We expect to deliver the notes against payment by the underwriters on or about May 26, 2015, which will be the seventh business day following the date of the pricing of the notes (such settlement being referred to as T+7). Since trades in the secondary market generally settle in three business days, purchasers who wish to trade notes on the date of pricing or the next three succeeding business days will be required, by virtue of the fact the notes initially will settle on T+7, to specify alternative settlement arrangements to prevent a failed settlement.
