

BANK OF MONTREAL /CAN/
Form 424B2
August 01, 2013

The information in this preliminary pricing supplement is not complete and may be changed. This preliminary pricing supplement is not an offer to sell nor does it seek an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

Registration Statement No. 333-173924
Filed Pursuant to Rule 424(b)(2)

Subject to Completion, dated July 31, 2013

Pricing Supplement to the Prospectus dated June 22, 2011, the Prospectus Supplement
dated June 22, 2011 and the Product Supplement dated June 23, 2011

Senior Medium-Term Notes, Series B

Buffered Bullish Enhanced Return Notes
Each Linked to a Single Exchange Traded Fund

This pricing supplement relates to more than one note offering. Each issue of the notes is linked to one, and only one, Underlying Asset named below. You may participate in any of the offerings individually or, at your election, in both of the offerings. This pricing supplement does not, however, allow you to purchase a single note linked to a basket of the Underlying Assets below.

An investor in the notes may lose some or a substantial portion of their principal at maturity.

The notes are designed for investors who seek a 200% leveraged return based on the appreciation in the share price of the applicable Underlying Asset. Investors should be willing to accept a payment at maturity that is capped at the applicable Maximum Redemption Amount (as defined below), be willing to forgo periodic interest, and be willing to lose 1% of their principal amount for each 1% that the price of the applicable Underlying Asset decreases by more than the applicable Buffer Percentage from its price on the Pricing Date.

The maximum return at maturity will be equal to the product of the Upside Leverage Factor of 200% and the applicable Cap.

The offerings are expected to price on August 28, 2013, and the notes are expected to settle through the facilities of The Depository Trust Company on or about August 30, 2013.

Any payment at maturity is subject to the credit risk of Bank of Montreal.

The notes will be issued in minimum denominations of \$1,000 and integral multiples of \$1,000.

Our subsidiary, BMO Capital Markets Corp. ("BMOCM"), is the agent for this offering. See "Supplemental Plan of Distribution (Conflicts of Interest)" below.

Common Terms for Each of the Notes:

Pricing Date:	On or about August 28, 2013	Valuation Date:	On or about August 27, 2015
Settlement Date:	On or about August 30, 2013	Maturity Date:	On or about August 31, 2015
Term of the Notes:	2 Years		

Specific Terms for Each of the Notes:

Underlying Asset	Cap	Maximum Redemption Amount	Buffer Percentage	Buffer Level of Initial Level (%)	Initial Level*	CUSIP	Principal Amount	Price to Public	Agent's Commission(1)	Proceeds to Bank of Montreal
iShares® Russell 2000 ETF (IWM)	8.25%	\$1,165	10%	90%		06366RQE8		100%	%	% US\$
Market Vectors® Gold Miners ETF (GDX)	16.75%	\$1,335	15%	85%		06366RQF5		100%	%	% US\$

* The actual Initial Level will be set on the pricing date.

(1) The actual agent's commission will be set forth in the final pricing supplement.

Investing in the notes involves risks, including those described in the "Selected Risk Considerations" section beginning on page P-4 of this pricing supplement, "Additional Risk Factors Relating to the Notes" section beginning on page PS-5 of the product supplement, and "Risk Factors" section beginning on page S-3 of the prospectus supplement and on page 7 of the prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these notes or passed upon the accuracy of this pricing supplement, the product supplement, the prospectus supplement or the prospectus. Any representation to the contrary is a criminal offense.

The notes will be our unsecured obligations and will not be savings accounts or deposits that are insured by the United States Federal Deposit Insurance Corporation, the Bank Insurance Fund, the Canada Deposit Insurance Corporation or any other governmental agency or instrumentality or other entity.

On the date of this preliminary pricing supplement, based on the terms set forth above, the estimated initial value of the notes is \$964.00 per \$1,000 in principal amount as to the notes linked to IWM, and \$964.10 per \$1,000 in principal amount as to the notes linked to GDX. The estimated initial value of the notes on the pricing date may differ from this value but will not be less than \$940.00 per \$1,000 in principal amount in the case of the notes linked to IWM, and \$940.00 per \$1,000 in principal amount in the case of the notes linked to GDX. However, as discussed in more detail in this pricing supplement, the actual value of the notes at any time will reflect many factors and cannot be predicted with accuracy.

BMO CAPITAL MARKETS

Key Terms of Each of the Notes:

General:	This pricing supplement relates to more than one offering of notes. Each offering is a separate offering of notes linked to one, and only one, Underlying Asset. If you wish to participate in both offerings, you must separately purchase the applicable notes. The notes offered by this pricing supplement do not represent notes linked to a basket of the Underlying Assets.
Payment at Maturity:	<p>If the Percentage Change is greater than or equal to the Cap, then the amount that the investors will receive at maturity for each \$1,000 in principal amount of the notes will equal the Maximum Redemption Amount.</p> <p>If the Percentage Change is positive but is less than the Cap, then the amount that the investors will receive at maturity for each \$1,000 in principal amount of the notes will equal:</p> $\text{Principal Amount} + [\text{Principal Amount} \times (\text{Percentage Change} \times \text{Upside Leverage Factor})]$ <p>If the Percentage Change is negative but the Final Level is greater than or equal to the Buffer Level, then the amount that the investors will receive at maturity will equal the principal amount of the notes.</p> <p>If the Percentage Change is negative and the Final Level is less than the Buffer Level, then the payment at maturity will equal:</p> $\text{Principal Amount} + [\text{Principal Amount} \times (\text{Percentage Change} + \text{Buffer Percentage})]$
Upside Leverage Factor:	200%
Initial Level:	The closing price of one share of the applicable Underlying Asset on the Pricing Date.
Final Level:	The closing price of one share of the applicable Underlying Asset on the Valuation Date.
Buffer Level:	As set forth on the cover page of this pricing supplement.
Buffer Percentage:	As set forth on the cover page of this pricing supplement. Accordingly, you will receive the principal amount of your notes at maturity only if the price of the applicable Underlying Asset does not decrease by more than the applicable Buffer Percentage. If the Final Level is less than the applicable Buffer Level, you will receive less than the principal amount of

your notes at maturity, and you could lose some or a substantial portion of the principal amount of your notes.

Percentage Change:	Final Level – Initial Level, expressed as a percentage. Initial Level
Pricing Date:	On or about August 28, 2013
Settlement Date:	On or about August 30, 2013, as determined on the Pricing Date.
Valuation Date:	On or about August 27, 2015, as determined on the Pricing Date.
Maturity Date:	On or about August 31, 2015, as determined on the Pricing Date.
Automatic Redemption:	Not applicable.
Calculation Agent:	BMOCM
Selling Agent:	BMOCM

Key Terms of the Notes Linked to the iShares® Russell 2000 ETF

Underlying Asset:	iShares® Russell 2000 ETF (NYSE Arca symbol: IWM). See the section below entitled “The Underlying Assets— iShares® Russell 2000 ETF” for additional information about the Underlying Asset.
Cap:	8.25%
Maximum Redemption Amount:	The payment at maturity will not exceed the Maximum Redemption Amount of \$1,165 per \$1,000 in principal amount of the notes.
Buffer Percentage	10%
Buffer Level	90% of the Initial Level
CUSIP:	06366RQE8

Key Terms of the Notes Linked to the Market Vectors® Gold Miners ETF:

Underlying Asset:	Market Vectors® Gold Miners ETF (NYSE Arca symbol: GDX). See the section below entitled “The Underlying Assets— Market Vectors® Gold Miners ETF” for additional information about the Underlying Asset.
Cap:	16.75%
Maximum Redemption Amount:	The payment at maturity will not exceed the Maximum Redemption Amount of \$1,335 per \$1,000 in principal amount of the notes.
Buffer Percentage	15%
Buffer Level	85% of the Initial Level
CUSIP:	06366RQF5

The Pricing Date and the Settlement Date are subject to change. The actual Pricing Date, Settlement Date, Valuation Date and Maturity Date for each of the notes will be set forth in the final pricing supplement.

We may use this pricing supplement in the initial sale of the notes. In addition, BMOCM or another of our affiliates may use this pricing supplement in market-making transactions in any notes after their initial sale. Unless our agent or we inform you otherwise in the confirmation of sale, this pricing supplement is being used in a market-making transaction.

P-2

Additional Terms of the Notes

You should read this pricing supplement together with the product supplement dated June 23, 2011, the prospectus supplement dated June 22, 2011 and the prospectus dated June 22, 2011. This pricing supplement, together with the documents listed below, contains the terms of each of the notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours or the agent. You should carefully consider, among other things, the matters set forth in “Additional Risk Factors Relating to the Notes” in the product supplement, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

- Product supplement dated June 23, 2011:
<http://www.sec.gov/Archives/edgar/data/927971/000121465911002118/f622112424b5.htm>
- Prospectus supplement dated June 22, 2011:
<http://www.sec.gov/Archives/edgar/data/927971/000095012311060741/o71090b5e424b5.htm>
- Prospectus dated June 22, 2011:
<http://www.sec.gov/Archives/edgar/data/927971/000095012311060730/o71090b2e424b2.htm>

Our Central Index Key, or CIK, on the SEC website is 927971. As used in this pricing supplement, the “Company,” “we,” “us” or “our” refers to Bank of Montreal.

Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in any of the Underlying Assets. These risks are explained in more detail in the “Additional Risk Factors Relating to the Notes” section of the product supplement.

- Your investment in the notes may result in a loss. — You may lose some or substantially all of your investment in the notes. The payment at maturity is based on the applicable Final Level, and whether the Final Level of the applicable Underlying Asset on the Valuation Date has declined from the Initial Level to a level that is less than the applicable Buffer Level. You will lose 1% of the principal amount of your notes for each 1% that the Final Level is less than the applicable Buffer Level. Accordingly, you could lose some or a substantial portion of the principal amount of the notes.
- Your return on the notes is limited to the applicable Maximum Redemption Amount, regardless of any appreciation in the price of the applicable Underlying Asset. — You will not receive a payment at maturity with a value greater than the applicable Maximum Redemption Amount per \$1,000 in principal amount of the notes. This will be the case even if the Percentage Change exceeds the applicable Cap.
- Your investment is subject to the credit risk of Bank of Montreal. — Our credit ratings and credit spreads may adversely affect the market value of the notes. Investors are dependent on our ability to pay the amount due at maturity, and therefore investors are subject to our credit risk and to changes in the market’s view of our creditworthiness. Any decline in our credit ratings or increase in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the value of the notes.
- Potential conflicts. — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes. We or one or more of our affiliates may also engage in trading of shares of the Underlying Assets or securities included in the applicable Underlying Index (as defined below) on a regular basis as part of our general broker-dealer and other businesses, for proprietary accounts, for other accounts under management or to facilitate transactions for our customers. Any of these activities could adversely affect the prices of the Underlying Assets and, therefore, the market value of the notes. We or one or more of our affiliates may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to changes in the performance of the Underlying Assets. By introducing competing products into the marketplace in this manner, we or one or more of our affiliates could adversely affect the market value of the notes.
- Our initial estimated value of the notes will be lower than the price to public. — Our initial estimated value of each of the notes is only an estimate, and is based on a number of factors. The price to public of each of the notes will exceed our initial estimated value, because costs associated with offering, structuring and hedging the notes are included in the price to public, but are not included in the estimated value. These costs include the agent’s commission, and the profits that we and our affiliates expect to realize for assuming the risks in hedging our obligations under the notes and the estimated cost of hedging these obligations. The initial estimated value of each of the notes may be as low as the applicable amount indicated on the cover page of this pricing supplement.
- Our initial estimated value does not represent any future value of the notes, and may also differ from the estimated value of any other party. — Our initial estimated value of the notes as of the date of this preliminary pricing supplement is, and our estimated value as determined on the pricing date will be, derived using our internal pricing models. This value is based on market conditions and other relevant factors, which include volatility of the Underlying Asset, dividend rates and interest rates. Different pricing models and assumptions could provide values

for the notes that are greater than or less than our initial estimated value. In addition, market conditions and other relevant factors after the pricing date are expected to change, possibly rapidly, and our assumptions may prove to be incorrect. After the pricing date, the value of each of the notes could change dramatically due to changes in market conditions, our creditworthiness, and the other factors set forth in this pricing supplement and the product supplement. The value of each of the notes after the pricing date is not expected to correlate with one another. These changes are likely to impact the price, if any, at which we or BMOCM would be willing to purchase the notes from you in any secondary market transactions. Our initial estimated values do not represent a minimum price at which we or our affiliates would be willing to buy your notes in any secondary market at any time.

- The terms of the notes are not determined by reference to the credit spreads for our conventional fixed-rate debt. — To determine the terms of the notes, we will use an internal funding rate that represents a discount from the credit spreads for our conventional fixed-rate debt. As a result, the terms of the notes are less favorable to you than if we had used a higher funding rate.

- Certain costs are likely to adversely affect the value of the notes. — Absent any changes in market conditions, any secondary market prices of the notes will likely be lower than the price to public. This is because any secondary market prices will likely take into account our then-current market credit spreads, and because any secondary market prices are likely to exclude all or a portion of the agent’s commission and the hedging profits and estimated hedging costs that are included in the price to public of the notes and that may be reflected on your account statements. In addition, any such price is also likely to reflect a discount to account for costs associated with establishing or unwinding any related hedge transaction, such as dealer discounts, mark-ups and other transaction costs. As a result, the price, if any, at which BMOCM or any other party may be willing to purchase the notes from you in secondary market transactions, if at all, will likely to be lower than the price to public. Any sale that you make prior to the maturity date could result in a substantial loss to you.
- Owning the notes is not the same as owning the applicable Underlying Asset or a security directly linked to the applicable Underlying Asset. — The return on your notes will not reflect the return you would realize if you actually owned the applicable Underlying Asset or a security directly linked to the performance of the applicable Underlying Asset and held that investment for a similar period. Your notes may trade quite differently from the applicable Underlying Asset. Changes in the price of the applicable Underlying Asset may not result in comparable changes in the market value of your notes. Even if the price of the applicable Underlying Asset increases during the term of the notes, the market value of the notes prior to maturity may not increase to the same extent. It is also possible for the market value of the notes to decrease while the price of the applicable Underlying Asset increases. In addition, any dividends or other distributions paid on the applicable Underlying Asset will not be reflected in the amount payable on the notes.
- You will not have any shareholder rights and will have no right to receive any shares of the applicable Underlying Asset at maturity. — Investing in your notes will not make you a holder of any shares of the applicable Underlying Asset or any securities held by the applicable Underlying Asset. Neither you nor any other holder or owner of the notes will have any voting rights, any right to receive dividends or other distributions or any other rights with respect to the applicable Underlying Asset or such other securities.
- Changes that affect the applicable index underlying the applicable Underlying Asset will affect the market value of the notes and the amount you will receive at maturity. — The policies of the sponsors (each, an “Index Sponsor”) of the Russell 2000® Index and the NYSE Arca Gold Miners Index (each, an “Underlying Index”), concerning the calculation of the applicable Underlying Index, additions, deletions or substitutions of the components of the applicable Underlying Index and the manner in which changes affecting those components, such as stock dividends, reorganizations or mergers, may be reflected in the applicable Underlying Index and, therefore, could affect the share price of the applicable Underlying Asset, the amount payable on the notes at maturity, and the market value of the notes prior to maturity. The amount payable on the notes and their market value could also be affected if the applicable Index Sponsor changes these policies, for example, by changing the manner in which it calculates the applicable Underlying Index, or if the applicable Index Sponsor discontinues or suspends the calculation or publication of the applicable Underlying Index.
- Adjustments to the applicable Underlying Asset could adversely affect the notes. — BlackRock, Inc. (collectively with its affiliates, “BlackRock”), as the sponsor and advisor of the iShares® Russell 2000 ETF, and Van Eck Associates Corporation (“Van Eck”), as the sponsor of the Market Vectors® Gold Miners ETF, are each responsible for calculating and maintaining the applicable Underlying Asset. BlackRock or Van Eck, as applicable, can add, delete or substitute the stocks comprising the applicable Underlying Asset or may make other methodological changes that could change the share price of the applicable Underlying Asset at any time. If one or more of these events occurs, the calculation of the amount payable at maturity may be adjusted to reflect such event or events. Consequently, any of these actions could adversely affect the amount payable at maturity and/or the market value of the notes.

- We have no affiliation with any Index Sponsor and will not be responsible for any actions taken by any Index Sponsor. —None of the Index Sponsors is an affiliate of ours or will be involved in any offerings of the notes in any way. Consequently, we have no control over the actions of any Index Sponsor, including any actions of the type that would require the calculation agent to adjust the payment to you at maturity. The Index Sponsors have no obligation of any sort with respect to the notes. Thus, the Index Sponsors have no obligation to take your interests into consideration for any reason, including in taking any actions that might affect the value of the notes. None of our proceeds from any issuance of the notes will be delivered to any Index Sponsor.

- We and our affiliates do not have any affiliation with the investment advisor of the Underlying Assets and are not responsible for their public disclosure of information. — The investment advisor of each Underlying Asset advises the applicable Underlying Asset on various matters including matters relating to the policies, maintenance and calculation of the applicable Underlying Asset. We and our affiliates are not affiliated with the investment advisor in any way and have no ability to control or predict their actions, including any errors in or discontinuance of disclosure regarding their methods or policies relating to the applicable Underlying Asset. The investment advisor is not involved in the offerings of the notes in any way and have no obligation to consider your interests as an owner of the notes in taking any actions relating to the applicable Underlying Asset that might affect the value of the notes. Neither we nor any of our affiliates has independently verified the adequacy or accuracy of the information about the investment advisor or the applicable Underlying Asset contained in any public disclosure of information. You, as an investor in the notes, should make your own investigation into the applicable Underlying Asset.
- The correlation between the performance of the applicable Underlying Asset and the performance of the applicable Underlying Index may be imperfect. — The performance of the applicable Underlying Asset is linked principally to the performance of the applicable Underlying Index. However, because of the potential discrepancies identified in more detail in the product supplement, the return on the applicable Underlying Asset may correlate imperfectly with the return on the applicable Underlying Index.
- The Underlying Assets are subject to management risks. — The Underlying Assets are subject to management risk, which is the risk that the investment advisor's investment strategy, the implementation of which is subject to a number of constraints, may not produce the intended results. For example, the investment advisor may invest a portion of the applicable Underlying Asset's assets in securities not included in the relevant industry or sector but which the investment advisor believes will help the applicable Underlying Asset track the relevant industry or sector.
- Lack of liquidity. — The notes will not be listed on any securities exchange. BMOCM may offer to purchase the notes in the secondary market, but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade the notes is likely to depend on the price, if any, at which BMOCM is willing to buy the notes.
- Hedging and trading activities. — We or any of our affiliates may carry out hedging activities related to the notes, including purchasing or selling securities included in the applicable Underlying Asset, or futures or options relating to the applicable Underlying Asset, or other derivative instruments with returns linked or related to changes in the performance of the applicable Underlying Asset or securities included in the applicable Underlying Index. We or our affiliates may also engage in trading relating to the applicable Underlying Asset from time to time. Any of these hedging or trading activities on or prior to the pricing date and during the term of the notes could adversely affect our payment to you at maturity.
- Many economic and market factors will influence the value of the notes. — In addition to the price of the applicable Underlying Asset and interest rates on any trading day, the value of the notes will be affected by a number of economic and market factors that may either offset or magnify each other, and which are described in more detail in the product supplement.
- You must rely on your own evaluation of the merits of an investment linked to the applicable Underlying Asset. — In the ordinary course of their businesses, our affiliates from time to time may express views on expected movements in the price of the Underlying Assets or the securities held by the Underlying Assets. One or more of our affiliates have published, and in the future may publish, research reports that express views on Underlying Assets or these securities. However, these views are subject to change from time to time. Moreover, other professionals who deal

in the markets relating to Underlying Assets at any time may have significantly different views from those of our affiliates. You are encouraged to derive information concerning the Underlying Assets from multiple sources, and you should not rely on the views expressed by our affiliates.

Neither the offering of the notes nor any views which our affiliates from time to time may express in the ordinary course of their businesses constitutes a recommendation as to the merits of an investment in the notes.

- Significant aspects of the tax treatment of the notes are uncertain. The tax treatment of the notes is uncertain. We do not plan to request a ruling from the Internal Revenue Service or from any Canadian authorities regarding the tax treatment of the notes, and the Internal Revenue Service or a court may not agree with the tax treatment described in this pricing supplement.

The Internal Revenue Service has issued a notice indicating that it and the Treasury Department are actively considering whether, among other issues, a holder should be required to accrue interest over the term of an instrument such as the notes even though that holder will not receive any payments with respect to the notes until maturity and whether all or part of the gain a holder may recognize upon sale or maturity of an instrument such as the notes could be treated as ordinary income. The outcome of this process is uncertain and could apply on a retroactive basis.

Please read carefully the section entitled “U.S. Federal Tax Information” in this pricing supplement, the section entitled “Supplemental Tax Considerations—Supplemental U.S. Federal Income Tax Considerations” in the accompanying product supplement, the section “United States Federal Income Taxation” in the accompanying prospectus and the section entitled “Certain Income Tax Consequences” in the accompanying prospectus supplement. You should consult your tax advisor about your own tax situation.

Additional Risks Relating to the iShares® Russell 2000 ETF

· An investment in the Underlying Asset is subject to risks associated in investing in stocks with a small market capitalization. — The Russell 2000® Index consists of stocks issued by companies with relatively small market capitalizations. These companies often have greater stock price volatility, lower trading volume and less liquidity than large-capitalization companies. As a result, the share price of the Underlying Asset may be more volatile than that of a market measure that does not track solely small-capitalization stocks. Stock prices of small-capitalization companies are also generally more vulnerable than those of large-capitalization companies to adverse business and economic developments, and the stocks of small-capitalization companies may be thinly traded, and be less attractive to many investors if they do not pay dividends. In addition, small capitalization companies are typically less well-established and less stable financially than large-capitalization companies and may depend on a small number of key personnel, making them more vulnerable to loss of those individuals. Small capitalization companies tend to have lower revenues, less diverse product lines, smaller shares of their target markets, fewer financial resources and fewer competitive strengths than large-capitalization companies. These companies may also be more susceptible to adverse developments related to their products or services.

Additional Risks Relating to the Market Vectors® Gold Miners ETF

· The Holdings of the Market Vectors® Gold Miners ETF are Concentrated in the Gold and Silver Mining Industries. — All or substantially all of the equity securities held by the Market Vectors® Gold Miners ETF are issued by gold or silver mining companies. An investment in the notes linked to the Market Vectors® Gold Miners ETF will be concentrated in the gold and silver mining industries. As a result of being linked to a single industry or sector, the notes may have increased volatility as the share price of the Market Vectors® Gold Miners ETF may be more susceptible to adverse factors that affect that industry or sector. Competitive pressures may have a significant effect on the financial condition of companies in these industries.

In addition, these companies are highly dependent on the price of gold or silver, as applicable. These prices fluctuate widely and may be affected by numerous factors. Factors affecting gold prices include economic factors, including, among other things, the structure of and confidence in the global monetary system, expectations of the future rate of inflation, the relative strength of, and confidence in, the U.S. dollar (the currency in which the price of gold is generally quoted), interest rates and gold borrowing and lending rates, and global or regional economic, financial, political, regulatory, judicial or other events. Gold prices may also be affected by industry factors such as industrial and jewelry demand, lending, sales and purchases of gold by the official sector, including central banks and other governmental agencies and multilateral institutions which hold gold, levels of gold production and production costs, and short-term changes in supply and demand because of trading activities in the gold market. Factors affecting silver prices include general economic trends, technical developments, substitution issues and regulation, as well as specific factors including industrial and jewelry demand, expectations with respect to the rate of inflation, the relative strength of the U.S. dollar (the currency in which the price of silver is generally quoted) and other currencies, interest rates, central bank sales, forward sales by producers, global or regional political or economic events, and production costs and disruptions in major silver producing countries such as Mexico and Peru. The supply of silver consists of a combination of new mine production and existing stocks of bullion and fabricated silver held by governments, public and private financial institutions, industrial organizations and private individuals. In addition, the price of silver has on occasion been subject to very rapid short-term changes due to speculative activities. From time to time,

above-ground inventories of silver may also influence the market.

- Relationship to Gold and Silver Bullion. — The Market Vectors® Gold Miners ETF invests in shares of gold and silver mining companies, but not in gold bullion or silver bullion. The Market Vectors® Gold Miners ETF may under- or over-perform gold bullion and/or silver bullion over the term of the notes.

P-7

Hypothetical Return on the Notes at Maturity

The following table and examples illustrate the hypothetical return at maturity on a \$1,000 investment in the notes. The “return,” as used in this section is the number, expressed as a percentage, which results from comparing the payment at maturity per \$1,000 in principal amount of the notes to \$1,000. The hypothetical total returns set forth below are based on a hypothetical Initial Level of \$100, a hypothetical Buffer Percentage of 10% (the Buffer Level is 90% of the Initial Level), an Upside Leverage Factor of 200%, a hypothetical Cap of 8.25% (a percentage change in the applicable Underlying Asset of 8.25% results in a maximum return on the notes of 16.50%), and a hypothetical Maximum Redemption Amount of \$1,165.00. The hypothetical returns set forth below are for illustrative purposes only and may not be the actual returns applicable to investors in the notes. The numbers appearing in the following table and in the examples below have been rounded for ease of analysis.

Hypothetical Final Level	Percentage Change	Return on the Notes
\$0.00	-100.00%	-90.00%
\$50.00	-50.00%	-40.00%
\$70.00	-30.00%	-20.00%
\$80.00	-20.00%	-10.00%
\$90.00	-10.00%	0.00%
\$95.00	-5.00%	0.00%
\$100.00	0.00%	0.00%
\$105.00	5.00%	10.00%
\$108.25	8.25%	16.50%
\$110.00	10.00%	16.50%
\$120.00	20.00%	16.50%
\$150.00	50.00%	16.50%
\$200.00	100.00%	16.50%

Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how the returns set forth in the table above are calculated.

Example 1: The price of the applicable Underlying Asset decreases from the hypothetical Initial Level of \$100 to a hypothetical Final Level of \$80, representing a Percentage Change of -20%. Because the Percentage Change is negative and the hypothetical Final Level of \$80.00 is less than the Initial Level by more than the hypothetical Buffer Percentage of 10%, the investor receives a payment at maturity of \$900.00 per \$1,000.00 in principal amount of the notes, calculated as follows:

$$\$1,000 + [\$1,000 \times (-20\% + 10\%)] = \$900.00$$

Example 2: The price of the applicable Underlying Asset decreases from the hypothetical Initial Level of \$100 to a hypothetical Final Level of \$95, representing a Percentage Change of -5%. Although the Percentage Change is negative, because the hypothetical Final Level of \$95.00 is less than the Initial Level by not more than the hypothetical Buffer Percentage of 10%, the investor receives a payment at maturity of \$1,000.00 per \$1,000.00 in principal amount of the notes.

Example 3: The price of the applicable Underlying Asset increases from the hypothetical Initial Level of \$100 to a hypothetical Final Level of \$105, representing a Percentage Change of 5%. Because the hypothetical Final Level of \$105.00 is greater than the Initial Level and the Percentage Change of 5% does not exceed the hypothetical Cap, the

investor receives a payment at maturity of \$1,100.00 per \$1,000.00 in principal amount of the notes, calculated as follows:

$$\$1,000 + [\$1,000 \times (5\% \times 200\%)] = \$1,100.00$$

Example 4: The price of the applicable Underlying Asset increases from the hypothetical Initial Level of \$100 to a hypothetical Final Level of \$120, representing a Percentage Change of 20%. Because the hypothetical Final Level of \$120.00 is greater than the Initial Level and the Percentage Change of 20% exceeds the hypothetical Cap, the investor receives a payment at maturity of \$1,165.00 per \$1,000.00 in principal amount of the notes, the Maximum Redemption Amount.

U.S. Federal Tax Information

By purchasing the notes, each holder agrees (in the absence of a change in law, an administrative determination or a judicial ruling to the contrary) to treat each note as a pre-paid cash-settled derivative contract for U.S. federal income tax purposes. However, the U.S. federal income tax consequences of your investment in the notes are uncertain and the Internal Revenue Service could assert that the notes should be taxed in a manner that is different from that described in the preceding sentence. Please see the discussion (including the opinion of our counsel Morrison & Foerster LLP) in the product supplement under “Supplemental Tax Considerations—Supplemental U.S. Federal Income Tax Considerations,” which applies to the notes.

A “dividend equivalent” payment is treated as a dividend from sources within the U.S. and such payments generally would be subject to a 30% U.S. withholding tax if paid to a non-United States holder (as defined in the product supplement). Under recently proposed U.S. Treasury Department regulations, certain payments that are contingent upon or determined by reference to U.S. source dividends, including payments reflecting adjustments for extraordinary dividends, with respect to equity-linked instruments, including the notes, may be treated as dividend equivalents. If enacted in their current form, the regulations will impose a withholding tax on payments made on the notes on or after January 1, 2014 that are treated as dividend equivalents. In that case, we (or the applicable paying agent) would be entitled to withhold taxes without being required to pay any additional amounts with respect to amounts so withheld. Further, non-United States holders may be required to provide certifications prior to, or upon the sale, redemption or maturity of the notes in order to minimize or avoid U.S. withholding taxes.

The Treasury Department has issued final regulations and a notice affecting the legislation enacted on March 18, 2010 and discussed in the product supplement under “Supplemental Tax Considerations—Supplemental U.S. Federal Income Tax Considerations—Legislation Affecting Taxation of Notes Held By or Through Foreign Entities.” Pursuant to the notice, withholding requirements with respect to the notes will generally begin no earlier than July 1, 2014. Additionally, the withholding tax will not be imposed on payments pursuant to obligations outstanding on July 1, 2014. Account holders subject to information reporting requirements pursuant to the legislation may include holders of the notes. Foreign financial institutions and non-financial foreign entities located in jurisdictions that have an intergovernmental agreement with the United States governing the legislation may be subject to different rules. Holders are urged to consult their own tax advisors regarding the implications of this legislation and subsequent guidance on their investment in the notes.

Supplemental Plan of Distribution (Conflicts of Interest)

BMOCM will purchase the notes from us at a purchase price reflecting the commission set forth on the cover page of this pricing supplement. BMOCM has informed us that, as part of its distribution of the notes, it will reoffer the notes to other dealers who will sell them. Each such dealer, or further engaged by a dealer to whom BMOCM reoffers the notes, will purchase the notes at an agreed discount to the initial price to public.

We own, directly or indirectly, all of the outstanding equity securities of BMOCM, the agent for this offering. In accordance with FINRA Rule 5121, BMOCM may not make sales in this offering to any of its discretionary accounts without the prior written approval of the customer.

We reserve the right to withdraw, cancel or modify the offering of any of the notes and to reject orders in whole or in part. You may cancel any order for the notes prior to its acceptance.

You should not construe the offering of any of the notes as a recommendation of the merits of acquiring an investment linked to the applicable Underlying Asset or as to the suitability of an investment in the notes.

BMOCM may, but is not obligated to, make a market in the notes. BMOCM will determine any secondary market prices that it is prepared to offer in its sole discretion.

We may use this pricing supplement in the initial sale of the notes. In addition, BMOCM or another of our affiliates may use this pricing supplement in market-making transactions in any notes after their initial sale. Unless BMOCM, or we inform you otherwise in the confirmation of sale, this pricing supplement is being used by BMOCM in a market-making transaction.

For a period of approximately three months following issuance of the notes, the price, if any, at which we or our affiliates would be willing to buy the notes from investors, and the value that BMOCM may also publish for the notes through one or more financial information vendors and which could be indicated for the notes on any brokerage account statements, will reflect a temporary upward adjustment from our applicable estimated value of the notes that would otherwise be determined and applicable at that time. This temporary upward adjustment represents a portion of (a) the hedging profit that we or our affiliates expect to realize over the term of the notes and (b) the selling concessions paid in connection with this offering. The amount of this temporary upward adjustment will decline to zero on a straight-line basis over the three-month period.

Additional Information Relating to the Estimated Initial Value of the Notes

Our estimated initial value of each of the notes on the date of this preliminary pricing supplement, and that will be set forth on the cover page of the final pricing supplement relating to the notes, equals the sum of the values of the following hypothetical components:

- a fixed-income debt component with the same tenor as the notes, valued using our internal funding rate for structured notes; and
 - one or more derivative transactions relating to the economic terms of the notes.

The internal funding rate used in the determination of the initial estimated value generally represents a discount from the credit spreads for our conventional fixed-rate debt. The value of these derivative transactions are derived from our internal pricing models. These models are based on factors such as the traded market prices of comparable derivative instruments and on other inputs, which include volatility, dividend rates, interest rates and other factors. As a result, the estimated initial value of each of the notes on the pricing date will be determined based on market conditions at that time.

The Underlying Assets

We have derived the following information from publicly available documents. We have not independently verified the accuracy or completeness of the following information. We are not affiliated with the applicable Underlying Asset and the applicable Underlying Asset will have no obligations with respect to the notes. This pricing supplement relates only to the notes and does not relate to the shares of the applicable Underlying Asset or securities in the applicable Underlying Index. Neither we nor BMOCM participates in the preparation of the publicly available documents described below. Neither we nor BMOCM has made any due diligence inquiry with respect to the applicable Underlying Asset in connection with the offering of the notes. There can be no assurance that all events occurring prior to the date of this pricing supplement, including events that would affect the accuracy or completeness of the publicly available documents described below, that would affect the trading price of the shares of the applicable Underlying Asset have been or will be publicly disclosed. Subsequent disclosure of any events or the disclosure of or failure to disclose material future events concerning the applicable Underlying Asset could affect the value of the shares of the applicable Underlying Asset on the Valuation Date and therefore could affect the Payment at Maturity.

The selection of the applicable Underlying Asset is not a recommendation to buy or sell the shares of the applicable Underlying Asset. Neither we nor any of our affiliates make any representation to you as to the performance of the shares of the applicable Underlying Asset. Information provided to or filed with the SEC under the Securities Exchange Act of 1934 and the Investment Company Act of 1940 relating to each Underlying Asset may be obtained through the SEC's website at <http://www.sec.gov>.

The iShares® Russell 2000 ETF

iShares® consists of numerous separate investment portfolios (the “iShares Funds”), including the Underlying Asset. The Underlying Asset seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the Russell 2000® Index. The Underlying Asset typically earns income dividends from securities included in the Russell 2000® Index. These amounts, net of expenses and taxes (if applicable), are passed along to the Underlying Asset's shareholders as “ordinary income.” In addition, the Underlying Asset realizes capital gains or losses whenever it sells securities. Net long-term capital gains are distributed to shareholders as “capital gain distributions.” However, because your notes are linked only to the share price of the Underlying Asset, you will not be entitled to receive income, dividend, or capital gain distributions from the Underlying Asset or any equivalent payments.

“iShares®” and “BlackRock®” are registered trademarks of BlackRock. The notes are not sponsored, endorsed, sold, or promoted by BlackRock, or by any of the iShares Funds. Neither BlackRock nor the iShares Funds make any representations or warranties to the owners of the notes or any member of the public regarding the advisability of investing in the notes. Neither BlackRock nor the iShares® Funds shall have any obligation or liability in connection with the registration, operation, marketing, trading, or sale of the notes or in connection with our use of information about the applicable Underlying Asset or any of the iShares Funds.

The shares of the Underlying Asset trade on the NYSE Arca, Inc. under the symbol “IWM”.

The Russell 2000® Index

We have derived all information contained in this pricing supplement regarding the Russell 2000® Index, including, without limitation, its make-up, method of calculation and changes in its components, from publicly available information. The information reflects the policies of, and is subject to change by, Russell. Russell has no obligation to continue to publish, and may discontinue publication of, the index. None of us, the calculation agent, or any selling agent accepts any responsibility for the calculation, maintenance, or publication of the Russell 2000® Index or any

successor index.

Russell began dissemination of the index on January 1, 1984 and calculates and publishes the index. The index was set to 135 as of the close of business on December 31, 1986. The Index is designed to track the performance of the small capitalization segment of the U.S. equity market. As a subset of the Russell 3000® Index, the Index consists of the smallest 2,000 companies included in the Russell 3000® Index. The Russell 3000® Index measures the performance of the largest 3,000 U.S. companies, representing approximately 98% of the investable U.S. equity market. The index is determined, comprised, and calculated by Russell without regard to the notes.

P-11

Selection of Stocks Comprising the Index

All companies eligible for inclusion in the index must be classified as a U.S. company under Russell's country-assignment methodology. If a company is incorporated, has a stated headquarters location, and trades in the same country (American Depositary Receipts and American Depositary Shares are not eligible), then the company is assigned to its country of incorporation. If any of the three factors are not the same, Russell defines three Home Country Indicators ("HCIs"): country of incorporation, country of headquarters, and country of the most liquid exchange (as defined by a two-year average daily dollar trading volume) ("ADDTV"). Using the HCIs, Russell compares the primary location of the company's assets with the three HCIs. If the primary location of its assets matches any of the HCIs, then the company is assigned to the primary location of its assets. If there is insufficient information to determine the country in which the company's assets are primarily located, Russell will use the primary country from which the company's revenues are primarily derived for the comparison with the three HCIs in a similar manner. Russell uses the average of two years of assets or revenues data to reduce potential turnover. If conclusive country details cannot be derived from assets or revenues data, Russell will assign the company to the country of its headquarters, which is defined as the address of the company's principal executive offices, unless that country is a Benefit Driven Incorporation "BDI" country, in which case the company will be assigned to the country of its most liquid stock exchange. BDI countries include: Anguilla, Antigua and Barbuda, Bahamas, Barbados, Belize, Bermuda, Bonaire, British Virgin Islands, Cayman Islands, Channel Islands, Cook Islands, Curacao, Faroe Islands, Gibraltar, Isle of Man, Liberia, Marshall Islands, Panama, Saba, Sint Eustatius, Sint Maarten, and Turks and Caicos Islands. For any companies incorporated or headquartered in a U.S. territory, including countries such as Puerto Rico, Guam, and U.S. Virgin Islands, a U.S. HCI is assigned.

All securities eligible for inclusion in the index must trade on a major U.S. exchange. Bulletin board, pink-sheets, and over-the-counter ("OTC") traded securities are not eligible for inclusion. Stocks must trade at or above \$1.00 on their primary exchange on the last trading day in May to be eligible for inclusion during annual reconstitution. However, in order to reduce unnecessary turnover, if an existing member's closing price is less than \$1.00 on the last day of May, it will be considered eligible if the average of the daily closing prices (from its primary exchange) during the month of May is equal to or greater than \$1.00. Initial public offerings must have a closing price at or above \$1.00 on the last day of their eligibility period in order to qualify for index inclusion. If a stock, new or existing, does not have a closing price at or above \$1.00 (on its primary exchange) on the last trading day in May, but does have a closing price at or above \$1.00 on another major U.S. exchange, that stock will be eligible for inclusion. Companies with a total market capitalization of less than \$30 million are not eligible for the index. Similarly, companies with only 5% or less of their shares available in the marketplace are not eligible for the index.

Royalty trusts, limited liability companies, closed-end investment companies (business development companies are eligible), blank check companies, special-purpose acquisition companies, and limited partnerships are ineligible for inclusion. Preferred and convertible preferred stock, redeemable shares, participating preferred stock, warrants, rights, and trust receipts are not eligible for inclusion in the index.

Annual reconstitution is a process by which the index is completely rebuilt. On the last trading day of May, all eligible securities are ranked by their total market capitalization. The largest 4,000 become the Russell 3000E Index, and the other Russell indexes are determined from that set of securities. Reconstitution of the index occurs on the last Friday in June or, when the last Friday in June is the 28th, 29th, or 30th, reconstitution occurs on the prior Friday. In addition, Russell adds initial public offerings to the index on a quarterly basis based on market capitalization guidelines established during the most recent reconstitution.

After membership is determined, a security's shares are adjusted to include only those shares available to the public. This is often referred to as "free float." The purpose of the adjustment is to exclude from market calculations the capitalization that is not available for purchase and is not part of the investable opportunity set.

Market Vectors® Gold Miners ETF

The Market Vectors® Gold Miners ETF is an investment portfolio maintained, managed and advised by Van Eck. The Market Vectors® ETF Trust is a registered open-end investment company that consists of numerous separate investment portfolios, including the Market Vectors® Gold Miners ETF.

The Market Vectors® Gold Miners ETF is an exchange traded fund that trades on NYSE Arca under the ticker symbol “GDX.”

The Market Vectors® Gold Miners ETF seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the NYSE Arca Gold Miners Index. The NYSE Arca Gold Miners Index was developed by the NYSE Amex and is calculated, maintained and published by NYSE Arca. The NYSE Arca Gold Miners Index is a modified market capitalization-weighted index comprised of publicly traded companies involved primarily in mining for gold or silver.

The Market Vectors® Gold Miners ETF utilizes a “passive” or “indexing” investment approach in attempting to track the performance of the NYSE Arca Gold Miners Index. The Market Vectors® Gold Miners ETF will invest in all of the securities which comprise the NYSE Arca Gold Miners Index. The Market Vectors® Gold Miners ETF will normally invest at least 95% of its total assets in common stocks that comprise the NYSE Arca Gold Miners Index.

The notes are not sponsored, endorsed, sold or promoted by Van Eck. Van Eck makes no representations or warranties to the owners of the notes or any member of the public regarding the advisability of investing in the notes. Van Eck has no obligation or liability in connection with the operation, marketing, trading or sale of the notes.

The NYSE Arca Gold Miners Index

We have derived all information contained in this pricing supplement regarding the NYSE Arca Gold Miners Index, including, without limitation, its make-up, method of calculation and changes in its components, from publicly available information and information supplied by NYSE Arca. Such information reflects the policies of, and is subject to change by, NYSE Arca. The NYSE Arca Gold Miners Index was developed by the NYSE Amex (formerly the American Stock Exchange) and is calculated, maintained and published by the NYSE Arca. The NYSE Arca has no obligation to continue to publish, and may discontinue the publication of, the NYSE Arca Gold Miners Index.

The NYSE Arca Gold Miners Index includes common stocks and ADRs of selected companies that are involved primarily in mining for gold or silver and that are listed for trading on the NYSE, NYSE Arca, or the NASDAQ Stock Market. Only companies with market capitalizations greater than \$100 million that have an average daily volume of at least 50,000 shares over the past six months are eligible for inclusion in the NYSE Arca Gold Miners Index. The NYSE Arca Gold Miners Index's benchmark value was 500.00 at the close of trading on December 20, 2002. As of November 27, 2012, there were 31 gold and silver mining companies included in the Market Vectors® Gold Miners ETF.

Eligibility Criteria for Index Components. The NYSE Arca Gold Miners Index includes common stocks and ADRs of selected companies that are involved in mining for gold and silver and that are listed for trading on the New York Stock Exchange, the NYSE Amex Stock Exchange or the NASDAQ Global Market. Only companies with a market capitalization of greater than \$100 million that have an average daily trading volume of at least 50,000 shares or ADRs over the past six months are eligible for inclusion in the NYSE Arca Gold Miners Index. NYSE Arca has the discretion to not include all companies that meet the minimum criteria for inclusion.

Calculation of the NYSE Arca Gold Miners Index. The NYSE Arca Gold Miners Index is calculated by NYSE Arca on a price return basis. The calculation is based on the current modified market capitalization divided by a divisor. The divisor was determined on the initial capitalization base of the NYSE Arca Gold Miners Index and the base level and may be adjusted as a result of corporate actions and composition changes, as described below.

Index Maintenance. The NYSE Arca Gold Miners Index is reviewed quarterly to ensure that at least 90% of the index weight is accounted for by index components that continue to meet the initial eligibility requirements. NYSE Arca may at any time and from time to time change the number of securities comprising the group by adding or deleting one or more securities, or replacing one or more securities contained in the group with one or more substitute securities of its choice, if in NYSE Arca's discretion such addition, deletion or substitution is necessary or appropriate to maintain the quality and/or character of the NYSE Arca Gold Miners Index. Components will be removed from the NYSE Arca Gold Miners Index during the quarterly review if the market capitalization falls below \$50 million or the traded average daily shares for the previous six months is lower than 25,000 shares.

At the time of the quarterly rebalance, the component security weights will be modified to conform to the following asset diversification requirements:

- (1) the weight of any single component security may not account for more than 20% of the total value of the NYSE Arca Gold Miners Index;
- (2)

the component securities are split into two subgroups—large and small, which are ranked by market capitalization weight in the NYSE Arca Gold Miners Index. Large securities are defined as having a starting index weight greater than or equal to 5%. Small securities are defined as having a starting index weight below 5%; and

- (3) the aggregate weight of those component securities which individually represent more than 4.5% of the total value of the NYSE Arca Gold Miners Index may not account for more than 50% of the total index value.

The weights of the components securities (taking into account expected component changes and share adjustments) are modified in accordance with the NYSE Arca Gold Miners Index's diversification rules.

Changes to the index composition and/or the component security weights in the NYSE Arca Gold Miners Index are determined and announced prior to taking effect, which typically occurs after the close of trading on the third Friday of each calendar quarter month in connection with the quarterly index rebalance. The share weight of each component security in the index portfolio remains fixed between quarterly reviews except in the event of certain types of corporate actions such as stock splits, reverse stock splits, stock dividends, or similar events. The share weights used in the index calculation are not typically adjusted for shares issued or repurchased between quarterly reviews. However, in the event of a merger between two components, the share weight of the surviving entity may be adjusted to account for any stock issued in the acquisition. NYSE Arca may substitute securities or change the number of securities included in the NYSE Arca Gold Miners Index, based on changing conditions in the industry or in the event of certain types of corporate actions, including mergers, acquisitions, spin-offs, and reorganizations. In the event of component or share weight changes to the index portfolio, the payment of dividends other than ordinary cash dividends, spin-offs, rights offerings, re-capitalization, or other corporate actions affecting a component security of the NYSE Arca Gold Miners Index, the index divisor may be adjusted to ensure that there are no changes to the index level as a result of nonmarket forces.

Historical Performances of the Underlying Assets

The following tables set forth the quarter-end high and low closing prices for each Underlying Asset from the first quarter of 2010 through July 30, 2013.

The historical prices of the Underlying Assets are provided for informational purposes only. You should not take the historical prices of the applicable Underlying Asset as an indication of its future performance, which may be better or worse than the prices set forth below.

Closing Prices of the iShares® Russell 2000 ETF

		High (\$)	Low (\$)
2010	First Quarter	69.25	58.68
	Second Quarter	74.14	61.08
