Ratio of Earnings to Fixed Charges:

Our previously presented ratio of earnings to fixed charges for the nine months ended March 27, 2016, on both an actual and pro forma basis, omitted interest expense of approximately \$27 million associated with the amortization of debt issuance costs relating to the bridge commitment letter from the computation of fixed charges for such nine-month period. Accordingly, including these expenses, our ratio of earnings to fixed charges for the nine months ended March 27, 2016 would have been 7.6x on an actual basis, and our pro forma ratio of earnings to fixed charges (giving effect to the KLA-Tencor Transactions and related financings as outlined in Use of Proceeds in the preliminary prospectus supplement, and assuming the KLA-Tencor Senior Notes are exchanged for new series of Lam Research senior unsecured notes) for the nine months ended March 27, 2016 would have been 3.6x.

Capitalization:

With regard to the stockholders' equity portion of the Capitalization table in the preliminary prospectus supplement, after giving effect to the assumed issuance of approximately 77.9 million shares of Lam Research common stock in the KLA-Tencor Merger, on an adjusted basis as of March 27, 2016: common stock would have been 237; additional paid in capital would have been 11,308,955; retained earnings would have been 4,531,721; and total stockholders' equity would have been 11,364,667 (all numbers in thousands except the total number of shares of Lam Research common stock assumed to be issued in the KLA-Tencor Merger).
