- .. Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01 Other Events

On May 27, 2015, NanoString Technologies, Inc. (the Company) entered into a clinical research collaboration with Merck Sharp & Dohme Corp., a subsidiary of Merck & Co., Inc. (Merck), to develop an assay that will optimize immune-related gene expression signatures and evaluate its potential to predict benefit to Merck s anti-PD-1 therapy, KEYTRUDA® (pembrolizumab), in multiple tumor types. The collaboration will utilize NanoString s nCounter® Analysis System to optimize the gene expression signatures as part of the KEYTRUDA clinical development program.

The first phase of the collaboration covered by this agreement is expected to be completed within one year, and will focus on applying NanoString expertise to refine and clinically validate the Merck gene expression assay, and to engage with the FDA on the design of potential registration studies. NanoString will receive a total of up to approximately \$4 million in payments, most of which is expected to be received in the year ending December 31, 2015, to fund work performed by the Company during the first phase of the collaboration. If successful, Merck and NanoString intend to negotiate in good faith a separate agreement that would govern and fund the development and commercialization of any companion diagnostic assay resulting from the first phase of the collaboration.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
