NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Description of the Business

Global Healthcare REIT, Inc. (the Company or Global) was organized with the intent of operating as a real estate investment trust (REIT) for the purpose of investing in real estate and other assets related to the healthcare industry.

Prior to the Company changing its name to Global Healthcare REIT, Inc. on September 30, 2013, the Company was known as Global Casinos, Inc. Global Casinos, Inc. operated two gaming casinos which were split-off and sold on September 30, 2013. Simultaneous with the split-off and sale of the gaming operations, the Company acquired West Paces Ferry Healthcare REIT, Inc. (WPF).

The Company intends to make a REIT election under sections 856 through 859 of the Internal Revenue Code of 1986, as amended. Such election will be made by the Board of Directors at such time as the Board determines that operating a REIT structure is appropriate.

On September 30, 2013, Global acquired all of the outstanding common stock of WPF in consideration of \$100. WPF owned a 65% membership interest in Dodge NH, LLC, which owned a skilled nursing facility located in Eastman, Georgia. Upon acquisition of WPF, a new board of directors and executive officers were installed who have the ability to exercise control over the combined entity. WPF's total assets and revenues were the largest of each of the combined entities. The acquisition was accounted for as a reverse acquisition whereby WPF was deemed to be the accounting acquirer. The results of operations of Global have been included in the consolidated financial statements since the date of the reverse acquisition. The historical financial statements of WPF are presented as the historical financial statements of the Company.

WPF acquired a 65% controlling interest in Dodge NH, LLC (Dodge) on March 15, 2013, from Georgia Healthcare REIT, Inc. (Ga. REIT). Ga. REIT is related to WPF through common ownership and control. Dodge was formed for the purpose of acquiring Middle Georgia Nursing Home, a 100 bed nursing home located in Eastman, Georgia. The nursing home acquisition was completed by Dodge effective July 1, 2012. From inception, Dodge has leased the facility to an unrelated third party nursing home operator described more fully in Note 13. The remaining 35% of Dodge is owned by Dodge Investors, LLC (Dodge Investors). Dodge Investors loaned funds totaling \$1,100,000 to Dodge that were used in conjunction with a loan from Colony Bank (Note 8) to acquire the facility on July 1, 2012.

Dodge Investors represents a portion of the noncontrolling interests presented in these consolidated financial statements.

Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with U.S. Generally Accepted Accounting Principles (U.S. GAAP) for interim financial information and in conjunction with the rules and regulations of the Securities Exchange Commission. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments considered necessary to make the consolidated financial statements not misleading

have been included. Operating results for the nine months ended September 30, 2014 are not necessarily indicative of the results that may be expected for the entire year. The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K/A for the year ended December 31, 2013 filed with the Securities and Exchange Commission.

The consolidated financial statements include the accounts of the Company, its wholly-owned subsidiaries and variable interest entities (VIEs) for which the Company has determined itself to be the primary beneficiary. Third party equity interests in subsidiaries and VIEs are recognized as noncontrolling interests in the consolidated financial statements. All significant inter-company balances and transactions have been eliminated in consolidation.

The Company is the primary beneficiary of a VIE if the Company has the power to direct the activities of the VIE that most significantly impact its economic performance and the obligation to absorb losses or receive benefits from the VIE that could be significant to the Company. If the interest in the entity is determined not to be a VIE, then the entity is evaluated for consolidation based on legal form, economic substance, and the extent to which the Company has control and/or substantive participating rights under the respective ownership agreement.

There are judgments and estimates involved in determining if an entity in which the Company has an investment is a VIE. The entity is evaluated to determine if it is a VIE by, among other things, determining if the equity investors as a group have a controlling financial interest in the entity and if the entity has sufficient equity at risk to finance its activities without additional subordinated financial support.

The Company receives the services of consultants and affiliates for which the service providers are not compensated either through cash or equity, and such costs are not currently recorded in the consolidated financial statements but are necessary for the operation of the Company. If the Company had to pay for such services, operating expenses of the Company would have increased and operating cash flows of the Company would have decreased.

Use of Estimates and Assumptions

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Significant estimates included herein relate to the recoverability of assets and the purchase price allocation for properties acquired. Actual results may differ from estimates.

Cash and Cash Equivalents

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

Restricted Cash

Restricted cash consisted of the following as of September 30, 2014 and December 31, 2013:

	September 30, 2014	December 31, 2013
Funds held in escrow related		
to construction projects	\$1,103,766	\$ -
Funds held in escrow related to private		
placement of common stock	-	106,500
Funds held in escrow under the terms of		
notes or bonds payable for purposes of		
paying future debt service costs	808,649	201,138
	\$1,912,415	\$307,638

Concentration of Credit Risk

The Company maintains deposits in financial institutions that at times exceed the insured amount of \$250,000 provided by the U.S. Federal Deposit Insurance Corporation (FDIC). The excess amounts at September 30, 2014 and December 31, 2013 were \$1,997,889 and \$908,281, respectively.

Property and Equipment

In accordance with purchase accounting guidance established for entities under common control, the property and equipment acquired from entities under common control are stated at their carrying value on the date of acquisition.

Property and equipment not owned by entities under common control is recorded at its estimated fair value. Estimated fair value is determined with the assistance from independent valuation specialists using recent sales of similar assets, market conditions or projected cash flows of properties using standard industry valuation techniques.

Upon acquisition of real estate properties, the Company determines the total purchase price of each property and allocates this price based on the fair value of tangible assets and intangible assets, if any, acquired and any liabilities assumed. Information used to determine fair value includes comparable sales values, discount rates, capitalization

rates, and lease-up assumptions from a third party appraisal or other market sources.

Any subsequent betterments and improvements are stated at historical cost. Depreciation is provided using the straight-line method over the estimated useful lives of the assets. Useful lives of the assets are summarized as follows:

Land Improvements	15 years
Buildings and Improvements	30 years
Furniture, Fixtures and Equipment	10 years

Impairment of Long Lived Assets

When circumstances indicate the carrying value of property and equipment may not be recoverable, the Company reviews the property for impairment. This review is based on an estimate of the future undiscounted cash flows, excluding interest charges, expected to result

from the property's use and eventual disposition. This estimate considers factors such as expected future operating income, market and other applicable trends and residual value, as well as the effects of leasing demand, competition and other factors. If impairment exists, due to the inability to recover the carrying amount of the property, an impairment loss is recorded to the extent that the carrying value exceeds the estimated fair value of the property and equipment. Estimated fair value is determined with the assistance from independent valuation specialists using recent sales of similar assets, market conditions or projected cash flows of the property using standard industry valuation techniques.

Advances Due To and From Related Parties

The Company will periodically advance cash to and receive cash from various related parties as a part of the normal course of business. The Company plans to monitor these non-interest bearing advances on a continual basis, evaluating the creditworthiness of the related party and its ability to repay the advance, generally using the strength and projected cash flows of the underlying related party operations as a basis for extending credit. The Company records allowances for collection against the advances or writes off the account directly, when factors are present that indicate the related party may not be able to repay the advance.

Notes Receivable - Related Parties

The Company evaluates its notes receivable for impairment when it is probable the payment of interest and principal will not be made in accordance with the contractual terms of the note agreements. Once a note has been determined to be impaired, it is measured to establish the amount of the impairment, if any, based on the fair value of the note using present value of expected future cash flows discounted at the note's effective interest. If the fair value of the impaired note receivable is less than the recorded investment in the note, a valuation allowance is recognized.

Deferred Loan Costs

Deferred loan costs are amortized over the life of the related loan using the straight-line method which approximates the effective interest method. Amortization expense for the three month periods ended September 30, 2014 and 2013 totaled \$12,186 and \$10,646, respectively. For the nine month period ended September 30, 2014, it was \$36,557 and for the period from March 13, 2013 (date of inception) through September 30, 2013, it was \$23,066. Accumulated amortization totaled \$100,431 and \$63,874 as of September 30, 2014 and December 31, 2013, respectively. Deferred loan cost amortization is included as a component of interest expense in the consolidated statements of operations.

Goodwill

Goodwill represents the excess of a Company's purchase price over the fair value of the identifiable assets acquired and liabilities assumed in a business combination. Goodwill resulting from acquisitions is not amortized, but is tested for impairment annually or whenever events change and circumstances indicate that it is more likely than not that an impairment loss has occurred. Management initially performs a qualitative analysis of goodwill using qualitative factors to determine if it is more likely than not that the fair value of the Company is less than its carrying amount including goodwill. Such qualitative factors include macroeconomic conditions, industry and market considerations, cost factors, overall financial performance and other relevant entity-specific events. If after assessing the totality of events or circumstances, the Company determines through the qualitative assessment that the fair value of

a reporting unit more likely than not exceeds its carrying value, no further evaluation is necessary, and performing the two-step impairment test is not required. There were no triggering events that required a test of impairment of goodwill during the nine months ended September 30, 2014.

Revenue Recognition

The Company's leases may be subject to annual escalations of the minimum monthly rent required under each lease. The accompanying consolidated financial statements reflect rental income on a straight-line basis over the term of each lease. Cumulative adjustments associated with the straight-line rent requirement are reflected in Prepaid Expenses, Deferred Loan Costs, and Other in the balance sheet and totaled \$45,504 and \$30,000 as of September 30, 2014 and December 31, 2013, respectively. Adjustments to reflect rent income on a straight-line basis totaled \$9,504 and \$3,000 for the three month periods ended September 30, 2014 and 2013, respectively, \$15,504 for the nine month period ended September 30, 2014 and \$10,000 for the period from March 13, 2013 (date of inception) through September 30, 2013.

Income Taxes

The Company will elect to be taxed as a REIT at such a time as the Board of Directors, with the consultation of professional advisors, determines the Company qualifies as a REIT under applicable provisions of the Internal Revenue Code. The Company cannot predict for which tax year that election will be made. Therefore, applicable taxes have been recorded in the accompanying consolidated financial statements.

The Company uses the asset and liability method of accounting for income taxes. Accordingly, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates resulting from new legislation is recognized in income in the period of enactment. A valuation allowance is established against deferred tax assets when management concludes that the more likely than not realization criteria has not been met. The Company recognizes the effect of income tax positions only if those positions are more likely than not of being sustained.

Income (Loss) Per Common Share

Basic income (loss) per share is computed by dividing the net income (loss) attributable to common stockholders for the period by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share is computed based on the weighted average number of common shares and potentially dilutive

common shares outstanding. The calculation of diluted net income (loss) per share excludes potential common shares if the effect would be anti-dilutive. Potential common shares consist of incremental common shares issuable upon the exercise of warrants and shares issuable upon the conversion of preferred stock.

Potentially dilutive shares of 4,454,743 and 3,714,250 for the three months ended September 30, 2014 and 2013, respectively, and 3,714,250 for the period from March 13, 2013 (date of inception) through September 30, 2013, were not included in the calculations of diluted earnings per share, as their inclusion would have been anti-dilutive due to the loss recorded for the

periods, and represent stock purchase warrants and shares issuable upon conversion of preferred stock.

Comprehensive Income

For the periods presented, there were no differences between reported net income (loss) and comprehensive income (loss).

Recently Issued Accounting Pronouncements

During April 2014, the FASB issued Accounting Standards Update ("ASU") No. 2014-08, "Presentation of Financial Statements and Property, Plant and Equipment; Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity." ASU 2014-08 modifies the requirements for reporting discontinued operations. Under the amendments in ASU 2014-08, the definition of discontinued operation has been modified to only include those disposals of an entity that represent a strategic shift that has (or will have) a major effect on an entity's operations and financial results. ASU 2014-08 shall be applied prospectively for periods beginning on or after December 15, 2014, with early adoption permitted. The Company adopted ASU 2014-08 as of January 1, 2014 on a prospective basis for transactions occurring after the adoption date.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers. This ASU requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. This ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for the Company on January 1, 2017. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. We are evaluating the effect that ASU 2014-09 will have on our consolidated financial statements and related disclosures. We have not yet selected a transition method nor have we determined the effect of the standard on our ongoing financial reporting.

2. REVERSE ACQUISITION

On September 30, 2013, Global acquired all of the outstanding common stock of WPF for consideration of \$100 plus the elimination on consolidation of a \$500,000 loan from Global to WPF. Upon acquisition of WPF, a new board of directors and executive officers were appointed who have the ability to exercise control over the combined entity.

WPF's total assets and revenues were the larger of the combined entities. The acquisition was accounted for as a reverse acquisition whereby WPF was deemed to be the accounting acquirer and Global the accounting acquiree.

The fair value of the consideration effectively transferred is based on what the legal subsidiary (accounting acquirer) would have had to issue to give the owners of the legal parent the same percentage equity interest in the combined entity that results from the reverse acquisition. The quoted market price of the Company's shares provided a more reliable basis for measuring the fair value of the consideration than the estimated fair value of the share in WPF, as WPF's shares were privately-held. As such, the fair value of the consideration effectively transferred was determined to be \$2,741,918.

Goodwill is calculated as the consideration effectively transferred less the net recognized values of the accounting acquiree's identifiable assets and liabilities. The goodwill recorded as a result of the reverse acquisition is not deductible for tax purposes.

The following table summarizes the estimated fair values of the assets acquired, liabilities assumed and consideration effectively transferred at the acquisition date.

3. ACQUISITION OF A CONTROLLING INTEREST IN DODGE NH, LLC

The Dodge acquisition was recorded by WPF by measuring the recognized assets and liabilities of Dodge at their carrying amount in the accounts of Ga. REIT at the date of acquisition.

WPF completed the acquisition of a controlling 65% equity interest in Dodge on March 15, 2013. The operations of Dodge are presented as if the acquisition occurred on the earliest date presented in the financial statements of the acquirer. Accordingly, the consolidated financial statements reflect rental operations of Dodge for the period from March 13, 2013 through September 30, 2013. The purchase price of this 65% controlling interest was equal to \$100. The equity interest acquired is considered to be a controlling interest in Dodge.

Southern Hills Retirement Center

Effective February 7, 2014, the Company acquired the real property and improvements of Southern Hills Retirement Center, a skilled nursing facility located in Tulsa, Oklahoma. As part of the purchase, the Company assumed an operating lease which will expire in June 2016. The fair value of the real property and improvements acquired was determined to be \$5.0 million based on independent appraisals. The preliminary purchase price allocation resulted in a bargain purchase gain as the seller was motivated to sell these assets since they were no longer a part of the seller's intended ongoing business. The preliminary purchase price allocation is as follows, and the Company expects the purchase price allocation to be finalized within one year of the acquisition date.

5. INVESTMENT IN UNCONSOLIDATED SUBSIDIARIES

Limestone, LLC

Effective March 5, 2014, the Company consummated a Membership Interest Purchase Agreement providing for the purchase from Connie Brogdon, spouse of Christopher Brogdon, President and Director of the Company, for nominal consideration (\$10), a 25% membership interest in Limestone Assisted Living, LLC (Limestone LLC). The remaining 75% membership interest in Limestone LLC is owned by Connie Brogdon (5%) and unaffiliated third parties (70%). The Company also extended a loan to Limestone LLC as described in Note 7.

The Company records this investment using the equity method since the Company has the ability to exercise significant influence, but not control, over Limestone LLC. Under the equity method, the Company has recorded the initial investment at cost and will adjust the carrying amount to reflect the Company's share of the earnings or losses of Limestone LLC. For the three and nine months ended September 30, 2014, the Company's share of losses of Limestone LLC were \$22,731 and \$38,156, respectively. As a result, the Company reduced its investment in

Limestone LLC to zero. U.S. GAAP requires equity method losses that exceed the investment balance to reduce the basis of other investments the Company has with Limestone LLC. As such, the Company has reduced the basis of its note receivable from Limestone LLC by \$38,146.

Limestone LLC owns 100% of the Limestone Assisted Living Facility, a 42-bed, 22,189 square foot assisted living facility located in Gainesville, Georgia. There is senior secured bond debt in the approximate amount of \$3.7 million in addition to the loan described in Note 7.

GL Nursing, LLC

Effective September 16, 2014, the Company acquired a 44.5% membership interest in GL Nursing, LLC which owns the real property and improvements known as the Golden Years Manor Nursing Home located in Lonoke, Arkansas. The purchase price for the 44.5% membership interest was 175,245 shares of the Company's common stock valued at \$1.00 per share. The Company accounts for this investment under the equity method of accounting as it has the ability to exercise significant influence on GL Nursing, LLC. For the three and nine months ended September 30, 2014, the Company's share of income from GL Nursing, LLC was \$655.

6. PROPERTY AND EQUIPMENT

The gross carrying amount and accumulated depreciation of the Company's property and equipment as of September 30, 2014 and December 31, 2013 are as follows:

Note Receivable Gemini Gaming, LLC

In connection with the split-off of gaming assets by Global, the Company accepted a note receivable in the amount of \$962,373 from Gemini Gaming, LLC. The note bears interest at 4.0% and is payable in quarterly installments of \$17,495 beginning on January 1, 2014 through maturity of the note on October 1, 2033. The note is secured by all rights, title, and interest in and to 100,000 shares of the membership interest in Gemini Gaming, LLC. In the event of default, the Company may not take possession of gaming assets or equipment or operate the casino unless duly licensed by the State of Colorado Division of Gaming.

On the acquisition date, the fair value of the note receivable was estimated by discounting the expected cash flows at a rate of 10.0%, a rate at which management believes a similar loan with similar terms and maturity would be made. As a result, the note receivable was discounted by \$362,225 to its fair value of \$600,148. The discount is accreted into earnings using the interest method over the term of the note. For the three and nine months ended September 30, 2014, \$5,514 and \$16,526, respectively, has been accreted into earnings.

Note Receivable Limestone Assisted Living, LLC

The loan was not paid by Limestone LLC as of August 31, 2014 which constitutes an event of default. As additional collateral for the loan, the following security instruments have been executed and are being held in escrow in accordance with the agreement described below:

Bay Landing ALF, LLC (Bay Landing) - The bank holds a second mortgage on an assisted living facility owned by Bay Landing located in Lynn Haven, Florida. Brogdon Family, LLC, of which Christopher Brogdon is a member and the manager, is a 100% owner of Bay Landing.

The Company intends to repay the loan from Colony Bank from the proceeds of a loan which is insured, guaranteed or extended by the United States Department of Agriculture (U.S.DA) or some other agency of the United States of America. To ensure the payment of the loan fees associated with the proposed loan, Colony Bank required the Company to deposit \$200,000 into an escrow account to be used to pay those costs when incurred. The escrow agent will also hold in escrow the security documents for the security interest in Bay Landing described above.

According to the escrow agreement, in the event the Company is unable to obtain the contemplated loan on or before June 30, 2013, the escrow agent is instructed to disburse the \$200,000 maintained in the escrow account to be applied at the Lender's election against the balance of the Colony Bank loan. In addition, Casinos U.S.A, Inc., a wholly-owned subsidiary of Gemini Gaming, LLC that owns and operates the Bull Durham Saloon and Casino located in Black Hawk, Colorado, has guaranteed the lease obligation on a joint and several basis with Gemini Gaming, LLC. All rental payments have been made by Gemini Gaming, LLC on a timely basis, and as a result no payments on the contingency have been required to date, and as management believes the fair value associated with this guarantee is de minimus, we have not recorded a liability in these consolidated financial statements.

The Company has entered into a lease of the skilled nursing facility at Southern Hills Retirement Center which will commence once all construction activities related to the facility are complete. The lease requires of the operating lessee monthly payments of \$35,000 in the initial year. The monthly lease payments escalate by \$1,000 per month on each lease anniversary thereafter through expiration of the lease agreement. The initial term of the lease can be extended for one additional term of five years if the lessee elects to exercise its renewal option and meets the requirements stated in the lease agreement. The lessee is responsible for payment of insurance, taxes and other charges while under the lease.

14. INCOME TAXES

The Company and its subsidiaries are subject to income taxes on income arising in, or derived from, the tax jurisdictions in which they operate. The Company is current with all its federal and state tax filings. The Company is open to examination for tax years 1998 through 2013 due to the carry back of net operating losses.

The following is a reconciliation of the federal statutory tax rate and the effective tax rate as a percentage.

	Three Months Ended September 30, 2014	Three Months Ended September 30, 2013
Statutory Federal Income Tax Rate	34%	34%
Effect of Valuation Allowance on		
Deferred Tax Assets	(34) - %	(34) - %
	Nine Months Ended September 30, 2014	March 13, 2013 (date of inception) through September 30, 2013
Statutory Federal Income Tax Rate	34%	34%
Effect of Valuation Allowance on		
Deferred Tax Assets	(34)	(34)

- %

- %

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

The components of deferred tax assets are as follows:

Deferred Tax Assets	<u>September 30, 2014</u>	<u>December 31, 2013</u>
Net Operating Loss Carry Forwards	\$ 2,618,602	\$ 2,415,827
Capital Loss Carryforward	99,137	-
Discount on Note Receivable	117,538	123,157
Acquisition Costs	140,840	67,573
	2,976,117	2,606,557
Deferred Tax Liabilities		
Bargain Purchase Gain	(1,020,000)	-
Property and Equipment	(126,083)	(119,448)
	(1,046,083)	(119,448)
	1,830,034	2,487,109
Valuation Allowance	(1,830,034)	(2,487,109)
Net Deferred Tax Asset	\$ -	\$ -

The valuation allowance at September 30, 2014 and December 31, 2013 was primarily related to federal net operating loss carryforwards that, in the judgment of management, are not more-likely-than-not to be realized. In assessing the realizability of deferred tax assets, management considers whether it is more-likely-than-not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible.

Management considers the scheduled reversal of deferred tax liabilities (including the impact of available carryback and carryforward periods), projected future taxable income, and tax-planning strategies in making this assessment. In order to fully realize the deferred tax asset, the Company will need to generate future taxable income of approximately \$7,701,000 prior to the expiration of the net operating loss carryforwards beginning in 2018. Taxable loss for the nine month period ended September 30, 2014 approximated \$888,000. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more-likely-than-not that the Company will not realize the benefits of these deductible differences, net of the existing valuation allowance at September 30, 2014.

When more than a 50% change in ownership occurs, over a three-year period, as defined, the Tax Reform Act of 1986 limits the utilization of net operating loss carry forwards in the years following the change in ownership. No determination has been made as of September 30, 2014, as to what implications, if any, there will be in the net operating loss carry forwards of the Company.

15. FAIR VALUE MEASUREMENTS

Financial accounting standards establish a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Level 1 inputs have the highest priority, and Level 3 inputs have the lowest priority. In some cases, the inputs used to measure fair value might fall in different

levels of the fair value hierarchy. When this happens, the level in the fair value hierarchy that the asset or liability falls under is based on the lowest input level that is significant to the fair value measurement in its entirety.

Level 1 Inputs - Fair values are based on quoted prices (unadjusted) in active markets for identical assets that the Company has the ability to access at the measurement date.

Level 2 Inputs - Fair values are based on inputs other than quoted prices included within Level 1 that are observable for valuing the asset or liability, either directly or indirectly (i.e. interest rate and yield curves observable at commonly quoted intervals, default rates, etc.). Observable inputs include quoted prices for similar assets or liabilities in active or non-active markets. Level 2 inputs may also include insignificant adjustments to market observable inputs.

Level 3 Inputs - Fair values are based on unobservable inputs used for valuing the asset or liability. Unobservable inputs are those that reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability, based on the best information available in the circumstances.

We generally determine or calculate the fair value of financial instruments using quoted market prices in active markets when such information is available or using appropriate present value or other valuation techniques, such as discounted cash flow analyses, incorporating available market discount rate information for similar types of instruments and our estimates for non-performance and liquidity risk. These techniques are significantly affected by the assumptions used, including the discount rate, credit spreads, and estimates of future cash flow.

Our balance sheets include the following financial instruments: cash and cash equivalents, advances to related parties, notes receivable, restricted cash, accounts payable, notes payable and lease security deposit. We consider the carrying values of our short-term financial instruments to approximate fair value because they generally expose the Company to limited credit risk, because of the short period of time between origination of the financial assets and liabilities and their expected settlement, or because of their proximity to acquisition date fair values. The carrying value of notes payable approximates fair value based on borrowing rates currently available for debt of similar terms and maturities.

Upon acquisition of real estate properties, the Company determines the total purchase price of each property and allocates this price base on the fair value of the tangible assets and intangible assets, if any, acquired and any liabilities assumed based on Level 3 inputs. These Level 3 inputs can include comparable sales values, discount rates, capitalization rates, and lease-up assumptions from a third party appraisal or other market sources.

16. SUPPLEMENTAL DISCLOSURE OF CASH FLOW INFORMATION

The Company acquired a controlling 65% interest in Dodge NH, LLC on March 15, 2013. On this acquisition date, unrestricted cash and cash equivalents held by Dodge totaled \$11,188. The non-cash elements of this acquisition are described in more detail in Notes 1 and 3.

The Company issued 477,950 shares of common stock in exchange for membership interests in various entities during the nine months ended September 30, 2014. The fair value assets acquired and liabilities assumed in the transactions are described in Note 4.

For the nine months ended September 30, 2014, notes payable and accrued interest totaling \$153,432 were converted into 204,575 shares of common stock in connection with the private offering.

A total of 325,000 shares of Series D Preferred Stock were converted into 325,000 shares of common stock during the nine months ended September 30, 2014.

The fair value of common stock issued to an employee during the nine months ended September 30, 2014 totaled \$47,348.

In July 2014, the Company issued 23,993 shares of common stock related to the cashless exercise of 47,985 warrants to purchase common stock at an exercise price of \$0.50 based on the market value of the Company's common stock at \$1.00 per share.

17. SUBSEQUENT EVENTS

Effective October 28, 2014, the Company formed a wholly-owned subsidiary, Southern Tulsa TLC, LLC, which entered into a \$1.75 million note payable with a bank maturing on November 10, 2017. The note bears interest at a rate of 4.75% per annum and is payable in 35 monthly installments of principal and interest of \$11,309 with a final balloon payment of the remaining principal and interest approximating \$1.6 million on November 10, 2017.

Collateral for the note includes all property and equipment of Southern Hills Skilled Nursing Facility, part of the Southern Hills Retirement Center, an assignment of its rents, and the guarantees of Christopher Brogdon and the Company.

During October 2014, the Company issued an aggregate of 818,500 shares of common stock pursuant to the exercise of outstanding Class A Warrants at \$0.50 per share.

Overview

Global Healthcare REIT, Inc. (Global or we or the Company) was organized for the purpose of investing in real estate related to the long-term care industry. Prior to the Company changing its name to Global Healthcare REIT, Inc. on September 30, 2013, the Company was known as Global Casinos, Inc. Global Casinos, Inc. operated two gaming casinos which were split-off and sold on September 30, 2013. Simultaneous with the split-off and sale of the gaming operations, the Company acquired West Paces Ferry Healthcare REIT, Inc. (WPF). We plan to elect to be treated as a real estate investment trust (REIT) in the future; however, we did not make that election for the 2013 fiscal year.

The Company will invest primarily in real estate serving the healthcare industry in the United States. We plan to acquire, develop, lease, manage and dispose of healthcare real estate. Our

portfolio will be comprised of investments in the following five healthcare segments: (i) senior housing, (ii) life science, (iii) medical office, (iv) post-acute/skilled nursing and (v) hospital. We will make investments within our healthcare segments using the following five investment products: (i) properties under lease, (ii) mortgage debt investments, (iii) developments and redevelopments, (iv) investment management and (v) RIDEA, which represents investments in senior housing operations utilizing the structure permitted by the Housing and Economic Recovery Act of 2008.

The delivery of healthcare services requires real estate and, as a result, tenants and operators depend on real estate, in part, to maintain and grow their businesses. We believe that the healthcare real estate market provides investment opportunities due to the following:

.
Compelling demographics driving the demand for healthcare services;

.
Specialized nature of healthcare real estate investing; and

.
Ongoing consolidation of a fragmented healthcare real estate sector.

Acquisition of West Paces Ferry Healthcare REIT, Inc. (WPF)

On September 30, 2013, Global acquired all of the outstanding common stock of WPF in consideration of \$100. WPF owns a 65% membership interest in Dodge NH, LLC, which owns a skilled nursing facility located in Eastman, Georgia.

Concurrently with the consummation of the split-off of gaming operations and the stock purchase, Clifford Neuman, Pete Bloomquist and Leonard Nacht resigned as Directors, and Mr. Neuman and Todd Huss resigned as executive officers of the Company. Also concurrently, the Board of Directors of Global Casinos was reconstituted to consist of Christopher Brogdon, Steven Bathgate and John Sheehan, Jr. The executive officers were also changed to consist of Mr. Brogdon as CEO and President, Philip Scarborough as CFO and Ryan Scates, as Secretary.

Acquisition of Middle Georgia Nursing Home

Effective July 1, 2012, Georgia Healthcare REIT, Inc., (Ga. REIT) a private company owned and controlled by Mr. Brogdon, consummated its first acquisition: the Middle Georgia Nursing Home. Middle Georgia Nursing Home is located in Eastman, Georgia (Middle Georgia or the Facility). The Facility was acquired through Dodge NH, LLC, a limited liability company formed for the purpose of acquiring Middle Georgia that was initially wholly-owned by Ga. REIT. Dodge Investors, LLC was formed and organized as a financing entity to raise \$1.1 million in funding necessary to complete the acquisition, as more fully described below.

The terms of the acquisition of Middle Georgia were as follows: The purchase price together with deferred financing costs was \$5.2 million, of which \$4.2 million was paid with the proceeds of a commercial mortgage with Colony Bank, as senior lender, which accrues interest at 6.25% per annum; and the balance of \$1.0 million was provided by Dodge Investors, LLC. Dodge Investors funded Dodge NH, LLC with \$1.1 million in consideration of 13% unsecured notes and a carried 35% membership interest in Dodge NH, LLC. Of the \$1.1 million raised by Dodge Investors, LLC, \$125,000 was invested by Ga. REIT from loan proceeds from the Company, representing a 4% membership interest of the total 35% membership interest held by Dodge Investors, LLC. The Dodge NH, LLC notes purchased by Dodge Investors, LLC accrue interest at the rate of 13% per annum, interest payable monthly, with the outstanding balance of principal and accrued and unpaid interest due July 1, 2014. The 35% membership interest of Dodge Investors, LLC will continue as a carried interest after the repayment of the notes.

Dodge NH, LLC has an operating lease agreement with Eastman Healthcare and Rehab, LLC, owned by a professional skilled nursing facility operator, having an initial term of five years with an option to renew for an additional five-year period. The rent begins at \$45,000 per month and increases by \$1,000 per month on each lease anniversary, thereafter.

Effective March 15, 2013, Ga. REIT conveyed its entire 65% membership interest in Dodge NH, LLC to WPF.

Acquisition of Warrenton Nursing Home

Effective December 31, 2013, the Company consummated the purchase of the 110 bed Warrenton Nursing Home (Warrenton) located in Warrenton, Georgia. Warrenton was purchased by ATL/WARR, LLC, a single purpose Georgia limited liability company (Warr LLC) previously owned 95% by Christopher Brogdon and 5% by an unaffiliated investor. Concurrently, Mr. Brogdon conveyed his 95% membership interest in Warr LLC to the Company for nominal consideration. The purchase price of Warrenton was \$3.5 million, of which \$2.72 million was provided by a commercial senior bank loan, and approximately \$984,500 was provided by the Company.

Warr LLC has assumed an operating lease (Lease) with a multi-unit skilled nursing home operator (Operator). The Operator (i) owns the facility records, residential agreements, resident trust funds and inventory, (ii) is the licensed operator of the facility, and (iii) operates the facility as a skilled nursing facility. The operating lease will expire in June 2016.

The Southern Hills facility is comprised of a senior living campus of three buildings totaling 104,192 square feet sitting on a 4.36 acre parcel. The Center offers 116 nursing beds, 86 independent living units, and 32 assisted living beds.

The purchase price for Southern Hills was \$2.0 million, of which \$1.5 million was provided by a bridge loan with First Commercial Bank, with the balance of \$500,000 provided by Global. Global also provided a guaranty of the bridge loan from First Commercial Bank. The preliminary purchase price allocation resulted in a bargain purchase gain of \$3.0 million as the seller was motivated to sell these assets since they were no longer a part of the seller's intended ongoing business.

On March 1, 2014, the Tulsa County Industrial Authority issued \$5.7 million of its First Mortgage Revenue Bonds and lent the net proceeds to the Company. The Company used the proceeds to pay off the \$1.5 million bridge loan, to pay certain costs of the bond issuance, to

renovate the 86 independent living units and 32-bed assisted living facility, and to establish a debt service reserve fund and other initial deposits as required by the bond indenture. The debt is secured by a first mortgage lien on the independent living units and assisted living facility (facilities), an assignment of the facilities leases, a first lien on all personal property located in the facilities, and a guaranty by the Company. The Series 2014 Bonds consist of \$5,075,000 in Series 2014A First Mortgage Revenue Bonds and \$625,000 in Series 2014B Taxable First Mortgage Revenue Bonds. Liquidity and Capital Resources

Throughout its history, the Company has experienced shortages in working capital and has relied, from time to time, upon loans from affiliates to meet immediate cash demands. At September 30, 2014, the Company had cash and cash equivalents of \$571,068 on hand. Our liquidity is expected to increase from potential equity and debt offerings and decrease as net offering proceeds are expended in connection with the acquisition of properties. Contractual obligations of \$7,721,181 due in less than one year include balloon payments at maturity of certain notes payable. We intend to refinance these notes payable upon maturity.

Off-Balance Sheet Arrangements

We have a contingent liability for rental payments on a long-term lease related to the casino operations split-off and sold to Gemini Gaming, LLC. The total minimum rentals under this lease total \$76,086 for the period from October 1, 2014 through December 31, 2014 and \$177,534 for the period from January 1, 2015 through termination of the lease agreement in July 2015. No payments on the contingency have been required to date.

Critical Accounting Policies

Set forth below is a summary of the accounting policies that management believes are critical to the preparation of the consolidated financial statements. Certain of these accounting policies are particularly important for an understanding of the financial position and results of operations presented in the consolidated financial statements set forth elsewhere in this report. These policies require that application of judgment and assumptions by management and, as a result, are subject to a degree of uncertainty. Actual results could differ as a result of such judgment and assumptions.

Property Acquisitions

We allocate the purchase price of acquired properties to net tangible and identified intangible assets based on relative fair values. Fair value estimates are based on information obtained from independent appraisals, other market data, information obtained during due diligence and information related to the marketing and leasing at the specific property. Acquisition-related costs such as due diligence, legal and accounting fees are expensed as incurred and not applied in determining the fair value of an acquired property.

Impairment of Long Lived Assets

When circumstances indicate the carrying value of property may not be recoverable, the Company reviews the asset for impairment. This review is based on an estimate of the future undiscounted cash flows, excluding interest charges, expected to result from the property's use and eventual disposition. This estimate considers factors such as expected future operating income, market and other applicable trends and residual value, as well as the effects of leasing demand, competition and other factors. If impairment exists, due to the inability to recover the carrying amount of the property, an impairment loss is recorded to the extent that the carrying value exceeds the estimated fair value of the property. Estimated fair value is determined with the assistance from independent valuation specialists using recent sales of similar assets, market conditions and projected cash flows of properties using standard industry valuation techniques.

Goodwill

Goodwill represents the excess of the Company's purchase price over the fair values of the respective identifiable assets acquired and liabilities assumed in business combinations. Goodwill resulting from acquisitions is not amortized, but is tested for impairment annually or whenever events change and circumstances indicate that it is more likely than not that an impairment loss has occurred using specific methods described in U.S. GAAP. As allowed by U.S. GAAP, management initially performs a qualitative analysis of goodwill using qualitative factors to determine if it is more likely than not that the fair value of a reporting unit is less than its carrying amount including goodwill. Such qualitative factors include macroeconomic conditions, industry and market considerations, cost factors, overall financial performance and other relevant entity-specific events. If after assessing the totality of events or circumstances, the Company determines through the qualitative assessment that the fair value of a reporting unit more likely than not exceeds its carrying value, no further evaluation is necessary, and performing the two-step impairment test outlined in U.S. GAAP is not required. For the nine months ended September 30, 2014, there were no triggering events that required a test of impairment of goodwill.

Notes Receivable

The Company evaluates its notes receivable for impairment when it is probable the payment of interest and principal will not be made in accordance with the contractual terms of the note receivable agreement. Once a note has been determined to be impaired, it is measured to establish the amount of the impairment, if any, based on the fair value of the note determined by using present value of expected future cash flows discounted at the note's effective interest rate.

If the fair value of the impaired note receivable is less than the recorded investment in the note, a valuation allowance is recognized.

Recently Issued Accounting Pronouncements

During April 2014, the FASB issued Accounting Standards Update ("ASU") No. 2014-08, "Presentation of Financial Statements and Property, Plant and Equipment; Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity." ASU 2014-08 modifies the

requirements for reporting discontinued operations. Under the amendments in ASU 2014-08, the definition of discontinued operation has been modified to only include those disposals of an entity that represent a strategic shift that has (or will have) a major effect on an entity's operations and financial results. ASU 2014-08 shall be applied prospectively for periods beginning on or after December 15, 2014, with early adoption permitted. The Company adopted ASU 2014-08 as of January 1, 2014 on a prospective basis for transactions occurring after the adoption date.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers. This ASU requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. This ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for the Company on January 1, 2017. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. We are evaluating the effect that ASU 2014-09 will have on our consolidated financial statements and related disclosures. We have not yet selected a transition method nor have we determined the effect of the standard on our ongoing financial reporting.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable.

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our senior management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. Our Chief Executive Officer and Chief Financial Officer have reviewed the effectiveness of our disclosure controls and procedures and have concluded that the disclosure controls and procedures were not effective as of the end of the period covered by this report. Prior to our reverse acquisition of WPF, we were a private company with limited accounting personnel and other resources with which to address our controls and procedures. In addition, there was a change in the Company's officers and consultants in charge of financial reporting which resulted in material weaknesses in our ability to timely file periodic reports required by the SEC. As we transition from a private company to a publicly reporting company, we continue to improve our internal control over financial reporting including the implementation of new accounting processes and control procedures. We continually reassess our internal controls over financial reporting in an effort to rectify those material weaknesses.
