

Amortization of intangible assets Amortization of intangible assets reflects the expensing of the cost to acquire intangible assets which are capitalized and amortized ratably over their estimated useful lives. Estimating the economic useful lives of our intangible assets depends on various factors including the remaining statutory life of the underlying assets as well as their expected period of benefit.

Table of Contents**Results of Operations**

The following table is provided to facilitate the discussion of our results of operations for the years ended December 31, 2014, 2013 and 2012 (in thousands):

	Year ended December 31,		
	2014	2013	2012
Revenue	\$ 42,534	\$ 13,128	\$ 33,775
Cost of revenues	14,170	7,872	314
Patent administration and related costs	6,386	4,405	3,655
Patent litigation	9,880	4,564	2,538
General and administrative	27,467	25,939	29,844
Stock-based compensation	9,405	12,345	8,597
Amortization of intangibles	15,929	15,864	13,471
Impairment of finite-lived intangibles and goodwill	11,013		
Interest income	94	131	238
Interest expense	193	195	2,483
Gain on deconsolidation of subsidiaries			48,685
Gain on settlement of Boeing litigation			10,000
Gain associated with disposition of assets			5,599
Other income (expense)	(16)	(55)	1,588
Income tax benefit (expense)	(6,303)		1,034

Revenue. Our revenue of \$42.5 million for the year ended December 31, 2014 increased by \$29.4 million, or more than 200%, as compared to \$13.1 million for the year ended December 31, 2013. The increase was primarily due to license agreements covering memory and storage technologies entered into during the year ended December 31, 2014 and the absence of licensing revenue during the year ended December 31, 2013, partially offset by sales of certain patent portfolios in 2013.

Revenue of \$13.1 million for the year ended December 31, 2013 decreased by \$20.7 million, or 61%, as compared to \$33.8 million for the year ended December 31, 2012. The decrease was primarily due to the absence of licensing revenue, partially offset by sales of certain patent portfolios that were not part of existing licensing programs.

Cost of Revenues. Cost of revenues of \$14.2 million for the year ended December 31, 2014 increased by \$6.3 million, or 80%, as compared to \$7.9 million for the year ended December 31, 2013. This increase was primarily due to costs associated with our March 2014 license agreement with Samsung, including payments to third parties to whom we have an obligation to share revenue, partially offset by \$7.9 million of costs related to certain patents sold in 2013.

Cost of revenues of \$7.9 million for the year ended December 31, 2013 increased by \$7.6 million, as compared to \$0.3 million for the year ended December 31, 2012. This increase was primarily due to \$7.9 million of costs related to certain patents sold in 2013.

In future periods, cost of revenues as a percentage of revenue may vary significantly, depending upon related revenue share obligations arising from licensing arrangements and the sales price realized compared to the net book value of patents sold.

Patent Administration and Related Costs. Patent administration and related costs of \$6.4 million for the year ended December 31, 2014 increased by \$2.0 million, or 45%, as compared to \$4.4 million for the year ended December 31, 2013. The increase in patent administration and related costs was primarily due to write-offs of the net book value of patents abandoned in 2014, partially offset by a reduction in patent maintenance and prosecution costs.

Table of Contents

Patent administration and related costs of \$4.4 million for the year ended December 31, 2013 increased by \$0.7 million, or 21%, as compared to \$3.7 million for the year ended December 31, 2012. The increase was due to patent maintenance and prosecution costs associated with the patents acquired in 2013.

Patent Litigation. Patent litigation expenses of \$9.9 million for the year ended December 31, 2014 increased by \$5.3 million, or 116%, as compared to \$4.6 million for the year ended December 31, 2013. The increase in patent litigation expenses was primarily due to costs incurred by our subsidiary, ContentGuard, in its litigation efforts against Amazon, Apple, Blackberry, DirecTV, Google, HTC, Huawei, Motorola Mobility and Samsung.

Patent litigation expenses of \$4.6 million for the year ended December 31, 2013 increased by \$2.1 million, or 80%, as compared to \$2.5 million for the year ended December 31, 2012. The increase in patent litigation expenses was primarily due to increased legal costs associated with the preparation for ContentGuard's litigation efforts that commenced in December 2013.

General and Administrative. General and administrative expenses of \$27.5 million for the year ended December 31, 2014 increased \$1.6 million, or 6%, as compared to \$25.9 million for the year ended December 31, 2013. The increase was primarily due to (i) \$3.2 million lump-sum severance payment to our CEO who departed in November 2014, (ii) \$0.6 million increase in bonus expense, (iii) \$0.6 million increase in expenses associated with researching acquisition opportunities, and (iv) \$0.6 million increase in professional fees and other expenses, partially offset by (a) \$1.5 million reduction in employment expenses resulting from a lower headcount, (b) \$1.4 million reduction in amortized prepaid compensation expense associated with the acquisition of the Ovidian Group LLC (Ovidian) in June 2011 (which was fully amortized as of June 2014), and (c) \$0.5 million reduction in expenses associated with Provitro.

General and administrative expenses of \$25.9 million for the year ended December 31, 2013 decreased \$3.9 million, or 13%, as compared to \$29.8 million for the year ended December 31, 2012. The decrease was primarily due to (i) \$2.3 million reduction in bonus expense, (ii) \$2.2 million reduction in general legal expenses, primarily due to fees incurred in the Boeing litigation and J&J Group in 2012, (iii) \$1.6 million reduction in consulting and other professional fees, (iv) \$1.2 million of withholding taxes associated with 2012 licensing revenues, and (iv) \$0.3 million of costs incurred in 2012 by the International Subsidiaries partially offset by (a) \$2.9 million related to operating expenses of Provitro and (b) \$0.7 million related to the addition of executives to the Pendrell team during 2013 and 2012.

Stock-based Compensation. Stock-based compensation of \$9.4 million for the year ended December 31, 2014 decreased by \$2.9 million, or 24%, as compared to \$12.3 million for the year ended December 31, 2013. The decrease in stock-based compensation expense was primarily due to the vesting of awards in June 2013 for which no further expense is being incurred and the recapture of expense related to terminated employees, partially offset by \$2.8 million of additional stock based compensation expense associated with the accelerated vesting of stock awards and the extension of the exercise period of vested options related to the November 2014 departure of our CEO.

Stock-based compensation of \$12.3 million for the year ended December 31, 2013 increased \$3.7 million, or 44%, as compared to \$8.6 million for the year ended December 31, 2012. The increase was due to \$2.6 million related to the addition of executives to the Pendrell team and the granting of stock options and restricted stock to employees during the last half of 2012 and \$1.1 million of incremental expense due to the August 2012 modification of restricted stock awards.

Amortization of Intangibles. Amortization of intangibles was \$15.9 million for both the year ended December 31, 2014 and 2013, with an increase in amortization due to the March 2013 acquisition of a portfolio of memory and storage technology patents offset by a reduction in amortization associated with sales and abandonments of certain patents in 2014.

Table of Contents

Amortization of intangibles of \$15.9 million for the year ended December 31, 2013 increased by \$2.4 million, or 18%, as compared to \$13.5 million for the year ended December 31, 2012, primarily due to the acquisition of intangible assets during 2012 and the first quarter of 2013.

Impairment of finite-lived intangibles and goodwill. During the fourth quarter of the year ended December 31, 2014, we took an impairment charge of approximately \$11.0 million, which was equal to our unamortized investment in the Provitro technology and related goodwill. The impairment resulted from the inability to identify near-term opportunities to commercialize the technology.

Interest Income. Interest income for the years ended December 31, 2014, 2013 and 2012 was nominal and primarily related to interest earned on money market funds.

Interest Expense. Interest expense of \$0.2 million for the years ended December 31, 2014 and 2013, consisted of interest expense resulting from the installment payment obligations associated with intangible assets acquired during 2013. Interest expense of \$2.5 million for the year ended December 31, 2012 consisted primarily of interest costs resulting from capital lease obligations associated with certain MEO gateway sites that we operated prior to their deconsolidation as a result of the transfer of our International Subsidiaries to the Liquidating Trust on June 29, 2012.

Gain on Deconsolidation of Subsidiaries. During the year ended December 31, 2012, we transferred our International Subsidiaries to the Liquidating Trust and recognized a gain of \$48.7 million on deconsolidation as a result of eliminating \$61.9 million of liabilities associated with the International Subsidiaries, including liabilities for uncertain tax positions, net of cumulative translation adjustment losses of \$12.7 million related to the International Subsidiaries.

Gain on Settlement of Boeing Litigation. On June 25, 2012, we settled our litigation against Boeing in exchange for \$10.0 million, which we reflected as a gain on litigation settlement for the year ended December 31, 2012.

Gain Associated with Disposition of Assets. During the year ended December 31, 2012, we recognized a \$5.6 million gain associated with the disposition of real property and MEO satellite related gateway equipment we owned in Brazil.

Other Income (Expense). Other expense for the years ended December 31, 2014 and 2013 was due to losses on foreign currency transactions. Other income of \$1.6 million for the year ended December 31, 2012 was primarily due to the release of a \$0.8 million liability associated with our prior ownership of MEO satellite assets and gains on foreign currency transactions.

Income Tax (Benefit) Expense. We did not have a U.S. federal income tax liability for the years ended December 31, 2014, 2013 or 2012. However, we recorded a tax provision of \$6.3 million for the year ended December 31, 2014 related to foreign taxes withheld on revenue generated from a license agreement executed with a licensee domiciled in a foreign jurisdiction. In general, foreign taxes withheld may be claimed as a deduction on future U.S. corporate income tax returns, or as a credit against future U.S. federal income tax liabilities, subject to certain limitations. However, due to uncertainty regarding our ability to utilize the deduction or credit resulting from the foreign withholding, at December 31, 2014, we established a full valuation allowance against this deferred tax asset.

The income tax benefit of \$1.0 million for the year ended December 31, 2012 was primarily due to expiration of the statute of limitations associated with previously recorded uncertain tax positions, including interest and penalties.

Table of Contents**Liquidity and Capital Resources**

Overview. As of December 31, 2014, we had cash and cash equivalents of \$168.8 million. Our primary expected cash needs for the next twelve months include ongoing operating costs associated with commercialization of our IP assets, product development costs, expenses in connection with legal proceedings, and other general corporate purposes. We also expect to use our cash, and may incur debt or issue equity, to acquire or invest in other businesses or assets.

We believe our current balances of cash and cash equivalents and cash flows from operations will be adequate to meet our liquidity needs for the foreseeable future. Cash and cash equivalents in excess of our immediate needs are held in interest bearing accounts with financial institutions.

Cash Flows. Cash and cash equivalents were \$168.8 million at December 31, 2014, compared to \$184.6 million at December 31, 2013. The following table is provided to facilitate the discussion of our liquidity and capital resources for the years ended December 31, 2014 and 2013 (in thousands):

	Year ended December 31,	
	2014	2013
Net cash used in:		
Operating activities	\$ (13,309)	\$ (15,151)
Investing activities	(119)	(11,560)
Financing activities	(2,346)	(2,475)
Net decrease in cash and cash equivalents	(15,774)	(29,186)
Cash and cash equivalents beginning of period	184,567	213,753
Cash and cash equivalents end of period	\$ 168,793	\$ 184,567

The decrease in cash and cash equivalents for the year ended December 31, 2014 of \$15.8 million was primarily due to \$56.3 million of general corporate expenditures and a \$2.0 million payment of an accrued obligation associated with the 2013 acquisition of our memory and storage technologies portfolio partially offset by revenue generated by operations of \$42.5 million.

For the year ended December 31, 2014, the \$13.3 million of cash used in operating activities consisted of our net loss of \$58.1 million adjusted for various non-cash items, including (i) \$11.0 million of impairment charge for finite-lived intangible assets and goodwill associated with Provitro (ii) \$15.9 million of amortization expense associated with patents and other intangible assets, (iii) \$9.4 million of stock-based compensation expense, (iv) \$3.6 million of non-cash loss associated with the abandonment and/or sale of patents, (v) \$1.4 million of amortized prepaid compensation expense associated with the Ovidian acquisition, (vi) \$1.5 million increase in accrued expenses, primarily related to bonus accrual, (vii) \$1.2 million decrease in receivables and prepaid expenses and (viii) \$0.8 million of depreciation and other noncash expenses.

For the year ended December 31, 2013, the \$15.2 million of cash used in operating activities consisted primarily of our net loss of \$58.0 million adjusted for various non-cash items, including (i) \$15.9 million of amortization expense associated with patents and other intangibles, (ii) \$12.3 million of stock-based compensation expense, and (iii) \$2.8 million of amortized prepaid compensation expense associated with our acquisition of Ovidian in June 2011, partially offset by \$8.9 million of cash collected from various receivables and a \$2.6 million increase in accrued expenses.

For the year ended December 31, 2014, the \$0.1 million of cash used in investing activities was primarily due to the acquisition of property and intangible assets. For the year ended December 31, 2013, the \$11.6 million of cash used in investing activities was primarily due to \$9.2 million for our acquisition of Provitro and \$2.4 million for the acquisition of property and intangible assets.

Table of Contents

For the year ended December 31, 2014, the \$2.3 million of cash used in financing activities consisted of a \$2.0 million payment of an accrued obligation associated with the 2013 purchase of property and intangible assets and \$0.8 million utilized to pay statutory taxes related to vesting of restricted stock awards, offset by \$0.4 million in proceeds from the exercise of stock options. For the year ended December 31, 2013, the \$2.5 million of cash used in financing activities consisted of \$2.7 million utilized to pay statutory taxes related to vesting of restricted stock awards, partially offset by \$0.2 million in proceeds from the exercise of stock options.

Contractual Obligations. Our primary contractual obligations relate to installment purchases of property and intangible assets as well as operating lease agreements for our main office location in Kirkland, Washington, and other offices in California, Texas and Finland. Our contractual obligations as of December 31, 2014 were as follows (in millions):

	Years ending December 31,				2020 and Thereafter
	Total	2015	2016-2017	2018-2019	
Purchase obligations	\$ 4.0	\$ 4.0	\$	\$	\$
Operating lease obligations	2.4	0.6	1.2	0.6	
Total	\$ 6.4	\$ 4.6	\$ 1.2	\$ 0.6	\$

Inflation

The impact of inflation on our consolidated financial condition and results of operations was not significant during any of the years presented.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

We have assessed our vulnerability to certain market risks, including interest rate risk associated with our accounts receivable, accounts payable, other liabilities, and cash and cash equivalents and foreign currency risk associated with our cash held in foreign currencies.

As of December 31, 2014, our cash and investment portfolio consisted of both cash and money market funds, with a fair value of \$168.8 million. The primary objective of our investments in money market funds is to preserve principal, while optimizing returns and minimizing risk, and our policies require, at the time of purchase, that we make these investments in short-term, high rated securities which currently yield between zero to 15 basis points.

	December 31, 2014
Cash	\$ 18,403
Money market funds	150,390
	\$ 168,793

Our primary foreign currency exposure relates to cash balances in foreign currencies. Due to the small balances we hold, we have determined that the risk associated with foreign currency fluctuations is not material to us.

Item 8. Financial Statements and Supplementary Data.
REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders

Pendrell Corporation

We have audited the accompanying consolidated balance sheet of Pendrell Corporation (a Washington corporation) and subsidiaries (the Company) as of December 31, 2014, and the related consolidated statements of operations, comprehensive income (loss), cash flows, and changes in shareholders' equity for the year ended December 31, 2014. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Pendrell Corporation and subsidiaries as of December 31, 2014, and the results of their operations and their cash flows for the year ended December 31, 2014 in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2014, based on criteria established in the 2013 *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report, dated March 6, 2015, expressed an unqualified opinion.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

Pendrell Corporation

Kirkland, Washington

We have audited the accompanying consolidated balance sheet of Pendrell Corporation and subsidiaries (the Company) as of December 31, 2013, and the related consolidated statements of operations, comprehensive income (loss), cash flows, and changes in shareholders' equity for each of the two years in the period ended December 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Pendrell Corporation and subsidiaries as of December 31, 2013, and the results of their operations and their cash flows for each of the two years in the period ended December 31, 2013, in conformity with accounting principles generally accepted in the United States of America.

Table of Contents

Pendrell Corporation

Notes to Consolidated Financial Statements

1. Organization and Business

Overview These consolidated financial statements include the accounts of Pendrell Corporation (Pendrell) and its consolidated subsidiaries (collectively referred to as the Company). Since 2011, the Company s strategy, through its consolidated subsidiaries, has been to invest in, acquire and develop businesses with unique technologies that are often protected by intellectual property (IP) rights, and that present the opportunity to address large, global markets. The Company s subsidiaries focus on licensing the IP rights they hold to third parties and pursuing relevant product opportunities. The Company regularly evaluates its existing investments to determine whether retention or disposition is appropriate, and investigates new investment and business acquisition opportunities. The Company also advises its clients on various IP strategies and transactions.

Pendrell was originally incorporated in 2000 as a Delaware corporation. On November 14, 2012, the Company reincorporated from Delaware to Washington. The reincorporation merely changed the Company s legal domicile. The Company s consolidated financial condition and results of operations immediately after consummation of the reincorporation were the same as those immediately prior to the reincorporation.

The Company was formed in 2000 to operate a next generation global mobile satellite communications system. The Company began its exit from the satellite business in 2011 with the sale of its interests in DBSD North America, Inc. and its subsidiaries (collectively referred to as DBSD) to DISH Network Corporation (DISH Network). During 2012, the Company completed its exit with (i) the sale of its medium earth orbit (MEO) satellite assets (MEO Assets) that had been in storage for nominal consideration, (ii) the transfer of its in-orbit MEO satellite (F2) to a new operator who assumed responsibility for all F2 operating costs effective April 1, 2012 and (iii) the deconsolidation of its MEO-related international subsidiaries (International Subsidiaries).

2. Summary of Significant Accounting Policies

Principles of Consolidation and Basis of Presentation The consolidated financial statements of the Company include the assets and liabilities of its wholly-owned subsidiaries and subsidiaries it controls or in which it has a controlling financial interest. Noncontrolling interests on the consolidated balance sheets include third-party investments in entities that the Company consolidates, but does not wholly own. Noncontrolling interests are classified as part of equity and the Company allocates net income (loss), other comprehensive income (loss) and other equity transactions to its noncontrolling interests in accordance with their applicable ownership percentages. All intercompany transactions and balances have been eliminated in consolidation. All information in these financial statements is in U.S. dollars. These financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).

Segment Information The Company operates in and reports on one segment (IP management). Operating segments are based upon the Company s internal organization structure, the manner in which its operations are managed, and the criteria used by its Chief Operating Decision Maker. Substantially all of the Company s revenue are generated by operations located within the United States, and the Company does not have any long-lived assets located in foreign countries.

Use of Estimates The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

On an ongoing basis, the Company evaluates its estimates, including among others, those related to the fair value of acquired intangible assets and goodwill, the useful lives and potential impairment of intangible assets

Table of Contents

and property and equipment, the value of stock awards for the purpose of determining stock-based compensation expense, accrued liabilities (including bonus accruals), valuation allowances related to the ability to realize deferred tax assets, allowances for doubtful receivables and certain tax liabilities. Estimates are based on historical experience and other factors, including the current economic environment as deemed appropriate under the circumstances. Estimates and assumptions are adjusted when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Any changes in estimates used to prepare these financial statements will be reflected in the financial statements in future periods.

Reclassifications Certain prior period amounts have been reclassified to conform to current year presentation. The reclassifications had no effect on previously reported net loss of the Company or the noncontrolling interest holder. Such reclassifications relate to the Company's presentation of expenses in its consolidated statements of operations, including the presentation of cost of revenues and patent litigation as separate captions; as such costs were previously included in patent administration, litigation and related costs and general and administrative. The following is a summary of the revised expense categories:

Cost of revenue Cost of revenue consists of certain costs that are variable in nature and are directly attributable to the Company's revenue generating activities including (i) payments to third parties to whom the Company has an obligation to share revenue, (ii) commissions, and (iii) success fees. Additionally, in periods when patent sales occur, cost of revenue includes the net book value and other related costs associated with the sold patents. Depending on the patents being monetized, revenue share payments as a percentage of revenues may vary significantly.

Patent administration and related costs Patent administration and related costs are comprised of (i) patent-related maintenance and prosecution costs incurred to maintain the Company's patents, (ii) other costs that support its patent monetization efforts, and (iii) costs associated with the abandonment of patents, including the write-off of any remaining net book value.

Patent litigation Patent litigation costs consist of costs and expenses incurred in connection with the Company's patent-related enforcement and litigation activities. These may include non-contingent or contingent fee obligations to external counsel.

General and administrative General and administrative expenses are primarily comprised of (i) personnel costs, (ii) general legal fees, (iii) professional fees, (iv) acquisition investigation costs, and (v) general office related costs.

Cash and Cash Equivalents Cash and cash equivalents are defined as short-term, highly liquid investments with original maturities from the date of purchase of 90 days or less. Cash and cash equivalents are comprised of the following (in thousands):

	December 31,	
	2014	2013
Cash	\$ 18,403	\$ 18,043
Money market funds	150,390	166,524
	\$ 168,793	\$ 184,567

The fair value of money market funds at December 31, 2014 and 2013 was classified as Level 1 in the hierarchy established by the Financial Accounting Standards Board (FASB) as amounts were based on quoted prices available in active markets for identical investments as of the reporting date.

Accounts Receivable Accounts receivable consists of amounts billed to customers under licensing arrangements, patent sales arrangements or consulting services. The majority of the Company's customers are well-established operating companies with investment-grade credit. For the periods ended December 31, 2014 and December 31, 2013, the Company did not incur any losses on its accounts receivable. Based upon historical

Table of Contents

collections experience and specific client information, the Company has determined that an allowance for doubtful accounts was not required at either December 31, 2014 or December 31, 2013. Carrying amounts of such receivables approximate their fair value due to their short-term nature.

Other Receivables As of December 31, 2014 and 2013 the Company recorded a receivable due from Jay & Jayendra (Pty) Ltd, a South African corporation or its designated affiliate (collectively, the J&J Group) for reimbursement of operating expenses related to the Company's MEO Assets of \$2.7 million and a corresponding full reserve against the receivable as a result of the J&J Group's failure to fulfill its obligation to reimburse the Company. The Company has obtained an enforcement judgment in South Africa (where J&J Group is domiciled), but due to the uncertainty of collection, the Company continues to maintain a full reserve against the receivable. Other receivables also include amounts for state income taxes, interest and other miscellaneous items.

Prepaid Expenses and Other Current Assets As of December 31, 2014 and 2013 prepaid expenses and other current assets consisted primarily of insurance prepayments and prepayments related to rent and security deposits associated with certain of the Company's leased facilities.

Property in Service Property in service consists primarily of computer equipment, software, furniture and fixtures and leasehold improvements. Property in service is recorded at cost, net of accumulated depreciation, and is depreciated using the straight-line method. Computer equipment and furniture and fixtures are depreciated over their estimated useful lives ranging from three to five years. Software is depreciated over the shorter of its contractual license period or three years. Leasehold improvements are amortized over the shorter of their estimated useful lives or the term of the respective lease. Significant additions and improvements to property in service are capitalized. Repair and maintenance costs are expensed as incurred.

Other Assets As of December 31, 2014 and 2013, other assets consisted primarily of long-term security deposits associated with the Company's leased facilities.

Business Combinations The Company accounts for business combinations using the acquisition method and, accordingly, the identifiable assets acquired and liabilities assumed are recorded at their acquisition date fair values. This valuation requires management to make significant estimates and assumptions, especially with respect to intangible assets. Valuation methodologies may include the cost, market or income approach. Critical estimates in valuing intangible assets include but are not limited to estimates about: future expected cash flows from customers, proprietary technology, the acquired company's brand awareness and market position and discount rates. The estimates are based upon assumptions the Company believes to be reasonable, but which are inherently uncertain and unpredictable. Goodwill is calculated as the excess of the purchase price over the fair value of net assets, including the amount assigned to identifiable intangible assets. Subsequent changes to assets, liabilities, valuation allowance or uncertain tax positions that relate to the acquired company and existed at the acquisition date that occur both within the measurement period and as a result of new information about facts and circumstances that existed at the acquisition date are recognized as an adjustment to goodwill. Acquisition-related costs, including advisory, legal, accounting, valuation and other costs, are expensed in the periods in which the costs are incurred. The results of operations of acquired businesses are included in the consolidated financial statements from the acquisition date.

Intangible Assets and Goodwill The Company amortizes finite-lived intangible assets, including patents, acquired in purchase transactions over their expected useful lives. The Company assigns goodwill and indefinite-lived intangible assets to its reporting units based on the expected benefit from the synergies arising from each business combination.

The Company evaluates finite-lived intangible assets when events or circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. These events or circumstances could include: a significant change in the business climate, legal factors, operating performance indicators, or changes in technology or customer requirements. Recoverability of an asset or asset group is measured by a comparison of

Table of Contents

the carrying amount to the future undiscounted net cash flows expected to be generated by the asset or asset group over its life. This comparison requires management to make judgments regarding estimated future cash flows. The Company's ability to realize the estimated future cash flows may be affected by factors such as changes in operating performance, changes in business strategy, invalidation of patents, unfavorable judgments in legal proceedings and changes in economic conditions. If the Company's estimates of the undiscounted cash flows do not equal or exceed the carrying value of the asset or asset group, an impairment charge equal to the amount by which the recorded value of the asset or asset group exceeds its fair value is recognized.

The Company evaluates goodwill for impairment on an annual basis during the fourth quarter, or more frequently if circumstances indicate that the carrying value of a Company reporting unit exceeds fair value. When evaluating goodwill and indefinite-lived intangible assets for impairment, the Company first performs a qualitative assessment to determine if fair value of the reporting unit is more likely than not greater than the carrying amount. If this assessment indicates that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, then the Company further evaluates the estimated fair value of the reporting unit through the use of discounted cash flow models, which requires management to make significant judgments as to the estimated future cash flows utilized. The Company's ability to realize the future cash flows utilized in its fair value calculations may be affected by factors such as changes in its operating performance, changes in its business strategy, invalidation of its patents, unfavorable judgments in legal proceedings and changes in economic conditions. The results of the models are compared to the carrying amount of the reporting unit. If such comparison indicates that the fair value of the reporting unit is lower than the carrying amount, impairment would exist and the impairment charge would be measured by comparing the implied fair value of the reporting unit's goodwill to its carrying value.

In January 2015, the Company suspended further development of its proprietary micro-propagation technology and related laboratory processes that are designed to facilitate production on a commercial scale of certain plants, particularly timber bamboo. Although the Company continued to pursue revenue generating business opportunities through the fourth quarter, it was unable to identify opportunities to commercialize the technology. The Company determined that the suspension of technology development provided additional evidence about conditions that existed prior to December 31, 2014. Accordingly, the Company took an \$11.0 million impairment charge during the fourth quarter of its year ended December 31, 2014. The charge is equal to the sum of its unamortized investment in its developed Provitro technology and the goodwill associated with its February 21, 2013 acquisition of Provitro Biosciences LLC (Provitro).

For the years ended December 31, 2013 and 2012, the Company recorded no such impairment charges.

Fair Value of Financial Instruments The Company determines the fair value of its financial instruments based on the fair value hierarchy established by the FASB. The three levels of inputs used to measure fair value are as follows:

Level 1 Quoted prices in active markets for identical assets and liabilities.

Level 2 Quoted prices in active markets for similar assets and liabilities or other inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets and liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

As of December 31, 2014 and 2013, the Company's financial instruments included its cash and cash equivalents, accounts receivable, other receivables, accounts payable and certain other assets and liabilities. The Company determines the carrying value of its financial instruments, based on the hierarchy established by the FASB, approximate the fair value of the financial instruments as they are equivalent to cash or due to their short-term nature.

Table of Contents

Foreign Currency Translation and Foreign Currency Transactions and Accumulated Other Comprehensive Income (Loss) The reporting currency for the Company's operations is U.S. dollars. The Company translates the activities of its subsidiaries with functional currencies other than the U.S. dollar at the average exchange rate prevailing during the period. Gains and losses on foreign currency transactions are recognized as a component of other income (expense) in the consolidated statements of operations in the period in which they occur. Assets and liabilities denominated in foreign currencies are translated at the exchange rates prevailing at the balance sheet date. Translation adjustments resulting from these processes are recognized as a component of accumulated other comprehensive income (loss).

For the years ended, December 31, 2014 and 2013, there were no gains or losses on intercompany foreign currency translations. For the year ended December 31, 2012, gains on intercompany foreign currency translations of \$0.1 million have been excluded from net income (loss) and reported as a component of accumulated other comprehensive income (loss) due to their long-term investment nature.

The Company recognizes applicable cumulative translation adjustments as a component of other operating income (loss) in the period in which a subsidiary is substantially liquidated or deconsolidated. For the year ended December 31, 2014 and 2013, there were no reclassifications of cumulative translation gains or losses resulting from the deconsolidation or liquidation of subsidiaries. For the year ended December 31, 2012, the Company reclassified net loss of \$12.7 resulting from the deconsolidation of its International Subsidiaries.

The Company had no accumulated other comprehensive income or (loss) as of December 31, 2014 and 2013 due to the deconsolidation of the Company's International Subsidiaries effective June 29, 2012.

Revenue Recognition The Company derives its operating revenue from IP monetization activities, including patent licensing and patent sales, and from IP consulting services. Although the Company's revenue may occur in different forms, it regards its IP monetization activities as integrated and not separate revenue streams. For example, a third party relationship could involve consulting and licensing activities, or the acquisition of a patent portfolio can lead to licensing, consulting and patent sales revenue.

The Company's patent licensing agreements often provide for the payment of contractually determined upfront license fees representing all or a majority of the revenue that will be generated from such agreements for nonexclusive, nontransferable, limited duration licenses. These agreements typically grant (i) a nonexclusive license to make, sell, distribute, and use certain specified products that read on the Company's patents, (ii) a covenant not to enforce patent rights against the licensee based on such activities, and (iii) the release of the licensee from certain claims.

Certain of the Company's patent licensing agreements provide for future royalties or future payment obligations triggered upon satisfaction of conditions. Future royalties and future payments are recognized in revenue upon satisfaction of any related conditions, provided that all revenue recognition criteria, as described below, have been met.

The Company sells patents from its portfolios from time to time. These sales are part of the Company's ongoing operations. Consequently, the related proceeds are recorded as revenue.

The timing and amount of revenue recognized from IP monetization activities depend on the specific terms of each agreement and the nature of the deliverables and obligations. Fees earned from IP consulting services are generally recognized as the services are performed. For agreements that are deemed to contain multiple elements, consideration is allocated to each element of an agreement that has stand-alone value using the relative fair value method. The Company recognizes revenue when (i) persuasive evidence of an arrangement exists, (ii) all material obligations have been substantially performed pursuant to agreement terms, services have been rendered to the customer or delivery has occurred, (iii) amounts are fixed or determinable, and (iv) collectability is reasonably assured. As a result of the contractual terms of our patent monetization agreements and the unpredictable nature, form and frequency of monetizing transactions, our revenue may fluctuate substantially from period to period.

Table of Contents

Research and Development The Company incurs costs associated with research and development activities and expenses the costs in the period incurred. Research and development expenses during the period were not material for separate disclosure and are included in general and administrative expenses.

Stock-Based Compensation The Company records stock-based compensation on stock options, stock appreciation rights, restricted stock awards, restricted stock units and other stock awards issued to employees, directors, consultants and/or advisors based on the estimated fair value on the date of grant and recognizes compensation cost over the requisite service period for awards expected to vest. The fair value of stock options and stock appreciation rights is estimated on the date of grant using the Black-Scholes option pricing model (Black-Scholes Model) based on the single option award approach. The fair value of restricted stock awards and restricted stock units is determined based on the number of shares granted and either the quoted market price of the Company's Class A common stock on the date of grant for time-based and performance-based awards, or the fair value on the date of grant using the Monte Carlo Simulation model (Monte Carlo Simulation) for market-based awards. The fair value of stock options, restricted stock awards and restricted stock units with service conditions are amortized to expense on a straight-line basis over the requisite service periods of the awards, which is generally the vesting period. The fair value of stock options, stock appreciation rights, restricted stock awards and restricted stock units with performance conditions deemed probable of being achieved and cliff vesting is amortized to expense over the requisite service period using the straight-line method of expense recognition. The fair value of restricted stock awards and restricted stock units with performance and market conditions are amortized to expense over the requisite service period using the straight-line method of expense recognition. The fair value of stock-based payment awards as determined by the Black-Scholes Model and the Monte Carlo Simulation are affected by the Company's stock price as well as other assumptions. These assumptions include, but are not limited to, the expected stock price volatility over the term of the awards and actual and projected employee stock option exercise behaviors. Forfeitures are estimated at the date of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

The Company accounts for the modification of the terms or conditions of a stock-based payment award as an exchange of the original award for a new award. Compensation expense for modified stock-based payment awards is equal to the fair value of the original award plus the incremental cost conveyed as a result of the modification expensed over the remaining life of the award.

Income Taxes The Company accounts for income taxes using the asset and liability method under which deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the period that includes the enactment date. A valuation allowance against deferred tax assets (DTAs) is recorded when it is more likely than not that the assets will not be realized.

The Company records an unrecognized tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained upon examination by the tax authorities. The Company's policy is to recognize interest and/or penalties related to unrecognized tax benefits as income tax expense.

Contingencies Outcomes of legal proceedings and claims brought by and against the Company are subject to significant uncertainty. The Company accrues an estimated loss from a loss contingency, such as a legal claim, by a charge to income if it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated. The Company discloses a contingency if there is at least a reasonable possibility that a loss has been incurred. In determining whether a contingent loss should be accrued or disclosed, the Company evaluates, among other factors, the degree of probability of an unfavorable outcome and the ability to make a reasonable estimate of the amount of loss. Changes in these factors could materially impact the Company's financial position, results of operations or cash flows. For contingencies that might result in a gain, the Company does not record the gain until realized.

Table of Contents

Income (Loss) Per Share Basic income (loss) per share is calculated based on the weighted average number of Class A common stock and Class B common stock (the Common Shares) outstanding during the period. Diluted income (loss) per share is calculated by dividing the income (loss) allocable to common shareholders by the weighted average Common Shares outstanding plus dilutive potential Common Shares. Prior to the satisfaction of vesting conditions, unvested restricted stock awards are considered contingently issuable and are excluded from weighted average Common Shares outstanding used for computation of basic income (loss) per share.

Potential dilutive Common Shares consist of the incremental Class A common stock issuable upon the exercise of outstanding stock options (both vested and non-vested), stock appreciation rights, warrants, and unvested restricted stock awards and units, calculated using the treasury stock method. The calculation of dilutive shares outstanding excludes out-of-the-money stock options (i.e., such options' exercise prices were greater than the average market price of the Company's Class A common shares for the period) because their inclusion would have been antidilutive.

The following table sets forth the computation of basic and diluted income (loss) per share (in thousands, except share and per share data):

	Year ended December 31,		
	2014	2013	2012
Net income (loss) attributable to Pendrell	\$ (51,002)	\$ (55,062)	\$ 40,084
Weighted average common shares outstanding	266,336,617	265,684,341	261,335,347
Less: weighted average unvested restricted stock awards	(1,929,119)	(3,564,938)	(4,380,344)
Shares used for computation of basic income (loss) per share	264,407,498	262,119,403	256,955,003
Add back: weighted average unvested restricted stock awards and units			4,977,877
Add back: dilutive stock options and stock appreciation rights			1,891,399
Shares used for computation of diluted income (loss) per share(1)	264,407,498	262,119,403	263,824,279
Basic income (loss) per share attributable to Pendrell	\$ (0.19)	\$ (0.21)	\$ 0.16
Diluted income (loss) per share attributable to Pendrell	\$ (0.19)	\$ (0.21)	\$ 0.15

- (1) Stock options, stock appreciation rights, restricted stock awards and units totaling 28,113,540, 34,408,579 and 26,593,976 for the years ended December 31, 2014, 2013 and 2012, respectively, were excluded from the calculation of diluted income (loss) per share as their inclusion was anti-dilutive.

New Accounting Pronouncements In August 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-15, *Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern*, which requires management to assess an entity's ability to continue as a going concern every reporting period including interim periods, and to provide related footnote disclosure in certain circumstances. Compliance with this ASU is required for annual periods beginning after December 15, 2016. Early adoption is permitted. The adoption of this ASU in 2014 did not have an impact on the Company's financial position, results of operations or cash flows.

In June 2014, the FASB issued ASU No. 2014-12, *Compensation-Stock Compensation (Topic 718) Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could*

Table of Contents

Be Achieved after the Requisite Service Period (a consensus of the FASB Emerging Issues Task Force). ASU No. 2014-12 requires that a performance target that affects vesting and could be achieved after the requisite service period shall be treated as a performance condition. Compliance with this ASU is required for annual periods beginning after December 15, 2015. Early adoption is permitted. The adoption of this ASU in 2014 did not have a material impact on the Company's financial position, results of operations or cash flows.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue (Topic 606): Revenue from Contracts with Customers*, which supersedes existing revenue recognition guidance under GAAP. The core principle of ASU 2014-09 is to recognize as revenue the amount that an entity expects to be entitled for goods or services at the time the goods or services are transferred to customers. ASU 2014-09 defines a five step process to achieve this core principle that will likely require more judgment and estimates within the revenue recognition process than are required under existing GAAP. Compliance with this ASU is required for annual periods beginning after December 15, 2016, and interim periods therein. Early adoption is not permitted. The Company is currently assessing the impact, if any, of implementing this ASU.

3. Business Combinations

On February 21, 2013, the Company acquired a 68.75% interest in Provitro. Accordingly, the activities of Provitro from the acquisition date through December 31, 2014 have been included in the Company's consolidated statement of operations for the years ended December 31, 2014 and 2013. Acquisition-related costs, including advisory, legal, accounting, valuation and other costs associated with the acquisition of Provitro of \$0.4 million, are included in general and administrative expenses for the year ended December 31, 2013.

The following table summarizes the allocation of the \$16.6 million cash paid for the assets acquired and liabilities assumed as a result of the Provitro acquisition on February 21, 2013 (in thousands):

Tangible assets acquired and liabilities assumed:	
Cash	\$ 7,396
Other current and noncurrent assets, net of liabilities	430
Property in service	2,950
Net tangible assets acquired	10,776
Identifiable intangible assets (developed technology)	12,853
Goodwill	516
Fair value of assets acquired	24,145
Fair value of 31.25% noncontrolling interest	(7,545)
Total purchase price	\$ 16,600

These allocations were based on fair value estimates as of the closing date of the acquisition and are included in the Company's consolidated balance sheet at December 31, 2013. The Company used the cost approach to value the \$12.9 million of definite-lived intangible assets related to the developed Provitro technology.

During the years ended December 31, 2014 and 2013, Provitro incurred \$2.4 million and \$2.9 million, respectively, of operating expenses which have been included in general and administrative expenses.

From acquisition through year-end 2014, the Company had been developing its strategy to commercialize the Provitro technology, but had yet to generate revenue associated with the technology. In January 2015, the Company suspended further development of the Provitro technology due to the Company's inability to identify near-term opportunities for commercialization. Accordingly, the Company took an \$11.0 million impairment charge during the fourth quarter of its year ended December 31, 2014. The impairment charge is equal to the sum of its unamortized investment in its developed Provitro technology and the goodwill associated with its acquisition of Provitro.

Table of Contents

4. Disposition of Satellite Assets

During the first quarter of 2012, the Company sold the real property it held for use in its satellite business in Brazil for approximately \$5.6 million and sold the remainder of its MEO Assets. On June 29, 2012, the Company transferred its International Subsidiaries to the Liquidating Trust. All of the property in Brazil, the MEO Assets and substantially all of the assets of the International Subsidiaries had been written off in prior years. The disposal of the Company's satellite assets and transfer of its International Subsidiaries to a Liquidating Trust resulted in the elimination of approximately \$61.9 million in satellite-related liabilities, a one-time \$48.7 million gain, and the triggering of tax losses of approximately \$2.4 billion, which the Company believes can be carried forward to offset taxable income for up to 20 years.

5. Intangible Assets and Goodwill

2014 Impairment of Finite-Lived Intangibles and Goodwill

The Company evaluates its finite-lived intangible assets when events or circumstances indicate that the carrying amount of a finite-lived intangible asset or asset group may not be recoverable. In January 2015, the Company suspended further development of the Provitro technology as it had been unable to identify near-term opportunities to commercialize the technology. The Company determined that this suspension provided additional evidence about conditions that existed prior to December 31, 2014, triggering an impairment analysis of the finite-lived intangibles associated with its Provitro asset group. In its impairment analysis, the Company compared the carrying amount of the Provitro technology to the future undiscounted net cash flows expected to be generated by the Provitro technology. The Company concluded that the anticipated undiscounted cash flows from the Provitro technology did not exceed the carrying value of the Provitro technology, prompting the Company to recognize a \$10.5 million non-cash impairment charge in its results of operations for the year ended December 31, 2014.

The Company evaluates its goodwill for impairment on an annual basis during the fourth quarter, or more frequently if circumstances indicate that the carrying value of a Company reporting unit exceeds fair value. Upon the completion of the goodwill impairment analysis in the fourth quarter of the year ended December 31, 2014, the Company determined that there was no impairment associated with its IP management reporting unit. However, in light of the impairment of the Provitro technology, the Company determined that the goodwill related to its acquisition of Provitro was impaired and recorded a \$0.5 million non-cash impairment charge in its results of operations for the year ended December 31, 2014.

For the years ended December 31, 2013 and 2012, the Company recorded no such impairment charges for finite-lived assets or goodwill.

Intangible Assets

The Company has determined that purchased trade names for both Ovidian and ContentGuard have indefinite lives as the Company expects to generate cash flows related to these assets indefinitely. Consequently, the trade names are not amortized, but are reviewed for impairment at least annually in the fourth quarter, or more frequently if circumstances indicate the carrying values of the assets may exceed their fair values.

Intangible assets with finite useful lives consist of acquired patents, developed technology, customer relationships and trade secrets which are amortized on a straight-line basis over the expected period of benefit which range from six to thirteen years.

Table of Contents

The following table presents details of the Company's intangible assets and related amortization (in thousands):

	December 31, 2014	December 31, 2013
Cost:		
Patents	\$ 139,902	\$ 144,739
Developed technology(1)		12,853
Customer relationships	6,615	6,615
Trade names	4,812	4,812
Trade secrets	1,940	1,940
Total cost	153,269	170,959
Accumulated amortization:
