CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

All statements contained in this Quarterly Report on Form 10-Q (“Form 10-Q”) for the registrant, other than statements of historical facts, that address future activities, events or developments are forward-looking statements, including, but not limited to, statements containing the words “believe,” “anticipate,” “expect” and words of similar import. These statements are based on certain assumptions and analyses made by us in light of our experience and our assessment of historical trends, current conditions and expected future developments as well as other factors we believe are appropriate under the circumstances. However, whether actual results will conform to the expectations and predictions of management is subject to a number of risks and uncertainties that may cause actual results to differ materially.

Such risks include, among others, the following: national and local general economic and market conditions; our ability to sustain, manage or forecast our growth; raw material costs and availability; new product development and introduction; existing government regulations and changes in, or the failure to comply with, government regulations; adverse publicity; competition; the loss of significant customers or suppliers; fluctuations and difficulty in forecasting operating results; changes in business strategy or development plans; business disruptions; the ability to attract and retain qualified personnel; the ability to protect technology; and other factors referenced in this and previous filings.

Consequently, all of the forward-looking statements made in this Form 10-Q are qualified by these cautionary statements and there can be no assurance that the actual results anticipated by management will be realized or, even if substantially realized, that they will have the expected consequences to or effects on our business operations.

Note 1 – DESCRIPTION OF BUSINESS AND ORGANIZATION

China Jo-Jo Drugstores, Inc. (“Jo-Jo Drugstores” or the “Company”), was incorporated in Nevada on December 19, 2006, originally under the name “Kerrisdale Mining Corporation”. On September 24, 2009, the Company changed its name to “China Jo-Jo Drugstores, Inc.” in connection with a share exchange transaction as described below.

On September 17, 2009, the Company completed a share exchange transaction with Renovation Investment (Hong Kong) Co., Ltd. (“Renovation”), whereby 7,900,000 shares of common stock were issued to the stockholders of Renovation in exchange for 100% of the capital stock of Renovation. The completion of the share exchange transaction resulted in a change of control. The share exchange transaction was accounted for as a reverse acquisition and recapitalization and, as a result, the consolidated financial statements of the Company (the legal acquirer) are, in substance, those of Renovation (the accounting acquirer), with the assets and liabilities, and revenues and expenses, of the Company being included effective from the date of the share exchange transaction. Renovation has no substantive operations of its own except for its holdings of Zhejiang Jiuxin Investment Management Co., Ltd. (“Jiuxin Management”), Zhejiang Shouantang Medical Technology Co., Ltd. (“Shouantang Technology”), Hangzhou Jiutong Medical Technology Co., Ltd (“Jiutong Medical”), and Hangzhou Jiuyi Medical Technology Co. Ltd. (“Jiuyi Technology”), its wholly-owned subsidiaries.

The Company is an online and offline retailer and wholesale distributor of pharmaceutical and other healthcare products in the People’s Republic of China (“China” or the “PRC”). The Company’s offline retail business is comprised primarily of pharmacies, which are operated by Hangzhou Jiuzhou Grand Pharmacy Chain Co., Ltd. (“Jiuzhou Pharmacy”), a company that the Company controls through contractual arrangements. On March 31, 2017, Jiuxin Management established a subsidiary, Lin’ An Jiuzhou Pharmacy Co., Ltd (“Lin’ An Jiuzhou”) to operate drugstores in Lin’an City. During the six months ending September 30, 2017, Jiuzhou Pharmacy established the following companies, each of which operates a drugstore in Hangzhou City:

Entity Name	Date Established
Hangzhou Jiuben Pharmacy Co., Ltd (“Jiuben Pharmacy”)	April 27, 2017
Hangzhou Jiuli Pharmacy Co., Ltd (“Jiuli Pharmacy”)	May 22, 2017
Hangzhou Jiuxiang Pharmacy Co., Ltd (“Jiuxiang Pharmacy”)	May 26, 2017
Hangzhou Jiuheng Pharmacy Co., Ltd (“Jiuheng Pharmacy”)	June 6, 2017
Hangzhou Jiujiu Pharmacy Co., Ltd (“Jiujiu Pharmacy”)	June 8, 2017
Hangzhou Jiuyi Pharmacy Co., Ltd (“Jiuyi Pharmacy”)	June 8, 2017

Hangzhou Jiuyuan Pharmacy Co., Ltd (“Jiuyuan Pharmacy”) July 13, 2017

Hangzhou Jiumu Pharmacy Co., Ltd (“Jiumu Pharmacy”) July 21, 2017

Hangzhou Jiurui Pharmacy Co., Ltd (“Jiurui Pharmacy”) August 4, 2017

The Company’s offline retail business also includes three medical clinics through Hangzhou Jiuzhou Clinic of Integrated Traditional and Western Medicine (“Jiuzhou Clinic”) and Hangzhou Jiuzhou Medical and Public Health Service Co., Ltd. (“Jiuzhou Service”), both of which are also controlled by the Company through contractual arrangements. On December 18, 2013, Jiuzhou Service established, and held 51% of, Hangzhou Shouantang Health Management Co., Ltd. (“Shouantang Health”), a PRC company licensed to sell health care products. Shouantang Health was closed in April 2015. In May 2016, Hangzhou Shouantang Bio-technology Co., Ltd. (“Shouantang Bio”), a wholly-owned subsidiary of Shouantang Technology, set up and held 49% of Hangzhou Kahamadi Bio-technology Co., Ltd. (“Kahamadi Bio”), a joint venture specialized in brand name development for nutritional supplements.

The Company currently conducts its online retail pharmacy business through Jiuzhou Pharmacy, which holds the Company’s online pharmacy license. Prior to November 2015, the Company primarily conducted its online retail pharmacy business through Zhejiang Quannuo Internet Technology Co., Ltd. (“Quannuo Technology”). In May 2015, the Company established Zhejiang Jianshun Network Technology Co. Ltd, a joint venture with Shanghai Jianbao Technology Co., Ltd. (“Jianshun Network”), in order to develop its online pharmaceutical sales from large commercial medical insurance companies. On September 10, 2015, Renovation set up a new entity Jiuyi Technology to provide additional technical support such as webpage development to our online pharmacy business. In November 2015, the Company sold all of the equity interests of Quannuo Technology to six individuals for approximately \$17,121 (RMB107,074). After the sale, its technical support function has been transferred back to Jiuzhou Pharmacy, which hosts our online pharmacy.

The Company’s wholesale business is primarily conducted through Zhejiang Jiuxin Medicine Co., Ltd. (“Jiuxin Medicine”), which is licensed to distribute prescription and non-prescription pharmaceutical products throughout China. Jiuzhou Pharmacy acquired Jiuxin Medicine on August 25, 2011.

The Company’s herb farming business is conducted by Hangzhou Qianhong Agriculture Development Co., Ltd. (“Qianhong Agriculture”), a wholly-owned subsidiary of Jiuxin Management, which operates a cultivation project of herbal plants used for traditional Chinese medicine (“TCM”).

The accompanying consolidated financial statements reflect the activities of the Company and each of the following entities:

Jiuzhou Pharmacy, Jiuzhou Clinic and Jiuzhou Service have been under the common control of Mr. Lei Liu, Mr. Chong'an Jin and Ms. Li Qi, the three shareholders of Renovation (the "Owners") since their respective establishment dates, pursuant to agreements among the Owners to vote their interests in concert as memorialized in a voting (1) rights agreement. Based on such voting rights agreement, the Company has determined that common control exists among these three companies. The Owners have operated these three companies in conjunction with one another since each company's respective establishment date. Jiuxin Medicine is also deemed under the common control of the Owners as a subsidiary of Jiuzhou Pharmacy.

To comply with certain foreign ownership restrictions of pharmacy and medical clinic operators, Jiuxin Management entered into a series of contractual arrangements with Jiuzhou Pharmacy, Jiuzhou Clinic and Jiuzhou Service on August 1, 2009. These contractual arrangements are comprised of five agreements: a consulting services agreement, operating agreement, equity pledge agreement, voting rights agreement and option agreement. Because such agreements obligate Jiuxin Management to absorb all of the risks of loss from the activities of (2) Jiuzhou Pharmacy, Jiuzhou Clinic and Jiuzhou Service, and enable the Company (through Jiuxin Management) to receive all of their expected residual returns, the Company accounts for each of the three companies (as well as subsidiaries of Jiuzhou Pharmacy) as a variable interest entity ("VIE") under the accounting standards of the Financial Accounting Standards Board ("FASB"). Accordingly, the financial statements of Jiuzhou Pharmacy, Jiuzhou Clinic and Jiuzhou Service, as well as the subsidiary under the control of Jiuzhou Pharmacy, Jiuxin Medicine and Shouantang Bio are consolidated into the financial statements of the Company.

Note 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation and consolidation

The accompanying consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (“US GAAP”). The consolidated financial statements include the financial statements of the Company, its wholly-owned subsidiaries and VIEs. All significant inter-company transactions and balances between the Company, its subsidiaries and VIEs are eliminated upon consolidation.

Consolidation of variable interest entities

In accordance with accounting standards regarding consolidation of variable interest entities, VIEs are generally entities that lack sufficient equity to finance their activities without additional financial support from other parties or whose equity holders lack adequate decision making ability. All VIEs with which the Company is involved must be evaluated to determine the primary beneficiary of the risks and rewards of the VIE. The primary beneficiary is required to consolidate the VIE for financial reporting purposes.

The Company has concluded, based on the contractual arrangements, that Jiuzhou Pharmacy (including its subsidiaries and controlled entities), Jiuzhou Clinic and Jiuzhou Service are each a VIE and that the Company’s wholly-owned subsidiary, Jiuxin Management, absorbs a majority of the risk of loss from the activities of these companies, thereby enabling the Company, through Jiuxin Management, to receive a majority of their respective expected residual returns.

Additionally, as Jiuzhou Pharmacy, Jiuzhou Clinic and Jiuzhou Service are under common control, the consolidated financial statements have been prepared as if the transactions had occurred retroactively as to the beginning of the reporting period of these consolidated financial statements.

Control and common control are defined under the accounting standards as “an individual, enterprise, or immediate family members who hold more than 50 percent of the voting ownership interest of each entity.” Because the Owners collectively own 100% of Jiuzhou Pharmacy, Jiuzhou Clinic and Jiuzhou Service, and have agreed to vote their interests in concert since the establishment of each of these three companies as memorialized in the voting rights agreement, the Company believes that the Owners collectively have control and common control of the three companies. Accordingly, the Company believes that Jiuzhou Pharmacy, Jiuzhou Clinic and Jiuzhou Service were

constructively held under common control by Jiuxin Management as of the time the Contractual Agreements were entered into, establishing Jiuxin Management as their primary beneficiary. Jiuxin Management, in turn, is owned by Renovation, which is owned by the Company.

Risks and Uncertainties

The operations of the Company are located in the PRC. Accordingly, the Company's business, financial condition, and results of operations may be influenced by political, economic, and legal environments in the PRC, as well as by the general state of the PRC economy. The Company's operations in the PRC are subject to special considerations and significant risks not typically associated with companies in North America and Western Europe. These include risks associated with, among others, the political, economic and legal environment and foreign currency exchange. The Company's results may be adversely affected by changes in the political, regulatory and social conditions in the PRC. Although the Company has not experienced losses from these situations and believes that it is in compliance with existing laws and regulations including its organization and structure disclosed in Note 1, this may not be indicative of future results.

The Company has significant cash deposits with suppliers in order to obtain and maintain inventory. The Company's ability to obtain products and maintain inventory at existing and new locations is dependent upon its ability to post and maintain significant cash deposits with its suppliers. In the PRC, many vendors are unwilling to extend credit terms for product sales that require cash deposits to be made. The Company does not generally receive interest on any of its supplier deposits, and such deposits are subject to loss as a result of the creditworthiness or bankruptcy of the party who holds such funds, as well as the risk from illegal acts such as conversion, fraud, theft or dishonesty associated with the third party. If these circumstances were to arise, the Company would find it difficult or impossible, due to the unpredictability of legal proceedings in China, to recover all or a portion of the amount on deposit with its suppliers.

Members of the current management team own controlling interests in the Company and are also the Owners of the VIEs in the PRC. The Company only controls the VIEs through contractual arrangements which obligate it to absorb the risk of loss and to receive the residual expected returns. As such, the controlling shareholders of the Company and the VIEs could cancel these agreements or permit them to expire at the end of the agreement terms, as a result of which the Company would not retain control of the VIEs.

Use of estimates

The preparation of unaudited condensed consolidated financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The significant estimates made in the preparation of the accompanying unaudited condensed consolidated financial statements relate to the assessment of the carrying values of accounts receivable, advances to suppliers and related allowance for doubtful accounts, useful lives of property and equipment, inventory reserve and fair value of its purchase option derivative liability. Because of the use of estimates inherent in the financial reporting process, actual results could materially differ from those estimates.

Fair value measurements

The Company has adopted FASB ASC Topic 820, “Fair Value Measurement and Disclosure,” which defines fair value, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements. It does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information. It establishes a three-level valuation hierarchy of valuation techniques based on observable and unobservable inputs, which may be used to measure fair value and include the following:

Level 1 – Quoted prices in active markets for identical assets or liabilities.

Level 2 – Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Classification within the hierarchy is determined based on the lowest level of input that is significant to the fair value measurement.

The Company's financial assets and liabilities, which include financial instruments as defined by FASB ASC 820, include cash and cash equivalents, accounts receivable, accounts payable, long-term debt and derivatives. The carrying amounts of cash and cash equivalents, financial assets available for sales, accounts receivable, notes receivables, and accounts payable are a reasonable approximation of fair value due to the short maturities of these instruments (Level 1). The carrying amount of notes payable approximates fair value based on borrowing rates of similar bank loan currently available to the Company (Level 2) (See Note 13). The carrying amount of the Company's derivative instruments is recorded at fair value and is determined based on observable inputs that are corroborated by market data (Level 2). As of September 30, 2017, the fair values of our derivative instruments that were carried at fair value (See Note 17).

	Active Market for Identical Assets (Level 1)	Observable Inputs (Level 2)	Unobservable Inputs (Level 3)	Total Carrying Value
Cash and cash equivalents	16,837,873	-	\$ -	16,837,873
Notes payable	-	12,872,045	-	12,872,045
Warrants liability	-	297,466	\$ -	297,466
Total	16,837,873	13,169,511	\$ -	30,007,384

Revenue recognition

Revenue from sales of prescription medicine at drugstores is recognized when the prescription is filled and the customer picks up and pays for the prescription.

Revenue from sales of other merchandise at drugstores is recognized at the point of sale, which is when a customer pays for and receives the merchandise. Usually the majority of our merchandise, such as prescription and OTC drugs, are not allowed to be returned after the customers leave the counter. Return of other products, such as sundry products, are minimal. Sales of drugs reimbursed by the local government medical insurance agency and receivables from the agency are recognized when a customer pays for the drugs at a store. Based on historical experience, a reserve for potential loss from denial of reimbursement on certain unqualified drugs is made to the receivables from the government agency.

Revenue from medical services is recognized after the service has been rendered to a customer.

Revenue from online pharmacy sales is recognized when merchandise is shipped to customers. While most deliveries take one day, certain deliveries may take longer depending on a customer's location. Any loss caused in a shipment will be reimbursed by the Company's courier company. Our sales policy allows for the return of certain merchandises without reason within seven days after customer's receipt of the applicable merchandise. A proper sales reserve is made to account for the potential loss from returns from customers. Historically, sales returns seven days after merchandise receipts have been minimal.

Revenue from sales of merchandise to non-retail customers is recognized when the following conditions are met: (1) persuasive evidence of an arrangement exists (sales agreements and customer purchase orders are used to determine the existence of an arrangement); (2) delivery of goods has occurred and risks and benefits of ownership have been transferred, which is when the goods are received by the customer at its designated location in accordance with the sales terms; (3) the sales price is fixed or determinable; and (4) collectability is probable. Historically, sales returns have been minimal.

The Company's revenue is net of value added tax ("VAT") collected on behalf of PRC tax authorities in respect to the sales of merchandise. VAT collected from customers, net of VAT paid for purchases, is recorded as a liability in the accompanying consolidated balance sheets until it is paid to the relevant PRC tax authorities.

Restricted cash

The Company's restricted cash consists of cash and long-term deposits in a bank as security for its notes payable. The Company has notes payable outstanding with the bank and is required to keep certain amounts on deposit that are subject to withdrawal restrictions. The notes payable are generally short term in nature due to their short maturity period of six to nine months; thus, restricted cash is classified as a current asset.

Accounts receivable

Accounts receivable represents the following: (1) amounts due from banks relating to retail sales that are paid or settled by the customers' debit or credit cards, (2) amounts due from government social security bureaus and commercial health insurance programs relating to retail sales of drugs, prescription medicine, and medical services that are paid or settled by the customers' medical insurance cards, (3) amounts due from non-bank third party payment

instruments such as Alipay and certain e-commerce platforms and (4) amounts due from non-retail customers for sales of merchandise.

Accounts receivable are recorded at net realizable value consisting of the carrying amount less an allowance for uncollectible accounts, as necessary. In the Company's retail business, accounts receivable mainly consist of reimbursements due from the government insurance bureaus and commercial health insurance programs and are usually collected within two or three months. The Company directly writes off delinquent account balances, which it determines to be uncollectible after confirming with the appropriate bureau or program each month. Additionally, the Company also makes estimated reserves on related outstanding accounts receivable based on historical trends.

In the Company's online pharmacy business, accounts receivable primarily consist of amounts due from non-bank third party payment instruments such as Alipay and certain e-commerce platforms. To purchase pharmaceutical products from an e-commerce platforms such as Tmall, customers are required to submit payment to certain non-bank third party payment instruments, such as Alipay, which, in turn, reimburse the Company within seven days to a month. Except for customer returns of sold products, the receivables from these payments instruments are rarely uncollectible.

In its wholesale business, the Company uses the aging method to estimate the allowance for anticipated uncollectible receivable balances. Under the aging method, bad debt percentages are determined by management, based on historical experience and the current economic climate, are applied to customers' balances categorized by the number of months the underlying invoices have remained outstanding. At each reporting period, the allowance balance is adjusted to reflect the amount computed as a result of the aging method. When facts subsequently become available to indicate that the allowance provided requires an adjustment, a corresponding adjustment is made to the allowance account as a change in estimate.

Advances to suppliers

Advances to suppliers consist of prepayments to our vendors, such as pharmaceutical manufacturers and other distributors. Since the acquisition of Jiuxin Medicine, we have transferred almost all logistics services of our retail drugstores to Jiuxin Medicine. Jiuzhou Pharmacy only directly purchases certain non-medical products, such as certain nutritional supplements. As a result, almost all advances to suppliers are made by Jiuxin Medicine.

Advances to suppliers for our drug wholesale business consist of prepayments to our vendors, such as pharmaceutical manufacturers and other distributors. We typically receive products from vendors within three to nine months after making prepayments. We continuously monitor delivery from, and payments to, our vendors while maintaining a provision for estimated credit losses based upon historical experience and any specific supplier issues, such as discontinuing of inventory supply, that have been identified. If we have difficulty receiving products from a vendor, we take the following steps: cease purchasing products from such vendor, ask for return of our prepayment promptly, and if necessary, take legal action. If all of these steps are unsuccessful, management then determines whether the

prepayments should be reserved or written off.

Inventories

Inventories are stated at the lower of cost or market value. Cost is determined using the first in first out (FIFO) method. Market value is the lower of replacement cost or net realizable value. The Company carries out physical inventory counts on a monthly basis at each store and warehouse location. Herbs that the Company farms are recorded at their cost, which includes direct costs such as seed selection, fertilizer, labor costs that are spent in growing herbs on the leased farmland, and indirect costs such as amortization of farmland development cost. All costs are accumulated until the time of harvest and then allocated to harvested herbs costs when the herbs are sold. The Company periodically reviews its inventory and records write-downs to inventories for shrinkage losses and damaged merchandise that are identified. The Company provides a reserve for estimated inventory obsolescence or excess quantities on hand equal to the difference, if any, between the cost of the inventory and its estimated realizable value.

Farmland assets

Herbs that the Company farms are recorded at their cost, which includes direct costs such as seed selection, fertilizer, and labor costs that are spent in growing herbs on the leased farmland, and indirect costs such as amortization of farmland development costs. Since April 2014, amortization of farmland development costs has been expensed instead of allocated into inventory due to unpredictable future market value of planted ginkgo trees.

All related costs described in the above are accumulated until the time of harvest and then allocated to harvested herbs when they are sold.

Property and equipment

Property and equipment are stated at cost, net of accumulated depreciation or amortization. Depreciation is calculated on the straight-line method over the estimated useful lives of the assets, taking into consideration the assets' estimated residual value. Leasehold improvements are amortized over the shorter of lease term or remaining lease period of the underlying assets. Following are the estimated useful lives of the Company's property and equipment:

	Estimated Useful Life
Leasehold improvements	3-10 years
Motor vehicles	3-5 years
Office equipment & furniture	3-5 years

Buildings 35 years

Maintenance, repairs and minor renewals are charged to expenses as incurred. Major additions and betterment to property and equipment are capitalized.

Intangible assets

Intangible assets are acquired individually or as part of a group of assets, and are initially recorded at their fair value. The cost of a group of assets acquired in a transaction is allocated to the individual assets based on their relative fair values.

The estimated useful lives of the Company's intangible assets are as follows:

	Estimated Useful Life
Land use rights	50 years
Software	3 years

The Company evaluates intangible assets for impairment whenever events or changes in circumstances indicate that the assets might be impaired.

Impairment of long lived assets

The Company evaluates long lived tangible and intangible assets for impairment, whenever events or changes in circumstances indicate that the carrying value may not be recoverable from its estimated future cash flows. Recoverability is measured by comparing the assets' net book value to the related projected undiscounted cash flows from these assets, considering a number of factors including past operating results, budgets, economic projections, market trends and product development cycles. If the net book value of the asset exceeds the related undiscounted cash flows, the asset is considered impaired, and a second test is performed to measure the amount of impairment loss. There were no fixed assets and farmland assets impaired for the three months ended September 30, 2017.

Notes payable

During the normal course of business, the Company regularly issues bank acceptance bills as a payment method to settle outstanding accounts payables with various material suppliers. The Company records such bank acceptance bills as notes payable. Such notes payable are generally short term in nature due to their short maturity period of six to nine months.

Income taxes

The Company follows FASB ASC Topic 740, "Income Taxes," which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred income taxes are recognized for the tax consequences in future years of differences between the tax bases of assets and liabilities and their financial reporting amounts at each period end based on enacted tax laws and statutory tax rates, applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

The Company has adopted FASB ASC Topic 740-10-25, which provides criteria for the recognition, measurement, presentation and disclosure of uncertain tax position. The Company must recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate resolution. The Company performed a self-assessment and the Company's liability for income taxes includes liability for unrecognized tax benefits, interest and penalties which relate to tax years still subject to review by taxing authorities. Audit periods remain open for review until the statute of limitations has passed, which in the PRC is usually 5 years. The completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to the Company's liability for income taxes. Any such adjustment could be material to the Company's results of operations for any given quarterly or annual period based, in part, upon the results of operations for the given period. As of September 30, 2017 and March 31, 2017, the management of the Company considered that the Company had no additional liabilities for uncertain tax positions affecting its consolidated financial position and results of operations or cash flows, and will continue to evaluate for any uncertain position in the future. There are no estimated interest costs and penalties provided in the Company's consolidated financial statements for the three months ended September 30, 2017 and 2016, respectively. The Company's tax positions related to open tax years are subject to examination by the relevant tax authorities, the most significant of which is the China Tax Authority.

Value added tax

Sales revenue represents the invoiced value of goods, net of VAT. All of the Company's products are sold in the PRC and are subject to a VAT on the gross sales price. The VAT rates range up to 17%, depending on the type of products sold. The VAT may be offset by VAT paid by the Company on raw materials and other materials included in the cost of producing or acquiring its finished products. The Company recorded a VAT payable net of payments in the accompanying financial statements.

The accounting standards clarify the accounting and disclosure requirements for uncertain tax positions and prescribe a recognition threshold and measurement attribute for recognition and measurement of a tax position taken or expected to be taken in a tax return. The accounting standards also provide guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosures, and transition. No significant penalties, uncertain tax provisions or interest relating to income taxes were incurred during the periods ended September 30, 2017 and 2016.

Stock based compensation

The Company follows the provisions of FASB ASC 718, "Compensation — Stock Compensation," which establishes accounting standards for non-employee and employee stock-based awards. Under the provisions of FASB ASC 718, the fair value of stock issued is used to measure the fair value of services received as the Company believes such approach is a more reliable method of measuring the fair value of the services. For non-employee stock-based awards, fair value is measured based on the value of the Company's common stock on the date that the commitment for performance by the counterparty has been reached or the counterparty's performance is complete. The fair value of the equity instrument is calculated and then recognized as compensation expense over the requisite performance period. For employee stock-based awards, share-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense with graded vesting on a straight-line basis over the requisite service period for the entire award.

Advertising and promotion costs

Advertising and promotion costs are expensed as incurred and amounted to \$180,639 and \$113,638 for the three months ended September 30, 2017 and 2016, respectively, and \$320,734 and \$182,487 for the six months ended September 30, 2017 and 2016, respectively. Such costs consist primarily of print and promotional materials such as flyers to local communities.

Operating leases

The Company leases premises for retail drugstores, offices and wholesale warehouse under non-cancellable operating leases. Operating lease payments are expensed over the term of lease. A majority of the Company's retail drugstore leases have a 3 to 10 year term with a renewal option upon the expiration of the lease; the wholesale warehouse lease has a 10-year term with a renewal option upon the expiration of the lease. The Company has historically been able to renew a majority of its drugstores leases. Under the terms of the lease agreements, the Company has no legal or contractual asset retirement obligations at the end of the lease. In addition, land leased from the government is amortized on a straight-line basis over a 30-year term.

Foreign currency translation

The Company uses the United States dollar (“U.S. dollars” or “USD”) for financial reporting purposes. The Company’s subsidiaries and VIEs maintain their books and records in their functional currency the Renminbi (“RMB”), the currency of the PRC.

In general, for consolidation purposes, the Company translates the assets and liabilities of its subsidiaries and VIEs into U.S. dollars using the applicable exchange rates prevailing at the balance sheet date, and the statements of income and cash flows are translated at average exchange rates during the reporting period. As a result, amounts related to assets and liabilities reported on the statement of cash flows will not necessarily agree with changes in the corresponding balances on the balance sheet. Equity accounts are translated at historical rates. Adjustments resulting from the translation of the financial statements of the subsidiaries and VIEs are recorded as accumulated other comprehensive income.

The balance sheet amounts, with the exception of equity, at September 30, 2017 and at March 31, 2017 were translated at 1 RMB to 0.1503 USD and at 1 RMB to 0.1451 USD, respectively. The average translation rates applied to income and cash flow statement amounts for the six months ended September 30, 2017 and 2016 were at 1 RMB to 0.1478 USD and 1 RMB to 0.1515 USD, respectively.

Concentrations and credit risk

Certain financial instruments, which subject the Company to concentration of credit risk, consist of cash and restricted cash. The Company has cash balances at financial institutions located in Hong Kong and PRC. Balances at financial institutions in Hong Kong may, from time to time, exceed Hong Kong Deposit Protection Board’s insured limits. Since March 31, 2015, balances at financial institutions and state-owned banks within the PRC are covered by insurance up to RMB 500,000 (USD 77,150) per bank. As of September 30, 2017 and March 31, 2017, the Company had deposits totaling \$26,709,868 and \$27,357,785 that were covered by such limited insurance, respectively. Any balance over RMB 500,000 (USD 75,150) per bank in PRC will not be covered. To date, the Company has not experienced any losses in such accounts.

For the three months ended September 30, 2017, three largest vendors accounted for 61.3% of the Company’s total purchases and one vendor accounted for 16.8% of the Company’s total advances to suppliers. For the three months ended September 30, 2016, one largest vendor accounted for 30.7% of the Company’s total purchases and one vendor accounted for 9.9% of the Company’s total advances to suppliers.

For the six months ended September 30, 2017, two largest vendors accounted for 39.6% of the Company's total purchases and one vendor accounted for 16.8% of the Company's total advances to suppliers. For the six months ended September 30, 2016, two largest vendors accounted for 38.6% of the Company's total purchases and one vendor accounted for 9.9% of the Company's total advances to suppliers.

For the three months and six months ended September 30, 2017 and September 30, 2016, no customer accounted for more than 10% of the Company's total sales or accounts receivable.

Recent Accounting Pronouncements

In January 2017, the FASB issued Accounting Standards Update ("ASU") No. 2017-04, "Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment" ("ASU 2017-04"), which removes Step 2 from the goodwill impairment test. An entity will apply a one-step quantitative test and record the amount of goodwill impairment as the excess of a reporting unit's carrying amount over its fair value, not to exceed the total amount of goodwill allocated to the reporting unit. The new guidance does not amend the optional qualitative assessment of goodwill impairment. Public business entity that is a U.S. Securities and Exchange Commission filer should adopt the amendments in this ASU for its annual or any interim goodwill impairment test in fiscal years beginning after December 15, 2019. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. We are currently evaluating the impact of the adoption of ASU 2017-04 on our consolidated financial statements.

Revenue Recognition

In March 2016, the FASB issued ASU 2016-08, "Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Gross versus Net)," clarifying the principal versus agent guidance in the new revenue recognition standard, by revising the indicators to focus on evidence that the Company is a principal.

In April 2016, the FASB issued ASU 2016-10, "Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing," reducing the complexity when applying the guidance for identifying performance obligations and clarifying how to determine whether revenue related to a performance obligation for an intellectual property license is recognized over time or at a point in time.

In May 2016, the FASB issued ASU 2016-12, “Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients,” clarifying certain core recognition principles including collectability, sales tax presentation, noncash consideration, contract modifications and completed contracts at transition.

These ASUs are effective for the Company beginning in the first quarter of the fiscal year of 2019, allow for early adoption in the first quarter of 2017 and may be applied using either a full retrospective approach or a modified retrospective approach. The Company is planning to adopt the new accounting standard ASC 606 and all related amendment using a modified retrospective approach. Revenue from sales at drugstores continues to be recognized at the point of sale, which is when a customer pays for and receives the merchandise. Revenue from online pharmacy sales is recognized when merchandise is shipped to customers. Revenue from sales of merchandise to non-retail customers is recognized upon delivery of goods. The Company does not expect the adoption of the New Revenue Standard to have material impact on its net income on an ongoing basis. Its interpretation is subject to change as a result of future change in market conditions or product offering.

NOTE 3 – FINANCIAL ASSETS AVAILABLE FOR SALE

As of September 30, 2017 and March 31, 2017, financial assets available for sale amounted to \$165,282 (RMB 1,100,000) and \$87,068 (RMB 600,000), respectively. In the year ended March 31, 2017, the Company invested as a limited partner (LP) in a private equity fund, which is intended to invest in retail pharmaceutical business. The company has signed an investment agreement with the private equity fund and agreed to invest a total of \$300,600 (RMB 2,000,000).

NOTE 4 – TRADE ACCOUNTS RECEIVABLE

Trade accounts receivable consisted of the following:

	September 30, 2017	March 31, 2017
Accounts receivable	\$ 12,270,651	\$ 9,977,101
Less: allowance for doubtful accounts	(2,070,109)	(1,415,505)
Trade accounts receivable, net	\$ 10,200,542	\$ 8,561,596

For the three months ended September 30, 2017 and 2016, \$98,590 and \$30,790 in accounts receivable were directly written off respectively. For the six months ended September 30, 2017 and 2016, \$124,983 and \$63,382 in accounts

receivable were directly written off respectively. As of September 30, 2017 and March 31, 2017, no trade accounts receivables were pledged as collateral for borrowings from financial institutions.

Note 5 – OTHER RECEIVABLE

Other receivable consisted of the following:

	September 30, 2017	March 31, 2017
Deposit*	\$ 1,216,800	\$ 855,755
Advance to employees	584,996	652,436
Accrued supplier rebate**	190,554	321,993
Interest receivable***	240,410	
Others	418,825	465,593
Less: allowance for doubtful accounts	(27,526)	(26,584)
Other receivable, net	\$ 2,624,059	\$ 2,269,193

* It refers to various advances deposits made to service providers and commercial platforms such as Alibaba's Tmall, in order to carry business via these service providers and platforms.

** It refers to supplier rebate receivables, which are computed based on our sales volume of the suppliers' products.

*** It refers to accrued interest receivable from several three-year bank deposits, which are used as a pledge for bank-guaranteed notes payable (see Note 14).

Note 6 – OTHER CURRENT ASSETS

Other current assets consisted of the following:

	September 30 2017	March 31, 2017
Prepaid rental expenses ⁽¹⁾	\$ 1,395,985	\$ 1,171,472
Prepaid and other current assets	408,669	394,683
Total	\$ 1,804,654	\$ 1,566,155

(1) Represents store and office rental expenses that were usually prepaid and amortized over the prepayment period. The increase reflects additional prepaid rental for new stores.

Note 7 – PROPERTY AND EQUIPMENT

Property and equipment consisted of the following:

	September 30, 2017	March 31, 2017
Building	\$ 1,611,055	\$ 1,555,923
Leasehold improvements	12,229,600	11,783,611
Farmland development cost	1,796,971	1,735,475
Office equipment and furniture	5,126,811	5,339,005
Motor vehicles	475,446	585,769
Total	21,239,883	20,999,783
Less: Accumulated depreciation	(14,861,284)	(14,489,479)
Impairment*	(2,365,317)	(2,247,147)
Construction-in-progress**	520,108	-
Property and equipment, net	\$ 4,533,390	\$ 4,263,157

* The variance of impairment from March 31, 2017 to September 30, 2017 is solely caused by exchange rate variance.

Includes clinic renovation expense of \$70,798 and SAP (a popular ERP software) implementation fee of \$449,309.

**The clinic renovation has been completed at the end of October 2017. SAP system is expected to be implemented by the end of 2017.

Depreciation expenses for property and equipment totaled \$171,051 and \$213,969 for the three months ended September 30, 2017 and 2016, respectively. Depreciation expenses for property and equipment totaled \$576,154 and \$452,979 for the six months ended September 30, 2017 and 2016, respectively. There were no fixed assets impaired in the six months ended September 30, 2017. For the year ended March 31, 2017, \$106,257 of land and road improvement in Qianhong Agriculture were impaired due to the estimated fair value being lower than the carrying value.

Note 8 – ADVANCES TO SUPPLIERS

Advances to suppliers consist of deposits, with or advances to, outside vendors for future inventory purchases. Most of the Company's suppliers require a certain amount of money to be deposited with them as a guarantee that the Company will receive its purchase on a timely basis. This amount is refundable and bears no interest. As of September 30, 2017 and March 31, 2017, advance to suppliers consist of the following:

	September 30, 2017	March 31, 2017
Advance to suppliers	\$ 6,280,908	\$ 7,006,396
Less: allowance for doubtful accounts	(2,366,809)	(1,502,255)
Advance to suppliers, net	\$ 3,914,099	\$ 5,504,141

* In order to collect a larger rebate for certain merchandise, such as *Colla corii asini* (donkey-hide gelatin), from certain suppliers, the Company made a significant cash advance to such suppliers.

For the six months ended September 30, 2017 and 2016, none of the advances to suppliers were written off against previous allowances for doubtful accounts, respectively.

Note 9 – INVENTORY

Inventory consisted of finished goods, valued at \$11,077,027 and \$9,923,101 as of September 30, 2017 and March 31, 2017, respectively. The Company constantly monitors its potential obsolete products and is allowed to return products close to their expiration date to its suppliers. Any loss on damaged items is immaterial and will be recognized immediately. As a result, no reserves were made for inventory as of September 30, 2017 and March 31, 2017.

Note 10 – FARMLAND ASSETS

Farmland assets consist of ginkgo trees planted in 2012 and expected to be harvested and sold in several years. As of September 30, 2017 and March 31, 2017, farmland assets are valued as follows:

	September 30, 2017	March 31, 2017
Farmland assets	\$ 2,273,593	\$ 2,195,787
Less: Impairment*	(1,529,337)	(1,477,000)
Farmland assets, net	\$ 744,256	\$ 718,787

* The estimated fair value is estimated to be lower than its investment value as of September 30, 2017 and March 31, 2017.

Note 11 – LONG TERM DEPOSITS, LANDLORDS

As of September 30, 2017 and March 31, 2017, long term deposits amounted to \$3,202,793 and \$2,294,848, respectively. Long term deposits are money deposited with, or advanced to, landlords for the purpose of securing retail store leases that the Company does not anticipate being returned within the next twelve months. Most of the Company's landlords require a minimum payment of nine months' rent, paid upfront, plus additional deposits. In the six months ended September 30, 2017, in order to quickly expand its network, the Company signed quite a few new store lease agreements and made additional leasehold deposits.

Note 12 – OTHER NONCURRENT ASSETS

Other noncurrent assets consisted of the following:

	September 30, 2017	March 31, 2017
Forest land use rights*	\$ 1,192,217	\$1,177,005
Long-term prepaid store rent (over one year)**	135,230	-
Total	\$ 1,327,447	\$1,177,005

* The prepayment for lease of forest land use rights is a payment made to a local government in connection with entering into an operating land lease agreement. The land is currently used to cultivate Ginkgo trees. The forest rights certificate from the local village extends the life of the lease to January 31, 2060.

The amortization of the prepayment for the lease of forest land use right was approximately \$7,042 and \$15,484 for the three months ended September 30, 2017 and 2016, respectively. The amortization of the prepayment for the lease of forest land use right was approximately \$13,888 and \$31,298 for the six months ended September 30, 2017 and 2016, respectively.

The Company's amortizations of the prepayment for lease of land use right for the next five years and thereafter are as follows:

For the year ending September 30,	Amount
2018	\$28,233

2019	28,233
2020	28,233
2021	28,233
2022	28,233
Thereafter	1,057,869

** In order to secure better terms in a lease agreement, the Company agreed to pay two-year rent at the beginning of the lease.

Note 13 – INTANGIBLE ASSETS

Net intangible assets consisted of the following at:

	September 30, 2017	March 31, 2017
License ⁽¹⁾	\$ 1,747,477	\$ 1,394,546
Land use rights ⁽²⁾	1,465,229	1,415,086
Total intangible assets	3,212,706	2,809,632
Less: accumulated amortization	(115,160)	(97,021)
Intangible assets, net	\$ 3,097,546	\$ 2,712,611

Amortization expense of intangibles amounted to \$7,334 and \$6,101 for the three months ended September 30, 2017 and 2016, respectively, and \$14,464 and \$13,591 for the six months ended September 30, 2017 and 2016, respectively.

This represents the fair value of the licenses of insurance applicable drugstores acquired from Sanhao Pharmacy, a drugstore chain Jiuzhou Pharmacy acquired in 2014. The licenses allow patients to pay by using insurance cards at stores. The stores are reimbursed from the Human Resource and Social Security Department of Hangzhou City. In September 2017, the Company acquired several new stores for the purpose of the Municipal Social Medical Reimbursement Qualification Certificates. The owners of these acquired drugstores agreed to cease their stores' business and liquidate all of the stores' accounts before Jiuzhou Pharmacy acquired their stores. As a result, Jiuzhou Pharmacy has not obtained any assets or liabilities from the stores, but was able to transfer the Certificate to our new store opened at the same time.

In July 2013, the Company purchased the land use rights of a plot of farmland in Lin'an, Hangzhou, intended for the establishment of an herb processing plant in the future. However, as our farming business in Lin'an has not grown, the Company does not expect completion of the plant in the near future.

Note 14 – NOTES PAYABLE

The Company has credit facilities with Hangzhou United Bank (“HUB”), Bank of Hangzhou (“BOH”), Industrial and Commercial Bank of China (“ICBC”) and Zhejiang Tailong Commercial Bank (“ZTCB”) that provided working capital in the form of the following bank acceptance notes at September 30, 2017 and March 31, 2017:

Beneficiary	Endorser	Origination date	Maturity date	September 30, 2017	March 31, 2017
Jiuzhou Pharmacy (1)	HUB	10/09/16	04/09/17	-	1,755,879
Jiuzhou Pharmacy (1)	HUB	10/09/16	04/09/17	-	341,676
Jiuzhou Pharmacy (1)	HUB	11/08/16	05/08/17	-	1,637,419

Jiuzhou Pharmacy (1)	HUB	03/07/17	09/07/17	-	267,651
Jiuzhou Pharmacy (1)	HUB	03/07/17	09/07/17	-	1,678,481
Jiuzhou Pharmacy (1)	HUB	04/05/17	10/05/17	1,345,036	-
Jiuzhou Pharmacy (1)	HUB	05/04/17	11/04/17	1,806,808	-
Jiuzhou Pharmacy (1)	HUB	06/05/17	12/05/17	1,561,478	-
Jiuzhou Pharmacy (1)	HUB	06/05/17	12/05/17	354,534	-
Jiuzhou Pharmacy (1)	HUB	06/29/17	12/29/17	1,074,330	-
Jiuzhou Pharmacy (1)	HUB	06/29/17	12/29/17	826,408	-
Jiuzhou Pharmacy (1)	HUB	06/29/17	12/29/17	1,984,650	-
Jiuzhou Pharmacy (1)	HUB	08/09/17	02/09/18	1,357,600	-
Jiuzhou Pharmacy (1)	HUB	09/05/17	12/05/17	267,756	-
Jiuzhou Pharmacy (1)	HUB	09/05/17	03/05/18	2,293,445	-
Total				\$ 12,872,045	\$ 12,691,575

As of March 31, 2017, the Company had \$12,111,119 (RMB 81,459,343.5) of notes payable from HUB. The Company is required to hold restricted cash in the amount of \$1,328,098 (RMB 9,152,104.2) with HUB as collateral against these bank notes. As of September 30, 2017, the Company had \$12,872,045 (RMB 85667428.6) (1) of notes payable from HUB. The Company is required to hold restricted cash in the amount of \$1,432,935 (RMB 9,536,623) with HUB as collateral against these bank notes. Additionally, a total of \$8,785,866 deposit (RMB 58,472,647.3), which matures in three years, was deposited into HUB as a collateral for current and future notes payable from HUB.

(2) As of March 31, 2017, the Company had \$580,456 (RMB 4,000,000) of notes payable from ZTCB, with restricted cash in the amount of \$290,228 (RMB 2,000,000) held at the bank. As of September 30, 2017, the Company had

no notes payable from ZTCB.

As of September 30, 2017, the Company had a credit line of approximately \$16.74 million in the aggregate from HUB, BOH, ICBC and ZTCB. By putting up the restricted cash of \$1.43 million deposited in the banks, the total credit line was \$18.17 million. As of September 30, 2017, the Company had approximately \$12.87 million of bank notes payable and approximately \$5.30 million bank credit line was still available for further borrowing. The bank notes are secured by buildings owned by the Company's major shareholders and by a shop of Jiuzhou Pharmacy, and are guaranteed by Jiuxin Medical.

Note 15 – TAXES

Income tax

For the three and six months ended September 30, 2017 and 2016, the income tax provisions were as follow:

	Three months ended September 30,		Six months ended September 30,	
	2017	2016	2017	2016
Income tax	\$18,047	\$17,484	\$38,585	\$45,918

The Company is subject to income taxes on an entity basis on income arising in or derived from the tax jurisdiction in which each entity is domiciled.

Entity	Income Tax Jurisdiction
Jo-Jo Drugstores	United States
Renovation	Hong Kong, PRC
All other entities	Mainland, PRC

The following table reconciles the U.S. statutory tax rates with the Company's effective tax rate for the three and six months ended September 30, 2017 and 2016:

	For the three months ended		For the six months ended	
	September 30, 2017	September 30, 2016	September 30, 2017	September 30, 2016
U.S. Statutory rates	34.0%	34.0%	34.0 %	34.0 %
Foreign income not recognized in the U.S.	(34.0)	(34.0)	(34.0)	(34.0)
China income taxes	25.0	25.0	25.0	25.0
Change in valuation allowance (1)	(18.4)	(25.0)	(22.9)	(25.0)
Non-deductible expenses-permanent difference (2)	(8.2)	15.2	(3.6)	16.7
Effective tax rate	(1.6)%	15.2 %	(1.5)%	16.7 %

(1) Represents non-taxable expense reversal due to overall decrease in allowance for accounts receivables and advance to suppliers.

(2) The (1.6)% and 15.2% rate adjustments for the three months ended September 30, 2017 and 2016, and the (1.5)% and 16.7% rate adjustments for the six months ended September 30, 2017 and 2016 represent expenses primarily including stock option expenses, legal, accounting and other expenses incurred by the Company that were not deductible for PRC income tax.

Jo-Jo Drugstores is incorporated in the U.S. and incurred a net operating loss for income tax purposes for the six months ended September 30, 2017 and 2016. As of September 30, 2017, the estimated net operating loss carry forwards for U.S. income tax purposes amounted to \$1,503,000, which may be available to reduce future years' taxable income. These carry forwards will expire if not utilized by 2032. Management believes that the realization of the benefits arising from this loss appears to be uncertain due to the Company's continuing losses for U.S. income tax purposes. Accordingly, the Company has provided a 100% valuation allowance at September 30, 2017. There was no net change in the valuation allowance for the six months ended September 30, 2017 and 2016. Management reviews this valuation allowance periodically and makes adjustments as necessary.

Taxes payable at September 30, 2017 and March 31, 2017 consisted of the following:

	September 30 2017	March 31, 2017
VAT	\$ 515,358	\$ 615,067
Income tax	18,494	19,416
Others	36,779	47,456
Total taxes payable	\$ 570,631	\$ 681,939

The Company has adopted FASB ASC Topic 740-10-05, "Income Taxes." To date, the adoption of this interpretation has not impacted the Company's financial position, results of operations, or cash flows. The Company performed a self-assessment and the Company's liability for income taxes includes liability for unrecognized tax benefits, interest and penalties which relate to tax years still subject to review by taxing authorities. Audit periods remain open for review until the statute of limitations has passed, which in the PRC is usually 5 years. The completion of review or the expiration of the statute of limitations for a given audit period could result in an adjustment to the Company's liability for income taxes. Any such adjustment could be material to the Company's results of operations for any given quarterly or annual period based, in part, upon the results of operations for the given period. As of September 30, 2017 and September 30, 2016, management considered that the Company had no uncertain tax positions affecting its consolidated financial position and results of operations or cash flows, and will continue to evaluate for any uncertain position in future. There are no estimated interest costs and penalties provided in the Company's consolidated financial statements for the six months ended September 30, 2017 and 2016, respectively. The Company's tax positions related to open tax years are subject to examination by the relevant tax authorities, the most significant of which is the China Tax Authority.

Note 16 – POSTRETIREMENT BENEFITS

Regulations in the PRC require the Company to contribute to a defined contribution retirement plan for all permanent employees. The contribution for each employee is based on a percentage of the employee's current compensation as required by the local government. The Company contributed \$276,490 and \$222,732 in employment benefits and pension for the three months ended September 30, 2017 and 2016, respectively. The Company contributed \$559,734 and \$470,632 in employment benefits and pension for the six months ended September 30, 2017 and 2016, respectively.

Note 17 – RELATED PARTY TRANSACTIONS AND ARRANGEMENTS

Amounts payable to related parties are summarized as follows:

	September 30, 2017	March 31, 2017
Due to a director and CEO ⁽¹⁾ :	755,734	927,052

⁽¹⁾ Due to foreign exchange restrictions, the Company’s director and CEO, Mr. Lei Liu personally lent U.S. dollars to the Company to facilitate its payments of expenses in the United States.

As of September 30, 2017 and March 31, 2017, notes payable totaling \$3,684,220 and \$3,974,193 were secured by the personal properties of certain of the Company’s shareholders, respectively.

The Company leases from Mr. Lei Liu a retail space; the lease expires in September 2018. Rent expenses totaled \$4,435 and \$4,499 for the three months ended September 30, 2017 and 2016, respectively. Rent expenses totaled \$8,870 and \$9,092 for the six months ended September 30, 2017 and 2016, respectively. The amounts owed under the lease for the three months ended September 30, 2017 and 2016 were not paid to Mr. Liu as of September 30, 2017.

Note 18 – WARRANTS

In connection with the registered direct offering closed on July 19, 2015, the Company issued to an investor a warrant to purchase up to 600,000 shares of common stock at an exercise price of \$3.10 per share. The warrant became exercisable on January 19, 2016 and will expire on January 18, 2021. In connection with the offering, the Company also issued a warrant to its placement agent of this offering, pursuant to which the agent may purchase up to 6% of the aggregate number of shares of common stock sold in the offering, i.e. 72,000 shares. Such warrant has the same terms as the warrant issued to investor in the offering.

The fair value of the warrants issued to purchase 672,000 shares as described above was estimated by using the binominal pricing model with the following assumptions:

	Common Stock Warrants September 30, 2017 ⁽¹⁾	Common Stock Warrants March 31, 2017		
Stock price	\$ 1.62	\$ 1.80		
Exercise price	\$ 3.10	\$ 3.10		
Annual dividend yield	-	% -	%	%
Expected term (years)	3.30	3.80		
Risk-free interest rate	1.62	% 0.87	%	%
Expected volatility	70.81	% 90.73	%	%

(1) As of September 30, 2017, the warrants had not been exercised.

Upon evaluation, the warrants meet the definition of a derivative under FASB ASC 815, as the Company cannot avoid a net cash settlement under certain circumstances. Accordingly, the fair value of the warrants was classified as a liability of \$496,217 as of March 31, 2017. For the three and six months ended September 30, 2017, the Company recognized a gain of \$148,427 and \$198,751 for the investor warrant and placement agent warrant, from the change in fair value of the warrant liability, respectively. As a result, the warrant liability is carried on the consolidated balance sheets at the fair value of \$297,466 for the investor warrant and placement agent warrant, collectively, as of September 30, 2017.

Note 19 – STOCKHOLDER’S EQUITY

Common stock

On January 23, 2017, the Company closed a private offering with one institutional investor (the “Investor”) pursuant to which the Company sold to the Investor, and the Investor purchased from the Company, an aggregate of 4,840,000 shares of the common stock, par value \$0.001 per share, of the Company, at a purchase price of \$2.20 per share, for aggregate gross proceeds to the Company of \$10,648,000 (the “Private Placement”).

Stock-based compensation

The Company accounts for share-based payment awards granted to employees and directors by recording compensation expense based on estimated fair values. The Company estimates the fair value of share-based payment awards on the date of grant. The value of the portion of the award that is ultimately expected to vest is recognized as an expense over the requisite service periods in the Company’s consolidated statements of operations. Share-based awards are attributed to expenses using the straight-line method over the vesting period. The Company determines the value of each option award that contains a market condition using a Monte Carlo Simulation valuation model, while all other option awards are valued using the Black-Scholes valuation model as permitted under FASB ASC 718 “Compensation - Stock Compensation.” The assumptions used in calculating the fair value of share-based payment awards represent the Company’s best estimates. The Company’s estimates of the fair values of stock options granted and the resulting amounts of share-based compensation recognized may be impacted by certain variables including stock price volatility, employee stock option exercise behaviors, additional stock option modifications, estimates of forfeitures, and the related income tax impact.

On June 3, 2016, the Company granted a total of 1,630,000 shares of restricted common stock to its key employees in its retail drugstores and online pharmacy under the Company’s 2010 Equity Incentive Plan, as amended. The stock awards vests in three years from the date of the grant. The trading value of the Company’s common stock on June 3, 2016 was \$1.62. For the three months ended September 30, 2017 and 2016, \$221,859 and \$221,859 was recorded as service compensation expense, respectively. For the six months ended September 30, 2017 and 2016, \$441,306 and \$286,970 was recorded as service compensation expense, respectively.

Stock option

On November 18, 2014, the Company granted a total of 967,000 shares of stock options under the Plan to a group of a total of 46 grantees including directors, officers and employees. The exercise price of the stock option is \$2.50. The option vests on November 18, 2017, provided that the grantees are still employed by the Company on such a date. The options will be exercisable for five years from the vesting date, or November 18, 2017 until November 17, 2022. For the six months ended September 30, 2017 and 2016, \$248,066 and \$248,066 was recorded as compensation expense. For the three months ended September 30, 2017 and 2016, \$124,033 and \$124,033 was recorded as compensation expense. As of September 30, 2017, there was approximately \$0.07 million of total unrecognized compensation costs related to stock option compensation arrangements granted which is expected to be recognized over the remaining weighted-average period of 0.13 years.

Statutory reserves

Statutory reserves represent restricted retained earnings. Based on their legal formation, the Company is required to set aside 10% of its net income as reported in their statutory accounts on an annual basis to the Statutory Surplus Reserve Fund (the “Reserve Fund”). Once the total amount set aside in the Reserve Fund reaches 50% of the entity’s registered capital, further appropriations become discretionary. The Reserve Fund can be used to increase the entity’s registered capital upon approval by relevant government authorities or eliminate its future losses under PRC GAAP upon a resolution by its board of directors. The Reserve Fund is not distributable to shareholders, as cash dividends or otherwise, except in the event of liquidation.

Appropriations to the Reserve Fund are accounted for as a transfer from unrestricted earnings to statutory reserves. During the three and six months ended September 30, 2017 and 2016, the Company did not make appropriations to statutory reserves.

There are no legal requirements in the PRC to fund the Reserve Fund by transfer of cash to any restricted accounts, and the Company does not do so.

Note 20 – (LOSS) INCOME PER SHARE

The Company reports earnings per share in accordance with the provisions of the FASB’s related accounting standard. This standard requires presentation of basic and diluted earnings per share in conjunction with the disclosure of the methodology used in computing such earnings per share. Basic earnings per share excludes dilution, but includes vested restricted stocks and is computed by dividing income available to common stockholders by the weighted average common shares outstanding during the period. Diluted earnings per share takes into account the potential dilution that could occur if securities or other contracts to issue common stock were exercised and converted into common stock.

The following is a reconciliation of the basic and diluted (loss) earnings per share computation:

	Three months ended September 30,		Six months ended September 30,	
	2017	2016	2017	2016
Net income attributable to controlling interest	\$ (1,168,709)	\$ 97,870	\$ (2,588,013)	\$ 229,023

Edgar Filing: CHINA JO-JO DRUGSTORES, INC. - Form 10-Q

Weighted average shares used in basic computation	25,214,678	19,375,773	25,214,678	18,239,065
Diluted effect of purchase options and warrants	-	-	-	-
Diluted effect of restricted shares	-	-	-	-
Weighted average shares used in diluted computation	25,214,678	19,375,773	25,214,678	18,239,065
Income per share – Basic:				
Net income before noncontrolling interest	\$(0.05) \$0.01	\$(0.10) \$0.01
Add: Net loss attributable to noncontrolling interest	\$-	\$-	\$-	\$-
Net income attributable to controlling interest	\$(0.05) \$0.01	\$(0.10) \$0.01
Loss per share – Diluted:				
Net income before noncontrolling interest	\$(0.05) \$0.01	\$(0.10) \$0.01
Add: Net income attributable to noncontrolling interest	\$-	\$-	\$-	\$-
Net income attributable to controlling interest	\$(0.05) \$0.01	\$(0.10) \$0.01

For the three and six months ended September 30, 2017, 967,000 shares underlying employee stock options and 600,000 shares underlying outstanding purchase options to an investor, and 72,000 shares underlying outstanding purchase option to an investment placement agent were excluded from the calculation of diluted loss per share as the options were anti-dilutive.

Note 21 – SEGMENTS

The Company operates within four main reportable segments: retail drugstores, online pharmacy, drug wholesale and herb farming. The retail drugstores segment sells prescription and over-the-counter (“OTC”) medicines, TCM, dietary supplements, medical devices, and sundry items to retail customers. The online pharmacy sells OTC drugs, dietary supplements, medical devices and sundry items to customers through several third-party platforms such as Alibaba’s Tmall, JD.com and Amazon.com, and the Company’s own platform all over China. The drug wholesale segment includes supplying the Company’s own retail drugstores with prescription and OTC medicines, TCM, dietary supplement, medical devices and sundry items (which sales have been eliminated as intercompany transactions), and also selling them to other drug vendors and hospitals. The Company’s herb farming segment cultivates selected herbs for sales to other drug vendors. The Company is also involved in online sales and clinic services that do not meet the quantitative thresholds for reportable segments and are included in the retail drugstores segment. The segments’ accounting policies are the same as those described in the summary of significant accounting policies. The Company evaluates performance based on profit or loss from operations before interest and income taxes not including nonrecurring gains and losses.

The Company’s reportable business segments are strategic business units that offer different products and services. Each segment is managed separately because each requires different operations and markets to distinct classes of customers.

The following table presents summarized information by segment of the continuing operations for the three months ended September 30, 2017.

	Retail drugstores	Online Pharmacy	Drug wholesale	Herb farming	Total
Revenue	\$15,047,615	\$3,065,016	5,378,412	-	23,491,043
Cost of goods	10,804,453	2,665,299	4,463,694	-	17,933,446
Gross profit	\$4,243,162	\$399,717	914,718	-	5,557,597
Selling expenses	2,582,089	459,785	1,308,898	-	4,350,772
General and administrative expenses	2,742,437	107,616	5,361	141	2,855,555

Note 22 – COMMITMENTS AND CONTINGENCIESOperating lease commitments

The Company recognizes lease expenses on a straight line basis over the term of its leases in accordance with the relevant accounting standards. The Company has entered into various tenancy agreements for its store premises and for the land leased from a local government to farm herbs.

The Company's commitments for minimum rental payments under its leases for the next five years and thereafter are as follows:

Periods ending September 30,	Retail drugstores	Online pharmacy	Drug wholesale	Herb farming	Total Amount
2018	\$3,875,101	\$ 36,366	\$ 72,732	\$ -	\$3,984,199
2019	3,462,529	36,366	72,732	-	3,571,627
2020	2,704,078	36,366	72,732	-	2,813,176
2021	2,156,248	12,122	24,244	-	2,192,614
2022	1,653,163	-	-	-	1,653,163
Thereafter	2,556,744	-	-	-	2,556,744

Total rent expense amounted to \$1,076,749 and \$722,190 for the three months ended September 30, 2017 and 2016, respectively.

NOTE 23 – SUBSEQUENT EVENTS

Based on a joint venture agreement (the "JV") with CareRetail (HK) Holdings Limited ("CareRetail HK") entered into on January 18, 2017, Jiuzhou Pharmacy will set up a JV with CareRetail HK. The JV is intended to be an investment vehicle in acquiring or cooperating with another pharmaceutical chain in China. As certain important terms (such as the amount of capital) require further discussion, as of the date hereof, the JV has not been set up.

**ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS
2. OF OPERATIONS.**

The following management's discussion and analysis should be read in conjunction with our unaudited condensed consolidated financial statements and the notes thereto and the other financial information appearing elsewhere in this item. In addition to historical information, the following discussion contains certain forward-looking statements within the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. These statements relate to our future plans, objectives, expectations and intentions. These statements may be identified by the use of words such as "may," "will," "could," "expect," "anticipate," "intend," "believe," "estimate," "plan," "predict," and similar terms or terminology, or the negative of such terms or other comparable terminology. Although we believe the expectations expressed in these forward-looking statements are based on reasonable assumptions within the bound of our knowledge of our business, our actual results could differ materially from those discussed in these statements. Factors that could contribute to such differences include, but are not limited to, those discussed in the "Risk Factors" section of our annual report on Form 10-K for the year ended March 31, 2017 and filed with the SEC on June 29, 2017. We undertake no obligation to update publicly any forward-looking statements for any reason even if new information becomes available or other events occur in the future.

Our financial statements are prepared in U.S. Dollars and in accordance with accounting principles generally accepted in the United States. See "Exchange Rates" below for information concerning the exchanges rates at which Renminbi ("RMB") were translated into U.S. Dollars ("USD" or "\$") at various pertinent dates and for pertinent periods.

Overview

We currently operate in four business segments in China: (1) retail drugstores, (2) online pharmacy, (3) wholesale of products similar to those that we carry in our pharmacies, and (4) farming and selling herbs used for traditional Chinese medicine ("TCM").

Our drugstores offer customers a wide variety of pharmaceutical products, including prescription and over-the-counter ("OTC") drugs, nutritional supplements, TCM, personal and family care products, medical devices, and convenience products, including consumable, seasonal, and promotional items. Additionally, we have licensed doctors of both western medicine and TCM on site for consultation, examination and treatment of common ailments at scheduled hours. As of September 30, 2017, we had 84 pharmacies in Hangzhou under the store brand of "Jiuzhou Grand Pharmacy." During the six months ended September 30, 2017, we opened twenty-eight new pharmacies.

Since May 2010, we have also been selling certain OTC drugs, medical devices, nutritional supplements and other sundry products online. Our online pharmacy sells through several third-party platforms such as Alibaba's Tmall, JD.com and Amazon.com, and the Company's own platform all over China. In fiscal year 2018, in order to keep top rankings in certain third-party platforms such as Tmall, we have spent reasonable resources on marketing our products through these third-party platforms. Our sales through our own platform are primarily generated by customers who use their private commercial medical insurances package.

We operate a wholesale business through Jiuxin Medicine distributing third-party pharmaceutical products (similar to those carried by our pharmacies) primarily to trading companies throughout China. We also farm certain herbs used in TCM but have not made any sales in the six months ended September 30, 2017.

Critical Accounting Policies and Estimates

In preparing our audited consolidated financial statements in accordance with accounting principles generally accepted in the United States of America, we are required to make judgments, estimates and assumptions that affect: (i) the reported amounts of our assets and liabilities; (ii) the disclosure of our contingent assets and liabilities at the end of each reporting period; and (iii) the reported amounts of revenue and expenses during each reporting period. We continually evaluate these estimates based on our own historical experience, knowledge and assessment of current business and other conditions, our expectations regarding the future based on available information and reasonable assumptions, which together form our basis for making judgments about matters that are not readily apparent from other sources. Since the use of estimates is an integral component of the financial reporting process, our actual results could differ materially from those estimates.

We believe that any reasonable deviation from those judgments and estimates would not have a material impact on our financial condition or results of operations. To the extent that the estimates used differ from actual results, however, adjustments to the statement of operations and corresponding balance sheet accounts would be necessary. These adjustments would be made in future financial statements.

When reading our financial statements, you should consider: (i) our critical accounting policies; (ii) the judgment and other uncertainties affecting the application of such policies; and (iii) the sensitivity of reported results to changes in conditions and assumptions. The critical accounting policies and related judgments and estimates used to prepare our financial statements are identified in Note 2 to our audited consolidated financial statements accompanying in this report.

Results of Operations***Comparison of three months ended September 30, 2017 and 2016***

The following table summarizes our results of operations for the three months ended September 30, 2017 and 2016:

	Three months ended September 30, 2017		2016			
	Amount	Percentage of total revenue	Amount	Percentage of total revenue		
Revenue	\$23,491,043	100 %	\$20,160,835	100.0 %

Income tax expense (benefit)	\$18,047	0.1 %	\$17,484	(0.1)%		
Net income(loss)	\$(1,168,709)	(5.0)%	\$97,870	0.5 %		

Revenue

Primarily due to the increase in our retail drugstores and wholesale business , revenue increased by \$3,330,208 or 17.0% for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016, partially offset by the decrease in online pharmacy business. The following table breaks down the revenue for our four business segments for the three months ended September 30, 2017 and 2016:

Quarterly Revenue by Segment

The following table breaks down the revenue for our four business segments for the three months ended September 30, 2017 and 2016:

	Three months ended September 30, 2017		2016		% of total revenue	Variance by amount	% of change
	Amount	% of total revenue	Amount				
Revenue from retail drugstores	\$15,047,615	64.1	% \$12,806,987	63.5	% \$2,240,628	17.0	%
Revenue from online sales	3,065,016	13.0	% 3,783,725	18.8	% (718,709)	(19.0)%
Revenue from wholesale business	5,378,412	22.9	% 3,570,123	17.7	% 1,808,289	51.0	%
Revenue from farming business	-	-	% -	-	% -	-	%
Total revenue	\$23,491,043	100.0	% \$20,160,835	100.0	% \$3,330,208	17.0	%

Retail drugstores sales, which accounted for approximately 64.1% of total revenue for the three months ended September 30, 2017, increased by \$2,240,628, or 17.0% as compared to the three months ended September 30, 2016, to \$15,047,615. Same-store sales increased by approximately \$1,313,448, or 11.5%, while new stores contributed approximately \$889,010 in revenue in the three months ended September 30, 2017. Starting in fiscal year 2017, our new general manager in retail business has been spending significant efforts on commodity selection and purchase price negotiation. A wide choice of suitable health products to customers is a key to a drugstore success. By introducing more quality products at lower prices, we were able to retain more customers visiting our stores. Additionally, in cooperation with brand name suppliers, we continuously implement various marketing activities. For example, we made a strategic alliance with a famous *Colla corii asini* manufacturer to promote its sales in Hangzhou. *Colla corii asini* is a well-known nutritional supplement in China and has a large number of consumers. By promoting the products in our stores, we were able to raise sales of the products while enjoying the supplier's support in the form of a lower purchase price and technical on-site assistance. As a side effect, customers who bought *Colla corii asini* in our stores also made purchases of other health products. We have plans to marketing a series of quality products in cooperation with their manufacturers in the second half of calendar year 2017. Our store count increased to 95 as of September 30, 2016, compared to 62 stores as of September 30, 2016, as an effect of opening thirty-three stores in fiscal year 2018.

Our online pharmacy sales decreased by approximately \$718,709, or 19.0% for the three months ended September 30, 2017, as compared to the three months ended September 30, 2016. The decrease was mainly caused by decline in our sale via e-commerce platforms, as further explained below, during this quarter. We carry our business either through certain e-commerce platforms such as Tmall and JD.com or via our own official online pharmacy website. Such arrangements with third-party platforms have exposed our online presence to a wider consumer base. In order to increase the popularity of our products, we have made considerable efforts to identify popular products that can drive sales, while keeping a close watch on cost. However, due to the suspension of OTC drug sales on e-commerce platforms such as Alibaba in the second quarter of fiscal year 2017 by the China Food and Drug Administration ("CFDA"), our sales via these e-commerce platforms have been curtailed. As a result, our sales via these e-commerce platforms decreased by 34.4% period over period. We are adding more non-medical health products such as nutritional supplements into our sales menu to counterpart the decline in sale of OTC drug category. For instance, we are opening a *dendrobium candidum* flagship store at Tmall with a local popular brand. The brand has a large customer base in Hangzhou. We expect our e-commerce platform sales will pick up in the future.

Wholesale revenue increased by \$1,808,289 or 51.0%, primarily as a result of our ability to resell certain products, which our retail stores made large orders on, to other vendors. As our retail drugstores achieved large quantity sales of certain brand name products, we were able to bargain lower purchase prices than the market level on these merchandises. As a result, vendors who were unable to obtain a better price than ours, turned to us for these products, causing the wholesale volume to grow. However, hospitals still act as a major source of drug retailers in China. Local hospitals usually have stronger ties with their existing suppliers and we have not been able to make significant progress in becoming a major supplier to local hospitals. Until we can establish a new customer base and secure a status to serve as a provincial or national exclusive sale agent for certain popular drugs, we do not expect our wholesale business to increase significantly in the immediate future.

In the three months ended September 30, 2017 and 2016, we have not generated revenue from our farming business. We planted ginkgo and maidenhair trees during the year of 2013. A ginkgo tree may have a growth period of up to twenty years before it is mature enough for harvest. We have not yet harvested our ginkgo or maidenhair trees. Usually, the longer it grows the more valuable it becomes. We plan to continue cultivating the trees in order to maximize their market value in the future. We anticipate that we will continue to grow ginkgo trees and start cultivating other herbs in the future.

Gross Profit

Gross profit increased by \$1,204,590 or 27.7% period over period primarily as a result of an increase in gross margin of wholesale business and increase in retail drugstores sale . At the same time, gross margin increased from 21.6% to 23.7% due to higher retail profit margins. The average gross margins for each of our four business segments are as follows:

	Three months ended September 30,	
	2017	2016
Average gross margin for retail drugstores	28.2%	29.4%
Average gross margin for online sales	13.0%	10.5%
Average gross margin for wholesale business	17.0%	5.2 %
Average gross margin for farming business	N/A	N/A

Retail gross margins decreased primarily due to lower prices in promotional campaigns, and lower profit margins of DTP medicine. In order to boost our sales, we have implemented several marketing campaigns in our stores in the three months ended September 30, 2017. As an effective method to promote sales, we have implemented promotional policies, such as coupon discounts on certain merchandise. As a result, our retail profit margins were diminished. Additionally, certain DTP medicines from hospitals have low profit margins. By selling these medicines, we may incur lower profit margins while maintaining a higher level of sales.

Gross margin of online pharmacy sales decreased primarily as a result of sales strategy adjustments. Starting from July 2017, the successive GM at our online pharmacy adjusted the sales strategy by abandoning certain extremely low margin products and introducing several profitable products. Although online sales declined, profit margins continued to increase. In contrast, in the three months ended September 30, 2016, in order to promote online sales, the predecessor GM chose to cut sales prices. In the future, we plan to increase our sales while keeping reasonable gross profit margins.

Wholesale gross margin increased primarily as a result of different products we carried and sold to certain pharmaceutical vendors. As we carried sales of certain high margin produces with suppliers rebate in this quarter, our sales profit margins increased.

Selling and Marketing Expenses

Sales and marketing expenses increased by \$1,327,450, or 43.9%, period over period, primarily due to commissions payable to our wholesale sales contractors, rent and expenditures for new retail stores, and reclassification of certain staff's salaries to selling and marketing expense in our wholesale business. In the three months ended September 30, 2017, certain wholesale business was referred by unaffiliated individual medical products traders who earned commissions based on the brokered transaction amount. As a result, we incurred additional selling expenses of approximately \$0.8 million. In the quarter ended September 30, 2017, we accelerated new store opening. As a result, we incurred additional rental costs of \$0.2 million. Additionally, as certain members of our wholesale staff provide general customer care and warehouses support that are more related to our sales, we reclassified \$0.3 million expenses as sales and marketing expenses to better reflect their nature. Such increase in expenses, as well as a decrease in overall sales, caused an increase in expenses as a percentage of our revenue to 18.5%, from 15.0% for the same period a year ago.

General and Administrative Expenses

General and administrative expenses increased by \$1,472,905, or 106.5%, period over period. Such expenses as a percentage of revenue increased to 12.20% from 6.9% for the same period a year ago. The increase in absolute dollars reflects additional accounts receivable and advances to vendors allowance of \$1.1 million in the three months ended September 30, 2017 as compared to reversal of \$0.3 million in the six months ended September 30, 2016. The difference was due to certain aged accounts receivable and advances to suppliers accounts as of September 30, 2017.

Income (Loss) from Operations

As a result of the above, we had loss from operations of \$1,648,730, as compared to loss from operations of \$52,965 a year ago. Our operating margin for the three months ended September 30, 2017 and 2016 was (7.0)% and (0.3)%, respectively.

Income Taxes

Our income tax expense increased by \$563 period over period due to increase in retail sales profit.

Net Income(Loss)

As a result of the foregoing, net income decreased by \$1,266,579 period over period.

Comparison of six months ended September 30, 2017 and 2016

The following table summarizes our results of operations for the six months ended September 30, 2017 and 2016:

	Six months ended September 30, 2017		2016			
	Amount	Percentage of total revenue	Amount	Percentage of total revenue		
Revenue	\$45,161,411	100.0	%	41,096,750	100.0	%
Gross profit	\$9,735,258	21.6	%	8,834,811	21.5	%
Selling expenses	\$8,267,631	18.3	%	5,706,043	13.9	%
General and administrative expenses	\$4,580,998	10.1	%	3,301,132	8	%
Income (loss) from operations	\$(3,113,371)	(6.9)%	(172,364)	(0.4)%

Net income attributable to controlling interest	\$(2,588,013)	(5.7)%	229,023	0.6	%
Net income (loss) attributable to noncontrolling interest	\$-	-	%	-	-	%

Revenue

Primarily due to the increase in our retail pharmacy business and wholesale business, our revenue increased by \$4,064,661 or 10.0% for the six months ended September 30, 2017, as compared to the six months ended September 30, 2016, partially offset by the increase in our wholesale business. The following table breaks down the revenue for our four business segments for the six months ended September 30, 2017 and 2016.

Quarterly Revenue by Segment

The following table breaks down the revenue for our four business segments for the six months ended September 30, 2017 and 2016:

	Six months ended September 30, 2017		2016		Variance by amount	% of change
	Amount	% of total revenue	Amount	% of total revenue		
Revenue from retail drugstores	\$28,067,985	62.0 %	\$25,515,229	62.1 %	\$2,552,756	10.0 %
Revenue from online sales	6,200,705	14.0 %	8,854,804	21.5 %	(2,654,099)	(30.0)%
Revenue from wholesale business	10,892,721	24.0 %	6,726,717	16.4 %	4,166,004	62.0 %
Revenue from farming business	-	- %	-	- %	-	- %
Total revenue	\$45,161,411	100.0 %	\$41,096,750	100.0 %	\$4,064,661	10.0 %

Retail drugstores sales, which accounted for approximately 62.0% of total revenue for the six months ended September 30, 2017, increased by \$2,552,756, or 10.0% as compared to the six months ended September 30, 2016, to \$28,067,985. Same-store sales increased by approximately \$2,814,763, or 12.4%, while new stores contributed approximately \$1,178,665 in revenue in the six months ended September 30, 2017. Excluding the RMB depreciation effect, the same store sales increased by approximately 15.2% period over period. Starting in fiscal year 2017, our new general manager in retail business has been spending significant efforts on commodity selection and purchase price negotiation. A wide choice of suitable health products to customers is a key to a drugstore success. By introducing more quality products at lower prices, we were able to retain more customers visiting our stores. Additionally, in cooperation with brand name suppliers, we continuously implement various marketing activities. For example, we made a strategic alliance with a famous *Colla corii asini* manufacturer to promote its sales in Hangzhou. *Colla corii asini* is a well-known nutritional supplement in China and has a large number of consumers. By promoting the products in our stores, we were able to raise sales of the products while enjoying the supplier's support in the form of a lower purchase price and technical on-site assistance. As a side effect, customers who bought *Colla corii asini* in our stores also made purchases of other health products. We have plans to market a series of quality products in cooperation with their manufacturers in the second half of calendar year 2017. Our store count increased to 95 as of

September 30, 2016, compared to 62 stores as of September 30, 2016, as an effect of opening thirty-three stores in fiscal year 2018.

Our online pharmacy sales decreased by approximately \$2,654,099, or 30.0% for the six months ended September 30, 2017, as compared to the six months ended September 30, 2016. The decrease was mainly caused by decline in our sale via e-commerce platforms, as further explained below, during this quarter. We carry our business either through certain e-commerce platforms such as Tmall and JD.com or via our own official online pharmacy website. Such arrangements with third-party platforms have exposed our online presence to a wider consumer base. In order to increase the popularity of our products, we have made considerable efforts to identify popular products that can drive sales, while keeping a close watch on cost. However, due to the suspension of OTC drug sales on e-commerce platforms such as Alibaba in the second quarter of fiscal year 2017 by the China Food and Drug Administration (“CFDA”), our sales via these e-commerce platforms have been curtailed. As a result, our sales via these e-commerce platforms decreased by 28.0% period over period. We are adding more non-medical health products such as nutritional supplements into our sales menu to counteract the decline in sale of OTC drug category. For instance, we are opening a *dendrobium candidum* flagship store at Tmall with a local popular brand. The brand has a large customer base in Hangzhou. We expect our e-commerce platform sales will pick up in the future. Due to the decline in business referred to us from “Yikatong”, a popular pharmacy and health insurance benefit card, the sales on our own official website for the six months ended September 30, 2017 decreased by \$0.53 million or 41.4% as compared to the six months ended September 30, 2016. Yikatong is run by a Pharmacy Benefit Management (“PBM”) provider in China. In fiscal year 2016, we created a strategic alliance with the PBM provider. However, in order to maximize its profit, the PBM provider chose to create its own online pharmacy to sell products referred from Yikatong. In order to grow its own online pharmacy, the PBM provider actively directed Yikatong customers to purchase products on its online pharmacy. As a result, the sales on our own official website declined.

Wholesale revenue increased by \$4,166,004 or 62.0%, primarily as a result of our ability to resell certain products, which our retail stores made large orders on, to other vendors. As our retail drugstores achieved large quantity sales of certain brand name products, we were able to bargain lower purchase prices than the market level on these merchandises. As a result, vendors who were unable to obtain a better price than ours, turned to us for these products, causing the wholesale volume to grow. However, hospitals still act as a major source of drug retailers in China. Local hospitals usually have stronger ties with their existing suppliers and we have not been able to make significant progress in becoming a major supplier to local hospitals.

In the six months ended September 30, 2017 and 2016, we have not harvested and generated revenue from our farming business. We planted ginkgo and maidenhair trees during the year ended March 31, 2013. A ginkgo tree may have a growth period of up to twenty years before it is mature enough for harvest. Usually, the longer it grows the more valuable it becomes. We plan to continue cultivating the trees in order to maximize their market value in the future. During the six months ended September 30, 2017, we have been evaluating feasibility of planting other herbs with short period of growth. We anticipate that we will continue to grow ginkgo trees and start cultivating other herbs in the future.

Gross Profit

Gross profit increased by \$900,447 or 10.2% period over period primarily as a result of an increase in gross margin of wholesale business and increase in retail drugstores sale. At the same time, gross margin increased from 21.5% to 21.6% due to higher retail profit margins. The average gross margins for each of our four business segments are as follows:

	Six months ended September 30,	
	2017	2016
Average gross margin for retail drugstores	26.8%	29.0%
Average gross margin for online sales	11.1%	11.9%
Average gross margin for wholesale business	13.9%	5.8 %
Average gross margin for farming business	N/A	N/A

Retail gross margins decreased primarily due to lower prices in promotional campaigns, and lower profit margins of DTP medicine. In order to boost our sales, we have implemented several marketing campaigns in our stores in the three months ended September 30, 2017. As an effective method to promote sales, we have implemented promotional policies such as coupon discounts on certain merchandise. As a result, our retail profit margins were diminished. Additionally, certain DTP medicines from hospitals have low profit margins. By selling these medicines, we may incur lower profit margins while keeping our sales up. However, as we continuously renegotiate with our suppliers for lower purchase prices from, we expect to increase profit while keeping sales growth quickly.

Gross margin of online pharmacy sales decreased primarily because of the decline in our sales via our own official website. We conduct our business either through certain e-commerce platforms such as Tmall and JD.com or via our own official online pharmacy website, www.dada360.com. The sales on our own official website usually have higher profit margins because customers referred by Yikatong and commercial insurance companies are premium customers who can afford premium products with higher profit margins. As described in the above, Yikatong has continued to cut its customer referrals to our online pharmacy. However, Starting from July 2017, the successive general manager at our online pharmacy adjusted the sales strategy by abandoning certain extremely low margin products and introducing several profitable products. Although online sales declined, profit margins continue to increase. In the future, we plan to increase our sales while keeping reasonable gross profit margins.

Wholesale gross margin increased primarily as a result of different products we carried and sold to certain pharmaceutical vendors. As we were able to carry sales of certain high margin produces with suppliers rebate in this period, our sales profit margin increased.

Selling and Marketing Expenses

Sales and marketing expenses increased by \$2,561,588 or 44.9% period over period, primarily due to commissions payable to our wholesale sales contractors, rent and expenditures for new retail stores, and reclassification of certain staff's salaries to selling and marketing expense in our wholesale business. In the three months ended September 30, 2017, much of our wholesale business was referred by unaffiliated individuals medical products traders who earned commissions based on the brokered transaction amount. As a result, we incurred additional selling expenses of approximately \$1.3 million. In the quarter ended September 30, 2017, we accelerated new store openings. As a result, we incurred \$0.7 million for additional rental and new store expenditures such as stationery and utility. Additionally, as certain members of our wholesale staff provide general customer care and warehouses support that are more related to our sales, we reclassified \$0.4 million expenses as sales and marketing expenses to better reflect their nature. These increases in expenses, as well as the decrease in overall sales, caused expenses as a percentage of our revenue to increase to 18.3%, from 13.9% for the same period a year ago.

General and Administrative Expenses

General and administrative expenses increased by \$1,279,866 or 38.8% period over period. Such expenses as a percentage of revenue increased to 10.1% from 8.0% for the same period a year ago. The increase in absolute dollars reflects additional accounts receivable and advances to vendors allowance of \$1.5 million in the six months ended September 30, 2017 as compared to a reversal of \$0.3 million in the six months ended September 30, 2016. The difference was due to certain aged accounts receivable and advances to suppliers accounts in the three months ended September 30, 2016.

Income (Loss) from Operations

As a result of the above, we had loss from operations of \$3,113,371, as compared to loss from operations of \$172,364 a year ago. Our operating margin for the six months ended September 30, 2017 and 2016 was (6.9)% and (0.4)%, respectively.

Income Taxes

Our income tax expense decreased by \$7,333 period over period due to overall increase in operation loss in retail profit.

Net Income (Loss)

As a result of the foregoing, net income decreased by \$2,817,036 period over period.

Accounts receivable

Accounts receivable, which are unsecured, are stated at the amount we expect to collect. We continuously monitor collections and payments from our customers and maintain a provision for estimated credit losses. To prepare for potential loss in such accounts, we made corresponding reserves.

Our accounts receivable aging was as follows for the periods described below:

From date of invoice to customer	Retail drugstores	Online Pharmacy	Drug wholesale	Herb farming	Total amount
1- 3 months	\$7,048,169	\$1,087,106	\$1,676,473	\$ -	\$9,812,462
4- 6 months	1,347	298,029	39,664	-	339,040
7- 12 months	24,117	34,652	168,793	-	226,383
Over one year	11,742	124,458	1,756,101	-	1,892,766
Allowance for doubtful accounts	(63,651)	(164,091)	(1,842,367)	-	(2,070,109)
Total accounts receivable	\$7,021,724	\$1,380,154	\$1,798,664	\$ -	\$10,200,542

Accounts receivable from our retail business mainly consist of reimbursements from government health insurance bureaus and commercial health insurance programs. In the three and six months ended September 30, 2017 and 2016, we wrote off an approximately \$124,983 and \$30,790 collectible from provincial and Hangzhou City government insurance, as such amount has been determined by the health insurance bureaus to be unqualified for reimbursement.

Accounts receivable from our online pharmacy business mainly consist of collectibles from third-party platforms such as Tmall and JD.com where we sell products. Usually the third-party platforms will collect from customers ordering on their platforms and then reimburse us in times ranging from several days to a month after orders are placed.

Accounts receivable from our drug wholesale business and herb farming business consist of receivables from our customers such as pharmaceutical distributors. Our drug wholesale business transitioned away from focusing on sales volume beginning in the second half of fiscal year 2013, and it tightened its customer credit policy and strengthened monitoring of uncollected receivables. However, in the six months ended September 30, 2016, certain accounts become aged and reserved. As a result, we made an additional \$654,604 in allowance.

Subsequent to September 30, 2017 and through October 31, 2017, we collected approximately \$2.6 million in receivables relating to our drugstore business, approximately \$1.4 million in receivables relating to our online pharmacy business, approximately \$0.2 million relating to our wholesale business, and \$0 relating to our herb farming business.

Advances to suppliers

Advances to suppliers are mainly prepayments to secure certain products or services and favorable pricing. The aging of our advances to suppliers is as follows for the periods described below:

From date of cash prepayment to suppliers	Retail drugstores	Online Pharmacy	Drug wholesale	Herb farming	Total amount
1- 3 months	\$477,084	\$ -	\$2,855,179	\$ -	\$3,332,263
4- 6 months	79,909	-	254,474	-	334,383
7- 12 months	54,722	-	469,246	-	523,968
Over one year	320,080	-	1,770,214	-	2,090,294
Allowance for doubtful accounts	(367,622)	-	(1,999,187)	-	(2,366,809)
Total advances to suppliers	\$564,173	\$ -	\$3,349,926	\$ -	\$3,914,099

Since the acquisition of Jiuxin Medicine, we have gradually transferred almost all logistics services of our retail drugstores to Jiuxin Medicine. Jiuzhou Pharmacy only makes purchases on certain non-medical products such as sundry. As a result, our retail chain had little advances to suppliers as of September 30, 2017.

Advances to suppliers for our drug wholesale business consist of prepayments to our vendors such as pharmaceutical manufacturers and other distributors. We typically receive products from vendors within three to nine months after making prepayments. We continuously monitor delivery from and payments to our vendors while maintaining a provision for estimated credit losses based upon historical experience and any supplier-specific issues such as discontinuing of inventory supply that have been identified. If we are having difficulty receiving products from a vendor, we take the following steps: cease purchasing products from the vendor, ask for return of our prepayment promptly, and if necessary, take legal action. If all of these steps are unsuccessful, management then determines whether or not the prepayments should be reserved or written off. To facilitate its initial expansion, Jiuxin Medicine made significant prepayments to certain vendors. Lack of timely supplier account reconciliation caused by several sales staff rotations delayed the monitoring of such accounts. To accommodate potential loss in advances to suppliers, we made reserve for amounts considered to be uncollectible. As previously discussed, Jiuxin Medicine transitioned away from focusing on sales volume beginning in the second half of fiscal year 2013, and since then we have tightened our customer credit policy and strengthened monitoring of uncollected receivables.

Liquidity and Capital Resources

Our cash flows for the periods indicated are as follows:

	Six months ended	
	September 30,	
	2017	2016
Net cash provided by operating activities	\$(520,646)	\$455,060
Net cash provided by investing activities	\$(1,095,979)	\$303,280
Net cash provided by financing activities	\$(857,505)	\$1,110,050

For the six months ended September 30, 2017, cash used in operating activities amounted to \$520,646, as compared to \$455,060 cash used in operating activities a year ago. The change is primarily attributable to a decrease of \$2,817,036 in net income, and a decrease of \$2,236,007 in cash provided by accounts payable, offset by a decrease of \$2,568,755 in cash used in inventory and biological assets, and an increase of \$1,418,433 in the change of bad debt direct write-off.

For the six months ended September 30, 2017, net cash used in investing activities amounted to \$1,095,979, as compared to \$303,280, provided by investing activities a year ago. The change is attributable to purchase of intangible assets such as social medical reimbursement certificate and increase in construction-in-progress such as SAP (see Note 7) system implementation in the six months ended September 30, 2017.

For the six months ended September 30, 2017, net cash used in financing activities amounted to \$857,505, as compared to \$1,110,050, provided by financing activities a year ago.

As of September 30, 2017, we had cash of approximately \$16,837,873. Our total current assets as of September 30, 2016, were \$57,213,864 and total current liabilities were \$44,010,342, which resulted in a working capital of \$13,203,522.

On January 23, 2017, we completed a private placement with a single healthcare-focused institutional investor for the purchase of an aggregate of 4,840,000 of our common stock at a price of \$2.20 per share and gross proceeds of approximately \$10,648,000. As of September 30, 2017, we had approximately \$5.30 million in our credit line available for further borrowing. We believe that the foregoing sources will collectively provide sufficient liquidity for us to meet our liquidity and capital obligations for the next twelve months. However, if we are to acquire additional businesses or further expand our operations, we may need additional capital.

Contractual Obligations and Off-Balance Sheet Arrangements

Contractual Obligations

When we open store locations, we typically enter into lease agreements that are generally between three to ten years. Our commitments for minimum rental payments under our leases for the next five years and thereafter are as follows:

Edgar Filing: CHINA JO-JO DRUGSTORES, INC. - Form 10-Q

Periods ending September 30,	Retail drugstores	Online pharmacy	Drug wholesale	Herb farming	Total Amount
2018	\$3,875,101	\$ 36,366	\$ 72,732	\$ -	\$3,984,199
2019	3,462,529	36,366	72,732	-	3,571,627
2020	2,704,078	36,366	72,732	-	,2,813,176
2021	2,156,248	12,122	24,244	-	2,192,614
2022	1,653,163	-	-	-	1,653,163
Thereafter	2,556,744	-	-	-	2,556,744

Off-balance Sheet Arrangements

We do not have any outstanding financial guarantees or commitments to guarantee the payment obligations of any third parties. We have not entered into any derivative contracts that are indexed to our shares and classified as stockholder's equity or that are not reflected in our consolidated financial statements. Furthermore, we do not have any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity. We do not have any variable interest in any unconsolidated entity that provides financing, liquidity, market risk or credit support to us or engages in leasing, hedging or research and development services with us.

Exchange Rates

Our subsidiaries and affiliated companies in the PRC maintain their books and records in RMB, the lawful currency of the PRC. In general, for consolidation purposes, we translate their assets and liabilities into USD using the applicable exchange rates prevailing at the balance sheet date, and the statement of income is translated at average exchange rates during the reporting period. Adjustments resulting from the translation of their financial statements are recorded as accumulated other comprehensive income.

The exchange rates used to translate amounts in RMB into USD for the purposes of preparing the audited consolidated financial statements or otherwise disclosed in this report were as follows:

	September 30, 2017	March 31, 2017
Balance sheet items, except for the registered and paid-up capital, as of end of period	USD1: RMB 0.1503	USD1: RMB 0.1451
Amounts included in the statement of Operations and statement of cash flows for the period ended	USD1: RMB 0.1478	USD1: RMB 0.1487

Inflation

We believe that inflation has not had a material effect on our operations to date.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Not applicable.

35

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of September 30, 2017, we carried out an evaluation, under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended. Based upon such evaluation, our chief executive officer and chief financial officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were ineffective at the reasonable assurance level. Such conclusion is based on the presence of the following material weakness in internal control over financial reporting as described in our annual report on Form 10-K for the year ended March 31, 2017:

Accounting and Finance Personnel Weaknesses - As noted in Item 9A of our annual reports on Form 10-K for the preceding fiscal years, management concluded that in light of the inexperience of our accounting staff with respect to the requirements of U.S. GAAP-based reporting and SEC rules and regulations, we did not maintain effective controls and did not implement adequate and proper supervisory review to ensure that significant internal control deficiencies would be detected or prevented.

We have been continually making progress in improving its internal control. In 2017, we have just installed a leading ERP system, SAP from Germany. SAP is a well-known management system used by many fortune 500 companies. Per the contract with the local SAP system provider, the total fee for SAP customized installation and training adds up to more than 1 million USD in this year. By automatically connecting commodity flow data with accounting recording, the system minimizes the manual errors made by accounting staff. Additionally, the system provides a view of overall and instant cash information by electronically linking local banking systems with SAP. Additional benefits include automatically-generated customized monthly company performance report, instant inventory monitoring and reporting, and punctual customer and suppliers accounts maintaining. On the other side, we plan to introduce talented managers who are able to better utilize the system. We expect to continually improve our internal control system.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) of the Securities Exchange Act of 1934) during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
