Since inception, SWZ has paid \$21.60 per share in total distributions to investors. This equates to an annualized rate of 10.1% based on the IPO price (after adjustment for Oct. 1998 2:1 stock split) Since 2005, SWZ has declared and paid to investors over \$379 million in dividends and distributions, an amount greater than SWZ's current net assets SWZ provides a competitive yield on both a share price and NAV basis Since July 1, 2014, SWZ has paid \$3.54 per share in total distributions to investors. This equates to an annualized rate of 7.55% based on share price and 6.81% based on NAV, as of April 30, 2018 Over the same period, the average annualized distribution rate of the Fund's Peer Group was 7.4% and 6.7% on share price and NAV, respectively SWZ recently announced the adoption of a managed distribution plan (MDP) SWZ currently intends to pay out quarterly distributions at an annualized rate of 6.00% starting in June 2018 Attractive distributions Source: Bloomberg

SWZ's discount: in-line with its peers As of April 30, 2018, SWZ's discount to NAV has narrowed since Schroders became the Fund's investment manager on July 1, 2014 SWZ's discount of 8.5% as of May 24, 2018 is consistent with its peer group Source: Bloomberg

Board nominees The Board's two nominees, Brian A. Berris and Jean E. Hoysradt, are "independent" Directors (under both 1940 Act and NYSE standards) Mr. Berris and Ms. Hoysradt are highly experienced and accomplished, and have extensive business and investment management backgrounds (please see biographies in the Appendix) Mr. Berris has been a Director of the Fund since 2012, and has served as Chairman of the Board since 2015. He is a member of the Governance/Nominating Committee, and a former member of the Audit Committee Ms. Hoysradt was elected by stockholders in 2017. She is Chair of the Board's Pricing Committee, and is a member of the Governance/Nominating and Audit Committees. Ms. Hoysradt is an "audit committee financial expert" Neither Board nominee is affiliated with Schroders or Bulldog In connection with SWZ's proxy contest with Bulldog in 2017, ISS recommended a vote "FOR" each of the Board's then-nominees, including Ms. Hoysradt The Independent Directors, who constitute 80% of SWZ's Board, believe that the Board's two Director nominees are better qualified and will better serve the interests of all of SWZ's stockholders.

Bulldog nominees Both of Bulldog's nominees have current relationships with Bulldog and may pursue actions to benefit Bulldog's constituents, rather than all of SWZ's stockholders Mr. Goldstein is a co-founder and principal of Bulldog By his own estimate provided several years ago, Mr. Goldstein's actions have been a "factor" in the termination of 10 funds As a principal of Bulldog, Mr. Goldstein has fiduciary duties to Bulldog that may—and likely will—conflict with his fiduciary obligations to SWZ's stockholders Mr. Hellerman currently serves as a director and the chief compliance officer of the funds for which Mr. Goldstein serves as a director Mr. Hellerman previously served with Mr. Goldstein on the boards of certain funds that have liquidated or are in the process of liquidating Mr. Hellerman (age 80) would not be an eligible Director nominee under the Board's age limitation set forth in the Fund's Governance and Nominating Committee Charter (i.e., he would be a one-term Director)

Overall, the historical track record of Bulldog's nominees is one of destabilization—funds tend to undergo significant tender offers, terminate their investment advisers or are liquidated Bulldog does not evidence why either of its nominees will better serve the interests of SWZ's stockholders On the contrary, SWZ has performed well, returned on its investment objective and its Board nominees have taken significant actions to protect and enhance stockholder value The election of Bulldog's nominees would give Bulldog control over SWZ's Board (4 of 5 Directors would have been nominated by Bulldog over the last two years) This would permit Bulldog to pursue its agenda—which may include measures that could adversely affect SWZ's investment operations and performance, as well as the potential liquidation of SWZ, to the detriment of SWZ's long-term stockholders—unchecked by SWZ's other Directors Even the destabilization of the Fund has a short-term impact on SWZ's stockholders to the extent the Fund has incurred increased expenses over the last 24 months due to activist pressure Bulldog nominees (con't) There is little reason to expect that Bulldog's nominees have the best interests of SWZ's stockholders in mind.

The Board's historical and more recent actions demonstrate a continued commitment to all of SWZ's stockholders—those actions have included: providing periodic liquidity to stockholders without creating a meaningful adverse effect on the Fund's performance, portfolio management or expense ratio; implementing a managed distribution plan; engaging in stock buybacks; continuing to seek ways in which to reduce Fund expenses; and continuing to evaluate other ways to manage the Fund's discount. Over the last seven years, the Board has authorized three tender offers for between 5% and 15% of SWZ's then-outstanding shares, including the 2017 tender offer in which SWZ repurchased 10% of its shares at 98% of NAV. As the Fund has appreciated in value over the years, the Board has concluded that it is appropriate for the Fund's stockholders, especially its long-term stockholders, to benefit from those gains through periodic tender offers or increased distributions; not through significant tender offers. Board actions to protect/enhance stockholder value

Over the last 19 years (with the exception of 2014), the Board has authorized an annual stock repurchase program. Since 1999, the Fund has repurchased approximately 8.8 million shares of its common stock, which has provided aggregate accretion to the Fund's net asset value of approximately \$22 million or \$0.83 per share. On May 29, 2018, the Board adopted an MDP. The purpose of the MDP is to enable the payment of long-term capital gains more frequently than once per year, thereby making it more likely that stockholders receive consistent, level distributions. The MDP could facilitate stable earnings distributions to stockholders—which would include realized earnings as well as potential returns of capital—without the negative consequences of a significant tender offer. The Directors review and discuss Fund expenses, performance and trading discounts regularly, including in connection with quarterly meetings. Board actions to protect/enhance stockholder value (con't)

Board actions: good corporate governance Until 2017, the Board had been entirely comprised of Independent Directors since Schroders took over management in 2014 Andrew Dakos, a principal of Bulldog, was elected by stockholders in 2017; the Board has determined he is an interested director The Board and its committees engage in annual self-assessments and consider industry best practices All Directors are stockholders of SWZ In 2017, the Fund's then-Directors enforced the Board's long-standing retirement policy, resulting in the loss of two long-standing Independent Directors In 2017, the Fund's then-Directors recommended, and stockholders approved, declassification of the Board—a step few closed-end funds have taken The Board also undertook a broad review of the Fund's By-Laws to consider potential revisions as a matter of (i) changes in state law, (ii) best practices, and (iii) expressed stockholder support; as a result, the Fund announced an amendment and restatement of its By-Laws in December 2017 In recent years, the Board has undertaken efforts to reduce its size and costs, resulting in cost savings to SWZ and its stockholders

Bulldog's agenda In 2013, Bulldog filed its first Schedule 13D seeking, among other things, a large tender offer After SWZ's 15% tender offer in 2014, Bulldog's ownership fell below 5% and no further activist measures were taken by Bulldog until September 2016 Bulldog supported the efforts of the Fund's then-Independent Directors to replace SWZ's investment adviser in 2014 Bulldog continues to remain focused on a short-term agenda to benefit its own constituents—not SWZ's stockholders Last year, Mr. Goldstein submitted a non-binding proposal seeking a 100% tender offer, which, if approved and conducted, could have led to the Fund's liquidation or conversion to a mutual fund or ETF (as first advocated by Bulldog in a Schedule 13D filed on September 23, 2016) The proposal was opposed by the Fund's then-Directors as well as ISS, and was rejected by the Fund's stockholders, with approximately only 25% of the votes cast in favor of the proposal The election of Bulldog's nominees could adversely affect the Fund's investment operations and performance to the detriment of all stockholders If Bulldog were to control the Fund's Board, it could pursue its agenda unchecked by the Fund's other Directors

Bulldog's agenda (con't) Bulldog has submitted a non-binding proposal seeking at least a 50% tender offer. The Independent Directors do not believe that this proposal is in the best interests of SWZ and all of its stockholders. Risks include: Significant increase in SWZ's expense ratio and reduction in future earnings and gains Significant negative tax consequences (39% of SWZ's NAV is comprised of capital gains as of March 31, 2018) and incurrence of material transactional expenses Constraints on Schroders' ability to manage SWZ according to its investment objective and investment strategies Bulldog wants SWZ and its stockholders to reimburse Bulldog for its proxy solicitation and litigation costs Stockholders should not have to bear the costs associated with Bulldog's short term agenda Bulldog is not asking stockholders to vote on whether such reimbursement is appropriate Bulldog is asking the Fund for reimbursement for its litigation costs, in addition to its proxy solicitation costs, even while a court decision on the same matter is pending The Independent Directors strongly oppose the tender offer proposal, as it is inconsistent with the Independent Directors' ongoing efforts to enhance stockholder value and provide periodic liquidity without having a material adverse effect on SWZ's performance, portfolio management or expense ratio.

Special Meeting Proposal A stockholder submitted a non-binding proposal seeking a reduction of the ownership threshold required for stockholders to call a special meeting to 10%. SWZ always has provided stockholders a right to call special meetings. The Delaware General Corporation Law does not provide a corporation's stockholders with a right to call special meetings; over 66% of public DE corporations do not provide stockholders a right to call special meetings. SWZ's special meeting By-Law is more permissive than those of its peers, and does not have any burdensome restrictions or exclusionary or prohibitive language. The Fund's By-Laws also provide stockholders the right to act by written consent (obviating the need for a special meeting). 10% threshold is too low for the Fund. Nearly 50% of the Fund's outstanding voting securities are held by four record stockholders, with two stockholders holding the power to vote over 10% of the Fund's shares (one holding in excess of 20% and two other stockholders each holding close to 9%). Special stockholder meetings can be expensive and time-consuming. The Board's recent review of the Fund's By-Laws concluded that the current ownership threshold was appropriate. The Board does not believe that this proposal is in the best interests of SWZ and its stockholders. It believes that the current 25% threshold strikes the appropriate balance between the right to call special meetings and the costs associated therewith.

Conclusion

Conclusion SWZ continues to deliver on its investment objective to provide long-term capital appreciation to investors. Since Schroders started managing the Fund in July 2014, SWZ has delivered strong performance, both relative to its peer group and other Swiss-focused registered funds, as well as its performance benchmark. SWZ's trading discount is in line with its peers; the Board actively monitors the discount and takes regular action to seek to manage it. The Independent Directors, including the Board's nominees, are actively engaged in overseeing the Fund for the benefit of all stockholders. The Independent Directors believe the Board's two Director nominees are more qualified and will better serve the interests of all SWZ's stockholders. The Independent Directors strongly disagree with Bulldog's agenda, which is intended to coerce the Board into taking destabilizing actions and is not intended to serve the long-term interests of SWZ's stockholders.

The value of investments can fall as well as rise as a result of market or currency movements. All investments, domestic and foreign, involve risks, including the risk of possible loss of principal. The market value of a fund's portfolio may decline as a result of a number of factors, including adverse economic and market conditions, prospects of stocks in the portfolio, changing interest rates, and real or perceived adverse competitive industry conditions. Investing overseas involves special risks including among others risks related to political or economic instability, foreign currency (such as exchange, valuation, and fluctuation) risk, market entry or exit restrictions, illiquidity, and taxation. The Swiss securities markets have substantially less trading volume than the U.S. securities markets. Additionally, the capitalization of the Swiss securities markets is highly concentrated. Securities of some companies located in Switzerland will be less liquid and more volatile than securities of comparable U.S. companies. This combination of lower volume and greater concentration in the Swiss securities markets may create a risk of greater price volatility than in the U.S. securities markets.
