NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands except share data and where otherwise indicated)

(unaudited)

1. Basis of Presentation and Significant Accounting Policies

The Condensed Consolidated Financial Statements of IDEX Corporation (“IDEX” or the “Company”) have been prepared in accordance with the accounting principles generally accepted in the United States of America applicable to interim financial information and the instructions to Form 10-Q under the Securities Exchange Act of 1934, as amended. The statements are unaudited but include all adjustments, consisting only of recurring items, except as noted, that the Company considers necessary for a fair presentation of the information set forth herein. The results of operations for the three months ended March 31, 2014 are not necessarily indicative of the results to be expected for the entire year. The Condensed Consolidated Financial Statements and Management’s Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

2. Acquisitions

All of the Company’s acquisitions have been accounted for under Accounting Standards Codification (“ASC”) 805, Business Combinations. Accordingly, the accounts of the acquired companies, after adjustments to reflect fair values assigned to assets and liabilities, have been included in the consolidated financial statements from their respective dates of acquisition.

2013 Acquisitions

On March 18, 2013, the Company acquired the assets of FTL Seals Technology, Ltd (“FTL”). FTL specializes in the design and application of high integrity rotary seals, specialty bearings, and other custom products for the oil & gas, mining, power generation, and marine markets. Located in Leeds, England, FTL, along with Precision Polymer Engineering (“PPE”), operates within the Health & Science Technologies segment as part of the Sealing Solutions group and will expand the range of PPE’s technology expertise and markets served. FTL was acquired for an aggregate purchase price of \$34.5 million (£23.1 million) in cash. The entire purchase price was funded with borrowings under the Company’s revolving credit facility. Goodwill and intangible assets recognized as part of this transaction were \$18.0 million and \$13.0 million, respectively. The \$18.0 million of goodwill is not deductible for tax purposes. The Company incurred \$0.5 million of acquisition-related transaction costs in the three months ended March 31, 2014. These costs were recorded in selling, general and administrative expense and were related to completed transactions, pending transactions and potential transactions, including transactions that ultimately were not completed.

3. Business Segments

The Company has three reportable business segments: Fluid & Metering Technologies, Health & Science Technologies and Fire & Safety/Diversified Products.

The Fluid & Metering Technologies segment designs, produces and distributes positive displacement pumps, flow meters, injectors, and other fluid-handling pump modules and systems and provides flow monitoring and other services for the water and wastewater industries. The Health & Science Technologies segment designs, produces and distributes a wide range of precision fluidics, rotary lobe pumps, centrifugal and positive displacement pumps, roll compaction and drying systems used in beverage, food processing, pharmaceutical and cosmetics, pneumatic components and sealing solutions, very high precision, low-flow rate pumping solutions required in analytical instrumentation, clinical diagnostics and drug discovery, high performance molded and extruded, biocompatible medical devices and implantables, air compressors used in medical, dental and industrial applications, optical components and coatings for applications in the fields of scientific research, defense, biotechnology, aerospace, semiconductor, telecommunications and electronics manufacturing, laboratory and commercial equipment used in the production of micro and nano scale materials, precision photonic solutions used in life sciences, research and defense

markets, and precision gear and peristaltic pump technologies that meet exacting original equipment manufacturer specifications. The Fire & Safety/Diversified Products segment produces firefighting pumps and controls, rescue tools, lifting bags and other components and systems for the fire and rescue industry, engineered stainless steel banding and clamping devices used in a variety of industrial and commercial applications, and precision equipment for dispensing, metering and mixing colorants and paints used in a variety of retail and commercial businesses around the world.

4. Earnings Per Common Share

Earnings per common share ("EPS") are computed by dividing net income by the weighted average number of shares of common stock (basic) plus common stock equivalents outstanding (diluted) during the period. Common stock equivalents consist of stock options, which have been included in the calculation of weighted average shares

outstanding using the treasury stock method, unvested shares, performance share units, and shares issuable in connection with certain deferred compensation agreements (“DCUs”).

(unaudited)

ASC 260 "Earnings Per Share" provides that all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends participate in undistributed earnings with common shareholders. If awards are considered participating securities, the Company is required to apply the two-class method of computing basic and diluted earnings per share. The Company has determined that its outstanding unvested shares are participating securities. Accordingly, earnings per common share are computed using the more dilutive of the treasury stock method and the two-class method prescribed by ASC 260. For the purposes of calculating diluted EPS, net income attributable to common shareholders was reduced by \$0.5 million and \$0.3 million for the three months ended March 31, 2014 and 2013, respectively.

Basic weighted average shares reconciles to diluted weighted average shares as follows:

	Three Months Ended March 31,	
	2014	2013
Basic weighted average common shares outstanding	80,527	82,197
Dilutive effect of stock options, unvested shares, performance share units and DCUs	1,048	955
Diluted weighted average common shares outstanding	81,575	83,152

Options to purchase approximately 0.5 million and 0.6 million shares of common stock for the three months ended March 31, 2014 and 2013, respectively, were not included in the computation of diluted EPS because the effect of their inclusion would be antidilutive.

5. Inventories

The components of inventories as of March 31, 2014 and December 31, 2013 were:

	March 31, 2014	December 31, 2013
Raw materials and component parts	\$139,522	\$133,470
Work in process	43,400	41,895
Finished goods	61,253	55,602
Total	\$244,175	\$230,967

Inventories are stated at the lower of cost or market. Cost, which includes material, labor, and factory overhead, is determined on a FIFO basis.

6. Goodwill and Intangible Assets

The changes in the carrying amount of goodwill for the three months ended March 31, 2014, by reportable business segment, were as follows:

	Fluid & Metering Technologies	Health & Science Technologies	Fire & Safety/ Diversified Products	Total
Balance at December 31, 2013	\$528,044	\$571,675	\$249,737	\$1,349,456
Foreign currency translation	(105) 618	(43) 470
Balance at March 31, 2014	\$527,939	\$572,293	\$249,694	\$1,349,926

ASC 350 "Goodwill and Other Intangible Assets" requires that goodwill be tested for impairment at the reporting unit level on an annual basis and between annual tests if an event occurs or circumstances change that would more likely

than not reduce the fair value of the reporting unit below its carrying value. Annually on October 31, goodwill and other acquired intangible assets with indefinite lives are tested for impairment. The Company did not consider there to be any triggering event that would require an interim impairment assessment, therefore none of the goodwill or other acquired intangible assets with indefinite lives were tested for impairment during the three months ended March 31, 2014. Based on the results of our annual impairment test at October 31, 2013, all reporting units had a fair value that was significantly in excess of carrying value, except for our IDEX Optics and Photonics ("IOP") reporting unit, which had a fair value approximately 10% greater than the carrying value. The IOP reporting

unit was written down to its fair value in 2012 as a result of our annual goodwill impairment testing and, thus, the fair value continues to be near the carrying value.

The following table provides the gross carrying value and accumulated amortization for each major class of intangible asset at March 31, 2014 and December 31, 2013:

	At March 31, 2014			Weighted Average Life	At December 31, 2013

Total intangible assets	\$505,257	\$ (204,547)	\$300,710		\$506,284	\$ (195,057)	\$311,227

The unamortized Banjo trade name is an indefinite lived intangible asset which is tested for impairment on an annual basis in accordance with ASC 350 or more frequently if events or changes in circumstances indicate that the asset might be impaired.

7. Accrued Expenses

The components of accrued expenses as of March 31, 2014 and December 31, 2013 were:

Total long-term borrowings	\$778,852	\$772,005

The Company maintains a \$700.0 million revolving credit facility (the "Revolving Facility") with a maturity date of June 27, 2016. Up to \$75.0 million of the Revolving Facility is available for the issuance of letters of credit, and up to \$25.0 million is available to the Company for swing line loans, available on a same-day basis.

Proceeds from the Revolving Facility are available for use towards working capital, acquisitions and other general corporate purposes, including refinancing existing debt of the Company and its subsidiaries.

Borrowings under the Revolving Facility bear interest, at either an alternate base rate or an adjusted LIBOR rate plus, in each case, an applicable margin. Such applicable margin is based on the Company's senior, unsecured, long-term debt rating and can range from .875% to 1.70%. Based on the Company's credit rating at March 31, 2014, the applicable margin was 1.05%. Interest is payable (a) in the case of base rate loans, quarterly, and (b) in the case of LIBOR rate loans, on the maturity date of the borrowing, or quarterly from the effective date for borrowings exceeding three months. An annual Revolving Facility fee, also based on the Company's credit rating, is currently 20 basis points and is payable quarterly.

At March 31, 2014, \$17.0 million was outstanding under the Revolving Facility, with \$7.9 million of outstanding letters of credit, resulting in net available borrowing capacity under the Revolving Facility at March 31, 2014 of approximately \$675.1 million.

Other borrowings of \$3.7 million at March 31, 2014 consisted primarily of debt at international locations maintained for working capital purposes. Interest is payable on the outstanding debt balances at rates ranging from 0.3% to 1.5% per annum.

There are two key financial covenants that the Company is required to maintain in connection with the Revolving Facility and 2.58% Senior Euro Notes. The most restrictive financial covenants under these debt instruments require a minimum interest coverage ratio of 3.0 to 1 and a maximum leverage ratio of 3.25 to 1. At March 31, 2014, the

Company was in compliance with both of these financial covenants. There are no financial covenants relating to the 4.5% Senior Notes or 4.2% Senior Notes; however, both are subject to cross-default provisions.

10. Derivative Instruments

The Company enters into cash flow hedges from time to time to reduce the exposure to variability in certain expected future cash flows. The type of cash flow hedges the Company enters into includes foreign currency contracts and interest rate exchange agreements that effectively convert a portion of floating-rate debt to fixed-rate debt and are designed to reduce the impact of interest rate changes on future interest expense.

The effective portion of gains or losses on interest rate exchange agreements is reported in accumulated other comprehensive income (loss) in shareholders' equity and reclassified into net income in the same period or periods in which the hedged transaction affects net income. See Note 12 for the amount of loss reclassified into income for interest rate contracts for March 2014 and 2013. The remaining gain or loss in excess of the cumulative change in the present value of future cash flows or the hedged item, if any, is recognized into net income during the period of change.

Fair values relating to derivative financial instruments reflect the estimated amounts that the Company would receive or pay to sell or buy the contracts based on quoted market prices of comparable contracts at each balance sheet date.

As of March 31, 2014 the Company did not have any interest rate contracts outstanding.

In 2010 and 2011 the Company entered into two separate forward starting interest rate contracts in anticipation of the issuance of the 4.2% Senior Notes and the 4.5% Senior Notes. The Company cash settled these two interest rate contracts in 2010 and 2011 for a total of \$68.9 million, which is being amortized into interest expense over the 10 year term of the debt instruments. Approximately \$7.2 million of the pre-tax amount included in accumulated other comprehensive income (loss) in shareholders' equity at March 31, 2014 will be recognized to net income over the next 12 months as the underlying hedged transactions are realized.

11. Fair Value Measurements

ASC 820 "Fair Value Measurements and Disclosures" defines fair value, provides guidance for measuring fair value and requires certain disclosures. This standard discusses valuation techniques, such as the market approach (comparable market prices), the income approach (present value of future income or cash flow), and the cost approach (cost to replace the service capacity of an asset or replacement cost). The standard utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs, other than quoted prices that are observable for the asset or liability, either directly or indirectly.

Level 3: These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs that reflect the reporting entity's own assumptions.

The following table summarizes the basis used to measure the Company's financial assets at fair value on a recurring basis in the balance sheet at March 31, 2014 and December 31, 2013:

	Basis of Fair Value Measurements			
	Balance at March 31, 2014	Level 1	Level 2	Level 3
Money market investment	\$22,669	\$22,669	\$—	\$—

(unaudited)

The carrying value of our cash and cash equivalents, accounts receivable, accounts payable and accrued expenses approximates their fair values because of the short term nature of these instruments. At March 31, 2014, the fair value of the outstanding indebtedness under our Revolving Facility, 2.58% Senior Euro Notes, 4.5% Senior Notes and 4.2% Senior Notes, based on quoted market prices and current market rates for debt with similar credit risk and maturity, was approximately \$801.1 million compared to the carrying value of \$776.5 million. This fair value measurement is classified as Level 2 within the fair value hierarchy since it is determined based upon significant inputs observable in the market, including interest rates on recent financing transactions to entities with a credit rating similar to ours.

12. Other Comprehensive Income (Loss)

The components of other comprehensive income (loss) are as follows:

	Three Months Ended March 31, 2014			Three Months Ended March 31, 2013
