Corporation Law

00951-2 PETRÓLEO BRASILEIRO S.A. - PETROBRAS 33.000.167/0001-01

06.01 - NOTES TO THE QUARTERLY INFORMATION

1 The Company and its operations

Petróleo Brasileiro S.A. - Petrobras is dedicated to prospecting, drilling, refining, processing, trading and transporting petroleum originating from wells, schist or other rocks, and oil products, natural gas and other liquid hydrocarbons, in addition to activities connected with energy, and it may carry out research, development, production, transport, distribution and trading of all forms of energy, as well as any other correlated or similar activities.

2 Presentation of the financial statements

Consolidated financial statements

The consolidated interim financial statements are being presented in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB).

Company financial statements

The Company interim financial statements are being presented in accordance with accounting practices generally accepted in Brazil, observing the provisions contained in the Corporation Law and they incorporate the changes introduced by Law 11638/07 and Law 11941/09, complemented by the new pronouncements, interpretations and orientations of the Accounting Pronouncements Committee (CPC), approved by resolutions of the Federal Accounting Council (CFC) and rules of the Brazilian Securities Commission (CVM) during 2009, to be applied as from 2010.

The pronouncements, interpretations and orientations of the Accounting Pronouncements Committee (CPC), approved by resolutions of the Federal Accounting Council (CFC) and the rules of the Brazilian Securities Commission (CVM) are converging with the international accounting standards issued by the IASB. Some adjustments were made to the company financial statements aiming at aligning and adjusting them to consolidated financial statements in accordance with IFRS, as required by CVM Resolution 610/09 (CPC 43 - Initial Adoption of the Technical

Pronouncements). Accordingly, the Company financial statements do not present differences in relation to the consolidated statements according to IFRS, except for the maintenance of deferred charges, as established in CPC 43. The reconciliations of shareholders' equity and results of the parent company with the consolidated statements are described in note 3.4.

Financial statements for 2009

Until December 31, 2009, Petrobras presented its Company and consolidated financial statements in accordance with accounting practices generally accepted in Brazil, which incorporated the changes introduced through Law 11.638/07 and Law 11.941/09 (Provisional Measure 449/08), complemented by the pronouncements of the Accounting Pronouncements Committee (CPC), approved by resolutions of the Federal Accounting Council (CFC) and rules of the Brazilian Securities Commission (CVM) until December 31, 2008.

As established in CVM Resolution 609/09 (CPC 37 – Initial Adoption of International Accounting Standards), international standards were implemented retroactively to January 1, 2009. Accordingly, the accounting information originally disclosed was adjusted and is being presented in accordance with international accounting standards.

The comparison of the balance sheet on the date of adoption of IFRS and the other adjusted information for 2009 with the amounts disclosed on those dates is presented in notes 3.2 and 3.3.

3 Adoption of international accounting standards

In the balance sheet for adoption of IFRS as of January 1, 2009, mandatory exceptions and certain optional exemptions for retroactive application of the IFRS were applied in accordance with CPC 37 and are presented as follows:

3.1 Transition of the accounting practices

a) Exchange variations recorded in a specific shareholders' equity account

The Company adopted CPC 02 – Effects of changes in the exchange rates and translation of the financial statements (IAS 21) in fiscal year 2008. However, at to the date of the opening balance of January 1, 2009, the balance of accumulated translation adjustments existing as of December 31, 2008 in the amount of R\$ 636,264 thousand, was transferred to retained earnings aiming at equivalence to the exemption of IFRS 1 from not calculating retroactively the exchange variations of investments in subsidiaries and affiliated companies with a functional currency different from the parent company.

b) Capitalization of loan costs

The Company capitalized financial charges only for the loans directly linked to a construction project, pursuant to CVM Resolution 193/96, applicable until December 31, 2008. From January 1, 2009 onwards, the Company also capitalized financial charges based on an average funding rate applied to the balance of work in progress, thus adopting the exemption established in IFRS 1 of not changing retroactively the criteria for computing capitalizable costs.

c) Business combinations

Business combinations occurring up to and including December 31, 2008 were recorded in the accounting pursuant to CVM Instruction 247/96. On adopting IFRS, the Company chose not to apply retroactively the requirements of CPC 15 Business Combinations (IFRS 3), as permitted by IFRS 1. Therefore, the goodwill existing at December 31, 2008, net of amortization, was maintained and is no longer amortized. The balances of negative goodwill existing as of December 31, 2008, in the amount of R\$ 815,655 thousand, were recognized against retained earnings on the date of transition to IFRS, also resulting in the reversal of amortizations recognized in the income statement.

The discounts verified in the acquisitions of Special Purpose Entities (SPE), during 2009, were recorded reducing the investment balances. For IFRS purposes they are considered as transactions with partners as owners, since the Company already controlled their operating activities and, consequently, consolidated their financial statements pursuant to CVM Instruction 408/04. Pursuant to CPC 36 Consolidated Statements (IAS 27), the amount of R\$ 1,421,952 thousand was recognized directly in shareholders' equity in 2009.

d) Provision for abandonment of wells and dismantling of areas

The costs for abandonment of assets and dismantling of areas are calculated considering the future costs discounted at a rate free of risk recorded in assets and liabilities when the obligation is incurred.

Until December 31, 2008, Petrobras adopted as an accounting practice SFAS pronouncement 143 Accounting for Asset Retirement Obligations of the Financial Accounting Standards Board (FASB), pursuant to which the future obligation with abandonment of wells and dismantling of production areas should be recorded in the accounting at its present value as a provision, considering the historic rates for each period for which the provision was recorded. With the adoption of ICPC 12 Changes in Liabilities for Deactivation, Restoration and Other Similar Liabilities (IFRIC 1), the provision for abandonment of wells and dismantling of areas should reflect the effects of the changes in the current discount rate from one period to another.

The Company recorded the amount of R\$ 1,273,166 thousand in retained earnings on the transition date, adopting the exemption from not using the provision at the time that the obligation had incurred, so that the cost of property, plant and equipment reflects the changes in the balance of the provision.

e) Post-retirement benefits

There is no difference in accounting practices for the valuation of post-employment benefits between CVM Resolution 371/00, in force until December 31, 2008, and CPC 33 – Benefits for Employees (IAS 19), since on the adoption of IFRS the Company chose to maintain the corridor method for the recording of actuarial gains and losses in the income statement. Accordingly, the moment of initial adoption of these pronouncements, different from the date of creation of the plans, could produce different balances for unrecognized actuarial gains and losses.

The balance of unrecognized actuarial gains and losses at December 31, 2008, in the amount of R\$ 580,000 thousand, was fully recorded against retained earnings on the transition date, thus adopting the exemption established in IFRS 1. Actuarial gains and losses generated after the transition date will be recognized in the income statement by the corridor method.

f) Deferred expenses and revenues

Law 11.941/09 extinguished deferred assets, permitting maintaining the balance as of December 31, 2008, which will continue to be amortized in up to 10 years, subject to impairment testing, which was adopted by the Company in the individual accounting statements, in accordance with that established by CPC 43.

Pursuant to IFRS pre-operating expenses and gains should be recorded as expenses and revenues, respectively, when incurred. With the adoption of IFRS, the amount of R\$ 1,035,983 thousand was recorded in retained earnings in consolidated.

g) Public service concessions

The Company exercises shared control over state gas distributors, which are proportionally consolidated to the share Petrobras holds in the capital of these companies. These distributors operate under concessions and their activities are classified within the requirements of ICPC 01 – Concession Agreements (IFRIC 12). Consequently, rights presented as part of the property, plant and equipment of these companies, in the amount of R\$ 575,499 thousand, are now addressed as intangible assets.

h) Reclassifications

The following reclassifications were made aiming to adjust the Company's presentation to the requirements of IFRS.

- Advances to suppliers that used to be presented as part of inventories or property, plant and equipment, were classified to specific lines for advances in current and non-current assets;
- Deferred income tax and social contributions, which used to be presented under current assets and liabilities, were reclassified to non-current assets and liabilities and, when applicable, are presented at their net amounts;
- Certain balances presented as part of deferred assets that met the criteria for recognition in IFRS were reclassified to prepaid expenses.

Parent company adjusted to international accounting standards (CPC)	297,960,329	164,908,473	24,482,849	22,511,744

The consolidated statements presented in tables 08.01, 08.02, 09.01 and 10.01 were prepared in accordance with the CPC (Accounting Pronouncements Committee) and IFRS. The only difference is the treatment of deferred assets, which pursuant to the CPC remain recorded in the individual demonstrations and pursuant to IFRS should be recorded as expenses and revenue, respectively, when incurred, and, therefore, were written off in the consolidated statements.

4 Description of significant accounting policies

4.1 Changes in accounting practices

The Company reviewed the useful economic life of the assets related to the Supply segment and to the thermoelectric power stations of the Gas and Energy segment, based on the reports of external appraisers, which resulted in the following changes in rates:

Estimated useful life	Former	Current
Industrial equipment and apparatus for refining	10 years	20 years
Ducts	10 years	31 years
Tanks for storage of products	10 years	26 years
Thermoelectric power stations	20 years	23 years

The effects of the change in the estimated useful life of these assets were recognized as from January 1, 2010 and, therefore, the depreciation for the period from January to September, 2010 was decreased by R\$ 782,951 thousand (R\$ 609,275 thousand in the parent company).

4.2 Below, we describe in detail the other accounting practices adopted by the Company that did not undergo changes with respect to fiscal year 2009:

4.2.1 Functional currency

The Company's functional currency is the Real.

The exchange variations on investments in subsidiaries and affiliated companies with a functional currency different from the parent company are recorded in shareholders' equity, as an accumulated translation adjustment and are transferred to the income statement upon realization of the investments.

The income statements and cash flows of the invested companies in a stable economic environment with a functional currency different from the parent company are translated into Reais at the monthly average exchange rate. Assets and liabilities are translated at the final rate and the other items of shareholders' equity are translated at the historic rate.

4.2.2 Accounting estimates

In the preparation of the financial statements it is necessary to use estimates for certain assets, liabilities and other transactions. These estimates include: petroleum and gas reserves, liabilities of pension and health plans, depreciation, depletion and amortization, abandonment costs, provisions for contingent liabilities, market value of financial instruments, income tax and social contribution. Although Management uses assumptions and judgments that are reviewed periodically, the actual outcome may differ from these estimates.

4.2.3 Statement of income

Income, recognized on the accrual basis, includes income, charges and monetary or exchange gains and losses at official indices or rates, due on current and non-current assets and liabilities, including, when applicable, the effects of adjustments to present value of significant transactions, adjustments to market value or realization value, as well as the allowance for doubtful accounts recorded at a limit considered sufficient to cover possible losses on the realization of accounts receivable.

Revenue from the sale of products is recognized in the income statement when the risks and rewards of ownership have been transferred to the buyer. Revenue from services rendered is recognized in the statement of income in proportion to the stage of completion of the service.

4.2.4 Cash and cash equivalents

Cash and cash equivalents are represented by short-term investments of high liquidity which are readily convertible into cash, with maturity within three months or less of the date of acquisition.

4.2.5 Marketable securities

The Company classifies marketable securities on initial recognition, based on Management's strategies for these securities in the following categories:

- Securities for trading are stated at fair value. Interest, monetary updating and changes resulting from the valuation to fair value are recorded in the income statement when incurred.
- Securities available for sale are stated at fair value. Interest and monetary updating are recorded in the income statement, when incurred, while the changes resulting from valuation to fair value are recorded in equity valuation adjustments, in shareholders' equity, and transferred to the income statement for the year, upon settlement.

- Securities held to maturity are stated at cost of acquisition, plus interest and monetary updating, which are recorded in the income statement when incurred.

4.2.6 Inventories

Inventories are presented as follows:

- Raw material comprises mainly the stocks of petroleum, which are stated at the average value of the costs for importing and production, adjusted, when applicable, to their realizable value;
- Oil and alcohol products are stated at the average cost of refining or purchase, adjusted, when applicable, to their realizable value;
- Materials and supplies are stated at the average purchase cost which does not exceed replacement cost. Imports in transit are stated at the identified cost.

4.2.7 Corporate investments

Investments in subsidiaries, jointly controlled subsidiaries and also in affiliated companies over which management has significant influence, and in other companies which are part of the same group or under common control, are presented at the equity accounting method.

4.2.8 Property, plant and equipment

PPE is stated at the cost of acquisition, restated monetarily until December 31, 1995 for the companies headquartered in Brazil, and until fiscal year 2002 for the companies headquartered in Argentina, and the rights that have as objects tangible assets intended for the maintenance of the Company's activities, resulting from transactions that transfer the benefits, risks and control of these assets, are stated at fair value or, if lower, by the present value of the minimum payments of the contract.

The equipment and facilities for petroleum and gas production related to the respective developed wells are depreciated according to the monthly volume of production in relation to the proven and developed reserves of each

producing field. The straight line method is used for assets with a useful life shorter than the life of the field or for assets that are linked to fields in various stages of production. Other equipment and assets not related to petroleum and gas production are depreciated by the straight line method according to their estimated useful life.

Expenditure on exploration and development of petroleum and gas production is recorded according to the successful efforts method. This method establishes that the development costs of the production wells and the successful exploration wells, linked to economically viable reserves, are capitalized, while the geology and geophysics costs should be considered as expenses for the period in which they occur. The cost of dry exploration wells and the costs linked to non-commercial reserves should be recorded in the income statement when they are identified.

Capitalized costs are depreciated using the unit of production method in relation to the proven, developed reserves. These reserves are estimated by the Company's geologists and petroleum engineers according to international standards and are reviewed annually or in case of indications of material changes.

Material expenses arising from maintenance of the industrial units and ships, which include spare parts, dismantling and assembly services, amongst others, are recorded in property, plant and equipment. These stoppages occur in programmed periods, on average every 4 years, and the respective expenses are depreciated as a production cost until the beginning of the following stoppage.

4.2.9 Intangible assets

They are stated at the cost of acquisition, less accumulated amortization and impairment losses. They comprise rights and concessions that include, mainly, the signing bonus paid for obtaining concessions for exploration of petroleum or natural gas, onerous assignment of exploration rights in blocks of the pre-salt area and public service concessions, in addition to trademarks and patents, software and goodwill from expectations of future profitability resulting from acquisition of a controlling interest (subsidiaries and jointly controlled subsidiaries). Goodwill resulting from acquisition of an interest in affiliated companies is presented in the investment.

The signing bonus and onerous assignment are amortized by the unit of production method in relation to the total proven reserves, while the other intangible assets are amortized on a straight line basis according to their estimated useful life.

4.2.10 Deferred charges

The Company maintained the balance of deferred assets as of December 31, 2008 in the Company statement, which will continue to be amortized in up to 10 years, subject to impairment testing in conformity with the Law 11941/09.

4.2.11 Decrease to recoverable value *Impairment*

The Company evaluates the items of property, plant and equipment, intangible assets with a definite useful life and deferred charges (individual) when there are indications their book values will not be recoverable. The assets that have an indefinite useful life, such as goodwill for expectations of future profitability, are tested for impairment on an annual basis, regardless of whether there are indications for an impairment or not.

When applying the impairment test to the recoverable value of assets, the carrying value of an asset or a cash generating unit is compared with its recoverable value. The recoverable value is the higher value of the net sales value of an asset and its value in use. Considering the particularities of the Company's assets, the recoverable value used for evaluation of the impairment test is the value in use, except when specifically indicated.

The value in use is estimated based on the net present value of future cash flows, resulting from the company's best estimates. The cash flows resulting from continuous use of the related assets are adjusted by the specific risks and use the pre-tax discount rate. This rate is derived from the structured post-tax rate in the weighted average cost of capital (WACC). The main assumptions for the cash flows are: prices based on the last strategic plan published, production curves associated with existing products in the Company's portfolio, market operating costs and investments required for carrying out the projects.

These evaluations are made at the lowest level of assets for which there are identifiable cash flows. Assets connected with the exploration and development of petroleum and gas production are reviewed annually, field by field, in order to identify possible losses on recovery based on the estimated future cash flow.

Reversal of previously recognized losses is permitted, except in relation to the decrease in the value of goodwill for expectations of future profitability.

4.2.12 Loans and financing

They are initially recognized at fair value less transaction costs incurred and, after initial recognition, are stated at amortized cost using the effective interest rate method.

4.2.13 Contracts with transfer of benefits, risks and control of assets

The Company records the rights that have as their objects tangible assets intended for the maintenance of the Company's activities resulting from operations that transferred the benefits, risks and control of these assets, as well as their correlated liability, in its property, plant and equipment at their fair value or, if lower, at the present value of the minimum payments of the contract.

4.2.14 Abandonment of wells and dismantling of areas

The future liability for abandonment of wells and dismantling the production area is stated at its present value, discounted at a risk free rate and is fully recorded at the time of the declaration of commercial viability of each field, as part of the costs of the related assets (property, plant and equipment) as a contra entry to the provision recorded in

the liabilities that will bear these expenses. The interest incurred through the updating of the provision is classified as a financial expense.

4.2.15 Derivative financial instruments and hedge operations

All the derivative instruments are recognized in the balance sheet, both in assets and in liabilities, and are stated at fair value.

In the operations with derivatives, for hedge against variations in the prices of oil and oil products and currency, the gains and losses resulting from the changes in fair value are recorded in the financial results.

For cash flow hedges, gains and losses resulting from the changes in their fair value are recorded in equity valuation adjustments in shareholders' equity, until their settlement.

4.2.16 Income tax and social contributions

These taxes are calculated and recorded based on the effective rates applicable on the date of preparation of the financial statements. Deferred taxes are recognized as a result of temporary differences, tax losses carried forward and negative basis of social contribution, when applicable.

4.2.17 Employee benefits

Provisions are recorded for the actuarial commitments with pension and retirement plans and the healthcare plan, based on an actuarial calculation prepared annually by an independent actuary, in accordance with the projected credit unit method, net of the guarantor assets of the plan, when applicable, and the costs referring to the increase in the present amount of the liability, resulting from the service provided by the employee, recognized during the employee's time of service.

The projected credit unit method considers each period of service as a generating fact for an additional unit of benefit, which is accumulated for the computation of the final obligation. Additionally, other actuarial assumptions are used, such as estimates of the evolution of costs with healthcare benefits, biological and economic hypotheses and, also, past data on expenses incurred and contributions from employees.

The actuarial gains and losses resulting from adjustments based on experience and on changes in the actuarial assumptions are included or excluded, respectively, when determining the net actuarial commitment and are amortized over the average period of service remaining for the active employees.

The Company also contributes to the national pension and social security plans of international subsidiaries, whose percentages are based on the payroll, and these contributions are taken to the income statement when incurred.

4.2.18 Government subsidies and assistance

Government subsidies for investments are recognized as revenue throughout the period, compared with the expenses that intends to offset on a systematic basis, and are invested in Petrobras in the following manner:

- Subsidies for re-investments: in the same proportion as the depreciation of the asset, and
- Direct subsidies related to the operating profit: directly in the income statement.

The amounts allocated to the income statement will be distributed to the tax incentive reserve, in shareholders equity.

Financial investments in Brazil have immediate liquidity and are represented by quotas of exclusive funds, the resources of which are invested in federal government bonds and derivative operations, executed by the managers of the funds, with future US dollar and Interbank Deposit (DI) contracts with a guarantee from BM&FBOVESPA, as described in note 31. The exclusive funds do not have material financial liabilities, which are limited to the daily liabilities of adjustments of the positions on the BM&FBOVESPA, audit services, service fees related to the custody of the assets and execution of financial operations and other administrative expenses. The balances of financial investments are recorded at cost plus accrued income, which is recognized proportionally at the balance sheet date at amounts not exceeding their respective market values.

At September 30, 2010, the Parent company had amounts invested in the Petrobras System's non-standard credit investment fund (FIDC-NP). This investment fund is intended predominantly for acquiring performing and/or non-performing credit rights of operations carried out by companies of the Petrobras System, and aims to optimize the financial management of the cash of the Parent company and its subsidiaries. The assignments of credit rights recorded in the current liabilities of the Parent company in the amount of R\$ 12,716,767 thousand (R\$ 14,318,379 thousand at December 31, 2009) were offset in Consolidated financial statements with the amounts invested in the FIDC-NP. The investments in government bonds in the FIDC-NP are recorded as Cash and cash equivalents (Consolidated) according to their respective realization terms.

At September 30, 2010 and December 31, 2009, the Company and its subsidiaries PifCo and Brasoil had amounts invested abroad in an investment fund that held, amongst others, debt securities of companies of the Petrobras System and a specific purpose entity related to the Company's projects, mainly the CLEP, Malhas, Marlim Leste (P-53) and Gasene projects, equivalent to R\$ 14,126,622 thousand (R\$ 12,724,142 thousand at December 31, 2009). These amounts refer to the consolidated companies and were offset against the balance of financing in current and non-current liabilities.

Bolivia-Brazil gas pipeline

The section of the Bolivia-Brazil gas pipeline in Bolivia is the property of the company Gás Transboliviano S.A. (GTB), in which Gaspetro holds a minority interest (11%).

A US\$ 350 million turn key contract for the construction of the Bolivian section of the pipeline was entered into with Yacimientos Petrolíferos Fiscales Bolivianos (YPFB), which was subsequently passed on to GTB, and it is being paid off in the form of transport services over 12 years, since January 2000.

At September 30, 2010, the balance of the rights for future transport services, on account of costs already incurred in the construction up to that date, plus interest of 10.7% p.a., is R\$ 279,177 thousand (R\$ 338,558 thousand at December 31, 2009), of which R\$ 170,675 thousand is classified as long term receivables as an advance to suppliers (R\$ 231,045 thousand at December 31, 2009) which includes the amount of R\$ 96,873 thousand (R\$ 101,912 thousand at December 31, 2009) related to the acquisition in advance of the right to transport 6 million cubic meters of gas for a period of 40 years (TCO - Transportation Capacity Option).

The Brazilian section of the gas pipeline is the property of Transportadora Brasileira Gasoduto Bolívia-Brasil S.A. (TBG), a subsidiary of Gaspetro. At September 30, 2010, Petrobras total receivable from TBG for management, forwarding of costs and financing related to the construction of the gas pipeline and the acquisition in advance of the right to transport 6 million cubic meters of gas for a period of 40 years (TCO) was R\$ 876,690 thousand (R\$ 973,404 thousand at December 31, 2009), and is classified under long-term assets as accounts receivable, net.

7.4 Guarantees obtained and granted

Petrobras has a policy of granting guarantees to its subsidiaries for certain financial operations carried out abroad.

The guarantees offered by Petrobras are based on contractual clauses that support the financial operations between its subsidiaries and third parties, guaranteeing the purchase of the debt in the event of default on the part of the subsidiaries.

At September 30, 2010, the financial operations carried out by these subsidiaries and guaranteed by Petrobras present the following balances to be settled:

Date of maturity of operations	R\$ thousand					12.31.2009	
	PNBV	PifCo	PIB-BV	Ref. Abreu e Lima	TAG	Total	Total
2010	2,880,140	2,541,300				5,421,440	4,927,213
2011	1,543,642	1,255,995				2,799,637	1,302,505
2012	569,251	1,016,520	84,710			1,670,481	2,705,825
2013	126,006	633,988				759,994	799,578
2014	513,343	1,220,209	169,420			1,902,972	2,044,249
2015 onwards	9,007,113	19,336,581	1,016,520	8,827,118	5,087,417	43,274,749	38,671,761
	14,639,495	26,004,593	1,270,650	8,827,118	5,087,417	55,829,273	50,451,131

Petrobras has been importing and exporting equipment and material pursuant to Decree 4543/2002, which governs the special customs regime for exporting and importing assets intended for research activities and exploitation of oil and natural gas deposits (Repetro). The benefit of these operations made via Repetro is the temporary suspension of federal taxes for the period in which the aforementioned materials and equipment remain in Brazil. An appropriate surety, signed by third parties, as a way of guaranteeing the payment of the suspended taxes, is required.

The appropriate sureties are being granted by Petrobras Distribuidora S/A (BR) and Petrobras Gás S/A (Gaspetro) and the remuneration charged is fixed at 0.30% p.a. on the amount of federal taxes that are suspended.

In the period from January to September 2010, the expenses incurred by Petrobras for obtaining the appropriate sureties were:

	R\$ thousand	
	Jan-Sep/2010	Jan-Sep/2009
BR	11,632	15,163
Gaspetro	12,563	6,946
Total	24,195	22,109

7.5 Transactions with affiliated companies, government entities and pension funds

The Company is controlled by the Federal Government and carries out various transactions with government entities in the normal course of its operations.

Significant transactions with affiliated companies government entities and a pension fund resulted in the following balances:

9 Petroleum and alcohol accounts - STN

In order to settle accounts with the Federal Government pursuant to Provisional Measure 2181, of August 24, 2001, after providing all the information required by the National Treasury Department (STN), Petrobras is seeking to settle the remaining differences between the parties.

At September 30, 2010, the balance of the account was R\$ 820,396 thousand and this can be discharged by the Federal Government by issuing National Treasury Notes in an amount equal to the final balance for the settling of accounts or through offsetting against other amounts that Petrobras may be owing the Federal Government at the time, including tax related amounts or a combination of the foregoing operations.

10 Marketable securities

	R\$ thousand

Non-current portion of securities	4,932,885	4,638,959	4,498,984	4,179,820

Securities available for sale include Series B National Treasury Notes (NTN-B) in the amount of R\$ 4,690,683 thousand (R\$ 4,462,163 thousand in the Parent company) as of September 30, 2010, given in guarantee to Petros in 2008, after signing the Financial Commitment Agreement (Note 24) and are presented in non-current assets. These NTN-B are indexed to the IPCA (Amplified Consumer Price Index) with payment of six-monthly coupons of 6% p.a. and maturity in 2024 and 2035.

The securities for trading refer to investments in public bonds with maturity terms of more than 90 days and are presented in current assets considering their expectation of realization in the short term.

The securities held until maturity in the Parent company include investments in the nonstandard credit assignment investment fund (FIDC-NP) related to non-performing credit rights of its operating activities in the amount of R\$ 2,021,466 thousand at September 30, 2010 and are presented in current assets.

11 Project financing

Petrobras carries out projects jointly with Brazilian and international financial agents and with companies in the petroleum and energy sector for the purpose of making feasible the investments needed in the business areas in which the Company operates.

11.1 Specific purpose entities

The project financing is made feasible through Specific Purpose Entities (SPE), whose activities are, in essence, controlled by Petrobras through contractual commitments with the transfer of assumed benefits, risks and controls. To terminate each of the contracts, the Company has the right to exercise its option to purchase the assets or the total number of common shares of the Special Purpose Entities.

a) Projects with assets in operation

The assets and liabilities originating from these contractual commitments are recognized in the Company financial statements of Petrobras as from the entry into operation of these assets and they are presented in notes 14.1 and 17, respectively.

Project	Description	Main guarantees
PDET	PDET Offshore S.A. is the owner of the project's assets and its purpose is to improve the infrastructure for transfer of the oil produced in the Campos Basin to the refineries in the Southeast Region and for export. These assets have been leased to Petrobras until 2019.	All the project's assets
Malhas	A consortium between Transpetro, Transportadora Associada de Gás (TAG), formerly TNS, Nova Transportadora do Sudeste (NTS) and Nova Transportadora do Nordeste (NTN). NTS and NTN contribute to the consortium through the incorporation of assets related to the transport of natural gas. TAG (a company fully owned by Gaspetro) provides assets already formed previously. Transpetro contributes as operator of the gas pipelines.	Prepayments based on transport capacity to cover any eventual consortium cash shortages.
Gasene		Pledge of credit rights.

Transportadora Gasene S.A. is responsible for the construction and future ownership of pipelines for transport of natural gas with a total length of 1.4 thousand kilometers and a transport capacity of 20 million cubic meters per day, connecting the Cabiúnas Terminal in Rio de Janeiro to the city of Catu, in the state of Bahia.

Pledge of the shares of the SPE.

Purchase and sale option of the shares of the SPE

The first segment of the Gasene project, the Cabiúnas-Vitória gas pipeline, entered into operation on November 10, 2008. The second segment of the Cacimbas-Catu gas pipeline entered into operation on May 1, 2010.

**Marlim Leste
(P-53)**

To develop the production of the Marlim Leste field, Petrobras will use a stationary production unit, P-53, which has been chartered from Charter Development LLC. The bare boat charter agreement, executed in November 2009, will be valid for a period of 15 years as from March 2010.

All the project's assets will be given in guarantee.

Others

**(Albacora,
Albacora/Petros
and PCGC)**

Ownership of the assets or payment of an additional lease in the event the revenue is not sufficient to meet obligations with financiers.

b) Project financing in progress

The assets originating from project financing in progress will be recorded into property, plant and equipment of the parent company when these assets enter into operation and they are described in note 14 of the consolidated statements of Petrobras.

Project	Description	Main guarantees
Mexilhão US\$ 756 million (*)	Construction of a platform (PMXL-1) for production of natural gas in the Mexilhão and Cedro fields in the Santos Basin, which will be held by Companhia Mexilhão do Brasil (CMB), which will be responsible for obtaining the funds needed to build the platform. After it has been built, PMXL-1 will be leased to Petrobras, which holds the concession for exploration and production in the aforementioned fields.	Pledge of credit rights. Pledge of the shares of the SPE.
Modernization of Revap US\$ 1.65 billion (*)	The objective of this project is to increase the heavy oil processing capacity of the Henrique Lage Refinery (Revap), bringing the diesel it produces into line with new Brazilian specifications and reducing pollution emission levels. To do this, the SPE, Cia. de Desenvolvimento e Modernização de Plantas Industriais (CDMPI) was created, which will build and lease to Petrobras a delayed coking plant, a coke naphtha hydro-treatment unit and related units to be installed in this refinery. The Executive Committee authorized an additional payment of funds of US\$ 750 million.	Prepayments of leasing to cover any eventual cash shortages of CDMPI.

(*) Estimated value of the investment in the project.

c) Project concluded with the exercise of the purchase option

Project	Description	Main guarantees
Amazônia		

Project for construction of a gas pipeline between Coari and Manaus, and an LPG pipeline between Urucu and Coari, both of which are under the responsibility of Transportadora Urucu Manaus S.A., and the construction of a thermal electric power station through SPE Companhia de Geração Termelétrica Manauara S.A., which was taken over by Transportadora Urucu Manaus in June 2010. On August 18, 2010 the specific purpose entity Transportadora Urucu Manaus (TUM) was taken over by Transportadora Associada de Gás (TAG). The financing contracted by the special purpose entity from BNDES (National Bank for Economic and Social Development) was amended and TAG became the beneficiary and Petrobras the guarantor of the transaction.

With the merger of the special purpose entity, the guarantees related to the project financing were also extinguished.

Barracuda and Caratinga

Project for the purpose of making the development of the production of the Barracuda and Caratinga fields, in the Campos Basin, viable. The special purpose entity Barracuda e Caratinga Leasing Company B.V. (BCLC) is responsible for the formation and ownership of all of the assets required for the project. On September 1, 2010, Petrobras Netherlands (PNBV) exercised its purchase option for the assets of the project (P-43, P-48 and subsea equipment) and Braspetro Oil Services (Brasoil) exercise its purchase option for Barracuda e Caratinga Leasing Company B.V. (BCLC).

With the closing of the project, Brasoil's guarantee for coverage of the financial requirements of BCLC was extinguished.

11.2 Reimbursements receivable and Ventures under negotiation

The balance of reimbursements receivable, net of advances received, referring to the costs incurred by Petrobras on account of projects already negotiated with third parties, is presented in a note 7.1.

The ventures under negotiation, which comprise the expenses already realized by Petrobras for which there are no defined partners, total R\$ 137,525 thousand at September 30, 2010 (R\$ 752,107 thousand at December 31, 2009).

These expenditures are recorded in long-term assets as project financing in the individual statements of Petrobras and in property, plant and equipment in the consolidated financial statements.

12 Deposits in court

The deposits in court are presented according to the nature of the corresponding lawsuits:

(*) On January 1, 2009, Petrobras Energia Participaciones S.A. (PEPSA) was taken over by its subsidiary Petrobras Energia S.A. (PESA), which changed its company name to Petrobras Argentina S.A. (PASA).

Quotation for Pesa s shares on the Buenos Aires stock exchange.

The market value of these shares does not necessarily reflect the realizable value of a representative lot of shares.

13.4 Other information

a) Investments abroad

Acquisition of the entire Pasadena Refinery

In a decision handed down at April 10, 2009, in an arbitration process existing between Petrobras America Inc. (PAI) and Astra Oil Trading NV (ASTRA) and others, which was in progress in accordance with the arbitration rules of the International Centre for Dispute Resolution, the exercise of the put option by ASTRA was confirmed as a valid with respect to PAI and subsidiaries of the remaining 50% of the shares of ASTRA in Pasadena Refining Systems Inc. (PRSI) and in the correlated trading company. PRSI owns the Pasadena Refinery, with an operating office in Texas. The operating, management and financial responsibilities had already been transferred to PAI since September 17, 2008, based on a preliminary arbitration decision on October 24, 2008.

According to the arbitration decision on April 10, 2009, the amount to be paid for the remaining 50% shareholding interest in the refinery and in the trading company was fixed at US\$ 466 million. The payment would be made in three installments, the first in the amount of US\$ 296 million (originally due on April 27, 2009, according to the decision) and the following two payments in the amount US\$ 85 million each, with due dates fixed by the arbitrators for September 2009 and September 2010. The disputing parties presented requests for clarification to the arbitration panel on certain points of the decision, but on June 3, 2009 the arbitration panel decided to confirm *in totum* the original decision without presenting any further explanations. The panel also decided that PAI should reimburse ASTRA an amount of US\$ 156 million plus interest, paid by ASTRA to the bank BNP Paribas as a result of the closing of the line of credit held by the trading company.

The amounts corresponding to the purchase of the shares and the reimbursement of the payment of the guarantee by BNP to ASTRA have been recognized in the accounting by the Company since the arbitration decision in April 2009. At September 30, 2010, these amounts corresponded to US\$ 506 million and US\$ 184 million, respectively, already considering the interest due up to this date.

In March 2009 a loss was recognized in the amount of R\$ 341,179 thousand (US\$ 147,365 thousand), corresponding to the difference between the value of the net assets and the value defined by the arbitration panel.

Until now the parties have not reached an agreement with respect to the finalization of various pending items existing between them, some of them the subject of double collection on the part of ASTRA, for signing the overall term of agreement that will put an end to the litigation and permit the payments that are the subject of the arbitration decision.

On August 4, 2010, reconsidering a decision to the contrary handed down on March 10, 2010, the Federal Court of Houston accepted the defensive thesis presented by PAI and dismissed the Action of Confirmation and Execution of the arbitration award of April 10, 2009, brought by ASTRA (and others) against PAI (and subsidiaries), recognizing its incompetency to examine and adjudge the proceedings. The request for partial annulment and alteration of the award formulated by PAI was not considered.

In the light of the dismissal of the proposed lawsuit before the Federal Court, currently, ASTRA is seeking confirmation and execution of the arbitration award before the State Court, in the litigation that had already been brought against PAI precisely for the hypothesis in question, of extinguishment of the suit in progress in the Federal Court through incompetence of the court.

In May 2010, PAI presented a petition for partial annulment and alteration of the arbitration award before the State, in the case records of the secondary confirmatory action proposed by ASTRA.

In the same sense as the petitions presented in the Federal Court by both the parties, the transfer of the shares of PRSI and PRSI Trading from ASTRA to PAI, through the put option, was not the subject of questioning and only the inappropriate management of the discovery by the arbitrators and questions linked to the implementation of the closing of the operation, inclusively with respect to the delivery of books and documents by ASTRA, was discussed.

It should be noted that the arbitration decision that PAI acquired 100% of the shareholding interest of Astra Oil Trading NV in PRSI, due to ASTRA's put option, which was not challenged by the parties, remains in force.

Judicial proceedings in which requests are made for reciprocal indemnifications made by the parties also continue in progress. Additionally, PRSI and the Trading Company are seeking recovery of certain accounting and fiscal books and records of these companies, incorrectly withheld by ASTRA and its lawyers.

Sale option of the Nansei Sekiyu refinery

On April 1, 2010 the Sumitomo Corporation (Sumitomo) reported its interest in exercising the right of sale to Petrobras, through of your wholly owned subsidiary PIBBV, of 12.5% of the shares of the capital of the Nansei Sekiyu K.K. refinery (Nansei). The rest of the shareholding capital is owned by PIBBV, since 2008.

Sumitomo also reported that its interest in the sale of the shares of Nansei is part of the rearrangement of its stakeholding in the oil products sector.

The share purchase agreement was signed on September 29, 2010, and on October 20, 2010 the payment was made in the amount equivalent to R\$ 48,843 thousand (JPY 2,365,268 thousand), through the delivery of the shares.

Nansei has a refinery located in the Japanese province of Okinawa, with a processing capacity of 100 thousand barrels of light petroleum per day, and it produces high quality oil products at the standards of the Japanese market. It also has an oil and oil products terminal for storage of 9.6 million barrels and three wharves capable of receiving very large crude carriers (VLCC) of up to 280.000 tbp.

b) Investments in Brazil

Investment agreement between Petrobras, Petroquisa, Braskem, Odebrecht and Unipar

The investment agreement entered into on January 22, 2010 established that the transaction for integration of the petrochemical interests will be achieved through the following steps: (i) the formation of a holding company, BRK Investimentos Petroquímicos S.A. (BRK), which now holds all the common shares issued by Braskem previously held by Odebrecht, Petroquisa and Petrobras (Petroquisa and Petrobras, jointly, the Petrobras system) (ii) payments of funds into BRK, to be made in cash by Odebrecht and Petrobras; (iii) a capital increase from Braskem to be made in the form of a private subscription by its shareholders; (iv) acquisition by Braskem of the shares of Quattor Participações held by Unipar; and (v) acquisition by Braskem of 100% of the shares of Unipar Comercial e Distribuidora S.A. (Unipar Comercial) and of 33.33% of the shares of Polibutenos S.A. Indústrias Químicas (Polibutenos); and (vi) acquisition by Braskem of the shares of Quattor held by the Petrobras System.

On February 8, 2010, W.B.W., a subsidiary of Petroquisa, the holder of 31% of the voting capital of Braskem, was taken over by BRK. As a result, BRK became the holder of common shares issued by Braskem, previously held by Petroquisa and Odebrecht, corresponding to 93.3% of its voting capital .

Also on February 8, 2010 a shareholders agreement was entered into between the Petrobras System and Odebrecht that now regulates their relationship as shareholders of Braskem and BRK. The abovementioned shareholders agreement reflects the commitments of the Petrobras System and Odebrecht to high levels of corporate governance and aggregation of value for all the shareholders of Braskem.

In the terms of the shareholders agreement, all the issues within the competence of the General Shareholders Meeting and the Board of Directors will be approved by consensus between Odebrecht and the Petrobras System. In the election of the officers, including the chief executive officer, and in the approval of the business plan, specific rules of the shareholders agreement will be observed, which constitute an exception to the rule of consensus.

On April 14, 2010, the private capital call of Braskem S.A. was finalized with a capital increase in the amount of R\$ 3.7 billion, of which R\$ 2.5 billion was paid in by Petrobras on April 5, 2010 and R\$ 1 billion by Odebrecht on March 30, 2010.

On April 27, 2010, Braskem acquired from Unipar 60% of Quattor Participações and, on May 10, 2010, 100% of Unipar Comercial and 33.33% of Polibutenos.

On June 18, 2010, the shares of Quattor Participações S.A. held by the Petrobras System were incorporated by Braskem through the issuing of 18,000,087 new common shares, where 14,358,067 were for Petrobras and 3,642,020 for Petroquisa.

On August 17, 2010, the transfer of 1,515,433 preferred shares of Braskem, held by Odebrecht, was made to Petrobras, for the purpose of reaching a stockholding difference of 2.33% in the total capital, excluding treasury shares, as established in the Investment Agreement.

On August 30, 2010, also within the ambit of the agreement, Petrobras incorporated in Braskem 10% of the shares of Rio Polímeros S.A. (Riopol) through the issuing of 1,280,132 new preferred shares. This interest in Riopol was purchased from BNDESPAR on August 9, 2010 for R\$ 139,536 thousand and payment will be made in 3 annual installments starting in 2015, restated by the long-term interest rate (TJLP) plus 2.5% p.a.

After the contributions, the incorporation of shares of Quattor Participações S.A. and Riopol, and the equalization of 2.33% of the shares, the Petrobras System now holds, directly and indirectly, 36.1% of the total capital of Braskem.

Also, on January 22, 2010, Odebrecht, the Petrobras System and Braskem executed a joint-venture agreement, the purpose of which is to regulate their commercial and corporate relationship in the Petrochemical Complex of Suape (Suape Complex) and the Petrochemical Complex of the State of Rio de Janeiro (COMPERJ). The joint venture agreement establishes that Braskem will gradually assume the companies that carry out the business of the Suape Complex.

With respect to the companies that develop the first and second petrochemical generations of COMPERJ, it was agreed that Braskem will assume these petrochemical businesses, observing the agreed-upon conditions. These transactions are in harmony with the interest of Odebrecht and the Petrobras System in integrating their petrochemical interests in Braskem.

The Company understands that the whole transaction is aligned with its strategic plan of operating in the petrochemical sector in a way that is integrated with its other businesses, adding value to its products and permitting more effective participation in Braskem. The transaction will also permit greater valorization of its participation in the

petrochemicals sector as a result of the larger scale of a capital framework that is more appropriate for the challenges of global competition and that the investment and shareholders agreements provide the Petrobras System a shareholding position that influences the preparation of the strategic, financial and operating strategies of the invested companies.

Total Agroindústria Canavieira S.A.

In 2010, Petrobras Biocombustível entered the ethanol market through the payment of R\$ 130,000 thousand, in the period from January 18 to September 30, 2010, into the capital of Total Agroindústria Canavieira S.A., pursuant to the commitment established in the Special General Shareholders Meeting of December 22, 2009, to pay in the amount of R\$ 150,000 thousand not later than March 2011, when it will then hold 40.4% of the capital. The partnership will make it viable to expand the refinery to a total capacity of 203 million liters per year, with surplus electric power of 38.5 MW for trading, generated through the use of sugar cane bagasse.

Breitener Energética S.A.

Up till December 31, 2009, Petrobras held 30% of the capital of Breitener Energética S.A., a company established for the purpose of generating electric power, situated in the city of Manaus, in the state of Amazonas. On February 12, 2010, 35% of the interest in the capital was purchased for R\$ 3 thousand and Petrobras now holds shareholding control of the company. The appraisal of the fair value of the assets and liabilities has not been concluded and, therefore, preliminarily, a gain of R\$ 17,362 thousand was recognized, pursuant to CPC 15 - Business Combinations (IFRS 3).

Açúcar Guarani S.A.

The investment agreement entered into on April 30, 2010 with Tereos Internacional establishes the entry of Petrobras Biocombustível in the capital of Açúcar Guarani S.A., with a capital contribution of R\$ 1,611 million until 2015, after which the Company will hold 45.7% of the capital shares. The investment will be made in three stages, as follows: (i) an initial investment in Cruz Alta Participações S.A. (a wholly owned subsidiary of Guarani); (ii) closing of the capital of Guarani with subsequent exchange of the shares of Cruz Alta for shares of Guarani; and (iii) an additional contribution to reach a 45.7% interest in the capital of Guarani. The agreement also establishes the possibility of additional contributions on the part of the partners up to the limit of a 49% interest by Petrobras Biocombustível.

On May 14, 2010, Petrobras Biocombustível paid R\$ 682,504 thousand into the capital of Cruz Alta Participações S.A.

On August 13, 2010 the corporate restructuring was concluded, where Tereos Internacional incorporated the shares of Guarani, which became a wholly owned subsidiary. After this restructuring. There are corporate acts in progress which will promote the replacement of the shares of Cruz Alta by shares of Guarani.

Guarani is the fourth largest sugar cane processing company in Brazil, focused on the ethanol and sugar market with a processing capacity of 17.4 million tons of sugar cane in the 2010/11 harvest through the seven industrial plants that it owns, six of which are located in Brazil and one in Mozambique.

Gas Brasileiro Distribuidora S.A.

On May 26, 2010, Petrobras Gás S.A. (Gaspetro) signed an agreement with Ente Nazionale Idrocarburi S.p.A. (ENI) for the acquisition of 100% of the shares of Gas Brasileiro Distribuidora S.A. (GBD), at an approximate amount of US\$ 250 million, subject to adjustments due to the value of the company's working capital at the date of settlement of the transaction.

GBD holds the natural gas distribution service concession in the north west region of the State of São Paulo, in an area that covers 375 municipalities where it attends the industrial, commercial, residential and vehicular demands of the region. The concession agreement began in December 1999 for a duration of 30 years and may be extended for another 20 years. In 2009, the company's distribution network comprised 734.5 km and the volume of sales was approximately 529 thousand cubic meters of natural gas per day.

Transfer of control will be made only after the conclusion of the transaction, which is conditioned to approval by the Regulatory Agency for Sanitation and Energy of the State of Sao Paulo (ARSESP).

São Martinho S.A.

On June 18, 2010, Petrobras Biocombustível entered into an investment agreement with Grupo São Martinho S.A., establishing a strategic partnership for increasing the production of ethanol in the Center-West region of Brazil.

The agreement establishes the setting up of a new company called Nova Fronteira Bioenergia S.A., which will control the Boa Vista Refinery, located in Goiás. Through a capital contribution of R\$ 420,800 thousand, at the end of 12 months Petrobras Biocombustível will then hold 49% of the shares of the new company.

Bioóleo Industrial e Comercial S.A

On August 24, 2010, Petrobras Biocombustível paid the amount of R\$ 15,500 thousand into the capital of Bioóleo Industrial e Comercial S.A., through the purchase and sale of shares and now holds 50% of the capital.

Bioóleo is a company for extracting vegetal oils, located in the city of Feira de Santana, in the State of Bahia, with a processing capacity of 130 thousand tonnes per year of various species of oleaginous grains. The unit has an installed capacity for storing 30 thousand tonnes of grain and a tanking capacity for 10 million liters of oil.

Additionally, transfers of R\$ 6,000 thousand were made for operating and security, environment and health (SMS) improvements, paid out in August 2010 in equal parts by the partners.

c) Specific purpose entities

In the period from January to September 2010, Petrobras and subsidiaries designated by Petrobras exercised the purchase option for the SPEs as follows, as established in the Option Agreements for Purchase and Sale of Shares, entered into between Petrobras and the shareholders of the SPEs.

Cayman Cabiúnas Investment Co. Ltd. Project Cabiúnas

On March 16, 2010, Petrobras exercised its purchase option for Cayman Cabiúnas Investment Co. Ltd. for US\$ 85 million (equivalent to R\$ 151,521 thousand).

NovaMarlim Participações S.A. Project NovaMarlim

On May 7, 2010, the transfer of 56.57% of the remaining shares of NovaMarlim Participações S.A. was made to Petrobras, whose exercise of the option occurred in 2009. This transaction with minority shareholders resulted in an increase of R\$ 1,112 thousand in the net equity attributable to the Company's shareholders.

On July 21 and August 11, 2010, the Brazilian Securities Commission (CVM), at the request of the company NovaMarlim Participações S.A. and its subsidiary NovaMarlim Petróleo S.A., canceled the respective listings of the companies on the stock exchange.

Transportadora Urucu Manaus S.A. Project Amazônia

On June 24, 2010, Cia. de Geração Termoelétrica Manauara was acquired by Transportadora Urucu Manaus S.A. (TUM) and was merged on June 29, 2010. On August 5, 2010, Transportadora Associada de Gás S.A (TAG), a subsidiary of Petrobras Gás S.A. (Gaspetro), exercised its purchase option of TUM for R\$ 10 thousand and took over the Company on August 18, 2010. This transaction with minority shareholders resulted in an increase of R\$ 170,245 thousand in the net equity attributable to the Company's shareholders.

As a consequence of these mergers, Codajás Coari Participações Ltda. and Manaus Geração Termoelétrica Participações Ltda., former parent companies of Cia. de Geração Termoelétrica Manauara and TUM, respectively, stopped being consolidated in Petrobras, due to their separation from Project Amazônia, whose investments began to be concentrated in TAG.

Barracuda & Caratinga Holding Company B.V. - Project Barracuda & Caratinga

On September 1, 2010, Braspetro Oil Services Company (Brasoil) exercised its option for the shares of Barracuda & Caratinga Holding Company B.V. (BCHC) for the amount of 22 thousand (equivalent to R\$ 49 thousand) and Petrobras Netherlands B.V. (PNBV) exercised its option for the shares of Barracuda & Caratinga Leasing Company B.V. (BCLC), a subsidiary of BCHC, for US\$ 20,00 (equivalent to R\$ 34.88). This transaction with minority shareholders resulted in a decrease of R\$ 997,260 thousand in the net equity attributable to the Company's shareholders.

At September 30, 2010, the property, plant and equipment of Consolidated and the Parent company includes assets originating from agreements that transfer benefits, risks and control in the amount of R\$ 803,757 thousand and R\$ 18,167,100 thousand, respectively (R\$ 1,267,430 thousand and R\$ 16,797,824 thousand at December 31, 2009).

Sale of the San Lorenzo refinery and part of the distribution network in Argentina

On May 4, 2010, Petrobras Argentina S.A. (formerly Petrobras Energia S.A.), approved the terms and conditions of the agreement for the sale to Oil Combustibles S.A. of refining and distribution assets in Argentina. The deal comprises a refinery located in San Lorenzo in the province of Santa Fé, a fluvial unit, and a fuel trading network connected to this refinery, consisting of 360 sales points and associated wholesaler clients.

The offer for the aforementioned assets was approximately US\$ 36 million. In addition, on the closing date the petroleum inventories and the different products will be sold to Oil Combustibles S.A. for approximately US\$ 74 million. The total amount of the transaction is estimated at around US\$ 110 million.

The transaction is in the process of approval by the administrative authorities required by the prevailing legislation in Argentina.

The transaction does not consider the sale of the reformer unit that Petrobras Argentina has in its Puerto General San Martín Petrochemical Complex.

14.2 Depreciation

Depreciation is presented as follows:

	R\$ thousand			
	Consolidated		Parent company	
	Jan-Sep/2010	Jan-Sep/2009	Jan-Sep/2010	Jan-Sep/2009

14.3 Decrease to recoverable value of assets (Impairment)

Gas & Energy

The loss is related to the assets for generating electric power of the subsidiary Breitener, due to the need to purchase new engines fueled by natural gas, since the engines currently used, fueled by fuel oil will remain on standby, as determined in the contracts with Eletrobras Amazonas Energia S.A., which stipulate bi-fuel operation (gas and fuel oil) for Breitner's two thermoelectric power stations in Manaus, in the State of Amazonas.

Although the installed generation capacity will be doubled as from the entry into operation of the new engines, there are no agreements yet for the sale of this power that may generate new revenue. Accordingly, the company conducted an impairment test for the current fuel oil engines and compared the book value of these assets with their recoverable value, since the Company will have to keep the present engines on standby, and their use value, which corresponds to the residual amount recorded in the accounting books, was considered for comparison.

Based on these indexes, the Company conducted an impairment test for these assets and recognized a provision for loss in the amount of R\$ 79,992 thousand. This amount was submitted to and approved by the General Shareholders meeting of that company on August 13, 2010.

International

In 2010 a loss was recorded in the amount equivalent to R\$ 113,762 thousand, due to the decrease in the recoverable value (impairment) of assets held for sale, referring to the refining and distribution segments. These assets were recognized at their fair value in the amount equivalent to R\$ 64,116 thousand, which corresponds to the revenue to be earned in the sales process, net of expenses incurred.

(*) Except Concessions that are amortized over the contractual term.

15.2 Petroleum exploration rights Onerous assignment

On September 3, 2010, Petrobras, as assignee, the Federal Government as assignor, and the National Agency for Petroleum, Natural Gas and Biofuels (ANP) as regulator and supervisor, executed an agreement for onerous assignment of the right to exercise research and mining activities for petroleum, natural gas and other fluid hydrocarbons located in blocks in the pre-salt area, limited to the production of five billion barrels of oil equivalents.

All the terms of the Onerous Assignment Agreement were approved by the Company's Board of Directors on September 1, 2010, by the National Energy Policy Council (CNPE) and by the minority shareholders' committee.

As a reciprocal obligation to the right of exercising petroleum exploration and production activities, the Company paid, with funds originating from the public share offering, the settlement of which took place on September 29, 2010 (see note 26.2), the amount of R\$ 67,815,921 thousand with National Treasury Bills (LFTs) and R\$ 6,991,695 thousand in local currency, amounting to the total for the right of exploration of R\$ 74,807,616 thousand, which will be amortized in accordance with the future units produced and will be subject to impairment testing.

The initial value of the Onerous Assignment Agreement was determined through negotiation between Petrobras and the Federal Government, based on technical appraisals prepared by independent certifying entities that were contracted by Petrobras and by ANP in the terms of Law 12276/10, resulting in a weighted average price of R\$ 14.96 (US\$ 8.51) per barrel for the areas presented below:

Blocks	Volumes Millions of boe	R\$ thousand
Franco	3,058	48,620,830
Florim	467	7,399,957
Nordeste de Tupi	428	6,425,388
Em torno de Iara	600	6,137,192
Sul Guará	319	4,456,309
Sul de Tupi	128	1,767,940
	5,000	74,807,616

The agreement for concession of the rights establishes that at the time of the declaration of the commerciality of the reserves there will be a review of volumes and prices, based on independent technical reports. If the review determines that the acquired rights reach an amount greater than that initially paid, the Company will be able to pay the difference to the Federal Government, recognizing this difference as an intangible asset, or it will be able to reduce the overall volume acquired in the terms of the agreement. If the review determines that the acquired rights result in an amount lower than that initially paid, the Federal Government will reimburse the difference.

15.3 Devolution of exploration areas to ANP

During the third quarter of 2010 there were no devolutions to the National Agency for Petroleum, Natural Gas and Biofuels (ANP) of rights over exploration blocks, including both exclusive concessions of Petrobras and blocks in partnership.

15.4 Devolution to ANP of petroleum and natural gas fields operated by Petrobras

During the third quarter of 2010, there were no devolutions by Petrobras to ANP of fields in production.

15.5 Concession of services for distribution of piped natural gas

Petrobras, through its subsidiaries, Petrobras Gás S.A. (Gaspetro) and Petrobras Energia S.A (PESA), has a shareholding interest in natural gas distributing companies located in Brazil and Argentina, while the subsidiary Petrobras Distribuidora S.A.(BR) has a concession agreement for exploitation of the services in Brazil.

In Brazil, the concessionaires have concession agreements for a period of 30 or 50 years and they started up their activities in different periods, using gas pipelines built by or purchased from third parties, with natural gas originating from Brazil and Bolivia. These agreements contain clauses that permit their renewal and establish quarterly readjustments of the tariffs practiced in order to reflect changes in the international price of oil, the US dollar (in the case of the companies that use imported natural gas) or price indexes for the consumer.

In Argentina, Transportadora de Gas del Sur S.A. (TGS), a subsidiary of CIESA, a joint subsidiary of PESA, was established from the privatization process of the Argentine company Gás Del Estado (GdE) and it started up its commercial activities on December 20, 1992, through a concession agreement for transport and distribution of natural gas in Argentina for a period of 35 years, renewable for another 10 years, provided that it fulfills certain contractual obligations. The tariffs are readjusted as follows: (i) half-yearly, in order to reflect the changes in the production indexes of the United States; and (ii) every five years in accordance with efficiency and investment factors to be determined by the regulatory agency.

Both in Brazil and abroad the remuneration for providing services consists of a combination of, basically, three components: (i) price of the gas purchased; (ii) operating costs and expenses; and (iii) remuneration of the capital invested.

The amount recorded as Intangible assets as of September 30, 2010, in an amount equivalent to R\$ 1,556,601 thousand, refers to the value of the assets linked to the concession. In the case of concessions in Brazil, the amount to be reimbursed at the end of the concession will be calculated based on the investments made in the last 5 or 10 remaining years of the concession. In the case of the concession in Argentina, the amount to be reimbursed at the end of the concession is recorded as long-term accounts receivable in the amount of R\$ 80,974 thousand.

(*) Agreements for conditioned purchase and sale of 46 ships were entered into with 6 Brazilian shipyards in the amount of R\$ 10,215,042 thousand, where 90% is financed by BNDES.

(**) On August 18, 2010 SPE Transportadora Urucu Manaus (TUM) was taken over by Transportadora Associada de Gás (TAG).

16.7.2 Debentures

The debentures issued by Petrobras financed, through BNDES, the acquisition in advance of the right to use the Bolivia-Brazil gas pipeline over a period of 40 years to transport 6 million cubic meters of gas per day (TCO - Transportation Capacity Option) totaled R\$ 430,000 thousand (43,000 debentures with a face value of R\$ 10.00) with maturity on February 15, 2015. These debentures are secured by common shares of TBG.

In August 2006, Refinária Alberto Pasqualini - Refap S.A. issued 852,600 simple, registered, book-entry debentures in the amount of R\$ 852,600 thousand, for the purpose of expanding and modernizing its industrial park, with the following characteristics (basic conditions approved by BNDES and BNDESPAR on June 23, 2006): amortization over 96 months plus a six-month grace period; 90% of the debentures subscribed by BNDES at the long-term interest rate (TJLP) + 3.8% p.a.; and 10% of the debentures subscribed by BNDESPAR with BNDES basket of currencies interest + 2.3% p.a. In May 2008 Refap issued another 507,989 debentures with similar characteristics in the amount of R\$ 507,989 thousand.

16.7.3 Guarantees

Petrobras is not required to provide guarantees to financial institutions abroad. Financing obtained from BNDES is secured by the assets being financed (carbon steel pipes for the Bolivia-Brazil gas pipeline and vessels).

On account of a guarantee agreement issued by the Federal Government in favor of multilateral loan agencies, motivated by financings funded by TBG, counter guarantee agreements were entered into, having as signatories the Federal Government, TBG, Petrobras, Petroquisa and Banco do Brasil S.A., where TBG undertakes to entail its revenues to the order of the Brazilian treasury until the settlement of the obligations guaranteed by the Federal Government.

In guarantee of the debentures issued, Refap has a short-term investment account (deposits tied to loans), indexed to the variation of the Interbank Deposit Certificate (CDI). The balance of the account must be three times the value of the last payment paid plus R\$ 31 million.

16.7.4 Indebtedness of CIESA and TGS

In order to clear the financial encumbrances of Compañía de Inversiones de Energia S.A. (CIESA) (a jointly controlled company), PESA transferred its 7.35% interest in the capital of Transportadora de Gas Del Sur S.A. (TGS) (a subsidiary of CIESA) to Enron Pipeline Company Argentina S.A. (ENRON) and, simultaneously, ENRON transferred 40% of its interest in the capital of CIESA to a trustee, the addressee of which would be indicated by CIESA, according to the terms of the financial restructuring to be agreed upon with its creditors.

In the second stage of the process, in conformity with the agreement for restructuring the financial debt, once the necessary approvals have been obtained from Ente Nacional Regulador Del Gas (ENARGAS) and Comisión Nacional de Defensa de la Competencia, ENRON would transfer the remaining 10% interest in CIESA to the financial creditors in exchange for 4.3% of the class B common shares of TGS that CIESA would deliver to its financial creditors as partial payment of the debt.

The restructuring agreement entered into with the creditors in September 2005 established that the remaining balance of the financial debt would be capitalized by the creditors. The restructuring agreement also established a period of validity which was successively extended until December 31, 2008, as from which date any one of the parties could consider the agreement as unilaterally terminated.

The period of validity of the agreement expired without the government approvals having been obtained and on January 9, 2009, Ashmore Energy International Limited (currently AEI) declared that it was the sole owner of the negotiable obligations of CIESA.

On January 28, 2009, CIESA filed litigation in the courts of the State of New York in the United States of America, challenging the lapse of the abovementioned negotiable obligations.

On April 21, 2009, AEI filed a petition for annulment of the process filed by CIESA in the state of New York.

On May 14, 2009, CIESA and AEI were present in the New York court for discussion of the petition for annulment filed by AEI. Up till now, the New York court has still not handed down a decision on the matter.

Additionally, on April 6, 2009 CIESA was notified of a petition for bankruptcy filed by AEI in the Argentine Court, and reimbursement of the amount equivalent to US\$ 127 million, referring to supposed credit originating from the negotiable bonds. CIESA replied to the notice, opposing the petition for bankruptcy, presenting, mainly, the following reasons: (i) non-compliance of the requirements for a bankruptcy petition considering that the requests for Corporate Bonds have a statute of limitation under New York law; (ii) CIESA is not insolvent.

In a decision in the second instance handed down by the Cámara Nacional de Apelaciones on October 9, 2009, the situation of insolvency of CIESA requested by AEI was rejected. The decision is unappealable, therefore, definitive.

As a result of the Chamber's decision, CIESA presented to the New York courts a request for revival and reargumentation with respect to the request by AEI for annulment of the process filed by CIESA in the State of New York, requesting the repeal of the court decision of July 29, 2009 in which it admitted the request for annulment presented by AEI.

On April 12, 2010, the New York courts granted an opinion favorable to CIESA's requests. On May 13, 2010, AEI filed an appeal counter-arguing CIESA's opinion and demanding payment of the debt and compensation of the losses from the aforementioned process.

CIESA and AEI are currently awaiting the decision of the New York Court on the matter.

17 Contractual commitments

At June 30, 2010 the Company had financial commitments due to rights resulting from transactions with and without transfer of benefits, risks and control of these assets.

a) Future minimum payments/receipts of contractual commitments with transfer of benefits, risks and control of assets:

	R\$ thousand		
	09.30.2010

Income and social contribution taxes - foreign operations	106,929	47,497	Occurrence of generating facts for making income available.
Investments in subsidiaries and affiliated companies	147,807		Occurrence of generating facts for making income available.
Exchange variation	1,466,029		Settlement of the contracts
Capitalized interest	1,550,791	1,550,791	Depreciation over the useful life of the asset or disposal
Temporary difference of contractual commitments with transfer of benefits, risks and control of assets and depreciation	1,228,271	1,131,472	Settlement of the liabilities
Others	1,380,622	348,857	
Total	24,327,176	20,219,915	

c) Realization of deferred income tax and social contribution

In the Parent company, the realization of deferred tax credit assets in the amount of R\$ 3.269.148 thousand does not depend on future income because they will be absorbed annually by the realization of the deferred tax liability. In the consolidated statements, for the portion that exceeds the Parent Company's balance, when applicable, the managements of the subsidiaries expect to offset these credits based on projections they have made.

Total	8,722,919	24,327,176	3,269,148	20,219,915

The subsidiary Petrobras Argentina S.A. (PESA) and its subsidiaries have tax credits resulting from accumulated tax losses amounting to approximately R\$ 76,239 thousand (US\$ 45,000 thousand) which are not recorded in their assets. Due to specific tax legislation in Argentina and other countries where PESA has investments that define limitation periods for these credits, these credits may be offset with future taxes payable.

In addition, the subsidiary Petrobras America Inc. (PAI) has unrecorded tax credits amounting to R\$ 1,304,519 thousand (US\$ 769,991 thousand) resulting from accumulated tax losses, originating mainly from oil and gas exploration and production activities. In accordance with specific legislation in the United States, where PAI has its headquarters, tax credits expire after 20 years as from the date of their formation.

Some subsidiaries abroad have accumulated tax losses in the exploration stage. These credits will be recognized according to the tax legislation of each country, if the venture is successful, through the generation of future taxable income.

23.5 Reconciliation of income tax and social contribution on income

The reconciliation of the taxes calculated in accordance with statutory rates and the amount of the taxes recorded in the third quarter of 2010 and 2009 are presented as follows:

a) Consolidated

	R\$ thousand	
	Jan-Sep 2010	Jan-Sep 2009
Income for the year before taxes and after employee profit sharing	35,049,516	34,910,053
Income tax and social contribution at statutory rates (34%)	(11,916,835)	(11,869,418)
Adjustments for calculation of the effective rate:		
Permanent additions, net	(373,643)	(356,213)

24.1 Pension Plan - Fundação Petrobras de Seguridade Social (Petros)

a) *Petros Plan*

Fundação Petrobras de Seguridade Social (Petros) is a defined benefit plan set up by Petrobras in July 1970 to ensure that members of the plan receive a supplement to the benefits provided by the Social Security system. In addition to Petrobras, the Petros Plan is sponsored by Petrobras Distribuidora S.A. (BR), Petroquisa and Alberto Pasqualini (Refap), and is closed to employees hired as from September 2002.

The evaluation of the Petros funding plan is made by independent actuaries on a capitalization basis for the majority of the benefits. The sponsors make regular contributions in amounts equal to the contributions of the members (employees) and assisted persons (retirees and pensioners), i.e. on a parity basis.

On the verification of an eventual deficit in the defined benefit plans, this must be resolved by members, beneficiaries and sponsors, pursuant to Constitutional Amendment 20/1998 and Complementary Law 109/2001, observing the proportion with respect to the normal contributions made in the year in which that result was verified.

On October 23, 2008, Petrobras and the subsidiaries that sponsored the Petros Plan and Petros signed Financial Commitment Agreements as a result of the ratification of a legal transaction related to the pension plan, as established in the Reciprocal Obligations Agreement entered into between the sponsors and the union entities. The Financial Commitment Agreement has a term of 20 years with payment of half-yearly interest of 6% p.a. on the updated balance payable. At September 30, 2010, the balances of the Financial Commitment Agreements totaled R\$ 4,523,919 thousand (R\$ 4,254,776 thousand in the Parent company), of which R\$ 110,797 thousand (R\$ 104,174 thousand in the parent company) in interest matures in 2010.

The obligation assumed by the Company, through the financial commitment agreements, represents a balancing item to the concessions made by the members/beneficiaries of the Petros Plan to the renegotiation for a change in the plan's regulations, in relation to the benefits, and the closing of existing litigations.

At September 30, 2010, Petrobras and its subsidiaries held long-term National Treasury Notes in the amount of R\$ 4,407,314 thousand (R\$ 4,178,794 thousand in the Parent company), which will be held in the Company's portfolio as a guarantee for the financial commitment agreements.

b) Petros Plan 2

Petros Plan 2, a variable contribution plan, was implemented by the sponsors Petróleo Brasileiro S.A.(Petrobras), Petrobras Distribuidora S.A. (BR), Petrobras Química S/A (Petroquisa) and Alberto Pasqualini Refap S.A., starting on July 1, 2007. Afterwards, the companies Ipiranga Asfaltos S.A. (IASA), FAFEN Energia S.A., Termorio S.A., Usina Termelétrica de Juiz de Fora S.A., Termobahia S.A., Termomacaé Ltda. and Termoçarã Ltda. joined the plan.

The sponsors that implemented the plan assumed the past service of the contributions corresponding to the period in which the members had no plan, as from August 2002, or from subsequent admission, until August 29, 2007. The disbursements for past service are made monthly over the same number of months in which the member had no plan and, therefore, should cover the part related to the members and sponsors. The plan will remain open for inscriptions after this date, but there will no longer be payment for past service.

The portion of this plan with defined benefit characteristics refers to risk coverage for disability and death, a guarantee of a minimum benefit and a lifetime income, and the related actuarial commitments are recorded according to the projected credit unit method. The portion of the plan with defined contribution characteristics, earmarked for forming a reserve for programmed retirement, was recognized in the results for the year as the contributions are made. At September 30, 2010, the contribution by Petrobras and subsidiaries to the defined contribution portion of this plan was R\$ 252,426 thousand (R\$ 240,747 thousand in the Parent company).

The actuarial evaluation in 2009, in order to comply with the rules for Supplementary Pensions, showed evidence of a lower level of loss from risk events in the year, and it also observed that the balance of the collective risk fund presented an amount sufficient to cover the estimated benefits for 2010. Accordingly, the Foundation followed the actuary's suggestion that the risk contributions were redirected to the member's account in the plan during the first semester of 2010 and, for the same reasons as previously mentioned, as of June 30, 2010, the Foundation's decision-making council also maintained this course of action for the second semester of 2010.

24.2 Petrobras Internacional Braspetro B.V. - PIB BV

24.2.1 Petrobras Argentina S.A.

a) Defined contribution pension plan

In 2005, Petrobras Argentina S.A. (PESA) implemented this voluntary plan for all employees who meet certain conditions. The company contributes with amounts equal to the contributions made by the employees in accordance with the contribution specified for each salary level.

The cost of the plan is recognized in accordance with the contributions that the company makes, which at September 30, 2010 totaled R\$ 3,390 thousand (R\$ 3,402 thousand at September 30, 2009).

b) Defined benefit pension plan

b.1) Termination Indemnity Plan

This is a benefit plan in which employees who meet certain conditions are eligible on retirement to receive one month's salary for each year they have worked in the Company, according to a decreasing scale, according to the number of years the plan has existed.

b.2) "Compensator Fund" Plan

This plan is available for all PESA employees who joined the defined contribution plans in force in the past and who joined the company prior to May 31, 1995 and have accumulated the required time of service. The benefit is calculated as a supplement to the benefits granted by these plans and by the retirement system, so that the total benefit received by each employee is equivalent to the amount defined in this plan.

If a surplus is recorded in the funds allocated to trusts for payment of the defined benefits awarded by the plans and it is duly certified by an independent actuary, PESA may use these funds simply by notifying the trustee of this fact.

24.2.2 Nansei Sekiyu K.K.

The Nansei Sekiyu K.K. Refinery offers its employees a supplementary retirement benefit plan, a defined benefit plan, where the members in order to become eligible for the benefit need to be at least 50 years old and have 20 years service in the company. Contributions are made only by the sponsor. The plan is managed by Sumitono Trust & Banking.

24.3 Healthcare - Multidisciplinary Healthcare (AMS)

Petrobras, its subsidiaries, Petrobras Distribuidora, Petroquisa and Alberto Pasqualini - Refap S.A. have a healthcare plan (AMS) that has defined benefits and covers all present and retired employees of the companies in Brazil and their dependents. The plan is managed by the company itself, and the employees contribute a fixed monthly amount to cover the main risks and a portion of the costs related to the other types of coverage in accordance with a participation table based on specified parameters, including salary levels, in addition to a pharmacy benefit that provides special terms for plan holders to buy certain medications in registered pharmacies throughout Brazil.

The healthcare plan is not covered by guarantor assets. The benefits are paid by the Company, based on the costs incurred by the plan members.

24.4 Other defined contribution plans

The subsidiary Transpetro and some subsidiaries of Petrobras sponsor defined contribution retirement plans for their employees.

24.5 The balance of the liabilities for expenses with post-employment benefits, calculated by independent actuaries, presents the following changes:

26 Shareholder s Equity

26.1 Paid in capital

At September 30, 2010, subscribed and fully paid-in capital amounting to R\$ 200,160,863 thousand is represented by 7,367,255,304 common shares and 5,489,244,532 preferred shares, all of which are registered and have no par value.

26.2 Capital increase

On September 23, 2010, the Board of Directors of Petrobras approved a capital increase in the amount of R\$ 115,052,319 thousand, increasing the Company s capital from R\$ 85,108,544 thousand to R\$ 200,160,863 thousand through issuing 2,293,907,960 common shares, at the unit price of R\$ 29,65, and 1.788,515,136 preferred shares at the unit price of R\$ 26,30, attributing to their holders the same rights as the holders of the previously existing shares, increasing the capital to be represented by 7,367,255,304 common shares and by 5,489,244,532 preferred shares.

On September 29, 2010, there was the settlement of the Offering of the abovementioned shares, which resulted in the raising of R\$ 115,052,319 thousand, where an amount equivalent to R\$ 67,815,921 thousand was received through four series of Financial Treasury Bills (LFT) issued by the Federal Government, with maturity on September 7, 2014 March 7, 2015, September 7, 2015 and September 7, 2016.

As established in the Information Documents of the Offering, the funds would be used for the payment of the Onerous Assignment Agreement (see note 15.2) and for the financing of the Company s Business Plan.

After the conclusion of the settlement of the Offering, on September 29, 2010 the Company transferred to the Federal Government the total Financial Treasury Bills (LFT) received by Petrobras and an additional amount of R\$ 6,991,695 thousand, in order to total the payment of the Onerous Assignment in the amount of R\$ 74,807,616 thousand. (See note 15.2)

On October 1, 2010, the Board of Directors of Petrobras approved the issue and verified the subscription of 75,198,838 Common Shares and 112,798,256 Preferred Shares, resulting from the option of a lot supplementary to the offering settled on September 29 2010, maintaining the same of prices and rights of the shares settled previously, resulting in the raising of additional funds and increasing the capital in the amount of R\$ 5,196,240 thousand,

increasing the capital to R\$ 205,357,103 thousand, represented by 7,442,454,142 Common Shares and 5,602,042,788 Preferred Shares.

The capital increases paid in on September 29 and October 1, 2010 are within the authorized capital limits established in article 4 of the Company's Bylaws.

The public offering generated a funding cost in the amount of R\$ 416,353 thousand, net of taxes, which was recorded in shareholders' equity.

26.3 Dividends

Interest on shareholders' equity - fiscal year 2010

The Company's Board of Directors approved the early distribution of remuneration to shareholders in the form of interest on shareholders' capital, as established in article 9 of Law 9249/95 and Decrees 2673/98 and 3381/00, on the following dates:

- On May 14, 2010, a payment of R\$ 1,754,815 thousand, corresponding to a gross amount of R\$ 0.20 per common or preferred share, to be made available on May 31, 2010, based on the shareholding position at May 21, 2010;
- On July 16, 2010, a second payment of R\$ 1,754,815 thousand, corresponding to a gross amount of R\$ 0.20 per common or preferred share, to be made available on August 31, 2010, based on the shareholding position at July 30, 2010;
- On October 22, 2010, a third payment of R\$ 1,826,230 thousand, corresponding to a gross amount of R\$ 0.14 per common or preferred share, to be made available on December 31, 2010, based on the shareholding position at November 1, 2010;

This interest on shareholders' equity should be discounted from the remuneration that is distributed on the closing of the first quarter of 2010. The amount will be monetarily updated, according to the variation of the SELIC rate since the date of effective payment until the end of the aforementioned quarter.

The interest on shareholders' equity is subject to the levy of income tax at the rate of 15%, except for shareholders that are declared immune or exempt.

Fishermen s Federation of Rio de Janeiro FEPERJ

On behalf of its members, FEPERJ is making a number of claims for indemnification as a result of an oil spill in Guanabara Bay which occurred on January 18, 2000. At the time, Petrobras paid out extrajudicial indemnification to all those that proved they were fishermen when the accident happened. According to the records of the national fishermen s registry, only 3,339 people were eligible to claim indemnification.

On February 2, 2007, a decision, partially accepting the expert report, was published and, on the pretext of quantifying the amount of the conviction, it established that the parameters for the respective calculations based on these criteria would result in an amount of R\$ 1,102,207 thousand. Petrobras appealed against this decision before the Court of Appeals of Rio de Janeiro, as the parameters stipulated in the decision are contrary to those specified by the Court of Appeals of Rio de Janeiro, itself. The appeal was accepted. On June 29, 2007, a decision was published by the First Civil Chamber of the Court of Appeals of the State of Rio de Janeiro denying approval to the appeal by Petrobras and granting approval to the appeal by FEPERJ. Special appeals were lodged by Petrobras against this decision, which in a decision handed down on November 19, 2009 by the Superior Court of Justice, were considered fit to annul the court decision of the First Civil Chamber of the Court of Appeals of Rio de Janeiro.

FEPERJ invoked motions for clarification of judgment, which are awaiting a hearing.

Based on the calculations prepared by the Company s experts, the amount of R\$ 47,730 thousand, updated to September 30, 2010, was maintained as representing the amount that the Company understands will be established by the higher courts at the end of the proceedings.

ICMS Sinking of Platform P-36

In 2001, Platform P-36 was imported by Petrobras through temporary admission in accordance with the special regime for imports and exports (REPETRO) which suspends taxation and, therefore, on this occasion state taxes were not due.

With the sinking of the platform, the State of Rio de Janeiro initiated actions for collection of the suspended ICMS through tax foreclosure proceedings as it understands that there will no longer be return of the platform.

In February 2010, with an unfavorable decision at the last level of appeals in the Superior Court of Rio de Janeiro, Petrobras began to evaluate the legal aspects of the suit and the economic aspects of the use of the benefits of a tax amnesty established in State Law 5,647, of January 18, 2010, which permits elimination of fines and an expressive decrease in other charges, as well as the possibility of payment with court order debts.

Petrobras adhered to the payment conditions of the aforementioned state law, fixing the total amount agreed upon with the State of Rio de Janeiro in the amount of R\$ 448,666 thousand.

In May 2010 Petrobras paid the amount of R\$ 313,666 thousand. The remaining balance of R\$ 135,000 thousand will be paid in court order debts. In addition, the State of Rio de Janeiro has undertaken to analyze tax benefits related to other projects and negotiation with the Company.

Triunfo Agro Industrial S.A and others

During the year 2000, Triunfo Agro Industrial and others filed a suit against Petrobras, claiming losses and damages as a result of the annulling of a credit assignment transaction excise tax (IPI) premium. The hearing by the Superior Court of Rio de Janeiro, in the second instance, was unfavorable to Petrobras and approval was denied for the appeal lodged by the Company. Appeals will be filed against this decision in the higher courts in Brasilia. Petrobras filed special and extraordinary appeals, which are awaiting a hearing.

Parallely to the filing of the aforementioned appeals, on September 28, 2010 Petrobras filed a rescissory action with the Superior Court of Rio de Janeiro.

The maximum estimated exposure is around R\$ 470,988 thousand.

Special interest in the Barracuda and Caratinga Fields

On July 1, 2010, Petrobras received a notice of infraction, drawn up by the National Agency for Petroleum, Natural Gas and Biofuels (ANP), in the amount of R\$ 221,968 thousand, on the pretence of a special interest in the Barracuda and Caratinga fields on account of amounts that would have been underpaid by the Company during the period between the second quarter of 2005 and the fourth quarter of 2009, due to the deduction of costs in supposed disagreement with ANP Ordinance 10/99.

On July 15, 2010, Petrobras filed its defense with ANP.

ANP presented a new official letter, with a review of the amount for the official notification, as it understands that part of the leasing agreement would not consist of a financing transaction.

At September 30, 2010, the maximum estimated exposure is around R\$ 83,236 thousand.

On October 28, 2010, Petrobras paid the first installment of a total of 30, with respect to this liability.

27.2 Main legal proceedings with a probability of possible loss:

Plaintiff: Porto Seguro Imóveis Ltda.

Nature: Civil

Porto Seguro, a minority shareholder of Petroquisa, filed a lawsuit against Petrobras, related to alleged losses arising from the sale of the shareholding interests of Petroquisa in various petrochemical companies included in the National Privatization Program. The plaintiff filed the aforesaid lawsuit to obtain an order obliging Petrobras, as the majority shareholder of Petroquisa, to compensate for the "loss" inflicted on the equity of Petroquisa, through the acts which approved the minimum sales price of its shareholding interest in the capital of the privatized companies.

On March 30, 2004 the Court of Appeals of Rio de Janeiro unanimously granted the new appeal lodged by Porto Seguro, ordering Petrobras to indemnify an amount equal to US\$ 2,370 million, plus 5% as a premium and 20% as lawyers' fees.

Petrobras filed a special and an extraordinary appeal before the Superior Court of Justice (STJ) and the Federal Supreme Court (STF), which were rejected. Petrobras then filed an interlocutory appeal against the decision before the Superior Court of Justice and the Federal Supreme Court.

The special appeal offered by Porto Seguro, which sought to bar the processing of the special appeal by Petrobras, was heard and dismissed in December 2009. Motions to clarify were then invoked by Porto Seguro on March 12, 2010, which are awaiting a hearing.

The publication of this decision and judgment of the aforementioned special appeal through which Petrobras seeks to totally reverse the sentence is being awaited.

Based on the opinion of its legal counsel, the Company does not expect an unfavorable outcome to these proceedings.

If the situation is not reversed, the estimated indemnification to Petroquisa, including monetary correction and interest, would be R\$ 18,122,682 thousand as of September 30, 2010. As Petrobras owns 100% of the capital of Petroquisa, part of the indemnification to Petroquisa, estimated at R\$ 11,960,970 thousand, will not represent an actual disbursement from the Petrobras System. Additionally, Petrobras would have to indemnify Porto Seguro, the plaintive, R\$ 906,134 thousand as a premium and pay \$ 3,624,536 thousand as lawyers' fees to Lobo & Ibeas Advogados.

Considered as with the ground at the first instance. The two parties lodged appeals which were dismissed. Petrobras is awaiting a hearing of the extraordinary appeal lodged with the Federal Supreme Court and a

Plaintiff: Kalium Mineração S.A.

Nature: Civil

An action for losses and damages and loss of earnings due to the contractual rescission.

special appeal with the Superior Court of Justice on September 18, 2003, both of which were admitted. There is also a special appeal by Kalium which is awaiting a hearing. The maximum exposure for Petrobras, updated to September 30, 2010, is R\$ 187,029 thousand.

Plaintiff: Destilaria J.B. Ltda. and Others.

Nature: Civil

Collection of charges on invoices related to the purchase of alcohol paid late.

There is a final and unappealable condemnatory decision in an amount to be calculated and still pending confirmation.

Indeterminate maximum exposure

Plaintiff: IBAMA

Nature: Civil

Non-compliance with the Settlement and Commitment Agreement (TAC) clause related to the Campos Basin , of August 11, 2004, for continuing to drill without prior approval.

Sentence handed down at the lower administrative level, ordering Petrobras to pay for non-compliance with the TAC. The Company filed a hierarchical appeal to the Ministry of the Environment which is awaiting a hearing.

Maximum updated exposure: R\$ 174,245 thousand

Plaintiff: Federal Revenue Department of Rio de Janeiro

Nature: Tax

Tax deficiency notice related to withholding income tax calculated on remittances of payments for affreightment of vessels referring to the period from 1999 to 2002.

Petrobras submitted new administrative appeals to the Higher Chamber of Tax Appeals, the highest administrative level, which are awaiting a hearing.

Maximum updated exposure: R\$ 4,487,857 thousand

Plaintiff: SRP - Social Security Department

Nature: Tax

Tax deficiency notices related to social security charges arising from administrative proceedings brought by the INSS which attributed joint liability to the company for the contracting of civil construction and other services.

Of the amounts the company disbursed to guarantee the filing of appeals and/or obtaining of the debt clearance certificate from the INSS, R\$ 114,634 thousand is recorded as deposited in court, which could be recovered in the proceedings in progress, related to 332 tax deficiency notices amounting to R\$ 363,298 thousand at September 30, 2010. The position of Petrobras legal department for these deficiency notices is minimal risk of future disbursement.

On August 15, 2006, the Company filed a refutation of this notice of infraction in the Federal Revenue Inspectorate of Rio de Janeiro as it considers that the tax collecting classifications that were made were supported by a technical report from a renowned institute. In a session on October 11, 2007, the First Panel of Judges considered the tax assessment as invalid, overcoming one judge who voted for partial validity. The Federal Revenue Inspectorate filed an ex-officio appeal to the Taxpayers Council and this request has not yet been

Plaintiff: Federal Revenue Department of Rio de Janeiro

Underpayment of corporate income tax (IRPJ) and social contribution on net income (CSLL) on income earned abroad in the period from 2005 to 2006, through affiliated companies and subsidiaries.

On September 3, 2009 the process was remitted to the Control and Hearing Service - DRJ.

Maximum updated exposure: R\$ 343,506 thousand
The lower court considered the assessment to have grounds. The decision was upheld at the second instance.

The filing of a special appeal is being evaluated by Petrobras, to be heard by the Superior Chamber of the Tax Court of the State of São Paulo.

Maximum updated exposure: R\$ 2,870,769 thousand

The lower court considered the assessment to have grounds. Petrobras filed a spontaneous appeal which is awaiting a hearing.

Maximum updated exposure: R\$ 139,885 thousand

The lower court considered the assessment to have grounds. Petrobras filed a spontaneous appeal which is awaiting a hearing.

Maximum updated exposure: R\$ 230,550 thousand

The lower court considered the assessment to have grounds.

Maximum updated exposure: R\$ 188,466 thousand

The Company is appealing at the administrative level.

Some notices were considered to have grounds at the first administrative level. The Company filed spontaneous appeals which are awaiting a hearing.

Maximum updated exposure: R\$ 171,759 thousand

The lower court considered the assessment to have grounds. The Company filed a spontaneous appeal which is awaiting a hearing.

Maximum updated exposure: R\$ 1,397,679 thousand

Processes for small amounts

The Company is party to a number of legal and administrative proceedings with expectations of possible losses, whose total per legal nature is R\$ 109,746 thousand in civil actions, R\$ 928,581 thousand in labor actions, R\$ 852,558 thousand in tax actions and R\$ 189,142 thousand in environmental actions.

Environmental questions

The Company is subject to various environmental laws and regulations that regulate activities involving the unloading of oil, gas and other materials and that establish that the effects on the environment caused by the Company's operations must be remedied or mitigated by the Company. We present below the updated situation of the main environmental proceedings with chances of possible loss.

In 2000, an oil spill at the São Francisco do Sul Terminal of the Presidente Getúlio Vargas Refinery (Repar) discharged approximately 1,06 million gallons of crude oil into the surrounding area. At that time approximately R\$ 74,000 thousand was spent to clean up the affected area and to cover the fines applied by the environmental authorities. There is the following lawsuit with respect to this spill:

Plaintiff: AMAR - Association for Environmental Defense of Araucária

Nature: Environmental

Claim for indemnification for moral and property damages to the environment.

Plaintiff: Federal Public Attorney's Office and Public Attorney's Office of the State of Paraná

Nature: Environmental

Claim for indemnification for moral and financial damages and environmental restoration.

In 2001, the Araucária - Paranaguá oil pipeline ruptured as a result of an earthquake, causing a spill of approximately 15,059 gallons of fuel oil into a number of rivers in the State of Paraná. At that time, services to clean the river surfaces were performed, recovering approximately 13,738 gallons of oil. As a result of the accident the following suit was filed against the Company:

Plaintiff: Paraná Environmental Institute (IAP)

Nature: Environmental

Fine applied for alleged environmental damages.

No decision handed down in the lower court. It is awaiting the start of the expert investigation to quantify the amount.

Maximum updated exposure: R\$ 145,308 thousand

The court determined that this suit and the suit brought by the Paraná Environmental Institute (IAP) are heard together.

No decision handed down in the lower court.

Maximum updated exposure: R\$ 5,528,461 thousand

Appeal by Petrobras dismissed at the 2nd administrative level. As it understands that the statute has run on the administrative fine, an annulment action was filed as a result of having received a "notice of federal debts payable", dated October 22, 2009.

Maximum updated exposure: R\$ 150,003 thousand

The court determined that this suit and the suit brought by AMAR are heard together.

On March 20, 2001, platform P-36 sank in the Campos Basin. As a result of the accident the following suit was filed against the Company:

Plaintiff: Federal Public Attorney s Office - Rio de Janeiro

Nature: Civil

Indemnification for environmental damages - P-36.

As published on May 23, 2007 the claim was considered partially to have grounds and Petrobras was ordered to pay damages in the amount of R\$ 100,000 thousand, for the damage caused to the environment, to be restated monthly with 1% interest on arrears as from the date on which the event occurred. Petrobras filed a civil appeal against this decision which is awaiting a hearing.

Maximum updated exposure: R\$ 282,952 thousand

Page: 103

27.3 Positive contingencies

27.3.1 Recovery of PIS and COFINS

Petrobras and its subsidiaries Gaspetro, Transpetro and Refap filed a civil suit against the Federal government before the judiciary of Rio de Janeiro, referring to recovery, through offsetting, of the amounts paid as PIS on financial revenue and exchange gains in the period between February 1999 and November 2002 and COFINS between February 1999 and January 2004, in light of the ruling that paragraph 1 of article 3 of Law 9.718/98 is unconstitutional.

On November 9, 2005, the Federal Supreme Court considered that the aforementioned paragraph 1 of article 3 of Law 9.718/98 is unconstitutional. On January 9, 2006, in view of the final decision by the Federal Supreme Court, Petrobras filed a new suit aiming at recovering the COFINS related to the period from January 2003 to January 2004.

At September 30, 2010, the amounts of R\$ 2,276,289 thousand for Petrobras, R\$ 73,962 thousand for Gaspetro, R\$ 28,292 thousand for Transpetro and R\$ 13,718 thousand for Refap, with respect to the aforementioned suits, are not reflected in the financial statements due to the absence of a definitive favorable decision.

27.3.2 Litigations abroad

a) In the United States - P-19 and P-31

On July 25, 2002, Braspetro Oil Service Company (Brasoil) and Petrobras won related lawsuits filed with the US lower courts by the insurance companies United States Fidelity & Guaranty Company and American Home Assurance Company in which they were trying to obtain, since 1997, with respect to the first company (Brasoil), a legal declaration that exempted them from the obligation of paying the performance bond of platforms P-19 and P-31, and, with respect to the second company (Petrobras), they were seeking reimbursement of any quantities for which they might happen to be condemned in the execution proceedings of the performance Bond.

A court decision by the Federal Court of the Southern District of New York recognized the right of Brasoil and Petrobras to receive indemnity for losses and damages in the amount of US\$ 237 million, plus interest and reimbursement of legal expenses on the date of effective receipt related to the performance bond, totaling

approximately US\$ 370 million.

The insurance companies filed an appeal against this decision before the Court of Appeals for the Second Circuit. On May 20, 2004 the Court handed down a decision that partially confirmed the sentence with respect to the responsibility of the insurance companies for payment of the performance bonds. However, it removed the obligation of the insurance companies with respect to payment of the fine, legal fees and costs, thus reducing the amount of the indemnity to US\$ 245 million. The insurance companies appealed against these decisions in the Full Court, which was not accepted, and the judgment above remains definitive.

In April 2005 the parties (the insurance companies and Brasoil) initiated negotiation procedures aimed at the effective settlement of Brasoil's credit, seeking the signing of a heads of agreement, the operationalization of which, however, resulted in new doubts and questions to be remedied in court. On July 21, 2006, the US Court handed down an executive decision, defining the points of difference, such as interest due, however, conditioning the payment of the amounts owed to Brasoil to the permanent closing of legal proceedings involving identical claims in progress before the Brazilian courts, which the parties proceeded to do.

b) In London - P-36

Through a decision handed down on February 2, 2004, Petromec Inc (Petromec) and Marítima Petróleo e Engenharia Ltda. (Marítima) were sentenced to reimburse Brasoil the amount of US\$ 58 million, plus interest, for the loan made by Brasoil to Petromec through a Deed of Payment and Indemnity, dated May 21, 1999 and guaranteed by Marítima in accordance with the Keepwell Agreement dated May 21, 1999. The payment of these amounts is halted until pending questions are decided.

In the current stage of the litigation, Petromec is upholding its request for additional costs for the upgrade based on the Supervision Agreement, dated June 20, 1997.

A preliminary hearing related to the method by which the eventual right of Petromec occurred took place on June 26 and 27, 2007. On June 6, 2007, the Court handed down a decision, upholding the methodology defended by Petrobras and Brasoil. Petromec appealed against this decision and the Appeals Court considered this appeal on November 27, 2007. On December 21, 2007 the Court of Appeals substantially rejected Petromec's appeal.

Petromec filed its Particulars of Claim on September 29, 2008, where it claimed the amount of US\$ 154 million, plus interest. Brasoil and Petrobras presented their defense on January 29, 2010.

The preliminary hearing of Petromec's claim is forecast to start on May 9, 2011. The final results of the litigation remain uncertain.

P-38 and P-40

After the hearing of the litigation related to P-38 and P-40, which took place in London during April and May 2007, the English Court handed down a decision on June 12, 2007 in favor of Brasoil in the following terms:

- 1) With respect to the litigation for P-38, a sentence for payment of the amount of US\$ 83 million with respect to the principal, plus interest in the amount of US\$ 31 million, and costs to be calculated; and
- 2) With respect to the litigation for P-40, a sentence for payment of the amount of US\$ 171 million with respect to the principal, plus interest in the amount of US\$ 66 million, and costs to be calculated.

The total amount awarded, excluding costs, in favor of Brasoil, is approximately 98.5% (in the case of P-38) and 96.4% (in the case of P-40) of the full amount of the sums claimed by Brasoil in the hearing.

In addition to the granting of the costs in favor of Brasoil, established in the decision of June 12, 2007, as mentioned above, a new decision was petitioned with respect to these costs. This decision was granted in the amount of £ 5 million. In a subsequent audience an additional decision in the amount of £ 1 million was granted.

c) Other litigation for indemnification

In the building/conversion of ships into Floating Production, Storage and Offloading (FPSO) and Floating, Storage and Offloading (FSO) vessels, Brasoil transferred financial resources in the amount of US\$ 640 million, equivalent to R\$ 1,083,892 thousand at September 30, 2010 (R\$ 1,102,929 thousand at December 31, 2009) directly to its suppliers and subcontractors, with the aim of avoiding delays in the building/conversion of vessels and, consequently, losses to Brasoil.

Based on the opinions of Brasoil's legal advisers, these expenditures are liable for reimbursement by the builders, which is the reason why litigations for financial indemnification were filed in international courts. However, conservatively, the portion of this balance not covered by real guarantees, in the amount of US\$ 568 million, equivalent to R\$ 961,839 thousand at September 30, 2010 (R\$ 977,490 thousand at December 31, 2009) is recorded as an allowance for doubtful accounts.

28 Commitments assumed by the energy segment

Commitments for purchase of natural gas

Petrobras entered into an agreement with Yacimientos Petrolíferos Fiscales Bolivianos (YPFB) to purchase a total of 201.9 billion m³ of natural gas during the term of the agreement, undertaking to purchase minimum annual volumes at a price calculated according to a formula indexed to the price of fuel oil. The agreement is valid until 2019 and will be renewed until the total contracted volume has been consumed.

In the period between 2002 and 2005, Petrobras bought less than the minimum volume established in the agreement with YPFB and paid US\$ 81,409 (equivalent to R\$ 137,858 thousand at September 30, 2010) referring to the volumes not transported, the credits for which will be realized through the drawing of future volumes.

The commitments for purchase of gas up to the end of the agreement represent volumes of 24 million cubic meters per day.

In the fourth quarter of 2009 Petrobras and YPFB signed a contractual addendum which regulates the payment of additional amounts to YPFB referring to the quantity of liquids (heavy hydrocarbons) present in the natural gas imported by Petrobras from YPFB through a Gas Supply Agreement (GSA). The addendum establishes additional amounts between US\$ 100 million and US\$ 180 million per year, applied to the volumes of gas delivered as from May 2007. With respect to 2007, the obligation for additional payment by Petrobras was recorded as a provision in 2009 and settled in February 2010. The payment of the amounts referring to subsequent years will only be due after compliance with a condition precedent established in the addendum, which will demand additional negotiations with YPFB.

29 Guarantees for concession agreements for petroleum exploration

Petrobras gave guarantees to the National Petroleum Agency (ANP) in the total amount of R\$ 4,656,670 thousand for the Minimum Exploration Programs established in the concession agreements for exploration areas, with R\$ 4,059,103 thousand, net of commitments already undertaken, remaining in force. Of this amount, R\$ 2,923,036 thousand corresponds to a lien on the oil from previously identified fields already in production, and R\$ 1,136,067 thousand refers to bank guarantees.

30 Segment reporting

Petrobras is an operationally integrated company and the major part of the production of petroleum and gas from the Exploration and Production Department is transferred to other business departments of Petrobras.

The information per business area (operating segment) is being presented pursuant to CPC 22 – Segment reporting (IFRS-8). In the statements by business segment, the Company's operations are presented according to the organization and management model approved on October 23, 2000 by the Board of Directors of Petrobras, comprising the following departments:

a) Exploration and Production: This comprises the activities of exploration, production development and production of oil, LNG (liquefied natural gas) and natural gas in Brazil, for the purpose of supplying, as a priority, refineries in Brazil and also selling on the domestic and foreign markets the surplus petroleum and byproducts produced in their natural gas processing plants.

b) Supply: This comprises the refining, logistics, transport and trading activities of oil and oil products, exporting of ethanol, extraction and processing of schist, as well as holding interests in companies of the petrochemical sector in Brazil.

c) Gas and Energy: It comprises the activities of transport and trading of natural gas produced in Brazil or imported, transport and trading of LNG, generation and trading of electric power, as well as corporate interests in transporters and distributors of natural gas and in thermoelectric power stations in Brazil, in addition to being responsible for the fertilizer business (migration of the fertilizer business from the Supply department to Gas and Energy, pursuant to a decision of the Board of Directors on September 21, 2009).

d) Distribution: It is responsible for the distribution of oil products, ethanol and compressed natural gas in Brazil, represented by the operations of Petrobras Distribuidora.

e) International: It comprises the activities for exploration and production of oil and gas, supply, gas and energy, and distribution, carried out abroad in a number of countries in the Americas, Africa, Europe and Asia.

The items that cannot be attributed to the other departments, notably those linked to corporate financial management, the overheads related to central administration and other expenses, including actuarial expenses related to the pension and healthcare plans for retired employees and pensioners, are allocated in the corporate agencies group. Businesses dealing with biofuels, represented mainly by the operations of Petrobras Biocombustível are also included in this group.

The accounting information per business segment was prepared based on the assumption of controllability, for the purpose of attributing to the business sectors only those items over which these segments have effective control.

In the computation of the results by business segment, transactions carried out with third parties and the transfers between the business segments are considered and they are valued by internal transfer prices defined between the segments using calculation methodologies based on market parameters.

31 Derivative financial instruments, hedge and risk management activities

The company is exposed to a series of market risks arising from its operations. These risks mainly involve the fact that eventual variations in the prices of oil and oil products, in exchange rates or in interest rates may negatively affect the value of the company's financial assets and liabilities or future cash flows and profits.

31.1 Risk management objectives and strategies

Petrobras' risk management is conducted by its officers, following a corporate risk management policy. In March 2010, in compliance with the new corporate governance model developed by the Company, the Financial Integration Committee was established by the Executive Board, replacing the Risk Management Committee. The Committee is sponsored by the Financial Board and is composed of all the executive managers of the financial department and the executive managers of the business departments are convened for discussions on specific themes. One of the responsibilities of the Financial Committee is to evaluate exposures to risks and to establish guidelines for measuring, monitoring and managing the risk related to the activities of Petrobras and it is the Executive Board's responsibility to decide on the themes.

The risk management policy of the Petrobras System aims at contributing towards an appropriate balance between its objectives for growth and return and its level of risk exposure, whether inherent to the exercise of its activities or arising from the context within which it operates, so that, through effective allocation of its physical, financial and human resources the company may attain its strategic goals.

The Company adopts a philosophy of integrated risk management, according to which the focus of management is not on individual risks—the operations or the business units—but on the broader, consolidated perspective of the corporation, making use of possible natural hedges. For the management of market/financial risks, structural actions, created as a result of appropriate management of the company's capital and indebtedness, are adopted as a preference in detriment to the use of derivative instruments.

In addition to assuring adequate protection for its fixed assets, facilities, operations and officers and orientating financial, tax, regulatory, market and loan exposure evaluations, amongst others, the Petrobras risk management policy seeks to make explicit its character of complementariness to its structural actions, which will create solid economic and financial grounds, capable of assuring that the opportunities for growth will be taken advantage of, even in adverse external circumstances.

31.2 Risk of change in the prices of oil and oil products

a) Risk management of prices of oil and oil products

Petrobras maintains, as a preference, exposure to the price cycle, not using derivatives for hedging systematic operations (purchase or sale of commodities with the aim of attending the operational requirements of the Petrobras System).

Nevertheless, the decisions referring to this issue are reviewed periodically and recommended to the Financial Integration Committee. If hedge is indicated, in scenarios with a significant probability of adverse events, the hedge strategy should be carried out with the aim of protecting the Company's solvency and liquidity, considering an integrated analysis of all the Company's risk exposures and assuring the execution of the corporate investment plan.

Following the assumption of considering only the consolidated net exposure of the price risk of oil and oil products, the operations with derivatives, generally, are limited to protecting the results of transactions carried out on the international market for physical goods, i.e. they are hedge operations where the gains and losses are totally or partially offset by the opposite result in the physical position.

b) Main transactions and future commitments hedged by derivative operations

The main operations with derivative financial instruments carried out by the companies of the Petrobras System are intended to hedge the expected results of the transactions performed abroad.

Accordingly, the operations with derivative instruments are usually short-term operations and accompany the terms of the commercial transactions. The instruments used are futures, forward, swap and options contracts. The operations are carried out on the New York Mercantile Exchange (NYMEX) and the Intercontinental Exchange (ICE), as well as on the international over-the-counter market.

The hedges settled during the period from January to September 2010 corresponded to approximately 68.10% of the traded volume of imports and exports to and from Brazil plus the total volume of the cargos traded abroad.

The main counterparties of operations for derivatives for oil and oil products are the New York Stock Exchange (NYMEX), the Intercontinental Exchange, BNP Paribas, Shell (Stasco) and Morgan Stanley.

c) Parameters used for risk management

The main parameters used in risk management for changes in the prices of Petrobras oil and oil products are the operating cash flow at risk (CFAR) for medium-term assessments, and Value at Risk (VAR) and Stop Loss for short-term assessments. Corporate limits are defined for VAR and Stop Loss.

At September 30, 2010, the portfolio for commercial operations carried out abroad, as well as the hedges for their protection through derivatives for oil and oil products, presented a maximum estimated loss per day (VAR Value at Risk), calculated at a reliability level of 95%, of approximately US\$ 46,025 thousand.

d) Notional and fair value of the derivative instruments

The following table summarizes the information on the derivative contracts in force for oil and oil products.

	Notional value in		Consolidated		Maturity
	thousands of bbl*		Fair value recorded		
	09.30.2010	12.31.2009	09.30.2010	12.31.2009

e) Gains and losses in the period

Derivatives for oil and oil products	R\$ thousand			
	Consolidated		Parent company	
	Jan-Sep/2010	Jan-Sep/2009	Jan-Sep/2010	Jan-Sep/2009
Gain (loss) recorded in results	34,899	(203,311)	(562)	154,044

f) Value and type of margins given in guarantee

The guarantees given as collateral generally consist of deposits.

The following table presents the balance of the margins given for coverage of the commodities transactions traded on the stock exchanges and the over-the-counter market of the Parent Company and Consolidated.

		R\$ thousand			
Consolidated				Parent company	
09.30.2010	12.31.2009	09.30.2010	12.31.2009	09.30.2010	12.31.2009
361,966	243,407	154,393		120,212	

g) Sensitivity analysis

The following sensitivity analysis was conducted for the fair value of the derivatives of oil and oil products. The probable scenario is the fair value at September 30, 2010. The possible and remote scenarios consider a deterioration of the prices in the risk variable of 25% and 50%, respectively, with respect to the same date.

Market derivatives for oil and oil products	Risk	R\$ thousand		
		Probable scenario at 09.30.2010	Possible Scenario (Δ de 25%)	Remote Scenario (Δ de 50%)
Brent	High in Brent Oil	15,359	(119,891)	(239,782)
Freight	High in freight	126	(777)	(1,554)
Gasoline	High of Gasoline	(12,011)	(38,149)	(76,299)

Propane	High of Propane	2,102	(7,221)	(14,442)
WTI	High of WTI	2,126	(328,604)	(830,584)
Diesel	High of Diesel	(33,971)	(177,458)	(354,916)
Butano	Fall in Butano	1,084	(6,791)	(13,582)
Etanol	Fall of Etanol	7	(4,839)	(9,678)

h) Embedded derivatives

The procedures for identifying derivative instruments in contracts aim at timely recognition, control and adequate accounting handling to be employed, and are applicable to the units of Petrobras and its subsidiaries.

The contracts with possible clauses for derivative instruments or securities to be realized are communicated before they are signed, so that there is orientation with respect to the eventual performance of effectivity tests, the establishment of the accounting policy to be adopted and the methodology for calculation of the fair value.

The Embedded derivatives identified in the quarter were:

Sale of Imported Petroleum

Sales agreements for imported petroleum entered into between Petrobras Singapore Private Limited (PSPL), a subsidiary of Petrobras International Finance Company (PIFCo), and Refinaria de Petróleo Riograndense S.A., a jointly controlled subsidiary of Petrobras, consolidated in proportion to its interests in the capital (33,20%).

The transaction consists of sale of petroleum, whose main characteristics reside in the fact that the prices to be paid on a future date are fixed at the time of the signing of the contracts, in contrast to other transactions of the same nature where the settlement prices are observed on the dates of delivery of the products, which incontestably defines the

existence of a short position for a petroleum futures contract.

	Notional value in thousands of bbl*	Fair value R\$ thousand	VAR thousand	R\$	Maturity
<u>Forward contract</u>					
Short position	840	1,473		2,630	2010/2011

31.3 Exchange risk

Exchange risk is one of the financial risks that the company is exposed to and it originates from changes in the levels or volatility of the exchange rate.

Fluctuations in exchange rates may have a negative effect on Petrobras' financial situation and operating results, since the majority of the Company's revenues are in reais while the major part of its liabilities are in foreign currency.

a) Management of exchange risks

With respect to the management of exchange risks, Petrobras seeks to identify and address them in an integrated manner, seeking to assure efficient allocation of the resources earmarked for the hedge.

Taking advantage of operating in an integrated manner in the energy segment, the company seeks, primarily, to identify or create natural hedges, i.e. to benefit from the correlation between its income and expenses. In the specific case of exchange variation inherent to contracts where the cost and remuneration involve different currencies, this hedge is provided through allocating the cash investments between the real and the US dollar or another currency.

The risk management is performed for the net exposure. Periodic analyses of the exchange risk are prepared, assisting the decisions of the executive committee. The exchange risk management strategy may involve the use of derivative instruments to minimize the exchange exposure of certain obligations of the Company.

b) Main transactions and future commitments protected by operations with derivatives

Petrobras International Finance Company (PIFCo)

In September 2006, the Company, through its subsidiary PifCo, contracted a hedge known as a cross currency swap for coverage of the bonds issued in Yens in order to fix the company's costs in this transaction in US dollars. In a cross currency swap there is an exchange of interest rates in different currencies. The exchange rate of the Yen for the US dollar is fixed at the beginning of the transaction and remains fixed during its existence. The Company does not intend to settle these contracts before the end of the term. For this relationship between the derivative and the loan, the Company adopted hedge accounting.

Petrobras Distribuidora

Petrobras Distribuidora is in a short position in exchange futures rates through NDFs (a currency forward contract without physical delivery) on the Brazilian over-the-counter market. For the aviation segment, which represents 100% of the operations contracted for the period, the term of exposure is three months on average and the hedge is contracted concomitantly with the definition of the cost of the exported aviation kerosene, thus fixing and assuring the trading margin. In the period in question operations were contracted in the amount of US\$ 236 million.

Usina Termelétrica Norte Fluminense (UTE Norte Fluminense)

The Company, aiming at assuring that significant fluctuations in the quotation of the US dollar do not affect its results and cash flows, contracted hedge in the nominal amount of US\$ 22 million, representing 50% of its total indebtedness in foreign currency.

It is important to point out that UTE Norte Fluminense is managed jointly, consolidated by Petrobras in proportion to its capital interest (10%).

Refinaria de Petróleo Riograndense S.A.

The refinery has outstanding positions in NDF instruments (a currency forward contract without physical delivery) for the acquisition of imported petroleum in the notional amount of US\$ 118,600 thousand and for hedging of financing in foreign currency in the notional amount of US\$ 29,619 thousand.

c) Results obtained with respect to the proposed objectives and parameters used for risk management

Petrobras International Finance Company (PIFCo)

The hedge known as a cross currency swap complies with CVM Resolution 604/09 which approved CPC 38 - Financial Instruments: Recognition and Valuation and CPC 39 - Financial Instruments Presentation.

The Company decided to qualify its cash flow cross currency hedging. Upon the contracting of hedge and during its term, it is expected that the cash flow hedge will be highly effective in offsetting the cash flows attributable to the hedge risk during the term of the operation. The changes in the fair value, in the measure of the effectiveness of the hedge, tested quarterly, are stated in other comprehensive retained earnings, until the cash flow of the hedged item is realized.

Petrobras Distribuidora

Petrobras Distribuidora is in a short position in exchange futures rates through NDFs on the Brazilian over-the-counter market. The hedge is contracted concomitantly with the definition of the cost of the exported products, thus fixing and guaranteeing the trading margin. The Company's policy is to hedge up to a maximum of 100% of the volume exported.

The volume of hedge contracted for international billing between January and September 2010 represented 54.87% of all the volume exported by Petrobras Distribuidora in the year. The settlements of all the operations that matured between January 1 and September 30, 2010 generated a positive result for the Company of R\$ 8.278 million.

Ipiranga Asfaltos S.A. (a subsidiary of BR Distribuidora) contracted NDFs in the short position in dollars to guarantee revenues in Reais from foreign clients with credit cards. Between January and September 2010 operations were contracted in a total amount of US\$ 2.537 million. In the same period, the settlements that occurred generated a positive result of R\$ 409 thousand.

d) Notional and fair value of the derivative instruments

The table below summarizes the information on the derivative contracts in force. The derivative transactions take into consideration the approved limits and credit balance for each institution in accordance with the regulatory orientations and procedures established by the Company.

Foreign currency derivatives

	Notional value		Consolidated		Maturity	Value at Risk R\$ *
	in \$ thousand		Fair value			
	09.30.2010	12.31.2009	R\$ **

(*) Value at Risk = maximum expected loss in one-day with 95% reliability under normal market conditions.

(**) Negative fair values were recorded in liabilities and positive fair values in assets.

Main counterparties of the operation: Citibank, HSBC and Bradesco.

The table below presents how gains or losses from derivative instruments were recognized and whether there were reclassifications of other comprehensive results to the results for the period.

e) Gains and losses in the year

Foreign currency derivatives	R\$ thousand			
	Consolidated		Parent company	
	Jan-Sep/2010	Jan-Sep/2009	Jan-Sep/2010	Jan-Sep/2009
Gain (loss) recorded in results	7,265	23,421		
Gain (loss) recorded in shareholders' equity	(27,485)	(22,736)		

f) Value and type of margins given in guarantee

The existing foreign currency derivative operations do not require a guarantee margin deposit.

g) Sensitivity analysis

The following sensitivity analysis was conducted for the fair value of the foreign currency derivatives, loans and financial investments in foreign currency. The probable scenario is the fair value at September 30, 2010. The possible and remote scenarios consider a deterioration in the risk variable of 25% and 50%, respectively, with respect to the same date.

Foreign currency derivatives	Risk	Probable scenario at 09.30.2010	R\$ thousand	
			Consolidated Possible Scenario (Δ of 25%)	Remote Scenario (Δ of 50%)
Dollar forward contracts	Appreciation of the dollar against the real	(7,029)	(1,674)	(3,348)
Dollar forward contracts	Appreciation of the dollar against the real	2,156	(6,664)	(15,483)
Cross Currency Swap	Depreciation of the yen against the dollar	158,753	3,671	(99,716)

Foreign currency debt *	Risk	Probable scenario at 09.30.2010	R\$ thousand	
			Consolidated Possible Scenario (Δ of 25%)	Remote Scenario (Δ of 50%)
Real ¹	Appreciation of the dollar against the real	25,169,454	6,292,364	12,584,727
Dollar	Appreciation of the dollar against the real	48,100,820	12,025,205	24,050,410
Euro	Appreciation of the euro against the real	225,280	56,320	112,640
Yen	Appreciation of the yen against the real	2,733,770	683,443	1,366,885
		76,229,324	19,057,332	38,114,662

Financial investment*	Risk	Probable scenario at 09.30.2010	R\$ thousand	
			Consolidated Possible Scenario (Δ of 25%)	Remote Scenario (Δ of 50%)
In foreign currency:	Appreciation of the real against the dollar	18,915,389	(4,728,847)	(9,457,695)
		18,915,389	(4,728,847)	(9,457,695)

		Probable scenario	Possible Scenario	Remote Scenario
Financial investment (derivative)*	Risk	at 09.30.2010	(Δ de 25%)	(Δ de 50%)
	Appreciation of the real against the dollar			
Future dollar long position		(2,717)	(95,003)	(190,005)
		(2,717)	(95,003)	(190,005)

(*) The isolated sensitivity analysis of the financial instruments does not represent the Company's net exposure to exchange risk. Considering the balance between liabilities, assets, revenues and future commitments in foreign currency, the economic impact of possible exchange variations is not considered material.

31.4 Interest rate risk

The interest rate risk that the Company is exposed to is due to its long-term debt and, to a lesser degree, its short-term debt. If the market interest rates (particularly LIBOR) rise, the Company's financial expenses will increase which may cause a negative impact on the operating results and financial position. The foreign currency debt at floating rates is subject, mainly, to the fluctuation of the Libor and the debt at floating rates expressed in reais is subject, mainly, to the fluctuation in the long-term interest rate (TJLP), published by the Central Bank of Brazil.

Management of interest rate risks

Currently, the Company does not use derivative financial instruments to manage its exposure to fluctuations in interest rates.

31.5 Credit risk

Petrobras is exposed to the credit risk of clients and financial institutions, resulting from its commercial operations and its cash management. These risks consist of the possibility of non-receipt of sales made and amounts invested, deposited or guaranteed by financial institutions.

Credit risk management objectives and strategies

The management of the credit risk in Petrobras is part of the management of the financial risks, which is performed by the Company's officers, following a corporate risk management policy. The Credit Commissions, which were established due to a decision by the Executive Board, are each composed of three members and chaired by the Executive Manager for Financial Planning and Risk Management and the other members are the Executive Manager for Finances and the Executive Manager for the commercial department in contact with the client or with the financial institution.

The purpose of the Credit Commissions is to analyze questions connected with credit management, not only with respect to granting credit but also with respect to its management; to encourage integration between the units that compose them; and to identify the recommendations to be applied in the units involved or to be submitted to the appreciation of higher instances.

The credit risk management policy is part of the overall risk management policy of the Petrobras System and aims at reconciling the need for minimizing exposure to credit risk and maximizing the result of sales and financial operations, through an efficient process of analysis, concession and management of the credits.

Petrobras only grants credit from commercial interest and solely for the acquisition of its products.

Parameters used for credit risk management

In its management of credit risks, Petrobras uses quantitative and qualitative parameters that are appropriate for each one of the market segments in which it operates.

The Company's commercial credit portfolio, which surpasses US\$ 36 billion, is very diversified and the credits granted are divided in an egalitarian manner between clients of the Brazilian domestic market and foreign markets.

Amongst the main clients there are large companies of the petroleum market, considered major companies, and the subsidiaries of the Petrobras System, beneficiaries of around 35% and 42%, respectively, of the total credit granted.

Financial institutions are beneficiaries of approximately US\$ 38 billion, distributed between the main international banks, considered by international risk classifiers as Investment Grade, and the most important Brazilian banks.

Guarantees used in credit risk management

Credit sales to clients considered as high risk are only made through receipt of guarantees. For this, the Company accepts credit cards issued abroad, bank guarantees issued in Brazil, mortgages and collateral.

For clients considered as medium risk, guarantees and endorsements of the partners of the companies, both individuals and legal entities, are also accepted.

Only guarantees issued by financial institutions that have available credit, established in accordance with the parameters adopted by the Company, are accepted.

The table below presents the maximum exposure to credit risk for the third quarter.

	R\$ thousand
Guarantees	2,679,264
Derivatives	11,129
Financial investments	22,571,276

31.6 Liquidity risk

Petrobras uses its funds mainly for capital expenses, payment of dividends and debt refinancing. Historically, the conditions are met with funds generated internally, short and long-term debts, project financing, sales transactions and leasing. These sources of funds, allied to the Company's strong financial position, will continue to permit compliance with the established capital requirements.

Liquidity risk management

The liquidity risk management policy adopted by the Company predicts the continuity of the rescheduling of the debt profile, appropriate to the investment cycle; raising of capital through various means and through medium and long-term financing agreements, including the issuing of bonuses on the international capital markets, financing of suppliers, project financing and bank financing.

Government regulation

In addition, the Ministry of Planning, Budgeting and Management controls the total amount of debts that Petrobras and its subsidiaries may incur, during the approval process of the annual budget. The Company and its subsidiaries must also obtain the approval of the National Treasury before assuming medium and long term debts. Loans that exceed the budgeted amounts for each year must be approved by the Federal Senate.

31.7 Financial investments (Operations with derivatives)

Petrobras has financial investments represented by quotas of exclusive funds, with part of the proceeds invested in operations with derivatives (US dollar futures contracts and interbank deposits) guaranteed by the Futures and Commodities Exchange (BM&F).

The following table presents the market value of the operations with derivatives held in the exclusive investment funds as of September 30, 2010.

Contract	Quantity	R\$ Thousand		Maturity
		Market value (Nocional)	Fair value	
<u>DI forward</u>	(17,429)	(2,399,761)	1,059	2010 a 2012
Long position	111,712	10,282,130	(325)	
Short position	(129,141)	(12,681,891)	1,384	
<u>Dollar forward</u>	5,536	453,793	(3,276)	2010
Long position	6,334	538,334	(3,487)	
Short position	(998)	(84,541)	211	
<u>Euro forward</u>	(113)	(13,108)	74	2010
Short position	(113)	(13,108)	74	

32 Fair value of financial assets and liabilities

Fair values are determined based on market price quotations, when available, or, in the absence thereof, on the present value of expected cash flows. The fair values of cash and cash equivalents, trade accounts receivable, short term debt and accounts payable to suppliers are the same as their carrying values. The fair values of the long-term assets and liabilities closely approximates their carrying values.

The estimated fair value for long-term loans of the Parent Company and Consolidated at September 30, 2010 were, respectively, R\$ 30,212,324 thousand and R\$ 94,000,575 thousand, calculated at the prevailing market rates, considering natures, terms and risks similar to the registered contracts, and they may be compared to the carrying values of R\$ 29,244,949 thousand and R\$ 91,974,017 thousand.

The hierarchy of the fair values of the Company's financial assets and liabilities, recorded at fair value on a recurring basis, at September 30, 2010, is presented as follows:

	R\$ thousand			Total
	Consolidated			
	Fair value measured based on			
	Prices quoted on active market (Level 1)	Valuation technique supported by observable prices (Level 2)	Valuation technique without use of observable prices (Level 3)	
Assets				
Marketable securities	16,165,424			16,165,424
Foreign currency derivatives		160,910		160,910
Commodity derivatives	47,563	19,738		67,301
Total assets	16,212,987	180,648		16,393,635
Liabilities				

Fair values are determined based on market price quotations, when available, or, in the absence thereof, the present value of expected cash flows.

Edgar Filing: PETROBRAS - PETROLEO BRASILEIRO SA - Form 6-K

Commodity derivatives	(118,552)	(16,303)	(134,855)
Total liabilities	(118,552)	(23,332)	(141,884)

33 Security, environment and health

In the first nine months of 2010, Petrobras's main security, environment and health indexes were compatible with the best companies in the sector worldwide and in the period it did not register any significant occurrence of oil spillage affecting the environment.

Petrobras continually invests in training and development of new technologies aimed at accident prevention and the safety and health of its employees, which have been successively recognized both within and outside Brazil.

As a consequence, in September 2010, for the fifth consecutive year Petrobras remained in the select group of companies that compose the Dow Jones Sustainability Index (DJSI) and it is the only Latin American company from the petroleum and gas sector present in this index.

According to the institution, Petrobras continued to hold a position of prominence in the requirements of transparency, risk and crisis management, client relationship management, management of social impacts on communities, as well as with respect to its environmental management policy and system.

In the period from January to September 2010, the Company's total expenditure on security, environment and health (SMS), considering investments and operations, reached the amount of R\$ 3,282,019 thousand, of which R\$ 1,465,489 thousand was spent on security, R\$ 1,565,321 thousand was spent on the environment and R\$ 251,208 thousand was spent on health, where the expenses with multidisciplinary health assistance (AMS) and support for outside environmental programs and/or projects are not included.

This total included the expenditures made through PEGASO (Program for Excellence in Environmental Management and Operating Security), which, between investments and operations, totaled R\$ 364,538 thousand in the period.

				Market Value			

(1) Before financial income and expenses and equity accounting.

The main factors that contributed to the 9% increase in net income for the period from January to September 2010 compared to the period from January to September 2009 were:

- 17% increase in net operating income as a result of:
 - ü Increase in the average prices of petroleum exports, due to the higher international quotations for oil, reflecting the improvement in the worldwide economic scenario, especially in the North American economy, as well as the greater volume exported.
 - ü Increase in the volumes sold on the domestic market, especially diesel, due to the recovery of industrial activity and investments in the infrastructure, and gasoline, reflecting the expressive growth in the fleet of flex fuel vehicles, allied to the shortage of alcohol on the market at the beginning of 2010.
- A 28% increase in the costs of goods sold, reflecting the effect of the higher international quotations on the expenditures with government holdings and with the importing of oil products. The greater participation of imported oil products, especially diesel and aviation kerosene, as well as the need to import gasoline also had an influence.

- Increase in the following expenditures:

Ø Sales (R\$ 742 million), due to the expenditures with pipeline transport of products and upkeep and repairs for equipment by Transpetro (R\$ 386 million), and an increase in the expenditures for storage and transport of natural gas in the pipelines belonging to the companies of the system, especially for the Malhas Consortium and TBG (R\$ 142 million). There was also an increase in the allowance for doubtful accounts (R\$ 125 million), in addition to expenditures for storage of LNG in regasifier ships that entered into operation at the end of 2009 (R\$ 225 million);

Ø General and Administrative (R\$ 193 million), an effect of the greater expenditures with personnel (R\$ 197 million) as a result of the increase in the workforce and the wage adjustment referring collective labor agreement for 2010/2011;

Ø Research and development (R\$ 130 million), as a consequence of the increase in the expenditures with machinery for catalytic conversion of natural gas in synthetic oil (Floating GTL Project - R\$ 72 million) and in the provision earmarked for contracting projects of institutions accredited by ANP (R\$ 51 million), due to the rise in the prices of petroleum and a consequent increase in gross revenue;

Surpassing the decrease in the following expenses:

Ø Other operating expenses (R\$ 147 million), due to:

Losses and contingencies with judicial proceedings	(824)*
Incentives to employees for purchase of Petrobras shares	85
Environmental expenditures with revitalization of areas	108
Institutional relations and cultural projects	117
Collective labor agreement	187
Income tax incentive on working profit	202
Others	(22)
	(147)

* In 2010 it includes the recording of provisions, particularly: Triunfo Agro Industrial IPI credit premium (R\$ 459 million), ICMS-RJ on platform P-36 (R\$ 449 million), I.V.I. Sade Vigesa Consortium (R\$ 215 million) and a difference in the calculation base of the special interest in the Barracuda and Caratinga fields (R\$ 83 million). In 2009, it includes differences in the calculation base of the special interest in the Marlim field (R\$ 2,048 million).

- Positive effect of R\$ 5,242 million in the financial results, basically on account of the decrease in the expenses with exchange variation, as a result of the 2.7% devaluation in 2010 of the rate for the US dollar on net assets. In 2009, there was a 23.9% devaluation in the rate for the US dollar.

- Decrease of R\$ 1,850 million in the equity earnings of subsidiaries, mainly due to the lower results presented by Downstream, Petroquisa and Gaspetro.

Economic indexes

In the period from January to September 2010 the business conducted by Petrobras presented a profit of R\$ 34.4 billion before financial results, results originating from corporate interests, taxes, depreciation and amortization (EBITDA), with an increase of R\$ 1.3 billion compared to the period from January to September 2009.

	3rd Quarter			Jan-Sep	
2Q - 2010					
39	37	42	Gross Margin (%)	39	44
24	20	21	Operating Margin (%)	23	26
21	21	22	Net Margin (%)	21	23
12,029	11,041	10,017	EBITDA R\$ million	34,447	33,062

The gross margin decreased 5 percentage points compared to the same period of the previous year, due to the realization of higher average unit costs, an effect of the higher international quotations on the expenses with government holdings and with the importing of oil products.

The operating margin decreased 3 percentage points compared to the same period of the previous year on account of the lower gross margin, compensated by the percentage decrease in operating expenses.

The net margin decreased 2 percentage points compared to the period from January to September 2009, due to the decrease in the operating margin and the lower participation in material investments, compensated by the positive effect in the financial results.

12.01 - COMMENTS ON THE CONSOLIDATED PERFORMANCE IN THE QUARTER

RESULTS FOR THE THIRD QUARTER OF 2010.

Rio de Janeiro November 11, 2010 Petrobras announces today its consolidated results expressed in millions of Brazilian Reals, in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). The 2009 information was adjusted for comparison purposes.

Consolidated net income totaled R\$8,566 million in 3Q-2010 and R\$24,588 million in 9M-2010

Main Highlights

	Third Quarter					Jan-Sep		
			3Q10					
2Q-2010			X					
			2Q10					
			(%)					
8,295	8,566	7,940	3	Consolidated Net Income	24,588	22,390	10	
2,587	2,570	2,534	(1)	Total Oil and Natural Gas Production (th. barrel/day)	2,568	2,513	2	
15,927	14,736	14,081	(7)	EBITDA	45,739	45,185	1

Fair values are determined based on market price quotations, when available, or, in the absence thereof, the price

- Net income totaled R\$8,566 million in 3Q-2010, 3% up on the previous quarter, due to higher domestic sales volume and the improved financial result.
- Brazilian oil and natural gas production increased by 2% year-on-year in 9M-2010, reaching a new record level of 53,773,000 m³/day in September.
- The Public Share Offering was concluded, increasing capital by R\$ 120,249 million;
- As a result, the funds generated allowed to execute the Transfer of Rights Agreement (R\$ 74,808 million) and continue with the 2010-2014 Business Plan (R\$ 45,440 million in cash and government securities).
- The capitalization maintained the Company's leverage indices at sustainable levels: net leverage fell from 34% to 16% (considering LFTs treasury bills maturing in more than 90 days).

- Thanks to economic growth and the reduction in reservoir levels, together with increased logistics capacity, gas-powered thermal energy output in September (6,252 average-MW) and natural gas sales in 3Q-2010 (360,000 boed) reached record levels.
- FPSO, *Cidade de Angra dos Reis*, began operations in October, the first definitive production system in the Tupi area, marking the initiation of commercial oil production in the Santos Basin pre-salt area.

III

¹ Operating income before financial result, equity balance and taxes.

² Earnings per share calculated by weighted average of shares outstanding

³ Operating income before financial result, equity balance and depreciation/amortization.

3Q-2010 x 2Q-2010.

- **Net Income** ⁴

In 3Q-2010, net income totaled R\$8,566 million, 3% up on the quarter before, due to higher domestic sales volume and the improved financial result, thanks to gains from the impact of the exchange variation on the net debt, offset by the reduction in international prices, in turn caused by the variation in commodity prices.

The upturn in operating expenses was due to expenses from the financial structuring of the Barracuda project, now concluded, and additional expenses arising from the 2010/2011 collective bargaining agreement and incentives for employees to purchase shares in the Public Offering.

- **EBITDA**

Third-quarter EBITDA came to R\$14,736 million, down by 7% due to the above-mentioned increase in operating expenses.

- **Net Debt /EBITDA Ratio** ⁵

The net debt of the Petrobras System closed the third quarter 39% down on June 30, 2010, reflecting the increase in the cash position following the Public Offering, while average indebtedness, measured by the net debt/EBITDA ratio, fell from 1.52 to 0.94 in the same period.

⁴ For further details, see Appendix 2.

⁵For further details, see page 16.

9M-2010 x 9M-2009.

- **Net Income** 6

Net income totaled R\$24,588 million in the first nine months, 10% up year-on-year, due to higher domestic sales volume, as well as higher export prices and international sales, which more than offset the reduction in domestic diesel and gasoline prices and the upturn in unit costs, chiefly from imports and the government take, which were also affected by international prices.

Selling expenses were pressured by higher sales volume and freight costs, while other operating expenses were pushed up by provisions for impairment losses in the San Lorenzo refinery and the Breitener thermal plant, additional expenses from the 2010/2011 collective bargaining agreement and the reduction in tax benefits.

The record financial result (R\$910 million) was due to the impact of the exchange variation on net liabilities, given that, in 2009, the average balance of assets exposed to the exchange rate was higher than the Company's debt.

Minority interests generated a positive impact of R\$3,088 million, thanks to the effect of the exchange rate variation on SPE debt, the exercise of stock options in certain structured projects and the revision of future receivables flows related to financial leasing operations, both at the end of 2009.

- **EBITDA**

EBITDA moved up by 1% over 9M-2009, reflecting higher domestic sales volume, the increase in international prices, and higher costs and expenses related to commodity prices and sales volume.

⁶ For further details, see Appendix 3

RESULTS BY BUSINESS AREA

Petrobras operates in an integrated manner, with the greater part of oil and gas production in the exploration and production area being transferred to other Company areas.

When reporting results per business area, transactions with third parties and transfers between business areas are valued in accordance with the internal transfer prices established between the various areas and assessment methodologies based on market parameters.

EXPLORATION AND PRODUCTION (E&P)

Third Quarter				Net Income	Jan-Sep		
2Q-2010	2010	2009	3Q10 X 2Q10 (%)		2010	2009	2010 X 2009 (%)
7,649	6,882	5,262	(10)		21,843	13,296	64

(3Q-2010 x 2Q-2010): The reduction in net income was caused by lower domestic oil sale/transfer prices, due to international oil prices and the appreciation of the Brazilian Real against the U.S. dollar, the 2010/2011 collective bargaining agreement, and non-recurring expenses from the financial structuring of the Barracuda project, now concluded.

These effects were partially offset by the 4.7% increase in the volume of oil sold/transferred.

The spread between the average domestic oil price and the average Brent price widened from US\$4.51/bbl in 2Q-2010 to US\$4.76/bbl in 3Q-2010.

(9M-2010 x 9M-2009): The increase in net income reflected higher domestic oil prices (50% in US\$/bbl), in turn due to the international market appreciation of "heavy versus light crudes and the 2% upturn in daily oil and LNG

Fair values are determined based on market price quotations, when available, or, in the absence thereof, on the price

production.

The spread between the average domestic oil sale/transfer price and the average Brent price fell from US\$8.67/bbl in 9M-2009 to US\$4.21/bbl in 9M-2010.

2Q-2010	Third Quarter				Domestic Production (th. barrels/day)	Jan-Sep		
			3Q10 X 2Q10 (%)					
2,010	1,991	1,974	(1)	Oil and NGL	1,995	1,963	2	
331	333	319	1	Natural Gas ⁷	327	316	3	
2,341	2,324	2,293	(1)	Total	2,322	2,279	2	

(3Q-2010 x 2Q-2010): The downturn was due to maintenance stoppages in various platforms in the Campos Basin throughout the third quarter, partially offset by higher output from the new production units.

[2]

(9M-2010 x 9M-2009): Increased output from the P-54 (Roncador), P-53 (Marlim Leste), FPSO-Cidade de Niterói (Marlim Leste), P-51 (Marlim Sul), P-34 (Jubarte), FPSO-Cidade de Vitória (Golfinho), FPSO-Cidade de Santos (Uruguá), FPSO-Espírito Santo (Parque das Conchas) and FPSO-Frade (Frade) platforms, as well as from the extended well tests (EWT) in Tiro (SS-11) and Tupi (FPSO-Cidade de São Vicente), offset the natural decline in the remaining fields.

2Q-2010	Third Quarter				Lifting Cost - country	Jan-Sep		
			3Q10 X 2Q09 (%)					
US\$/barrel:								
9.79	10.60	9.02	8	without government participation	9.94	8.53	17	
24.50	24.67	22.86	1	with government participation	24.31	19.06	28	
R\$/barrel:								
17.54	18.46	16.84	5	without government participation	17.66	17.44	1	
43.91	42.72	41.62	(3)	with government participation	43.48	38.28	14	

Lifting Cost Excluding Government Take US\$/barrel

Fair values are determined based on market price quotations, when available, or, in the absence thereof, the price of the underlying assets. 250

(3Q-2010 x 2Q-2010): The upturn in the lifting cost was due to the increase in personnel expenses as a result of the 2010/2011 collective bargaining agreement and the use of maintenance materials for the Campos Basin platforms.

(9M-2010 x 9M-2009): Excluding the exchange variation, the lifting cost climbed by 6% over 9M-2009 due to the increased number of interventions in the Albacora Leste, Marlim Sul, Marlim, Albacora and Bicudo fields, as well as higher personnel expenses.

⁷ Excludes liquefied gas and includes re-injected gas.

Lifting Cost Including Government Take US\$/barrel

(3Q-2010 x 2Q-2010): Excluding the exchange variation, the unit lifting cost remained virtually flat.

(9M-2010 x 9M-2009): Excluding the exchange variation, the unit lifting cost increased by 22% as a result of the higher reference price for local oil and the higher tax rate applied to the Marlim Sul and Marlim Leste fields due to the upturn in production.

REFINING, TRANSPORTATION & MARKETING

				Third Quarter			Jan-Sep		
				3Q10					
				X					
				2Q10					
				(%)					
				Net Income					
2Q-2010	(108)	1,299	2,114	(1,303)		2,307	12,295	(81)	

(3Q-2010 x 2Q-2010): The improved result was due to lower oil acquisition/transfer and oil product import costs, in turn caused by international prices, the appreciation of the Brazilian Real against the U.S. dollar and the increase in domestic oil product sales volume, especially diesel (+7%).

These effects were partially offset by the reduction in the domestic price of those oil products whose prices are directly pegged to international prices.

(9M-2010 x 9M-2009): The reduction in net income reflected higher oil acquisition/transfer and oil product import costs (Brent, up by 35% in US\$/bbl).

These effects were partially offset by the increase in domestic oil product sales volume, chiefly gasoline (18%), diesel (10%) and jet fuel (16%), higher average export prices and the upturn in the domestic price of those oil products

Fair values are determined based on market price quotations, when available, or, in the absence thereof, the price of the

whose prices are directly pegged to international prices, despite the reduction in the price of diesel (15%) and gasoline (4.5%) in June 2009.

(3Q-2010 x 2Q-2010): The reduction in oil exports was due to higher processed volume following the resumption of operations in Replan.

The upturn in oil product imports, chiefly diesel, reflected the seasonal impact of planting for the summer grain harvest and the increase in industrial activity.

(9M-2010 x 9M-2009): The upturn in oil exports was caused by higher output and increased supply, due to lengthier scheduled stoppages in distillation units, especially in Replan.

The increase in oil product imports reflected growing demand, especially for diesel, thanks to the improved grain harvest in 2010 and the intensification of infrastructure works, and gasoline, due to the ethanol shortage at the beginning of 2010.

[3] [4]

Third Quarter				Jan-Sep			
			3Q10				
2Q-2010			X	Output Oil products (th. barrels/day)			
			2Q09				
			(%)				
1,807	1,843	1,867	2	Output Oil products	1,805	1,806	
1,942	1,942	1,942		Primary Processed Installed Capacity¹⁰	1,942	1,942	
91	94	94	3	Use of Installed Capacity (%)	91	92	(1)
81	83	79	2	Domestic crude as % of total feedstock processed	82	79	3

Fair values are determined based on market price quotations, when available, or, in the absence thereof, the price of the product.

2Q-2010	Third Quarter				Processed Feedstock Domestic (th. barrels/day)	Jan-Sep	
				3Q10 X 2Q09 (%)			
	1,760	1,830	1,826	4		1,777	1,778

(3Q-2010 x 2Q-2010): Daily processed crude moved up by 4%, as a result of the scheduled stoppage in the Replan refinery's distillation unit in 2Q-2010.

(9M-2010 x 9M-2009): Daily processed crude remained flat over the over the first nine months of 2009.

⁸ Includes oil exports by the Refining, Transportation & Marketing and E&P business areas.

⁹ Includes ongoing exports.

¹⁰ According to the ownership recognized by the ANP.

Third Quarter				Jan-Sep			
2Q-2010				3Q10 X 2Q09	Refining Cost - Domestic		
				(%)			
3.93	4.89	3.37	24	Refining Cost (US\$/barrel)	4.17	3.02	38
7.03	8.55	6.27	22	Refining Cost (R\$/barrel)	7.39	6.17	20

(3Q-2010 x 2Q-2010): Excluding the exchange variation, refining costs climbed by 22%, due to higher expenses from scheduled stoppages; personnel, following the 2010/2011 collective bargaining agreement; and catalysts and other chemical products, caused by lower consumption in the second quarter as a result of the scheduled stoppages in Recap and Replan.

(9M-2010 x 9M-2009): Excluding the exchange variation, these costs increased by 22%, due to higher expenses from scheduled stoppages, personnel and third-party services, chiefly as a result of equipment maintenance.

GAS & POWER

Third Quarter				Jan-Sep			
2Q-2010				3Q10 X 2Q09	Net Income		
				(%)			
349	275	343	(21)		947	541	75

(3Q-2010 x 2Q-2010): The reduction in net income was due to the following factors:

Lower energy trading margins due to the higher average spot market acquisition cost;

Fair values are determined based on market price quotations, when available, or, in the absence thereof, the pre

The reduction in the average natural gas sales price, reflecting the increased sales share of the thermal market.

These factors were partially offset by higher electric generation and by increase in natural gas sales.

(9M-2010 x 9M-2009): The year-on-year improvement was due to the following factors:

Higher sales of natural gas to the non-thermal generation segment, accompanying industrial growth, as well as to the thermal segment, thanks to greater demand for power generation;

Increased fixed revenue from energy auctions (regulated market);

The reduction in natural gas import/transfer costs, accompanying the behavior of international prices and the appreciation of the Brazilian Real against the U.S. dollar.

These factors were partially offset by higher selling expenses from LNG regasification vessels.

Third Quarter					Jan-Sep		
				3Q10			
				X			
2Q-2010				2Q09	Gas Import (th. barrels/day)		
				(%)			
168	184	141	10	Gas Import (th. Barrels/day)	168	142	18
2,052	1,827	1,811	(11)	Electricity sell - average MW	2,056	1,641	25
881	2,853	251	224	Electricity generation - average MW	1,405	629	123
41	118	21	188	Price for the Settlement of Differences	60	44	36

(3Q-2010 x 2Q-2010): Upturn in imports due to the increased volume of imported gas to meet growing demand (which reached record levels in 3Q-2010).

In comparison with 2Q-2010, electric power sales fell by 11% due to the anticipation of sales in 1Q-2010 and 2Q-2010 as a result of commercial opportunities that arose in the first half of the year.

Thermal generation jumped by 224% over the previous quarter due higher output as a result of low reservoir levels in the period. Exports (to Argentina) also contributed to the upturn.

Fair values are determined based on market price quotations, when available, or, in the absence thereof, on the price

(9M-2010 x 9M-2009): Sales climbed by 25% due to higher energy reserves, allowing the company to take advantage of market opportunities.

Higher output as of July was due to low reservoir levels in the period and increased demand for electric power.

DISTRIBUTION

				DISTRIBUTION		
Third Quarter				Jan-Sep		
				Net Income		
2Q-2010	3Q10 X 2Q10 (%)					
268	348	409	30	978	944	4

(3Q-2010 x 2Q-2010): The upturn in net income was due to the 10% increase in sales volume despite the 4% reduction in sales margins. This improvement was also caused by the fact that in 2Q-2010 the Company incurred non-recurring expenses from the settlement of ICMS tax debits with the state of Rio de Janeiro (R\$ 110 million).

The segment recorded a 38.8% share of the fuel distribution market in 3Q-2010, versus 38% in the previous quarter.

(9M-2010 x 9M-2009): The year-on-year improvement in net income was due to the 3% increase in sales margins and the 9% upturn in sales volume, partially offset by expenses from the settlement of ICMS tax debits with the state of Rio de Janeiro (R\$ 110 million).

The Company's share of the fuel distribution market climbed from 38.5% in 9M-2009 to 38.7% in 9M-2010.

INTERNATIONAL MARKET

				INTERNATIONAL MARKET		
Third Quarter				Jan-Sep		
				Net Income		
2Q-2010	3Q10 X 2Q10 (%)					
533	277	273	(48)	1,258	26	4,738

(3Q-2010 x 2Q-2010): The reduction in net income was due to higher exploration expenses (R\$83 million) and the write-off of dry or economically unviable wells in Angola, Nigeria, the USA and Argentina (R\$127 million).

Fair values are determined based on market price quotations, when available, or, in the absence thereof, the price of the

(9M-2010 x 9M-2009): The improvement was caused by higher international commodity prices in 2010, increased E&P sales volume, and the operational start-up of the Akpo field in Nigeria in March 2009, which impacted gross profit (R\$1,220 million).

2Q-2010	Third Quarter			X 2Q09 (%)	International Production (th. barrels/day)	Jan-Sep		
	2Q-2010	3Q10	2Q09			3Q10	2Q09	Jan-Sep
					Consolidated - International Production			
	146	144	137	(1)	Oil and NGL	144	127	13
	92	94	94	2	Natural Gas ¹¹	94	96	(2)
	238	238	231		Total	238	223	7
	8	8	10		Non Consolidated - Internacional Production¹²	8	11	(27)
	246	246	241		Total International Production	246	234	5

(3Q-2010 x 2Q-2010): Consolidated oil and LNG production fell due to unitization of the Agbami field, in Nigeria, reducing Petrobras' share of this field.

Consolidated gas production moved up in 3Q-2010 due to increased Brazilian demand for Bolivian gas.

(9M-2010 x 9M-2009): Consolidated oil and LNG production increased due to the start-up of the Akpo field, in Nigeria, in March/09, more than offsetting the reduced interest in the Guando field, in Colombia, for contractual reasons, and the decline in output from mature wells in the Neuquina Basin, in Argentina.

The increase in gas production was fueled by increased Brazilian demand for Bolivian gas, partially offset by the decline in mature wells in the Neuquina Basin.

[5] [6]

2Q-2010	Third Quarter			X 2Q09 (%)	Lifting Cost - International (US\$/barrel)	Jan-Sep

3,698	3,690	3,436		Total	3,631	3,343	9

Year-to-date domestic sales volume moved up by 13% over 9M-2009, chiefly due to sales of the following products:

- Diesel (increase of 10%) due to the economic recovery, higher grain production and increased investments in infrastructure.
- Gasoline (increase of 18%) due to increased use of flex-fuel vehicles as a result of the ethanol shortage at the beginning of 2010, the reduction in the ratio of anhydrous ethanol in the gasoline mix in February 2010, and higher urban consumption.
- Natural gas (increase of 28%) due to higher consumption by the non-thermal market, fueled by the industrial recovery, and by the thermal market to meet the demand for electricity and maintain the level of hydro plant reservoirs during the dry season.

¹⁶ Especially asphalt sales volume, due to increased consumption by infrastructure works.

¹⁷ Altered in accordance with revision of volumes from PESA.

Corporate Overhead (US\$ million)

	Third Quarter				Jan-Sep		
				3Q10 X 2Q09 (%)			
2Q-2010	725	887	745	22	2,263	1,790	26

(3Q-2010 x 2Q-2010): Excluding the exchange variation, corporate overhead increased by 20% over the previous quarter, due to higher expenses with personnel and data-processing, partially offset by lower expenses from advertising, marketing and sponsorships.

(9M-2010 x 9M-2009): Excluding the exchange variation, corporate overhead climbed by 12% in the first nine months, due to higher expenses with personnel, rent, general services and data-processing.

(A free translation of the original report in Portuguese)

Consolidated investments

In compliance with the goals outlined in its strategic plan, Petrobras continues to prioritize investments in the expansion of its oil and natural gas production capacity by investing its own funds and by structuring ventures with strategic partners.

	Jan-Sep

. FX effect on controlled companies abroad	(2,992)	2,493	(499)
. Other	925	(858)	67
	23,644	(21,270)	2,374
- import of crude oil and oil products and gas	(4,914)		
- domestic government take	(2,241)		
- oil products (domestic purchase)	(431)		
- generation and purchase of energy for commercialization	(211)		
- salaries, benefits and charges	(92)		
- materials, services, rent and depreciation	198		
	(7,691)		

3. Consolidated Taxes and Contributions

The economic contribution of Petrobras to the country, measured through the generation of current taxes, duties and social contributions, totaled R\$49,690 million.

4. Government Take

2Q-2010	Third Quarter			3Q10 X 2Q10 (%)	Country	Jan-Sep		
	2,396	2,287	2,187	(5)	Royalties	7,016	5,787	21
	2,598	2,323	2,418	(11)	Special Participation	7,531	5,636	34
	29	34	32	17	Surface Rental Fees	95	98	(3)
			2,048		ANP Agreement		2,048	
	5,023	4,644	6,685	(8)	Subtotal Country	14,642	13,569	8
	121	125	124	3	Foreign	371	328	13
	5,144	4,769	6,809	(7)	Total	15,013	13,897	8

The government take in the country in the 3Q-2010 fell by 8% over the previous quarter, due to the 4% decline in the reference price for local oil, which averaged R\$118.70 (US\$67.89) in 3Q-2010, versus R\$123.05 (US\$68.75) in 2Q-2010, reflecting international oil prices and the exchange variation.

The government take in the country in 9M-2010 increased by 8% over 9M-2009, due to the 20% upturn in the reference price for local oil, which averaged R\$122.01 (US\$68.55) in 9M-2010, versus R\$101.49 (US\$49.78) in the same period in 2009, reflecting international oil prices and the higher tax rate in the Marlim Sul and Marlim Leste fields.

Independent accountants review report

(A free translation of the original report in Portuguese, as filed with the Brazilian Securities Commission (CVM), prepared in accordance with the accounting practices adopted in Brazil, rules of the CVM and the International Financial Reporting Standards - IFRS)

To

The Board of Directors and Shareholders of

Petróleo Brasileiro S.A. - Petrobras

Rio de Janeiro - RJ

1. We have reviewed the accounting information included in the individual Quarterly Information - ITR of Petróleo Brasileiro S.A. - Petrobras (the Company), comprising the balance sheet and the statements of income, comprehensive income, changes in shareholders equity, cash flows and added value and in the Consolidated Quarterly Information of this Company and its subsidiaries, comprising the consolidated balance sheet and the consolidated statements of income, comprehensive income, changes in shareholders equity and cash flows, both referring to the quarter ended September 30, 2010, which include the notes to the quarterly information and the performance report, which are the responsibility of its management.

2. Our review was performed in accordance with the review standards established by the IBRACON - Brazilian Institute of Independent Accountants and the Federal Council of Accountancy - CFC, which comprised, mainly: (a) inquiry and discussion with management responsible for the accounting, financial and operational areas of the

Fair values are determined based on market price quotations, when available, or, in the absence thereof, the pro

Company and its subsidiaries, regarding the main criteria adopted in the preparation of the Quarterly Information; and (b) review of the information and subsequent events, which have, or may have, a material effect on the financial position and operations of the Company and its subsidiaries.

3. Based on our review, we are not aware of any material change that should be made to the accounting information included in the individual Quarterly Information of Petróleo Brasileiro S.A. Petrobras referred to above, for them to be in accordance with the accounting practices adopted in Brazil, specially the Accounting Pronouncements Committee (CPC) 21 Quarterly Information, and rules issued by the Brazilian Securities Commission (CVM), specifically applicable to the preparation of the Quarterly Information.

4. Based on our review, we are also not aware of any material changes that should be made to the accounting information contained in the Consolidated Quarterly Information of Petróleo Brasileiro S.A. Petrobras and its subsidiaries referred to above for them to be in accordance with the International Financial Reporting Standards (IFRS), specially the International Accounting Standards (IAS) 34 Interim Financial Reporting, issued by the International Accounting Standards Board (IASB), and rules issued by the Brazilian Securities Commission (CVM), applicable to the preparation of the Quarterly Information.

COMMERCIAL, INDUSTRIAL & OTHER TYPES OF COMPANY

5. {0As described in Note 2, during 2009 the Brazilian Securities Commission (CVM) approved several pronouncements, interpretations and technical orientations issued by the Accounting Pronouncements Committee (CPC) which are effective for 2010, and changed the accounting practices adapted in Brazil.<0} {0> 100{>These changes were adopted by the Company and its subsidiaries in the preparation of its Quarterly Information for the quarter ended September 30, 2010 and disclosed in Note 4.1.<0} {0> <}98{>The Quarterly Information of the Company related to the year and period of 2009, presented for comparison purposes, were adjusted to include the changes in accounting practices adopted in Brazil in force for 2010.<0}

6. As described in Note 2, the Company and its subsidiaries started to disclosure in 2010 their Consolidated Quarterly Information in accordance with International Financial Reporting Standards (IFRS), applicable to the preparation of consolidated interim financial reports (IAS 34) issued by IASB. The Consolidated Quarterly Information of Petróleo Brasileiro S.A. - Petrobras and its subsidiaries related to the year and period of 2009, presented for comparison purposes, were adjusted and are being presented in accordance with the mentioned international accounting standard.

7. Our review was conducted with the purpose of issuing a review report on the accounting information contained in the Consolidated Quarterly Information of this Company and its subsidiaries described in the first paragraph, taken as a whole. The consolidated statement of added value for the quarter ended September 30, 2010 is not required by the international accounting standards issued by IASB and has been included to facilitate additional analysis. This supplementary information was submitted to the same review procedures as applied to the accounting information contained in the Consolidated Quarterly Information of this Company and its subsidiaries and, based on our review, we are not aware of any material change that should be made for it to be adequate presented in relation to the accounting information presented in the Consolidated Quarterly Information described in the first paragraph, taken as a whole.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act) that are not based on historical facts and are not assurances of future results. These forward-looking statements are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.

All forward-looking statements are expressly qualified in their entirety by this cautionary statement, and you should not place reliance on any forward-looking statement contained in this press release. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.
