Media release

Credit Suisse Group reports record income from continuing operations of CHF 8.5 billion for 2007

Income from continuing operations of CHF 1.3 billion for the fourth quarter

Diluted earnings per share from continuing operations of CHF 7.65 for 2007; diluted earnings per share from continuing operations of CHF 1.21 for the fourth quarter

Strong BIS tier 1 ratio of 11.4% as of December 31, 2007

Proposal for increased cash dividend of CHF 2.50 per share for 2007

In the fourth quarter: continued strong growth in Private Banking; Investment Banking remained profitable; valuation reductions led to a loss in Asset Management

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Zurich, February 12, 2008 **Credit Suisse Group reported income from continuing operations of CHF 8,549 million for the full year 2007, an increase of 3% compared to 2006. Net revenues on a core results basis also increased 3% to CHF 36,130 million in 2007. Net income in 2007 was CHF 8,549 million, down from CHF 11,327 million in 2006, which included income from discontinued operations of CHF 3,070 million. Diluted earnings per share from continuing operations for 2007 were CHF 7.65 compared to CHF 7.19 for 2006, and were CHF 1.21 for the fourth quarter of 2007 compared to CHF 2.29 for the fourth quarter of 2006. The return on equity was 19.8% in 2007 and 12.4% in the fourth quarter of 2007.**

Commenting on the results, Brady W. Dougan, Chief Executive Officer, said: I am pleased to announce record results for 2007, which we achieved in an extremely challenging environment. Our integrated business model, global reach, strong risk management capabilities and capital position proved important competitive advantages, as we delivered year-on-year growth and sustained profitability. As a result, the Board of Directors is proposing a further increase to the cash dividend to CHF 2.50 per share.

He continued: The resilience of our business model and our disciplined approach were clearly reflected in our fourth-quarter results. Private Banking delivered strong growth, benefiting from both the expansion of our international platform in Wealth Management and improved profitability from Corporate & Retail Banking. We contained the impact of the credit market dislocation in Investment Banking and increased revenues from the previous quarter, with strong performances in several major business areas. Our Asset Management division reported a loss in the quarter, reflecting valuation reductions from securities purchased from our money market funds. However, before these valuation reductions, Asset Management continued to perform well, particularly in alternative investments.

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Media Release
February 12, 2008

Page 2/7

He concluded: Our performance in 2007 provides a strong foundation for 2008. Our earnings base is well diversified by business and geography and we have good growth prospects across our businesses. Our risk management capabilities are strong and we are benefiting from increasing bank-wide efficiencies. We are well capitalized and conservatively funded. Most importantly, our integrated model sets us apart from many of our peers and gives us attractive opportunities for sustainable growth and value creation even in the face of difficult markets. These strengths make me confident in our ability to deliver a superior performance over market cycles.

Financial Highlights

(in CHF million, except where indicated)	2007	Change in % vs 2006	4Q2007	Change in % vs 3Q2007	Change in % vs 4Q2006

Segment Results

Private Banking

Private Banking, which comprises the Wealth Management and Corporate & Retail Banking businesses, reported record income from continuing operations before taxes of CHF 5,486 million for the full year 2007, an increase of 19% from 2006.

In the fourth quarter of 2007, income from continuing operations before taxes was CHF 1,377 million, an increase of 20% compared to the fourth quarter of 2006.

The **Wealth Management** business reported record income from continuing operations before taxes of CHF 3,865 million for the full year 2007, up 19% from 2006. Net revenues grew 17% to a record level and total operating expenses rose 15%. The pre-tax income margin was 40.3% in 2007 compared to 39.6% in 2006.

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

In the fourth quarter of 2007, income from continuing operations before taxes was CHF 976 million, up 20% from the fourth quarter of 2006. The 19% growth in net revenues was driven by an improvement in recurring revenues, reflecting higher net interest income and higher commissions and fees, particularly from managed investment products and performance-based fees. Total operating expenses grew 17%, driven by higher compensation and benefits, due to the ongoing strategic investment in the global

February 12, 2008

Page 3/7

franchise, and higher total other operating expenses. The pre-tax income margin was 39.4% in the fourth quarter of 2007 compared to 39.0% in the fourth quarter of 2006.

The *Corporate & Retail Banking* business reported a 19% increase in income from continuing operations before taxes to a record CHF 1,621 million for the full year 2007. Net revenues increased 13% in 2007 to a record level and total operating expenses rose 9%. The pre-tax income margin was 41.2% in 2007 compared to 38.9% in 2006.

In the fourth quarter of 2007, income from continuing operations before taxes was CHF 401 million, an increase of 21% compared to the same period of 2006. Net revenues rose 12% to a record level, reflecting significantly higher total non-interest income. Net releases of provisions for credit losses were CHF 8 million, compared to net releases of CHF 24 million in the fourth quarter of 2006. Total operating expenses rose 4%. The pre-tax income margin was 40.0% in the fourth quarter of 2007 compared to 37.1% in the fourth quarter of 2006.

Investment Banking

Investment Banking reported income from continuing operations before taxes of CHF 4,826 million for the full year 2007, a decrease of 19% compared to 2006, reflecting the challenging operating environment in the second half of the year. Net revenues decreased 2% in the full year, as higher revenues in equity trading, equity underwriting and advisory and other fees were offset by significantly lower revenues in fixed income trading and debt underwriting. Total operating expenses increased 3% from 2006, primarily reflecting credits from insurance settlements for litigation and related costs of CHF 508 million in 2006. The compensation/revenue ratio was 50.6% in 2007 compared to 50.1% in 2006. The pre-tax income margin was 24.0% in 2007 compared to 29.1% in 2006.

In the fourth quarter of 2007, income from continuing operations before taxes was CHF 328 million, a decrease of 86% compared to the strong fourth quarter of 2006. Net revenues declined 36% from the same period a year earlier, due in large part to the impact of the current credit market dislocations on the fixed income businesses.

Net revenues reflected net writedowns in the leveraged finance and structured products businesses of CHF 1.3 billion in the fourth quarter of 2007. The leveraged finance business had net writedowns of CHF 231 million in the fourth quarter of 2007. Within this business, unfunded and funded non-investment grade loan commitments, both leveraged loan and bridge, were CHF 36.0 billion at the end of the quarter, down from CHF 58.6 billion at the end of the third quarter. The majority of the funded and unfunded loan commitments exposure is to large cap issuers with historically stable cash flows and substantial assets. The commercial mortgage-backed securities (CMBS) business had net writedowns of CHF 384 million in the quarter. Within this business, the origination gross exposure was CHF 25.9 billion at the end of the quarter, down from CHF 35.9 billion at the end of the third quarter. The vast majority of the loans are secured by stable, high quality, income-producing real estate to a diverse range of borrowers in the US, Europe and Asia. The residential mortgage-backed securities (RMBS) business had net writedowns of CHF 480 million in the fourth quarter of 2007. Within this business, the net US subprime exposure was CHF 1.6 billion at the end of the quarter, down from CHF 3.9 billion at the end of the third quarter. Other RMBS non-agency exposure was CHF 7.1 billion at the end of the fourth quarter, down from CHF 12.4 billion at the end of the previous quarter. The asset-backed securities collateralized debt obligations (CDO) origination, warehousing and synthetic businesses had net writedowns of CHF 164 million in the fourth

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Media Release

February 12, 2008

Page 4/7

quarter. The CDO business had net subprime exposure of CHF 2.7 billion at the end of the quarter, compared to CHF 2.3 billion at the end of the third quarter.

The decline in fixed income trading results in the fourth quarter of 2007, reflecting the dislocation in the structured products and credit markets, was partly offset by strong performances in the interest rate products, fixed income proprietary trading and foreign exchange businesses. Equity trading benefited from strong performances in the global cash, prime services and derivatives businesses in the fourth quarter. Equity proprietary trading returned to profitability after losses in the third quarter. Fixed income and equity trading also benefited from fair value gains of CHF 489 million in the fourth quarter due to widening credit spreads on Credit Suisse debt. Underwriting and advisory revenues declined compared to the fourth quarter of 2006, but improved compared to the third quarter of 2007.

Total operating expenses decreased 9% compared to the fourth quarter of 2006, due primarily to a decrease in compensation and benefits expenses. The compensation/revenue ratio was 53.1% in the fourth quarter of 2007 compared to 42.2% in the fourth quarter of 2006, reflecting a significantly higher level of revenues in the fourth quarter of 2006. The pre-tax income margin was 8.4% in the fourth quarter of 2007 compared to 38.5% in the fourth quarter of 2006.

Asset Management

The Asset Management segment reported income from continuing operations before taxes of CHF 354 million for the full year 2007, a decrease of 30% compared to 2006. Net revenues declined 10% compared to the previous year and total operating expenses were down 5%. The pre-tax income margin was 13.7% in 2007 compared to 17.8% in 2006. As of December 31, 2007, assets under management were CHF 691.3 billion, an increase of 3.2% from December 31, 2006.

In the fourth quarter of 2007, income from continuing operations before taxes was a loss of CHF 247 million, mainly due to valuation reductions of CHF 774 million from securities purchased from our money market funds. In the fourth quarter of 2006, income from continuing operations before taxes was CHF 89 million. The above-mentioned securities were purchased in order to address liquidity concerns caused by the extreme conditions in the US market.

Before the valuation reductions, income from continuing operations before taxes was a strong CHF 527 million in the fourth quarter of 2007. Net revenues declined 52% in the fourth quarter of 2007 compared to the same period of 2006 but increased 53% before the valuation reductions, benefiting from strong asset management and administrative fees, significantly higher private equity and other investment-related gains and performance-based fees, and solid private equity commission. Total operating expenses decreased 7% in the fourth quarter of 2007 compared to the same period a year earlier. The pre-tax income margin was a negative 69.8% in the fourth quarter of 2007 compared to a positive 12.1% in the fourth quarter of 2006. Before the valuation reductions, the pre-tax income margin was 46.7% in the fourth quarter of 2007.

Net New Assets

The Wealth Management business generated CHF 50.2 billion of net new assets in 2007, compared to CHF 50.5 billion in 2006. In the fourth quarter of 2007, Wealth Management recorded CHF 12.0 billion of net new assets, with strong contributions from Asia and Europe, Middle East and Africa (EMEA), up from CHF 8.6 billion in the fourth quarter of 2006. The Asset Management segment had CHF 3.6 billion of net new assets in 2007. In the fourth quarter, Asset Management recorded net outflows of CHF 24.9 billion, including outflows of CHF 27.9 billion in money market assets, CHF 3.3 billion in balanced assets and CHF 3.1 billion in equities and fixed income, offset in part by inflows of CHF 9.7 billion in alternative investments. Total assets under management were CHF 1,554.7 billion as of December 31, 2007, an increase of 4.7% from December 31, 2006.

Proposal for increased dividend

The Board of Directors will propose an increased cash dividend of CHF 2.50 per share for the financial year 2007 at the Annual General Meeting on April 25, 2008. This compares to a dividend of CHF 2.24 per share and a par value reduction of CHF 0.46 per share for the financial year 2006, which benefited from the proceeds from the sale of the insurance business.

Cautionary Statement Regarding Forward-Looking and Non-GAAP Information

This press release contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- Our plans, objectives or goals;
- Our future economic performance or prospects;
- The potential effect on our future performance of certain contingencies; and
- Assumptions underlying any such statements.

Words such as believes, anticipates, expects, intends and plans and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- The ability to maintain sufficient liquidity and access capital markets;
- Market and interest rate fluctuations;
- The strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations in particular;
- The ability of counterparties to meet their obligations to us;
- The effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- Political and social developments, including war, civil unrest or terrorist activity;
- The possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- Operational factors such as systems failure, human error, or the failure to implement procedures properly;
- Actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
- The effects of changes in laws, regulations or accounting policies or practices;
- Competition in geographic and business areas in which we conduct our operations;
- The ability to retain and recruit qualified personnel;
- The ability to maintain our reputation and promote our brand;
- The ability to increase market share and control expenses;
- Technological changes;
- The timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- Acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- The adverse resolution of litigation and other contingencies; and
- Our success at managing the risks involved in the foregoing.

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, as well as the information set forth in our Form 20-F Item 3 - Key Information - Risk factors.

This press release contains non-GAAP financial information. Information needed to reconcile such non-GAAP financial information to the most directly comparable measures under GAAP can be found in Credit Suisse Group's Financial Review 4Q07 and Credit Suisse Group's Financial Statements 4Q07.

Cautionary statement

Cautionary statement regarding forward-looking and non-GAAP information

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995.

Forward-looking statements involve inherent risks and uncertainties, and we might not be able to achieve the predictions, forecasts, projections and other outcomes we describe or imply in forward-looking statements.

A number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions we express in these forward-looking statements, including those we identify in "Risk Factors" in our Annual Report on Form 20-F for the fiscal year ended December 31, 2006 filed with the US Securities and Exchange Commission, and in other public filings and press releases.

We do not intend to update these forward-looking statements except as may be required by applicable laws.

This presentation contains non-GAAP financial information. Information needed to reconcile such non-GAAP financial information to the most directly comparable measures under GAAP can be found in Credit Suisse Group's fourth quarter report 2007.

Summary

Delivered record revenues and income in a challenging environment

Growth momentum and strong profitability in Private Banking

further investing in the international expansion

net new asset momentum in Asia and increased global hiring

Maneuvered well through difficult environment in Investment Banking

avoided excessive exposures, driven bank-wide by risk management culture

losses well contained

Strong performance across most Asset Management businesses, but performance affected by losses on purchased money market securities

Strong capital and conservative liquidity management

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Fourth-quarter and full-year 2007 results

Renato Fassbind, Chief Financial Officer

Risk management update

Wilson Ervin, Chief Risk Officer

Strategy review and outlook

Brady W. Dougan, Chief Executive Officer

Introduction

Brady W. Dougan, Chief Executive Officer

Our risk framework worked effectively in 2007

Investment Banking
navigated effectively
through difficult markets

Total 2007 net writedown of CHF 2.0 bn; among the
lowest in peer group

Profitable in third and fourth quarter and delivered
strong earnings for 2007

Avoided excessive subprime and CDO risks

Positions actively managed and significantly reduced in fourth quarter

Asset Management
addressed stress conditions
in money market sector

Securities taken on balance sheet and marked-to-market

Money market funds now restored to normal operations

Purchased securities reduced by 58% in fourth quarter

**Strong risk framework
and governance**

Independent risk function reporting to CEO; strong senior oversight

Independent pricing controls and consistent fair value disciplines
across key sectors, reporting to CFO

Disciplined credit selection; credit performance continues to be solid

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Investment Banking: Overview of key sectors

CMBS exposures are fundamentally different from residential mortgage exposures

Majority of our portfolio is secured by high quality, income-producing real estate

Development loans are less than 5% of our portfolio and have an average LTV of 51%

Portfolio is well-diversified with solid LTV ratios

UK

2%

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Residential mortgage (RMBS) exposure and portfolio analysis

Reduced origination activity early in crisis

RMBS re-positioned largely as a trading business;
exposures are managed on a net basis

US subprime positions reduced by 59% in 4Q07;
positions also reduced in higher quality credit
sectors (Alt-A and Prime)

Exposures are fair valued based on market levels

Benchmark price testing: valuations for our
subprime positions (across both RMBS and
CDOs) are consistent with ABX index levels

Significant amount of additional index hedges

Other focus sectors

We do not rely on monolines in our subprime hedging, in either RMBS or CDO trading

Gross credit exposures of approx. CHF 2 bn with monolines are more than offset by combination of reinsurance, other hedges and trading positions

Monolines

SIVs

Credit Suisse does not sponsor any SIVs

Investment bank has CHF 930 m of gross exposure (mostly undrawn liquidity facilities)

SIV = Structured Investment Vehicles

Asset Management: money market fund repositioning

Gross exposure (CHF bn)

4Q07

CHF m

4Q07

2007

Responded to highly stressed market conditions
affecting money market funds

Bought CHF 9.3 bn of securities from its third party
funds onto Credit Suisse balance sheet

Actions taken to maintain liquidity and to protect client
franchise

Money market funds are now operating normally

No material exposure to SIVs, CDOs or US subprime

Purchased securities caused significant losses

Valuations impacted as mortgage market stress
began to affect higher rated securities

Positions are marked-to-market, and carry typical
discounts to par of 15% to 20%

Portfolio reduced by 58% in 4Q07 and we continue to
reduce/hedge positions

Securities transferred to bank balance sheet

3,921

Value-at-Risk (VaR)

Broad measure of trading risk, calculated in line with regulatory requirements

Based on historical market data (backward looking)

As 2H07 market swings were absorbed into the model, the VaR for the same positions increased by almost 2x (vs. pre-crisis calibration at mid-year)

When adjusted for model effects, 4Q07 VaR is roughly flat vs. 2Q07 and up 21% vs. 3Q07

Actual trading P&L was more volatile than predicted by VaR in fall 2007 (until new market volatility was incorporated by the model)

As these limitations of VaR are well known, we do not use VaR as part of our planning for stress events

Reported VaR in CHF m

Proprietary risk model based on long-term
stress market analysis

Captures all positions on a consistent basis
(incl. market, credit and investment risks)

Assumptions generally held up well, even
vs. 2007 stress levels

ERC declined 10% in 4Q07 as IB worked
down key positions; risk capital coverage
remains strong

Disclosed on quarterly basis to show
portfolio trends

Helped us take action in certain portfolios
(e.g. Leveraged finance) in early 2007

ERC risk breakdown at 4Q07

ERC a broader view of risk

Conclusions

Risk Management is a key part of Credit Suisse's culture at all levels

Broad risk perspective and sophisticated tools

Strong risk culture and proactive management

Independent risk control, measurement and approval

Strong management oversight and governance

Navigated effectively through difficult market conditions

Positions are actively managed and cut significantly in fourth quarter

Extensive hedging

Credit performance continues to be solid

Net writedowns among the lowest in industry

Agenda

markets

Outlook

Expect challenging environment to continue near-term, but remain well positioned given capital strength and well established efficiency culture

Substantial opportunities to grow and strengthen our franchise

Long-term growth prospects for Wealth Management remain intact

Growth in Investment Banking targeted at the less cyclical areas

Asset Management continues to grow significantly in high margin businesses
