Cautionary Note on Forward-Looking Statements

For purposes of this Quarterly Report, the terms Oracle, we, us and our refer to Oracle Corporation and its consolidated subsidiaries. This Quarterly Report on Form 10-Q contains statements that are not historical in nature, are predictive in nature, or that depend upon or refer to future events or conditions or otherwise contain forward-looking statements within the meaning of Section 21 of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. These include, among other things, statements regarding:

our expectation that we will continue to acquire companies, products, services and technologies to further our corporate strategy;

our belief that our acquisitions should allow us to grow and continue to make investments in research and development;

our expectation that the total revenues of our cloud and on-premise software business on a constant currency basis generally will continue to increase due to demand for our on-premise software products and software license updates and product support offerings, expected growth from our cloud software as a service (SaaS), platform as a service (PaaS) and infrastructure as a service (IaaS) offerings, and contributions from acquisitions;

our belief that the introduction of additional Oracle Cloud IaaS offerings will complement our cloud SaaS and PaaS offerings and allow us to offer customers additional opportunities to access Oracle technologies through the Oracle Cloud;

our expectation that we will continue to place significant strategic emphasis on growing our SaaS, PaaS and IaaS offerings, which will affect the growth of our cloud SaaS, PaaS and IaaS revenues and our new software license revenues and the related expenses;

our intention that we will renew our cloud SaaS, PaaS and IaaS contracts when they are eligible for renewal;

our belief that software license updates and product support revenues and margins will grow;

our expectation that our hardware business will have lower operating margins as a percentage of revenues than our cloud and on-premise software business;

our expectation that we will continue to make significant investments in research and development and related product opportunities, including those related to hardware products and services, and our belief that research and development efforts are essential to maintaining our competitive position;

our international operations providing a significant portion of our total revenues and expenses;

the sufficiency of our sources of funding for working capital, capital expenditures, contractual obligations, acquisitions, dividends, stock repurchases, debt repayments and other matters;

our belief that we have adequately provided under U.S. generally accepted accounting principles for outcomes related to our tax audits and that the final outcome of our tax related examinations, agreements or judicial proceedings will not have a material effect on our

Edgar Filing: ORACLE CORP - Form 10-Q

results of operations, and our belief that our net deferred tax assets will be realized in the foreseeable future;

our estimates and projections regarding potential future goodwill impairment losses;

our belief that the outcome of certain legal proceedings and claims to which we are a party will not, individually or in the aggregate, result in losses that are materially in excess of amounts already recognized, if any;

the possibility that certain legal proceedings to which we are a party could have a material impact to our future cash flows and results of operations;

Table of Contents

our expectations regarding the timing and amount of expenses relating to the Fiscal 2017 Oracle Restructuring Plan and the improved efficiencies in our operations that such plan will create;

the timing and amount of our stock repurchases;

our expectations regarding the impact of recent accounting pronouncements on our consolidated financial statements;

our expectation that to the extent customers renew support contracts or cloud SaaS, PaaS and IaaS contracts from companies that we have acquired, we will recognize revenues for the full contracts' values over the respective renewal periods;

our ability to predict quarterly hardware revenues;

the timing of customer orders and delays in our ability to manufacture or deliver a few large transactions substantially affecting the amount of hardware products revenues, expenses and operating margins that we will report;

as well as other statements regarding our future operations, financial condition and prospects, and business strategies. Forward-looking statements may be preceded by, followed by or include the words expects, anticipates, intends, plans, believes, seeks, strives, should, is designed to and similar expressions. We claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 for all forward-looking statements. We have based these forward-looking statements on our current expectations and projections about future events. These forward-looking statements are subject to risks, uncertainties and assumptions about our business that could affect our future results and could cause those results or other outcomes to differ materially from those expressed or implied in the forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in Risk Factors included in documents we file from time to time with the U.S. Securities and Exchange Commission (the SEC), including our Annual Report on Form 10-K for our fiscal year ended May 31, 2016 and our other Quarterly Reports on Form 10-Q to be filed by us in our fiscal year 2017, which runs from June 1, 2016 to May 31, 2017.

We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or risks, except to the extent required by applicable securities laws. If we do update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements. New information, future events or risks could cause the forward-looking events we discuss in this Quarterly Report not to occur. You should not place undue reliance on these forward-looking statements, which reflect our expectations only as of the date of this Quarterly Report.

ORACLE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

November 30, 2016

(Unaudited)

1. BASIS OF PRESENTATION AND RECENT ACCOUNTING PRONOUNCEMENTS

Basis of Presentation

We have prepared the condensed consolidated financial statements included herein pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) have been condensed or omitted pursuant to such rules and regulations. However, we believe that the disclosures herein are adequate to ensure the information presented is not misleading. These unaudited condensed consolidated financial statements should be read in conjunction with the audited financial statements and the notes thereto included in our Annual Report on Form 10-K for the fiscal year ended May 31, 2016.

We believe that all necessary adjustments, which consisted only of normal recurring items, have been included in the accompanying financial statements to present fairly the results of the interim periods. The results of operations for the interim periods presented are not necessarily indicative of the operating results to be expected for any subsequent interim period or for our fiscal year ending May 31, 2017. Certain prior year balances have been reclassified to conform to the current year presentation. Such reclassifications did not affect total revenues, operating income or net income.

During the first half of fiscal 2017, we adopted Accounting Standards Update (ASU) 2016-09, *Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting* (ASU 2016-09). As required by ASU 2016-09, excess tax benefits recognized on stock-based compensation expense are reflected in the condensed consolidated statements of operations as a component of the provision for income taxes on a prospective basis. As required by ASU 2016-09, excess tax benefits recognized on stock-based compensation expense are classified as an operating activity in our condensed consolidated statements of cash flows and we have applied this provision on a retrospective basis. For the six months ended November 30, 2015, net cash provided by operating activities increased by \$40 million with a corresponding offset to net cash used for financing activities. Finally, ASU 2016-09 allows for the option to account for forfeitures as they occur, rather than estimating expected forfeitures over the course of a vesting period. We have elected to account for forfeitures as they occur and the net cumulative effect of this change was recognized as a \$9 million increase to additional paid in capital, a \$3 million increase to deferred tax assets and a \$6 million reduction to retained earnings as of June 1, 2016.

In addition, in fiscal 2017, we also adopted ASU 2016-17, *Consolidation (Topic 810): Interests Held through Related Parties That Are under Common Control* which did not result in a material impact to our reported financial position or results of operations and cash flows.

There have been no other significant changes in our reported financial position or results of operations and cash flows as a result of our adoption of new accounting pronouncements or changes to our significant accounting policies that were disclosed in our Annual Report on Form 10-K for the fiscal year ended May 31, 2016.

Acquisition Related and Other Expenses

Acquisition related and other expenses consist of personnel related costs and stock-based compensation for transitional and certain other employees, integration related professional services, certain business combination adjustments including certain adjustments after the measurement period has ended and certain other operating items, net.

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****November 30, 2016****(Unaudited)**

(in millions)	Three Months Ended November 30,		Six Months Ended November 30,

Total acquisition related and other expenses	\$ 40	\$ (7)	\$ 54	\$ 25

Included in acquisition related and other expenses in the fiscal 2016 periods presented is an acquisition related benefit of \$19 million.

Non-Operating Income, net

Non-operating income, net consists primarily of interest income, net foreign currency exchange gains (losses), the noncontrolling interests in the net profits of our majority-owned subsidiaries (primarily Oracle Financial Services Software Limited and Oracle Japan) and net other income (losses), including net realized gains and losses related to all of our investments and net unrealized gains and losses related to the small portion of our investment portfolio that we classify as trading.

Other income (loss), net	5	18	24	(14)
Total non-operating income, net	\$ 99	\$ 84	\$ 247	\$ 114

Sales of Financing Receivables

We offer certain of our customers the option to acquire our software products, hardware products and services offerings through separate long-term payment contracts. We generally sell these contracts that we have financed for our customers on a non-recourse basis to financial institutions within 90 days of the contracts' dates of execution. We record the transfers of amounts due from customers to financial institutions as sales of financing receivables because we are considered to have surrendered control of these financing receivables. Financing receivables sold to financial institutions were \$121 million and \$1.0 billion for the three and six months ended November 30, 2016, respectively, and \$228 million and \$1.2 billion for the three and six months ended November 30, 2015, respectively.

Recent Accounting Pronouncements

Income Taxes: In October 2016, the Financial Accounting Standards Board (FASB) issued ASU 2016-16, *Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory* (ASU 2016-16), which changes the timing of when certain intercompany transactions are recognized within the provision for income taxes. ASU 2016-16 is effective for us in our first quarter of fiscal 2019 on a modified retrospective basis, and earlier adoption is permitted. We are currently evaluating the impact of our pending adoption of ASU 2016-16 on our consolidated financial statements.

Table of Contents

ORACLE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

November 30, 2016

(Unaudited)

Statement of Cash Flows: In November 2016, the FASB issued ASU 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash* (ASU 2016-18), which provides amendments to current guidance to address the classification and presentation of changes in restricted cash in the statement of cash flows.

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments* (ASU 2016-15), which clarifies how companies present and classify certain cash receipts and cash payments in the statement of cash flows.

Both ASU 2016-18 and ASU 2016-15 are effective for us in our first quarter of fiscal 2019 and earlier adoption is permitted. We are currently evaluating the impact of our pending adoption of these standards on our consolidated financial statements.

Financial Instruments: In June 2016, the FASB issued ASU 2016-13, *Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments* (ASU 2016-13), which requires measurement and recognition of expected credit losses for financial assets held. ASU 2016-13 is effective for us in our first quarter of fiscal 2021, and earlier adoption is permitted beginning in the first quarter of fiscal 2020. We are currently evaluating the impact of our pending adoption of ASU 2016-13 on our consolidated financial statements.

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities* (ASU 2016-01), which addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. ASU 2016-01 is effective for us in our first quarter of fiscal 2019, and earlier adoption is not permitted except for certain provisions. We currently do not expect that our pending adoption of ASU 2016-01 will have a material effect on our consolidated financial statements.

Leases: In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)* (ASU 2016-02). ASU 2016-02 requires companies to generally recognize on the balance sheet operating and financing lease liabilities and corresponding right-of-use assets. ASU 2016-02 is effective for us in our first quarter of fiscal 2020 on a modified retrospective basis, and earlier adoption is permitted. We are currently evaluating the impact of our pending adoption of ASU 2016-02 on our consolidated financial statements, and we currently expect that most of our operating lease commitments will be subject to the new standard and recognized as operating lease liabilities and right-of-use assets upon our adoption of ASU 2016-02, which will increase our total assets and total liabilities that we report relative to such amounts prior to adoption.

Revenue Recognition: In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers: Topic 606* and issued subsequent amendments to the initial guidance in August 2015, March 2016, April 2016 and May 2016 within ASU 2015-14, ASU 2016-08, ASU 2016-10 and ASU 2016-12, respectively (ASU 2014-09, ASU 2015-14, ASU 2016-08, ASU 2016-10 and ASU 2016-12 collectively, Topic 606). Topic 606 supersedes nearly all existing revenue recognition guidance under GAAP. The core principle of Topic 606 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration that is expected to be received for those goods or services. Topic 606 defines a five-step process to achieve this core principle and, in doing so, it is possible more judgment and estimates may be required within the revenue recognition process than are required under existing GAAP, including identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation, among others. Topic 606 also provides guidance on the recognition of costs related to obtaining customer contracts. Topic 606 is effective for us as of either our first quarter of fiscal 2018 or our first quarter of fiscal 2019 using either of two methods: (1) retrospective application of Topic 606 to each prior reporting period presented with the option to elect certain practical expedients as defined within Topic 606 or (2) retrospective application of Topic 606 with the cumulative effect of initially applying Topic 606 recognized at the date of initial application and providing

Table of Contents

ORACLE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

November 30, 2016

(Unaudited)

certain additional disclosures as defined per Topic 606. Preliminarily, we plan to adopt Topic 606 in the first quarter of fiscal 2019 pursuant to the aforementioned adoption method (1) and we do not believe there will be a material impact to our revenues upon adoption. We are continuing to evaluate the impact to our revenues related to our pending adoption of Topic 606 and our preliminary assessments are subject to change. We are also continuing to evaluate the impact adoption of Topic 606 will have on our recognition of costs related to obtaining customer contracts.

2. ACQUISITIONS

Acquisition of NetSuite Inc., a Related Party

On July 28, 2016, we entered into an Agreement and Plan of Merger (Merger Agreement) with NetSuite Inc. (NetSuite), a provider of cloud-based enterprise resource planning (ERP) software and related applications and, as described further below, a related party to Oracle.

Pursuant to the Merger Agreement, we commenced a tender offer on August 18, 2016 to purchase all of the issued and outstanding shares of NetSuite common stock (NetSuite Shares) at a purchase price of \$109.00 per share, net to the seller in cash, without interest thereon, based upon the terms and subject to the conditions set forth in the Offer to Purchase dated August 18, 2016, and in the related Letter of Transmittal. On November 7, 2016, pursuant to the terms of the tender offer and applicable Delaware law, we accepted and paid for the substantial majority of outstanding NetSuite Shares and effectuated the merger of NetSuite with and into a wholly-owned subsidiary of Oracle and NetSuite became an indirect, wholly-owned subsidiary of Oracle. Pursuant to the Merger Agreement, NetSuite Shares that remained outstanding and were not acquired by us were converted into, and cancelled in exchange for, the right to receive \$109.00 per share in cash. The unvested equity awards to acquire NetSuite Shares that were outstanding immediately prior to the conclusion of the merger were converted into equity awards denominated in shares of Oracle common stock based on formulas contained in the Merger Agreement. We acquired NetSuite to, among other things, expand our cloud software as a service offerings with a complementary set of cloud ERP and related cloud software applications for customers. We have included the financial results of NetSuite in our consolidated financial statements from the date of acquisition.

Lawrence J. Ellison, Oracle's Chairman of the Board and Chief Technology Officer and Oracle's largest stockholder, is an affiliate of NetSuite's largest stockholder, NetSuite Restricted Holdings LLC (a single member LLC investment entity whose interests are beneficially owned by a trust controlled by Mr. Ellison), which owned approximately 40% of the issued and outstanding NetSuite Shares immediately prior to the conclusion of the merger. Oracle's Board of Directors appointed a Special Committee (comprised solely of directors who are independent of the management of Oracle, Mr. Ellison, his family members and any affiliated entities, and NetSuite) to which it delegated the full and exclusive power, authority and discretion of the Board to evaluate, assess, and approve the NetSuite transaction on its behalf. The Special Committee engaged its own independent legal counsel and its own independent financial advisor to advise it on the transaction. The financial advisor provided the Special Committee with a fairness opinion in connection with the transaction. After extensive deliberations, the Special Committee concluded that the transaction terms were fair to Oracle and the transaction was in the best interests of Oracle and its stockholders. The Special Committee unanimously approved the transaction on behalf of Oracle and the Board.

The total preliminary purchase price for NetSuite was approximately \$9.1 billion, which consisted of approximately \$9.0 billion in cash and \$74 million for the fair values of restricted stock-based awards and stock options assumed. Pursuant to our business combinations accounting policy, we estimated the preliminary fair values of net tangible and intangible assets acquired, and the excess of the consideration transferred over the

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****November 30, 2016****(Unaudited)**

aggregate of such fair values was recorded as goodwill. The preliminary fair values of net tangible assets and intangible assets acquired were based on preliminary valuations, and our estimates and assumptions are subject to change within the measurement period (up to one year from the acquisition date). The primary areas that remain preliminary relate to the fair values of intangible assets acquired, certain tangible assets and liabilities acquired, certain legal matters, income and non-income based taxes and residual goodwill. We expect to continue to obtain information to assist us in determining the fair values of the net assets acquired during the measurement period. The following table summarizes the estimated preliminary fair values of net tangible liabilities and intangible assets acquired from NetSuite:

(in millions)	
Cash and cash equivalents	\$ 481
Trade receivables, net	32
Other assets	121
Intangible assets	3,157
Goodwill	6,696
Accounts payable and other liabilities	(134)
Deferred revenues	(153)
Debt	(342)
Deferred tax liabilities, net	(782)
 Total	 \$ 9,076

We do not expect the goodwill recognized as a part of the NetSuite acquisition to be deductible for income tax purposes.

Other Fiscal 2017 and Fiscal 2016 Acquisitions

During the first half of fiscal 2017, we acquired certain companies and purchased certain technology and development assets primarily to expand our products and services offerings. These acquisitions were not individually or in the aggregate significant. We have included the financial results of the acquired companies in our consolidated financial statements from their respective acquisition dates, and the results from each of these companies were not individually material to our consolidated financial statements. In the aggregate, the total preliminary purchase price for these acquisitions was approximately \$1.5 billion, which consisted of approximately \$1.5 billion in cash and \$10 million for the fair values of restricted stock-based awards and stock options assumed. We preliminarily recorded \$250 million of net tangible assets and \$481 million of identifiable intangible assets, based on their estimated fair values, and \$816 million of residual goodwill.

The preliminary fair value estimates for the assets acquired and liabilities assumed for our acquisitions completed during the first half of fiscal 2017 were based upon preliminary calculations and valuations, and our estimates and assumptions for these acquisitions are subject to change as we obtain additional information during the respective measurement periods (up to one year from the respective acquisition dates). The primary areas of those preliminary estimates that are not yet finalized relate to certain tangible assets and liabilities acquired, identifiable intangible assets, certain legal matters, income and non-income based taxes and residual goodwill.

We also have entered into certain non-material agreements to acquire certain companies and expect these proposed acquisitions to close during the third quarter of fiscal 2017.

During fiscal 2016, we acquired certain companies and purchased certain technology and development assets primarily to expand our products and services offerings. These acquisitions were not significant individually or in the aggregate.

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****November 30, 2016****(Unaudited)****Unaudited Pro Forma Financial Information**

The unaudited pro forma financial information in the table below summarizes the combined results of operations for Oracle, NetSuite and certain other companies that we acquired since the beginning of fiscal 2016 that were considered relevant for the purposes of unaudited pro forma financial information disclosure as if the companies were combined as of the beginning of fiscal 2016. The unaudited pro forma financial information for all periods presented included the business combination accounting effects resulting from these acquisitions, including amortization charges from acquired intangible assets (certain of which are preliminary), stock-based compensation charges for unvested restricted stock-based awards and stock options assumed, if any, and the related tax effects as though the aforementioned companies were combined as of the beginning of fiscal 2016. The unaudited pro forma financial information as presented below is for informational purposes only and is not necessarily indicative of the results of operations that would have been achieved if the acquisitions had taken place at the beginning of fiscal 2016.

The unaudited pro forma financial information for the three and six months ended November 30, 2016 combined the historical results of Oracle for the three and six months ended November 30, 2016, the historical results of NetSuite for the three and six month periods ended September 30, 2016 (adjusted due to differences in reporting periods and considering the date we acquired NetSuite) and the historical results of certain other companies that we acquired since the beginning of fiscal 2017 based upon their respective previous reporting periods and the dates these companies were acquired by us, and the effects of the pro forma adjustments listed above.

The unaudited pro forma financial information for the three and six months ended November 30, 2015 combined the historical results of Oracle for the three and six month periods ended November 30, 2015, the historical results of NetSuite for the three and six months ended September 30, 2015 (adjusted due to differences in reporting periods) and the historical results of certain other companies that we acquired since the beginning of fiscal 2016 based upon their respective previous reporting periods and the dates these companies were acquired by us, and the effects of the pro forma adjustments listed above. The unaudited pro forma financial information was as follows:

(in millions, except per share data)	Three Months Ended		Six Months Ended	
	November 30,		November 30,	
	2016	2015	2016	2015
Total revenues	\$ 9,213	\$ 9,254	\$ 18,045	\$ 17,950
Net income	\$ 1,920	\$ 1,990	\$ 3,591	\$ 3,537
Basic earnings per share	\$ 0.47	\$ 0.47	\$ 0.87	\$ 0.83
Diluted earnings per share	\$ 0.46	\$ 0.46	\$ 0.85	\$ 0.81

3. FAIR VALUE MEASUREMENTS

We perform fair value measurements in accordance with FASB Accounting Standards Codification (ASC) 820, *Fair Value Measurement*. ASC 820 defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required to be recorded at their fair values, we consider the principal or most advantageous market in which we would transact and consider assumptions that market participants would use when pricing the assets or liabilities, such as inherent risk, transfer restrictions and risk of nonperformance.

ASC 820 establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. An asset's or a liability's categorization

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****November 30, 2016****(Unaudited)**

within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. ASC 820 establishes three levels of inputs that may be used to measure fair value:

Level 1: quoted prices in active markets for identical assets or liabilities;

Level 2: inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; or

Level 3: unobservable inputs that are supported by little or no market activity and that are significant to the fair values of the assets or liabilities.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

Our assets and liabilities measured at fair value on a recurring basis, excluding accrued interest components, consisted of the following (Level 1 and Level 2 inputs are defined above):

(in millions)	November 30, 2016			May 31, 2016		
	Fair Value Measurements Using Input Types			Fair Value Measurements Using Input Types		
	Level 1	Level 2	Total	Level 1	Level 2	Total
Assets:						
Corporate debt securities and other	\$ 170	\$ 37,097	\$ 37,267	\$ 393	\$ 35,095	\$ 35,488
Commercial paper debt securities		3,757	3,757		2,155	2,155
Money market funds	552		552	3,750		3,750
Derivative financial instruments		54	54		122	122
Total assets	\$ 722	\$ 40,908	\$ 41,630	\$ 4,143	\$ 37,372	\$ 41,515
Liabilities:						
Derivative financial instruments	\$	\$ 268	\$ 268	\$	\$ 218	\$ 218

Our marketable securities investments consist of Tier 1 commercial paper debt securities, corporate debt securities and certain other securities. As of November 30, 2016 and May 31, 2016, approximately 39% and 28%, respectively, of our marketable securities investments mature within one year and 61% and 72%, respectively, mature within one to six years. Our valuation techniques used to measure the fair values of our marketable securities that were classified as Level 1 in the table above were derived from quoted market prices and active markets for these instruments that exist. Our valuation techniques used to measure the fair values of Level 2 instruments listed in the table above, the counterparties to which have high credit ratings, were derived from the following: non-binding market consensus prices that were corroborated by observable market data, quoted market prices for similar instruments, or pricing models, such as discounted cash flow techniques, with all

Edgar Filing: ORACLE CORP - Form 10-Q

significant inputs derived from or corroborated by observable market data including LIBOR-based yield curves, among others.

Based on the trading prices of our \$54.2 billion and \$40.1 billion of borrowings, which consisted primarily of senior notes and the related fair value hedges that were outstanding as of November 30, 2016 and May 31, 2016, respectively, the estimated fair values of senior notes and the related fair value hedges issued by Oracle using Level 2 inputs at November 30, 2016 and May 31, 2016 were \$55.6 billion and \$43.2 billion, respectively.

4. INVENTORIES

Inventories consisted of the following:

(in millions)	November 30, 2016	May 31, 2016
Raw materials	\$ 153	\$ 95
Work-in-process	46	31
Finished goods	128	86
Total	\$ 327	\$ 212

5. INTANGIBLE ASSETS AND GOODWILL

The changes in intangible assets for fiscal 2017 and the net book value of intangible assets as of November 30, 2016 and May 31, 2016 were as follows:

(in millions)	Intangible Assets, Gross		Accumulated Amortization			Intangible Assets, Net		Weighted Average Useful Life ⁽¹⁾	
	May 31, 2016	November 30, 2016	May 31, 2016	Expense November 30, 2016	May 31, 2016	November 30, 2016			
Developed technology	\$ 3,661	\$ 1,515	\$ 5,176	\$ (1,876)	\$ (280)	\$ (2,156)	\$ 1,785	\$ 3,020	8 years
Software support agreements and related relationships	2,419		2,419	(1,287)	(63)	(1,350)	1,132	1,069	N.A.
SaaS, PaaS and IaaS agreements and related relationships	2,034	2,005	4,039	(704)	(148)	(852)	1,330	3,187	10 years
Customer relationships and contract backlog	1,399		1,399	(1,121)	(36)	(1,157)	278	242	N.A.
Hardware support agreements and related relationships	1,010		1,010	(797)	(38)	(835)	213	175	N.A.
Trademarks and other	1,043	118	1,161	(838)	(48)	(886)	205	275	9 years
Total intangible assets, net	\$ 11,566	\$ 3,638	\$ 15,204	\$ (6,623)	\$ (613)	\$ (7,236)	\$ 4,943	\$ 7,968	9 years

⁽¹⁾ Represents weighted-average useful lives of intangible assets acquired during fiscal 2017.

Total amortization expense related to our intangible assets was \$302 million and \$613 million, respectively, for the three and six months ended November 30, 2016, respectively, and \$423 million and \$875 million for the three and six months ended November 30, 2015, respectively. As of November 30, 2016, estimated future amortization expenses related to intangible assets were as follows (in millions):

Edgar Filing: ORACLE CORP - Form 10-Q

Remainder of fiscal 2017	\$ 723
Fiscal 2018	1,331
Fiscal 2019	1,222
Fiscal 2020	1,035
Fiscal 2021	861
Fiscal 2022	758
Thereafter	2,038
Total intangible assets, net	\$ 7,968

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****November 30, 2016****(Unaudited)**

The changes in the carrying amounts of goodwill, net, which is generally not deductible for tax purposes, for our operating segments for the six months ended November 30, 2016 were as follows:

(in millions)	Cloud Software and On-Premise Software	Software License Updates and Product Support	Hardware Support	Consulting	Other, net ⁽²⁾	Total Goodwill, net
Balances as of May 31, 2016	\$ 15,747	\$ 14,439	\$ 2,367	\$ 1,759	\$ 278	\$ 34,590
Goodwill from acquisitions	815				6,696	7,511
Goodwill adjustments, net ⁽¹⁾	(286)				268	(18)
Balances as of November 30, 2016	\$ 16,276	\$ 14,439	\$ 2,367	\$ 1,759	\$ 7,242	\$ 42,083

(1) Pursuant to our business combinations accounting policy, we recorded goodwill adjustments for the effects on goodwill of changes to net assets acquired during the period that such a change is identified, provided that any such change is within the measurement period (up to one year from the date of the acquisition).

(2) Represents goodwill allocated to our other operating segments and, as of November 30, 2016, approximately \$6.7 billion of NetSuite goodwill that will be allocated based upon the finalization of purchase accounting valuations.

6. NOTES PAYABLE AND OTHER BORROWINGS**Senior Notes**

In July 2016, we issued \$14.0 billion, par value, of fixed-rate senior notes comprised of the following as of November 30, 2016:

(Dollars in millions)	Date of Issuance	November 30, 2016	
		Amount	Effective Interest Rate
\$4,250, 1.90%, due September 2021	July 2016	\$ 4,250	1.94%
\$2,500, 2.40%, due September 2023	July 2016	2,500	2.40%
\$3,000, 2.65%, due July 2026	July 2016	3,000	2.69%
\$1,250, 3.85%, due July 2036	July 2016	1,250	3.85%
\$3,000, 4.00%, due July 2046	July 2016	3,000	4.00%
Total fixed rate senior notes		\$ 14,000	

Unamortized discount/issuance costs	(65)
Total fixed rate senior notes, net	\$ 13,935

We issued the senior notes for general corporate purposes, which may include stock repurchases, payment of cash dividends on our common stock and repayment of indebtedness and future acquisitions. The interest is payable semi-annually. We may redeem some or all of the senior notes of each series prior to their maturity, subject to certain restrictions, and the payment of an applicable make-whole premium in certain instances.

The senior notes rank pari passu with any other existing and future unsecured and unsubordinated indebtedness of Oracle Corporation. All existing and future indebtedness and liabilities of the subsidiaries of Oracle Corporation are or will be effectively senior to the senior notes. We were in compliance with all debt-related covenants at November 30, 2016.

Other Fiscal 2017 Borrowings Activities

In the second quarter of fiscal 2017, we assumed \$113 million of debt that bears interest at 3.53% and matures in August 2025 in connection with our acquisition of certain land and buildings.

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****November 30, 2016****(Unaudited)**

In connection with our acquisition of NetSuite in the second quarter of fiscal 2017 (see Note 2 above), we assumed \$310 million par value of legacy NetSuite convertible notes (NetSuite Debt) with a fair value of \$342 million as of the acquisition date. The NetSuite Debt bears interest at 0.25% and matures in June 2018. Our acquisition of NetSuite triggered (a) the right of holders of the NetSuite Debt to convert their debt holdings into an amount payable in cash, at any time through December 22, 2016, based upon conversion formulas that are contained within the NetSuite Debt indenture and (b) the obligation of NetSuite to offer to repurchase the NetSuite Debt from each holder at a purchase price equal to par, plus accrued and unpaid interest, which offer will expire on December 21, 2016. As of November 30, 2016, \$342 million of the NetSuite Debt remained outstanding.

In May 2016, we borrowed \$3.8 billion pursuant to three revolving credit agreements with JPMorgan Chase Bank, N.A., as initial lender and administrative agent (the 2016 Credit Agreements). In June 2016, we repaid the \$3.8 billion and the 2016 Credit Agreements expired pursuant to their terms.

There have been no other significant changes in our notes payable or other borrowing arrangements that were disclosed in our Annual Report on Form 10-K for the fiscal year ended May 31, 2016.

7. RESTRUCTURING ACTIVITIES**Fiscal 2017 Oracle Restructuring Plan**

During the first quarter of fiscal 2017, our management approved, committed to and initiated plans to restructure and further improve efficiencies in our operations due to our recent acquisitions and certain other operational activities (2017 Restructuring Plan). The total estimated restructuring costs associated with the 2017 Restructuring Plan are up to \$502 million and will be recorded to the restructuring expense line item within our consolidated statements of operations as they are incurred. We recorded \$202 million of restructuring expenses in connection with the 2017 Restructuring Plan in the first half of fiscal 2017 and we expect to incur the majority of the estimated remaining \$300 million through the end of fiscal 2018. Any changes to the estimates of executing the 2017 Restructuring Plan will be reflected in our future results of operations.

Summary of All Plans

(in millions)	Six Months Ended November 30, 2016					Accrued November 30, 2016 ⁽²⁾	Total Costs Accrued to Date	Total Expected Program Costs
	Accrued	Initial Costs ⁽³⁾	Adj. to Cost ⁽⁴⁾	Cash Payments	Others ⁽⁵⁾

Total restructuring plans	\$ 283	\$ 206	\$ (21)	\$ (216)	\$ (11)	\$ 241

- (1) Restructuring costs recorded for individual line items primarily related to employee severance costs.
- (2) The balances at November 30, 2016 and May 31, 2016 included \$222 million and \$255 million, respectively, recorded in other current liabilities, and \$19 million and \$28 million, respectively, recorded in other non-current liabilities.
- (3) Costs recorded for the respective restructuring plans during the current period presented.
- (4) All plan adjustments were changes in estimates whereby increases and decreases in costs were generally recorded to operating expenses in the period of adjustments.

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****November 30, 2016****(Unaudited)**

⁽⁵⁾ Represents foreign currency translation and certain other adjustments.

⁽⁶⁾ Other restructuring plans presented in the table above included condensed information for other Oracle based plans (primarily the Fiscal 2015 Oracle Restructuring Plan) and other plans associated with certain of our acquisitions whereby we continued to make cash outlays to settle obligations under these plans during the period presented but for which the periodic impact to our condensed consolidated statements of operations was not significant.

8. DEFERRED REVENUES

Deferred revenues consisted of the following:

	November 30,	May 31,
(in millions)	2016	2016
Software license updates and product support	\$ 5,446	\$ 5,864
Cloud SaaS, PaaS and IaaS	954	705
Hardware support and other	605	675
Services	350	339
New software licenses	56	72
Deferred revenues, current	7,411	7,655
Deferred revenues, non-current (in other non-current liabilities)	519	536
Total deferred revenues	\$ 7,930	\$ 8,191

Deferred software license updates and product support revenues and deferred hardware support revenues represent customer payments made in advance for support contracts that are typically billed on a per annum basis in advance with corresponding revenues being recognized ratably over the support periods. Deferred cloud software as a service (SaaS), platform as a service (PaaS) and infrastructure as a service (IaaS) revenues generally resulted from customer payments made in advance for our cloud-based offerings that are recognized over the corresponding contractual term. Deferred services revenues include prepayments for our services business and revenues for these services are generally recognized as the services are performed. Deferred new software licenses revenues typically resulted from undelivered products or specified enhancements, customer specific acceptance provisions, customer payments made in advance for time-based license arrangements and software license transactions that cannot be separated from undelivered consulting or other services.

In connection with our acquisitions, we have estimated the fair values of the cloud SaaS and PaaS, software license updates and product support, and hardware support obligations, among others, assumed from our acquired companies. We generally have estimated the fair values of these obligations assumed using a cost build-up approach. The cost build-up approach determines fair value by estimating the costs related to fulfilling the obligations plus a normal profit margin. The sum of the costs and operating profit approximates, in theory, the amount that we would be required to pay a third party to assume these acquired obligations. These aforementioned fair value adjustments recorded for obligations assumed from our acquisitions reduced the cloud SaaS and PaaS, software license updates and product support and hardware support deferred revenues balances that we recorded as liabilities from these acquisitions and also reduced the resulting revenues that we recognized or will recognize over the terms of the acquired obligations during the post-combination periods.

9. DERIVATIVE FINANCIAL INSTRUMENTS

Fair Value Hedges Interest Rate Swap Agreements

In July 2014, we entered into certain interest rate swap agreements that have the economic effect of modifying the fixed-interest obligations associated with our \$2.0 billion of 2.25% senior notes due October 2019 (October 2019 Notes) and our \$1.5 billion of 2.80% senior notes due July 2021 (July 2021 Notes) so that the interest

Table of Contents

ORACLE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

November 30, 2016

(Unaudited)

payable on these senior notes effectively became variable based on LIBOR. In July 2013, we entered into certain interest rate swap agreements that have the economic effect of modifying the fixed-interest obligations associated with our \$1.5 billion of 2.375% senior notes due January 2019 (January 2019 Notes) so that the interest payable on these senior notes effectively became variable based on LIBOR. The critical terms of the interest rate swap agreements match the critical terms of the October 2019 Notes, July 2021 Notes and the January 2019 Notes that the interest rate swap agreements pertain to, including the notional amounts and maturity dates.

We have designated the aforementioned interest rate swap agreements as qualifying hedging instruments and are accounting for them as fair value hedges pursuant to ASC 815, *Derivatives and Hedging* (ASC 815). These transactions are characterized as fair value hedges for financial accounting purposes because they protect us against changes in the fair values of certain of our fixed-rate borrowings due to benchmark interest rate movements. The changes in fair values of these interest rate swap agreements are recognized as interest expense in our consolidated statements of operations with the corresponding amounts included in other assets or other non-current liabilities in our consolidated balance sheets. The amount of net gain (loss) attributable to the risk being hedged is recognized as interest expense in our consolidated statements of operations with the corresponding amount included in notes payable, non-current. The periodic interest settlements for the interest rate swap agreements for the October 2019 Notes, July 2021 Notes and the January 2019 Notes are recorded as interest expense and are included as a part of cash flows from operating activities.

We do not use any interest rate swap agreements for trading purposes.

Cash Flow Hedges Cross-Currency Swap Agreements

In connection with the issuance of our 1.25 billion of 2.25% senior notes due January 2021 (January 2021 Notes), we entered into certain cross-currency swap agreements to manage the related foreign currency exchange risk by effectively converting the fixed-rate, Euro-denominated January 2021 Notes, including the annual interest payments and the payment of principal at maturity, to fixed-rate, U.S. Dollar-denominated debt. The economic effect of the swap agreements was to eliminate the uncertainty of the cash flows in U.S. Dollars associated with the January 2021 Notes by fixing the principal amount of the January 2021 Notes at \$1.6 billion with a fixed annual interest rate of 3.53%. We have designated these cross-currency swap agreements as qualifying hedging instruments and are accounting for these as cash flow hedges pursuant to ASC 815. The critical terms of the cross-currency swap agreements correspond to the January 2021 Notes, including the annual interest payments being hedged, and the cross-currency swap agreements mature at the same time as the January 2021 Notes.

We used the hypothetical derivative method to measure the effectiveness of our cross-currency swap agreements. The fair values of these cross-currency swap agreements are recognized as other assets or other non-current liabilities in our consolidated balance sheets. The effective portions of the changes in fair values of these cross-currency swap agreements are reported in accumulated other comprehensive loss in our consolidated balance sheets and an amount is reclassified out of accumulated other comprehensive loss into non-operating income, net in the same period that the carrying value of the Euro-denominated January 2021 Notes is remeasured and the interest expense is recognized. The ineffective portion of the unrealized gains and losses on these cross-currency swaps, if any, is recorded immediately to non-operating income, net. We evaluate the effectiveness of our cross-currency swap agreements on a quarterly basis. We did not record any ineffectiveness for the six months ended November 30, 2016 or 2015. The cash flows related to the cross-currency swap agreements that pertain to the periodic interest settlements are classified as operating activities and the cash flows that pertain to the principal balance are classified as financing activities.

We do not use any cross-currency swap agreements for trading purposes.

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****November 30, 2016****(Unaudited)****Net Investment Hedge Foreign Currency Borrowings**

In July 2013, we designated our 750 million of 3.125% senior notes due July 2025 (July 2025 Notes) as a net investment hedge of our investments in certain of our international subsidiaries that use the Euro as their functional currency in order to reduce the volatility in stockholders' equity caused by the changes in foreign currency exchange rates of the Euro with respect to the U.S. Dollar.

We used the spot method to measure the effectiveness of our net investment hedge. Under this method, for each reporting period, the change in the carrying value of the Euro-denominated July 2025 Notes due to remeasurement of the effective portion is reported in accumulated other comprehensive loss in our consolidated balance sheet and the remaining change in the carrying value of the ineffective portion, if any, is recognized in non-operating income, net in our consolidated statements of operations. We evaluate the effectiveness of our net investment hedge at the beginning of every quarter. We did not record any ineffectiveness for the six months ended November 30, 2016 or 2015.

Foreign Currency Forward Contracts Not Designated as Hedges

We transact business in various foreign currencies and have established a program that primarily utilizes foreign currency forward contracts to offset the risks associated with the effects of certain foreign currency exposures. We neither use these foreign currency forward contracts for trading purposes nor do we designate these forward contracts as hedging instruments pursuant to ASC 815 (refer to Note 11 of Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the fiscal year ended May 31, 2016 for additional information regarding these contracts). As of November 30, 2016 and May 31, 2016, the notional amounts of the forward contracts we held to purchase U.S. Dollars in exchange for other major international currencies were \$2.3 billion and \$2.7 billion, respectively and the notional amount of forward contracts we held to sell U.S. Dollars in exchange for other major international currencies were \$925 million and \$2.0 billion, respectively. The fair values of our outstanding foreign currency forward contracts were nominal as of November 30, 2016 and May 31, 2016. Included in our non-operating income, net were \$15 million and \$21 million of net gains related to these forward contracts for the three and six months ended November 30, 2016, respectively and \$27 million of net losses and \$70 million of net gains for the three and six months ended November 30, 2015. The cash flows related to these foreign currency contracts are classified as operating activities.

The effects of derivative and non-derivative instruments designated as hedges on certain of our consolidated financial statements were as follows as of or for each of the respective periods presented below (amounts presented exclude any income tax effects):

Fair Values of Derivative and Non-Derivative Instruments Designated as Hedges in Condensed Consolidated Balance Sheets

(in millions)	Balance Sheet Location	Fair Value	
		November 30, 2016	May 31, 2016

10. STOCKHOLDERS EQUITY**Common Stock Repurchases**

Our Board of Directors has approved a program for us to repurchase shares of our common stock. As of November 30, 2016, approximately \$6.3 billion remained available for stock repurchases pursuant to our stock repurchase program. We repurchased 62.0 million shares for \$2.5 billion during the six months ended November 30, 2016 (including 0.6 million shares for \$24 million that were repurchased but not settled) and 162.1 million shares for \$6.2 billion during the six months ended November 30, 2015 under the stock repurchase program.

Our stock repurchase authorization does not have an expiration date and the pace of our repurchase activity will depend on factors such as our working capital needs, our cash requirements for acquisitions and dividend payments, our debt repayment obligations or repurchases of our debt, our stock price, and economic and market conditions. Our stock repurchases may be effected from time to time through open market purchases or pursuant to a Rule 10b5-1 plan. Our stock repurchase program may be accelerated, suspended, delayed or discontinued at any time.

Dividends on Common Stock

During the six months ended November 30, 2016, our Board of Directors declared cash dividends of \$0.30 per share of our outstanding common stock, which we paid during the same period.

In December 2016, our Board of Directors declared a quarterly cash dividend of \$0.15 per share of our outstanding common stock. The dividend is payable on January 26, 2017 to stockholders of record as of the close of business on January 5, 2017. Future declarations of dividends and the establishment of future record and payment dates are subject to the final determination of our Board of Directors.

Stock-Based Compensation Expense and Valuations of Stock Awards

During the first half of fiscal 2017, we issued 49 million restricted stock-based awards (consisting of 47 million service-based restricted stock units (RSUs) and 2 million performance-based restricted stock units (PSUs)) and 21 million stock options. Substantially all of the awards were issued as a part of our annual stock-based award process

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****November 30, 2016****(Unaudited)**

or in connection with our acquisitions and are subject to service-based vesting restrictions, with the PSUs also having performance-based vesting restrictions, that are of a similar nature to those described in Note 14 of Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the fiscal year ended May 31, 2016. Approximately 7 million of the 21 million stock options granted during the first half of fiscal 2017 were to our Chief Executive Officers and Chief Technology Officer and had contractual lives of five years versus the ten year contractual lives for most of the other stock options granted. Our fiscal 2017 stock-based award issuances were partially offset by forfeitures and cancellations of 6 million shares during the first half of fiscal 2017.

Stock-based compensation expense is included in the following operating expense line items in our condensed consolidated statements of operations:

(in millions)	Three Months Ended		Six Months Ended	
	November 30, 2016	November 30, 2015	November 30, 2016	November 30, 2015

General and administrative	35	27	72	57
Acquisition related and other	11		11	3
Total stock-based compensation	\$ 327	\$ 254	\$ 646	\$ 507

11. INCOME TAXES

The effective tax rate for the periods presented is the result of the mix of income earned in various tax jurisdictions that apply a broad range of income tax rates. Our provision for income taxes differs from the tax computed at the U.S. federal statutory income tax rate due primarily to certain earnings considered as indefinitely reinvested in foreign operations, state taxes, the U.S. research and development tax credit, settlements with tax authorities and the U.S. domestic production activity deduction. In addition, beginning in fiscal 2017, the provision for income taxes also differs from the tax computed at the U.S. federal statutory tax rate due to the tax effects of stock-based compensation. Our effective tax rate was 24.3% and 23.6% for the three and six months ended November 30, 2016, respectively, and 17.6% and 20.8% for the three and six months ended November 30, 2015, respectively.

Our net deferred tax assets were \$183 million and \$1.1 billion as of November 30, 2016 and May 31, 2016, respectively. We believe that it is more likely than not that the net deferred tax assets will be realized in the foreseeable future. Realization of our net deferred tax assets is dependent upon our generation of sufficient taxable income in future years in appropriate tax jurisdictions to obtain benefit from the reversal of temporary differences, net operating loss carryforwards and tax credit carryforwards. The amount of net deferred tax assets considered realizable is subject to adjustment in future periods if estimates of future taxable income change.

Edgar Filing: ORACLE CORP - Form 10-Q

Domestically, U.S. federal and state taxing authorities are currently examining income tax returns of Oracle and various acquired entities for years through fiscal 2015. Our U.S. federal income tax returns have been examined for all years prior to fiscal 2007, and we are no longer subject to audit for those periods. Our U.S. state income

Table of Contents

ORACLE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

November 30, 2016

(Unaudited)

tax returns, with some exceptions, have been examined for all years prior to fiscal 2004, and we are no longer subject to audit for those periods.

Internationally, tax authorities for numerous non-U.S. jurisdictions are also examining returns affecting our unrecognized tax benefits. With some exceptions, we are generally no longer subject to tax examinations in non-U.S. jurisdictions for years prior to fiscal 1997.

We believe that we have adequately provided under GAAP for outcomes related to our tax audits. However, there can be no assurances as to the possible outcomes or any related financial statement effect thereof. On July 27, 2015, in *Altera Corp. v. Commissioner*, the U.S. Tax Court issued an opinion related to the treatment of stock-based compensation expense in an intercompany cost-sharing arrangement. A final decision has yet to be issued by the Tax Court due to other outstanding issues related to the case. At this time, the U.S. Department of the Treasury has not withdrawn the requirement to include stock-based compensation from its regulations. We have reviewed this case and its impact on Oracle and concluded that no adjustment to the consolidated financial statements is appropriate at this time. We will continue to monitor ongoing developments and potential impacts to our consolidated financial statements.

We are under audit by the IRS and various other domestic and foreign tax authorities with regards to income tax and indirect tax matters and are involved in various challenges and litigation in a number of countries, including, in particular, India, Brazil, and Korea, where the amounts under controversy are significant. In some, although not all, cases, we have reserved for potential adjustments to our provision for income taxes and accrual of indirect taxes that may result from examinations by, or any negotiated agreements with, these tax authorities or final outcomes in judicial proceedings, and we believe that the final outcome of these examinations, agreements or judicial proceedings will not have a material effect on our results of operations. If events occur which indicate payment of these amounts is unnecessary, the reversal of the liabilities would result in the recognition of benefits in the period we determine the liabilities are no longer necessary. If our estimates of the federal, state, and foreign income tax liabilities and indirect tax liabilities are less than the ultimate assessment, it could result in a further charge to expense.

12. SEGMENT INFORMATION

ASC 280, *Segment Reporting*, establishes standards for reporting information about operating segments. Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance. Our chief operating decision makers are our Chief Executive Officers. We are organized geographically and by line of business. While our Chief Executive Officers evaluate results in a number of different ways, the line of business management structure is the primary basis for which the allocation of resources and financial results are assessed.

We have three businesses – cloud and on-premise software, hardware and services – which are further divided into certain operating segments. Our cloud and on-premise software business is comprised of three operating segments: (1) cloud software and on-premise software, which includes our cloud SaaS and PaaS offerings, (2) cloud infrastructure as a service and (3) software license updates and product support. Our hardware business is comprised of two operating segments: (1) hardware products and (2) hardware support. All other operating segments are combined under our services business.

Our cloud software and on-premise software line of business markets, sells and delivers a broad spectrum of application and platform technologies through our SaaS and PaaS offerings, which are certain of our applications and platforms software delivered via a cloud-based information technology (IT) environment that we host, manage and support, and through the licensing of our software products including Oracle Applications, Oracle Database, Oracle Fusion Middleware and Java, among others.

Table of Contents

ORACLE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

November 30, 2016

(Unaudited)

The cloud IaaS line of business includes Oracle Cloud IaaS offerings, which provide infrastructure cloud services that are enterprise-grade, hosted and supported within the Oracle Cloud to perform elastic compute, storage and networking services on a subscription basis; and Oracle Managed Cloud Services, which are comprehensive software and hardware management and maintenance services for customer IT infrastructure for a fee for a stated term that are hosted at our Oracle data center facilities, select partner data centers or physically on-premise at customer facilities.

The software license updates and product support line of business generates revenues through the sale of software support contracts related to new software licenses purchased by our customers. The software license updates and product support line of business provides our on-premise software customers with rights to software product upgrades and maintenance releases, patches released, internet access to technical content, as well as internet and telephone access to technical support personnel during the support period.

The hardware products line of business provides Oracle Engineered Systems, servers, storage, networking, industry-specific hardware, virtualization software, operating systems including the Oracle Solaris Operating System and management software to support diverse IT environments, including cloud computing environments.

Our hardware support line of business provides customers with software updates for the software components that are essential to the functionality of our hardware products, such as Oracle Solaris and certain other software, and can include product repairs, maintenance services and technical support services.

Our services business is comprised of the remainder of our operating segments and offers consulting, advanced customer support services and education services. Our consulting line of business primarily provides services to customers in business and IT strategy alignment, enterprise architecture planning and design, initial product implementation and integration and ongoing product enhancements and upgrades. Advanced customer support services provides on-premise and remote support services to our customers to enable increased performance and higher availability of their Oracle products and services and also include certain other services. Education services provide training to customers, partners and employees as a part of our mission of accelerating the adoption and use of our cloud, on-premise software and hardware offerings.

We do not track our assets by operating segments. Consequently, it is not practical to show assets by operating segment.

Non-operating income, net	99	84	247	114
Income before provision for income taxes	\$ 2,685	\$ 2,668	\$ 5,058	\$ 4,978

⁽¹⁾ Cloud SaaS and PaaS revenues, software license updates and product support revenues and hardware support revenues for management reporting included revenues that would have otherwise been recorded by our acquired businesses as independent entities but were not recognized in our condensed consolidated statements of operations for the periods presented due to business combination accounting requirements.

13. EARNINGS PER SHARE

Basic earnings per share is computed by dividing net income for the period by the weighted-average number of common shares outstanding during the period. Diluted earnings per share is computed by dividing net income for the period by the weighted-average number of common shares outstanding during the period, plus the dilutive effect of outstanding restricted stock-based awards, stock options, and shares issuable under the employee stock purchase plan using the treasury stock method. The following table sets forth the computation of basic and diluted earnings per share:

Edgar Filing: ORACLE CORP - Form 10-Q

(in millions, except per share data)	Three Months Ended November 30,		Six Months Ended November 30,	
	2016	2015	2016	2015
Net income	\$ 2,032	\$ 2,197	\$ 3,864	\$ 3,945
Weighted average common shares outstanding	4,104	4,239	4,112	4,278
Dilutive effect of employee stock plans	91	77	96	86
Dilutive weighted average common shares outstanding	4,195	4,316	4,208	4,364
Basic earnings per share	\$ 0.50	\$ 0.52	\$ 0.94	\$ 0.92
Diluted earnings per share	\$ 0.48	\$ 0.51	\$ 0.92	\$ 0.90
Shares subject to anti-dilutive restricted stock-based awards and stock options excluded from calculation ⁽¹⁾	77	65	74	61

(1) These weighted shares relate to anti-dilutive restricted stock-based awards and stock options as calculated using the treasury stock method and could be dilutive in the future.

14. LEGAL PROCEEDINGS

Hewlett-Packard Company Litigation

On June 15, 2011, Hewlett-Packard Company, now Hewlett Packard Enterprise Company (HP), filed a complaint in the California Superior Court, County of Santa Clara against Oracle Corporation alleging numerous causes of action including breach of contract, breach of the covenant of good faith and fair dealing, defamation, intentional interference with prospective economic advantage, and violation of the California Unfair Business Practices Act. The complaint alleged that when Oracle announced on March 22 and 23, 2011 that it would no longer develop future versions of its software to run on HP's Itanium-based servers, it breached a settlement agreement signed on September 20, 2010 between HP and Mark Hurd (the Hurd Settlement Agreement), who is our Chief Executive Officer and was both HP's former chief executive officer and chairman of HP's board of directors. HP sought a judicial declaration of the parties' rights and obligations under the Hurd Settlement Agreement and other equitable and monetary relief.

Oracle answered the complaint and filed a cross-complaint, which was amended on December 2, 2011. The amended cross-complaint alleged claims including violation of the Lanham Act. Oracle alleged that HP had secretly agreed to pay Intel to continue to develop and manufacture the Itanium microprocessor, and had misrepresented to customers that the Itanium microprocessor had a long roadmap, among other claims. Oracle sought equitable rescission of the Hurd Settlement Agreement, and other equitable and monetary relief.

The court bifurcated the trial and tried HP's causes of action for declaratory relief and promissory estoppel without a jury in June 2012. The court issued a final statement of decision on August 28, 2012, finding that the Hurd Settlement Agreement required Oracle to continue to develop certain of its software products for use on HP's Itanium-based servers and to port such products at no cost to HP for as long as HP sells those servers (the Phase One Ruling). A jury trial began on May 23, 2016. On June 30, 2016, the jury returned a verdict in favor of HP on its claims for breach of contract and breach of the implied covenant of good faith and fair dealing and against Oracle on its claim for violation of the Lanham Act (the Phase Two Jury Verdict). The jury awarded HP damages in the amount of \$3.0 billion, and HP is entitled to post-judgment interest on this award. On August 30, 2016, the court denied HP's motion for pre-judgment interest. Judgment was entered on October 20, 2016. Oracle filed a motion for a new trial on November 14, 2016.

If Oracle's motion for a new trial is denied, Oracle plans to appeal the trial court's Phase One Ruling and Phase Two Jury Verdict. No amounts have been paid or recorded to our results of operations either prior to or subsequent to the Phase One Ruling or Phase Two Jury Verdict. We continue to believe that we have meritorious defenses against HP's claims, and we intend to present these defenses to the appellate court. Among the arguments we expect to make on appeal are the following: the trial court misapplied fundamental principles of contract law and misinterpreted the Hurd Settlement Agreement, including by disregarding the context of the Hurd Settlement Agreement and the evidence of the parties' mutual intentions; that HP's breach of contract claim should fail as a matter of law because HP does not claim and did not prove that Oracle failed to deliver any software under the trial court's interpretation of the contract; that awarding HP both damages for breach of the Hurd Settlement Agreement and specific performance of that agreement constitutes an improper double recovery; and that the damages award is excessive, unsupported by the evidence, and contrary to law. We cannot currently estimate a reasonably possible range of loss for this action due to the complexities and uncertainty surrounding the appeal process and the nature of the claims. Litigation is inherently unpredictable, and the outcome of the appeal process related to this action is uncertain. It is possible that the resolution of this action could have a material impact to our future cash flows and results of operations.

Other Litigation

We are party to various other legal proceedings and claims, either asserted or unasserted, which arise in the ordinary course of business, including proceedings and claims that relate to acquisitions we have completed or to companies we have acquired or are attempting to acquire. While the outcome of these matters cannot be predicted with certainty, we do not believe that the outcome of any of these matters, individually or in the aggregate, will result in losses that are materially in excess of amounts already recognized, if any.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

We begin Management's Discussion and Analysis of Financial Condition and Results of Operations with an overview of our businesses, key operating segments and significant trends. This overview is followed by a summary of our critical accounting policies and estimates that we believe are important to understanding the assumptions and judgments incorporated in our reported financial results. We then provide a more detailed analysis of our results of operations and financial condition.

Business Overview

Oracle Corporation provides products and services that address all aspects of corporate information technology (IT) environments' application, platform and infrastructure. Our Oracle Cloud offerings provide a comprehensive and fully integrated stack of application, platform, compute, storage, and networking services in all three primary layers of the cloud: Software as a Service (SaaS), Platform as a Service (PaaS) and Infrastructure as a Service (IaaS). Our on-premise offerings include Oracle database and middleware software, application software, hardware (Oracle Engineered Systems, servers, storage, networking and industry-specific products), and related support and services. We provide our cloud and on-premise offerings to over 400,000 worldwide customers via deployment models that best suit their needs.

Our comprehensive and fully integrated stack of SaaS, PaaS and IaaS offerings integrate the software, hardware and services on the customers' behalf in IT environments that we deploy, support and manage for the customer. Our integrated Oracle Cloud offerings are designed to be rapidly deployable to enable customers' shorter time to innovation; easily maintainable to reduce integration and testing work; connectable among differing deployment models to enable interchangeability and extendibility between cloud and on-premise IT environments; compatible to easily move workloads between on-premise IT environments and the Oracle Cloud; cost-effective by requiring lower upfront customer investment; and secure, standards-based and reliable. We are a leader in the core technologies of cloud IT environments, including database and middleware software as well as enterprise applications, virtualization, clustering, large-scale systems management and related infrastructure. Our products and services are the building blocks of our Oracle Cloud services, our partners' cloud services and our customers' cloud IT environments.

In addition to providing a broad spectrum of cloud offerings, we develop and sell our products and services to our customers worldwide for use in their global data centers and on-premise IT environments. An important element of our corporate strategy is to continue our investments in, and innovation with respect to, our products and services that we offer through our cloud and on-premise software, hardware and services businesses. We have a deep understanding as to how all components within IT environments' application, platform and infrastructure interact and function with one another. We focus our development efforts on improving the performance, security, operation and integration of these differing technologies to make them more cost-effective and easier to deploy, manage and maintain for our customers and to improve their computing performance relative to our competitors. After the initial purchase of Oracle products and services, our customers can continue to take advantage of our research and development investments and deep IT expertise by purchasing and renewing Oracle support offerings, which may include product enhancements that we periodically deliver to our Oracle E-Business Suite, Siebel, PeopleSoft and JD Edwards application software products, among others, and by renewing their SaaS, PaaS and IaaS contracts with us.

As customers deploy with the Oracle Cloud, many are adopting a hybrid IT model whereby certain of their IT resources are deployed and managed through the Oracle Cloud, while other of their IT resources are deployed and managed on-premise, and both sets of resources can be managed as one. We focus the engineering of our products and services to best connect these different deployment models to enable flexibility, ease, agility, compatibility, extensibility and seamlessness.

A selective and active acquisition program is another important element of our corporate strategy. We believe that our acquisitions enhance the products and services that we can offer to customers, expand our customer base, provide greater scale to accelerate innovation, grow our revenues and earnings, and increase stockholder value. In recent years, we have invested billions of dollars to acquire a number of companies, products, services and technologies that add to, are complementary to, or have otherwise enhanced our existing offerings. On

Table of Contents

November 7, 2016, we acquired NetSuite Inc. (NetSuite), which contributed to the growth in our cloud SaaS and PaaS revenues, among others, from the date of acquisition. Note 2 of Notes to Condensed Consolidated Financial Statements, included elsewhere in this Quarterly Report, provides additional information related to our acquisition of NetSuite. We expect to continue to acquire companies, products, services and technologies to further our corporate strategy.

We have three businesses that deliver our application, platform and infrastructure technologies: cloud and on-premise software, hardware and services. These businesses can be further divided into certain operating segments (Note 12 of Notes to Condensed Consolidated Financial Statements, included elsewhere in this Quarterly Report, provides additional information related to our operating segments). Each of our businesses and operating segments has unique characteristics and faces different opportunities and challenges. An overview of our three businesses and related operating segments follows.

Cloud and On-Premise Software Business

Our cloud and on-premise software business, which represented 79% of our total revenues on a trailing 4-quarter basis, is comprised of three operating segments: (1) cloud software and on-premise software, (2) cloud IaaS and (3) software license updates and product support. On a constant currency basis, we expect that our cloud and on-premise software business total revenues generally will continue to increase due to demand for our on-premise software products and software license updates and product support offerings, including the high percentage of customers that renew their software license updates and product support contracts, expected growth from our cloud SaaS, PaaS and IaaS offerings, and contributions from our acquisitions, which should allow us to grow and continue to make investments in research and development.

Cloud Software and On-Premise Software: Our cloud software and on-premise software line of business markets, sells and delivers a broad spectrum of application and platform technologies through our SaaS and PaaS offerings, which are certain of our software applications and platforms that are delivered via a cloud-based IT environment that we host, manage and support. Our cloud software and on-premise software line of business also licenses our software products including Oracle Applications, Oracle Database, Oracle Fusion Middleware and Java, among others, for on-premise IT environments.

We believe that the comprehensiveness and breadth of our SaaS, PaaS and on-premise software offerings provides greater benefit to our customers and differentiates us from many of our competitors that offer more limited or specialized software offerings. Our SaaS and PaaS offerings are designed to be interoperable with one another, thereby limiting the integration and tuning of multiple cloud applications from multiple vendors. Our SaaS and PaaS offerings are designed to deliver secure data isolation and flexible upgrades, self-service access controls for users, a Service-Oriented Architecture (SOA) for integration with on-premise systems, and a high performance, high availability infrastructure based on our infrastructure technologies including our Oracle Engineered Systems. Our on-premise software offerings are substantially designed to operate on both single server and clustered server configurations for cloud or on-premise IT environments, and to support a choice of operating systems including Oracle Solaris, Oracle Linux, Microsoft Windows and third party UNIX products, among others. Our commitment to industry standards results in software offerings that work in customer environments with Oracle or non-Oracle hardware or software components and that can be adapted to meet specific industry or business needs. We focus the engineering of our products and services to best connect cloud and on-premise deployment models to enable flexibility, ease, agility, compatibility, extensibility and seamlessness. All of these approaches are designed to support customer choice and reduce customer risk. Our customers include businesses of many sizes, government agencies, educational institutions and resellers. We market and sell our cloud software and on-premise software offerings to these customers with a sales force positioned to offer the combinations that best fit customer needs. We enable customers to evolve and transform to substantially any IT environment at whatever pace is most appropriate for them.

Our SaaS and PaaS revenues and new software licenses revenues are affected by the strength of general economic and business conditions, governmental budgetary constraints, the strategy for and competitive position of our software offerings, our acquisitions, our ability to deliver and renew our SaaS and PaaS contracts with our existing customers and foreign currency rate fluctuations. In recent periods, we have placed significant strategic

Table of Contents

emphasis on growing our cloud SaaS and PaaS revenues, which has affected the growth of our cloud SaaS and PaaS revenues and our new software licenses revenues and the related expenses. We expect these trends will continue. Our SaaS and PaaS arrangements are generally one to three years in duration and we strive to renew these contracts when they are eligible for renewal. The substantial majority of our new software license transactions are characterized by long sales cycles and the timing of a few large software license transactions can substantially affect our quarterly new software licenses revenues.

Cloud software and on-premise software revenues represented 26% of our total revenues on a trailing 4-quarter basis. Our cloud software and on-premise software segment's margin has historically trended upward over the course of the four quarters within a particular fiscal year due to the historical upward trend of our new software licenses revenues over those quarterly periods and because the majority of our costs for this segment are predominantly fixed in the short term. As discussed further below under Supplemental Disclosure Related to Certain Charges, our cloud software and on-premise software segment's margin has been and will continue to be affected by the fair value adjustments relating to the cloud SaaS and PaaS obligations that we assumed in our business combinations and by the amortization of intangible assets associated with companies and technologies that we have acquired.

Cloud Infrastructure as a Service: Our cloud IaaS segment, which represented 2% of our total revenues on a trailing 4-quarter basis, provides Oracle Cloud IaaS offerings, which are infrastructure cloud services that are enterprise-grade, hosted and supported within the Oracle Cloud to perform elastic compute, storage and networking services on a subscription basis. Our cloud IaaS segment also offers Oracle Managed Cloud Services, which are comprehensive software and hardware management and maintenance services for customer IT infrastructure for a fee for a stated term that are hosted at our Oracle data center facilities, select partner data centers or physically on-premise at customer facilities. We believe that the introduction of additional Oracle Cloud IaaS offerings complements our SaaS and PaaS offerings and allows us to offer customers additional opportunities to access Oracle technologies through the Oracle Cloud to meet their IT needs.

Software License Updates and Product Support: Software license updates and product support revenues are generated through the sale of software support contracts relating to on-premise new software licenses purchased by our customers. Customers that purchase software license updates and product support are granted rights to unspecified product upgrades and maintenance releases and patches released during the term of the support period, as well as technical support assistance. Our software license updates and product support contracts are generally one year in duration. Substantially all of our on-premise software license customers renew their software license updates and product support contracts annually. The growth of software license updates and product support revenues is primarily influenced by four factors: (1) the percentage of our software support contract customer base that renews its software support contracts, (2) the amount of new software license revenues sold, (3) the amount of new software support contracts sold in connection with the sale of new software licenses and (4) the amount of software support contracts assumed from companies we have acquired.

Our software license updates and product support segment, which represented 51% of our total revenues on a trailing 4-quarter basis, is our highest margin business unit. Our software support margins over the trailing 4-quarters were 93% and accounted for 87% of our total margins over the same period. Over the longer term, we believe that software license updates and product support revenues and margins will grow for the following reasons:

substantially all of our on-premise new software license customers, including customers from acquired companies, renew their software support contracts when eligible for renewal;

substantially all of our customers purchase software license updates and product support contracts when they buy new software licenses, resulting in a further increase in our software support contract base. Even if new software licenses revenues growth was flat, software license updates and product support revenues would continue to grow in comparison to the corresponding prior year periods assuming contract renewal and cancellation rates and foreign currency rates remained relatively constant, since substantially all new software licenses transactions result in the sale of software license updates and product support contracts, which add to our software support contract base; and

our acquisitions have increased our software support contract base, as well as the portfolio of products available to be licensed and supported.

Table of Contents

Hardware Business

Our hardware business is comprised of two operating segments: (1) hardware products and (2) hardware support. Our hardware business represented 12% of our total revenues on a trailing 4-quarter basis. We expect our hardware business to have lower operating margins as a percentage of revenues than our cloud and on-premise software business due to the incremental costs we incur to produce and distribute these products and to provide support services, including direct materials and labor costs. We expect to make investments in research and development to improve existing hardware products and services and to develop new hardware products and services.

Hardware Products: We provide a broad selection of hardware and related services, including Oracle Engineered Systems, servers, storage, networking, workstations and related devices, industry-specific hardware, virtualization software, operating systems, and management software to support diverse IT environments, including cloud computing environments. We engineer our hardware products with virtualization and management capabilities to enable the rapid deployment and efficient management of cloud and on-premise IT infrastructures. Our hardware products support many of the world's largest cloud infrastructures, including the Oracle Cloud.

Our hardware products are designed to be easier to deploy, manage and maintain for our customers and to improve computing performance relative to our competitors' offerings. We design our hardware products to seamlessly connect cloud and on-premise IT environments to further enable interoperability, interchangeability and extendibility and to work in customer environments that may include other Oracle or non-Oracle hardware or software components. Our flexible and open approach provides Oracle customers with a broad range of choices in how they deploy our hardware products, which we believe is a priority for our customers.

Oracle Engineered Systems are core to our hardware offerings and are important elements of our data center and cloud computing offerings including the Oracle Cloud. These pre-integrated products are designed to integrate multiple Oracle technology components to work together to deliver improved performance, availability, security and operational efficiency relative to our competitors' products; to be upgraded effectively and efficiently; and to simplify maintenance cycles by providing a single solution for software patching. Oracle Engineered Systems are tested before they are shipped to customers and delivered ready-to-run, enabling customers to shorten deployment time to production. We offer certain of our Oracle Engineered Systems technologies through flexible deployment options including as a cloud service and for on-premise IT environments.

We offer a wide range of server products using our SPARC microprocessor. Our SPARC servers run the Oracle Solaris operating system and are designed to be differentiated by their reliability, security and scalability. Our mid-size and large servers are designed to offer better performance and lower total cost of ownership than competitive UNIX systems for business critical applications, for customers having more computationally intensive needs, and as platforms for building cloud computing IT environments. Our SPARC servers are also a core component of the Oracle SuperCluster, one of our Oracle Engineered Systems.

We also offer enterprise x86 servers. These x86 servers are based on microprocessors from Intel Corporation and are compatible with Oracle Solaris, Oracle Linux, Microsoft Windows and other operating systems. Our x86 servers are also a core component of many of our Oracle Engineered Systems including the Oracle Exadata Database Machine, Oracle Exalogic Elastic Cloud, Oracle Exalytics In-Memory Machine and the Oracle Big Data Appliance.

Our storage products are engineered for the cloud and designed to securely store, manage, protect, archive, backup and recover customers mission critical data assets. Our storage products consist of disk, flash, tape, virtual tape and hardware-related software including file systems software, back-up and archive software, hierarchical storage management software and networking for mainframe and heterogeneous systems environments. We also offer certain of our storage offerings as a cloud service.

Our networking and data center fabric products, including Oracle Virtual Networking, and Oracle InfiniBand and Ethernet technologies, are used with our server and storage products and are integrated into our management tools to help enterprise customers improve infrastructure performance, reduce cost and complexity and simplify storage and server connectivity.

Table of Contents

We offer hardware products and services designed for certain specific industries. Our point-of-sale hardware offerings include point-of-sale terminals and related hardware that are designed for managing businesses within the food and beverage, hotel and retail industries, among others. Our hardware products and services for communications networks include network signaling, policy control and subscriber data management solutions, and session border control technology, among others.

The majority of our hardware products are sold through indirect channels, including independent distributors and value-added resellers.

To produce our hardware products, we rely on both our internal manufacturing operations as well as third party manufacturing partners. Our internal manufacturing operations consist primarily of materials procurement, assembly, testing and quality control of our Oracle Engineered Systems and certain of our enterprise and data center servers and storage products. For all other manufacturing, we generally rely on third party manufacturing partners to produce our hardware-related components and hardware products and we may involve our internal manufacturing operations in the final assembly, testing and quality control processes for these components and products. We distribute most of our hardware products either from our facilities or partner facilities. We strive to reduce costs by simplifying our manufacturing processes through increased standardization of components across product types and a build-to-order manufacturing process in which products generally are built only after customers have placed firm orders.

Our hardware products revenues, cost of hardware products and hardware operating margins that we report are affected by our strategy for and the competitive position of our hardware products, the strength of general economic and business conditions, governmental budgetary constraints, certain of our acquisitions and foreign currency rate fluctuations.

Our quarterly hardware products revenues are difficult to predict. The timing of customer orders and delays in our ability to timely manufacture or deliver a few large hardware transactions, among other factors, could substantially affect the amount of hardware products revenues, expenses and operating margins that we report.

Hardware Support: Our hardware support offerings provide customers with software updates for software components that are essential to the functionality of our hardware products, such as Oracle Solaris and certain other software products, and can include product repairs, maintenance services and technical support services. Typically, our hardware support contract arrangements are priced as a percentage of the net hardware products fees, are invoiced to the customer at the beginning of the support period and are one year in duration. We continue to evolve hardware support processes that are intended to proactively identify and solve quality issues and to increase the amount of new and renewed hardware support contracts sold in connection with the sales of our hardware products. Our hardware support revenues that we report are influenced by a number of factors, including the volume of purchases of hardware products, the pricing and mix of hardware products purchased, whether customers decide to purchase hardware support contracts at or in close proximity to the time of hardware product sale, the percentage of our hardware support contract customer base that renews its support contracts and our acquisitions. Substantially all of these factors are heavily influenced by our customers' decisions to either maintain or upgrade their existing hardware infrastructure to newly developed technologies that are available.

Services Business

Our services business, which represented 9% of our total revenues on a trailing 4-quarter basis, is comprised of the remainder of our operating segments. Our services business has lower margins than our cloud and on-premise software and hardware businesses. Our services revenues are impacted by our strategy for and the competitive position of our services, certain of our acquisitions, general economic conditions, governmental budgetary constraints, personnel reductions in our customers' IT departments, tighter controls over discretionary spending, our strategic emphasis on growing our cloud revenues and the growth in our software and hardware offerings. Our services business' offerings include:

consulting services that are designed to help our customers and global system integrator partners more successfully architect and deploy our offerings, including IT strategy alignment, enterprise architecture planning and design, initial cloud and software implementation and integration, and ongoing software

Table of Contents

enhancements and upgrades. We utilize a global, blended delivery model to optimize value for our customers and partners, consisting of on-premise consultants from local geographies, industry specialists and consultants from our global delivery and solution centers;

advanced customer support services, which are provided on-premise and remotely to our customers to enable increased performance and higher availability of their Oracle products and services and also include certain other services; and

education services for Oracle products and services, including training and certification programs that are offered to customers, partners and employees through a variety of formats, including instructor-led classes at our education centers, live virtual training, self-paced online training, private events and custom training.

Acquisitions

A selective and active acquisition program is another important element of our corporate strategy. In recent years, we have invested billions of dollars to acquire a number of complementary companies, products, services and technologies.

We have acquired certain companies and technologies during the fiscal 2017 and 2016 periods presented in this Quarterly Report, including NetSuite. Note 2 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report provides additional information related to our recent acquisitions.

We believe that our acquisition program strengthens our competitive position, enhances the products and services that we can offer to customers, expands our customer base, provides greater scale to accelerate innovation, grows our revenues and earnings and increases stockholder value. We expect to continue to acquire companies, products, services and technologies in furtherance of our corporate strategy.

We believe that we can fund our pending and future acquisitions with our internally available cash, cash equivalents and marketable securities, cash generated from operations, additional borrowings or from the issuance of additional securities. We estimate the financial impact of any potential acquisition with regard to earnings, operating margin, cash flow and return on invested capital targets before deciding to move forward with an acquisition.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP) as set forth in the Financial Accounting Standards Board's (FASB) Accounting Standards Codification (ASC), and we consider the various staff accounting bulletins and other applicable guidance issued by the U.S. Securities and Exchange Commission. GAAP, as set forth within the ASC, requires us to make certain estimates, judgments and assumptions. We believe that the estimates, judgments and assumptions upon which we rely are reasonable based upon information available to us at the time that these estimates, judgments and assumptions are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements as well as the reported amounts of revenues and expenses during the periods presented. To the extent that there are differences between these estimates, judgments or assumptions and actual results, our financial statements will be affected. The accounting policies that reflect our more significant estimates, judgments and assumptions and which we believe are the most critical to aid in fully understanding and evaluating our reported financial results include:

Revenue Recognition;

Business Combinations;

Goodwill and Intangible Assets Impairment Assessments;

Accounting for Income Taxes; and

Legal and Other Contingencies.

Table of Contents

In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application. There are also areas in which management's judgment in selecting among available alternatives would not produce a materially different result. Our senior management has reviewed our critical accounting policies and related disclosures with the Finance and Audit Committee of the Board of Directors.

During the first half of fiscal 2017, there were no significant changes to our critical accounting policies and estimates. Management's Discussion and Analysis of Financial Condition and Results of Operations contained in Part II, Item 7 of our Annual Report on Form 10-K for our fiscal year ended May 31, 2016 provides a more complete discussion of our critical accounting policies and estimates.

Results of Operations

Impact of Acquisitions

The comparability of our operating results in the second quarter and first half of fiscal 2017 compared to the same periods of fiscal 2016 was impacted by our recent acquisitions. In our discussion of changes in our results of operations from the second quarter and first half of fiscal 2017 compared to the same periods of fiscal 2016, we may qualitatively disclose the impact of our acquired products and services for the one-year period subsequent to the acquisition date to the growth in certain of our operating segments' revenues where such qualitative discussions would be meaningful for an understanding of the factors that influenced the changes in our results of operations. When material, we may also provide quantitative disclosures related to such acquired products and services. Expense contributions from our recent acquisitions for each of the respective period comparisons generally were not separately identifiable due to the integration of these businesses and operating segments into our existing operations, and/or were insignificant to our results of operations during the periods presented.

We caution readers that, while pre- and post-acquisition comparisons, as well as any quantified amounts themselves, may provide indications of general trends, any acquisition information that we provide has inherent limitations for the following reasons:

any qualitative and quantitative disclosures cannot specifically address or quantify the substantial effects attributable to changes in business strategies, including our sales force integration efforts. We believe that if our acquired companies had operated independently and sales forces had not been integrated, the relative mix of products and services sold would have been different; and

although substantially all of our on-premise software license customers, including customers from acquired companies, renew their software license updates and product support contracts when the contracts are eligible for renewal, and we strive to renew cloud SaaS and PaaS contracts and hardware support contracts, the amounts shown as cloud SaaS and PaaS deferred revenues, software license updates and product support deferred revenues, and hardware support deferred revenues in our Supplemental Disclosure Related to Certain Charges (presented below) are not necessarily indicative of revenue improvements we will achieve upon contract renewals to the extent customers do not renew.

For purposes of presentation of amortization of intangible assets within our condensed consolidated statements of operations included elsewhere in this Quarterly Report, we present a single line item within operating expenses and provide appropriate supplemental footnote disclosure. With respect to the presentation and discussion of our segments' results for the periods presented, we have assigned the amortization of our intangible assets to the lines of business to which such amortization pertains and also have provided a discussion and presentation of comparative movements for such amortization amounts in totality.

Seasonality

Our quarterly revenues have historically been affected by a variety of seasonal factors, including the structure of our sales force incentive compensation plans, which are common in the technology industry. In each fiscal year, our total revenues and operating margins are typically highest in our fourth fiscal quarter and lowest in our first

Table of Contents

fiscal quarter. The operating margins of our businesses, in particular, our cloud software and on-premise software segment, are generally affected by seasonal factors in a similar manner as our revenues as certain expenses within our cost structure are relatively fixed in the short term.

Constant Currency Presentation

Our international operations have provided and are expected to continue to provide a significant portion of each of our segments' revenues and expenses. As a result, each segment's revenues and expenses and our total revenues and expenses will continue to be affected by changes in the U.S. Dollar against major international currencies. In order to provide a framework for assessing how our underlying businesses performed excluding the effects of foreign currency rate fluctuations, we compare the percent change in the results from one period to another period in this Quarterly Report using constant currency disclosure. To present this information, current and comparative prior period results for entities reporting in currencies other than U.S. Dollars are converted into U.S. Dollars at constant exchange rates (i.e., the rates in effect on May 31, 2016, which was the last day of our prior fiscal year) rather than the actual exchange rates in effect during the respective periods. For example, if an entity reporting in Euros had revenues of 1.0 million Euros from products sold on November 30, 2016 and 2015, our financial statements would reflect reported revenues of \$1.05 million in the first half of fiscal 2017 (using 1.05 as the month-end average exchange rate for the period) and \$1.06 million in the first half of fiscal 2016 (using 1.06 as the month-end average exchange rate for the period). The constant currency presentation, however, would translate the results for the three and six months ended November 30, 2016 and 2015 using the May 31, 2016 exchange rate and indicate, in this example, no change in revenues during the period. In each of the tables below, we present the percent change based on actual, unrounded results in reported currency and in constant currency.

Total Revenues and Operating Expenses

(Dollars in millions)	Three Months Ended November 30,				Six Months Ended November 30,			
	2016	Percent Change		2015	2016	Percent Change		2015
		Actual	Constant			Actual	Constant

(2) The Asia Pacific region includes Japan

Table of Contents

Fiscal Second Quarter 2017 Compared to Fiscal Second Quarter 2016: Excluding the effects of foreign currency rate variations, our total revenues increased in the second quarter of fiscal 2017 due to growth in our cloud and on-premise software revenues, which was attributable to growth in our SaaS, PaaS and IaaS revenues, growth in our software license updates and product support revenues, and revenue contributions from our recent acquisitions and was partially offset by decreases in our new software licenses revenues. The increase in our cloud and on-premise software business revenues was partially offset by a constant currency decrease in our hardware business revenues. Excluding the effects of currency rate fluctuations, the EMEA and Asia Pacific regions contributed to the growth in our total revenues during the second quarter of fiscal 2017, while the Americas region was flat.

Excluding the effects of foreign currency rate variations, our total operating expenses were flat during the second quarter of fiscal 2017 relative to the prior year period. We incurred certain expense increases during the second quarter of fiscal 2017 including higher sales and marketing and research and development expenses due primarily to increased headcount, increased cloud SaaS, PaaS and IaaS expenses resulting primarily from increased headcount and infrastructure expenses to support the increase in our cloud SaaS, PaaS and IaaS revenues, and higher general and administrative expenses due primarily to higher third party legal fees. These constant currency expense increases in the second quarter of fiscal 2017 were offset by decreased hardware products expenses due to lower hardware products revenues, decreased software support and hardware support costs due primarily to lower headcount and decreased expenses associated with certain of our intangible assets that became fully amortized.

In constant currency, our total operating margin and total operating margin as a percentage of revenues increased during the second quarter of fiscal 2017 due to the increase in our total revenues.

First Half Fiscal 2017 Compared to First Half Fiscal 2016: Excluding the effects of unfavorable currency rate variations, our total revenues increased in the first half of fiscal 2017 due to growth in our cloud and on-premise software revenues, which was attributable to similar reasons as those noted above, and was partially offset by decreases in our hardware business and services business revenues. In constant currency, the Americas region contributed 30%, the EMEA region contributed 32% and the Asia Pacific region contributed 38% to the growth in our total revenues during the first half of fiscal 2017.

Excluding the effects of favorable currency rate variations, our total operating expenses increased during the first half of fiscal 2017. Our constant currency sales and marketing, research and development, cloud SaaS, PaaS and IaaS, and general and administrative expenses increased during the first half of fiscal 2017, all generally for similar reasons as noted above, and were partially offset by lower hardware products expenses, software support expenses, hardware support expenses and intangible asset amortization, which were also generally attributable to the reasons noted above.

In constant currency, our total operating margin and total operating margin as a percentage of revenues increased during the first half of fiscal 2017 due to the increase in our total revenues.

Supplemental Disclosure Related to Certain Charges

To supplement our consolidated financial information, we believe that the following information is helpful to an overall understanding of our past financial performance and prospects for the future. You should review the introduction under **Impact of Acquisitions** (above) for a discussion of the inherent limitations in comparing pre- and post-acquisition information.

Table of Contents

Our operating results included the following business combination accounting adjustments and expenses related to acquisitions, as well as certain other expense and income items:

(in millions)	Three Months Ended		Six Months Ended	
	November 30, 2016	November 30, 2015	November 30, 2016	November 30, 2015
Cloud software as a service and platform as a service deferred revenues ⁽¹⁾	\$ 34	\$ 3	\$ 52	\$ 4
Software license updates and product support deferred revenues ⁽¹⁾	1		1	1
Hardware support deferred revenues ⁽¹⁾				1
Acquired deferred sales commissions amortization ⁽²⁾	(9)		(9)	
Amortization of intangible assets ⁽³⁾	302	423	613	875
Acquisition related and other ⁽⁴⁾⁽⁶⁾	40	(7)	54	25
Restructuring ⁽⁵⁾	86	95	185	178
Stock-based compensation ⁽⁶⁾	316	254	635	504
Income tax effects ⁽⁷⁾	(228)	(230)	(486)	(451)
	\$ 542	\$ 538	\$ 1,045	\$ 1,137

(1) In connection with our acquisitions, we have estimated the fair values of the cloud SaaS and PaaS subscriptions, software support and hardware support obligations assumed. Due to our application of business combination accounting rules, we did not recognize the cloud SaaS and PaaS, software license updates and product support and hardware support revenue amounts as presented in the above table that would have otherwise been recorded by the acquired businesses as independent entities upon delivery of the contractual obligations. To the extent customers to which these contractual obligations pertain renew these contracts with us, we expect to recognize revenues for the full contracts' values over the respective contracts' renewal periods.

(2) Certain acquired companies capitalized sales commissions associated with subscription agreements and amortized these amounts over the related contractual terms. Business combination accounting rules generally require us to eliminate these capitalized sales commissions balances as of the acquisition date and our post-combination GAAP sales and marketing expenses generally do not reflect the amortization of these deferred sales commissions balances. This adjustment is intended to include, and thus reflect, the full amount of amortization related to such balances as though the acquired companies operated independently in the periods presented.

(3) Represents the amortization of intangible assets, substantially all of which were acquired in connection with our acquisitions. As of November 30, 2016, estimated future amortization expenses related to intangible assets were as follows (in millions):

Remainder of fiscal 2017	\$ 723
Fiscal 2018	1,331
Fiscal 2019	1,222
Fiscal 2020	1,035
Fiscal 2021	861
Fiscal 2022	758
Thereafter	2,038
Total intangible assets, net	\$ 7,968

(4) Acquisition related and other expenses primarily consist of personnel related costs and stock-based compensation expenses for transitional and certain other employees, integration related professional services, certain business combination adjustments including certain adjustments after the measurement period has ended and certain other operating items, net.

Edgar Filing: ORACLE CORP - Form 10-Q

- (5) Restructuring expenses during the first half of fiscal 2017 primarily related to employee severance in connection with our Fiscal 2017 Oracle Restructuring Plan (2017 Restructuring Plan). Restructuring expenses during the first half of fiscal 2016 primarily related to costs incurred pursuant to our 2015 Oracle Restructuring Plan (2015 Restructuring Plan). Additional information regarding certain of our restructuring plans is provided in Note 7 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report and in Note 9 of Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the fiscal year ended May 31, 2016.

Table of Contents

(6) Stock-based compensation was included in the following operating expense line items of our condensed consolidated statements of operations (in millions):

	Three Months Ended		Six Months Ended	
	November 30,		November 30,	
	2016	2015	2016	2015
Sales and marketing	\$ 68	\$ 55	\$ 133	\$ 107
Cloud software as a service and platform as a service	6	4	11	8
Cloud infrastructure as a service	1	1	2	2
Software license updates and product support	6	6	12	12
Hardware products	2	2	4	3
Hardware support	1	1	2	3
Services	9	7	17	14
Research and development	188	151	382	298
General and administrative	35	27	72	57
Subtotal	316	254	635	504
Acquisition related and other	11		11	3
Total stock-based compensation	\$ 327	\$ 254	\$ 646	\$ 507

(7) The income tax effects presented were calculated as if the above described charges were not included in our results of operations for each of the respective periods presented. Income tax effects for the second quarter and first half of fiscal 2017 were calculated based on the applicable jurisdictional tax rates applied to the items within the table above and resulted in effective tax rates of 25.5% and 25.5%, respectively, instead of 24.3% and 23.6%, respectively, which represented our effective tax rates as derived per our condensed consolidated statements of operations, primarily due to the net tax effects of acquisition related items, including the tax effects of amortization of intangible assets and the net tax effects of stock-based compensation. Income tax effects for the second quarter and first half of fiscal 2016 were calculated reflecting effective tax rates of 20.4% and 22.6%, respectively, instead of 17.6% and 20.8%, respectively, which represented our effective tax rates as derived per our condensed consolidated statements of operations, primarily due to the net tax effects of acquisition related items, including the tax effects of amortization of intangible assets.

Cloud and On-Premise Software Business

Our cloud and on-premise software business consists of our cloud software and on-premise software segment, our cloud IaaS segment and our software license updates and product support segment.

Cloud Software and On-Premise Software: Our cloud software and on-premise software segment engages in the sale, marketing and delivery of our cloud software offerings, including our cloud SaaS and PaaS offerings, and the licensing of our software for on-premise IT environments. Our cloud SaaS and PaaS offerings grant customers access to a broad range of our application and platform software technologies on a subscription basis in a secure, standards-based, cloud computing environment that generally includes access, hosting, infrastructure management, the use of software updates, and support. New software licenses revenues represent fees earned from granting customers licenses to use our database and middleware and our application software products within on-premise IT environments. We continue to place significant emphasis, both domestically and internationally, on direct sales through our own sales force. We also continue to market our products through indirect channels. Costs associated with our cloud software and on-premise software segment are included in sales and marketing expenses, cloud SaaS and PaaS expenses and amortization of intangible assets. These costs are largely personnel related and include commissions earned by our sales force for the sale of our software offerings, marketing program costs, the cost of providing our cloud SaaS and PaaS offerings and the amortization of intangible assets including developed technology, customer contracts and customer relationship intangibles.

(1) Excluding stock-based compensation

(2) Included as a component of Amortization of Intangible Assets in our condensed consolidated statements of operations

Excluding the effects of currency rate fluctuations, total revenues from our cloud software and on-premise software segment increased by 4 and 8 percentage points in the second quarter and first half of fiscal 2017, respectively, relative to the corresponding prior year periods due to growth in our cloud SaaS and PaaS revenues and revenue contributions from our recent acquisitions, and were partially offset by decreases in our new software licenses revenues. The increases in our cloud SaaS and PaaS revenues and decreases in our new software licenses revenues during the fiscal 2017 periods presented were primarily due to the continued strategic emphasis placed on selling, marketing and growing our cloud software offerings and we expect these revenue trends will continue. For the second quarter of fiscal 2017, the Americas and Asia Pacific regions contributed to the constant currency growth in our total revenues for this segment and were partially offset by a slight decline in revenues in the EMEA region. For the first half of fiscal 2017, the Americas, EMEA and Asia Pacific regions contributed 49%, 23%, and 28%, respectively, to the constant currency growth in our total revenues for this segment.

In reported currency, new software licenses revenues earned from transactions of \$3 million or greater decreased by 17% and 11% in the second quarter and first half of fiscal 2017, respectively, and represented 26% and 24% of our new software licenses revenues in the second quarter and first half of fiscal 2017, respectively, in comparison to 25% and 23% in the second quarter and first half of fiscal 2016, respectively.

In constant currency, total cloud software and on-premise software expenses increased in the fiscal 2017 periods presented primarily due to higher employee related expenses from increased headcount and higher cloud SaaS and PaaS expenses incurred to support the related revenues increases.

Excluding the effects of currency rate fluctuations, our cloud software and on-premise software segment's total margin and total margin as a percentage of revenues decreased in the fiscal 2017 periods presented as our total expenses grew at a faster rate than our total revenues for this

segment.

Table of Contents

Cloud Infrastructure as a Service: Our cloud IaaS segment includes Oracle Cloud IaaS and Oracle Managed Cloud Services offerings. Oracle Cloud IaaS provides infrastructure cloud services that are enterprise-grade, hosted and supported within the Oracle Cloud to perform elastic compute, storage and networking services on a subscription basis. Oracle Managed Cloud Services are comprehensive software and hardware management and maintenance services for customer IT infrastructure for a fee for a stated term that are hosted at our Oracle data center facilities, select partner data centers or physically on-premise at customer facilities. Our cloud IaaS segment's expenses consist primarily of personnel related expenditures, technology infrastructure expenditures and facilities costs. Operating expenses associated with our IaaS offerings also include sales and marketing expenses, which are largely personnel related, and amortization of intangible assets. For the fiscal 2016 periods presented, our cloud IaaS segment's revenues and expenses were substantially attributable to our Oracle Managed Cloud Services offerings.

⁽¹⁾ Excluding stock-based compensation

⁽²⁾ Included as a component of Amortization of Intangible Assets in our condensed consolidated statements of operations

Excluding the effects of unfavorable currency rate fluctuations, our total cloud IaaS segment revenues increased in the fiscal 2017 periods presented due to growth in our Oracle Cloud IaaS offerings. Excluding the effects of currency rate fluctuations, the Americas region contributed 31% and 55%, respectively, the EMEA region contributed 41% and 23%, respectively, and the Asia Pacific region contributed 28% and 22%, respectively, to the increases in our total cloud IaaS segment revenues during the second quarter and first half of fiscal 2017, respectively.

On a constant currency basis, our cloud IaaS segment's total expenses increased during the fiscal 2017 periods presented primarily due to higher technology infrastructure expenses to support the increase in our cloud IaaS revenues.

Excluding the effects of currency rate fluctuations, total margin and total margin as a percentage of total revenues decreased during the fiscal 2017 periods presented as total expenses increased at a faster rate than our total revenues for this segment.

Software License Updates and Product Support: Software license updates and product support revenues are typically generated through the sale of software support contracts related to on-premise new software licenses purchased by our customers. Our software license updates and product support offerings include software license updates, which grant on-premise software customers rights to unspecified product upgrades and maintenance releases and patches released during the support period, and product support including internet access to

Table of Contents

technical content as well as internet and telephone access to technical support personnel in our global support centers. Expenses associated with our software license updates and product support line of business include the cost of providing the support services, largely personnel related expenses, and the amortization of our intangible assets associated with software support contracts and customer relationships obtained from acquisitions.

(1) Excluding stock-based compensation

(2) Included as a component of Amortization of Intangible Assets in our condensed consolidated statements of operations. Excluding the effects of currency rate fluctuations, software license updates and product support revenues increased in the fiscal 2017 periods presented as a result of substantially all customers electing to purchase software support contracts in conjunction with their new software licenses purchased during the trailing 4-quarter period, and due to the renewal of substantially all of the software support customer base eligible for renewal during the trailing 4-quarter period. Excluding the effects of currency rate fluctuations, the Americas region contributed 40% and 41%, respectively, the EMEA region contributed 28% and 28%, respectively, and the Asia Pacific region contributed 32% and 31%, respectively, to the increase in software license updates and product support revenues during the second quarter and first half of fiscal 2017, respectively.

In constant currency, total software license updates and product support expenses decreased during the fiscal 2017 periods presented due primarily to lower employee related expenses resulting from lower headcount and a reduction in expenses associated with certain of our intangible assets that became fully amortized.

In constant currency, total margin and margin as a percentage of revenues increased during the fiscal 2017 periods presented due to the growth in total revenues and the decrease in total expenses for this segment.

Table of Contents**Hardware Business**

Our hardware business consists of our hardware products segment and hardware support segment.

Hardware Products: Hardware products revenues are primarily generated from the sales of our Oracle Engineered Systems, computer server, storage, networking, workstations and related devices and industry-specific hardware products. We market and sell our hardware products through our direct sales force and indirect channels such as independent distributors and value-added resellers. Operating expenses associated with our hardware products include the cost of hardware products, which consists of expenses for materials and labor used to produce these products by our internal manufacturing operations or by third party manufacturers, warranty expenses and the impact of periodic changes in inventory valuation, including the impact of inventory determined to be excess and obsolete. Operating expenses associated with our hardware products also include sales and marketing expenses, which are largely personnel related and include variable compensation earned by our sales force for the sales of our hardware products, and amortization of intangible assets.

(1) Excluding stock-based compensation

(2) Included as a component of Amortization of Intangible Assets in our condensed consolidated statements of operations. Excluding the effects of currency rate fluctuations, total hardware products revenues decreased in the fiscal 2017 periods presented primarily due to reductions in sales volumes of certain of our product lines, including lower margin products, partially offset by growth in certain of our Oracle Engineered Systems. On a constant currency basis, hardware products revenues generally declined across all regions during the fiscal 2017 periods presented with the exception of the EMEA region during the second quarter of fiscal 2017, which grew modestly.

Excluding the effects of currency rate fluctuations, total hardware products expenses decreased in the fiscal 2017 periods presented due primarily to lower hardware products costs associated with lower hardware products revenues, and due to a reduction in expenses associated with certain of our intangible assets that became fully amortized.

For the second quarter of fiscal 2017, total margin and total margin as a percentage of revenues for this segment increased on a constant currency basis primarily due to the total expense reductions for this segment. For the first half of fiscal 2017, total margin and total margin as a

Edgar Filing: ORACLE CORP - Form 10-Q

percentage of revenues for this segment decreased on a constant currency basis primarily due to the decrease in our total revenues for this segment.

Table of Contents

Hardware Support: Our hardware support offerings provide customers with software updates for software components that are essential to the functionality of our hardware products, such as Oracle Solaris and certain other software, and can include product repairs, maintenance services and technical support services. Expenses associated with our hardware support operating segment include the cost of materials used to repair customer products, the cost of providing support services, largely personnel related expenses, and the amortization of our intangible assets primarily associated with hardware support contracts and customer relationships obtained from our acquisitions.

⁽¹⁾ Excluding stock-based compensation

⁽²⁾ Included as a component of Amortization of Intangible Assets in our condensed consolidated statements of operations

Excluding the effects of currency rate fluctuations, hardware support revenues decreased in the fiscal 2017 periods presented primarily due to reductions in sales volumes of certain of our hardware product lines for which we offer hardware support. On a constant currency basis, hardware support revenues declined across all regions during the fiscal 2017 periods presented.

Excluding the effects of currency rate fluctuations, total hardware support expenses decreased in the fiscal 2017 periods presented primarily due to lower employee related expenses resulting from lower headcount and a reduction in expenses associated with certain of our intangible assets that became fully amortized.

In constant currency, total hardware support margin and margin as a percentage of total revenues increased in the fiscal 2017 periods presented primarily due to the total expense reductions for this segment.

Services Business

Our services business consists of consulting, advanced customer support services and education services. Consulting revenues are earned by providing services to customers in business and IT strategy alignment, enterprise architecture planning and design, initial software implementation and integration, and ongoing software enhancements and upgrades. Advanced customer support services are provided on-premise and remotely to our customers to enable increased performance and higher availability of their Oracle products and services and also include certain other services. Education revenues are earned by providing instructor-led, live virtual training, self-paced online training, private events and custom training in the use of our cloud, on-premise software and hardware offerings. The cost of providing our services consists

Edgar Filing: ORACLE CORP - Form 10-Q

primarily of personnel related expenses, technology infrastructure expenditures, facilities expenses and external contractor expenses.

(2) Included as a component of Amortization of Intangible Assets in our condensed consolidated statements of operations

Fiscal Second Quarter 2017 Compared to Fiscal Second Quarter 2016: Excluding the effects of currency rate fluctuations, our total services revenues were flat in the second quarter of fiscal 2017. Constant currency increases in our consulting and advanced customer services revenues during the second quarter of fiscal 2017, which were primarily attributable to revenue contributions from our recent acquisitions were, offset by decreases in our education revenues. On a constant currency basis, services revenues growth in the EMEA region during the second quarter of fiscal 2017 was offset by services revenues declines in the Americas and Asia Pacific regions.

In constant currency, total services expenses increased during the second quarter of fiscal 2017 primarily due to a modest increase in expenses associated with our consulting segment, which were primarily attributable to expense contributions from our recent acquisitions.

In constant currency, total services margin and total margin as a percentage of total services revenues decreased in the second quarter of fiscal 2017 primarily due to the increase in total expenses associated with this segment.

First Half Fiscal 2017 Compared to First Half Fiscal 2016: Excluding the effects of currency rate fluctuations, our total services revenues declined in the first half of fiscal 2017 primarily due to decreases in our consulting and education revenues, partially offset by increases in our advanced customer support revenues and revenue contributions from our recent acquisitions. On a constant currency basis, services revenues growth in the EMEA region during the first half of fiscal 2017 was offset by services revenue declines in the Americas and Asia Pacific regions.

In constant currency, our total services expenses increased in the first half of fiscal 2017 primarily due to a \$30 million charge, which was recorded in the first quarter of fiscal 2017 and not expected to recur.

In constant currency, total services margin and total margin as a percentage of total services revenues decreased during the first half of fiscal 2017 due to the decrease in total revenues and due to the aforementioned increase in expenses attributable to a non-recurring charge.

As of our most recent annual goodwill impairment review date of March 1, 2016, our consulting reporting unit's fair value was 11% in excess of its carrying value. As of March 1, 2016, we estimated that should our consulting reporting unit's projected margins and related cash flows unfavorably deviate from our projections by 20% or

Table of Contents

more each year, our consulting reporting unit likely could incur a goodwill impairment loss. We continue to monitor the performance of and projections for all of our reporting units. We did not record any goodwill impairment losses during any of the fiscal 2017 and 2016 periods presented.

Research and Development Expenses: Research and development expenses consist primarily of personnel related expenditures. We intend to continue to invest significantly in our research and development efforts because, in our judgment, they are essential to maintaining our competitive position.

(Dollars in millions)	Three Months Ended November 30,				Six Months Ended November 30,

% of Total Revenues		17%		16%	17%			16%

⁽¹⁾ Excluding stock-based compensation

On a constant currency basis, total research and development expenses increased during the fiscal 2017 periods presented primarily due to increased employee related expenses resulting from increased headcount, including additional headcount from our recent acquisitions, and higher stock-based compensation.

General and Administrative Expenses: General and administrative expenses primarily consist of personnel related expenditures for IT, finance, legal and human resources support functions.

(Dollars in millions)	Three Months Ended November 30,				Six Months Ended November 30,			
	2016	Percent Change		2015	2016	Percent Change		2015

% of Total Revenues		3%		3%	4%			3%

⁽¹⁾ Excluding stock-based compensation

On a constant currency basis, total general and administrative expenses during the fiscal 2017 periods presented increased due primarily to higher professional services expenses, primarily legal related expenses, and higher stock-based compensation.

Amortization of Intangible Assets: Substantially all of our intangible assets are acquired through our business combinations. We amortize our intangible assets over, and monitor the appropriateness of, the estimated useful lives of these assets. We also periodically review these intangible assets for potential impairment based upon relevant facts and circumstances. Note 5 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report has additional information regarding our intangible assets and related amortization.

Table of Contents

Amortization of intangible assets decreased during the fiscal 2017 periods presented due to a reduction in expenses associated with certain of our intangible assets that became fully amortized, partially offset by additional amortization from intangible assets that we acquired in connection with our recent acquisitions.

Acquisition Related and Other Expenses: Acquisition related and other expenses consist of personnel related costs and stock-based compensation for transitional and certain other employees, integration related professional services, certain business combination adjustments including certain adjustments after the measurement period has ended and certain other operating items, net.

(Dollars in millions)	Three Months Ended November 30,				Six Months Ended November 30,

Total acquisition related and other expenses	\$ 40	713%	707%	\$ (7)	\$ 54	121%	130%	\$ 25

* Not meaningful

On a constant currency basis, the increase in acquisition related and other expenses during the fiscal 2017 periods presented was primarily due to higher stock compensation expenses as a result of our acquisition of NetSuite and higher professional fees. In addition, in the second quarter of fiscal 2016, we recognized an acquisition related benefit of \$19 million which decreased acquisition related and other expenses during the fiscal 2016 periods presented.

Restructuring Expenses: Restructuring expenses resulted from the execution of management approved restructuring plans that were generally developed to improve our cost structure and/or operations, often in conjunction with our acquisition integration strategies. Restructuring expenses consist of employee severance costs and may also include charges for duplicate facilities and other contract termination costs to improve our cost structure prospectively. For additional information regarding our restructuring plans, see Note 7 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report and Note 9 of Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the fiscal year ended May 31, 2016.

(Dollars in millions)	Three Months Ended November 30,				Six Months Ended November 30,			
	2016	Percent Change		2015	2016	Percent Change		2015
		Actual	Constant			Actual	Constant	
Restructuring expenses	\$ 86	-10%	-5%	\$ 95	\$ 185	4%	8%	\$ 178

Restructuring expenses in the fiscal 2017 periods presented primarily related to our 2017 Restructuring Plan. Restructuring expenses in the fiscal 2016 periods presented primarily related to our 2015 Restructuring Plan, which is complete. Our management approved, committed to and initiated these plans in order to restructure and further improve efficiencies in our operations. The total estimated restructuring costs associated with the 2017 Restructuring Plan are up to \$502 million and will be recorded to the restructuring expense line item within our consolidated statements of operations as they are incurred. The total estimated remaining restructuring costs associated with the 2017 Restructuring Plan were approximately \$300 million as of November 30, 2016 and the majority of the remaining costs are expected to be incurred through the end of fiscal 2018. Our estimated costs are subject to change in future periods.

Interest Expense:

Three Months Ended November 30,

Six Months Ended November 30,

Edgar Filing: ORACLE CORP - Form 10-Q

(Dollars in millions)	2016	Percent Change		2015	2016	Percent Change		2015
		Actual	Constant			Actual	Constant	
Interest expense	\$ 451	22%	22%	\$ 371	\$ 867	16%	16%	\$ 745

Table of Contents

Interest expense increased in the fiscal 2017 periods presented primarily due to higher average borrowings resulting from our issuance of \$14.0 billion of senior notes in July 2016. This increase in interest expense during the fiscal 2017 periods presented was partially offset by reductions in interest expense resulting from the maturity and repayment of \$2.0 billion of senior notes in January 2016. See Recent Financing Activities below and Note 6 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report for additional information regarding our fiscal 2017 borrowings.

Non-Operating Income, net: Non-operating income, net consists primarily of interest income, net foreign currency exchange gains (losses), the noncontrolling interests in the net profits of our majority-owned subsidiaries (primarily Oracle Financial Services Software Limited and Oracle Japan) and net other income (losses), including net realized gains and losses related to all of our investments and net unrealized gains and losses related to the small portion of our investment portfolio that we classify as trading.

(Dollars in millions)	Three Months Ended November 30,				Six Months Ended November 30,			
	2016	Percent Change		2015	2016	Percent Change		2015
		Actual	Constant			Actual	Constant	
Interest income	\$ 204	66%	66%	\$ 123	\$ 381	59%	60%	\$ 240
Foreign currency losses, net	(69)	153%	200%	(28)	(82)	56%	73%	(53)
Noncontrolling interests in income	(41)	40%	40%	(29)	(76)	28%	28%	(59)
Other income (loss), net	5	-70%	-70%	18	24	267%	268%	(14)
Total non-operating income, net	\$ 99	17%	2%	\$ 84	\$ 247	118%	114%	\$ 114

On a constant currency basis, our non-operating income, net for the fiscal 2017 periods presented increased primarily due to higher interest income resulting from higher cash, cash equivalent and short-term investment balances and higher interest rates, partially offset by higher foreign currency losses, net.

Provision for Income Taxes: Our effective tax rate in all periods is the result of the mix of income earned in various tax jurisdictions that apply a broad range of income tax rates. The provision for income taxes differs from the tax computed at the U.S. federal statutory income tax rate due primarily to certain earnings considered as indefinitely reinvested in foreign operations, state taxes, the U.S. research and development tax credit, settlements with tax authorities and the U.S. domestic production activity deduction. In addition, beginning in fiscal 2017, the provision for income taxes also differs from the tax computed at the U.S. federal statutory tax rate due to tax effects of stock-based compensation (refer to Note 1 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report for additional discussion). Future effective tax rates could be adversely affected if earnings are lower than anticipated in countries where we have lower statutory tax rates, by unfavorable changes in tax laws and regulations or by adverse rulings in tax related litigation, among others.

(Dollars in millions)	Three Months Ended November 30,				Six Months Ended November 30,			
	2016	Percent Change		2015	2016	Percent Change		2015
		Actual	Constant			Actual	Constant	
Provision for income taxes	\$ 653	39%	39%	\$ 471	\$ 1,194	16%	15%	\$ 1,033
Effective tax rate	24.3%			17.6%	23.6%			20.8%

Fiscal Second Quarter 2017 Compared to Fiscal Second Quarter 2016: Provision for income taxes in the second quarter of fiscal 2017 increased relative to the corresponding prior year period due in substantial part to the effects of settlements with tax authorities in the second quarter of fiscal 2016, which was not present in the second quarter of fiscal 2017, as well as an unfavorable jurisdictional mix of earnings in the second quarter of fiscal 2017 relative to fiscal 2016. These unfavorable impacts to our second quarter of fiscal 2017 provision for income taxes were partially offset by the permanent extension of the U.S. research and development credit in fiscal 2017, which was not available in fiscal 2016.

First Half Fiscal 2017 Compared to First Half Fiscal 2016: Provision for income taxes in the first half of fiscal 2017 increased relative to the corresponding prior year period due in substantial part to effects of settlements with tax authorities in the second quarter of fiscal 2016, which was not present in the first half of fiscal 2017, as well as an unfavorable jurisdictional mix of earnings in the first half of fiscal 2017 relative to the first half of fiscal 2016. In addition, the increase in our provision for income taxes during the first half of fiscal

Table of Contents

2017 was partially offset by the favorable impact of the permanent extension of the U.S. research and development credit and excess tax benefits recognized for stock-based compensation expense in fiscal 2017, which were not available in fiscal 2016.

Liquidity and Capital Resources

(Dollars in millions)	November 30, 2016	Change	May 31, 2016
Working capital	\$ 48,387	3%	\$ 47,105
Cash, cash equivalents and marketable securities	\$ 58,206	4%	\$ 56,125

Working capital: The increase in working capital as of November 30, 2016 in comparison to May 31, 2016 was primarily due to our issuance of \$14.0 billion of long-term senior notes in July 2016, the favorable impacts to our net current assets resulting from our net income during the first half of fiscal 2017 and cash proceeds from stock option exercises. These favorable working capital movements were partially offset by cash used for acquisitions, including our \$9.1 billion acquisition of NetSuite in the second quarter of fiscal 2017, cash used for repurchases of our common stock, cash used to pay dividends to our stockholders and cash used for capital expenditures. Our working capital may be impacted by some or all of the aforementioned factors in future periods, the amounts and timing of which are variable.

Cash, cash equivalents and marketable securities: Cash and cash equivalents primarily consist of deposits held at major banks, Tier-1 commercial paper and other securities with original maturities of 90 days or less. Marketable securities consist of Tier-1 commercial paper debt securities, corporate debt securities and certain other securities. The increase in cash, cash equivalents and marketable securities at November 30, 2016 in comparison to May 31, 2016 was primarily due to cash inflows generated by our operations during the first half of fiscal 2017, \$10.2 billion of cash inflows, net of repayments, from fiscal 2017 debt issuances, and cash inflows from stock option exercises. These cash inflows were partially offset by cash outflows for acquisitions, including our acquisition of NetSuite, repurchases of our common stock, payments of cash dividends to our stockholders and cash used for capital expenditures. Cash, cash equivalents and marketable securities included \$51.1 billion held by our foreign subsidiaries as of November 30, 2016, a significant portion of which was generated from the earnings of these foreign subsidiaries that we consider as indefinitely reinvested in our foreign operations outside the United States. These undistributed earnings that are considered as indefinitely reinvested overseas would be subject to U.S. income tax if repatriated to the United States. The amount of cash, cash equivalents and marketable securities that we report in U.S. Dollars for a significant portion of the cash, cash equivalents and marketable securities balances held by our foreign subsidiaries is subject to translation adjustments caused by changes in foreign currency exchange rates as of the end of each respective reporting period (the offset to which is substantially recorded to accumulated other comprehensive loss in our consolidated balance sheets and is also presented as a line item in our condensed consolidated statements of comprehensive income included elsewhere in this Quarterly Report). As the U.S. Dollar strengthened against certain major international currencies during the first half of fiscal 2017, the amount of cash, cash equivalents and marketable securities that we reported in U.S. Dollars for these subsidiaries decreased on a net basis as of November 30, 2016 relative to what we would have reported using constant currency rates from our May 31, 2016 balance sheet date.

Days sales outstanding, which we calculate by dividing period end accounts receivable by average daily sales for the quarter, was 37 days at November 30, 2016 compared with 46 days at May 31, 2016. The days sales outstanding calculation excludes the impact of any revenue adjustments resulting from business combinations that reduced our acquired cloud SaaS and PaaS obligations, software license updates and product support obligations and hardware support obligations to fair value. The decline in days sales outstanding was primarily due to strong collections in our first half of fiscal 2017 and seasonality resulting in a large volume of software license, hardware products and software support balances outstanding as of May 31, 2016.

(Dollars in millions)	Six Months Ended November 30, 2016	Change	2015
Net cash provided by operating activities	\$ 6,961	9%	\$ 6,397
Net cash used for investing activities	\$ (14,920)	347%	\$ (3,338)
Net cash provided by (used for) financing activities	\$ 6,739	195%	\$ (7,066)

Table of Contents

Cash flows from operating activities: Our largest source of operating cash flows is cash collections from our customers following the purchase and renewal of their software license updates and product support agreements. Payments from customers for these support agreements are generally received near the beginning of the contracts terms, which are generally one year in length. Over the course of a fiscal year, we also have historically generated cash from the sales of new software licenses, cloud SaaS, PaaS and IaaS offerings, hardware products, hardware support arrangements and services. Our primary uses of cash from operating activities are for employee related expenditures, material and manufacturing costs related to the production of our hardware products, taxes and leased facilities.

Net cash provided by operating activities increased during the first half of fiscal 2017 due primarily to favorable working capital movements during the first half of fiscal 2017 including less cash used to settle accrued liabilities and income taxes, each in relation to the corresponding movements in the first half of fiscal 2016.

Cash flows from investing activities: The changes in cash flows from investing activities primarily relate to our acquisitions, the timing of our purchases, maturities and sales of our investments in marketable debt securities and investments in capital and other assets, including certain intangible assets, to support our growth.

Net cash used for investing activities increased in the first half of fiscal 2017 relative to the first half of fiscal 2016 primarily due to an increase in cash used for acquisitions, net of cash acquired, an increase in cash used to purchase marketable securities and other investments, net of proceeds received from sales and maturities, and increased capital expenditures primarily related to real estate purchases.

Cash flows from financing activities: The changes in cash flows from financing activities primarily relate to borrowings and repayments related to our debt instruments as well as stock repurchases, dividend payments and net proceeds related to employee stock programs.

Net cash provided by financing activities in the first half of fiscal 2017 was \$6.7 billion in comparison to net cash used for financing activities of \$7.1 billion during the first half of fiscal 2016. The change in financing activities cash flows during the first half of fiscal 2017 in comparison to the corresponding prior year period was primarily related to borrowing activities, net of debt repayments, for which we received \$10.2 billion of net cash proceeds during the first half of fiscal 2017 (no debt issuances or repayments were made during the first half of fiscal 2016).

Free cash flow: To supplement our statements of cash flows presented on a GAAP basis, we use non-GAAP measures of cash flows on a trailing 4-quarter basis to analyze cash flows generated from our operations. We believe free cash flow is also useful as one of the bases for comparing our performance with our competitors. The presentation of non-GAAP free cash flow is not meant to be considered in isolation or as an alternative to net income as an indicator of our performance, or as an alternative to cash flows from operating activities as a measure of liquidity. We calculate free cash flow as follows:

(Dollars in millions)	Trailing 4-Quarters Ended November 30,		
	2016	Change	2015
Net cash provided by operating activities	\$ 14,249	9%	\$ 13,113
Capital expenditures	(1,604)	0%	(1,606)
Free cash flow	\$ 12,645	10%	\$ 11,507
Net income	\$ 8,820		\$ 9,198
Free cash flow as percent of net income	143%		125%

Long-Term Customer Financing: We offer certain of our customers the option to acquire our software products, hardware products and services offerings through separate long-term payment contracts. We generally sell these contracts that we have financed for our customers on a non-recourse basis to financial institutions within 90 days of the contracts dates of execution. We generally record the transfers of amounts due from customers to financial institutions as sales of financing receivables because we are considered to have surrendered control of these financing receivables. We financed \$268 million and \$299 million, respectively, or approximately 11% and 11%, respectively, of our new software licenses revenues in the first half of fiscal 2017 and 2016, and \$43 million and \$61 million, respectively, or approximately 4% and 5%, respectively, of our hardware products revenues in the first half of fiscal 2017 and 2016.

Table of Contents

Recent Financing Activities:

Senior Notes: In July 2016, we issued \$14.0 billion of senior notes comprised of the following:

\$4.25 billion of 1.90% senior notes due September 2021;

\$2.5 billion of 2.40% senior notes due September 2023;

\$3.0 billion of 2.65% senior notes due July 2026;

\$1.25 billion of 3.85% senior notes due July 2036; and

\$3.0 billion of 4.00% senior notes due July 2046.

We issued the senior notes for general corporate purposes, which may include stock repurchases, payment of cash dividends on our common stock, repayment of indebtedness and future acquisitions. Additional details regarding the senior notes are included in Note 6 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report.

Other Fiscal 2017 Borrowings Activities: In the second quarter of fiscal 2017, we assumed \$310 million par value of legacy NetSuite convertible notes due June 1, 2018 in connection with the acquisition of NetSuite (refer to Note 7 of Notes to Condensed Consolidated Financial Statements included in Item 1 of this Quarterly Report for additional discussion).

In the second quarter of fiscal 2017, we assumed \$113 million of debt due August 1, 2025 in connection with the acquisition of certain land and buildings.

In May 2016, we borrowed \$3.8 billion pursuant to three revolving credit agreements with JPMorgan Chase Bank, N.A., as initial lender and administrative agent (the 2016 Credit Agreements). In June 2016, we repaid the \$3.8 billion and the 2016 Credit Agreements expired pursuant to their terms.

Contractual Obligations: During the first half of fiscal 2017, there were no significant changes to our estimates of future payments under our fixed contractual obligations and commitments as presented in Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for our fiscal year ended May 31, 2016 other than our issuance of \$14.0 billion of senior notes. Additional details regarding our issuance of \$14.0 billion of senior notes are included in Note 6 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report.

We believe that our current cash, cash equivalents and marketable securities and cash generated from operations will be sufficient to meet our working capital, capital expenditures and contractual obligation requirements. In addition, we believe that we could fund our pending and future acquisitions, dividend payments and repurchases of common stock or debt with our internally available cash, cash equivalents and marketable securities, cash generated from operations, additional borrowings or from the issuance of additional securities.

Off-Balance Sheet Arrangements: We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Restricted Stock-Based Awards and Stock Options

Our stock-based compensation program is a key component of the compensation package we provide to attract and retain certain of our talented employees and align their interests with the interests of existing stockholders.

Edgar Filing: ORACLE CORP - Form 10-Q

We recognize that restricted stock-based awards and stock options dilute existing stockholders and have sought to control the number of stock-based awards granted while providing competitive compensation packages. Consistent with these dual goals, our cumulative potential dilution since June 1, 2013 has been a weighted-average annualized rate of 1.5% per year. The potential dilution percentage is calculated as the average annualized new restricted stock-based awards or stock options granted and assumed, net of restricted stock-based awards and stock options forfeited by employees leaving the company, divided by the weighted-average outstanding shares during the calculation period. This maximum potential dilution will only result if all restricted stock-based awards vest and stock options are exercised. Of the outstanding stock options at November 30, 2016,

Table of Contents

which generally have a ten-year exercise period, 14.9% have exercise prices higher than the market price of our common stock on such date. In recent years, our stock repurchase program has more than offset the dilutive effect of our stock-based compensation program; however, we may reduce the level of our stock repurchases in the future, as we may use our available cash for acquisitions, to pay dividends, to repay or repurchase indebtedness or for other purposes. At November 30, 2016, the maximum potential dilution from all outstanding restricted stock-based awards and unexercised stock options, regardless of when granted and regardless of whether vested or unvested and including stock options where the strike price is higher than the market price as of such date, was 11.1%.

Recent Accounting Pronouncements

For information with respect to recent accounting pronouncements, if any, and the impact of these pronouncements on our consolidated financial statements, if any, see Note 1 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There were no significant changes to our quantitative and qualitative disclosures about market risk during the first half of fiscal 2017. Please refer to Part II, Item 7A. Quantitative and Qualitative Disclosures about Market Risk included in our Annual Report on Form 10-K for our fiscal year ended May 31, 2016 for a more complete discussion of the market risks we encounter.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures: Based on our management's evaluation (with the participation of our Principal Executive Officers, one of whom is our Principal Financial Officer), as of the end of the period covered by this Quarterly Report, our Principal Executive Officers have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) were effective to provide reasonable assurance that the information required to be disclosed by us in our reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms and is accumulated and communicated to our management (including our Principal Executive Officers) as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting: There were no changes in our internal control over financial reporting that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls: Our management, including our Principal Executive Officers (one of whom is our Principal Financial Officer), believes that our disclosure controls and procedures and internal control over financial reporting are designed to provide reasonable assurance of achieving their objectives and are effective at the reasonable assurance level. However, our management does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all errors and all fraud. A control system, no matter how well-conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision making can be faulty and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Table of Contents**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

The material set forth in Note 11 (pertaining to information regarding contingencies related to our income taxes) and Note 14 (pertaining to information regarding legal contingencies) of Notes to Condensed Consolidated Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q is incorporated herein by reference.

Item 1A. Risk Factors

In addition to the other information set forth in this Quarterly Report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for our fiscal year ended May 31, 2016. The risks discussed in our Annual Report on Form 10-K could materially affect our business, financial condition and future results. The risks described in our Annual Report on Form 10-K are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be insignificant also may materially and adversely affect our business, financial condition or operating results in the future.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Our Board of Directors has approved a program for us to repurchase shares of our common stock. On March 15, 2016, we announced that our Board of Directors approved an expansion of our stock repurchase program by an additional \$10.0 billion. As of November 30, 2016, approximately \$6.3 billion remained available for stock repurchases pursuant to our stock repurchase program.

Our stock repurchase authorization does not have an expiration date and the pace of our repurchase activity will depend on factors such as our working capital needs, our cash requirements for acquisitions and dividend payments, our debt repayment obligations or repurchases of our debt, our stock price, and economic and market conditions. Our stock repurchases may be effected from time to time through open market purchases or pursuant to a Rule 10b5-1 plan. Our stock repurchase program may be accelerated, suspended, delayed or discontinued at any time.

The following table summarizes the stock repurchase activity for the three months ended November 30, 2016 and the approximate dollar value of shares that may yet be purchased pursuant to our stock repurchase program:

(in millions, except per share amounts)	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program
September 1, 2016 - September 30, 2016	4.2	\$ 39.98	4.2	\$ 6,675.0
October 1, 2016 - October 31, 2016	4.3	\$ 38.46	4.3	\$ 6,508.5
November 1, 2016 - November 30, 2016	4.2	\$ 39.47	4.2	\$ 6,341.7
Total	12.7	\$ 39.29	12.7
