- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01 Other Events

E. I. du Pont de Nemours and Company (“DuPont” or the “Company”) is announcing its decision to not re-start the insecticide manufacturing facility at the La Porte site located in La Porte, Texas. This facility manufactures Lannate® and Vydate® insecticides and has been shut down since November 2014.

Since the shutdown of the facility, there have been a number of changes in the global crop protection chemicals market including low crop prices which have impacted demand for crop protection chemicals and declines in the Brazilian market due to lower insect pressure, insect resistant crops and currency and economic conditions. Due to the changes in the market, uncertainty regarding when the facility could be restarted and further capital expenditures required for the restart, the Company has decided that restart of the facility is not a long-term viable and cost efficient option for the DuPont Crop Protection business.

The DuPont Crop Protection business has identified alternative sources for the supply of methomyl, the active ingredient in Lannate® in order to meet the majority of the expected demand for this product. These new sources have either been or are in the process of being registered in the relevant markets. In addition, the business is actively pursuing the procurement of oxamyl, the active ingredient in Vydate®.

The Company expects this decision to result in a pre-tax charge of approximately \$70 million in the first quarter of 2016 related to severance and related benefit costs, asset related charges and contract termination costs. Additional costs related to this decision are anticipated during 2016 but are not expected to be material to the Company’s 2016 results of operations.

Forward-Looking Statements: This communication contains “forward-looking statements” within the meaning of the federal securities laws, including Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. In this context, forward-looking statements often address expected future business and financial performance and financial condition, and often contain words such as “expect,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “see,” “will,” “would,” “target,” similar expressions, and variations or negatives of these words. Forward-looking statements by their nature address matters that are, to different degrees, uncertain, such as statements about the consummation of the proposed transaction and the anticipated benefits thereof. Forward-looking statements are not guarantees of future performance and are based on certain assumptions and expectations of future events which may not be realized. Forward-looking statements also involve risks and uncertainties, many of which are beyond the company’s control. Some of the important factors that could cause the company’s actual results to differ materially from those projected in any such forward-looking statements are: fluctuations in energy and raw material prices; failure to develop and market new products and optimally manage product life cycles; ability to respond to market acceptance, rules, regulations and policies affecting products based on biotechnology and, in general, for products for the agriculture industry; outcome of significant litigation and environmental matters, including realization of associated indemnification assets, if any; failure to appropriately manage process safety and product stewardship issues; changes in laws and regulations or political conditions; global economic and capital markets conditions, such as inflation, interest and currency exchange rates; business or supply disruptions; security threats, such as acts of sabotage, terrorism or war, natural disasters and weather events and patterns which could affect demand as well as availability of products for the agriculture industry; ability to protect and enforce the company’s intellectual property rights; successful integration of acquired businesses and separation of underperforming or non-strategic assets or businesses; and risks related to the agreement entered on December 11, 2015, with The Dow Chemical Company pursuant to which the companies have agreed to effect an all-stock merger of equals, including the completion of the proposed transaction on anticipated terms and timing, the ability to fully and timely realize the expected benefits of the proposed transaction and risks related to the intended business separations contemplated to occur after the completion of the proposed transaction. The company undertakes no duty to publicly revise or update any forward-looking statements as a result of future developments, or new information or otherwise, should circumstances change, except as otherwise required by securities and other applicable laws.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
