SYNCOR INTERNATIONAL CORPORATION AND SUBSIDIARIES Notes to Condensed Consolidated Financial Statements

GENERAL

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting only of normal recurring accruals) considered necessary for a fair presentation have been included. The results of the three months ended March 31, 2001, are not necessarily indicative of the results to be expected for the full year. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2000. Certain line items in the prior year's condensed consolidated financial statements have been reclassified to conform to the current year's presentation.

SEGMENT INFORMATION

Syncor has identified three primary operating segments: U.S. Pharmacy Services, U.S. Medical Imaging and International Operations. Segment selection was based upon internal organizational structures, the way these operations are managed and evaluated, the availability of separate financial results, and materiality considerations. Segment detail is summarized as follows:

	<u>Three Months Ended</u>

NET INCOME PER SHARE

Basic earnings per share (EPS) amounts are computed by dividing earnings applicable to common stockholders by the average number of shares outstanding. Diluted EPS amounts assume the issuance of common stock for all potentially dilutive equivalents outstanding. Anti-dilutive outstanding stock options have been excluded from the diluted calculation.

The reconciliation of the numerator and denominators of the basic and diluted

NET SALES

Consolidated net sales for the three months ended March 31, 2001 increased 21.8% or \$32.4 million to \$181.4 million versus \$149.0 million for the first quarter of 2000.

U.S. PHARMACY SERVICES BUSINESS

The Pharmacy Services business grew at a pace of 9.1% for the current quarter, which is a result of continued growth in both the overall radiopharmacy market and the Cardiology sector of the Company's business. The overall year-over-year growth rate for the quarter for the Cardiology sector was approximately 12%. Sales of Cardiolite(R), a proprietary technetium-based heart imaging agent to which the Company has preferential U.S. distribution rights, led the growth in Cardiology with approximately a 15% growth rate over the corresponding period. Sales of Cardiolite(R) increased by approximately 12% in volume coupled with a 3.5% price increase.

U.S. MEDICAL IMAGING BUSINESS

Edgar Filing: SYNCOR INTERNATIONAL CORP /DE/ - Form 10-Q

The Company continues to grow the medical imaging business both as a result of the acquisition of sites and growth at existing sites. Overall, sales have increased year-over-year 110% for the first quarter. Growth in this segment of the business has been driven primarily by the US Diagnostic, Inc. acquisition that took place after the first quarter of 2000. Same store sales growth for the quarter was 16.7% or \$2.6 million and represented 15% of the increase. At quarter end the Company had 58 domestic imaging centers compared to 42 for the comparable quarter in 2000. The Company expects to continue to grow this business through a combination of growth in existing sites and strategic acquisitions in areas of the country that fit within the Company's overall strategy of becoming a significant provider in certain geographic regions. In order to accomplish these goals, the Company continues to devote additional resources for certain sales and operations positions and consolidation of the billing and collection functions on one platform.

INTERNATIONAL OPERATIONS

The Company's international operations continue to grow, with sales for the quarter increasing 18.6% as compared to the prior year. Same store growth was flat for the quarter and was impacted by lower sales in the Taiwan sites due to a temporary slowdown in government health care spending. Excluding Taiwan, same store sales growth was 5.4% for the quarter. A number of acquired and start-up sites completed in 2000 generated \$3.2 million in additional sales in the quarter. We look for the continued expansion of this segment as these operations mature, and through further strategic acquisitions.

GROSS PROFIT

Gross profit for the first quarter increased \$17.7 million to \$68.7 million. As a percentage of net sales, gross margins reached 37.9% for the first quarter compared to 34.2% for the respective period in 2000.

U.S. PHARMACY SERVICES BUSINESS

The gross profit from this group continues to increase (from 28.5% in the first quarter of 2000 to 29.4% in the first quarter of 2001) due to the shift from lower margin products to Cardiolite(R) and increased leverage of labor and delivery dollars. Material costs, as a percentage of sales, decreased by 0.2% due to the continued product mix shift to Cardiolite(R) and a price increase that was instituted in January, 2001. Direct labor costs as a percent of sales were reduced in this quarter as compared to the first quarter of 2000 by 0.3% as a result of the continued commitment to staffing controls at the pharmacy locations.

U.S. MEDICAL IMAGING BUSINESS

The gross profit margin for this group decreased from 69.7% to 66.5% for the first quarter in 2001 as compared to the prior year. This decline is principally from two factors. The first is the conversion of sites from managed sites and the resultant loss

Edgar Filing: SYNCOR INTERNATIONAL CORP /DE/ - Form 10-Q

of "management fee income" which does not have any "cost of goods sold component" to owned sites. At present, the Company has converted the majority of sites to owned sites so this trend should dissipate in future quarters. The second is an increase in reading fees paid to contracted radiologists.

INTERNATIONAL OPERATIONS

The gross profit margin for this segment increased from 41.2% in the first quarter of 2000 to 43.0% in the first quarter of 2001. These margins have improved as volumes have increased and efficiencies have improved at the pharmacy sites. The increasing share of revenues generated from owning and managing imaging centers also increased these margins as imaging centers traditionally have lower cost of materials.

OPERATING, SELLING AND ADMINISTRATIVE EXPENSES

Operating, Selling and Administration costs showed a year-over-year increase for the quarter ended March 31, 2001 of approximately 21.9% or \$7.0 million. The ratio of these expenses to sales was flat at 21.5% for the comparative quarters. The primary reason this percentage remained flat in the quarter was that the Company accrued certain performance bonuses at a higher rate during the first quarter of 2000 than in the first quarter of 2001, which offset increased expenses associated with the CMI sales growth and acquisitions.

DEPRECIATION AND AMORTIZATION

Depreciation and amortization increased by \$3.4 million for the first quarter of 2001, compared to the first quarter of 2000. The increase is primarily the result of depreciation, goodwill and non-compete costs associated with the Medical Imaging business acquisitions, which accounts for \$2.5 million of this increase. In addition, the Company has invested capital in international sites (primarily imaging equipment), which contributed about \$0.5 million additionally of this increase.

OTHER EXPENSE, NET

The change in Other Expense, Net was primarily the result of increased borrowings and the resultant interest for acquisition debt incurred since the first quarter of 2000.

ACQUISITION OF BUSINESSES

During the first quarter of 2001, the Company made three acquisitions, two of which were outside of the U.S. The first of these was by CMI, which acquired three sites in California at a purchase price of \$13.4 million. This completed a series of previously announced acquisitions from US Diagnostic, Inc. The second acquisition was in Brazil for a purchase price of \$2.0

Edgar Filing: SYNCOR INTERNATIONAL CORP /DE/ - Form 10-Q

million. The third was in New Zealand for a purchase price of \$0.3 million.

LIQUIDITY AND CAPITAL RESOURCES

The Company had cash, cash equivalents and investments of \$26.4 million at March 31, 2001 compared with \$29.7 million at December 31, 2000. The Company's total debt of \$192.0 million at March 31, 2001 reflects an increase of \$42.0 million when compared to the balance of \$150.0 million at December 31, 2000. The increase for the three months ended March 31, 2001 resulted primarily from the financing of acquisitions which required approximately \$16 million and the advance purchase payment of Cardiolite(R) inventory which required approximately \$19 million in short-term financing. Working capital increased by \$40.6 million to \$120.9 million at March 31, 2001 compared to \$80.3 million at December 31, 2000.

The Company believes that sufficient internal and external sources exist to fund operations and future expansion plans. The Company increased its credit line facility to \$190 million on May 10, 2001. Of the original \$150 million credit line facility, \$1.2 million was available on March 31, 2001.

FORWARD LOOKING STATEMENTS

Except for the historical information and discussions contained herein, statements contained in this Report on Form 10-Q may constitute "forward looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These statements involve a number of risks, uncertainties and other factors that could cause actual results to differ materially, including: changes in the regulation of the healthcare industry at either or both of the federal and state levels; changes or delays in the Company's reimbursement for services by governmental or private payers; the Company's failure to continue to develop and market new products and services and to keep pace with technological change; competitive pressures; failure to obtain or protect intellectual property rights; quarterly fluctuations in revenues and volatility of the Company's stock price; the Company's ability to attract and retain key personnel; currency risks; dependence on certain suppliers; the Company's ability to successfully manage acquisitions and alliances; legal, political and economic changes; and other risks, uncertainties and factors discussed in the "Risk Factors" section in the Annual Report on Form 10-K and elsewhere herein, in the Company's other filings with the SEC or in materials incorporated by reference. Given these uncertainties, undue reliance should not be placed on such forward-looking statements.
