President

Wells Fargo Funds

In a marked difference from the prior 12 months, muted volatility characterized the high-yield bond market.

In another departure from the prior year, default events among energy and materials companies moderated during the period.

Dear Shareholder:

We are pleased to offer you this semi-annual report for the Wells Fargo Income Opportunities Fund for the six-month period that ended October 31, 2016. High-yield bonds enjoyed favorable market conditions during the period. Credit spreads narrowed, prices strengthened, and volatility was subdued in comparison to the prior year. These conditions attracted greater interest in high-yield bonds among investors, helping the market as measured by the BofA Merrill Lynch U.S. High Yield Index¹ to achieve a 7.74% return for the period.

In a marked difference from the prior 12 months, muted volatility characterized the high-yield bond market. Once again, the Federal Open Market Committee the policy-making committee of the U.S Federal Reserve (Fed) deferred an interest-rate hike at its September meeting. Throughout the period, the Fed cited inconsistent employment or jobs creation data and other mixed economic and manufacturing indicators to explain its hesitancy to raise rates. Based on high-yield bond pricing at the close of the period, it appeared the market still is anticipating that there is a more-than-even chance that the Fed will announce an interest-rate hike at its December 2016 meeting.

The U.S. economy continued to grow at a moderate pace during the six-month reporting period. The country delivered annualized real gross domestic product (GDP) growth of 1.4% in the second quarter of 2016. GDP growth accelerated to 2.9% in the third quarter that ended September 30, 2016. Reported inflation, as measured by the core personal consumption expenditures price index, remained below the Fed's target of 2.0%.

The U.K.'s vote in June to exit the European Union (Brexit) created some initial volatility in the U.S. high-yield market but had little enduring overall effect during the period. Credit spreads tightened primarily due to monetary policy in major global financial markets that was accommodative of economic and business activity. Further accommodation out of major central banks—the European Central Bank, the People's Bank of China, and the Bank of Japan—offered strong encouragement that they would maintain low and in some cases negative interest rates as well as provide liquidity to the markets through bond purchases. To a certain degree, accommodative monetary policies around the globe, including negative interest rates on some sovereign bonds, drove yields down and supported the investment case for riskier assets such as high-yield bonds as investors sought higher yields than were available in other sectors of the bond market or from equity investments.

In another departure from the prior year, default events among energy and materials companies moderated during the period. While defaults continue, the overall default rate is less than 1% when those occurring among commodity-related businesses are excluded. Outside of the stressed commodity sector, the majority of U.S. high-yield companies are meeting their debt obligations, largely because of continued low interest rates. High-yield companies can obtain inexpensive financing compared with historical norms to meet their interest payments.

Energy prices rebounded somewhat from the declines that began in mid-2014. The potential for an agreement among Organization of Petroleum Exporting Countries (OPEC) to limit output helped support higher oil prices for several weeks.

¹ The BofA Merrill Lynch U.S. High Yield Index (formerly known as BofA Merrill Lynch High Yield Master II Index) is a market-capitalization-weighted index of domestic and Yankee high-yield bonds. The index tracks the performance of the high-yield securities traded in the United States bond market. You cannot invest directly in an index.

Table of Contents

Letter to shareholders (unaudited) Wells Fargo Income Opportunities Fund 3

during the period. Higher oil prices reduced the specter of default for energy-sector companies which had suffered elevated default levels as commodity prices remained low. Also, the Fed's continued low-interest-rate policy along with continued slow but consistent U.S. economic growth combined to support higher investor interest in lower-quality bonds. One outcome of increased investor risk tolerance was that CCC-rated bonds outperformed BB-rated and B-rated bonds during the period.

New issuance remains below 2015 levels, but the difference has steadily narrowed after a slow start. High-yield new issuance began 2016 well below last year's pace but grew more robust later in the reporting period. This is an encouraging sign for high-yield bond issuers relying on the capital markets for financing and for investors seeking the yields available in the high yield bond markets.

Don't let short-term uncertainty derail long-term investment goals.

Periods of uncertainty can present challenges, but experience has taught us that maintaining long-term investment goals can be an effective way to plan for the future. Although diversification cannot guarantee an investment profit or prevent losses, we believe it can be an effective way to manage investment risk and potentially smooth out overall portfolio performance. We encourage investors to know their investments and to understand that appropriate levels of risk-taking may unlock opportunities.

Thank you for choosing to invest with Wells Fargo Funds. We appreciate your confidence in us and remain committed to helping you meet your financial needs.

Sincerely,

Karla M. Rabusch

President

Average annual total returns (%) as of October 31, 2016¹

	6 months	1 year	5 year	10 year
Based on market value	10.67	15.11	6.08	5.51
Based on net asset value (NAV)	11.49	12.76	8.95	6.96
BofA Merrill Lynch U.S. High Yield Index ²	7.74	10.16	7.07	7.46

Figures quoted represent past performance, which is no guarantee of future results, and do not reflect taxes that a shareholder may pay on fund distributions or the sales of fund shares. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted, which assumes the reinvestment of dividends and capital gains. Performance figures of the Fund do not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares. If taxes and such brokerage commissions had been reflected, performance would have been lower. To obtain performance information current to the most recent month-end, please call 1-800-222-8222.

The Adviser has committed through March 6, 2017, to waive fees and/or reimburse expenses to the extent necessary to limit the Fund's borrowing expenses to an amount that is 0.05% lower than what the borrowing expenses would have been if the Fund had not redeemed its Auction Market Preferred Shares. The Fund previously utilized Auction Market Preferred Shares for leverage but secured debt financing to fully redeem those shares in 2010. The Fund's gross and net expense ratios, which include 0.44% of interest expense, were 1.36% and 1.16%, respectively, for the six months ended October 31, 2016. Without this waiver and/or reimbursement, the Fund's returns would have been lower.

Comparison of NAV vs. market value³

The Fund is leveraged through a revolving credit facility and also may incur leverage by issuing preferred shares in the future. The use of leverage results in certain risks, including, among others, the likelihood of greater volatility of net asset value and the market value of common shares. Derivatives involve additional risks, including interest-rate risk, credit risk, the risk of improper valuation, and the risk of noncorrelation to the relevant instruments that they are designed to hedge or closely track. Bond values fluctuate in response to the financial condition of individual issuers, general market and economic conditions, and changes in interest rates. Changes in market conditions and government policies may lead to periods of heightened volatility in the bond market and reduced liquidity for certain bonds held by the Fund. In general, when interest rates rise, bond values fall and investors may lose principal value. Interest-rate changes and their impact on the fund and its share price can be sudden and unpredictable. High-yield securities have a greater risk of default and tend to be more volatile than higher-rated debt securities. This closed-end fund is no longer offered as an initial public offering and is only offered through broker/dealers on the secondary market. A closed-end fund is not required to buy its shares back from investors upon request.

MANAGER'S DISCUSSION

Wells Fargo Income Opportunities Fund 5

The Fund's return based on market value was 10.67% during the six months that ended October 31, 2016. During the same period, the Fund's return based on net asset value (NAV) was 11.49%. Based on its NAV return, the Fund outperformed relative to the BofA Merrill Lynch U.S. High Yield Index (the Index), which returned 7.74%.

Overview

The rally reflected the continued bounce-back from the decline in the high-yield market that began in June 2015. Energy and other commodity-related bonds drove much of the decline in high-yield bond prices, as commodity prices were generally falling until mid-February 2016. Technical pressure from large investment grade issuers being downgraded to high-yield ratings aggravated the price decline of non-investment grade debt issues. Once the downgrades were absorbed by the high-yield market and commodity prices began to stabilize or rebound, the high-yield market rallied during the reporting period.

From a fundamental perspective, corporate leverage remained at elevated levels for this point in the credit cycle. However, the cash flow impact from these higher leverage levels was somewhat offset by issuers' ability to finance debt at low interest rates. Outside of commodity-dependent sectors, the U.S. economy appears to be growing, albeit at a subdued pace. Moderate growth with low unemployment should provide an ideal environment for high-yield issuers because consumer demand might remain stable and the Federal Reserve (Fed) should have room to be accommodative. While we continue to remain cautiously optimistic that this environment will continue in the near term, we are cognizant that ideal environments never last forever, and as yields move lower, the risk of a future sell off may increase.

NGPL PipeCo LLC, 7.77%, 12-15-2037	2.65
Jabil Circuit Incorporated, 8.25%, 3-15-2018	2.27
Greektown Holdings LLC, 8.88%, 3-15-2019	2.13
NCR Corporation, 6.38%, 12-15-2023	1.65
Texas Competitive Electric Holdings Company LLC, 0.00%, 10-10-2017	1.54
Diamond 1 Finance Corporation, 7.13%, 6-15-2024	1.50
Sprint Capital Corporation, 6.88%, 11-15-2028	1.49
TerraForm Power Operating LLC, 6.38%, 2-1-2023	1.41
Ultra Petroleum Corporation, 6.13%, 10-1-2024	1.38
PHI Incorporated, 5.25%, 3-15-2019	1.38

Credit quality as of October 31, 2016⁵**Contributors to performance**

As compared with the composition of the broader high-yield bond market, as measured by the Index, the portfolio benefited from a relatively higher level of investment in the midstream energy industry, including Natural Gas

Pipeline Company of America and Rockies Express Pipeline LLC. The Fund's investment in Ultra Petroleum Corporation contributed to performance.

Detractors from performance

The portfolio was hurt by a comparatively lower level of investment (as compared with the Index as representative of the broader high-yield bond market) to two sectors. The portfolio's lower-than-market allocation to the metals and mining sector was a detractor. The portfolio also invested in the energy exploration and production sector at a lower level than represented in the market, which detracted from performance. An investment in private prison operator Geo Group Incorporated also detracted. A relatively higher cash allocation in a strong market during the period restrained performance.

The ratings and maturity allocations of the Fund did not have a meaningful effect on relative performance during this period.

Management outlook

Our outlook for high-yield energy and commodity companies has not changed. With respect to the broader high-yield market, we continue to believe that a number of imbalances that have existed for years around the world could prompt a second potential scenario. Although likely to remain dormant, these imbalances have the potential to cause renewed fears of systemic risks and a related fall in all risk markets, including high yield. These global imbalances include the high government debt and deficit levels in most of the developed world, potential real-estate and municipal-debt bubbles in China, potential real-estate bubbles in major cities, and persistent trade and current international account deficits and

Please see footnotes on page 6.

Table of Contents

6 Wells Fargo Income Opportunities Fund	Performance highlights (unaudited)
Effective maturity distribution as of October 31, 2016⁶	

surpluses. We believe high-yield bonds will remain relatively stable and potentially outperform other fixed-income asset classes such as intermediate U.S. Treasuries and investment-grade corporate markets that may be more affected by a rising interest-rate environment. In this scenario, the economy would improve at a consistent pace and interest rates would rise as the Fed continued to reduce the exceptionally accommodative monetary stance it has maintained for nearly a decade. We expect the Fed to be extremely cautious in implementing further

rate increases and may be willing to risk higher inflation

in order to avoid derailing the economy. In our view, the recent rally in the high-yield and bank loan markets tends to reduce the likelihood of the market remaining stable and increases the risk that the market sells off in the future.

Default rates were mostly concentrated in the energy and commodity industries over the prior year. While we expect that bankruptcies will remain concentrated in those industries in the near term, many of the weakest names have already filed for bankruptcy. Outside of the broader energy and metals and mining complexes, we believe that lower energy and commodity prices are generally a positive for the economy and the high-yield market. Lower energy and commodity prices should reduce expenses at most companies and leave consumers with more purchasing power with which to buy goods and services. In addition, lower energy and commodity prices may suppress near-term inflation, which would allow the Fed to leave rates lower for longer.

In addition, lower rates since the beginning of this year have also been a near-term positive for high-yield bonds, as weaker companies are more easily able to refinance their debt when yields are lower. In a higher-yield environment, these companies may have more difficulty accessing the high-yield market leading to more bankruptcies. In this way, the fall in rates may be a near-term positive, but a long-term risk for the market.

In the long run, we expect high yield's relative performance will be primarily driven by corporate fundamentals and defaults. In the near term, with the exception of the energy and other commodity sectors, our default outlook remains fairly benign. Over a full cycle, we believe the best way to protect the portfolio from periodic bouts of systemic fears and rebalancing is by following a bottom-up investment process that attempts to minimize downside risk while capturing the return potential of high-yield issuers.

¹ Total returns based on market value are calculated assuming a purchase of common stock on the first day and a sale on the last day of the period reported. Total returns based on NAV are calculated based on the NAV at the beginning of the period and end of the period. Dividends and distributions, if any, are assumed for the purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan.

- ² The BofA Merrill Lynch U.S. High Yield Index (formerly known as BofA Merrill Lynch High Yield Master II Index) is a market-capitalization-weighted index of domestic and Yankee high-yield bonds. The index tracks the performance of the high-yield securities traded in the United States bond market. You cannot invest directly in an index.
- ³ This chart does not reflect any brokerage commissions charged on the purchase and sale of the Fund's common stock. Dividends and distributions paid by the Fund are included in the Fund's average annual total returns but have the effect of reducing the Fund's NAV.
- ⁴ The ten largest holdings, excluding cash and cash equivalents, are calculated based on the value of the investments divided by total net assets of the Fund. Holdings are subject to change and may have changed since the date specified.
- ⁵ The credit quality distribution of portfolio holdings reflected in the chart is based on ratings from Standard & Poor's, Moody's Investors Service, and/or Fitch Ratings Ltd. Credit quality ratings apply to the underlying holdings of the Fund and not to the Fund itself. The percentages of the Fund's portfolio with the ratings depicted in the chart are calculated based on the total market value of fixed income securities held by the Fund. If a security was rated by all three rating agencies, the middle rating was utilized. If rated by two of three rating agencies, the lower rating was utilized, and if rated by one of the rating agencies, that rating was utilized. Standard & Poor's rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Ratings from A to CCC may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories. Standard & Poor's rates the creditworthiness of short-term notes from SP-1 (highest) to SP-3 (lowest). Moody's rates the creditworthiness of bonds, ranging from Aaa (highest) to C (lowest). Ratings Aa to B may be modified by the addition of a number 1 (highest) to 3 (lowest) to show relative standing within the ratings categories. Moody's rates the creditworthiness of short-term U.S. tax-exempt municipal securities from MIG 1/VMIG 1 (highest) to SG (lowest). Fitch rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Credit quality distribution is subject to change and may have changed since the date specified.
- ⁶ Effective maturity distribution is subject to change and are calculated based on the total long-term investments of the Fund.

Non-income-earning security

(i) Illiquid security

144A The security may be resold in transactions exempt from registration, normally to qualified institutional buyers, pursuant to Rule 144A under the Securities Act of 1933.

%% The security is issued on a when-issued basis.

¥ A payment-in-kind (PIK) security is a security in which the issuer may make interest or dividend payments in cash or additional securities. These additional securities generally have the same terms as the original holdings.

(s) The security is currently in default with regards to scheduled interest and/or principal payments. The Fund has stopped accruing interest on the security.

(a) The security is fair valued in accordance with procedures approved by the Board of Trustees.

± Variable rate investment. The rate shown is the rate in effect at period end.

< All or a portion of the position represents an unfunded loan commitment.

(l) The issuer of the security is an affiliated person of the Fund as defined in the Investment Company Act of 1940.

(u) The rate represents the 7-day annualized yield at period end.

All or a portion of this security is segregated for when-issued and/or unfunded loans.

* Cost for federal income tax purposes is \$890,660,632 and unrealized gains (losses) consists of:

Gross unrealized gains	\$ 45,303,157
Gross unrealized losses	(69,132,451)

Net unrealized losses	\$ (23,829,294)

24 Wells Fargo Income Opportunities Fund

Notes to financial statements (unaudited)

1. ORGANIZATION

The Wells Fargo Income Opportunities Fund (the Fund) was organized as a statutory trust under the laws of the state of Delaware on December 3, 2002 and is registered as a diversified closed-end management investment company under the Investment Company Act of 1940, as amended. As an investment company, the Fund follows the accounting and reporting guidance in Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946, *Financial Services - Investment Companies*.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (generally 4 p.m. Eastern Time), although the Fund may deviate from this calculation time under unusual or unexpected circumstances.

Debt securities are valued at the evaluated bid price provided by an independent pricing service or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

Equity securities that are listed on a foreign or domestic exchange or market are valued at the official closing price or, if none, the last sales price. If no sale occurs on the principal exchange or market that day, the prior day's price will be deemed stale and a fair value price will be determined in accordance with the Fund's Valuation Procedures.

Investments in registered open-end investment companies are valued at net asset value.

Investments which are not valued using any of the methods discussed above are valued at their fair value, as determined in good faith by the Board of Trustees of the Fund. The Board of Trustees has established a Valuation Committee comprised of the Trustees and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities, unless the determination has been delegated to the Management Valuation Team of Wells Fargo Funds Management, LLC (Funds Management). The Board of Trustees retains the authority to make or ratify any valuation decisions or approve any changes to the Valuation Procedures as it deems appropriate. On a quarterly basis, the Board of Trustees receives reports on any valuation actions taken by the Valuation Committee or the Management Valuation Team which may include items for ratification.

Valuations of fair valued securities are compared to the next actual sales price when available, or other appropriate market values, to assess the continued appropriateness of the fair valuation methodologies used. These securities are fair valued on a day-to-day basis, taking into consideration changes to appropriate market information and any significant changes to the inputs considered in the valuation process until there is a readily available price provided on

an exchange or by an independent pricing service. Valuations received from an independent pricing service or independent broker-dealer quotes are periodically validated by comparisons to most recent trades and valuations provided by other independent pricing services in addition to the review of prices by the adviser and/or subadviser. Unobservable inputs used in determining fair valuations are identified based on the type of security, taking into consideration factors utilized by market participants in valuing the investment, knowledge about the issuer and the current market environment.

When-issued transactions

The Fund may purchase securities on a forward commitment or when-issued basis. The Fund records a when-issued transaction on the trade date and will segregate assets in an amount at least equal in value to the Fund's commitment to purchase when-issued securities. Securities purchased on a when-issued basis are marked-to-market daily and the Fund begins earning interest on the settlement date. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

Loans

The Fund may invest in direct debt instruments which are interests in amounts owed to lenders by corporate or other borrowers. The loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. Investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third

Table of Contents

Notes to financial statements (unaudited) Wells Fargo Income Opportunities Fund 25

parties. When the Fund purchases participations, it generally has no rights to enforce compliance with terms of the loan agreement with the borrower. As a result, the Fund assumes the credit risk of both the borrower and the lender that is selling the participation. When the Fund purchases assignments from lenders, it acquires direct rights against the borrower on the loan and may enforce compliance by the borrower with the terms of the loan agreement. Loans may include fully funded term loans or unfunded loan commitments, which are contractual obligations for future funding.

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Interest income is accrued daily and bond discounts are accreted and premiums are amortized daily based on the effective interest method. To the extent debt obligations are placed on non-accrual status, any related interest income may be reduced by writing off interest receivables when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. If the issuer subsequently resumes interest payments or when the collectability of interest is reasonably assured, the debt obligation is removed from non-accrual status.

Dividend income is recognized on the ex-dividend date.

Distributions to shareholders

Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-dividend date. Such distributions are determined in conformity with federal income tax regulations, which may differ in amount or character from net investment income and realized gains recognized for purposes of U.S. generally accepted accounting principles.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund's income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

Capital loss carryforwards that do not expire are required to be utilized prior to capital loss carryforwards that expire. As of April 30, 2016, capital loss carryforwards available to offset future net realized capital gains were as follows through the indicated expiration dates:

2017	2018	No expiration Short-term
\$130,598,584	\$155,329,141	\$4,979,470

As of April 30, 2016, the Fund had current year deferred post-October capital losses consisting of \$612,706 in short-term losses and \$7,312,748 in long-term losses which will be recognized on the first day of the following fiscal year.

3. FAIR VALUATION MEASUREMENTS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to significant unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, use of amortized cost, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

Table of Contents

26 Wells Fargo Income Opportunities Fund Notes to financial statements (unaudited)
 The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund's assets and liabilities as of October 31, 2016:

	Quoted prices (Level 1)	Other significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
Assets				
Investments in:				
Common stocks				
<i>Energy</i>	\$ 864,288	\$ 0	\$ 0	\$ 864,288
<i>Materials</i>	557	0	0	557
Corporate bonds and notes	0	733,468,545	0	733,468,545
Loans	0	26,705,111	3,036,442	29,741,553
Yankee corporate bonds and notes	0	61,376,130	9,638	61,385,768
Short-term investments				
<i>Investment companies</i>	41,370,627	0	0	41,370,627
Total assets	\$ 42,235,472	\$ 821,549,786	\$ 3,046,080	\$ 866,831,338

The Fund recognizes transfers between levels within the fair value hierarchy at the end of the reporting period. At October 31, 2016, the Fund did not have any transfers into/out of Level 1. The Fund had no material transfers between Level 2 and Level 3.

4. TRANSACTIONS WITH AFFILIATES**Advisory fee**

Funds Management, an indirect wholly owned subsidiary of Wells Fargo & Company (Wells Fargo), is the adviser to the Fund and is entitled to receive a fee at an annual rate of 0.60% of the Fund's average daily total assets. Total assets consist of the net assets of the Fund plus borrowings or other leverage for investment purposes to the extent excluded in calculating net assets. Funds Management has committed through March 31, 2017 to waive fees and/or reimburse expenses to the extent necessary to limit the Fund's borrowing expenses to an amount that is 0.05% lower than what the borrowing expenses would have been if the Fund had not redeemed its Auction Market Preferred Shares. The Fund previously utilized Auction Market Preferred Shares for leverage but secured debt financing to fully redeem those shares in 2010. Funds Management contractually waived its advisory fee in the amount of \$636,004 for the six months ended October 31, 2016.

Funds Management has retained the services of a subadviser to provide daily portfolio management to the Fund. The fee for subadvisory services is borne by Funds Management. Wells Capital Management Incorporated, an affiliate of Funds Management and an indirect wholly owned subsidiary of Wells Fargo, is the subadviser to the Fund and is

entitled to receive a fee from Funds Management at an annual rate of 0.40% of the Fund's average daily total assets.

Administration fee

Funds Management also serves as the administrator to the Fund, providing the Fund with a wide range of administrative services necessary to the operation of the Fund. Funds Management is entitled to receive an annual administration fee from the Fund equal to 0.05% of the Fund's average daily total assets.

5. CAPITAL SHARE TRANSACTIONS

The Fund has authorized capital of 100,000,000 shares with no par value. For the six months ended October 31, 2016 and year ended April 30, 2016, the Fund did not issue any shares.

On December 17, 2015, the Fund announced an open-market share repurchase program (the Buyback Program). Under the Buyback Program, the Fund may repurchase up to 10% of its outstanding shares within one year of December 17, 2015. The Fund's Board of Trustees has delegated to Funds Management full discretion to administer the Buyback Program including the determination of the amount and timing of repurchases in accordance with the best interests of the Fund and subject to applicable legal limitations. During the six months ended October 31, 2016, the Fund purchased 76,871 of its shares on the open market at a total cost of \$633,809 (weighted average price per share of \$8.25). The weighted average discount of these repurchased shares was 10.59%.

Table of Contents

Notes to financial statements (unaudited)

Wells Fargo Income Opportunities Fund 27

6. BORROWINGS

As of October 31, 2016, the Fund has borrowed \$230 million through a revolving credit facility administered by a major financial institution (the Facility). The Facility has a commitment amount of \$230 million with no specific contract expiration date but the Facility can be terminated upon 180 days notice. The Fund is charged interest at London Interbank Offered Rate (LIBOR) plus 0.70% and a commitment fee of 0.30% of the average daily unutilized amount of the commitment which may be waived if the amount drawn on the Facility is over 75% of the committed amount.

During the six months ended October 31, 2016, the Fund had average borrowings outstanding of \$230,000,000 at an average rate of 1.20% and paid interest in the amount of \$1,379,216, which represents 0.44% of its average daily net assets.

7. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments, excluding U.S. government obligations (if any) and short-term securities, for the six months ended October 31, 2016 were \$194,667,230 and \$176,979,059, respectively.

The Fund may purchase or sell investment securities to other Wells Fargo funds under procedures adopted by the Board of Trustees. The procedures have been designed to ensure that these interfund transactions, which generally do not incur broker commissions, are effected at current market prices. Interfund trades are included within the respective purchases and sales amounts shown.

As of October 31, 2016, the Fund had unfunded term loan commitments of \$247,500.

8. INDEMNIFICATION

Under the Fund's organizational documents, the officers and Trustees have been granted certain indemnification rights against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

9. NEW ACCOUNTING PRONOUNCEMENTS

In August 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) No. 2016-15, *Classification of Certain Cash Receipts and Cash Payments (a Consensus of the Emerging Issues Task Force)*, which is intended to reduce diversity in practice in how certain transactions are classified in the statement of cash flows. Management is currently assessing the potential impact on the financial statements that may result from adopting this ASU. This ASU is effective for annual reporting periods beginning after December 15, 2017, including interim periods within those financial years, with early adoption permitted.

In November 2016, FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230), Restricted Cash (a Consensus of the Emerging Issues Task Force)*, which requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts general described as restricted cash or restricted

cash equivalents. Amounts described as restricted cash and restricted cash equivalents should be included with the cash and cash equivalents in reconciling the beginning and end of period total amounts shown on the statement of cash flows. Management is currently assessing the potential impact on the financial statements that may result from adopting this ASU. This ASU is effective for interim and annual reporting periods beginning after December 15, 2017.

10. REGULATORY CHANGES

In October 2016, the Securities and Exchange Commission (SEC) adopted new rules and forms and amended existing rules and forms (together, final rules) intended to modernize and enhance the reporting and disclosure of information by registered investment companies and to enhance liquidity risk management by open-end mutual funds and exchange-traded funds. The final rules will enhance the quality of information available to investors and will allow the SEC to more effectively collect and use data reported by funds. In part, the final rules amend Regulation S-X and require standardized, enhanced disclosure about derivatives in the Fund s financial statements, as well as other amendments. The compliance date for the amendments to Regulation S-X is August 1, 2017 while the compliance date for the new form types is June 1, 2018 and the compliance date for the liquidity risk management program requirements is December 1, 2018. Management is currently assessing the potential impact of these enhancements and their impact on the financial statement disclosures and reporting requirements.

Notes to financial statements (unaudited)

11. SUBSEQUENT DISTRIBUTIONS

The Fund declared the following distributions to common shareholders:

Declaration date	Record date	Payable date	Per share amount
October 28, 2016	November 14, 2016	December 1, 2016	\$0.068
November 16, 2016	December 12, 2016	January 3, 2017	0.068

These distributions are not reflected in the accompanying financial statements. The final determination of the source of all distributions is subject to change and made after the Fund's tax year-end.

12. SUBSEQUENT EVENT

On November 23, 2016, the Fund announced an extension of its Buyback Program. Under the extended Buyback Program, the Fund may repurchase up to 10% of its outstanding shares during the period beginning December 17, 2016 and ending December 31, 2017.

PROXY VOTING INFORMATION

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available, upon request, by calling **1-800-222-8222**, visiting our website at **wellsfargofunds.com**, or visiting the SEC website at sec.gov. Information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available on the Fund's website at **wellsfargofunds.com** or by visiting the SEC website at sec.gov.

ANNUAL MEETING OF SHAREHOLDERS

On August 8, 2016, an Annual Meeting of Shareholders for the Fund was held to consider the following proposal. The results of the proposal are indicated below.

Proposal 1 Election of trustees:

Net assets voted	For	Peter G. Gordon	\$ 504,010,681
Net assets voted	Withhold		\$ 18,872,584
Net assets voted	For	Timothy J. Penny	\$ 504,536,569
Net assets voted	Withhold		\$ 18,346,696
Net assets voted	For	Michael S. Scofield	\$ 504,114,652
Net assets voted	Withhold		\$ 18,768,613

PORTFOLIO HOLDINGS INFORMATION

The complete portfolio holdings for the Fund are publicly available monthly on the Fund's website (**wellsfargofunds.com**), on a one-month delayed basis. The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q, which is available by visiting the SEC website at sec.gov. In addition, the Fund's Form N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, DC, and at regional offices in New York City, at 233 Broadway, and in Chicago, at 175 West Jackson Boulevard, Suite 900. Information about the Public Reference Room may be obtained by calling 1-800-SEC-0330.

BOARD OF TRUSTEES AND OFFICERS**

Other information (unaudited)

The following table provides basic information about the Board of Trustees (the Trustees) and Officers of the Fund. Each of the Trustees and Officers¹ listed below acts in identical capacities for each fund in the Wells Fargo family of funds, which consists of 139 mutual funds comprising the Wells Fargo Funds Trust, Wells Fargo Variable Trust, Wells Fargo Master Trust, and four closed-end funds, including the Fund (collectively the Fund Complex). The mailing address of each Trustee and Officer is 525 Market Street, 12th Floor, San Francisco, CA 94105. The Board of Trustees is classified into three classes of which one is elected annually. Each Trustee serves a three-year term concurrent with the class from which the Trustee is elected. Each Officer serves an indefinite term.

Independent Trustees

32 Wells Fargo Income Opportunities Fund	Other information (unaudited)
BOARD CONSIDERATION OF INVESTMENT ADVISORY AND SUB-ADVISORY AGREEMENTS:	

Under the Investment Company Act of 1940 (the 1940 Act), the Board of Trustees (the Board) of Wells Fargo Income Opportunities Fund (the Fund) must determine whether to approve the continuation of the Fund's investment advisory and sub-advisory agreements. In this regard, at an in-person meeting held on May 24-25, 2016 (the Meeting), the Board, all the members of which have no direct or indirect interest in the investment advisory and sub-advisory agreements and are not interested persons of the Fund, as defined in the 1940 Act (the Independent Trustees), reviewed and approved: (i) an investment advisory agreement with Wells Fargo Funds Management, LLC (Funds Management), and (ii) an investment sub-advisory agreement with Wells Capital Management Incorporated (the Sub-Adviser), an affiliate of Funds Management. The investment advisory agreement with Funds Management and the investment sub-advisory agreement with the Sub-Adviser are collectively referred to as the Advisory Agreements.

At the Meeting, the Board considered the factors and reached the conclusions described below relating to the selection of Funds Management and the Sub-Adviser and the continuation of the Advisory Agreements. Prior to the Meeting, including at an in-person meeting in April 2016, the Trustees conferred extensively among themselves and with representatives of Funds Management about these matters. Also, the Board has adopted a team-based approach, with each team consisting of a sub-set of Trustees, to assist the full Board in the discharge of its duties in reviewing performance and other matters throughout the year. The Independent Trustees were assisted in their evaluation of the Advisory Agreements by independent legal counsel, from whom they received separate legal advice and with whom they met separately.

In providing information to the Board, Funds Management and the Sub-Adviser were guided by a detailed set of requests for information submitted to them by independent legal counsel on behalf of the Independent Trustees at the start of the Board's annual contract renewal process earlier in 2016. In considering and approving the Advisory Agreements, the Trustees considered the information they believed relevant, including but not limited to the information discussed below. The Board considered not only the specific information presented in connection with the Meeting, but also the knowledge gained over time through interaction with Funds Management and the Sub-Adviser about various topics. In this regard, the Board reviewed reports of Funds Management at each of its quarterly meetings, which included, among other things, portfolio reviews and performance reports. In addition, the Board and the teams mentioned above confer with portfolio managers at various times throughout the year. The Board did not identify any particular information or consideration that was all-important or controlling, and each individual Trustee may have attributed different weights to various factors.

After its deliberations, the Board unanimously approved the continuation of the Advisory Agreements and determined that the compensation payable to Funds Management and the Sub-Adviser is reasonable. The Board considered the continuation of the Advisory Agreements for the Fund as part of its consideration of agreements for funds across the complex, but its approvals were made on a fund-by-fund basis. The following summarizes a number of important, but not necessarily all, factors considered by the Board in support of its approvals.

Nature, extent and quality of services

The Board received and considered various information regarding the nature, extent and quality of services provided to the Fund by Funds Management and the Sub-Adviser under the Advisory Agreements. This information included, among other things, a summary of the background and experience of senior management of Funds Management, and the qualifications, background, tenure and responsibilities of each of the portfolio managers primarily responsible for

the day-to-day portfolio management of the Fund.

The Board evaluated the ability of Funds Management and the Sub-Adviser to attract and retain qualified investment professionals, including research, advisory and supervisory personnel. The Board further considered the compliance programs and compliance records of Funds Management and the Sub-Adviser. In addition, the Board took into account the full range of services provided to the Fund by Funds Management and its affiliates.

Fund performance and expenses

The Board considered the performance results for the Fund over various time periods ended December 31, 2015. The Board considered these results in comparison to the performance of funds in a Universe that was determined by Broadridge Inc. (Broadridge) to be similar to the Fund (the Universe), and in comparison to the Fund's benchmark index and to other comparative data. The Board received a description of the methodology used by Broadridge to select the funds in the performance Universe. The Board noted that the performance of the Fund was higher than or in range of the average performance of the Universe for all periods under review. The Board also noted that the performance of the Fund was higher than its benchmark, the BofA Merrill Lynch High Yield Master II Index, for all periods under review except the one-year period.

Table of Contents

Other information (unaudited) Wells Fargo Income Opportunities Fund 33

The Board also received and considered information regarding the Fund's net operating expense ratio and its various components, including actual management fees, and custodian and other non-management fees. The Board considered this ratio in comparison to the median ratio of funds in an expense group that was determined by Broadridge to be similar to the Fund (the Group). Broadridge is an independent provider of investment company data. The Board received a description of the methodology used by Broadridge to select the funds in the expense Group and an explanation of how funds comprising expense groups and their expense ratios may vary from year-to-year. Based on the Broadridge reports, the Board noted that the net operating expense ratio of the Fund was lower than the median net operating expense ratio of the expense Group.

The Board took into account the Fund performance and expense information provided to it among the factors considered in deciding to re-approve the Advisory Agreements.

Investment advisory and sub-advisory fee rates

The Board reviewed and considered the contractual investment advisory fee rate that is payable by the Fund to Funds Management for investment advisory services (the Advisory Agreement Rate), both on a stand-alone basis and on a combined basis with the Fund's contractual administration fee rate (the Management Rate). The Board also reviewed and considered the contractual investment sub-advisory fee rate that is payable by Funds Management to the Sub-Adviser for investment sub-advisory services (the Sub-Advisory Agreement Rate).

Among other information reviewed by the Board was a comparison of the Management Rate of the Fund with those of other funds in the expense Group at a common asset level. The Board noted that the Management Rate of the Fund was lower than the average rate for the Fund's expense Group.

The Board also received and considered information about the portion of the total advisory fee that was retained by Funds Management after payment of the fee to the Sub-Adviser for sub-advisory services. In assessing the reasonableness of this amount, the Board received and evaluated information about the nature and extent of responsibilities retained and risks assumed by Funds Management and not delegated to or assumed by the Sub-Adviser, and about Funds Management's on-going oversight services. However, given the affiliation between Funds Management and the Sub-Adviser, the Board ascribed limited relevance to the allocation of the advisory fee between them.

Based on its consideration of the factors and information it deemed relevant, including those described here, the Board determined that the Advisory Agreement Rate and the Sub-Advisory Agreement Rate was reasonable, in light of the services covered by the Advisory Agreements.

Profitability

The Board received and considered information concerning the profitability of Funds Management, as well as the profitability of Wells Fargo as a whole, from providing services to the Fund and the fund family as a whole. The Board also received and considered information concerning the profitability of the Sub-Adviser from providing services to the fund family as a whole, noting that the Sub-Adviser's profitability information with respect to providing services to the Fund was subsumed in the Wells Fargo and Funds Management profitability analysis.

Funds Management reported on the methodologies and estimates used in calculating profitability. Among other things, the Board noted that the levels of profitability reported on a fund-by-fund basis varied widely, depending on factors such as the size and type of fund. Based on its review, the Board did not deem the profits reported by Funds Management or Wells Fargo from its services to the Fund to be at a level that would prevent it from approving the continuation of the Advisory Agreements.

Economies of scale

The Board considered the extent to which there may be sharing with the Fund of potential economies of scale in the provision of advisory services to the Fund. The Board noted that, as is typical of closed-end funds, there are no breakpoints in the Management Rate. Although the Fund would not share in any potential economies of scale through contractual breakpoints, the Board noted that fee waiver and expense reimbursement arrangements and competitive fee rates at the outset are means of sharing potential economies of scale with shareholders of the Fund and the fund family as a whole. The Board concluded that the Fund's fee waiver and expense arrangements constituted a reasonable approach to sharing potential economies of scale with the Fund and its shareholders. The Board also noted that it would have opportunities to revisit the Management Rate as part of future contract reviews.

Other benefits to Funds Management and the Sub-Adviser

The Board received and considered information regarding potential fall-out or ancillary benefits received by Funds Management and its affiliates, including the Sub-Adviser, as a result of their relationships with the Fund. Ancillary benefits

Table of Contents

34 Wells Fargo Income Opportunities Fund Other information (unaudited) could include, among others, benefits directly attributable to other relationships with the Fund and benefits potentially derived from an increase in Funds Management's and the Sub-Adviser's business as a result of their relationships with the Fund. The Board also reviewed information about soft dollar credits earned and utilized by the Sub-Adviser and commissions earned by affiliated brokers from portfolio transactions.

Based on its consideration of the factors and information it deemed relevant, including those described here, the Board did not find that any ancillary benefits received by Funds Management and its affiliates, including the Sub-Adviser, were unreasonable.

Conclusion

At the Meeting, after considering the above-described factors and based on its deliberations and its evaluation of the information described above, the Board unanimously approved the continuation of the Advisory Agreements for an additional one-year period and determined that the compensation payable to Funds Management and the Sub-Adviser is reasonable.

Automatic dividend reinvestment plan

Wells Fargo Income Opportunities Fund 35

AUTOMATIC DIVIDEND REINVESTMENT PLAN

All common shareholders are eligible to participate in the Automatic Dividend Reinvestment Plan (the Plan). Pursuant to the Plan, unless a common shareholder is ineligible or elects otherwise, all cash dividends and capital gains distributions are automatically reinvested by Computershare Trust Company, N.A., as agent for shareholders in administering the Plan (Plan Agent), in additional common shares of the Fund. Whenever the Fund declares an ordinary income dividend or a capital gain dividend (collectively referred to as dividends) payable either in shares or in cash, nonparticipants in the Plan will receive cash, and participants in the Plan will receive the equivalent in common shares. The shares are acquired by the Plan Agent for the participant s account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund (newly issued common shares) or (ii) by purchase of outstanding common shares on the open-market (open-market purchases) on the NYSE Amex or elsewhere. If, on the payment date for any dividend or distribution, the net asset value per share of the common shares is equal to or less than the market price per common share plus estimated brokerage commissions (market premium), the Plan Agent will invest the amount of such dividend or distribution in newly issued shares on behalf of the participant. The number of newly issued common shares to be credited to the participant s account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value (market discount), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases. There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gains distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent s open-market purchases in connection with the reinvestment of dividends. The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends. All correspondence concerning the Plan should be directed to the Plan Agent at P.O. Box 30170, College Station, Texas 77842-3170 or by calling 1-800-730-6001.
