Comments on the Company's Consolidated Performance

São Paulo, November 7, 2018

3Q18 Earnings Release

Companhia Siderúrgica Nacional (CSN) (BM & FBOVESPA: CSNA3) (NYSE: SID) **announces today its results for the third quarter of 2018 (3Q18)** in Brazilian reais, and its consolidated financial statements, which are presented in accordance with International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board (IASB) and with the accounting practices adopted in Brazil, which are fully convergent with international accounting standards, issued by the Accounting Pronouncements Committee (CPC) and approved by the Brazilian Securities and Exchange Commission (CVM), pursuant to CVM Instruction 485 of September 1, 2010. The comments presented herein refer to the Company's consolidated results for the third quarter of 2018 (3Q18) and comparisons are for the second quarter of 2018 (2Q18) and for the third quarter of 2017 (3Q17). The Brazilian real/US dollar exchange rate was R\$ 4.0039 on September 30, 2018, R\$ 3.8558 on June 30, 2018 and R\$ 3.1680 on September 30, 2017.

3Q18 financial and operating Highlights

- **Generation of adjusted EBITDA of R\$1,627 MM**, a 34% increase over 3Q17 and 15% over 2Q18, with EBITDA margin of 25.2%.
- **Higher domestic sales volume of steel since 4Q14**, reaching 912 thousand tons and an increase of 14% in relation to the previous quarter.
- **Adjusted EBITDA from mining increasing 52%, reaching R\$811 MM (EBITDA margin of 49%) against 2Q18**, with a higher volume of ore traded (+14%) and quality premiums.
- **Free cash flow, before financing activities, reached R\$838 MM in 3Q18, against R\$73 MM in 2Q18.**
- **0.41x reduction in the leverage ratio**, from 5.34x in the previous quarter to 4.93x in 3Q18, due to higher operating cash generation and EBITDA growth.
- **Net Income of R\$752 MM in 3Q18**, due to the strong operational evolution besides non operational revenues in the period, totaling R\$3.4 billion in 2018.

¹Adjusted EBITDA is calculated based on net profit/loss, plus depreciation and amortization, income tax, net finance income (costs), share of profit (loss) of investees and other operating income (expenses), and includes the proportionate share of EBITDA of the jointly-owned subsidiaries MRS Logística and CBSI. Adjusted EBITDA includes 100% interest in CSN Mineração, 37.27% in MRS and 50% in CBSI.

² Adjusted net debt and adjusted cash account for 100% stake in CSN Mineração, 37.27% in MRS and 50% in CBSI.

CSN's Consolidated Result

- In 3Q18, **net revenue** totaled R\$6,165 million, **8%** and **28%** higher than in 2Q18 and 3Q17, respectively. Compared to 2Q18, the improvement in performance was due to the increase in steel products prices and volumes in the domestic market, and in the mining segment.
- In 3Q18, the **cost of goods sold** amounted to R\$4,299 million, **4.2%** higher than in 2Q18, due to the increase in raw material prices resulting from the appreciation of the US dollar against the Brazilian real, as well as higher manufacturing costs.
- In the third quarter of 2018, **gross profit** totaled R\$1,866 million, a strong increase of **54%** over 3Q17, with a gross margin of 5.1 p.p. higher than the same basis of comparison, due to the strong gain in the mining's margin.
- In 3Q18, **general and administrative expenses** totaled R\$106 million, with **dilution of 2.1% (2Q18) to 1.7% (3Q18)** of net revenue. **Sales expenses** totaled R\$569 million, or 9.2% of net revenue, **0.9 p.p. above** the figure recorded in 2Q18 (8.3% of net revenue) due to the increase in transoceanic iron ore freight expenses in cost and freight (CIF) sales.
- In 3Q18, **other net income (expenses)** reached a positive value of R\$178 million, mainly due to the recognition in the results of judicial assets and the valuation of Usiminas shares in the period.
- In 3Q18, **net financial result** was negative by R\$423 million. **Finance costs (ex-variation)** continued to decline, due to the lower Selic rate, since **interest rates on local currency loans** decreased from R\$ 377MM in **3Q17** to R\$ 254 MM in **3Q18**. Inflation adjustments and exchange variations were impacted by the appreciation of the dollar in the period, generating a negative amount of R\$465 million, partially off-set by hedge accounting positions.

- Adjusted **EBITDA** totaled **R\$1,627 million**, against R\$1,420 million in 2Q18, a 15% increase resulted from the operational improvement especially in the mining and logistics segments. **Adjusted EBITDA margin reached 25.2%**, or 1.3 p.p. above the previous quarter.

Adjusted EBITDA Margin is calculated based on Adjusted EBITDA divided by adjusted net revenue, which includes 100% stake in CSN Mining, 37.27% in MRS and 50% in CBSI, as of December/15.

Free Cash Flow

In **3Q18**, operating cash flow, as measured by Free Cash Flow, was R\$838 million, positively influenced by higher EBITDA and a more efficient financial cycle. In the last 12 months, Free Cash Flow reached R\$1,687 million.

¹Our working capital include changes in current assets and current liabilities, disregarding the impacts on the exchange rate variation, as well as non-recurring tax credit in the amount of R\$725MM, related to the exclusion of PIS/COFINS from the ICMS base.

Debt

As of September 30, 2018, net adjusted debt reached R\$ 27,057 million, while net debt/EBITDA ratio, calculated based on adjusted EBITDA of the last twelve months, reached 4.93x. In the quarter, the deleveraging effects from the increased LTM EBITDA led to a reduction of net debt/EBITDA by 0.41x, even considering the impacts of the exchange rate variation on dollarized debt.

1****Foreign exchange exposure**

The net foreign exchange exposure of our consolidated balance sheet was US\$1,433 million on September 30, 2018, as shown in the table below. It should be noted that within the net FX exposure, a liability of US\$1.0 billion is included in the "Borrowings and financing" line related to the Perpetual Bond, which, due to its nature, will not require disbursement for settlement of the principal amount in the foreseeable future.

The hedge accounting adopted by CSN correlates the projected exports inflow in dollars with part of the scheduled debt payments in the same currency. As a result, the exchange rate changes in the US dollar-denominated debt is temporarily recorded in equity and subsequently recorded in profit or loss when revenues in US dollars from exports occur.

Investments

R\$ 325 million were invested in 3Q18, an increase of 24% over 2Q18, mainly due to project seasonality. The increase in steel and mining expenses are related to investments for better coking/sintering and filtration performance, respectively.

Working capital

To calculate Working capital, CSN adjusts its assets and liabilities as demonstrated below:

- Trade receivables: excludes dividends receivable, advances to employees and other receivables;
- Inventories: includes estimated losses and excludes the spare parts, which are not part of the cash conversion cycle and will be subsequently recorded in Fixed assets when consumed;
- Advanced taxes: solely composed of income tax and social contribution included in line item "Recoverable taxes";
- Taxes payable: composed of line item "Taxes payable", in current liabilities, plus taxes in installments;
- Advances from customers: recognized in line item "Other payables", in current liabilities;

Accordingly, working capital invested in the Company's business **totaled R\$2,727 million in 3Q18, reducing the financial cycle in 9 days** when compared to **2Q18**, due to the

reduction in accounts receivable from the sale of CSN LLC and the decrease in the inventory position, normalized after the truck drivers' strike in 2Q18.

As of 2013, the Company no longer reports the proportional consolidation of its jointly-owned subsidiaries Namisa, MRS and CBSI. For the purposes of preparing and presenting the information by business segment, Management decided to maintain the proportional consolidation of the jointly-owned subsidiaries, as historically presented. For purposes of reconciliation of the consolidated result, the amounts recorded by these companies are not included in the "Corporate expenses/elimination" column.

After the closing of 2015, after the combination of CSN's mining assets (Casa de Pedra, Namisa and Tecar), the consolidated result includes this new company's information as a whole.

- CSN's **total sales** amounted to 1,290 thousand tons of steel products in **3Q18**, or **2%** and **1%** lower than in 2Q18 and 3Q17, respectively. Adjusting for the effects of the sale of the plant in Terra Haute, USA, total sales would have grown by 4% against 2Q18.

- In **3Q18**, the volume of steel sold by CSN in the **domestic market** totaled 912 thousand tons, **14%** higher than in 2Q18. Of this total, 859 thousand tons refer to flat steel and 53 thousand tons to long steel products. The greater domestic market orientation with **higher performance in the automotive, white goods, packaging and OEM segments** resulted in a **strong increase in sales of cold-rolled flat steel products (+21% - 3Q18x2Q18), galvanized items (+17% - 3Q18x2Q18) and tin plates (+20% - 3Q18x2Q18)**.

- In the **foreign market**, CSN's sales in **3Q18** totaled 378 thousand tons, 28% lower than in the previous quarter mainly due to the sale of CSN LLC at the end of 2Q18 (-12% adjusting to this effect), in addition to the strategy of redirecting galvanized to the domestic market. In

this period, 48 thousand tons were exported directly and 329 thousand tons were sold by the subsidiaries abroad, of which 65 thousand tons by LLC, 185 thousand tons by SWT and 79 thousand tons by Lusosider.

- In 3Q18, CSN maintained a high **market share of coated products** as a percentage of domestic sales volume (45% in 3Q18 against 44% in 2Q18), following the strategy of adding more value to its product mix. Sales of coated products such as galvanized items and tin plates accounted for 48% of flat steel sales, considering all markets in which the Company operates.

According to **ANFAVEA** (National Association of Automobile Manufacturers), **in the third quarter of 2018, the production of automobiles, light commercial vehicles, trucks and buses** reached 760,226 thousand units, **an increase of 5.05%**, compared to the same period of prior year. **Exports**, in turn, showed a lower performance, totaling 145,258 thousand vehicles sold, a **decrease of 25%** against the same period of the previous year. Anfavea estimates an increase of 11.9% in vehicle production in 2018, to 3.02 million units.

According to **ABRAMAT** (Brazilian Association of the Building Material Industry), **building materials industry revenues increased** by 2.7% in September 2018, compared to the same month a year ago, ergo the association maintains its estimate of growth of 1.5% in the industry revenues in 2018.

According to **IBGE** (Brazilian Institute of Geography and Statistics), **home appliance production** referring to data accumulated from 12 months to August, **registered a growth of 3.1%**, compared to the same period accumulated in 2017.

According to data from **INDA (National Institute of Steel Distributors)** in **3Q18**, distribution purchases **increased by 7%** compared to 3Q17. **Imports closed 3Q18 with a decrease of 12.5%** in relation to the same period of 2017, with a total volume of 324 thousand tons.

- **Net steel revenue** reached R\$4,099 million in 3Q18, stable compared to 2Q18. Excluding distortions resulted from the sale of the plant in the US, net revenue grew 10% in the quarter. In addition to volume growth, the increase was also due to higher average price of steel, both in the domestic market (+5% vs. 2Q18) and in the external market (+8% vs. 2Q18).
- **Cost of goods sold in 3Q18** increased by 3.2% when compared to 2Q18, totaling R\$3,380 million, chiefly influenced by the 9.6% devaluation of the Brazilian real against the US dollar in the period.

- **Slab production cost** in **3Q18** reached R\$1,704/t, 4% higher than in 2Q18. The increase in prices of the main raw materials was additionally impacted by the exchange rate variation in the period.
- **Adjusted EBITDA** reached R\$ 652 million in **3Q18**, 7.9% lower than the R\$708 million recorded in 2Q18 due to seasonal fluctuations in the performance of subsidiaries abroad. Adjusted EBITDA margin reached 15.9% in 3Q18, or 1.4 p.p. lower than in the previous quarter.

CSN's mining results

In **3Q18**, steel production in China was **242,4 Mt**, reaching a quarterly production record and representing a 10% increase compared to 3Q17. Resilient demand, capacity constraints and operating margins of steel companies produced a positive effect on prices, especially higher quality products. In this context, the **iron ore price ratio closed 3Q18 averaging US\$ 66.68/dmt (Platts, Fe62%, N. China), 2% up on 2Q18**. The average dollar variation between the periods was +9.6%, benefiting iron ore revenues in local currency.

The decline in the global supply of **high silica** since 2Q18 resulted in a **strong reduction in the market discount of this impurity in 3Q18**. On the other hand, the low impurity of Alumina in the Casa de Pedra product, added to lower silica discounts and with better ore content in the quarter, provided a premium of **US\$2.1 /dmt** for CSN.

In terms of **maritime freight**, the BCI-C3 (Tubarão-Qingdao) route reached an average of US\$ 22.33/wmt in **3Q18**, **an increase of 28%** over the previous quarter, driven by higher transoceanic volumes and higher oil prices.

- In **3Q18**, CSN's **iron ore production** totaled 7.6 million tons, 13% higher than in 2Q18 due to the successful implementation of the mining plan and start-up of the first filtering plant. **Iron ore purchases** reached 1,501 thousand tons in **3Q18**, down 20% from 2Q18.

- Iron ore **sales** totaled 9.3 million tons in **3Q18**, 14% above those recorded in 2Q18, with 1.1 million tons sold to the Presidente Vargas Plant and the rest distributed in the Asian and European markets.

- In **3Q18, net revenue** from mining reached R\$1,659 million, 25% higher than in the previous quarter, due to the higher sales volume (+14%) and appreciation of the US dollar against the real. The **CFR unit revenue for exports** in **3Q18** reached **US\$69.4/dmt**, a quarterly increase of 4% driven by alumina premiums. On the other hand, the CIF+FOB reference was US\$56.8/wmt, stable compared to the previous period, impacted by higher maritime freight and FOB sales.

- Mining **sales cost** totaled R\$882 million in **3Q18**, 3% up on 2Q18, due to the higher volume traded in the period (+14%).

- **Adjusted EBITDA margin reached 49% in 3Q18, or 8.8pp. higher than 2Q18**, while **adjusted EBITDA reached R\$ 811 million in 3Q18**, 52% higher than 2Q18 due to higher volume, lower unit cost of ore placed on the ship, maintenance of realized price and appreciation of the dollar in the period.

CSN's logistics results

Railway Logistics: In **3Q18, net revenue** reached R\$406 million, generating **adjusted EBITDA** of R\$179 million and **adjusted EBITDA margin** of 44% (+4.3 p.p. against 2Q18).

Port Logistics: in **3Q18**, Sepetiba Tecon shipped 88 thousand tons of steel products, in addition to 63 thousand tons of general cargo and approximately 63 thousand containers. In 3Q18, **net revenue** reached R\$64 million, generating Adjusted **EBITDA** of R\$ 15 million, with **adjusted EBITDA margin** of 23% (+4.6 p.p. against 2Q18).

CSN's energy results

According to the **Energy Research Company (EPE)**, the **domestic electric energy consumption in Brazil** increased by **1.3%** in **3T18** compared to the same period of the previous year. The industrial sector posted an increase in energy consumption of **1.6%** in the 9M18 versus the same period last year. The residential and commercial sectors increased energy consumption by **1.2%** and **0.4%**, respectively, compared to the same period.

In **3Q18**, **net revenue** from energy totaled R\$104 million (+2% vs. 3Q17) due to greater availability and sale of energy in the free market. **Adjusted EBITDA** was R\$32 million and adjusted **EBITDA margin** of 31%.

CSN's cement results

In the **first nine months of 2018**, **domestic cement sales** totaled 39.5 million tons, according to preliminary industry data released by the National Cement Industry Union (**SNIC**). This amount represents a fall of **2.2%** from the same period last year. According to SNIC, **sales volume in the third quarter reflects the poor performance of the economic activity**.

In **3Q18**, CSN's **cement sales** was higher than in 2Q18. **Net revenue** reached R\$ 160 million, 6% higher due to price and volumes increases, despite the adverse scenario in the sector. Adjusted **EBITDA** reached R\$17 million, with adjusted **EBITDA margin** of 11%, impacted by higher raw materials prices, especially pet coke.

1. DESCRIPTION OF BUSINESS

Companhia Siderúrgica Nacional “CSN”, also referred to as “the Company” or “Parent Company”, is a publicly-held company incorporated on April 9, 1941, under the laws of the Federative Republic of Brazil (Companhia Siderúrgica Nacional, its subsidiaries, associates and joint ventures are collectively referred to herein as the "Group"). The Company’s registered office is located in São Paulo, SP, Brazil.

CSN is listed on the São Paulo Stock Exchange (B3 S.A.- Brasil, Bolsa, Balcão) and on the New York Stock Exchange (NYSE). Accordingly, the Company reports its information to the Brazilian Securities and Exchange Commission (CVM) and the U.S. Securities and Exchange Commission (SEC).

The Group's main operating activities are divided into five (5) segments as follows:

- **Steel:**

The Company’s main industrial facility is the Presidente Vargas steelworks (“UPV”), located in the city of Volta Redonda, State of Rio de Janeiro. This segment consolidates all operations related to the production, distribution and sale of flat steel, long steel, metallic containers and galvanized steel. In addition to the facilities in Brazil, CSN has commercial activities in the United States and operations in Portugal and Germany aimed at gaining markets and providing excellent services to end consumers. Its steel is used in home appliances, civil construction and automobile industries.

- **Mining:**

The production of iron ore is developed in the city of Congonhas, State of Minas Gerais.

Iron ore is sold basically in the international market, especially in Europe and Asia. The prices charged in these markets are historically cyclical and subject to significant fluctuations over short periods of time, driven by several factors related to global demand, strategies adopted by the major steel producers, and the foreign exchange rate. All these factors are beyond the Company's control. The ore transportation is carried out through Terminal de Carvão e Minérios do Porto de Itaguaí – (“TECAR”), a solid bulk terminal, one of the four terminals that comprise the Itaguaí Port, in State of Rio de Janeiro. Imports of coal and coke are also carried out through this terminal by providing services to CSN's steel segment.

The Company's mining activities also comprise exploitation of tin in the State of Rondônia, to supply the needs of the UPV. The surplus of these raw materials is sold to subsidiaries and third parties.

- **Cement:**

CSN entered the cement market boosted by the synergy between this activity and its existing businesses. Next to the Presidente Vargas Steelworks (UPV) in Volta Redonda (RJ), the Company installed a new business unit that produces CP-III type cement using slag produced by the UPV's blast furnaces. It also exploits limestone and dolomite at the Arcos unit in the State of Minas Gerais, to meet the needs of the UPV and of the cement plant.

In the fourth quarter of 2016, the Company started the operation of its second clinker production line in Arcos/MG. As a result, the Company is self-sufficient in the production of cement, with an installed capacity of 4.7 million tons per year.

- **Logistics**

Railroads:

CSN has interests in three railroad companies: MRS Logística S.A., which manages the Southeast Railway System of the former Rede Ferroviária Federal S.A. (“RFFSA”), Transnordestina Logística S.A. (“TLSA”) and FTL - Ferrovia Transnordestina Logística S.A. (“FTL”), which has the concession to operate the former Northeast Railway System of RFFSA, in the States of Maranhão, Piauí, Ceará, Rio Grande do Norte,

Paraíba, Pernambuco and Alagoas, with TLSA being responsible for the rail links of Missão Velha-Salgueiro, Salgueiro-Trindade, Trindade-Eliseu Martins, Salgueiro-Porto de Suape and Missão Velha-Porto de Pecém (Railway System II), still under construction and FTL being responsible for the rail links of São Luiz-Mucuripe, Arrojado-Recife, Itabaiana-Cabedelo, Paula Cavalcante-Macau and Propriá-Jorge Lins (Railway System I).

Ports:

The Company operates in the State of Rio de Janeiro, through its subsidiary Sepetiba Tecon S.A., the Container Terminal ("TECON") and through its subsidiary CSN Mineração S.A – ("CSN Mineração")., TECAR, both at the Itaguaí Port. Located in the Bay of Sepetiba, they have privileged highway, railroad and maritime access.

At TECON, shipment of CSN's steel products, movement of containers, storage, consolidation and deconsolidation of cargo are carried out and, at TECAR, the shipment of iron ore to overseas market and the unloading of coal and other products, such as petroleum coke, sulfur and zinc concentrate for our own use and for several customers.

- **Energy:**

As energy is fundamental to its production process, the Company has electric energy generation assets to guarantee its self-sufficiency.

Note 26 - "Segment Information" details the financial information per CSN's business segment.

- **Going Concern**

The interim financial information was prepared based on the normal continuity of its business.

Negotiations in progress for reprofiling part of the debts do not jeopardize the Company's operating continuity and Management does not have any other relevant operational restructuring plan that implies a change to the conclusion of the operational continuity. Further disclosures on the bases for evaluating the operational continuity were made in the disclosures of this subject included in the financial statements of December 31, 2017, approved by Management on March 26, 2018.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.a) Basis of preparation

The Group's parent company and consolidated condensed interim financial information ("condensed quarterly information") have been prepared and are being presented in accordance with accounting practices adopted in Brazil based on the provisions of the Brazilian Corporate Law, pronouncements, guidelines and interpretations issued (CPC), standards issued by the Brazilian Securities and Exchange Commission ("CVM") and International Financial Reporting Standards ("IFRS") issued by the International Accounting Standard Board (IASB) and highlight all the relevant information of the interim financial statements, and only this information, is being disclosed and corresponds to the information used by the Company's management in its activities

The condensed interim financial information has been prepared and is being presented in accordance with CPC 21 (R1) - "Interim Financial Reporting" and IAS 34 - "Interim Financial Reporting", consistently with the standards issued by the CVM.

3. ADOPTION OF NEW ACCOUNTING PRACTICES

The Company applied as of January 1, 2018, the IFRS 09 Financial Instruments (corresponding to CPC 48) and IFRS 15 Revenues from Contracts with Customers (corresponding to CPC 47), both of which were approved by CVM in November 2016 as well as interpretation IFRIC 22, corresponding to ICPC 21, approved in July 2017. IFRS 09 and 15 replaced IAS 39 Financial Instruments: Recognition and Measurement and IAS 18 Revenue and related interpretations, respectively.

The Company decided to adopt the modified transition method for the implementation of the new standards, where any transitory adjustment is recognized in retained earnings on January 1, 2018, without comparative adjustment and whose impacts are being detailed below:

• **IFRS 9 / CPC 48 Financial instruments**

The new pronouncement includes new rules on the classification and measurement of financial assets, as well as impairment of assets and new practices for hedge accounting, which are simplified below:

Classification and measurement - IFRS 9 establishes that financial assets should be classified and measured in one of three categories: amortized cost, fair value through other comprehensive income (VJORA) and fair value through profit or loss (VJR). The categories of held-to-maturity, loans and receivables and available for sale that were part of the scope of IAS 39, were removed.

Impairment of assets- the "incurred losses" model is replaced by an "estimated credit loss" model, where it is no longer necessary for a loss event to occur before recognition of the impairment loss. The model uses a two-pronged approach, in which the provision will be measured for expected credit losses for 12 months or for the entire life of the asset. These changes did not bring impacts to the Company.

Hedge Accounting - a new general hedge accounting model was included, which does not change, but fundamentally the types of hedge relationship or requirements for measurement and recognition of ineffectiveness. These changes did not bring impacts to the Company.

The main effect of the adoption of IFRS 09 is presented in note 14.II, referring to the classification from January 1, 2018 and measurement of the investment in Usinas Siderúrgicas de Minas Gerais S.A. - Usiminas and Panatlântica S.A. at fair value through profit or loss (VJR) and obtained a gain of R\$ 1.5 billion (gross) as of September 30, 2018 recorded in other operating income and expenses (Note 24).

• **IFRS 15 / CPC 47 Revenue from contract with customer**

Revenue from contracts with customers - IFRS 15 establishes a new concept for revenue recognition, replacing IAS 18 Revenue, IAS 11 - Construction Contracts and related interpretations. The Company adopted IFRS 15 using the modified retrospective method, which does not require the restatement of comparative information

The new pronouncement establishes a five-step model for determining the recognition of revenue from customer contracts, as follows:

- **Identification of the contract:** identify when there is an agreement and the parties involved.

- **Identify the performance obligations:** from the definitive agreement, analyze the contractual promises, in order to identify which promised items can be considered as performance obligations.

- **Determine the price of the obligation:** The transaction price is the value of the consideration that the entity expects to receive by transferring the control of the promised goods and services, the value of the transaction can include fixed values, variable values or both.

- **Transaction Price Allocation:** At the time of signing the contract, the transaction price must be allocated to each performance obligation.

- **Recognize Revenue:** Revenue recognition occurs at the time (or to the extent that) meets a performance obligation by transferring control of a good or service to a customer.

Analyzing the topic "identification of performance obligations", the Company identified in its operations the following performance obligations.

- **Sale of finished products:** the transfer of risks and benefits coincides with the transfer of control of the products, thus, the moment of recognition of revenue from product sales was not impacted by the adoption of this new standard.

- **Provision of service:** in the main services provided by the Company, the revenue recognition coincides with the conclusion of the service, therefore without impacts by the adoption of this standard.

- **Freight / insurance liability in CFR / CIF incoterms:** the freight service in the CFR and CIF modalities will be considered a separate service and therefore a separate performance obligation, with allocation of part of the price of the transaction recognized in profit or loss, according to the effective provision of the service over time.

The effect of the difference in the recognition of the portion of revenue allocated to freight does not significantly affect the Company's income. Therefore, such revenue will not be presented separately in the Company's financial statements.

In the other topics of the new standard, the Company did not identify material measurement impacts in the application of this standard

• **IFRIC 22 / ICPC 21 Foreign currency transaction and down payment**

Required to apply in January 2018, IFRIC 22, which corresponds to ICPC 21, is to regulate the concepts established in CPC 02 - Effects of Changes in Foreign Exchange Rates and Conversion of Financial Statements, on how to determine the transaction date with the purpose of determining the exchange rate to be used in the initial recognition of an asset, expense or revenue (or part thereof) in the derecognition of non-monetary assets or non-monetary liabilities arising from the payment or early receipt in foreign currency.

Generally speaking, the interpretation deals with transactions in foreign currency in which the Company recognizes a non-monetary asset or non-monetary liability resulting from early payment or receipt, even before the company recognizes the related asset, expense or revenue.

The consensus of this interpretation clarifies that the transaction date for determining the exchange rate to be used in the case of advances is defined as the date that the entity initially recognizes the non-monetary asset or non-monetary liability arising from the early payment or receipt. In the case of multiple payments or receipts in advance, the company shall determine the transaction date, each payment or advanced receipt.

As the Company already adopts the practices established by CPC 02, establishing the historical rate at the time of recognition of non-monetary assets and liabilities related to the anticipation, there is no impact resulting from the application of this technical interpretation.

4. SALE OF FOREIGN SUBSIDIARY

During the second quarter of 2018, CSN announced to its shareholders and to the market, through a Material Fact, the sale by its wholly-owned subsidiary CSN Steel S.L.U., total interest in Companhia Siderúrgica Nacional LLC ("LLC") to Steel Dynamics, Inc. ("SDI"), approved on the same date by the Board of Directors. The LLC is located in the United States with operations in stripping, cold rolling and galvanizing of flat steel.

Still in the second quarter of 2018, after fulfilling all the precedent conditions foreseen in the purchase and sale agreement entered into with SDI, the Company concluded the transaction with the transfer of the equity interest and receipt of the base value of the transaction, adjusted in US\$ 400 million, as shown below:

- TRANSNORDESTINA LOGÍSTICA S.A. (“TLSA”)

It is in pre-operational phase and will continue as such until the completion of Railway System II. The approved schedule, which estimated the completion of the work by January 2017, is currently under review and discussion with the responsible agencies; however, Management believes that new deadlines for project completion will not have material adverse effects on the expected return on the investment. After analyzing this matter, Management considered as appropriate the use of the accounting basis of operational continuity (going concern) of the project in the preparation of its financial statements.

The assumptions used to evaluate the impairment test in December 2017 remain valid and there is no trigger to justify records of *impairment* in the first quarter.

11. PROPERTY, PLANT AND EQUIPMENT

The information on property, plant and equipment has not changed significantly in relation to that disclosed in the Company's financial statements as of December 31, 2017.

14. FINANCIAL INSTRUMENTS

I - Identification and measurement of financial instruments

The Company enters into transactions involving various financial instruments, mainly cash and cash equivalents, including short-term investments, marketable securities, trade receivables, trade payables, and borrowings and financing. The Company also enters into derivative transactions, especially interest rate and foreign exchange rate *swaps*.

Considering the nature of the instruments, the fair value is basically determined by the use of quotations in the open capital market of Brazil and the Commodities and Futures Exchange. The amounts recorded in current assets and liabilities have immediate liquidity or maturity, mostly in terms of less than three months. Considering the term and the characteristics of these instruments, the book values approximate the fair values.

- **Classification of financial instruments**

With the implementation of pronouncements CPC 48/ IFRS9, the classification of financial instruments: held to maturity, loans and receivables and available for sale were replaced by three categories of classification and measurement of financial instruments: amortized cost, fair value through other comprehensive income (VJORA) and fair value through profit or loss (VJR).

- **Fair value measurement**

The following table shows the financial instruments recognized at fair value through profit or loss classifying them according to the fair value hierarchy:

Consolidated	Level 1	Level 2	09/30/2018 Balances	Level 1	Level 2	12/31/2017 Balances
Assets						
Current						
Financial assets at fair value through profit or loss

Total Assets	2,177,211	1,039	2,178,250	2,225,385		2,225,385

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Includes observable inputs in market such as interest rates, exchange etc., but not prices traded in active markets.

There are no assets and liabilities classified as level 3.

II – Investments in securities measured at fair value through profit or loss

During the application of IAS 39/CPC 38 until December 2017, the Company has investments in equity instruments, measured at fair value through other comprehensive income, because the nature of the investment is not included in any other categories of financial instruments (loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss).

Gains and losses arising from the variation of the share price, were recorded directly in shareholders' equity under the account "Other comprehensive income" and for each significant decrease in market value an impairment loss was recognized in income.

With the implementation of the pronouncements IFRS 9 / CPC 48 as from January 1, 2018, the equity instruments classified as held-to-maturity should be classified as fair value through profit or loss (VJR). In this way, the Company reclassified the investments in common (USIM3) and preferred (USIM5) shares of Usiminas ("Usiminas Shares"), from fair value through other comprehensive income (VJORA) to fair value through profit or loss. In relation to Panatlântica shares (PATI3), currently classified as (VJORA), the Company based on its current business model, whose objective is to maintain this financial asset to obtain contractual cash flows, but adopts the option to reclassify it to VJR, recognizing changes in fair value in profit or loss.

Accordingly, the credit balance accumulated in December 2017 in other comprehensive income of R\$1,559,682 was reclassified to the statement of income from the effective date of the new standard. With the new classification, changes in fair value are recorded in the statement of income, whose movement occurred until September 30, 2018 generated a loss of R\$ 12,417 and a cumulated gain of R\$ 1,547,265. (See opening below and note 24).

In February 2018, 3,136,100 preferred shares (USIM5) were sold, totaling R\$39,377 through the exclusive fund "VR1 - Multimarket Private Investment Fund".

•Share market price risks

The Company is exposed to the risk of changes in the price of the shares due to the investments, valued at fair value through profit or loss and other comprehensive income that have their prices based on the market price on the stock exchange (B3).

III - Financial risk management:

The Company follows risk management strategies, with guidelines in relation to the risks incurred by the company. The nature and general position of financial risks is regularly monitored and managed to assess the results and the financial impact on cash flow. The credit limits and hedge quality of the counterparties are also periodically reviewed.

Market risks are protected when it is considered necessary to support the corporate strategy or when it is necessary to maintain the level of financial flexibility.

The Company may manage some of the risks through the use of derivative instruments, not associated with any speculative trading or short selling.

14.a) Foreign exchange rate and interest rate risks:

- **Foreign exchange rate risk:**

The exposure arises from the existence of assets and liabilities denominated in Dollar or Euro, since the Company's functional currency is substantially the Real and is denominated natural currency hedge. The net exposure is the result of offsetting the natural currency exposure by hedging instruments adopted by CSN.

The consolidated net exposure as of September 30, 2018 is as follows:

CSN is currently in process of redefining its currency hedge strategy. The Company began to focus its hedging strategy to preserve its cash flow capturing the existing natural relationships and the use of derivative instruments to hedge CSN's future cash flows.

- Interest rate risk:**

The risk arises from short and long-term liabilities with fixed or floating interest rates and inflation indices.

In item 14b) we show the derivatives and hedging strategies to hedge foreign exchange and interest rate risks.

14.b) Hedging instruments: Derivatives and cash flows hedge accounting and foreign investment hedge accounting

CSN uses various instruments to hedge foreign exchange and interest rate risks, as shown in the following topics:

- **Portfolio of derivative financial instruments**

Swap cambial Dollar x Euro

The subsidiary Lusosider has derivative operations to hedge its exposure of the dollar against the euro.

- Cash flow hedge accounting***

Beginning November 1, 2014, the Company formally designated cash flow hedging relationships to hedge highly probable future cash flows against US dollar fluctuations.

In order to better reflect the accounting impacts of this foreign exchange hedging strategy on the Company's results, CSN designated part of its US dollar-denominated liabilities as a hedging instrument of its future exports. As a result, foreign exchange differences arising from designated liabilities will be temporarily recognized in shareholders' equity and recognized in profit or loss when such exports are carried out, allowing the concurrent recognition of the dollar impact on liabilities and on exports. The adoption of this hedge accounting does not entail entering into any financial instrument. As of September 30, 2018, US\$2.3 billion in exports to be carried out from July 2018 until February 2023 are designated.

In order to support the aforementioned designations, the Company prepared formal documentation indicating how the hedge designation is aligned with CSN's objective and risk management strategy, identifying the hedging instruments used, the hedge object, the nature of the risk to be hedged and demonstrating the expectation of high effectiveness of the designated relations. Debt instruments have been designated in amounts equivalent to the portion of future exports. Therefore, the exchange variation of the instrument and the object are similar. According to the Company's accounting policy, continuous evaluations of prospective and retrospective effectiveness should be carried out, comparing the amounts designated with the amounts expected and approved in the Management's budgets, as well as the amounts actually exported.

Through hedge accounting, the exchange gains and losses on debt instruments will not immediately affect the Company's profit or loss except to the extent that exports are carried out.

The table below shows a summary of the hedging relationships as of September 30, 2018:

As of September 30, 2018, the hedging relationships established by the Company were effective, according to prospective tests conducted. Thus, no reversal for hedge accounting ineffectiveness was recognized.

- Hedge of net investment in foreign operation***

CSN has a natural currency exposure in Euros substantially arising from a borrowing taken by a foreign subsidiary with functional currency in Reais, for the acquisition of investments abroad where the functional currency is Euro. Such exposure arises from translating the balance sheets of these subsidiaries for consolidation into CSN, where the exchange difference on the borrowings affected the statement of income, in the finance income and costs line item, and the exchange difference on the net assets of the foreign operation directly affected the shareholder's equity, in other comprehensive income.

As from September 1, 2015, CSN began to adopt the net investment hedge to eliminate such exposure and cover future fluctuations of the Euro on such borrowings. Non-derivative financial liabilities were designated, represented by borrowing agreements with financial institutions in the amount of € 120 million. The account balances as of September 30, 2018 are as follows:

(*) The sensitivity analysis is based on the assumption of maintaining, as a probable scenario, the market values as of September 30, 2018 recognized in the company's assets and liabilities.

14.d) Liquidity risk

It is the risk that the Company does not have sufficient liquid resources to honor its financial commitments, as a result of mismatching of term or volume between expected receipts and payments.

In order to manage the liquidity of the cash in local and foreign currency, premises of disbursements and future receipts are established, being monitored daily by the Treasury area. The payment schedules for the long-term portions of the loans and financing and debentures are presented in Note 13.

The following table shows the contractual maturities of financial liabilities, including accrued interest.

IV - Fair values of assets and liabilities as compared to their carrying amounts

Financial assets and liabilities measured at fair value through profit or loss are recorded in current and noncurrent assets and liabilities and gains and losses are recorded as financial income and expenses, respectively.

The amounts are recorded in the financial statements at their carrying amount, which are substantially similar to those that would be obtained if they were traded in the market. The fair values of other long-term assets and liabilities do not differ significantly from their carrying amounts, except for the amounts below.

The estimated fair values for certain consolidated long-term borrowings and financing were calculated at prevailing market rates, taking into consideration the nature, terms and risks similar to those of the

recorded contracts, according below:

• Credit Risks

The exposure to credit risks of financial institutions complies with the parameters established in the financial policy. The Company has as practice the detailed analysis of the patrimonial and financial situation of its clients and suppliers, the establishment of a credit limit and the permanent monitoring of its outstanding balance.

With respect to financial investments, the Company only makes investments in institutions with low credit risk rated by rating agencies. Since part of the funds is invested in repo operations that are backed by Brazilian government bonds, there is also exposure to the credit risk of the Brazilian State.

Regarding the exposure to credit risk in accounts receivable and other receivables, the company has a credit risk committee, in which each new customer is analyzed individually regarding their financial condition, before granting the credit limit and payment terms and periodically revised, according to the periodicity procedures of each business area.

• Capital Management

The Company seeks to optimize its capital structure in order to reduce its financial costs and maximize the return to its shareholders. The table below shows the evolution of the Company's capital structure, with financing by equity and third-party capital:

In its corporate structure the Company has foreign subsidiaries whose profits are subject to income tax in the countries where they were established at rates lower than those prevailing in Brazil. In the period from 2013 and 2018, these foreign subsidiaries generated profits amounting to R\$963,209. If the tax authorities understand that these profits are subject to additional taxation in Brazil in respect of income tax and social contribution, these, if due, would total approximately R\$327,491.

The Company, based on its legal counsel's opinion, assessed as possible the likelihood of loss in the event of challenge by the tax authorities and, therefore, no provision was recognized in the financial statements.

16.c) Impairment test - Deferred taxes

The Company's management constantly evaluates the ability to use its tax credits. In this direction, CSN periodically updates a technical study to demonstrate if the generation of future taxable profits support the realization of tax credits and, consequently support the realization of tax credits, the maintenance on the balance sheet or the constitution of a provision for loss in the realization of these credits.

This study is prepared at Entity level, in accordance with the Brazilian tax legislation, and is performed considering the Parent company's projections, which is the entity that generates a significant amount of tax credits, mainly, temporary differences. The parent company covers the following businesses:

- Steel Brazil;and

- Cement;

The deferred tax assets on tax losses and temporary differences refers mainly to the following:

	Nature	Description
Tax losses		In recent periods, the Company started to incur in tax losses at the parent company level, mostly because of high financial expenses, as substantially all our loans and financings are on this level.
	Exchange differences expenses	Since 2012 the Company opted by the taxation on a cash basis. As the Parent Company have operated without taxable profit, it would not make sense to use this deductibility year by year (accrual basis). As a result of the cash basis tax treatment, taxes are only due and expenses are only deductible at the time of debt settlement.
Temporary differences	Losses on Usiminas shares	The losses on Usiminas shares are recognized on an accrual basis, but the taxable event will occur only at the time of divestment.
	Other provisions	Various accounting provisions are recognized on an accrual basis, but their taxation occurs only at the time of its realization, such as provisions for contingencies, impairment losses, environmental liabilities, etc.

The study is prepared based on the Company's long-term business plan designed for a period reasonably estimated by management and considered several scenarios which vary according to different macroeconomic and operating assumptions.

The model for projection of taxable profit considers two main indicators:

- Pre-Tax Profit, reflecting our projected EBITDA plus depreciation, other income and expenses and financial income (expenses); and
- Taxable Profit, which is our pre-tax profit plus (minus) expenses and income items that are taxable at a time different from the time obtained on an accrual basis (temporary differences).

In addition, a sensitivity analysis of tax credits utilization considering a variation in macroeconomic assumptions, operational performance and liquidity events.

A significant aspect to be considered in the analysis is the fact that CSN has presented recent tax losses mainly due to the deterioration of the Brazilian political and macroeconomic environment, as well as the growth of its financial leverage. These two aspects combined led to an unbalance between the financial and operating results of the Parent company.

Within this context, the Company works with a business plan to rebalance between the financial and operating results of the Parent company, whose main measures are:

- Expansion of disinvestment efforts;
- Reduction of financial leverage;
- Improvement in operating results due to increased sales volume, better prices of its products and efficiency in controlling production costs and
- Reprofiling of the Parent company's indebtedness, with negotiations to extend the amortization periods and decentralization of debt through redirection of contracts to subsidiaries according to the nature and application of resources.

With the aforementioned measures already in an advanced stage of execution, the Company's management expects to retake high profitability rates. Accordingly, management considers that the gradual recognition of tax credits, using at first a time period of projections of less than 10 years, better reflects the expectation of utilization of the credits recognized in the Company's tax books. As a result of the study, the Company reversed R\$ 653,193 of the loss recorded in previous years, presenting until 2018 credits recognized in the amount of R\$ 226,895 in the Parent Company and a debit of R\$ 161,249 in the Consolidated.

(1) Refers to the recognition of the PIS and Cofins credit arising from the exclusion of ICMS from calculation basis of previous years. With the final res judicata of the lawsuit on September 20, 2018, CSN's right to offset amounts unduly collected under these taxes was confirmed. The reported amount refers to a portion of the credits verified by the company, writ of mandamus nº 2006.51.01.020125-7 (Special Appeal nº1,241,431 / RJ) (see notes 8 and 25). The credit recognized refers to the years 2010 to 2014, arising

from the exclusion of ICMS from PIS and Cofins calculation basis, for which the Company has completed the identification of the amounts. For the other years since 2001, the credits unduly collected are being calculated by the Company and expects to complete the analysis before the end of the year.

(2) Refers to the contractual amendment with the jointly-owned subsidiary MRS, for the revision of the "Annual Transportation Plan".

Adjusted EBITDA is the principal measurement through which the chief operating decision maker assesses the segment performance and the capacity to generate recurring operating cash, consisting of profit for the year less net finance income (expenses), income tax and social contribution, depreciation and amortization, equity in results, results of discontinued operations and other operating income (expenses), plus the proportionate EBITDA of joint ventures.

Even though it is an indicator used in segment measurement, EBITDA is not a measurement recognized by accounting practices adopted in Brazil or IFRS, it does not have a standard definition, and may not be comparable with measurements using similar names provided by other companies.

As required by IFRS 8, the table below shows the reconciliation of the measurement used by the chief operating decision maker with the results determined using the accounting practices:

	Nine months ended		Consolidated Three months ended	
	09/30/2018	09/30/2017	09/30/2018	09/30/2017

Adjusted EBITDA (*)	4,288,184	3,441,103	1,627,018	1,212,921

(*) The Company discloses its adjusted EBITDA net of its share of investments and other operating income (expenses) because it understands that these should not be considered in the calculation of recurring operating cash generation.

27. INSURANCE

Aiming to properly mitigate risk and in view of the nature of its operations, the Company and its subsidiaries have taken out several different types of insurance policies. Such policies are contracted in line with the Risk Management policy and are similar to the insurance taken out by other companies operating in the same lines of business as CSN and its subsidiaries. The risks covered under such policies include the following: Domestic Transportation, International Transportation, Life and Casualty, Health, Vehicles Fleet, D&O (Civil Liability Insurance for Directors and Officers), General Civil Liability, Engineering Risks, Named Peril, Export Credit, Surety Bond and Port Operator's Civil Liability.

In 2017, after negotiation with insurers and reinsurers in Brazil and abroad, an insurance policy was issued for the contracting of a policy of Operational Risk of Property Damages and Loss of Profits, with effect from September 30, 2017 to March 31, 2019. Under the insurance policy, the LMI (Maximum Limit of Indemnity) is US\$600 million and deductibles in the amount of US\$385 million for material damages and 45 days for loss of profits and covers the following Company's units and subsidiaries: Presidente Vargas Steelworks, CSN Mineração and Sepetiba Tecon. Management understands that the policies covers its assets and the risks to which the Company is subject.

28. ADDITIONAL INFORMATION TO CASH FLOWS

30. INDEPENDENT INVESTIGATION – CONSTRUCTION OF THE LONG STEEL PLANT

Considering the information from a Company's officer published in the press in April 2017, based on testimonials made before the Court, the Audit Committee decided to hire a specialized forensic service to conduct an independent external investigation of the contractual relationship related to the construction of CSN's Long Steel Plant (contract in which there would have been alleged undue payments, as bonus, as a form of reimbursement for payments made to political parties), and to analyze the extent of the business relationships between the contracting parties. The conclusion of the investigation is that nothing from the testimonials referred to above was confirmed, and there are no contingencies deriving from the matters investigated. Consequently, the Company understands that there is no basis to justify the setting up of a provision for losses or the disclosure of a contingency. In October 2017, complying with a determination of the Supreme Federal Court, the Federal Police started an investigation of the facts reported in those testimonials previously mentioned. Subsequently, in February 2018, the Second Panel of the Federal Supreme Court determined that the examination of the facts should occur within the scope of the Electoral Justice rather than the Common Federal Justice. At the moment, the decision of Supreme Federal Court is awaited to send the case to the Electoral Court.

COMMENTS ON THE PERFORMANCE OF BUSINESS PROJECTIONS

1) Projections

The Company clarifies that the information disclosed in this item represents a mere estimate, hypothetical data and cannot be interpreted as a promise of performance by the Company and/or its Management. The projections listed below include market variables that are not under the Company's control and, therefore, may change.

a) Purpose of Projection

CSN estimates a Net Revenue of R\$22.2 billion for 2018.

CSN estimates an adjusted annualized EBTIDA close to R\$5.6 billion for 2018.

CSN estimates a leverage measured by the ratio of net debt to adjusted EBITDA close to 3.5 times over a 9 to 12 months.

b) Period and validity term of the projection.

For the year 2018, is projected Net Revenue of R\$22.2 billion, an adjusted EBITDA close to R\$5.6 billion. In turn, the validity term of the presented projection ends with the results being disclosed for the fiscal year ended December 31, 2018, that will be available to the market within the period established by the local authority.

From 2018 to 2019, CSN estimates a leverage measured by the ratio of net debt to adjusted EBTIDA close to 3.5 times, that will be available to the market at the end of the first half of 2019.

c) Assumptions of the projection, indicating which can be influenced by the issuer's management and which are beyond its control.

c) Assumptions of the projection, indicating which can be influenced by the issuer's management and which are beyond its control. 200

All assumptions mentioned below are subject to the influence of external variables, which are beyond the control of the Company's management. Therefore, in case of relevant changes in these assumptions, the Company may revise its estimates mentioned below, modifying them in comparison with those originally presented.

Net Revenue

The assumptions used to project the estimated Net Revenue for 2018 is 20% above when compared to the previous year.

Adjusted EBITDA

The assumptions used to project the adjusted EBITDA 20% above in 2018, consider the best average prices for flat and long steel in the domestic and foreign markets, as well as the higher sales volume, highlighting the allocation of goods to the domestic market focusing on better operational margins. In relation to the mining, our estimate is that the price levels (Platts) of iron ore will remain the same in 2018 when compared to the previous year.

Leverage 9 to 12 months

The assumptions used for the leverage measured by the ratio of net debt to adjusted EBITDA close to 3.5 times over a 9 to 12 months, is based on an increase of the adjusted EBITDA in 2018 and 2019, resulting in a higher generation of free cash flow and lower net debt, leading to a substantial reduction of the indicator.

If the issuer has disclosed, in the last 3 fiscal years, projections over the progress of its indicators:

a) In the form, inform which were being replaced by new projections and which were being repeated.

There are no new projections.

Estimates have been kept:

CSN estimates a Net Revenue of R\$22.2 billion for 2018.

CSN estimates an adjusted annualized EBTIDA close to R\$5.6 billion for 2018. Estimates maintained:

CSN estimates a leverage measured by the ratio of net debt to adjusted EBITDA close to 3.5 times over a 9 to 12 months.

b) In relation to the projections for periods that have already occurred, compare the projection data with the performance indicators, clearly indicating the reasons that led to deviations in the projections.

b) In relation to the projections for periods that have already occurred, compare the projection data with 2016 perform

In 2017, Net Revenue was 3% higher than the previous estimate, due to the better steel prices.

In 2017, the Adjusted EBITDA was 7% lower than the previous estimate, due to the fact that mining presented an adjusted EBITDA lower than expected in 4Q17.

In 2017, leverage was 13% higher than expected, due to the lower Adjusted EBITDA and exchange-rate appreciation that affected our dollar-debt position, resulting in an above average leverage ratio.

c) In relation to the projections for periods still in progress, inform if the projections remain valid on the date of delivery the form and, when applicable, explain why they were abandoned or replaced.

Estimates in progress:

CSN estimates a leverage measured by the ratio of net debt to adjusted EBITDA close to 3.5 times over a 9 to 12 months.

Follow-up and changes to projections disclosed

The result of the second quarter does not bring any material variation to the results projections previously presented for the year 2018 and 2019, which can therefore be maintained.

Independent Auditor’s Report on Review of the Interim Financial Information

To the

Shareholders, Directors and Management of

Companhia Siderúrgica Nacional

São Paulo – SP

Introduction

We have reviewed the accompanying individual and consolidated interim financial information of Companhia Siderúrgica Nacional (“Company”), identified as Parent and Consolidated, respectively, included in the Interim Financial Information Form (ITR) for the quarter ended September 30, 2018, which comprises the balance sheet as at September 30, 2018 and the related statement of profit and loss and statement of comprehensive income (loss) for the three- and nine-month periods then ended, and the statement of changes in equity and statement of cash flows for the nine-month period then ended, including a summary of significant accounting policies and other explanatory notes.

Management is responsible for the preparation of the individual and consolidated interim financial information in accordance with Technical Pronouncement CPC 21 (R1) - Interim Financial Reporting and IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board (IASB), as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM) applicable to the preparation of Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the standards on auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the individual and consolidated interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual and consolidated interim financial information included in the Interim Financial Information Form (ITR) referred to above is not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34 applicable to the preparation of interim financial information and presented in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM).

Emphasis of matter

Ability of the jointly-controlled subsidiary Transnordestina Logística S.A. to continue as a going concern

We draw attention to Note 10.c) to the interim financial information, which describes the percentage of completion of the new railway network by the jointly-controlled subsidiary Transnordestina Logística S.A. (TLSA), currently under construction and originally scheduled to be completed by January 2017, is currently being revised and discussed by the relevant regulatory bodies. The completion of the work under the project (and consequent start of operations) is contingent upon receiving ongoing financial contribution from TLSA's shareholders and third parties. These events and conditions, together with other issues described in note 10.c) to the financial statements, indicate the existence of significant uncertainty that may raise significant doubt as to TLSA's ability to continue as a going concern. Our conclusion is not qualified regarding this matter.

Other matters

Interim statements of value added

We have also reviewed the individual and consolidated statements of value added (DVA) for the nine-month period ended September 30, 2018, prepared under the responsibility of the Company's management, the presentation of which is required by the standards issued by the Brazilian Securities and Exchange Commission (CVM) applicable to the preparation of interim financial information and considered supplemental information by IFRS, which does not require the presentation of a DVA. This interim financial information was subject to the same review procedures described above and, based on our review, nothing has come to our attention that causes us to believe that it was not fairly presented, in all material respects, in relation to the individual and consolidated interim financial information taken as a whole.
