quarterly report pursuant to section 13 or 15(d) of THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2018
OR

transition report pursuant to section 13 or 15 (d) of the SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

Commission file number 001-31830

Cathay General Bancorp

(Exact name of registrant as specified in its charter)

Delaware (State of other jurisdiction of incorporation or organization)	95-4274680 (I.R.S. Employer Identification No.)
---	---

777 North Broadway, Los Angeles, California (Address of principal executive offices)	90012 (Zip Code)
---	---------------------

Registrant's telephone number, including area code: (213) 625-4700
(Former name, former address and former fiscal year, if changed since last report)

Edgar Filing: CATHAY GENERAL BANCORP - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer’s classes of common stock, as of the latest practicable date.

Common stock, \$.01 par value, 81,240,422 shares outstanding as of April 30, 2018.

Forward-Looking Statements

In this Quarterly Report on Form 10-Q, the term “Bancorp” refers to Cathay General Bancorp and the term “Bank” refers to Cathay Bank. The terms “Company,” “we,” “us,” and “our” refer to Bancorp and the Bank collectively.

The statements in this report include forward-looking statements within the meaning of the applicable provisions of the Private Securities Litigation Reform Act of 1995 regarding management’s beliefs, projections, and assumptions concerning future results and events. We intend such forward-looking statements to be covered by the safe harbor provision for forward-looking statements in these provisions. All statements other than statements of historical fact are “forward-looking statements” for purposes of federal and state securities laws, including statements about anticipated future operating and financial performance, financial position and liquidity, growth opportunities and growth rates, growth plans, acquisition and divestiture opportunities, business prospects, strategic alternatives, business strategies, financial expectations, regulatory and competitive outlook, loan and deposit growth, investment and expenditure plans, financing needs and availability, level of nonperforming assets, and other similar forecasts and statements of expectation and statements of assumptions underlying any of the foregoing. Words such as “aims,” “anticipates,” “believes,” “can,” “continue,” “could,” “estimates,” “expects,” “hopes,” “intends,” “may,” “optimistic,” “plans,” “potential,” “possible,” “seeks,” “shall,” “should,” “will,” and variations of these words and similar expressions are intended to identify these forward-looking statements. Forward-looking statements by us are based on estimates, beliefs, projections, and assumptions of management and are not guarantees of future performance. These forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our historical experience and our present expectations or projections. Such risks and uncertainties and other factors include, but are not limited to, adverse developments or conditions related to or arising from:

- U.S. and international business and economic conditions;
- possible additional provisions for loan losses and charge-offs;
- credit risks of lending activities and deterioration in asset or credit quality;
- extensive laws and regulations and supervision that we are subject to, including potential supervisory action by bank supervisory authorities;
- increased costs of compliance and other risks associated with changes in regulation, including the implementation of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”);
- higher capital requirements from the implementation of the Basel III capital standards;
- compliance with the Bank Secrecy Act and other money laundering statutes and regulations;
- potential goodwill impairment;
- liquidity risk;
- fluctuations in interest rates;
- risks associated with acquisitions and the expansion of our business into new markets;
- inflation and deflation;
- real estate market conditions and the value of real estate collateral;
- environmental liabilities;

our ability to compete, including against larger competitors;

1

Table of Contents

our ability to retain key personnel;
successful management of reputational risk;
natural disasters and geopolitical events;
general economic or business conditions in Asia, and other regions where the Bank has operations;
failures, interruptions, or security breaches of our information systems;
our ability to adapt our systems to technological changes;
risk management processes and strategies;
adverse results in legal proceedings;
the impact of regulatory enforcement actions, if any;
certain provisions in our charter and bylaws that may affect acquisition of the Company;
changes in accounting standards or tax laws and regulations;
market disruption and volatility;
fluctuations in the Bancorp's stock price;
restrictions on dividends and other distributions by laws and regulations and by our regulators and our capital structure;
issuances of preferred stock;
capital level requirements and successfully raising additional capital, if needed, and the resulting dilution of interests of holders of our common stock; and
the soundness of other financial institutions.

These and other factors are further described in Bancorp's Annual Report on Form 10-K for the year ended December 31, 2017 (Item 1A in particular), other reports and registration statements filed with the Securities and Exchange Commission ("SEC"), and other filings Bancorp makes with the SEC from time to time. Actual results in any future period may also vary from the past results discussed in this report. Given these risks and uncertainties, readers are cautioned not to place undue reliance on any forward-looking statements, which speak to the date of this report. We have no intention and undertake no obligation to update any forward-looking statement or to publicly announce any revision of any forward-looking statement to reflect future developments or events, except as required by law.

Bancorp's filings with the SEC are available at the website maintained by the SEC at <http://www.sec.gov>, or by request directed to Cathay General Bancorp, 9650 Flair Drive, El Monte, California 91731, Attention: Investor Relations (626) 279-3286.

CATHAY GENERAL BANCORP AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. Business

Cathay General Bancorp (“Bancorp”) is the holding company for Cathay Bank (the “Bank” and, together, with Bancorp, the “Company”), *eight* limited partnerships investing in affordable housing investments in which the Bank is the sole limited partner, Asia Realty Corp. and GBC Venture Capital, Inc. Bancorp also owns *100%* of the common stock of *five* statutory business trusts created for the purpose of issuing capital securities. The Bank was founded in *1962* and offers a wide range of financial services. As of *March 31, 2018*, the Bank operates *26* branches in Southern California, *15* branches in Northern California, *12* branches in New York State, *three* branches in Illinois, *three* branches in Washington State, *two* branches in Texas, *one* branch in Massachusetts, New Jersey, Maryland, and Nevada, *one* branch in Hong Kong, and a representative office in Beijing, Shanghai and in Taipei. Deposit accounts at the Hong Kong branch are *not* insured by the Federal Deposit Insurance Corporation (the “FDIC”).

2. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information and with the instructions to Form *10-Q* and Article *10* of Regulation *S-X*. Accordingly, they do *not* include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the interim periods presented are *not* necessarily indicative of the results that *may* be expected for the year ending *December 31, 2018*. For further information, refer to the audited consolidated financial statements and notes included in the Company’s Annual Report on Form *10-K* for the year ended *December 31, 2017*.

The preparation of the condensed consolidated financial statements in accordance with GAAP requires management of the Company to make a number of estimates and assumptions relating to the reported amount of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates. The Company expects that the most significant estimates subject to change are the allowance for loan losses, goodwill impairment, and other-than-temporary impairment.

In the condensed consolidated statement of cash flows, the amounts for the three months ended March 31, 2017 have been corrected in the current year and differ from the previously reported amounts of \$251.6 million for net cash provided by investing activities, (\$27.5) million for decrease in cash and cash equivalents, \$218.0 million for cash and cash equivalents, beginning of period and \$190.5 million for cash and cash equivalents, end of period.

Table of Contents**3. Recent Accounting Pronouncements*****Accounting Standards adopted in 2018***

In *May 2014*, the Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update ("ASU") *2014-09*, "Revenue from Contracts with Customers (Topic 606)." The new guidance replaces existing revenue recognition guidance for contracts to provide goods or services to customers and amends existing guidance related to recognition of gains and losses on the sale of certain nonfinancial assets such as real estate. ASU *2014-09* clarifies the principles for recognizing revenue and replaces nearly all existing revenue recognition guidance in U.S. GAAP. Quantitative and qualitative disclosures regarding the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers are also required. ASU *2014-09* as amended by ASU *2015-14*, ASU *2016-08*, ASU *2016-10* and ASU *2016-12*, is effective for interim and annual periods beginning after *December 15, 2017* and is applied on either a modified retrospective or full retrospective basis. Our revenue is primarily comprised of net interest income on financial assets and financial liabilities, which is explicitly excluded from the scope of ASU *2014-09*, and non-interest income. Accordingly, the majority of the Company's revenues will not be affected. In addition, the new standard does not materially impact the timing or measurement of the Company's revenue recognition as it is consistent with the Company's existing accounting for contracts within the scope of the new standard. The Company adopted this guidance as of January 1, 2018 using the modified retrospective method where there was no cumulative effect adjustment to retained earnings as a result of adopting this new standard. In addition, the standard did not have a material impact on our consolidated financial statements. The Company has provided a disaggregation of the significant categories of revenues within the scope of this guidance and expanded the qualitative disclosures of the Company's noninterest income. See footnote 17 - Revenue from Contracts with Customers for additional information.

In *January 2016*, the FASB issued ASU *2016-01*, "Financial Instruments Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities." This update requires an entity to measure equity investments with readily determinable fair values at fair value with changes in fair value recognized in net income. Equity investment without readily determinable fair values will be measured at fair value either upon the occurrence of an observable price change or upon identification of an impairment and any amount by which the carrying value exceeding the fair value will be recognized as an impairment in net income. This update also requires an entity to disclose fair value of financial instruments measured at amortized cost on the balance sheet to measure that fair value using the exit price option. In addition, this update requires separate presentation in comprehensive income for changes in the fair value of a liability and in the balance sheet by measurement category and form of financial asset. ASU *2016-01* becomes effective for interim and annual periods beginning after *December 15, 2017*. The adoption of the amendment resulted in approximately \$8.6 million being reclassified from accumulated other comprehensive income to retained earnings, representing an increase to retained earnings as of *January 1, 2018* and reduced pre-tax income by \$3.8 million for the quarter ended *March 31, 2018*. See footnote 7 – Investment Securities. Also, beginning in the *first* quarter of *2018*, the Company is adopting the exit price notion on fair value measurement of its loan portfolio. As a result of this fair value change, the prior-year figures shown for loans on footnote *13* for comparative purposes will *no* longer be comparable.

In *February 2018*, FASB issued ASU 2018-02 to help organizations address certain stranded income tax effects in accumulated other comprehensive income (“AOCI”) resulting from the Tax Legislation. The amendment provides financial statement preparers with an option to reclassify stranded tax effects within AOCI to retained earnings in each period in which the effect of the changes in the U.S. federal corporate income tax rate in the Tax Legislation (or portion thereof) is recorded. The amendment also includes disclosure requirements regarding the issuer’s accounting policy for releasing income tax effects from AOCI. The amendment is effective for annual periods, and interim periods within those annual periods, beginning after *December 15, 2018*. Early adoption is permitted, and organizations should apply the provisions of the amendment either in the period of adoption or retrospectively to each period (or periods) in which the effect of the change in the U.S. federal corporate income tax rate in the Tax Legislation is recognized. The Company has elected to reclassify the income tax effects of the Tax Cuts and Jobs Act from accumulated other comprehensive income to retained earnings effective *January 1, 2018*. This resulted in the reclassification of *\$515,000* from accumulated other comprehensive income to retained earnings, representing a decrease to retained earnings as of *January 1, 2018*. See footnote 18 – Stockholders Equity.

Table of Contents

Other Accounting Standards

In *February 2016*, the FASB issued ASU 2016-02, "Leases (Topic 842)", which is intended to increase transparency and comparability in the accounting for lease transactions. ASU 2016-02 requires lessees to recognize all leases longer than *twelve* months on the consolidated balance sheet as lease assets and lease liabilities and quantitative and qualitative disclosures regarding key information about leasing arrangements. Lessor accounting is largely unchanged. ASU 2016-02 is effective for fiscal years beginning after *December 15, 2018*, including interim periods within those fiscal years with an option to early adopt. ASU 2016-02 mandates a modified retrospective transition method for all entities. The Company is evaluating the impact of ASU 2016-02 and has determined that the majority of our leases are operating leases. We expect, upon adoption, that the Company will record a liability for the remaining obligation under the lease agreements and a corresponding right-of-use asset in its consolidated financial statements. ASU 2016-02 will be effective for us on *January 1, 2019* and will require transition using a modified retrospective approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements.

In *June 2016*, the FASB issued ASU 2016-13, "Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." This update requires an entity to use a broader range of reasonable and supportable forecasts, in addition to historical experience and current conditions, to develop an expected credit loss estimate for financial assets and net investments that are *not* accounted for at fair value through net income. Credit losses relating to available-for-sale debt securities should be recorded through an allowance for credit losses to the amount by which fair value is below amortized cost. ASU 2016-13 becomes effective for interim and annual periods beginning after *December 15, 2019*. The Company has designated a management team to evaluate ASU 2016-13 and develop an implementation strategy. The Company has *not* yet determined the effect of ASU 2016-13 on its accounting policies or the impact on the Company's consolidated financial statements.

In *January 2017*, the FASB issued ASU 2017-04, "Intangibles—Goodwill and Other (Topic 350)": Simplifying the Test for Goodwill Impairment." This update simplifies how an entity is required to test goodwill for impairment by eliminating Step 2 from the goodwill impairment test. Step 2 measures a goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill. Adoption of this update is on a prospective basis and the amendments in this update are to be applied to annual periods beginning after *December 15, 2019*. Adoption of ASU 2017-04 is *not* expected to have a significant impact on the Company's consolidated financial statements.

In *March 2017*, the FASB issued ASU 2017-08, "Receivables- Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities" This update amends the amortization period for certain purchased callable debt securities held at a premium. The amendments require the premium to be amortized to the earliest call date. The amendments do *not* require an accounting change for securities held at a discount; the discount continues to be amortized to maturity. This update affects all entities that hold investments in callable debt securities that have an amortized cost basis in excess of the amount that is repayable by the issuer at the earliest call date. This update is effective for fiscal years, and interim periods within those fiscal years, beginning after *December*

15, 2018. The Company is currently evaluating the impact on its consolidated financial statements.

Table of Contents

In *July 2017*, the FASB issued ASU 2017-11, “Earnings per Share (Topic 260), Distinguishing Liabilities from Equity (Topic 480) and Derivatives and Hedging (Topic 815).” There are *two* parts to this update. Part I of this update addresses the complexity of accounting for certain financial instruments with down round features. Down round features are features of certain equity-linked instruments that result in the strike price being reduced on the basis of the pricing of future equity offerings. Part II of this update addresses the difficulty in navigating topic 480, Distinguishing Liabilities from Equity, because of the existence of extensive pending content in the FASB Accounting Standards Codification. This pending content is the result of the indefinite deferral of accounting requirements about mandatorily redeemable financial instruments of certain nonpublic entities and certain mandatorily redeemable noncontrolling interests. The amendments in this update are effective for fiscal years beginning after *December 15, 2020*. Early adoption is permitted for all entities, including adoption in an interim period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period. The amendments in part I of this update should be applied in either of the following ways: (i) Retrospectively to outstanding financial instruments with a down round feature by means of a cumulative-effect adjustment to the statement of financial position as of the beginning of the *first* fiscal year and interim periods in which the pending content that links to this paragraph is effective; or (ii) Retrospectively to outstanding financial instruments with a down round feature for each prior reporting period presented in accordance with the guidance on accounting changes in paragraphs 250-10-45-5 through 45-10. The amendments to Part II of this update do *not* require any transition guidance because those amendments do *not* have an accounting effect. The Company is currently evaluating the impact on its consolidated financial statements.

In *August 2017*, the FASB issued ASU 2017-12, “Derivatives and Hedging (Topic 815)”, which targeted improvements to accounting for hedging activities. The amendments in this update better align an entity’s risk management activities and financial reporting for hedging relationships through changes to both the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. To meet that objective, the amendments expand and refine hedge accounting for both nonfinancial and financial risk components and align the recognition and presentation of the effects of the hedging instrument and the hedged item in the financial statements. For public business entities, the amendments in this update are effective for fiscal years beginning after *December 15, 2018*, and interim periods within those fiscal years. For all other entities, the amendments are effective for fiscal years beginning after *December 15, 2019*, and interim periods within fiscal years beginning after *December 15, 2020*. The Company is currently evaluating the impact on its consolidated financial statements.

Table of Contents

4. Acquisition

On *July 14, 2017*, the Company completed the acquisition of SinoPac Bancorp, the parent of Far East National Bank ("FENB"), pursuant to a Stock Purchase Agreement, dated as of *July 8, 2016*, by and between the Company and Bank SinoPac Co. Ltd. Under the terms of the Stock Purchase Agreement, the Company purchased all of the issued and outstanding share capital of SinoPac Bancorp for an aggregate purchase price of \$351.6 million plus additional post closing payments based on the realization of certain assets of FENB. The Company issued 926,192 shares of common stock as consideration and the remainder of the consideration is payable in cash of which \$100 million was deferred and paid on *November 14, 2017* and \$35.4 million was deferred and will be released over the next *three* years. On *December 12, 2017*, additional cash consideration of \$4.1 million was paid based on the realized gain from the sale of the building that housed FENB's former Alhambra, California branch. SinoPac Bancorp was merged into Cathay General Bancorp on *July 17, 2017* and subsequently, on *October 27, 2017*, FENB was merged into Cathay Bank. The acquisition allowed the Company to expand its number of branches in California. Prior to the closing of the acquisition, FENB operated *nine* branches in California, and a representative office in Beijing. The acquisition is accounted for as a business combination, subject to the provisions of ASC 805-10-50, Business Combinations.

The assets and liabilities, both tangible and intangible, were recorded at their estimated fair values as of the *July 14, 2017* acquisition date. We have included the financial results of the business combinations in the condensed consolidated statement of income beginning on the acquisition date. The assets and liabilities, both tangible and intangible, were recorded at their estimated fair values as of the acquisition date. We made significant estimates and exercised significant judgement in estimating fair values and accounting for such acquired assets and liabilities. The assets acquired, and liabilities assumed have been accounted for under the acquisition method of accounting.

Table of Contents

The fair value of the assets and the liabilities acquired as of *July 14, 2017* are shown below:

	SinoPac Bancorp
Assets acquired:	
Cash and cash equivalents	\$ 166,932
Short-term investments	122,000
Securities available-for-sale	88,044
FHLB and FRB stock	19,890
Loans	705,792
Premises and equipment	6,239
Cash surrender value of life insurance	46,083
Deferred tax assets, net	40,690
Core deposit intangible	6,122
Accrued interest receivable and other assets	10,689
Total assets acquired	1,212,481
Liabilities assumed:	
Deposits	813,888
Advances from the Federal Home Loan Bank	30,000
Accrued interest payable and other liabilities	8,512
Total liabilities assumed	852,400
Net assets acquired	\$ 360,081
Cash paid	\$ 284,984
Fair value of common stock issued	34,862
Total consideration paid	\$ 319,846
Purchase price payable to SinoPac	34,267
Total consideration	\$ 354,113
Gain from acquisition	\$ 5,968

The table above reflects net purchase price adjustments of \$340,000 related to contingent compensation and imputed interest adjustments made during the quarter ended *March 31, 2018*. *The purchase price allocations reflected in the table above are preliminary for up to 12 months after the acquisition date and subject to revision as more detailed analyses are completed and additional information about fair value of assets and liabilities becomes available.*

Table of Contents**5. Earnings per Share**

Basic earnings per share excludes dilution and is computed by dividing net income available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock and resulted in the issuance of common stock that then shared in earnings. Outstanding stock options and restricted stock units with anti-dilutive effect were *not* included in the computation of diluted earnings per share. The following table sets forth earnings per common share calculations:

(Dollars in thousands, except share and per share data)	Three months ended March	
	31, 2018	2017
Net income	\$63,816	\$48,941
Weighted-average shares:		
Basic weighted-average number of common shares outstanding	81,123,380	79,703,593
Dilutive effect of weighted-average outstanding common share equivalents		
Warrants	295,453	416,607
Options	-	33,888
Restricted stock units	261,612	259,090
Diluted weighted-average number of common shares outstanding	81,680,445	80,413,178
Average stock options and restricted stock units with anti-dilutive effect	38,906	19,900
Earnings per common share:		
Basic	\$0.79	\$0.61
Diluted	\$0.78	\$0.61

6. Stock-Based Compensation

Under the Company's equity incentive plans, directors and eligible employees *may* be granted incentive or non-statutory stock options and/or restricted stock units or awarded non-vested stock. As of *March 31, 2018*, there were *no* stock options outstanding.

There were 35,880 and 18,040 stock option shares exercised in the *first* quarter ended *March 31, 2018* and *2017*, respectively. The Company received \$838,000 from the exercise of stock options for 35,880 shares at \$23.37 per share

which had an aggregate intrinsic value of \$718,000 during the *first* quarter ended *March 31, 2018* compared to \$422,000 from the exercise of stock options which had an aggregate intrinsic value of \$262,000 during the *first* quarter ended *March 31, 2017*.

The Company granted restricted stock units for 122,674 shares at an average closing price of \$43.50 per share in the *first* quarter of 2018. The Company granted restricted stock units for 87,781 shares at an average closing price of \$38.59 per share in 2017.

Table of Contents

In *December 2013*, the Company granted performance share unit awards in which the number of units earned is calculated based on the relative total shareholder return (“TSR”) of the Company’s common stock as compared to the TSR of the KBW Regional Banking Index. In addition, the Company granted performance share unit awards in which the number of units earned is determined by comparison to the targeted EPS as defined in the award for the *2014 to 2016* period. In *December 2016*, in addition to TSR and EPS awards, the Company granted performance share unit awards in which the number of units earned is determined by comparison to the targeted return of assets ROA as defined in the award for *December 2016*. In *December 2014*, the Company granted additional performance TSR restricted stock units for *60,456* shares and performance EPS restricted stock units for *57,642* shares to *seven* executive officers. In *December 2015*, the Company granted additional performance TSR restricted stock units for *61,209* shares and performance EPS restricted stock units for *57,409* shares to *seven* executive officers. In *December 2016*, the Company granted additional performance TSR restricted stock units for *30,319* shares, performance EPS restricted stock units for *58,241* shares, and performance ROA restricted stock units for *29,119* shares to *seven* executive officers. In *December 2017*, the Company granted additional performance TSR restricted stock units for *23,556* shares and performance ROA restricted stock units for *22,377* shares to *six* executive officers. In *March 2018*, the Company granted performance EPS restricted stock units for *55,455* shares to *six* executive officers. Performance TSR, performance EPS, and performance ROA share awarded are scheduled to vest *three* years from grant date.

The following table presents restricted stock unit activity during the *three* months ended *March 31, 2018*:

	Units
Balance at December 31, 2017	561,610
Granted	178,129
Distributed	(109,454)
Forfeited	(4,010)
Balance at March 31, 2018	626,275

The compensation expense recorded for restricted stock units was *\$1.5* million for the *three* months ended *March 31, 2018*, compared to *\$1.2* million in the same period a year ago. Unrecognized stock-based compensation expense related to restricted stock units was *\$15.1* million as of *March 31, 2018* and is expected to be recognized over the next *2.3* years.

As of *March 31, 2018*, *2,608,672* shares were available under the Company’s *2005* Incentive Plan (as Amended and Restated) for future grants.

Tax benefit from share-based payment arrangements of *\$0.7* million reduced income tax expense in the *first* quarter of *2018* compared to *\$2.6* million in the same period a year ago.

Table of Contents

The amortized cost and fair value of investment securities as of *March 31, 2018*, by contractual maturities, are shown below. Actual maturities *may* differ from contractual maturities because borrowers *may* have the right to call or repay obligations with or without call or repayment penalties.

	Securities	
	Available-For-Sale	
	Amortized	Fair value
	cost	
	(In thousands)	
Due in one year or less	\$140,165	\$139,922
Due after one year through five years	466,090	453,280
Due after five years through ten years	5,783	5,624
Due after ten years	659,253	642,279
Total	\$1,271,291	\$1,241,105

There were *no* sales of mortgage-backed securities during the *first* quarter of 2018 and the *first* quarter of 2017. Proceeds from repayments, maturities and calls of mortgage-backed securities were \$22.9 million and \$15.4 million for the *three* months ended *March 31, 2018* and 2017, respectively. There were *no* sales of other investment securities during the *first* quarter of 2018 compared to proceeds from the sale of \$99.5 million during the *first* quarter of 2017. Proceeds from maturities and calls of other investment securities were \$151.0 million during the *three* months ended *March 31, 2018* compared to \$70.0 million during the same period a year ago. There were *no* gains or losses on sales of investment securities during the *three* months ended *March 31, 2018*, compared to \$438,000 of losses in the same quarter a year ago. There were *no* other than temporary impairment write-downs recorded during the *first* quarter of 2018 compared to \$28,000 recorded during the *first* quarter of 2017.

The adoption of ASU 2016-01 resulted in approximately \$8.6 million being reclassified from accumulated other comprehensive income to retained earnings, representing an increase to retained earnings as of *January 1, 2018*. At *March 31, 2018*, the Company recognized a net loss of \$3.8 million due to the decrease in fair value of equity investments with readily determinable fair values at *March 31, 2018*. Equity securities were \$24.2 million as of *March 31, 2018*, compared to \$28.1 million as of *December 31, 2017*.

As of *March 31, 2018*, the Company had unrealized losses on available-for-sale securities of \$31.7 million. The unrealized losses on these securities were primarily attributed to yield curve movement, together with widened liquidity spreads and credit spreads. The issuers have *not*, to the Company's knowledge, established any cause for default on these securities. Management believes the impairment was temporary and, accordingly, *no* impairment loss on these securities has been recognized in our condensed consolidated statements of operations. The Company expects to recover the amortized cost basis of its securities and has *no* intent to sell, and will *not* be required to sell, available-for-sale securities that have declined below their cost before their anticipated recovery.

Table of Contents

Investment securities having a carrying value of \$231.0 million as of *March 31, 2018*, and \$272.2 million as of *December 31, 2017*, were pledged to secure public deposits, other borrowings, treasury tax and loan, and securities sold under agreements to repurchase.

8. Loans

Most of the Company's business activities are with customers located in the high-density Asian-populated areas of Southern and Northern California; New York City, New York; Dallas and Houston, Texas; Seattle, Washington; Boston, Massachusetts; Chicago, Illinois; Edison, New Jersey; Rockville, Maryland; Las Vegas, Nevada, and Hong Kong. The Company has *no* specific industry concentration, and generally its loans are secured by real property or other collateral of the borrowers. Loans are generally expected to be paid off from the operating profits of the borrowers, from refinancing by other lenders, or through sale by the borrowers of the secured collateral.

The types of loans in the Company's condensed consolidated balance sheets as of *March 31, 2018*, and *December 31, 2017*, were as follows:

	March 31, 2018	December 31, 2017
	(In thousands)	
Commercial loans	\$2,436,421	\$2,461,266
Residential mortgage loans	3,198,750	3,062,050
Commercial mortgage loans	6,610,254	6,482,695
Real estate construction loans	587,927	678,805
Equity lines	176,714	180,304
Installment & other loans	4,473	5,170
Gross loans	\$13,014,539	\$12,870,290
Allowance for loan losses	(122,084)	(123,279)
Unamortized deferred loan fees	(3,289)	(3,245)
Total loans, net	\$12,889,166	\$12,743,766
Loans held for sale	\$-	\$8,000

As of *March 31, 2018*, recorded investment in impaired loans totaled \$132.1 million and was comprised of non-accrual loans, excluding loans held for sale, of \$49.3 million and accruing troubled debt restructured loans ("TDRs") of \$82.8 million. As of *December 31, 2017*, recorded investment in impaired loans totaled \$117.4 million and was comprised of non-accrual loans, excluding loans held for sale, of \$48.8 million and accruing TDRs of \$68.6 million. For impaired loans, the amounts previously charged off represent 6.4% as of *March 31, 2018*, and 7.2% as of

December 31, 2017, of the contractual balances for impaired loans.

Table of Contents

The following table presents the average balance and interest income recognized related to impaired loans for the periods indicated:

	Impaired Loans			
	Average Recorded Investment		Interest Income Recognized

The determination of the amount of the allowance for loan losses for impaired loans is based on management's current judgment about the credit quality of the loan portfolio and takes into consideration known relevant internal and external factors that affect collectability when determining the appropriate level for the allowance for loan losses. The nature of the process by which the Bank determines the appropriate allowance for loan losses requires the exercise of considerable judgment. This allowance evaluation process is also applied to troubled debt restructurings since they are considered to be impaired loans. The allowance for loan losses and the reserve for off-balance sheet credit commitments are significant estimates that can and do change based on management's process in analyzing the loan

portfolio and on management's assumptions about specific borrowers, underlying collateral, and applicable economic and environmental conditions, among other factors.

A troubled debt restructuring is a formal modification of the terms of a loan when the lender, for economic or legal reasons related to the borrower's financial difficulties, grants a concession to the borrower. The concessions *may* be granted in various forms, including a change in the stated interest rate, a reduction in the loan balance or accrued interest, or an extension of the maturity date that causes significant delay in payment.

TDRs on accrual status are comprised of the loans that have, pursuant to the Bank's policy, performed under the restructured terms and have demonstrated sustained performance under the modified terms for *six* months before being returned to accrual status. The sustained performance considered by management pursuant to its policy includes the periods prior to the modification if the prior performance met or exceeded the modified terms. This would include cash paid by the borrower prior to the restructure to set up interest reserves.

Table of Contents

As of *March 31, 2018*, accruing TDRs were \$82.8 million and non-accrual TDRs were \$31.2 million compared to accruing TDRs of \$68.6 million and non-accrual TDRs of \$33.4 million as of *December 31, 2017*. The Company allocated specific reserves of \$1.2 million to accruing TDRs and \$75,000 to non-accrual TDRs as of *March 31, 2018*, and \$1.9 million to accruing TDRs and \$83,000 to non-accrual TDRs as of *December 31, 2017*. The following tables present TDRs that were modified during the *first* quarter ended *March 31, 2018* and *2017*, their specific reserves as of *March 31, 2018* and *2017*, and charge-offs for the *first* quarter ended *March 31, 2018* and *2017*:

	Three months ended March 31, 2018				March 31, 2018
	No. of Contracts	Pre-Modification Outstanding Recorded Investment (Dollars in thousands)	Post-Modification Outstanding Recorded Investment	Charge-offs	Specific Reserve
Commercial loans	3	\$ 2,463	\$ 2,463	\$ -	\$ -
Commercial mortgage loans	6	14,287	14,287	-	134
Residential mortgage loans and equity lines	2	801	801	-	8
Total	11	\$ 17,551	\$ 17,551	\$ -	\$ 142

	Three months ended March 31, 2017			March 31, 2017	
	No. of Contracts	Pre-Modification Outstanding Recorded Investment (Dollars in thousands)	Post-Modification Outstanding Recorded Investment	Charge-offs	Specific Reserve
Real estate construction loans	2	\$ 27,683	\$ 27,683	\$ -	\$ -
Total	2	\$ 27,683	\$ 27,683	\$ -	\$ -

Modifications of the loan terms during the *first* quarter of *2018* were in the form of extensions of maturity dates. The length of time for which modifications involving extensions of maturity dates ranged from *three* to *twelve* months from the modification date.

We expect that the TDRs on accruing status as of *March 31, 2018*, which were all performing in accordance with their restructured terms, will continue to comply with the restructured terms because of the reduced principal or interest payments on these loans. A summary of TDRs by type of concession and by type of loan, as of *March 31, 2018*, and *December 31, 2017*, is shown below:

March 31, 2018

Foreclosures	-	(726)
Restructured loans restored to accrual status	(2,318)	-
Ending balance	\$31,195	\$32,779

The Company considers a loan to be in payment default once it is 60 to 90 days contractually past due under the modified terms. The Company did *not* have any loans that were modified as a TDR during the previous *twelve* months and which had subsequently defaulted as of *March 31, 2018*.

Under the Company's internal underwriting policy, an evaluation is performed of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification in order to determine whether a borrower is experiencing financial difficulty.

Table of Contents

As of *March 31, 2018*, there were *no* commitments to lend additional funds to those borrowers whose loans had been restructured, were considered impaired, or were on non-accrual status.

As part of the on-going monitoring of the credit quality of our loan portfolio, the Company utilizes a risk grading matrix to assign a risk grade to each loan. The risk rating categories can be generally described by the following grouping for non-homogeneous loans:

Pass/Watch – These loans range from minimal credit risk to lower than average, but still acceptable, credit risk.

Special Mention – Borrower is fundamentally sound and loan is currently protected but adverse trends are apparent that, if *not* corrected, *may* affect ability to repay. Primary source of loan repayment remains viable but there is increasing reliance on collateral or guarantor support.

Substandard – These loans are inadequately protected by current sound net worth, paying capacity, or collateral. Well-defined weaknesses exist that could jeopardize repayment of debt. Loss *may not* be imminent, but if weaknesses are *not* corrected, there is a good possibility of some loss.

Doubtful – The possibility of loss is extremely high, but due to identifiable and important pending events (which *may* strengthen the loan), a loss classification is deferred until the situation is better defined.

Loss – These loans are considered uncollectible and of such little value that to continue to carry the loan as an active asset is *no* longer warranted.

The following tables present the loan portfolio by risk rating as of *March 31, 2018*, and as of *December 31, 2017*:

March 31, 2018

	Pass/Watch	Special Mention	Substandard	Doubtful	Total

9. Commitments and Contingencies

The Company is involved in various litigation concerning transactions entered into in the normal course of business. Management, after consultation with legal counsel, does *not* believe that the resolution of such litigation will have a material effect upon its consolidated financial condition, results of operations, or liquidity taken as a whole. Although the Company establishes accruals for legal proceedings when information related to the loss contingencies

represented by those matters indicates both that a loss is probable and that the amount of loss can be reasonably estimated, the Company does *not* have accruals for all legal proceedings where there is a risk of loss. In addition, amounts accrued *may not* represent the ultimate loss to the Company from the legal proceedings in question. Thus, ultimate losses *may* be higher or lower, and possibly significantly so, than the amounts accrued for legal loss contingencies.

In the normal course of business, the Company becomes a party to financial instruments with off-balance sheet risk to meet the financing needs of its customers. These financial instruments include commitments to extend credit in the form of loans, or through commercial or standby letters of credit and financial guarantees. These instruments represent varying degrees of exposure to risk in excess of the amounts included in the accompanying condensed consolidated balance sheets. The contractual or notional amount of these instruments indicates a level of activity associated with a particular class of financial instrument and is *not* a reflection of the level of expected losses, if any.

Table of Contents

10. Borrowed Funds

Securities Sold Under Agreements to Repurchase. Securities sold under agreements to repurchase were \$100 million with a weighted average rate of 2.86% as of *March 31, 2018*, compared to \$100 million with a weighted average rate of 2.86% as of *December 31, 2017*. Final maturity for the *two* fixed rate non-callable securities sold under agreements to repurchase was \$50.0 million in *June 2018* and \$50.0 million in *July 2018*.

These transactions are accounted for as collateralized financing transactions and recorded at the amounts at which the securities were sold. The Company *may* have to provide additional collateral for the repurchase agreements, as necessary. The underlying collateral pledged for the repurchase agreements consists of U.S. Treasury securities and mortgage-backed securities with a fair value of \$107.6 million as of *March 31, 2018*, and \$108.4 million as of *December 31, 2017*.

Borrowing from the Federal Home Loan Bank ("FHLB"). As of *March 31, 2018*, over-night borrowings from the FHLB were \$250 million at a rate of 1.87% compared to \$325 million at a rate of 1.41% as of *December 31, 2017*. As of *March 31, 2018*, the advances from the FHLB were \$75 million at a rate of 1.53% compared to \$105 million at a rate of 1.41% as of *December 31, 2017*. As of *March 31, 2018*, FHLB advances of \$15 million will mature in *April 2018*, \$5 million in *July 2018*, \$5 million in *October 2018*, and \$50 million in *December 2019*.

Other Borrowing. Pursuant to the Stock Purchase Agreement with Bank SinoPac Co. Ltd, the Company paid \$100 million of the purchase price on *November 14, 2017*, 30 days after receipt of regulatory approval for the merger of FENB into Cathay Bank. The residual payable balance of \$35.2 million has a floating rate of *three-month LIBOR* rate plus 150 basis points. Outstanding payable balance is accruing interest at a rate of 2.8% of which 50%, 30%, and 20% will be disbursed annually over *three* years on the anniversary dates, respectively. As of *March 31, 2018*, outstanding payable balance was \$35.7 million compared to \$35.2 million at *December 31, 2017*.

Long-term Debt. On *October 12, 2017*, the Bank entered into a term loan agreement of \$75.0 million with U.S. Bank. The loan has a floating rate of *one-month LIBOR* plus 175 basis points. As of *March 31, 2018*, the term loan has an interest rate of 3.438% compared to 3.125% at *December 31, 2017*. The principal amount of the long-term debt from U.S. Bank is due and payable in consecutive quarterly installments in the amount of \$4.7 million each on the last day of each calendar quarter commencing *December 31, 2018*, with the final installment due and payable on *October 12, 2020*. The U.S. Bank loan proceeds were used to fund a portion of our acquisition of SinoPac Bancorp.

11. Income Taxes

The effective tax rate for the *first* quarter of 2018 was 22.8% compared to 29.5% for the *first* quarter of 2017. The reduction in effective tax rate was primarily due to the Tax Cuts and Jobs Act that was enacted into law on *December 22, 2017*, which reduced the Federal corporate tax rate from 35% to 21% effective *January 1, 2018*.

As of *December 31, 2017*, the Company had income tax refunds receivable of \$7.2 million. These income tax receivables are included in other assets in the accompanying condensed consolidated balance sheets.

The Company's tax returns are open for audit by the Internal Revenue Service back to 2014 and by the California Franchise Tax Board back to 2013.

It is reasonably possible that unrecognized tax benefits could change significantly over the next *twelve* months. The Company does *not* expect that any such changes would have a material impact on its annual effective tax rate.

Table of Contents

12. Fair Value Measurements

The Company adopted ASC Topic 820 on *January 1, 2008*, and determined the fair values of our financial instruments based on the following:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable prices in active markets for similar assets or liabilities; prices for identical or similar assets or liabilities in markets that are *not* active; directly observable market inputs for substantially the full term of the asset and liability; market inputs that are *not* directly observable but are derived from or corroborated by observable market data.

Level 3 – Unobservable inputs based on the Company’s own judgment about the assumptions that a market participant would use.

The Company uses the following methodologies to measure the fair value of its financial assets and liabilities on a recurring basis:

Securities Available for Sale. For certain U.S. Treasury securities, the Company measures the fair value based on quoted market prices in active exchange markets at the reporting date, a Level 1 measurement. The Company also measures securities by using quoted market prices for similar securities or dealer quotes, a Level 2 measurement. This category generally includes U.S. Government agency securities, state and municipal securities, mortgage-backed securities (“MBS”), commercial MBS, collateralized mortgage obligations, asset-backed securities, corporate bonds and trust preferred securities.

Warrants. The Company measures the fair value of warrants based on unobservable inputs based on assumptions and management judgment, a Level 3 measurement.

Foreign Exchange Contracts. The Company measures the fair value of foreign exchange contracts based on dealer quotes, a Level 2 measurement.

Interest Rate Swaps. Fair value of interest rate swaps is derived from *third* party models with observable market data, a Level 2 measurement.

Assets measured at estimated fair value on a non-recurring basis:

Certain assets or liabilities are required to be measured at estimated fair value on a nonrecurring basis subsequent to initial recognition. Generally, these adjustments are the result of lower-of-cost-or-fair value or other impairment write-downs of individual assets. In determining the estimated fair values during the period, the Company determined that substantially all the changes in estimated fair value were due to declines in market conditions versus instrument specific credit risk. For the three months ended March 31, 2018 and December 31, 2017, there were no material adjustments to fair value for the Company's assets and liabilities measured at fair value on a nonrecurring basis in accordance with GAAP.

Table of Contents

Table of Contents

The Company measured the fair value of its warrants on a recurring basis using significant unobservable inputs. The fair value of warrants was \$195,000 as of *March 31, 2018*, compared to \$91,000 as of *December 31, 2017*. The fair value adjustment of warrants was included in other operating income in the *first* quarter of 2018. The significant unobservable inputs in the Black-Scholes option pricing model for the fair value of warrants are their expected life ranging from 1 to 6 years, risk-free interest rate from 2.30% to 2.94%, and stock volatility from 8.99% to 12.73%.

For financial assets measured at fair value on a nonrecurring basis that were still reflected in the condensed consolidated balance sheet as of *March 31, 2018*, the following tables provide the level of valuation assumptions used to determine each adjustment, the carrying value of the related individual assets as of *March 31, 2018*, and *December 31, 2017*, and the total losses for the periods indicated:

(1) Other real estate owned balance of \$9.4 million in the Consolidated Balance Sheets is net of estimated disposal costs.

The significant unobservable (Level 3) inputs used in the fair value measurement of collateral for collateral-dependent impaired loans was primarily based on the appraised value of collateral adjusted by estimated sales cost and commissions. The Company generally obtains new appraisal reports every *twelve* months. As the Company's primary objective in the event of default would be to monetize the collateral to settle the outstanding balance of the loan, less marketable collateral would receive a larger discount. During the reported periods, collateral discounts ranged from 55% in the case of accounts receivable collateral to 65% in the case of inventory collateral.

Table of Contents

The significant unobservable inputs used in the fair value measurement of loans held for sale was primarily based on the quoted price or sale price adjusted by estimated sales cost and commissions.

The significant unobservable inputs used in the fair value measurement of other real estate owned (“OREO”) was primarily based on the appraised value of OREO adjusted by estimated sales cost and commissions. The Company applies estimated sales cost and commissions ranging from 3% to 6% of the collateral value of impaired loans, quoted price, or loan sale price of loans held for sale, and appraised value of OREO.

13. Fair Value of Financial Instruments

The Company uses the following methods and assumptions to estimate the fair value of each class of financial instruments.

Cash and Cash Equivalents. For cash and cash equivalents, the carrying amount was assumed to be a reasonable estimate of fair value, a Level 1 measurement.

Short-term Investments and Interest Bearing Deposits. For short-term investments and interest bearing deposits, the carrying amount was assumed to be a reasonable estimate of fair value, a Level 1 measurement.

Securities Purchased under Agreements to Resell. The fair value of securities purchased under agreements to resell is based on dealer quotes, a Level 2 measurement.

Securities. For securities, including securities held-to-maturity, available-for-sale, and for trading, fair values were based on quoted market prices at the reporting date. If a quoted market price was *not* available, fair value was estimated using quoted market prices for similar securities or dealer quotes. For certain actively traded agency preferred stock, U.S. Treasury securities, and other equity securities, the Company measures the fair value based on quoted market prices in active exchange markets at the reporting date, a Level 1 measurement. The Company also measures securities by using quoted market prices for similar securities or dealer quotes, a Level 2 measurement. This category generally includes U.S. Government agency securities, state and municipal securities, mortgage-backed securities (“MBS”), commercial MBS, collateralized mortgage obligations, asset-backed securities, and corporate bonds.

Loans Held for Sale. The Company records loans held for sale at fair value based on quoted prices from *third* party sources, or appraisal reports adjusted by sales commission assumptions.

Loans. Fair values were estimated for portfolios of loans with similar financial characteristics. Each loan category was further segmented into fixed and adjustable rate interest terms and by performing and non-performing categories. The fair values were based primarily on *third*-party vendor pricing to determine fair values based on the exit price notion.

The fair value of performing loans was calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk inherent in the loan, a Level 3 measurement.

The fair value of impaired loans was calculated based on the net realizable fair value of the collateral or the observable market price of the most recent sale or quoted price from loans held for sale. The Company does *not* record loans at fair value on a recurring basis. Nonrecurring fair value adjustments to collateral dependent impaired loans are recorded based on the current appraised value or adjusted appraised value of the collateral, a Level 2 or Level 3 measurement.

Table of Contents

FHLB Stock. These securities can only be redeemed or sold at their par value and only to the respective issuing government-supported institution or to another member institution. Management considers these non-marketable equity securities to be long-term investments. Accordingly, when evaluating these securities for impairment, management considers the ultimate recoverability of the par value rather than recognizing temporary declines in value.

Deposit Liabilities. The fair value of demand deposits, savings accounts, and certain money market deposits was assumed to be the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit was estimated using the rates currently offered for deposits with similar remaining maturities, a Level 3 measurement.

Securities Sold under Agreements to Repurchase. The fair value of securities sold under agreements to repurchase is based on dealer quotes, a Level 2 measurement.

Advances from FHLB. The fair value of the advances is based on quotes from the FHLB to settle the advances, a Level 2 measurement.

Other Borrowings. This category includes borrowings from other financial institutions. The fair value of other borrowings is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk, a Level 3 measurement.

Long-term Debt. The fair value of long-term debt is estimated based on the quoted market prices or dealer quotes, a Level 2 measurement.

Currency Option and Foreign Exchange Contracts. The Company measures the fair value of currency option and foreign exchange contracts based on dealer quotes, a Level 2 measurement.

Interest Rate Swaps. Fair value of interest rate swaps is derived from *third* party models with observable market data, a Level 2 measurement.

Off-Balance-Sheet Financial Instruments. The fair value of commitments to extend credit, standby letters of credit, and financial guarantees written were estimated using the fees currently charged to enter into similar agreements,

taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. The fair value of guarantees and letters of credit was based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date. The fair value of off-balance-sheet financial instruments was based on the assumptions that a market participant would use, a Level 3 measurement.

Fair value was estimated in accordance with ASC Topic 825. Fair value estimates were made at specific points in time, based on relevant market information and information about the financial instrument. These estimates do *not* reflect any premium or discount that could result from offering for sale at *one* time the Bank's entire holdings of a particular financial instrument. Because *no* market exists for a significant portion of the Bank's financial instruments, fair value estimates were based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates were subjective in nature and involved uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Table of Contents

The following table presents the carrying and notional amounts and estimated fair value of financial instruments as of *March 31, 2018*, and as of *December 31, 2017*:

	March 31, 2018		December 31, 2017

(I) In accordance with the prospective adoption of ASU 2016-01, the fair value of loans as of *March 31, 2018* was measured using an exit price notion. The fair value of loans as of *December 31, 2017* was measured using an entry price notion.

14. Goodwill and Goodwill Impairment

The Company's policy is to assess goodwill for impairment at the reporting unit level on an annual basis or between annual assessments if a triggering event occurs or circumstances change that would more likely than *not* reduce the fair value of a reporting unit below its carrying amount. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value.

As of *March 31, 2018*, the Company's market capitalization was above book value and there was *no* triggering event that required the Company to assess goodwill for impairment as of an interim date.

Table of Contents**15. Financial Derivatives**

It is the policy of the Company *not* to speculate on the future direction of interest rates. However, the Company enters into financial derivatives in order to seek mitigation of exposure to interest rate risks related to our interest-earning assets and interest-bearing liabilities. We believe that these transactions, when properly structured and managed, *may* provide a hedge against inherent interest rate risk in the Company's assets or liabilities and against risk in specific transactions. In such instances, the Company *may* enter into interest rate swap contracts or other types of financial derivatives. Prior to considering any hedging activities, we seek to analyze the costs and benefits of the hedge in comparison to other viable alternative strategies. All hedges must be approved by the Bank's Investment Committee.

The Company follows ASC Topic 815 that establishes accounting and reporting standards for financial derivatives, including certain financial derivatives embedded in other contracts, and hedging activities. It requires the recognition of all financial derivatives as assets or liabilities in the Company's consolidated balance sheet and measurement of those financial derivatives at fair value. The accounting treatment of changes in fair value is dependent upon whether or *not* a financial derivative is designated as a hedge and, if so, the type of hedge. Fair value is determined using *third-party* models with observable market data. For derivatives designated as cash flow hedges, changes in fair value are recognized in other comprehensive income and are reclassified to earnings when the hedged transaction is reflected in earnings. For derivatives designated as fair value hedges, changes in the fair value of the derivatives are reflected in current earnings, together with changes in the fair value of the related hedged item if there is a highly effective correlation between changes in the fair value of the interest rate swaps and changes in the fair value of the underlying asset or liability that is intended to be hedged. If there is *not* a highly effective correlation between changes in the fair value of the interest rate swap and changes in the fair value of the underlying asset or liability that is intended to be hedged, then only the changes in the fair value of the interest rate swaps are reflected in the Company's consolidated financial statements.

In *May 2014*, the Bancorp entered into interest rate swap contracts in the notional amount of *\$119.1* million for a period of *ten* years. The objective of these interest rate swap contracts, which were designated as hedging instruments in cash flow hedges, was to hedge the quarterly interest payments on the Bancorp's *\$119.1* million of Junior Subordinated Debentures that had been issued to *five* trusts, throughout the *ten-year* period beginning in *June 2014* and ending in *June 2024*, from the risk of variability of these payments resulting from changes in the *three-month* LIBOR interest rate. The Bancorp pays a weighted average fixed interest rate of *2.61%* and receives a variable interest rate of the *three-month* LIBOR at a weighted average rate of *2.17%*. As of *March 31, 2018*, the notional amount of cash flow interest rate swaps was *\$119.1* million and their unrealized gain of *\$428,000*, net of taxes, was included in other comprehensive income compared to unrealized loss of *\$1.9* million at *March 31, 2017*. The amount of periodic net settlement of interest rate swaps included in interest expense was *\$274,000* for the *three* months ended *March 31, 2018*, compared to *\$479,000* for the same quarter a year ago. As of *March 31, 2018*, and *2017*, the ineffective portion of these interest rates swaps was *not* significant.

As of *March 31, 2018*, the Bank's outstanding interest rate swap contracts had a notional amount of *\$561.9* million for various terms from *two* to *ten* years. The Bank entered into these interest rate swap contracts that are matched to individual fixed-rate commercial real estate loans in the Bank's loan portfolio. These contracts have been designated as hedging instruments to hedge the risk of changes in the fair value of the underlying commercial real estate loans due to changes in interest rates. The swap contracts are structured so that the notional amounts reduce over time to match the contractual amortization of the underlying loan and allow prepayments with the same pre-payment penalty amounts as the related loan. The Bank pays a weighted average fixed rate of *4.6%* and receives a variable rate of the *one-month* LIBOR rate plus a weighted average spread of *279* basis points, or at a weighted average rate of *4.5%*. As of *March 31, 2018*, and *March 31, 2017*, the notional amount of fair value interest rate swaps was *\$561.9* million and *\$424.2* million with unrealized gains of *\$11.1* million and *\$1.9* million, respectively, were included in other non-interest income. The amount of periodic net settlement of interest rate swaps reducing interest income was *\$229,000* for the *three* months ended *March 31, 2018*, compared to *\$713,000* for the same period a year ago. As of *March 31, 2018*, and *2017*, the ineffective portion of these interest rate swaps was *not* significant.

Table of Contents

Interest rate swap contracts involve the risk of dealing with institutional derivative counterparties and their ability to meet contractual terms. Institutional counterparties must have a strong credit profile and be approved by the Company's Board of Directors. The Company's credit exposure on interest rate swaps is limited to the net favorable value and interest payments of all swaps by each counterparty. Credit exposure *may* be reduced by the amount of collateral pledged by the counterparty. The Bancorp's interest rate swaps have been assigned by the counterparties to a derivatives clearing organization and daily margin is indirectly maintained with the derivatives clearing organization. Cash posted as collateral by the Bancorp related to derivative contracts totaled *\$1.3 million as of March 31, 2018* and *\$4.5 million as of December 31, 2017*.

The Company enters into foreign exchange forward contracts with various counterparties to mitigate the risk of fluctuations in foreign currency exchange rates for foreign exchange certificates of deposit or foreign exchange contracts entered into with our clients. These contracts are *not* designated as hedging instruments and are recorded at fair value in our Consolidated Balance Sheet. Changes in the fair value of these contracts as well as the related foreign exchange certificates of deposit and foreign exchange contracts are recognized immediately in net income as a component of non-interest income. Period end gross positive fair values are recorded in other assets and gross negative fair values are recorded in other liabilities. *At March 31, 2018*, the notional amount of option contracts totaled *\$1.0 million* with a net negative fair value of *\$3,000*. *At March 31, 2018*, spot, forward, and swap contracts in the total notional amount of *\$78.0 million* had a positive fair value of *\$1.5 million*. Spot, forward, and swap contracts in the total notional amount of *\$57.6 million* had a negative fair value of *\$924,000* at *March 31, 2018*. *At December 31, 2017*, the notional amount of option contracts totaled *\$1.0 million* with a net negative fair value of *\$9,000*. *At December 31, 2017*, spot, forward, and swap contracts in the total notional amount of *\$108.5 million* had a positive fair value of *\$1.8 million*. Spot, forward, and swap contracts in the total notional amount of *\$32.1 million* had a negative fair value of *\$453,000* at *December 31, 2017*.

16. Balance Sheet Offsetting

Certain financial instruments, including resell and repurchase agreements, securities lending arrangements and derivatives, *may* be eligible for offset in the condensed consolidated balance sheets and/or subject to master netting arrangements or similar agreements. The Company's securities sold with agreements to repurchase and derivative transactions with upstream financial institution counterparties are generally executed under International Swaps and Derivative Association master agreements that include "right of set-off" provisions. In such cases, there is generally a legally enforceable right to offset recognized amounts and there *may* be an intention to settle such amounts on a net basis. Nonetheless, the Company does *not* generally offset such financial instruments for financial reporting purposes.

Table of Contents

Financial instruments that are eligible for offset in the condensed consolidated balance sheets, as of *March 31, 2018*, and *December 31, 2017*, are presented in the following table:

	Gross Amounts		Net Amounts	Gross Amounts Not Offset in the Balance Sheet		Net
	Gross Amounts Recognized	Offset in the Balance Sheet	Presented in the Balance Sheet	Financial Instruments	Collateral	Amount
(In thousands)

17. Revenue from Contracts with Customers

On January 1, 2018, the Company adopted ASU 2014-09, Revenue from Contracts with Customers - Topic 606 and all subsequent ASUs that modified ASC 606, Revenue from Contracts with Customers. The Company adopted ASC 606 using the modified retrospective method applied to those contracts which were not completed as of January 1, 2018. The new standard did not materially impact the timing or measurement of the Company's revenue recognition as it is consistent with the Company's existing accounting for contracts within the scope of the new standard. There was no cumulative effect adjustment to retained earnings as a result of adopting this new standard.

The following is a summary of revenue from contracts with customers that are in-scope and not in-scope under Topic 606:

	March 31, 2018	March 31, 2017
	(In thousands)	
Non-interest income, in-scope⁽¹⁾:		
Fees and service charges on deposit accounts	\$2,318	\$2,512
Wealth management fees	1,301	979
Other service fees ⁽²⁾	3,248	3,169
Total noninterest income	6,867	6,660
Noninterest income, not in-scope ⁽³⁾	(1,557)	58
Total noninterest income	\$5,310	\$6,718

⁽¹⁾ There were no adjustments to the Company's financial statements recorded as a result of the adoption of ASC 606. For comparability, the Company has adjusted prior period amounts to conform to the periods presentation.

⁽²⁾ Other service fees comprise of fees related to letters of credit, wire fees, fees on foreign exchange transactions and other immaterial individual revenue streams.

⁽³⁾ These amounts primarily represent revenue from contracts with customers that are out of the scope of ASC 606.

Table of Contents

The major revenue streams by fee type that are within the scope of ASC 606 presented in the above tables are described in additional detail below:

Fees and Services Charges on Deposit Accounts

Fees and service charges on deposit accounts include charges for analysis, overdraft, cash checking, ATM, and safe deposit activities executed by our deposit clients, as well as interchange income earned through card payment networks for the acceptance of card based transactions. Fees earned from our deposit clients are governed by contracts which provide for overall custody and access to deposited funds and other related services, and can be terminated at will by either party. Fees received from deposit clients for the various deposit activities are recognized as revenue once the performance obligations are met. The adoption of ASU 2014-09 had no impact to the recognition of fees and service charges on deposit accounts.

Wealth Management Fees

The Company employs financial consultants to provide investment planning services for customers including wealth management services, asset allocation strategies, portfolio analysis and monitoring, investment strategies, and risk management strategies. The fees the Company earns are variable and are generally received monthly. The Company recognizes revenue for the services performed at quarter end based on actual transaction details received from the broker dealer the Company engages.

Practical Expedients and Exemptions

The Company applies the practical expedient in ASC 606-10-50-14 and does not disclose the value of unsatisfied performance obligations as the Company's contracts with customers generally have a term that is less than one year, are open-ended with a cancellation period that is less than one year, or allow the Company to recognize revenue in the amount to which the Company has the right to invoice.

In addition, given the short term nature of the contracts, the Company also applies the practical expedient in ASC 606-10-32-18 and does not adjust the consideration from customers for the effects of a significant financing component, if at contract inception the period between when the entity transfers the goods or services and when the customer pays for that good or service is one year or less.

18. Stockholders' Equity

Total equity was \$2.0 billion as of *March 31, 2018*, an increase of \$36.5 million, from \$1.97 billion as of *December 31, 2017*, primarily due to net income of \$63.8 million partially offset by common stock cash dividends of \$19.5 million and decreases in other comprehensive income of \$9.3 million.

The U.S. Treasury received warrants to purchase common stock of 1,846,374 shares at an exercise price of \$20.96 as part of the Company's participation in the U.S. Treasury Troubled Asset Relief Program Capital Purchase Program. As a result of the anti-dilution adjustments under the warrant, the exercise price at *December 31, 2017*, has been adjusted to \$20.41 and the number of warrants increased by 1.03%. At *March 31, 2018*, 578,238 warrants remain exercisable compared to 943,327 warrants at *December 31, 2017*.

(2) This amount was recorded as of *January 1, 2018* as a result of the adoption of ASU 2016-1.

19. Stock Repurchase Program

On *February 1, 2016*, the Company's Board of Directors approved a new stock repurchase program to buy back up to \$45.0 million of our common stock. In 2016, the Company repurchased 1,380,578 shares for \$37.5 million, or \$27.13 per share under the *February 2016* repurchase program. The Company did *not* repurchase any shares under the *February 2016* repurchase program in 2017 and for the *three* months ended *March 31, 2018*. As of *March 31, 2018*, and *December 31, 2017*, the Company *may* repurchase up to \$7.5 million of its common stock under the *February 2016* repurchase program.

20. Subsequent Events

The Company has evaluated the effect of events that have occurred subsequent to *March 31, 2018*, through the date of issuance of the Consolidated Financial Statements, and there have been *no* material events that would require recognition in the Consolidated Financial Statements or disclosure in the notes to the Consolidated Financial Statements.

Table of Contents

Item 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion is based on the assumption that the reader has access to and has read the Company’s Annual Report on Form 10-K for the year ended December 31, 2017.

Critical Accounting Policies

The discussion and analysis of the Company’s financial condition and results of operations are based upon its unaudited condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these condensed consolidated financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues, and expenses, and related disclosures of contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Management of the Company considers the following to be critical accounting policies:

Accounting for the allowance for loan losses involves significant judgments and assumptions by management, which have a material impact on the carrying value of net loans. The judgments and assumptions used by management are based on historical experience and other factors, which are believed to be reasonable under the circumstances as described in “*Allowance for Credit Losses*” under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2017.

Highlights

Diluted earnings per share increased 27.9% to \$0.78 per share for the first quarter of 2018 compared to \$0.61 per share for the same quarter a year ago.

Net interest margin for the first quarter increased to 3.75% compared to 3.49% in first quarter of 2017 and 3.65% in the fourth quarter of 2017.

Total deposits increased by \$322 million, or 10.2% annualized, to \$13.0 billion, for the quarter.

Total loans increased \$144 million, or 4.5% annualized, to \$13.0 billion for the quarter.

Quarterly Statement of Operations Review

Net Income

Net income for the quarter ended March 31, 2018, was \$63.8 million, an increase of \$14.9 million, or 30.4%, compared to net income of \$48.9 million for the same quarter a year ago. Diluted earnings per share for the quarter ended March 31, 2018, was \$0.78 compared to \$0.61 for the same quarter a year ago. First quarter net income included a \$3.8 million decrease in the fair value of equity securities now recorded in the income statement as a result of the adoption of ASU 2016-01, which reduced first quarter 2018 earnings per share by \$.03.

Return on average stockholders' equity was 12.99% and return on average assets was 1.65% for the quarter ended March 31, 2018, compared to a return on average stockholders' equity of 10.73% and a return on average assets of 1.42% for the same quarter a year ago.

Table of Contents**Financial Performance**

	Three months ended	
	March 31, 2018	March 31, 2017
Net income (in millions)	\$63.8	\$48.9
Basic earnings per common share	\$0.79	\$0.61
Diluted earnings per common share	\$0.78	\$0.61
Return on average assets	1.65 %	1.42 %
Return on average total stockholders' equity	12.99 %	10.73 %
Efficiency ratio	43.35 %	43.66 %

Net Interest Income Before Provision for Credit Losses

Net interest income before provision for credit losses increased \$23.2 million, or 20.7%, to \$135.3 million during the first quarter of 2018, compared to \$112.1 million during the same quarter a year ago. The increase was due primarily to an increase in interest income from loans and securities, offset by increases in interest expense from time deposits and long-term debt.

The net interest margin was 3.75% for the first quarter of 2018 compared to 3.49% for the first quarter of 2017 and 3.65% for the fourth quarter of 2017.

For the first quarter of 2018, the yield on average interest-earning assets was 4.42%, the cost of funds on average interest-bearing liabilities was 0.92%, and the cost of interest-bearing deposits was 0.81%. In comparison, for the first quarter of 2017, the yield on average interest-earning assets was 4.07%, the cost of funds on average interest-bearing liabilities was 0.80%, and the cost of interest-bearing deposits was 0.69%. The increase in the yield on average interest earning assets resulted mainly from higher rates on loans. The net interest spread, defined as the difference between the yield on average interest-earning assets and the cost of funds on average interest-bearing liabilities, was 3.50% for the quarter ended March 31, 2018, compared to 3.27% for the same quarter a year ago.

Table of Contents

The following table sets forth information concerning average interest-earning assets, average interest-bearing liabilities, and the average yields and rates paid on those assets and liabilities for the three months ended March 31, 2018, and 2017. Average outstanding amounts included in the table are daily averages.

(1) Changes in interest income and interest expense attributable to changes in both volume and rate have been allocated proportionately to changes due to volume and changes due to rate.

Provision/(reversal) for credit losses

The reversal for credit losses was \$3.0 million in the first quarter of 2018 compared to \$2.5 million in the first quarter of 2017. The reversal for credit losses was based on a review of the appropriateness of the allowance for loan losses at March 31, 2018. The following table summarizes the charge-offs and recoveries for the periods indicated:

	Three months ended	
	March 31, 2018	March 31, 2017
	(In thousands)	
Charge-offs:		
Commercial loans	\$19	\$1,204

Commercial loans	913	491
Construction loans	44	49
Real estate loans ⁽¹⁾	867	297
Total recoveries	1,824	837
Net (recoveries)/charge-offs	\$(1,805)	\$922

(1) Real estate loans include commercial mortgage loans, residential mortgage loans, and equity lines.

Table of Contents

Non-Interest Income

Non-interest income, which includes revenues from depository service fees, letters of credit commissions, securities gains (losses), wire transfer fees, and other sources of fee income, was \$5.3 million for the first quarter of 2018, a decrease of \$1.4 million, or 21.0%, compared to \$6.7 million for the first quarter of 2017, primarily due to a \$3.8 million decrease in the fair value of equity securities and offset by an increase in other operating income of \$1.5 million.

Non-Interest Expense

Non-interest expense increased \$9.1 million, or 17.5%, to \$61.0 million in the first quarter of 2018 compared to \$51.9 million in the same quarter a year ago. The increase in non-interest expense in the first quarter of 2018 was primarily due to a \$4.5 million increase in salaries and employee benefits expense, partly from the acquisition of Far East National Bank, and a \$1.8 million increase in professional services expense when compared to the same quarter a year ago. The efficiency ratio was 43.4% in the first quarter of 2018 compared to 43.7% for the same quarter a year ago.

Income Taxes

The effective tax rate for the first quarter of 2018 was 22.8% compared to 29.5% for the first quarter of 2017. The effective tax rate includes the reduction of the corporate tax rate from the enactment of the Tax Cuts and Jobs Act and the impact of low income housing tax credits. Income tax expense for the first quarter of 2018 was also reduced by \$0.7 million in benefits from the distribution of restricted stock units and exercises of stock options.

Balance Sheet Review

Assets

Total assets were \$15.9 billion as of March 31, 2018, an increase of \$242.2 million, or 1.5%, from \$15.6 billion as of December 31, 2017, primarily due to loan growth and increases in short-term investments offset by decreases in investment securities.

Investment Securities

Investment securities represented 8.0% of total assets as of March 31, 2018, compared to 8.5% of total assets as of December 31, 2017. Securities available-for-sale were \$1.2 billion as of March 31, 2018, compared to \$1.3 billion as of December 31, 2017.

Table of Contents

The following tables reflect the amortized cost, gross unrealized gains, gross unrealized losses, and fair value of securities available-for-sale as of March 31, 2018, and investment securities as of December 31, 2017:

	March 31, 2018

For additional information, see Note 7 to the Company's unaudited condensed consolidated financial statements.

Investment securities having a carrying value of \$231.0 million as of March 31, 2018, and \$272.2 million as of December 31, 2017, were pledged to secure public deposits, other borrowings, treasury tax and loan and securities sold under agreements to repurchase.

Equity Securities

The adoption of ASU 2016-01 resulted in approximately \$8.6 million being reclassified from accumulated other comprehensive income to retained earnings, representing an increase to retained earnings as of January 1, 2018. At March 31, 2018, the Company recognized a net loss of \$3.8 million due to the decrease in fair value of equity investments with readily determinable fair values at March 31, 2018. Equity securities were \$24.2 million as of March 31, 2018, compared to \$28.1 million as of December 31, 2017.

Table of Contents**Loans**

Gross loans, excluding loans held for sale, were \$13.0 billion at March 31, 2018, an increase of \$144 million, or 1.1%, from \$12.9 billion at December 31, 2017. The increase was primarily due to increases of \$136.7 million, or 4.5%, in residential mortgage loans, and \$127.6 million, or 2.0%, in commercial mortgage loans, partially offset by decreases of \$90.9 million, or 13.4%, in real estate construction loans, and \$24.8 million, or 1.0%, in commercial loans. The loan balances and composition at March 31, 2018, compared to December 31, 2017 are presented below:

	March 31, 2018	% of Gross Loans	December 31, 2017	% of Gross Loans	% Change
(Dollars in thousands)					
Type of Loans					
Commercial loans	\$2,436,421	18.7 %	\$2,461,266	19.1 %	(1.0%)
Residential mortgage loans	3,198,750	24.6	3,062,050	23.8	4.5

Installment and other loans	4,473	0.0	5,170	0.0	(13.5)
Gross loans	\$13,014,539	100 %	\$12,870,290	100 %	1.1 %
Allowance for loan losses	(122,084)		(123,279)		(1.0)
Unamortized deferred loan fees	(3,289)		(3,245)		1.4
Total loans, net	\$12,889,166		\$12,743,766		1.1 %
Loans held for sale	\$-		\$8,000		(100.0%)

Non-performing Assets

Non-performing assets include loans past due 90 days or more and still accruing interest, non-accrual loans, and other real estate owned ("OREO"). The Company's policy is to place loans on non-accrual status if interest and/or principal is past due 90 days or more, or in cases where management deems the full collection of principal and interest unlikely.

After a loan is placed on non-accrual status, any previously accrued but unpaid interest is reversed and charged against current income and subsequent payments received are generally first applied towards the outstanding principal balance of the loan. Depending on the circumstances, management may elect to continue the accrual of interest on certain past due loans if partial payment is received and/or the loan is well collateralized and in the process of collection. The loan is generally returned to accrual status when the borrower has brought the past due principal and interest payments current and, in the opinion of management, the borrower has demonstrated the ability to make future payments of principal and interest as scheduled.

Management reviews the loan portfolio regularly for problem loans. During the ordinary course of business, management becomes aware of borrowers that may not be able to meet the contractual requirements of the loan agreements. Such loans are placed under closer supervision with consideration given to placing the loans on non-accrual status, the need for an additional allowance for loan losses, and (if appropriate) partial or full charge-off.

The ratio of non-performing assets, excluding non-accrual loans held for sale, to total assets was 0.4% at March 31, 2018 and December 31, 2017. Total non-performing assets increased \$390,000, or 0.7%, to \$58.6 million at March 31, 2018, compared to \$58.2 million at December 31, 2017, primarily due to an increase of \$541,000, or 1.1%, in non-accrual loans and offset by a decrease of \$151,000, or 1.6%, in other real estate owned.

Table of Contents

As a percentage of gross loans, excluding loans held for sale, plus OREO, our non-performing assets was 0.45% as of March 31, 2018, compared to 0.45% as of December 31, 2017. The non-performing loan portfolio coverage ratio, defined as the allowance for credit losses to non-performing loans, decreased to 256.8% as of March 31, 2018, from 262.1% as of December 31, 2017.

The following table presents the changes in non-performing assets and troubled debt restructurings (“TDRs”) as of March 31, 2018, compared to December 31, 2017, and to March 31, 2017:

(Dollars in thousands)	March 31, 2018	December 31, 2017	%	March 31, 2017	%

Non-accrual Loans

At March 31, 2018, total non-accrual loans were \$49.3 million, an increase of \$541,000, or 1.1%, from \$48.8 million at December 31, 2017, and an increase of \$1.3 million, or 2.9%, from \$48.0 million at March 31, 2017. The allowance for the collateral-dependent loans is calculated based on the difference between the outstanding loan balance and the value of the collateral as determined by recent appraisals, sales contracts, or other available market price information, less cost to sell. The allowance for collateral-dependent loans varies from loan to loan based on the collateral coverage of the loan at the time of designation as non-performing. We continue to monitor the collateral coverage of these loans, based on recent appraisals, on a quarterly basis and adjust the allowance accordingly. Non-accrual loans also include those TDRs that do not qualify for accrual status.

Table of Contents

The following tables present the type of properties securing the non-accrual portfolio loans and the type of businesses the borrowers engaged in as of the dates indicated:

	March 31, 2018		December 31, 2017

Impaired Loans

A loan is considered impaired when it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement based on current circumstances and events. The assessment for impairment occurs when and while such loans are on non-accrual as a result of delinquency status of over 90 days or receipt of information indicating that full collection of principal is doubtful, or when the loan has been restructured in a troubled debt restructuring (TDRs). Those loans with a balance less than our defined selection criteria, generally a loan amount less than \$500,000, are treated as a homogeneous portfolio. If loans meeting the defined criteria are not collateral dependent, we measure the impairment based on the present value of the expected future cash flows discounted at the loan's effective interest rate. If loans meeting the defined criteria are collateral dependent, we measure the impairment by using the loan's observable market price or the fair value of the collateral. We obtain an appraisal to determine the amount of impairment at the date that the loan becomes impaired. The appraisals are based on "as is" or bulk sale valuations. To ensure that appraised values remain current, we generally obtain an updated appraisal every twelve months from qualified independent appraisers. If the fair value of the collateral, less cost to sell, is less than the recorded amount of the loan, we then recognize impairment by creating or adjusting an existing valuation allowance with a corresponding charge to the provision for loan losses. If an impaired loan is expected to be collected through liquidation of the collateral, the amount of impairment, excluding disposal costs, which range between 3% to 6% of the fair value, depending on the size of the impaired loan, is charged off against the allowance for loan losses. Non-accrual impaired loans, including TDRs, are not returned to accrual status unless the unpaid interest has been brought current and full repayment of the recorded balance is expected or if the borrower has made six consecutive monthly payments of the scheduled amounts due, and TDRs are reviewed for continued impairment until they are no longer reported as TDRs.

Table of Contents

As of March 31, 2018, recorded investment in impaired loans totaled \$132.1 million and was comprised of non-accrual loans, excluding loans held for sale, of \$49.3 million and accruing troubled debt restructured loans (TDRs) of \$82.8 million. As of December 31, 2017, recorded investment in impaired loans totaled \$117.4 million and was comprised of non-accrual loans, excluding loans held for sale, of \$48.8 million and accruing TDRs of \$68.6 million. For impaired loans, the amounts previously charged off represent 6.4% as of March 31, 2018, and 7.2% as of December 31, 2017, of the contractual balances for impaired loans. As of March 31, 2018, \$33.4 million, or 67.7%, of the \$49.3 million of non-accrual loans, excluding loans held for sale, was secured by real estate compared to \$34.5 million, or 70.7%, of the \$48.8 million of non-accrual loans, excluding loans held for sale, that was secured by real estate as of December 31, 2017. The Bank obtains current appraisals, sales contracts, or other available market price information intended to provide updated factors in evaluating potential loss.

As of March 31, 2018, \$1.5 million of the \$122.1 million allowance for loan losses was allocated for impaired loans and \$120.6 million was allocated to the general allowance. As of December 31, 2017, \$2.1 million of the \$123.3 million allowance for loan losses was allocated for impaired loans and \$121.1 million was allocated to the general allowance.

The allowance for loan losses to non-accrual loans was 247.5% as of March 31, 2018, from 252.7% as of December 31, 2017, primarily due to an increase in the non-accrual loans. Non-accrual loans also include those TDRs that do not qualify for accrual status.

The following table presents impaired loans and the related allowance as of the dates indicated:

	Impaired Loans March 31, 2018			December 31, 2017

Table of Contents

Loan Interest Reserves

In accordance with customary banking practice, we originate construction loans and land development loans where interest on the loan is disbursed from pre-established interest reserves included in the total original loan commitment. Our construction loans and land development loans generally include optional renewal terms after the maturity of the initial loan term. New appraisals are obtained prior to extension or renewal of these loans in part to determine the appropriate interest reserve to be established for the new loan term. Loans with interest reserves are underwritten to the same criteria, including loan to value and, if applicable, pro forma debt service coverage ratios, as loans without interest reserves. Construction loans with interest reserves are monitored on a periodic basis to gauge progress towards completion. Interest reserves are frozen if it is determined that additional draws would result in a loan to value ratio that exceeds policy maximums based on collateral property type. Our policy limits in this regard are consistent with supervisory limits and range from 65% in the case of land to 85% in the case of one to four family residential construction projects.

As of March 31, 2018, construction loans of \$465.6 million were disbursed with pre-established interest reserves of \$69.4 million compared to \$545.0 million of such loans disbursed with pre-established interest reserves of \$72.3 million at December 31, 2017. The balance for construction loans with interest reserves that have been extended was \$63.6 million with pre-established interest reserves of \$2.3 million at March 31, 2018, compared to \$62.1 million with pre-established interest reserves of \$2.0 million at December 31, 2017. Land loans of \$19.2 million were disbursed with pre-established interest reserves of \$689,000 at March 31, 2018, compared to \$32.7 million of land loans disbursed with pre-established interest reserves of \$1.3 million at December 31, 2017. The balance for land loans with interest reserves that have been extended was \$6.4 million at March 31, 2018 with pre-established interest reserves of \$248,000 compared to \$6.9 million in land loans with pre-established interest reserves of \$221,000 at December 31, 2017.

At March 31, 2018 and December 31, 2017, the Bank had no loans on non-accrual status with available interest reserves. At March 31, 2018, \$8.1 million of non-accrual non-residential construction loans had been originated with pre-established interest reserves. At December 31, 2017, \$8.2 million of non-accrual non-residential construction loans and \$8.0 million of non-accrual land loans had been originated with pre-established interest reserves. While we typically expect loans with interest reserves to be repaid in full according to the original contractual terms, some loans require one or more extensions beyond the original maturity before full repayment. Typically, these extensions are required due to construction delays, delays in the sale or lease of property, or some combination of these two factors.

Loan Concentration

Most of the Company's business activities are with customers located in the high-density Asian-populated areas of Southern and Northern California; New York City, New York; Dallas and Houston, Texas; Seattle, Washington;

Edgar Filing: CATHAY GENERAL BANCORP - Form 10-Q

Boston, Massachusetts; Chicago, Illinois; Edison, New Jersey; Rockville, Maryland; Las Vegas, Nevada, and Hong Kong. The Company has no specific industry concentration, and generally its loans are collateralized with real property or other pledged collateral of the borrowers. The Company generally expects loans to be paid off from the operating profits of the borrowers, refinancing by another lender, or through sale by the borrowers of the collateral. There were no loan concentrations to multiple borrowers in similar activities that exceeded 10% of total loans as of March 31, 2018, or as of December 31, 2017.

Table of Contents

The federal banking regulatory agencies issued final guidance on December 6, 2006, regarding risk management practices for financial institutions with high or increasing concentrations of commercial real estate (“CRE”) loans on their balance sheets. The regulatory guidance reiterates the need for sound internal risk management practices for those institutions that have experienced rapid growth in CRE lending, have notable exposure to specific types of CRE, or are approaching or exceeding the supervisory criteria used to evaluate the CRE concentration risk, but the guidance is not to be construed as a limit for CRE exposure. The supervisory criteria are: (1) total reported loans for construction, land development, and other land represent 100% of the institution’s total risk-based capital, and (2) total CRE loans represent 300% or more of the institution’s total risk-based capital and the institution’s CRE loan portfolio has increased 50% or more within the last thirty-six months. Total loans for construction, land development, and other land represented 35% of the Bank’s total risk-based capital as of March 31, 2018, and 41% as of December 31, 2017. Total CRE loans represented 293% of total risk-based capital as of March 31, 2018, and 293% as of December 31, 2017 and were below the Bank’s internal limit for CRE loans of 400% of total capital at both dates.

Allowance for Credit Losses

The Bank maintains the allowance for credit losses at a level that the Bank considers appropriate to absorb the estimated and known risks in the loan portfolio and off-balance sheet unfunded credit commitments. Allowance for credit losses is comprised of the allowance for loan losses and the reserve for off-balance sheet unfunded credit commitments. With this risk management objective, the Bank’s management has an established monitoring system that is designed to identify impaired and potential problem loans, and to permit periodic evaluation of impairment and the appropriate level of the allowance for credit losses in a timely manner.

In addition, the Bank’s Board of Directors has established a written credit policy that includes a credit review and control system that the Board of Directors believes should be effective in ensuring that the Bank maintains an appropriate allowance for credit losses. The Board of Directors provides oversight for the allowance evaluation process, including quarterly evaluations, and determines whether the allowance is appropriate to absorb losses in the credit portfolio. The determination of the amount of the allowance for credit losses and the provision for credit losses are based on management’s current judgment about the credit quality of the loan portfolio and takes into consideration known relevant internal and external factors that affect collectability when determining the appropriate level for the allowance for credit losses. The nature of the process by which the Bank determines the appropriate allowance for credit losses requires the exercise of considerable judgment. Additions to the allowance for credit losses are made by charges to the provision for credit losses. While management utilizes its best judgment based on the information available, the ultimate appropriateness of the allowance is dependent upon a variety of factors beyond the Bank’s control, including the performance of the Bank’s loan portfolio, the economy, changes in interest rates, and the view of the regulatory authorities toward loan classifications. Identified credit exposures that are determined to be uncollectible are charged against the allowance for credit losses. Recoveries of previously charged off amounts, if any, are credited to the allowance for credit losses. A weakening of the economy or other factors that adversely affect asset quality could result in an increase in the number of delinquencies, bankruptcies, or defaults, and a higher level of non-performing assets, net charge-offs, and provision for credit losses in future periods.

The allowance for loan losses was \$122.1 million and the allowance for off-balance sheet unfunded credit commitments was \$4.6 million at March 31, 2018, which represented the amount believed by management to be appropriate to absorb credit losses inherent in the loan portfolio, including unfunded credit commitments. The \$122.1 million allowance for loan losses at March 31, 2018, decreased \$1.2 million, or 1.0%, from \$123.3 million at December 31, 2017. The allowance for loan losses represented 0.94% of period-end gross loans, excluding loans held for sale, and 247.5% of non-performing loans at March 31, 2018. The comparable ratios were 0.96% of period-end gross loans, excluding loans held for sale, and 252.7% of non-performing loans at December 31, 2017.

Table of Contents

The following table sets forth information relating to the allowance for loan losses, charge-offs, recoveries, and the reserve for off-balance sheet credit commitments for the periods indicated:

	Three months ended

(1) Excluding loans held for sale.

(2) Excluding non-accrual loans held for sale.

Our allowance for loan losses consists of the following:

Specific allowance: For impaired loans, we provide specific allowances for loans that are not collateral dependent based on an evaluation of the present value of the expected future cash flows discounted at the loan's effective interest rate and for loans that are collateral dependent based on the fair value of the underlying collateral •determined by the most recent valuation information received, which may be adjusted based on factors such as changes in market conditions from the time of valuation. If the measure of the impaired loan is less than the recorded investment in the loan, the deficiency will be charged off against the allowance for loan losses or, alternatively, a specific allocation will be established.

General allowance: The unclassified portfolio is segmented on a group basis. Segmentation is determined by loan type and common risk characteristics. The non-impaired loans are grouped into 19 segments: two commercial segments, ten commercial real estate segments, one residential construction segment, one non-residential construction segment, one SBA segment, one installment loans segment, one residential mortgage segment, one equity lines of credit segment, and one overdrafts segment. The allowance is provided for each segmented group based on the group's historical loan loss experience aggregated based on loan risk classifications which take into account the current financial condition of the borrowers and guarantors, the prevailing value of the underlying collateral if collateral dependent, charge-off history, management's knowledge of the portfolio, general economic conditions, environmental factors including the trends in delinquency and non-accrual, and other significant factors, such as the national and local economy, volume and composition of the portfolio, strength of management and loan staff, underwriting standards, and concentration of credit. In addition, management review reports on past-due loans to ensure appropriate classification.

Table of Contents

The table set forth below reflects management's allocation of the allowance for loan losses by loan category and the ratio of each loan category to the average gross loans as of the dates indicated:

	March 31, 2018		December 31, 2017		
	Amount	Percentage of Loans in Each Category to Average Gross Loans	Amount	Percentage of Loans in Each Category to Average Gross Loans	
Type of Loan:	(Dollars in thousands)				
Commercial loans	\$54,597	18.9	% \$49,796	19.1	%
Residential mortgage loans ⁽¹⁾	11,372	25.6	11,013	24.5	
Commercial mortgage loans	34,230	50.5	37,610	51.2	
Real estate construction loans	21,864	5.0	24,838	5.2	
Installment and other loans	21	0.0	22	0.0	
Total	\$122,084	100	% \$123,279	100	%

(1) Residential mortgage loans includes equity lines.

The allowance allocated to commercial loans increased \$4.8 million, or 9.6%, to \$54.6 million at March 31, 2018, from \$49.8 million at December 31, 2017. The increase is a result of the trade instability and pending tariffs between the U.S. and China and an increase in non-accrual commercial loans in the first quarter of 2018.

The allowance allocated for residential mortgage loans increased slightly by \$0.4 million, or 3.3%, to \$11.4 million as of March 31, 2018, from \$11.0 million at December 31, 2017.

The allowance allocated to commercial mortgage loans decreased \$3.4 million, or 9.0%, to \$34.2 million at March 31, 2018, from \$37.6 million at December 31, 2017 as a result of lower delinquencies and continued recoveries in the first quarter of 2018.

The allowance allocated to real estate construction loans decreased \$3.0 million, or 12.0%, to \$21.9 million at March 31, 2018 from \$24.8 million at December 31, 2017. The decrease is due primarily to the decrease in loan volume and decreases in delinquencies during the first quarter of 2018.

Table of Contents**Deposits**

Total deposits were \$13.0 billion at March 31, 2018, an increase of \$322 million, or 2.5%, from \$12.7 billion at December 31, 2017. The following table displays the deposit mix as of the dates indicated:

	March 31, 2018		December 31, 2017		
	Amount	Percentage	Amount	Percentage	
Deposits					
Non-interest-bearing demand deposits	\$2,741,321	21.1	% \$2,783,127	21.9	%
Interest bearing demand deposits	1,398,076	10.7	1,410,519	11.1

Total deposits	\$13,012,251	100.0	% \$12,689,893	100.0	%

The following table shows the maturity distribution of time deposits as of March 31, 2018:

	At March 31, 2018		
	Time Deposits - under \$100,000	Time Deposits - \$100,000 and over	Total Time Deposits
(In thousands)			
Less than three months	\$379,168	\$845,570	\$1,224,738
Three to six months	211,671	1,113,961	1,325,632
Six to twelve months	693,708	1,731,286	2,424,994
Over one year	220,968	671,520	892,488

Total	\$1,505,515	\$4,362,337	\$5,867,852
Percent of total deposits	11.6	% 33.5	% 45.1

Borrowings

Borrowings include federal funds purchased, securities sold under agreements to repurchase, funds obtained as advances from the FHLB of San Francisco, and borrowings from other financial institutions.

Securities Sold Under Agreements to Repurchase. Securities sold under agreements to repurchase were \$100 million with a weighted average rate of 2.86% at both March 31, 2018, and December 31, 2017. Final maturity for the two fixed rate non-callable securities sold under agreements to repurchase was \$50.0 million in June 2018 and \$50.0 million in July 2018.

These transactions are accounted for as collateralized financing transactions and recorded at the amounts at which the securities were sold. The Company may have to provide additional collateral for the repurchase agreements, as necessary. The underlying collateral pledged for the repurchase agreements consists of U.S. Treasury securities and mortgage-backed securities with a fair value of \$107.6 million as of March 31, 2018, and \$108.4 million as of December 31, 2017.

Table of Contents

Borrowing from the FHLB. As of March 31, 2018, over-night borrowings from the FHLB were \$250 million at a rate of 1.87% compared to \$325 million at a rate of 1.41% as of December 31, 2017. As of March 31, 2018, the advances from the FHLB were \$75 million at a rate of 1.53% compared to \$105 million at a rate of 1.41% as of December 31, 2017. As of March 31, 2018, FHLB advances of \$15 million will mature in April 2018, \$5 million in July 2018, \$5 million in October 2018, and \$50 million in December 2019.

Other Borrowing. Pursuant to the Stock Purchase Agreement with Bank SinoPac Co. Ltd, \$35.2 million of the total consideration was held back with interest accruing at three-month LIBOR plus 150 basis points and 50%, 30%, and 20% will be disbursed annually over three years on the anniversary dates, respectively. As of March 31, 2018, the outstanding balance was \$35.7 million with a rate of 2.8% compared to \$35.2 million at December 31, 2017.

Long-term Debt. On October 12, 2017, the Bank entered into a term loan agreement of \$75.0 million with U.S. Bank. The loan has a floating rate of one-month LIBOR plus 175 basis points. As of March 31, 2018, the term loan has an interest rate of 3.438% compared to 3.125% at December 31, 2017. The principal amount of the long-term debt from U.S. Bank is due and payable in consecutive quarterly installments of \$4.7 million each on the last day of each calendar quarter commencing December 31, 2018, with the final installment due and payable on October 12, 2020. We used the U.S. Bank loan proceeds to fund a portion of our acquisition of SinoPac Bancorp.

At March 31, 2018, Junior Subordinated Notes totaled \$119.1 million with a weighted average interest rate of 4.34%, compared to \$119.1 million with a weighted average rate of 3.78% at December 31, 2017. The Junior Subordinated Notes have a stated maturity term of 30 years. As of March 31, 2018, and December 31, 2017, the Company's assets grew past the \$15 billion threshold which no longer qualifies the Junior Subordinated Notes as Tier 1 capital for regulatory reporting purposes. The Junior Subordinated Notes qualify as Tier 1 capital for regulatory reporting purposes at December 31, 2016 and 2015. The trusts are not consolidated with the Company in accordance with an accounting pronouncement that took effect in December 2003.

Table of Contents**Off-Balance-Sheet Arrangements and Contractual Obligations**

The following table summarizes the Company's contractual obligations to make future payments as of March 31, 2018. Payments for deposits and borrowings do not include interest. Payments related to leases are based on actual payments specified in the underlying contracts.

	Payment Due by Period				Total
	1 year or less	More than 1 year but less than 3 years	3 years or more but less than 5 years	5 years or more	
Contractual obligations:					
Deposits with stated maturity dates	\$4,975,364	\$869,045	\$23,431	\$12	\$5,867,852
Non-callable securities sold under agreements to repurchase	100,000	-	-	-	100,000
Advances from the Federal Home Loan Bank	275,000	50,000	-	-	325,000
Other borrowings	17,702	18,042	-	17,434	53,178
Long-term debt	4,688	70,312	-	119,136	194,136
Operating leases	10,228	13,289	8,777	2,997	35,291
Total contractual obligations and other commitments	\$5,382,982	\$1,020,688	\$32,208	\$139,579	\$6,575,457

In the normal course of business, we enter into various transactions, which, in accordance with U.S. generally accepted accounting principles, are not included in our condensed consolidated balance sheets. We enter into these transactions to meet the financing needs of our customers. These transactions include commitments to extend credit and standby letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in the condensed consolidated balance sheets.

Loan Commitments. We enter into contractual commitments to extend credit, normally with fixed expiration dates or termination clauses, at specified rates and for specific purposes. Substantially all of our commitments to extend credit are contingent upon customers maintaining specific credit standards at the time of loan funding. We minimize our exposure to loss under these commitments by subjecting them to credit approval and monitoring procedures. Management assesses the credit risk associated with certain commitments to extend credit in determining the level of the allowance for credit losses.

Standby Letters of Credit. Standby letters of credit are written conditional commitments issued by us to secure the obligations of a customer to a third party. In the event the customer does not perform in accordance with the terms of an agreement with the third party, we would be required to fund the commitment. The maximum potential amount of future payments we could be required to make is represented by the contractual amount of the commitment. If the commitment is funded, we would be entitled to seek reimbursement from the customer. Our policies generally require that standby letter of credit arrangements contain security and debt covenants similar to those contained in loan agreements.

Table of ContentsCapital Resources

Total equity was \$2.0 billion as of March 31, 2018, an increase of \$36.5 million, from \$1.97 billion as of December 31, 2017, primarily due to net income of \$63.8 million offset by common stock cash dividends of \$19.5 million and decreases of other comprehensive income of \$18.4 million due in part to the adoption of new accounting pronouncements in the first quarter of 2018.

The following table summarizes changes in total equity for the three months ended March 31, 2018:

(In thousands)	March 31, 2018
Net income	\$63,816
Stock options exercised and RSUs distributed	838
Proceeds from shares issued through the Dividend Reinvestment Plan	664
Shares withheld related to net share settlement of RSUs	(1,538)
Share-based compensation	1,499
Other comprehensive income	(18,395)
Retained earnings adjustments upon initial adoption of new pronouncements ⁽¹⁾	9,073
Cash dividends paid to common stockholders	(19,469)
Net increase in total equity	\$36,488

⁽¹⁾ These adjustments are a result of the adoption of ASU 2016-01 and 2018-2, effective as of January 1, 2018.

Capital Adequacy Review

Management seeks to maintain the Company's capital at a level sufficient to support future growth, protect depositors and stockholders, and comply with various regulatory requirements.

Both Bancorp's and the Bank's regulatory capital continued to exceed the regulatory minimum requirements under Basel III rules that became effective January 1, 2015, with transitional provisions as of March 31, 2018. In addition, the capital ratios of the Bank place it in the "well capitalized" category, which is defined as institutions with a common equity tier 1 capital ratio equal to or greater than 6.5%, a Tier 1 risk-based capital ratio equal to or greater than 8%, a

total risk-based capital ratio equal to or greater than 10%, and a Tier 1 leverage capital ratio equal to or greater than 5%.

Table of Contents

The following table presents Bancorp's and the Bank's capital and leverage ratios as of March 31, 2018, and December 31, 2017:

(Dollars in thousands)	Cathay General Bancorp				Cathay Bank			
	March 31, 2018		December 31, 2017		March 31, 2018		December 31, 2017

Excess	\$1,012,666	6.61	\$964,676	6.35	\$1,163,669	7.61	\$1,147,760	7.82
Risk-weighted assets	\$12,995,268		\$12,901,161		\$12,978,442		\$12,887,142	
Total average assets ⁽¹⁾	\$15,320,188		\$15,183,720		\$15,296,787		\$14,673,981	

(1) The quarterly total average assets reflect all debt securities at amortized cost, equity securities with readily determinable

fair values at the lower of cost or fair value, and equity securities without readily determinable fair values at historical cost.

Dividend Policy

Holders of common stock are entitled to dividends as and when declared by our Board of Directors out of funds legally available for the payment of dividends. Although we have historically paid cash dividends on our common stock, we are not required to do so. The amount of future dividends will depend on our earnings, financial condition, capital requirements and other factors, and will be determined by our Board of Directors. The terms of our Junior Subordinated Notes also limit our ability to pay dividends. We increased the common stock dividend from \$.21 per share in the fourth quarter of 2016, to \$.24 per share in the fourth quarter of 2017.

The Company declared a cash dividend of \$0.24 per share on 81,126,888 shares outstanding on March 1, 2018, for distribution to holders of our common stock on March 12, 2018. The Company paid total cash dividends of \$19.5 million in the first quarter of 2018.

Financial Derivatives

It is the policy of the Company not to speculate on the future direction of interest rates. However, the Company enters into financial derivatives in order to seek mitigation of exposure to interest rate risks related to our interest-earning assets and interest-bearing liabilities. We believe that these transactions, when properly structured and managed, may provide a hedge against inherent interest rate risk in the Company's assets or liabilities and against risk in specific transactions. In such instances, the Company may enter into interest rate swap contracts or other types of financial derivatives. Prior to considering any hedging activities, we seek to analyze the costs and benefits of the hedge in comparison to other viable alternative strategies. All hedges must be approved by the Bank's Investment Committee.

Table of Contents

The Company follows ASC Topic 815 that establishes accounting and reporting standards for financial derivatives, including certain financial derivatives embedded in other contracts, and hedging activities. It requires the recognition of all financial derivatives as assets or liabilities in the Company's consolidated balance sheet and measurement of those financial derivatives at fair value. The accounting treatment of changes in fair value is dependent upon whether or not a financial derivative is designated as a hedge and, if so, the type of hedge. Fair value is determined using third-party models with observable market data. For derivatives designated as cash flow hedges, changes in fair value are recognized in other comprehensive income and are reclassified to earnings when the hedged transaction is reflected in earnings. For derivatives designated as fair value hedges, changes in the fair value of the derivatives are reflected in current earnings, together with changes in the fair value of the related hedged item if there is a highly effective correlation between changes in the fair value of the interest rate swaps and changes in the fair value of the underlying asset or liability that is intended to be hedged. If there is not a highly effective correlation between changes in the fair value of the interest rate swap and changes in the fair value of the underlying asset or liability that is intended to be hedged, then only the changes in the fair value of the interest rate swaps are reflected in the Company's consolidated financial statements.

In May 2014, the Bancorp entered into interest rate swap contracts in the notional amount of \$119.1 million for a period of ten years. The objective of these interest rate swap contracts, which were designated as hedging instruments in cash flow hedges, was to hedge the quarterly interest payments on the Bancorp's \$119.1 million of Junior Subordinated Debentures that had been issued to five trusts, throughout the ten-year period beginning in June 2014 and ending in June 2024, from the risk of variability of these payments resulting from changes in the three-month LIBOR interest rate. The Bancorp pays a weighted average fixed interest rate of 2.61% and receives a variable interest rate of the three-month LIBOR at a weighted average rate of 2.17%. As of March 31, 2018, the notional amount of cash flow interest rate swaps was \$119.1 million and their unrealized gain of \$428,000, net of taxes, was included in other comprehensive income compared to unrealized loss of \$1.9 million at March 31, 2017. The amount of periodic net settlement of interest rate swaps included in interest expense was \$274,000 for the three months ended March 31, 2018, compared to \$479,000 for the same quarter a year ago. As of March 31, 2018, and 2017, the ineffective portion of these interest rates swaps was not significant.

As of March 31, 2018, the Bank's outstanding interest rate swap contracts had a notional amount of \$561.9 million for various terms from two to ten years. The Bank entered into these interest rate swap contracts that are matched to individual fixed-rate commercial real estate loans in the Bank's loan portfolio. These contracts have been designated as hedging instruments to hedge the risk of changes in the fair value of the underlying commercial real estate loans due to changes in interest rates. The swap contracts are structured so that the notional amounts reduce over time to match the contractual amortization of the underlying loan and allow prepayments with the same pre-payment penalty amounts as the related loan. The Bank pays a weighted average fixed rate of 4.6% and receives a variable rate of the one-month LIBOR rate plus a weighted average spread of 279 basis points, or at a weighted average rate of 4.5%. As of March 31, 2018, and March 31, 2017, the notional amount of fair value interest rate swaps was \$561.9 million and \$424.2 million with unrealized gains of \$11.1 million and \$1.9 million, respectively, were included in other non-interest income. The amount of periodic net settlement of interest rate swaps reducing interest income was \$229,000 for the three months ended March 31, 2018, compared to \$713,000 for the same period a year ago. As of March 31, 2018, and 2017, the ineffective portion of these interest rate swaps was not significant.

Table of Contents

Interest rate swap contracts involve the risk of dealing with institutional derivative counterparties and their ability to meet contractual terms. Institutional counterparties must have a strong credit profile and be approved by the Company's Board of Directors. The Company's credit exposure on interest rate swaps is limited to the net favorable value and interest payments of all swaps by each counterparty. Credit exposure may be reduced by the amount of collateral pledged by the counterparty. The Bancorp's interest rate swaps have been assigned by the counterparties to a derivatives clearing organization and daily margin is indirectly maintained with the derivatives clearing organization. Cash posted as collateral by the Bancorp related to derivative contracts totaled \$1.3 million as of March 31, 2018 and \$4.5 million as of December 31, 2017.

The Company enters into foreign exchange forward contracts with various counterparties to mitigate the risk of fluctuations in foreign currency exchange rates for foreign exchange certificates of deposit or foreign exchange contracts entered into with our clients. These contracts are not designated as hedging instruments and are recorded at fair value in our Consolidated Balance Sheet. Changes in the fair value of these contracts as well as the related foreign exchange certificates of deposit and foreign exchange contracts are recognized immediately in net income as a component of non-interest income. Period end gross positive fair values are recorded in other assets and gross negative fair values are recorded in other liabilities. At March 31, 2018, the notional amount of option contracts totaled \$1.0 million with a net negative fair value of \$3,000. At March 31, 2018, spot, forward, and swap contracts in the total notional amount of \$78.0 million had a positive fair value of \$1.5 million. Spot, forward, and swap contracts in the total notional amount of \$57.6 million had a negative fair value of \$924,000 at March 31, 2018. At December 31, 2017, the notional amount of option contracts totaled \$1.0 million with a net negative fair value of \$9,000. At December 31, 2017, spot, forward, and swap contracts in the total notional amount of \$108.5 million had a positive fair value of \$1.8 million. Spot, forward, and swap contracts in the total notional amount of \$32.1 million had a negative fair value of \$453,000 at December 31, 2017.

Table of Contents

Liquidity

Liquidity is our ability to maintain sufficient cash flow to meet maturing financial obligations and customer credit needs, and to take advantage of investment opportunities as they are presented in the marketplace. Our principal sources of liquidity are growth in deposits, proceeds from the maturity or sale of securities and other financial instruments, repayments from securities and loans, federal funds purchased, securities sold under agreements to repurchase, and advances from the FHLB. As of March 31, 2018, our average monthly liquidity ratio (defined as net cash plus short-term and marketable securities to net deposits and short-term liabilities) was 12.7% compared to 12.1% as of December 31, 2017.

The Bank is a shareholder of the FHLB, which enables the Bank to have access to lower-cost FHLB financing when necessary. At March 31, 2018, the Bank had an approved credit line with the FHLB of San Francisco totaling \$6.2 billion. Total advances from the FHLB of San Francisco were \$325.0 million and standby letter of credits issued by FHLB on the Company's behalf were \$148.2 million as of March 31, 2018. These borrowings bear fixed rates and are secured by loans. See Note 9 to the Consolidated Financial Statements. At March 31, 2018, the Bank pledged \$39.4 million of its commercial loans to the Federal Reserve Bank's Discount Window under the Borrower-in-Custody program. The Bank had borrowing capacity of \$34.6 million from the Federal Reserve Bank Discount Window at March 31, 2018.

Liquidity can also be provided through the sale of liquid assets, which consist of federal funds sold, securities purchased under agreements to resell, and securities available-for-sale. At March 31, 2018, investment securities totaled \$1.3 billion, with \$231.0 million pledged as collateral for borrowings and other commitments. The remaining \$1.0 billion was available as additional liquidity or to be pledged as collateral for additional borrowings.

Approximately 85% of our time deposits mature within one year or less as of March 31, 2018. Management anticipates that there may be some outflow of these deposits upon maturity due to the keen competition in the Bank's marketplace. However, based on our historical runoff experience, we expect the outflow will not be significant and can be replenished through our normal growth in deposits. Management believes all the above-mentioned sources will provide adequate liquidity during the next twelve months for the Bank to meet its operating needs.

The business activities of Bancorp consist primarily of the operation of the Bank and limited activities in other investments. The Bank paid dividends to Bancorp totaling \$32.0 million during the first quarter of 2018 and \$208.2 million during 2017.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We use a net interest income simulation model to measure the extent of the differences in the behavior of the lending and funding rates to changing interest rates, so as to project future earnings or market values under alternative interest rate scenarios. Interest rate risk arises primarily through the Company's traditional business activities of extending loans and accepting deposits. Many factors, including economic and financial conditions, movements in interest rates, and consumer preferences affect the spread between interest earned on assets and interest paid on liabilities. The net interest income simulation model is designed to measure the volatility of net interest income and net portfolio value, defined as net present value of assets and liabilities, under immediate rising or falling interest rate scenarios in 100 basis point increments.

Table of Contents

Although the modeling is very helpful in managing interest rate risk, it does require significant assumptions for the projection of loan prepayment rates on mortgage related assets, loan volumes and pricing, and deposit and borrowing volume and pricing, that might prove inaccurate. Because these assumptions are inherently uncertain, the model cannot precisely estimate net interest income, or precisely predict the effect of higher or lower interest rates on net interest income. Actual results will differ from simulated results due to the timing, magnitude, and frequency of interest rate changes, the differences between actual experience and the assumed volume, changes in market conditions, and management strategies, among other factors. The Company monitors its interest rate sensitivity and attempts to reduce the risk of a significant decrease in net interest income caused by a change in interest rates.

We have established a tolerance level in our policy to define and limit net interest income volatility to a change of plus or minus 5% when the hypothetical rate change is plus or minus 200 basis points. When the net interest rate simulation projects that our tolerance level will be met, or exceeded, we seek corrective action after considering, among other things, market conditions, customer reaction, and the estimated impact on profitability. The Company's simulation model also projects the net economic value of our portfolio of assets and liabilities. We have established a tolerance level in our policy to limit the loss in the net economic value of our portfolio of assets and liabilities to zero when the hypothetical rate change is plus or minus 200 basis points.

The table below shows the estimated impact of changes in interest rates on net interest income and market value of equity as of March 31, 2018:

	Net Interest Income	Market Value of Equity
Change in Interest Rate (Basis Points)	Volatility (1)	Volatility (2)
+200	8.7	3.3
+100	4.5	1.9
-100	-7.7	0.2
-200	-15.0	-2.6

Item 4. CONTROLS AND PROCEDURES.

The Company's principal executive officer and principal financial officer have evaluated the effectiveness of the Company's "disclosure controls and procedures," as such term is defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as of the end of the period covered by this quarterly report. Based upon their evaluation, the principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports filed or submitted by it under the Exchange Act is recorded, processed, summarized and

reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and include controls and procedures designed to ensure that information required to be disclosed by the Company in such reports is accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Table of Contents

There has not been any change in our internal control over financial reporting that occurred during the first quarter of 2018 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS.

Bancorp's wholly-owned subsidiary, Cathay Bank, is a party to ordinary routine litigation from time to time incidental to various aspects of its operations. Management does not believe that any such litigation is expected to have a material adverse impact on the Company's consolidated financial condition or results of operations.

Table of Contents**Item 1A. RISK FACTORS.**

There is no material change in the risk factors as previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2017, in response to Item 1A in Part I of Form 10-K.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.**ISSUER PURCHASES OF EQUITY SECURITIES**

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
