**THE CATO CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
FOR THE THREE MONTHS ENDED APRIL 30, 2011 AND MAY 1, 2010**

NOTE 1 - GENERAL:

The condensed consolidated financial statements have been prepared from the accounting records of The Cato Corporation and its wholly-owned subsidiaries (the “Company”), and all amounts shown as of and for the periods ended April 30, 2011 and May 1, 2010 are unaudited. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. All such adjustments are of a normal, recurring nature unless otherwise noted. The results of the interim period may not be indicative of the results expected for the entire year.

The interim financial statements should be read in conjunction with the consolidated financial statements and notes thereto, included in the Company’s Annual Report on Form 10-K for the fiscal year ended January 29, 2011. Amounts as of January 29, 2011, have been derived from the audited balance sheet other than the retrospective application of the change in accounting principal.

On May 26, 2011, the Board of Directors increased the quarterly dividend by 24% from \$.185 per share to \$.23 per share or an annualized rate of \$.92 per share.

CHANGE IN ACCOUNTING PRINCIPLE:

The Company elected to change its method of accounting for inventory to the weighted average cost method from the retail method effective January 30, 2011. In accordance with ASC 250 “Accounting Changes and Error Corrections”, all periods have been retrospectively adjusted to reflect the period-specific effects of the change to the weighted average cost method. The company believes that the weighted average cost method better matches cost of sales with related sales, as well as having an inventory valuation that more closely reflects the acquisition cost of inventory by valuing inventory on a unit basis verses the product department level under the retail method. The cumulative adjustment as of January 31, 2010, was an increase in inventory of \$11.7 million and an increase in retained earnings of \$7.3 million.

Additionally, the Company has changed the classification for certain balance sheet items to conform to the 2011 presentation. This change in classification will reduce accounts payable and inventory by \$1.6 million as of January 29, 2011 and \$0.6 million as of May 1, 2010.

In addition, the Company has changed the classification of certain prior year first quarter income statement items to conform to the 2011 presentation. The change has no effect on net income; however, it does reduce retail sales by \$720,000, cost of goods sold by \$241,000 and selling, general and administrative expense by \$479,000.

NOTE 2 - EARNINGS PER SHARE:

ASC 260 – *Earnings Per Share* requires dual presentation of basic and diluted Earnings Per Share (EPS) on the face of all income statements for all entities with complex capital structures. The Company has presented one basic EPS and one diluted EPS amount for all common shares in the accompanying Condensed Consolidated Statements of Income. While the Company’s certificate of incorporation provides the right for the Board of Directors to declare dividends on Class A shares without declaration of commensurate dividends on Class B shares, the Company has historically paid the same dividends to both Class A and Class B shareholders and the Board of Directors has resolved to continue this practice. Accordingly, the Company’s allocation of income for purposes of the EPS computation is the same for Class A and Class B shares and the EPS amounts reported herein are applicable to both Class A and Class B shares.

Basic EPS is computed as net income less earnings allocated to non-vested equity awards divided by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur from common shares issuable through stock options and the Employee Stock Purchase Plan.

The Company's 1987 Non-Qualified Stock Option Plan authorized 5,850,000 shares for the granting of options to officers and key employees. The 1999 Incentive Compensation Plan and 2004 Amended and Restated Incentive Compensation Plan authorized 1,500,000 and 1,350,000 shares, respectively, for the granting of various forms of equity-based awards, including restricted stock and stock options to officers and key employees. The 1999 Plan has expired as to the ability to grant new awards.

The following table presents the number of options and shares of restricted stock initially authorized and available for grant under each of the plans:

Edgar Filing: CATO CORP - Form 10-Q

	1987 Plan	1999 Plan	2004 Plan	Total

April 30, 2011	19,677	-	628,621	648,298

As of April 30, 2011 and May 1, 2010, there was \$5.4 million and \$8.0 million of total unrecognized compensation cost related to nonvested restricted stock awards, which have a remaining weighted-average vesting period of 2.1 years and 3.1 years, respectively. The total fair value of the shares recognized as compensation expense during the first quarter ended April 30, 2011 was \$467,000 compared to \$454,000 for the first quarter ended May 1, 2010. These expenses are classified as a component of selling, general and administrative expenses in the Condensed Consolidated Statements of Income.

The compensation expense recognized for the 15% discount given under the Employee Stock Purchase Plan was approximately \$39,000 and \$34,000 for the three months ended April 30, 2011 and May 1, 2010, respectively. NOTE 6 – STOCK BASED COMPENSATION (CONTINUED):

No options were granted in the first quarter of fiscal 2011 or fiscal 2010. No options were exercised in the first quarter of fiscal 2011.

The total intrinsic value of options exercised during the first quarter ended April 30, 2011 was \$0 compared to \$158,000 for the prior year quarter ended May 1, 2010.

The Company recognized additional share-based compensation expense of \$0 and \$2,000 for the first quarter ended April 30, 2011 and May 1, 2010, respectively. These amounts are classified as a component of selling, general and administrative expenses in the Condensed Consolidated Statements of Income.

Stock option awards outstanding under the Company's current plans were granted at exercise prices which were equal to the market value of the Company's stock on the date of grant, vest over five years and expire no later than ten years after the grant date.

NOTE 7 – INCOME TAXES:

For the quarter ended April 30, 2011, the Company's effective tax rate was 35.7% compared to 36.9% for the prior year quarter ended May 1, 2010. The current year quarter was impacted by the reduction of a reserve for certain unrecognized tax benefits from the closing of a state income tax audit. During the next 12 months, various taxing authorities' statutes of limitations are expected to expire which could result in a potential reduction of unrecognized tax benefits. In addition, certain state examinations may close, the ultimate resolution of which could materially affect the effective tax rate. As a consequence, the balance in unrecognized tax benefits can be expected to fluctuate from

period to period. It is reasonably possible such changes could be significant when compared to our total unrecognized tax benefits, but the amount of change is not currently estimable.

NOTE 8 – FAIR VALUE MEASUREMENTS (CONTINUED):

The Company's investment portfolio was primarily invested in tax exempt variable rate demand notes ("VRDN"), corporate bonds, and governmental debt securities held in managed funds with underlying ratings of A or better at both April 30, 2011 and January 29, 2011. The underlying securities have contractual maturities which generally range from 50 days to 30 years. Although the Company's investments in VRDN's have underlying securities with contractual maturities longer than one year, the VRDN's themselves have interest rate resets of 7 days and are considered short-term investments. These securities are classified as available-for-sale and are recorded as short-term investments on the accompanying Condensed Consolidated Balance Sheets at estimated fair value, with unrealized gains and losses reported net of taxes in accumulated other comprehensive income.

Additionally, at April 30, 2011 and January 29, 2011, the Company had \$1.9 million of privately managed funds, \$0.5 million of corporate equities and a single auction rate security ("ARS") of \$3.5 million which continues to fail its auction. All of these assets are recorded within Other assets in the Condensed Consolidated Balance Sheets.

Level 1 category securities are measured at fair value using quoted active market prices. Level 2 investment securities include corporate and municipal bonds for which quoted prices may not be available on active exchanges for identical instruments. Their fair value is principally based on market values determined by management with assistance of a third party pricing service. Since quoted prices in active markets for identical assets are not available, these prices are determined by the pricing service using observable market information such as quotes from less active markets and/or quoted prices of securities with similar characteristics, among other factors.

The Company's failed ARS is measured at fair value using Level 3 inputs at each reporting period. Because there is no active market for this particular ARS, its fair value was determined through the use of a discounted cash flow analysis. The terms used in the analysis were based on management's estimate of the timing of future liquidity, which assumes that the security will be called or refinanced by the issuer or settled with a broker dealer prior to maturity. The discount rates used in the discounted cash flow analysis were based on market rates for similar liquid tax exempt securities with comparable ratings and maturities. Due to the uncertainty surrounding the timing of future liquidity, the Company also considered a liquidity/risk value reduction. In estimating the fair value of this ARS, the Company also considered the financial condition and near-term prospects of the issuer, the probability that the Company will be

unable to collect all amounts due according to the contractual terms of the security and whether the security has been downgraded by a rating agency. The Company's valuation is sensitive to market conditions and management's judgment and can change significantly based on the assumptions used.

The Company has two privately managed funds. The privately managed funds cannot be redeemed at net asset value at a specific date without advance notice. As a result, the Company has classified the investments as Level 3.

NOTE 9 – RECENT ACCOUNTING PRONOUNCEMENTS:

In January 2011, the Company adopted accounting guidance regarding changes to disclosure requirements for fair value measurements. For fair value measurements using significant unobservable inputs (Level 3), the guidance requires a reporting entity to present separate information about gross purchases, sales, issuances and settlements. The adoption of this guidance did not have an impact on the consolidated financial statements.

CRITICAL ACCOUNTING POLICIES:

The Company's accounting policies are more fully described in Note 1 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the fiscal year ended January 29, 2011. As disclosed in Note 1 of Notes to Consolidated Financial Statements, the preparation of the Company's financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions about future events that affect the amounts reported in the financial statements and accompanying notes. Future events and their effects cannot be determined with absolute certainty. Therefore, the determination of estimates requires the exercise of judgment. Actual results inevitably will differ from those estimates, and such differences may be material to the financial statements. The most significant accounting estimates inherent in the preparation of the Company's financial statements include the allowance for doubtful accounts receivable, workers' compensation, general and auto insurance liabilities, group health insurance, litigation, calculation of asset impairment, store closings, inventory shrinkage and uncertain tax positions.

The Company's critical accounting policies and estimates are discussed with the Audit Committee on a quarterly basis.

CHANGE IN ACCOUNTING PRINCIPLE:

The Company elected to change its method of accounting for inventory to the weighted average cost method from the retail method effective January 30, 2011. In accordance with ASC 250 "Accounting Changes and Error Corrections", all periods have been retrospectively adjusted to reflect the period specific effects of the change to the weighted average cost method. The company believes that the weighted average cost method better matches cost of sales with related sales, as well as having an inventory valuation that more closely reflects the acquisition cost of inventory by valuing inventory on a unit basis verses the product department level under the retail method. The cumulative adjustment as of January 31, 2010, was an increase in inventory of \$11.7 million and an increase in retained earnings of \$7.3 million.

Additionally, the Company has changed the classification for certain balance sheet items to conform to the 2011 presentation. This change in classification will reduce accounts payable and inventory by \$1.6 million as of January 29, 2011 and \$0.6 million as of May 1, 2010.

In addition, the Company has changed the classification of certain prior year first quarter income statement items to conform to the 2011 presentation. The change has no effect on net income; however, it does reduce retail sales by \$720,000, cost of goods sold by \$241,000 and selling, general and administrative expense by \$479,000.

See Note 1 to the Condensed Consolidated Financial Statements for details regarding the effects of the change in accounting principle and revised classifications on prior periods.

RESULTS OF OPERATIONS – (CONTINUED):

Comparison of First Quarter of 2011 with 2010

Total retail sales for the first quarter were \$270.9 million compared to last year's first quarter sales of \$259.0 million, a 4.6% increase. Same-store sales increased 2.0% in the first quarter of fiscal 2011 due to favorable tax refund timing and favorable weather. Total revenues, comprised of retail sales and other income (principally, finance charges and late fees on customer accounts receivable and layaway fees), were \$273.7 million for the first quarter ended April 30, 2011, compared to \$262.0 million for the first quarter ended May 1, 2010. The Company operated 1,282 stores at April 30, 2011 compared to 1,272 stores at the end of last year's first quarter. For the first three months of fiscal 2011 the Company opened four new stores, relocated one store and closed four stores. The Company expects to open approximately 54 stores, relocate seven stores and close approximately 27 stores in fiscal 2011.

Credit revenue of \$2.0 million represented 0.7% of total revenues in the first quarter of fiscal 2011, compared to 2010 credit revenue of \$2.2 million or 0.8% of total revenues. Credit revenue decreased for the most recent comparable period due to lower finance charge income and lower late fee income from sales under the Company's proprietary credit card. Credit revenue is comprised of interest earned on the Company's private label credit card portfolio and related fee income. Related expenses include principally bad debt expense, payroll, postage and other administrative expenses and totaled \$1.3 million in the first quarter of 2011, compared to last year's first quarter expenses of \$1.6 million. The decrease was primarily due to lower bad debt and postage expenses compared to the first quarter of 2010.

Other income in total, as included in total revenues, was \$2.7 million for the first quarter of fiscal 2011, compared to \$2.9 million for the prior year's comparable first quarter. The slight overall decrease resulted primarily from lower finance and late fee charges partially offset by an increase in layaway charges.

Cost of goods sold was \$158.4 million, or 58.5% of retail sales for the first quarter of fiscal 2011, compared to \$149.9 million, or 57.9% of retail sales in the first quarter of fiscal 2010. The overall increase in cost of goods sold as a percent of retail sales for the first quarter of 2011 resulted primarily from higher freight costs and product mix changes partially offset by lower vendor allowances. Cost of goods sold includes merchandise costs, net of discounts and allowances, buying costs, distribution costs, occupancy costs, freight and inventory shrinkage. Net merchandise costs and in-bound freight are capitalized as inventory costs. Buying and distribution costs include payroll, payroll-related costs and operating expenses for the buying departments and distribution center. Occupancy expenses include rent, real estate taxes, insurance, common area maintenance, utilities and maintenance for stores and distribution facilities. Total gross margin dollars (retail sales less cost of goods sold) increased by 3.0% to \$112.5 million for the first quarter of fiscal 2011 compared to \$109.2 million in the first quarter of fiscal 2010. Gross margin as presented may not be comparable to those of other entities.

CONDITION AND RESULTS OF OPERATIONS (CONTINUED)**

RESULTS OF OPERATIONS – (CONTINUED):

Selling, general and administrative expenses (“SG&A”) primarily include corporate and store payroll, related payroll taxes and benefits, insurance, supplies, advertising, bank and credit card processing fees and bad debts. SG&A expenses were \$63.3 million, or 23.4% of retail sales for the first quarter of fiscal 2011, compared to \$68.1 million, or 26.3% of retail sales in the first quarter of fiscal 2010. SG&A expenses as a percentage of retail sales decreased 290 basis points for the first quarter of fiscal 2011 as compared to the prior year. The decrease was primarily attributable to incentive-based compensation expenses, group health insurance expenses, and workers’ compensation expenses, slightly offset by higher payroll and legal costs.

Depreciation expense was \$5.4 million, or 2.0% of retail sales for the first quarter of fiscal 2011, compared to \$5.3 million, or 2.0% of retail sales for the first quarter of fiscal 2010. The slight increase in depreciation expense was due to store development and information technology investments.

Interest and other income was \$1.0 million, or 0.4% of retail sales for the first quarter of fiscal 2011, compared to \$0.9 million, or 0.3% of retail sales for the first quarter of fiscal 2010 primarily due to higher interest income due to an increase in cash and short-term investments.

Income tax expense was \$17.0 million or 6.3% of retail sales for the first quarter of fiscal 2011, compared to \$14.6 million, or 5.6% of retail sales for the first quarter of fiscal 2010. The first quarter increase resulted from higher pre-tax income partially offset by a slightly lower effective tax rate. The effective income tax rate for the first quarter of fiscal 2011 was 35.7% compared to 36.9% for the first quarter of 2010. The current year quarter was impacted by the reduction of a reserve for certain unrecognized tax benefits from the closing of a state income tax audit.

LIQUIDITY, CAPITAL RESOURCES AND MARKET RISK:

The Company has consistently maintained a strong liquidity position. Cash provided by operating activities during the first three months of fiscal 2011 was \$43.0 million as compared to \$33.5 million in the first three months of fiscal 2010. These amounts enable the Company to fund its regular operating needs, capital expenditure program, cash dividend payments, and share repurchases. In addition, the Company maintains a \$35.0 million unsecured revolving credit facility for short-term financing of seasonal cash needs. There were no outstanding borrowings on this facility at April 30, 2011.

Cash provided by operating activities for the first three months of fiscal 2011 was primarily generated by earnings adjusted for depreciation and changes in working capital. The increase of \$9.5 million for the first three months of fiscal 2011 as compared to the first three months of fiscal 2010 was primarily due to an increase in net income, a change in inventories, and accrued income taxes partially offset by a decrease in accounts payable.

The Company believes that its cash, cash equivalents and short-term investments, together with cash flows from operations will be adequate to fund the Company's dividends, share repurchases, other operating requirements and expected capital expenditures for fiscal 2011 and for the foreseeable future.

At April 30, 2011, the Company had an unsecured revolving credit agreement, which provides for borrowings of up to \$35.0 million. The revolving credit agreement is committed until August 2013. The credit agreement contains various financial covenants and limitations, including the maintenance of specific financial ratios with which the Company was in compliance as of April 30, 2011. There were no borrowings outstanding under the credit facility during the first quarter ended April 30, 2011.

The expenditures for the first three months of 2011 were primarily for the development of four new stores and additional investments in new technology. For the full fiscal 2011 year, the Company expects to invest approximately \$32.3 million for capital expenditures. This includes expenditures to open 54 new stores and relocate seven stores, upgrades to merchandise systems, and home office and distribution center expansion.

Net cash used in investing activities totaled \$2.7 million in the first quarter of fiscal 2011 compared to \$22.6 million used in the comparable period of 2010. The decrease was due primarily to the decrease in purchases of short-term investments.
