The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer

to buy these securities in any state where the offer or sale is not permitted

Subject to Completion, dated July 3, 2014

GWG HOLDINGS, INC.

\$1,000,000,000 of Series L Bonds

GWG Holdings, Inc., through its subsidiaries, invests in life insurance assets in the secondary marketplace. Our objective is to earn returns from our investments in life insurance assets that are greater than the costs necessary to purchase, finance and service those policies to their maturity.

We are offering up to \$1,000,000,000 in Series L Bonds (the Series L Bonds) in this offering. This is a continuous offering and there is no minimum amount of Series L Bonds that must be sold before we can use any of the proceeds. The proceeds from the sale of the Series L Bonds will be paid directly to us following each sale and will not be placed in an escrow account. We will use the net proceeds from the offering of the Series L Bonds primarily to purchase and finance additional life insurance assets, and to service and retire other outstanding debt obligations. The minimum investment in Series L Bonds is \$25,000. Investments in excess of such minimum amount may be made in \$1,000 increments. The Series L Bonds will be sold with varying maturity terms, interest rates and frequency of interest payments, all as set forth in this prospectus and in supplements we publish from time to time. Depending on our capital needs and the amount of your investment, Series L Bonds with certain terms may not always be available. Although we will periodically establish and change interest rates on unsold Series L Bonds offered pursuant to this prospectus, once a Series L Bond is sold, its interest rate will not change during its term (subject, however, to the extension and renewal provisions contained in such Series L Bond). Upon maturity, subject to the terms and conditions described in this prospectus, the Series L Bonds will be automatically renewed for the same term at the interest rate we are offering at that time to other investors with similar aggregate Series L Bond portfolios for Series L Bonds of the same maturity, unless redeemed upon maturity at our or your election.

The Series L Bonds are secured by the assets of GWG Holdings, Inc. and a pledge of all of the common stock by our largest stockholders. Importantly, GWG Holdings' most significant assets are cash and its investment in subsidiaries. Obligations under the Series L Bonds will be guaranteed by our subsidiary GWG Life, LLC, which guarantee will involve the grant of a security interest in all of the assets of such subsidiary. The majority of our life insurance assets are held in our subsidiary GWG DLP Funding II, LLC, which is a direct subsidiary of GWG Life. The life insurance assets held by GWG DLP Funding II will not be collateral for obligations under the Series L Bonds although the guarantee and collateral provided by GWG Life will include its ownership interest in GWG DLP Funding II. These facts present the risk to investors that the collateral security we and our subsidiary have granted for our obligations under the Series L Bonds may be insufficient to repay the Series L Bonds upon an event of default. The security offered for the Series L Bonds will provide rights as to collateral that are pari passu with the holders of other secured debt previously issued by GWG Life and GWG Holdings. This generally means that claims for payment and entitlement to security among the holders of Series L Bonds and such other secured debt previously issued by GWG Life and GWG Holdings will be treated equally and without preference.

We may call and redeem the entire outstanding principal and accrued but unpaid interest of any or all of the Series L Bonds at any time without penalty or premium. Series L Bond holders will have no right to put (that is, require us to redeem) any Series L Bond prior to the due date unless in the case of death, bankruptcy or total disability. In the event we agree to redeem a Series L Bond upon the request of a Series L Bond holder other than after death, bankruptcy or total disability of such holder we will impose a redemption fee of 6% against the outstanding principal balance of the redeemed Series L Bond. This redemption fee will be subtracted from the amount paid.

We do not intend to list our Series L Bonds on any securities exchange during the offering period, and we do not expect a secondary market in the Series L Bonds to develop. As a result, you should not expect to be able to resell your Series L Bonds regardless of how we perform. Accordingly, an investment in our Series L Bonds is not suitable for investors that require liquidity in advance of their Series L Bond's maturity date.

We maintain a senior borrowing arrangement that subordinates the right to payment on, and shared collateral securing, the Series L Bonds to our senior secured lender. From time to time we may add or replace senior lenders and the particular arrangements under which we borrow from them. In addition, these borrowing arrangements with senior lenders restrict, and are expected to continue to restrict, our cash flows and, subject to certain exceptions, distributions from our operating subsidiaries. These provisions will restrict cash flows available for payment of principal and interest on the Series L Bonds.

Edgar Filing: GWG Holdings, Inc. - Form S-1

We are an emerging growth company under applicable law and are subject to reduced public company reporting requirements. Please read the disclosures on page 11 of this prospectus for more information. Investing in our Series L Bonds may be considered speculative and involves a high degree of risk, including the risk of losing your entire investment. See Risk Factors beginning on page 19 to read about the risks you should consider before buying our Series L Bonds. You should carefully consider the risk factors set forth in this prospectus. The Series L Bonds are only suitable for persons with substantial financial resources and with no need for liquidity in this investment.

Please read this prospectus before investing and keep it for future reference. We file annual, quarterly and current reports with the SEC. This information will be available free of charge by contacting us at 220 South Sixth Street, Suite 1200, Minneapolis, Minnesota 55402 or by phone at (612) 746-1944 or on our website at www.gwglife.com. The SEC also maintains a website at www.sec.gov that contains such information.

Neither the SEC nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is _____, 2014

Table of Contents

The Series L Bonds will be offered and sold on a best-efforts basis by _____, a registered broker-dealer and member of the Financial Industry Regulatory Authority (FINRA). _____ will be an underwriter of the Series L Bonds in this offering for purposes of the Securities Act of 1933. _____ may retain other dealers to act as an agent on its behalf in the course of offering and selling Series L Bonds in this offering. We will pay _____ a selling commission ranging from 0.50% to 5.00% of the principal amount of Series L Bonds sold, depending on the Series L Bonds' maturity date. We will also pay _____ additional underwriting compensation ranging from 1.00% to 3.00% of the principal amount of Series L Bonds sold, again depending on the Series L Bonds' maturity date. Such additional underwriting compensation consists of a dealer-manager fee, a wholesaling fee (payable only to wholesaling dealers), and an accountable and non-accountable expense allowance. _____ will share its commissions and accountable and non-accountable expense allowance with other dealers who may participate in the offering. The total amount of the selling commissions and additional underwriting compensation paid to _____ and any other FINRA member in the course of offering and selling Series L Bonds will not exceed 8.00% of the aggregate amount of the Series L Bonds sold. See Plan of Distribution and Use of Proceeds for further information.

	Price to Investor	Aggregate Commissions, Fees, and Expense Allowances (1) (2)	Net Proceeds to Company
Minimum Investment	\$ 25,000	\$ 1,812	\$ 23,188(3)
Offering	\$ 1,000,000,000	\$ 72,500,000	\$ 926,000,000(4)

- (1) Assumes an average sales commission of 4.25%, average dealer-manager fee of 0.50%, average wholesaling fees of 0.80%, and average accountable and non-accountable expense allowance of 1.70%. As explained above, actual commissions, fees and allowances will vary based on the term of the Series L Bonds sold. Nevertheless, the total amount of selling commissions and additional underwriting compensation (consisting of dealer-manager fees, wholesaling fees and accountable and non-accountable expense allowances) paid to the underwriter will not exceed 8.00% of the aggregate principal amount of Series L Bonds sold.
- (2) _____ has agreed to offer the Series L Bonds on a best efforts basis.
- (3) Net Proceeds to Company based on the Minimum Investment are calculated after deducting (i) selling commissions and (ii) additional underwriting compensation (consisting of a dealer-manager fee, wholesaling fee, and an accountable and non-accountable expense allowance). We expect that our own offering expenses, consisting of legal, accounting, printing, mailing, registration, qualification and associated securities offering filing costs and expenses, will through the course of the offering aggregate to approximately \$1,500,000, but for purposes of illustrating the Net Proceeds to Company based on the Minimum Investment, those offering expenses of \$1,500,000 are not reflected.

Edgar Filing: GWG Holdings, Inc. - Form S-1

- (4) Net Proceeds to Company based on the offering of \$1,000,000,000 in principal amount of Series L Bonds are calculated as described in fn. 3 above, but also after deducting our own expected offering expenses of \$1,500,000.

We will issue the Series L Bonds in book-entry form, certificated form, or in the form of a global certificate deposited with a depository. Depending on the manner in which you purchase Series L Bonds, you may not receive a physical certificate representing your Series L Bonds. In all cases, however, we will deliver written confirmation to purchasers of Series L Bonds. Bank of Utah will act as trustee for the Series L Bonds.

The initial interest rates for the Series L Bonds based on the applicable maturity thereof is set forth in the table below.

<u>Maturity Term</u>	<u>Interest Rate (%)</u>
1 year	5.00
2 years	6.50
3 years	7.50
5 years	8.50
7 years	9.00

We may change the interest rates applicable to unsold Series L Bonds from time to time during this offering, in which case the applicable interest rates will be set forth in an interest rate supplement to this prospectus. Once a Series L Bond is sold, the interest rate will not change during its term (subject, however, to the extension and renewal provisions contained in such Series L Bond).

ABOUT THIS PROSPECTUS

We have prepared this prospectus as part of a registration statement that we filed with the SEC for our continuous offering of Series L Bonds. Periodically, as we make material investments or have other material developments, we will provide a prospectus supplement that may add to, update or change information contained in this prospectus. We will endeavor to avoid interruptions in the continuous offering of our Series L Bonds. Nonetheless, our continuous offering may be suspended while the SEC or FINRA reviews certain amendments to our registration statement, until ultimately declared effective by the SEC.

Any statement that we make in this prospectus will be modified or superseded by any inconsistent statement made by us in a subsequent prospectus supplement. The registration statement we filed with the SEC includes exhibits that provide more detailed descriptions of the matters discussed in this prospectus. You should read this prospectus, the related exhibits filed with the SEC, and any prospectus supplement, together with additional information described below under Where You Can Find More Information. In this prospectus, we use the term day to refer to a calendar day, and we use the term business day to refer to any day other than Saturday, Sunday, a legal holiday or a day on which banks in New York City are authorized or required to close.

You should rely only on the information contained in this prospectus. Neither we nor the dealer-manager have authorized any other person to provide you with any information different from that contained in this prospectus or information furnished by us upon request as described herein. The information contained in this prospectus is complete and accurate only as of the date of this prospectus, regardless of the time of delivery of this prospectus or sale of our Series L Bonds. This prospectus contains summaries of certain other documents, which summaries contain all material terms of the relevant documents and are believed to be accurate, but reference is hereby made to the full text of the actual documents for complete information concerning the rights and obligations of the parties thereto. Such information necessarily incorporates significant assumptions, as well as factual matters. All documents relating to this offering and related documents and agreements, if readily available to us, will be made available to a prospective investor or its representatives upon request. During the course of this offering and prior to sale, each prospective Series L Bond holder is invited to ask questions of and obtain additional information from us concerning the terms and conditions of this offering, our company, the Series L Bonds and any other relevant matters, including but not limited to additional information necessary or desirable to verify the accuracy of the information set forth in this prospectus. We will provide the information to the extent it possesses such information or can obtain it without unreasonable effort or expense. If there is a material change in the affairs of our company, we will supplement this prospectus or amend the registration statement of which this prospectus is a part.

No information contained herein, nor in any prior, contemporaneous or subsequent communication should be construed by a prospective investor as legal or tax advice. Each prospective investor should consult its, his or her own legal, tax and financial advisors to ascertain the merits and risks of the transactions described herein prior to purchasing the Series L Bonds. This written communication is not intended to be issued as a reliance opinion or a marketed opinion, as defined under Section 10.35 of Circular 230 published by the U.S. Treasury Department, so as to avoid any penalties that could be assessed under the Internal Revenue Code of 1986, as amended (the Code) or its applicable Treasury

Regulations. Accordingly, (a) any information contained in this written communication is not intended to be used, and cannot be used or relied upon for purposes of avoiding any penalties that may be imposed on a prospective investor by the Code or applicable Treasury Regulations; (b) this written communication has been written to support the promotion or marketing of the transactions or matters addressed by this written communication; and (c) each prospective investor should seek advice based on the prospective investor's particular circumstances from an independent tax advisor.

The Series L Bonds will be issued under an indenture. This prospectus is qualified in its entirety by the terms of that indenture filed with SEC as an exhibit to the registration statement of which this prospectus is a part. All material terms of the indenture are summarized in this prospectus. You may obtain a copy of the indenture upon written request to us or online at www.sec.gov.

Table of Contents

The indenture trustee did not participate in the preparation of this prospectus and makes no representations concerning the Series L Bonds, the collateral, or any other matter stated in this prospectus. The indenture trustee has no duty or obligation to pay the Series L Bonds from their funds, assets or capital or to make inquiry regarding, or investigate the use of, amounts disbursed from any account.

INDUSTRY AND MARKET DATA

The industry and market data used throughout this prospectus have been obtained from our own research, surveys or studies conducted by third parties and industry or general publications. Industry publications and surveys generally state that they have obtained information from sources believed to be reliable, but do not guarantee the accuracy and completeness of such information. We believe that each of these studies and publications is reliable.

HOW TO PURCHASE SERIES L BONDS

If, after carefully reading this entire prospectus, obtaining any other information requested and available, and being fully satisfied with the results of pre-investment due-diligence activities, you would like to purchase Series L Bonds, you will have two different ways in which to consummate a purchase: (1) DTC settlement, and (2) direct settlement with the Company.

1. *Depository Trust Company Settlement (DTC settlement)*. If your broker-dealer is a participant in the DTC system and makes DTC settlement available to you, then you can place an order for the purchase of Series L Bonds through your broker-dealer. A broker-dealer using this service will have an account with DTC in which your funds will be placed to facilitate the monthly closing cycle. Orders will be executed by your broker-dealer electronically and you must coordinate with your broker-dealer's registered representative to pay the full purchase price for the Series L Bonds by the final settlement date (generally the 20th day of the month immediately preceding the end of a calendar month). Your purchase price for Series L Bonds purchased in this way will not be held in escrow.

2. *Direct Settlement with the Company*. If you wish to purchase Series L Bonds through direct settlement with the Company, then you must complete, execute and return the Subscription Agreement to us together with a certified check or personal check payable to the order of GWG Holdings, Inc. Subscription Account (or wire sent to the Subscription Account) equal to the principal amount of Series L Bonds you wish to purchase. If you are working with a broker-dealer, your subscription materials and the certified check or personal check should be delivered to your broker-dealer, who will deliver it to us at the following address:

**GWG Holdings, Inc.
220 South Sixth Street, Suite 1200
Minneapolis, MN 55402**

Table of Contents

COVERED SECURITY

Our Series L Bonds are a covered security. The term covered security applies to securities exempt from state registration pursuant to Section 18 of the Securities Act of 1933. Generally, securities listed on national exchanges are the most common type of covered security exempt from state registration. A non-traded security also can be a covered security if it has a seniority greater than or equal to other securities from the same issuer that are listed on a national exchange. Our Series L Bonds are a covered security because it is senior to our common stock, which is listed on the Nasdaq Global Market.

Table of Contents

PROSPECTUS SUMMARY

This summary highlights some of the information in this prospectus. It is not complete and may not contain all of the information that you may want to consider. To understand this offering fully, you should carefully read the entire prospectus, including the section entitled Risk Factors, before making a decision to invest in our Series L Bonds. Unless otherwise noted or unless the context otherwise requires, the terms we, us, our, the Company and GWG refers to GWG Holdings, Inc. together with its wholly owned subsidiaries. In instances where we refer emphatically to GWG Holdings or GWG Holdings, Inc., or where we refer to a specific subsidiary of ours by name, we are referring only to that specific legal entity.

Our Company

We provide financial services to consumers in the emerging secondary market for life insurance assets. We target our financial service offerings toward consumers owning life insurance who can benefit from realizing the actuarial value of their life insurance policy. We believe the value proposition of our services to the consumers we serve is very high, and these consumers represent the fastest growing demographic in the United States according to the U.S. Census Bureau. To address this growing need, we recently have expanded our services by offering consumers a range of options to access the actuarial value of their life insurance, including purchasing (i) all or a portion of their life insurance policy for cash, (ii) all or a portion of their life insurance policy in exchange for a different asset, and (iii) all or a portion of their life insurance policy in an installment sale that provides the selling consumer with a stream of cash flow. All of our services involve our purchase or financing of life insurance assets from consumers in the secondary market at a discount to the face value of the life insurance asset we obtain. In cases where we purchase a life insurance policy, we continue paying the policy premiums until maturity, in order to collect the policy benefit upon the insured's mortality. In this way, we hope to profit from the difference between our cost of obtaining and financing a life insurance asset, and the policy benefit we ultimately receive upon the mortality of the insured.

In addition to our goal of providing consumers with value-added services based upon the actuarial value of their life insurance policies, we seek to build a profitable and large portfolio of life insurance assets that are well diversified in terms of insurance carriers, mortality profiles and the medical conditions of insureds. We believe that successfully diversifying our assets will lower our overall risk exposure and provide our portfolio of life insurance assets with greater actuarial stability and more reliable returns. To obtain the growth and diversification we seek, we have raised capital through a variety of financing efforts that have included the public offering of our common stock, private and public offerings of structured debt securities, private offerings of preferred stock, and the use of a senior secured revolving credit facility. This offering

of Series L Bonds is an extension of that strategy, and presents investors with an opportunity to participate in our business and the opportunity presented by the secondary market for life insurance. We believe that this investment opportunity is unique and attractive in that potential investment returns from life insurance assets are not correlated to general economic or financial market conditions.

According to the American Council of Life Insurers Fact Book 2013 (ACLI), individuals owned over \$11.22 trillion of face value of life insurance policies in the United States in 2012. This figure includes all types of policies, including term and permanent insurance known as whole life, universal life, variable life, and variable universal life. The ACLI reports that the lapse and surrender rate of individual life insurance policies for 2012 was 5.9%, over \$661 billion in face value of policy benefits in 2012 alone. These figures do not include group-owned life insurance, such as employer-provided life insurance, the market for which totaled over \$8.01 trillion of face value of life insurance policies in the United States in 2012, and the policies of which exhibit similar lapse and surrender rates, according to the ACLI. Consumers owning life insurance generally allow policies to lapse or surrender the policies for a variety of reasons, including: (i) the life insurance is no longer needed; (ii) unrealistic original earnings assumptions made when the policy was purchased; (iii) increasing premium payment obligations as the insured ages; (iv) changes in financial status or outlook which cause the insured to no longer require life insurance; (v) other financial needs that make the insurance unaffordable; or (vi) a desire to maximize the policy's investment value.

Table of Contents

The secondary market for life insurance has developed in response to the large volume of policy lapses and surrenders. Rather than allowing a policy to lapse as worthless, or surrendering a life insurance policy at a fraction of its inherent value, the secondary market can be a source of significant value to consumers. The inherent actuarial value of a policy in the life insurance secondary market often exceeds the cash surrender value offered by the insurance carrier. Without the development of the secondary market, insurance carriers would maintain monopsony power over the options offered to consumers who no longer need or want their life insurance.

Although still relatively new and still emerging, Conning Research & Consulting (Conning) reports that the secondary market for life insurance policies grew from \$2 billion in face value of benefits purchased in 2002, to over \$12 billion in face value of benefits purchased in 2008. During and after the 2009 credit crisis, the secondary market for life insurance contracted significantly, evidenced by Conning's report that investors purchased approximately \$2 billion in face value of life insurance benefits in 2012. Nevertheless, Conning reports that consumer demand for continued development of the secondary market remains strong, and there are indications of strengthening interest among investors. Conning maintains that, given the current economic condition and investor sentiment, the secondary market will likely increase, and the market's largest growth will likely come from companies that attract capital to purchase the assets. We believe that socio-economic and demographic trends further support the long-term development and growth of the secondary market for life insurance, and that the secondary market for life insurance represents a significant and expanding market opportunity. In support of this belief, Conning reports that the net market potential for policies sold in the secondary market exceeded \$109 billion in 2012, and is expected to grow to \$151 billion by 2019.

We believe that we are uniquely positioned to capitalize on this opportunity by providing value-added services to the consumers we serve, and new investment opportunities for investors, where both participants can profit. To participate and compete in our growing market, we have spent and intend to continue to spend significant resources: (i) developing a robust operational platform and systems for originating, purchasing, and servicing life insurance policies; (ii) obtaining requisite licensure to participate in the life insurance secondary market; (iii) developing financing resources, strategies, and capabilities for servicing a large portfolio of life insurance policies; (iv) recruiting and developing a professional management team; and (v) establishing strategic relationships for delivering our services.

Since our formation in 2006, we have evaluated over 36,000 policies and acquired over \$1.7 billion in face value of life insurance policy benefits in the secondary market. In 2008, after selling approximately \$1 billion in face value of life insurance policy benefits, we adopted our current buy-and-hold strategy of investing in a portfolio life insurance assets and offering investors the opportunity to finance our ownership of the portfolio. As of March 31, 2014, we owned approximately \$772 million in face value of life insurance policy benefits with an aggregate cost basis (i.e., acquisition and ongoing premiums and financing costs) of approximately \$246 million.

A summary of our portfolio of life insurance assets as of March 31, 2014, is set forth in the table below:

Life Insurance Portfolio Summary

Total portfolio face value of policy benefits	\$771,940,000
---	---------------

Edgar Filing: GWG Holdings, Inc. - Form S-1

Average face value per policy	\$ 2,699,000
Average face value per insured life	\$ 3,015,000
Average age of insured (yrs.) *	82.3
Average life expectancy estimate (yrs.) *	7.02
Total number of policies	286
Number of unique lives	256
Demographics	67% Males; 33% Females
Number of smokers	3 insureds are smokers
Largest policy as % of total portfolio	1.30%
Average policy as % of total portfolio	0.35%
Average Annual Premium as % of face value	3.15%

5

Table of Contents

All of our services are premised on financial and actuarial modeling that assigns a present value to the face value of an insurance policy benefit. In this regard, the value we assign to a life insurance asset in the secondary market is primarily a function of: (i) the face value of the life insurance policy or portion thereof we may wish to acquire; (ii) the estimated life expectancy of the individual insured under the policy; (iii) the premiums expected to be paid over the life of the insured; (iv) market competition from other purchasers in the secondary market; and (v) the particular underwriting characteristics of the policy, relative to the characteristics of our portfolio of life insurance assets as a whole.

The types of policies for which we provide services are typically, but not always, universal life insurance policies. Universal life insurance is a type of permanent life insurance in which premium payments above the cost of insurance are credited to the cash value of the policy. The cash value is credited each month with interest based on the terms of the insurance policy agreement. If a universal life insurance policy were to lapse, the insured or other owner of the policy would nonetheless have a right to receive the cash surrender value of the policy. The cash surrender value is the cash value of the policy, less any surrender charges imposed by the insurance company for removing the cash value. Our services provide greatest value to a consumer when the actuarial value of the life insurance policy benefit exceeds the cash surrender value of the policy which is often the case. We also provide services to consumers who own term life insurance. Unlike permanent universal life insurance, term life insurance does not have a cash value associated with it. Nevertheless, most term insurance policies permit the policy to be converted into permanent universal life insurance. In the future, we may consider offering services in conjunction with variable universal life insurance, which differs from universal insurance in that the variable component of the policy involves the ownership of securities inside the policy. Regardless of the type of policy, we generally seek to purchase life insurance policies issued by rated life insurance carriers with investment grade credit ratings by Standard & Poor's (AAA through BBB), Moody's (Aaa through Baa3), or A.M. Best Company (aaa through bbb). As of December 31, 2013 and March 31, 2014, over 93.5% and 92.3%, respectively, of life insurance policies within our portfolio were issued by companies rated A- or better under Standard & Poor's rating system.

Before acquiring a life insurance asset, we value the related life insurance policy by conducting an underwriting review. Our present underwriting review process generally involves obtaining two life expectancy estimates on each insured from third-party medical-actuarial firms, and then averaging these two estimates. On occasion, we may obtain more than two life expectancy estimates, in which case we average the two life expectancy estimates that we believe are the most reliable, based on our own analyses and conclusions. In this regard, the two life expectancy estimates we ultimately choose to average may not always be the most conservative estimates we obtain. From time to time and as permitted by applicable borrowing covenants, we may modify our underwriting review process. For example, in anticipation of our planned marketing efforts, we recently changed our definition of a small face policy from \$250,000 in policy benefits to \$1,000,000 in policy benefits. For small face policies, rather than obtaining life expectancy estimates from third-party medical-actuarial firms, we may employ a modified underwriting review process involving the use of a combination of standard mortality tables, actuarial or medical consultants, and our own analysis to develop a life expectancy estimate for an insured.

We generally transact directly with the policy owner who originally purchased the life insurance in the primary market. Historically, we have purchased policies in the secondary market through a network of life insurance agents, life insurance brokers, and licensed providers who assist policy owners in accessing the secondary market. We expect to expand our origination practice by marketing directly to consumers through various marketing initiatives.

We have built our business with what we believe to be the following competitive strengths:

Industry Experience: We have actively participated in the development of the secondary market of life insurance as a principal purchaser and financier within the asset class since 2006. Our position within the marketplace has allowed us to gain a deep understanding of the life insurance secondary market. We have participated in the leadership of various industry associations and forums, including the Life Insurance Settlement Association (LISA) and the Insurance Studies Institute (ISI). Our experience gives

Table of Contents

us confidence in building a company to compete in the industry and acquire a portfolio of life insurance policies that will perform to our expectations.

Operational Platform: We have built and continue to refine and develop an operational platform and systems for efficiently tracking, processing, and servicing life insurance policies that we believe provide competitive advantages when participating in the life insurance secondary marketplace.

Origination and Underwriting Practices: We seek to use underwriting review processes and file documentation standards that generally meet published guidelines for rated securitizations of life insurance portfolios. We purchase life insurance policies we consider to be non-contestable and that meet our underwriting criteria and reviews. We consider a life insurance policy to be non-contestable once applicable state law prohibits the insurer from challenging the validity of the policy due to fraud. In this regard, state non-contestability laws generally require a period of one to two years to elapse after the initial issuance of the policy before that policy is considered non-contestable under state law. Non-contestability laws do not, however, prevent an insurer from challenging the validity of a policy procured by fraud for lack of an insurable interest at the time at which the policy was purchased, such as is the case with so-called stranger-originated life insurance policies. To the extent we use modified methodologies for estimating life expectancies for small face policies, those modified methodologies may not meet published guidelines for rated securitizations of life insurance portfolios.

Origination Relationships and Strategies: We have established origination relationships with life insurance policy brokers and insurance agents who submit policies for our purchase or financing. Our referral base knows our underwriting standards for purchasing life insurance policies in the secondary market, which provides confidence in our bidding and closing processes and streamlines our own due-diligence process. We expect to expand our origination methodology and channels with the proceeds of this offering (e.g., the addition of consumer marketing).

Life Expectancy Methodology: We generally rely on two life expectancy estimates obtained from independent third-party medical-actuarial underwriting firms to arrive at a life expectancy estimate we use for valuing a life insurance asset. For a majority of our life insurance asset purchases, we rely on estimates obtained from 21st Services and AVS Underwriting to develop our life expectancy estimate. We may, however, also obtain and use life expectancy estimates from other medical-actuarial underwriting firms. As explained above, we may from time to time modify our underwriting review processes, including our methodology for arriving at life expectancy estimates we use in ascribing value to a life insurance asset.

Pricing Software and Methodology: To calculate our expected returns on the investments we make in life insurance assets, we use actuarial pricing methodologies and software tools built by a leading independent actuarial service firm and currently supported by Modeling Actuarial Pricing Systems, Inc. (MAPS).

Financing Strategy: We have actively developed diversified financing strategy for accessing capital markets in support of our buy-and-hold strategy for our portfolio of life insurance policies, ranging from institutional bank financing to a network of broker-dealers registered with the Financial Industry Regulatory Authority (FINRA), many of whom have participated in one or more of our Series I Secured note financing, our Series A preferred stock financing, or our Renewable Secured Debenture financing. If in the future we determine to offer different kinds of investment products, we expect to leverage the network of broker-dealers that we have built over time.

On the other hand, our business involves a number of challenges and risks described in more detail elsewhere in this prospectus, including the following:

Relatively New Market: Investing in life insurance assets in the secondary market is a relatively new and evolving market. Our ability to source and invest in life insurance assets at attractive prices materially depends on the continued growth of the secondary market for life insurance and the continued solvency of the life insurance companies that pay the face value of life insurance policy benefits.

Table of Contents

Asset Valuation Assumptions: The valuation of our portfolio life insurance assets the principal asset on our balance sheet requires us to make material assumptions that may ultimately prove to be incorrect. These assumptions include appropriate discount rates, cash flow projections, and the life expectancy estimates we use for these purposes, any of which may ultimately prove to be inaccurate.

Ability to Expand Our Portfolio: Our business model requires us to achieve actual results that are in line with those we expect to attain from our investments in life insurance assets. In this regard, we believe that the larger the portfolio of life insurance assets we own, the greater likelihood there is that we will achieve results matching our expectations. Although we plan to expand the number of investments in life insurance assets using proceeds from the sale of our Series L Bonds, we may be unable to meet this goal. Furthermore, even if we successfully grow our portfolio of life insurance assets, we nevertheless may not achieve the results we expect.

Reliance on Financing: We have chosen to finance our business almost entirely through the issuance of debt, including the sale of Series L Bonds, Renewable Secured Debentures, Series I Secured notes, and our use of a senior secured revolving credit facility. Our business model expects that we will have continued access to financing (including financing to expand or replace our existing financing) in order to purchase a large and diversified portfolio of life insurance assets, and thereafter pay the attendant premiums and financing costs of maintaining that portfolio. We will be required to rely on our access to financing to pay premiums and interest until such time as we experience a significant amount of mortality within our portfolio and begin receiving significant revenues from the receipt of life insurance policy benefits. Even if we obtain the financing we require, we may not receive life insurance policy benefits that match our cash flow projections or meet them in time to earn profits after the payment of financing costs.

Risk of Investment in Life Insurance Assets: Our investments in life insurance assets have inherent risks, including fraud and legal challenges to the validity of the life insurance policies. Examples of fraud include the possibility that the seller of a policy may have provided us with inaccurate or misleading information during the underwriting review process.

Effects of Regulation: Our business is subject to complex state and federal regulation. Changes in state or federal laws and regulations governing our business, or changes in the interpretation of such laws and regulations, could materially and negatively affect our business.

Our business also involves certain other challenges and risks described in the Risk Factors section of this prospectus.

Implications of Being an Emerging Growth Company

As a public reporting company with less than \$1 billion in revenue during our last fiscal year, we qualify as an emerging growth company under the Jumpstart our Business Startups Act of 2012, or the JOBS Act. An emerging growth company may take advantage of certain reduced reporting requirements and is relieved of certain other significant requirements that are otherwise generally applicable to public companies. In particular, as an emerging growth company we:

are not required to obtain an attestation and report from our auditors on our management's assessment of our internal control over financial reporting pursuant to the Sarbanes-Oxley Act of 2002;

are not required to provide a detailed narrative disclosure discussing our compensation principles, objectives and elements and analyzing how those elements fit with our principles and objectives (commonly referred to as compensation discussion and analysis);

are not required to obtain a non-binding advisory vote from our stockholders on executive compensation or golden parachute arrangements (commonly referred to as the say-on-pay, say-on-frequency and say-on-golden-parachute votes);

are exempt from certain executive compensation disclosure provisions requiring a pay-for-performance graph and CEO pay ratio disclosure;

Table of Contents

may present only two years of audited financial statements and only two years of related Management's Discussion & Analysis of Financial Condition and Results of Operations, or MD&A; and

are eligible to claim longer phase-in periods for the adoption of new or revised financial accounting standards under §107 of the JOBS Act.

We intend to take advantage of all of these reduced reporting requirements and exemptions, including the longer phase-in periods for the adoption of new or revised financial accounting standards under §107 of the JOBS Act. Our election to use the phase-in periods may make it difficult to compare our financial statements to those of non-emerging growth companies and other emerging growth companies that have opted out of the phase-in periods under §107 of the JOBS Act. Please see Risk Factors, page 32 (*We are an 'emerging growth company'*).

Certain of these reduced reporting requirements and exemptions were already available to us due to the fact that we also qualify as a smaller reporting company under SEC rules. For instance, smaller reporting companies are not required to obtain an auditor attestation and report regarding management's assessment of internal control over financial reporting; are not required to provide a compensation discussion and analysis; are not required to provide a pay-for-performance graph or CEO pay ratio disclosure; and may present only two years of audited financial statements and related MD&A disclosure.

Under the JOBS Act, we may take advantage of the above-described reduced reporting requirements and exemptions for up to five years after our initial sale of common equity pursuant to a registration statement declared effective under the Securities Act of 1933, or such earlier time that we no longer meet the definition of an emerging growth company. In this regard, the JOBS Act provides that we would cease to be an emerging growth company if we have more than \$1 billion in annual revenues, have more than \$700 million in market value of our common stock held by non-affiliates, or issue more than \$1 billion in principal amount of non-convertible debt over a three-year period. Furthermore, under current SEC rules we will continue to qualify as a smaller reporting company for so long as we have a public float (i.e., the market value of common equity held by non-affiliates) of less than \$75 million as of the last business day of our most recently completed second fiscal quarter.

Corporate Organization

Our business was organized in February 2006. As a parent holding company, GWG Holdings was incorporated on March 19, 2008 as a limited liability company. On June 10, 2011, GWG Holdings converted from a Delaware limited liability company to a Delaware corporation through the filing of statutory articles of conversion. In connection with the conversion, each class of limited liability company membership interests in GWG Holdings, LLC was converted into shares of common stock of GWG Holdings, Inc. Our corporate structure, including our principal subsidiaries, is as follows:

Table of Contents

GWG Life, LLC (a Delaware limited liability company formerly known as GWG Life Settlements, LLC), is a licensed life/viatical settlement provider and the guarantor of the obligations of GWG Holdings under our Renewable Secured Debentures. GWG DLP Funding II, LLC (a

Edgar Filing: GWG Holdings, Inc. - Form S-1

Delaware limited liability company), or DLP Funding II, is a wholly owned special-purpose subsidiary owning life insurance policies and is the borrower under our revolving line of credit from Autobahn/DZ Bank. The life insurance assets owned by DLP Funding II are held in the GWG DLP Master Trust II (a Delaware statutory trust). The trust exists solely to hold the collateral security (i.e., life insurance policies) granted to Autobahn/DZ Bank under our revolving line of credit. DLP Funding II is the beneficiary under that trust.

On June 24, 2014, we effected a 1-for-2 share combination (reverse stock split) of our issued and outstanding common stock. Unless otherwise expressly indicated herein, all common share figures contained in this prospectus have been adjusted to reflect the effectiveness of this share combination.

Our principal executive offices are located at 220 South Sixth Street, Suite 1200, Minneapolis, Minnesota 55402 and our telephone number is (612) 746-1944. Our website address is www.gwglife.com. The information on or accessible through our website is not part of this prospectus.

10

Table of Contents

The Offering

Issuer	GWG Holdings, Inc.
Indenture Trustee	Bank of Utah
Paying Agent	GWG Holdings, Inc.
Securities Offered	We are offering up to \$1,000,000,000 in principal amount of our Series L Bonds. The Series L Bonds are being sold on a continuous basis.
Method of Purchase	We will sell Series L Bonds using two different closing or settlement services. The first service is DTC settlement, and the second is direct settlement with the Company. For more information, see Plan of Distribution.
Denomination	The minimum purchase of Series L Bonds is \$25,000 in principal amount. Additional Series L Bonds in excess of \$25,000 may be purchased in increments of \$1,000.
Offering Price	100% of the principal of the Series L Bond.
Limited Rescission Right	If you are purchasing Series L Bonds through direct settlement with the Company and your Subscription Agreement is accepted at a time when we have determined that a post-effective amendment to the registration statement of which this prospectus is a part must be filed with the SEC, but such post-effective amendment has not yet been declared effective, you will have a limited time within which to rescind your investment subject to the conditions set forth in this prospectus. See Description of the Series L Bonds Limited Rescission Right for additional information.
Maturity	You may generally choose maturities for your Series L Bonds of 1, 2, 3, 5, or 7 years. Nevertheless, depending on our capital requirements, we may not offer and sell Series L Bonds of all maturities at all times during this offering.
Interest Rates	The interest rate of the Series L Bonds will be established at the time of your purchase, or at the time of renewal, based upon the rates we are offering in this prospectus or our latest interest rate supplement to this prospectus (i.e.,

any prospectus supplement containing interest rate information for Series L Bonds of different maturities), and will remain fixed throughout the term of the Series L Bond. We may offer higher rates of interest to investors with larger aggregate Series L Bond portfolios, but only as set forth in the then-current interest rate supplement.

Interest Payments

We will pay interest on the Series L Bonds based on the terms you choose, which may be quarterly or annually. Interest will accrue from the effective date of the Series L Bond. Interest payments will generally be made on the 15th day immediately following the last day of the quarter to the Series L Bond holder of record as of the

11

Table of Contents

last day of that interest-payment period. Interest will be paid without any compounding.

Principal Payments

The maturity date for the Series L Bonds will be the last day of the month during which the Series L Bond matures. We are obligated to pay the principal on the Series L Bond by the 15th day of the month next following its maturity (or the first business day following such date).

Payment Method

Principal and interest payments will be made by direct deposit to the account you designate in your Subscription Agreement if you purchase Series L Bonds through direct settlement with the Company. If you purchase Series L Bonds through DTC settlement, principal and interest payments will be made to your broker-dealer or custodial account through DTC.

Renewal or Redemption at Maturity

Upon maturity, the Series L Bonds will be automatically renewed for the same term at the interest rate we are offering at that time to other investors with similar aggregate Series L Bond portfolios for Series L Bonds of the same maturity, unless repaid upon maturity at our or your election. In this regard, we will notify you at least 45 days prior to the maturity date of your Series L Bonds. In the notice, we will advise you if we intend to repay the Series L Bonds or else remind you that your Series L Bonds will be automatically renewed unless you exercise your option, within 20 days, to elect to have your Series L Bonds repaid. If applicable, a new certificate will be issued.

If we determine that a post-effective amendment to the registration statement covering the offer and sale of Series L Bonds must be filed during your 20-day repayment election period, we will extend your election period until 20 days following the postmark date of our notice to you that the amendment has become effective.

For any Series L Bonds offered hereby that mature after the three-year anniversary of the commencement of this offering, we expect that the renewal of such Series L Bonds may require us to file a new registration statement. In such a case, the new registration statement must be declared effective before we will be able to renew your Series L Bond. In this event, if the new registration statement has not yet been filed or become effective, we will extend your election period until 20 days following the date of our notice to you that the new registration statement has become effective, which notice

will include a new prospectus.

If Series L Bonds with similar terms are not being offered at the time of renewal, the interest rate upon renewal will be (a) the rate specified by us in writing on or before the

12

Table of Contents

maturity date or (b) if no such rate is specified, the rate of your existing Series L Bonds. Accordingly, you should understand that the interest rate offered upon renewal may differ from the interest rate applicable to your Series L Bonds prior to maturity. See Description of the Series L Bonds Renewal or Redemption on Maturity.

Call and Redemption Prior to Maturity

We may call and redeem the entire outstanding principal balance and accrued but unpaid interest of any or all of the Series L Bonds at any time without penalty or premium. Series L Bond holders will have no right to require us to redeem any Series L Bond prior to maturity unless the request is due to death, bankruptcy or total disability. In our sole discretion, we may accommodate other requests to redeem any Series L Bond prior to maturity. If we agree to redeem a Series L Bond upon the request of a Series L Bond holder, we will impose a redemption fee of 6% against the outstanding principal balance of the Series L Bond redeemed, which fee will be subtracted from the amount paid.

Ranking

The Renewable Secured Debentures will constitute secured debt of GWG Holdings. The payment of principal and interest on the Series L Bonds will be:

pari passu with respect to payment on and collateral securing the approximately \$28.6 million in outstanding principal amount of Series I Secured notes previously issued by our subsidiary GWG Life and the Renewable Secured Debentures issued by GWG Holdings, Inc. at any time, of which approximately \$146 million in principal amount is outstanding as of March 31, 2014 (see the caption Collateral Security below);

structurally junior to the present and future obligations owed by our subsidiary DLP Funding II under our current revolving credit facility with Autobahn/DZ Bank (including the approximately \$79 million presently outstanding under such facility), and structurally or contractually junior to any future obligations that DLP Funding II or other primary obligors or guarantors may have under future senior secured borrowing facilities; and

structurally junior to the present and future claims of other creditors of DLP Funding II, including trade creditors.

The indenture will permit us to issue other forms of debt, including senior and secured debt, in the future. Any such secured senior debt will have priority over Series L Bonds with respect to claims for payment and claims for any collateral that is shared as between the holders of Series L Bonds and such senior secured debt.

Table of Contents

To fully understand the foregoing summary, you should understand that *pari passu* means that claims for payment and entitlement to security among the holders of Series L Bonds, the holders of Renewable Secured Debentures, and the holders of Series I Secured notes previously issued by GWG Life, together with the holders of any later-created class of *pari passu* debt of ours, will generally be treated equally and without preference. We expect to continue our offering of Renewable Secured Debentures and Series I Secured Notes for purposes of processing renewals only, and any such debt issued on a *pari passu* basis in the future would also be treated equally and without preference in respect of the Series L Bonds and any secured debt issued by GWG Life. Thus, in the event of any default on the Series L Bonds (or any other debt securities of ours that is *pari passu* with the Series L Bonds) resulting in claims for payment or claims on collateral security, the holders of the Series L Bonds and all such other debt securities that are *pari passu* with the Series L Bonds would share in payment or collateral in proportion to the amount of principal and interest owed on each such debt instrument. See Description of the Series L Bonds Ranking for further information.

Guarantee

The payment of principal and interest on the Series L Bonds is fully and unconditionally guaranteed by GWG Life. This guarantee, together with the accompanying grant of a security interest in all of the assets of GWG Life and the terms and conditions of the Intercreditor Agreement, makes the Series L Bonds *pari passu*, with respect to payment and collateral, with the Series I Secured notes issued by GWG Life and Renewable Secured Debentures issued by GWG Holdings. On March 31, 2014, there was approximately \$28.6 million in outstanding principal amount owed on the Series I Secured notes and approximately \$146 million in outstanding principal amount of Renewable Secured Debentures.

Collateral Security

The Series L Bonds are secured by the assets of GWG Holdings, Inc. We have granted a security interest in all of our assets to the indenture trustee for the benefit of the Series L Bond holders. Our assets consist primarily of our investments in our subsidiaries and any cash proceeds we receive from life insurance assets of our subsidiaries, and all other cash and investments we hold in various accounts.

The majority of our life insurance assets are held in our subsidiary DLP Funding II, LLC. The Series L Bonds' security interest will be structurally subordinate to the security interest in favor of our senior secured lender under the revolving credit facility, together with any future senior secured lenders of ours. The assets of GWG

Table of Contents

Life, including proceeds it receives as distributions from DLP Funding II and derived from the insurance policies owned by DLP Funding II, are collateral for GWG Life's guarantee of the repayment of principal and interest on the Series L Bonds. As indicated above under Collateral, this security interest will be pari passu to other issued and outstanding debt of GWG Life and GWG Holdings, including our Series I Secured notes and Renewable Secured Debentures, respectively. The Series L Bonds are also secured by a pledge of a majority of our outstanding common stock from our largest stockholders, which pledge is pari passu with the pledge of such common stock to the holders of Series I Secured notes issued by GWG Life and to the holders of Renewable Secured Debentures issued by GWG Holdings. For a description of the meaning of the term pari passu, please refer to the caption Ranking above.

Indenture Covenants

The indenture governing the Series L Bonds places restrictive covenants and affirmative obligations on us. For example, our debt coverage ratio may not exceed 90%.

The indenture defines the debt coverage ratio as a percentage calculated by the ratio of (A) obligations owing by us and our subsidiaries on all outstanding debt for borrowed money (including the Series L Bonds), over (B) the net present asset value of all life insurance assets we own, directly or indirectly, plus any cash held in our accounts. For this purpose, the net present asset value of our life insurance assets is equal to the present value of the cash flows derived from the face value of policy benefit assets we own, discounted at a rate equal to the weighted-average cost of capital for all our indebtedness for the prior month.

We are required to notify the indenture trustee in the event that we violate this restrictive covenant. An event of default will exist under the indenture if a violation of this covenant persists for a period of 30 calendar days after our initial notice to the trustee.

The indenture also places limitations on our ability to engage in a merger or sale of all of our assets. See Description of the Indentures Events of Default and Consolidation Mergers or Sales for more information.

Use of Proceeds

If all the Series L Bonds are sold, we would expect to receive up to approximately \$926 million of net proceeds from this offering after paying estimated offering and related expenses and after paying our estimated average selling commissions, dealer-manager fees, accountable and non-accountable expense allowances, wholesale commissions and our offering expenses. If the maximum offering were sold and the maximum commissions, fees

Table of Contents

and allowances were paid, the proceeds to us would be approximately \$918.5 million. There is no minimum amount of Series L Bonds that must be sold before we access investor funds. The exact amount of proceeds we receive may vary considerably depending on a variety of factors, including how long the Series L Bonds are offered.

We intend to use a substantial majority of the net proceeds from this offering to invest in life insurance policies assets. We intend to use the remaining balance of the net proceeds from this offering for certain other expenditures we anticipate incurring in connection with this offering and in connection with our business. See [Use of Proceeds](#) for additional information.

No Market for Series L Bonds and Restrictions on Transfers

There is no existing market for the Series L Bonds and we do not anticipate that a secondary market for the Series L Bonds will develop. We do not intend to apply for listing of the Series L Bonds on any securities exchange or for quotation of the Series L Bonds in any automated dealer quotation system. You will be able to transfer or pledge the Series L Bonds only with our prior written consent. See [Description of the Series L Bonds Transfers](#).

Book Entry

The Series L Bonds may be issued in book-entry form, certificated form, or in the form of a global certificate deposited with a depository. See [Description of the Series L Bonds Registration and Exchange](#).

Covered Security

Our Series L Bonds are a covered security. The term covered security applies to securities exempt from state registration because of their oversight by federal authorities and national-level regulatory bodies pursuant to Section 18 of the Securities Act of 1933. Generally, securities listed on national exchanges are the most common type of covered security exempt from state registration. A non-traded security also can be a covered security if it has a seniority greater than or equal to other securities from the same issuer that are listed on a national exchange. Our Series L Bonds are a covered security because it is senior to our common stock, which is listed on the Nasdaq Global Market, and therefore our offering Series L Bonds are exempt from state registration.

Risk Factors

An investment in the Series L Bonds involves significant risks, including the risk of losing your entire investment, and may be considered speculative. Importantly, we maintain a senior borrowing arrangement that subordinates the right to payment on, and shared collateral securing, the Series L Bonds to our senior secured lender. From time to time we may add or replace senior lenders and the particular arrangements under

Table of Contents

which we borrow from them. In addition, these borrowing arrangements with senior lenders restrict, and are expected to continue to restrict, our cash flows and, subject to certain exceptions, distributions from our operating subsidiaries. These provisions will restrict cash flows available for payment of principal and interest on the Series L Bonds. For a summary of risks relating to this offering and our Company and business, please see [Risk Factors](#), page 19.

Table of Contents

RISK RELATING TO FORWARD-LOOKING STATEMENTS

Certain matters discussed in this prospectus contain forward-looking statements. These forward-looking statements are subject to risks, uncertainties and assumptions about our operations and the investments we make, including, among other things, factors discussed under the heading "Risk Factors" in this prospectus and the following:

- changes in the secondary market for life insurance;
- our limited operating history;
- the valuation of assets reflected on our financial statements;
- the reliability of assumptions underlying our actuarial models;
- the reliability of assumptions underlying our life expectancy estimates;
- our reliance on debt financing;
- risks relating to the validity and enforceability of the life insurance policies we purchase;
- our reliance on information provided and obtained by third parties;
- federal and state regulatory matters, including the effect and outcome of current regulatory investigations;
- additional expenses, not reflected in our operating history, related to being a public reporting company;
- competition in the secondary life insurance market;
- the relative illiquidity of life insurance policies;
- life insurance company credit exposure;
- economic outlook;
- performance of our investments in life insurance policies;
- financing requirements;
- litigation risks; and
- restrictive covenants contained in borrowing agreements.

Forward-looking statements can be identified by the use of words like "believes," "could," "possibly," "probably," "anticipates," "estimates," "projects," "expects," "may," "will," "should," "seek," "intend," "plan," "expect," or "consider" or the negative of these expressions or other variations, or by disclosure of a strategy that involves risks and uncertainties. All forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual transactions, results, performance or achievements to be materially different from any future transactions, results,

performance or achievements expressed or implied by such forward-looking statements. We base these forward-looking statements on current expectations and projections about future events and the information currently available to us. Although we believe that the assumptions for these forward-looking statements are reasonable, any of the assumptions could prove to be inaccurate. Consequently, no representation or warranty can be given that the estimates, opinions, or assumptions made in or referenced by this prospectus will prove to be accurate. Some of the risks, uncertainties and assumptions are identified in the discussion entitled "Risk Factors" in this prospectus. We caution you that the forward-looking statements in this prospectus are only estimates and predictions, or statements of current intent. Actual results or outcomes, or actions that we ultimately undertake, could differ materially from those anticipated in the forward-looking statements due to risks, uncertainties or actual events differing from the assumptions underlying these statements. These risks, uncertainties and assumptions include, but are not limited to, those discussed in this prospectus.

Table of Contents

RISK FACTORS

An investment in the Series L Bonds involves a high degree of risk. Before purchasing Series L Bonds, you should carefully consider the following risk factors in conjunction with the other information contained in this prospectus. The risks discussed in this prospectus can materially harm our operations, operating results, financial condition or future results. If any of these risks materialize or occur, the value of our Series L Bonds could decline and could cause you to lose part or all of your investment. You should review the risks of this investment with your legal and financial advisors prior to purchasing Series L Bonds.

Risks Related to Our Company and Our Industry

Material changes in the life insurance secondary market, a relatively new and evolving market, may adversely affect our operating results, business prospects and our ability to repay our obligations under the Series L Bonds.

Our sole business is the purchase and ownership of life insurance policies acquired in the secondary market, which is a relatively new and evolving market. The success of our business and our ability to repay the principal and interest on our obligations, including our Series L Bonds, depends in large part on the continued development of the secondary market for life insurance, including the solvency of life insurance companies to pay the face value of the life insurance benefits, both of which will critically impact the performance of the life insurance assets we own. We expect that the development of the secondary market will primarily be impacted by a variety of factors such as the interpretation of existing laws and regulations (including laws relating to insurable interests), the passage of new legislation and regulations, mortality improvement rates, and actuarial understandings and methodologies. Importantly, all of the factors that we believe will most significantly affect the development of the life insurance secondary market are beyond our control. Any material and adverse development in the life insurance secondary market could adversely affect our operating results, our access to capital, our ability to repay our various obligations, including our Series L Bonds, and our business prospects and viability. Because of this, an investment in the Series L Bonds generally involves greater risk as compared to investments offered by companies with more diversified business operations in more established markets.

We have a relatively limited history of operations and our earnings and cash flows may be volatile, resulting in future losses and uncertainty about our ability to service and repay our debt when and as it comes due.

We are a company with a limited history, which makes it difficult to accurately forecast our earnings and cash flows. During the year ended December 31, 2013, we incurred a net loss of \$(195,000), and for the three months ended March 31, 2014, we incurred a net loss of \$(1,901,170). Our lack of a significant history and the evolving nature of our market make it likely that there are risks inherent in our business that are yet to be recognized by us or others, or not fully appreciated, and that could result in us earning less than we anticipate or even suffering further losses. As a result of the foregoing, an investment in the Series L Bonds necessarily involves uncertainty about the stability of our earnings, cash flows and, ultimately, our ability to service and repay our debt. Accordingly, there is a risk that you could lose your entire investment.

The valuation of our principal assets on our balance sheet requires us to make material assumptions that may ultimately prove to be incorrect. In such an event, we could suffer significant losses that could materially and adversely affect our results of operations and eventually cause us to be in default of restrictive covenants contained in our borrowing agreements.

Our principal asset is a portfolio of life insurance policies purchased in the secondary market, comprising approximately 85% of our total assets at December 31, 2013 and 88% of our total assets at March 31, 2014. Those assets are considered Level 3 fair value measurements under ASC 820, Fair Value Measurements and Disclosures, as there is currently no active market where we are able to observe quoted prices for identical

assets. As a result, our valuation of those assets incorporates significant inputs that are not observable. Fair value is defined as an exit price representing the amount that would be received if assets were sold or that

Table of Contents

would be paid to transfer a liability in an orderly transaction between market participants at the measurement date. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability.

A Level 3 fair value measurement is inherently uncertain and creates additional volatility in our financial statements that are not necessarily related to the performance of the underlying assets. As of both December 31, 2013 and March 31, 2014, we estimated the fair value discount rate for our portfolio to be 11.69%. If in the future we determine that a higher discount rate is required to ascribe fair value to a similarly situated portfolio of life insurance policies, we could experience significant losses materially affecting our results of operations. It is also possible that significant losses of this nature could at some point cause us to fall out of compliance with certain borrowing covenants contained in our various borrowing agreements. This could result in acceleration of our loan balances under the revolving credit facility or our Series I Secured notes and the Series L Bonds, which we may not be able to repay. We may be forced to seek additional debt or equity financing to repay such debt amounts, which may not be available on terms acceptable to us, if at all. If we are unable to repay when debt comes due, then our senior lender or the holders of our Series I Secured notes and the Series L Bonds, or both, would have the right to foreclose on our assets.

In an effort to present operating results not subject to the valuation volatility associated with the discount rate we choose, we intend to provide additional non-GAAP financial disclosures, on a consistent basis, presenting the actuarial economic gain we expect within our portfolio of life insurance policies at the expected internal rate of return against the costs we incur over the same period. We report these very same non-GAAP financial measures to the lender under our revolving credit facility pursuant to financial covenants in the related borrowing documents. Nevertheless, our reported GAAP earnings may in the future be volatile for reasons that do not bear an immediate relationship to the cash flows we experience.

For further disclosure relating to the risks associated with the valuation of our assets, see the risk factor below *If actuarial assumptions we obtain from third-party providers* on page 24.

Our expected results from our life insurance portfolio may not match actual results, which could adversely affect our ability to service and grow our portfolio for diversification.

Our business model relies on achieving actual results that are in line with the results we expect to attain from our investments in life insurance assets. In this regard, we believe that the larger portfolio we own, the greater the likelihood that we will achieve our expected results. To our knowledge, rating agencies generally suggest that portfolios of life insurance policies be diversified enough to achieve actuarial stability in receiving expected cash flows from underlying mortality. For instance, in a study published in 2012, A.M. Best concluded that at least 300 lives are necessary to narrow the band of cash flow volatility and achieve actuarial stability, while Standard & Poor's has indicated that stability is unlikely to be achieved with a pool of less than 1,000 lives. As of December 31, 2013, we owned \$741 million in face value of life insurance policies covering 239 lives. As of March 31, 2014, we owned approximately \$772 million in face value of life insurance policies covering 256 lives. Accordingly, while there is risk with a portfolio of any size that our actual yield may be less than expected, we believe that the risk we face is presently more significant given the relative lack of diversification in our current portfolio as compared to rating agency recommendations.

Although we plan to expand the number of life insurance policies we own using proceeds raised from our ongoing offering of the Series L Bonds, we may be unable to meet this goal if sufficient financing from capital sources is not available or is available only on unfavorable or unacceptable terms. Furthermore, even if our portfolio reaches the size we desire, we still may experience material differences between the actuarial models we use and actual mortalities.

Differences between our expectations and actuarial models (which include life expectancy estimates) on the one hand, and actual mortality results on the other hand, could have a materially adverse effect on our operating results and cash flow. In such a case, we may face liquidity problems, including difficulties servicing our remaining portfolio of policies and servicing our outstanding debt obligations. Continued or material failures to meet our expected results could decrease the attractiveness of our securities in the eyes of

Table of Contents

potential investors, making it even more difficult to obtain capital needed to service our portfolio, grow the portfolio to obtain desired diversification, and service our existing debt.

We critically rely on debt financing for our business. Any inability to borrow could adversely affect our business operations, our ability to satisfy our obligations under the Series L Bonds, and ultimately our viability.

To date, we have chosen to finance our business principally through the issuance of debt, including debt incurred by DLP Funding II under a senior revolving credit facility provided by Autobahn/DZ Bank (which we refer to throughout this prospectus as our revolving credit facility), our Series I Secured notes and the Series L Bonds. Our revolving credit facility is secured by all of the assets of DLP Funding II, has a maximum amount of \$100 million, and the outstanding balance at both December 31, 2013 and March 31, 2014 was approximately \$79 million. Obligations under the revolving credit facility have a scheduled maturity date of December 31, 2016, and obligations under our Series I Secured notes and the Series L Bonds have scheduled maturities as indicated below in the risk factor *If a significant number of holders*, on page 29. Our debt arrangements comprise the most important sources of financing on which our business critically relies to grow our portfolio of life insurance policies and maintain those policies.

Our business model expects that we will have continued access to financing in order to purchase a large and diversified portfolio of life insurance policies and pay the attendant premiums and costs of maintaining the portfolio, all while satisfying our current interest and principal repayment obligations under our revolving credit facility and other indebtedness. We expect to refinance our revolving credit facility, either through renewal or replacement, when it comes due on December 31, 2016. Pending the due date or refinancing of our revolving credit facility, we expect that proceeds from our life insurance policies will first be used to satisfy our obligations under that facility, as required by the agreement governing the revolving credit facility. Accordingly, until we achieve cash flows derived from our portfolio of life insurance policies, we expect to rely on the proceeds from this offering of Series L Bonds and from our ongoing offering of the Renewable Secured Debentures to satisfy our ongoing financing and liquidity needs. Nevertheless, continued access to financing and liquidity under the revolving credit facility or otherwise is not guaranteed. For example, general economic conditions could limit our access to financing, as could regulatory or legal pressures exerted on us, our financiers or those involved in our general plan of financing such as brokers, dealers and registered investment advisors. If we are unable to borrow under the revolving credit facility or otherwise for any reason, or to renew or replace the revolving credit facility when it comes due in December 2016, our business would be adversely impacted and our ability to service and repay our obligations would be compromised.

Our investments in life insurance policies have inherent risks, including fraud and legal challenges to the validity of the policies, which we will be unable to eliminate and which may adversely affect our results of operations.

When we purchase a life insurance policy, we underwrite the purchase of the policy to mitigate certain risks associated with insurance fraud and other legal challenges to the validity of the life insurance policy. For example, to the extent that the insured is not aware of the existence of the policy, the insured him or herself does not exist, or the insurance company does not recognize the policy, the insurance company may cancel or rescind the policy thereby causing the loss of an investment in that policy. In addition, if medical records have been altered in such a way as to shorten a life expectancy report, this may cause us to overpay for the related policy. Finally, we may experience legal challenges from insurance companies claiming that the insured failed to have an insurable interest at the time the policy was originally purchased or that the policy owner made fraudulent disclosures to the insurer at the time the policy was purchased (e.g., disclosures pertaining to the health status of the insured or the existence or sources of premium financing), or challenges from the beneficiaries of an insurance policy claiming, upon mortality of the insured that the sale of the policy to us was invalid.

To mitigate these risks, we require a current verification of coverage from the insurance company, complete a due-diligence investigation of the insured and accompanying medical records, review the life insurance policy application, require a policy to have been in force for at least two years before purchasing,

Table of Contents

and require a legal review of any premium financing associated with the life insurance policy to determine whether an insurable interest existed

at the time the policy was originally purchased in the primary market. Nevertheless, we do not expect that these steps will eliminate the risk of fraud or legal challenges to the life insurance policies we purchase. Furthermore, changes in laws or regulations, or the interpretation of existing laws or regulations, may prove our current due-diligence and risk-mitigation efforts inadequate for us to have confidence that our portfolio of life insurance policies are unlikely to be successfully challenged or to purchase new policies with such confidence. If a significant face amount of policies were invalidated for reasons of fraud or any other reason, our results of operations would be adversely affected, perhaps materially.

Every acquisition of a life insurance policy necessarily requires us to materially rely on information provided or obtained by third parties. Any misinformation or negligence in the course of obtaining information could materially and adversely affect the value of the policies we own.

The acquisition of each life insurance policy is negotiated based on variables and particular facts that are unique to the life insurance policy itself and the health of the insured. The facts we obtain about the policies and the insured at the time at which the policy is applied for and obtained are based on factual representations made to the insurance company by the insured, and the facts the insurance company independently obtains in the course of its own due-diligence examination, such as facts concerning the health of the insured and whether or not there is an insurable interest present when the policy was issued. Any misinformation or negligence in the course of obtaining or supplying information relating to an insurance policy or insured could materially and adversely impact the value of the life insurance policies we own and could, in turn, adversely affect our financial condition, results of operations, and the value of any investment in our company.

Our business is subject to state regulation, and changes in state laws and regulations governing our business, or changes in the interpretation of such laws and regulations, could negatively affect our business.

When we purchase a life insurance policy, we are subject to state insurance regulations. Over the past years, we have seen a dramatic increase in the number of states that have adopted legislation and regulations from a model law promulgated by either the National Association of Insurance Commissioners (NAIC) or by the National Conference of Insurance Legislators (NCOIL). These laws are essentially consumer protection statutes responding to abuses that arose early in the development of our industry, some of which may persist. Today, almost every state has adopted some version of either the NAIC or NCOIL model laws, which generally require the licensing of purchasers of and brokers for life insurance policies, the filing and approval of purchase agreements, and the disclosure of transaction fees. These laws also require various periodic reporting requirements and prohibit certain business practices deemed to be abusive.

State statutes typically provide state regulatory agencies with significant powers to interpret, administer and enforce the laws relating to the purchase of life insurance policies. Under statutory authority, state regulators have broad discretionary power and may impose new licensing requirements, interpret or enforce existing regulatory requirements in different ways or issue new administrative rules, even if not contained in state statutes. State regulators may also impose rules that are generally adverse to our industry. Because the life insurance secondary market is relatively new and because of the history of certain abuses in the industry, we believe it is likely that state regulation will increase and grow more complex during the foreseeable future. We cannot, however, predict what any new regulation would specifically involve.

Any adverse change in present laws or regulations, or their interpretation, in one or more states in which we operate (or an aggregation of states in which we conduct a significant amount of business) could result in our curtailment or termination of operations in such jurisdictions, or cause us to modify our operations in a way that adversely affects our profitability. Any such action could have a corresponding material and negative impact on our results of operations and financial condition, primarily through a material decrease in revenues, and could also negatively affect our general business prospects.

Table of Contents

If federal or state regulators or courts conclude that the purchase of life insurance in the secondary market constitutes, in all cases, a transaction in securities, we could be in violation of existing covenants under our revolving credit facility, which could result in significantly diminished access to capital. We could also face increased operational expenses. The materialization of any of these risks could adversely affect our operating results and possibly threaten the viability of our business.

Some states and the SEC have, on occasion, attempted to regulate the purchase of non-variable universal life insurance policies as transactions in securities under federal or state securities laws. In July 2010, the SEC issued a Staff Report of its Life Settlement Task Force. In that report, the Staff recommended that certain types of purchased life insurance policies be classified as securities. The SEC has not taken any position on the Staff Report, and there is no indication if the SEC will take or advocate for any action to implement the recommendations of the Staff Report. In addition, there have been several federal court cases in which transactions involving the purchase and fractionalization of life insurance contracts have been held to be transactions in securities under the federal Securities Act of 1933. We believe that the matters discussed in the Staff Report,

and existing case law, do not presently impact our current business model since our purchases of life settlements are currently distinguishable from those cases that have been held by courts, and advocated by the Staff Report, to be transactions in securities. For example, presently neither we nor any of our affiliates are involved in the fractionalization of any life insurance policies, and we do not presently purchase variable life insurance policies.

With respect to state securities laws, almost all states currently treat the sale of a life insurance policy as a securities transaction under state laws, although some states exclude from the definition of security the original sale from the insured or the policy owner to the life settlement provider. To date, due to the manner in which we conduct and structure our activities and the availability, in certain instances, of exceptions and exemptions under those state laws, such laws have not adversely impacted our business model.

As a practical matter, the widespread application of federal securities laws to our purchases of life insurance policies, either through the expansion of the definition of what constitutes a security, the expansion of the types of transactions in life insurance policies that would constitute transactions in securities, or the elimination or limitation of available exemptions and exceptions (whether by statutory change, regulatory change, or administrative or court interpretation) could burden us and other companies operating in the life insurance secondary market through the imposition of additional processes in the purchase of life insurance policies or the imposition of additional corporate governance and operational requirements through the application of the federal Investment Company Act of 1940. Any such burdens could be material. Among the particular repercussions for us would be a violation of existing covenants under our revolving credit facility requiring us to not be an investment company under the Investment Company Act of 1940, which could in the short or long term affect our liquidity and increase our cost of capital and operational expenses, all of which would adversely affect our operating results. It is possible that such an outcome could threaten the viability of our business and our ability to satisfy our obligations as they come due, including obligations under our Series L Bonds.

Being a public company results in additional expenses and diverts management's attention, and could also adversely affect our ability to attract and retain qualified directors.

We have been a public reporting company since January 31, 2012. As a public reporting company, we are subject to the reporting requirements of the Securities Exchange Act of 1934. These requirements generate significant accounting, legal and financial compliance costs, and make some activities more difficult, time consuming or costly, and may place significant strain on our personnel and resources. The Securities Exchange Act of 1934 requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. In order to establish the requisite disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight are required.

As a result, management's attention may be diverted from other business concerns, which could have an adverse and even material effect on our business, financial condition and results of operations. These rules and regulations may also make it more difficult and expensive for us to obtain director and officer liability

Table of Contents

insurance. If we are unable to obtain appropriate director and officer insurance, our ability to recruit and retain qualified officers and directors, especially those directors who may be deemed independent, could be adversely impacted.

Our business and prospects may be adversely affected by changes, lack of growth or increased competition in the life insurance secondary market.

The growth of the life insurance policy secondary market and our expansion within the market may be negatively affected by a variety of factors beyond our control, including:

the inability to locate sufficient numbers of life insurance policy sellers and agents to source such sellers;

the inability to convince life insurance policy owners of the benefits of selling their life insurance policy;

competition from other companies in the life insurance secondary market;

negative publicity about the market based on actual or perceived abuses; and

the adoption of additional governmental regulation.

The relatively new and evolving nature of the market in which we operate makes these risks unique and difficult to quantify. Nevertheless, contractions in the secondary market for life insurance policies, whether resulting from general economic conditions, regulatory or legal pressures or otherwise (including regulatory pressures exerted on us or others involved in the secondary market for life insurance or involved with participants in that market), could make participation in that market generally less desirable. This could, in turn, depress the prices at which life insurance policies on the secondary market are bought and sold. As indicated elsewhere in this prospectus, decreases in the value of life insurance policies on the secondary market could negatively affect our results of operations and our financial condition since the value of our policy portfolio is marked to market on a quarterly basis.

Changes in general economic conditions could adversely impact our business.

Changes in general economic conditions, including, for example, interest rates, investor sentiment, changes specifically affecting the insurance industry, competition, technological developments, political and diplomatic events, tax laws, and other factors not known to us today, can substantially and adversely affect our business and prospects. For example, changes in interest rates may increase our cost of capital and ability to raise capital, and have a corresponding adverse impact on our operating results. While we may engage in certain hedging activities to mitigate the impact of these changes, none of these conditions are or will be within our control.

If actuarial assumptions we obtain from third-party providers and rely on to model our expected returns on our investments in life insurance policies change, our operating results and cash flow could be adversely affected, as well as the value of our collateral and our ability to service our debt obligations, including obligations owed to the holders of Series L Bonds.

The expected internal rate of return we calculate we will earn when purchasing a life insurance policy is based upon our estimate of how long the insured will live an actuarial life expectancy estimate. We presently obtain actuarial life expectancy estimates from third-party medical-actuarial underwriting companies. In the case of small face policies, which we currently define as life insurance policies with less than \$1,000,000 in face value of policy benefits, we may choose not to obtain life expectancies from third-party medical-actuarial firms, but rather use standard mortality tables to develop our own life expectancy of an insured. These actuarial life expectancies are subject to interpretation and change based on evolving medical technology, actuarial data and analytical techniques. Any increase in the actuarial life expectancy estimates of insureds within our portfolio could have a materially adverse effect on our operating results and cash flow. Adverse impacts on the value of our life insurance policy portfolio or our cash flow could in turn impair the value of

Table of Contents

the collateral we have pledged to our creditors, including the holders of our Series L Bonds, and our ability to service our debt and obligations as they come due.

For example, on January 22, 2013, 21st Services, an independent provider of life expectancy analysis and related services for the life settlement industry in general, announced advancements in its underwriting methodology, resulting in revised life expectancy mortality tables for life settlement transactions. Based on information publicly released by 21st Services, the revised tables incorporate significantly more older-age mortality data than earlier versions commonly used by the life insurance industry, resulting in a far greater ability to:

assess the magnitude of impact that hundreds of different types of health impairments have on senior mortality on a case-by-case basis;

apply credits and debits during the underwriting process in a manner that accounts for the different impacts of the same impairments for males and females; and

reflect the difference in mortality between insureds who have sold policies and the group of 90,000 insureds underwritten by 21st Services, most of whom did not ultimately sell their policies in the life settlement market (such difference is frequently referred to in the life-settlement industry as anti-selection).

21st Services reported that the revised mortality tables reflected an average 19% increase in the life expectancy of insureds. Nevertheless, 21st Services representatives have also advised us that generalizations could not be gleaned from their report as the changes that were made were very granular and dependent upon the specific medical conditions of an insured, as well as other factors. More specifically, mortality tables increased the general life expectancies most significantly for people leading an active lifestyle. The revised tables also generally reflect increased life expectancies for non-smoking men and women. 21st Services representatives have further advised us that (i) certain medical conditions have resulted in increased life expectancies (e.g., cardiovascular disease) and some conditions resulted in decreased life expectancies, and (ii) the revised tables also have greater impact on the life expectancies of insureds who are younger.

For a majority of our life insurance policy purchases, we use 21st Services life expectancy estimates as one of two such estimates we generally obtain prior to purchasing life insurance policies on the secondary market and average those estimates for our life expectancy estimate. The life expectancy of an insured has an inverse relationship to the expected internal rate of return to be generated from life insurance policies purchased in the secondary market. A reduced internal rate of return may reduce the value of a life insurance policy available for purchase on the secondary market, and the value of life insurance policies already purchased by us and being serviced in our portfolio.

As of December 31, 2012, we increased all life expectancy reports provided by 21st Services by an average of 8.67%. The impact of this adjustment to the fair value of our portfolio was a decrease of \$12.4 million as of December 31, 2012, and the impact on our expected internal rate of return was a decrease from 14.27% to 12.84%. In February 2013, we began the process of evaluating the impact of 21st Services' revised mortality tables upon our portfolio. We concluded that the adjustments we made a year ago were reasonable based upon the updated life expectancy estimates we have received as of December 31, 2013.

We generally rely on two life expectancy estimates from independent third-party medical-actuarial underwriting firms to develop our own life expectancy estimate. In some cases, we may obtain more than two life expectancy estimates. In those cases, we average the two life expectancy estimates that we believe are the most reliable of those we have received, based on our own analyses and conclusions. In this regard, the two life expectancy estimates we ultimately choose to average may not always be the most conservative ones we obtain.

In addition to actuarial life expectancies, we rely on pricing and premium forecasting software models developed by third-party actuarial companies for the valuation of policies we purchase, future mortality revenues, and the calculation of anticipated internal rates of return. These pricing models forecast the estimated future premiums due, as well as the future mortalities based on the survival probabilities of the

Table of Contents

insureds over their life expectancies. It is possible that the actuarial tables we presently use will again change in the future or that the mortality assumptions will fail substantially to meet actuarial estimates, and that any such failure could have a materially adverse effect on our business.

We rely on estimated rates of mortality for the actuarial assumptions we use when valuing life insurance policies and forecasting the performance of our portfolio, and we also rely on other estimates derived from statistical methodologies for projecting our future cash flows, among other things. If our estimates prove to be incorrect, it could materially and adversely affect our ability to satisfy our debt service and repayment obligations, including our obligations under the Series L Bonds.

If we assume we will receive cash inflows from policies sooner than we actually do, we may not be able to make payment on our debt obligations, including our Series L Bonds, in a timely manner, or at all. Moreover, a significant discovery that results in mortality improvements among seniors, above historically predicted rates by medical actuaries providing life expectancies, could have a material adverse effect on our life insurance policy investments.

For example, we use a modeling method for projecting cash flows known as the probabilistic method. This is an actuarial method that uses a mortality curve to project the likely flow of policy benefits to us, and attempts to reflect the probability that each premium must be paid. We have in fact experienced fewer cash flows from policy benefits than projected in the early stages of ownership of our current life insurance policy portfolio using this method. We had expected to receive approximately \$65.7 million in cumulative policy benefits as of December 31, 2013, and in fact received \$28.6 million. This has resulted in greater than expected premium payments, increasing from an expected \$58.6 million to \$61.0 million. Barring significant mortality improvements (i.e., medical advancements relating to the medical conditions of insureds), however, the fact that actual results have differed from the expectations derived from the probabilistic method of projecting cash flows should ordinarily result in greater cash flows later in the portfolio's servicing period.

We update and revise our projected future cash flows each month using the probabilistic method to reflect the actual experience within our life insurance policy portfolio to date. We use the current future cash flow projection to generate our expected internal rate of return on the life insurance policy portfolio we own. We would expect to change our method of calculating our future cash flows only if leading actuarial firms no longer believed such methodology was the most appropriate means of generating projected cash flows from a life insurance policy portfolio. Any change to the pricing model, methodology, premium forecasting assumptions, cash flow projections, or the mortality assumptions accompanied therewith that increase the projected cost of insurance premiums or decrease the probability of mortality could have a material and adverse impact on our results of operations and cash flows. Ultimately, this could adversely affect our ability to meet our debt service and repayment obligations, including our obligations under the Series L Bonds.

Risks Related to This Offering and Our Company

We may not be able to raise the capital that we are seeking in this offering or in our ongoing offering of Renewable Secured Debentures, and may be unable to meet our overall business objectives of growing a larger, more statistically diverse portfolio of life insurance policies without the proceeds from the sale of such securities.

_____ serves as our underwriter in this offering of Series L Bonds on a best-efforts basis. Although _____ has agreed to use its best efforts in the offer and sale of the Series L Bonds, there is no minimum aggregate principal amount of Series L Bonds that we must sell prior to accessing investor funds, and we may not be able to sell the Series L Bonds that we are seeking to sell in this offering. Consequently, the additional capital we are seeking may not ultimately be obtained.

Our offering of Renewable Secured Debentures is the principal means by which we have raised the funds needed to meet our goal of growing a larger and more statistically diverse portfolio that is more likely to meet our cash flow projections. While we plan to continue financing our business and meet this goal through this offering of Series L Bonds, if we are unable to continue this offering for any reason we may be unable to

Table of Contents

meet our goal. In addition, if holders of our Series I Secured notes or Renewable Secured Debentures were to fail to renew those securities with the frequency we have historically experienced, and actual cash flows from our portfolio of life insurance policies do not occur as our actuarial projections have forecasted, we could be forced to sell our investments in life insurance policies in order to service or satisfy our debt-related obligations. If we are forced to sell investments in life insurance policies or our entire portfolio, we may be unable to sell them at prices we believe are appropriate, and may not be able to sell them at prices that approximate the discount rate we have applied to value our portfolio, particularly if our sale of policies occurs at a time when we are (or are perceived to be) in distress. In any such event, our business and the value of our securities, including our debt securities and common stock, may be materially and adversely impacted. Accordingly, there is a risk that you could lose your entire investment.

We depend upon cash distributions from our subsidiaries, and contractual restrictions on distributions to us or adverse events at one of our operating subsidiaries could materially and adversely affect our ability to pay our debts, including our obligations under the Series L Bonds, and to continue to operate our business.

GWG Holdings, Inc. is a holding company. As a holding company, we conduct our operations through our operating subsidiaries, and our only significant assets are the capital stock of our subsidiaries. Accordingly, our ability to meet our cash obligations, including our obligations under the Series L Bonds, depends in material part upon the ability of our subsidiaries to make cash distributions to us. In this regard, the ability of our subsidiaries to make distributions to us is, and will continue to be, restricted by certain negative covenants in the agreement governing our revolving credit facility. DLP Funding II is the borrower under our revolving credit facility (see note 6 to our consolidated financial statements). The significant majority of the insurance policies we own are subject to a collateral arrangement with the agent for our revolving credit lender, as described in note 2 to our consolidated financial statements. Under this arrangement, collection and escrow accounts are used to fund purchases of and premiums for the insurance policies and to pay interest and other charges under the revolving credit facility. The lender and its agent must authorize all disbursements from these accounts, including any distributions to GWG Life. Distributions are limited to an amount that would result in the borrowers (us) realizing an annualized rate of return on the equity funded amount for such assets of not more than 18%, as determined by the agent. After such amount is reached, the credit agreement requires that excess funds be used to fund repayments or a reserve account in certain amount, before any additional distributions may be made.

If any of the above limitations were to materially impede the flow of cash to us, such fact would materially and adversely affect our ability to service and repay our debt, including obligations under the Series L Bonds and Series I Secured notes. In addition, any adverse event at the subsidiary level, such as a declaration of bankruptcy, liquidation or reorganization or an event of default under our revolving credit facility, could materially and adversely affect the ability of our subsidiaries to make cash distributions to us. Just as with a material contractual impediment to cash flow, any such subsidiary corporate event would materially and adversely affect our ability to service and repay our debt, including obligations under the Series L Bonds, and negatively impact our ability to continue operations.

Subordination provisions contained in the indenture will restrict the ability of the trustee or the Series L Bond holders to enforce their rights against us under the indenture, including the right to payment on the Series L Bonds, if a default then exists under our revolving credit facility.

The Series L Bonds will be subordinate in right of payment to any claims of the senior lender under our revolving credit facility. In this regard, subordination provisions limiting the right of Series L Bond holders to enforce their rights are contained in the indenture. These provisions include:

a prohibition on challenging any enforcement action taken by a senior lender or interfering with any legal action or suits undertaken by a senior lender against us and our affiliates;

a 180-day standstill period during which there may not be brought any action to enforce an event of default against us or our affiliates unless our revolving credit facility has been repaid in full, which period may be extended if the credit facility provider takes action during such standstill period; and

Table of Contents

a prohibition on filing a bankruptcy or insolvency case against us or our affiliates for at least one year plus one day after the revolving credit facility lender has been paid in full.

Furthermore, in the event of a default, we will be prohibited from making any payment, direct or indirect (whether for interest, principal, as a result of any redemption or repayment at maturity, on default, or otherwise), on the Series L Bonds and any other indebtedness, and neither the holders of the Series L Bonds nor the trustee will have the right, directly or indirectly, to sue to enforce the indenture or the Series L Bonds, if a default or event of default under any senior credit facility has occurred and is continuing, or if any default or event of default under any senior credit facility would result from such payment. This payment restriction will generally remain in effect unless and until: (i) the default and event of default respecting the senior credit facility has been cured or waived or has ceased to exist; and (ii) the end of the period commencing on the date the indenture trustee receives written notice of default from a holder of such credit facility and ending on the earlier of the indenture trustee's receipt of (1) a valid waiver of default from the holder of a credit facility, or (2) a written notice from the holder of a credit facility terminating the payment blockage period.

Other provisions of the indenture permit the trustee to take action to enforce the right of Series L Bond holders to payment after 179 days have passed since the trustee's receipt of notice of default from the senior lender, but in such case any funds paid as a result of any such suit or enforcement action shall be applied toward the senior credit facility until the facility is indefeasibly paid in full before being applied to the Series L Bonds. These subordination provisions present the risk that, upon any default by us on obligations owed under our senior debt, the holders of the Series L Bonds will be unable to enforce their right to payment.

If the 180-day standstill period noted above or any other limitation on the rights of the trustee or Series L Bond holders to assert their rights to payment of principal or interest under the indenture or Series L Bonds is ultimately determined to conflict with provisions of the Trust Indenture Act of 1939 (most notably sections 316(b) and 317(a) of that Act), then the trustee, as well as any holder who shall not have earlier consented to such subordination provisions, shall (notwithstanding such provision contained in the indenture) be authorized to institute a lawsuit for the enforcement of any payment of principal or interest after their respective due dates.

The collateral granted as security for our obligations under the Series L Bonds, Renewable Secured Debentures and Series I Secured notes may be insufficient to repay the indebtedness upon an event of default.

Edgar Filing: GWG Holdings, Inc. - Form S-1

Our Series L Bonds, Renewable Secured Debentures and Series I Secured notes are structurally subordinate to all obligations of our wholly owned subsidiary DLP Funding II. Importantly in this regard, DLP Funding II owns most of our life insurance policies and is the borrower under the credit facility. This means that holders of the Series L Bonds, Renewable Secured Debentures and Series I Secured notes will have a junior position to the claims of our senior credit facility provider.

Thus, Series L Bonds, Renewable Secured Debentures and Series I Secured notes are subordinate to all senior secured debt we have or may incur, to the extent of the value of the assets securing that debt. Importantly, as the issuers of the Series L Bonds, Renewable Secured Debentures and Series I Secured notes which have granted a general security interest in its assets as collateral security for those obligations, GWG Holdings and GWG Life's most significant assets are cash and their investments in subsidiaries. GWG Holdings' total assets at March 31, 2014 were approximately \$287 million, of which approximately \$148 million was its investment in subsidiaries. While the indenture agreements governing each of the Series L Bonds and the Renewable Secured Debentures limit the amount of debt we and our subsidiaries can incur (through the debt coverage ratio covenant contained in Section 6.1 of each such indenture), the indentures permit us and our subsidiaries to incur secured debt (subject to the debt coverage ratio) that may be senior to the Series L Bonds and Renewable Secured Debentures. For more information relating to the debt coverage ratio, please refer to the risk factor below captioned *Because we intend to hold our life insurance policies to their maturity*, page 30.

As indicated above, as of March 31, 2014, we had approximately \$79 million of outstanding secured indebtedness under our revolving credit facility that is senior to the Series L Bonds. For a description of the

28

Table of Contents

ranking of the Series L Bonds, see *Description of the Series L Bonds Ranking* in this prospectus. In addition, the guarantee and associated grant of collateral security by GWG Life for our obligations under the Series L Bonds may offer security that is insufficient to fully satisfy obligations under the Series L Bonds. Like GWG Holdings, GWG Life's most significant asset is its investment in its subsidiaries (in this case, DLP Funding II). GWG Life's total assets at March 31, 2014 were approximately \$180 million, of which approximately \$178 million was its investment in subsidiaries.

Because of the foregoing, and because of the fact that 77.6% of our life insurance policies representing approximately 80.3% of the face value of our life insurance policy benefits as of March 31, 2014 are held in our DLP Funding II subsidiary (and all of those assets serve as collateral security for our obligations under the revolving credit facility), Series L Bond holders, as well Renewable Secured Debenture holders, risk the possibility that the collateral security we have granted for our obligations under such securities may be insufficient to repay those securities upon an event of default.

If a significant number of holders of our Series I Secured notes and Series L Bonds demand repayment of those instruments instead of renewing them, and at such time we do not have sufficient capital on hand to fund such repayment (and do not otherwise have access to sufficient capital), we may be forced to liquidate some of our life insurance assets, which could have a material and adverse impact on our results of operations.

Our direct and wholly owned subsidiary, GWG Life, had issued and outstanding approximately \$29.7 million and \$28.6 million in Series I Secured notes as of December 31, 2013 and March 31, 2014, respectively. By virtue of GWG Life's full and unconditional guarantee of obligations under the Series L Bonds, and other agreements contained in or made in connection with the indenture, the Series L Bonds are pari passu in right of payment and collateral with the Series I Secured notes. The indenture governing the Series L Bonds, and the note issuance and security agreement governing the Series I Secured notes, each provide for cross defaults upon an event of default under the provisions of the other agreement (i.e., an event of default under the note issuance and security agreement will constitute an event of default under the indenture for the Series L Bonds, and vice versa).

The terms of the Series I Secured notes have renewal features. Since we first issued our Series I Secured notes, we have experienced \$124,856,000 in maturities, of which \$96,435,000 has renewed for an additional term as of March 31, 2014. This has provided us with an aggregate renewal rate of approximately 77% for investments in our Series I Secured notes. Future contractual maturities of Series I Secured notes payable at March 31, 2014 are as follows:

Years Ending December 31,

Nine months ending December 31, 2014	\$ 8,323,000
--------------------------------------	--------------

Years Ending December 31,

2015	8,638,000
2016	7,193,000
2017	4,252,000
2018	754,000
Thereafter	64,000
	\$29,224,000

The terms of the Renewable Secured Debentures also have renewal features. Since we first issued our Renewable Secured Debentures, we have experienced \$28,668,000 in maturities, of which \$18,111,000 has renewed for an additional term as of March 31, 2014. This has provided us with an aggregate renewal rate of approximately 63% for investments in the Renewable Secured Debentures. Future contractual maturities of Renewable Secured Debentures at March 31, 2014 are as follows:

29

Table of Contents**Years Ending December 31,**

Nine months ending December 31, 2014	\$ 31,109,000
2015	44,587,000
2016	34,623,000
2017	13,094,000
2018	6,779,000
Thereafter	18,873,000
	\$ 149,065,000

If investors holding existing indebtedness with short-term maturities do not elect to renew and we do not, at such time, have access to sufficient capital or have not raised sufficient capital by other financing efforts, we may need to liquidate some of our investments in life insurance policies earlier than anticipated. In such an event, we may be unable to sell those life insurance policies at prices we believe are fair or otherwise appropriate and such sales could have a material and adverse impact on our results of operations.

Because we intend to hold our life insurance policies to their maturity, we therefore measure our debt coverage ratio against our current cost of financing, which may not reflect the sale price of our life insurance policies if we were to liquidate them.

We intend and expect to hold the life insurance policy investments until they are paid out at the mortality of the insured. As a result, we measure our debt coverage ratio based on the portfolio's gross expected yield against the interest cost of our total debt obligations to finance the portfolio. The debt coverage ratio, expressed as a percentage, is defined as the ratio of (i) total amounts outstanding on any indebtedness for borrowed money, over (ii) the net present asset value of all life insurance assets we own, plus any cash held in our accounts. For this purpose, the net present asset value is calculated as the present value of the life insurance portfolio's expected future cash flows discounted at the weighted-average interest rate of the indebtedness for the previous month. Under the indentures for each of the Renewable Secured Debentures and the Series L Bonds, the maximum amount of such securities we may issue at any time is limited to an amount such that our debt coverage ratio does not exceed 90%. This limitation is designed to provide some comfort to holders of our debt that the value of our assets exceeds our obligations to those holders. Nevertheless, the debt coverage ratio (as calculated) is not based on the fair value of our life insurance assets, which may be different greater or less than the amount we would receive if we were forced to sell those assets in the marketplace.

We have no obligation to redeem Series L Bonds prior to their maturity date except in narrowly limited circumstances.

We will have no obligation, and Series L Bond holders will have no right to require us, to redeem any Series L Bond prior to its maturity date. The only exceptions exist for situations in which an individual natural person investor suffers a total permanent disability or a bankruptcy, or dies. In any such event, we will be required to redeem the Series L Bond of such person so long as certain procedural requirements are met.

Outside these narrow exceptions, we may nonetheless agree, in our sole and absolute discretion, to accommodate requests to redeem a Series L Bond prior to its maturity in other cases. If we do agree to redeem a Series L Bond, we will assess a 6% redemption fee for such transaction. For more information, see *Description of the Series L Bonds Call and Redemption Prior to Stated Maturity*. As a result, any investment in a Series L Bond should be considered illiquid and unable to be redeemed until its stated maturity.

Fraudulent transfer statutes may limit your rights under the guarantee of the Series L Bonds.

Our obligations under the Series L Bonds will be fully and unconditionally guaranteed by our direct wholly owned subsidiary, GWG Life. The guarantee may be subject to review under various laws for the protection of creditors. It is possible that other creditors of GWG Life may challenge the guarantee as a fraudulent transfer under relevant federal and state laws. Under certain circumstances, including a finding that

Table of Contents

GWG Life was insolvent at the time its guarantee was issued, a court could hold that the obligations of GWG Life under the guarantee may be voided or are subordinate to other obligations of GWG Life, or that the amount for which GWG Life is liable under its guarantee of the Series L Bonds may be limited. Different jurisdictions define insolvency differently, and we cannot assure you as to what standard a court would apply to determine whether GWG Life was insolvent. If a court were to determine that GWG Life was insolvent on the date on which it guaranteed the Series L Bonds, or that the guarantee constituted a fraudulent transfer on other legal grounds, the claims of creditors of GWG Life would effectively have priority with respect to GWG Life's assets and earnings over the claims of the holders of the Series L Bonds.

Our controlling stockholders and principal executives are involved in a litigation clawback claim made by a bankruptcy trustee to an affiliate, and it is possible that the trustee may assert claims against our company.

Our Chief Executive Officer, Jon R. Sabes and our President and Secretary, Steven F. Sabes, who together beneficially own or control approximately 94.2% of our common stock, as of December 31, 2013, are subject to litigation relating to claims by a bankruptcy trustee for loan payments made to an affiliate, Opportunity Finance, LLC. Such payments may ultimately be deemed to be avoidable transfers under preference or other legal theories. Case No. 08-45257 (U.S. Bankruptcy Court District of Minnesota). In addition, GWG Holdings invested \$1.0 million in Opportunity Finance, LLC in 2006 and was repaid and received \$176,948 of interest income from that investment in 2007. To date, no claim has been made against GWG Holdings.

Although we believe there are numerous meritorious defenses to the claims made by the bankruptcy trustee, and we are advised that the defendants in that action will vigorously defend against the trustee's claims, such defendants may not prevail in the litigation with the bankruptcy trustee. If the bankruptcy trustee sought to sell or transfer the equity interests of Jon R. Sabes or Steven F. Sabes as a result of the litigation, there could be a change in control of the Company, and our business together with all of our investors, including investors in our common stock, could be materially and adversely impacted. Such adverse results would likely arise in connection with negative change-in-control covenants contained in our revolving credit facility agreements, the breach of those covenants and an ensuing event of default under such facility. Finally, regardless of the outcome of this litigation, these matters are likely to distract management and reduce the time and attention that they are able to devote to our business.

We have no obligation to contribute to a sinking fund to retire the Series L Bonds, nor are the Series L Bonds guaranteed by any governmental agency.

We have no obligation to contribute funds to a sinking fund to repay principal or interest on the Series L Bonds upon maturity or default. The Series L Bonds are not certificates of deposit or similar obligations of, or guaranteed by, any depository institution. Further, no governmental entity insures or guarantees payment on the Series L Bonds if we do not have enough funds to make principal or interest payments.

The loss of the services of our current executives or other key employees, or the failure to attract additional key individuals, would materially and adversely affect our business operations and prospects.

Our financial success is dependent to a significant degree upon the efforts of our current executive officers and other key employees. In addition, our revolving credit facility requires Messrs. Jon R. Sabes and Steven F. Sabes to generally remain active within the business. We have entered into employment agreements with Messrs. Jon R. Sabes, Steven F. Sabes, Paul A. Siegert, William Acheson and Jon Gangelhoff. Nevertheless, there can be no assurance that these individuals will continue to provide services to us. A voluntary or involuntary termination of employment could have materially adverse effect on our business operations if we were not able to attract qualified replacements in a timely manner. At

present, we do not maintain key-man life insurance policies for any of these individuals. In addition, our success and viability is also dependent to a significant extent upon our ability to attract and retain qualified personnel in all areas of our business, especially our sales, policy acquisition, and financial management team. If we were to lose the

Table of Contents

members of these service teams, we would need to replace them with qualified individuals in a timely manner or our business operations and prospects could be adversely impacted.

We have the discretion to purchase assets, including life insurance policies, through different subsidiaries, and to transfer assets among our subsidiaries. Any decision to purchase or hold title to assets in one subsidiary, as opposed to a different subsidiary, may affect the value of collateral security for our obligation under the Series L Bonds.

We may at our discretion direct the purchase of policies by, and the sale of policies and other assets amongst, different subsidiaries of GWG Holdings as a method of asset and liability management and to attempt to maintain diversification and certain ratios in our investment portfolio. Purchases of assets in, or movements of assets amongst, different subsidiaries could affect the value of the collateral security for obligations under the Series L Bonds. For example, purchases through, or transfers of life insurance policies to, DLP Funding II would cause the policies acquired by DLP Funding II to become collateral for our revolving credit facility, whereas purchases through, or transfers of life insurance policies to, GWG Life would cause the policies acquired by GWG Life to become collateral for the Series L Bonds. Accordingly, purchases of assets such as life insurance policies through, or transfers of such assets to, different subsidiaries may affect the value of collateral security for different classes of holders of our debt, including the Series L Bonds. In the case of a liquidation, any of these discretionary decisions may affect the value of and amount you may ultimately be entitled to receive with respect to your Series L Bonds.

We are an emerging growth company and our election to delay adoption of new or revised accounting standards applicable to public companies may result in our financial statements not being comparable to those of some other public companies. As a result of this and other reduced disclosure requirements applicable to emerging growth companies, our securities may be less attractive to investors.

As a public reporting company with less than \$1.0 billion in revenue during our last fiscal year, we qualify as an emerging growth company under the Jumpstart our Business Startups Act of 2012, or the JOBS Act. An emerging growth company may take advantage of certain reduced reporting requirements and is relieved of certain other significant requirements that are otherwise generally applicable to public companies. In particular, as an emerging growth company we:

are not required to obtain an attestation and report from our auditors on our management's assessment of our internal control over financial reporting pursuant to the Sarbanes-Oxley Act of 2002;

are not required to provide a detailed narrative disclosure discussing our compensation principles, objectives and elements and analyzing how those elements fit with our principles and objectives (commonly referred to as compensation discussion and analysis);

are not required to obtain a non-binding advisory vote from our stockholders on executive compensation or golden parachute arrangements (commonly referred to as the say-on-pay, say-on-frequency and say-on-golden-parachute votes);

are exempt from certain executive compensation disclosure provisions requiring a pay-for-performance graph and CEO pay ratio disclosure;

may present only two years of audited financial statements and only two years of related Management's Discussion & Analysis of Financial Condition and Results of Operations, or MD&A; and

are eligible to claim longer phase-in periods for the adoption of new or revised financial accounting standards under §107 of the JOBS Act.

We intend to take advantage of all of these reduced reporting requirements and exemptions, including the longer phase-in periods for the adoption of new or revised financial accounting standards under §107 of the JOBS Act. Our election to use the phase-in periods may make it difficult to compare our financial statements

Table of Contents

to those of non-emerging growth companies and other emerging growth companies that have opted out of the phase-in periods under §107 of the JOBS Act.

Certain of these reduced reporting requirements and exemptions were already available to us due to the fact that we also qualify as a smaller reporting company under SEC rules. For instance, smaller reporting companies are not required to obtain an auditor attestation and report regarding management's assessment of internal control over financial reporting; are not required to provide a compensation discussion and analysis; are not required to provide a pay-for-performance graph or CEO pay ratio disclosure; and may present only two years of audited financial statements and related MD&A disclosure.

Under the JOBS Act, we may take advantage of the above-described reduced reporting requirements and exemptions for up to five years after our initial sale of common equity pursuant to a registration statement declared effective under the Securities Act of 1933, or such earlier time that we no longer meet the definition of an emerging growth company. In this regard, the JOBS Act provides that we would cease to be an emerging growth company if we have more than \$1.0 billion in annual revenues, have more than \$700 million in market value of our common stock held by non-affiliates, or issue more than \$1.0 billion in principal amount of non-convertible debt over a three-year period. Furthermore, under current SEC rules we will continue to qualify as a smaller reporting company for so long as we have a public float (i.e., the market value of common equity held by non-affiliates) of less than \$75 million as of the last business day of our most recently completed second fiscal quarter.

We cannot predict if investors will find our securities less attractive due to our reliance on these exemptions. If investors were to find our securities less attractive as a result of our election, we may have difficulty raising all of the proceeds we seek in this offering.

We do not expect a market to exist that will enable you to sell your Series L Bonds.

Although we are a public reporting company that files information with the SEC, the Series L Bonds will not be readily resalable or transferable. No public market for the Series L Bonds exists and none is expected to develop. As a result, the transferability of the Series L Bonds will be limited. Accordingly, the purchase of Series L Bonds is not suitable for investors desiring liquidity at any time prior to the maturity of the Series L Bonds.

We cannot know the tax implications of an investment in the Series L Bonds for the Series L Bond holder.

The section of this prospectus entitled "Material Federal Income Tax Considerations" sets forth a summary of federal income tax consequences to the purchasers of the Series L Bonds. No information is provided concerning tax consequences under any other federal, state, local or foreign laws that may apply to the purchasers of the Series L Bonds. Prospective investors or their representatives should read that section very carefully in order to properly evaluate the federal income tax risks of an investment in the Series L Bonds. Each prospective investor should consult his personal counsel, accountant and other business advisors as to the federal, state, local and foreign tax consequences of an investment in the Series L Bonds. Series L Bond holders will receive an IRS Form 1099-INT in connection with their receipt of interest payments.

Advances previously made to members of our executive management and outstanding at the time that we initially filed the registration statement for our ongoing offering of Renewable Secured Debentures may be deemed violations of Section 402 of the Sarbanes-Oxley Act of 2002. That law prohibits public reporting companies from extending or maintaining credit to directors or executive officers in the form of a personal loan. Any such violations could have a material and adverse effect upon our reputation and business.

Prior to our conversion from a limited liability company to a corporation and the filing of the registration statement for our ongoing offering of Renewable Secured Debentures, we made certain advances to our executive management personnel, Messrs. Jon R. Sabes, Steven F. Sabes and Paul A. Siegert, that were to be repaid by such individuals upon or in connection with operating distributions to be paid by us when the Company had cash flow sufficient to make distributions on account of their ownership interests in the Company. For further information, please refer to the "Executive Compensation" section of this prospectus

Table of Contents

the Summary Compensation Table, Employment Agreements and Change-in-Control Provisions, and Related-Party Transactions captions thereunder.

Each of Messrs. Jon R. Sabes, Steven F. Sabes and Paul A. Siegert have repaid all outstanding advances, including all interest accrued thereon. Nevertheless, because such loan advances remained outstanding at the time that we initially filed such registration statement with the SEC, we may be deemed to have inadvertently violated Section 402 of the Sarbanes-Oxley Act of 2002, which prohibits issuers from extending or maintaining credit to directors or executive officers in the form of a personal loan. As defined under the Sarbanes-Oxley Act of 2002, the term issuer includes, in addition to public companies, a company that has filed a registration statement that has not yet become effective under the Securities Act of 1933 and that has not been withdrawn. Although we believe that the loan advances constitute business loans, as opposed to personal loans, regulatory authorities may not agree with this assessment if the matter is investigated and claims alleging a violation are pursued. On July 27, 2011, Messrs. Jon R. Sabes, Steven F. Sabes and Paul A. Siegert repaid their loan balances.

Violations of the Sarbanes-Oxley Act of 2002 could result in significant penalties, including censure, cease and desist orders, revocation of registration and fines. It is also possible that the criminal penalties could exist, although criminal penalties require a related violation to have been willful, and not the result of an innocent mistake, negligence or inadvertence. In the end, it is possible that we could face any of these potential penalties or results, and any action by administrative authorities, whether or not ultimately successful, could have a material and adverse effect upon our reputation and business.

The protection provided by the federal securities laws relating to forward-looking statements does not apply to us. The lack of this protection could harm us in the event of an adverse outcome in a legal proceeding relating to forward-looking statements made by us.

Although federal securities laws provide a safe harbor for forward-looking statements made by a public company that files reports under the federal securities laws, this safe harbor is not available to certain issuers, including issuers that do not have their equity traded on a recognized national securities exchange. Our common stock does not trade on any recognized national securities exchange. As a result, we will not have the benefit of this safe harbor protection in the event of any legal action based upon a claim that the material provided by us contained a material misstatement of fact or was misleading in any material respect because of our failure to include any statements necessary to make the statements not misleading. The lack of this protection in a contested proceeding could harm our financial condition.

Table of Contents

USE OF PROCEEDS

If all of the Series L Bonds are sold, we expect to receive up to approximately \$926 million of net proceeds from this offering after paying estimated offering and related expenses and after paying our estimated average selling and wholesale commissions, dealer-manager fees, accountable and non-accountable expense allowances. The estimated commissions, dealer-manager fees, accountable and non-accountable expense allowances and wholesale commissions of our selling group members aggregate to approximately \$72.5 million based on expected average selling commissions of \$42.5 million (4.25%), dealer-manager fees of \$5 million (0.50%), accountable and non-accountable expenses of \$17 million (1.70%), and wholesale commissions of \$8.0 million (0.80%), assuming the sale of all of the Series L Bonds. In addition, we expect that our offering expenses, consisting of legal, accounting, printing, mailing, registration, qualification and associated securities offering filing costs and expenses, will aggregate to approximately \$1,500,000 through the course of this offering.

As explained elsewhere in this prospectus, the maximum amount of commissions, fees and allowances payable to FINRA selling members is 8.00% of the aggregate principal amount of Series L Bonds sold. Therefore, if all of the Series L Bonds were sold and the maximum commissions, fees and allowances were paid, we estimate that the net proceeds to us, after paying our own estimated offering and related expenses, would be approximately \$918.5 million. Nevertheless, because we do not know the total principal amount of Series L Bonds that will be ultimately sold, we are unable to accurately forecast the total net proceeds that will be generated by this offering. For more information about dealer-manager fees, selling commissions, non-accountable expense allowances and accountable due diligence expenses payable to our selling group in connection with the sale of Series L Bonds, as well as our own offering and related expenses, please see Plan of Distribution.

There is no minimum amount of Series L Bonds that must be sold before we access investor funds. The exact amount of proceeds we receive may vary considerably depending on a variety of factors, including how long the Series L Bonds are offered.

Edgar Filing: GWG Holdings, Inc. - Form S-1

Our goal is to use a majority of the net proceeds from the sale of Series L Bonds to purchase additional life insurance policy assets in the secondary market. The amount of proceeds we apply towards purchasing additional life insurance policy assets will depend, among other things, on how long the Series L Bonds are offered, the amount of net proceeds that we receive from the sale of Series L Bonds being offered, the existence and timing of opportunities to expand our portfolio of insurance policy assets, our cash needs for certain other expenditures (summarized below) we anticipate incurring in connection with this offering and in connection with our business, and the availability of other sources of cash (e.g., our revolving credit facility). These certain other expenditures, listed in order of priority, include:

paying premiums on life insurance assets we own;

paying principal at maturity, interest and fees to our lenders, including under our revolving credit facility, the Series I Secured notes, the Renewable Secured Debentures and the Series L Bonds; and paying fees and expenses of the trustees of certain trusts associated with our Series I Secured notes, the Renewable Secured Debentures and the Series L Bonds; and

providing funds for portfolio operations and working capital purposes.

Our use of funds for portfolio operations is expected to include, but not be limited to, expenditures such as (i) obtaining life expectancy reports, (ii) mortality tracking and (iii) legal and collections expenses; and our use of funds for working capital purposes is expected to include, but not be limited to, (iv) sales and marketing expenses, (v) general and administrative expenses, as well as (vi) tax liabilities, and (vii) interest rate caps, swaps or hedging instruments for our life insurance policy portfolio or our indebtedness.

As indicated above, the extent to which we will use proceeds from this offering for these other purposes, and the amounts and timing of such expenditures will depend on, among other things, how long the Series L Bonds are offered, the amount of net proceeds that we receive from the sale of Series L Bonds being offered, the existence and timing of opportunities to expand our portfolio of insurance policy assets, the availability of

35

Table of Contents

funds from other sources, including borrowings from our revolving credit facility and cash generated from our operations, and certain other factors. We currently expect to allocate net offering proceeds (assuming the maximum amount of commissions, fees and allowances of 8.00% of the aggregate principal amount of Series L Bonds sold) as follows, based upon various assumed amounts of gross proceeds that we receive from the sale of Series L Bonds:

	Gross Offering Proceeds					
	\$ 1,000,000,000		\$ 500,000,000		\$ 250,000,000	
Net Offering Proceeds	918,500,000	100%	458,500,000	100%	228,500,000	100%
Purchase Policies	661,320,000	72%	330,120,000	72%	141,670,000	62%
Payment of Premiums	91,850,000	10%	45,850,000	10%	34,275,000	15%
Payment of Principal and Interest	119,405,000	13%	59,605,000	13%	41,130,000	18%
Other Expenditures	45,925,000	5%	22,925,000	5%	11,425,000	5%

Net offering proceeds not immediately applied to the uses summarized above will be invested in short-term investments such as money market funds, commercial paper, U.S. Treasury Bills and similar securities investments pending their use. We may also purchase interest rate hedges to lock in our cost of capital, or longevity hedges to lock in our expected return from our portfolio.

As indicated above, we may use some of the net proceeds from this offering to pay premiums on life insurance assets we own. Our aggregate premium obligations over the next five years for life insurance assets that we own as of March 31, 2014 are set forth in the table below. These premium obligations do not take into account the expectation of mortality over the periods presented.

Year	Premiums
Nine months ending December 31, 2014	\$ 18,025,000
2015	26,221,000
2016	28,693,000
2017	32,252,000
2018	35,298,000
Total	\$ 140,489,000

Also as indicated above, we may use some of the net proceeds from this offering to pay principal amounts owing under our Series I Secured notes when such amounts become due and payable. The amount of such notes that we would repay with proceeds of this offering will depend on whether the holders of such notes elect repayment rather than renewal of such notes, as well as whether we elect to use other sources of repayment. We believe it is most likely that such payments, if any, would relate to notes that mature within the first three years after the initial effective date of the registration statement of which this prospectus is a part (i.e., the maximum period of time during which we may offer securities under the registration statement). Of the Series I Secured notes presently scheduled to mature on or prior to December 31, 2017, such notes have an aggregate outstanding principal amount of approximately \$28.6 million and a weighted-average interest rate of 8.35% as of March 31, 2014. We do not intend to use any net proceeds from this offering to repurchase Series I Secured notes prior to their maturity.

Some of the outstanding Series I Secured notes due to mature within the next year may have been issued within the prior year (i.e., less than one year ago). In such a case, we used the proceeds of such debt to purchase life insurance policies or finance the servicing of such policies.

Table of Contents

CAPITALIZATION

The following table sets forth, as of March 31, 2014, our consolidated debt and stockholders' equity on an actual basis and as adjusted to give effect to the sale of the maximum amount of Series L Bonds offered hereby. You should read this table in conjunction with our consolidated financial statements and the notes thereto which are incorporated herein by this reference.

	At March 31, 2014	
	Actual	As Adjusted
	(Dollars in thousands, except per-share amounts) (Unaudited)	
Debt:		
Series L Bonds offered hereby	\$ 0	\$ 1,000,000
Renewable Secured Debentures	145,989	145,989
Series I Secured notes (1)	28,602	28,602
Revolving credit facility (2)	79,000	79,000
Total debt	\$ 253,591	\$ 1,253,591
Preferred stock:		
Series A Convertible Preferred (par value \$0.001; shares authorized 40,000,000; shares issued and outstanding 3,478,219; liquidation preference of \$26,087,000 on March 31, 2014) (3)	\$ 25,036	\$ 25,036
Stockholders' equity:		
Common stock (par value \$0.001 per share; shares authorized 210,000,000; shares issued and outstanding 4,562,000)	\$ 5	\$ 5
Additional paid-in capital	2,872	2,872
Retained earnings	(10,340)	(10,340)

At March 31, 2014

Total stockholders' equity	\$ (7,463)	\$ (7,463)
Total debt, preferred stock and common stockholders' equity	\$ 271,164	\$ 1,271,164

- (1) The total outstanding face amount of Series I Secured notes outstanding at March 31, 2014 was \$29,224,000, less unamortized selling costs of \$622,000. The weighted-average interest rate of our outstanding Series I Secured notes at March 31, 2014 was approximately 8.35%, and the weighted-average maturity was approximately 2.24 years.
- (2) The interest rate of our revolving credit line floats in conjunction with advances made thereunder. The weighted-average interest rate payable under our revolving credit line at March 31, 2014 was approximately 6.21%. Amounts owing under our revolving credit line come due on December 31, 2016.
- (3) As of March 31, 2014, we had issued 3,395,000 preferred shares resulting in gross consideration of \$25,261,000 (including cash proceeds, conversion of Series I Secured notes and accrued interest on Series I notes, and conversion of preferred dividends payable) net of redemptions. We incurred Series A preferred stock issuance costs of \$2,838,000, of which \$2,510,000 was amortized to additional paid in capital as of March 31, 2014, resulting in a carrying amount of \$25,036,000.

For more discussion and information relating to the retirement of Series I Secured notes, please refer to the "Use of Proceeds" section of this prospectus.

SUMMARY FINANCIAL INFORMATION

The following tables set forth our summary consolidated financial information. The summary statement of operations data for fiscal years 2013 and 2012 and the selected balance sheet data as of December 31, 2013 and 2012 are derived from our audited consolidated financial statements contained elsewhere in this prospectus. This selected consolidated financial information should be read in conjunction with, and is qualified by reference to, our consolidated financial statements and related notes contained herein and the "Management's Discussion and Analysis of Financial Condition and Results of Operations" section of this prospectus.

Balance Sheet Data:

	March 31, 2014	December 31, 2013	December 31, 2012
Total Assets	\$ 287,577,263	\$ 275,380,476	\$ 197,948,035
Investment in Portfolio	254,503,535	234,672,794	164,317,183
Cash and Cash Equivalents	28,083,299	33,449,793	27,497,044
Restricted Cash	2,853,763	5,832,970	2,093,092
Total Liabilities	270,004,316	256,149,798	175,303,946
Revolving Credit Facility	79,000,000	79,000,000	71,000,000
Series I Secured notes (1)	28,602,238	29,275,202	37,844,711
Renewable Secured Debentures (2)	145,989,431	131,646,062	55,718,950
Stockholder Preferred and Common Equity	17,572,947	19,530,678	22,644,089

Edgar Filing: GWG Holdings, Inc. - Form S-1

- (1) The total outstanding face amount of Series I Secured notes outstanding at March 31, 2014 was \$29,224,000, less unamortized selling costs of \$622,000.
- (2) The total outstanding face amount of Renewable Secured Debentures outstanding at March 31, 2014 was \$149,065,000 plus \$2,343,000 of subscriptions in process, less unamortized selling costs of \$5,418,000.

Income Statement Data:

	March 31, 2014	December 31, 2013	December 31, 2012
Total Revenue	\$ 5,523,572	\$ 33,064,774	\$ 17,525,798
Gain on Life Insurance Contracts	5,516,205	29,513,642	17,436,743
Interest Expense	6,326,548	20,762,644	10,878,627
Net Income (Loss)	(1,901,170)	(194,955)	(1,012,899)

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

You should read the following discussion in conjunction with the consolidated financial statements and accompanying notes and the information contained in other sections of this prospectus, particularly under the headings "Risk Factors" and "Business." This discussion and analysis is based on the beliefs of our management, as well as assumptions made by, and information currently available to, our management. The statements in this discussion and analysis concerning expectations regarding our future performance, liquidity and capital resources, as well as other non-historical statements, are forward-looking statements. These forward-looking statements are subject to numerous risks and uncertainties. Our actual results could differ materially from those suggested or implied by any forward-looking statements. Please see the "Risk Relating to Forward-Looking Statements" section of this prospectus.

Overview

We are engaged in the emerging secondary market for life insurance policies. We acquire life insurance policies in the secondary market from policy owners desiring to sell their policies at a discount to the face value of the insurance benefit. Once we purchase a policy, we continue paying the policy premiums in order to ultimately collect the face value of the insurance benefit. We generally seek to hold the individual policies to maturity, in order to ultimately collect the policy's face value upon the insured's mortality. Our strategy is to build a profitable and large (greater than 300 live) portfolio of policies that is diversified in terms of insurance carriers and the medical conditions of insureds. We believe that diversification among insureds, insurers and medical conditions will lower our overall risk exposure, and that a larger number of individual policies (diversification in overall number) will provide our portfolio with greater actuarial stability.

In 2013, we recognized \$12,036,000 of revenue from the receipt of \$16,600,000 in policy benefits. In addition, we recognized revenue from the change in fair value of our life insurance policies, net of premiums and carrying costs, of \$17,478,000. In 2013, interest expense, including amortization of the deferred financing costs and preferred stock dividends, was \$20,763,000, and selling, general and administrative expenses were \$10,323,000. Income tax expense in 2013 was \$2,174,000. Our net loss in 2013 was \$195,000.

In the first three months of 2014, we recognized revenue from the change in fair value of our life insurance policies, net of premiums and carrying costs, of \$5,516,000. Interest expense, including amortization of the deferred financing costs and preferred stock dividends, was \$6,327,000, and selling, general and administrative expenses were \$2,053,000. Income tax benefit for the three months ended March 31, 2014 was \$955,000. Our net loss for first quarter of 2014 was \$1,901,000.

To date, we have financed our business principally through the issuance of debt, including debt incurred by our subsidiary DLP Funding II under a senior revolving credit facility provided by Autobahn/DZ Bank, Series I Secured notes issued by our subsidiary GWG Life and our ongoing

registered public offering of Renewable Secured Debentures. See the Liquidity and Capital Resources caption below. Since July 31, 2011, we have also issued Series A Convertible Preferred Stock for gross consideration of approximately \$25.2 million, including cash proceeds, conversion of Series I Secured notes and accrued interest on those notes, and satisfaction of preferred dividends payable. All outstanding shares of our preferred stock (equaling 3,478,219 preferred shares as of the date of this prospectus) will be convertible into an aggregate of 2,608,664 shares of our common stock upon the closing of this offering.

Critical Accounting Policies

Critical Accounting Estimates

The preparation of our consolidated financial statements in accordance with the Generally Accepted Accounting Principles (GAAP) requires us to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. We base our judgments, estimates and assumptions on historical experience and on various other factors believed to be reasonable under the circumstances. Actual

39

Table of Contents

results could differ materially from these estimates. We evaluate our judgments, estimates and assumptions on a regular basis and make changes accordingly. We believe that the judgments, estimates and assumptions involved in the accounting for the valuation of investments in life insurance policies have the greatest potential impact on our consolidated financial statements and accordingly believe these to be our critical accounting estimates. Below we discuss the critical accounting policies associated with these estimates as well as certain other critical accounting policies.

Ownership of Life Insurance Policies – Fair Value Option

Our primary business involves the purchasing and financing of life insurance policies. As such, we account for the purchase of life insurance policies in accordance with Financial Accounting Standards Board's Accounting Standards Codification (FASB ASC) 325-30, *Investments in Insurance Contracts*, which requires us to use either the investment method or the fair value method. We have elected to account for these life insurance policies as investments using the fair value method.

We initially record our purchase of life insurance policies at the transaction price, which is the amount paid for the policy, inclusive of all fees and costs associated with the acquisition. The fair value of our investment in the portfolio of insurance policies is evaluated at the end of each reporting period. Changes in the fair value of the portfolio of life insurance policies are based on periodic evaluations and are recorded as changes in fair value of life insurance policies in our consolidated and combined statement of operations. The fair value is determined as the net present value of the life insurance portfolio's future expected cash flows that incorporates current life expectancy estimates and discount rate assumptions.

In addition to reporting our results of operations and financial condition based on the fair value of our life insurance policies as required by GAAP, management also makes calculations based on the weighted-average expected internal rate of return of the policies. See Non-GAAP Financial Measures below.

Valuation of Life Insurance Policies

Unobservable inputs, as discussed below, are a critical component of our estimate for the fair value of our investments in life insurance policies. We currently use a probabilistic method of estimating and valuing the projected cash flows of our portfolio of life insurance policies, which we believe to be the preferred and most prevalent valuation method in the industry. In this regard, the most significant assumptions we make are the life expectancy estimates of the insureds and the discount rate applied to the projected cash flows to be derived from our portfolio.

In determining life expectancy estimates, we generally use actuarial medical reviews from independent medical underwriters. These medical underwriters summarize the health of the insured by reviewing historical and current medical records. The medical underwriters evaluate the health condition of the insured in order to produce an estimate of the insured's mortality a life expectancy report. In the case of a small face policy (\$1,000,000 face value or less), we may use one life expectancy report or estimate life expectancy based on a modified methodology which does not use actuarial medical reviews from independent medical underwriters. The life expectancy estimate represents a range of probabilities for the

insured's mortality against a group of cohorts with the same age, sex and smoking status. These mortality probabilities represent a mathematical curve known as a mortality curve, which is then used to generate a series of expected cash flows from the life insurance policy over the expected lifespan of the insured. A discount rate is used to calculate the net present value of the expected cash flows. The discount rate represents the internal rate of return we expect to earn on investments in a policy or in the portfolio as a whole at the stated fair value. The discount rate used to calculate fair value of our portfolio incorporates the guidance provided by ASC 820, *Fair Value Measurements and Disclosures*. Many of our current underwriting review processes, including our policy of obtaining actuarial medical reviews from independent medical underwriters as described above, are undertaken in satisfaction of obligations under our revolving credit facility. As a result, we may in the future modify our underwriting review processes if permitted under our borrowing arrangements.

Table of Contents

The table below provides the discount rate used to estimate the fair value of our portfolio of life insurance policies for the period ending:

<u>March 31, 2014</u>	<u>December 31, 2013</u>
11.69%	11.69%

The change in the discount rate incorporates current information about discount rates applied by other reporting companies owning portfolios of life insurance policies, discount rates observed in the life insurance secondary market, market interest rates, the credit exposure to the issuing insurance companies and our estimate of the risk premium a purchaser would require to receive the future cash flows derived from our portfolio of life insurance policies. Because we use the discount rate to arrive at the fair value of our portfolio, the rate we choose necessarily assumes an orderly and arms-length transaction (i.e., a non-distressed transaction in which neither seller nor buyer is compelled to engage in the transaction).

We engaged a third party, Model Actuarial Pricing Systems (MAPS), to prepare a third-party valuation of our life settlement portfolio. MAPS owns and maintains the portfolio pricing software we use. MAPS processed policy data, future premium data, life expectancy estimate data, and other actuarial information we supply to calculate a net present value for our portfolio using the specified discount rate of 11.69%. MAPS independently calculated the net present value of our portfolio of 286 policies to be \$254,503,535, which is the same fair value estimate we used on the balance sheet as of March 31, 2014, and furnished us with a letter documenting its calculation. A copy of such letter is filed as Exhibit 99.1 to the registration statement of which this prospectus is a part.

JOBS Act

On April 5, 2012, the Jumpstart Our Business Startups Act of 2012, or JOBS Act, was enacted. Section 107 of the JOBS Act provides that an emerging growth company can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act of 1933 for complying with new or revised accounting standards. This means that an emerging growth company can make an election to delay the adoption of certain accounting standards until those standards would apply to private companies. We have elected to delay such adoption of new or revised accounting standards and, as a result, we may not comply with new or revised accounting standards at the same time as other public reporting companies that are not emerging growth companies. This exemption will apply for a period of five years following our first sale of common equity securities under an effective registration statement or until we no longer qualify as an emerging growth company as defined under the JOBS Act, whichever is earlier.

Deferred Income Taxes

FASB ASC 740, Income Taxes, requires us to recognize deferred tax assets and liabilities for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. A valuation allowance is established for any portion of deferred tax assets that is not considered more likely than not to be realized.

We have provided a valuation allowance against the deferred tax asset related to a note receivable because we believe that, when realized for tax purposes, it will result in a capital loss that will not be utilized because we have no expectation of generating a capital gain within the applicable carryforward period. Therefore, we do not believe that it is more likely than not that the deferred tax asset will be realized.

We have also provided a valuation allowance against the deferred tax asset related to a tax basis capital loss generated with respect to its settlement and subsequent disposal of our investment in Athena Structured Funds PLC (see Notes to Consolidated Financial Statements Note

10). As we have no expectation of generating capital gains within the applicable carry-forward period, we do not believe that it is more likely than not that the deferred asset will be realized.

A valuation allowance is required to be recognized to reduce deferred tax assets to an amount that is more likely than not to be realized. Realization of deferred tax assets depends upon having sufficient past or future taxable income in periods to which the deductible temporary differences are expected to be recovered

Table of Contents

or within any applicable carryback or carryforward periods. We believe that it is more likely than not that we will be able to realize all of our deferred tax assets other than that which is expected to result in a capital loss.

Deferred Financing and Issuance Costs

Financing costs incurred to obtain financing under the revolving credit facility have been capitalized and are amortized using the straight-line method over the term of the revolving credit facility. The Series I Secured note obligations are reported net of issuance costs, sales commissions and other direct expenses, which are amortized using the interest method over the term of each respective borrowing. The Renewable Secured Debentures are reported net of issuance costs, sales commissions and other direct expenses, which are amortized using the interest method over the term of each respective borrowing. The Series A preferred stock is reported net of issuance costs, sales commissions, including the fair value of warrants issued, and other direct expenses, which are amortized using the interest method as interest expense over the three-year redemption period.

Principal Revenue and Expense Items

We earn revenues from three primary sources as described below.

Policy Benefits Realized. We recognize the difference between the death benefits and carrying values of the policy when an insured event has occurred and we determine that settlement and ultimate collection of the death benefits is realizable and reasonably assured. Revenue from a transaction must meet both criteria in order to be recognized. We generally collect the face value of the life insurance policy from the insurance company within 45 days of the insured's mortality.

Change in Fair Value of Life Insurance Policies. We have elected to carry our investments in life insurance policies at fair value in accordance with ASC 325-30, *Investments in Life Insurance Contracts*. Accordingly, we value our investments in our portfolio of life insurance policies each reporting period in accordance with the fair value principles discussed herein, which includes the expected payment of premiums for future periods.

Sale of a Life Insurance Policy or a Portfolio of Life Insurance Policies. In an event of a sale of a policy, we recognize gain or loss as the difference between the sale price and the carrying value of the policy on the date of the receipt of payment on such sale.

Our main components of expense are summarized below.

Selling, General and Administrative Expenses. We recognize and record expenses incurred in the operations of the purchasing and servicing of life insurance policies. These expenses include professional fees, salaries, and sales and marketing expenditures.

Interest Expense. We recognize and record interest expenses associated with the costs of financing our life insurance portfolio for the current period. These expenses include interest paid to our senior lender under our revolving credit facility, as well as all interest paid on our Renewable Secured Debentures and other outstanding indebtedness such as our subsidiary secured notes and dividends on convertible, redeemable preferred stock. When we issue long-term indebtedness, we amortize the issuance costs associated with such indebtedness over the outstanding term of the financing, and classify it as interest expense.

Edgar Filing: GWG Holdings, Inc. - Form S-1

The following is our analysis of the results of operations for the periods indicated below. This analysis should be read in conjunction with our consolidated financial statements and related notes.

Revenue. Revenue recognized from the receipt of policy benefits was \$12,036,000 and \$6,283,000 in 2013 and 2012, respectively. Revenue recognized from the change in fair value of our life insurance policies, net of premiums and carrying costs, was \$17,478,000 in 2013 and \$11,154,000 in 2012. That portion of the

42

Table of Contents

change in fair value related to new policies acquired during 2013 and 2012 was \$27,475,000 and \$12,242,000, respectively. In each case, the increases in fair value were due to changes in the discount rates we applied to calculate the net present value of cash flows expected from our portfolio of life insurance policies, change in fair value of policies acquired during the period, and aging of the policies. The discount rate incorporates current information about market interest rates, credit exposure to the insurance companies that issued the life insurance policies in our portfolio and our estimate of the risk premium an investor would require to receive the future cash flows from our portfolio of life insurance policies. The discount rate applied to estimate the fair value of the portfolio of life insurance policies we own was 11.69% as of December 31, 2013, compared to 12.08% for the same date in 2012. The decrease in discount rate was due to an increase in the size of the portfolio and the diversity of policies held in our portfolio of life insurance policies that resulted in a lower anticipated risk premium to a potential buyer. The carrying value of policies acquired during each quarterly reporting period are adjusted to their current fair value using the fair value discount rate applied to the entire portfolio as of that reporting date.

Gain Upon Termination of Agreement with Athena Securities Ltd. In June 2013, we entered into a Purchase and Sale Agreement with Athena Securities Ltd. and Athena Securities Group Ltd. This agreement effected the termination of an earlier agreement that the parties had entered into in 2011. That 2011 agreement had contemplated cooperative efforts by the parties aimed at developing a security and related offering in Europe or Ireland, the proceeds of which would be used to finance the acquisition of life-insurance related assets in the United States. We sought to terminate the 2011 agreement due to a changing regulatory environment in Europe that negatively affected the likelihood of consummating the contemplated offering of securities, and due to our dissatisfaction with Athena's performance under the 2011 agreement. Accordingly, the June 2013 agreement contained mutual general releases of claims and substantially unwound certain capital stock transactions that had been effected under the earlier agreement. In particular, Athena returned to us for redemption 432,500 shares of our common stock, and retained 62,000 common shares in recognition of their earlier efforts under the 2011 agreement. For our part, we sold back to Athena Securities Group Ltd. all of our ownership in Athena Structured Funds, PLC that we had originally acquired under the 2011 agreement. As a result of the termination effected by our June 2013 agreement with Athena and our re-acquisition of 432,500 shares of our common stock, we recorded a non-cash gain on the transaction of \$3,252,000. Presently, we have no ongoing business relationship with Athena.

Expenses. Interest expense, including amortization of the deferred financing costs and preferred stock dividends, was \$20,763,000 during 2013 compared to \$10,879,000 during 2012, an increase of \$9,884,000. The increase was due to increased average debt outstanding and increased issuance costs being amortized during 2013. Selling, general and administrative expenses were \$10,323,000, and \$6,467,000 for 2013 and 2012, respectively, representing an increase of \$3,856,000. Employee compensation and benefits increased by \$2,140,000. This increase partially resulted from \$825,000 in bonuses paid to the original members of the Company (prior to its conversion to a corporation) equal to the tax effect of the conversion from an LLC to a corporation, and a \$449,000 increase related to the implementation of a new incentive compensation plan. Legal expenses increased by \$745,000 due in part to increased compliance work. Sales and marketing expenses increased by \$971,000 due to increased activity related to our public offering of Renewable Secured Debentures and increased effort at procuring life insurance policies for our investment portfolio.

Income Tax Expense. Income tax expense was \$2,174,000 and \$1,193,000 in 2013 and 2012, respectively. The effective tax rate for the 12 months ended December 31, 2013 and 2012, was 109.8% and 661.8%, respectively, compared to a statutory rate of 40.5%. In 2013 and 2012, there were significant permanent differences between income before income taxes and taxable income. The primary permanent differences between our effective tax rate and the statutory federal rate result from the accrual of preferred stock dividend expense, state taxes, and other non-deductible expenses. The dividends charged to interest expense were \$2,528,000 and \$2,227,000 in 2013 and 2012, respectively. Excluding the impact of the dividends and other permanent differences, the effective tax rate for 2013 and 2012 would have been 40.5%.

The most significant temporary differences between GAAP net income and taxable net income are the treatment of interest costs with respect to the acquisition of the life insurance policies and revenue recognition with respect to the mark-to-market of life insurance portfolio.

43

Table of Contents**Results of Operations Three Months Ended March 31, 2014 Compared to the Same Period in 2013**

The following is our analysis of the results of operations for the periods indicated below. This analysis should be read in conjunction with our consolidated financial statements and related notes.

Revenue. Revenue recognized from the receipt of policy benefits was \$0 and \$2,510,000 during the three months ended March 31, 2014 and 2013, respectively. Revenue recognized from the change in fair value of our life insurance policies, net of premiums and carrying costs, was \$5,516,000 and \$5,830,000 for the three month ended March 31, 2014 and 2013, respectively. The total revenue from received policy benefits and change in fair value was \$5,516,000 and \$8,340,000 for the three months ended March 31, 2014 and 2013, respectively. During the three-month period ended March 31, 2013, we purchased a higher volume of life insurance policies than we did during the same period in 2014. The change in fair value related to new policies acquired during the three months ended March 31, 2014 and 2013 was \$4,473,000 and \$6,057,000 respectively. In each case, the increases in fair value were due to changes in the discount rates we use to calculate the net present value of cash flows expected from our portfolio of life insurance policies, change in fair value of policies acquired during the period, and aging of the policies. Decreases in fair value were due to changes in life expectancy estimates. The discount rate incorporates current information about market interest rates, the credit exposure to the insurance companies that issued the life insurance policies in our portfolio and our estimate of the risk premium an investor would require to receive the future cash flows from our portfolio of life insurance policies. The discount rate used to estimate the fair value of the life insurance policies we own was 11.69% as of March 31, 2014, compared to 12.12% for the same date in 2013. The decrease in discount rate was due to changes in a variety of factors in our fair value methodology. The carrying value of policies acquired during each quarterly reporting period are adjusted to their current fair value using the fair value discount rate applied to the portfolio as of that reporting date.

Expenses. Interest expense, including amortization of the deferred financing costs as well as preferred stock dividends, was \$6,327,000 during the three months ended March 31, 2014 compared to \$4,467,000 during the same period of 2013, an increase of \$1,860,000. \$153,000 of that increase was due to higher interest rate associated with the revolving line of credit, and the rest was due to the increased debt outstanding that went up from \$243,635,000 at March 31, 2013 to \$257,289,000 at March 31, 2014. Selling, general, and administrative expenses were \$2,053,000, and \$3,407,000 during the three-month periods ending March 31, 2014 and 2013, respectively representing a decrease of \$1,354,000. The decrease is mostly due to \$825,000 in discretionary bonuses equal to the tax effect of the conversion from an LLC to a corporation, paid to the original LLC members in the first quarter of 2013. The payments under our incentive compensation plan were also higher in the first quarter of 2013 compared to those in the same period of 2014 due to higher volume of life insurance contracts purchased.

Income Tax Expense. For the three months ended March 31, 2014, we had \$2,856,000 loss before income taxes and recorded income tax benefit of \$955,000, or 33.4%. In the same period of 2013, we had \$633,000 income before income taxes and recognized an income tax expense of \$566,000, or 89.4%. The primary differences between our effective tax rate and the statutory federal rate are the accrual of preferred stock dividend expense, state taxes, and other non-deductible expenses. Excluding the impact of the dividends and other permanent differences, the effective tax rate for the three months ended March 31, 2014 and 2013 would have been 43.8% and 40.5%, respectively.

The following table provides a reconciliation of our income tax expense at the statutory federal tax rate to our actual income tax expense:

Three months ended:	March 31, 2014		March 31, 2013	
Statutory federal income tax	\$ (971,000)	34.0%	\$ 215,000	34.0%
State income taxes, net of federal benefit	(143,000)	5.0%	85,000	13.5%
Series A preferred stock dividends	216,000	(7.6)%	216,000	34.1%
Other permanent differences	(57,000)	2.0%	50,000	7.8%
Total income tax expense	\$ (955,000)	33.4%	\$ 566,000	89.4%

Edgar Filing: GWG Holdings, Inc. - Form S-1

The most significant temporary differences between GAAP net income and taxable net income are the treatment of interest costs with respect to the acquisition of the life insurance policies and revenue recognition with respect to the mark-to-market of life insurance portfolio.

Liquidity and Capital Resources

We finance our business through a combination of policy benefit revenues, origination fees, equity offerings, debt offerings, and a credit facility. We have used our debt offerings and credit facility primarily for policy acquisition, policy servicing and portfolio related financing expenditures. We charge an intercompany origination fee in the amount of one to four percent of the face value of a life insurance policy's benefit when we acquire the related life insurance policy. The origination fee we charge is included in the total purchase price we pay for a life insurance policy for purposes of our valuation and expected internal rate of return calculations, but is not netted against the purchase price we pay to a seller of an insurance policy. We generated cash flows of \$966,000 and \$1,278,000 from origination fees during the three months ended March 31, 2014 and 2013, respectively. Profit from intra-company origination fees for life insurance policies retained by the Company are eliminated from our consolidated statements of operations. As such, the origination fees collected under our life insurance policy financing arrangements are reflected in our consolidated statements of cash flows as cash flows from financing activities as they are received from borrowings used to finance the acquisition of life insurance policies. Our revolving bank line allows DLP Funding II to borrow the funds necessary to pay origination fees to GWG Life. Our borrowing agreements allow us to use net proceeds of the Renewable Secured Debentures for policy acquisition, which includes origination fees. If the policy acquisition is not financed, no fees are included in the consolidated cash flows. See **Cash Flows** below for further information. We determine the purchase price of life insurance policies in accordance with ASC 325-30, **Investments in Insurance Contracts**, using the fair value method. Under the fair value method, the initial investment is recorded at the transaction price. Because the origination fees are paid from a wholly owned subsidiary to the parent company, these fees are not included in the transaction price as reflected in our consolidated financial statements. For further discussion on our accounting policies for life settlements, please refer to note 1 to our consolidated financial statements.

As of March 31, 2014, we had approximately \$32.8 million in combined available cash and available borrowing base surplus capacity under our revolving credit facility for the purpose of purchasing additional life insurance policies, paying premiums on existing policies, paying portfolio servicing expenses, and paying principal and interest on our outstanding financing obligations.

As of December 31, 2013, we had approximately \$43.2 million in combined available cash and available borrowing base surplus capacity under our revolving credit facility for the purpose of purchasing additional life insurance policies, paying premiums on existing policies, paying portfolio servicing expenses, and paying principal and interest on our outstanding financing obligations.

In September 2012, we concluded a Series A preferred stock offering, receiving an aggregate \$24.6 million in subscriptions for our Series A preferred stock. These subscriptions consisted of \$14.0 million in conversions of outstanding Series I Secured notes and \$10.6 million of new investments. We have used the proceeds from the sale of our Series A preferred stock, together with the origination fees we received to purchase and finance life insurance policies to fund our operational expenditures.

In June 2011, we registered a \$250.0 million debt offering of our Renewable Secured Debentures with the SEC, which registration became effective on January 31, 2012. Through March 31, 2014, the total amount of Renewable Secured Debentures sold, including renewals, is \$177.7 million. As of March 31, 2014, we had approximately \$149.0 million in principal amount of Renewable Secured Debentures outstanding.

Additionally, our wholly owned subsidiary GWG Life issued Series I Secured notes beginning in November 2009 on a private placement basis to accredited investors only. As of March 31, 2014, we had approximately \$29.2 million in principal amount of Series I Secured notes outstanding. This offering was closed in November 2011.

Table of Contents

The weighted-average interest rate of our outstanding Series I Secured notes as of both March 31, 2014 and December 31, 2013 was 8.35%, and the weighted-average maturity at those dates was 2.24 and 2.49 years, respectively. The Series I Secured notes have renewal features. Since we first issued our Series I Secured notes, we have experienced \$124,856,000 in maturities, of which as of March 31, 2014 \$96,435,000 has renewed for an additional term. This has provided us with an aggregate renewal rate of approximately 77% for investments in our subsidiary secured notes. Future contractual maturities of Series I Secured notes payable at March 31, 2014 are:

Years Ending December 31,

Years Ending December 31,

Nine months ending December 31, 2014	\$ 8,323,000
2015	8,638,000
2016	7,193,000
2017	4,252,000
2018	754,000
Thereafter	64,000
	\$ 29,224,000

The weighted-average interest rate of our outstanding Renewable Secured Debentures as of both March 31, 2014 and December 31, 2013 was 7.53%, and the weighted average maturity at those dates was 3.54 and 3.69 years, respectively. Our Renewable Secured Debentures have renewal features. Since we first issued our Renewable Secured Debentures, we have experienced \$28,668,000 in maturities, of which as of March 31, 2014 \$18,111,000 has renewed for an additional term. This has provided us with an aggregate renewal rate of approximately 63% for investments in our Renewable Secured Debentures. Future contractual maturities of Renewable Secured Debentures at March 31, 2014 are:

Years Ending December 31,

Nine months ending December 31, 2014	\$ 31,109,000
2015	44,587,000
2016	34,623,000
2017	13,094,000
2018	6,779,000
Thereafter	18,873,000
	\$ 149,065,000

The Renewable Secured Debentures and Series I Secured notes are secured by all our assets, and are subordinate to our revolving credit facility with Autobahn/DZ Bank. The Renewable Secured Debentures and Series I Secured notes are pari passu with respect to our assets pursuant to an intercreditor agreement (see notes 7 and 8 to our consolidated financial statements).

We maintain a \$100 million revolving credit facility with Autobahn/DZ Bank through GWG Life's wholly owned subsidiary DLP Funding II. As of both March 31, 2014 and December 31, 2013, we had \$79.0 million outstanding under the revolving credit facility and maintained an available borrowing base surplus of \$4.7 and \$3.9 million (see note 6 to our consolidated financial statements).

We expect to meet our ongoing operational capital needs through a combination of policy benefit revenues, origination fees, and proceeds from financing transactions. We expect to meet our policy acquisition, servicing, and financing capital needs principally from the receipt of policy benefit revenues from our portfolio of life insurance policies, net proceeds from our offering of Renewable Secured Debentures, and from our revolving credit facility. Because we only receive origination fees when we purchase a policy, our receipt of those fees is contingent upon our consummation of policy purchases, which is, in turn, contingent upon our receipt of external funding. Despite recent adverse capital market conditions, including a prolonged credit crisis, we have demonstrated continued access to credit and financing markets. Furthermore, we expect to begin receiving insurance benefit payments on our portfolio of life insurance policies as the average age of the insureds increase and mortality events occur over time which we expect to begin more significantly in 2015 and steadily increasing until 2018. As a result of the foregoing, we estimate that our liquidity and capital

Table of Contents

resources are sufficient for our current and projected financial needs. Nevertheless, if we are unable to continue our offering of Renewable Secured Debentures for any reason (or if we become unsuccessful in selling such debentures), and we are unable to obtain capital from other sources, we expect that our business would be materially and adversely affected. In addition, our business would be materially and adversely

Edgar Filing: GWG Holdings, Inc. - Form S-1

affected if we did not receive the policy benefits we forecast and if holders of our Renewable Secured Debentures or Series I Secured notes failed to renew with the frequency we have historically experienced. In such a case, we could be forced to sell our investments in life insurance policies to service or satisfy our debt-related obligations and continue to pay policy premiums.

Capital expenditures have historically not been material and we do not anticipate making material capital expenditures in 2014 or beyond.

Debt Financings Summary

We had the following outstanding debt balances as of March 31, 2014:

Issuer/Borrower	Principal Amount Outstanding	Weighted Average Interest Rate
GWG Holdings, Inc. Renewable Secured Debentures	\$ 149,065,000	7.53%
GWG Life, LLC Series I Secured notes	29,224,000	8.35%
GWG DLP Funding II, LLC revolving credit facility	79,000,000	6.21%
Total	\$ 257,289,000	7.21%

Our total credit facility and other indebtedness balance as of March 31, 2014 and December 31, 2013 was \$257,289,000 and \$243,635,000, respectively. At March 31, 2014, the total outstanding face amount under our Series I Secured notes outstanding was \$29,224,000, less unamortized selling costs of \$622,000, resulting in a carrying amount of \$28,602,000. At December 31, 2013, the total outstanding face amount under our Series I Secured notes outstanding was \$29,744,000, less unamortized selling costs of \$469,000, resulting in a carrying amount of \$29,275,000. At March 31, 2014, the total outstanding face amount of Renewable Secured Debentures was \$149,065,000 plus \$2,343,000 of subscriptions in process and pending, less unamortized selling costs of \$5,418,000, resulting in a carrying amount of \$145,990,000. At December 31, 2013, the total outstanding face amount of Renewable Secured Debentures outstanding was \$134,891,000 plus \$1,902,000 of subscriptions in process, less unamortized selling costs of \$5,147,000, resulting in a carrying amount of \$131,646,000. At March 31, 2014, the fair value of our investments in life insurance policies of \$254,504,000 plus our cash balance of \$28,083,000 and our restricted cash balance of \$2,854,000, totaled \$285,441,000, representing an excess of portfolio assets over secured indebtedness of \$28,152,000. At December 31, 2013, the fair value of our investments in life insurance policies of \$234,673,000 plus our cash balance of \$33,450,000 and our restricted cash balance of \$5,833,000, totaled \$273,956,000, representing an excess of portfolio assets over secured indebtedness of \$30,321,000. The Renewable Secured Debentures and Series I Secured notes are secured by all our assets and are subordinate to our revolving credit facility with Autobahn/DZ Bank. The Renewable Secured Debentures and Series I Secured notes are pari passu with respect to shared collateral pursuant to an intercreditor agreement.

The following forward-looking table seeks to illustrate the impact of the sale of our portfolio of life insurance assets at various discount rates in order to satisfy our debt obligations as of March 31, 2014. In all cases, the sale of the life insurance assets owned by DLP Funding II will be used first to satisfy all amounts owing under the revolving credit facility with Autobahn/DZ Bank. The net sale proceeds remaining after satisfying all obligations under the revolving credit facility would be applied to Renewable Secured Debentures and Series I Secured notes on a pari passu basis.

Table of Contents

Portfolio Discount Rate	11%	12%	13%	14%	15%
Value of portfolio	\$ 263,696,606	\$ 250,538,024	\$ 238,394,725	\$ 227,165,747	\$ 216,762,110
Cash and cash equivalents	30,937,062	30,937,062	30,937,062	30,937,062	30,937,062
Total assets	294,633,668	281,475,086	269,331,787	258,102,808	247,699,172
Revolving credit facility					
Autobahn/DZ Bank	79,000,000	79,000,000	79,000,000	79,000,000	79,000,000
Net after revolving credit facility	215,633,668	202,475,086	190,331,787	179,102,808	168,699,172

Edgar Filing: GWG Holdings, Inc. - Form S-1

Portfolio Discount Rate	11%	12%	13%	14%	15%
Series I Secured notes and Renewable Secured Debentures	178,289,219	178,289,219	178,289,219	178,289,219	178,289,219
Net after Series I Secured notes and Renewable Secured Debentures	37,344,449	24,185,867	12,042,568	813,590	(9,590,047)
Impairment to Series I Secured notes and Renewable Secured Debentures	No impairment	No impairment	No impairment	No impairment	Impairment

The table illustrates that our ability to fully satisfy amounts owing under the Renewable Secured Debentures and Series I Secured notes would likely be impaired upon the sale of all our life insurance assets at a price equivalent to a discount rate of approximately 14.08% or higher. The discount rates used to calculate the fair value of our portfolio for mark-to-market accounting were 11.69% as of both March 31, 2014 and December 31, 2013. The table does not include any allowance for transactional fees and expenses associated with a portfolio sale (which expenses and fees could be substantial), and is provided to demonstrate how various discount rates used to value our portfolio could affect our ability to satisfy amounts owing under our debt obligations, in light of our senior secured lender's right to priority payments. You should read the above table in conjunction with the information contained in other sections of this prospectus, including our discussion of discount rates included under the Critical Accounting Policies Valuation of Insurance Policies caption above. This discussion and analysis is based on the beliefs of our management, as well as assumptions made by, and information currently available to, our management. The forward-looking presentation above is subject to numerous risks and uncertainties. Our actual results could differ materially from those suggested or implied by the above table. Please see the caption Risk Relating to Forward-Looking Statements above.

On January 29, 2013, we entered into an Amended and Restated Credit and Security Agreement with Autobahn Funding Company LLC, as the conduit lender, and DZ Bank AG Deutsche Zentral-Genossenschaftsbank, as the committed lender and as the agent on behalf of secured parties under such agreement. The Amended and Restated Credit and Security Agreement extended the maturity date of borrowings made by our subsidiary, GWG DLP Funding II, LLC, to December 31, 2014, and removed certain GWG-related parties to the original Credit and Security Agreement dated June 15, 2008. In connection with the Amended and Restated Credit and Security Agreement, we entered into certain other agreements and amendments and restatements of earlier agreements entered into in connection with the original Credit and Security Agreement. Included among these other agreements was a Reaffirmation and Modification Agreement that reaffirms the performance guaranty that GWG Holdings earlier provided in connection with the original Credit and Security Agreement to DZ Bank AG Deutsche Zentral-Genossenschaftsbank, as agent. On May 29, 2014, we entered into an amendment to the Amended and Restated Credit and Security Agreement to extend the maturity date for borrowings to December 31, 2016.

Cash Flows

The payment of premiums and servicing costs to maintain life insurance policies represents our most significant requirement for cash disbursement. When a policy is purchased, we are able to calculate the minimum premium payments required to maintain the policy in-force. Over time as the insured ages, premium payments will increase; however, the probability of actually needing to pay the premiums decreases since mortality becomes more likely. These scheduled premiums and associated probabilities are factored into our

Table of Contents

expected internal rate of return and cash-flow modeling described herein. Beyond premiums, we incur policy servicing costs, including annual trustee and tracking costs, and debt servicing costs, including principal and interest payments. Until we receive a stable amount of proceeds from the policy benefits, we intend to pay these costs from our credit facility, when permitted, and through the issuance of debt securities, including Renewable Secured Debentures.

For the quarter end dates set forth below, the following table illustrates the total amount of face value of policy benefits owned, and the trailing 12 months of life insurance policy benefits collected and premiums paid on our portfolio. The trailing 12-month benefits/premium coverage ratio indicates the ratio of policy benefits received to premiums paid over the trailing 12-month period from our portfolio of life insurance policies.

Quarter End Date

Edgar Filing: GWG Holdings, Inc. - Form S-1

	Portfolio Face Amount	12-Month Trailing Benefits Collected	12-Month Trailing Premiums Paid	12-Month Trailing Benefits/ Premiums Coverage Ratio
March 31, 2012	\$482,455,000	\$ 4,203,000	\$ 14,977,000	28.06%
June 30, 2012	489,255,000	8,703,000	15,412,000	56.47%
September 30, 2012	515,661,000	7,833,000	15,837,000	49.46%
December 31, 2012	572,245,000	7,350,000	16,597,000	44.28%
March 31, 2013	639,755,000	11,350,000	18,044,000	62.90%
June 30, 2013	650,655,000	13,450,000	19,182,000	70.11%
September 30, 2013	705,069,000	18,450,000	20,279,000	90.98%
December 31, 2013	740,648,000	16,600,000	21,733,000	76.38%
March 31, 2014	771,940,000	12,600,000	21,930,000	57.46%

We believe that the portfolio cash flow results set forth above represent our general investment thesis: that the life insurance policy benefits we receive will continue to increase over time in relation to the premiums we are required to pay on the remaining policies in the portfolio. Nevertheless, we expect that our portfolio cash flow results will remain inconsistent until such time we achieve our goal of acquiring a larger, more diversified portfolio of life insurance policies in order to obtain more normalized actuarial results. For example, we had expected to receive a greater amount of insurance benefits for the periods ended December 31, 2013 and March 31, 2014 than we actually experienced. As our receipt of life insurance policy benefits increase, we expect to begin servicing and paying down our outstanding indebtedness, or alternatively purchasing additional life insurance policies, from these cash flows. As indicated above under Liquidity and Capital Resources, we presently expect that by 2015, the cash inflows from the receipt of policy benefits will exceed the premium obligations on the remaining life insurance policies held within the portfolio as of December 31, 2013. See Business Portfolio Management.

The amount of payments for anticipated premiums and servicing costs that we will be required to make over the next five years to maintain our current portfolio, assuming no mortalities, is set forth in the table below.

Year	Premiums and Servicing
Nine months ending December 31, 2014	\$ 18,025,000
2015	26,221,000
2016	28,693,000
2017	32,252,000
2018	35,298,000
Total	\$ 140,489,000

The life insurance policies owned by DLP Funding II are subject to a collateral arrangement with the agent to our revolving credit lender, as described in note 6 to the consolidated financial statements. Under this arrangement, collection and escrow accounts are used to fund purchases and premiums of the insurance

Table of Contents

policies and to pay interest and other charges under our revolving credit facility. The lender and its agent must authorize all disbursements from these accounts, including any distributions to GWG Life or Holdings. Distributions are limited to an amount that would result in the borrowers (DLP Funding II, GWG Life, and Holdings) realizing an annualized rate of return on the equity funded amount for such assets of not more than

18%, as determined by the agent. After such amount is reached, the credit agreement requires that excess funds be used to fund repayments or a reserve account in a certain amount before any additional distributions may be made. In the future, these arrangements may restrict the cash flows available for payment of principal and interest on our debt obligations.

Inflation

Changes in inflation do not necessarily correlate with changes in interest rates. We presently do not foresee any material impact of inflation on our results of operations in the periods presented in our consolidated financial statements.

Off-Balance Sheet Arrangements

Operating Lease We entered into an office lease with U.S. Bank National Association as the landlord. The lease was effective April 22, 2012 with a term through August 31, 2015. The lease is for 11,695 square feet of office space located at 220 South Sixth Street, Minneapolis, Minnesota. We are obligated to pay base rent plus common area maintenance and a share of the building operating costs. Minimum lease payments under the lease are as follows:

2014	\$ 78,000
2015	70,000
Total	\$ 148,000

Credit Risk

We review the credit risk associated with our portfolio of life insurance policies when estimating its fair value. In evaluating the policies credit risk we consider insurance company solvency, credit risk indicators, economic conditions, ongoing credit evaluations, and company positions. We attempt to manage our credit risk related to life insurance policies typically by purchasing policies issued only from companies with an investment grade credit rating by either Standard & Poor's, Moody's, or A.M. Best Company. As of March 31, 2014, 97.60% of our life insurance policies, by face value benefits, were issued by companies that maintained an investment grade rating (BBB or better) by Standard & Poor's. See the table disclosing the concentration risk of our ten largest insurance company holdings as of March 31, 2014 under Business Portfolio Credit Risk Management on page 74.

Interest Rate Risk

Our credit facility is floating-rate financing. In addition, our ability to offer interest rates that attract capital (including in the offer and sale of Renewable Secured Debentures) is generally impacted by prevailing interest rates. Furthermore, while our other indebtedness provides us with fixed-rate financing, our debt coverage ratio is calculated in relation to our total cost of financing. Therefore, fluctuations in interest rates impact our business by increasing our borrowing costs, and reducing availability under our debt financing arrangements. Furthermore, we calculate our portfolio earnings based upon the spread generated between the return on our life insurance portfolio and the cost of our financing. As a result, increases in interest rates will reduce the earnings we expect to achieve from our investments in life insurance policies.

Non-GAAP Financial Measures

We use non-GAAP financial measures when evaluating our financial results, for planning and forecasting purposes, and for maintaining compliance with covenants contained in our borrowing agreements. Non-GAAP financial measures disclosed by management are provided as additional information to investors in order to

Table of Contents

provide them with an alternative method for assessing our financial condition and operating results. These non-GAAP financial measures are not in accordance with GAAP and may be different from non-GAAP measures used by other companies, including other companies within our industry. This presentation of non-GAAP financial information is not meant to be considered in isolation or as a substitute for comparable amounts prepared in accordance with GAAP. See the notes to our consolidated financial statements and our audited financial statements

contained herein.

We have elected to carry our investments in life insurance policies at fair value in accordance with ASC 325-30, *Investments in Life Insurance Contracts*. Accordingly, we value our investments in life insurance policies at the conclusion of each reporting period in accordance with GAAP fair value accounting principles. In addition to GAAP, we are required to report non-GAAP financial measures to Autobahn/DZ Bank under certain financial covenants made to that lender under our revolving credit facility. As indicated above, we also use non-GAAP financial reporting to manage and evaluate the financial performance of our business.

GAAP-based fair value requires us to mark-to-market our investments in life insurance policies, which by its nature, is based upon Level 3 measurements that are unobservable. As a result, this accounting treatment imports financial market volatility and subjective inputs into our financial reporting. We believe this type of accounting reporting is at odds with one of the key attractions for purchasing and owning a portfolio of life insurance policies: the non-correlated nature of the returns to be derived from such policies. Therefore, in contrast to a GAAP-based fair valuation, we seek to measure the accrual of the actuarial gain occurring within the portfolio of life insurance policies at their expected internal rate of return based on statistical mortality probabilities for the insureds (using primarily the insureds' age, sex and smoking status). The expected internal rate of return tracks actuarial gain occurring within the policies according to a mortality table as the insureds' age increases. By comparing the actuarial gain accruing within our portfolio of life insurance policies against our costs during the same period, we can estimate, manage and evaluate the overall financial profitability of our business without regard to mark-to-market volatility. We use this information to balance our life insurance policy purchasing and manage our capital structure, including the issuance of debt and utilization of our other sources of capital, and to monitor our compliance with borrowing covenants. We believe that these non-GAAP financial measures provide information that is useful for investors to understand period-over-period operating results separate and apart from fair value items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

Our credit facility requires us to maintain a positive net income and tangible net worth each of which are calculated on an adjusted non-GAAP basis on the method described above, without regard to GAAP-based fair value measures. In addition, our revolving credit facility requires us to maintain an excess spread, which is the difference between (i) the weighted average of our expected internal rate of return of our portfolio of life insurance policies and (ii) the weighted average of our credit facility's interest rate. These calculations are made using non-GAAP measures in the method described below, without regard to GAAP-based fair value measures.

In addition, our Renewable Secured Debentures and Series I Secured notes require us to maintain a debt coverage ratio designed to ensure that the expected cash flows from our portfolio of life insurance policies is able to adequately service our total outstanding indebtedness. In addition, our Renewable Secured Debentures requires us to maintain a subordination ratio which limits the total amount of indebtedness that can be issued senior in rank to the Renewable Secured Debentures and Series I Secured notes. These ratios are calculated using non-GAAP measures in the method described below, without regard to GAAP-based fair value measures.

Adjusted Non-GAAP Net Income. Our credit facility requires us to maintain a positive net income calculated on an adjusted non-GAAP basis. We calculate the adjusted net income by recognizing the actuarial gain accruing within our life insurance policies at the expected internal rate of return of the policies we own without regard to fair value. We net this actuarial gain against our costs during the same period to calculate our net income on a non-GAAP basis.

Table of Contents

<u>Three months ended March 31,</u>	<u>2014</u>	<u>2013</u>
GAAP net income (loss)	\$ (1,901,000)	\$ 67,000
Unrealized fair value gain (1)	(11,359,000)	(27,856,000)
Adjusted cost basis increase (2)	11,397,000	10,256,000
Accrual of unrealized actuarial gain (3)	7,305,000	5,033,000
Total adjusted non-GAAP income (4)	\$ 5,442,000	\$ 3,861,000

(1) Reversal of unrealized fair value gain of life insurance policies for current period.

Edgar Filing: GWG Holdings, Inc. - Form S-1

- (2) Adjusted cost basis is increased to include those acquisition and servicing expenses that are not capitalized by GAAP.
- (3) Accrual of actuarial gain at expected internal rate of return based on investment cost basis for the period.
- (4) We must maintain an annual positive consolidated net income, calculated on a non-GAAP basis, to maintain compliance with our revolving credit facility with DZ Bank/Autobahn.

Adjusted Non-GAAP Tangible Net Worth. Our revolving credit facility requires us to maintain a tangible net worth in excess of \$15 million calculated on an adjusted non-GAAP basis. We calculate the adjusted tangible net worth by recognizing the actuarial gain accruing within our life insurance policies at the expected internal rate of return of the policies we own without regard to fair value. We net this actuarial gain against our costs during the same period to calculate our tangible net worth on a non-GAAP basis.

	As of March 31, 2014	As of December 31, 2013
GAAP net worth (1)	\$ 17,573,000	\$ 19,231,000
Less intangible assets (2)	(7,179,000)	(6,068,000)
GAAP tangible net worth	10,394,000	13,163,000
Unrealized fair value gain (3)	(126,103,000)	(114,744,000)
Adjusted cost basis increase (4)	117,602,000	106,201,000
Accrual of unrealized actuarial gain (5)	56,972,000	49,666,000
Total adjusted non-GAAP tangible net worth (6)	\$ 58,865,000	\$ 54,286,000

-
- (1) Includes termination of redeemable member's interest prior to corporate conversion and preferred stock classified as temporary equity.
 - (2) Unamortized portion of deferred financing costs and pre-paid insurance.
 - (3) Reversal of cumulative unrealized fair value gain or loss of life insurance policies.
 - (4) Adjusted cost basis is increased by acquisition and servicing expenses which are not capitalized under GAAP.
 - (5) Accrual of cumulative actuarial gain at expected internal rate of return based on investment cost basis.
 - (6) We must maintain a total adjusted non-GAAP tangible net worth of \$15 million to maintain compliance with our revolving credit facility with DZ Bank/Autobahn.

Excess Spread. Our revolving credit facility requires us to maintain a 2.00% excess spread between our weighted-average expected internal rate of return of our portfolio of life insurance policies and the credit facility's interest rate. A presentation of our excess spread and our total excess spread is set forth below. Management uses the total excess spread to gauge expected profitability of our investments, and uses the excess spread to monitor compliance with our borrowing covenants.

Table of Contents

As of March 31,	As of December 31,
--------------------	-----------------------

Edgar Filing: GWG Holdings, Inc. - Form S-1

	2014	2013
Weighted-average expected IRR (1)	12.17%	12.21%
Weighted-average revolving credit facility interest rate (2)	6.21%	6.19%
Excess spread (3)	5.96%	6.02%
Total weighted-average interest rate on indebtedness for borrowed money (4)	7.21%	7.20%
Total excess spread	4.96%	5.01%

(1) This represents the weighted-average expected internal rate of return of the life insurance policies as of the measurement date based upon our investment cost basis in the insurance policies and expected cash flows from the life insurance portfolio. Our investment cost basis is calculated as our cash investment in the life insurance policies, without regard to GAAP-based fair value measurements, and is set forth below:

	As of March 31, 2014	As of December 31, 2013
<i>Investment Cost Basis</i>		
GAAP fair value	\$ 254,504,000	\$ 234,673,000
Unrealized fair value gain (A)	(126,103,000)	(114,744,000)
Adjusted cost basis increase (B)	117,602,000	106,201,000
Investment cost basis (C)	\$ 246,003,000	\$ 226,130,000

(A) This represents the reversal of cumulative unrealized GAAP fair value gain of life insurance policies.

(B) Adjusted cost basis is increased to include those acquisition and servicing expenses that are not capitalized by GAAP.

(C) This is the full cash investment cost basis in life insurance policies from which our expected internal rate of return is calculated.

(2) This is the weighted-average revolving credit facility interest rate as of the measurement date.

(3) We must maintain an excess spread of 2.00% relating to our revolving credit facility to maintain compliance under such facility.

(4) Represents the weighted-average interest rate paid on all outstanding indebtedness as of the measurement date, determined as follows:

	As of March 31, 2014	As of December 31, 2013
<i>Outstanding Indebtedness</i>		
Revolving credit facility	\$ 79,000,000	\$ 79,000,000
Series I Secured notes	29,224,000	29,744,000
Renewable Secured Debentures	149,065,000	134,891,000
Total	\$257,289,000	\$243,635,000
<i>Interest Rates on Indebtedness</i>		
Revolving credit facility	6.21%	6.19%
Series I Secured notes	8.35%	8.35%
Renewable Secured Debentures	7.53%	7.53%
Weighted-average interest rates on indebtedness	7.21%	7.20%

Debt Coverage Ratio and Subordination Ratio. Our Renewable Secured Debentures and Series I Secured notes, as well as the Series L Bonds issuable pursuant to this prospectus, require us to maintain a debt coverage ratio of less than 90%. The debt coverage ratio is calculated by dividing the sum of our total

53

Table of Contents

indebtedness by the sum of our cash and cash equivalents and the net present value of the life insurance portfolio. The subordination ratio for our Renewable Secured Debentures is calculated by dividing the total indebtedness that is senior to Renewable Secured Debentures and Series I Secured notes by the sum of the company's cash and cash equivalents and the net present value of the life insurance portfolio. The subordination ratio must be less than 50%. For purposes of both ratio calculations, the net present value of the life insurance portfolio is calculated using a discount rate equal to the weighted average interest rate of all indebtedness.

	As of March 31, 2014	As of December 31, 2013
Life insurance portfolio policy benefits	\$ 771,940,000	\$ 740,648,000
Discount rate of future cash flows	7.21%	7.20%
Net present value of Life insurance portfolio policy benefits	\$ 325,006,000	\$ 302,761,000
Cash and cash equivalents	30,937,000	39,283,000
Total Coverage	355,943,000	332,044,000
Revolving credit facility	79,000,000	79,000,000
Series I Secured notes	29,224,000	29,744,000
Renewable Secured Debentures	149,065,000	134,891,000
Total Indebtedness	\$ 257,289,000	\$ 243,635,000
Debt Coverage Ratio	72.28%	71.23%
Subordination Ratio	22.19%	23.10%

As of March 31, 2014, we were in compliance with both the debt coverage ratio and the subordination ratio as required under our related financing agreements for Renewable Secured Debentures and Series I Secured notes.

BUSINESS

Overview

We provide financial services to consumers in the emerging secondary market for life insurance assets. We target our financial service offerings toward consumers owning life insurance who can benefit from realizing the actuarial value of their life insurance policy. We believe the value proposition of our services to the consumers we serve is very high, and these consumers represent the fastest growing demographic in the United States according to the U.S. Census Bureau. To address this growing need, we recently have expanded our services by offering consumers a range of options to access the actuarial value of their life insurance, including purchasing (i) all or a portion of their life insurance policy for cash, (ii) all or a portion of their life insurance policy in exchange for a different asset, and (iii) all or a portion of their life insurance policy in an

installment sale that provides the selling consumer with a stream of cash flow. All of our services involve our purchase or financing of life insurance assets from consumers in the secondary market at a discount to the face value of the life insurance asset we obtain. In cases where we purchase a life insurance policy, we continue paying the policy premiums until maturity, in order to collect the policy benefit upon the insured's mortality. In this way, we hope to profit from the difference between our cost of obtaining and financing a life insurance asset, and the policy benefit we ultimately receive upon the mortality of the insured.

In addition to our goal of providing consumers with value-added services based upon the actuarial value of their life insurance policies, we seek to build a profitable and large portfolio of life insurance assets that are well diversified in terms of insurance carriers, mortality profiles and the medical conditions of insureds. We believe that successfully diversifying our assets will lower our overall risk exposure and provide our portfolio of life insurance assets with greater actuarial stability and more reliable returns. To obtain the growth and diversification we seek, we have raised capital through a variety of financing efforts that have included the public offering of our common stock, private and public offerings of structured debt securities, private offerings of preferred stock, and the use of a senior secured revolving credit facility. This offering of Series L Bonds is an extension of that strategy, and presents investors with an opportunity to participate in our business and the opportunity presented by the secondary market for life insurance. We believe that this investment opportunity is unique and attractive in that potential investment returns from life insurance assets are not correlated to general economic or financial market conditions.

As of March 31, 2014, we owned approximately \$772 million in face value of life insurance policy benefits covering 256 lives with an aggregate cost basis of approximately \$246 million. Aggregate cost basis includes our acquisition costs and ongoing maintenance and financing costs. We have acquired this portfolio through a combination of the issuance of debt in particular, the sale of Renewable Secured Debentures by GWG Holdings, the sale of Series I Secured notes by GWG Life, and the use of a senior secured revolving credit facility provided to our subsidiary GWG DLP Funding II, as borrower. Our objective is to earn returns from our life insurance assets that are greater than the costs necessary to purchase and finance those policy assets to their maturity. We expect to accomplish our objective by:

- purchasing life insurance policy assets which generate expected internal rates of returns in excess of our cost of capital;

- paying the life insurance asset's premiums and costs until the insured's mortality;

- obtaining a large and diverse portfolio of insurance policy assets to mitigate actuarial risk;

- maintaining diversified funding sources to reduce our overall cost of financing;

- maintaining rigorous portfolio monitoring and servicing practices; and

- if appropriate, engaging in hedging strategies that reduce potential volatility to our cost of financing.

We intend to apply the majority of proceeds of this offering, along with amounts we receive under arrangements with senior lenders, to expand the portfolio of insurance assets we own, and finance those assets until their maturity. See also [Use of Proceeds](#).

Table of Contents

Market

According to the American Council of Life Insurers Fact Book 2013 (ACLI), individuals owned over \$11.22 trillion of face value of life insurance policies in the United States in 2012. This figure includes all types of policies, including term and permanent insurance known as whole life, universal life, variable life, and variable universal life. The ACLI reports that the lapse and surrender rate of individual life insurance policies for 2012 was 5.9%, over \$661 billion in face value of policy benefits in 2012 alone. These figures do not include group-owned life insurance, such as employer-provided life insurance, the market for which totaled over \$8.01 trillion of face value of life insurance policies in the United States in 2012, and the policies of which exhibit similar lapse and surrender rates, according to the ACLI. Consumers owning life insurance generally allow policies to lapse or surrender the policies for a variety of reasons, including: (i) the life insurance is no longer needed; (ii) unrealistic original earnings assumptions made when the policy was purchased; (iii) increasing premium payment obligations as the insured ages; (iv) changes in financial status or outlook which cause the insured to no longer require life insurance; (v) other financial needs that make the insurance unaffordable; or (vi) a desire to maximize the policy's investment value.

The secondary market for life insurance has developed in response to the large volume of policy lapses and surrenders. Rather than allowing a policy to lapse as worthless, or surrendering a life insurance policy at a fraction of its inherent value, the secondary market can be a source of significant value to consumers. The inherent actuarial value of a policy in the life insurance secondary market often exceeds the cash surrender value offered by the insurance carrier. Life insurance companies earn substantial revenue windfalls due to the lapse and surrender of many insurance policies. These revenue windfalls have enabled life insurance companies to issue policies with reduced premiums. The profit opportunity for a purchaser of a life insurance asset in the secondary market is the difference, or spread, between (i) the cost of obtaining and maintaining a life insurance policy over the insured's lifetime, and (ii) the face value of the policy's benefit that will be paid upon the insured's mortality. The secondary market for life insurance policies has also been driven by the creation of life insurance policy pricing tools and actuarial modeling techniques developed by investors. Without the development of the secondary market, insurance carriers would maintain monopsony power over the options offered to consumers who no longer need or want their life insurance.

Although still relatively new and still emerging, Conning Research & Consulting (Conning) reports that the secondary market for life insurance policies grew from \$2 billion in face value of benefits purchased in 2002, to over \$12 billion in face value of benefits purchased in 2008. During and after the 2009 credit crisis, the secondary market for life insurance contracted significantly, evidenced by Conning's report that investors purchased approximately \$2 billion in face value of life insurance benefits in 2012. Nevertheless, Conning reports that consumer demand for continued development of the secondary market remains strong, and there are indications of strengthening interest among investors. Conning maintains that, given the current economic condition and investor sentiment, the secondary market will likely increase, and the market's largest growth will likely come from companies that attract capital to purchase the assets. Conning reports that the net market potential for policies sold in the secondary market exceeded \$109 billion in 2012, and is expected to grow to \$151 billion by 2019.

We believe that socio-economic and demographic trends further support the long-term development and growth of the secondary market for life insurance, and that the secondary market for life insurance represents a significant and expanding market opportunity. According to the United States Census Bureau (Bureau) the population age 65 and older is expected to more than double between 2012 and 2060, from 43.1 million to 92.0 million. The Bureau projects that the increase in the number of the oldest old will be even more dramatic those 85 and older are projected to more than triple from 5.9 million to 18.2 million, reaching 4.3 percent of the total population. We believe that this older demographic, 85 years and older, may be particularly well served by the services we offer.

In addition to changing demographics, we believe there is a growing need for services that address the post-retirement financial needs of consumers in general. Research published by Natixis Global Asset Management (NGAM) reports that retirees will likely be required to finance a larger portion of their

Table of Contents

retirement as the government's ability to support them fades. In response to this growing need, the States of Texas and Kentucky adopted legislation enabling individuals to help finance their long-term care needs through the value of their life insurance by allowing individuals to enter the Medicaid program so long as they use the proceeds from the sale of their life insurance policy in the secondary market for long-term care needs. Additional states are considering similar legislation to deal with the increasing costs of providing long-term care to the growing population of seniors.

As the life insurance secondary market has grown, a regulatory framework has been established to oversee the industry participants and protect consumers. Since 2007, there has been a dramatic increase in the number of states that have adopted legislation and regulations. Today, almost every state has adopted some version of model laws prohibiting business practices deemed to be abusive and generally requiring the licensing of life insurance purchasers and brokers, the filing and approval of purchase agreements, disclosure of transaction fees and periodic reporting requirements. The widespread adoption of this regulatory framework by states has brought about standardized practices and procedures for industry participants in the secondary market. In addition, several states have modified their laws to adopt notice requirements for the benefit of consumers owning life insurance, alerting them to the existence of the secondary market before they surrender their life insurance policy or allow it to lapse.

We believe the strengthened regulatory framework, along with the emergence of best practices adopted by industry participants within the life insurance secondary market, will lead to a growing awareness of the secondary market among life insurance agents and financial advisors serving the financial needs of consumers. We expect this growing awareness, along with the demographic factors described above, will lead to the continued growth of services related to the secondary market for life insurance policies.

The secondary market for life insurance policies has also attracted global investor interest because investments in life insurance policy assets can provide non-correlated investment diversification. The ability for investors to invest in the life insurance asset class comes as a result of the development of life insurance policy pricing tools and actuarial modeling techniques for valuing portfolios of life insurance policies. Standardized life insurance pricing tools and actuarial modeling software, including life expectancies, have provided foundational support for the development of services related to the life insurance secondary market. The appeal for investors to achieve non-correlated diversification appears strong, particularly after the global recession of 2008. The appeal of non-correlation is that the underlying investment return is independent of the factors contributing to economic downturns such as real estate values, commodity prices, and stock market indices. In addition, many life insurance policies represent payment obligations from highly rated life insurance companies. As a result, investors can evaluate the expected risk premium they receive for investing in the asset class as compared to the credit profile of the underlying insurance company. The risk premium offered by the asset class, along with the non-correlated return profile has attracted a large number of investors seeking investment opportunities in the life insurance secondary market. As innovation and investor awareness of the secondary market for life insurance increases, we expect continued investor interest in the asset class.

We believe that we are uniquely positioned to capitalize on this opportunity by providing value-added services to the consumers we serve, and new investment opportunities for investors, where both participants can profit. To participate and compete in our growing market, we have spent and intend to continue to spend significant resources: (i) developing a robust operational platform and systems for originating, purchasing, and servicing life insurance policies; (ii) obtaining requisite licensure to participate in the life insurance secondary market; (iii) developing financing resources, strategies, and capabilities for servicing a large portfolio of life insurance policies; (iv) recruiting and developing a professional management team; and (v) establishing strategic relationships for delivering our services.

Table of Contents

Company History

We were founded in 2006 to develop a platform to evaluate, purchase, service, and track life insurance policies purchased in the secondary market. Our original model was to operate as a joint venture with WestLB, AG, a large German commercial bank, with the goal of having the bank securitize and sell investments in the life insurance portfolio we purchased. During 2006 and 2007, we built an institutional platform to underwrite, purchase, service, and track life insurance policies purchased in the secondary market in conjunction with a \$250 million revolving credit facility provided by WestLB. In 2008, however, WestLB informed us that they were abandoning their effort to securitize and sell investments backed by our life insurance portfolio in light of the global economic and financial crisis. This resulted in a material change to our business plan, as we had earlier purchased the portfolio of life insurance policies with the expectation these policies would be sold through a securitization organized by WestLB. Subsequently, in 2010 we sold the original portfolio that had been financed entirely by WestLB.

Since 2008, we have focused on establishing diversified funding sources whose investment expectation is based on the purchase and finance of life insurance policies to their maturity a buy-and-hold strategy as opposed to the securitized sale of those assets prior to maturity. In 2009, our subsidiary GWG Life, LLC, or GWG Life, began selling Series I Secured notes to further finance our buy-and-hold strategy. In January 2012, we registered a public offering of our Renewable Secured Debentures in order to continue to grow and diversify the portfolio we started acquiring with the sale of Series I Secured notes. In addition to the Series I Secured notes and Renewable Secured Debentures, we have utilized a \$100 million senior secured revolving credit facility provided by Autobahn Funding Company, LLC, a bank-sponsored commercial paper conduit administered by DZ Bank AG Deutsche Zentral-Genossenschaftsbank, or DZ Bank. This credit facility is provided to our wholly owned subsidiary GWG DLP Funding II, LLC, or DLP Funding II, as borrower. DLP Funding II holds title to substantially all of our life insurance assets. We expect to maintain and expand our credit facility in conjunction with the stated goal of growing and expanding our portfolio of life insurance policies through the proceeds of our Series L Bond offering.

Our Business Model

All of our services are premised on financial and actuarial modeling that assigns a present value to the face value of an insurance policy benefit. In this regard, the value we assign to a life insurance asset in the secondary market is primarily a function of: (i) the face value of the life insurance policy or portion thereof we may wish to acquire; (ii) the estimated life expectancy of the individual insured under the policy; (iii) the premiums expected to be paid over the life of the insured; (iv) market competition from other purchasers in the secondary market; and (v) the particular underwriting characteristics of the policy, relative to the characteristics of our portfolio of life insurance assets as a whole.

The types of policies for which we provide services are typically, but not always, universal life insurance policies. Universal life insurance is a type of permanent life insurance in which premium payments above the cost of insurance are credited to the cash value of the policy. The cash value is credited each month with interest based on the terms of the insurance policy agreement. If a universal life insurance policy were to

lapse, the insured or other owner of the policy would nonetheless have a right to receive the cash surrender value of the policy. The cash surrender value is the cash value of the policy, less any surrender charges imposed by the insurance company for removing the cash value. Our services provide greatest value to a consumer when the actuarial value of the life insurance policy benefit exceeds the cash surrender value of the policy which is often the case. We also provide services to consumers who own term life insurance. Unlike permanent universal life insurance, term life insurance does not have a cash value associated with it. Nevertheless, most term insurance policies permit the policy to be converted into permanent universal life insurance. In the future, we may consider offering services in conjunction with variable universal life insurance, which differs from universal insurance in that the variable component of the policy involves the ownership of securities inside the policy. Regardless of the type of policy, we generally seek to purchase life insurance policies issued by rated life insurance carriers with investment grade credit ratings by Standard & Poor's (AAA through BBB), Moody's (Aaa through Baa3), or A.M. Best Company (aaa through bbb). As of

Table of Contents

December 31, 2013 and March 31, 2014, over 93.5% and 92.3%, respectively, of life insurance policies within our portfolio were issued by companies rated A- or better under Standard & Poor's rating system.

Before acquiring a life insurance asset, we value the related life insurance policy by conducting an underwriting review. Our present underwriting review process generally involves obtaining two life expectancy estimates on each insured from third-party medical-actuarial firms, and then averaging these two estimates. On occasion, we may obtain more than two life expectancy estimates, in which case we average the two life expectancy estimates that we believe are the most reliable, based on our own analyses and conclusions. In this regard, the two life expectancy estimates we ultimately choose to average may not always be the most conservative estimates we obtain. From time to time and as permitted by applicable borrowing covenants, we may modify our underwriting review process. For example, in anticipation of our planned marketing efforts, we recently changed our definition of a small face policy from \$250,000 in policy benefits to \$1,000,000 in policy benefits. For small face policies, rather than obtaining life expectancy estimates from third-party medical-actuarial firms, we may employ a modified underwriting review process involving the use of a combination of standard mortality tables, actuarial or medical consultants, and our own analysis to develop a life expectancy estimate for an insured.

We generally transact directly with the policy owner who originally purchased the life insurance in the primary market. Historically, we have purchased policies in the secondary market through a network of life insurance agents, life insurance brokers, and licensed providers who assist policy owners in accessing the secondary market. We expect to expand our origination practice by marketing directly to consumers through various marketing initiatives.

We have built our business with what we believe to be the following competitive strengths:

Industry Experience: We have actively participated in the development of the secondary market of life insurance as a principal purchaser and financier within the asset class since 2006. Our position within the marketplace has allowed us to evaluate over 36,000 life insurance policies, thereby gaining a deep understanding of the variety of issues involved when participating in the secondary market. We have participated in the leadership of various industry associations and forums, including the Life Insurance Settlement Association (LISA) and the Insurance Studies Institute (ISI). Our experience gives us confidence in building a portfolio of life insurance policies that will perform to our expectations.

Operational Platform: We have built an operational platform and systems for efficiently tracking, processing, and servicing life insurance policies that we believe provide competitive advantages when participating in the life insurance secondary marketplace.

Origination and Underwriting Practices: We seek to use underwriting review processes and file documentation that meet published guidelines for rated securitizations of life insurance portfolios. We purchase only permanent life insurance policies we consider to be non-contestable and that meet our underwriting criteria and reviews. We consider a life insurance policy to be non-contestable once applicable state law prohibits the insurer from challenging the validity of the policy due to fraud. In this regard, state non-contestability laws generally require a period of one to two years to elapse after the initial issuance of the policy before that policy is considered non-contestable under state law. Non-contestability laws do not, however, prevent an insurer from challenging the validity of a policy procured by fraud for lack of an insurable interest at the time at which the policy was purchased (such as is the case with stranger-originated life insurance policies).

Origination Relationships and Strategies: We have established origination relationships with life insurance policy brokers and insurance agents who submit policies for our purchase or financing. Our referral base knows our underwriting standards for purchasing life insurance

policies in the secondary market, which provides confidence in our bidding and closing processes and streamlines our own due-diligence process. We expect to expand our origination methodology and channels with the proceeds of this offering (e.g., the addition of direct-response consumer marketing).

Life Expectancy Methodology: We generally rely on two life expectancy estimates from independent third-party medical-actuarial underwriting firms to develop our own life expectancy estimate. For a

Table of Contents

majority of our life insurance policy purchases, we rely on estimates obtained from 21st Services and AVS Underwriting to develop our life expectancy estimate. We may also obtain and use life expectancy estimates from Fasano Associates and Examination Management Services, Inc. We may from time to time modify our underwriting review processes, including our use of life expectancy estimates.

Pricing Software and Methodology: To calculate our expected returns on the investments we make in life insurance policies, we use actuarial pricing methodologies and software tools that are built by a leading independent actuarial service firm and currently supported by Modeling Actuarial Pricing Systems, Inc. (MAPS).

Financing Strategy: We have actively developed diversified financing strategy for accessing capital markets in support of our buy-and-hold strategy for our portfolio of life insurance policies, ranging from institutional bank financing to a network of broker-dealers registered with the Financial Industry Regulatory Authority (FINRA), many of whom have participated in one or more of our Series I Secured note financing, our Series A preferred stock financing, or our Renewable Secured Debenture financing. If in the future we determine to offer different kinds of investment products, we expect to leverage the network of broker-dealers that we have built over time.

On the other hand, our business involves a number of challenges and risks described in more detail elsewhere in this prospectus, including the following:

Relatively New Market: Investing in life insurance policies acquired in the secondary market is a relatively new and evolving market. Our ability to source and invest in life insurance policy benefits at attractive discounts materially depends on the continued development of the secondary market for life insurance. This includes the solvency of the life insurance companies that pay the face value of the life insurance benefits, the accuracy of our life expectancy estimate assumptions, and other factors beyond our control.

Asset Valuation Assumptions: The valuation of our portfolio of life insurance policies, which is the principal asset on our balance sheet, requires us to make material assumptions that may ultimately prove to be incorrect. These assumptions include appropriate discount rates, cash flow projections, and actuarial life expectancy estimates, any of which may ultimately prove to be inaccurate.

Ability to Expand Our Portfolio: Our business model relies on achieving actual results that are in line with the results we expect to attain from our investments in life insurance assets. In this regard, we believe that the larger the portfolio of life insurance assets we own, the greater likelihood we will achieve actuarial results matching our expected results. Although we plan to expand the number of investments in life insurance assets using proceeds from the sale of our Series L Bonds, we may be unable to meet this goal. And, even if we attain the goal, we may not achieve the actuarial results we expect.

Reliance on Financing: We have chosen to finance our business almost entirely through the issuance of debt, including the sale of Series L Bonds, Renewable Secured Debentures, Series I Secured notes, and our use of a senior secured revolving credit facility. Our business model expects that we will have continued access to financing (including financing to expand or replace existing financing) in order to purchase a large and diversified portfolio of life insurance policies, and thereafter pay the attendant premiums and financing costs of maintaining that portfolio. In building a larger portfolio of policies, our goal is to remain diversified in terms of insurance carriers and the medical conditions of insureds. We believe that diversification among insurers and medical conditions will lower our overall risk, and that a larger number of policies will provide our portfolio with greater actuarial stability. We will be required to rely on our access to financing to pay premiums and interest until such time as we experience a significant amount of mortality within our portfolio and begin receiving significant revenues from the receipt of insurance policy benefits. Nevertheless, we may not receive insurance policy benefits that match our cash flow projections.

Table of Contents

Risk of Investment in Life Insurance Assets: Our investments in life insurance assets have inherent risks, including fraud and legal challenges to the validity of the life insurance policies. Examples of fraud include the possibility that the seller of a policy may have provided us with inaccurate or misleading information during the underwriting review process.

Effects of Regulation: Our business is subject to complex state and federal regulation. Changes in state or federal laws and regulations governing our business, or changes in the interpretation of such laws and regulations, could negatively affect our business.

Our business also involves certain other challenges and risks described in the Risk Factors section of this prospectus.

We track concentrations of pre-existing medical conditions among insured individuals within our portfolio based on information obtained in our underwriting review process. We track these medical conditions with ten primary disease categories: (1) cardiovascular, (2) cerebrovascular, (3) dementia, (4) cancer, (5) diabetes, (6) respiratory disease, (7) neurological disorders, (8) other, no disease, or multiple. Our primary disease categories are summary generalizations based on the ICD-9 codes we track on each insured individuals within our portfolio. ICD-9 codes, published by the World Health Organization, are used worldwide for medical diagnoses and treatment systems, as well as morbidity and mortality statistics. Currently, cardiovascular is the only primary disease category within our portfolio that represents a concentration over 10%.

Our portfolio of life insurance assets, owned by our subsidiaries as of March 31, 2014, organized by the primary disease categories of the insured and associated policy benefits, is summarized below:

Distribution of Policy Benefits by Primary Disease Category

Primary Disease Category	Policy Benefits	Distribution
Cancer	\$ 49,967,000	6.47%
Cardiovascular	154,068,000	19.96%
Cerebrovascular	36,985,000	4.79%
Dementia	53,949,000	6.99%
Diabetes	39,067,000	5.06%
Multiple	195,051,000	25.27%
Neurological Disorders	13,000,000	1.68%
No Disease	69,986,000	9.07%
Other	108,167,000	14.01%
Respiratory Diseases	51,700,000	6.70%
Total Policy Benefits	\$771,940,000	100.00%

The primary disease category represents a general category of impairment. Within the primary disease category, there are a multitude of sub-categorizations defined more specifically by ICD-9 codes. For example, a primary disease category of cardiovascular includes subcategorizations such as atrial fibrillation, heart valve replacement, coronary atherosclerosis, etc. In addition, individuals may have more than one ICD-9 code describing multiple medical conditions within one or more primary disease categories. Where an individual's ICD-9 codes indicate medical conditions in more than one primary disease categories, we categorize the individual as having multiple primary disease categories.

(1) The insured's age is current as of the measurement date.

(2) The insured's life expectancy estimate, other than for a small face value insurance policy benefit, is the average of two life expectancy estimates provided by independent third-party medical-actuarial underwriting firms at the time of purchase, actuarially adjusted through the measurement date. Numbers in this column represent months. For more information, see disclosure under the caption *Pricing Life Insurance Policies*.

Obtaining Life Insurance Assets

We seek to offer our services nationwide. In general, we work directly with consumers in states where we hold proper licensure, and in states where we are not licensed we work through other licensed providers. Historically, sourcing policy assets typically begins with life insurance

agents and financial advisors (agents) that identify consumers owning life insurance who could benefit from the extraction of value from their life insurance in the secondary market. The agents typically work with professional life insurance policy brokers specializing in packaging the policies for presentation to participants in the secondary market. Their packaging

Table of Contents

includes obtaining medical records on the insured, life expectancy estimates from medical-actuarial firms, current insurance policy illustrations, and other information needed to properly evaluate the policy. The only parties able to evaluate the policies are regulated licensed providers. Once the providers have evaluated the policy, offers are made to the owner through a competitive auction process whereby brokers facilitate competing offers from providers, concurrently negotiating fees.

We maintain membership affiliations and representation within key industry groups, such as the Life Insurance Settlement Association. Our Executive Chairman, Paul Siegert, currently serves on the board of the Life Insurance Settlement Association. We typically sponsor events and/or maintain a trade booth at events where we are able to maintain contacts with existing life settlement brokers and meet new brokers to submit policies for purchase.

In the future, we expect to develop new channels for obtaining life insurance assets by soliciting consumers directly, which may eliminate fees we pay brokers and competition we experience when a policy is auctioned through a broker. While these new channels are unproven, we believe that consumer awareness of the life insurance secondary market is relatively low while the consumer value proposition is very high and, as a result, provides a significant growth opportunity for our business.

Life Insurance Policy Underwriting and Investment Process

The process used to value and underwrite life insurance policies is relatively new and continues to be refined. We underwrite and service all the life insurance policies that we purchase. When we identify a life insurance policy that meets our criteria, we seek to invest in the policy at a discount sufficient to provide us with an expected internal rate of return that meets our internal guidelines. Once our offer to invest in a policy is accepted, we enter into a purchase agreement with the seller. This agreement gives us the right to, among other things, pay premiums, collect policy benefits, file collateral assignments, change the ownership, and obtain medical records. The general terms and conditions of the agreement are standardized and regulated by most states.

We maintain an underwriting department with experience in underwriting life insurance policies for investment. The underwriting due diligence process consists of a careful review and analysis of available materials related to a life insurance policy and the covered individual. The goal of the underwriting process is to make an informed investment decision with respect to the life insurance policy. While we believe that our underwriting policies and practices are consistent with industry best practices, it is possible that the processes may change or may not accurately reflect actual mortality experience or catch fraud or deception by sellers. To the extent the underwriting is not accurate or we are subject to fraud or deception by sellers, the performance of policies may be different from the expected results, which could adversely affect profitability.

Life Insurance Policy Characteristics

We typically invest in universal life insurance policies whose insureds are 65 years or older and whose actuarial life expectancies are estimated to be less than 168 months. In some cases, however, we invest in term life insurance policies that are convertible into universal life insurance policies, depending on the analysis of the life insurance policy and the insured's life expectancy estimate. The life expectancy estimate is the number of months the insured is expected to live based upon 50% mortality (meaning roughly half of the individuals with similar age, sex, smoking and medical statuses will have died within that number of months), which is in turn based upon actuarial tables.

We invest only in life insurance assets that have been in force for more than two years from the policy issuance date and meet our other underwriting guidelines. We reserve the right to disqualify some life insurance companies or categories of life insurance policies for purchasing in our sole discretion.

Table of Contents

Pricing Life Insurance Policies

Pricing involves an analysis of both the policy and the insured. An analysis of the insurance policy starts with an illustration obtained from the insurance company providing a schedule of level premium payments until the insured reaches age 125. Then, utilizing pricing software now owned by Modeling Actuarial Pricing Systems, Inc. (MAPS), we reverse engineer the premium schedule of the policy to determine a premium schedule that provides for the minimum payments required to keep the policy in effect. An analysis of the insured involves an actuarial evaluation of the insured's probable mortality at different points in the future—the mortality curve. This analysis covers the insured's entire projected lifespan using life expectancy estimates generated by third-party medical-actuarial underwriting firms or generated from base actuarial tables in the case of small face policies.

In determining the life expectancy estimate, we presently require two life expectancy estimates from independent third-party medical-actuarial underwriting firms, unless the life insurance policy is a small face policy (defined as a policy with \$1,000,000 in face value benefits or less), in which case we may use a life expectancy estimate derived from base actuarial mortality table assumptions. When a life expectancy estimate is obtained from a medical-actuarial firm, the health of the insured is summarized by the underwriters in a written health assessment based on the review of the insured's historical and current medical records. Underwriting assesses the characteristics and health risks of the insured in order to quantify the health into a mortality rating that represents their life expectancy estimate. We currently average the life expectancy estimates provided by two independent medical-actuarial underwriting firms to form our life expectancy estimate for life insurance policies other than small face policies. In some cases, we may obtain more than two life expectancy estimates. In those cases, we average the two life expectancy estimates that we believe are the most reliable of those we have received, based on our own analyses and conclusions. In this regard, the two life expectancy estimates we ultimately choose to average may not always be the most conservative. If in the future our we believe our business model will benefit from changes in our underwriting process and are permitted under our borrowing covenants, we may change our underwriting processes and policies, including our present policy under which we generally obtain two life expectancy estimates from independent third-party medical-actuarial firms (other than for small face policies).

By combining the optimized premiums and the insured's life expectancy estimate within the MAPS software, we generate detailed information, including the expected mortality curve over the insured's total projected lifespan; the expected premiums and related costs over the insured's total projected lifespan; the expected policy benefit paid over the insured's total projected lifespan; the account values within the policy; and the expected internal rate of return we will achieve at various investment amounts. From this information set, we are able to calculate the present value of the life insurance policy by discounting the anticipated cash flows at the sought for internal rate of return using the probabilistic pricing methodology employed by the MAPS program. The value of the life insurance policy asset is the present value of the policy's cash flows discounted at an expected internal rate of return. We expect that we will realize an operating profit as long as we are able to invest and service life insurance policies that generate yields in excess of our borrowing and operating costs.

On January 22, 2013, one of the independent medical-actuarial underwriting firms we utilize, 21st Services, announced advancements in its underwriting methodology, resulting in revised estimated life expectancy mortality tables for life settlement transactions. We were advised by 21st Services that the changes are very granular and relate to both specific medical conditions and lifestyles of insureds. These changes resulted from the application of additional medical information gathered by 21st Services over a period of time. While we do not believe these revised methodologies indicate the previous estimated life expectancies were inaccurate, we believe the revised methodologies provide additional information that should be considered in updating our estimate of the life expectancies of the insureds within our portfolio. Based upon our evaluation and analysis of data made available by 21st Services, as well as information regarding the insureds within our portfolio, we have estimated the impact of the changes in 21st Services' methodologies for determining life expectancies on a policy-by-policy basis within our portfolio as of December 31, 2012 and applied such changes to the life expectancy inputs used to estimate fair value. We have adjusted the original life expectancies provided by 21st Services based on four factors, the impact of each analyzed individually for

Table of Contents

each insured in the GWG portfolio. The four factors are gender, anti-selection, age, and primary impairment. GWG applied this set of adjustments to all 21st Services life expectancy reports used in valuation of the portfolio as of December 31, 2012. At that time, the portfolio contained 211 policies on 194 insured lives. Of those 211 policies, 199 were valued using a 21st Services life expectancy report as part of the pricing life expectancy estimate calculation. While the analysis and adjustments were applied on an individual policy basis, the result was an average overall increase in the original life expectancy estimates of 8.67%. We have a standard practice of obtaining two third-party life expectancy estimates for each policy in our portfolio. As a result, the effective change in life expectancy on the portfolio as of December 31, 2012 was an average of approximately 4.33%, which resulted in an aggregate decrease in the fair value of our life settlements portfolio of \$12.4

million as of December 31, 2012. Life expectancy reports by their very nature are estimates.

During 2013, we sought to update our life expectancy estimates from all four of the major independent third-party medical-actuarial underwriting firms (including 21st Services) with updated medical records on all of the 211 policies we originally used a life expectancy report from 21st Services. As of December 31, 2013, we had successfully procured new life expectancy reports on 176 of the 211 policies owned as of December 31, 2012. We experienced ten mortalities in 2013 for which no updated life expectancy reports were necessary. We also had two small face policies in our portfolio for which we did not update life expectancy reports. Accordingly, as of December 31, 2013 we had updated our life expectancy estimates based on updated life expectancy reports on all but 22 policies (covering 21 people) in our portfolio that we are still seeking to update.

In order to assess the reasonableness of our adjustments made effective December 31, 2012, we compared the life expectancy estimates including any adjustments used on December 31, 2012 to the updated life expectancy estimates used on December 31, 2013. Because an additional year has elapsed since the December 31, 2012 date, the older set of adjusted life expectancy estimates were rolled down to shorter numbers based on an actuarial calculation to make them comparable to the updated life expectancy estimates used on December 31, 2013. The average amount of roll down to account for the 12-month passage of time was eight and one-half months. We concluded that our the adjustments we made a year ago were reasonable when we the compared the rolled down life expectancy estimates from December 31, 2012 to the updated life expectancy estimates on December 31, 2013. The average rolled down life expectancy estimate from December 31, 2012 is 80.9 months. The average updated life expectancy estimate obtained from updated life expectancy reports as of December 31, 2013 is 79.4 months, shorter by one and one-half months. We see no need to make any further adjustments to our life expectancy estimates at this time.

Portfolio Administration

We have developed a comprehensive administration and servicing platform to manage the life insurance assets we own. This allows us to safeguard our life insurance assets and to process and report on the assets in our portfolio. We regularly contact each insurance company on every policy we own to verify policy account values, confirm the correct application of premium payments made, and the resulting account values inside the life insurance policy after application of the premium payment and the deduction of the cost of insurance. We typically maintain little account value inside the policy and seek to make only minimum premium payments necessary to keep the life insurance policy in force until the next scheduled premium payment.

In addition to policy servicing, we monitor insureds by periodically contacting them directly, or their appointed representatives, to confirm their location and health status. We monitor the social security database for mortalities as well as online obituary databases. When we are notified of an insured's mortality, we are required to obtain a copy of the death certificate and present it to the life insurance company for payment of the face value of the policy benefit.

Table of Contents

Portfolio Management

We realize profits by earning a spread between our investment cost in our life insurance assets and the face value of the policy benefits that will be paid upon the insured's mortality. We believe that building and managing a profitable portfolio of life insurance policies is complex, requires considerable technical knowledge and resources, and is subject to numerous regulations. We have developed extensive experience and disciplines to work toward a stable and profitable portfolio. We update our actuarial projections each month for the portfolio based on the life expectancy estimates, premium payments made, and mortalities experienced. These data points combine to provide us with future forecasted cash flows with respect to our portfolio of life insurance assets. These forecasted future cash flows, along with our current financial position, are combined in a comprehensive model that includes detailed assumptions as to interest rates, financing costs, life insurance asset acquisitions, and capital markets activities. This comprehensive financial model enables us to closely monitor and manage our necessary capital reserves and attempt to project our future profitability.

While we believe our portfolio of life insurance assets represents a balanced and stable portfolio of life insurance assets, we seek to grow the size of the portfolio in order to further mitigate risk and improve our profitability. In order to assess the stability of our portfolio, we analyze longevity risk, which is the risk of the insured living longer than his/her life expectancy estimate. Longevity risk is the single largest variable affecting the returns on an investment in life insurance assets and the ability to predict the portfolio's value over time. Research by A.M. Best and others indicates that, as the number of insured lives increase within a portfolio of life insurance policies, there is a decrease in the standard deviation of the value of the portfolio i.e., the stability of longevity risk increases with an increase in the number of insured lives. While Standard & Poor's has indicated that statistical credibility is unlikely to be achieved with a pool of less than 1,000 lives, a study published in 2014 by A.M.

Best concluded that at least 300 lives are necessary to narrow the band of expected cash flow volatility using the Monte Carlo simulations, which is the same methodology we use to evaluate our portfolios. Our internal analysis of our portfolio, which as of March 31, 2014 consisted of 256 lives, resulted in a standard deviation that is comparable with the A.M. Best measurement for a portfolio of 200 lives. We believe this result is due to the specific portfolio make up of our portfolio relative to the variation in underlying life expectancy estimates. Further, A.M. Best suggests that no one life should comprise more than 3.33% of the face value of an entire portfolio or collateral pool. As of March 31, 2014, the largest face value policy on one life in our portfolio represented approximately 1.30% of the total portfolio. We intend to maintain a well-diversified portfolio as we continue to expand our investments in life insurance assets.

We also believe our portfolio represents a profitable portfolio. In order to assess the profitability, we analyze the future cash flows expected from our portfolio of life insurance assets. The standard practice within the insurance industry is to analyze the timing of uncertain future cash flows through stochastic modeling, or Monte Carlo simulations. We continue to analyze the expected internal rates of return and spread against borrowing costs represented by our portfolio. As of December 31, 2013, the expected internal rate of return on our portfolio of life insurance assets was 12.21% and our weighted-average borrowing costs to finance our portfolio was 7.20%.

Portfolio Credit Risk Management

The life insurance assets that we invest in represent obligations of third-party life insurance companies to pay the benefits under the relevant policy. Because we finance life insurance policies, we rely on the payments from the face value of policy benefits from life insurance companies for revenue collections. We rely on the face value of the life insurance policy benefit at maturity as the exclusive form of payment.

The possible insolvency or loss by a life insurance company is a significant risk to our business. To manage this risk, we seek to invest in life insurance assets that are issued by insurance companies with investment-grade ratings from either A.M. Best, Moody's or Standard & Poor's. To further mitigate risk, we seek to limit the face value of policy benefits issued by any one life insurance company within the total portfolio to 20%. State guaranty funds generally guaranty policy benefits up to \$200,000. In addition, to assure diversity and stability in our portfolio, we regularly review the various metrics of our portfolio relating

Table of Contents

to credit risk. We track industry rating agency reports and industry journals and articles in order to gain insight into possible financial problems of life insurance companies. Recently, some of the credit ratings on insurance companies were downgraded and we will no longer consider purchasing policies issued by these insurance companies. Finally, we will only invest in those life insurance policies that meet the underwriting standards established in the indenture governing the Series L Bonds.

As of March 31, 2014, 97.60% of insurance companies in our portfolio hold an investment-grade rating by Standard & Poor's (BBB- or better), and the face value of policy benefits issued by one life insurance company within the portfolio was 15.98%. Of the 44 insurance companies that insure the policies we own, ten companies insure approximately 72.95% of total face value of insurance benefits and the remaining 34 insurance companies insure the remaining approximately 27.05% of total face value of insurance benefits. The concentration risk of our ten largest insurance company holdings as of March 31, 2014 is set forth in the table below.

Rank	Policy Benefits	Percentage of Policy Benefit Amt.	Insurance Company	Ins. Co. S&P Rating

Servicing Agents

We have contracted with Wells Fargo Bank to provide servicing, collateral agent, and trustee services with respect to certain life insurance policies owned by DLP Funding II. We have contracted with Bank of Utah to provide servicing, collateral agent, and trustee services with respect to all other life insurance policies we own. Wells Fargo Bank and Bank of Utah provide services for certain life insurance policies in connection with ownership and tracking of life insurance policies we own, including paying premiums, posting of payments (receipts) of the life insurance policies, certain monitoring, enforcement of rights and payer notifications, and related services. We reserve the right to service and provide collateral agent services for certain life insurance policies directly, or appoint additional third-party servicers in the future.

Competition

We encounter significant competition in the life insurance secondary market from numerous companies, including hedge funds, investment banks, secured lenders, specialty life insurance finance companies and life insurance companies themselves. Many of these competitors have greater financial and other resources than we do and may have significantly lower cost of funds because they have greater access to insured deposits or the capital markets. Moreover, some of these competitors have significant cash reserves and can better fund shortfalls in collections that might have a more pronounced impact on companies such as ours. They also have greater market share. In the event that the life insurance companies make a significant effort to compete against the business, we would experience significant challenges with our business model.

Competition can take many forms, including the pricing of the financing, transaction structuring, timeliness and responsiveness in processing a seller's application and customer service. Some of the competitors may outperform us in these areas. Some competitors target the same type of life insurance clients as we do and generally have operated in the markets we service for a longer period of time. Increased competition may result in increased costs of purchasing policies, or it may affect the availability and quality of policies that are available for our purchase. These factors could adversely affect our profitability by reducing our return on investment or increasing our risk.

Table of Contents

Government Regulation

The life insurance sector is highly regulated at both the federal and state levels. We are subject to federal and state regulation and supervision in the life insurance purchasing and finance business. There are significant regulations in many states that require us to obtain specific licenses or approvals to be able to purchase life insurance policies in those states. We continually research and monitor regulations and apply for the appropriate licenses in the required states.

Governments at both the federal and state levels have continued to review the impact of the business on the life insurance industry. Moreover, recent federal government actions with respect to insurance companies have increased the federal government's role in regulating the insurance industry. Recently we have seen legislative efforts by state governments to mandate the sale or liquidation of a life insurance policy as part of the Patient Protection and Affordable Care Act in order to increase the number of Americans covered by health insurance and decrease the cost of health care. The legislative effort is designed to monetize all assets of the insured prior to eligibility under the health care provided under the Patient Protection and Affordable Care Act. These efforts may affect the number of life insurance policies available for purchase and their attractiveness.

State statutes typically provide state regulatory agencies with significant powers to interpret, administer and enforce the laws relating to the purchase of life insurance policies in those states. Under statutory authority, state regulators have broad discretionary power and may impose new licensing requirements, interpret or enforce existing regulatory requirements in different ways or issue new administrative rules, even if not contained in state statutes. State regulators may also impose rules that are generally adverse to our industry. Because the life insurance secondary market is relatively new and because of the history of certain abuses in the industry, we believe it is likely that state regulation will increase and

grow more complex in the foreseeable future. We cannot, however, predict what any new regulation would specifically involve.

Any adverse change in present laws or regulations, or their interpretation, in one or more states in which we operate (or an aggregation of states in which we conduct a significant amount of business) could result in our curtailment or termination of operations in such jurisdictions, or cause us to modify our operations in a way that adversely affects our ultimate profitability. Any such action could have a corresponding material and negative impact on our results of operations and financial condition, primarily through a material decrease in revenues, and could also negatively affect our general business prospects.

Some states and the SEC have, on occasion, attempted to regulate the purchase of non-variable life insurance policies as transactions in securities under federal or state securities laws. In July 2010, the SEC issued a Staff Report of its Life Settlement Task Force. In that report, the Staff recommended that certain types of purchased life insurance policies be classified as securities. The SEC has not taken any position on the Staff Report, and there is no indication if the SEC will take or advocate for any action to implement the recommendations of the Staff Report. In addition, there have been several federal court cases in which transactions involving the purchase and fractionalization of life insurance contracts have been held to be transactions in securities under the federal Securities Act of 1933. We believe that the matters discussed in the Staff Report, and existing case law, do not impact our current business model since our purchases of life settlements are distinguishable from those cases that have been held by courts, and advocated by the Staff Report, to be transactions in securities. For example, we are not involved in fractionalization of any life insurance policies, and we do not purchase variable life insurance policies.

If federal law were to change, whether by action of the Congress or through the courts, with the result that purchases of non-fractionalized and non-variable life insurance policies would be considered transactions in securities, we would be in violation of existing covenants under our revolving credit facility requiring us to not be an investment company under the Investment Company Act of 1940. This could in the short-term or long-term affect our liquidity and increase our cost of capital and operational expenses, all of which would adversely affect our operating results. It is possible that such an outcome could threaten the viability of our business and our ability to satisfy our obligations as they come due.

Table of Contents

With respect to state securities laws, almost all states currently treat the sale of a life insurance policy as a securities transaction under state laws, although some states exclude from the definition of a security the original sale from the insured or the policy owner to the life settlement provider. To date, due to the manner in which we conduct and structure our activities and the availability, in certain instances, of exceptions and exemptions under securities laws, such laws have not adversely impacted our business model.

State Life Settlement License Requirements

State laws differ as to the extent to which purchasers of life insurance policies are required to be licensed by a state regulatory agency. We may elect to conduct life insurance policy purchasing only in those states in which we are licensed or where no licensure is required. The licensing requirements differ from state to state, but where they exist, they typically require the payment of licensing fees, periodic reporting, and submission to audit by state regulators. We do not intend to purchase any life insurance policies in any states that require a license or similar qualification without first obtaining such license or qualification or purchasing through a licensed provider in that state.

The table below identifies all states (and the District of Columbia) in which we can conduct business directly with the seller of a life insurance policy or through a licensed provider. An asterisk (*) indicates that the state does not require licensing. In those states identified in the right-hand column, we can purchase policies through our provider relationships with Magna Administrative Services, Inc. Abacus Settlements, LLC, and Lotus Life, LLC. If our relationships with either Magna Administrative Services, Abacus Settlements or Lotus Life were to end, for any reason, we believe we would be able to replace that relationship quickly.

We are not presently able to conduct business in the following states due to the fact that we neither have a license to operate in that state nor do we have a relationship with another licensed provider in that state: Alaska, Hawaii, Idaho, Montana, New Hampshire, North Dakota, Vermont, and West Virginia.

Health Insurance Portability and Accountability Act (HIPAA)

HIPAA requires that holders of medical records maintain such records and implement procedures in ways designed to assure the privacy of patient records. HIPAA has precipitated widespread changes in record keeping, including patient consent forms and access restrictions in data processing software. In order to carry out the business, we receive medical records and obtain a release to share such records with a defined group of persons. We are entitled to have access to patient information, take on the responsibility for preserving the privacy of that information, and use the information only for purposes related to the life insurance policies.

Regulatory Matters

We have been informed that the SEC is conducting a private investigation of our company and its offering of Renewable Secured Debentures. The SEC has advised us in writing that the investigation is a fact-finding inquiry and does not mean the SEC has concluded that we, or anyone else, have violated any laws or regulations. Also, the SEC has advised us in writing that the investigation does not mean that they have a negative opinion of any person, entity or security. The SEC has not informed us of any intent on its part to stop order our registration statement; it has not asked us to modify our registration statement in any way; and it has not stated that it has found the registration statement to be deficient in any respect. We are fully cooperating with this investigation.

Employees

We employ approximately 40 employees.

Properties

Our principal executive offices are located at 220 South Sixth Street, Suite 1200, Minneapolis, Minnesota 55402. At that location, we lease 11,695 square feet of space for a lease term expiring in August 2015. We believe that these facilities are adequate for our current needs and that suitable additional space will be available as needed.

Legal Proceedings

Our Chief Executive Officer, Jon R. Sabes and President and Secretary, Steven F. Sabes, who together beneficially own approximately 94.7% of our common stock, are subject to litigation relating to claims by a bankruptcy trustee for loan payments made to an affiliate, Opportunity Finance, LLC. Such payments may ultimately be deemed to be avoidable transfers under preference or other legal theories. Case No. 08-45257 (U.S. Bankruptcy Court District of Minnesota). In addition, GWG Holdings invested \$1 million in

Table of Contents

Opportunity Finance, LLC in 2006 and was repaid and received \$176,948 of interest income from that investment in 2007. To date, no claim has been made against us.

While we believe there are numerous meritorious defenses to the claims made by the bankruptcy trustee, and we are advised that the defendants in that action will vigorously defend against the trustee's claims, such defendants may not prevail in the litigation with the bankruptcy trustee. If the bankruptcy trustee sought to sell or transfer the equity interests of Jon R. Sabes or Steven F. Sabes as a result of the litigation, there could be a change in control of the Company and our business together with all of our investors, including investors in our Series L Bonds, could be materially and adversely impacted. Such adverse results would likely arise in connection with negative change-in-control covenants contained in our revolving credit facility agreements, the breach of those covenants and an ensuing event of default under such facility. In addition, if the bankruptcy trustee sought to sell or transfer the equity interests of Jon R. Sabes or Steven F. Sabes as a result of the litigation, such transfers would adversely affect holders of our Series L Bonds by reducing the number of shares of common stock of GWG Holdings that have been pledged as collateral security for our obligations under those securities. Finally, regardless of the outcome of this litigation, these matters are likely to distract management and reduce the time and attention that they are able to devote to our business.

Table of Contents**MANAGEMENT AND DIRECTORS****Directors and Executive Officers**

The name, age and positions of our current executive officers and directors are as follows:

Name	Age	Positions
Jon R. Sabes	47	Chief Executive Officer and Director
Paul A. Siegert	75	Director (Executive Chairman)
Steven F. Sabes	45	President, Secretary and Director
William Acheson	49	Chief Financial Officer
Jon Gangelhoff	56	Chief Operating Officer
Jeffrey L. McGregor	60	Director
Charles H. Maguire III	71	Director
David H. Abramson	73	Director
Shawn R. Gensch	45	Director

Jon R. Sabes, co-founder and Chief Executive Officer of our company, is a financial professional with over 20 years of experience in the fields of finance, venture capital, business development, managerial operations, and federal taxation. Since 1999, Mr. Sabes has served as Chief Executive Officer of Opportunity Finance, LLC, a family investment company specializing in structured finance. Over his career, Mr. Sabes has been active in receivable financing, life insurance financing, and casualty insurance financing, structuring over \$900 million in financing commitments for his related businesses. Mr. Sabes' experience includes co-founding and leading the development of two leading insurance-related finance companies: GWG Life, a company in the life insurance finance industry founded in 2006, and MedFinance, an innovator in casualty insurance and healthcare finance founded in 2005. Through these companies, Mr. Sabes has developed and applied financial structuring techniques, underwriting algorithms, and business modeling aspects to the insurance industry. Mr. Sabes' education includes a Juris Doctor degree cum laude from the University of Minnesota Law School; and a Bachelor of Arts degree in Economics, from the University of Colorado. Over his career, Mr. Sabes has held several licenses and professional association memberships including FINRA Series 7, Series 63, Minnesota State Bar Association, and American Bar Association. In addition to being an active father of three, Mr. Sabes serves on the boards of Saving Children and Building Families, and the Insurance Studies Institute. Mr. Sabes is the brother of Steven F. Sabes. Mr. Sabes has served as our Chief Executive Officer, and a director, since 2006.

Paul A. Siegert, co-founder of our company, has over 50 years of experience in national and international business with focus on general business, financial and investment strategies, management practices, fiscal controls, profit incentives, systems and corporate structuring and governance. Over his career, Mr. Siegert has consulted to Fortune 500 corporations, regional firms, emerging businesses, government and education, and has served as director, general partner and advisor to partnerships and corporations, including restructuring of economically troubled businesses. Mr. Siegert has provided written testimony to the Senate Finance Committee regarding SEC practices and created two companies registered under the Investment Advisors Act of 1940. Mr. Siegert was an active participant in the formation and direction of the Colorado Institute for Artificial Intelligence at the University of Colorado. Mr. Siegert's education includes studies toward a Master of Business Administration, University of Chicago; and Bachelor of Science and Industrial Management, Purdue University. His insurance-related experiences include the creation of one of the nation's first employer self-funded life, medical and disability insurance programs; designing medical, life insurance and social security opt-out programs for educational institutions; incorporation of financial analysis disciplines in life insurance and estate planning; and strategizing of key-man insurance plans and life insurance in business continuation planning for corporations and senior executives. From 1979 to 1986, Mr. Siegert was nationally recognized as a tax and estate planning expert. In 1999, Mr. Siegert retired from active business to engage in various personal financial and investment endeavors. In 2004, he founded Great West Growth, LLC, a Nevada limited liability company and a predecessor to GWG Life, to purchase life insurance policies. In his capacities with GWG Life, he created an insurance policy valuation and pricing model, created life insurance policy purchase documentation, undertook state licensing and compliance and developed operating and

marketing systems. Mr. Siegert currently serves as the President and Chief Executive Officer of the Insurance Studies Institute, which he founded in 2007, and also serves on the Board of Directors of the Life Insurance Settlement Association. Mr. Siegert currently serves as Director and Executive Chairman of the Board of GWG Holdings, Inc., and served as its President until May 30, 2014. He has been active in a variety of charities and foundations, including Rotary International.

Steven F. Sabes, co-founder and President and Secretary of our company, is responsible for various managerial aspects of our business, with a specific focus on treasury and financial operations, life insurance policy purchasing, and specialty finance operations. Since 1998, Mr. Sabes has served as a Managing Director of Opportunity Finance, LLC, a family investment company specializing in structured finance. Mr. Sabes holds a Master of Science and Doctor of Philosophy in organic chemistry from the University of Minnesota, as well as a Bachelor of Arts degree from The Colorado College. Mr. Sabes is the brother of Jon Sabes. Mr. Sabes has served as our Secretary, and a director, since 2006. He also served as our Chief Operating Officer from 2006 until May 30, 2014, when he was appointed as our President.

William Acheson became our Chief Financial Officer on May 30, 2014. Prior to joining us, Mr. Acheson served as Chief Financial Officer and Senior Vice President of Strategic Development for The Homeownership Preservation Foundation, a residential real estate foreclosure prevention organization seeded by GMAC, from 2009 through 2013. Prior to that, Mr. Acheson served as Managing Director of Global Structured Finance and Investments at Merrill Lynch in London, England, from 2007 through 2008. From 1991 to 2007, Mr. Acheson spent his career at GMAC-RESCAP, where he served as Managing Director for a number of business units, concluding his career as Chief Financial Officer of the United Kingdom division from 2005 through 2007. Mr. Acheson earned a Bachelor of Science degree in accounting from the College of St. Thomas in St. Paul, Minnesota, and earned his Certified Public Accountant certificate in 1991 while working for Ernst & Young in Minneapolis, Minnesota.

Jon Gangelhoff, our Chief Operating Officer, served rapidly growing businesses in several industries as chief financial officer with a strong focus on business operations since 1986. Prior to joining our company as Chief Financial Officer in March 2009, he served as chief financial officer for Northern Metal Recycling, a metal recycling firm the sales of which exceeded \$500 million annually, from 2006 to 2008. Mr. Gangelhoff's responsibilities at Northern Metal Recycling included acquisition and related integration operations focused on finance, information systems, and human resources functions. Prior to that, from 2003 to 2006, Mr. Gangelhoff served as the chief financial officer of Kuhlman Company, formerly a public reporting company, where he established corporate infrastructure, developed financial reporting and internal control systems, and managed the SEC reporting process. During his 25-year career, Mr. Gangelhoff has used an integrated hands-on and financial management approach to improve the performance of the companies he served in a variety of industries. Mr. Gangelhoff holds a Bachelor of Arts degree from Mankato State University. Mr. Gangelhoff was appointed as our Chief Operating Officer on May 30, 2014.

Jeffrey L. McGregor has had an extensive career in the insurance and financial services industry, serving as President for three major financial sales and distribution companies. Mr. McGregor has 34 years of experience in sales, distribution strategies and leadership with a proven track record in sales and growth of annuity, life insurance, and mutual fund products. Mr. McGregor has been a quoted industry source for Ignites, Foxfire, Dalbar, Mutual Fund Forum and Investment News, and has served on numerous industry boards and associations, including the Life and Annuity Advisory Board, the Mutual Fund Forum, and the International Association for Financial Planning. Mr. McGregor has written, published and presented a number of papers focused on the insurance and financial industry. Throughout his career, Mr. McGregor's primary focus has been to promote successful collaboration with employees, clients and colleagues to create respectful, profitable, and long-term relationships.

Mr. McGregor has lead teams that represented all traditional life insurance products term, whole life, universal life, disability insurance, long-term care, along with high-net worth and estate planning strategies that maximize the protection and tax advantages that life insurance products provide. Mr. McGregor has worked closely with product development teams in determining the risk and required sales results necessary to meet profitability targets. Mr. McGregor professional career encompasses the oversight and creation of

Table of Contents

marketing, sales presentations and advisor/only materials, seeking a balanced approach to the risks and rewards of the insurance, annuity and asset management products offered.

From 2005 to 2010, Mr. McGregor served as the President of RiverSource Distributors and Senior Vice President of Ameriprise Financial, Inc. During his tenure as the President of RiverSource Distributors, he was responsible for the sales and distribution of all insurance, annuity and asset management product lines of Ameriprise through existing and new channels. In this position, Mr. McGregor identified and greatly

influenced strategy, compliance, profitability and the success of multiple insurance and investment products offered by Ameriprise.

From 2001 to 2004, Mr. McGregor was President of AXA Distributors, where he was responsible for the sales and distribution of insurance and annuity products manufactured by AXA Financial. In 2003, Mr. McGregor's sales team achieved annuity sales of \$7.0 billion. This record sales year resulted in AXA Distributors' market share position going from number six in 2002 to number two in 2003.

From 1988 to 1998, Mr. McGregor served in a variety of senior leadership positions for Colonial Investment Services. Mr. McGregor was named President of Colonial Investment Services in 1990 and joined Colonial's Board of Directors. During his tenure, assets under management grew from \$9.0 billion to \$24.0 billion. During Mr. McGregor's leadership, Colonial earned a number one rating in wholesaler and marketing support three times, according to Dalbar Survey.

Over his career, Mr. McGregor has also worked with American Capital, Prudential-Bache Securities, Planco and IDS, where he began his career as a financial advisor in 1978. Mr. McGregor has earned numerous industry degrees and certifications, including LUTC CFP, CLU, and NASD licenses Series 7 and 24. Mr. McGregor received his B.S. and M.B.A. from California Coast University. In 2012, Mr. McGregor authored a life experience and motivational book "A Spirit Never Tires" which echoes his results driven style to inspire others through passion, energy, courage and a positive attitude.

Charles H. Maguire III, a registered FINRA Arbitrator, has over 35 years of experience in the financial services industry. The core of Mr. Maguire's career has been with Merrill Lynch and Company from 1969 to 2004. In one of his last positions with Merrill Lynch, Mr. Maguire served as Director of Financial Institutions Services Group, where he had complete responsibility for the Merrill Lynch's institutional client services within its domestic branch office system. In addition, Mr. Maguire oversaw the professional teams responsible for product creation and had oversight of an institutional trading desk in New York City. Mr. Maguire's most notable contribution to Merrill Lynch was the creation of the Consults Product, which to this day is one of the most profitable products at Merrill Lynch. In addition to serving as Director of Financial Institutions Services Group, Mr. Maguire held a variety of sales and management roles at Merrill Lynch, including Sales Manager, Resident Vice President, Regional Sales Manager, Senior Resident Vice President, and Managing Director.

From 2009 to 2011, Mr. Maguire served as a leadership consultant for the University of Cincinnati School of Medicine and the Economic Center, University of Cincinnati. From 2005 to 2007, Mr. Maguire also served as the Senior Advisor on Staff to the Governor of the State of South Carolina, the Director of Cabinet Affairs, and the Chief of Staff of the Department of Commerce for the State of South Carolina. During his tenure as Director of Cabinet Affairs for the Governor of the State of Carolina, Mr. Maguire was fully responsible for overseeing the operations of all agencies that reported to the Governor of South Carolina. In his role as Chief of Staff of the South Carolina Department of Commerce, Mr. Maguire was responsible for the daily operations of the Department of Commerce. During his tenure with the Department of Commerce, Mr. Maguire led the restructuring of the Department of Commerce, which led to South Carolina becoming one of the top three states for job creation and corporate relocations.

Mr. Maguire has served on the boards (or similar functions) of over 25 nonprofit organizations, including services as a trustee for Centre College, trustee for The Seven Hills School, member of the Charter Review Committee of Cincinnati, trustee for the Queen City Foundation, trustee and executive committee member for St. Elizabeth Medical Center, and President for the Joy Outdoor Education Center. Mr. Maguire holds a B.A. from Centre College.

Table of Contents

David H. Abramson, a certified public accountant, is presently the Chairman and Chief Executive Officer of David Abramson & Associates, LLC, an executive search and leadership development and financial consulting firm that he founded in 2002. The firm provides retained executive search services at the senior leadership levels as well as senior leadership mentoring and coaching. In addition, the firm provides financial and other consulting services to clients.

In 2001, Mr. Abramson was a Senior Vice President of AXA Financial/Equitable Life Insurance based in New York City, and served as Chairman and Chief Executive Officer of Grant Thornton Advisors, a joint venture of AXA Financial and Grant Thornton. Required by his responsibility, Mr. Abramson held NASD series 7, 24 and 66 licenses during his tenure at Grant Thornton Advisors. From 1999 to 2001 Mr. Abramson was Grant Thornton's National Managing Partner of Financial Advisory Services where he led the design of the vision, strategy, governance and operational planning for Grant Thornton Advisors. Grant Thornton Advisors was designed to offer personal financial and estate planning, and investment and insurance products and services to middle-market companies, their owners and officers and other high net worth individuals.

Edgar Filing: GWG Holdings, Inc. - Form S-1

The core of Mr. Abramson's career was as a Partner in Grant Thornton from 1972 until 2001. In 1972, Mr. Abramson became an Audit Partner and the Minneapolis Office Managing Partner, and he continued serving in those roles throughout most of his time at Grant Thornton. Mr. Abramson also became a member of Grant Thornton's National Senior Leadership Team in 1982 and continued in that role until 2001. In this regard, his primary responsibility was Regional Managing Partner with direct line responsibility over assigned operating offices throughout the country. From 1988 to 1990, Mr. Abramson was Grant Thornton's National Managing Director of Client Services directly responsible for Accounting, Tax, Management Consulting, Human Resources, Marketing and Strategic Planning. During the 1990s, Mr. Abramson also led the development and implementation of the Manufacturing/Distribution Services practice. Mr. Abramson's partners at Grant Thornton elected him to serve on Grant Thornton's 11-person Partnership Board for three terms from 1982 to 1990. This board provided oversight and direction related to governance, partner admission and compensation, financial and strategic issues.

Mr. Abramson previously served on the Board of Directors of Southwest Casino Corporation, and served as Chairman of that board's Audit Committee and a member of its Governance and Nominating Committee from 2006 to 2009. Mr. Abramson has also served as a board member, Chairman or President of a number of nonprofit organizations, including President of the Minnesota Society of CPAs, Chairman of The Greater Minneapolis Chamber of Commerce, and President of Temple Israel. He currently is a Member of the University of Minnesota Carlson School Of Management Alumni Board, and an Advisory Board Member of the University of Minnesota Carlson Consulting Enterprise.

Mr. Abramson received his B.S. degree (Accounting) from the University of Minnesota and his M.B.A. from the University of Michigan.

Shawn R. Gensch is a financial and marketing executive with over 20 years of professional experience. Previously, Mr. Gensch was the Senior Vice President, Marketing, at Target Corporation, a role he held from 2012 through 2013, and in which he led, among other things, that corporation's media strategy, public relations, events and lifestyle marketing efforts. In previous marketing roles with Target, beginning in 2008, Mr. Gensch led brand marketing, storewide and seasonal campaigns, agency management, and marketing finance, production and technology teams. Prior to 2008, Marketing, Mr. Gensch served as the initial President of Target Bank (2003-2007), served as Vice President, Financial Product Design & Development, at Target Financial Services (2005-2008), and served as Director of New Business Development (2003-2005). Prior to joining Target Corporation in 2003, Mr. Gensch worked in various roles in the structured finance, insurance, banking and related consulting industries, including work as Vice President and Assistant Treasurer of Green Tree Financial Corporation (Conseco Finance), in which role he led that corporation's commercial paper program and asset-based funding conduits, syndicated banking lines and structured-finance securitization efforts across a variety of asset classes. Mr. Gensch began his career with KPMG as an Assurance Accountant in 1992.

Mr. Gensch presently serves as a director of Anser Innovation, a technology company developing Internet-based software and hardware to enhance remote interaction, and is currently also Vice-Chair of the

Table of Contents

Board of Directors of Avenues for Homeless Youth based in Minneapolis, Minnesota. He previously served on the Board of Directors of the Walker Art Center, Minneapolis, Minnesota. Mr. Gensch graduated from the University of Wisconsin-Eau Claire with a B.S. degree in accounting.

Director Qualifications, Independence and Board Committees

When considering whether directors have the experience, qualifications, attributes and skills to enable the Board of Directors to satisfy its oversight responsibilities effectively in light of the Company's business and structure, the Board of Directors focuses primarily on the information discussed in each of the directors' individual biographies set forth above. With regard to Mr. Jon R. Sabes, the board considered his significant experience, expertise and background with regard to financial matters, and his demonstrated experience and skills in managing the Company's business. With respect to Mr. Siegert, the board considered his significant experience in securities and finance, and his background in secondary life insurance market. With regard to Mr. Steven F. Sabes, the board considered his background and experience with the Company and its business. With regard to Mr. McGregor, the board considered his experience in the financial and insurance industries, and in particular his sales, marketing and leadership experience relative to those industries. In the case of Mr. Maguire, the board considered his extensive background in the financial services industry and service in various leadership positions for multiple organizations. With regard to Mr. Abramson, the board considered his extensive background and knowledge of accounting and finance, his focus on wealth management, and prior leadership positions. With regard to Mr. Gensch, the board considered his finance background as well as his marketing expertise.

The Board of Directors periodically reviews relationships that directors have with the Company to determine whether the directors are independent. Directors are considered independent as long as they do not accept any consulting, advisory or other compensatory fee (other than

director fees) from the Company, are not an affiliated person of the Company or its subsidiaries (e.g., an officer or a greater-than-ten-percent stockholder) and are independent within the meaning of applicable laws, regulations and the NASDAQ listing rules. In this latter regard, the Board of Directors uses the NASDAQ listing rules (specifically, Section 5605(a)(2) of such rules) as a benchmark for determining which, if any, of its directors are independent, solely in order to comply with applicable SEC disclosure rules.

The Board of Directors has determined that, of its current directors, Messrs. Abramson, McGregor, Maguire III and Gensch are independent within the meaning of the NASDAQ listing rule cited above. In the case of Mr. Siegert, his position as an executive officer of the Company precludes him from being considered independent. In the case of both Messrs. Jon R. and Steven F. Sabes, their positions as executive officers of the Company, together with their beneficial ownership of more than ten percent of the common stock of the Company, similarly precludes them from being considered independent within the meaning of the cited NASDAQ listing rule.

Our Board of Directors has an Audit Committee, Compensation Committee and Nomination and Corporate Governance Committee. The Audit Committee is composed of Messrs. Abramson (Chair), McGregor, Maguire and Gensch. The Compensation Committee is composed of Messrs. Maguire (Chair), Abramson and Gensch. The Nomination and Corporate Governance Committee is composed of Messrs. McGregor (Chair) and Abramson.

Our Audit Committee, Compensation Committee, and Nomination and Corporate Governance Committee each comply with the listing requirements of The NASDAQ Marketplace rules. At least one member of the Audit Committee, Mr. Abramson, is an audit committee financial expert, as that term is defined in Item 401(h)(2) of Regulation S-K, and is independent as that term is defined in Rule 5605(a) of the NASDAQ Marketplace Rules.

Indemnification of Directors and Executive Officers

Section 145 of the Delaware General Corporation Law provides for, under certain circumstances, the indemnification of our officers, directors, employees and agents against liabilities that they may incur in such capacities. A summary of the circumstances in which such indemnification provided for is contained herein,

Table of Contents

but that description is qualified in its entirety by reference to the relevant Section of the Delaware General Corporation Law.

In general, the statute provides that any director, officer, employee or agent of a corporation may be indemnified against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement, actually and reasonably incurred in a proceeding (including any civil, criminal, administrative or investigative proceeding) to which the individual was a party by reason of such status. Such indemnity may be provided if the indemnified person's actions resulting in the liabilities: (i) were taken in good faith; (ii) were reasonably believed to have been in or not opposed to our best interest; and (iii) with respect to any criminal action, such person had no reasonable cause to believe the actions were unlawful. Unless ordered by a court, indemnification generally may be awarded only after a determination of independent members of the Board of Directors or a committee thereof, by independent legal counsel or by vote of the stockholders that the applicable standard of conduct was met by the individual to be indemnified.

The statutory provisions further provide that to the extent a director, officer, employee or agent is wholly successful on the merits or otherwise in defense of any proceeding to which he was a party, he is entitled to receive indemnification against expenses, including attorneys' fees, actually and reasonably incurred in connection with the proceeding.

Indemnification in connection with a proceeding by or in the right of GWG Holdings, Inc. in which the director, officer, employee or agent is successful is permitted only with respect to expenses, including attorneys' fees actually and reasonably incurred in connection with the defense. In such actions, the person to be indemnified must have acted in good faith, in a manner believed to have been in our best interest and must not have been adjudged liable to us unless and only to the extent that the Court of Chancery or the court in which such action or suit was brought shall determine upon application that, despite the adjudication of liability, in view of all the circumstances of the case, such person is fairly and reasonably entitled to indemnity for such expense which the Court of Chancery or such other court shall deem proper. Indemnification is otherwise prohibited in connection with a proceeding brought on behalf of GWG Holdings, Inc. in which a director is adjudged liable to us, or in connection with any proceeding charging improper personal benefit to the director in which the director is adjudged liable for receipt of an improper personal benefit.

Edgar Filing: GWG Holdings, Inc. - Form S-1

Delaware law authorizes us to reimburse or pay reasonable expenses incurred by a director, officer, employee or agent in connection with a proceeding in advance of a final disposition of the matter. Such advances of expenses are permitted if the person furnishes to us a written agreement to repay such advances if it is determined that he is not entitled to be indemnified by us.

The statutory section cited above further specifies that any provisions for indemnification of or advances for expenses does not exclude other rights under our Certificate of Incorporation, corporate bylaws, resolutions of our stockholders or disinterested directors, or otherwise. These indemnification provisions continue for a person who has ceased to be a director, officer, employee or agent of the corporation and inure to the benefit of the heirs, executors and administrators of such persons.

The statutory provision cited above also grants the power to GWG Holdings, Inc. to purchase and maintain insurance policies that protect any director, officer, employee or agent against any liability asserted against or incurred by him in such capacity arising out of his status as such. Such policies may provide for indemnification whether or not the corporation would otherwise have the power to provide for it.

Article 6 of our corporate bylaws provides that we shall indemnify our directors, officers, employees and agents to the fullest extent permitted by the Delaware General Corporation Law. Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers or persons controlling GWG Holdings, Inc. pursuant to the foregoing provisions, we understand that in the opinion of the SEC such indemnification is against public policy as expressed in that Act and is therefore unenforceable.

We have purchased directors and officers liability insurance in order to limit the exposure to liability for indemnification of directors and officers, including liabilities under the Securities Act of 1933.

EXECUTIVE COMPENSATION AND RELATED-PARTY TRANSACTION DISCLOSURES

Summary Compensation Table

The following table sets forth the cash and non-cash compensation awarded to or earned by: (i) each individual who served as the principal executive officer and principal financial officer of GWG Holdings during the years ended December 31, 2013 and 2012; and (ii) each other individual that served as an executive officer of either GWG Holdings or GWG Life, Inc. at the conclusion of the years ended December 31, 2013 and 2012 and who received more than \$100,000 in the form of salary and bonus during such fiscal year. For purposes of this document, these individuals are collectively the named executives of the Company.

Name and Principal Position		Salary	Bonus (1)	All Other Compensation (2)	Total
Jon R. Sabes	2013	\$ 350,000	\$ 544,581	\$ 16,905	\$ 911,486
Chief Executive Officer	2012	\$ 350,000	\$ 163,182	\$ 0	\$ 513,182
Jon Gangelhoff	2013	\$ 120,000	\$ 57,276	\$ 13,244	\$ 190,520
Chief Financial Officer	2012	\$ 120,000	\$ 28,244	\$ 0	\$ 148,244
Paul A. Siegert	2013	\$ 150,000	\$ 54,236	\$ 2,631	\$ 206,867
President and Chairman of the Board	2012	\$ 150,000	\$ 113,967	\$ 0	\$ 263,967
Steven F. Sabes	2013	\$ 150,000	\$ 426,836	\$ 11,063	\$ 587,899
COO and Secretary	2012	\$ 150,000	\$ 35,591	\$ 0	\$ 185,591

Edgar Filing: GWG Holdings, Inc. - Form S-1

- (1) In 2013, Messrs. Jon R. Sabes, Steven F. Sabes, and Paul A. Siegert each received a discretionary bonus related to the tax impact of the conversion of the Company from a limited liability company to a corporation. In this regard, Mr. Jon R. Sabes received a discretionary tax-related bonus of \$436,700, Mr. Steven F. Sabes received a discretionary tax-related bonus of \$380,600, and Mr. Paul A. Siegert received a discretionary tax-related bonus of \$8,000. In addition, each named executive received a cash bonus under the Company's incentive compensation plan. Mr. Jon R. Sabes received a \$107,881 cash bonus, Mr. Gangelhoff received a \$57,276 cash bonus, Mr. Siegert received a \$46,236 cash bonus, and Mr. Steven F. Sabes received a \$46,236 cash bonus, under that incentive compensation plan.
- (2) All Other Compensation includes payment of unused and accrued vacation, and premiums paid by the Company that are reported on the named executives' W-2 forms as a component of gross income.

Employment Agreements and Change-in-Control Provisions

In June 2011, we entered into employment agreements with each of Messrs. Jon R. Sabes, Steven F. Sabes, Paul A. Siegert and Jon Gangelhoff. Mr. Jon R. Sabes is our Chief Executive Officer; Mr. Steven F. Sabes is our President and Secretary and previously served as our Chief Operating Officer; Mr. Siegert previously served as our President and Chairman of the Board and is currently the Executive Chairman of the Board; and Mr. Gangelhoff previously served as our Chief Financial Officer and is currently our Chief Operating Officer. On May 30, 2014, we entered into an employment agreement with William Acheson coincident with his appointment as our new Chief Financial Officer. These employment agreements establish key employment terms (including reporting responsibilities, base salary, discretionary and bonus opportunity and other benefits), provide for severance benefits in certain situations, and contain non-competition, non-solicitation and confidentiality covenants.

Under their respective employment agreements, Mr. Jon R. Sabes receives an annual base salary of \$350,000, Messrs. Steven F. Sabes, William Acheson and Paul A. Siegert receive an annual base salary of \$200,000, and Mr. Gangelhoff receives an annual base salary of \$250,000. The employment agreements contain customary provisions prohibiting the executives from soliciting our employees for a period of 12-18 months after any termination of employment, and from competing with the Company for either two years (if

85

Table of Contents

the executive is terminated for good cause or if he resigns without good reason) or one year (if we terminate the executive's employment without good cause or if he resigns with good reason). In the case of Mr. Acheson, his employment agreement prohibits him from competing against the Company for a one-year period after his termination of employment, regardless of the circumstances relating to that termination. If an executive's employment is terminated by us without good cause or if the executive voluntarily resigns with good reason, then the executive will be entitled to (i) severance pay for a period of 12 months and (ii) reimbursement for health insurance premiums for his family if he elects continued coverage under COBRA.

The employment agreements for Messrs. Jon R. Sabes, Steve F. Sabes and Paul A. Siegert also provide that we will reimburse them for any legal costs they incur in enforcing their rights under the employment agreement and, to the fullest extent permitted by applicable law, indemnify them for claims, costs and expenses arising in connection with their employment, regardless of the outcome of any such legal contest, as well as interest at the prime rate on any payments under the employment agreements that are determined to be past due, unless prohibited by law.

All of the executive employment agreements include a provision allowing us to reduce their severance payments and any other payments to which the executive becomes entitled as a result of our change in control to the extent needed for the executive to avoid paying an excise tax under Code Section 280G, unless the named executive officer is better off, on an after-tax basis, receiving the full amount of such payments and paying the excise taxes due.

Outstanding Equity Awards at Fiscal Year End

As of December 31, 2013, our named executives had the following outstanding options to purchase common stock:

Vested Shares	Un-Vested Shares	Total Shares
_____	_____	_____

	Vested Shares	Un-Vested Shares	Total Shares
Jon R. Sabes		6,000	6,000
Steven F. Sabes	25,000	2,500	27,500
Paul Siegert	25,000	2,500	27,500
Jon Gangelhoff	50,000	26,000	77,000
	100,000	38,000	138,000

2013 Stock Incentive Plan

In April 2013, our Board of Directors and our stockholders adopted the 2013 Stock Incentive Plan and reserved 1,000,000 shares of common stock for issuance under that plan. The 2013 Stock Incentive Plan permits the grant of both incentive and non-statutory stock options. As of the date of this prospectus, there are 373,250 common shares issuable upon exercise of outstanding incentives granted under the plan. The Board of Directors adopted the 2013 Stock Incentive Plan to provide a means by which our employees, directors, officers and consultants may be granted an opportunity to purchase our common stock, to assist in retaining the services of such persons, to secure and retain the services of persons capable of filling such positions and to provide incentives for such persons to exert maximum efforts for our success.

Related-Party Transactions

As explained above under Employment Agreements and Change-in-Control Provisions, we were party to an arrangement with each of Jon R. Sabes, Paul A. Siegert and Steven F. Sabes whereby those individuals received loan advances that accrued interest at rates ranging from 4.2% to 5.0% per annum. Under this arrangement, made during the time when GWG Holdings was a limited liability company, these advance amounts were to be repaid upon or in connection with operating distributions made by us. From inception through June 13, 2011, advances aggregating approximately \$981,167 were made to Jon R. Sabes with cumulative interest owed of \$114,496, \$287,500 to Paul A. Siegert with cumulative interest owed of \$22,708, and \$861,976 were made to Steven F. Sabes with cumulative interest owed of \$94,438. On July 27, 2011, Messrs. Jon R. Sabes, Steven F. Sabes and Paul A. Siegert repaid their loan balances.

Table of Contents

In May 2008, our affiliate, Insurance Strategies Fund, LLC, a Delaware limited liability company beneficially owned by Mr. Jon R. Sabes, our Chief Executive Officer, agreed to make discretionary unsecured general working capital loans to GWG Holdings for short-term working capital needs. As of December 31, 2013 and 2012, we owed no amounts to Insurance Strategies Fund. Nevertheless, an Amended and Restated Investment Agreement with Insurance Strategies Fund, dated as of September 3, 2009, remains in place. That agreement permits Insurance Strategies Fund to make additional discretionary unsecured short-term work capital loans in the future.

Effective July 14, 2008, we entered into an Addendum No. 1 to Sub-Sublease Agreement with Opportunity Finance, LLC, a limited liability company of which Jon R. Sabes, our Chief Executive Officer, also serves as Chief Executive Officer. Pursuant to the Addendum, Opportunity Finance, LLC assigned to us, and we assumed, all of Opportunity Finance's rights and obligations under a Sub-Sublease Agreement between Opportunity Finance and an unrelated third party. The Sub-Sublease Agreement relates to the facilities in which we conduct our business operations. Under the Sub-Sublease Agreement, as assigned, we assumed the obligation to make monthly payments of base rent that range from \$7,310 (from the commencement date through July 31, 2009) to \$8,770 (for the period from August 1, 2011 through the April 20, 2012 expiration of the Sub-Sublease Agreement). In addition, the Sub-Sublease Agreement, as assigned, requires that we pay additional monthly amounts in respect of operating costs as additional rent. We made aggregate payments under the Sub-Sublease Agreement of \$0 and \$50,000 for the calendar years ended December 31, 2013 and 2012, respectively.

On July 11, 2011, we entered into a Purchase and Sale Agreement with Athena Securities Group, Ltd. and Athena Structured Funds PLC. Under this agreement, we issued to Athena Securities Group, Ltd. (Athena) 494,500 shares of common stock, which was equal to 9.9% of our then-outstanding shares, in exchange for shares equal to 9.9% of the outstanding shares in Athena Structured Funds, PLC and cash of \$5,000. This 2011 agreement had contemplated cooperative efforts by the parties aimed at developing a security and related offering in Europe or Ireland, the proceeds of which would be used to finance the acquisition of life-insurance related assets in the United States. In 2013, we sought to terminate the 2011 agreement due to a changing regulatory environment in Europe that negatively affected the likelihood of consummating the contemplated offering of securities, and our dissatisfaction with Athena's performance under the 2011 agreement. As a result, in June 2013

we entered into a second Purchase and Sale Agreement with Athena Securities Ltd. and Athena. This agreement effected the termination of the 2011 agreement. The June 2013 agreement contained mutual general releases of claims and substantially unwound certain capital stock transactions that had been effected under the 2011 agreement. In particular, Athena returned to us for redemption 432,500 shares of our common stock, and retained 62,000 common shares in recognition of their earlier efforts under the 2011 agreement. For our part, we sold back to Athena all of our ownership in Athena Structured Funds, PLC that we had originally acquired under the 2011 agreement. Presently, we have no ongoing business relationship with Athena.

Related-Party Transaction Policy

In all cases, we abide by applicable state corporate law when approving all transactions, including transactions involving officers, directors or affiliates. More particularly, our policy is to have any related-party transactions (i.e., transactions involving a director, an officer or an affiliate of the Company) be approved solely by a majority of the disinterested and independent directors serving on our Board of Directors. Presently, we have four independent directors on the board, and intend to maintain a board on which independent directors comprise a majority of directors serving on the board.

Table of Contents

DIRECTOR COMPENSATION

The following table sets forth the cash and non-cash compensation awarded to or earned by each individual who served as a member of the board of directors of GWG Holdings during the year ended December 31, 2013.

<u>Director's Name</u>	<u>Fees Earned or Paid in Cash 2013</u>
Paul A. Siegert (Chairman)	\$ 30,000
Jon R. Sabes	\$ 30,000
Steven F. Sabes	\$ 30,000
Brian Tyrell	\$ 25,000
Laurence Zipkin	\$ 25,000
Kenneth Fink	\$ 25,000
David H. Abramson	\$ 11,000
Charles H. Maguire III	\$ 8,000
Jeffrey L. McGregor	\$ 8,000

On October 28, 2013, Messrs. Tyrell, Zipkin, and Fink voluntarily resigned from the board and three new directors, Messrs. David H. Abramson, Jeffrey L. McGregor, and Charles H. Maguire III, were appointed to the board. Each independent board member receives base compensation of \$5,000 and an option to purchase 1,000 shares of the Company's common stock per quarter. In addition, the chairman of the audit committee receives \$4,000 and an option to purchase up to 1,000 shares of the Company's common stock per quarter. The chairmen of the compensation committee and the corporate governance committee each receive \$2,000 and an option to purchase up to 500 shares of the Company's common stock per quarter. Also each non-chair member of committees receive \$1,000 and an option to purchase up to 250 shares of the Company's common stock per quarter.

On December 12, 2013, Messrs. Zipkin and Fink each received an option with a ten-year term to purchase 15,000 shares of the Company's common stock for their service as board members.

Table of Contents**SECURITY OWNERSHIP OF
CERTAIN BENEFICIAL OWNERS AND MANAGEMENT**

The following table sets forth the number and percentage of outstanding common shares beneficially owned as of the close of business on July 1, 2014, by:

each person known by us to be the beneficial owner of more than five percent of our outstanding common stock

each of our current directors

each our current executive officers and any other persons identified as a named executive in the Summary Compensation Table above, and

all current executive officers and directors as a group.

Shares beneficially owned and percentage ownership is based on 4,562,000 shares of common stock outstanding. Beneficial ownership is determined in accordance with the rules of the SEC, and includes general voting power and/or investment power with respect to securities. Shares of common stock issuable upon exercise of options or warrants that are currently exercisable or exercisable within 60 days of the record date, and shares of common stock issuable upon conversion of other securities currently convertible or convertible within 60 days, are deemed outstanding for computing the beneficial ownership percentage of the person holding such securities but are not deemed outstanding for computing the beneficial ownership percentage of any other person. Under the applicable SEC rules, each person's beneficial ownership is calculated by dividing the total number of shares with respect to which they possess beneficial ownership by the total number of outstanding shares of the Company. In any case where an individual has beneficial ownership over securities that are not outstanding, but are issuable upon the exercise of options or warrants or similar rights within the next 60 days, that same number of shares is added to the denominator in the calculation described above. Because the calculation of each person's beneficial ownership set forth in the Percentage of Common Shares column of the table may include shares that are not presently outstanding, the sum total of the percentages set forth in such column may exceed 100%. Unless otherwise indicated, the address of each of the following persons is 220 South Sixth Street, Suite 1200, Minneapolis, Minnesota 55402, and each such person has sole voting and investment power with respect to the shares set forth opposite his, her or its name.

Name and Address	Shares Beneficially Owned	Percentage of Shares Beneficially Owned
Jon R. Sabes (1)	2,427,394	47.2%
Steven S. Sabes (2)	2,386,247	46.4%
Paul A. Siegert (3)	225,445	4.4%
Jon Gangelhoff (4)	50,000	1.0%
William B. Acheson (5)	2,500	*
David H. Abramson (6)	10,000	*
Jeffrey L. McGregor (7)	7,000	*
Charles H. Maguire III (8)	7,000	*
Shawn R. Gensch (9)	1,500	*
All current directors and officers as a group	4,628,000	99.7%

* less than one percent.

- (1) Mr. Sabes is our Chief Executive Officer and a director of the Company. Shares reflected in the table include 1,092,276 shares held individually, 489,086 shares held by Opportunity Finance, LLC, a Minnesota limited liability company of which Mr. Sabes is a manager and member, 169,671 shares held by Jon Sabes 1992 Trust No.1, a trust of which Mr. Sabes is the beneficiary, 168,801 shares held by Jon Sabes 12.30.92 Trust, a trust of which Mr. Sabes is a beneficiary, 241,631 shares held by Jon Sabes 1982 Trust, a trust of which Mr. Sabes is a beneficiary, and 163,737 shares held by Jon Sabes 1976 Trust, a

Table of Contents

trust of which Mr. Sabes is a beneficiary. Also 102,191 shares held by Mr. Sabes immediate family members. The trustees of each of the trusts are Robert W. Sabes, Steve F. Sabes and Ross A. Sabes.

- (2) Mr. Sabes is our President, Secretary and a director of the Company. Shares reflected in the table include 799,779 shares held individually, 489,086 shares held by Opportunity Finance, LLC, a Minnesota limited liability company of which Mr. Sabes is a manager and member, 521,158 shares held by SFS Trust 1982, a trust of which Mr. Sabes is the beneficiary, 350,779 shares held by SFS Trust 1992 Esther, a trust of which Mr. Sabes is a beneficiary, and 200,445 shares held by SFS Trust 1976, a trust of which Mr. Sabes is a beneficiary. The trustees of each of the trusts are Robert W. Sabes, Jon R. Sabes and Ross A. Sabes. The number of shares also include 25,000 of vested stock options granted pursuant to stock option agreement dated September 5, 2013 for 27,500 shares at a per-share exercise price of \$8.28 vesting over a three-year period.
- (3) Mr. Siegert is a director of the Company (Executive Chairman). Shares reflected in the table include 200,445 shares held individually and 25,000 of vested stock options granted pursuant to stock option agreement dated September 5, 2013 for 27,500 shares at a per-share exercise price of \$7.52 vesting over a three-year period.
- (4) Mr. Gangelhoff is our Chief Operating Officer. Shares reflected in the table include 50,000 of vested stock options granted pursuant to stock option agreement dated September 5, 2013 for 77,000 shares at a per-share exercise price of \$7.52 vesting over a three-year period.
- (5) Mr. Acheson is our Chief Financial Officer. Shares reflected in the table include 2,500 of vested stock options granted pursuant to a stock option agreement dated May 27, 2014 for 32,500 shares at a per-share exercise price of \$7.52 and vesting over a three-year period.
- (6) Mr. Abramson is a director of the Company. Shares reflected in the table include 10,000 of vested stock options granted pursuant to a stock option agreement dated October 28, 2013 for 30,000 shares at a per-share exercise price of \$7.52 and vesting quarterly over a three-year period.
- (7) Mr. McGregor is a director of the Company. Shares reflected in the table include 7,000 of vested stock options granted pursuant to a stock option agreement dated November 12, 2013 for 21,000 shares at a per-share exercise price of \$7.52 and vesting quarterly over a three-year period.
- (8) Mr. Maguire is a director of the Company. Shares reflected in the table include 7,000 of vested stock options granted pursuant to a stock option agreement dated November 12, 2013 for 21,000 shares at a per-share exercise price of \$7.52 and vesting quarterly over a three-year period.
- (9) Mr. Gensch is a director of the Company. Shares reflected in the table include 1,500 of vested stock options granted pursuant to a stock option agreement dated July 1, 2014 for 18,000 shares at a per-share exercise price of \$7.52 and vesting quarterly over a three-year period.

Table of Contents**DESCRIPTION OF THE SERIES L BONDS****General**

Edgar Filing: GWG Holdings, Inc. - Form S-1

The Series L Bonds will be secured obligations of GWG Holdings. The Series L Bonds will be issued under an indenture between us and Bank of Utah as the indenture trustee. The terms and conditions of the Series L Bonds include those stated in the indenture and those made part of the indenture by reference to the Trust Indenture Act of 1939. The following is a summary of the material provisions of the indenture. For a complete understanding of the Series L Bonds, you should review the definitive terms and conditions contained in the indenture, which include definitions of certain terms used below. A copy of the indenture has been filed with the SEC as an exhibit to the registration statement of which this prospectus is a part, and is available from us at no charge upon request.

The following is a summary of the material terms associated with the Series L Bonds:

The Series L Bonds are general secured obligations of GWG Holdings. The obligations are secured by a grant of a security interest in all of the assets of GWG Holdings, which assets will serve as collateral for our obligations under the Series L Bonds. This grant of a security interest is effected pursuant to a pledge and security agreement attached to the indenture.

The Series L Bonds are fully and unconditionally guaranteed by our wholly owned direct subsidiary, GWG Life, but otherwise are not guaranteed by any other person or entity. The guarantee is backed by a grant of a security interest in all of the assets of GWG Life, which assets will serve as additional collateral for our obligations under the Series L Bonds. Chief among these assets is GWG Life's ownership interest in DLP Funding II. This guarantee is effected pursuant to provisions contained in the indenture.

The Series L Bonds are also secured by a pledge of the equity ownership interests in GWG Holdings by its principal stockholders Jon R. Sabes and Steven F. Sabes which pledge is effected pursuant to a pledge and security agreement attached to the indenture.

The collateral granted for our obligations under the Series L Bonds (i.e., the security interest in all of the assets of GWG Holdings, and the guarantee by GWG Life and corresponding security interest in all of its assets including a pledge of the equity ownership interests in DLP Funding II), together with (i) certain covenants contained in the documents relating to our earlier issued Series I Secured notes (of which approximately \$28.6 million was outstanding as of March 31, 2014), and (ii) an intercreditor agreement among GWG Holdings, GWG Life, Bank of Utah (on behalf of the Series L Bond holders, and on behalf of the Renewable Secured Debentures) and Lord Securities Corporation (the collateral trustee for the Series I Secured notes), make the Series L Bonds pari passu with the Series I Secured notes and the Renewable Secured Debentures with respect to payment, security and collateral. The intercreditor agreement is attached to the indenture.

The Series L Bonds will be junior to the \$100 million revolving credit facility of DLP Funding II with Autobahn/DZ Bank, which currently has an outstanding balance of approximately \$79 million. The Series L Bonds will also be junior to any other senior lending facility we may later obtain.

The Series L Bonds are not savings accounts, certificates of deposit (CDs) or other forms of deposits, and are not insured by the FDIC or any other governmental agency.

The Series L Bonds are not directly secured by any life insurance assets not owned by GWG Life. A significant amount of our life insurance assets (77.6% of our policies, representing approximately 80.3% of the face value of policy benefits as of March 31, 2014) are held by our DLP Funding II subsidiary. Although GWG Life's equity ownership interests in DLP Funding II is an asset in which GWG Life has pursuant to its guarantee granted a security interest to serve as collateral for obligations under the Series L Bonds, the payment on such equity interests will be subordinate to the interests of creditors of DLP Funding II, including our senior creditor Autobahn/DZ Bank.

The Series L Bonds do not have the benefit of a sinking fund for the retirement of principal.

Table of Contents

The Series L Bonds are not convertible into our capital stock or other securities.

We have the option to call and redeem the entire outstanding principal balance and accrued but unpaid interest of any Series L Bonds at any time and without premium or penalty. If we elect to call and redeem your Series L Bonds, those redeemed Series L Bonds will cease to accrue interest after the redemption date under the terms and subject to the conditions of the indenture.

Except in limited circumstances (death, bankruptcy or total disability), Series L Bond holders will have no right to require us to redeem any Series L Bond prior to its maturity date. Any early redemption will be for the total outstanding principal balance and accrued but unpaid interest. If we in our sole discretion nonetheless elect to accommodate a redemption request, we will redeem the entire (but not less than the entire) outstanding principal balance and accrued but unpaid interest of the Series L Bonds and impose a redemption fee of 6% against the outstanding principal balance of the Series L Bond redeemed. This fee will be subtracted from the amount paid to you.

The Series L Bonds will be denominated in U.S. dollars and we intend to sell the Series L Bonds at 100% of their principal face amount. The minimum investment amount in the Series L Bonds will be \$25,000. Above that minimum amount, Series L Bonds may be purchased in \$1,000 increments. Subject to the minimum investment amount, you may select the principal amount and term of the Series L Bonds (ranging from one year to seven years) you would like to purchase when you subscribe. The interest rate of your Series L Bond will remain fixed until maturity. Depending on our capital requirements, we may not, however, always offer Series L Bonds with the particular terms you seek. See [Description of the Series L Bonds](#) [Interest Rate and Maturity](#) below.

Upon acceptance of your subscription, we will create an account in a book-entry registration and transfer system for you, and credit the principal amount of your subscription to your account. Alternatively, you may subscribe for Series L Bonds as a direct participant with Depository Trust Company (DTC settlement). See [Plan of Distribution](#) [Settlement Procedures](#) for more information. We will send you a purchase confirmation that will indicate our acceptance of your subscription. If your subscription is rejected, all funds deposited will be promptly returned to you without any interest. See [Registration and Exchange](#) below.

Investors whose subscriptions for Series L Bonds have been accepted and anyone who subsequently acquires Series L Bonds in a qualified transfer are referred to as [holders](#) or [registered holders](#) in this prospectus. We may modify or supplement the terms of the Series L Bonds described in this prospectus from time to time in a supplement to the indenture and a supplement to this prospectus. Except as set forth under

[Amendment, Supplement and Waiver](#) below, any modification or amendment will not affect Series L Bonds outstanding at the time of such modification or amendment.

The Series L Bonds are not assignable without our prior consent. The Series L Bonds may be transferred or exchanged for other Series L Bonds of the same series and class of a like aggregate principal amount subject to limitations contained in the indenture. We will not charge a fee for any registration, transfer or exchange of Series L Bonds. However, we may require the holder to pay any tax, assessment fee, or other governmental charge required in connection with any registration, transfer or exchange of Series L Bonds. The registered holder of a Series L Bond will be treated as its owner for all purposes.

Denomination

You may purchase Series L Bonds in the minimum principal amount of \$25,000, and in whole increments of \$1,000 above \$25,000. You will determine the original principal amount of each Series L Bond you purchase when you subscribe. You may not cumulate purchases of multiple Series L Bonds with principal amounts less than \$25,000 to satisfy the minimum requirement. In our discretion, we may waive the \$25,000 minimum purchase requirement for any investor.

Table of Contents

Term

We may offer Series L Bonds with the following terms to maturity:

one year	five years
two years	seven years
three years	

You will select the term of each Series L Bond you purchase when you subscribe. You may purchase multiple Series L Bonds with different terms by filling in investment amounts for more than one term on your Subscription Agreement. However, during this offering we may not

always offer Series L Bonds with each of the terms outlined above.

The actual maturity date will be on the last day of the month in which the Series L Bond matures (i.e., the month in which the Series L Bond s term ends). For example, if you select a one-year term and your Series L Bond becomes effective on January 1, 2015, the actual maturity date will be January 31, 2016. After actual maturity, we will pay all outstanding principal and accrued but unpaid interest on the Series L Bond no later than the 15th day of the calendar month next following its maturity (or the first business day following the 15th day of such month). So, in the case of a Series L Bond with a maturity date of January 31, 2016, actual payment will be made on or prior to February 15, 2016 (unless such date is not a business day, in which case actual payment will be made on the next business day). The Series L Bonds do not earn interest after the maturity date or any date set for prepayment.

Should the original Series L Bond holder (x) no longer be the holder of the Series L Bond or (y) be unavailable, or a change in payee be necessary, such as in the case of a surviving estate, we may require a copy of the executed assignment agreement between the original Series L Bond holder and any transferee along with our consent to such transfer, or an order from a court or probate commission, as the case may be, in order that we know the principal is returned to the rightful party.

Interest Rate

The rate of interest we will offer to pay on Series L Bonds at any particular time will vary based upon market conditions, and will be determined by the term to maturity of the Series L Bonds, our capital requirements and other factors described below. The interest rate on a particular Series L Bond will be determined at the time of subscription or renewal and then remain fixed for the original or renewal term of the Series L Bond. We will establish and may change the interest rates payable for Series L Bonds of various terms and at various investment levels in an interest rate supplement to this prospectus.

We may offer Series L Bonds that earn incrementally higher interest rates when, at the time they are purchased or renewed, the aggregate principal amount of the Series L Bond portfolio of the holder increases. If applicable, the interest rates payable at each level of investment will be set forth in an interest rate supplement to this prospectus. We may change the interest rate for any or all maturities to reflect market conditions at any time by supplementing this prospectus. If we change the interest rates, the interest rate on Series L Bonds issued before the date of the change will not be affected.

Payments on the Series L Bonds; Paying Agent and Registrar

Investors will have the opportunity to select whether interest on their Series L Bonds will be paid quarterly or annually. For investors using direct settlement with the Company, this selection opportunity will be presented in the Subscription Agreement.

Interest will accrue on the Series L Bonds at the stated rate from and including the effective date of the Series L Bond until maturity. The effective date of a Series L Bond will be as follows:

If you purchase a Series L Bond through DTC settlement, the first business day after the monthly closing cycle with DTC. In this regard, you should be aware that the final settlement date for participating in a closing cycle will generally require you to have paid your subscription at least ten days prior to the end of a calendar month. So for example, to participate in a closing cycle on which

Table of Contents

Series L Bonds will be issued on May 1, your DTC settlement subscription must be effected and paid for no later than April 20.

If you purchase a Series L Bond through direct settlement with the Company, the effective date of your bond will be the following, as applicable: (i) in cases where you pay for your bond via wire transfer directly to us, the first business day of the calendar month after which we receive the wire; (ii) in cases where you pay for your bond by bank draft directly to us, the first business day of the calendar month after which we receive the draft; or (iii) in cases where you pay for your bond by personal check, the first business day of the calendar month that is five full business days after which we receive the check.

Interest payments on Series L Bonds will be paid on the 15th day immediately following the last day of the applicable interest payment period. Interest will be paid without any compounding. The first payment of interest will include interest for the partial period in which the purchase occurred. The indenture provides that all interest will be calculated based on a year with twelve 30-day months.

We will pay the principal of, and interest on, Series L Bonds by direct deposit to the account you specify in your Subscription Agreement. We will not accept subscriptions from investors who are not willing to receive their interest payments via direct deposit. If the foregoing payment method is not available, principal and interest payments on the Series L Bonds will be payable at our principal executive office or at such other place as we may designate for payment purposes. If you purchase your Series L Bond through DTC settlement, our payments of principal and interest will be paid to the depository (DTC) and then be credited to your brokerage or custodial account through the DTC procedures followed by your brokerage firm or custodian.

We will withhold 28% of any interest payable to any investor who has not provided us with a social security number, employer identification number, or other satisfactory equivalent in the Subscription Agreement (or another document) or where the IRS has notified us that backup withholding is otherwise required. Please see **Material Federal Income Tax Considerations Backup Withholding and Information Reporting**.

Registration and Exchange

The Series L Bonds that we settle directly will be issued in book-entry form, which means that no physical Series L Bond is created, subject, however, to limited exceptions described in the indenture. The Series L Bonds settled through DTC settlement will be represented by global certificates deposited with the depository as described below.

Book-Entry Registration

Evidence of your ownership will be provided by written confirmation. As described below, holders may, under certain circumstance described below, opt to receive physical delivery of a certificated security that evidences their Series L Bonds. Otherwise, the issuance and transfer of Series L Bonds will be accomplished exclusively through the crediting and debiting of the appropriate accounts in our book-entry registration and transfer system.

The holders of the accounts established upon the purchase or transfer of Series L Bonds will be deemed to be the owners of the Series L Bonds under the indenture. The holder of the Series L Bonds must rely upon the procedures established by the trustee to exercise any rights of a holder of Series L Bonds under the indenture. We will regularly provide the trustee with information regarding the establishment of new accounts and the transfer of existing accounts.

On or prior to any interest payment date or upon redemption, we will also provide the trustee with information regarding the total amount of any principal and interest due to holders of Series L Bonds. On each interest payment date, we will credit interest due on each account and direct payments to the holders. We will determine the interest payments to be made to the book-entry accounts and maintain, supervise and review any records relating to book-entry beneficial interests in the Series L Bonds.

Table of Contents

Book-entry notations in the accounts evidencing ownership of the Series L Bonds are exchangeable for certificated Series L Bonds only: (i) at the request of the holder, at the end of Company's next fiscal quarter; or (ii) after the occurrence of an event of default under the indenture, if holders of more than 50% of the aggregate outstanding principal amount of the Series L Bonds advise the trustee in writing that the continuation of a book-entry system is no longer in the best interests of the holders of Series L Bonds. Subject to these requirements, the book-entry interests in these securities will not be exchangeable for fully registered certificated Series L Bonds.

Global Certificates Deposited with DTC

Series L Bonds may be issued in the form fully registered global certificates deposited with, or on behalf of, The Depository Trust Company (DTC), New York, NY, and registered in the name of Cede & Co., as nominee of DTC. Unless and until exchanged, in whole or in part, for Series L Bonds in definitive registered form, a global certificate may not be transferred except as a whole by the depository to a nominee of such depository, by a nominee of such depository to such depository or another nominee of such depository, or by such depository or any nominee of such depository to a successor of such depository or a nominee of such successor.

DTC is a limited-purpose trust company organized under the New York Banking Law, a banking organization within the meaning of the New York Banking Law, a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code and a clearing agency registered pursuant to the provisions of Section 17A of the Exchange Act. DTC was created to hold securities of its participants and to facilitate the clearance and settlement of securities transactions, such as transfers and pledges, among its participants in such securities through electronic computerized book-entry changes in accounts of the participants, thereby eliminating the need for physical movement of securities certificates. DTC's participants include securities brokers and dealers (including the underwriters), banks, trust companies, clearing corporations and certain other organizations, some of whom own DTC. Access to DTC's book-entry system is also available to others, such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a participant, either directly or indirectly. The rules applicable to DTC and its participants are on file with the SEC.

If available, purchases of the Series L Bonds within the DTC system must be made by or through direct participants, which will receive a credit for the Series L Bonds on DTC's records. The ownership interest of each beneficial owner of the Series L Bonds will be recorded on the direct and indirect participants' records. Beneficial owners will not receive written confirmation from DTC of their purchases, but beneficial owners are expected to receive written confirmations providing details of the transactions, as well as periodic statements of their holdings, from the direct or indirect participants through which the beneficial owners entered into the transaction. Transfers of ownership interests in the Series L Bonds are to be accomplished by entries made on the books of participants acting on behalf of beneficial owners.

To facilitate subsequent transfers, all Series L Bonds deposited by participants with DTC will be registered in the name of DTC's nominee, Cede & Co. The deposit of the Series L Bonds with DTC and their registration in the name of Cede & Co. will effect no change in beneficial ownership. DTC will have no knowledge of the actual beneficial owners of the Series L Bonds. DTC's records will reflect only the identity of the direct participants to whose accounts such notes are credited, which may or may not be the beneficial owners. The participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to direct participants, by direct participants to indirect participants and by direct and indirect participants to beneficial owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

We will make payments due on the notes to Cede & Co., as nominee of DTC, in immediately available funds. DTC's practice is to credit direct participants' accounts, upon DTC's receipt of funds and corresponding detailed information, on the relevant payment date in accordance with their respective holdings shown on

Table of Contents

DTC's records. Payments by participants to beneficial owners will be governed by standing instructions and customary practices, as is the case with securities held for the account of customers in bearer form or registered in street name, and will be the responsibility of such participant and not our responsibility or DTC, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment to Cede & Co. is our responsibility. Disbursement of such payments to direct participants is the responsibility of Cede & Co. Disbursement of such payments to the beneficial owners is the responsibility of direct and indirect participants.

Except as provided herein, a beneficial owner of an interest in a global certificate will not be entitled to receive physical delivery of the Series L Bonds. Accordingly, each beneficial owner must rely on the procedures of DTC to exercise any rights under the Series L Bonds. The laws of some jurisdictions require that certain purchasers of securities take physical delivery of securities in definitive form. Such laws may impair the ability to transfer beneficial interests in a global certificate.

As long as the depository, or its nominee, is the registered holder of a global certificate, the depository or such nominee will be considered the sole owner and holder of the Series L Bonds represented thereby for all purposes under the Series L bonds and the indenture. Except in the limited circumstances referred to below, owners of beneficial interests in a global certificate will not be entitled to have such global certificate or any Series L Bonds represented thereby registered in their names, will not receive or be entitled to receive physical delivery of certificated Series L Bonds in exchange for the global certificate and will not be considered to be the owners or holders of such global certificate or any certificates represented thereby for any purpose under the Series L Bonds or the indenture. Accordingly, each person owning a beneficial interest in such global certificate must rely on the procedures of the depository and, if such person is not a participant, on the procedures of the participant through which such person owns its interest to exercise any rights of a holder under the indenture.

If the depository for a global certificate representing Series L Bonds is at any time unwilling or unable to continue as depository and a successor depository is not appointed by us within 90 days, we will issue Series L Bonds in definitive form in exchange for such global certificate. In addition, we may at any time and in our sole discretion determine not to have the Series L Bonds represented by one or more global certificates and, in such event, we will issue the notes in definitive form in exchange for all of the global certificates representing the Series L Bonds. Finally, if an event of default, or an event which with the giving of notice or lapse of time or both would constitute an event of default, with respect to the Series L Bonds represented by a global certificate has occurred and is continuing, then we will issue Series L Bonds in definitive form in exchange for all of the global certificates representing the notes.

Although DTC has agreed to the procedures provided above in order to facilitate transfers, it is under no obligation to perform these procedures, and these procedures may be modified or discontinued at any time.

Limited Rescission Right

If you are purchasing Series L Bonds through direct settlement with the Company and your Subscription Agreement is accepted at a time when we have determined that a post-effective amendment to the registration statement of which this prospectus is a part must be filed with the SEC, but such post-effective amendment has not yet been declared effective, we will send to you at your registered address a notice and a copy of the related prospectus once it has been declared effective. You will thereupon have the right to rescind your investment upon written request within five business days from the postmark date of the notice we send to you that the post-effective amendment has been declared effective (and containing the related prospectus). We will promptly return any funds sent with a Subscription Agreement that is properly rescinded without penalty, although any interest previously paid on a rescinded Series L Bond will be deducted from the funds returned to you upon rescission. A written request for rescission, except in the case of a mailed rescission, must be postmarked on or before the fifth business day after our notice to you (described above). If you notify us other than by mail, we must actually receive your rescission request on or before the fifth business day after our notice to you.

Table of Contents

Renewal or Repayment on Maturity

At least 45 days prior to the maturity of your Series L Bond, we will provide you with a notice indicating that your Series L Bond is about to mature and whether we will allow automatic renewal of your Series L Bond. If we allow you to renew your Series L Bond, we will also provide to you the then-current form of prospectus, which will include an interest rate or prospectus supplement and any other updates to the information contained in this prospectus. The interest rate or prospectus supplement will set forth the interest rates then in effect. The notice will recommend that you review the then-current prospectus, including any interest rate or prospectus supplement, prior to exercising one of the below options. If we do not provide you a new prospectus because the prospectus has not changed since the delivery of this prospectus in connection with your original subscription or any prior renewal, we will nonetheless send you a new copy of the prospectus upon your request. Unless the election period is extended as described below, you will have until 20 days prior to the maturity date to exercise one of the following options:

You can do nothing, in which case (subject to applicable law) your Series L Bond will automatically renew for a new term equal to the original term but at the interest rate in effect at the time of renewal. Interest on renewed Series L Bonds will be paid on the same schedule (i.e., quarterly or annually) as the original Series L Bond. If applicable, a new certificate will be issued.

You can elect repayment of your Series L Bond, in which case the principal amount will be repaid in full along with any accrued but unpaid interest. If you choose this option, your Series L Bond will not earn interest on or after the maturity date.

You can elect repayment of your Series L Bond and use all or part of the proceeds to purchase a new Series L Bond with a different term or principal amount. To exercise this option, you will need to complete a new Subscription Agreement for the new Series L Bond and mail it along with your request. The issue date of the new Series L Bond will be the maturity date of the old Series L Bond. Any proceeds from the old Series L Bond that are not applied to the new Series L Bond will be sent to you.

The foregoing options will be available to holders unless and until terminated under the indenture. Interest will accrue from the first day of each renewed term. Each renewed Series L Bond will retain all its original provisions, including provisions relating to payment, except that the interest rate payable during any renewal term will be the interest rate that is being offered at that time to other holders with similar aggregate Series L Bond portfolios for Series L Bonds of the same term as set forth in the interest rate supplement delivered with the maturity notice. If similar Series L Bonds are not then being offered, the interest rate upon renewal will be the rate specified by us on or before the maturity date, or

the rate of the existing Series L Bond if no such rate is specified.

If we notify the holder of our intention to repay a Series L Bond at maturity, or if the holder timely requests repayment, we will pay the principal and all accrued but unpaid interest on the Series L Bond on or prior to the 15th day of the calendar month after the maturity date (or the first business day following the 15th day of such month). Thus, in the case of a Series L Bond with a maturity date of January 31, 2015, actual payment will be made on or prior to February 15, 2015 (unless such date is not a business day, in which case actual payment will be made on the next business day). No interest will accrue after the maturity date. You should be aware that because payment is made by ACH transfer, funds may not be received in the holder's account for two to three business days.

We will be required from time to time to file post-effective amendments to the registration statement of which this prospectus is a part to update the information it contains. If you would otherwise be required to elect to have your Series L Bonds renewed or repaid following their stated maturity at a time when we have determined that a post-effective amendment must be filed with the SEC, but such post-effective amendment has not yet been declared effective, the period during which you can elect renewal or repayment will be automatically extended until ten days following the postmark date of our notice to you that the post-effective amendment has been declared effective, which notice shall contain a copy of the related prospectus. All other

Table of Contents

provisions relating to the renewal or redemption of Series L Bonds upon their stated maturity described above shall remain unchanged.

For any Series L Bonds offered hereby that mature on or after _____, we expect that the renewal of such Series L Bonds will require us to file a new registration statement. In such a case, the new registration statement must be declared effective before we can renew your Series L Bond. In this event, if the new registration statement has not yet been filed or become effective, we will extend your election period until ten days following the date of our notice to you that the new registration statement has become effective, which notice will include a new prospectus. In addition, we will be required to renew or extend our applications for effectiveness in one or more states from time to time.

Call and Redemption Prior to Stated Maturity

We may call and redeem the entire (but not less than the entire) principal amount and accrued but unpaid interest on any Series L Bonds prior to their stated maturity only as set forth in the indenture and described below. The holder has no right to put or otherwise require us to redeem any Series L Bond prior to its maturity date (as originally stated or as it may be extended), except as indicated in the indenture and described below.

Our Voluntary Redemption

We have the right to redeem any Series L Bond, in whole but not in part, at any time prior to its stated maturity upon 30 days written notice to the holder of the Series L Bond. The holder of the Series L Bond being redeemed will be paid a redemption price equal to the outstanding principal amount thereof plus accrued but unpaid interest up to but not including the date of redemption without any penalty or premium. We may use any criteria we choose to determine which Series L Bonds we will redeem if we choose to do so. We are not required to redeem Series L Bonds on a pro rata basis.

Holder's Put Election Upon Death, Bankruptcy or Total Permanent Disability

Series L Bonds may be redeemed prior to maturity at the election of a holder who is a natural person (including Series L Bonds held in an individual retirement account), by giving us written notice within 45 days following the holder's total permanent disability or bankruptcy, as established to our satisfaction, or at the election of the holder's estate, by giving written notice within 45 days following the death of the holder. Subject to the limitations described below, we will redeem the Series L Bonds on the 15th day of the month next following the month in which we establish to our satisfaction the holder's death, bankruptcy or total permanent disability. In the event that the 15th day of the month next following the month in which we so establish such facts is not a business day, we will redeem the Series L Bonds on the next business day. The redemption price, in the event of such a death, bankruptcy or total permanent disability, will be the entire principal amount of the Series L Bonds, plus accrued but unpaid interest thereon up to and through the last day of the calendar month preceding the redemption date.

If spouses are joint registered holders of a Series L Bond, the right to elect to have us redeem Series L Bonds will apply when either registered holder dies, files bankruptcy or suffers a total permanent disability. If the Series L Bond is held jointly by two or more persons who are not

legally married, none of these persons will have the right to request that we redeem the Series L Bonds unless all joint holders have died, filed bankruptcy or suffered a total permanent disability. If the Series L Bond is held by a trust, partnership, corporation or other similar entity, the right to request redemption upon death or total permanent disability does not apply.

Redemption at Request of Holder

We have no obligation to redeem any Series L Bonds other than upon maturity, or upon the death, bankruptcy or total permanent disability of a natural person holder. Nevertheless, at our sole discretion we may agree from time to time, at the written request of a holder, to redeem a Series L Bond, subject, however, to a redemption fee of 6.0% of the principal amount of such Series L Bond. If we so redeem any Series L

98

Table of Contents

Bond prior to maturity, we will redeem the entire principal amount of such Series L Bond together with accrued but unpaid interest thereon, The redemption fee will be subtracted from the amount paid to you.

Transfers

The Series L Bonds are not negotiable debt instruments. The purchase confirmation issued upon our acceptance of a subscription is not a negotiable instrument, and no rights of record ownership can be transferred without our prior written consent. Ownership of Series L Bonds may be transferred on the Series L Bond register only as follows:

The holder must deliver us written notice requesting a transfer signed by the holder(s) or such holder's duly authorized representative on a form to be supplied by us.

We must provide our written consent to the proposed transfer.

We may require a legal opinion from counsel satisfactory to us that the proposed transfer will not violate any applicable federal or state securities laws.

We may require a signature guarantee in connection with such transfer.

Upon transfer of a Series L Bond, we will provide the new holder of the Series L Bond with a purchase confirmation that will evidence the transfer of the account on our records. If applicable (e.g., if transferred to a custodial account), a new certificate will be issued. We may charge a reasonable service charge in connection with the transfer of any Series L Bond.

Quarterly Statements

We will provide holders of the Series L Bonds with quarterly statements, which will indicate, among other things, the account balance at the end of the quarter, interest credited, redemptions made, if any, and the interest rate paid during the quarter. These statements will be sent electronically on or prior to the 32nd day after the end of each calendar quarter. If a holder is unwilling or unable to receive quarterly statements electronically, we will mail the statements to the address of record on or prior to the 32nd day after the end of each calendar quarter. In such a case, we may charge such holders a reasonable fee to cover our expenses incurred in mailing the statements.

Ranking

The Series L Bonds will constitute secured debt of GWG Holdings. The payment of principal and interest on the Series L Bonds will be:

pari passu with respect to payment and collateral securing the approximately \$28.6 million in outstanding principal amount of Series I Secured notes previously issued by our subsidiary GWG Life and the Renewable Secured Debentures issued by GWG Holdings, at any time, of which approximately \$146 million in principal amount is outstanding as of March 31, 2014 (see the caption Collateral Security below);

structurally junior to the present and future obligations owed by our subsidiary DLP Funding II under the senior secured revolving credit facility with Autobahn/DZ Bank (including the approximately \$79 million outstanding under such facility as of March 31, 2014), and structurally or contractually junior to any future obligations that DLP Funding II or other primary obligors or guarantors may have under future senior secured borrowing facilities; and

structurally junior to the present and future claims of creditors of our subsidiaries, other than GWG Life, including trade creditors, including trade creditors.

The indenture will permit us to issue other forms of debt, including secured and senior debt, in the future.

Table of Contents

Pari passu means that claims for payment and entitlement to security among the holders of Series L Bonds, the holders of Renewable Secured Debentures, and the holders of Series I Secured notes previously issued by GWG Life, together with the holders of any later-created class of pari passu debt, will be treated equally and without preference. Although we have no present intention of causing GWG Life to issue additional secured debt in the future, any such debt issued on a pari passu basis in the future would also be treated equally and without preference in respect of the Series L Bonds, Renewable Secured Debentures and Series I Secured notes. We may continue our ongoing offering of Renewable Secured Debentures and Series I Secured Notes for renewals only, and any such debt issued on a pari passu basis in the future would also be treated equally and without preference in respect of the Series L Bonds and any secured debt issued by GWG Life. Thus, in the event of any default on the Series L Bonds (or any other debt securities of ours that is pari passu with the Series L Bonds) resulting in claims for payment or claims on collateral security, the holders of the Series L Bonds and all such other debt securities pari passu with the Series L Bonds would share in payment or collateral in proportion to the amount of principal and interest owed on each such debt instrument.

Guarantee by GWG Life Subsidiary

The payment of principal and interest on the Series L Bonds is fully and unconditionally guaranteed by GWG Life. This guarantee, together with (i) the accompanying grant of a security interest in all of the assets of GWG Life, including GWG Life's entire ownership interest in DLP Funding II, (ii) the pledge of ownership interests in GWG Holdings, Inc. by our principal stockholders, and (iii) an intercreditor agreement among GWG Holdings, GWG Life, Bank of Utah (on behalf of the Series L Bond holders) and Lord Securities Corporation (the collateral trustee for the Series I Secured notes), make the Series L Bonds pari passu with the Series I Secured notes and the Renewable Secured Debentures with respect to payment, security and collateral. For an explanation of the term pari passu, see Ranking above. There were approximately \$28.6 million in principal amount of Series I Secured notes and approximately \$146 million in principal amount of Renewable Secured Debentures outstanding as of March 31, 2014.

Collateral Security

The Series L Bonds are secured by the assets of GWG Holdings, Inc. We will grant a security interest in all of the assets of GWG Holdings to the indenture trustee for the benefit of the Series L Bond holders. The assets of GWG Holdings consist, and are expected to consist, primarily of (i) any cash proceeds received from its subsidiaries as distributions derived from life insurance assets of subsidiaries, (ii) all other cash and investments held in various accounts, (iii) the equity ownership interests in subsidiaries of GWG Holdings, including the equity ownership interest in GWG Life, together with (iv) all proceeds from the foregoing. This collateral security granted by us is referred to as the GWG Holdings Assets Collateral.

As indicated above, our direct and wholly owned subsidiary, GWG Life, will fully and unconditionally guarantee our obligations under the Series L Bonds. This guarantee will be supported by GWG Life's grant of a security interest in all of its assets. The assets of GWG Life consist, and are expected to consist, primarily of (i) certain life insurance assets, (ii) any cash proceeds received from life insurance assets owned by GWG Life or received from its direct subsidiary DLP Funding II as distributions derived from life insurance policies owned by that subsidiary, (iii) all other cash and investments held by GWG Life in its various accounts, (iv) GWG Life's equity ownership interest in its direct subsidiary DLP Funding II, together with (v) all proceeds from the foregoing. The collateral security granted by GWG Life pursuant to its guarantee of our obligations under the Series L Bonds is referred to as the GWG Life Assets Collateral.

Edgar Filing: GWG Holdings, Inc. - Form S-1

In addition, Messrs. Jon R. Sabes and Steven F. Sabes, our principal stockholders beneficially holding approximately 94.2% of the outstanding shares of our common stock, have pledged all of the shares they beneficially own in GWG Holdings to further secure our obligations under the Series L Bonds. This collateral security granted by Messrs. Jon R. Sabes and Steven F. Sabes is referred to as the GWG Holdings Equity Collateral.

Together, the GWG Holdings Assets Collateral, GWG Life Assets Collateral and GWG Holdings Equity Collateral comprise all of the collateral security for our obligations under the Series L Bonds. To the extent

100

Table of Contents

that we subsequently establish one or more wholly owned subsidiaries of GWG Holdings or GWG Life, the Series L Bonds will have a security interest in the equity ownership interests of those subsidiaries if and to the extent owned by GWG Holdings or GWG Life.

The guarantee by GWG Life is contained in the indenture, and the grant of security interests in the GWG Holdings Assets Collateral, GWG Life Assets Collateral and GWG Holdings Equity Collateral is effected through a Pledge and Security Agreement that is an exhibit to the indenture. The grant of collateral security comprising the GWG Life Assets Collateral and GWG Holdings Equity Collateral is designed to afford the holders of Series L Bonds with rights to the same payment and collateral as that granted to holders of our Series I Secured notes and the holders of our Renewable Secured Debentures on a pari passu basis. To effect this arrangement, the trustee under the indenture, Bank of Utah (to whom the security grant is made under the Pledge and Security Agreement), has entered into an Intercreditor Agreement with GWG Holdings, GWG Life and Lord Securities Corporation (the trustee for our Series I Secured notes). This Intercreditor Agreement is an exhibit to the indenture.

A significant amount of our life insurance assets (77.6% of our policies, representing approximately 80.3% of the face value of policy benefits as of March 31, 2014) are held in our subsidiary GWG DLP Funding II, LLC, which we refer to throughout this prospectus as DLP Funding II. The Series L Bonds will not be directly secured by any security interest in the assets of DLP Funding II. Instead, the Series L Bonds will be secured by a pledge of the equity ownership interests in DLP Funding II owned by GWG Life by virtue of the guarantee provisions in the indenture and the Pledge and Security Agreement referenced above. An equity ownership interest is, by its very nature, subordinate to the interests of creditors. **Therefore, although investors in the Series L Bonds will have a security interest in the ownership of DLP Funding II, any claim they may have to the assets owned by such entity will be subordinate to the interests of creditors of that entity, including (i) Autobahn/DZ Bank which is the lender to DLP Funding II under our revolving credit facility, and (ii) all other creditors of DLP Funding II, including trade creditors. In addition, there is the risk that the collateral security granted for our obligations under the Series L Bonds may be insufficient to repay the Series L Bonds upon an event of default. See Risk Factors, page 28 (The collateral granted as security...).**

Subordination; Other Indebtedness

Our obligations under the Series L Bonds will be subordinate to all our senior debt. For this purpose, our senior debt presently includes all indebtedness of our subsidiaries with respect to which the Series L Bonds are not pari passu with respect to payment and collateral (i.e., other than our Series I Secured notes and Renewable Secured Debentures). In this regard, our subsidiary DLP Funding II has, as of March 31, 2014, approximately \$79 million of debt outstanding under our revolving credit facility. With respect to pari passu indebtedness, as of March 31, 2014 our subsidiary GWG Life has approximately \$28.6 million of debt outstanding under our Series I Secured notes, and we had approximately \$146 million of debt outstanding under our Renewable Secured Debentures.

The maximum amount of debt, including the Series L Bonds, we may issue is limited by the indenture. In particular, the indenture prohibits us from issuing debt in an amount such that our debt coverage ratio would exceed 90%. The indenture defines the debt coverage ratio as a percentage calculated by the ratio of (A) obligations owing by us and our subsidiaries on all outstanding debt for borrowed money (including the Series L Bonds), over (B) the net present asset value of all life insurance assets we own, directly or indirectly, plus any cash held in our accounts. For this purpose, the net present asset value of our life insurance assets is equal to the present value of the cash flows derived from the face value of policy benefit assets we own, discounted at a rate equal to the weighted average cost of capital for all our indebtedness for the prior month.

We are required to notify the indenture trustee in the event that we violate this restrictive covenant. An event of default will exist under the indenture if a violation of this covenant persists for a period of 30 calendar days after our initial notice to the trustee.

The Series L Bonds are guaranteed by GWG Life but otherwise are not guaranteed by any of our subsidiaries, affiliates or control persons. The indenture does not prevent holders of debt issued by our

Table of Contents

subsidiaries from disposing of, or exercising any other rights with respect to, any or all of the collateral securing that debt. Accordingly, in the event of a liquidation or dissolution of one of our subsidiaries (other than GWG Life), creditors of that subsidiary that are senior in rank will be paid in full, or provision for such payment will be made, from the assets of that subsidiary prior to distributing any remaining assets to us as an equity owner of that subsidiary.

The indenture also contains specific subordination provisions, benefitting lenders under senior credit facilities to our operating subsidiaries, restricting the right of Series L Bond holders to enforce certain of their rights in certain circumstances, including:

a prohibition on challenging any enforcement action taken by a senior lender or interfering with any legal action or suits undertaken by the senior lender against us and our affiliates;

a 180-day standstill period during which there may not be brought any action to enforce an event of default against us or our affiliates unless our revolving credit facility has been repaid in full, which period may be extended if the credit facility provider takes action during such standstill period; and

a prohibition on filing a bankruptcy or insolvency case against us or our affiliates for at least one year plus one day after the revolving credit facility lender has been paid in full.

We will not make any payment, direct or indirect (whether for interest, principal, as a result of any redemption or repayment at maturity, on default, or otherwise), on the Series L Bonds and any other indebtedness, and neither the holders of the Series L Bonds nor the trustee will have the right, directly or indirectly, to sue to enforce the indenture or the Series L Bonds, if a default or event of default under any senior credit facility has occurred and is continuing, or if any default or event of default under any senior credit facility would result from such payment, in each case unless and until:

the default and event of default has been cured or waived or has ceased to exist; and

the end of the period commencing on the date the indenture trustee receives written notice of default from a holder of such credit facility and ending on the earlier of the indenture trustee's receipt of (i) a valid waiver of default from the holder of a credit facility, or (ii) a written notice from the holder of a credit facility terminating the payment blockage period.

Notwithstanding the foregoing, if any of the blockage events described above have occurred and 179 days have passed since the indenture trustee's receipt of the notice of default without the occurrence of the cure, waiver, termination, or extension of all blockage periods described above, the trustee may thereafter sue on and enforce the indenture and our obligations thereunder and under the Series L Bonds as long as any funds paid as a result of any such suit or enforcement action shall be paid toward the senior credit facility until it is indefeasibly paid in full before being applied to the Series L Bonds. The indenture contains provisions whereby each investor in the Series L Bonds consents to the subordination provisions contained in the indenture and related agreements governing collateral security.

If the 180-day standstill period noted above or any other limitation on the rights of the trustee or Series L Bond holders to assert their rights to payment of principal or interest under the indenture or Series L Bonds is ultimately determined to conflict with provisions of the Trust Indenture Act of 1939 (most notably sections 316(b) and 317(a) of that Act), then the trustee, as well as any holder who shall not have earlier consented to such subordination provisions, shall (notwithstanding such provision contained in the indenture) be authorized to institute a lawsuit for the enforcement of any payment of principal or interest after their respective due dates.

No Sinking Fund

The Series L Bonds are not associated with any sinking fund. A sinking fund is generally any account to which contributions will be made, from which payments of principal or interest owed on the Series L Bonds will be made. See Risk Factors, page 19.

Table of Contents

Restrictive Covenants

The indenture contains covenants that restrict us from certain actions as described below. In particular, the indenture provides that:

we will not declare or pay any dividends or other payments of cash or other property solely in respect of our capital stock to our stockholders (other than a dividend paid in shares of our capital stock on a pro rata basis to all our stockholders) unless no default and no event of default with respect to the Series L Bonds exists or would exist immediately following the declaration or payment of the dividend or other payment;

to the extent legally permissible, we will not at any time insist upon, plead, or in any manner whatsoever claim or take the benefit or the performance of the indenture;

our Board of Directors will not adopt a plan of liquidation that provides for, contemplates or the effectuation of which is preceded by (a) the sale, lease, conveyance or other disposition of all or substantially all of our assets, otherwise than (i) substantially as an entirety, or (ii) in a qualified sales and financing transaction, and (b) the distribution of all or substantially all of the proceeds of such sale, lease, conveyance or other disposition and of our remaining assets to the holders of our capital stock, unless, prior to making any liquidating distribution pursuant to such plan, we make provision for the satisfaction of our obligations under the renewable unsecured subordinated notes; and

our debt coverage ratio may not exceed 90%.

The indenture defines the debt coverage ratio as a percentage calculated by the ratio of (A) obligations owing on all outstanding debt for borrowed money (including the Series L Bonds), over (B) the net present asset value of all life insurance assets we own, plus any cash held in our accounts. For this purpose, the net present asset value of our life insurance assets is equal to the present value of the face value of policy benefit assets we own, discounted at a rate equal to the weighted average cost of capital for all our indebtedness for the prior month.

Importantly, we are not restricted from entering into qualified sale and financing transactions or incurring additional indebtedness, including additional senior debt.

Consolidation, Mergers or Sales

The indenture generally permits a consolidation or merger between us and another entity. It also permits the sale or transfer by us of all or substantially all of our property and assets. These transactions are permitted if:

the resulting or acquiring entity, if other than us, is a United States corporation, limited liability company or limited partnership and assumes all of our responsibilities and liabilities under the indenture, including the payment of all amounts due on the notes and performance of the covenants in the indenture; and

immediately after the transaction, and after giving effect to the transaction, no event of default shall exist under the indenture.

If we consolidate or merge with or into any other entity or sell or lease all or substantially all of our assets, according to the terms and conditions of the indenture, the resulting or acquiring entity will be substituted for us in the indenture with the same effect as if it had been an original party to the indenture. As a result, the successor entity may exercise our rights and powers under the indenture in our name, and we (as an entity) will be released from all our liabilities and obligations under the indenture and under the Series L Bonds. Nevertheless, no such transaction will by itself eliminate or modify the collateral that we have provided as security for our obligations under the indenture.

Table of Contents

Events of Default and Remedies

The indenture provides that each of the following constitutes an event of default:

the failure to pay interest or principal on any Series L Bond for a period of 30 days after it becomes due and payable;

a failure to observe or perform any material covenant, condition or agreement in the indenture, but only after notice of failure to the indenture trustee and such failure is not cured within 60 days;

our debt coverage ratio exceeds 90% for a period of 30 consecutive calendar days;

certain events of bankruptcy, insolvency or reorganization with respect to us; or

the cessation of our business.

In addition, the indenture provides that for so long as any Series I Secured notes or Renewable Secured Debentures remain outstanding, an event of default under the borrowing agreements relating to the Series I Secured notes or the Renewable Secured Debentures (as the same may from time to time be amended) will constitute an event of default under the indenture. In this regard, a default under the Series I Secured note or Renewable Secured Debenture borrowing agreements includes a default under our revolving credit facility. As explained in other parts of this prospectus, our revolving credit facility is currently provided by Autobahn Funding Company, LLC, as lender, and DZ Bank AG Deutsche Zentral-Genossenschaftsbank, as agent, pursuant to a Credit and Security Agreement dated July 15, 2008, which was amended and restated effective as of January 29, 2013. DLP Funding II is the borrower under the line of credit, and GWG Holdings is a party to the facility as performance guarantor (primarily for the obligations of GWG Life, as the servicer of policy assets).

The maximum line of credit is \$100 million subject to a borrowing base, which permits us to borrow up to 70% of the amount of eligible policies purchased and held in our portfolio. As of March 31, 2014, approximately \$79 million was outstanding under the line of credit. Proceeds of the line of credit may be used to purchase policies and loans. The credit facility matures in December 31, 2016. Advances under the line of credit bear interest based either at the commercial paper rates available to the lender at the time of funding or at the lender's cost of borrowing plus an applicable margin.

The line of credit is secured by a pledge of substantially all of each borrower's assets and requires GWG Holdings to provide certain indemnities to the lender. In addition, the borrowers are required to maintain a reserve account for the benefit of the lenders. If at any time the ratio of outstanding borrowings under the line of credit, together with accrued and unpaid interest and fees, exceeds 50% of the borrower's net eligible receivables balance (as defined in the loan agreement), collections from the maturity of life insurance policies are required to be deposited in the reserve account.

The line of credit is subject to customary affirmative and negative covenants. In addition, we must maintain certain financial covenants, including a positive consolidated net income measured annually and, at all times, a tangible net worth in excess of \$15,000,000 (calculated on a prescribed non-GAAP basis). In addition, the line of credit requires us to maintain a reserve for certain projected expenditures (including anticipated premium payments required to service our life insurance portfolio) that increases, from an initial amount equal to six months of such expenditures, to an amount equal to 12 months of such expenditures beginning as of September 1, 2013.

Finally, the line of credit is subject to certain customary events of default (e.g., payment defaults, covenant defaults, cross-defaults, material adverse change, changes in control and changes in management) and certain events of default specifically relating to our business, including but not limited to (i) portfolio defaults in excess of 10% on an annualized basis, (ii) failure to obtain an unqualified opinion on our annual consolidated financial statements, (iii) failure to maintain certain hedge transactions or replace hedge counterparties under any certain hedging transactions required under the credit agreement, (iv) any governmental authority directs that the purchase and/or servicing of loans be terminated or any law, rule or regulation makes it unlawful to originate, purchase and/or service loans, (v) the performance guaranty of

GWG Holdings shall cease to be in full force and effect (vi) a deficiency in the borrowing base, as calculated under the credit agreement, or (vii) any default in the payment when due of other indebtedness in excess of \$100,000.

The indenture requires that we give immediate notice to the indenture trustee upon the occurrence of an event of default, unless it has been cured or waived. The indenture trustee may then provide notice to the Series L Bond holders or withhold the notice if the indenture trustee determines in good faith that withholding the notice is in your best interest, unless the default is a failure to pay principal or interest on any Series L Bond.

If an event of default occurs, the indenture trustee or the holders of at least 25% in principal amount of the outstanding Series L Bonds, may by written notice to us declare the unpaid principal and all accrued but unpaid interest on the Series L Bonds to be immediately due and payable. Notwithstanding the foregoing, the indenture limits the ability of the Series L Bond holders to enforce certain rights under the indenture in certain circumstances. These limitations are required subordination provisions under our revolving credit facility and are summarized above under Subordination; Other Indebtedness. The Pledge and Security Agreement permits the trustee to exercise on behalf of the holders of Series L Bonds all rights and remedies as are available to a secured creditor under applicable law, subject to any limitations in the indenture, that agreement or the Intercreditor Agreement. In this regard, the trustee is not authorized under the Pledge and Security Agreement to distribute in kind any collateral in its possession to the holders of Series L Bonds.

Amendment, Supplement and Waiver

Except as provided in this prospectus or the indenture, the terms of the indenture or the Series L Bonds then outstanding may be amended, supplemented or waived with the consent of the holders of at least a majority in principal amount of the Series L Bonds then outstanding (which consent will be presumed if a holder does not object within 30 days of a request for consent), and any existing default or compliance with any provision of the indenture or the Series L Bonds may be waived with the affirmative consent of the holders of a majority in principal amount of the then outstanding Series L Bonds.

Notwithstanding the foregoing, an amendment or waiver will not be effective with respect to the Series L Bonds held by a holder who him, her or itself has not consented if such amendment or waiver:

reduces the principal of or changes the fixed maturity of any Series L Bond;

reduces the rate of or changes the time for payment of interest, including default interest, on any Series L Bond;

waives a default or event of default in the payment of principal or interest on the Series L Bonds, except for a rescission or withdrawal of acceleration of the Series L Bonds made by the holders of at least a majority in aggregate principal amount of the then-outstanding Series L Bonds and a waiver of the payment default that resulted from such acceleration;

makes any change in the provisions of the indenture relating to waivers of past defaults or the rights of holders of Series L Bonds to receive payments of principal of or interest on the Series L Bonds; or

makes any change to the subordination provisions of the indenture that has a material adverse effect on holders of Series L Bonds.

Notwithstanding the foregoing, the following kinds of amendments or supplements to the indenture may be effected by us and the trustee without any consent of any holder of the Series L Bonds:

to cure any ambiguity, defect or inconsistency;

to provide for assumption of our obligations to holders of the Series L Bonds in the case of a merger, consolidation or sale of all or substantially all of our assets;

to provide for additional uncertificated or certificated Series L Bonds;

Table of Contents

to make any change that does not materially and adversely affect the legal rights under the indenture of any holder of Series L Bonds, including but not limited to an increase in the aggregate dollar amount of Series L Bonds which may be outstanding under the indenture and limited in amount thereunder;

to modify or eliminate our policy regarding redemptions elected by a holder of Series L Bonds prior to maturity, including our obligation to redeem Series L Bonds upon the death, bankruptcy or total permanent disability of any holder of the Series L Bonds, but only so long as such modifications do not materially and adversely affect any then-outstanding Series L Bonds;

to comply with requirements of the SEC in order to effect or maintain the qualification of the indenture under the Trust Indenture Act of 1939, or to comply with other applicable federal or state laws or regulations;

to comply with the rules or policies of a depository of the Series L Bonds; or

in connection with an amendment, extension, replacement, renewal or substitution of any senior debt, to amend the subordination provisions of the indenture to conform to the reasonable requirements of the holder or holders of such senior debt.

Rights of Series L Bond Holders

As a Series L Bond holder, you have limited rights to vote on our actions as they are limited by the indenture. In general, you will have the right to vote on whether or not to approve some amendments to the indenture. For a description of these rights, see Amendment, Supplement and Waiver above. You will also have the right to direct some actions that the trustee takes if there is an event of default with respect to the Series L Bonds. For a description of these rights, see above under the caption Events of Default. For a complete description of your rights as a Series L Bond holder, we encourage you to read a copy of the indenture, which is filed as an exhibit to the registration statement of which this prospectus is a part. We will also provide you with a copy of the indenture upon your request.

The trustee and the Series L Bond holders will have the right to direct the time, method and place of conducting any proceeding for some of the remedies available, except as otherwise provided in the indenture. The trustee may require reasonable indemnity, satisfactory to the trustee, from Series L Bond holders before acting at their direction. You will not have any right to pursue any remedy with respect to the indenture or the Series L Bonds unless you satisfy the conditions contained in the indenture.

The Indenture Trustee

General

Bank of Utah has agreed to be the trustee under the indenture. The indenture contains certain limitations on the rights of the trustee, should it become one of our creditors, to obtain payment of claims in certain cases, or to realize on certain property received in respect of any claim as security or otherwise. The trustee will be permitted to engage in other transactions with us.

Subject to certain exceptions, the holders of a majority in principal amount of the then-outstanding Series L Bonds will have the right to direct the time, method and place of conducting any proceeding for exercising any remedy available to the trustee. The indenture provides that if an event of default specified in the indenture shall occur and not be cured, the trustee will be required, in the exercise of its power, to use the degree of care of a reasonable person in the conduct of his own affairs. Subject to such provisions, the trustee will be under no obligation to exercise any of its rights or powers under the indenture at the request of any holder of Series L Bonds, unless the holder shall have offered to the trustee security and indemnity satisfactory to it against any loss, liability or expense.

Table of Contents

Resignation or Removal of the Trustee

Edgar Filing: GWG Holdings, Inc. - Form S-1

The trustee may resign at any time, or may be removed by the holders of a majority of the aggregate principal amount of the outstanding Series L Bonds. In addition, we may remove the trustee for certain failures in its duties, including the insolvency of the trustee or the trustee's ineligibility to serve as trustee under the Trust Indenture Act of 1939. However, no resignation or removal of the trustee may become effective until a successor trustee has accepted the appointment as provided in the indenture.

Reports to Trustee

We will provide the trustee with (i) a calculation date report by the 15th day of each month containing a calculation of the debt coverage ratio that includes a summary of all cash, life insurance policy investments serving as collateral, as well as our total outstanding indebtedness including outstanding principal balances, interest credited and paid, transfers made, any redemption or repayment and interest rate paid; (ii) copies of our audited annual financials, no earlier than when the same become a matter of public record; and (iii) any additional information reasonably requested by the trustee.

Certain Charges

We and our servicing agents, if any, may assess service charges for changing the registration of any Series L Bond to reflect a change in name of the holder, multiple changes in interest payment dates or transfers (whether by operation of law or otherwise) of a Series L Bond by the holder to another person. The indenture permits us to set off, against amounts otherwise payable to you under the Series L Bonds, the amount of these charges.

Variations in Terms and Conditions

We may from time to time vary the terms and conditions of the Series L Bonds offered, including but not limited to minimum initial principal investment amount requirements, maximum aggregate principal amount limits, interest rates, minimum denominations, service and other fees and charges, and redemption provisions. Terms and conditions may be varied by state, locality, principal amount, type of investor (for example, new or current investor) or as otherwise permitted under the indenture governing the securities offered by this prospectus. No change in terms, however, will apply to any Series L Bonds already issued and outstanding at the time of such change.

Satisfaction and Discharge of Indenture

The indenture shall cease to be of further effect upon the payment in full of all of the outstanding Series L Bonds and the delivery of an officer's certificate to the trustee stating that we do not intend to issue additional Series L Bonds under the indenture or, with certain limitations, upon deposit with the trustee of funds sufficient for the payment in full of all of the outstanding Series L Bonds.

Reports

We will publish annual reports containing financial statements and quarterly reports containing financial information for the first three quarters of each fiscal year. We will send copies of these reports, at no charge, to any holder of Series L Bonds who sends us a written request.

Table of Contents

PLAN OF DISTRIBUTION

General

We are offering up to \$1,000,000,000 in principal amount of Series L Bonds on a continuous basis. The Series L Bonds will be sold at their face value and in amounts of \$25,000 or more in principal. There is no minimum amount of Series L Bonds that must be sold before we access and use the proceeds. The proceeds of new sales of Series L Bonds will be paid directly to us promptly following each sale and will not be placed in an escrow account. Even if we sell less than the entire \$1,000,000,000 in Series L Bonds being offered, the Series L Bonds that we sell will be issued, and the proceeds of those Series L Bond sales will be invested, as described in this prospectus.

The Series L Bonds will be offered and sold on a best efforts basis by ____ (our dealer manager) and any participating broker-dealers it engages for this purpose (together the selling group). ____ will be an underwriter of the Series L Bonds for purposes of the Securities Act of 1933. We may also directly offer and sell Series L Bonds apart from the selling group. We and the selling group will offer the Series L Bonds to the public

on the terms set forth in this prospectus and any prospectus supplements we may file from time to time. Both we and the selling group plan to market the Series L Bonds directly to the public primarily through presentations, the Internet, and personal contacts made by us and through the selling group. We may also sell Series L Bonds to registered investment advisors. Neither our dealer manager nor any other broker-dealer participating in our selling group will have any obligation to take or purchase any Series L Bonds. Our dealer manager and each broker-dealer member of our selling group is expected to assist in the offering by: (1) conducting informational meetings for subscribers and other qualified potential purchasers; (2) keeping records of all subscriptions; and (3) training and educating employees regarding the mechanics and regulatory requirements of the offering process.

Members of the selling group will receive sales commissions of up to 5.00% of the gross offering proceeds depending upon the maturity of the Series L Bond sold. In addition, members of our selling group may receive up to 3.00% of the gross offering proceeds as additional underwriting compensation consisting of (i) an accountable and non-accountable expense allowance, (ii) a dealer-manager fee (payable only to _____) for managing and coordinating the offering, and (iii) a wholesaling fee (payable only to wholesaling dealers), in each case depending upon the maturity of the Series L Bond sold. We will not pay referral or similar fees to any accountants, attorneys or other persons in connection with the distribution of the Series L Bonds.

Our dealer manager will enter into participating dealer agreements with certain other broker-dealers that are members of FINRA, referred to as selling group members, to authorize such broker-dealers to sell our Series L Bonds. Upon the sale of Series L Bonds by such broker-dealers, the broker-dealer effecting the sale will receive selling commissions and additional underwriting compensation in connection therewith.

As part of the accountable expense allowance, the dealer manager and members of the selling group are expected to be reimbursed for accountable due diligence expenses incurred by them. Expenses eligible for reimbursement may include travel, lodging, meals and other reasonable out-of-pocket expenses incurred by participating broker-dealers and their personnel when visiting our office to verify information relating to us and this offering, and reimbursement of actual costs of third-party professionals retained to provide due diligence services to our dealer manager and selling group members. In no event will the total selling commissions, additional underwriting compensation and accountable due diligence expenses exceed 8.00% of the aggregate principal amount of Series L Bonds sold.

Our Series L Bonds will also be distributed through registered investment advisors who are generally compensated on a fee-for-service basis by the investor. In the event of the sale of Series L Bonds in our primary offering through an investment advisor compensated on a fee-for-service basis by the investor, our selling group member will waive its right to a commission.

In addition to the sales commissions, fees, allowances and expenses described above, we expect to pay approximately \$1,500,000 in offering and related costs and expenses in connection with this offering. These kinds of expenses include all expenses to be paid by us in connection with the offering (other than sales

Table of Contents

commissions, additional underwriting compensation, and expense allowances and reimbursement to our selling group members), including but not limited to legal, accounting, printing and mailing expenses, registration, qualification and associated securities filing fees and other costs and expenses.

The table below sets forth the maximum amount of sales commissions and additional underwriting compensation (consisting of accountable and non-accountable expense allowances, a dealer-manager fee (payable only to _____), and a wholesaling fee (payable only to wholesaling dealers), and more fully described in fn. 1 to the table below) we may pay in connection with this offering.

Debenture Term	Sales Commission	Additional Underwriting Compensation (1)	Total
1 year	1.00%	3.00%	4.00%
2 years	3.25%	3.00%	6.25%
3 years	4.25%	3.00%	7.25%
5 years	4.90%	3.00%	7.90%

Debenture Term	Sales Commission	Additional Underwriting Compensation (1)	Total
7 years	5.00%	3.00%	8.00%

- (1) As described above, additional underwriting compensation includes (i) a non-accountable allowance expense of 1.00% for all Series L Bond maturities; (ii) an accountable allowance expense of up to 0.70% of gross offering proceeds for all Series L Bond maturities; (iii) a dealer-manager fee of 0.50% of gross offering proceeds for all Series L Bond maturities; and (iv) if applicable, a wholesaling fee of up to 0.80% of gross offering proceeds for all Series L Bond maturities.

The line items reflected in the table below are our current estimates of average sales commissions and additional underwriting compensation (including accountable due diligence expenses) that we will pay. Specifically, we estimate that the average sales commission will be 4.25%, or \$42,500,000 based on \$1,000,000,000 in principal amount of Series L Bonds sold, and the average additional underwriting compensation will be 3.00%, or \$30,000,000 based on \$1,000,000,000 in principal amount of Series L Bonds sold. The components of additional underwriting compensation are detailed in fn. 1 to the table below. Actual costs may differ from the percentages and amounts shown in the table below, subject, however, to the limitations noted above.

Series L Bonds Sold	Sales Commission	Additional Underwriting Compensation (1)	Total
\$300,000,000	\$ 12,750,000	\$ 9,000,000	7.25%
500,000,000	21,250,000	15,000,000	7.25%
1,000,000,000	42,500,000	30,000,000	7.25%

- (1) Additional underwriting compensation consists of all selling compensation (other than sales commissions) paid in the form of an accountable and non-accountable expense allowance, a dealer-manager fee, and wholesale commissions. We have assumed the maximum accountable and non-accountable allowance expense of 1.70% or \$17,000,000 of gross offering proceeds (assuming \$1,000,000,000 in principal amount of Series L Bonds sold), dealer-manager fees of 0.50% or \$5,000,000 of gross offering proceeds (assuming \$1,000,000,000 in principal amount of Series L Bonds sold), and wholesale commissions of 0.80% or \$8,000,000 of gross offering proceeds (assuming \$1,000,000,000 in principal amount of Series L Bonds sold) will be paid by us in connection with the offering.

Our dealer manager holds the FINRA licenses for wholesalers employed by us, who attend local, regional and national conferences of the participating broker-dealers and who contact participating broker-dealers and their registered representatives to make presentations concerning us and this offering and to encourage them to sell our Series L Bonds. The wholesalers receive base salaries and bonuses as compensation for their efforts. We host training and education meetings for broker-dealers and their representatives. The costs of the training and education meetings will be borne by us.

Table of Contents

In accordance with FINRA rules, in no event will our total underwriting compensation to FINRA members, including but not limited to sales commissions, the dealer-manager fee and accountable and non-accountable expense reimbursements to our dealer manager and selling group broker-dealers, exceed 8.00% of our gross offering proceeds, in the aggregate.

We will indemnify the participating broker-dealers and our dealer manager against some civil liabilities, including certain liabilities under the Securities Act of 1933 and liabilities arising from breaches of our representations and warranties contained in the Managing Broker-Dealer Agreement. If we are unable to provide this indemnification, we may contribute to payments the indemnified parties may be required to make in respect of those liabilities.

The foregoing is a summary of the material terms relating to the plan of distribution of the Series L Bonds contained in the Managing Broker-Dealer Agreement. Any amendment to the Managing Broker-Dealer Agreement will be filed as an exhibit to an amendment to the registration statement of which this prospectus is a part.

Settlement Procedures

If you purchase Series L Bonds through a broker-dealer who is a DTC participant and offers DTC settlement, then you can place an order for the purchase of Series L Bonds through your broker-dealer. A broker-dealer using this service will have an account with DTC in which your funds will be placed to facilitate the anticipated monthly closing cycle. Orders will be executed by your broker-dealer electronically and you must coordinate with your broker-dealer's registered representative to pay the full purchase price of the Series L Bonds by the settlement date, which depends on when you place the order during the monthly settlement cycle. If you purchase your Series L Bonds in this manner, your purchase price will not be held in escrow.

You also have the option to elect to settle your purchase directly with us, the Company. If you elect to use direct settlement with us, you should complete and sign a Subscription Agreement similar to the one filed as an exhibit to the registration statement of which this prospectus is a part. A form of Subscription Agreement is available from your broker-dealer's registered representative. Once completed and signed, your Subscription Agreement should be provided to your broker-dealer who will deliver it to us to be held, together with your related subscription funds, until our acceptance of your subscription. In connection with a direct settlement subscription, you should pay the full purchase price of the Series L Bonds to us as set forth in the Subscription Agreement. Subscribers may not withdraw funds from the subscription account. Subscriptions will be effective upon our acceptance of your Subscription Agreement and related funds, and we reserve the right to reject any subscription in whole or in part.

Covered Security

Our Series L Bonds are a covered security. The term covered security applies to securities exempt from state registration because of their oversight by federal authorities and national-level regulatory bodies pursuant to Section 18 of the Securities Act of 1933. Generally, securities listed on national exchanges are the most common type of covered security exempt from state registration. A non-traded security also can be a covered security if it has a seniority greater than or equal to other securities from the same issuer that are listed on a national exchange. Our Series L Bonds are a covered security because it is senior to our common stock, which is listed on the Nasdaq Global Market, and therefore our offering Series L Bonds are exempt from state registration.

Table of Contents

MATERIAL FEDERAL INCOME TAX CONSIDERATIONS

The following is a general discussion of the material United States (U.S.) federal income tax considerations relating to the initial purchase, ownership and disposition of the Series L Bonds by U.S. and non-U.S. holders. This discussion is a summary only and is not a complete analysis of all the potential tax considerations relating to the purchase, ownership and disposition of the Series L Bonds. We have based this summary on current provisions of the Code of 1986, as amended (the Code), applicable U.S. Treasury Regulations promulgated thereunder, judicial opinions, and published rulings of the Internal Revenue Service (the IRS), all as in effect on the date of this prospectus. However, these laws and other guidance are subject to differing interpretations or change, possibly with retroactive effect. In addition, we have not sought, and will not seek, a ruling from the U.S. Internal Revenue Service (IRS) or an opinion of counsel with respect to any tax consequences of purchasing, owning or disposing of Series L Bonds. Thus, the IRS could challenge one or more of the tax consequences or matters described in this prospectus; and there can be no assurance that any position taken by the IRS would not be sustained.

This discussion is limited to purchasers of Series L Bonds who acquire the Series L Bonds from us in this offering and hold the Series L Bonds as capital assets for federal income tax purposes. This discussion does not address all possible tax consequences that may be applicable to you in light of your specific circumstances. For instance, this discussion does not address the alternative minimum tax provisions of the Code, or special rules applicable to some categories of investors such as financial institutions, insurance companies, tax-exempt organizations, dealers in securities, real estate investment trusts, regulated investment companies, or persons who hold Series L Bonds as part of a hedge, conversion or

Edgar Filing: GWG Holdings, Inc. - Form S-1

constructive sale transaction, straddle or other risk reduction transaction that may be subject to special rules. This discussion also does not address the tax consequences arising under the laws of any foreign, state or local jurisdiction; or any U.S. estate or gift tax laws.

If you are considering the purchase of a Series L Bond, you should consult your own tax advisors as to the particular tax consequences to you of acquiring, holding or otherwise disposing of the Series L Bonds, including the effect and applicability of state, local or foreign tax laws, or any U.S. estate and gift tax laws.

As used in this discussion, the term **U.S. holder** means a holder of a Series L Bond that is:

- (i) for United States federal income tax purposes, a citizen or resident of the United States;
- (ii) a corporation, partnership or other entity created or organized in or under the laws of the United States or of any political subdivision thereof or other entity characterized as a corporation or partnership for federal income tax purposes;
- (iii) an estate, the income of which is subject to United States federal income taxation regardless of its source; or
- (iv) a trust, the administration of which is subject to the primary supervision of a court within the United States and which has one or more United States persons with authority to control all substantial decisions, or if the trust was in existence on August 20, 1996, and has elected to continue to be treated as a United States trust.

For the purposes of this discussion, a **non-U.S. holder** means any holder of Series L Bonds other than a U.S. holder. Any Series L Bond purchaser who is not a U.S. citizen will be required to furnish documentation, on IRS Form W-8BEN, that clearly states whether it is subject to U.S. withholding taxes, in accordance with applicable requirements of the United States taxing authority.

Characterization of the Series L Bonds

The federal income tax consequences of owning Series L Bonds depend on characterization of the Series L Bonds as debt for federal income tax purposes, rather than as equity interests or a partnership among the holders of the Series L Bonds. We believe that the Series L Bonds have been structured in a manner that will allow the Series L Bonds to be characterized as debt for federal income tax purposes. However, this is only

111

Table of Contents

our belief; and no ruling from the IRS or an opinion of counsel has been sought in this regard. Thus, the IRS could successfully challenge this characterization.

If the Series L Bonds were treated as equity interests, there could be adverse effects on some holders. For example, payments on the Series L Bonds could (1) if paid to non-U.S. holders, be subject to federal income tax withholding; (2) constitute unrelated business taxable income to some tax-exempt entities, including pension funds and some retirement accounts (if the relationship were characterized as a partnership for tax purposes); and (3) cause the timing and amount of income that accrues to holders of Series L Bonds to be different from that described below.

Because of these potential adverse effects, you are urged to consult your own tax advisors as to the tax consequences that may apply to your particular situation in the event the Series L Bonds are re-characterized as equity interests; and as to the likelihood that the Series L Bonds could be so re-characterized. The remainder of this discussion assumes that the Series L Bonds are characterized as debt.

Taxation of U.S. Holders

Stated Interest

Under general federal income tax principles, you must include stated interest in income in accordance with the method of accounting you use for federal income tax purposes. Accordingly, if you are using the accrual method of tax accounting, you must include stated interest in income as it accrues. If you are using the cash method of tax accounting, you must include stated interest in income as it is actually or constructively

received. Payments of interest to taxable holders of Series L Bonds will constitute portfolio income, and not passive activity income, for the purposes of the passive loss limitations of the Code. Accordingly, income arising from payments on the Series L Bonds will not be subject to reduction by losses from passive activities of a holder.

Income attributable to interest payments on the Series L Bonds may be offset by investment expense deductions, subject to the limitation that individual investors may only deduct miscellaneous itemized deductions, including investment expenses other than interest, to the extent these deductions exceed 2% of the investor's adjusted gross income.

If a partnership (or other entity or arrangement treated as a partnership for U.S. federal income tax purposes) holds Series L Bonds, the tax treatment of a partner generally will depend upon the status of the partner and the activities of the partnership. If you are a partner in a partnership purchasing Series L Bonds, we urge you to consult your tax advisor.

Disposition of Series L Bonds

In general, a U.S. holder will recognize gain or loss upon the sale, exchange or other taxable disposition of a Series L Bond measured by the difference between (1) the sum of the cash and the fair market value of all other property received on such disposition, excluding any portion of the payment that is attributable to accrued interest on the Series L Bonds; and (2) your adjusted tax basis in the Series L Bond. A U.S. holder's adjusted tax basis in a Series L Bond generally will be equal to the price the U.S. holder paid for the Series L Bond. Any of this gain or loss generally will be long-term capital gain or loss if, at the time of any such taxable disposition, the Series L Bond was a capital asset in the hands of the holder and was held for more than one year. Under current law, net long-term capital gain recognized by individual U.S. holders in tax years beginning before January 1, 2013, is eligible for a reduced rate of taxation. The deductibility of capital losses is subject to annual limitations.

The terms of the Series L Bonds may be modified upon the consent of a specified percentage of holders and, in some cases, without consent of the holders. In addition, the Series L Bonds may be assumed upon the occurrence of specific transactions. The modification or assumption of a Series L Bond could, in some instances, give rise to a deemed exchange of a Series L Bond for a new debt instrument for federal income

Table of Contents

tax purposes. If an exchange is deemed to occur by reason of a modification or assumption, you could realize gain or loss without receiving any cash.

Additional Tax on Net Investment Income

For taxable years beginning after December 31, 2012, if you are a U.S. holder other than a corporation, you generally will be subject to a 3.8% additional tax (the Medicare tax) on the lesser of (1) your net investment income for the taxable year, and (2) the excess of your modified adjusted gross income for the taxable year over a certain threshold. Your net investment income generally will include any income or gain recognized by you with respect to our Series L Bonds, unless such income or gain is derived in the ordinary course of the conduct of your trade or business (other than a trade or business that consists of certain passive or trading activities).

Considerations for Tax-Exempt Holders of Series L Bonds

Tax-exempt entities, including charitable corporations, pension plans, profit sharing or stock bonus plans, individual retirement accounts and some other employee benefit plans are subject to federal income tax on unrelated business taxable income. For example, net income derived from the conduct of a trade or business regularly carried on by a tax-exempt entity or by a partnership in which it is a partner is treated as unrelated business taxable income.

A \$1,000 special deduction is allowed in determining the amount of unrelated business taxable income subject to tax. Tax-exempt entities taxed on their unrelated business taxable income are also subject to the alternative minimum tax for items of tax preference which enter into the computation of unrelated business taxable income.

In general, interest income does not constitute unrelated business taxable income. However, under the debt-financed property rules, if tax-exempt holders of Series L Bonds finance the acquisition or holding of Series L Bonds with debt, interest on the Series L Bonds will be

taxable as unrelated business taxable income. The Series L Bonds will be treated as debt-financed property if the debt was incurred to acquire the Series L Bonds or was incurred after the acquisition of the Series L Bonds, so long as the debt would not have been incurred but for the acquisition and, at the time of the acquisition, the incurrence of the debt has already occurred or was foreseeable.

Non-U.S. Holders

The following discussion is a summary of the principal U.S. federal income consequences resulting from the ownership of the Series L Bonds by non-U.S. holders. However, application of the U.S. federal income tax rules associated with non-U.S. holders is complex and factually sensitive. Thus, if you could be considered to be a non-U.S. holder, you are urged to consult your own tax advisors with respect to the application of the federal income tax rules for your particular situation.

Payments of Interest to Non-U.S. Holders

Subject to the discussion below under Backup Withholding and Information Reporting, payments of interest received by a non-U.S. holder generally will not be subject to U.S. federal withholding tax, provided (1) that (a) the non-U.S. holder does not own, actually or constructively, 10% or more of the total combined voting power of all classes of our stock entitled to vote; (b) the non-U.S. holder is not a controlled foreign corporation, actually or constructively, through stock ownership; and (c) the beneficial owner of the Series L Bond complies with the certification requirements, including delivery of a statement, signed by the holder under penalties of perjury, certifying that the holder is a foreign person and provides its name and address; or (2) that the non-U.S. holder is entitled to the benefits of an income tax treaty under which the interest is exempt from U.S. withholding tax and the non-U.S. holder complies with the reporting requirements. If a Series L Bond is held through a securities clearing organization or other specified financial institutions (an Intermediary), the Intermediary may provide the relevant signed statement and, unless the Intermediary is a qualified intermediary as defined under the Code, the signed statement provided by the Intermediary must

Table of Contents

be accompanied by a copy of a valid Form W-8BEN provided by the non-U.S. beneficial holder of the Series L Bond.

Payments of interest not exempt from United States federal withholding tax as described above will be subject to a withholding tax at the rate of 30%, subject to reduction under an applicable income tax treaty. Payments of interest on a Series L Bond to a non-U.S. holder generally will not be subject to U.S. federal income tax, as opposed to withholding tax, unless the income is effectively connected with the conduct by the non-U.S. holder of a trade or business in the United States. To claim the benefit of a lower treaty withholding rate, a non-U.S. holder must provide a properly executed IRS Form W-8BEN to us or our paying agent before the payment of stated interest; and may be required to obtain a U.S. taxpayer identification number and provide documentary evidence issued by foreign governmental authorities to prove residence in the foreign country. You should consult your own tax advisor to determine the effects of the application of the U.S. federal withholding tax to your particular situation.

Disposition of the Series L Bonds by Non-U.S. Holders

Subject to the discussion below under Backup Withholding and Information Reporting, a non-U.S. holder generally will not be subject to United States federal income tax, and generally no tax will be withheld with respect to gains realized on the disposition of a Series L Bond, unless (a) the gain is effectively connected with a United States trade or business conducted by the non-U.S. holder or (b) the non-U.S. holder is an individual who is present in the United States for 183 or more days during the taxable year of the disposition and other requirements are satisfied.

Non-U.S. Holders Subject to U.S. Income Taxation

If interest and other payments received by a non-U.S. holder with respect to the Series L Bonds, including proceeds from the disposition of the Series L Bonds, are effectively connected with the conduct by the non-U.S. holder of a trade or business within the United States, or the non-U.S. holder is otherwise subject to United States federal income taxation on a net basis with respect to the holder's ownership of the Series L Bonds, or are individuals that have by operation of law become residents in the United States for federal income tax purposes, the non-U.S. holder generally will be subject to the rules described above applicable to U.S. holders of Series L Bonds, subject to any modification provided under an applicable income tax treaty. If any of these non-U.S. holders is a corporation, it may also be subject to a U.S. branch profits tax at a 30% rate.

Backup Withholding and Information Reporting

Non-corporate U.S. holders may be subject to backup withholding at a rate of 31% on payments of principal, premium, and interest on, and the proceeds of the disposition of, the Series L Bonds. In general, backup withholding will be imposed only if the U.S. holder (1) fails to furnish its taxpayer identification number (TIN), which for an individual would be his or her Social Security number; (2) furnishes an incorrect TIN; (3) is notified by the IRS that it has failed to report payments of interest or dividends; or (4) under some circumstances, fails to certify under penalty of perjury that it has furnished a correct TIN and has been notified by the IRS that it is subject to backup withholding tax for failure to report interest or dividend payments. In addition, the payments of principal and interest to U.S. holders generally will be subject to information reporting. You should consult your tax advisors regarding your qualification for exemption from backup withholding and the procedure for obtaining an exemption, if applicable.

Backup withholding generally will not apply to payments made to a non-U.S. holder of a Series L Bond who provides the certification that it is a non-U.S. holder, and the payor does not have actual knowledge that a certificate is false, or otherwise establishes an exemption from backup withholding. Payments by United States office of a broker of the proceeds of a disposition of the Series L Bonds generally will be subject to backup withholding at a rate of 31% unless the non-U.S. holder certifies it is a non-U.S. holder under penalties of perjury or otherwise establishes an exemption. In addition, if a foreign office of a foreign custodian, foreign nominee or other foreign agent of the beneficial owner, or if a foreign office of a

114

Table of Contents

foreign broker pays the proceeds of the sale of a Series L Bond to the seller, backup withholding and information reporting will not apply; provided that the nominee, custodian, agent or broker is not a United States related person, or a person which derives more than 50% of its gross income for some periods from the conduct of a trade or business in the United States or is a controlled foreign corporation. The payment by a foreign office of a broker that is a United States person or a United States related person of the proceeds of the sale of Series L Bonds will not be subject to backup withholding, but will be subject to information reporting unless the broker has documentary evidence in its records that the beneficial owner is not a United States person for purposes of the backup withholding and information reporting requirements and other conditions are met, or the beneficial owner otherwise establishes an exemption.

The amount of any backup withholding imposed on a payment to a holder of a Series L Bond will be allowed as a credit against the holder's United States federal income tax liability and may entitle the holder to a refund; provided that the required information is furnished to the IRS.

115

Table of Contents

STATE, LOCAL AND FOREIGN TAXES

We make no representations regarding the tax consequences of the purchase, ownership or disposition of the Series L Bonds under the tax laws of any state, locality or foreign country. You should consult your own tax advisors regarding these state and foreign tax consequences.

ERISA CONSIDERATIONS

General

Title I of the Employee Retirement Income Security Act of 1974, as amended (ERISA), and Section 4975 of the Code impose restrictions on employee benefit plans that are subject to ERISA, or plans or arrangements that are subject to Code Section 4975, and on persons who are parties in interest or disqualified persons with respect to those plans or arrangements. Some employee benefit plans, like governmental plans and church plans (if no election has been made under Section 410(d) of the Code), are not subject to the restrictions of Title I of ERISA or Code Section 4975, and assets of these plans may be invested in the Series L Bonds without regard to the ERISA considerations described below, subject to the Code and other applicable federal and state laws affecting tax-exempt organizations generally. Any plan fiduciary that proposes to cause a plan to acquire any of the Series L Bonds should consult with its counsel with respect to the potential consequences under ERISA and

the Code of the plan's acquisition and ownership of the Series L Bonds. Investments by plans are also subject to ERISA's and the Code's general fiduciary requirements, including the requirement of investment prudence and diversification and the requirement that a plan's investments be made in accordance with the documents governing the plan.

Prohibited Transactions

General

Section 406 of ERISA and Section 4975 of the Code prohibits certain parties in interest and disqualified persons with respect to a plan from engaging in select transactions involving a plan and its assets unless a statutory, regulatory or administrative exemption applies to the transaction. Section 4975 of the Code imposes excise taxes, or in some cases a civil penalty may be assessed under Section 502(i) of ERISA, on parties in interest that engage in non-exempt prohibited transactions. Section 502(i) of ERISA requires the Secretary of the U.S. Department of Labor (Labor) to assess a civil penalty against a fiduciary who breaches any fiduciary responsibility under, or commits any other violation of, part 4 of Title I of ERISA, or any other person who knowingly participates in a breach or violation.

Plan Asset Regulations

Labor has issued regulations concerning the definition of what constitutes the assets of a plan for purposes of ERISA and the prohibited transaction provisions of the Code. The plan asset regulations describe the circumstances where the assets of an entity in which a plan invests will be considered to be plan assets, so that any person who exercises control over the assets would be subject to ERISA's fiduciary standards. Generally, under the plan asset regulation, when a plan invests in another entity, the plan's assets do not include, solely by reason of the investment, any of the underlying assets of the entity. However, the plan asset regulation provides that, if a plan acquires an equity interest in an entity that is neither a publicly-offered security nor a security issued by an investment company registered under the Investment Company Act of 1940 the assets of the entity will be treated as assets of the plan investor unless exceptions apply.

Under the plan asset regulations the term equity interest is defined as any interest in an entity other than an instrument that is treated as indebtedness under applicable local law and that has no substantial equity features. Although the plan asset regulation is silent with respect to the question of which law constitutes applicable local law for this purpose, Labor has stated that these determinations should be made under the state law governing interpretation of the instrument in question. In the preamble to the plan asset regulation, Labor declined to provide a precise definition of what features are equity features or the

Table of Contents

circumstances under which the features would be considered substantial, noting that the question of whether a plan's interest has substantial equity features is an inherently factual one, but that in making that determination it would be appropriate to take into account whether the equity features are such that a plan's investment would be a practical vehicle for the indirect provision of investment management services. We believe that the Series L Bonds will be classified as indebtedness without substantial equity features for ERISA purposes.

Under the plan asset regulations the term publicly-offered security is defined as a security that is (i) freely transferable, (ii) part of a class of securities that is widely held, and (iii) either (A) part of a class of securities registered under section 12(b) or 12(g) of the Securities Exchange Act of 1934 or (B) sold to the plan as part of an offering of securities to the public pursuant to an effective registration statement under the Securities Act of 1933 and the class of securities of which such security is a part is registered under the Securities Exchange Act of 1934 within 120 days after the end of the fiscal year of the issuer during which the offering of such securities to the public occurred. For purposes of the above, a class of securities is considered to be widely held if it is owned by 100 or more investors independent of the issuer and of one another. In the case of this offering, while the offer and sale of the Series L Bonds have been registered under the Securities Act of 1933, the Series L Bonds themselves have not been registered under the Securities Exchange Act of 1934. For this reason, we believe that the Series L Bonds will not likely meet the definition for publicly-offered security under the plan asset regulations.

In light of the foregoing, if the Series L Bonds were deemed to be equity interests for this purpose and no statutory, regulatory, or administrative exception applies, we could be considered to hold plan assets by reason of a plan's investment in the Series L Bonds. These plan assets would include an undivided interest in all of our assets. In this case, we may be considered a fiduciary with respect to the investing plans. We would be subject to the fiduciary responsibility provisions of Title I of ERISA, including the prohibited transaction provisions of Section 406 of ERISA and Section 4975 of the Code, and to Section 4975 of the Code with respect to transactions involving any of our assets. The ERISA fiduciary standards could affect the way we conduct the business, which would have consequences for all investors, not just those that are employee

benefit plans.

Depending on the relevant facts and circumstances, prohibited transaction exemptions may apply to the purchase or holding of the Series L Bonds. See, for example, Prohibited Transaction Class Exemption (PTE) 96-23, which exempts some transactions effected on behalf of a plan or by an in-house asset manager; PTE 95-60, which exempts some transactions between insurance company general accounts and parties in interest; PTE 91-38, which exempts some transactions between bank collective investment funds and parties in interest; PTE 90-1, which exempts some transactions between insurance company pooled separate accounts and parties in interest; or PTE 84-14, which exempts some transactions effected on behalf of a plan by a qualified professional asset manager. However, there can be no assurance that any of these exemptions will apply with respect to any plan's investment in the Series L Bonds, or that the exemption, if it did apply, would apply to all prohibited transactions that may occur in connection with the investment.

Any plan fiduciary considering whether to purchase Series L Bonds on behalf of a plan should consult with its counsel regarding the applicability of the fiduciary responsibility and prohibited transaction provisions of ERISA and the Code. Before purchasing any Series L Bonds, a fiduciary of a plan should make its own determination as to (1) whether GWG Holdings, as issuer of and borrower under the Series L Bonds, is a party in interest under ERISA or a disqualified person under the Code with respect to the plan; (2) the availability of the relief provided in the plan asset regulation and (3) the availability of any other prohibited transaction exemptions. In addition, purchasers that are insurance companies should consult their own ERISA counsel with respect to their fiduciary responsibilities associated with their purchase and ownership of the Series L Bonds, including any responsibility under the Supreme Court case *John Hancock Mutual Life Insurance Co. v. Harris Trust and Savings Bank*.

LEGAL MATTERS

Certain legal matters in connection with the Series L Bonds will be passed upon for us by Maslon Edelman Borman & Brand, LLP, of Minneapolis, Minnesota.

EXPERTS

The consolidated financial statements of GWG Holdings, Inc. and its subsidiaries as of and for the year ended December 31, 2013, included in this prospectus and in the related registration statement, have been audited by Baker Tilly Virchow Krause, LLP, an independent registered public accounting firm. The consolidated financial statements of GWG Holdings, Inc. and its subsidiaries as of and for the year ended December 31, 2012, included in this prospectus and in the related registration statement, have been audited by Mayer Hoffman McCann P.C., an independent registered public accounting firm. As indicated in their reports with respect thereto, these consolidated financial statements are included in this prospectus in reliance upon the authority of such firms as experts in auditing and accounting, with respect to each such respective report.

WHERE YOU CAN FIND MORE INFORMATION

We have filed with the SEC a registration statement on Form S-1 under the Securities Act with respect to the Series L Bonds to be offered and sold pursuant to the prospectus which is a part of that registration statement. This prospectus does not contain all the information contained in the registration statement. For further information with respect to us and the Series L Bonds to be sold in this offering, we refer you to the registration statement, including the agreements, other documents and schedules filed as exhibits to the registration statement.

We file annual, quarterly and current reports, and other information with the SEC. We intend to make these filings available on our website at www.gwglife.com. Information on our website is not incorporated by reference in this prospectus. We maintain an office at 220 South Sixth Street, Suite 1200, Minneapolis, MN 55402 where all records concerning the Series L Bonds are to be retained. Series L Bond holders and their representatives can request information regarding the Series L Bonds by contacting our office by mail at our address or by telephone at (612) 746-1944 or by fax at (612) 746-0445. Upon request, we will provide copies of our filings with the SEC free of charge to our investors. Our SEC filings, including the registration statement of which this prospectus is a part, will also be available on the SEC's Internet site at <http://www.sec.gov>. You may read and copy all or any portion of the registration statement or any reports, statements or other information we file at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549. In addition, you may call the SEC at 1-800-SEC-0330 for further information on the operation of the public reference room. You may receive copies of these documents upon payment of a duplicating fee by writing to the SEC.

To the Shareholders, Audit Committee and Board of Directors
 GWG Holdings, Inc.
 Minneapolis, MN

We have audited the accompanying consolidated balance sheet of GWG Holdings, Inc. as of December 31, 2013, and the related consolidated statements of operations, changes in stockholders' equity, and cash flows for the year then ended. These consolidated financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of its internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management as well as evaluating the overall consolidated financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of GWG Holdings, Inc. as of December 31, 2013 and the results of their operations and their cash flows for the year then ended, in conformity with U.S. generally accepted accounting principles.
