12. Stock Option Plan

On November 3, 1998, the Company adopted the Alico, Inc., Incentive Equity Plan (The Plan) pursuant to which the Board of Directors of the Company may grant options, stock appreciation rights, and/or restricted stock to certain directors and employees.

5

The Plan authorizes grants of shares or options to purchase up to 650,000 shares of authorized but unissued common stock. Stock options granted have a strike price and vesting schedules which are at the discretion of the Board of Directors and determined on the effective date of the grant. The strike price cannot be less than 55% of the market price.

	Options	Weighted average exercise price	Weighted average remaining contractual life (in years)
Balance outstanding, August 31, 2001	84,080	\$ 14.62	9

Basic earnings per share as reported	\$ 1.79	\$ 0.15
Proforma basic earnings per share	\$ 1.79	\$ 0.15

13. Future Application of Accounting Standards

In December 2003, the FASB issued FASB Interpretation No. 46 (revised December 2003), *Consolidation of Variable Interest Entities*,

which addresses how a business enterprise should evaluate whether it has a controlling financial interest in an entity through means other than voting rights and accordingly should consolidate the entity. FIN 46R replaces FASB Interpretation No. 46, *Consolidation of Variable Interest Entities*, which was issued in January 2003. The Company will be required to apply FIN 46R to variable interests in VIEs for periods ending after December 15, 2003, and for all other types of entities for periods ending after March 15, 2004. The adoption of Interpretation No. 46 is not expected to have a material effect on the financial condition, results of operations, or liquidity of the Company.

11

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

LIQUIDITY AND CAPITAL RESOURCES:

Working capital increased to \$106.4 million at February 29, 2004, from \$79.5 million at August 31, 2003. As of February 29, 2004, the Company had cash and cash investments of \$23.5 million compared to \$16.4 million at August 31, 2003. Marketable securities increased to \$51.8 million from \$38.8 million during the same period. The ratio of current assets to current liabilities increased to 12.50 to 1 at February 29, 2004 up from 8.41 to 1 at August 31, 2003. Total assets increased by \$15.1 million to \$227.8 million at February 29, 2004, compared to \$212.7 million at August 31, 2003.

Management expects continued profitability from its agricultural operations in fiscal 2004. The outlook is for gross profits from citrus operations to decline due to a large crop forecast for the industry as a whole and substantial carryover inventories for the industry.

Management also expects gross profits from sugarcane to decline as the Company's current crop is expected to be smaller in fiscal 2004 than in fiscal 2003. Gross profits from the Company's cattle operations are expected to increase due to reduced beef supplies creating favorable market conditions for beef and an increase in the number of cattle sold.

Management believes that the Company will be able to meet its working capital requirements for the foreseeable future with internally generated funds. In addition, the Company has credit commitments which provide for revolving credit of up to \$54.0 million, of which \$14.3 million was available for the Company's general use at February 29, 2004 (see Note 8 to condensed consolidated financial statements).

RESULTS OF OPERATIONS:

The basic business of the Company is agriculture, which is of a seasonal nature and is subject to the influence of natural phenomena and

wide price fluctuations. The results of operations for the stated periods are not necessarily indicative of results to be expected for the full year.

Net income for the six months ending February 29, 2004 increased by \$11.7 million when compared to the first six months of the prior year.

This was primarily due to an increase in **income** from real estate sales for the six months ended February 29, 2004 when compared to the six months ended February 28, 2003 (\$19.5 million vs. \$0.6 million during the first six months of fiscal 2004 and 2003, respectively).

Income from operations decreased to \$484 thousand for the first six months of fiscal 2004, compared to \$1.2 million for the first six months of fiscal 2003. The increase was largely due to an increase in general and administrative expenses due to \$1.4 million of stock options vesting in the second quarter commensurate with a change in control.

Earnings from agricultural activities approximated the prior year (\$1.7 million vs. \$1.6 million for the second quarter, and \$2.1 million during the first six months of both fiscal 2004 and 2003, respectively). **For a detailed discussion of agricultural operating results please see below.**

Citrus

The citrus division reported a profit of \$506 thousand for the second quarter of fiscal 2004, vs. a profit of \$369 thousand for the second quarter of fiscal 2003. The Citrus division recorded a loss of \$394 thousand for the first six months of fiscal 2004, compared to \$410 thousand profit during the first six months of fiscal 2003. The current year's Florida orange crop has been forecasted to be the largest on record. As of February 29, 2004, it appears that the projection will be significantly correct. Accordingly, citrus prices have declined (**\$4.21 vs. \$4.83 average price per box at February 29, 2004 and February 28, 2003, respectively.**). In light of this, the Company recorded a valuation allowance of \$722 thousand against the unharvested fruit crop during the first quarter of fiscal 2004.

Sugarcane

Sugarcane earnings were \$1.2 million for both the second quarter of fiscal 2004 and 2003. Sugarcane earnings were \$1.7 million for the six months ending February 29, 2004 and the six months ended February 28, 2003.

Ranching

Ranch earnings during the second quarter of fiscal 2004 approximated those of the second quarter of prior year (\$89 thousand vs. \$121 thousand for the second quarter of fiscal 2004 and 2003, respectively). For the first six months of fiscal 2004, ranch earnings have increased when compared to the same period a year ago (\$813 thousand vs. \$25 thousand for the six months ended February 29, 2004 and February 28, 2003 respectively). Cattle prices have averaged significantly higher during fiscal 2004 than in fiscal 2003 (**\$.93 vs. \$.69 per pound for the first six months of fiscal 2004 and 2003, respectively**), and is the primary cause of the increase.

During December 2003, a cow in Washington State tested positive for bovine spongiform encephalopathy (BSE a/k/a "mad cow disease").

This has caused some foreign countries to ban beef imports from the United States. Although there have been price declines since the BSE discovery, the incident appears to be isolated and beef prices are still well above prior year levels. The Company has no reason to believe its beef herd is subject to any risk from this disease.

General Corporate

The Company is continuing its marketing and permitting activities for its land that surrounds Florida Gulf Coast University in Lee County, Florida. There are sales contracts in place for all this property, totaling \$138.4 million. The agreements are at various stages in the due diligence process with closing dates expected over the next two years. The contracts are subject to various contingencies and there is no assurance that they will close.

The Company formed Agri-Insurance Company, Ltd. (Agri) a wholly owned subsidiary, during July of 2000. The insurance company was initially capitalized by transferring cash and approximately 3,000 acres of the Lee County property. Through Agri, the Company has been able to underwrite previously uninsurable risk related to catastrophic crop and other losses. The coverages currently underwritten by Agri will indemnify insureds for the loss of the revenue stream resulting from a catastrophic event that would cause a grove to be replanted. To expedite the creation of the capital liquidity necessary to underwrite the Company's exposure to catastrophic losses, another 5,600 acres were transferred during fiscal 2001. Agri underwrote a limited amount of coverage for Ben Hill Griffin, Inc. during fiscal years 2001 - 2004, and in August 2002, Agri began insuring the Alico, Inc., citrus groves. As Agri gains underwriting experience and increases its liquidity, it will be able to increase its insurance programs. Due to Agri's limited operating history, it would be difficult, if not impossible, to speculate about the impact that Agri could have on the Company's financial position, results of operations and liquidity in future periods. Since the coverages that have been written, as liquidity has been generated, are primarily for the benefit of Alico, the financial substance of this venture is to insure risk that is inherent in the Company's existing operations.

During the third quarter of fiscal 2003, the Company entered into a limited partnership with Agri to manage Agri's real estate holdings.

Agri transferred all of the Lee County property and associated sales contracts to the limited partnership, Alico-Agri, Ltd (Alico-Agri) in return for a 99% partnership interest. Alico, Inc. transferred \$1.2 million cash for a 1% interest. The creation of the partnership allows Agri to concentrate solely on insurance matters while utilizing Alico's knowledge of real estate management.

In the fourth quarter of fiscal 2003, the Company, through Alico-Agri, completed the sale of 313 acres in Lee County, Florida to Airport Interstate Associates, LLC. The sales price was \$9.7 million and resulted in a gain of \$8.7 million. Additionally, Alico-Agri completed the sale of 40 acres in Lee County, Florida to University Club Apartments/Gulf Coast, LLC. The sales price of the property was \$5.5 million and generated a gain of \$4.7 million.

During the fourth quarter of fiscal 2003, the Company sold 358 acres in Hendry County, Florida for \$669 thousand. The sale generated a gain of \$335 thousand. Additionally, the Company sold 266 acres in Polk County, Florida for \$617 thousand, generating a gain of \$612 thousand.

During the second quarter of fiscal 2004, the Company, through Alico-Agri, completed the sale of 244 acres in Lee County, Florida. The sales price was \$30.9 million and resulted in a gain of \$19.7 million. The sale generated \$20.9 million cash with the remaining \$10 million held in the form of a mortgage receivable due in December 2004.

Off Balance Sheet Arrangements

The Company has no off balance sheet arrangements that have, or are reasonably likely to have any material impact on the Company's current or future financial condition, revenues, or results of operations.

13

Critical Accounting Policies and Estimates

The preparation of the Company's financial statements and related disclosures in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. On an on-going basis, management evaluates the estimates and assumptions based upon historical experience and various other factors and circumstances. Management believes that the estimates and assumptions are reasonable in the circumstances; however, actual results may vary from these estimates and assumptions under different future circumstances. The following critical accounting policies that affect the more significant judgments and estimates used in the preparation of our consolidated financial statements are discussed below.

Alico records inventory at the lower of cost or market. Management regularly assesses estimated inventory valuations based on current and forecasted usage of the related commodity and any other relevant factors that affect the net realizable value.

Based on fruit buyers and processors' advances to growers, stated cash and futures markets combined experience in the industry, management reviews the reasonableness of the citrus revenue accrual. Adjustments are made throughout the year to these estimates as relevant information regarding the citrus market becomes available. Fluctuation in the market prices for citrus fruit has caused the Company to recognize additional revenue from the prior year's crop totaling \$187 thousand during fiscal 2004 and \$196 thousand in fiscal 2003.

In accordance with Statement of Position 85-3 "Accounting by Agricultural Producers and Agricultural Cooperatives", the cost of growing crops (citrus and sugarcane) are capitalized into inventory until the time of harvest. Once a given crop is harvested, the related inventoried costs are recognized as cost of sales to provide an appropriate matching of costs incurred with the related revenue earned. The inventoried cost of each crop is then compared with the estimated net realizable value (NRV) of the crop and any costs in excess of the NRV are immediately recognized as cost of sales.

Cautionary Statement

Readers should note, in particular, that this Form 10-Q contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), that involve substantial risks and uncertainties. When used in this document, or in the documents incorporated by reference herein, the words "anticipate", "believe", "estimate", "may", "intend" and other words of similar meaning, are likely to address the Company's growth strategy, financial results and/or product development programs. Actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained herein. The considerations listed herein represent certain important factors the Company believes could cause such results to differ. These considerations are not intended to represent a complete list of the general or specific risks that may effect the Company. It should be recognized that other risks, including general economic factors and expansion strategies, may be significant, presently or in the future, and the risks set forth herein may affect the Company to a greater extent than indicated.

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk

No changes

ITEM 4. Controls and Procedures

Evaluation of disclosure controls and procedures

The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's

12

disclosure controls and procedures as of February 29, 2004 pursuant to Exchange Act Rule 13a-15 and 15d-15. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic Securities and Exchange Commission filings. No significant deficiencies or material weaknesses in the Company's disclosure controls and procedures were identified in the evaluation and therefore, no corrective actions were taken.

Changes in internal controls

There were no significant changes in the Company's internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation.
