FOOTNOTES TO SCHEDULE OF INVESTMENTS:

(A) Security is registered pursuant to Rule 144A of the Securities Act of 1933. The security is deemed to be liquid for purposes of compliance limitations on holdings of illiquid securities and may be resold as transactions exempt from registration, normally to qualified institutional buyers. At June 30, 2015, the total aggregate value of 144A securities is \$59,279,160, representing 41.6% of the Fund's net assets.

- (B) *Floating or variable rate security. The rate disclosed is as of June 30, 2015.*
- (C) *When-issued security or delayed-delivery security; to be settled and delivered after June 30, 2015.*
- (D) *All or a portion of the security is on loan. The value of all securities on loan is \$4,845,710. The amount of securities on loan indicated may not correspond with the securities on loan identified because securities with pending sales are in the process of recall from the brokers.*
- (E) *The security has a perpetual maturity; the date displayed is the next call date.*
- (F) *Step bond. Coupon rate changes in increments to maturity. The rate disclosed is as of June 30, 2015; the maturity date disclosed is the ultimate maturity date.*
- (G) *Illiquid security. Total aggregate value of illiquid securities is \$299,201, representing 0.2% of the Fund's net assets.*
- (H) *Rate disclosed reflects the yield at June 30, 2015.*
- (I) *Aggregate cost for federal income tax purposes is \$144,764,696. Aggregate gross unrealized appreciation and depreciation for all securities is \$8,855,125 and \$2,236,759, respectively. Net unrealized appreciation for tax purposes is \$6,618,366.*
- (J) *The Fund recognizes transfers between Levels at the end of the reporting period. There were no transfers between Levels 1, 2 and 3 during the period ended June 30, 2015. See the Security Valuation section of the Notes to Schedules of Investments for more information regarding security valuation and pricing inputs.*

NOTES TO SCHEDULES OF INVESTMENTS

At June 30, 2015

(unaudited)

NOTE 1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Transamerica Income Shares, Inc. (the Fund) is a diversified closed-end management investment company registered under the Investment Company Act of 1940, as amended (the 1940 Act). The Fund applies investment company accounting and reporting guidance. The following is a summary of significant accounting policies followed by the Fund.

Securities lending: Securities are lent to qualified financial institutions and brokers. State Street serves as securities lending agent to the Fund pursuant to a Securities Lending Agreement. The lending of securities exposes the Fund to risks such as, the borrowers may fail to return the loaned securities, the borrowers may not be able to provide additional collateral, the Fund may experience delays in recovery of the loaned securities or delays in access to collateral, or the Fund may experience losses related to the investment collateral. To minimize certain risks, loan counterparties pledge cash collateral with a value of at least 102% of the current value of the loaned securities for securities traded on U.S. exchanges and a value of at least 105% for all other securities loaned. The lending agent has agreed to indemnify the Fund in the case of default of any securities borrower.

Cash collateral received is invested in the State Street Navigator Securities Lending Trust-Prime Portfolio, a money market mutual fund registered under the 1940 Act. The value of loaned securities and related collateral outstanding at June 30, 2015, if any, are shown on a gross basis in the Schedule of Investments.

Repurchase agreements: In a repurchase agreement, the Fund purchases a security and simultaneously commits to resell that security to the seller at an agreed-upon price on an agreed-upon date. Securities purchased subject to a repurchase agreement are held at the Fund's custodian, or designated sub-custodian related to tri-party repurchase agreements, and, pursuant to the terms of the repurchase agreement, must be collateralized by securities with an aggregate market value greater than or equal to 100% of the resale price. The Fund will bear the risk of value fluctuations until the securities can be sold and may encounter delays and incur costs in liquidating the securities. In the event of bankruptcy or insolvency of the seller, delays and costs may be incurred.

Repurchase agreements are subject to netting agreements, which are agreements between the Fund and its counterparties that provide for the net settlement of all transactions and collateral with the Fund, through a single payment, in the event of default or termination. Amounts presented on the Schedule of Investments, and as part of Repurchase agreements, at value on the Statement of Assets and Liabilities are shown on a gross basis. The value of the related collateral for each repurchase agreement, as reflected in the Schedule of Investments, exceeds the value of each repurchase agreement at June 30, 2015.

Open repurchase agreements at June 30, 2015, if any, are included within the Schedule of Investments.

Foreign currency denominated investments: The accounting records of the Fund are maintained in U.S. dollars. Securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the closing exchange rate each day. The cost of foreign securities purchased and any realized gains or losses are

translated at the prevailing exchange rates in effect on the date of the respective transaction.

Foreign currency denominated assets may involve risks not typically associated with domestic transactions. These risks include revaluation of currencies, adverse fluctuations in foreign currency values, and possible adverse political, social, and economic developments, including those particular to a specific industry, country or region.

Foreign taxes: The Fund may be subjected to taxes imposed by the countries in which it invests, with respect to its investments in issuers existing or operating in such countries. The Fund may also be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Fund accrues such taxes and recoveries as applicable when the related income or capital gains are earned or unrealized, and based upon the current interpretation of tax rules and regulations that exist in the markets in which the Fund invests. Some countries require governmental approval for the repatriation of investment income, capital, or the proceeds of sales earned by foreign investors. In addition, if there is deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions of foreign capital remittances abroad.

To be announced (TBA) commitments: TBA commitments are entered into to purchase or sell securities for a fixed price at a future date, typically not to exceed 45 days. They are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased declines, or the value of the security sold increases, prior to settlement date, in addition to the risk of decline in the value of the Fund's other assets. Unsettled TBA commitments are valued at the current value of the underlying securities, according to the procedures described under Security Valuation.

NOTES TO SCHEDULES OF INVESTMENTS (continued)

At June 30, 2015

(unaudited)

NOTE 1. (continued)

TBA commitments held at June 30, 2015, if any, are identified in the Schedule of Investments.

When-Issued, forward delivery securities and delayed-delivery settlements: The Fund may purchase or sell securities on a when-issued, forward (delayed) delivery basis or delayed settlement. When-issued and forward delivery transactions are made conditionally because a security, although authorized, has not yet been issued in the market. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Fund engages in when-issued transactions to obtain an advantageous price and yield at the time of the transaction. The Fund engages in when-issued and forward delivery transactions for the purpose of acquiring securities, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Fund may be required to pay more at settlement than the security is worth. In addition, the Fund is not entitled to any of the interest earned prior to settlement.

Delayed-delivery transactions involve a commitment by the Fund to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery transactions are outstanding, the Fund will segregate with its custodian either cash, U.S. government securities, or other liquid assets at least equal to the value or purchase commitments until payment is made. When purchasing a security on a delayed delivery basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations. These transactions also involve a risk to the Fund if the other party to the transaction defaults on its obligation to make payment or delivery, and the Fund is delayed or prevented from completing the transaction. The Fund may dispose of or renegotiate a delayed-delivery transaction after it is entered into, which may result in a realized gain or loss. When the Fund sells a security on a delayed-delivery basis, the Fund does not participate in future gains and losses on the security.

When-issued securities or delayed-delivery securities held at June 30, 2015, if any, are identified in the Schedule of Investments.

Treasury inflation-protected securities (TIPS): The Fund may invest in TIPS. TIPS are fixed income securities whose principal value is periodically adjusted according to the rate of inflation/deflation. If the index measuring inflation/deflation rises or falls, the principal value of TIPS will be adjusted upward or downward, and consequently the interest payable on these securities (calculated with respect to a larger or smaller principal amount) will be increased or reduced, respectively. Any upward or downward adjustment in the principal amount of a TIPS will be included as interest income in the Statement of Operations, even though investors do not receive their principal until maturity. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds. For bonds that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

TIPS held at June 30, 2015, if any, are included within the Schedule of Investments.

Illiquid securities: The Fund may invest in illiquid securities. A security may be considered illiquid if it lacks a readily available market or if its valuation has not changed for a certain period of time. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at the current valuation may be difficult.

Illiquid securities held at June 30, 2015, if any, are identified in the Schedule of Investments.

Security transactions and investment income: Security transactions are recorded on the trade date. Security gains and losses are calculated on the first-in, first-out basis. Dividend income, if any, is recorded on the ex-dividend date or, in the case of foreign securities, as soon as the Fund is informed of the ex-dividend dates, net of foreign taxes. Interest income, including accretion of discounts and amortization of premiums, is recorded on the accrual basis commencing on the settlement date.

Real estate investment trusts (REIT): REITs are pooled investment vehicles which invest primarily in income producing real estate, or real estate related loans or interests. There are certain additional risks involved in investing in REITs. These include, but are not limited to, economic conditions, changes in zoning laws, real estate values, property taxes, and interest rates.

REITs held at June 30, 2015, if any, are identified in the Schedule of Investments.

NOTE 2. SECURITY VALUATION

All investments in securities are recorded at their estimated fair value. The Fund values its investments at the close of the New York Stock Exchange (NYSE), normally 4:00 p.m. Eastern Time, each day the NYSE is open for business. The Fund utilizes various methods to measure the fair value of its investments on a recurring basis.

Generally Accepted Accounting Principles in the United States of America establishes a hierarchy that prioritizes inputs to valuation methods. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three Levels of inputs of the fair value hierarchy are defined as follows:

Level 1 Unadjusted quoted prices in active markets for identical securities.

Level 2 Inputs, other than quoted prices included in Level 1, which are observable, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3 Unobservable inputs, which may include Transamerica Asset Management, Inc.'s (TAM) internal valuation committee's (the Valuation Committee) own assumptions in determining the fair value of investments. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the sub-adviser, issuer, analysts, or the appropriate stock exchange (for exchange-traded securities), analysis of the issuer's financial statements or other available documents and, if necessary, available information concerning other securities in similar circumstances.

The inputs used to measure fair value may fall into different Levels of the fair value hierarchy. In such cases, for disclosure purposes, the Level in the fair value hierarchy that is assigned to the fair value measurement of a security is determined based on the lowest Level input that is significant to the fair value measurement in its entirety. The hierarchy classification of inputs used to value the Fund's investments at June 30, 2015, is disclosed in the Security Valuation section of the Schedule of Investments.

Under supervision of the Board, TAM provides day-to-day valuation functions. TAM formed the Valuation Committee to monitor and implement the fair valuation policies and procedures as approved by the Board. These policies and procedures are reviewed at least annually by the Board.

The Valuation Committee, among other tasks, monitors for when market quotations are not readily available or are unreliable and determines in good faith the fair value of the portfolio investments. For instances in which daily market quotes are not readily available, securities may be valued, pursuant to procedures adopted by the Board, with reference to other instruments or indices. Depending on the relative significance of valuation inputs, these instruments may be classified in either Level 2 or Level 3 of the fair value hierarchy.

The Valuation Committee may employ a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information for the security to determine the fair value of the security. An income-based valuation approach may also be used in which the anticipated future cash flows of the security are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the securities. When the Fund uses fair value methods that rely on significant unobservable inputs to determine a security's value, the Valuation Committee will choose the method that is believed to accurately reflect fair value. These securities are categorized in Level 3 of the fair value hierarchy. The Valuation Committee reviews fair value measurements on a regular and ad hoc basis and may, as deemed appropriate, update the security valuations as well as the fair valuation guidelines. The Board reviews Valuation Committee determinations at its regularly scheduled meetings.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, but not limited to, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is generally greatest for instruments categorized in Level 3. Due to the inherent uncertainty of valuation, the Valuation Committee's determination of values may differ significantly from values that would have been realized had a ready market

NOTE 2. (continued)

for investments existed, and the differences could be material. The Valuation Committee employs various methods for calibrating these valuation approaches, including a regular review of valuation methodologies, key inputs and assumptions, transactional back-testing, and reviews of any market related activity.

Fair value measurements: Descriptions of the valuation techniques applied to the Fund's significant categories of assets and liabilities measured at fair value on a recurring basis are as follows:

Equity securities (common and preferred stocks): Securities are stated at the last reported sales price or closing price on the day of valuation taken from the primary exchange where the security is principally traded. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy.

Foreign securities, in which the primary trading market closes at the same time or after the NYSE, are valued based on quotations from the primary market in which they are traded and are categorized in Level 1. Because many foreign securities markets and exchanges close prior to the close of the NYSE, closing prices for foreign securities in those markets or on those exchanges do not reflect the events that occur after that close. Certain foreign securities may be fair valued using a pricing service that considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, Exchange-Traded Funds, and the movement of the certain indices of securities based on a statistical analysis of their historical relationship; such valuations generally are categorized in Level 2.

Preferred stock and other equities traded on inactive markets or valued by reference to similar instruments are also generally categorized in Level 2 or Level 3 if inputs are unobservable.

Securities lending collateral: Securities lending collateral is invested in a money market fund which is valued at the NAV of the underlying securities and no valuation adjustments are applied. It is categorized in Level 1 of the fair value hierarchy.

Repurchase agreements: Repurchase agreements are traded on inactive markets or valued by reference to similar instruments and are generally categorized in Level 2.

Corporate bonds: The fair value of corporate bonds is estimated using various techniques, which consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, fundamental data relating to the issuer, and credit default swap spreads adjusted for any basis difference between cash and derivative instruments. While most corporate bonds are categorized in Level 2 of the fair value hierarchy, in instances where lower relative weight is placed on transaction prices, quotations, or similar observable

inputs, they are categorized in Level 3.

Asset-backed securities: The fair value of asset-backed securities is estimated based on models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield, and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Mortgage-backed securities: The fair value of mortgage-backed securities is estimated based on models that consider issuer type, coupon, cash flows, mortgage prepayment projection tables and adjustable rate mortgage evaluations that incorporate index data, periodic life caps and the next coupon reset date. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

Municipal bonds & notes and variable rate notes: The fair value of municipal bonds & notes and variable rate notes is estimated based on models that consider, among other factors, information received from market makers and broker-dealers, current trades, bid-want lists, offerings, market movements, the liquidity of the bond, state of issuance, benchmark yield curves, and bond or note insurance. To the extent the inputs are observable and timely, the values would generally be categorized in Level 2 of the fair value hierarchy; otherwise they are categorized in Level 3.

Short-term notes: Short-term notes are valued using amortized cost, which approximates fair value. To the extent the inputs are observable and timely, the values would be generally categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

Government securities: Government securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued by principally using dealer quotations. Government securities generally are categorized in Level 2 of the fair value hierarchy, or Level 3 if inputs are unobservable.

NOTE 2. (continued)

U.S. government agency securities: U.S. government agency securities are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Generally, agency issued debt securities are valued in a manner similar to U.S. government securities. Mortgage pass-throughs include to be announced (TBA) securities and mortgage pass-through certificates. Generally, TBA securities and mortgage pass-throughs are valued using dealer quotations. Depending on market activity levels and whether quotations or other observable data are used, these securities are typically categorized in Level 2 of the fair value hierarchy; otherwise they would be categorized in Level 3.

NOTE 3. ACCOUNTING PRONOUNCEMENT

In June 2014, the Financial Accounting Standards Board issued Accounting Standards Update No. 2014-11, Transfers and Servicing, Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures . The guidance changes the accounting for certain repurchase agreements and expands disclosure requirements related to repurchase agreements, securities lending, repurchase-to-maturity and similar transactions. The guidance is required to be presented for annual periods beginning after December 15, 2014, and for interim periods beginning after March 15, 2015. Management is currently evaluating the implication, if any, of the additional disclosure requirements and its impact on the Fund s financial statements.

Item 2. Controls and Procedures.

- (a) The Registrant's principal executive officer and principal financial officer evaluated the Registrant's disclosure controls (as defined in Rule 30a-3(c) under the Investment Company Act of 1940) within 90 days of the date of this filing and concluded that the Registrant's disclosure control and procedures were effective as of that date.

- (b) There was no change in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 3. Exhibits.

Separate certifications by the Registrant's principal executive officer and principal financial officer, as required by Rule 30a-2(a) under the 1940 Act, are attached.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
