Registrant s telephone number, including area code: (844) 337-4626

Date of fiscal year end: December 31

Date of reporting period: June 30, 2018

Form N-CSR is to be used by management investment companies to file reports with the Commission not later than 10 days after the transmission to stockholders of any report that is required to be transmitted to stockholders under Rule 30e-1 under the Investment Company Act of 1940 (17 CFR 270.30e-1). The Commission may use the information provided on Form N-CSR in its regulatory, disclosure review, inspection, and policymaking roles.

A registrant is required to disclose the information specified by Form N-CSR, and the Commission will make this information public. A registrant is not required to respond to the collection of information contained in Form N-CSR unless the Form displays a currently valid Office of Management and Budget (OMB) control number. Please direct comments concerning the accuracy of the information collection burden estimate and any suggestions for reducing the burden to Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0609. The OMB has reviewed this collection of information under the clearance requirements of 44 U.S.C. § 3507.

Item 1. Reports to Shareholders.

The following is a copy of the report transmitted to shareholders pursuant to Rule 30e-1 under the Investment Company Act of 1940, as amended (the 1940 Act) (17 CFR 270.30e-1).

Letter from the Chairman of the Board & President

Dear Shareholder,

Following is the PIMCO Closed-End Funds Semiannual Report, which covers the six-month reporting period ended June 30, 2018. On the subsequent pages you will find specific details regarding investment results and a discussion of factors that most affected performance over the reporting period.

For the six-month reporting period ended June 30, 2018

The U.S. economy continued to expand during the reporting period. Looking back, U.S. gross domestic product (GDP) expanded at a revised annual pace of 2.3% and 2.2% during the fourth quarter of 2017 and first quarter of 2018, respectively. The Commerce Department s initial reading released after the reporting period had ended showed that second-quarter 2018 GDP grew at an annual pace of 4.1%.

The Federal Reserve (Fed) continued to normalize monetary policy during the reporting period. After raising interest rates three times in 2017, the Fed again raised rates at its March 2018 meeting, pushing the federal funds rate to a range between 1.50% and 1.75%. Finally, at its meeting that concluded on June 13, 2018, the Fed raised rates to a range between 1.75% and 2.00%.

Economic activity outside the U.S. moderated somewhat during the reporting period. Against this backdrop, the European Central Bank (ECB), the Bank of Japan and the Bank of England largely maintained their highly accommodative monetary policies. Other central banks took a more hawkish stance, including the Bank of Canada, as it raised rates in January 2018. Meanwhile, in June 2018, the ECB indicated that it plans to end its quantitative easing program by the end of the year, but it did not expect to raise interest rates at least through the summer of 2019.

The U.S. Treasury yield curve flattened during the reporting period, as short-term rates moved up more than their longer-term counterparts. The increase in rates at the short end of the yield curve was mostly due to Fed interest rate hikes. The yield on the benchmark 10-year U.S. Treasury note was 2.85% at the end of the reporting period, up from 2.40% on December 31, 2017. U.S. Treasuries, as measured by the Bloomberg Barclays U.S. Treasury Index, returned -1.08% over the six months ended June 30, 2018. Meanwhile the Bloomberg Barclays U.S. Aggregate Bond Index, a widely used index of U.S. investment grade bonds, returned -1.62% over the period. Riskier fixed income asset classes, including high yield corporate bonds and emerging market debt, generated mixed results versus the broad U.S. market. The ICE BofAML U.S. High Yield Index gained 0.08% over the reporting period, whereas emerging market external debt, as represented by the JPMorgan Emerging Markets Bond Index (EMBI) Global, returned -5.23% over the reporting period. Emerging market local bonds, as represented by the JPMorgan Government Bond Index-Emerging Markets Global Diversified Index (Unhedged), returned -6.44% over the period.

The municipal (or muni) market produced choppy results during the reporting period. After declining over the first two months, the muni market posted positive returns during three of the last four months of the reporting period. While munis were negatively impacted by rising interest rates, their losses were tempered by overall positive investor demand and moderating supply. All told, the Bloomberg Barclays Municipal Bond Index returned -0.25% during the six months ended June 30, 2018.

Thank you for the assets you have placed with us. We deeply value your trust, and will continue to work diligently to meet your broad
investment needs. For any questions regarding your PIMCO Closed-End Funds investments, please contact your financial advisor, or call the
Funds shareholder servicing agent at (844) 33-PIMCO. We also invite you to visit our website at pimco.com to learn more about our global
viewpoints.

Sincerely,

Hans W. Kertess Chairman of the Board of Trustees Peter G. Strelow President

Past performance is no guarantee of future results.

SEMIANNUAL REPORT JUNE 30, 2018

3

Important Information About the Funds

We believe that bond funds have an important role to play in a well-diversified investment portfolio. It is important to note, however, that in an environment where interest rates may trend upward, rising rates would negatively impact the performance of most bond funds, and fixed-income securities and other instruments held by a Fund are likely to decrease in value. A wide variety of factors can cause interest rates to rise (e.g., central bank monetary policies, inflation rates, general economic conditions). In addition, changes in interest rates can be sudden and unpredictable, and there is no guarantee that Fund management will anticipate such movement accurately. A Fund may lose money as a result of movement in interest rates.

As of the date of this report, interest rates in the U.S. and many parts of the world, including certain European countries, are at or near historically low levels. As such, bond funds may currently face an increased exposure to the risks associated with a rising interest rate environment. This is especially true as the Fed ended its quantitative easing program in October 2014 and has begun, and may continue, to raise interest rates. To the extent the Federal Reserve Board continues to raise interest rates, there is a risk that rates across the financial system may rise. Further, while bond markets have steadily grown over the past three decades, dealer inventories of corporate bonds are near historic lows in relation to market size. As a result, there has been a significant reduction in the ability of dealers to make markets. Bond funds and individual bonds with a longer duration (a measure used to determine the sensitivity of a security s price to changes in interest rates) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities or funds with shorter durations. In addition, in the current low interest rate environment, the market price of the Funds common shares may be particularly sensitive to changes in interest rates or the perception that there will be a change in interest rates. All of the factors mentioned above, individually or collectively, could lead to increased volatility and/or lower liquidity in the fixed income markets or negatively impact a Fund s performance or cause a Fund to incur losses. Additionally, the United States presidential administration s enforcement of tariffs on goods from other countries, with a focus on China, has contributed to international trade tensions and may impact portfolio securities.

Investing in the municipal bond market involves the risks of investing in debt securities generally and certain other risks. The amount of public information available about the municipal bonds in which a Fund may invest is generally less than that for corporate equities or bonds, and the investment performance of a Fund s investment in municipal bonds may therefore be more dependent on the analytical abilities of PIMCO than its investments in taxable bonds. The secondary market for municipal bonds also tends to be less well-developed or liquid than many other securities markets, which may adversely affect a Fund s ability to sell its bonds at attractive prices.

The ability of municipal issuers to make timely payments of interest and principal may be diminished during general economic downturns, by litigation, legislation or political events, or by the bankruptcy of the issuer. Laws, referenda, ordinances or regulations enacted in the future by Congress or state legislatures or the applicable governmental entity could extend the time for payment of principal and/or interest, or impose other constraints on enforcement of such obligations, or on the ability of municipal issuers to levy taxes. Issuers of municipal securities also might seek protection under the bankruptcy laws. In the event of bankruptcy of such an issuer, a Fund could experience delays in collecting principal and interest and the Fund may not, in all circumstances, be able to collect all principal and interest to which it is entitled. To enforce its rights in the event of a default in the payment of interest or repayment of principal, or both, a Fund may take possession of and manage the assets securing the issuer s obligations on such securities, which may increase the Fund s operating expenses. Any income derived from the Fund s ownership or operation of such assets may not be tax-exempt.

A Fund that has substantial exposures to California municipal bonds may be affected significantly by economic, regulatory or political developments affecting the ability of California issuers to pay interest or repay principal. Certain issuers of California municipal bonds have experienced serious financial difficulties in the past and reoccurrence of these difficulties may impair the ability of certain California issuers to pay principal or interest on their obligations. Provisions of the California Constitution and State statutes that limit the taxing and spending authority of California governmental entities may impair the ability of California issuers to pay principal and/or interest on their obligations. While California s economy is broad, it does have major concentrations in high technology, aerospace and defense-related manufacturing, trade, entertainment, real estate and financial services, and may be sensitive to economic problems affecting those industries. Future California political and economic developments, constitutional amendments, legislative measures, executive orders, administrative regulations, litigation and voter initiatives could have an adverse effect on the debt obligations of California issuers.

A Fund that has substantial exposures to New York municipal bonds may be affected significantly by economic, regulatory or political developments affecting the ability of New York issuers to pay interest or repay principal. While New York s economy is broad, it does have concentrations in the financial services industry, and may be sensitive to economic problems affecting that industry. Certain issuers of New York municipal bonds have experienced serious financial difficulties in the past and reoccurrence of these difficulties may impair the ability of certain New York issuers to pay principal or interest on their obligations. The financial health of New York City affects that of the

4 PIMCO CLOSED-END FUNDS

Table of Contents

State, and when New York City experiences financial difficulty it may have an adverse effect on New York municipal bonds held by a Fund. The growth rate of New York has at times been somewhat slower than the nation overall. The economic and financial condition of New York also may be affected by various financial, social, economic and political factors.

The use of derivatives may subject the Funds to greater volatility than investments in traditional securities. The Funds may use derivative instruments for hedging purposes or as part of an investment strategy. Use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, call risk, credit risk, leverage risk, management risk and the risk that a Fund may not be able to close out a position when it would be most advantageous to do so. Changes in regulation relating to a Fund s use of derivatives and related instruments could potentially limit or impact a Fund s ability to invest in derivatives, limit a Fund s ability to employ certain strategies that use derivatives and/or adversely affect the value or performance of derivatives and the Fund. Certain derivative transactions may have a leveraging effect on a Fund. For example, a small investment in a derivative instrument may have a significant impact on a Fund s exposure to interest rates, currency exchange rates or other investments. As a result, a relatively small price movement in an asset, instrument or component of the index underlying a derivative instrument may cause an immediate and substantial loss or gain, which translates into heightened volatility in a Fund s net asset value (NAV). A Fund may engage in such transactions regardless of whether the Fund owns the asset, instrument or components of the index underlying the derivative instrument. A Fund may invest a significant portion of its assets in these types of instruments. If it does, a Fund s investment exposure could far exceed the value of its portfolio securities and its investment performance could be primarily dependent upon securities it does not own.

A Fund s use of leverage creates the opportunity for increased income for the Fund s common shareholders, but also creates special risks. Leverage is a speculative technique that may expose a Fund to greater risk and increased costs. If shorter-term interest rates rise relative to the rate of return on a Fund s portfolio, the interest and other costs of leverage to the Fund could exceed the rate of return on the debt obligations and other investments held by the Fund, thereby reducing return to the Fund s common shareholders. In addition, fees and expenses of any form of leverage used by a Fund will be borne entirely by its common shareholders (and not by preferred shareholders, if any) and will reduce the investment return of the Fund s common shares. There can be no assurance that a Fund s use of leverage will result in a higher yield on its common shares, and it may result in losses. Leverage creates several major types of risks for a Fund s common shareholders,

including: (1) the likelihood of greater volatility of net asset value and market price of the Fund s common shares, and of the investment return to the Fund s common shareholders, than a comparable portfolio without leverage; (2) the possibility either that the Fund s common share dividends will fall if the interest and other costs of leverage rise, or that dividends paid on the Fund s common shares will fluctuate because such costs vary over time; and (3) the effects of leverage in a declining market or a rising interest rate environment, as leverage is likely to cause a greater decline in the net asset value of the Fund s common shares than if the Fund were not leveraged and may result in a greater decline in the market value of the Fund s common shares. Moreover, to make payments of interest and other loan costs, a Fund may be forced to sell portfolio securities when it is not otherwise advantageous to do so.

There is a risk that a Fund investing in a tender option bond program will not be considered the owner of a tender option bond for federal income tax purposes, and thus will not be entitled to treat such interest as exempt from federal income tax. Certain tender option bonds may be illiquid or may become illiquid as a result of, among other things, a credit rating downgrade, a payment default or a disqualification from tax-exempt status. A Fund s investment in the securities issued by a tender option bond trust may involve greater risk and volatility than an investment in a fixed rate bond, and the value of such securities may decrease significantly when market interest rates increase. Tender option bond trusts could be terminated due to market, credit or other events beyond the Funds control, which could require the Funds to dispose of portfolio investments at inopportune times and prices. A Fund may use a tender option bond program as a way of achieving leverage in its portfolio, in which case the Fund will be subject to leverage risk.

High-yield bonds (commonly referred to as junk bonds) typically have a lower credit rating than other bonds. Lower-rated bonds generally involve a greater risk to principal than higher-rated bonds. Further, markets for lower-rated bonds are typically less liquid than for higher-rated bonds, and public information is usually less abundant in markets for lower-rated bonds. Thus, high yield investments increase the chance that a Fund will lose money. PIMCO does not rely solely on credit ratings, and develops its own analysis of issuer credit quality. A Fund may purchase

unrated securities (which are not rated by a rating agency) if PIMCO determines that the security is of comparable quality to a rated security that a Fund may purchase. Unrated securities may be less liquid than comparable rated securities and involve the risk that PIMCO may not accurately evaluate the security s comparative credit quality, which could result in a Fund s portfolio having a higher level of credit and/or high yield risk than PIMCO has estimated or desires for the Fund, and could negatively impact the Fund s performance and/or

SEMIANNUAL REPORT JUNE 30, 2018

5

Important Information About the Funds (Cont.)

returns. Certain Funds may invest a substantial portion of their assets in unrated securities and therefore may be particularly subject to the associated risks. Analysis of the creditworthiness of issuers of high yield securities may be more complex than for issuers of higher-quality debt obligations. To the extent that a Fund invests in high yield and/or unrated securities, the Fund success in achieving its investment objectives may depend more heavily on the portfolio manager sucreditworthiness analysis than if the Fund invested exclusively in higher-quality and rated securities. The Funds may hold defaulted securities that may involve special considerations including bankruptcy proceedings, other regulatory and legal restrictions affecting the Funds ability to trade, and the availability of prices from independent pricing services or dealer quotations. Defaulted obligations might be repaid only after lengthy workout or bankruptcy proceedings, during which the issuer might not make any interest or other payments. Defaulted securities are often illiquid and may not be actively traded. Sales of securities in bankrupt companies at an acceptable price may be difficult and differences compared to the value of the securities used by the Funds could be material. The credit quality of a particular security or group of securities does not ensure the stability or safety of the overall portfolio.

Variable and floating rate securities generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Conversely floating rate securities will not generally increase in value if interest rates decline. Inverse floating rate securities may decrease in value if interest rates increase. Inverse floating rate securities may also exhibit greater price volatility than a fixed rate obligation with similar credit quality. When a Fund holds variable or floating rate securities, a decrease (or, in the case of inverse floating rate securities, an increase) in market interest rates will adversely affect the income received from such securities and the NAV of the Funds—shares.

Municipal obligations issued by the Commonwealth of Puerto Rico or its political subdivisions, agencies, instrumentalities, or public corporations may be affected by economic, market, political, and social conditions in Puerto Rico. Puerto Rico currently is experiencing significant fiscal and economic challenges, including substantial debt service obligations, high levels of unemployment, underfunded public retirement systems, the severe impact of two hurricanes, and persistent government budget deficits. These challenges may negatively affect the value of a Fund s investments in Puerto Rico municipal securities. Major ratings agencies have downgraded the general obligation debt of Puerto Rico to below investment grade and continue to maintain a negative outlook for this debt, which increases the likelihood that the rating will be lowered further. In both August 2015 and January 2016, Puerto Rico defaulted on its debt by failing to make full payment due on its outstanding

bonds, and there can be no assurance that Puerto Rico will be able to satisfy its future debt obligations. Further downgrades or defaults may place additional strain on the Puerto Rico economy and may negatively affect the value, liquidity, and volatility of the Funds investments in Puerto Rico municipal securities. Legislation, including legislation that would allow Puerto Rico to restructure its municipal debt obligations, thus increasing the risk that Puerto Rico may never pay off municipal indebtedness, or may pay only a small fraction of the amount owed, could also impact the value of a Funds investments in Puerto Rico municipal securities.

These challenges and uncertainties have been exacerbated by Hurricane Maria and the resulting natural disaster in Puerto Rico. In September 2017, Hurricane Maria struck Puerto Rico, causing major damage across the Commonwealth, including damage to its water, power, and telecommunications infrastructure. The length of time needed to rebuild Puerto Rico s infrastructure is unclear, but could amount to years, during which the Commonwealth is likely to be in an uncertain economic state. The full extent of the natural disaster s impact on Puerto Rico s economy and foreign investment in Puerto Rico is difficult to estimate.

As the use of technology has become more prevalent in the course of business, the Funds have become potentially more susceptible to operational and information security risks resulting from breaches in cyber security. A breach in cyber security refers to both intentional and unintentional cyber events that may, among other things, cause a Fund to lose proprietary information, suffer data corruption and/or destruction or lose operational capacity, result in the unauthorized release or other misuse of confidential information, or otherwise disrupt normal business operations. Cyber security breaches may involve unauthorized access to a Fund s digital information systems (e.g., through hacking or malicious software coding), but may also result from outside attacks such as denial-of-service attacks (i.e., efforts to make network services unavailable to

intended users). In addition, cyber security breaches involving a Fund s third party service providers (including but not limited to advisers, sub-advisers, administrators, transfer agents, custodians, distributors and other third parties), trading counterparties or issuers in which a Fund invests can also subject a Fund to many of the same risks associated with direct cyber security breaches. Moreover, cyber security breaches involving trading counterparties or issuers in which a Fund invests could adversely impact such counterparties or issuers and cause the Fund s investment to lose value.

Cyber security failures or breaches may result in financial losses to a Fund and its shareholders. These failures or breaches may also result in disruptions to business operations, potentially resulting in financial losses; interference with a Fund s ability to calculate its net asset value,

6 PIMCO CLOSED-END FUNDS

Table of Contents

process shareholder transactions or otherwise transact business with shareholders; impediments to trading; violations of applicable privacy and other laws; regulatory fines; penalties; reputational damage; reimbursement or other compensation costs; additional compliance and cyber security risk management costs and other adverse consequences. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future.

Like with operational risk in general, the Funds have established business continuity plans and risk management systems designed to reduce the risks associated with cyber security. However, there are inherent limitations in these plans and systems, including that certain risks may not have been identified, in large part because different or unknown threats may emerge in the future. As such, there is no guarantee that such efforts will succeed, especially because the Funds do not directly control the cyber security systems of issuers in which a Fund may invest, trading counterparties or third party service providers to the Funds. There is also a risk that cyber security breaches may not be detected. The Funds and their shareholders could be negatively impacted as a result.

The common shares of the Funds trade on the New York Stock Exchange. As with any stock, the price of a Fund s common shares will fluctuate with market conditions and other factors. If you sell your common shares of a Fund, the price received may be more or less than your original investment. Shares of closed-end management investment companies frequently trade at a discount from their net asset value.

The common shares of a Fund may trade at a price that is less than the initial offering price and/or the net asset value of such shares. Further, if a Fund s shares trade at a price that is more than the initial offering price and/or the net asset value of such shares, including at a substantial premium and/or for an extended period of time, there is no assurance that any such premium will be sustained for any period of time and will not decrease, or that the shares will not trade at a discount to net asset value thereafter.

The Funds may be subject to various risks, including, but not limited to, the following: asset allocation risk, credit risk, stressed securities risk, distressed and defaulted securities risk, corporate bond risk, high yield risk, market risk, issuer risk, liquidity risk, equity securities and related market risk, mortgage-related and other asset-backed securities risk, extension risk, prepayment risk, privately issued mortgage-related securities risk, mortgage market/ subprime risk, currency risk, redenomination risk, non-diversification risk, management risk, municipal bond risk, tender option bond risk, inflation-indexed security risk, senior debt risk, loans, participations and assignments risk, reinvestment risk, real estate risk, U.S. Government securities risk, valuation risk, valuation risk,

segregation and cover risk, focused investment risk, credit default swaps risk, event-linked securities risk, counterparty risk, preferred securities risk, confidential information access risk, other investment companies risk, private placements risk, inflation/deflation risk, regulatory risk, tax risk, recent economic conditions risk, market disruptions and geopolitical risk, potential conflicts of interest involving allocation of investment opportunities, repurchase agreements risk, securities lending risk, zero-coupon bond and payment-in-kind securities risk, portfolio turnover risk, smaller company risk, short sale risk and convertible securities risk. A description of certain of these risks is available in the Notes to Financial Statements of this Report.

On each Fund Summary page in this Shareholder Report, the Average Annual Total Return table measures performance assuming that all dividend and capital gain distributions were reinvested. Total return is calculated by determining the percentage change in NAV or market price (as applicable) in the specified period. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions. Total return for a period of more than one year represents the average annual total return. Performance at market price will differ from results at NAV. Although market price returns tend to reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about a Fund, market conditions, supply and demand for the Fund s shares, or changes in the Fund s dividends. Performance shown is net of fees and expenses.

The following table discloses the commencement of operations and diversification status of each Fund:

Fund Name	Commencement of Operations	Diversification Status
PIMCO Municipal Income Fund	06/29/01	Diversified
PIMCO Municipal Income Fund II	06/28/02	Diversified
PIMCO Municipal Income Fund III	10/31/02	Diversified
PIMCO California Municipal Income Fund	06/29/01	Diversified
PIMCO California Municipal Income Fund II	06/28/02	Diversified

Important Information About the Funds (Cont.)

procure through other parties, necessary or desirable services on behalf of the Funds. Shareholders are not parties to or third-party beneficiaries of such service agreements. Neither a Fund s original or any subsequent prospectus or Statement of Additional Information (SAI), any press release or shareholder report, any contracts filed as exhibits to a Fund s registration statement, nor any other communications, disclosure documents or regulatory filings from or on behalf of a Fund creates a contract between or among any shareholders of a Fund, on the one hand, and the Fund, a service provider to the Fund, and/or the Trustees or officers of the Fund, on the other hand. The Trustees (or the Funds and their officers, service providers or other delegates acting under authority of the Trustees) may amend its most recent or use a new prospectus or SAI with respect to a Fund, adopt and disclose new or amended policies and other changes in press releases and shareholder reports and/or amend, file and/or issue any other communications, disclosure documents or regulatory filings, and may amend or enter into any contracts to which a Fund is a party, and interpret the investment objective(s), policies, restrictions and contractual provisions applicable to any Fund, without shareholder input or approval, except in circumstances in which shareholder approval is specifically required by law (such as changes to fundamental investment policies) or where a shareholder approval requirement was specifically disclosed in a Fund s prospectus, SAI or shareholder report and is otherwise still in effect.

PIMCO has adopted written proxy voting policies and procedures (Proxy Policy) as required by Rt106(4)-6 under the Investment Advisers Act of 1940. The Proxy Policy has been adopted by the Funds as the policies and procedures that PIMCO will use when voting proxies on behalf of the Funds. A description of the policies and procedures that PIMCO uses to vote proxies relating to portfolio securities of each Fund, and information about how each Fund voted proxies relating to portfolio securities held during the most recent twelve-month period ended June 30, are available without charge, upon request, by calling the Funds at (844) 33-PIMCO (844-337-4626), on the Funds website at www.pimco.com, and on the Securities and Exchange Commission s (SEC) website at http://www.sec.gov.

Each Fund files a complete schedule of its portfolio holdings with the SEC for the first and third quarters of its fiscal year on Form N-Q. A copy of each Fund s FornN-Q is available on the SEC s website at http://www.sec.gov and may be reviewed and copied at the SEC s Public Reference Room in Washington, D.C., and is available without charge, upon request by calling the Funds at (844) 33-PIMCO (844-337-4626) and on the Funds website at www.pimco.com.

Updated portfolio holdings information about a Fund will be available at www.pimco.com approximately 15 calendar days after such Fund s most recent fiscal quarter end, and will remain accessible until such Fund files

a Form N-Q or a shareholder report for the period which includes the date of the information. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

The SEC adopted a rule that generally allows funds to deliver shareholder reports to investors by providing access to such reports online free of charge and by mailing a notice that the report is electronically available. Pursuant to the rule, investors may still elect to receive a complete shareholder report in the mail. PIMCO is evaluating how to make the electronic delivery option available to shareholders in the future.

(1) Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Current performance may be lower or higher than performance shown. Investment return and the principal value of an investment will fluctuate. Returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the sale of Fund shares. Total return, market price, NAV, market price distribution rate, and NAV distribution rate will fluctuate with changes in market conditions. Performance current to the most recent month-end is available at www.pimco.com or via (844) 33-PIMCO. Performance is calculated assuming all dividends and distributions are reinvested at prices obtained under the Fund s dividend reinvestment plan. Performance does not reflect any brokerage commissions in connection with the purchase or sale of Fund shares.
(2) Distribution rates are not performance and are calculated by annualizing the most recent distribution per share and dividing by the NAV or Market Price, as applicable, as of the reported date. Distributions may be comprised of ordinary income, net capital gains, and/or a return of capital (ROC) of your investment the Fund. Because the distribution rate may include a ROC, it should not be confused with yield or income. If the Fund estimates that a portion of its distribution may be comprised of amounts from sources other than net investment income in accordance with its policies and good accounting practices, the Fund will notify shareholders of the estimated composition of such distribution through a Section 19 Notice. Please refer to the most recent Section 19 Notice, if applicable, for additional information regarding the estimated composition of distributions. Please visit www.pimco.com for most recent Section 19 Notice, if applicable. Final determination of a distribution s tax character will be made on Form 1099 DIV sent to shareholders each January.
(3) Represents total effective leverage outstanding, as a percentage of total managed assets. Total effective leverage consists of preferred shares, reverse repurchase agreements and other borrowings, credit default swap notional and floating rate notes issued in tender option bond transactions, as applicable (collectively Total Effective Leverage). The Fund may engage in other transactions not included in Total Effective Leverage disclosed above that may give rito a form of leverage, including certain derivative transactions. For the purpose of calculating Total Effective Leverage outstanding as a percentage of total managed assets, total managed assets refer to total assets (including assets attributable to Total Effective Leverage that may be outstanding) minus accrued liabilities (other than liabilities representing Total Effective Leverage).
Investment Objective and Strategy Overview
PIMCO Municipal Income Fund s investment objective is to seek to provide current income exempt from federal income tax.
Fund Insights at NAV
The following affected performance during the reporting period:
» The Fund s duration exposure detracted from performance, as municipal yields moved higher.
» Exposure to the tobacco sector contributed to performance, as the sector outperformed the general municipal market.
» Select exposure to the special tax sector contributed to performance.
» Exposure to the healthcare sector contributed to performance, as the sector outperformed the general municipal market.
» Exposure to the electric utility sector detracted from performance, as the sector underperformed the general municipal market.

(3) Represents total effective leverage outstanding, as a percentage of total managed assets. Total effective leverage consists of preferred shares, reverse repurchase agreements and other borrowings, credit default swap notional and floating rate notes issued in tender option bond transactions, as applicable (collectively Total Effective Leverage). The Fund may engage in other transactions not included in Total Effective Leverage disclosed above that may give rise to a form of leverage, including certain derivative transactions. For the purpose of calculating Total Effective Leverage outstanding as a percentage of total managed assets, total managed assets refer to total assets (including assets attributable to Total Effective Leverage that may be outstanding) minus accrued liabilities (other than liabilities representing Total Effective Leverage). Investment Objective and Strategy Overview PIMCO California Municipal Income Fund III s investment objective is to seek to provide current income exempt from federal and California income tax. Fund Insights at NAV The following affected performance during the reporting period: » The Fund s duration exposure detracted from performance, as municipal yields moved higher. » Exposure to the tobacco sector contributed to performance, as the sector outperformed the general municipal market. Select exposure to the pre-refunded sector contributed to performance. » Select exposure to the healthcare sector detracted from performance. » Exposure to the water and sewer sector detracted from performance, as the sector underperformed the general municipal market.

- (1) Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Current performance may be lower or higher than performance shown. Investment return and the principal value of an investment will fluctuate. Returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the sale of Fund shares. Total return, market price, NAV, market price distribution rate, and NAV distribution rate will fluctuate with changes in market conditions. Performance current to the most recent month-end is available at www.pimco.com or via (844) 33-PIMCO. Performance is calculated assuming all dividends and distributions are reinvested at prices obtained under the Fund s dividend reinvestment plan. Performance does not reflect any brokerage commissions in connection with the purchase or sale of Fund shares.
- (2) Distribution rates are not performance and are calculated by annualizing the most recent distribution per share and dividing by the NAV or Market Price, as applicable, as of the reported date. Distributions may be comprised of ordinary income, net capital gains, and/or a return of capital (ROC) of your investment in the Fund. Because the distribution rate may include a ROC, it should not be confused with yield or income. If the Fund estimates that a portion of its distribution may be comprised of amounts from sources other than net investment income in accordance with its policies and good accounting practices, the Fund will notify shareholders of the estimated composition of such distribution through a Section 19 Notice. Please refer to the most recent Section 19 Notice, if applicable, for additional information regarding the estimated composition of distributions. Please visit www.pimco.com for most recent Section 19 Notice, if applicable. Final determination of a distribution s tax character will be made on Form 1099 DIV sent to shareholders each January.
- (3) Represents total effective leverage outstanding, as a percentage of total managed assets. Total effective leverage consists of preferred shares, reverse repurchase agreements and other borrowings, credit default swap notional and floating rate notes issued in tender option bond transactions, as applicable (collectively Total Effective Leverage). The Fund may engage in other transactions not included in Total Effective Leverage disclosed above that may give rise to a form of leverage, including certain derivative transactions. For the purpose of calculating Total Effective Leverage outstanding as a percentage of total managed assets, total managed assets refer to total assets (including assets attributable to Total Effective Leverage that may be outstanding) minus accrued liabilities (other than liabilities representing Total Effective Leverage).

Investment Objective and Strategy Overview

PIMCO New York Municipal Income Fund s investment objective is to seek to provide current income exempt from federal, New York State and New York City income tax.

- $^{\wedge}~$ A zero balance may reflect actual amounts rounding to less than \$0.01 or 0.01%.
- + Unaudited
- * Annualized
- (a) Per share amounts based on average number of common shares outstanding during the year or period.
- (b) The tax characterization of distributions is determined in accordance with Federal income tax regulations. The actual tax characterization of distributions paid is determined at the end of the fiscal year. See Note 2, Distributions Common Shares, in the Notes to Financial Statements for more information.
- (c) Total investment return is calculated assuming a purchase of a common share at the market price on the first day and a sale of a common share at the market price on the last day of each year or period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Funds dividend reinvestment plan. Total investment return does not reflect brokerage commissions in connection with the purchase or sale of Fund shares
- (d) Calculated on the basis of income and expenses applicable to both common and preferred shares relative to the average net assets of common shareholders.
- (e) Interest expense primarily relates to participation in borrowing and financing transactions. See Note 5, Borrowings and Other Financing Transactions, in the Notes to Financial Statements for more information.
- (f) Fiscal year end changed from April 30th to December 31st.
- (g) Fiscal year end changed from May 31st to December 31st.
- (h) Fiscal year end changed from September 30th to December 31st.

(i) Total distributions for the period ended December 31, 2015 may be lower than prior fiscal years due to fiscal year end changes resulting in a reduction of the amount of days in the period ended December 31, 2015.

NOTES TO SCHEDULE OF INVESTMENTS:

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) Security is not accruing income as of the date of this report.
- (b) Zero coupon security.
- (c) Security becomes interest bearing at a future date.
- (d) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Tender Option Bond Transactions, in the Notes to Financial Statements for more information.
- (e) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2018.

Total Borrowings and Other Financing Transactions	\$	2,815	\$ 0	\$	0	\$	0					

⁽¹⁾ Includes accrued interest.

See Accompanying Notes

SEMIANNUAL REPORT JUNE 30, 2018 37

⁽²⁾ Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from borrowings and other financing transactions can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Master Netting Arrangements, in the Notes to Financial Statements for more information regarding master netting arrangements.

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) Security is not accruing income as of the date of this report.
- (b) Zero coupon security.
- (c) Security becomes interest bearing at a future date.
- (d) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Tender Option Bond Transactions, in the Notes to Financial Statements for more information.
- (e) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2018.

Total Borrowings and Other Financing Transactions	\$	857	\$	0	\$	0					

⁽¹⁾ Includes accrued interest.

FAIR VALUE MEASUREMENTS

The following is a summary of the fair valuations according to the inputs used as of June 30, 2018 in valuing the Fund s assets and liabilities:

				Value at
Category and Subcategory	Level 1	Level 2	Level 3	06/30/2018
Investments in Securities, at Value Municipal Bonds & Notes				
Alabama	\$ 0	\$ 55,429	\$ 0	\$ 55,429
Arizona	0	89,384	0	89,384
California	0	130,988	0	130,988
Colorado	0	17,545	0	17,545
Connecticut	0	2,439	0	2,439
Florida	0	47,378	0	47,378
Georgia	0	47,239	0	47,239
Hawaii	0	8,497	0	8,497
Illinois	0	149,937	0	149,937

⁽²⁾ Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from borrowings and other financing transactions can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Master Netting Arrangements, in the Notes to Financial Statements for more information regarding master netting arrangements.

NOTES TO SCHEDULE OF INVESTMENTS:

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) Security is not accruing income as of the date of this report.
- (b) Zero coupon security.
- (c) Security becomes interest bearing at a future date.
- (d) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Tender Option Bond Transactions, in the Notes to Financial Statements for more information.
- (e) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect

on June 30, 2018.

NOTES TO SCHEDULE OF INVESTMENTS:

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) Zero coupon security.
- (b) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Tender Option Bond Transactions, in the Notes to Financial Statements for more information.
- (c) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2018.

BORROWINGS AND OTHER FINANCING TRANSACTIONS SUMMARY

The following is a summary by counterparty of the market value of Borrowings and Other Financing Transactions and collateral pledged/(received) as of June 30, 2018:

Counterparty	Repurchase Agreement Proceeds to be Received ⁽¹⁾		Payable for Reverse Repurchase Agreements		Payable for Sale-Buyback Transactions		Total Borrowings and Other Financing Transactions		ollateral d/(Received)	Net Exposure ⁽²⁾		
Global/Master Repurchase Agreement FICC	\$	182	\$	0	\$	0	\$	182	\$ (191)	\$	(9)	
Total Borrowings and Other Financing Transactions	\$	182	\$	0	\$	0						

⁽¹⁾ Includes accrued interest.

FAIR VALUE MEASUREMENTS

⁽²⁾ Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from borrowings and other financing transactions can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Master Netting Arrangements, in the Notes to Financial Statements for more information regarding master netting arrangements.

The following is a summary of the fair valuations according to the inputs used as of June 30, 2018 in valuing the Fund s assets and liabilities:

Category and Subcategory	Lev	vel 1 Level 2		Lev	el 3	Fair Value at 5/30/2018	
Investments in Securities, at Value							
Municipal Bonds & Notes							
California	\$	0	\$	505,096	\$	0	\$ 505,096
Illinois		0		9,657		0	9,657
Puerto Rico		0		2,677		0	2,677
U.S. Virgin Islands		0		1,137		0	1,137
Short-Term Instruments							
Repurchase Agreements		0		182		0	182
Total Investments	\$	0	\$	518,749	\$	0	\$ 518,749

There were no significant transfers among Levels 1, 2, or 3 during the period ended June 30, 2018.

NOTES TO SCHEDULE OF INVESTMENTS:

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) Zero coupon security.
- (b) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Tender Option Bond Transactions, in the Notes to Financial Statements for more information.
- (c) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2018.

New York		0	1,555		0	1,555
Puerto Rico		0	2,786		0	2,786
U.S. Virgin Islands		0	1,281		0	1,281

Short-Term Instruments

⁽²⁾ Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from borrowings and other financing transactions can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Master Netting Arrangements, in the Notes to Financial Statements for more information regarding master netting arrangements.

Repurchase Agreements	0	624	0	624
Total Investments	\$ 0	\$ 496,804	\$ 0	\$ 496,804

There were no significant transfers among Levels 1, 2, or 3 during the period ended June 30, 2018.

NOTES TO SCHEDULE OF INVESTMENTS:

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) Zero coupon security.
- (b) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Tender Option Bond Transactions, in the Notes to Financial Statements for more information.
- (c) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2018.

SEMIANNUAL REPORT JUNE 30, 2018 57

Schedule of Investments PIMCO New York Municipal Income Fund (Cont.)

June 30, 2018 (Unaudited)

NOTES TO SCHEDULE OF INVESTMENTS:

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) Security is not accruing income as of the date of this report.
- (b) Zero coupon security.
- (c) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Tender Option Bond Transactions, in the Notes to Financial Statements for more information.

See Accompanying Notes

⁽¹⁾ Includes accrued interest.

⁽²⁾ Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from borrowings and other financing transactions can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Master Netting Arrangements, in the Notes to Financial Statements for more information regarding master netting arrangements.

NOTES TO SCHEDULE OF INVESTMENTS:

^{*} A zero balance may reflect actual amounts rounding to less than one thousand.

[^] Security is in default.

⁽a) Security is not accruing income as of the date of this report.

- (b) Zero coupon security.
- (c) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Tender Option Bond Transactions, in the Notes to Financial Statements for more information.
- (d) Represents an investment in a tender option bond residual interest certificate purchased in a secondary market transaction. The interest rate shown bears an inverse relationship to the interest rate on a tender option bond floating rate certificate. The interest rate disclosed reflects the rate in effect on June 30, 2018.

⁽¹⁾ Includes accrued interest.

60 PIMCO CLOSED-END FUNDS

See Accompanying Notes

⁽²⁾ Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from borrowings and other financing transactions can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Master Netting Arrangements, in the Notes to Financial Statements for more information regarding master netting arrangements.

NOTES TO SCHEDULE OF INVESTMENTS:

- * A zero balance may reflect actual amounts rounding to less than one thousand.
- ^ Security is in default.
- (a) Security is not accruing income as of the date of this report.
- (b) Zero coupon security.
- (c) Represents an underlying municipal bond transferred to a tender option bond trust established in a tender option bond transaction in which the Fund sold, or caused the sale of, the underlying municipal bond and purchased the residual interest certificate. The security serves as collateral in a financing transaction. See Note 5, Tender Option Bond Transactions, in the Notes to Financial Statements for more information.

SEMIANNUAL REPORT JUNE 30, 2018

⁽¹⁾ Includes accrued interest.

⁽³⁾ Net Exposure represents the net receivable/(payable) that would be due from/to the counterparty in the event of default. Exposure from borrowings and other financing transactions can only be netted across transactions governed under the same master agreement with the same legal entity. See Note 7, Master Netting Arrangements, in the Notes to Financial Statements for more information regarding master netting arrangements.

Notes to Financial Statements

1. ORGANIZATION

PIMCO Municipal Income Fund, PIMCO Municipal Income Fund II, PIMCO Municipal Income Fund III, PIMCO California Municipal Income Fund, PIMCO California Municipal Income Fund III, PIMCO California Municipal Income Fund III, PIMCO New York Municipal Income Fund, PIMCO New York Municipal Income Fund III (each a Fund and collectively, the Funds) are organized as closed-end management investment companies registered under the Investment Company Act of 1940, as amended, and the rules and regulations thereunder (the Act). Each Fund was organized as a Massachusetts business trust on the dates shown in the table below. Pacific Investment Management Company LLC (PIMCO or the Manager) serves as the Funds investment manager.

	Formation
Fund Name	Date
PIMCO Municipal Income Fund	May 9, 2001
PIMCO Municipal Income Fund II	March 29, 2002
PIMCO Municipal Income Fund III	August 20, 2002
PIMCO California Municipal Income Fund	May 10, 2001
PIMCO California Municipal Income Fund II	March 29, 2002
PIMCO California Municipal Income Fund III	August 20, 2002
PIMCO New York Municipal Income Fund	May 10, 2001
PIMCO New York Municipal Income Fund II	March 29, 2002
PIMCO New York Municipal Income Fund III	August 20, 2002

2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by each Fund in the preparation of its financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP). Each Fund is treated as an investment company under the reporting requirements of U.S. GAAP. The functional and reporting currency for the Funds is the U.S. dollar. The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

(a) Securities Transactions and Investment Income Securities transactions are recorded as of the trade date for financial reporting purposes. Realized gains (losses) from securities sold are recorded on the identified cost basis. Securities purchased or sold on a when-issued or delayed-delivery basis may be settled beyond a standard settlement period for the security after the trade date. Dividend income is recorded on the ex-dividend date, except certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as a Fund is informed of the ex-dividend date. Interest income, adjusted for the accretion of discounts and amortization of premiums, is recorded on the

accrual basis from settlement date, with the exception of securities with a forward starting effective date, where interest income is recorded on the accrual basis from effective date. For convertible securities, premiums attributable to the conversion feature are not amortized. Estimated tax liabilities on certain foreign securities are recorded on an accrual basis and are reflected as components of interest income or net change in unrealized appreciation (depreciation) on investments on the Statements of Operations, as appropriate. Tax liabilities realized as a result of such security sales are reflected as a component of net realized gain (loss) on investments on the Statements of Operations. Paydown gains (losses) on mortgage-related and other asset-backed securities, if any, are recorded as components of interest income on the Statements of Operations. Income or short-term capital gain distributions received from registered investment companies, if any, are recorded as dividend income.

Long-term capital gain distributions received from registered investment companies, if any, are recorded as realized gains.

Debt obligations may be placed on non-accrual status and related interest income may be reduced by ceasing current accruals and writing off interest receivable when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. A debt obligation is removed from non-accrual status when the issuer resumes interest payments or when collectability of interest is probable.

(b) Distributions Common Shares The following table shows the anticipated frequency of distributions from net investment income and gains from the sale of portfolio securities and other sources to common shareholders.

	Distribution Frequency		
Fund Name	Declared	Distributed	
PIMCO Municipal Income Fund	Monthly	Monthly	
PIMCO Municipal Income Fund II	Monthly	Monthly	
PIMCO Municipal Income Fund III	Monthly	Monthly	
PIMCO California Municipal Income Fund	Monthly	Monthly	
PIMCO California Municipal Income Fund II	Monthly	Monthly	
PIMCO California Municipal Income Fund III	Monthly	Monthly	
PIMCO New York Municipal Income Fund	Monthly	Monthly	
PIMCO New York Municipal Income Fund II	Monthly	Monthly	
PIMCO New York Municipal Income Fund III	Monthly	Monthly	

Net realized capital gains earned by each Fund, if any, will be distributed no less frequently than once each year.

Income distributions and capital gain distributions are determined in accordance with income tax regulations which may differ from U.S. GAAP. Differences between tax regulations and U.S. GAAP may cause timing differences between income and capital gain recognition. Further, the character of investment income and capital gains may be different for certain transactions under the two methods of accounting. As a result, income distributions and capital gain distributions declared during a fiscal period may differ significantly from the net investment

64 PIMCO CLOSED-END FUNDS

Table of Contents

June 30, 2018 (Unaudited)

income (loss) and realized gains (losses) reported on each Fund s annual financial statements presented under U.S. GAAP.

If a Fund estimates that a portion of its distribution may be comprised of amounts from sources other than net investment income in accordance with its policies and good accounting practices, the Fund will notify shareholders of the estimated composition of such distribution through a Section 19 Notice. For these purposes, a Fund estimates the source or sources from which a distribution is paid, to the close of the period as of which it is paid, in reference to its internal accounting records and related accounting practices. If, based on such accounting records and practices, it is estimated that a particular distribution does not include capital gains or paid-in surplus or other capital sources, a Section 19 Notice generally would not be issued. It is important to note that differences exist between a Fund s daily internal accounting records and practices, a Fund s financial statements presented in accordance with U.S. GAAP, and recordkeeping practices under income tax regulations. For instance, a Fund s internal accounting records and practices may take into account, among other factors, tax-related characteristics of certain sources of distributions that differ from treatment under U.S. GAAP. Examples of such differences may include, among others, the treatment of paydowns on mortgage-backed securities purchased at a discount and periodic payments under interest rate swap contracts. Accordingly, among other consequences, it is possible that a Fund may not issue a Section 19 Notice in situations where the Fund s financial statements prepared later and in accordance with U.S. GAAP and/or the final tax character of those distributions might later report that the sources of those distributions included capital gains and/or a return of capital. Please visit www.pimco.com for the most recent Section 19 Notice, if applicable, for additional information regarding the estimated composition of distributions. Final determination of a distribution s tax character will be reported on Form 1099 DIV sent to shareholders f

Distributions classified as a tax basis return of capital, if any, are reflected on the Statements of Changes in Net Assets and have been recorded to paid in capital. In addition, other amounts have been reclassified between undistributed (overdistributed) net investment income (loss), accumulated undistributed (overdistributed) net realized gain (loss) and/or paid in capital to more appropriately conform U.S. GAAP to tax characterizations of distributions.

(c) New Accounting Pronouncements In August 2016, the Financial Accounting Standards Board (FASB) issued an Accounting Standards Update (ASU), ASU 2016-15, which amends Accounting Standards Codification (ASC) 230 to clarify guidance on the classification of certain cash receipts and cash payments in the Statement of Cash Flows. The ASU is effective for annual periods beginning after

December 15, 2017, and interim periods within those annual periods. The Funds have adopted the ASU. The implementation of the ASU did not have an impact on the Funds financial statements.

In October 2016, the U.S. Securities and Exchange Commission (SEC) adopted new rules and forms, and amendments to certain current rules and forms, to modernize reporting and disclosure of information by registered investment companies. The amendments to Regulation S-X require standardized, enhanced disclosure about derivatives in investment company financial statements, and also change the rules governing the form and content of such financial statements. The compliance date for these amendments was August 1, 2017. Compliance is based on reporting period-end date. Management has adopted these amendments and the changes are incorporated in the financial statements.

In November 2016, the FASB issued ASU 2016-18 which amends ASC 230 to provide guidance on the classification and presentation of changes in restricted cash and restricted cash equivalents on the Statement of Cash Flows. The ASU is effective for annual periods beginning after December 15, 2017, and interim periods within those annual periods. The Funds have adopted the ASU. The implementation of the ASU did not have an impact on the Funds financial statements.

In March 2017, the FASB issued ASU 2017-08 which provides guidance related to the amortization period for certain purchased callable debt securities held at a premium. The ASU is effective for annual periods beginning after December 15, 2018, and interim periods within those annual periods. The Funds have adopted the ASU. The implementation of the ASU did not have an impact on the Funds financial statements.

3. INVESTMENT VALUATION AND FAIR VALUE MEASUREMENTS

(a) Investment Valuation Policies The NAV of a Fund s shares is determined by dividing the total value of portfolio investments and other assets attributable to that Fund less any liabilities by the total number of shares outstanding of that Fund.

On each day that the New York Stock Exchange (NYSE) is open, Fund shares are ordinarily valued as of the close of regular trading (NYSE Close). Information that becomes known to the Funds or their agents after the time as of which NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of a security or the NAV determined earlier that day. Each Fund reserves the right to change the time as of which its respective NAV is calculated if the Fund closes earlier, or as permitted by the SEC.

For purposes of calculating a NAV, portfolio securities and other assets for which market quotes are readily available are valued at market value. Market value is generally determined on the basis of official

SEMIANNUAL REPORT JUNE 30, 2018 65

Notes to Financial Statements (Cont.)

closing prices or the last reported sales prices, or if no sales are reported, based on quotes obtained from established market makers or prices (including evaluated prices) supplied by the Funds—approved pricing services, quotation reporting systems and other third-party sources (together, Pricing Services). The Funds will normally use pricing data for domestic equity securities received shortly after the NYSE Close and do not normally take into account trading, clearances or settlements that take place after the NYSE Close. If market value pricing is used, a foreign (non-U.S.) equity security traded on a foreign exchange or on more than one exchange is typically valued using pricing information from the exchange considered by PIMCO to be the primary exchange. A foreign (non-U.S.) equity security will be valued as of the close of trading on the foreign exchange, or the NYSE Close, if the NYSE Close occurs before the end of trading on the foreign exchange. Domestic and foreign (non-U.S.) fixed income securities, non-exchange traded derivatives, and equity options are normally valued on the basis of quotes obtained from brokers and dealers or Pricing Services using data reflecting the earlier closing of the principal markets for those securities. Prices obtained from Pricing Services may be based on, among other things, information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Certain fixed income securities purchased on a delayed-delivery basis are marked to market daily until settlement at the forward settlement date. Exchange-traded options, except equity options, futures and options on futures are valued at the settlement price determined by the relevant exchange. Swap agreements are valued on the basis of bid quotes obtained from brokers and dealers or market-based prices supplied by Pricing Services. A Fund—s investments in open-end management investments companies, other than exchange-traded funds (ETFs—

Investments for which market quotes or market based valuations are not readily available are valued at fair value as determined in good faith by the Board or persons acting at their direction. The Board has adopted methods for valuing securities and other assets in circumstances where market quotes are not readily available, and has delegated to PIMCO the responsibility for applying the fair valuation methods. In the event that market quotes or market based valuations are not readily available, and the security or asset cannot be valued pursuant to a Board approved valuation method, the value of the security or asset will be determined in good faith by the Valuation Oversight Committee of the Board (Valuation Oversight Committee), generally based on recommendations provided by the Manager. Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information, bid/ask information, indicative market quotations (Broker Quotes), Pricing Services prices), including where events occur after

the close of the relevant market, but prior to the NYSE Close, that materially affect the values of a Fund s securities or assets. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities trade do not open for trading for the entire day and no other market prices are available. The Board has delegated to the Manager the responsibility for monitoring significant events that may materially affect the values of a Fund s securities or assets and for determining whether the value of the applicable securities or assets should be reevaluated in light of such significant events.

When a Fund uses fair valuation to determine the value of a portfolio security or other asset for purposes of calculating its NAV, such investments will not be priced on the basis of quotes from the primary market in which they are traded, but rather may be priced by another method that the Board or persons acting at their direction believe reflects fair value. Fair valuation may require subjective determinations about the value of a security. While the Funds policy is intended to result in a calculation of a Fund s NAV that fairly reflects security values as of the time of pricing, the Funds cannot ensure that fair values determined by the Board or persons acting at their direction would accurately reflect the price that a Fund could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by a Fund may differ from the value that would be realized if the securities were sold.

(b) Fair Value Hierarchy U.S. GAAP describes fair value as the price that a Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. It establishes a fair value hierarchy that prioritizes inputs to valuation methods and requires disclosure of the fair value hierarchy, separately for each major category of assets and liabilities, that segregates fair value measurements into levels (Level 1, 2, or 3). The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Levels 1, 2, and 3 of the fair value hierarchy are defined as follows:

Level 1 Quoted prices in active markets or exchanges for identical assets and liabilities.

Level 2 Significant other observable inputs, which may include, but are not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market corroborated inputs.

Level 3 Significant unobservable inputs based on the best information available in the circumstances, to the extent observable

66 PIMCO CLOSED-END FUNDS

Table of Contents

June 30, 2018 (Unaudited)

inputs are not available, which may include assumptions made by the Board or persons acting at their direction that are used in determining the fair value of investments.

In accordance with the requirements of U.S. GAAP, the amounts of transfers between Levels 1 and 2 and transfers into and out of Level 3, if material, are disclosed in the Notes to Schedule of Investments for each respective Fund.

For fair valuations using significant unobservable inputs, U.S. GAAP requires a reconciliation of the beginning to ending balances for reported fair values that presents changes attributable to realized gain (loss), unrealized appreciation (depreciation), purchases and sales, accrued discounts (premiums), and transfers into and out of the Level 3 category during the period. The end of period value is used for the transfers between Levels of a Fund s assets and liabilities. Additionally, U.S. GAAP requires quantitative information regarding the significant unobservable inputs used in the determination of fair value of assets or liabilities categorized as Level 3 in the fair value hierarchy. In accordance with the requirements of U.S. GAAP, a fair value hierarchy, and if material, a Level 3 reconciliation and details of significant unobservable inputs, have been included in the Notes to Schedule of Investments for each respective Fund.

(c) Valuation Techniques and the Fair Value Hierarchy

Level 1 and Level 2 trading assets and trading liabilities, at fair value The valuation methods (or techniques) and significant inputs used in determining the fair values of portfolio securities or other assets and liabilities categorized as Level 1 and Level 2 of the fair value hierarchy are as follows:

Fixed income securities including corporate, convertible and municipal bonds and notes, U.S. government agencies, U.S. treasury obligations, sovereign issues, bank loans, convertible preferred securities and non-U.S. bonds are normally valued on the basis of quotes obtained from brokers and dealers or Pricing Services that use broker-dealer quotations, reported trades or valuation estimates from their internal pricing models. The Pricing Services internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Fixed income securities purchased on a delayed-delivery basis or as a repurchase commitment in a sale-buyback transaction are marked to market daily until settlement at the forward settlement date and are categorized as Level 2 of the fair value hierarchy.

Level 3 trading assets and trading liabilities, at fair value When a fair valuation method is applied by PIMCO that uses significant

unobservable inputs, investments will be priced by a method that the Board or persons acting at their direction believe reflects fair value and are categorized as Level 3 of the fair value hierarchy.

Short-term debt instruments (such as commercial paper) having a remaining maturity of 60 days or less may be valued at amortized cost, so long as the amortized cost value of such short-term debt instruments is approximately the same as the fair value of the instrument as determined without the use of amortized cost valuation. These securities are categorized as Level 2 or Level 3 of the fair value hierarchy depending on the source of the base price.

4. SECURITIES AND OTHER INVESTMENTS

(a) Investments in Securities

The Funds may utilize the investments and strategies described below to the extent permitted by each Fund s respective investment policies.

Restricted Investments are subject to legal or contractual restrictions on resale and may generally be sold privately, but may be required to be registered or exempted from such registration before being sold to the public. Private placement securities are generally considered to be restricted except for those securities traded between qualified institutional investors under the provisions of Rule 144A of the Securities Act of 1933. Disposal of restricted investments may involve time-consuming negotiations and expenses, and prompt sale at an acceptable price may be difficult to achieve. Restricted investments held by the Funds at June 30, 2018 are disclosed in the Notes to Schedules of Investments.

Securities Issued by U.S. Government Agencies or Government-Sponsored Enterprises are obligations of and, in certain cases, guaranteed by, the U.S. Government, its agencies or instrumentalities. Some U.S. Government securities, such as Treasury bills, notes and bonds, and securities guaranteed by the Government National Mortgage Association (GNMA or Ginnie Mae), are supported by the full faith and credit of the U.S. Government; others, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Department of the Treasury (the U.S. Treasury); and others, such as those of the Federal National Mortgage Association (FNMA or Fannie Mae), are supported by the discretionary authority of the U.S. Government to purchase the agency s obligations. U.S. Government securities may include zero coupon securities. Zero coupon securities do not distribute interest on a current basis and tend to be subject to a greater risk than interest-paying securities.

Government-related guarantors (*i.e.*, not backed by the full faith and credit of the U.S. Government) include FNMA and the Federal Home Loan Mortgage Corporation (FHLMC or Freddie Mac). FNMA is a

SEMIANNUAL REPORT JUNE 30, 2018 67

Notes to Financial Statements (Cont.)

government-sponsored corporation. FNMA purchases conventional (*i.e.*, not insured or guaranteed by any government agency) residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA, but are not backed by the full faith and credit of the U.S. Government. FHLMC issues Participation Certificates (PCs), which are pass-through securities, each representing an undivided interest in a pool of residential mortgages. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the U.S. Government. Instead, they are supported only by the discretionary authority of the U.S. Government to purchase the agency s obligations.

5. BORROWINGS AND OTHER FINANCING TRANSACTIONS

The Funds may enter into the borrowings and other financing transactions described below to the extent permitted by each Fund s respective investment policies.

The following disclosures contain information on a Fund s ability to lend or borrow cash or securities to the extent permitted under the Act, which may be viewed as borrowing or financing transactions by a Fund. The location of these instruments in each Fund s financial statements is described below. For a detailed description of credit and counterparty risks that can be associated with borrowings and other financing transactions; please see Note 6, Principal Risks.

- (a) Repurchase Agreements Under the terms of a typical repurchase agreement, a Fund purchases an underlying debt obligation (collateral) subject to an obligation of the seller to repurchase, and a Fund to resell, the obligation at an agreed-upon price and time. In an open maturity repurchase agreement, there is no pre-determined repurchase date and the agreement can be terminated by the Fund or counterparty at any time. The underlying securities for all repurchase agreements are held by a Fund societation or designated subcustodians under tri-party repurchase agreements and in certain instances will remain in custody with the counterparty. The market value of the collateral must be equal to or exceed the total amount of the repurchase obligations, including interest. Repurchase agreements, if any, including accrued interest, are included on the Statements of Assets and Liabilities. Interest earned is recorded as a component of interest income on the Statements of Operations. In periods of increased demand for collateral, a Fund may pay a fee for the receipt of collateral, which may result in interest expense to the Fund.
- (b) Tender Option Bond Transactions In a tender option bond transaction (TOB), a tender option bond trust (TOB Trust) issues

floating rate certificates (TOB Floater) and residual interest certificates (TOB Residual) and utilizes the proceeds of such issuances to purchase a fixed rate municipal bond (Fixed Rate Bond) that is either owned or identified by the Fund. The TOB Floater is generally issued to third party investors (typically a money market fund) and the TOB Residual is generally issued to the Fund that sold or identified the Fixed Rate Bond. The TOB Trust divides the income stream provided by the Fixed Rate Bond to create two securities, the TOB Floater, which is a short-term security, and the TOB Residual, which is a longer-term security. The interest rates payable on the TOB Residual issued to the Fund bear an inverse relationship to the interest rate on the TOB Floater. The interest rate on the TOB Floater is reset by a remarketing process typically every 7 to 35 days. After income is paid on the TOB Floater at current rates, the residual income from the Fixed Rate Bond goes to the TOB Residual.

Therefore, rising short-term rates result in lower income for the TOB Residual, and vice versa. In the case of a TOB Trust that utilizes the cash received (less transaction expenses) from the issuance of the TOB Floater and TOB Residual to purchase the Fixed Rate Bond from a Fund, the Fund may then invest the cash received in additional securities, generating leverage for the Fund. Other PIMCO-managed accounts may also contribute municipal bonds to a TOB Trust into which a Fund has contributed Fixed Rate Bonds. If multiple PIMCO-managed accounts participate in the same TOB Trust, the economic rights and obligations under the TOB Residual will be shared among the funds ratably in proportion to their participation in the TOB Trust.

The TOB Residual may be more volatile and less liquid than other municipal bonds of comparable maturity. In most circumstances the TOB Residual holder bears substantially all of the underlying Fixed Rate Bond s downside investment risk and also benefits from any appreciation in the value of the underlying Fixed Rate Bond. Investments in a TOB Residual typically will involve greater risk than investments in Fixed Rate Bonds.

A TOB Residual held by a Fund provides the Fund with the right to: (1) cause the holders of the TOB Floater to tender their notes at par, and (2) cause the sale of the Fixed Rate Bond held by the TOB Trust, thereby collapsing the TOB Trust. TOB Trusts are generally supported by a liquidity facility provided by a third party bank or other financial institution (the Liquidity Provider) that provides for the purchase of TOB Floaters that cannot be remarketed. The holders of the TOB Floaters have the right to tender their certificates in exchange for payment of par plus accrued interest on a periodic basis (typically weekly) or on the occurrence of certain mandatory tender events. The tendered TOB Floaters are remarketed by a remarketing agent, which is typically an affiliated entity of the Liquidity Provider. If the TOB Floaters cannot be remarketed, the TOB Floaters are purchased by the TOB Trust either from the proceeds of a loan from the Liquidity Provider or from a liquidation of the Fixed Rate Bond.

68 PIMCO CLOSED-END FUNDS

Table of Contents

June 30, 2018 (Unaudited)

The TOB Trust may also be collapsed without the consent of a Fund, as the TOB Residual holder, upon the occurrence of certain tender option termination events (or TOTEs) as defined in the TOB Trust agreements. Such termination events typically include the bankruptcy or default of the Fixed Rate Bond, a substantial downgrade in credit quality of the Fixed Rate Bond, or a judgment or ruling that interest on the Fixed Rate Bond is subject to Federal income taxation. Upon the occurrence of a termination event, the TOB Trust would generally be liquidated in full with the proceeds typically applied first to any accrued fees owed to the trustee, remarketing agent and liquidity provider, and then to the holders of the TOB Floater up to par plus accrued interest owed on the TOB Floater and a portion of gain share, if any, with the balance paid out to the TOB Residual holder. In the case of a mandatory termination event (MTE), after the payment of fees, the TOB Floater holders would be paid before the TOB Residual holders (i.e., the Funds). In contrast, in the case of a TOTE, after payment of fees, the TOB Floater holders and the TOB Residual holders would be paid pro rata in proportion to the respective face values of their certificates.

Each Fund s transfer of Fixed Rate Bonds to a TOB Trust is considered a secured borrowing for financial reporting purposes. The cash received by the TOB Trust from the sale of the TOB Floaters, less certain transaction expenses, is paid to a Fund. A Fund typically invests the cash received in additional municipal bonds. The Funds account for the transactions described above as secured borrowings by including the Fixed Rate Bonds in their Schedules of Investments, and account for the TOB Floater as a liability under the caption Payable for tender option bond floating rate certificates in the Funds Statements of Assets and Liabilities. Interest income, including amortization and accretion of premiums and discounts, from the underlying municipal bonds is recorded by each Fund on an accrual basis and is shown as interest on the Statements of Operations. Interest expense incurred on the secured borrowing is shown as interest expense on the Statements of Operations.

The Funds may also purchase TOB Residuals in a secondary market transaction without transferring a fixed rate municipal bond into a TOB Trust. Such transactions are not accounted for as secured borrowings but rather as a security purchase with the TOB Residual being included in the Schedule of Investments.

In December 2013, regulators finalized rules implementing Section 619 (the Volcker Rule) and Section 941 (the Risk Retention Rules) of the Dodd-Frank Wall Street Reform and Consumer Protection Act. Both the Volcker Rule and the Risk Retention Rules apply to tender option bond programs. In particular, these rules preclude banking entities from (i) sponsoring or acquiring interests in the trusts used to hold a municipal bond in the creation of TOB Trusts; and (ii) continuing to service or maintain relationships with existing programs involving TOB Trusts to the same extent and in the same capacity as existing programs. The Risk Retention Rules require the sponsor to a TOB Trust to retain at least five percent of

the credit risk of the underlying assets supporting to the TOB Trust s municipal bonds. The Risk Retention Rules may increase the costs of such transactions in certain circumstances.

In response to these rules, industry participants explored various structuring alternatives for TOB Trusts established after December 31, 2013 and TOB Trusts established prior to December 31, 2013 (Legacy TOB Trusts) and agreed on a new tender option bond structure in which the Funds hire service providers to assist with establishing, structuring and sponsoring a TOB Trust. Service providers to a TOB Trust, such as administrators, liquidity providers, trustees and remarketing agents act at the direction of, and as agent of, the Funds as the TOB residual holders.

The Funds have restructured their Legacy TOB Trusts in conformity with regulatory guidelines. Under the new TOB Trust structure, the Liquidity Provider or remarketing agent will no longer purchase the tendered TOB Floaters, even in the event of failed remarketing. This may increase the likelihood that a TOB Trust will need to be collapsed and liquidated in order to purchase the tendered TOB Floaters. The TOB Trust may draw upon a loan from the Liquidity Provider to purchase the tendered TOB Floaters. Any loans made by the Liquidity Provider will be secured by the purchased TOB Floaters held by the TOB Trust and will be subject to an interest rate agreed upon with the liquidity provider.

For the period ended June 30, 2018, the Funds average leverage outstanding from the use of TOB transactions and the daily weighted average interest rate, including fees, were as follows:

Fund Name	Average Leverage Outstanding (000s)	Weighted Average Interest Rate*
PIMCO Municipal Income Fund	\$ 60,138	2.24%
PIMCO Municipal Income Fund II	189,901	2.74%
PIMCO Municipal Income Fund III	82,754	2.67%
PIMCO California Municipal Income Fund	95,792	2.18%
PIMCO California Municipal Income Fund II	51,350	2.24%
PIMCO California Municipal Income Fund III	80,435	2.17%
PIMCO New York Municipal Income Fund	23,062	1.76%
PIMCO New York Municipal Income Fund II	32,786	2.15%
PIMCO New York Municipal Income Fund III	13,987	2.31%

^{*} Annualized

6. PRINCIPAL RISKS

In the normal course of business, the Funds trade financial instruments and enter into financial transactions where risk of potential loss exists due to such things as changes in the market (market risk) or failure or inability of the other party to a transaction to perform (credit and counterparty risk). See below for a detailed description of select principal risks. For a more comprehensive list of potential risks the Funds may be subject to, please see the Important Information About the Funds.

SEMIANNUAL REPORT JUNE 30, 2018

Notes to Financial Statements (Cont.)

Market Risks A Fund s investments in financial derivative instruments and other financial instruments expose the Fund to various risks such as, but not limited to, interest rate, foreign (non-U.S.) currency, equity and commodity risks.

Interest rate risk is the risk that fixed income securities and other instruments held by a Fund will decline in value because of changes in interest rates. As nominal interest rates rise, the value of certain fixed income securities held by a Fund is likely to decrease. A nominal interest rate can be described as the sum of a real interest rate and an expected inflation rate. Interest rate changes can be sudden and unpredictable, and a Fund may lose money if these changes are not anticipated by the Fund s management. Variable rate securities may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. A Fund may not be able to hedge against changes in interest rates or may choose not to do so for cost or other reasons. In addition, any hedges may not work as intended.

Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Duration is a measure used to determine the sensitivity of a security s price to changes in interest rates that incorporates a security s yield, coupon, final maturity and call features, among other characteristics. Duration is useful primarily as a measure of the sensitivity of a fixed income security s market price to interest rate (i.e. yield) movements. All other things remaining equal, for each one percentage point increase in interest rates, the value of a portfolio of fixed income investments would generally be expected to decline by one percent for every year of the portfolio s average duration above zero. For example, the value of a portfolio of fixed income securities with an average duration of three years would generally be expected to decline by approximately 3% if interest rates rose by one percentage point.

Convexity is an additional measure used to understand a security s interest rate sensitivity. Convexity measures the rate of change of duration in response to changes in interest rates and may be positive or negative. Securities with negative convexity may experience greater losses during periods of rising interest rates, and accordingly Funds holding such securities may be subject to a greater risk of losses in periods of rising interest rates.

A wide variety of factors can cause interest rates to rise (e.g., central bank monetary policies, inflation rates, general economic conditions, etc.). Under current economic conditions, interest rates are near historically low levels. The Funds currently face a heightened level of interest rate risk, especially since the Federal Reserve Board has ended its quantitative easing program and has begun, and may continue, to raise interest rates. To the extent the Federal Reserve Board continues to raise interest rates, there is a risk that rates across the financial system may rise. During periods of very low or negative interest rates, a Fund may be unable to maintain positive returns.

Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, may result in heightened market volatility and may detract from Fund performance to the extent a Fund is exposed to such interest rates. Rising interest rates may result in a decline in value of a Fund s fixed-income investments and in periods of volatility. Further, while U.S. bond markets have steadily grown over the past three decades, dealer market making ability has remained relatively stagnant. As a result, dealer inventories of certain types of bonds and similar instruments, which provide a core indication of the ability of financial intermediaries to make markets, are at or near historic lows in relation to market size. Because market makers provide stability to a market through their intermediary services, the significant reduction in dealer inventories could potentially lead to decreased liquidity and increased volatility in the fixed income markets. Such issues may be exacerbated during periods of economic uncertainty. All of these factors, collectively and/or individually, could cause a Fund to lose value.

The market values of a Fund s investments may decline due to general market conditions which are not specifically related to a particular company or issuer, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment. They may also decline due to factors which affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Equity securities and equity related investments generally have greater market price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. Credit ratings downgrades may also negatively affect securities held by a Fund. Even when markets perform well, there is no assurance that the investments held by a Fund will increase in value along with the broader market. In

addition, market risk includes the risk that geopolitical events will disrupt the economy on a national or global level.

Credit and Counterparty Risks A Fund will be exposed to credit risk to parties with whom it trades and will also bear the risk of settlement default. A Fund seeks to minimize concentrations of credit risk by undertaking transactions with a large number of counterparties on recognized and reputable exchanges, where applicable. Over the counter (OTC) derivative transactions are subject to the risk that a counterparty to the transaction will not fulfill its contractual obligations to the other party, as many of the protections afforded to centrally cleared derivative transactions might not be available for OTC derivative transactions. For derivatives traded on an exchange or through a central counterparty, credit risk resides with a Fund s clearing broker, or the clearinghouse itself, rather than with a counterparty in an OTC derivative transaction. A Fund could lose money if the issuer or guarantor of a fixed income security, or the

70 PIMCO CLOSED-END FUNDS

Table of Contents

June 30, 2018 (Unaudited)

counterparty to a financial derivatives contract, repurchase agreement or a loan of portfolio securities, is unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. Securities are subject to varying degrees of credit risk, which are often reflected in credit ratings.

Similar to credit risk, a Fund may be exposed to counterparty risk, or the risk that an institution or other entity with which the Fund has unsettled or open transactions will default. PIMCO, as the Manager, seeks to minimize counterparty risks to the Funds through a number of ways. Prior to entering into transactions with a new counterparty, the PIMCO Counterparty Risk Committee conducts an extensive credit review of such counterparty and must approve the use of such counterparty. Furthermore, pursuant to the terms of the underlying contract, to the extent that unpaid amounts owed to a Fund exceed a predetermined threshold, such counterparty is required to advance collateral to the Fund in the form of cash or securities equal in value to the unpaid amount owed to the Fund. A Fund may invest such collateral in securities or other instruments and will typically pay interest to the counterparty on the collateral received. If the unpaid amount owed to a Fund subsequently decreases, the Fund would be required to return to the counterparty all or a portion of the collateral previously advanced. PIMCO s attempts to minimize counterparty risk may, however, be unsuccessful.

All transactions in listed securities are settled/paid for upon delivery using approved counterparties. The risk of default is considered minimal, as delivery of securities sold is only made once a Fund has received payment. Payment is made on a purchase once the securities have been delivered by the counterparty. The trade will fail if either party fails to meet its obligation.

To the extent a Fund has a policy to limit the net amount owed to or to be received from a single counterparty under existing swap agreements, such limitation only applies to counterparties to OTC swaps and does not apply to centrally cleared swaps where the counterparty is a central counterparty or derivatives clearing organization.

7. MASTER NETTING ARRANGEMENTS

A Fund may be subject to various netting arrangements (Master Agreements) with select counterparties. Master Agreements govern the terms of certain transactions, and are intended to reduce the counterparty risk associated with relevant transactions by specifying credit protection mechanisms and providing standardization that is intended to improve legal certainty. Each type of Master Agreement governs certain types of transactions. Different types of transactions may be traded out of different legal entities or affiliates of a particular organization, resulting in the need for multiple agreements with a single counterparty. As the Master Agreements are specific to unique

operations of different asset types, they allow a Fund to close out and net its total exposure to a counterparty in the event of a default with respect to all the transactions governed under a single Master Agreement with a counterparty. For financial reporting purposes the Statements of Assets and Liabilities generally present derivative assets and liabilities on a gross basis, which reflects the full risks and exposures prior to netting.

Master Agreements can also help limit counterparty risk by specifying collateral posting arrangements at pre-arranged exposure levels. Under most Master Agreements, collateral is routinely transferred if the total net exposure to certain transactions (net of existing collateral already in place) governed under the relevant Master Agreement with a counterparty in a given account exceeds a specified threshold, which typically

ranges from zero to \$250,000 depending on the counterparty and the type of Master Agreement. United States Treasury Bills and U.S. dollar cash are generally the preferred forms of collateral, although other forms of AAA rated paper or sovereign securities may be used depending on the terms outlined in the applicable Master Agreement. Securities and cash pledged as collateral are reflected as assets on the Statements of Assets and Liabilities as either a component of Investments at value (securities) or Deposits with counterparty. Cash collateral received is not typically held in a segregated account and as such is reflected as a liability on the Statements of Assets and Liabilities as Deposits from counterparty. The market value of any securities received as collateral is not reflected as a component of NAV. A Fund so verall exposure to counterparty risk can change substantially within a short period, as it is affected by each transaction subject to the relevant Master Agreement.

Master Repurchase Agreements and Global Master Repurchase Agreements (individually and collectively Master Repo Agreements) govern repurchase, reverse repurchase, and sale-buyback transactions between a Fund and select counterparties. Master Repo Agreements maintain provisions for, among other things, initiation, income payments, events of default, and maintenance of collateral. The market value of transactions under the Master Repo Agreement, collateral pledged or received, and the net exposure by counterparty as of period end are disclosed in the Notes to Schedules of Investments.

8. FEES AND EXPENSES

(a) Management Fee Pursuant to the Investment Management Agreement with PIMCO (the Agreement), and subject to the supervision of the Board, PIMCO is responsible for providing to each Fund investment guidance and policy direction in connection with the management of the Fund, including oral and written research, analysis, advice, and statistical and economic data and information. In addition, pursuant to the Agreement and subject to the general supervision of the Board, PIMCO, at its expense, provides or causes to be furnished

SEMIANNUAL REPORT JUNE 30, 2018

Notes to Financial Statements (Cont.)

most other supervisory and administrative services the Funds require, including but not limited to, expenses of most third-party service providers (e.g., audit, custodial, legal, transfer agency, printing) and other expenses, such as those associated with insurance, proxy solicitations and mailings for shareholder meetings, NYSE listing and related fees, tax services, valuation services and other services the Funds require for their daily operations.

Pursuant to the Agreement, PIMCO receives an annual fee, payable monthly, at the annual rates shown in the table below:

	Annual
Fund Name	Rate ⁽¹⁾
PIMCO Municipal Income Fund	0.705%
PIMCO Municipal Income Fund II	0.685%
PIMCO Municipal Income Fund III	0.705%
PIMCO California Municipal Income Fund	0.705%
PIMCO California Municipal Income Fund II	0.705%
PIMCO California Municipal Income Fund III	0.715%
PIMCO New York Municipal Income Fund	0.770%
PIMCO New York Municipal Income Fund II	0.735%
PIMCO New York Municipal Income Fund III	0.860%

(1) Management fees calculated based on the Fund s average daily NAV (including daily net assets attributable to any preferred shares of the Fund that may be outstanding).

(b) Fund Expenses Each Fund bears other expenses, which may vary and affect the total level of expenses paid by shareholders, such as (i) salaries and other compensation or expenses, including travel expenses of any of the Fund s executive officers and employees, if any, who are not officers, directors, shareholders, members, partners or employees of PIMCO or its subsidiaries or affiliates; (ii) taxes and governmental fees, if any, levied against the Fund; (iii) brokerage fees and commissions and other portfolio transaction expenses incurred by or for the Fund (including, without limitation, fees and expenses of outside legal counsel or third-party consultants retained in connection with reviewing, negotiating and structuring specialized loan and other investments made by the Fund, subject to specific or general authorization by the Fund s Board); (iv) expenses of the Fund s securities lending (if any), including any securities lending agent fees, as governed by a separate securities lending agreement; (v) costs, including interest expense, of borrowing money or engaging in other types of leverage financing, including, without limitation, through the use by the Fund of reverse repurchase agreements, tender option bonds, bank borrowings and credit facilities; (vi) costs, including dividend and/or interest expenses and other costs (including, without limitation, offering and related legal costs, fees to brokers, fees to auction agents, fees to transfer agents, fees to ratings agencies and fees to auditors associated with satisfying ratings agency requirements for preferred shares or other securities issued by the Fund and other related requirements in the Fund s organizational documents) associated with the Fund s issuance, offering, redemption and

maintenance of preferred shares, commercial paper or other senior securities for the purpose of incurring leverage; (vii) fees and expenses of any underlying funds or other pooled investment vehicles in which the Fund invests; (viii) dividend and interest expenses on short positions taken by the Fund; (ix) fees and expenses, including travel expenses, and fees and expenses of legal counsel retained for their benefit, of Trustees who are not officers, employees, partners, shareholders or members of PIMCO or its subsidiaries or affiliates; (x) extraordinary expenses, including extraordinary legal expenses, that may arise, including expenses incurred in connection with litigation, proceedings, other claims, and the legal obligations of the Fund to indemnify its Trustees, officers, employees, shareholders, distributors, and agents with respect thereto; (xi) organizational and offering expenses of the Fund, including with respect to share offerings, such as rights offerings and shelf offerings, following the Fund s initial offering, and expenses associated with tender offers and other share repurchases and redemptions; and (xii) expenses of the Fund which are capitalized in accordance with U.S. GAAP.

Each of the Trustees of the Funds who is not an interested person under Section 2(a)(19) of the Act, (the Independent Trustees) also serves as a trustee of a number of other closed-end funds for which PIMCO serves as investment manager (together with the Funds, the PIMCO Closed-End Funds), as well as PIMCO Flexible Credit Income Fund and PIMCO Flexible Municipal Income Fund, each a closed end management investment company managed by PIMCO that is operated as an interval fund (the PIMCO Interval Funds), and PIMCO-Managed Accounts Trust, an open-end management investment company with multiple series for which PIMCO serves as investment adviser and administrator (PMAT and, together with the PIMCO Closed-End Funds and the PIMCO Interval Funds, the PIMCO-Managed Funds). In addition, each of the Independent Trustees also serves as a trustee of certain investment companies (together, the Allianz-Managed Funds), for which Allianz Global Investors U.S. LLC (AllianzGI U.S.), an affiliate of PIMCO, serves as investment manager. Prior to the close of business on September 5, 2014, a predecessor entity of AllianzGI U.S. served as investment manager of PMAT and the PIMCO Closed-End Funds.

Each Independent Trustee currently receives annual compensation of \$225,000 for his or her service on the Boards of the PIMCO-Managed Funds, payable quarterly. The Independent Chairman of the Boards receives an additional \$75,000 per year, payable quarterly. The Audit Oversight Committee Chairman receives an additional \$50,000 annually, payable quarterly. Trustees are also reimbursed for meeting-related expenses.

Each Trustee s compensation for his or her service as a Trustee on the Boards of the PIMCO-Managed Funds and other costs in connection

72 PIMCO CLOSED-END FUNDS

June 30, 2018 (Unaudited)

with joint meetings of such Funds are allocated among the PIMCO-Managed Funds, as applicable, on the basis of fixed percentages among PMAT, the PIMCO Interval Funds and the PIMCO Closed-End Funds. Trustee compensation and other costs will then be further allocated pro rata among the individual PIMCO-Managed Funds within each grouping based on each such PIMCO-Managed Funds relative net assets.

9. RELATED PARTY TRANSACTIONS

The Manager is a related party. Fees payable to this party are disclosed in Note 8, Fees and Expenses, and the accrued related party fee amounts are disclosed on the Statements of Assets and Liabilities.

Certain Funds are permitted to purchase or sell securities from or to certain related affiliated funds under specified conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any purchase or sale of securities by the Funds from or to another fund or portfolio that are, or could be, considered an affiliate, or an affiliate of an affiliate, by virtue of having a common investment adviser (or affiliated investment advisers), common Trustees and/or common officers complies with Rule 17a-7 under the Act. Further, as defined under the procedures, each transaction is effected at the current market price. During the period ended June 30, 2018, the Funds below engaged in purchases and sales of securities pursuant to Rule 17a-7 under the Act (amounts in thousands):

Fund Name	Purchases	Sales
PIMCO Municipal Income Fund	\$ 0	\$ 3,177
PIMCO Municipal Income Fund II	10,214	6,355
PIMCO Municipal Income Fund III	0	10,214
PIMCO California Municipal Income Fund	1,334	2,630
PIMCO California Municipal Income Fund II	2,002	1,956
PIMCO California Municipal Income Fund III	1,250	0
PIMCO New York Municipal Income Fund	0	2,286

PIMCO New York Municipal Income Fund III	686	0

A zero balance may reflect actual amounts rounding to less than one thousand.

10. GUARANTEES AND INDEMNIFICATIONS

Under each Fund s organizational documents, each Trustee and officer is indemnified, to the extent permitted by the Act, against certain liabilities that may arise out of performance of their duties to the Funds. Additionally, in the normal course of business, the Funds enter into contracts that contain a variety of indemnification clauses. The Funds maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts.

11. PURCHASES AND SALES OF SECURITIES

The length of time a Fund has held a particular security is not generally a consideration in investment decisions. A change in the securities held by a Fund is known as portfolio turnover. Each Fund may engage in frequent and active trading of portfolio securities to achieve its investment objective, particularly during periods of volatile market movements. High portfolio turnover may involve correspondingly greater transaction costs to a Fund, including brokerage commissions or dealer mark-ups and other transaction costs on the sale of securities and reinvestments in other securities. Such sales may also result in realization of taxable capital gains, including short-term capital gains (which are generally taxed at ordinary income tax rates). The transaction costs and tax effects associated with portfolio turnover may adversely affect a Fund s performance. The portfolio turnover rates are reported in the Financial Highlights.

Purchases and sales of securities (excluding short-term investments) for the period ended June 30, 2018, were as follows (amounts in thousands):

	U.S. Governm	nent/Agency	All Other	
Fund Name	Purchases	Sales	Purchases	Sales
PIMCO Municipal Income Fund	\$ 0	\$ 0	\$ 127,191	\$ 70,841
PIMCO Municipal Income Fund II	0	0	341,219	154,657
PIMCO Municipal Income Fund III	0	0	157,983	91,170
PIMCO California Municipal Income Fund	0	0	72,176	43,765
PIMCO California Municipal Income Fund II	0	0	72,209	46,288
PIMCO California Municipal Income Fund III	0	0	47,378	24,823
PIMCO New York Municipal Income Fund	0	0	25,240	15,127
PIMCO New York Municipal Income Fund II	0	0	30,583	19,138
PIMCO New York Municipal Income Fund III	0	0	19,339	11,039

A zero balance may reflect actual amounts rounding to less than one thousand.

12. AUCTION-RATE PREFERRED SHARES

Each series of Auction-Rate Preferred Shares (ARPS) outstanding of each Fund has a liquidation preference of \$25,000 per share plus any accumulated, unpaid dividends. Dividends are accumulated daily at an annual rate that is typically reset every seven days through auction procedures (or through default procedures in the event of failed auctions). Distributions of net realized capital gains, if any, are paid at least annually.

For the period ended June 30, 2018, the annualized dividend rates on the ARPS ranged from:
