Item 1.01 Entry into a Material Definitive Agreement.

On December 18, 2013, Midwest Energy Emissions Corp and its wholly owned subsidiary MES, Inc. (together the “Company”) entered into an Amendment to the Exclusive Patent and Know-How License (the “Amendment”) with Energy & Environment Research Center Foundation, a North Dakota nonprofit entity (“EERCF”) when it received an executed signature page from EERCF to obtain the rights to use and obtain ownership of additional intellectual property of the EERCF. The Amendment finalized on December 18, 2013 was made to be effective on December 16, 2013.

Pursuant to the Amendment, in exchange for additional patent rights the Company agreed to pay the EERCF \$50,000, issue 962,500 shares of its common stock to the EERCF and issue a total of 412,500 shares of its common stock to four individual inventors of the intellectual property contained in the amended license agreement within 30 days. Also, the annual license maintenance fees are \$300,000 payable in monthly installments of \$25,000 and the previous requirement of the Company to annually enter into at least one sales agreement for at least one gigawatt nameplate electrical generation capacity has been eliminated. The Company has the option to receive an assignment of the patent rights from the EERCF by paying \$2,500,000 and issuing 612,500 shares of its common stock to the EERCF and issuing a total of 262,500 shares of its common stock issued to four individual inventors of the intellectual property contained in the amended license agreement. Upon the receipt of the optional payment and the assignment of these patent rights, all royalty and maintenance fee payments cease.

The foregoing summary of the Amendment is qualified in its entirety by reference to the actual agreements, a copy of which is filed as Exhibit 10.1 to this report, and incorporated by reference herein.
