MITEK SYSTEMS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

Mitek Systems, Inc. (the “Company”) develops, markets and sells proprietary mobile capture and identity verification software solutions for enterprise customers.

The Company applies its patented technology in image capture, correction and intelligent data extraction in the mobile financial and business services markets. The Company’s technology allows users to remotely deposit checks, open accounts, get insurance quotes and pay bills, as well as verify their identity by taking pictures of various documents with their camera-equipped smartphones and tablets instead of using the device’s keyboard. As of January 23, 2017, the Company has been granted 28 patents and it has filed for 17 additional domestic and international patents.

The Mobile Verify™ products combine the Mitek MiSnap™ auto capture experience with a variety of advanced computer vision techniques to provide verification of ID documents. Mobile Verify™ provides a check of authenticity of U.S. state-issued driver’s licenses and includes full global coverage. These products enable banks and other businesses to improve know your customer processes. Mobile Fill™ enables the camera to serve as a keyboard. Using Mobile Fill™, consumers can quickly pre-fill any form with personal data by simply snapping a picture of their driver license, credit card, or other document. The Company’s Mobile Deposit® product is software that allows users to remotely deposit a check using their camera-equipped smartphone or tablet. As of December 31, 2016, over 5,500 financial institutions have signed agreements to deploy Mobile Deposit®. These include all of the top ten, and nearly all of the top 50 U.S. retail banks. The Company’s mobile imaging software solutions are available for iOS and Android operating systems.

The Company markets and sells the Mitek Mobile Identity Suite of mobile capture and identity verification software products directly to enterprise customers or through channel partners. These software solutions are embedded in mobile banking or enterprise applications developed by banks, insurance companies or their partners, and then marketed under their own proprietary brands.

Basis of Presentation

The accompanying unaudited consolidated financial statements of the Company as of December 31, 2016 have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X and, accordingly, they do not include all information and footnote disclosures required by accounting principles generally accepted in the U.S. (“GAAP”). The Company believes the footnotes and other disclosures made in the financial statements are adequate for a fair presentation of the results of the interim periods presented. The financial statements include all adjustments (solely of a normal recurring nature) which are, in the opinion of management, necessary to make the information presented not misleading. You should read these financial statements and the accompanying notes in conjunction with the financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the fiscal year ended September 30, 2016, filed with the U.S. Securities and Exchange Commission on December 9, 2016.

Results for the three months ended December 31, 2016 are not necessarily indicative of results for any other interim period or for a full fiscal year.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

Foreign Currency

The Company's foreign subsidiaries operate and sell the Company's products and services in various countries and jurisdictions around the world. As a result, the Company is exposed to foreign currency exchange risks. For those subsidiaries whose functional currency is not the U.S. dollar, assets and liabilities are translated into U.S. dollar equivalents at the exchange rate in effect on the balance sheet date and revenues and expenses are translated into U.S. dollars using the average exchange rate over the period. Resulting currency translation adjustments are recorded in accumulated other comprehensive income (loss) in the Consolidated Balance Sheets. The Company recorded net losses resulting from foreign exchange translation of \$370,000 and \$130,000 for the three months ended December 31, 2016 and 2015, respectively.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, expenses and related disclosure of contingent assets and liabilities. On an ongoing basis, management reviews its estimates based upon currently available information. Actual results could differ materially from those estimates. These estimates include, but are not limited to, assessing the collectability of accounts receivable, estimation of the value of stock-based compensation awards, fair value of assets and liabilities acquired, impairment of goodwill, useful lives of intangible assets, vendor specific objective evidence (“VSOE”) of fair value related to revenue recognition and income taxes.

Goodwill and Purchased Intangible Assets

Goodwill resulted from the acquisition of IDchecker (as defined below) in fiscal year 2015. Goodwill and intangible assets with indefinite useful lives are not amortized, but are tested for impairment at least annually or as circumstances indicate that their value may no longer be recoverable. In accordance with Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 350, Intangibles—Goodwill and Other (“ASC 350”), the Company reviews the goodwill and indefinite-lived intangible asset for impairment at least annually in the fourth fiscal quarter and more frequently if events or changes in circumstances occur that indicate a potential reduction in the fair value of the reporting unit and/or the indefinite-lived intangible asset below their respective carrying values. Examples of such events or circumstances include: a significant adverse change in legal factors or in the business climate, a significant decline in the stock price, a significant decline in projected revenue or cash flows, an adverse action or assessment by a regulator, unanticipated competition, a loss of key personnel, or the presence of other indicators that would indicate a reduction in the fair value of a reporting unit.

Goodwill is considered to be impaired if the Company determines that the carrying value of the reporting unit to which the goodwill has been assigned exceeds management’s estimate of its fair value. Based on the guidance provided by ASC 350 and FASB ASC Topic 280, Segment Reporting, management has determined that the Company operates in one segment and consists of one reporting unit given the similarities in economic characteristics between operations and the common nature of the products, services and customers. As the Company has only one reporting unit, and because the Company is publicly traded, the Company determines the fair value of the reporting unit based on market capitalization as this represents the best evidence of fair value. In the fourth quarter of fiscal 2016, we completed the annual goodwill impairment test as of September 30, 2016 and concluded that goodwill was not impaired. The conclusion that goodwill was not impaired was based on a comparison of net assets as of September 30, 2016 to market capitalization.

Intangible assets are amortized over their useful lives. Each period, the Company evaluates the estimated remaining useful life of its intangible assets and whether events or changes in circumstances warrant a revision to the remaining period of amortization. The carrying amounts of these assets are periodically reviewed for impairment whenever events or changes in circumstances indicate that the carrying value of these assets may not be recoverable. Recoverability of these assets is measured by comparing the carrying amount of each asset to the future undiscounted cash flows the asset is expected to generate. The carrying amount of such assets is reduced to fair value if the undiscounted cash flows used in the test for recoverability are less than the carrying amount of such assets.

Net Income Per Share

The Company calculates net income per share in accordance with FASB ASC Topic 260, Earnings per Share. Basic net income per share is based on the weighted average number of common shares outstanding during the period.

Edgar Filing: MITEK SYSTEMS INC - Form 10-Q

Diluted net income per share also gives effect to all potentially dilutive securities outstanding during the period, such as options and restricted stock units (“RSUs”), if dilutive. In a period with a net loss position, potentially dilutive securities are not included in the computation of diluted net loss because to do so would be antidilutive, and the number of shares used to calculate basic and diluted net loss is the same.

For the three months ended December 31, 2016 and 2015, the following potentially dilutive common shares were excluded from the calculation of net loss per share, as they would have been antidilutive:

	Three Months Ended	
	December 31,	
	2016	2015
Stock options	3,107,081	3,621,853
RSUs	2,435,521	1,769,588
IDchecker closing shares	464,132	652,904
IDchecker earnout shares	163,624	—
Total potentially dilutive common shares outstanding	6,170,358	6,044,345

The calculation of basic and diluted net loss per share is as follows (amounts in thousands, except share data):

	Three Months Ended	
	December 31,	
	2016	2015
Net loss	\$(607)	\$(322)
Weighted-average common shares outstanding - basic and diluted	32,376,671	31,094,417
Net loss per share - basic and diluted	\$(0.02)	\$(0.01)

Revenue Recognition

Revenue from sales of software licenses sold through direct and indirect channels is recognized upon shipment of the related product, if the requirements of FASB ASC Topic 985-605, Software Revenue Recognition (“ASC 985-605”) are met, including evidence of an arrangement, delivery, fixed or determinable fee, collectability and VSOE of the fair value of the undelivered element. If the requirements of ASC 985-605 are not met at the date of shipment, revenue is not recognized until such elements are known or resolved. Revenue from customer support services, or maintenance revenue, includes post-contract support and the rights to unspecified upgrades and enhancements. VSOE of fair value for customer support services is determined by reference to the price the customer pays for such element when sold separately; that is, the renewal rate offered to customers. In those instances, when objective and reliable evidence of fair value exists for the undelivered items but not for the delivered items, the residual method is used to allocate the arrangement consideration. Under the residual method, the amount of arrangement consideration allocated to the delivered items equals the total arrangement consideration less the aggregate fair value of the undelivered items. Revenue from post-contract customer support is recognized ratably over the term of the contract. Certain customers have agreements that provide for usage fees above fixed minimums. Usage fees above fixed minimums are recognized as revenue when such amounts are reasonably estimable and billable. Revenue from professional services is recognized when such services are delivered. When a software sales arrangement requires professional services related to significant production, modification or customization of software, or when a customer considers professional services essential to the functionality of the software product, revenue is recognized based on predetermined milestone objectives required to complete the project, as those milestone objectives are deemed to be substantive in relation to the work performed. Any expected losses on contracts in progress are recorded in the period in which the losses become probable and reasonably estimable.

The Company provides hosting services that give customers access to software that resides on Company servers. The Company’s model typically includes an up-front fee and a monthly commitment from the customer that commences upon completion of the implementation through the remainder of the customer life. The up-front fee is the initial setup fee, or the implementation fee. The monthly commitment includes, but is not limited to, a fixed monthly fee or a transactional fee based on system usage that exceeds monthly minimums. If the up-front fee does not have standalone value, revenue is deferred until the date the customer commences use of the Company’s services, at which point the up-front fees are recognized ratably over the life of the customer arrangement. If the up-front fee has standalone value, revenue is deferred until the work has been performed. In determining whether professional services have standalone value, the Company considers the following factors for each customer arrangement: availability of the services from other vendors, the nature of the professional services, the timing of when the professional services contract was signed in comparison to the subscription service start date and the contractual dependence of the subscription service on the customer’s satisfaction with the professional services work.

Investments

Investments consist of corporate notes and bonds, and commercial paper. The Company classifies investments as available-for-sale at the time of purchase and reevaluates such classification as of each balance sheet date. All investments are recorded at estimated fair value. Unrealized gains and losses for available-for-sale securities are included in accumulated other comprehensive income, a component of stockholders' equity. The Company evaluates its investments to assess whether those with unrealized loss positions are other-than-temporarily impaired. Impairments are considered to be other-than-temporary if they are related to deterioration in credit risk or if it is likely that the Company will sell the securities before the recovery of its cost basis. Realized gains and losses and declines in value judged to be other-than-temporary are determined based on the specific identification method and are reported in other income, net in the Statements of Operations and Other Comprehensive Loss. No other-than-temporary impairment charges were recognized in the three months ended December 31, 2016 or 2015.

All investments whose maturity or sale is expected within one year are classified as "current" on the Consolidated Balance Sheets. All other securities are classified as "long-term" on the Consolidated Balance Sheets.

Accounts Receivable and Allowance for Doubtful Accounts

Trade accounts receivable are recorded at the net invoice value and are not interest bearing. The Company considers receivables past due based on the contractual payment terms. Allowances for doubtful accounts are established based on various factors, including credit profiles of the Company's customers, contractual terms and conditions, historical payments, and current economic trends. The Company reviews its allowances by assessing individual accounts receivable over a specific aging and amount. Accounts receivable are written off on a case-by-case basis, net of any amounts that may be collected. The Company maintained an allowance for doubtful accounts of \$33,000 and \$35,000 as of December 31, 2016 and September 30, 2016, respectively.

Capitalized Software Development Costs

Costs incurred for the development of software that will be sold, leased or otherwise marketed are capitalized when technological feasibility has been established. Software development costs consist primarily of compensation of development personnel and related overhead incurred to develop new products and upgrade and enhance the Company's current products, as well as fees paid to outside consultants. Capitalization of software development costs ceases and amortization of capitalized software development costs commences when the products are available for general release. For the three months ended December 31, 2016 and 2015, no software development costs were capitalized because the time period and costs incurred between technological feasibility and general release for all software product releases were not material or were not realizable.

Guarantees

In the ordinary course of business, the Company is not subject to potential obligations under guarantees that fall within the scope of FASB ASC Topic 460, Guarantees ("ASC 460"), except for standard indemnification and warranty provisions that are contained within many of the Company's customer license and service agreements and certain supplier agreements, and give rise only to the disclosure requirements prescribed by ASC 460. Indemnification and warranty provisions contained within the Company's customer license and service agreements and certain supplier agreements are generally consistent with those prevalent in the Company's industry. The Company has not previously incurred significant costs to settle claims or pay awards under these indemnification or warranty obligations. The Company accounts for these obligations in accordance with FASB ASC Topic 450, Contingencies ("ASC 450"), and records a liability for these obligations when a loss is probable and reasonably estimable. The Company has not recorded any liabilities for these obligations as of December 31, 2016 or September 30, 2016.

Fair Value of Equity Instruments

The fair value of equity instruments involves significant estimates based on underlying assumptions made by management. The fair value for purchase rights under the Company's equity plans is measured at the grant date using a Black-Scholes valuation model, which involves estimates of stock volatility, expected life of the instruments and other assumptions, and using the closing price of the Company's common stock on the grant date for RSUs. The fair value of stock-based awards is recognized as an expense over the respective terms of the awards.

Deferred Income Taxes

Deferred income taxes reflect the net tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the tax basis of such assets and liabilities. The Company maintains a valuation allowance against its deferred tax assets due to the uncertainty regarding the future realization of such assets,

which is based on historical taxable income, projected future taxable income and the expected timing of the reversals of existing temporary differences. Until such time as the Company can demonstrate that it will no longer incur losses, or if the Company is unable to generate sufficient future taxable income, it could be required to maintain the valuation allowance against its deferred tax assets.

Comprehensive Loss

Comprehensive loss consists of net loss, unrealized gains and losses on available-for-sale securities and foreign currency translation adjustments. Included on the Consolidated Balance Sheets at December 31, 2016 is an accumulated other comprehensive loss of \$433,000, compared to \$42,000 at September 30, 2016, related to the Company's available-for-sale securities and foreign currency translation adjustments.

Recently Adopted Accounting Pronouncements

In September 2015, the FASB issued Accounting Standards Update (“ASU”) No. 2015-16, Simplifying the Accounting for Measurement-Period Adjustments (Topic 805) (“ASU 2015-16”) which eliminates the requirement to restate prior period financial statements for measurement period adjustments. ASU 2015-16 requires that the cumulative impact of a measurement period adjustment (including the impact on prior periods) be recognized in the reporting period in which the adjustment is identified. The new standard is effective for interim and annual periods beginning after December 15, 2015 and early adoption is permitted. The Company had adopted the standard prospectively as of October 1, 2016. The adoption of ASU 2015-16 did not have a material impact on the results of operations, financial condition, or cash flows of the Company.

Recently Issued Accounting Pronouncements

In October 2016, the FASB issued ASU No. 2016-16, Intra-Entity Transfers of Assets Other Than Inventory (Topic 740) (“ASU 2016-16”), which requires entities to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. ASU 2016-16 is effective for interim and annual reporting periods beginning after December 15, 2017 with early adoption permitted. The Company is currently evaluating the impact ASU 2016-16 will have on its consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments (“ASU 2016-13”), which requires entities to use a Current Expected Credit Loss model which is a new impairment model based on expected losses rather than incurred losses. Under this model, an entity would recognize an impairment allowance equal to its current estimate of all contractual cash flows that the entity does not expect to collect from financial assets measured at amortized cost. The entity's estimate would consider relevant information about past events, current conditions and reasonable and supportable forecasts. ASU 2016-13 is effective for interim and annual reporting periods beginning after December 31, 2019 with early adoption permitted for annual reporting periods beginning after December 31, 2018. The Company is currently evaluating the impact ASU 2016-13 will have on its consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-09, Compensation – Stock Compensation (Topic 718) (“ASU 2016-09”), which simplified certain aspects of the accounting for share-based payment transactions, including income taxes, classification of awards and classification in the statement of cash flows. ASU 2016-09 will be effective for the Company beginning in its first quarter of fiscal 2018. The Company is currently evaluating the impact of adopting the new stock compensation standard on its consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) (“ASU 2016-02”), which modified lease accounting for both lessees and lessors to increase transparency and comparability by recognizing lease assets and lease liabilities by lessees for those leases classified as operating leases under previous accounting standards and disclosing key information about leasing arrangements. ASU 2016-02 will be effective for the Company beginning in its first quarter of fiscal 2020 and early adoption is permitted. The Company is currently evaluating the timing of its adoption and the impact of adopting the new lease standard on its consolidated financial statements.

In May 2014, the FASB issued guidance codified in FASB ASC Topic 606, Revenue Recognition – Revenue from Contracts with Customers (“ASC 606”), which amends the guidance in former ASC 605, Revenue Recognition. This accounting standard update will be effective for the Company beginning in the first quarter of fiscal 2019. The Company is currently evaluating the impact of the provisions of ASC 606.

No other new accounting pronouncement issued or effective during the three months ended December 31, 2016 had, or is expected to have, a material impact on the Company’s consolidated financial statements.

2. BUSINESS COMBINATION

On June 17, 2015, the Company completed the acquisition (the “Acquisition”) of IDchecker NL B.V., a company incorporated under the laws of the Netherlands (“IDC NL”), and ID Checker, Inc., a California corporation and wholly owned subsidiary of IDC NL (“IDC Inc.” and together with IDC NL, “IDchecker”), pursuant to a Share Purchase Agreement (the “Share Purchase Agreement”) dated May 26, 2015, by and among the Company, IDC NL, ID Checker Holding B.V. (“Parent”), Stichting Administratiekantoor OPID (together with Parent, the “Sellers”), and the other individuals specified therein. Upon completion of the Acquisition, IDC NL and IDC Inc. became wholly owned subsidiaries of the Company and the transaction has been accounted for as an acquisition of a business. IDchecker is a provider of cloud-based identification document verification services.

Pursuant to the terms of the Share Purchase Agreement, the Company acquired all of the issued and outstanding shares of IDC NL and IDC Inc. At the closing of the Acquisition, the Company paid a purchase price of \$5.9 million, which consisted of (i) a cash payment to the Sellers of \$5.6 million, subject to adjustments for transaction expenses, indebtedness, and working capital adjustments (the “Cash Payment”) and (ii) the forgiveness of the outstanding balance of approximately \$0.3 million on a promissory note issued by the Company to Parent. Approximately \$2.7 million in shares of the Company’s common stock (the “Closing Shares”), par value \$0.001 per share (“Common Stock”), or 712,790 shares, were issued to the Sellers at the closing of the Acquisition. In January 2016, the Company issued 137,306 additional shares (the “Earnout Shares”), to the Sellers for achievement by IDchecker of certain revenue and net income targets for the nine-month period ended September 30, 2015. Additionally, 55,297 Earnout Shares were earned by the Sellers for achievement by IDchecker of certain revenue and net income targets for the twelve-month period ended September 30, 2016. Vesting of both the Closing Shares and Earnout Shares is subject to the continued employment of the founders of IDchecker and such shares are being accounted for as compensation for future services in accordance with FASB ASC Topic 718, Compensation – Stock Compensation. For additional information regarding the Closing Shares and Earnout Shares, see Note 5 to the Company’s consolidated financial statements.

Upon the closing of the Acquisition, the Company deposited \$1.8 million of the Cash Payment and 20% of the Closing Shares into an escrow fund to serve as collateral and partial security for working capital adjustments and certain indemnification rights. In January 2016, the Company also deposited 27,461 Earnout Shares into an escrow fund. Additionally, 11,059 Earnout Shares will be added to the escrow fund from the Earnout Shares earned for the twelve-month period ended September 30, 2016. The escrow fund will be maintained until January 2018 or until such earlier time as the escrow fund is exhausted.

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed as part of the Acquisition as of June 17, 2015 (amounts shown in thousands):

	June 17, 2015
Current assets	\$620
Property, plant and equipment	42
Intangible assets	3,570
Assets acquired	\$4,232
Current liabilities	\$(476)
Other liabilities	(810)
Liabilities assumed	\$(1,286)
Fair value of net assets acquired	\$2,946
Total consideration paid	5,819
Goodwill before effect in exchange rates as of June 17, 2015	\$2,873
Effect of movements in exchange rates as of December 31, 2016	(190)
Goodwill as of December 31, 2016	\$2,683

The Company estimated the fair value of identifiable acquisition-related intangible assets primarily based on discounted cash flow projections that will arise from these assets. The Company exercised significant judgment with regard to assumptions used in the determination of fair value such as with respect to discount rates and the

determination of the estimated useful lives of the intangible assets, (see Note 4 to the Company's consolidated financial statements). The excess of the purchase price over the fair value of the assets acquired and liabilities assumed was allocated to goodwill. Goodwill in the amount of \$2.9 million was recorded in the Consolidated Balance Sheets at the acquisition date. The goodwill recognized is due to expected synergies and other factors and is not expected to be deductible for income tax purposes.

3. INVESTMENTS

The following table summarizes investments by type of security as of December 31, 2016 (amounts shown in thousands):

	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Market Value
Available-for-sale securities:				
U.S. Treasury	\$12,904	\$ 1	\$ (2)	\$12,903
Corporate debt securities, short-term	15,427	—	(16)	15,411
Total	\$28,331	\$ 1	\$ (18)	\$28,314

9

The following table summarizes investments by type of security as of September 30, 2016 (amounts shown in thousands):

	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Market Value
Available-for-sale securities:				
U.S. Treasury	\$12,907	\$ 8	\$ —	\$12,915
Corporate debt securities, short-term	11,949	2	(3)	11,948
Corporate debt securities, long-term	1,954	1	(3)	1,952
Total	\$26,810	\$ 11	\$ (6)	\$26,815

The cost of securities sold is based on the specific identification method. Amortization of premiums, accretion of discounts, interest, dividend income and realized gains and losses are included in investment income.

The Company determines the appropriate designation of investments at the time of purchase and reevaluates such designation as of each balance sheet date. All of the Company's investments are designated as available-for-sale debt securities. As of December 31, 2016 and September 30, 2016, the Company's short-term investments have maturity dates of less than one year from the balance sheet date and the Company's long-term investments have maturity dates of greater than one year from the balance sheet date.

Available-for-sale marketable securities are carried at fair value as determined by quoted market prices for identical or similar assets, with unrealized gains and losses, net of taxes, and reported as a separate component of stockholders' equity. Management reviews the fair value of the portfolio at least monthly, and evaluates individual securities with fair value below amortized cost at the balance sheet date. For debt securities, in order to determine whether impairment is other-than-temporary, management must conclude whether the Company intends to sell the impaired security and whether it is more likely than not that the Company will be required to sell the security before recovering its amortized cost basis. If management intends to sell an impaired debt security or it is more likely than not that the Company will be required to sell the security prior to recovering its amortized cost basis, an other-than-temporary impairment is deemed to have occurred. The amount of an other-than-temporary impairment on debt securities related to a credit loss, or securities that management intends to sell before recovery, is recognized in earnings. The amount of an other-than-temporary impairment on debt securities related to other factors is recorded consistent with changes in the fair value of all other available-for-sale securities as a component of stockholders' equity in other comprehensive income. No other-than-temporary impairment charges were recognized in the three months ended December 31, 2016 and 2015.

Fair Value Measurements and Disclosures

FASB ASC Topic 820, Fair Value Measurements ("ASC 820") defines fair value, establishes a framework for measuring fair value under GAAP and enhances disclosures about fair value measurements. Fair value is defined under ASC 820 as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value under ASC 820 must maximize the use of observable inputs and minimize the use of unobservable inputs. ASC 820 describes a fair value hierarchy based on the following three levels of inputs that may be used to measure fair value, of which the first two are considered observable and the last, unobservable:

Level 1—Quoted prices in active markets for identical assets or liabilities;

Level 2—Inputs other than Level 1 inputs that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; and

Level 3—Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

10

Edgar Filing: MITEK SYSTEMS INC - Form 10-Q

The following tables represent the fair value hierarchy of the Company's investments and acquisition-related contingent consideration as of December 31, 2016 and September 30, 2016, respectively (amounts shown in thousands):

	Balance	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2016:				
Assets:				
Short-term investments:				
U.S. Treasury	\$12,903	\$12,903	\$ —	\$ —
Corporate debt securities				
Financial	3,450	—	3,450	—
Industrial	5,176	—	5,176	—
Commercial paper				
Financial	4,089	—	4,089	—
Industrial	2,696	—	2,696	—
Total short-term investments at fair value	\$28,314	\$12,903	\$15,411	\$ —
Liabilities:				
Acquisition-related contingent consideration	282	—	—	282
Total liabilities at fair value	\$282	\$—	\$ —	\$ 282

	Balance	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
September 30, 2016:				
Assets:				
Short-term investments:				
U.S. Treasury	\$12,915	\$12,915	\$ —	\$ —
Corporate debt securities				
Financial	3,963	—	3,963	—
Industrial	4,445	—	4,445	—
Commercial paper				
Financial	2,843	—	2,843	—
Industrial	697	—	697	—
Total short-term investments at fair value	24,863	12,915	11,948	—
Long-term investments:				
Corporate debt securities				

Edgar Filing: MITEK SYSTEMS INC - Form 10-Q

Financial	502	—	502	—
Industrial	1,450	—	1,450	—
Total assets at fair value	\$26,815	\$12,915	\$13,900	\$—
Liabilities:				
Acquisition-related contingent consideration	252	—	—	252
Total liabilities at fair value	\$252	\$—	\$—	\$252

The following table includes a summary of the contingent consideration measured at fair value using significant unobservable inputs (Level 3) during the three months ended December 31, 2016 (amounts shown in thousands):

Balance at September 30, 2016	\$252
Expenses recorded due to changes in fair value	73
Issuance of common stock	(43)
Balance at December 31, 2016	\$282

4. GOODWILL AND INTANGIBLE ASSETS

Goodwill

The Company had goodwill balances of \$2.7 million and \$2.9 million at December 31, 2016 and September 30, 2016, respectively, associated with the acquisition of IDchecker which occurred during fiscal year 2015. For information regarding the acquisition of IDchecker, see Note 2 to the Company's consolidated unaudited financial statements. Goodwill represents the excess of costs over fair value of assets of businesses acquired. Goodwill acquired in a business combination and determined to have an indefinite useful life is not amortized, but instead is tested for impairment at least annually in accordance with ASC 350.

Intangible assets

Intangible assets include the value assigned to purchased completed technology, customer relationships, and trade names. The estimated useful lives for all of these intangible assets range from five to six years. Intangible assets as of December 31, 2016 are summarized as follows (amounts shown in thousands, except for years):

	Weighted Average Amortization Period	Cost	Accumulated Amortization	Net
Completed technologies	6 years	\$2,370	\$ 725	\$1,645
Customer relationships	6 years	970	297	673
Tradenames	5 years	230	81	149
Total intangible assets		\$3,570	\$ 1,103	\$2,467

Amortization expense related to acquired intangible assets was \$144,000 and \$149,000 for the three months ended December 31, 2016 and 2015, respectively, and is recorded within acquisition-related costs and expenses on the Consolidated Statements of Operations and Other Comprehensive Loss.

The estimated future amortization expense related to intangible assets for each of the five succeeding fiscal years is expected to be as follows (amounts shown in thousands):

	Estimated Future Amortization Expense
2017 (remaining nine months)	\$ 422
2018	563
2019	563
2020	550
2021	369
Total	\$ 2,467

5. STOCKHOLDERS' EQUITY

Stock-Based Compensation Expense

The following table summarizes stock-based compensation expense related to stock options and RSUs, which was allocated as follows (amounts shown in thousands):

	Three Months Ended	
	December 31,	
	2016	2015
Cost of revenue	\$40	\$18
Sales and marketing	314	225
Research and development	213	181
General and administrative	518	565
Stock-based compensation expense included in expenses	\$1,085	\$989

The fair value calculations for stock-based compensation awards to employees for the three months ended December 31, 2016 and 2015 were based on the following assumptions:

	Three Months Ended	Three Months Ended
	December 31, 2016	December 31, 2015
Risk-free interest rate	1.68% – 1.92%	1.57% – 1.75%
Expected life (years)	5.30	5.90
Expected volatility	78%	83%
Expected dividends	None	None

The expected life of options granted is derived using assumed exercise rates based on historical exercise patterns and vesting terms, and represents the period of time that options granted are expected to be outstanding. Expected stock price volatility is based upon implied volatility and other factors, including historical volatility. After assessing all available information on either historical volatility, or implied volatility, or both, the Company concluded that a combination of both historical and implied volatility provides the best estimate of expected volatility.

As of December 31, 2016, the Company had \$12.6 million of unrecognized compensation expense related to outstanding stock options and RSUs expected to be recognized over a weighted-average period of approximately 2.6 years.

2012 Incentive Plan

In January 2012, the Company’s board of directors (the “Board”) adopted the Mitek Systems, Inc. 2012 Incentive Plan (the “2012 Plan”), upon the recommendation of the compensation committee of the Board. On March 2, 2016, the Company’s stockholders approved an amendment to the 2012 Plan that increased the total number of shares of Common Stock reserved for issuance thereunder from 4,000,000 shares to 6,000,000 shares plus that number of shares of Common Stock that would otherwise return to the available pool of unissued shares reserved for awards under its 1999 Stock Option Plan, 2000 Stock Option Plan, 2002 Stock Option Plan, 2006 Stock Option Plan and 2010 Stock Option Plan (collectively, the “Prior Plans”). As of December 31, 2016, (i) stock options to purchase 2,008,353 shares of Common Stock and 1,892,136 RSUs were outstanding under the 2012 Plan, and 1,165,111 shares of Common Stock were reserved for future grants under the 2012 Plan and (ii) stock options to purchase an aggregate of 1,098,728 shares of Common Stock were outstanding under the Prior Plans.

Director Restricted Stock Unit Plan

In January 2011, the Board adopted the Mitek Systems, Inc. Director Restricted Stock Unit Plan, as amended and restated (the “Director Plan”), reserving up to 1,000,000 shares of Common Stock for the issuance of RSUs that may be granted to both employee and non-employee members of the Board. As of December 31, 2016, (i) 543,385 RSUs were outstanding under the Director Plan and (ii) 31,786 shares of Common Stock were reserved for future grants under the Director Plan.

Stock Options

The following table summarizes stock option activity under the Company’s equity plans during the three months ended December 31, 2016:

	Number of	Weighted- Average Exercise Price	Weighted-Average Remaining Contractual Term (in Years)
	Shares		
Outstanding, September 30, 2016	3,015,374	\$ 3.95	6.4
Granted	101,800	\$ 6.10	
Exercised	(5,760)	\$ 3.02	
Cancelled	(4,333)	\$ 2.82	
Outstanding, December 31, 2016	3,107,081	\$ 4.02	6.3

The Company recognized \$0.2 million and \$0.5 million in stock-based compensation expense related to outstanding stock options in the three months ended December 31, 2016 and 2015, respectively. As of December 31, 2016, the Company had \$2.1 million of unrecognized compensation expense related to outstanding stock options expected to be recognized over a weighted-average period of approximately 2.2 years.

Aggregate intrinsic value represents the value of the Company's closing stock price on the last trading day of the fiscal period in excess of the weighted-average exercise price, multiplied by the number of options outstanding and exercisable. The total intrinsic

value of options exercised during the three months ended December 31, 2016 and 2015 was \$18,000 and \$105,000, respectively. The per-share weighted-average fair value of options granted during the three months ended December 31, 2016 was \$3.96. The aggregate intrinsic value of options outstanding as of December 31, 2016 and 2015, was \$8.8 million and \$4.7 million, respectively.

Restricted Stock Units

The following table summarizes RSU activity under the Company's equity plans during the three months ended December 31, 2016:

	Weighted-Average	
	Number of	Fair Market Value
	Shares	Per Share
Outstanding, September 30, 2016	2,046,169	\$ 4.90
Granted	891,185	\$ 5.77
Settled	(486,833)	\$ 6.50
Cancelled	(15,000)	\$ 5.59
Outstanding, December 31, 2016	2,435,521	\$ 5.27

The cost of RSUs is determined using the fair value of Common Stock on the award date, and the compensation expense is recognized ratably over the vesting period. The Company recognized \$0.8 million and \$0.5 million in stock-based compensation expense related to outstanding RSUs in the three months ended December 31, 2016 and 2015, respectively. As of December 31, 2016, the Company had \$10.5 million of unrecognized compensation expense related to outstanding RSUs expected to be recognized over a weighted-average period of approximately 3.1 years.

Closing Shares

In connection with the closing of the Acquisition, the Company issued to the Sellers 712,790 shares of Common Stock. Vesting of these shares is subject to the continued employment of the founders of IDchecker and occurs over a period of 27 months (the "Service Period") from the date of issuance. The cost of the Closing Shares is determined using the fair value of Common Stock on the award date, and the stock-based compensation is recognized ratably over the vesting period. The Company recognized \$0.3 million in stock-based compensation expense related to the Closing Shares for the three months ended December 31, 2016 and 2015, respectively, which is recorded within acquisition-related costs and expenses on the Consolidated Statements of Operations and Other Comprehensive Loss. As of December 31, 2016, the Company had \$0.9 million of unrecognized compensation expense related to Closing Shares expected to be recognized over the remaining Service Period.

Earnout Shares

In addition to the Cash Payment and the issuance of Closing Shares, in each case at the closing of the Acquisition, the Company issued 137,306 Earnout Shares to the Sellers for achievement by IDchecker of certain revenue targets for the nine-month period ended September 30, 2015. Additionally, 55,297 Earnout Shares were earned by the Sellers for achievement by IDchecker of certain revenue targets for the twelve-month period ended September 30, 2016. Earnout Shares vest and will be eligible for resale such that 12.5% of the Earnout Shares will vest and be released for resale in

July 2017 and thereafter, the remaining 87.5% of the applicable Earnout Shares will vest and be released for resale in equal quarterly installments. Vesting of the Earnout Shares is subject to the continued employment of the founders of IDC NL through January 2019.

The Company calculated the fair value of the Earnout Shares using the Monte-Carlo simulation (using the Company's valuation date stock price, the annual risk-free interest rate, expected volatility, the probability of reaching the performance targets and a 10 trading day average stock price). This model will be updated and the respective fair value adjusted each reporting period based on the relevant facts and conditions at the reporting date. The Company recognized \$73,000 and \$84,000 in stock-based compensation expense related to the Earnout Shares for the three months ended December 31, 2016 and 2015, respectively, which is recorded within acquisition-related costs and expenses on the Consolidated Statements of Operations and Other Comprehensive Loss.

6. INCOME TAXES

The Company's deferred tax assets are primarily comprised of federal and state net operating loss carryforwards. Such federal and state net operating loss carryforwards begin to expire in the fiscal years ending September 30, 2018 and September 30, 2016, respectively. The Company carries a deferred tax valuation allowance equal to 100% of the net deferred tax assets. In recording this allowance, management has considered a number of factors, particularly the Company's recent history of sustained operating

losses. Management has concluded that a valuation allowance is required for 100% of the net deferred tax assets as it is more likely than not that the deferred tax assets will not be realized.

There can be no assurance that the Company will ever realize the benefit of any or all of the federal and state net operating loss carryforwards or the credit carryforwards, either due to ongoing operating losses or due to ownership changes, which may limit the usefulness of the net operating loss carryforwards. Due to the 100% valuation allowance on the net deferred tax assets, the Company does not anticipate that future changes in the Company's unrecognized tax benefits will impact its effective tax rate.

The Company's policy is to classify interest and penalties related to income tax matters as income tax expense. The Company had no accrual for interest or penalties as of December 31, 2016 or September 30, 2016, and has not recognized interest and/or penalties in the Consolidated Statements of Operations and Other Comprehensive Income for the three months ended December 31, 2016 or 2015.

7. COMMITMENTS AND CONTINGENCIES

Rothschild Mobile Imaging Innovations, Inc.

On May 16, 2014, Rothschild Mobile Imaging Innovations, Inc. ("RMII") filed a complaint against the Company in the U.S. District Court for the District of Delaware alleging that certain of the Company's mobile imaging products infringe four RMII-owned patents related to mobile imaging technology. On June 1, 2014, RMII amended its complaint to add JPMorgan Chase & Co. and JPMorgan Chase Bank, N.A. (together, "Chase"), one of the Company's customers, as a defendant in the lawsuit (as amended, the "Initial Lawsuit"). On September 8, 2014, RMII filed three additional complaints (the "Subsequent Lawsuits") against the Company in the U.S. District Court for the District of Delaware. The Subsequent Lawsuits contain allegations substantially similar to the Initial Lawsuit regarding infringement by the Company's mobile imaging products of the four RMII-owned patents related to mobile imaging technology, but name as co-defendants Citibank, N.A., Citigroup Inc., Wells Fargo & Company, Wells Fargo Bank, N.A., Bank of America Corporation and Bank of America, N.A., respectively (together with Chase, the "Bank Defendants"). RMII subsequently filed amended complaints (together with the Initial Lawsuit and the Subsequent Lawsuits, the "RMII Lawsuits") adding as defendants both Fiserv and NCR (the "Distributor Defendants"), each of whom distributes the Company's mobile imaging technology to one or more of the Bank Defendants. Based on the Company's understanding of the claims, the Company agreed to accept the demands for indemnity and defense tendered by each of the Bank Defendants and Distributor Defendants in connection with the RMII Lawsuits.

On November 10, 2014, the Company filed a motion to sever and stay the claims against Chase in the Initial Lawsuit pending resolution of RMII's claims against the Company, which motion was granted on August 3, 2015. On November 19, 2014, the Company filed joinders to the motion to stay with respect to the Subsequent Lawsuits, which joinders were also granted on August 3, 2015. Additionally, the Patent Trial and Appeal Board ("PTAB") of the Patent and Trademark Office instituted the Company's petitions for Inter Partes Review ("IPR") challenging the patentability of all four asserted patents, and the Court agreed to stay the litigation in its entirety until all of the decisions are rendered in the IPR proceedings.

On July 20, 2016, the PTAB entered its final decision in the IPR proceedings. The PTAB ruled that all claims asserted in the litigation in all four RMII patents were directed to unpatentable subject matter and thus not patent eligible. On September 16, 2016, the parties filed a joint status report notifying the Court of the PTAB's decisions in the IPRs.

Through that notice, Mitek requested that the Court enter a judgment of non-infringement, or, in the alternative, dismiss all of RMII's claims against all defendants with prejudice. On September 16, 2016, RMII filed a motion to dismiss without prejudice.

The Company is currently controlling the defense of such claims and has taken actions to defend the RMII Lawsuits, as more fully described above. The Company believes that RMII's claims are without merit and have vigorously defended against those claims. The Company does not believe that the results of the RMII Lawsuits will have a material adverse effect on its financial condition or results of operations.

Other Legal Matters

In addition to the foregoing, the Company is subject to various claims and legal proceedings arising in the ordinary course of its business. The Company accrues for such liabilities when it is both (i) probable that a loss has occurred and (ii) the amount of the loss can be reasonably estimated in accordance with ASC 450. While any legal proceeding has an element of uncertainty, the Company believes that the disposition of such matters, in the aggregate, will not have a material effect on the Company's financial condition or results of operations.

Facility Leases

The Company's principal executive offices, as well as its research and development facility, are located in approximately 28,354 square feet of office space in San Diego, California. The term of the lease for the Company's offices commenced on October 1, 2016 and continues through April 30, 2020. The annual base rent under this lease is approximately \$0.6 million per year. In connection with this lease, the Company received tenant improvement allowances totaling \$0.3 million. These lease incentives are being amortized as a reduction of rent expense over the term of the lease. As of December 31, 2016, the unamortized balance of the lease incentives was \$0.3 million, of which \$0.1 million has been included in other current liabilities and \$0.2 million has been included in other non-current liabilities. The offices of IDchecker are located in the Netherlands and the term of this lease continues through May 31, 2020. The annual base rent under this lease is approximately €48,000 per year. The Company has a sales office in London, UK. The term of this lease continues through May 31, 2017. The annual base rent under this lease is approximately £65,000 per year. The Company believes its existing properties are in good condition and are sufficient and suitable for the conduct of its business.

8. REVENUE AND VENDOR CONCENTRATIONS

Revenue Concentration

For the three months ended December 31, 2016, the Company derived revenue of \$3.9 million from two customers, with such customers accounting for 31% and 11%, respectively, of the Company's total revenue. For the three months ended December 31, 2015, the Company derived revenue of \$3.7 million from three customers, with such customers accounting for 20%, 19% and 12%, respectively, of the Company's total revenue. The corresponding accounts receivable balances of customers from which revenues were in excess of 10% of total revenue were \$2.5 million and \$2.3 million at December 31, 2016 and 2015, respectively.

The Company's revenue is derived primarily from sales by the Company to channel partners, including systems integrators and resellers, and end-users of licenses to sell products covered by the Company's patented technologies. These contractual arrangements do not obligate the Company's channel partners to order, purchase or distribute any fixed or minimum quantities of the Company's products. In most cases, the channel partners purchase the license from the Company after they receive an order from an end-user. The channel partners receive orders from various individual end-users; therefore, the sale of a license to a channel partner may represent sales to multiple end-users. End-users can purchase the Company's products through more than one channel partner.

Revenues can fluctuate based on the timing of license renewals by channel partners. When a channel partner purchases or renews a license, the Company receives a license fee in consideration for the grant of a license to sell the Company's products and there are no future payment obligations related to such agreement; therefore, the license fee the Company receives with respect to a particular license renewal in one period does not have a correlation with revenue in future periods. During the last several quarters, sales of licenses to one or more channel partners have comprised a significant part of the Company's revenue. This is attributable to the timing of renewals or purchases of licenses and does not represent a dependence on any single channel partner. The Company believes that it is not dependent upon any single channel partner, even those from which revenues were in excess of 10% of the Company's total revenue in a specific reporting period, and that the loss or termination of the Company's relationship with any such channel partner would not have a material adverse effect on the Company's future operations because either the Company or another channel partner could sell the Company's products to the end-user that had purchased from the

channel partner the Company lost.

International sales accounted for approximately 25% and 10% of the Company's total revenue for the three months ended December 31, 2016 and 2015, respectively.

Vendor Concentration

The Company purchases its integrated software components from multiple third-party software providers at competitive prices. For the three months ended December 31, 2016 and 2015, the Company did not make purchases from any one vendor comprising 10% or more of the Company's total purchases. The Company has entered into contractual relationships with some of its vendors; however, the Company does not believe it is substantially dependent upon nor exposed to any significant concentration risk related to purchases from any of its vendors given the availability of alternative sources for its necessary integrated software components.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

This Quarterly Report on Form 10-Q (this "Form 10-Q"), contains "forward-looking statements" that involve risks and uncertainties, as well as assumptions that, if they never materialize or they prove incorrect, could cause our results to differ materially and adversely from those expressed or implied by such forward-looking statements. The forward-looking statements are contained principally in Part I, Item 2—"Management's Discussion and Analysis of Financial Condition and Results of Operations" and Part II, Item 1A—"Risk Factors," but appear throughout this Form 10-Q. Forward-looking statements may include, but are not limited to, statements relating to our outlook or expectations for earnings, revenues, expenses, asset quality, volatility of our common stock, financial condition or other future financial or business performance, strategies, expectations, or business prospects, or the impact of legal, regulatory or supervisory matters on our business, results of operations or financial condition.

Forward-looking statements can be identified by the use of words such as "estimate," "plan," "project," "forecast," "intend," "expect," "anticipate," "believe," "seek," "target", "will," "would," "could," "can," "may", or similar expressions. Forward-looking statements reflect our judgment based on currently available information and involve a number of risks and uncertainties that could cause actual results to differ materially from those described in the forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in Part II, Item 1A- "Risk Factors" in this Form 10-Q and in our other filings with the U.S. Securities and Exchange Commission (the "SEC"), including our Annual Report on Form 10-K for the fiscal year ended September 30, 2016, filed with the SEC on December 9, 2016 (the "Form 10-K"). Additionally, there may be other factors that could preclude us from realizing the predictions made in the forward-looking statements. We operate in a continually changing business environment and new factors emerge from time to time. We cannot predict such factors or assess the impact, if any, of such factors on our financial position or results of operations. All forward-looking statements included in this Form 10-Q speak only as of the date of this Form 10-Q and you are cautioned not to place undue reliance on any such forward-looking statements. Except as required by law, we undertake no obligation to publicly update or release any revisions to these forward-looking statements to reflect any events or circumstances after the date of this Form 10-Q or to reflect the occurrence of unanticipated events.

In this Form 10-Q, unless the context indicates otherwise, the terms "Mitek," "the Company," "we," "us" and "our" refer to Mitek Systems, Inc., a Delaware corporation and its subsidiaries.

Overview

Mitek Systems, Inc. develops, markets and sells proprietary mobile capture and identity verification software solutions for enterprise customers.

Our mobile capture and identify verification technologies are embedded into the mobile applications of leading brands across the globe to improve usability while minimizing risk. They serve the needs of any regulated business that has obligations to know its customers.

By licensing our proprietary technology, enterprise customers improve customer acquisition and other key objectives including securing high risk transactions, verification for age sensitive and age-restricted commerce, and meeting know your customer ("KYC") and other compliance regulations.

Our technology uses advanced algorithms to correct image distortion, extract relevant data, route images to their desired location and process transactions.

On June 17, 2015, Mitek completed the acquisition (the “Acquisition”) of IDchecker NL B.V., a company incorporated under the laws of the Netherlands (“IDC NL”), and ID Checker, Inc., a California corporation and wholly owned subsidiary of IDC NL (“IDC Inc.” and together with IDC NL, “IDchecker”), pursuant to a Share Purchase Agreement dated May 26, 2015, by and among the Company, IDC NL, ID Checker Holding B.V., Stichting Administratiekantoor OPID, and the other individuals specified therein. Upon completion of the Acquisition, IDC NL and IDC Inc. became wholly owned subsidiaries of the Company. IDchecker is a global provider of cloud based identity document verification. The Acquisition expands Mitek’s mobile ID verification capabilities through IDchecker’s ability to read several different types of passports, international driver’s licenses and identity cards from around the world. The Acquisition also adds an international customer base in the payments, financial services and information services verticals.

More than 90% of millennials own a smartphone and its most utilized feature is the camera, according to industry analyst ComScore. A 2015 survey conducted by Zogby Analytics (“Millennials – The Next Mobile Disruptors”) revealed three key findings: (i) millennials are embracing adoption of a mobile self-service channel; (ii) they expect to use their mobile device’s camera to deliver an easy mobile commerce experience; and (iii) the mobile camera is key for businesses looking to engage with this demographic. Mitek is leveraging the mobile camera through our Mitek Mobile Identity Suite to create a superior user experience across all versions of the Apple iPhone and Android devices.

The core of our user experience is Mitek MiSnap™, a touch-free automated capture technology, which is incorporated universally across our product line. It provides a simple and superior user experience, making transactions on mobile devices fast and easy for the consumer while helping organizations drive revenue from the increasingly popular mobile channel.

Our Mobile Verify™ products combine the Mitek MiSnap™ auto capture experience with a variety of advanced computer vision techniques to provide verification of ID documents. Mobile Verify™ provides a check of authenticity of U.S. state-issued driver's licenses and includes full global coverage. These products enable banks and other businesses to improve KYC processes. This is especially valuable to highly regulated industries with a large and growing percentage of transactions conducted remotely via mobile devices. These products also enable trust to be achieved on peer-to-peer and merchant processing networks where identity is an inherent part of the transaction. Mobile Verify™ customers include international payments, financial services and information services providers.

Mobile Fill™, our mobile identity capture solution, enables the camera to serve as a keyboard. Using Mobile Fill™, consumers can quickly pre-fill any form with personal data by simply snapping a picture of their driver license, credit card, or other document. Organizations use Mobile Fill™ to verify identity for service. This can include streamlining the process of opening a customer checking, savings or credit card account, paying a bill, activating a 'switch and save' offer, and more. Mitek's prime customers for Mobile Fill™ include national and regional banks, credits unions, wireless telecom operators and insurance providers.

The second generation of our Mobile Fill™ product, Mobile Fill for Mobile Web™, enables potential new customers to use their camera as a keyboard right from the organization's mobile website, eliminating the need to download an application.

Mitek's Mobile Identity Suite has been developed pursuant to the success of Mobile Deposit®, a category leading product that allows individuals and businesses to remotely deposit checks with their banks using a camera-equipped smartphone or tablet. Our Mobile Deposit® solution has now processed over one billion check deposits. We began selling Mobile Deposit® in the second fiscal quarter of 2008, and received our first patent issued for this product in August 2010. Our Commercial Mobile Deposit Capture™ utilizes the same core technology as Mobile Deposit®, but is specific to small and medium size businesses. It adds capabilities such as mobile multi-check capture to help businesses reduce or eliminate their need for check scanners and trips to the ATM or bank branch. Just like the retail side of banks, the commercial and treasury divisions recognize substantially lower transaction costs associated with processing checks through the mobile channel, and are thus highly motivated to drive more mobile deposit transactions as an alternative to branch or ATM transactions. In addition, many businesses are seeking to lower operating costs through mobile tools that enable them to quickly process payments without a trip to the bank, extra hardware or interchange fees associated with credit cards.

We market and sell our Mitek Mobile Identity Suite line of mobile capture and identity verification software products directly to enterprise customers or through channel partners. Our mobile capture software solutions are often embedded in other mobile banking or enterprise applications developed by banks, insurance companies or their partners, and then marketed under their own proprietary brands.

First Quarter Fiscal 2017 Highlights

Revenues for the three months ended December 31, 2016 were \$9.3 million, an increase of 25% compared to revenues of \$7.4 million in the three months ended December 31, 2015. Net loss was \$0.6 million, or \$0.02 per diluted share, during the three months ended December 31, 2016, compared to a net loss of \$0.3 million, or \$0.01 per diluted share, during the three months ended December 31, 2015.

Our mobile check deposit business continued to grow. During the first quarter of fiscal 2017 the total number of financial institutions licensing our technology exceeded 5,500. All of the top 10 U.S. retail banks, and nearly all of the top 50 U.S. retail banks utilize our technology.

We added new patents to our portfolio during the first quarter of fiscal 2017 bringing our total number of issued patents to 28 as of January 23, 2017. In addition, we have 17 domestic and international patent applications as of January 23, 2017.

Market Opportunities, Challenges & Risks

The increase in the acceptance of mobile banking by financial institutions and their customers has helped drive our recent growth in revenue. In the past year, we experienced a significant increase in the number of financial institutions that have integrated and launched our mobile applications, particularly our Mobile Deposit® product, as part of their offering of mobile banking choices for their customers. We believe that financial institutions see our patented solutions as a way to provide an enhanced customer experience and reduce the cost of sales and service.

To sustain our growth in 2017 and beyond, we believe we must continue to offer imaging technology for mobile applications that address a growing market for mobile banking and mobile imaging solutions sold into other vertical markets. Our entry into the ID capture and verification market has expanded our addressable market and we intend to leverage the success of our mobile check deposit solution at more than 5,500 financial institutions to increase adoption of our ID capture and verification solutions.

Factors adversely affecting the pricing of or demand for our mobile applications, such as competition from other products or technologies, any decline in the demand for mobile applications, or negative publicity or obsolescence of the software environments in which our products operate, could result in lower revenues or gross margins. Further, because most of our revenues are from a single type of technology, our product concentration may make us especially vulnerable to market demand and competition from other technologies, which could reduce our revenues.

Results of Operations

Comparison of the Three Months Ended December 31, 2016 and 2015

The following table summarizes certain aspects of our results of operations for the three months ended December 31, 2016 and 2015 (amounts in thousands, except percentages):

	December 31, 2016	December 31, 2015	Change \$	Change %	
Revenue					
Software	\$ 5,983	\$ 4,730	\$ 1,253	26	%
SaaS, maintenance and consulting	3,286	2,674	612	23	%
Total revenue	\$ 9,269	\$ 7,404	\$ 1,865	25	%
Cost of revenue	\$ 891	\$ 942	\$(51)	(5)	%
% of revenue	10	% 13	%		
Selling and marketing	\$ 3,838	\$ 2,463	\$ 1,375	56	%
% of revenue	41	% 33	%		
Research and development	\$ 2,451	\$ 1,707	\$ 744	44	%
% of revenue	26	% 23	%		
General and administrative	\$ 2,243	\$ 2,091	\$ 152	7	%
% of revenue	24	% 28	%		
Acquisition-related costs and expenses	\$ 518	\$ 543	\$(25)	(5)	%
% of revenue	6	% 7	%		
Other income, net	\$ 65	\$ 36	\$ 29	81	%
% of revenue	1	% 0	%		
Income tax provision	\$ —	\$ (16)	\$ 16	(100)	%
% of revenue	0	% 0	%		

Revenue

Total revenue increased \$1.9 million or 25%, to \$9.3 million in the three months ended December 31, 2016 compared to \$7.4 million in the three months ended December 31, 2015. The increase was due to an increase in sales of software

licenses of \$1.3 million, or 26%, to \$6.0 million in the three months ended December 31, 2016 compared to \$4.7 million in the three months ended December 31, 2015, and due to an increase in Software as a Service (“SaaS”), maintenance and consulting revenue of \$0.6 million, or 23%, to \$3.3 million in the three months ended December 31, 2016 compared to \$2.7 million in the three months ended December 31, 2015. The increase in software license revenue primarily relates to an increase in sales of both our mobile identity and mobile deposit in the three months ended December 31, 2016 compared to the three months ended December 31, 2015. Services revenue increased, primarily due to additional maintenance associated with the increase in our software license revenue as well as additional SaaS revenue.

Cost of Revenue

Cost of revenue includes the costs of royalties for third party products embedded in our products, personnel costs and overhead related to software support and billable services engagements. Cost of revenue decreased \$51,000, or 5%, to \$891,000 in the three months ended December 31, 2016 compared to \$942,000 in the three months ended December 31, 2015. As a percentage of revenue, cost of revenue decreased to 10% in the three months ended December 31, 2016 from 13% in the three months ended December 31, 2015.

Selling and Marketing Expenses

Selling and marketing expenses include payroll, employee benefits and other headcount-related costs associated with sales, marketing, and product management personnel, non-billable costs of professional services personnel, and advertising, promotions, trade shows, seminars and other programs. Selling and marketing expenses increased \$1.4 million, or 56%, to \$3.8 million in the three months ended December 31, 2016 compared to \$2.5 million in the three months ended December 31, 2015. As a percentage of revenue, selling and marketing expenses increased to 41% in the three months ended December 31, 2016 from 33% in the three months ended December 31, 2015. The increase is primarily due to higher personnel-related costs as well as additional marketing program expenditures.

Research and Development Expenses

Research and development expenses include payroll, employee benefits, consultant expenses and other headcount-related costs associated with software engineering and mobile capture science. Research and development expenses increased \$0.7 million, or 44%, to \$2.5 million in the three months ended December 31, 2016 compared to \$1.7 million in the three months ended December 31, 2015. As a percentage of revenue, research and development expenses increased to 26% in the three months ended December 31, 2016 from 23% in the three months ended December 31, 2015. The increase in research and development expenses is primarily due to higher personnel-related costs.

General and Administrative Expenses

General and administrative expenses include payroll, employee benefits, and other headcount-related costs associated with finance, administration and information technology, as well as legal, accounting and other administrative fees. General and administrative expenses increased \$0.2 million, or 7%, to \$2.2 million in the three months ended December 31, 2016 compared to \$2.1 million in the three months ended December 31, 2015. As a percentage of revenue, general and administrative expenses decreased to 24% in the three months ended December 31, 2016 from 28% in the three months ended December 31, 2015. The increase in general and administrative expenses is primarily attributable to increased personnel-related costs.

Acquisition-related Costs and Expenses

Acquisition-related costs and expenses were \$0.5 million in the three months ended December 31, 2016 and 2015.

Other Income, Net

Other income, net includes interest income net of amortization on our marketable securities portfolio and foreign currency transactional gain/losses. Other income, net was \$65,000 and \$36,000 for the three months ended December 31, 2016 and December 31, 2015, respectively.

Income tax provision

Income tax provision for the three months ended December 31, 2016 and 2015 was \$0 and \$16,000, respectively.

Liquidity and Capital Resources

On December 31, 2016, we had \$34.5 million in cash and cash equivalents and investments compared to \$35.8 million on September 30, 2016, a decrease of \$1.3 million, or approximately 4%. The decrease in cash and cash equivalents and investments was primarily due to our net loss and a decrease in working capital, offset by non-cash items.

Net Cash Provided by (Used in) Operating Activities

Net cash used in operating activities during the three months ended December 31, 2016 was \$1.2 million and resulted primarily from net loss of \$0.6 million and decreases in operating assets and liabilities of \$2.4 million, partially offset by non-cash charges of \$1.8 million. The primary non-cash adjustments to operating activities were stock-based compensation expense, amortization of closing and earnout shares related to the Acquisition, depreciation and amortization, and amortization of intangible assets totaling \$1.1 million, \$0.4 million, \$0.2 million and \$0.1 million, respectively.

Net cash provided by operating activities during the three months ended December 31, 2015 was \$1.0 million and resulted primarily from our net loss of \$0.3 million adjusted for non-cash charges of \$1.7 million, partially offset by changes in operating assets and liabilities of \$0.3 million. The primary non-cash adjustments to operating activities were stock-based compensation expense, amortization of closing and earnout shares related to the Acquisition, amortization of intangible assets and depreciation totaling \$1.0 million, \$0.4 million, \$0.1 million, and \$0.1 million, respectively.

Net Cash Provided by (Used in) Investing Activities

Net cash used in investing activities was \$1.6 million during the three months ended December 31, 2016, which consisted primarily of cash used by purchases of investments of \$5.3 million, partially offset by the sales and maturities of investments of \$3.8 million.

Net cash provided by investing activities was \$0.5 million during the three months ended December 31, 2015, which consisted primarily of cash provided by the sales and maturities of investments of \$6.4 million used, partially offset by purchases of investments of \$5.8 million.

Net Cash Provided by Financing Activities

Net cash provided by financing activities was \$19,000 during the three months ended December 31, 2016, which consist of proceeds of \$19,000 from the exercise of stock options.

Net cash provided by financing activities was \$110,000 during the three months ended December 31, 2015, which consist primarily of proceeds of \$0.1 million from the exercise of stock options.

Other Liquidity Matters

On December 31, 2016, we had investments of \$28.3 million, designated as available-for-sale marketable securities, which consisted of commercial paper and corporate issuances, carried at fair value as determined by quoted market prices for identical or similar assets, with unrealized gains and losses, net of tax, and reported as a separate component of stockholders' equity. All securities whose maturity or sale is expected within one year are classified as "current" on the Consolidated Balance Sheets. All other securities are classified as "long-term" on the Consolidated Balance Sheets. At December 31, 2016, we had all \$28.3 million of our available-for-sale securities classified as current. At September 30, 2016, we had \$24.9 million of our available-for-sale securities classified as current and \$2.0 million of our available-for-sale securities classified as long-term.

We had working capital of \$35.1 million at December 31, 2016 compared to \$32.0 million at September 30, 2016.

Based on our current operating plan, we believe the current cash balance and cash expected to be generated from operations will be adequate to satisfy our working capital needs for the next 12 months.

Off Balance Sheet Arrangements

The Company had no off balance sheet arrangements as of December 31, 2016.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based on our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the U.S. The preparation of the consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and the related disclosure of contingent assets and liabilities. We review our estimates on an on-going basis, including those related to income taxes and the valuation of goodwill, intangibles and other long-lived assets. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from these estimates under different assumptions or conditions. The critical accounting policies and estimates used in the preparation of our

consolidated financial statements are described in Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” of Form 10-K. We believe that there were no significant changes in our critical accounting policies and estimates since September 30, 2016.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Interest Rates

The primary objective of our investment activities is to preserve principal while at the same time maximizing after-tax yields without significantly increasing risk. To achieve this objective, we maintain our investment portfolio of cash equivalents and marketable securities in a variety of securities, including corporate debt securities, commercial paper and certificates of deposit. We have not used derivative financial instruments in our investment portfolio, and none of our investments are held for trading or speculative purposes. Short-term and long-term marketable securities are generally classified as available-for-sale and consequently are recorded on the Consolidated Balance Sheets at fair value with unrealized gains or losses reported as a separate component of

accumulated other comprehensive income, net of estimated tax. As of December 31, 2016, our marketable securities had remaining maturities between approximately one and twelve months and a fair market value of \$28.3 million, representing approximately 61% of our total assets.

The fair value of our cash equivalents and marketable securities is subject to change as a result of changes in market interest rates and investment risk related to the issuers' credit worthiness. We do not utilize financial contracts to manage our investment portfolio's exposure to changes in market interest rates. A hypothetical 100 basis point increase or decrease in market interest rates would not have a material impact on the fair value of our cash equivalents and marketable securities due to the relatively short maturities of these investments. While changes in market interest rates may affect the fair value of our investment portfolio, any gains or losses will not be recognized in our results of operations until the investment is sold or if the reduction in fair value was determined to be an other-than-temporary impairment.

Foreign Currency Risk

As a result of the Acquisition, we have operations in the Netherlands that are exposed to fluctuations in the foreign currency exchange rate between the U.S. dollar and the Euro. The functional currency of our Dutch operations is the Euro. Our results of operations and cash flows are subject to fluctuations due to changes in foreign currency exchange rates, particularly changes in the Euro. Translation adjustments resulting from translating the functional currency financial statements into U.S. dollar equivalents are reported separately in the Consolidated Statements of Operations and Comprehensive Income.

Market Risk

The Company has had no material changes to market risk as outlined in the Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES.

Disclosure Controls and Procedures

We maintain disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), that are designed to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms, and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required financial disclosures.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of our disclosure controls and procedures as of the end of the period covered by this Form 10-Q pursuant to Exchange Act Rules 13a-15(b) and 15d-15(b). In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control – Integrated Framework (2013). We recognize that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and

management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of December 31, 2016.

Changes in Internal Control over Financial Reporting

There has been no change in our internal control over financial reporting during the quarter ended December 31, 2016 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II

OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

For information regarding our legal proceedings, see Note 7 to our financial statements included in this Form 10-Q and Item 3— “Legal Proceedings” in the Form 10-K. There have been no material developments in our historical legal proceedings since September 30, 2016.

ITEM 1A. RISK FACTORS.

While we attempt to identify, manage, and mitigate risks and uncertainties associated with our business to the extent practical under the circumstances, some level of risk and uncertainty will always be present. Item 1A of the Form 10-K describes some of the risks and uncertainties associated with our business, which we strongly encourage you to review. These risks and uncertainties have the potential to materially affect our business, financial condition, results of operations, cash flows, projected results, and future prospects. There have been no material changes in our risk factors from those disclosed in the Form 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

There were no unregistered sales of the Company’s equity securities during the quarter ended December 31, 2016, that were not previously disclosed in a Current Report on Form 8-K.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. MINE SAFETY DISCLOSURES.

None.

ITEM 5. OTHER INFORMATION.

None.
