**Consolidated  
TCO's  
Operating  
Highlights**

- Continued market leadership as a result of the increase in the **customer base** by 17.1% in the last 12 months, with 2.6% growth of the prepaid customer base, despite strong competition.
- **SAC** decreased by 18.9% and 17.6% in the comparison between 4Q04 and 3Q05, respectively, as a result of the reduction in the total subsidy, however continuing with the customer retention efforts, specially the medium and high end ones.
- **The postpaid ARPU** of R\$ 86.8 increased by 5.3% in relation to 4Q04, due to the increase in the outgoing ARPU, despite the change in the customer mix. In the year-to-date total, the 0.6% reduction was mainly due to a drop in the inbound ARPU. The **blended ARPU** of R\$ 25.9 recorded a 19.0% increase over 2004, reflecting a decrease in the prepaid ARPU, due, among other factors, to the outgoing traffic and the MOU of this segment.

- The **post-paid MOU** increased by 6.2% and 5.6% in relation to the accumulated total for 2005 and 2004 and in the comparison between 4Q05 and 4Q04, respectively, due to the increase in the post-paid outgoing MOU. On the other hand, the total MOU was impacted by the changes in the customer mix, once the prepaid MOU is impacted by the reduction in the fixed-mobile inbound traffic.

**Net Services Revenue** The net services revenue grew 5.0% in the accumulated total for 2005 in comparison to 2004, recording R\$ 1,972.7 million. Such growth was caused, mainly, by the increase in the customer base and by the increased use of data services, despite the effects of the customer profile adequacy, such as Vivo Ideal and customer loyalty campaigns.

It must be highlighted that “subscription and usage revenue” recorded a 14.5% increase in the accumulated total for 2005 over 2004, due to the increase in the total outgoing traffic. In the service revenue mix, this increase was partially offset by a reduction in the inbound traffic revenue, as a result of the transition from fixed-mobile traffic to mobile-mobile traffic, with consequent drop in interconnection revenue and the partial Bill & Keep effect.

Data revenues grew 39.5% in the comparison between the accumulated total for 2005 and for 2004, representing 5.6% of the net service revenues in 2005 (4.2% in 2004). This increase has continued to occur due to a more widespread access and use of such services, in addition to the several services launched on the market and the increase in the customer base. The SMS accounted for 71.6% of data revenues in 2005. Average number of SMS messages sent per month in the accumulated total for 2005 was some 38.8 million.

**Personnel Cost**

The increase in personnel cost in the comparison between the accumulated total for 2005 and 2004 is due to salary adjustments arising out of the November/2004, the investments in training and the incentive campaigns for the selling team.

The positive variation between 4Q05 and 3Q05 is a result of the collective agreement signed in November/2005 and the reflexes in provisions and benefits.

<b><i>Cost of Services Rendered</i></b>	<p>The 110.8% increase in the cost of services rendered by TCO, in 4Q05, when compared to 4Q04, and of 67.6% in the accumulated total for 2005, in relation to 2004, is due to an increase in the number of links and negotiations of connection means as well as the increase in the customer base. The variation recorded in “Fistel and other fees and contributions” in the periods under examination arises out of equalization of TCO’s accounting criteria to the other Group Companies, as well as of the increase in expenses with third-party services, especially plant maintenance and electric power.</p>
<b><i>Cost of Goods Sold</i></b>	<p>Cost of goods sold decreased by 35.7% in relation to 4Q04 and by 10.3% in the comparison between the accumulated total for 2005 and 2004, mostly due to the increase in the number of customer additions, reduced costs and improved mix of handsets, as a result of market conditions.</p>
<b><i>Selling Expenses</i></b>	<p>In 4Q05, selling expenses increased by 83.7% in relation to 4Q04 and by 58.6% in the comparison between the accumulated totals for 2005 and 2004, caused by an increase in expenses with third-party services, especially publicity, commissions, and post-sale “client care”, resulting from the increase in the total traffic recorded in 2005.</p> <p>The Provision for Bad Debt – PBD recorded the amount of R\$ 113.0 million in 4Q05 and R\$ 224.6 million in the year 2005.</p> <p>In addition to the effect from adjustments in the recognition of the acquisition of customers, it must be mentioned that the company provisioned revenue from receivables of calls made through the networks of other operators. Such values, according to the present regulation are obligatorily paid to the cited operators, independently of recognition of such calls from our clients. It must be said that structural measures and process actions have been adopted, including substitution of systems and certification of analog networks and TDMA of other operators to substantially reduce said expenses.</p> <p>Disregarding the above mentioned effects, we estimate that the PDD would have recorded R\$ 44.4 million for 4Q05 and R\$ 107.8 million for year 2005, in line with the business evolution.</p> <p>By the same criterion, we estimate that the EBITDA in 4Q05 would have been R\$ 184.7 million with an EBITDA Margin of 32.4%. For the year 2005 the EBITDA would have been R\$ 766.1 million with a 33.7% margin.</p>
<b><i>General and Administrative Expenses</i></b>	<p>The 20.9% reduction in general and administrative expenses in 4Q05, as compared to 3Q05, is due to the recognition on 3Q05 of a provision for value-added tax. In the accumulated total for 2005, the 28.7% increase over 2004 is due to the increase in</p>

the costs of third-party services, especially labor and systems maintenance.

**Other Operating Revenues/ Expenses**

Increase of R\$ 41.7 million in the revenue in 4Q05 in relation to the same period of the previous year and increase of R\$ 19.4 million in the accumulated total of 2005 over 2004, caused by an extraordinary effect referring to recovery of expenses with taxes and reversal of contingencies provision.

**EBITDA**

In the year-to-date figure, the EBITDA (earnings before interests, taxes, depreciation and amortization) was R\$ 649.3 million, with 28.6% margin. The variation recorded in the EBITDA in the period reviewed was caused, among other factors, by the drop in the revenue from sale of handsets, partially offset by the reduction in the cost of goods, as well as by the increase in selling costs (PDD and third party), and by the cost of services rendered (Fistel and other fees and contributions and third-party services).

**Depreciation and Amortization**

Depreciation and amortization expenses recorded R\$ 70.3 million in 4Q05 and R\$ 262.8 million in the accumulated total for 2005, representing 3.5% increase in 4Q05 in relation to the previous quarter and 25.1% in the comparison between the accumulated total for 2005 and 2004, due to the investments effected, especially in function of the overlay to the CDMA network and incoming operational assets, as a result of the conclusion of works.

**Net Financial Revenues (Expenses)**

Net financial revenues in 4Q05 recorded a reduction of R\$ 15.7 million when compared to 3Q05. Such result was due to the positive effect in 3Q05 of the discount of R\$ 7.3 million obtained in the advanced payment of the tax incentive with the State of Goiás Treasury Department (Teleproduzir) and the decrease in the interest rate for the period earned from the company's financial investments (4.74% in 3Q05 and 4.31% in 4Q05). Other effects which caused such reduction were the increase of R\$ 2.4 million, in relation to 3Q05, in the expenses with Pis/Cofins taxes on Interest on Own Capital referring to fiscal year 2005, and the increase in the monetary adjustment occurred in 4Q05, which is assessed on Contingencies (Telebrás spin-off).

The increase in the interest rate of 2005 over 2004 (16.17% in 2004 and 19.0% in 2005), together with the increase in the net cash position of the Company, caused an increase in the net financial revenue over 2004 of R\$ 54.9 million.

**Net Profit**

The net profit in the quarter was R\$ 63.2 million, and in the accumulated total for the year was R\$ 339.1 million.

**Indebtedness** On December 31, 2005, TCO's debt related to loans and financings amounted to R\$ 108.9 million (R\$ 140.7 million on September 30, 2005), 28% of which is nominated in foreign currency. The Company has signed exchange rate hedging contracts thus protecting 100% of its financial debt against foreign exchange volatility, so that the final cost (debt and swap) is reais-referenced. This debt was offset by cash and financial investments (R\$ 894.5 million) and by derivative assets and liabilities (R\$ 15.2 million payable) resulting in a net cash position of R\$ 770.4 million, a 14.2% reduction in relation to September 2005.

The payments effected in December 2005 of Interest on Own Capital referring to fiscal year 2004 (R\$ 51.1 million) and to Interim Dividends for fiscal year 2005 (R\$ 46.4 million), besides the postponement of the maturity dates of some postpaid cycles were the key factors which caused the reduction in TCO's net cash position in the comparison between 4Q05 and 3Q05.

TCP's and TCO's businesses, allowing enhanced synergies between the referred Companies, which, either directly or through the respective operators controlled by them, already use "VIVO brand".
